Thus far we have seen little that is objectionable in the condition of Hebrew servants. In respect to marriage there were some peculiarities which, to our ideas, would be regarded as hardships. A master might, for instance, give a wife to a Hebrew servant for the time of his servitude, the wife being in this case, it must be remarked, not only a slave but a non-Hebrew. Should he leave when his term has expired, his wife and children would remain the absolute property of the master (Ex. xxii. 5). The regulation in this regard is evidently, that the children of a female heathen slave were slaves; they inherited the mother's dispossession. Such a condition of marrying a slave would be regarded as an axiom by a Hebrew, and the case is only incidentally noticed. Again, a father might sell his young daughter to a Hebrew, with a view either of [his] marrying her himself, or of [his] giving her to his son (Ex. xxx. 7-9). It diminishes the apparent harshness of this proceeding if we look on the purchase-money as in the light of a dowry given, as was not unusual, to the parents of the bride; still more, if we accept the Rabbinical view (which, however, we consider very doubtful) that the consent of the maid was required before the marriage could take place. But even if this consent was not obtained, the paternal authority would not appear to be violently strained; for among ancient nations that authority was generally held to extend even to the life of a child, much more to the giving of a daughter in marriage. The position of a maiden thus sold by her father was subject to the following regulations: (1.) She could not go out as the men-servants do, i.e. she could not leave at the termination of servitude, or in the year of Jubilee, if (as the regulation assumes) her master was willing to fill up the object for which he had purchased her. (2.) Should he not wish to marry her, he should call upon her friends to procure her release by the repayment of the purchase-money (perhaps, as in other cases, with a deduction for the value of her services).

(3.) If he betrothed her to his son, he was bound to make such provision for her as he would for one of his own daughters. (4.) If either he or his son, having married her, took a second wife, it should not be to the prejudice of the first. (5.) If neither of the three first specified alternatives took place, the maid was entitled to immediate and gratuitous liberty (Ex. xxi. 7-11).

The condition of reducing Hebrews to servitude appears to have fallen into disuse subsequently to the Babylonian Captivity. The attempt to enforce it in Nehemiah's time met with decided resistance (Neh. v. 5), and Herod's enactment that thieves should be sold to foreigners, raised the greatest animosity (Joseph. Ant. xvi. 1, § 1). Vast numbers of Hebrews were reduced to slavery as war-captives at different periods by the Phoenicians (Joseph. Ant. iii. 6), the Philistines (Joseph. Ant. iii. 6; Am. i. 9), the Syrians (1 Macc. iii. 41; 2 Macc. viii. 11), the Egyptians (Joseph. Ant. xii. 2, § 3), and, above all, by the Romans (Joseph. B. J. vi. 9, § 3). We may form some idea of the numbers reduced to slavery by war from the single fact that Nicander calculated on realizing 2000 talents in one campaign by the sale of captives at the rate of 90 for a talent (2 Macc. viii. 10, 11), the usual or required to fetch the sum being 180000. The Phoenicians were the most active slave-dealers of ancient times, purchasing the Philtines (Am. i. 9), of the Syrians (2 Macc. viii. 11), and even of the tribes on the shores of the Euxine Sea (Ex. xviii. 5), and selling them wherever they could find a market. We know but little about the shores of the Mediterranean, and particularly in Joel's time to the periphery of Phoenicia (Joel iii. 6), it being uncertain whether that name represents a place in South Arabia or the Greeks of Asia Minor and the peninsulas. It was probably through the Tyrians that Jews were transported in Obadiah's time to Seiphard or Sards (Ob. 29).

At Rome vast numbers of Jews emerged from the state of slavery and became freemen. The price at which the slaves were offered by Nicander was considerably below the ordinary value either in Palestine or Greece. In the former country it stood at 30 shillings (about £3 3s.), as stated below, in the latter at about £1 12s. (about £1 16s.), this being the mean between the extremes stated by Xenophon (Mem. ii. 3, § 2) as the ordinary price at Athens. The price at which Nicander offered them was £2 2s. 6d., a head.

---

a In the A. V. the sense of obligation is not conveyed; instead of "may" in vv. 48, 49, should be substituted.

b The female slave was in this case termed הָאֶלּוּא (eluel), applied to the ordinary household slave. The distinction is marked in regard to Hagar, who is described by the latter term before the birth of Ishmael, and by the former after that event (comp. Gen. xxxi. 1, xxx. 10). The relative value of the terms is expressed in Abigail's address, "Let thine handmaid (amor) be a servant (sippakim) to wash," etc. (1 Sam. xiv. 11).
Occasionally slaves were sold as high as a talent (£240 15s.) each (Gen. ix. 1; Joseph. Ant. xii. 4, § 9).

The majority of non-Jewish slaves were war-captives, either the Canaanites who had survived the general extermination of their race under Joshua, or such as were conquered from the other surrounding nations (Num. xxxi. 26 ff.). Besides these, many were obtained by purchase from foreign slave-dealers (Lev. xiv. 44, 45); and others may have been resident foreigners who were reduced to this state either by poverty or crime. The Rabbinists further deemed that any person who performed the services of a slave became ipso facto a slave (Mishn. Kollek, 1, § 3). The children of slaves remained slaves, being the class described as "born in the house" (Gen. xiv. 14, xvii. 12; Exod. ii. 7), and hence the number was likely to increase as time went on. The only statement as to their number applies to the post-Babylonian period, when they amounted to 1,357, or about 1 to 6 of the population (Ex. xii. 36). We have reason to believe that the number diminished subsequently to this period, the Pharisees in particular being opposed to the system. The average value of a slave appears to have been thirty shekels (Ex. xxxii. 22), varying of course according to age, sex, and capabilities.

The estimation of persons given in Lev. xxv. 28 probably applies to war-captives who had been dedicated to the Lord, and the price of their redemption would in this case represent the ordinary value of such slaves.

2. That the slave might be manumitted, appears from Ex. xxi. 26, 27; Lev. xiv. 20. As to the methods by which this might be effected, we are told nothing in the Bible; but the Rabbinists specify the following four methods: (1) redemption by a money payment, (2) a bill or ticket of freedom, (3) testamentary disposition, or, (4) any act that implied manumission, such as making a slave one's heir (Mielziner, pp. 65, 66).

3. The slave is described as the "possession" of his master, apparently with a special reference to the power which the latter had of disposing of him to the use he would make of him; and no other article of personal property (Lev. xxv. 45, 46); the slave is also described as his master's "money" (Ex. xxi. 21), i. e., as representing a certain money value. Such expressions show that he was regarded very much in the light of a nuncupator or chattel. But on the other hand, provision was made for the protection of his person: willful murder of a slave entailed the same punishment as in the case of a free man (Lev. xxiv. 17, 22). So again, if a master inflicted so severe a punishment as to cause the death of his servant, he was liable to a penalty, the amount of which probably depended on the circumstances of the case, for the Rabbinical view that the words "be shall be surely punished," or, more correctly, "it is to be avenged," imply a sentence of death is wholly untenable (Ex. xxi. 20). No punishment at all was imposed if the slave survived the punishment by a day or two (Ex. xxi. 21), the loss of the slave being regarded as a sufficient punishment in this case. A minor personal injury, such as the loss of an eye or a tooth was to be recompensed by giving the servant his liberty (Ex. xxi. 26, 27).

The general treatment of slaves appears to have been gentle — occasionally too gentle, as we infer from Solomon's advice (Prov. xxix. 19, 21), nor do we hear more than twice of a slave running away from his master (1 Sam. xiv. 10; 1 K. ii. 30). The slave was considered by a conscientious master as entitled to justice (Job xxx. 13-15) and honorable treatment (Prov. xxix. 10). A slave, according to the Rabbinists, had no power of acquiring property for himself; whatever he might become entitled to, even by way of compensation for personal injury, reverted to his master (Mielziner, p. 55). On the other hand, the master might constitute him his heir either wholly (Gen. xiii.), or jointly with his children (Prov. xvii. 2); or again, he might give him his daughter in marriage (1 Chr. ii. 35). The position of the slave in regard to religious privileges was favorable. He was to be circumcised (Gen. xvii. 12), and hence was entitled to partake of the Paschal sacrifice (Ex. xii. 44), as well as of the other religious festivals (Deut. xii. 12, 18, xvi. 11, 14). It is implied that every slave must have been previously brought to the knowledge of the true God, and to a willing acceptance of the tenets of Judaism. This would naturally be the case with regard to all who were "born in the house," and who were to be circumcised at the usual age of eight days; but it is difficult to understand how those who were "bought with money," as adults, could be always induced to change their creed, or how they could be circumcised without having changed it. The Mosaic Law certainly presupposes an universal acknowledgment of Jehovah within the limits of the Promised Land, and would therefore enforce the dismissal or extermination of slaves who persisted in heathenism.

The occupations of slaves were of a menial character, as implied in Lev. xxi. 29, consisting partly in the work of the house, and partly in personal attendance on the master. Female slaves, for instance, ground the corn in the handmill (Ex. xi. 5; Job xxxi. 10; xvii. 2), or gleaned in the harvest field (Ruth ii. 8). They also laked, washed, cocked, and nursed the children (Mishn. Geh. x. § 5). The occupations of the men are not specified; the most trustworthy held confidential posts, such as that of steward or major-domo (Gen. xx. 14, xxiv. 2), of tutors to sons (Prov. xvii. 2), and of tenants to persons of large estates, such as is the case of Ziba (2 Sam. xi. 2, 10).

SLIME. The rendering in the A. V. of the Heb. מַדַּשׁ, chéndwr, the מַדַּשׁ (Hommar) of the

There was an apparent disproportion between this and the following regulation, arising probably out of the different circumstances under which the injury was inflicted. In this case the law is speaking of grievous punishment "with a rod," in the next case of violent assault.
Arabs, translated ἀσφαλτος by the LXX, and Bitumen in the Vulgate. That our translators understood by this word the substance now known as bitumen, is evident from the following passages in Holland's Pliny (ed. 1634): "The very clammy slime Bitumen, which at certain times of the year flatted and swimmèt upon the lake of Sodöm, called Asphaltes in Jūrwy" (vii. 15, vol. i. p. 163). "The Bitumen whereof I speak, is in some places in manner of a muddy slime; in others, very earth or mineral" (xxv. 10, vol. ii. p. 277.)

The three instances in which it is mentioned in the O. T. are abundantly illustrated by travellers and historians, ancient and modern. It is first spoken of as used for cement by the builders in the plain of Shinar, or Babylon (Gen. xi. 3). The bitumen pits in the vale of Siddim are mentioned in the ancient fragment of Canaanitic history (Gen. xiv. 10); and the ark of purpurn in which Moses was placed was made impervious to water by a coating of bitumen and pitch (Ex. ii. 3).

Herodotus (i. 179) tells us of the bitumen found at Is, a town of Babylonia, eight days’ journey from Babylon. The captive Eusebians (Her. vi. 119) were sent by Darius to collect asphaltum, salt, and other abrasives, a place two hundreds and sixty stadia from Susi, in the district of Cissia. The town of Is was situated on a river, or small stream, of the same name, which flowed into the Euphrates, and carried down with it the lumps of bitumen, which was used in the building of Babylon. It is probably the bitumen springs of Is which are described in Strabo (vii. 745). "Eratosthenes, whom he quotes, says that the liquid bitumen, which is called naphtha, is found in Susiana, and the dry in Babylonia. Of the latter there is a spring near the Euphrates, and when the river is flooded by the melting of the snow, the spring also is filled and overflows into the river. The masses of bitumen thus produced are fit for buildings which are made of baked brick. Diodorus Siculus (ii. 12) speaks of the abundance of bitumen in Babylonia. It proceeds from a spring, and is gathered by the people of the country, not only for building, but when dry for fuel, instead of wood. Annamius Marcellinus (xxiii. 6, § 23) tells us that Babylon was built with bitumen by Semiramis (comp. Plin. xxxv. 51; Berosus, quoted by Jos. Ant. x. 11, § 1, c. Apion. i. 19; Arrian, Exp. A. vii. 17, § 1, (c.).

The town of Is, mentioned by Herodotus, is with doubt the modern Hit or Hest, on the west or right bank of the Euphrates, and four days’ journey, N. W., or rather W. N. W., of Bagdad (Sir R. Ker Porter’s Trac. ii. 361, ed. 1822). The principal bitumen pit at Hest, says Mr. Rich (Morais on the Rains of Bible, p. 63, ed. 1815), has two sources, and is divided by a wall in the centre, being on the higher plains, and therefore drier regions.” This view is indirectly confirmed by Mr. Rich, who says that the tenacity of bitumen bears no proportion to that of mortar. The use of bitumen appears to have been confined to the Babylonians, for at Nineveh, Mr. Layard observes (Niv. ii. 278), “bitumen and reeds were not employed to cement the layers of bricks, as at Babylon; although both materials are to be found in abundance in the basaltic country of the Tigris.” At Ninroud bitumen was found under a pavement (Niv. i. 29), and “the sculpture rested simply upon the platform of sun-dried bricks without any other substructure, a mere layer of bitumen, about an inch thick, having been placed under the plinth” (Niv. of Bib. p. 288). In his description of the firing of the bitumen pits at Ninroud by his Arabs, Mr. Layard falls into the language of our translators—“Tongues of flame and jets of gas, driven from the burning pit, shot through the murky canopy. As the fire brightened, a thousand fantastic forms of light played amid the smoke. To break the cinder crust, and to bring fresh slime to the surface, the Arabs throw large stones into the spring. In an hour the bitumen was exhausted for the time, the dense smoke gradually died away, and the pale light of the moon again shone over the black slime pits” (Niv. of Bib. p. 292).

The bitumen of the Dead Sea is described by Strabo, Josephus, and Pliny. Strabo (xvi. 762) gives an account of the volcanic action by which the bottom of the sea was disturbed, and the bitumen thrown to the surface. It was at first liquidated by the heat, and then changed into a thick viscous substance by the cold water of the sea, on the surface of which it thuntof in aumps (Σαλων). Theseumps are described by Josephus (B. J. iv. 8, § 4) as of the size and shape of a headless ox (comp. Plin. vii. 13). The semi-liquid kind of bitumen is that which Pliny says is found in the Dead Sea, the earthy in Syria about Sidon. Liquid bitumen, such as the Zacynthian, the Babylonian, and the Apolloniac, he adds, is known by the Greeks by the name of pis-asphaltum (comp. Ex. ii. 3, LXX.). He tells us moreover that it was used for cement, and that bronze vessels and statues and the heads of nails were covered with it (Plin. xxxv. 51). The bitumen pits by the Dead Sea are described by the monk Hieronymus (Descri. Terr. Syriae, etc., ed. 1844). The Arabs of the neighborhood have perpetuated the story of its formation as given by Strabo. "They say that it forms on the rocks in the depths of the sea, and by earthquakes or other submarine conccusions is broken off in large masses, and rises to the surface” (Thomson, Land and Book, p. 223). They told Burgkhardt a similar tale. "The asphaltum (καρπον), Hommeur, which is collected by the Arabs of the western shore, is said to come from a mountain which blocks up the passage along the eastern shore, and which is situated at about two hours south of the town of Jericho. The mass oozes up from fissures in the cliff, and collects in large pieces on the rock below, where the mass gradually increases and hardens, until it is rent asunder by the heat of the sun, with a loud explosion, and, falling into the sea, is carried by the waves in considerable quantities to the opposite shores.” (Proc. in Tyryn, p. 264). Dr. Thomson tells us that the Arabs still call these spots the bayret bittume, which strikingly resembles the Heb. biblical chomar of Gen. xiv. 10 (Levi and Book, p. 224).

Strabo says that in Babylonia boats were made of wicker-work, and then covered with bitumen to
SLING

keep out the water (xvi. p. 743). In the same way the ark of rushes or papyrus in which Moses was placed was plastered over with a mixture of bitumen and pitch or tar. Dr. Thomson remarks (p. 224): "This is doubtless interesting, as it reveals the process by which they prepared the bitumen. The mineral, as found in this country, melts readily enough by itself; but then, when cold, it is as brittle as glass. It must be mixed with tar while melting, and in that way forms a hard, gummy wax, perfectly impervious to water." We know from Strabo (vii. p. 764) that the Egyptians used the bitumen of the Dead Sea in the process of embalming, and Pliny (vi. 55) mentions a spring of the same mineral at Carmel in Ethiopia.

W. A. W.

SLING (σφερόμαχον; fuscus). The sling has been in all ages the favorite weapon of the shepherds of Syria (1 Sam. xvii. 40; Bunkardt's Notes, i. 57), and hence was adopted by the Israelitish armies as the most effective weapon for light-armed troops. The Benjamites were particularly expert in their use of it: even the left-handed could "sling stones at a height and not miss" (Judg. xx. 16; comp. 1 Chr. xii. 2). According to the Tar-gum of Jonathan and the Syriac, it was the weapon of the Cherebites and Pelchites. It was advantageously used in attacking and defending towns (2 K. iii. 25; Joseph. B. J. iv. 1, § 2), and in skirmishing (B. J. ii. 17, § 5). Other eastern nations made themselves of it, as the Syrians (1 Macc. ix. 11), who also invented a kind of artificial sling (1 Macc. vi. 51); the Assyrians (Jud. ix. 7; Layard's Nin. ii. 344); the Egyptians (Wilkinson, i. 357); and the Persians (Xen. Anc. iii. 3, § 18). The construction of the weapon hardly needs description: it consisted of a couple of strings of

Egyptian Slingers. (Wilkinson.)

new or some fibrous substance, attached to a lateral receptacle for the stone in the centre, which was termed the cuph, a i.e. pan (1 Sam. xxx. 21): the sling was swung once or twice round the head, and the stone was then discharged by letting go one of the strings. Sling-stones b were selected for their smoothness (1 Sam. xvii. 40), and were recognized as one of the ordinary munitions of war (2 Chr. xxvii. 14). In action the stones were either carried in a bag round the neck (1 Sam. xvii. 40), or were heaped up at the feet of the combatant (Layard's Nin. ii. 344). The violence with which the stone was projected supplied a vivid image of sudden and forcible removal (Jer. x. 18). The rapidity of the whirling motion of the sling round the head was emblematic of iniquity (27. xxv. 29, "the souls of thine enemies shall be whirled round in the midst of the pan of a sling"); while the sling-stones represented the enemies of God (Zech. ix. 13, "they shall tread under foot the sling-stones"). The term ἄγαραμα in Prov. xxv. 8 is of doubtful meaning; Gesenius (Thes. p. 1283) explains of "a heap of stones," as in the margin of the A. V., the LXX., Ewald, and Hitzig, of "a sling," as in the text. W. L. B.

* SLUICES. The word so translated (σφερόμαχον) in Is. xix. 10 seems to have been entirely misapplied by our English translator, after the example of some of the ancient versions. It means here, weapons, and the last clause of the verse should be rendered, "and all those who work for wages shall be of a sad heart." On the origin of the error and the true meaning, see Gesenius (Comm. a. den Jesaia, in loc.).

B. D. C. B.

SMITH. The work of the smith, together with an account of his tools, is explained in HANDICRAFT, vol. ii. p. 592 f. A description of a smith's workshop is given in Ezekiel xxxviii. 28 H. W. P.

SMYRNA (Σμύρνα, Smyrne). The city to which allusion is made in Revelation ii. 8-11, was founded, or at least the design of founding it was entertained, by Alexander the Great soon after the battle of the Granicus, in consequence of a dream when he had lain down to sleep after the fatigue of hunting. A temple in which two goddesses were worshipped under the name of Nemesis stood on the hill, on the sides of which the new town was built under the auspices of Antigonus and Lysimachus, who carried out the design of the conqueror after his death. It was situated twenty stades from the city of the same name, which after a long series of wars with the Lydians had been finally taken and sacked by Halysites. The rich lands in the neighborhood were cultivated by the inhabitants, scattered in villages about the country (like the Jewish population between the times of Zebediah and Ezra), for a period which Strabo, speaking roundly, calls 400 years. The descendants of this population were reunited in the new Smyrna, which soon became a wealthy and important city. Not only was the soil in the neighborhood eminently productive — so that the vines were even said to have two crops of grapes — but its position was such as to render it the natural outlet for the produce of the whole valley of the Hermus. The Prunneum wine (which Nestor in the Iliad, and Circe in the Odyssey, are represented as mixing with honey, cheese, and meal, to make a

2. σφερόμαχον: wallclaster: a hammerer.

a term applied to Tubal-Cain, Gen. iv. 22 (Gen. pp 530, 755; Saislachitz, Arch. Klo. i. 143). [Tubal- Cain].

3. Σμύρνα: ἀ πετρα: he that smites (the anvli
SMYRNA

kind of salad dressing) grew even down to the time of Pliny in the immediate neighborhood of the temple of the Mother of the gods at Smyrna, and doubtless played its part in the orgiastic rites both of that deity and of Dionysus, each of whom in the times of Imperial Rome possessed a guild of worshippers frequently mentioned in the inscriptions as ίερά άύνυσι μοστάρι κατάριον Ἑπνων and the ίερα άύνυσι μοστάρι κατ' Τικτίτων Διόνυσου. One of the most remarkable of the chei'd'αυνυνήν of Myron which stood at Smyrna, representing an old woman intoxicated, illustrates the prevalent habits of the population.

The inhabitants of New Smyrna appear to have possessed the talent of successfully divining the course of events in the troublous times through which it was their destiny to pass, and of habitually securing for themselves the favor of the victor for the time being. Their adulation of Seleucus and his son Antiochus was excessive. The title διόθετ καὶ σωτήρ is given to them in an extant inscription; and a temple dedicated to his mother Stratonice, under the title of Ἀρμοδίη τῷ Στρατονίς, was not only constituted a sanctuary itself, but the same right was extended in virtue of it to the whole city. Yet when the tide turned, a temple was erected to the city Rome as a divinity in time to save the credit of the Smyrneans as zealous friends of the Roman people. Indeed, though history is silent as to the particulars, the existence of a coin of Smyrna with the head of Mithridates upon it, indicates that this energetic prince also, for a time at least, must have included Smyrna within the circle of his dependencies. However, during the reign of Tiberius, the reputation of the Smyrneans for an ardent loyalty was so unimpaired, that on this account alone they obtained permission to erect a temple, in behalf of all the Asiatic cities, to the emperor and senate, the question having been for some time doubtful as to whether their city or Sardis [SARDIS] — the two selected out of a crowd of competitors — should receive this distinction. The honor which had been obtained with such difficulty, was required with a proportionate adulation. Nero appears in the inscriptions as σωτήρ τῶν πολεμίων Ἀρμοδίε τῆς γένους.

The Castle and Port of Smyrna. (Labord.)

It seems impossible, that just as St. Paul's illustrations in the Epistle to the Corinthians are derived from the Isthmian games, so the message to the Church in Smyrna contains allusions to the ritual of the pagan mysteries which prevailed in that city. The story of the violent death and re-viviscence of Dionysus entered into these to such an extent, that Origen, in his argument against Celus, does not scruple to quote it as generally accepted by the Greeks, although by them interpreted metaphysically (iv. 171, ed. Spencer). In this view, the words &omicr; πρῶτος καὶ οὐ&omicr;κατος, δι&omicr; ἐγένετο με&omicr;ρος καὶ ἐξε&omicr;σε (Rev. ii. 8) would come with peculiar force to ears perhaps accustomed to hear them in a very different application. The same may be said of δι&omicr;σων σε τ&omicr;ν στέ&omicr;φανον τ&omicr;ς τ&omicr;ς ζω&omicr;ς, it having been a usual practice at Smyrna to present a crown to the priest who superintended the religious ceremonial at the end of his year of office. Several persons of both sexes have the title of στρατονί&omicr;ς in the inscriptions; and the context shows that they possessed great social consideration.

In the time of Strabo the ruins of the Old Smyrna still existed, and were partially inhabited, but the new city was one of the most beautiful in all Asia. The streets were laid out as near as might be at right angles; but an unfortunate oversight of the architect, who forgot to make underground drains to carry off the storm rains, occasioned the flooding of the town with the filth and refuse of the streets. There was a large public library there, and also a handsome building surrounded with porticoes which served as a museum. It was consecrated as a hermion to Homer, whom the Smyrneans claimed as a countryman. There was also an Odeum, and a temple of the Olympian Zeus, with whose exit that of the Roman emperors was associated. Olympian games were celebrated here, and excited great interest. On one of these

---

1 This is the more likely from the superstitious regard in which the Smyrneans held chance phrases (ἐλάφον) as a material for augury. They had a καιρός (kairos) just above the city outside the walls, in which this mode of divination was the ordinary one (Thuc. xii. 11, § 7).
occasions (in the year A. D. 68) a Rhodian youth of the name of Artemidorus obtained greater distinctions than any on record, under peculiar circumstances, which Pausanias relates. He was a panarist, and not long before he had been driven at Elis from deficiency in growth. But when the Smyrnaean Olympic next came round, his bodily strength had so developed that he was victor in three trials on the same day, the first against his former competitors at the Peloponnesian Olympia, the second with the youths, and the third with the men: the last contest having been provoked by a taunt (Pausanias, v. 14, § 4). The extreme interest excited by the games at Smyrna may perhaps account for the remarkable facility exhibited by the population against the aged bishop Polycarp.

It was exactly on such occasions that what the pagans regarded as the unpatriotic and anti-social spirit of the early Christians became most apparent; and it was to the violent demands of the people assembled in the stadium that the Roman proconsul yielded up the martyr. The letter of the Smyrnaeans, in which the account of his martyrdom is contained, represents the Jews as taking part with the Gentiles in accusing him as an enemy to the state religion,—conduct which would be inconceivable in a sincere Jew, but which was quite natural in those whom the sacred writer characterizes as "a synagogue of Satan" (Rev. ii. 9).

Smyrna under the Romans was the seat of a conventus juridicon, whether law cases were brought from the citizens of Magnesia on the Siphus, and also from a Macedonian colony settled in the same country under the name of Hyrcanii. The last are probably the descendants of a military body in the service of Seleucids, to whom lands were given soon after the building of New Smyrna, and who, together with the Magnesians, seem to have had the Smyrnaean citizenship then bestowed upon them. The decree containing the particulars of this arrangement is among the marbles in the University of Oxford. The Romans continued the system which they found existing when the country passed over into their hands. (Strabo, xiv. 183 ff. : Herodotus, i. 10; Tacitus, Ann. iii. 63, iv. 56; Pliny, H. N. v. 29; Boeckh, Inscription. Græc. "Smyrna Inscriptions," especially Nos. 213, 216; Pausanias, ii. cit., and iv. 21, § 5; Macrobius, Saturni. i. 13; [Prot. G. M. Lane, art. Smyrna, in Bibl. Sacra for Jan. 1858.])

* Smyrna is about 40 miles from Ephesus, and now connected with it by a railroad. [Ephesus, Amer. ed.] The Apostle John must often have passed between the two places during his long life at Ephesus. Paul's ministry at Ephesus (Acts xx. 31) belongs no doubt to an earlier period, before the gospel had taken root in the other city. The spot where Polycarp is supposed to have been burnt at the stake is near the ruins of a stadium on the hill behind the present town. It may be the exact spot or certainly near there, for it is the place where the people were accustomed to meet for public spectacles. Ignatius, Bishop of Antioch, touched at Smyrna on his voyage to Rome, where he was thrown to wild beasts in the amphitheatre, about A. D. 108. Two of his extant letters were addressed to Polycarp and to the Smyrneans. Smyrna is the only one of the cities of the seven churches which retains any importance at the present day. Its population is stated to be 150,000, nearly one half of whom are Mohammedans. On the import of the Savior's message to the Church at Smyrna may be mentioned Stier's Supplement to his Leben Jesu, pp. 129-137, and Archbishop Trench's Commentary on the Epistles to the Seven Churches, pp. 132-162 (Amer. ed.).

H. SNAILE. The representative in the A. V. of the Hebrew words shoceed and chomast.

1. Shochel (שח族自治, καψις; ττρις, Agq. ἄρχων, Syn. : σεσυνοί) occurs only in Ps. viii. 9 (8, A. V.): "As a shocel which melteth (the wicked) pass away." There are various opinions as to the meaning of this word, the most curious, perhaps, being that of Synanachus. The LXX. read "melted wax," similarly the Vulg. The rendering of the A. V. ("snail") is supported by the authority of many of the Jewish Doctors, and is probably correct. The Chaldee Paraph. explains shocel by kółobal (ךלוזלך), i.e. "a snail or a slug," which was supposed by the Jews to consume away and die by reason of its constantly emitting slime as it crawls along. See Schol. ad gen. Med. Katon, 1, fol. 6 B, as quoted by Bochart (Hier. iii. 500) and Gesenius (Thes. p. 212). It is needless to observe that this is not a zoological fact, though perhaps generally believed by the Orientals. The term shocel was touched either by Iomem or a helix, which are particularly noticeable for the slimy track they leave behind them.

2. Chomast (ךומש; χαμψα: αικεττα) occurs only as the name of some unclean animal in Lev. xii. 30. The LXX. and Vulg. understand some kind of lizard by the term; the Arabic versions of Epenisus and Sadasia give the chamaelom as the animal intended. The Veneto-Greek and the Rabins, with whom agrees the A. V., render the Heb. term by "snail." Bochart (Hier. ii. 500) has endeavored to show that a species of small sand lizard, called chelcyra by the Arabs, is denoted: but his argument rests entirely upon some supposed etymological foundation, and proves nothing at all. The truth of the matter is that there is no evidence to lead us to any conclusion; perhaps some kind of lizard may be intended, as the two most important old versions conjecture.

W. H.

* SNAIRES OF DEATH. The rendering of the A. V. in 2 Sam. xxii. 6; Ps. xviii. 5, "The snares of hell compass me about, the snares of death prevented me," needs correction and explanation. The passage may be thus translated: — "The cords of the underworld (Sheol) were cast around me; the snares of death had caught me." The psalmist describes himself, in metaphors borrowed from hunting, as caught in the toils of his enemies, and in imminent danger of his life. A. SNOW (נָמַו; χανών; ἀνάκομος in Prov. xxii. 11). The historical books of the Bible contain only two notices of snow actually falling (2 Sam. xxii. 20; 1 Marc. xii. 22) but the allusions in the poetical books are so numerous that there can be no doubt as to its being an ordinary occurrence in the winter months. Thus, for instance, the snow-storm is mentioned among the ordinary operations of nature which are illustrative of the Creator's power (Ps. calvi. 10, calvi. 8). We have again, notice of the beneficial effect of snow on the soil (Is. iv. 10). Its color is adopted as the "Kosmos"
of brilliancy (Dan. vii. 8; Matt. xxix. 3: Rev. i. 14), of purity (Is. i. 18: Lam. iv. 7, in reference to the white robes of the princes), and of the blanching effects of leprosy (Ex. iv. 6; Num. xii. 10; 2 K. v. 27). In the book of Job we have references to the supposed cleansing effects of snow-water (lx. 30), to the rapid melting of snow under the sun's rays (xxiv. 19), and the consequent flooding of the brooks (vi. 16). The thick fallen of the snow forms the point of comparison in the obscure passage in Ps. lxxviii. 14. The snow lies deep in the ravines of the highest ridge of Lebanon until the summer is far advanced, and indeed never wholly disappears (Robinson, iii. 531); the summit of Hermon also perpetually glitters with frozen snow (Robinson, li. 437). From these sources probably the Jews obtained their supplies of ice for the purpose of cooling their beverages in summer (Prov. xxv. 13). The "snow of Lebanon" is also used as an expression for the refreshing coolness of spring water, probably in reference to the stream of Si- loam (Jer. xviii. 14). Lastly, in Prov. xxxvi. 21, snow appears to be used as a synonym for winter or cold weather. The liability to snow must of course vary considerably in a country of such varying altitude as Palestine. Josephus notes it as a peculiarity of the low plain of Jericho that it was warm there even when snow was prevalent in the rest of the country (B. J. iv. 8, § 3). At Jerusalem snow often falls to the depth of a foot or more in January and February, but it seldom lies (Robinson, i. 420). At Nazareth it falls more frequently and deeply, and it has been observed to fall even in the maritime plain at Joppa and about Carmel (Kitto, Phys. Hist. p. 210). A comparison of the notices of snow contained in Scripture and in the works of modern travellers would, however, lead to the conclusion that snow fell more in ancient times than at the present day. At Damascus, snow falls to the depth of nearly a foot, and lies at all events for a few days (WortPast's Syrie, i. 215, 236). At Aleppo it falls, but never lies for more than a day (Russell, i. 69). W. L. H.

The "time of harvest" (Prov. xxv. 13) answers to our summer rather than the autumn. At Damascus snow procured from Anti-Lebanon is kept for sale in the bazaars during the hot months, and being mixed with the juice of pomegranates, with sherbet and other drinks, forms a favorite beverage. "In the heat of the day," says Dr. Wilson, "the Jews at Hossanah, in northern Galilee, offered us water cooled with snow from Jebel es-Sheikh, the modern Hermion." (Leaves of the Bible, ii. 186). "Countless loads of snow," says Dr. Schutz (Jersalem, eine Vorlesung, p. 10), "are brought down to Jerusalem from the sides of Sannin, one of the highest peaks of Lebanon, to freshen the water, otherwise hardly fit to drink." (See also Volney, Voyage en Egypte et en Syrie, p. 262.)

The practice of using snow in this manner existed also among the Greeks and the Romans. The comparison in the proverb therefore is very significant. The prompt return of the messenger with good tidings refreshes the heart of the anxiously expectant like a cooling draught in the heat of summer.

H.

* SNUFF-DISH. [Censeer; Fire-pan.]

SO (SNUF-DISH) [Egypt. Serecho or Sere, an Egyptian deity, First: Serqet; [Alex. Seth; Comp. Soud:] Seti]. "So king of Egypt" is once mentioned in the Bible. Hoshea, the last king of Israel, evidently intending to become the vassal of Egypt, sent messengers to him, and made no present, as had been the yearly custom, to the king of Assyria (2 K. xiii. 4). The consequence of this step, which seems to have been forbidden by the prophets, who about this period are constantly warning the people against trusting in Egypt and Ethiopia, was the imprisonment of Hoshea, the taking of Samaria, and the carrying captive of the ten tribes.

So has been identified by different writers with the first and second kings of the Ethiopian XXVth dynasty, called by Manetho, Sabakön and Sebi-chus. It will be necessary to examine the chronology of the period in order to ascertain which of these identifications is the more probable. We therefore give a table of the dynasty (see below), including the third and last reign, that of Tirhakah, for the illustration of a later article. [Tirhakah.]

The accession of Tirhaka, the Tirhak of Scripture, may be nearly fixed on the evidence of an Apis-tablet, which states that one of the bulls Apis was born in his 28th year, and died at the end of the 20th of Pashmetichus I. This bull lived more than 20 years, and the longest age of any Apis stated is 25. Supposing the latter duration, which would allow a short interval between Tirhaka and Pashmetichus II, as seems necessary, the accession of Tirhaka would be B.C. 695. If we assign 24 years to the two predecessors, the commencement of the dynasty would be B.C. 719. But it is not certain that their reigns were continuous. The account which Herodotus gives of the war of Semancharib and Sethos suggests that Tirhak was not ruling in Egypt at the time of the destroy-
tion of the Assyrian army, so that we may either conjecture, as Dr. Hince has done, that the reign of Sesothen followed that of Shebetek and preceded that of Taharkah over Egypt (Journ. Soc. Litt., January, 1854), or else that Taharkah was king of Ethiopia while Shebetek, not the same as Sesothen, ruled in Egypt, the former hypothesis being far the more probable. It seems impossible to arrive at any positive conclusion as to the dates to which the mentions in the Bible of So and Taharkah refer, but it must be remarked that it is difficult to place the date of b.c. 721, for the taking of Samaria.

If we adopt the earlier dates So must correspond to Shebetek, if the later, perhaps to Shebetek; but if it should be found that the reign of Taharkah is dated too high, the former identification might still be held. The name Shebetek is nearer to the Hebrew name than Shebetek, and if the Masoretic points do not faithfully represent the original pronunciation, as we might almost infer from the consonants, and the name was Neva or Seva, it is not very remote from Shebetek. We cannot account for the transcription of the LXX.

From Egyptian sources we know nothing more of Shebetek than that he conquered and put to death Bocchoris, the sole king of the XXVIth dynasty, as we learn from Manetho's list, and that he continued the monumental works of the Egyptian kings.

There is a long inscription at El Karnak in which Shebetek speaks of tributes from "the king of the land of Khala (Shaba)," supposed to be Syria. (Brugsch, Histoire d'Egypte, i. 244.) This gives some slight confirmation to the identification of this king with So, and it is likely that the founder of a new dynasty would have endeavored, like Shishak and Psammetichus I., the latter virtually the founder of the XXVIth, to restore the Egyptian supremacy in the neighboring Asiatic countries.

The standard inscriptions of Sargon in his palace at Khorsabad states, according to M. Oppert, that after the capture of Samaria, Hamon king of Gaza, and Sebboth suffian of Egypt, met the king of Assyria in battle at Raphia, Kaphia, and were defeated. Sebboth was then, however, by Shishak, but Hamon was conquered. Pharaoh king of Egypt was then put to tribute. (Les Inscriptions Assyriennes des Sargonides, etc., p. 22.) This statement would appear to indicate that either Shebetek or Shebetek, for we cannot lay great stress upon the seeming identity of name with the former, advanced to the support of Hosenh and his party, and being defeated fled into Ethiopia, leaving the kingdom of Egypt to a native prince. This evidence favors the idea that the Ethiopian kings were not successive.

R. S. P.

SOAP

The Hebrew term bōrith does not in itself bear the sense of a general term for any substance of cleansing qualities. As, however, it appears in Jer. ii. 22, in contradistinction to mērēth, which undoubtedly means "nitre," or mineral alkali, it is fair to infer that bōrith refers to vegetable alkali, or some kind of potash, which forms one of the usual ingredients in our soap. Numerous plants, capable of yielding alkales, exist in Palestine and the surrounding parts; we may notice one named Hubeleth (the palre bätli of botanists), found near the Dead Sea, with glassy, leafless, the ashes of which are called ch-Kali from their strong alkaline properties (Robinson, Bibl. Researches, i. 505); the Ajrom, found near Saini, which when powdered serves as a substitute for soap (Robinson, i. 84); the gilboa, or "soap plant," of Egypt (Wilkinson, ii. 109); and the ashes in the neighborhood of Joppa (Kitt's Phys. Hist. ii. 367). Modern travellers have also noticed the Sapuvoria officinalis and the Mecumdrvdrhoma molliflora, both possessing alkaline properties, as growing in Palestine. From these sources large quantities of alkali have been extracted in past ages, as the heaps of ashes outside Jerusalem and Nobitis testify (Wilkinson, iii. 201, 209), and an active trade in the article is still prosecuted with Aleppo in one direction (Kissell, i. 79), and Arabia in another (Barckhardt, i. 66). We need not assume that the ashes were worked up in the form familiar to us, for no such article was known to the Egyptians (Wilkinson, i. 186). The use of soap among the Hebrews was twofold: (1) for cleansing either the person (Jer. ii. 22; Job xix. 30, where " never so clean," read "with alkali") or the clothes: (2) for purifying metals (Is. i. 25, where for "purely," read "as through alkali"). Hitzig suggests that bōrith should be substituted for bōrith, "covenant," in Ez xx. 37, and Mal. iii. 1. W. L. B.

Soc'h (Soc'h [branches]: Socho, Socoh)

1 Chr. iv. 18. Probably the town of Socoh in Judah, though which of the two cannot be ascertained. It appears from its mention in this list, that it was colonized by a man or a place named Heber. The Targum, playing on the passage after the custom of Hebrew writers, interprets it as referring to Moses, and takes the names Jereb, Soco, Jekuthiel, as titles of him. He was the Rabbah of Soco, because he sheltered ("sā'El") the house of Israel with his virtue."

G.

Soc'h (Soc'h [branches]: Soc'h)

Another form of the name which is more correctly given in the A. V. as Socoh, but which appears therein under no less than six forms. The present one occurs in the list of King Solomon's commissariat districts (1 K. xv. 10), and is therefore probably, though not certainly, the town in the Shebaloth, that being the great corn-growing district of the country. (Socoh, 1.)

Soc'h (Soc'h [see above]).

The name of two towns in the tribe of Judah.

1. (Soc'h: Alex. Socho: Socoh.) In the district of the Shebaloth (Josh. xv. 35). It is a member of the same group with Jarmuth, Azekah, Shinarim, etc. The same relative situation is implied in the other passages in which the place (under slight variations of form) is mentioned. At Ephes-dammim, between Socho and Azekah (1 Sam. xvi. 1), the Philistines took up their position for the memorable engagement in which their champion was slain, and the wounded fell down in the road to Shinarim (ver. 52). Socho, Adullam, Azekah, were among the cities in Judah which Rehoboam fortified after the revolt of the northern tribes (2 Chr. xl. 7), and it is mentioned with others of the original list as being taken by the Philistines (1 Chr. xxvii. 18). In the time of Eisaneth and Jerome (Onomat., "Socho") it bore the name of Soccheth, and lay a The text of the Vat. Ms. is so corrupt as to prevent any name being recognized.
between 8 and 9 Roman miles from Eleutheropolis, on the road to Jerusalem. Paul passed through it on his way from Bethulia (i?) to Egypt (Deir-'Ain, Ep. Pauli, § 14). As is not unfrequently the case in this locality, there were then two villages, an upper and a lower (Onomast.). Dr. Robinson's identification of Socoh with esh-Shuweilekh in the western part of the mountains of Judah is very probable (Bibl. Res. ii. 21). It lies about one mile to the north of the track from Beit 'Ain to Jerusalem, between 7 and 8 English miles from the former.

To the north of it within a couple of miles is Yavo-'nab, the ancient Jarmuth. Dunamis, perhaps Ephedrinumm, is about the same distance to the east, and although Azekah and Sharratim have not been definitely identified, there is no doubt that they were in this neighborhood. To complete the catalogue, the ruins—which must be those of the upper one of Eskeleia's two villages—stand on the southern slope of the Wady es-Suant, which with great probability is the Valley of Elah, the scene of Goliat's death. (See Tller, "Jiste Wanderungen," p. 122.)

No traveller appears to have actually visited the spot, but one of the few who have approached it describes it as "nearly half a mile above the bed of the Wady an expanse of flat ground covered with green fields (in spring), and dotted with gray ruins" (Porter, "Handb. of p. 249 n.).

From this village probably came "Antigonus of Socoh," who lived about the commencement of the 3d century B.C. He was remarkable for being the eldest Jew who is known to have had a Greek name; for being the disciple of the great Simon, son of the Zealot; for being the master of Saodok, the reputed founder of the Sabatai; but most truly remarkable as the author of the following saying which is given in the Mishna ("Pirke Abott., i. 3") as the substance of his teaching, "Be not ye like servants who serve their lord that they may receive a reward. But be ye like servants who serve their lord without hope of receiving a reward, but in the fear of Heaven." Socoh appears to be mentioned, under the name of Socoh, in the Acts of the Council of Nice, though its distance from Jerusalem as there given is not sufficient for the identification proposed above (Reinaul, "Pal. p. 1019.

2. (Socoh: Alex. "Socoh; Socoh.) Also a town of Judah, but in the mountain district (Josh. xv. 48, § It is one of the first groups, and is named in company with Anah, Jattir, Eshtonah, and others. It has been discovered by Dr. Robinson (Bibl. Res. i. 494) in the Wady el-Khalil, about 10 miles S. W. of Hebron; bearing, like the other Socoh, the name of esh-Shuweilekh, and with which Socoh, Semua, "Atir", within easy distance of it. G."

*SOD, the preterite of *seethe; "And Jacob sod pottery," Gen. xxv. 20; and see also 2 Chr. xxxv. 13. H.

In SODDEN, past participle of *seethe" (Ex. xii. 19). [Sop.]

SODI (נָב [a confidant, favorite]: סודָי;)

a Shuweilekh is a diminutive of Shawkh, as Morekilh of Morekh, etc.

b The Keri to this passage reads צדָע, i. e. Socoh.

c It is perhaps doubtful whether the name had not also the form צָעִית, Socoanu, which appears in Gen. x. 19. The suffix may in this case be only the}

[Sod.]. The father of Gadidiel, the spy selected from the tribe of Zebediah (Num. xii. 10).

SODOM (טָוָה לַאִים [i. e. Solar] [see note below]; [ra]. "Sodom: Joseph. pهدソドומאָר: "Sodom:-J.). The name vacillates between singular and plural, noun and adjective. He employs all the following forms, Sodomian, in Sodomian, Schehownian, Sobomian, Sodomian). One of the most ancient cities of Syria, whose name is now a synonym for the most disgusting and opprobrious of vices. It is commonly mentioned in connection with Gomorrah, but also with Admah and Zeboim, and on one occasion (Gen. xiv.) with Bela or Zoar. Sodom was evidently the chief town in the settlement. Its king takes the lead and the city is always named first in the list, and appears to be the most important.

The four are first named in the etiological records of Gen. x. 19, as belonging to the Canaanites: "The border of the Canaanite was from Zidon towards the east unto Azzah; towards Selaon and Amorah, and Admah and Zeboim unto Lasha." The meaning of which appears to be that the district in the hands of the Canaanites formed a kind of triangle—the apex at Zidon, the south-west extremity at Gaza, the southeastern at Lasha. Lasha, it may be remarked in passing, seems most probably located on the Wady Zeker Main, which enters the east side of the Dead Sea, about nine miles from its northern end.

The next mention of the name of Sodom (Gen. xii. 10-13) gives more certain indication of the position of the city. Abram and Lot are standing together between Bethel and Ai (ver. 3), taking, as any spectator from that spot may still do, a survey of the land around and below them. Eastward of them, and absolutely at their feet, is the "circle of Jordan." It was in all its verdant glory, that glory of which the traces are still to be seen, and which is so strangely and irresistibly attractive to a spectator from any of the heights in the neighborhood of Bethel—watered by the copious supplies of the Wady Kelt, the Ain Sultan, the Ain Dik, and the other springs which gush out from the foot of the mountains. These abundant waters even now support a mass of verdure before they are lost in the light, barren soil of the region. But at the time when Abram and Lot beheld them, they were husbanded and directed by irrigation, after the manner of Egypt, till the whole circle was one great oasis — "a garden of Jehovah" (ver. 10). In the midst of the garden the four cities of Sodom, Gomorrah, Admah, and Zeboim appear to have been situated. To these cities Lot descended, and retaining his monad habits amongst the more civilized manners of the Canaanite settlement "pitched his tent" by the chief of the four. At a later period he seems to have been living within the walls of Sodom. It is necessary to notice how absolutely the cities are identified with the district. In the subsequent account of their destruction (Gen. xix.), the toponymical terms are employed with all the precision which is characteristic of such early times. "The Goceir," the "land of the}
SODOM

Ciec,? "The cities of Jordan," recurs again and again both in chaps. xiii. and xiv., and "the cities of the plain" are the common designation of the towns which were destroyed in the catastrophe related in the latter chapter. The mention of the Jordan is conclusive as to the situation of the district, for the Jordan ceases where it enters the Dead Sea, and can have no existence south of that point. But, in addition, there is the mention of the eastward direction from Bethel, and the fact of the perfect manner in which the district north of the Lake can be seen from the central highlands of the country on which Abram and Lot were standing. And there is still further corroboration in Deut. xxxiv. 3, where "the Ciec" is directly connected with Jericho and Zoar, coupled with the statement of Gen. x. already quoted, which appears to place Zoar to the north of Lachish. It may be well to remark here, with reference to what will be named further on, that the southern half of the Dead Sea is invisible from this point: not merely too distant, but shut out by intervening heights.

We have seen what evidence the earliest records afford of the situation of the five cities. Let us now see what they say of the nature of that catastrophe by which they are related to have been destroyed. It is described in Gen. xix. as a shower of brimstone and fire from Jehovah, from the skies — "The Lord rained upon Sodom, and upon Gomorrah, brimstone and fire from the Lord out of heaven; and he overthrew those cities, and the plain, and all the inhabitants of the cities, and that which grew upon the ground; and he smote the smoke of the land as the smoke of a furnace." "It rained fire and brimstone from heaven" (Luke xvii. 29). However we may interpret the words of the earliest narrative one thing is certain, that the lake was not one of the agents in the catastrophe. Further, two words are used in Gen. xix. to describe what happened: שׁמ, to throw down, to destroy (v. 13, 14), and לִשׁ, to overturn (21, 23, 29). In neither of these is the presence of water — the submergence of the cities or of the district in which they stood — either mentioned, or implied. Nor is it implied in any of the later passages in which the destruction of the cities is referred to throughout the Scriptures.

Quite the contrary. Those passages always speak of the district on which the cities once stood, not as submerged, but as still visible, though desolate and uninhabitable. "Brimstone, and salt, and burning . . . not sown, nor heareth, nor any grass groweth therein" (Deut. xxix. 23). "Never to be inhabited, nor dwelt in from generation to generation; where neither Arab should pitch tent nor shepherd make fold" (Is. xxiii. 20). "No man abiding there, nor son of man dwelling in it" (Jer. xlix. 18; l. 40). "A fruitful land turned into saltiness" (Ps. ciii. 31). "Overthrown and burnt" (Amos iv. 11). "The breeling of nettles, and salt pits, and a perpetual desolation" (Zeph. ii. 9).

A waste land that smoketh, and plants bearing fruit which never cometh to ripeness" (Nisv. x. 7). "These people, which may not the ashes" (2 Esdr. ii. 9). "The cities turned into ashes" (2 Pet. ii. 6, where their destruction by fire is contrasted with the Deluge).

In agreement with this is the statement of Josephus (B. J. vi. iv. 8, § 4). After describing the lake, he proceeds: "Adjoining it is Sodomitis, once a blessed region abounding in produce and in cities, but now entirely burnt up. They say that it was destroyed by lightning for the impurity of its inhabitants. And even to this day the relics of the Divine fire, and the traces of five cities are to be seen there, and moreover the ashes reappear even in the fruit." In another passage (B. J. v. 13, § 6) he alludes incidentally to the destruction of Sodom, contrasting it, like St. Peter, with a destruction by water. By comparing these passages with Ant. i. 9, it appears that Josephus believed the vale of Siddim to have been submerged, and to have been a distinct district from that of Sodom in which the cities stood, which latter was still to be seen.

With this agree the accounts of heathen writers, as Strabo and Tacitus; who, however vague their statement may be, are evidently under the belief that the district was not under water, and that the remains of the towns were still to be seen.

From all these passages, though much is obscure, two things seem clear.

1. That Sodom and the rest of the cities of the plain of Jordan stood on the north of the Dead Sea.

2. That neither the cities nor the district were submerged by the lake, but that the cities were overthrown and the land spoiled, and that it may still be seen in its desolate condition.

When, however, we turn to more modern views, we discover a remarkable variance from these conclusions.

1. The opinion long current, that the five cities were submerged in the lake, and that their remains — walls, columns, and capitals — might be still discerned below the water, hardly needs refutation after the distinct statement and the constant implication of Scripture.

Ireland (Pal. p. 257) showed more than two centuries ago how baseless was such a hypothesis, and how completely it is contradicted by the terms of the original narrative. It has since been assailed with great energy by De Sauley, Professor Stanley (S. of P. p. 289) has left his powerful aid in the same direction, and the theory, which probably arose from a confusion between the Vale of Siddim and the plain of the Jordan, will doubtless never again be listened to. But

2. A more serious departure from the terms of the ancient history is exhibited in the prevalent opinion that the cities stood at the south end of the Lake. This appears to have been the belief of Josephus and Jerome (to judge by their statements on the subject of Zoar). It seems to have been universally held by the medieval historians and pilgrims, and it is adopted by modern topog-

a Josephus regarded this passage as his main statement of the event. See Ant. i. 11, § 4.
b These passages are given at length by De Sauley (Norr. i. 445).

† A purely expression which seems to imply that the rise of the Dead Sea was within historical times, is that contained in Gen. xiv. 3 — "the Vale of Siddim, which is the Salt Sea." But this phrase may merely mean that the region in question bore both names; as in the similar expressions (vv. 7 and 17) — "En Mishpat, which is Kadesh; † Shaveh, which is the King's Dale." It should, however, be observed that the word "Vale," translated † vale, is usually employed for a broad valley, such as in this connection would naturally mean the whole length of the Dead Sea. (Stanley, S. of P. p. 289 note).
Sodom

...spheres, probably without exception. In the words of one of the most able and careful of modern travelers, Dr. Robinson, "The cities which were destroyed must have been situated on the south end of the lake as it then existed." (Bibl. Res. ii. 188). This is also the belief of M. De Saully, except with regard to Gomorrha; and, in fact, is generally accepted. There are several grounds for this belief; but the main point on which Dr. Robinson rests his argument is the situation of Zoar.

(a.) "Lot," says he, in continuing the passage just quoted, "settled in the land which was then to Sodom and Zoar lay almost at the southern end of the present sea, probably in the mouth of the Wady Kerak, where it opens upon the isthmus of the peninsula. The fertile plain, therefore, which Lot chose for himself, where Sodom was situated . . . lay also south of the lake as thou comest unto Zoar." (Bibl. Res. ibid.).

Zoar is said by Jerome to have been "the key of Moab." It is certainly the key of the position which we are now examining. Its situation is more properly investigated under its own head. (Zoar.) It will be there shown that grounds exist for believing that the Zoar of Josephus, Jerome, and the Crusaders, which probably lay where Dr. Robinson places it, was not the Zoar of Lot. On such a point, however, where the evidence is so fragmentary and uncertain, it is impossible to speak otherwise than with extreme dilution.

In the mean time, however, it may be observed that the statement of Gen. xix. hardly supports the inference relative to the position of these two places, which is attempted to be extorted from it. For, assuming that Sodom was where all topographers seem to concur in placing it, at the salt ridge of Udum, it will be found that the distance between that spot and the mouth of the Wady Kerak, where Dr. Robinson proposes to place Zoar, a distance which, according to the narrative, was traversed by Lot and his party in the short twilight of an eastern morning (Gen. xix. 15, 22), is no less than 15 miles.

With the question of the situation of Gen. xix. is strictly historical throughout, we are not at present in possession of sufficient knowledge of the topography and of the names attached to the sites of this remarkable region, to enable any probable conclusions to be arrived at on this and the other kindred questions connected with the destruction of the five cities.

(b.) Another consideration in favor of placing the cities at the southern end of the lake is the existence of similar names in that direction. Thus, the name Udum, attached to the remarkable ridge of salt which lies at the southwestern corner of the lake, is usually accepted as the representative of Sodom (Robinson, Van de Velde, De Saully, etc., etc.). But there is a considerable difference between the two words סודה and אֹם, and at any rate the point deserves further investigation.

The name 'Amarah (אֲמָרָה), which is attached to a valley among the mountains south of Masada (Van de Velde, ii. 99, and Map), is an almost exact equivalent to the Hebrew of Gomorrha b) (Amarah). The name Brokh (בְּרֶקֶח), and much more strongly that of Ḥozal (حسأل), recall Zoar.

(c.) A third argument, and perhaps the weightiest of the three, is the existence of the salt mound at the south of the lake, and its tendency to split off in columnar masses, presenting a rude resemblance to the human form. But with reference to this it may be remarked that it is by no means certain that salt does not exist at other spots round the lake. In fact, as we shall see under the head of Zoar, Tiberias (A. D. 1217) states that he saw the pillar of Lot's wife on the east of Jordan at about a mile from the ordinary ford: and whenever such salt exists, since it doubtless belongs to the same formation as the Khosha Udum, it will possess the habit of splitting into the same shapes as that does.

It thus appears that on the situation of Sodom no satisfactory conclusion can at present be come to. If Dr. Robinson's hand the narrative of Genesis seems to state positively that it lay at the northern end of the Dead Sea. On the other hand the long-continued tradition and the names of existing spots seem to pronounce with almost equal positiveness that it was at its southern end. How the geological argument may affect either side of the proposition cannot be decided in the present condition of our knowledge.

Of the catastrophe which destroyed the city and the district of Sodom we can hardly hope ever to form a satisfactory conception. Some catastrophe there undoubtedly was. Not only does the narrative of Gen. xix. expressly state that the cities were miraculously destroyed, but all the references to the event in subsequent writers in the Old and New Testaments bear witness to the same fact. But what secondary agencies, besides fire, were employed in the accomplishment of the punishment, cannot be safely determined in the almost total absence of exact scientific description of the natural features of the ground round the lake. It is possible that when the ground has been thoroughly examined by competent observers, something may be discovered which may throw light on the narrative. Until then, it is useless, however tempting, to speculate. But even this is almost too much to hope for; because, as we shall presently see, there is no warrant for imagining that the catastrophe was a geological one, and in any other case all traces of action must at this distance of time have vanished.

It was formerly supposed that the overthrow of Sodom was caused by the convulsion which formed was "the erode" of these tribes. (Zoar, Aver. W. 3.)

6 The G here is employed by the Greeks for the difficult gutural nun of the Hebrews, which they were unable to pronounce (comp. Gottschalk for Aithalsh, etc.). This, however, would not be the case where the nun is very common, and therefore De Saully's identification of Gomorrain with Gomorrha falls to the ground, as far at least, as etymology is concerned.
SODOM

the Dead Sea. This theory is stated by Dean Milne in his History of the Jews (5.15, 16) with great spirit and clearness. "The valley of the Jordan, in which the cities of Sodom, Gomorrah, Adma, and Tseloim were situated, was rich and highly cultivated. It is most probable that the river then flowed in a deep and uninterrupted channel down a regular descent, and discharged itself into the eastern gulf of the Red Sea. The cities stood on a soil bosom and underlain with veins of bitumen and sulphur. These inflammable substances, set on fire by lightning, caused a tremendous conflagration: the water courses, both the river and the canals by which the land was extensively irrigated, burst their banks: the cities, the walls of which were perhaps built from the combustible materials of the soil, were entirely swallowed up by the fiery inundation: and the whole valley, which had been compared to Paradise, and to the well-watered cornfields of the Nile, became a dead and fetid lake."

But nothing was then known of the lake, and the recent discovery of the extraordinary depression of its surface below the ocean level, and its no less extraordinary depth, has rendered it impossible any longer to hold such a theory. The changes which occurred when the limestone strata of Syria were split by that vast fissure which forms the Jordan Valley and the basin of the Salt Lake, must not only have taken place at a time long anterior to the period of Abraham, but must have been of such a nature and on such a scale as to destroy all animal life far and near (Dr. Buist, in Trans. of London Geog. Soc. xii. p. xvi.).

Since the knowledge of these facts has rendered the old theory untenable, a new one has been broached by Dr. Robinson. He admits that a lake must have existed where the Dead Sea now lies, into which the Jordan poured its waters long before the catastrophe of Sodom. The great depression of the whole broad Jordan Valley and of the northern part of the Arabah, the direction of its lateral valleys, as well as the slope of the high western district towards the north, all go to show that the configuration of this region in its main features is coeval with the present condition of the surface of the earth in general, and not the effect of any local catastrophe at a subsequent period.

In view of the fact of the necessary existence of a lake before the catastrophe of Sodom, the well-watered plain toward the south, in which were the cities of Sodom and Gomorrah, and not far off the sources of bitumen; as also the peculiar character of this part of the lake, where alone asphaltum at the present day makes its appearance — I say, in view of all these facts, there is but a step to the obvious hypothesis, that the fertile plain is now in part occupied by the southern bay lying south of the Dead Sea, and that, by some convulsion or catastrophe of nature connected with the miraculous destruction of the cities, either the surface of this plain was scooped out, or the bottom of the lake heaved up so as to cause the waters to overflow and cover permanently a larger tract than formerly" (Bibl. Res. ii. 185, 189).

a This cannot be said of the account given by Fuller in his Psalms of Palestine (bk. 2, ch. 13), which seems to combine every possible mistake with an amount of bad taste and unseemly drollery quite astonishing even in Fuller.

b This is the account of the Koran (xi. 34): "We turned those cities upside down and we ruined upon them stones of baked clay."

c Taking ٣٧٧٧ = ٣٧ق٧٧٧ and that as ٣٧٧٧٧.
In this view he is supported by the analogous fact that the entire valley was designated by Jerome and Eusebius as the 
Abun = the ravine, and that it is now called by the Arabs the 
Ghor = the depression.

The argument from the Scripture narrative (Gen. xiii.) given in this article is, in substance, this: that Abraham and Lot, standing on some eminence between Bethel and Ai, surveyed the fruitful plain of the Jordan on the east — the region north of the sea being visible from that point, while what is now the southern end of the sea would be invisible; and that Lot selected the plain thus visible below him as his residence, and descending to it pitched his tent near Sodom, one of the cities planted amid its verdure.

The scene of the conference between Abraham and Lot is not stated by the sacred writer, but would seem to have been near the spot above named. The inference stated is also natural, and if there were no special reason to question it, it would pass unchallenged. But the location of the cities is not so definitely given as to compel us to accept the inference. Nor is it fairly implied in the narrative that Lot's view took in the whole valley; he surveyed a section of it, which in its fruitfulness represented the whole. The argument assumes that there has been no essential change in the plain of the sea since that day except what would result in the former from disuse of the artificial irrigation which then made it so fruitful. But the phrase "before the Lord destroyed," etc., plainly indicates a marked change in consequence of the event; and there certainly is nothing in the Scripture narrative inconsistent with the general belief that the catastrophe of the cities, which destroyed also "the country," wrought a great and general change in "the land of Sodom and Gomorrah," thus turned "into ashes." If the cultivated plain or valley, with or without a lake of fresh water in a part of the present bed of the sea, then extended as far as the present southern limit of the sea and adjacent plain, and the cities were in that section of it, the fact would not conflict with the first record. The passage cited (Gen. xiii.) does not countenance this view, neither does it contradict it. The host of writers, ancient and modern, who have firmly held it, have never felt that this passage offered any objection to it.

Of the reasons which we now offer additional to the site of Zoar, which in itself is conclusive, the first two are conceded above.

1. The names suggestive of identity with the original sites which adhere to the localities around the southern end of the sea, and of which we have no certain traces around the northern end.

2. The existence and peculiar features of the salt mountains south of the sea, with no corresponding object north of it, which is certainly remarkable in connection with the sacred narrative, and irresistibly associates the flight of Lot and the fate of his wife, with this locality.

3. The living fountains and streams of fresh water which flow into the plain south of the sea, correspondent with its original features, if it was the southern extremity of the plain of Jordan which Lot surveyed, "well-watered everywhere, before the Lord destroyed Sodom and Gomorrah, even as the garden of the Lord, like the land of Egypt, as thou comest into Zoar" (Gen. xiii. 10). This is a feature which Dr. Robinson specially noted: "Even to the present day more living streams flow into 

"Phlegraan fields" in the Campagna at Rome, says that "the name, if not derived from the subsequent catastrophe, shows that the marks of fire had already passed over the doomed valley." Apparent "marks of fire" there are all over the neighbourhood of the Dead Sea. They have misled many travellers into believing them to be the tokens of configuration and volcanic action: and in the same manner it is quite possible that they originated the name Sodom, for they undoubtedly abounded on the shores of the lake long before even Sodom was established. But there is no warrant for treating those appearances as the "gloves" and consequences of that terrific volcanic action. They are produced by the gradual and ordinary action of the atmosphere on the rocks. They are familiar to geologists in many other places, and they are found in other parts of Palestine where no fire has ever been suspected.

The miserable fate of Sodom and Gomorrah is held up as a warning in numerous passages of the Old and New Testaments. By St. Peter and St. Jude it is made "an example to those that after should live ungodly," and to those "denying the only Lord God, and our Lord Jesus Christ" (2 Pet. ii. 6; Jude, 4-7). And our Lord himself, when describing the fearful punishment that will befall those that reject his disciples, says that "it shall be more tolerable for Sodom and Gomorrah in the day of judgment than for that city" (Mark xi. 11; comp. Matt. x. 15).

The name of the Bishop of Sodom — "Severus Sodomeonius" — appears amongst the Arabian prelates who signed the acts of the first Council of Nicea. Eusebides testifies against the idea of the Sodom of the Bible being intended, and suggests that it is a mistake for Zuunmun or Zu-rainna, a sea under the metropolitan of Rostro (Pol. p. 1020). This M. De Sancy (Voy. i. 454) refuses to admit. He explains it by the fact that many seas still bear the names of places which have vanished, and exist only in name and memory, such as Troy. The Coptic version to which he refers, in the edition of N. Lenormant, does not throw any light on the point.

The theory which is propounded in this article respecting the catastrophe of the cities and the submergence of the district, is examined in the articles, SEA, THE SALT (p. 2897 f.) and SODOM, THE VALLE OF (p. 3052 f., Amer. ed.). The argument which would locate the cities north of the sea, is refuted, so far as it relates to Zoar, in the article ZOAR (Amer. ed.). For the reason above named, that Zoar is "the key of the position," its site determines that of Sodom, which was so near it that it could be reached by flight between the early dawn and the broad daylight after the sun had risen over the mountains, and it was exposed to the same catastrophe, being saved by special interposition. If Zoar was in the district in which we have placed it, Sodom was south, and not north, of the sea. But on this point we offer further and cumulative evidence relating especially to Sodom.
the Gkôr, at the south end of the sea, from washes of the eastern mountains, than are found so near together in all Palestine besides." (Phys. Geog. p. 234.) Mr. Tristram's observations of the soil below the surface both at the foot of Sodom's hill and in the salt marsh, confirm the theory that the whole region was once fruitful. He says: "We collected specimens of the soil at the depth of two feet from the surface, where it is a rich grey loam, but strongly impregnated with salt." "At the depth of eighteen inches in the plain, the soil was a fat, grey loam" (Land of Israel, pp. 322, 323). Before this point was reached, the cardinal salt was covered with the saline incrustation of the marsh and water of the lagoon, we have an image of the fertility and beauty of the whole expanse, in Mr. Tristram's description of the present luxuriance of the oasis on the eastern border: "All teemed with a prodigality of life. It was, in fact, a reproduction of the oasis of Jericho, in a far more tropical climate, and with yet more lavish supply of water." For three miles we rode through these rich groves, revelling in the tropical verdure and sprawling ornithology of its labyrinths" (Ibid. p. 336).

4. The testimony of unbroken tradition, ancient and modern. Strabo, Josephus, Tacitus, Galen, Jerome, Eusebius, "medieval historians and pilgrims, and modern topographers, without exception," - is the formidable array which Mr. Grose proposes to turn aside by an interpretation, plausible in itself, of a single passage of Scripture, which offers no bar to their unanimous verdict, and which seems to us even to require it. (The reader will find these cited in the Bibi. Sacra, xxx. 147.) The whole series, of course, does not amount to positive proof, but it is so universal and unvarying that it has not a little value as corroborative evidence.

5. There remains a combined topographical and historical argument which to us appears conclusive. No event has perhaps occurred on the globe more fitted to leave a permanent scar on its surface than the conflagration of the cities of the plain and the plains of Jordan. Of no other recorded occurrence except perhaps the Deluge, is there more reason for clearer traces. It was a catastrophe so dire that it became a standing comparison for signal and overwhelming destruction, and would naturally leave a perpetual mark on the valley which bore it. This impression, which every reader would receive from the original narrative, is confirmed by every succeeding notice of it and of the locality. The event occurred about nineteen centuries before Christ, and the fertile and populous plain was at once made desolate and tensantress. This is the record: "Then the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord out of heaven; and he overthrew those cities, and all the plain, and all the inhabitants of the cities, and that which grew upon the ground." (Gen. xxvi. 24, 25.) About four and a half centuries later, Moses, warning the Israelites against apostasy, admonishes them that the judgments of God for idolatry would make their country so desolate that a visitor would find its condition portrayed in these words: "And the whole land thereof is brimstone and salt and burning, that it is not sown, nor sown, nor any grass growth therein, like the overthrow of Sodom and Gomorrah, Admah and Zeboim, which the Lord overthrew in his anger and in his wrath." (Deut. xxix. 23.) The above is a picture of the site of Sodom as it appeared that period. The testimony which exhibits it still deserted and desolate in the subsequent centuries, as furnished by the prophecies of Isaiah, Jeremiah, and Zephaniah, by the apocryphal books of Esdras and the Wisdom of Solomon, and by the ancient authors, Strabo, Philo, and Tacitus, together with the New Testament allusions, are partially quoted above, and more fully in Bibi. Sacra, xxv. 146-148. No historic proof can be more clear and complete, than that the site of Sodom, from the time of its destruction to the Christian era and subsequently, was a blasted region, an utter desolation.

With these historical and physical delineations before us, it is only necessary to call attention to the aspect of the two sites to settle the question of identity. The south end of the sea and its surroundings present at this day such an appearance as the scriptural statements would lead us to expect. The entire southwest coast and adjacent territory from above the mound to the fertile border of the Gkôr or Sîfîkêh on the extreme southeast, relieved at a single point by the verdure of the small oasis of Zotlírah, is, and has been, from the time of Sodom's destruction, the image of enthroned desolation. The sombre wilderness and desolation of the whole scene: the tokens of volcanic action, or of some similar natural conclusion; the Sodom mountain, a mass of crystalline salt, furred into fantastic ridges and pillars; the craggy sunburnt precipices and ravines on the west; the valley below udum, with the mingled sand, sulphur, and bitumen, which have been washed down the gorges; the marshy plain of the adjacent Sâhîbîh, with its briny drainings, "destitute of every species of vegetation: the stagnant sea, with its border of dead driftwood; the sulphurous odors: the sterility and deathlike solitude" (Robinson); "desolation, elsewhere partial, here supreme: "nothing in the Sahara more desolate" (Tristram); "the unmitigated desolation" (Lyons); "scorched and desolate tract" (W.): "desolation which, perhaps, cannot be exceeded anywhere upon the face of the earth." (Grove.) It is possible, indeed, that a mind can scarcely conceive: (Porter); these and the like features impress all visitors as a fit memorial of such a catastrophe as the sacred writers have recorded. Whether we accept or not certain localities as particular sites, the total ensemble is a most striking confirmation of the narrative.

The more detailed explorations of the region confirm the impression which its general appearance conveys. Mr. Tristram, who bestowed upon the whole locality a careful scientific examination, thinks that he discovered in the deposits of Lío Wady Mahawah, a broad deep ravine at the north end of Jebel udum, traces of the agency which destroyed the cities. He says: "There are exposed on the sides of the wady, and chiefly on the south, large masses of bitumen, mingled with gravel. These overlie a thin stratum of sulphur, which again overlies a thick stratum of sand, so strongly impregnated with sulphur that it yields powerful fumes on being sprinkled over a hot coal. Many great blocks of the bitumen have been washed down the gorge, and lie scattered on the plain below, along with huge boulders and other traces of tremendous floods. The phenomenon commences about half a mile from where the wady opens up on the plain, and may be traced at irregular intervals for nearly
SODOM

SODOMITES

have further up. The bitumen has many small
water-worn stones and pebbles embedded in it."

"Again, the bitumen, unlike which we pick
up on the shore, is strongly impregnated with sul-
phur, and yields an overpowering sulphurous odor;
above all, it is calcined, and bears the marks of
having been subjected to extreme heat."

"I have a great dread of seeking forced cor-
roboration of Scriptural statements from ques-
tionable physical evidence, for the skeptic is apt to
imagine that when he has refuted the wrong argu-
ment adduced in support of a Scriptural statement,
he has refuted the Scriptural statement itself; but
so far as I can understand this deposit, if there be
any physical evidence left of the catastrophe which
destroyed Sodom and Gomorrah, or of similar
occurrences, we have it here. The whole appear-
ance points to a shower of hot sulphur and an
irruption of bitumen upon it, which would nat-
urally be calcined and impregnated by its fumes;
and this at a geologic period quite subsequent to
all the dihual and alluvial action of which we
have such abundant evidence. The vestiges remain
exactly as the last relics of a snow-drift remain in
spring - an atmospheric deposit. The catastrophe
must have been since the formation of the wady,
since the deposition of the marl, and while the
water was at its present level; therefore probably
during the historic period "(Land of Israel, pp.
354-357).

Our only surprise is, that the intelligent ob-
server who finds these probable tokens "of the
catastrophe which destroyed Sodom and Gomor-
rah" in the very locality near which on other
grounds we think these cities must have stood,
should have left them half the place fully miles distant.
He has proved to his own satisfaction that the
smoke which Abraham saw ascended from the
northern end of the sea; but if his interesting
discovery is reliable, there must have been some
"smoke," as well as "extreme heat," at the south-
ern end. If in these and similar features we have
not physical evidence of the visitation which de-
stroyed the cities, we have just such smoke and pheno-
mena as we should naturally look for in a terri-
itory which had been the theatre of such a cata-
trophe, and whose subsequent condition had been
described in the passages which have been cited."

We turn now to the other proposed site, the
country north of the sea, and we find neither
mones of the places nor traces of the events em-
bodied in the Scriptural record. Instead of a
territory scalced as by hot thunderbolts, we find a
district teeming with all the elements of fruitful-
ness. In the very year that Moses describes the
site of the destroyed cities as brimstone and salt
and burning, Joshua brings the hosts of Israel to
the territory which Mr. Grove proposes as the site
of these cities, and finds there forests of palm
and fields of barley, "old corn and parched corn," sup-
plies of grain and fruit for the multitude, which
enable them to dispense with the manna. Through
the succeeding centuries important cities stood on
this territory. It was here that the assembled
nation, with sacrificial offerings and rejoicings, in-
Custed Soul with the kingdom (1 Sam. xi. 13);
and here were gathered schools of the prophets (2
K. ii. 5, iv. 38). Josephus gives glowing descrip-
tions of the exuberant productiveness of this very
district, speaks of the variety of its trees and herbs,
and refers to the revenue which it yielded (Jos. xv
4, § 2), describes it as the garden of Palestine,
and even calls it a "divine region" (R. J. iv. 8,
§ 4). This plain or valley is now marked by a
belt of luxuriant vegetation along the sweet waters
of the river, while the interval between it and the
highlands on each side, though arid in the dry
season from the great heat, and presenting from
this cause broad, desolate strips, is yet susceptible
of irrigation and high cultivation. Not a token
of the catastrophe in which we find here either of the awful cataclysms in which the guilty cities, with the plain on which they stood, were consumed, or of the perpetual
devastation which subsequently brooded over the
scene. We find the opposite; and in contrast
with the descriptions which we have given of travellers
who have visited the district south of the sea we
quote the expression of the latest visitor to the
district north of it which refers to "the verdant
meadows on each side" (Porter, Bible, p. 112).

Can there be a question which of these two sites
is, and which is not, that of the historic Sodom?
This combined topographical and historical argu-
ment against the pretensions of the new site, and
in favor of the identity of the old, appears to us as
exclusive as it well could be with reference to an
event which occurred nearly four thousand years
ago, decisive in itself, and jointly with other pro-
potent enough to silence discussion. S. W.

SODOMA (sod'ma, Sodoma). Rom. ix. 29.
In this place alone the Authorized Version has fol-
lowed the Greek and Vulgate form of the well-
known name Sodom, which forms the subject of
the preceding article. The passage is a quotation
from Is. i. 9. The form employed in the Penta-
teuch, and occasionally in the other books of the
A. V. of 1611 is Sodome, but the name is now
universally reduced to Sodom, except in the one
passage quoted above. G.

SODOMITES (sod'mites; sō'dō̇mites) [see below; 
scorchers of the mountains]. This word should not denote
the inhabitants of Sodom (except only in 2 Esdr. 
vi. 30) nor their descendants; but is employed in
the A. V. of the Old Testament for those who prac-
ticed as a religious rite the abominable and un-
natural vice from which the inhabitants of Sodom
and Gomorrah have derived their lastinfamy.
It occurs in Dent. xxii. 17; 1 K. iv. 24, xv. 12,
xvii. 46; 2 K. xiii. 7; and Job xxxvi. 11 (youth
origin). The Hebrew word Kudosh is said to be
derived from a root kudosh, which (strange as it
appear) means "pure," and thence "holy."
The words vauor in Latin, and "devoted" in our
language, have also a double meaning, though the
subordinate signification is not so absolutely con-
trary to the principal one as it is in the case of
kudosh. "This dreadful consecration," or rather
desecration, was spread in different forms over Phoe-
nicia, Syria, Phrygia, Assyria, Babylonia, As-
charoth, the Greek Astarte, was its chief object."
It appears also to have been established at Rome,
where its victims were called Galli (not from Galli,
but from the river Gallus in Bithynia). There is
an instructive note on the subject in Jerome's
Comm. on Hos. iv. 14.

Æ We have private advices that Mr. Tritram has
wittiglish at the theory respecting the site of the
cities to which he had published his assent, and now
accepts the other view. S. W.
The translators of the Septuagint, with that anxiety to soften and conceal obscurities expressions, which has been often noticed as a characteristic of their version, have, in all cases but one, avoided rendering κοπρίαν καταστροφήν and ταπεινοκρίσια (initiated). In the second αὐθεντικόν (ε conspiracy, perhaps reading ὕπερ). In the third τὰς πετασμάς (sacrifices). In the fourth the Vat. MS. omits it, and the Alex. has τὸν ἐνδιαλεγόμενον. In the fifth τῶν θεάσασθαι: and in the sixth ἐπὶ ἄγγελον.

There is a feminine equivalent to קדשה, namely, קדשנויה. This is found in Gen. xxxviii. 21; Deut. xxxiii. 17; and Hos. ii. 14. In each of these cases it throws a new light on the passage to remember that these women were (if the expression may be allowed) the priestesses of a religion, not nailing for hire, or merely instruments for gratifying passing lust. Such ordinary prostitutes are called by the name zoonth. The "strange women" of Prov. ii. 16, &c., were foreigners, ætros, &c. G.

SODOMITISH SEA, THE. (Μέγα So- domitikós) 2 Esdr. v. 7: meaning the Dead Sea. It is the only instance in the books of the Old Testament, New Testament, or Apocrypha, of an approach to the inaccurate modern opinion which connects the salt lake with the destruction of Sodom. The name may, however, arise here simply from Sodom having been situated near the lake.

* SOLDIER. [Arms; Army.]

SOLOMON (Σολώμων, Shiloh'ock [peaceful, patriach]: Σαλωμών, LXX: Σολωμών, N.T. and Josephus). I. Nume.-The changes of pronunciation are worth noticing. We lose something of the dignity of the name when it passes from the measured steadiness of the Hebrew to the anapest of the N. T., or the tribach of our common speech. Such changes are perhaps inevitable wherever a name becomes a household word in successive genera; and as the S. is evidently identical in meaning with Solomon passes into Frederick, the feminine form of the word (Σαλωμία) retains the long vowel in the N. T. It appears, though with an altered sound, in the Arabic Salaiman.

II. Materials. (1) The comparative scantiness of historic data for a life of Solomon is itself significant. While that of David occupies 1 Sam. xix.:xxxi.; 2 Sam. i.:xxiv.; 1 K. v.; li; 1 Chr. x.:xxxiv; that of Solomon fills only the eleven chapters 1 K. i.:xi., and the nine 2 Chr. i.:ix. The compilers of those books felt, as by a true inspiration, that the wanderings, wars, and sufferings of David were better fitted for the instruction of after ages than the magnificence of his son. They manifestly give extracts only from larger works which, were before them. 1. The books of the Acts of Solomon" (1 K. xi. 41); "The book of Nathan the prophet, the book of Ahijah the Shi- lomite, the visions of Iddo the seer" (2 Chr. ix. 29). Those which they do give, bear, with what for the historian is a disproportionate fullness, on the early glories of his reign, and speak last little (those in 2 Chr. not at all) of its later sins and misfortunes, and we are consequently unable to follow the annals of Solomon step by step.

(2.) Ewald, with his usual fondness for assigning different portions of each book of the O. T. to a series of successive editors, goes through the process here with much ingenuity, but without any very satisfactory result (Geschichte, ii. 250-253).

A more interesting inquiry would be, to which of the books above named we may refer the sections which the compilers have put together. We shall probably not be far wrong in thinking of Nathan, far advanced in life at the commencement of the reign, David's chief adviser during the years in which he was absorbed in the details of the Temple and its ritual, himself a priest (1 K. iv. 5 in Uch.'a, comp. Ewald, ii. 11), as having written the account of the accession of Solomon and the dedication of the Temple (1 K. i.-viii. 66; 2 Chr. i.-viii. 15). The prayer of Solomon, so fully reproduced, and so obviously precomposed, may have been written under his guidance. To Ahijah the Shilomite, active at the close of the reign, and at some time after Jeroboam's accession, we may ascribe the short record of the sin of Solomon, and of the revolution to which he himself had so largely contributed (1 K. xi.). From the book of the Acts of Solomon came probably the miscellaneous facts as to the commerce and splendor of his reign (1 K. iv. 10-x. 23).

(3.) Besides the direct history of the O. T. we may find some materials for the life of Solomon in the books that bear his name, and in the passages which are referred, on good grounds, to his time, Ps. ii., xlv., lxix., exxvi. Whatever doubts may hang over the date and authorship of Ecclesiastes and the Song of Songs, we may at least see in them the reflection of the thoughts and feelings of his reign. If we accept the latest date which recent researches have assigned to them, and absolutely work up materials which were accessible to the writers, and are not accessible to us. If we refer them in their substance, following the judgment of the most advanced Shemitic scholars, to the Solomonic period itself, they then come before us with all the freshness and vivacity of contemporary evidence (Revell, Hist. des Langues Sem.), p. 131.)

(4.) Other materials are but very scanty. The history of Josephus is, for the most part, only a base and inaccurate paraphrase of the O. T. narrative. In him, and in the more erudite among early Christian writers, we find some fragments of older history not without their value, extracts from archives alleged to exist at Tyre in the first century of the Christian era, and from the Phenician histories of Manander and Dius (Jos. Ant. viii. 2, § 5, § 3), from Eusebius (Hist. Eccl. Prop. Euseb. Eccl. i.)

The name of Solomon (Sofra), but having hardly any connection with David, is at once striking and in- structural.

The weight of R.,n's judgment is however dis- infirmed by the fact that he had previously assigned Ecclesiastes to the time of Alexander the Great (Cont. des Cont. p. 102).
JO, from Alexander Polyhistor, Menander, and Lattus (Lem. Al. Strom. i. 21). Writers such as these were of course only compilers at second-hand, but they probably had access to some earlier documents. Eduard has not, in his introduction, those by Bathsheba included, guided by the influence of Nathan, or by his own discernment of the gifts and graces which were tokens of the love of Jehovah, pledged his word in secret to Bathsheba that he, and no other, should be the heir (1 K. i. 13). The words which were spoken somewhat later, express, however, the purpose which guided him throughout (1 Chr. xxi. 9, 29). His son’s life should not be as his own had been, one of hardships and wars, dark crimes and passionate retribution, but, from first to last, be pure, blameless, peaceful, fulfilling the ideal of glory and of righteousness, after which he himself had vainly striven. The glorious visions of Ps xlviii. may be looked on as the prophetic expansion of the hopes of his old age. So far, all was well. But we may not ignore the fact, that the later years of David’s life presented a change for the worse, as well as for the better. His sin, though forgiven, left behind it the Nemesis of an enfeebled will and a less generous activity. The liturgical element of religion becomes, after the first passionate outpouring of Ps li., mobl., predominant. He lives to name the first-born and to order materials for the Temple which he may not build (1 Chr. xxii. 5, 14). He plans with his own hands all the details of its architecture (1 Chr. xxvi. 19). He organizes on a scale of elaborate magnificence all the attendance of the priesthood and the ceremonial services of the Levites (1 Chr. xxiv., xxv.). But, meanwhile, his duties as a king are neglected. He no longer sits in the gate to do judgment (2 Sam. xv. 2, 4). He leaves the son of Amnon unpunished, “because he loved him, for he was his first-born” (LXX. of 2 Sam. xiii. 21). The hearts of the people fall away from him. First Absalom, and then Sheba, become formidable rivals (2 Sam. xv. 6, xx. 2). The history of the numbering of the people (2 Sam. xxiv., 1 Chr. xxix.) implies the presence of some act of deposition, a poll-tax, or a conscription (2 Sam. xxiv. 9 makes the latter the more probable), such as started all his other and more experienced counsellors. If, in the last words of David “belonging to this period, there is the old devotion, the old hungering after righteousness (2 Sam. xxvii. 2-5), there is also — first generally (Job, 6, 7); and afterwards resting on individual standards (1 K. ii. 3-8) — a more passionate desire to punish those who had wronged him, a painful recurrence of vindictive thoughts for offences which he had once freely forgiven, and which were not greater than his own. We cannot rest in the belief that his influence over his son’s character was one exclusively for good.

(4.) In eastern countries, and under a system of polygamy, the son is more dependent, even than elsewhere, on the character of the mother. The history of the Jewish monarchy furnishes many instances of that dependence. It recognizes it in

reproof was drawn forth by the king’s interpenetration and sensibility. In contrast to what his wives were, she draws the picture of what a pattern wife ought to be (Pius, 1 iv).

There also the epithet “le bien-aimé” reminds us, no less than Jedidiah, of the terrible irony of History for those who abuse gifts and forfeit a vocation.
SOLOMON

the care with which it records the name of each monarch's mother. Nothing that we know of Bathsheba leads us to think of her as likely to mould her son's mind and heart to the higher forms of goodness. She offers no resistance to the king's passion (Ewald, iii. 211). She makes it a stepping-stone to power. She is a ready accomplice in the scheme by which her shame was to have been concealed. Deadline too she was sorrowful and penitent when the rebuke of Nathan was followed by her child's death (2 Sam. xii. 24), but the after-history shows that the grand-colour of Bathsheba (BATHSHEBA) inherited not a little of his character. A willing adulteress, who had become devout, but had not ceased to be ambitious, could hardly be more, at the best, than the Madame de Maintenon of a king, whose affection and piety were rendering him unlike his former self, uncharitably passive in the hands of others.

(5.) What was likely to be the influence of the prophet to whose care the education of Solomon was confided? (Hdb. of 2 Sam. xii. 25.) We know, beyond all doubt, that he could speak bold and faithful words when they were needed (2 Sam. vii. 1-17, xii. 1-14). But this power, belonging to moments or messages of special inspiration, does not involve the permanent possession of a clear-sighted wisdom, or of wisdom that can be acquired, and we can search the later years of David's reign for no proof of Nathan's activity for good. He gives himself to the work of writing the annals of David's reign (1 Chr. xxix. 29). He places his own sons in the way of being the companions and counsellors of the future king (1 K. iv. 5). The absence of his name from the history of the succeeding generations, and the fact that the events were followed early in the reign of Solomon by heavy burdens and a forced service, almost lead us to the conclusion that the prophet had acquired a measure which had in view the magnificence of the Temple, and that it was left to David's own heart, returning to its better impulses (2 Sam. xiv. 10), and to an older and less erring prophet, to protest against an act which had begun in pride and tended to oppression.

(6.) Under these influences the boy grew up. At the age of ten or eleven he must have passed through the revolt of Absalom, and shared his father's exile (2 Sam. xv. 16). He would be taught all that priests, or Levites, or prophets had to teach: music and song: the Book of the Law of the Lord, in such potions and in such forms as were then current; the "proverbs of the ancient," which his father had been wont to quote (1 Sam. xxiv. 13); probably also a literature which has survived only in fragments: the Book of Jasher, the upright ones, the heroes of the people; the Book of the Wars of the Lord: the wisdom, oral or written, of the sages of his own tribe, Heman, and Ezra, and Caleb, and David (1 Chr. i. 59), who contributed so largely to the noble hymns of this period (Ps. cxliii., cxlix.), and were incorporated, probably, into the choir of the Tabernacle (Ewald, iii. 355). The growing intercourse of Israel with the Phenicians would lead naturally to a wider knowledge of the existing world and its wonders than had fallen to his father's lot. Adorable, however, as all this was, a shepherd-life like his father's, furnished, we may believe, a better education for the kingly calling (Ps. xxxviii. 70, 71). Born to the purple, there was the inevitable risk of a selfish luxury. Conspicuous in literature, trained to think chiefly of the magnificent "palace" of Jehovah (1 Chr. xxi. 19) of which he was to be the builder, there was the danger, first, of an aesthetic formalism, and then of ultimate indifference.

IV. Accession. — (1.) The feebleness of David's old age led to an attempt which might have deprived Solomon of the throne his father destined for him. Adonijah, next in order of birth to Absalom, like Absalom was "a goodly man" (1 K. i. 5), in full maturity of years, backed by the oldest of the king's friends and counsellors, Joab and Abiathar, and by all the sons of David, who looked with jealousy, the latter on the obvious though not as yet declared preference of the late-born, and the former on the growing influence of the rival counsellors who were most in the king's favor, Nathan, Zadok, and Benaiah. Following in the steps of Absalom, he assumed the kingly state of a chieftain and a body-guard; and David, more passive than ever, looked on in silence. At last a time was chosen for openly proclaiming him as king. A solemn assembly, the Ex-Servi, the Cheerdwells and Peculians (mercenaries, and therefore not liable to the contagion of popular feeling) under the command of Benaiah, he called his kinsmen, his followers of the left hand of his brother, all summoned together. The king was reminded of his oath. A virtual abdication was pressed upon him as the only means by which the succession of his favorite son could be secured. The whole thing was completed with wonderful rapidity. Riding on the mole, well-known as belonging to the king, attended by Nathan the prophet, and Zadok the priest, and more important still, by the king's special company of the thirty Gibborim, or mighty men (1 K. i. 10, 19), and the body-guard of the Cheerdwells and Peculians (mercenaries, and therefore not liable to the contagion of popular feeling) under the command of Benaiah (himself, like Nathan and Zadok, of the sons of Aaron), he went down to Gilboa, and was proclaimed and anointed king. The shouts of his followers fell on the startled ears of the guests at Adonijah's banquet. Happily they were as yet committed to no overt act, and they did not venture on one now. One by one they rose and departed. The plot had failed. The counter coup d'état of Nathan and Bathsheba had been successful. Such incidents are common enough in the history of eastern monarchies. They are usually followed by a massacre of the defeated party. Adonijah expected such an issue, and took refuge at the horns of the altar. In this instance, however, the young conqueror used his triumph generously. The lives both of Adonijah and his partisans were spared, at least for a time. What had been done hurriedly was done afterwards in more solemn form. Solomon was presented to a great gathering of all the notables of Israel, with a set speech, in

a Josephus, with his usual inaccuracy, substitutes Nathan for Adonijah in his narrative (Ant. viii. 3, § 21).
b We regret to find ourselves unable to follow Ewald in his high estimate of the old age of David, and, consequently, of Solomon's education.

c According to later Jewish teaching a king was not anointed when he succeeded his father, except in the case of a previous usurpation or a disputed succession (Otho, Lexir. Rabbin v. r. "Rez").
The large 3,000 older the Boul among Lebanon, soft time, of at well direct of perfection as the age and the race were capable of attaining. We may rightly ask — what manner of man he was, outwardly and inwardly, who at the age of nineteen or twenty, was called to this glorious sovereignty? We have, it is true, no direct description in this case as we have of the earlier kings. There are, however, materials for filling up the gap. The wonderful impressions which Solomon made upon all who came near him may well lead us to believe that with him, as with Saul and David, Absalom and Adonijah, as with most other favorite princes of eastern peoples, there must have been the fascination and the grace of a noble presence. Whatever his mystic meaning may be latent in Ps. xlv., or the Song of Songs, we are all too compelled to think of them as having had, at least, a historical starting-point. They tell us of one who was, in the eyes of the men of his own time, "fairer than the children of men," the face "bright and ruddy" as his father's (Cant. v. 10; 1 Sam. xvii. 42), husky locks, dark as the raven's wing, yet not without a golden glow, the eyes soft as "the eyes of doves," the "countenance as Lebanon, excellent as the cedars," the "choicest among ten thousand, the altogether lovely" (Cant. 9-16). Add to this all gifts of a noble, far-reaching intellect, and large and genial humor, the lips full of grace, the soul "anointed" as "with the oil of gladness" (Ps. xlv.), and we may form some notion of what the king was like in that dawn of his golden prime.  

The same mentioned are (1) the public funds for building the Temple, 100,000 talents (kikarim) of gold and 1,000,000 of silver: (2) David's private offerings, 3,000 talents of gold and 7,000 of silver. Besides these, large sums of unknown amount were believed to have been stored up in the storehouse of David. 5,000 talents were taken from it by Hiram (1 K. vii. 15, § 3, xiii. 8, § 4, xvi. 7, § 11.

Possibly sprinkled with gold dust, as was the hair of the youths who waited on him (1 K. vii. 7, § 3), and with henna (Michaels, Not. in Lowlh, Pref. xxxii.).

It is at least the case that Solomon adopted the scheme of the older liberal school, Bezaeeet, Lovel, Michaels, rather than that of the more recent critics, Edwards, Renan, Wintring. In this way as the idea is worked out we cannot bring ourselves to believe that a drama, belonging to the literature of the northern kingdom, not with that of Judah, holding up Solomon to ridicule as at once licentious and unsuccessful, would have been treasured up by the Jews of the Captivity, and received by the Soc. of the Great Synagogue as by, or at least, in honor of Solomon (comp. Renan, Lc Coutute des Critiques, pp. 21, 95). We follow the Jesuit Pintsch (De rebus Solom.; iv. 3) in applying the language of the Shulamite to Solomon's personal appearance, but not in his extreme antiquity. The hypothesis is, however, not altogether new. It was held by some of the liberal historical school of Theodore of Mopsuestia (not by Theodore himself); as well as some of Migne, Irv., and such as is amathorized by Theob. of Cyr. (Papez. Cont. Crit.). The latter, believing the Song of Solomon to have been supernaturally dictated to Ezra, could admit no interpretation but the mystical (comp. Ginzberg, Song, p. 80). There is, however, no needless slaughter. The other "sons of David" are still spared, and
one of them, Nathan, becomes the head of a distinct family (1 Chron. xi. 12), which ultimately fills up the failure of the direct succession (Luke iii. 31). As hepunishes his father's enemies, he also shows kindness to the friends who had been faithful to him. Chaimath, the son of Barzilai, apparently receives an inheritance near the city of David, and probably in the reign of Solomon, displays his inherited hospitality by building a caravanserai for the strangers whom the fame and wealth of Solomon drew to Jerusalem (2 Sam. xix. 31-40; 1 Kings ii. 7).  Ewald, Gesch. iii. 274;  Proph. i. 191).

V. Foreign Policy.—(1.) The want of sufficient data for a continuous history has been already noticed. All that we have are (a) The duration of the reign, 40 years (1 K. xi. 42). (b) The commencement of the Temple in the 4th, its completion in the 11th year of his reign (1 Chron. xi. 37, 38). (c) The commencement of his own palace in the 7th, its completion in the 20th year (1 Kings vii. 1: 2 Chron. viii. 1). (d) The conquest of Hamath-Zobah, and the consequent foundation of cities in the region north of Palestine after the 20th year (2 Chron. viii. 4). All with materials for these, it will be better to group the chief facts in an order which will best enable us to appreciate their significance.

(2.) Egypt.—The first act of the foreign policy of the new reign must have been to meet Israelites, a very startling one. He made affinity with Pharaoeh, king of Egypt. He married Pharaoh's daughter (1 K. iv. 1). Since the time of the Edomites there had been no intercourse between the two countries, David and his counsellors had taken no steps to promote it. Egypt had probably taken part in assisting Edom in its resistance to David (1 Chron. xi. 23; Ewald, iii. 182), and had received Haddar, the prince of Edom, with royal honors. The king had given him his wife's sister in marriage, and adopted his son into his own family (1 K. xi. 14-20). These steps indicated a purpose to support him at some future time more actively, and Solomon's proposal of marriage was probably intended to counteract it. It was at the time so far successful, that when Haddar, on hearing of the death of the dreaded leaders of the armies of Israel, David and Joab, wished to seize the opportunity of attacking the new king, the court of Egypt rendered him no assistance (1 K. xi. 21, 22). The disturbances thus caused, and not less those in the North, coming from the foundation of a new Syrian kingdom at Damascus by Rezon and other fugitives (a) Josephus, again inaccurate, lengthens the reign to 80 years, and makes the age at accession 14 (Ant. viii. 7 & 8).

(b) This Pharaoh is identified by Ewald (iii. 270) with Paseusenes, the last king of the XXVth dynasty of Egypt, which had its seat in Lower Egypt at Tanis (but see Pharaoh, iii. 240 f.). Josephus (Ant. viii. 6, § 2) only notes the fact that he was the last king of Egypt to be known simply by the title Pharaoh. Ewald (c) Josephus (Ant. viii. 7, § 6), misled by the position of these statements, refers the disturbances to the close of Solomon's reign, and is followed by most later writers. The dates given, however, in one case after the death of Joab, in the other after David's conquest of Zobah, show that we must think of them as continuing "all the days of Solomon," and consequently the commencement of his reign, becoming more formidable at the conclusion.

Ewald sees in Ps. ii. 1 a great hymn of thanks from Zolah (1 K. xi. 23-25), might well lead Solomon to look out for a powerful support, to obtain for a new dynasty and a new kingdom a recognition by one of older fame and greater power. The immediate results were probably favorable enough. The new queen brought with her as a dowry the frontier-city of Gezer, against which, as threatening the tranquillity of Israel, and as still possessed by a remnant of the old Canaanites, Pharaoh had led his armies. She was received with all honor, the queen-mother herself attending to place the diadem on her son's brow on the day of his espousals (Cant. iii. 11). Gifts from the nobles of Israel and from Tyre (the latter offered perhaps by a Tyrian princess) were bestowed at her feet (Ps. xlv. 12). A separate and stately palace was built for her before long, outside the city of David (2 Chron. viii. 11). She dwelt there apparently with attendants of her own race, "the virgins that he brought," probably conforming in some degree to the religion of her adopted country. According to a tradition which may have some foundation in spite of its exaggerated numbers, Pharaoh (Pseusenes, or as in the story Vaphres) sent with her workmen to help in building the Temple, bringing with them 80,000 workmen, in End. Prep. Exeg., ii. 30-35. The "chariots of Pharaoh," at any rate, appeared in royal procession with a splendor hitherto unknown (Cant. i. 9).

(3.) The ultimate issue of the alliance showed that it was hollow and impotent. There may have been a revolution in Egypt, changing the dynasty and transferring the seat of the kingdom to Tanis (Ewald, iii. 389). There was at any rate a change of policy. The court of Egypt welcomes the fugitive Jeroboam when he is known to have aspirations after kingly power. There, we may believe, by some kind of compact, expressed or understood, was planned the scheme which led first to the rebellion of the Ten Tribes, and then to the attack of Shishak on the weakened and dismantled kingdom of the son of Solomon. Evils such as these were hardly counterbalanced by the trade opened by Solomon in the fine linen of Egypt, or the supply of chariots and horses, which, as belonging to aggressive rather than defensive warfare, a wiser policy would have led him to avoid (1 Kings x. 28, 29).

(4.) Tyre.—The alliance with the Phoenician king rested on a somewhat different footing. It had been part of David's policy from the beginning of his reign. Hiram had been "ever a lover of David." He, or his grandfather, had helped him giving for deliverance from these dangers. The evidence in favor of David's authorship seems, however, to preponderate.

a Philostratus, according to Josephus (Ant. viii. 6, § 1).

b If, with Ewald (iii. 277), we identify Gezer with Gezur, we may see in this attack a desire to weaken a royal house which was connected by marriage with David's (1 Kings viii. 11), and therefore likely to be hostile to Solomon. But comp. Gezer.

c We may see in this fact a sign of popular disatisfaction at least on the part of the Priests and Levites represented by the compiler of 2 Chron. The singular omission of the LXX. to the history of Jeroboam in 1 K. x. makes this improbable. Jeroboam, as well as Haddar, is received into the king's family by marriage with his wife's sister; and, in each case, the wife's name is given as Thubalina.

d Comp. the data given in 2 Sam. vii. 11; Joseph
by supplying materials and workmen for his palace. As soon as he heard of Solomon's accession he sent ambassadors to salute him. A correspondence roused between the two kings, which ended in a treaty of commerce.\(^3\) Israel was to be supplied from Tyre with the materials which were wanted for the Temple that was to be the glory of the new reign. Gold from Ophir, cedar-wood from Lebanon, probably also copper from Cyprus and tin from Spain or Cornwall (Neh. iii. 79) for the brass which was so highly valued, purple from Tyre itself, workmen from among the Zidonians, all these were wanted and were given. The opening of Joppa as a port created a new coasting-trade, and the materials from Tyre were conveyed to it on floats, and thence to Jerusalem (2 Chr. ii. 16). The chief architect of the Temple, though an Israelite on his mother's side, belonging to the tribe of Dan or Naphtali (1 Kings), was yet by birth a Tyrian, a namesake of the king. In return for these exports the Phoenicians were only too glad to receive the corn and oil of Solomon's territory. Their narrow strip of coast did not produce enough for the population of their cities, and them, as at a later period, "their country was starved"\(^4\) by the broad valleys and plains of Samaria and Galilee (Acts xii. 20).

(5.) The results of the alliance did not end here. Now, for the first time in the history of Israel, they entered on a career as a commercial people. They joined the Phoenicians in their Mediterranean voyages to the coasts of Spain (†TARSHISH).\(^5\) Solomon's possession of the Edomite coast enabled him to open to his ally a new world of commerce. The ports of Elath and Ezion-geber were fitted with ships of Tarshish, merchant-ships, i.e. for the long voyages, manned chiefly by Phoenicians, but built at Solomon's expense, which sailed down the Eudamitic Gulf of the Red Sea, to the Indian Ocean, to lands which had before been hardly known even by name, to Orthus and Sihira, to Arabia Felix, or Hadhramaut, or Ceylon, and brought back, after an absence of nearly three years, treasures almost or altogether new, gold and silver and precious stones, nard, aloes, sandal-wood, almug-trees, and ivory; and, last but not least in the eyes of the historian, terebinth, an animal life, on which the inhabitants of Palestine gazed with wondering eyes, "apes and peacocks." The interest of Solomon in these enterprises was shown by his leaving his palaces at Jerusalem and elsewhere, and travelling to Elath and Ezion-geber to superintend the construction of the fleet (2 Chr. viii. 17), perhaps also to Sidon for a like purpose.\(^6\) To the knowledge thus gained, we may ascribe the wider thoughts which appear in the Psalms of this and the following periods, as of those who "see the wonders of the deep and occupy their business in great waters." (Psa. cvii. 23-30), perhaps also an experience of the more humiliating accidents of sea-travel (Prov. xxiii. 34, 35).

(6.) According to the statement of the Phoenician writers quoted by Josephus (Ant. viii. 5, § 3), the intercourse of the two kings had in it also something of the sportiveness and freedom of friends. They delighted to perplex each other with hard questions, and laid wagers as to their power of answering them. Hiram was at first the loser and paid his forfeits; but afterwards, through the help of a sharp-witted Tyrian boy, Abdon, solved the hard problems, and was in the end the winner.\(^7\) The singular fragment of history inserted in 1 K. ix. 11-14, recording the cession by Solomon of sixteen [twenty] cities, and Hiram's dissatisfaction with them, is perhaps connected with these imperial wagers. The king of Tyre resolves himself by a Phoenician bon-mot [CARIO]. He fulfills his part of the contract, and pays the stipulated price.

(7.) These were the two most important alliances. The absence of any reference to Babylon and Assyria, and the fact that the Pharaohs were recognized as the boundary of Solomon's kingdom (2 Chr. ix. 26), suggest the inference that the Mesopotamian monarchies were, at this time, comparatively feeble. Other neighboring nations were content to pay annual tribute in the form of gifts (2 Chr. ix. 21). The kings of the Hittites and of Syria welcomed the opening of a new line of commerce which enabled them to find in Jerusalem an emporium where they might get the chariots and horses of Egypt (1 K. ix. 28). This, however, was obviously but a small part of the traffic organized by Solomon. The foundation of cities like Tadmor in the wilderness, and Tiphah (Thapsacus) on the Euphrates; of others on the route, each with its own market for chariots, or horses, or stones (2 Chr. vii. 2-4); the erection of lofty towers on Lebanon (2 Chr. l. c.; Cant. vii. 4) pointed to a more distant commerce, opening out the resources of central Asia, reaching, as it did, to the ports of the Caspian and the Black Sea, to Tarsus and Meshech and Tubal (Ez. xxii. 23, 14; comp. Milman, _Hist. of the Jews_, i. 270).

(8.) The survey of the influence exercised by Solomon on surrounding nations would be incomplete if we were to pass over that which was more directly personal — the fame of his glory and his wisdom. The legends which pervade the East are probably not merely the expansion of the scanty notices of the O.T., but (as suggested above), like those which gather round the names of Nimrod and Alexander, the result of the impression made by the personal presence of one of the mighty ones of the

---

\(^3\) Ant. vii. 3. § 2, viii. 5, § 3, c. Ap. i. 18, and Ewald, in loc.

\(^4\) The letters are given at length by Josephus (Ant. vii. 2, § 3) and Euseb (Kusseb. Prop. Ev. 1. c. 345).

\(^5\) Ewald disputes this (iii. 245), but the statement in 2 Chr. ix. 21, is explicit enough, and there are no grounds for arbitrarily seeing it as absurd. A blunder.

\(^6\) The statement of Justin Mart. (Ref. Doct. c. 14) in Solomonis decem librorum, receives by the accompanying ἀπὸ γεγονότος the character of an extract from some history then extant. The marriage of Solomon with a daughter of the king of Tyre is mentioned by a good historian (Prop. Euseb. i. 11).

\(^7\) D The narrative of Josephus implies the existence of some story, more or less luminous, in Tyrian literature, in which the visit of the kings of earth was hailed by a boy's cleverness. A singular pendant to this is found in the popular medieval story of Solomon and Moroif, in which the latter (an ugly, deformed dwarf) outshines the former. A modernized version of this work, an imitation of the Story of the Wise Man, by W. Y. Long, appeared in 1844. Older copies, in Latin and German, of the 15th century, are in the Brit. Mus. Library. The Anglo-Saxon Dialogue of Solomon and Saturn is a more cautious statement of Scriptural knowledge.
earth." Wherever the ships of Tarshish went, they carried with them the report, losing nothing in its passage, of what their crews had seen and heard. The impression made on the Incas of Peru by the power and knowledge of the Spaniards, offers perhaps the nearest approach to what falls so little within the limits of our experience, though there was there no personal centre round which the admiration could gather itself. The journey of the queen of Sheba, though from its circumstances the most conspicuous, did not stand alone. The inhabitants of Jerusalem, of the whole line of country between it and the Gulf of Akaba, saw with amazement the "great train"—the men with their swarthy faces, the camels bearing spices and gold and gems—of a queen who had come from the far South, because she had heard of the wisdom of Solomon, and connected with it the name of Jehovah (1 K. x. 1). She came with hard questions to test that wisdom, and the words just quoted may throw light upon their nature. Not riddles and enigmas only, as the sporting fancies of the best delicats in, but the ever-present ever-new problems of life, such as, even in that age and country, were vexing the hearts of the speakers in the book of Job; she was stirring in her mind when she commended with Solomon of "all that was in her heart" (2 Chr. ix. 1). She meets us as the representative of a body whom the dedication-prayer shows to have been numerous, the strangers "coming from a far country" because of the "great name" of Jehovah (1 K. viii. 41), many of them princes themselves, or the messengers of kings (2 Chr. ix. 23). The historians of Israel delighted to dwell on her confession that the reality surpassed the fame, "the one half of the greatness of thy wisdom was not told me" (2 Chr. ix. 6; Ewald, iii. 353).

VI. Internal History. (1.) We can now enter upon the reign of Solomon, in its bearing upon the history of Israel, without the necessity of a digression. The first prominent scene is one which presents his character in its noblest aspect. There were two holy places which divided the reverence of the people, the ark and its provisional tabernacle at Jerusalem, and the original Tabernacle of the congregation, which, after many wanderings, was now pitched at Gibbon. It was thought right that the new king should offer solemn sacrifices at both. After those at Gibbon there came that vision of the night which has in all ages borne its noble witness to the hearts of rulers. Not for riches, or long life, or victory over enemies, would the son of David, then at least true to his high calling, feeling himself as "a little child" in comparison with the vastness of his work, offer his supplications, but for a wise and understanding heart," that he might judge the people. The "speech pleased the Lord." There came in answer the promise of a wisdom "like which: there had been none before, like which there should be none after" (1 K. iii. 5-15). So far all was well. The prayer was a right and noble one. Yet there is also a contrast between it and the prayers of David which accounts for many other contrasts. The desire of David's heart is not chiefly for wisdom, but for holiness. He is conscious of an oppressing evil, and seeks to be delivered from it. He repents, and fall, and repents again. Solomon asks only for wisdom. He has a lofty idea before him, and seeks to accomplish it, but he is as yet haunted by no deeper yearnings, and speaks as one who has "no need of repentance."

(2.) The wisdom asked for was given in large measure, and took a varied range. The wide world of nature, animate and inanimate, which the enterprises of his subjects were throwing open to him, the life within the animal and external, the weaknesses, in all their inner depths, lay before him, and he took cognizance of all. But the highest wisdom was that which wanted for the highest work, for governing and guiding, and the historian hastens to give an illustration of it. The pattern-instance is, in all its circumstances, thoroughly oriental. The king sits in the gate of the city, at the early dawn, to settle any disputes, however strange, between any litigants, however humble. In the rough and ready test which turns the scales of evidence, before so evenly balanced, there is a kind of rough humor as well as sagacity, specially attractive to the eastern mind, and then at all times (1 K. iii. 19-28).

(3.) But the power to rule showed itself not in judging only, but in organizing. The system of government which he inherited from David received a fuller expansion. Prominent among the "princes" of his kingdom, i.e. officers of his own appointment, were members of the priestly order: Azariah the son of Zadok, Zadok himself the high-priest, Bezalel the son of Jehoshua as captain of the host, another Azariah and Zadok, the sons of Nathan, one over the officers (Nittathu) who acted as purveyors to the king's household (1 K. iv. 2-5), the other in the more confidential character of "king's friend." In addition to these there were the two scribes (Siphe'tim), the king's secretaries, drawing up his edicts and the like (Scribes), Eliezer and Ahiah, the recorder or annalist of the king's reign (Moscheth), the superintendent of the king's house, and house-
bold expenses (Is. xxii. 15), including probably the harén. The last in order, at once the most indis- pensable and the most hated, was Adoniram, who presided "over the tribute," that word including probably the personal service of forced labor (comp. 2 K. xiv. 24, etc., and Ewald, loc. cit., ii. 344).

(4.) The last name leads us to the king's finances. The first impression of the facts given us is that of abounding plenty. That all the drinking vessels of the two palaces should be of pure gold was a small thing, "nothing accounted of in the days of Solomon" (1 K. x. 21). "Silver was in Jeru- salem as stones, and cedars as sycamore-trees in the street of the city." The people were "eating, and drinking and making merry" (1 K. iv. 20). The treasures left by David for building the Temple might well seem almost inexhaustible (1 Chr. xxix. 1-7). The large quantities of the precious metals imported from Ophir and Tarshish would speak, to a people who had not learned the lessons of a long experience, of a boundless source of wealth (1 K. ix. 21).

All the kings and princes of the subject-provinces paid tribute in the form of gifts, in money and in kind, "at a fixed rate year by year" (1 K. x. 25). Monopolies of trade, then, as at all times in the East, contributed to the king's treasury, and the trade in the fine linen, and caravans, and horses of Egypt, must have brought in large profits (1 K. x. 28, 29). The king had "domain-lands extended outwards, as vineyards or for other purposes, at a fixed annual rental (Cant. viii. 11). Upon the Israelites (probably not till the later period of his reign) there was levied a tax of ten per cent. on their produce (1 Sam. xviii. 15). All the provinces of his own kingdom, grouped apparently in a special order for this purpose, were bound each in turn to supply the king's enormous household with provisions (1 K. iv. 21-23). [Comp. Taxes.] The total amount thus brought into the treasury in gold, exclusive of all payments in kind, amounted to 666 talents (1 K. x. 14).5

(5.) It was hardly possible, however, that any financial system could bear the strain of the king's passion for magnificence. The cost of the Temple was not a true, but provided for by David's savings and the offerings of the people; but even while that was building, yet more when it was finished, one struc-

a A reminiscence of this form of splendor is seen in the fact that the melechah goldsmith described their earliest plate as "œuvre de Solomon." It was wrought in king's behalf, was eaten in its origin, and was known also as Saracen (Liber Custumatorum, i. 61, 759).

6 We labor, however, under a twofold uncertainty, (1) as to the accuracy of the numbers, (2) as to the value of the terms. Probable, followed by Lewis, es- timates the amount at £528,000,000, yet the savings of the later years of David's life, for one special purpose, could hardly have surpassed the national debt of England (comp. Maurice's Hist. of Judea, i. 237).

6 (9). There is something starting in this finding in a simple historical statement a number which has since become invested with such a mysterious and terrible significance (Rev. xvi. 18). The coexist- ence, Cantor, loc. cit., and Ewald, "would not be there of itself." "The Seer of the Apocalypse," it has been well said, "lives entirely in Holy Scripture. On this territory, therefore, is the solution of the sacred riddle to be sought." (Hengstenberg, Comm. on Rev. in loc.) If, therefore, we find the number occurring in the O.T., with any special significance, we may well think that this furnishes the starting-point of the enigma. And there is such a significance here. (1.) As the glory and the wisdom of Solomon were the representatives of all earthly wisdom and glory, so the wealth of Solomon would be the representative of all earthly wealth. (2.) The purpose of the visions of St. John is to oppose the heavenly to the earthly Jerusalem; the true "olive-tree of David," the "lion of the tribe of Judah," to all counterfeiters; the true riches to the false. (3.) The worship of the beast is the worship of the world's mammon. It may seem to represent the glory and the wealth of the old Jerusalem in its golden days, but it is of evil, not of God; a Babylon, not a Jerusalem. (4.) This reference does not of course exclude either the mystical meaning of the number six, so well brought out by Hengstenberg (loc. c.) and Mr. Maurice (on the Apocalypse, p. 251), or even names like Locrinus and Nero Caesar. The greater the variety of thoughts that could be con- nected with the number six, the more assuredly it can- not be confined to itself, and to all familiar with the method of the Gematria of the Jewish cabalists.

9 Punicus' conjecture (iii. 28) that "the house with seven pillars" is "the highest places of the city," of Prov. i. 5-9, had originally a local reference is, at least, plausible enough to be worth mentioning. It is curious to think that there may have been a historica-

Solomon's house," like that of the New Atlantis.
thousand horsemen made up the measure of his magnificence (1 K. iv. 26). If some of the public works had the plea of utility, the fortification of some cities for purposes of defense — Millo (the suburb of Jerusalem), Hazor, Megiddo, the two Lebib fortresses, the foundation of others, Tadmor and Tiphshah, for purposes of commerce — these were simply the pangs of a selfish luxury, and the people, after the first dazzle was over, felt that they were so. As the treasury became empty, taxes multiplied and monopolies became more irksome. Even Israélites, besides the conception which brought them into the king's armies (1 K. ix. 22), were subjected to what was for a part only a tax, a tax to the core of compulsory labor (1 K. v. 13). The revolution that followed had, like most other revolutions, financial disorder as the chief among its causes. The people complained, not of the king's idolatry, but of their burdens, of his "grievous yoke" (1 K. xii. 4). Their hatred fell heaviest on Adonijah, who was over the tribute. If, on the one side, the division of the kingdom came as a penalty for Solomon's idolatrous apostasy from Jehovah, it was, on another, the Nemesis of a selfish passion for glory, itself the most terrible of all idolatries.

(6) It remains for us to trace that other downfall, belonging more visibly, though not more really, to his later life, from the loftiest height even to the lowest depth. The building and dedication of the Temple are obviously the representatives of the first. That was the special task which he inherited from his father, and to that he gave himself with all his heart and strength. He came to it with all the noble thoughts as to the meaning and grounds of worship which his father and Nathan could instil into him. We have already seen, in speaking of his intercourse with Tyre, what measures he took for its completion. All that can be said as to its architecture, proportions, materials [Temple], and the organization of the ministering priests and Levites, will be found elsewhere. Here it will be enough to picture to ourselves the feelings of the men of Judah as they watched, during seven long years, the 'peculiar embellishments of the Temple,' its towers and doors, its gates and chambers, advancing gradually, step by step, reaching at last when all else has perished, Ewald, iii. 257] gradually rising up and covering the area of the threshing-floor of Araunah, materials arriving continually from Joppa, cedar, and gold and silver, brass "without weight" from the foundries of Sochoth and Zarethan, stones ready hewn and squared from the quarries. Far from colossal in its size, it was proportionately chief by the lavish use, within and without, of the gold of Ophir and Parvaim. It glittered in the morning sun (it has been well said) like the sanctuary of an El Dorado (Millman, Hist. of Joræ, i. 250). Throughout the whole work the tranquillity of the kingly city was unbroken by the sound of the workman's hammer: "Like some tall palm, the noiseless fabric grew."

(7) We cannot ignore the fact that even now there were some darker shades in the picture. Not reverence only for the Holy City, but the wish to shut out from sight the misery he had caused, to clothe his ears against cries which were rising daily to the ears of the Lord of Sabaoth, led him probably to place the works connected with the Temple at great a distance as possible from the Temple itself. Forgetful of the lessons taught by the history of his own people, and of the precepts of the Law (Ex. xxvii. 21, xxviiii. 9, et al.), following the example of David's policy in his last, noble aspect (1 Chr. xxiii. 2), he reduced the "strangers" in the land, the remnant of the Canaanite races who had chosen the alternative of conformity to the religion of their conquerors, to the state of helots, and made their life "bitter with all bondage." a

a Ewald's apology for these acts of despotism (ibid. 252) presents a singular contrast to the free spirit which, for the most part, pervades his work. Throughout his history of David and Solomon, his sympathy for the father's heroism, his admiration for the son's magnificence, seem to keep his judgment under a function which it is difficult for his readers to escape from.
the congregation, offers up the solemn prayer, dedicates the Temple. He, and not any member of the prophetic order, is then, and probably at other times, the spokesman and 'prophet' of the people (Ewald, ii. 520). He takes at least some steps towards that far-off (Ps. cx. 1) ideal of 'a priest after the order of Melchizedek,' which one of his descendants rashly sought to fulfill [Yezzi], but which was to be fulfilled only in a Son of David, not the crowned leader of a mighty nation, but despised, rejected, crucified. From him came the lofty prayer, the noblest utterance of the creed of Israel, setting forth the distance and the nearness of the Eternal God, One, Incomprehensible, dwelling not in temples made with hands, yet ruling men, hearing their prayers, giving them all good things, wisdom, peace, righteousness.\\n
(9.) The solemn day was followed by a week of festival, synchronizing with the Feast of Tabernacles, the time of the completed vintage. Representatives of all the tribes, elders, fathers, captains, proplexes, it may be, from the newly acquired territories in Northern Syria (2 Chr. vi. 32, vii. 8), were all assembled, rejoicing in the actual glory and the bright hopes of Israel. For the king himself then, or at a later period (the narrative of 1 K. ix. and 2 Chr. vii. leaves it doubtful), there was a strange contrast to the glory of that day. A criticism of a sentence has led to a warning prophecy of sin, punishment, desolation, only a vaticiniam ex ceceitu, added some centuries afterwards (Ewald, iii. 494). It is open to us to maintain that, with a character such as Solomon's, with a religious ideal so far beyond his actual life, such thoughts were psychologically probable, that strange misgivings, suggested by the very words of the jubilant hymns of the day's solemnity, might well mingle with the shouts of the people and the hallelujahs of the Levites. In harmony with all we know of the work of the Divine Teacher, that those misgivings should receive an interpretation, that the king should be taught that what he had done was indeed right and good, but that it was not good, and might not be permanent, unless the people were warned against the sources of sin and wickedness. Solomon was then a danger near hand.

(10.) The danger came, and in spite of the warnings the king fell. Before long the priests and prophets had to receive over rival temples to Moloch, Chemosh, Ashhtaroth, forms of ritual not idolatrous only, but cruel, dark, impure. This evil came, as the compiler of 1 K. xii. 1-8 records, as the penalty of another. Partly from policy, seeking fresh alliances, partly from the terrible necessity of lessening the stimulus of change, he gave himself to 'strange women.' He found himself involved in a fascination which led to the worship of strange gods. The starting-point and the goal are given us. We are left, from what we know otherwise, to trace the process. Something there was perhaps in his very 'largeness of heart,' so far in advance of the traditional knowledge of his age, rising to higher and wider thoughts of God, which predisposed him to it. His converse with men of other creeds and climes might lead him to anticipate, in this respect, one phase of modern thought, as the confessions of the Preacher in Koheleth anticipate another. In reconciling faith that was the true faith, the forms of faith, he might lose his horror at what was false, his sense of the preeminence of the truth revealed to him, of the historical continuity of the nation's religious life. His worship might go backward from Jehovah to Elohim, c from Elohim to the 'Gods many and Lords many' of the nations round. Jehovah, Baal, Ashhtaroth, Chemosh, each form of nature-worship, might come to seem equally true, equally acceptable. The women whom he brought from other countries might well be allowed the luxury of their own superstitions. And, if permitted at all, the worship must be worthy of his fame and be part of his magnificence. With this there may, as Ewald suggests (iii. 380), have mingled political motives. He may have hoped, by a policy of toleration, to consolidate neighboring princes, to attract a larger traffic. But probably also there was another influence less commonly taken into account. The wide-spread belief of the East in the magic arts of Solomon is not, it is believed, without its foundation of truth. On the one hand, an ancient study of nature, in the period that precedes science, runs on inevitably into the pursuit of marvellous and mysterious properties. On the other, throughout the whole history of Joshua, the element of idolatry which has the strongest hold on men's minds was the thummaturge, soothsaying, incantations, divinations (2 K. i. 2; Is. ii. 6; 2 Chr. xxxiii. 8, et al.). The religion of Israel opposed a stern prohibition to all such perils yet tempting arts (Heut. xviii. 14, et al.). The religions of the nations round fostered them. Was it strange that one who found his progress impeded in one path should turn into the other? So, at any rate it was. The reign which began so gloriously was a step backwards into the gross darkness of fetish-worship. As he left behind him the legacy of luxury, selfishness, oppression, more than enough to weigh upon all the good of his kingdom, and wider knowledge, so he left this too as an inexcusable evil. Not less truly than the son of Nebat might his name have been written in history as Solomon the son of David who 'made Israel to sin.'\\n
(11.) Disasters followed before long as the natural consequence of what was politically a blunder as well as religiously a sin. The strength of the nation rested on its unity, and its unity depended on its faith. Whatever attractions the sensuous ritual which he introduced may have had for the great body of the people, the priests and Levites must have looked on the rival worship with entire disfavor. The zeal of the prophetic order, dormant in the earlier part of the reign, and as it were, hindered from its usual utterances by the more dazzling wisdom of the king, was now kindled into active opposition. Ahijah of Shiloh, as if taught by the history of his native place, was sent to utter

a Ewald, yielding to his one special weakness, sees in this prayer the rhetorical addition of the Deuteronomist editor (iii. 315).

b Ps. cxxxii. belongs manifestly comp. vv. 7, 8, 10, 16, with 2 Chr. vi. 41, to the day of dedication.\\n
c It is noticeable that Elohim, and not Jehovah, is the Divine name used throughout Ecclesiastes.

d To see, however, as Ewald does, in Solomon's policy nothing but a wise toleration like that of a modern statesman in regard to Christian sects, or of the English Government in India, is surely to read history through a reflecting and distorting medium.
one of those predictions which help to work out their own fulfillment, fastening on thoughts before vague, pointing Jeroboam out to himself and to the people as the destined heir to the larger half of the kingdom. He was truly called as David's eldest child, to be the anointed of the Lord (1 K. xi. 28-33). The king in vain tried to check the current that was setting strong against him. If Jeroboam was driven for a time into exile it was only, as we have seen, to be united in marriage to the then reigning dynasty, and to come back with a daughter of the Pharaoh as his queen (1 K. x. 14 sq.). The old tribal archy foreseen in the setting up of a body of elders, suggested by the Pharaoh, to the Ephraim was prepared once more to dispute the supremacy of Judah, needing special control (1 K. xi. 28). And with this weakness within there came attacks from without. Hadad and Rezon, the one in Edom, the other in Syria, who had been foiled in the beginning of his reign, now found no effectual resistance. The king, prematurely old,1 must have foreseen the rapid breaking up of the great monarchy to which he had succeeded. Rechobam, inheriting his faults without his wisdom, haughty and indiscreet, was not likely to avert it.

(12) Of the inner changes of mind and heart which ran parallel with this history, Scripture is comparatively silent. Something may be learned from the books that bear his name, which, whether written by him or not, stand in the Canon of the O. T. as representing, with profound, inspired insight, the successive phases of his life: something also from the fact that so little remains out of so much, out of the songs, proverbs, treatises of which the historian speaks (1 K. iv. 32, 33). Legendary as may be the traditions which speak of Hezekiah as at one and the same time preserving amongst portions of Solomon's writings (Prov. xxi. 1), and destroying others,1 a like process of selection must have been gone through by the unknown Rabbis of the great Synagogue after the return from the exile. Slowly and hesitatingly they received into the Canon, as they went on with their unparalleled work of the expurgation by a people of its own literature, the two books which have been the stumbling-blocks of commentators, Ecclesiastes and the Song of Songs (Ginsburg, Koheloth, pp. 13-15). They are, however, rather than that of Rechobam. Of the thousand and five Songs (the precise number indicates a known collection) we know absolutely nothing. They were willing, i.e., to admit Koheloth for the sake of its ethical conclusion; the Song of Songs, because at a very early period, possibly even then, it had received a mystical interpretation (Keil, Einleit. in das All. Text. p. 127), because, with the law, the prophetic, the cultic, and even the mystical, the Song of Songs was a natural document to find its way into the collection of passages suitable for the synagogue, and even of a higher character. It is easy to see that there are elements in that poem, the strong delight in visible outward beauty, the surrender of the heart and will to one overpowering impulse, which might come to be divorced from truth and purity, and would then be perilous in proportion to their grace and charm. Such a divorce, we may suppose, is already noticed in the actual life of Solomon. It could not fail to leave its stamp upon the idylls in which feeling and fancy uttered themselves. The poems of the Son of David may have been like those of Hafiz. The Scribes who compiled the Canon of the O. T. may have acted wisely, rightly, charitably to his fame, in excluding them.

(15) The books that remain unread, as has been said, as at any rate, representing the three stages of his life. The Song of Songs brings before us the brightness of his youth, the heart as yet untainted, human love passionate yet undefiled, and therefore becoming, under a higher inspiration, half-consciously it may be to itself, but, if not, then unconsciously for others, the parable of the soul's affections. (c) (A 'ANT' THEES.) Then comes in the book of Proverbs, the stage of practical, prudent thought, searching into the recesses of man's heart, seeing duty in little things as well as great, setting all duty on the fear of God, gathering from the wide lessons of a king's experience, lessons which mankind could ill afford to lose.2 The poet has

1 Solomon's age at his death could not have been more than fifty-nine or sixty, yet it was not till he was "old" that his wives prevailed over him (1 K. xi. 4).

2 Hezekiah found, it was said, formule for the cure of disease-encephalopathy of the dogs-pets of the Temple, and destroyed them because they drew men away from the worship of Jehovah (Stuhlm. S. c. Egesig). Strange as the history is, it has a counterpart in the complaint of the writer of 2 Chr. xvi. 12, that Aza "sought not to the Lord but to the physicians." There was a rivalry in the treatment of disease between the priests and prophets on this very subject ('comp. Is. xxxvii. 21), and in this respect the charlatan-priests on the one ('comp. also 2 K. i. 2)?

3 The Song of Songs, however, was never read publicly, either in the Jewish or the Christian Church; nor in the former were young men allowed to read it at all (Theod. Cyriac. Probat. in Cant. Cont.; Theod. Mops. p. 159 in Migne).

4 We rest on this as the necessary condition of all deeper interpretation. To argue, as many have done, that the mystical sense must be the only one because the literal would be insupportable, is simply to "bring a clean thing out of an unclean," to assert that the Divine Spirt would choose a love that was baseless and impure as the fitting parable of the holiest. Much rather may we say with Herder (Gest. der Ehr. Poeten, Dari. vi.), that the poem, in its literal sense, is one which "might have been written in Paradise." The man and the woman are, as in their primal innocence, loving, loving and beloved, thinking no evil, "naked and not ashamed." 5 We adopt the older view of Loewth (Probt. xxxii., xxiii.) of the Song of Songs, rather than that of Rosen and Ewald, which almost brings down a noble poem to the level of an operatic ballet at a Parisian theatre. Theodore of Mopsuestia (I. c.) had, at least, placed it on a level with the Sursum Corda of Plato. The theory of Michaelis (Not. in Loewth, xxxii.) that it represents a young husband and his favorite bride hindered, by harrow jealousies or regulations, from free intercourse with each other, seems to us preferable, and connects itself with the identification of the Shulammite with Abi-shina, book-heroes.

6 The final curse of Canailec, "It has been well said, "was that it might be a field in which mysticism could dispose itself"? (Bishop Jebb, Correspond. with Knox, I. 245.) The truth of the "great mystery," which thus connects divine and human love, are indeed to be found everywhere, in the Targums of Rabbes, in the writings of Fathers, Schoolmen, Puritans, in the poems of Mystics like Novalis, Jehalebin Rumi, Saadi (comp. Tholuck, Margenot. Mystik. pp. 55, 257). It appears in its highest form in the Vita Nera of Dante, purified by Christian feeling from the sensuous element which in eastern writers too readily intrudes with it. Of all strange assertions, that of Reinhart, that mysticism of this kind is foreign to the Shemitic character, is perhaps about the strangest (Cont. des Cant. p. 139).

7 Both in Ecclesiastes (i. 8-12) and yet more in
become the philosopher, the mystic has passed into the moralist. But the man passed through both stages without being permanently the better for either. They were to him but phases of his life which he had known and exhausted (Eccles. i., ii.). And therefore there came, as in the Confessions of the Preacher, the great retribution. The "sense that wore with time" avenged the "crime of sense."

There fell on him, as on other crowned voluptuaries, the weariness which sees written on all things Vainy of Vanities. Slowly only could he recover himself from that "extinction of spirit," and the recovery was incomplete. It was not as the strong burst of penitence that brought to his father David the assurance of forgiveness. He could not rise to the height from which he had fallen, or restore the freshness of his first love. The weary soul could only lay by again, with slow and painful relapses, the foundations of a true morality [comp. Ecclesiastes].

(14.) Here our survey must end. We may not enter into the things within the vail, or answer either way the doubting question, Is there any hope? Others have not shrunk from debating that question, deciding, according to their formula, that he did or did not fulfill the conditions of salvation so as to justify those whom they had placed upon the judgment-seat. It would not be profitable to give references to the patristic and other writers who have dealt with this subject. They have been elaborately collected by Calmet (Diction. s. v. Solomon, Nouvell. Diction. de la salut du Sol.) It is noticeable and characteristic that Chrysostom and the theologians of the Greek Church are, for the most part, favorable to Augustine and those of the Latin, for the most part, adverse to his claims of salvation. b

VII. Legends. — (1.) The impression made by Solomon on the minds of later generations, is shown in its best form by the desire to claim the sanction of his name for even the noblest thoughts of other writers. Possible in Ecclesiastes, certainly in the Book of Wisdom, we have instances of this, free from the vicious element of an apocryphal literature. Before long, however, it took other forms. Round the facts of the history, as a nucleus, there gathers a whole world of fantastic fables, Jewish, Christian, Mohammedan, refractions, colored and distorted, according to the media through which they pass, of a colossal form. Even in the Targum of Ecclesiastes we find strange stories of his character. He and the Rabbis of the Sanhedrin sat and drank wine together in Jabin. His porridge was filled with costly trees which the evil spirits brought him from India. The casuistry of the Rabbis rested on his dicta. Ashamed, the king of the demons, de- prived him of his magic ring, and he wandered through the cities of Israel, weeping and saying, 1. the presbyter, was king over Israel in Jerusalem (Ginsburg, Kiddelevh, App. i. ii.; Koran, Sur. 38). He let behind him spells and charms to cure diseases and cast out evil spirits; and for centuries, incantations bearing his name were the special boast of all the "vagabond Jew exorcists who swarmed in the cities of the empire (Jos. Ant. viii. 2, § 5; Just. Mart. Respons. id Ortob. p. 55; Orig., Comm. in Matt. xxvi. 3). His wisdom enabled him to interpret the speech of beasts and birds, a gift shared afterwards, it was said, by his son Hiram (Herod. ii. 218). Solomon was the inventor of the Syriac and Arabian alphabet (Tibi. 1014).

(2.) Arabic imagination took a yet wider flight. After a long struggle with the rebellions Axrets and Jines, Solomon conquered them and cast them into the sea (Lane, Arabia Nights, i. 36).

The remote pre-Adamic past was peopled with a succession of forty Solomons, ruling over different races, each with a shield and sword that gave them sovereignty over the Jews. To Solomon himself belonged the magic ring which revealed to him the past, the present, and the future. Because he stayed his march at the hour of prayer instead of passing over it, God gave him the winds as a charriot, and the birds flew over him, making a perpetual canopy. The demons in their spite wrote books of magic in his name, but he, being wise of heart, seized them and placed them under his throne, where they remained till his death, and then the demons again got hold of them and scattered them abroad (D'Herber, s. c. Solomon ben David;" Koran, Sur. 21). The visit of the Queen of Sheba furnished some three or four romances. The Koran (Sur. 27) narrates her visit, her wonder, her conversion to the Islam, which Solomon professed. She appears under three different names, Nicaule (Calmet, Dict. s. v., D'Herber), Makkis (D'Herber, s. c.), Makeda (Vineda, v. 14). The Arabs claim her as belonging to Yemen, the Edith-now as coming from Mecc. In each form of the story a son is born to her, which calls Solo- mon his father, in the Arab version Melek, in the Ethiopian David, after his grandfather, the ancestor of a long line of Ethiopian kings (Ludolf, Hist. Ethip. ii. 3, 4, 5). Twelve thousand Hebrews accompanied her on her return home, and from them were descended the Jews of Ethiopia, and the great Praetor John (Presbyter Joannes) of mediaval travellers (D'Herber, l. c.; Vineda, l. c.; Corylus, Diss. de regia Austr. in Meuten's Tascwars, l.). She brought to Solomon the self-same gifts which the Magi afterwards brought to Christ. [Magi] One at least of the hard questions with which she was rescued from oblivion. Fabulists and sturdy girls were dressed up by her exactly alike so that no eye could distin-

b How deeply this question entered into the hearts of medieval thinkers, and in what the noblest of them all decided it, we read in the Deina Conform.: —

"La quieta luce che tra noi piu bella Super di tal amor, che tutto il mondo" Lughe ne gola di super moltella.

Paradiso, x. 93.

The "pira di tal amor," refers, of course, to the Song of Solomon.

c The name of a well-known plant, Solomon's seal (Convallaria Majalis), perpetuates the old belief

Pros nisus (i. 11-17, vii. 6-22) we may find traces of experiences gained in other ways. The graphic picture of the life of the robbers and the prostitutes of an eastern city could hardly have been drawn but by one who is familiar with Haroum there as with other oriental kingdoms, at times laid aside the trappings of royalty, and plunged into the other extreme of social life, that so he might gain the excitement of a fresh sensation.

a. "A taste for pleasure is externally true in the King's heart (Louis XIV.). Age and devotion have taught him to make serious reflections on the vanity of everything he was formerly fond of" (Minue de Maintenon's Letters, p. 261).
guish them. The king placed water before them and made them wash, and then when the boys scrubbed their faces and the girls stroked them softly, he made out which were which (tyless, Anath, in Fabricius, l. c.). Versions of these and other legends are to be found also in Well, Bibl. Legens, p. 171; First, Peribochiææ, c. 36.

(3.) The name of Solomon spread northward and eastward to Persia. At Shiraz they showed the Herov-Salemius, or tomb of Bath-shева, and that Persepolis had been built by the Jains at his command, and pointed to the Takhti-i-Salemi (Solomon's throne) in proof. Through their spells too he made his wonderful journey, breakfasting at Persepolis, dining at Bad-pee, stopping at Jerusalem (Chardin, iii. 135, 143; Ouseley, ii. 41, 457). Persian literature, while it had no single life of David, boasted of countless histories of Solomon, the Sulaiman Namah, in eighty books, ascribed to the poet Firdusi (D'IHerbelot, l. c.; Chardin, iii. 198). In popular belief he was confounded with the great Persian hero, Djeschid (Ouseley, ii. 64).

(4.) As might be expected, the legends appeared in their closest and fullest form in Europe, losing all but their master, the mere appendages of the most detectable of Apocrypha, Books of Magic, a Hygro- mancean, a Contradictio Salomonean (whatever that may be) condemned by Geselius, Incanentiones, Clavdia, and the like. One pseudepigraph work has a somewhat higher character, the Peri- saliun Salomonean, altogether without merit, a mere copy from the Psalms of David, but not otherwise offensive (Fabricius, i. 917; Tegelius, Intro. to N. T. p. 154), and therefore attached sometimes, as in the great Alexandrian Codex, to the sacred volume. One strange story meets us from the omnivorous Note-book of Bele. Solomon did repent, and in his contrition he offered himself to the Sunehrid, doing penance, and they scourged him five times with rods, and then he traveled in sackcloth through the cities of Israel, saying as he went: 'Give alms to Solomon (Bele, de Sylon, ap. Pindar).

VIII. New Testament. — We pass from this wild jarriage of Jewish and other fables, to that which presents the most entire contrast to them. The teaching of the N. T. adds to nothing the materials for a life of Solomon. It enables us to take the truest measure of it, in the eyes of men, a less varied range: but deeper, truer, purer, because united with purity, victory over temptation, self-sacrifice, the true large-heartedness of sympathy with all men. On the lowest view which serious thinkers have ever taken of the life of Jesus of Nazareth, they have owned that there was in Him one "greater than Solomon" (Matt. xii. 42). The historical Son of David, ideally of the type of the Christ, that was to come, was in his actual life, the most strangely contrasted. It was reserved for the true, the later Son of David, to fulfill the prophetic yearnings which had gathered round the birth of the earlier. He was the true Shicknom, the prince of peace, the true Jedidjah, the well-beloved of the Father. E. H. P. * SOLOMON'S GARDENS. [GARDEN, vol. i. p. 885.]

SOLOMON'S PORCH. [PALACE.]

SOLOMON'S SERVANTS. (CHILDREN OF). (יֵלָדָיו יֶשָׁר אֵלֶּה יְשַׁרְאֵל : יוּלָה 'אָבָה שָׁנִיָּו, Ex. xii. 55; יִוְיָל בְּנֵי סַולָמְיָן, Ex. ii. 55; Neh. vii. 57, 60; יַיִת שָׁרָאָו סוֹלָמֶיָן.) The persons thus named appear in the lists of the exiles who returned from the Captivity. They occupy all but the lowest places in those lists, and their position indicates some connection with the services of the Temple. First come the priests, then Leities, then Nehumim, then "the children of Solomon's servants." In the Genea of 1 Esdr. vi. 53, 54, the order is the same, but instead of Nehumim we meet with ἱερασία, "servants" or "ministers," of the Temple. In the absence of any definite statement as to their office we are left to conjecture and inference. (1.) The name as well as the order, implies inferiority even to the Nehumim. They are the descendants of the servitors of Solomon. The servitors of the Nehumim, "given to the Lord," was softened by the idea of dedication. [NEHUMIM. (2.) The starting-point of their history is to be found probably in 1 K. v. 13, 14, ix. 20, 21: 2 Chr. viii. 7, 8. Cannanites, who had been living till then with a certain measure of freedom, were reduced by Solomon to the hobat state, and compelled to labor in the king's stone quarries and in building his palaces and cities. To some extent, indeed, the change had been effected under David, but it appears to have been then connected specially with the Temple, and the servitude under his successor was at once harder and more extended (1 Chr. xxii. 2). (3.) The last passage throws some light on their special office. The Nehumim, as in the case of the Gileadites, were appointed to be hewers of wood (Josh. ix. 23), and this was enough for the services of the Tabernacle. For the construction and repairs of the Temple another kind of labor was required, and the new slaves were set to the work of hewing and squaring stones (1 K. v. 17, 18). Their descendants appear to have formed a distinct order, inheriting probably the same functions and the same rank. The prominence which the erection of a new Temple on their return from Babylon would give to their work, accounts for the special mention of them in the lists of Ezra and

a Two of these strange books have been reprinted in fac-simile by Jacob Kuster, 1850. The Cordance Solomonis Neronianae consists of incantations made up of Hebrew words; and the mightiest spell of the enchantor is the Sidom-Salomonis, engraved with Hebrew characters, such as might have been hallowed long before by the perception of Jewish sorcerers, c. But the whole, t. is singular (unless this too was part of the impression that both the books profess to be published with the special license of Popes Julius II and Alexander VI. Was this the form of Hebrew literature which the wise King Solomon was willing to receive, and was it a Cordance Solomonis Neronianae? c. A pleasant Persian apologue teaching a like lesson deserves to be rescued from the mass of fables. The king of Israel met one day the king of the ants, took the insect on his hand, and held converse with it, asking, Queen-like, "Am I not the mightiest and most glorious of men?" "Not so," replied the ant-king, "Thou sittest on a throne of gold, but I make thy hand thy throne, and thus am greater than thou." (Chardin, iii. 128).
Nehemiah. Like the Nethinim, they were in the position of porters, outwardly conforming to the Jewish ritual, though belonging to the hated race, and, even in their names, bearing traces of their origin (Est. ii. 53-58). Like them, too, the great mass must either have perished, or given up their position, or remained at Babylon. The 292 of Est. ii. 55 (Nethinim included) must have been but a small fragment of the descendants of the 150,000 employed by Solomon (1 K. v. 13). E. H. P.

**SOLOMON'S SONG. [CANTICLES.]**

**SOLOMON, WISDOM OF. [WISDOM, BOOK OF.]**

**SON.** The term "son" is used in Scripture language to imply almost any kind of descent or succession, as ben shohnah, "a son of a year," i. e. a year old, ben kesheth, "a son of a bow," i. e. an arrow. The word ber is often found in N. T. in composition, as Bar-thimaeus. [CHILDREN]

H. W. P.

**SON OF GOD (υἱός θεοῦ),** the Second Person of the ever-blessed Trinity, who is coequal, cosupernatural, and consubstantial with the Father, and who took the nature of man in the womb of the blessed Virgin Mary, and as Man bears the name of Jesus, or Saviour, and who proved Himself to be theMessiah or Christ, the Prophet, Priest, and King of all true Israelites, the seed of faithful Abraham, the universal Church of God.

The title Son of God was gradually revealed to the world in this its full and highest signification. In the book of Genesis the term occurs in the plural number, " Sons of God," צְולַלָן, צְולַלָן (Gen. vi. 2, 4), and there the application is made to the patriarchs of the earth, and to those who were set in authority over others according to the exposition in Cyril Alex. Aed. Auliaon. pp. 296, and Aed. Aethropoep. c. 17, (or as some have held) the sons of the family of Seth—those who had been most distinguished by piety and virtue. In Job i. 6, and ii. 1, this title, "Sons of God," is used as a designation of the Angels. In Psalm lxxii. 6, 11 have said, ye are gods; and ye are all sons of the Highest. (1 P. i. 22), the title is explained by Theodoret and others to signify those persons whom God invests with a portion of his own dignity and authority as rulers of his people, and who have clearer revelations of his will, as our Lord intimates (John x. 35); and therefore the children of Israel, the favored people of God, are specially called collectively, by God, his Son (Ex. iv. 22, 23; Hos. xi. 1).

But, in a still higher sense, that title is applied by God to his only Son, begotten by eternal generation (see 1. x. 7), as interpreted in the Epistle to the Hebrews (i. 5, 5); the word צֶלַלָן, צֶלַלָן, "to-day," in that passage, being expressive of the act of God, with whom is no yesterday, nor to-morrow. "In a sense peculiar unto us, and futurum, and perpetuum hodie" (Luther). That text evidently refers to the Messiah, who is crowned and anointed as King by God (Ps. ii. 2, 6), although resisted by men, Ps. ii. 1, 3, compared with Acts iv. 25-27, where that text is applied by St. Peter to the exaltation of Christ and his subsequent exaltation; and the same psalm is also referred to Christ by St. Paul, when preaching in the Jewish synagogue at Antioch in Pisidia (Acts xiii. 31), whence it may be inferred that the Jews might have learnt from their own Scriptures that the Messiah is in a special sense the Son of God; and this is allowed by Maimonides in Porta Musi, ed. Porccke, pp. 160, 259. This truth might have been deduced by logical inference from the Old Testament, but in no passage of the Hebrew Scriptures is the Messiah clearly and explicitly designated by the title "Son of God." The words, "The form of the fourth is like the Son of God," are in the Chaldee portion of the book of Daniel (Dan. iii. 25), and were uttered by a heathen and idolatrous king, Nebuchadnezzar, and cannot therefore be understood as expressing a clear appreciation, on the part of the speaker, of the divinity of the Messiah although we may readily agree that, like Caiaphas and Pilate, the king of Babylon, especially as he was perhaps in habits of intercourse with Daniel, may have delivered a true prophecy concerning Christ.

We are now brought to the question, whether the Jews, in our Lord's age, generally believed that the Messiah, Messiah, or Christ, was also the Son of God in the highest sense of the term, namely, as a Divine Person, coequal, cosupernatural, and consubstantial with the Father?

That the Jews entertained the opinion that the Messiah would be the Son of God, in the subordinate senses of the term already specified (namely, as a holy person, and as invested with great power by God), cannot be doubted; but the point at issue is, whether they supposed that the Messiah would be what the Universal Church believes Jesus Christ to be? Did they believe (as some learned persons suppose they did) that the terms Messiah and Son of God are "equivalent and inseparable"?

It cannot be denied that the Jews ought to have deduced the doctrine of the Messiah's divinity from their own Scriptures, especially from such texts as Psalm xlv. 6, 7, " Thy throne, O God, is for ever and ever; the sceptre of thy kingdom is a right sceptre. Thou livest righteousness and hated wickedness: therefore God, thy God, anointed Thee with the oil of gladness above thy fellows;" a text to which the author of the Epistle to the Hebrews appeals (Heb. i. 8); and the doctrine of the Messiah's godhead might also have been inferred from such texts as Isaiah ix. 6, 9: Unto us a Child is born, unto us a Son is given .... and his name shall be called Wonderful, Counselor, the Mighty God;" and vii. 14, " Behold a Virgin shall conceive and bear a Son, and shall call his name Immanuel" (with us, God); and from Jer. xxiii. 5, "Behold, the days come, saith the Lord, that I will raise unto David a righteous Branch, and a King shall reign and prosper: .... and this is the name

---

5. צָלַלָן: strîp: posterior.
6. צָלַלָן, like a son, i. e. a successor.

b The present article, in conjunction with that of Savio, forms the supplement to the life of our Lord [see Acts Chistos, vol. ii. p. 191.]
SON OF GOD

3083

whereby He shall be called, the Lord (Ixobpiv) our Righteousness;" and from Miech v. 2, "Out of thee (Bethelehem Ephrathah) shall He come forth unto me that is to be Leader in Israel, whose going forth have been from of old, from everlasting;" and from Zech. xi. 14, "And the Lord said unto me, Cast it unto the potter: a goodly price that I was prized at of thee." But the question is not, whether the Jews might not and ought not to have inferred the Divine Sonship of the Messiah from their own Scriptures, but whether, for the most part, they really did deduce that doctrine from those Scriptures? They ought doubtless to have been prepared by those Scriptures for a suffering Messiah: but this we know was not the case, and the Cross of Christ was to them a stumbling-block (1 Cor. i. 23); and one of the strongest objections which they raised against the Christians was, that they worshipped a man who died a death which is declared to be an accursed one in the Law of Moses, which was delivered by God himself (Deut. xxi. 23).

May it not also be true, that the Jews of our Lord's day failed likewise of attaining to the trueness of their own Scriptures, in the opposite direction? May it not also be true, that they did not acknowledge the Divine Sonship of the Messiah, and that they were not prepared to admit the claims of one who asserted Himself to be the Christ, and also affirmed Himself to be the Son of God, coequal with the Father?

In looking at this question à privé, it must be remembered that the Hebrew Scriptures declare in the strongest and most explicit terms the Divine Unity. "Hear, O Israel, the Lord our God is one Lord" (Deut. vi. 4), this is the solemn declaration which the Jews recite daily, morning and evening (see Mifnah, R. Pesqah, chap. i.). They regarded themselves as set apart from all the nations of earth to be a witness of God's unity, and to protest against the polytheism of the rest of mankind. And having suffered severe chastisements in the Babylonish captivity for their own idolatries, they shrunk — and still shrink — with fear and abhorrence, from everything that might seem in any degree to trench upon the doctrine of the unity of the Godhead.

To this consideration we must add, à posteriori, the external evidence derived from the testimony of ancient writers who lived near to our Lord's age.

Trypho, the learned Jew, who debated with Justin Martyr at Ephesus about A. D. 150, on the points of controversy between the Jews and Christians, expressly states, "that it seems to him not only paradoxical but silly (usage), to say that the Messiah, or Christ, proceeded from eternity as God, and that He descended to be born as man, and " — Trypho explodes the notion — that Christ is "not born begotten of man" (Justin M. Dial. c. Trypho. § 48, vol. ii. p. 154, ed. Otto, Jen. 1842). Here is a distinct assertion on the part of the Jew that the Messiah is merely man; and here also is a denial of the Christian doctrine, that He is God, pre-existing from eternity, and took the nature of man. In the same Dialogue the Jewish interlocutor, Trypho, approves the tenets of the Ebionite heretics, who asserted that the Christ was a mere man (φανος άνθρωπος), and adds this remarkable declaration: "all we (Jews) expect that the Messiah will come as a man from man (i.e. from human parents), and that Elias will anoint Him when He is come." (παντες ήμεις τον χριστον ανθρωπον εις ανθρωπον προσδοκοισε ντενορειται, και τον Χριστον ιπποιν δι' αυτου, Trypho Justin. ap. Justin M. Dialog. § 49, p. 156). And in § 54, St. Justin Martyr, speaking in the name of the Christian believers, contests that assumption, and affirms that the Hebrew prophecies themselves, to which he appeals, testify that the Messiah is not a man born of man, according to the ordinary manner of human generation, άνθρωπος εις ανθρωπον κατα το κοινον των ανθρωπων γενεται. And there is a remarkable passage in a subsequent portion of the same dialogue, where Justin says, "If O Trypho, ye understood who He is that is sometimes called the Messenger of mighty counsel, and a Man by Ezekiel, and designated as the Son of Man by Daniel, and as a Child by Isaiah, and the Messiah and God by Daniel, and a Stone by many, and Wisdom by Solomon, and a Star by Moses, and the Day-spring by Zechariah, who is represented in prophecy by Moses, by Isaiah, and is called by him a Rod, and a Flower and Corner Stone, and the Son of God, you would not have spoken blasphemy against Him, who is already come, and who has been born, and has suffered, and has ascended into Heaven, and will come again." (Justin M. c. Trypho. § 126, p. 409). Then Justin affirms that he has proved, against the Jews, that "a Christ, who is the Lord God, and Son of God," appeared to their Fathers, the Patriarchs, in various forms, under the old dispensation (§ 128, p. 425). Compare the authorities in Dömer, On the Person of Christ, i. pp. 265–271, Eng. transl.

In the middle of the third century, Origen wrote his apologetic work in defence of Christianity against Celsus, the Epicurean, and in various places of that treatise he recites the allegations of the Jews against the Gospel. In one passage, when Celsus, speaking in the person of a Jew, had said that one of the Hebrew prophets had predicted that the Son of God would come to judge the righteous and to punish the wicked, Origen rejoins, that such a notion is most, improperly ascribed to a Jew: insomuch as the Jews did indeed look for a Messiah, but not as the Son of God. "No Jew," he says, would allow that any prophet ever said that a Son of God would come: but what the Jews do say, is, that the Christ of God will come; and they often dispute with us Christians as to this very question, for instance, concerning the Son of God, on the plea that no such Person exists or was ever foretold." (Origen, Adv. Cels. i. § 49, vol. i. p. 365, 1; see p. 38 and p. 79, ed. Spencer, and other places, c. e. pp. 22, 30, 51, 62, 71, 82, 110, 130).

In the 4th century Eusebius testified that the Jews of that age would not accept the title Son of God as applicable to the Messiah (Euseb. Den. Orig. iv. 1), and in later days they charge Christians with impiety and blasphemy for designating Christ by that title (Leonin, Con. Nicc. ii. Act. iv.).

Lastly, a learned Jew, Orochio, in the 17th century, in his conference with Limborch, affirms that if a prophet, or even, if it were possible, the Messiah

\[\text{R. Noyes in the Christian Examiner for Jan., May and July, 1836.}\]

\* On these passages and on the general subject, see, on the one hand, Hengstenberg's Christianity of the Old Test.; on the other, three articles by Dr. G.
who professed to be the Messiah at that period, seems to show that they would have willingly allowed the claims of one who "wronged many miracles," as, even by the confession of the chief priests and Pharisees, Jesus of Nazareth did (John xi. 47), if he had been content with such a title, as the Jews assigned to their expected Messiah, namely, that of a great Prophet, distinguished by mighty works.

We find that when our Lord put to the Pharisees this question, "What think ye of Christ, whose Son is He?" their answer was not, "He is the Son of God," but "He is the Son of David;" and they could not answer the second question which He next propounded to them, "How then doth David, speaking in the Spirit, call Him Lord?" The reason was, because the Pharisees did not expect the Messiah to be the Son of God; and when He, who is the Messiah, claimed to be God, they rejected his claim to be the Christ.

The reason, therefore, of his condemnation by the Jewish Sanhedrim, and of his delivery to Pilate for crucifixion, was not that He claimed to be the Messiah, but because He asserted Himself to be much more than that; in a word, because He claimed to be the Son of God, and to be God.

This is further evident from the words of the Jews to Pilate, "We have a law, and by our law He ought to die, because He made Himself the Son of God" (John xv. 5); and from the previous resolution of the Jewish Sanhedrim, "Then said they all, Art thou then the Son of God? And He said unto them, Ye say that I am. And they said, What need we any further witness? for we ourselves have heard of his own mouth. And the whole multitude of them arose and led Him unto Pilate" (Luke xxiii. 70, 71, xviii. 1).

In St. Matthew's Gospel the question of the high-priest is as follows: "Adulterate thee by the living God, that thou tell us whether thou be the Christ, the Son of God" (Matt. xxvi. 63). This question does not intimate that in the opinion of the high-priest the Christ was the Son of God, but it shows that Jesus claimed both titles, and in charging them for Himself asserted that the Christ was the Son of God: whereas, that this answer was the popular opinion, is evident from the considerations above stated, and also from his words to St. Peter when the Apostle confessed Him to be the "Christ, the Son of the living God" (Matt. xvi. 16); He declared that Peter had received this truth, not from human testimony, but by extraordinary revelation: "Blessed art thou, Simon Bar-jona: for flesh and blood hath not revealed it unto thee, but my Father which is in heaven" (Matt. xvi. 17).

It was the claim which He put forth to be the Christ and Son of God, that led to our Lord's condemnation by the unanimous verdict of the Sanhedrin: "They all condemned Him to be guilty of death (Mark xvi. 64; Matt. xxvi. 63-69); and the sense in which it is written to be Son of God, is clear from the narrative of John v. 18. The Jews sought the more to kill Him because He not only had broken the Sabbath, but said also that God was his own Father (σαρκίδα Θεον ἔχεις τὸν θεόν), making Himself equal unto God; and when He claimed Divine preexistence, saying, "Before Abraham was (ἐγώ ἦμι), I am, thou hast put me to the test at Him" (John viii. 58, 59); and when He asserted his own unity with God, "I and the Father are one" — one substance (ὁμογενής), not one person.
(ef) - then the Jews took up stones again to stone Him" (John x. 59, 31); and this is evident again from their own words, "For a good work we stone thee not, but for blasphemy; and because that thou, being a man, makest thyself God." (John x. 33).

Accordingly we find that, after the Ascension, the Apostles labored to bring the Jews to acknowledge that Jesus was not only the Christ, but was also a Divine Person, even the Lord Jehovah. Thus, for example, St. Peter, after the outpouring of the Holy Ghost on the Day of Pentecost by Christ, says, "Ye are all free men of the house of Israel known of God, that God hath made that same Jesus, whom ye have crucified, both Lord (Kipor, Jehovah) and Christ." (Acts ii. 36).

2. This conclusion supplies a convincing proof of Christ's Godhead. If He is not the Son of God, equal with God, then there is no other alternative but that He was guilty of blasphemy; for He claimed "God as his own Father, making Himself equal with God," and by doing so He proposed Himself as an object of Divine worship. And in that case He would have rightly been put to death; and the Jews in rejecting and killing Him would have been acting in obedience to the Law of God, which commanded them to put to death any prophet, however distinguished he might be by the working of miracles, if he were guilty of blasphemy (Deut. xiii. 1-11); and the crucifixion of Jesus would have been an act of pious zeal on their part for the honor of God, and would have commanded them to his favor and protection, whereas we know that it was an act which filled the cup of their national guilt, and has made them outcasts from God to this day (Matt. xxiii. 32-38; Luke xiv. 31-54; 1 Thess. ii. 15, 16; James v. 6).

When they repent of this sin, and say, "Blessed (ευλογημένος) is He that cometh in the name of the Lord," and acknowledge Jesus to be Christ and the Son of God, equal with God, then Israel shall be saved (Isa. xi. 9).

This view explains the fact — which might otherwise have perplexed and staggered us — that the miracles which Jesus worked, and which the Jews and their rulers acknowledged to have been wrought by Him, did not have their due influence upon them; those mighty and marvelous works did not produce the effect upon them which they ought to have produced, if the Jews and their rulers had been prepared, as they ought to have been, by an intelligent study of their own Scriptures, to regard their expected Messiah as the Son of God, equal with God.

Not being so prepared, they applied to these miracles the test supplied by their own Law, which enjoined that, if a prophet arose among them, and wrought miracles, and endeavored to draw them away from the worship of the true God, those miracles were to be regarded as trials of their own steadfastness, and were not to be accepted as proofs of a Divine mission, but the prophet himself to be put to death" (Dent. xiii. 1-11).

The Jews tried our Lord and his miracles by this law. Some of the Jews ventured to say that "Jesus of Nazareth was specially in the mind of the Divine Lawgiver when He framed that law" (see Fagius on the Chaldee Paraphrase of Dent. XIII., and his note on Dent. xviii. 15), and that it was provided expressly to meet his case. Indeed they do not hesitate to say that, in the words of the Law, "if thy brother, the son of thy mother, entice thee secretly" (Dent. xiii. 6), there was a prophetic reference to the case of Jesus, who said that He had a human nature but not a human father, but was the Son of God and was God." (see Fagius, l. c.)

Jesus claimed to be the Messiah; but, according to the popular view and preconceived notions of the Jews, the Messiah was to be merely a human personage, and would not claim to be God and to be entitled to Divine power. Therefore, though they admitted his miracles to be really wrought; yet they did not acknowledge the claim grounded on those miracles to be true, but rather regarded those miracles as trials of their loyalty to the One True God, whose prerogatives, they thought, were infringed and invaded by Him who wrought those miracles; and they even ascribed those miracles to a Prince of the Devil (Matt. xii. 24, 27; Mark iii. 22; Luke xi. 15), and said that He, who wrought those miracles, had a devil (John vii. 20, 48), and they called Him Beelzebub (Matt. x. 25), because they thought that He was setting Himself in opposition to God.

4. "They all condemned Him to be guilty of death" (Mark xiv. 64). The Sanhedrim was unanimous in the sentence of condemnation. This is remarkable. We cannot suppose that there were not some conscientious persons in so numerous a body. Indeed, it may readily be allowed that many of the members of the Sanhedrim were actuated by an earnest zeal for the honor of God when they condemned Jesus to death, and that they did what they thought was right in view to God's glory. But we are supposed to be disposed by our Lord's previsions; and that they were guided by a desire to comply with God's law, which required them to put to death every one who was guilty of blasphemy in arrogating to himself the power which belonged to God.

Hence we may explain our Lord's words on the cross, "Father, forgive them, for they know not what they do." (Luke xxiii. 34), "Father, they are not aware that He whom they are crucifying is thy Son," and St. Peter said at Jerusalem to the Jews after the crucifixion, "Now, brethren, I write that through ignorance ye did it (i.e. rejected and crucified Christ), as did also your rulers" (Acts iii. 17); and St. Paul declared in the Jewish synagogue at Antioch in Pisidia, "they that dwell at Jerusalem, and their rulers, because they knew Him not, nor yet the voices of the prophets, which are read every Sabbath-day, have fulfilled them in condemning Him." (Acts xiii. 27).
Hence it is evident that the predictions of Holy Scripture may be accomplished before the eyes of men, while they are unconscious of that fulfillment; and that the prophecies may be even accomplished by persons who have the prophecies in their hands, and do not know that they are fulfilling them. Hence also it is clear that men may be guilty of enormous sins when they are actually according to their consciences and with a view to God's glory, and while they hide the Bible in their hands and hear its voice sounding in their ears (Acts xiii. 27): and that it is therefore of unspeakable importance not only to hear the words of the Scriptures, but to mark, learn, and inwardly digest them, with humility, docility, earnestness, and prayer, in order to understand their true meaning.

Therefore the Christian student has great reason to thank God that He has given in the New Testament a divinely-inspired interpretation of the Old Testament, and also has sent the Holy Spirit to teach the Apostles all things (John xiv. 26), to abide forever with his Church (John xvi. 15), the body of Christ (Col. i. 24), which He has made to be the pillar and ground of truth (1 Tim. iii. 15), and on whose interpretations, embodied in the creeds generally received among Christians, we may safely rely, as declaring the true sense of the Bible.

If the Jews and their rulers had not been swayed by prejudice, but in a careful, candid, and humble spirit had considered the evidence before them, they would have known that their promised Messiah was to be the Son of God, equal with God, and that He was revealed as such in their own Scriptures, and thus his miracles would have had their due effect upon their minds.

5. Those persons who now deny Christ to be the Son of God, equal and coeternal with the Father, are followers of the Jews, who, on the plea of zeal for the divine Unity, rejected and crucified Jesus, who claimed to be God. Accordingly we find that the Ebionites, Cerinthians, Nazarenes, Pholidians, and others who denied Christ's divinity, arose from the ranks of Judaism (cf. Waterland, Works, v. 240, ed. Oct. 1823: on these heresies the writer of the Second Epistle to the Corinthians is particularly refer to his Introduction to the First Epistle of St. John, in his edition of the Greek Testament). It has been well remarked by the late Professor Blunt that the arguments by which the ancient Christian Apologists, such as Justin Martyr, Tertullian, and others, confuted the Jews, afford the strongest armor against the modern Socinians (see also the remark of St. Athanasius, Quot. ii. ad. Artemius, pp. 377-383, where he compares the Arians to the Jews).

The Jews sinned against the comparatively dim light of the Old Testament: they who have fallen into their error reject the evidence of both Testaments.

6. Lastly, the conclusion stated in this article supplies a strong argument for the Divine origin and truth of Christianity. The doctrine of Christ, the Son of God as well as Son of Man, reaches from the highest pole of Divine glory to the lowest pole of human suffering. No human mind could ever before devise such a scheme as that: and when it was presented to the mind of the Jews, the favored people of God, they could not reach to either of these two poles; they could not mount to the weight of the Divine exaltation in Christ the Son of God, nor descend to the depth of human suffering in Christ the Son of Man. They invented the theory of two Messiahs, in order to escape from the imaginary contradiction between a suffering and triumphant Christ; and they rejected the doctrine of Christ's Godhead in order to cling to a defective and unscriptural Monotheism. They failed of grasping the true sense of their own Scriptures; but in the divine Person of Jesus Christ, Son of God and Son of Man, reaches from one pole to the other, and filleth all in all (Eph. i. 23). The Gospel of Christ ran counter to the Jewish zeal for Monotheism, and incurred the charge of Polytheism, by preaching Christ the Son of God, coequal with the Father: and also contravened and challenged all the complex and dominant systems of Gentile Polytheism, by proclaiming the Divine Unity. It boldly confronted the World, and it has conquered the World: because "the excellency of the power of the Gospel is not of man, but of God" (2 Cor. iv. 7).

The author of the above article may refer for further confirmation of his statements, to an excellent work by the Rev. W. Wilson, B. D., and Fellow of St. John's College, Cambridge, entitled An Illustration of the Method of explaining the New Testament by the early Opinions of Jews and Christians concerning Christ, Cambridge, 1797 [new ed. 1838]; and to Dr. J. A. Dorner's History of the Development of the Doctrine of the Person of Christ, of which an English translation has been printed at Edinburgh, 1841, 2 vols.; and to Hagenbach, Dogmengeschichte, §§ 42, 45, 46, 47, 847, Leipzig, 1857.

C. W.

A.

S. O. N. OF MAN (Δημος), and in Chaldean

Δημος: o dios tou et Aphrodou, or o dios authephon, the name of the Second Person of the ever-blessed Trinity, the Eternal Word, the Everlasting Son, becoming Incarnate, and so made the Son of Man, the source of all grace to all men, united in his mystical body, the Christian Church.

1. In a general sense every descendant of Adam bears the name "Son of Man" in Holy Scripture, as in Job xxv. 6; Ps. cxlvii. 3, cxliii. 3; Is. li. 12, lv. 2. But in a more restricted signification it is applied by way of distinction to particular persons. Thus the prophet Ezekiel is addressed by Jehovah (god as Ben-Adam, or s n of Man," about eighty
times in his prophecies. This title appears to be assigned to Ezekiel as a term of honour from God—(αγαθός ἄριστος)—in order that the prophet, who had been permitted to behold the glorious manifestation of the Head, and to hold converse with the Almighty, and to see visions of futurity, should not be exalted above measure by the abundance of his revelations, but should recognize his own weakness and mortality, and not impute his prophetic knowledge to himself, but ascribe all the glory of it to God, and be ready to execute with meekness and sincerity the duties of his prophetic office and mission from God to his fellow men.

2. In a still more emphatic and distinctive sense the title "Son of Man" is applied in the Old Testament to the Messiah. And, inasmuch as the Messiah is revealed in the Old Testament as a Divine Person and the Son of God (Ps. ii. 7, lxxxix. 27: Is. vii. 14, ix. 6), it is a prophetic pre-announcement of his incarnation (compare Ps. viii. 4 with Heb. ii. 6, 7, 8, and 1 Cor. xv. 27).

In the Old Testament the Messiah is designated by this title: "Son of Man," in his royal and judicial character, particularly in the prophecy of Dan. vii. 13: "Behold One like the Son of Man came with the clouds of heaven, and came to the Ancient of Days . . . . and there was given Him dominion and glory . . . . His dominion is an everlasting dominion." Here the title is not Bar- eno, or Bar-ebo, but Bar-enos, which signifies humanity in its greatest fulness and dignity, and is a significant declaration that the exaltation of Christ in his kingly and judicial office is due to his previous condescension, obedience, self-sacrifice, and suffering in his human nature (comp. Phil. ii. 5-11).

The title —Son of Man,— derived from that passage of Daniel, is applied by St. Stephen to Christ in his heavenly exaltation and royal majesty: "Behold I see the heavens opened, and the Son of Man standing on the right hand of God" (Acts vii. 56). This title is also applied to Christ by St. John in the Apocalypse, describing our Lord's priestly office, which He executes in heaven (Rev. i. 13): "In the midst of the seven golden candlesticks" (or golden lamps, which are the emblems of heavenly light) "I beheld a high priest like the Son of Man, clothed with a garment down to the foot," (his priestly attire); "his head and his hairs were white like wool, as white as snow" (attributes of divinity; comp. Dan. vii. 9). St. John also in the Apocalypse (xiv. 14) ascribes the title —Son of Man— to Christ when He displays his kingly and judicial office: "I looked and beheld a white cloud, and upon the cloud One sat like unto the Son of Man, having on his head a golden crown, and in his hand a sharp sickle— to reap the harvest of the earth.

3. It is observable that Ezekiel never calls himself —Son of Man,— and in the Gospels Christ is never called —Son of Man,— by the Evangelists; but whenever that title is applied to Him there, it is applied by Himself.

The only passages in the New Testament where Christ is called —Son of Man,— by any one except Himself, are those just cited, and they relate to Him, not in his humiliation upon earth, but in his heavenly exaltation consequent upon that humiliation. The passage in John vii. 54, "Who is this Son of Man?" is an inquiry of the people concerning Him who applied this title to Himself.

The reason of what has been above remarked seems to be, that, as on the one hand it was expedient for Ezekiel to be reminded of his own humanity, in order that he should not be exalted by his revelations; and in order that the readers of his prophecies might bear in mind that the revelations in them are not due to Ezekiel, but to God (in the Holy Ghost, who spake by him (see 2 Pet. i. 21)); so, on the other hand, it was necessary that they who saw Christ's miracles, the evidences of his divinity, and they who read the evangelical histories of them, might indeed adore Him as God, but might never forget that He is Man.

4. The two titles —Son of God,— and —Son of Man,— declaring that in the one Person of Christ there are two natures, the nature of God and the nature of man, joined together, but not confused, are presented to us in two memorable passages of the Gospel, which declare the will of Christ that all men should confess Him to be God and man, and which proclaim the blessedness of this confession.

(1.) "Whom do men say that I, the Son of Man, am?" was our Lord's question to his Apostles; and "Whom say ye that I am? Simon Peter answered and said, Thou art the Christ, the Son of the living God." Our Lord acknowledged this confession to be true, and to have been revealed from heaven, and He blessed him who uttered it: "Blessed art thou, Simon Bar-jona, —Thou art son of Jonas, Bar-jona (comp. John xxi. 15); and as truly as this art thou, so truly am I Bar-enos, Son of Man, and Bar-Ebkon, Son of God; and My Father, who is in heaven, hath revealed this truth unto thee. Blessed is every one who holds this faith; for I myself, Son of God and Son of Man, am the living Rock on which the Church is built; and he who holds this faith is a genuine Petra, a lively stone, laid out of me the Divine Peter, the Everlasting Rock, and built upon me" (see the authorities cited in the note on Matt. xvi. 18, in the present writer's edition).

(2.) The other passage where the two titles (Son of God and Son of Man) are found in the Gospels is no less significant. Our Lord, standing before Caiphas and the chief priests, was interrogated by those high priests like the Son of Man: "Tell us of the Christ, the Son of God?" (Matt. xxvi. 63; comp. Mark xiv. 61). "Art thou that which thou claimest to be, the Messiah? and art thou, as thou professest to be, a Divine Person, the Son of God, the Son of the Blessed?" "Jesus saith unto him, Thou sayest it; I am" (Matt. xxvi. 64; Mark xiv. 62).

But, in order that the high-priest and the counsellors might not suppose Him to be a Divine Person only, and not to be also really and truly Man, our Lord added of his own accord, "Nevertheless" (ἀλλά), besides, or, as St. Mark has it, καί, also, in addition to the avowal of my divinity) "I say unto you, Hereafter shall ye see the Son of Man sitting on the right hand of power, and coming in the clouds of heaven." (Mark xvi. 64; Matt. xvi. 22). That is, "I am indeed the Son of God, but do not forget that I am also the Son of Man. Believe and confess the true faith, that I, who claim to be the Christ, am Very God and Very Man."

5. The Jews, in our Lord's age, were not disposed to receive either of these truths expressed in those words. They were so tenacious of the doctrine of the Divine Unity (as they understood it,
that they were not willing to accept the assertion that Christ is the "Son of God," Very God of Very God (see above, article Son of God), and they were not disposed to admit that God could become incarnate, and that the Son of God could be also the Son of Man (see the remarks on this subject by Dörner, On the Person of Christ, Introduction, throughout).

Hence we find that no sooner had our Lord asserted these truths, than the high-priest rent his clothes, saying, He hath spoken blasphemy. What think ye? and they all condemned Him to be guilty of death (Matt. xxi. 65, 66; Mark xvi. 65, 66). And they said, "What if He be the Christ, the Son of the living God?" (Matt. xiii. 55), and again, "What if He be the Son of God, that He saith unto me, Thou art my Son; and that if ye shall see the Son of Man ascend up where He was before?" (John vi. 62, compared with John i. 1-3.)

8. By his perfect obedience in our nature, and by his voluntary submission to death in that nature, Christ acquired new dignity and glory, due to his obedience and sufferings. This is the dignity and glory of his mediatorial kingdom: that kingdom which He has as God-man, the only Mediator between God and man (as partaking perfectly of the nature of both, and as making an At-one-ment between them), "the Man Christ Jesus" (1 Tim. ii. 5; Heb. ix. 15, xii. 24).

It was as Son of Man that He humbled Himself, it was as Son of Man that He was exalted; it was as Son of Man, born of a woman, that He was made under the Law (Gal. iv. 4), and as Son of Man He was Lord of the Sabbath-day (Matt. xii. 8); as Son of Man He suffered for sins (Matt. xviii. 13; Mark viii. 31), and as Son of Man He has authority on earth to forgive sins (Matt. xix. 8). It was as Son of Man that He had not where to lay his head (Matt. viii. 20; Luke ix. 58), it is as Son of Man that He wears on his head a golden crown (Rev. xiv. 14); it was as Son of Man that He was betrayed into the hands of sinful men, and suffered many things, and was rejected, and condemned, and crucified (see Matt. xvi. 22, xx. 18, xxvi. 2, 24; Mark xviii. 31, ix. 31, x. 33; Luke xvii. 32, iv. 34, xxxv. 31, xxxiv. 7), it is as Son of Man that He now sits at the right hand of the Father, and as Son of Man He will come in the clouds of heaven, with power and great glory, in his own glory, and in the glory of his Father, and all his holy angels with Him, and it is as Son of Man that He will sit on the throne of his glory, and before Him will be gathered all nations (Matt. xvi. 27, xxv. 30, xxxv. 31, 32; Mark xiv. 62; Luke xxv. 27); and He will send forth his angels to gather his elect from the four winds (Matt. xxiv. 31), and to yank up the tares from out of his field, which is the world (Matt. xxii. 38, 41); and to bind them in bundles to burn them, and to gather his wheat into his barn (Matt. xxxi. 30). It is as Son of Man that He will call all from their graves, and summon them to his judgment-seat, and pronounce their sentence for everlasting life or torments; for the Father judgeth no man, but hath committed all judgment unto the Son; . . . . and hath given Him authority to execute judgment also, because He is the Son of Man." (John v. 22, 27). Only "the pure in heart will see God" (Matt. v. 8; Heb. xii. 14); but the evil as well as the good will see their Judge: "every eye shall see Him." (Rev. i. 7). This is fit and equitable: and it is also fit and equitable that He who as Son of Man was judged by the world, should also judge the world; and that He who was rejected openly, and suffered death for all, should
be openly glorified by all, and be exalted in the eyes of all, as King of kings, and Lord of lords.

9. Christ is represented in Scripture as the second Adam (1 Cor. iv. 45, 47; comp. Rom. v. 14), insomuch as He is the Father of the new race of mankind; and as we are all nature in Adam, so are we by grace in Christ; and "as in Adam all die, even so in Christ all are made alive" (1 Cor. xv. 22); and "if any man be in Christ, he is a new creature" (2 Cor. v. 17; Eph. iv. 24); and He, who is the Son, is also in this respect a Father; and therefore Isaiah joins both titles in one, To-Mary, "and His name shall be called the Mighty God, the Everlasting Father." (Is. ix. 6). Christ is the second Adam, as the Father of the new race; but in another respect He is unlike Adam, because Adam was formed in nature man-hood, from the earth; but Christ, the second Adam, is new Adam, the Son of Adam: and therefore St. Luke, writing specially for the Gentiles, and desirous to show the universality of the redemption wrought by Christ, traces his genealogy to Adam (Luke iii. 23-38). He is Son of Man, insomuch as he was the Promised Seed, and was conceived in the womb of the Virgin Mary, and took our nature, the nature of us all, and became "Emmanuel, God with us" (Matt. i. 23), - God manifest in the flesh (1 Tim. iii. 16). Thus the new Creation sprang out of the old; and He made "all things new" (Rev. xxi. 5). The Son of God in Eternity became the Son of Man in Time. He turned back, as it were, the streams of pollution and of death, flowing in the immemorial channels of the human family, and introduced into them a new element, the life of grace and health, of Divine incorruption and immortality; which would not have been the case, if He had been merely like Adam, having an independent origin, springing by a separate efflux out of the earth, and had not been New-Adam as well as Re-Edenian, the Son of Adam, as well as the Son of God. And this is what St. Paul observes in his comparison — and contrast — between Adam and Christ (Rom. v. 15-18). Elsewhere was the free gift (Rom. iii. 24) (as is the fact) the many (i.e. all) died by the transgression of the one (Adam), much more the grace and the gift by the grace that is of the one Man Jesus Christ, overflowed to the many; and not, as by one who sinned, so is the gift; for the judgment came from one to condemnation, but the free gift came forth from many transgressions to their state of justification. For if by the transgression of the one (Adam), Death reigned by means of the one, much more they who receive the abundance of grace and of the gift of righteousness will reign in life through the one Jesus Christ . . .

Thus, where Sin abounded, Grace did much more abound (Rom. v. 20); for, as, by the disobedience of one man (Adam), the many were made sinners, so by the obedience of one (Christ), the many were made righteous. . . ."

10. The benefits accruing to mankind from the Incarnation of the Son of God are obvious from these considerations: —

We are not so to conceive of Christ as of a Deity delivered exterem into humanity, but as incorporating humanity in such wise as He is the Father of the new race of mankind; as we are all nature in Adam, so are we by grace in Christ; and "as in Adam all die, even so in Christ all are made alive" (1 Cor. xv. 22); and "if any man be in Christ, he is a new creature" (2 Cor. v. 17; Eph. iv. 24); and He, who is the Son, is also in this respect a Father; and therefore Isaiah joins both titles in one, to-Mary, "and His name shall be called the Mighty God, the Everlasting Father." (Is. ix. 6). Christ is the second Adam, as the Father of the new race; but in another respect He is unlike Adam, because Adam was formed in nature man-hood, from the earth; but Christ, the second Adam, is New-Adam, the Son of Adam: and therefore St. Luke, writing specially for the Gentiles, and desiring to show the universality of the redemption wrought by Christ, traces his genealogy to Adam (Luke iii. 23-38). He is Son of Man, insomuch as He was the Promised Seed, and was conceived in the womb of the Virgin Mary, and took our nature, the nature of us all, and became "Emmanuel, God with us" (Matt. i. 23), — God manifest in the flesh (1 Tim. iii. 16). Thus the new Creation sprang out of the old; and He made "all things new" (Rev. xxi. 5). The Son of God in Eternity became the Son of Man in Time. He turned back, as it were, the streams of pollution and of death, flowing in the immemorial channels of the human family, and introduced into them a new element, the life of grace and health, of Divine incorruption and immortality; which would not have been the case, if He had been merely like Adam, having an independent origin, springing by a separate efflux out of the earth, and had not been New-Adam as well as Re-Edenian, the Son of Adam, as well as the Son of God. And this is what St. Paul observes in his comparison — and contrast — between Adam and Christ (Rom. v. 15-18). Elsewhere was the free gift (Rom. iii. 24) (as is the fact) the many (i.e. all) died by the transgression of the one (Adam), much more the grace and the gift by the grace that is of the one Man Jesus Christ, overflowed to the many; and not, as by one who sinned, so is the gift; for the judgment came from one to condemnation, but the free gift came forth from many transgressions to their state of justification. For if by the transgression of the one (Adam), Death reigned by means of the one, much more they who receive the abundance of grace and of the gift of righteousness will reign in life through the one Jesus Christ . . .

Thus, where Sin abounded, Grace did much more abound (Rom. v. 20); for, as, by the disobedience of one man (Adam), the many were made sinners, so by the obedience of one (Christ), the many were made righteous. . . ."

more recent literature. See further W. S. Tyler, in \textit{Bibl. Sacra} for Jan. 1865, Beyerlehr, \textit{Christologie des N. T.} (1896), pp. 9-34, and the writers on Biblical theology in general, as Von Coeld, Reckweg, Jordan, and Wies; also the commentators on Matt. viii. 20 and John i. 32. For the older literature, see Hase's \textit{Leben Jesu}, 4th Aed. § 64, note f. "Son of Man" is a frequent designation of the Messiah in the apocryphal Book of Enoch, but the date of this book is uncertain. [\textit{Enoch}, Book of.]

SOPATER (Σωπάτερ; \textit{Sopater}). Sopater the son of Pyrrhus of Berea was one of the companions of St. Paul on his return from Greece into Asia, as he came back from his third missionary journey (Acts xx. 4). Whether he is the same with Sosipater, mentioned in Rom. xvi. 21, cannot be positively determined. The name of his father, Pyrrhus, is omitted in the received text, though it has the authority of the oldest MSS., A, B, D, E, and the recently discovered Codex Sinaiticus, as well as of the Vulgate, Coptic, Sahidic, Philoxenian, Syriac, Armenian, and Slavonic versions. Mill condemns it, apparently without reason, as a traditional gloss. [\textit{Priests}, Amer. ed.]

W. A. W.

SOPHE'RETH (Σωφηρεθ; \textit{Sophereth}; \textit{Sopherath}; \textit{Sopherath}). [Var. \textit{Sophiera}, \textit{Sopharath}; V. A. \textit{Sopharae}, \textit{Sopharath}; \textit{Sopheret}; \textit{Sophereth}]. "The children of Sophereth" were a family who returned from Babylon with Zerubbabel among the descendants of Solomon's servants (Ezr. ii. 55; Neh. vii. 57). Called \textit{Azaphiron} in 1 Esdr. v. 33.

SOPHONIAS (Sophonias). The Prophet Zephaniah (2 Esdr. i. 40).

SORCERER. [\textit{Divination}.]

SORCHEK. [\textit{Valley of}.]

\textit{Sosthenes} (\textit{Sosthenes}; \textit{preserver of strongly}; \textit{Sosthenes}) was a Jew at Corinth, who was seized and beaten in the presence of Gallio, on the refusal of the latter to entertain the charge of heresy which the Jews alleged against the Apostle Paul (see \textit{Acts} xvii. 12-17). His precise connection with that affair is left in some doubt. Some have thought that he was a Christian, and was unmolested thus by his own countrymen, because he was known as a special friend of Paul. But it is improbable if Sosthenes was a believer, that Luke would mention him merely as "the ruler of the synagogue" (\textit{διακονός Ἰησοῦς}), without any allusion to his change of faith. A better view is, that Sosthenes was one of the more looser and bigoted Jews; and that "the crowd" (\textit{πόλεμος simply, and not πόλεμος τῶν Ἐλαμπρίων, the true reading) were Greeks who, taking advantage of the indiffercence of Gallio, and ever ready to show their contempt of the Jews, turned their indignation against Sosthenes. In this case he must have been the successor of Crispus, (\textit{Acts} xvii. 8) as chief of the synagogue (possibly colleague with him, in the lesser sense of \textit{διακονός Ἰησοῦς}, as in Mark v. 22), or, as Biscecco conjectures, may have belonged to some other synagogue at Corinth. Chrysostom's notion that Crispus and Sosthenes were names of the same person, is arbitrary and unsupported.

Paul wrote the first Epistle to the Corinthians jointly in his own name and that of a certain Sosthenes whom he terms "the brother" (1 Cor. i. 1). The mode of designation implies that he was well known to the Corinthians; and some have held that he was identical with the Sosthenes mentioned in the second chapter of the \textit{Acts} of the \textit{Apostles}, which runs from near \textit{Bet Jibrin to Askallah}; but this he admits to be mere conjecture.

\* The AA is no doubt the last relic of \textit{Nahor}, comp. \textit{Liber Amn}. and \textit{Kainam. Ritter}.

\* M. Van de Velde (\textit{Mom. 350}) proposes the \textit{Wady}.

\* The Arabic versions of this passage retain the term \textit{Sorek} as a proper name.
in the Acts. If this be so, he must have been converted at a later period (Wetstein, N. Test. vol. ii. p. 573), and have been at Ephesus and not at Corinth, when Paul wrote to the Corinthians. The name was a common one, and but little stress can be laid on that coincidence. Eusebias says (H. F. i. 12, § 1) that this Sosthenes (1 Cor. i. 1) was one of the seventy disciples, and a later tradition adds that he became bishop of the church at Colophon in Ionia.

H. B. H.

SOSTRATUS (Σωστράτος; σώστρατος; [source of the name]): Sosthenes, a commander of the Syrian garrison in the Apo-Jerusalem (a. 7 εν ἀρμυρικὴ στρατεύματος) in the reign of Anthodus Ephiphanes (c. E. c. 172: 2 Mac. iv. 27, 28). B. F. W.

SOTA'I [2 esl] (נוּן [one who tares aside]): সৌতি, স্তোত্র: Alex. Σωτήριον in Nehr.: Sotai, Sotliotl. The children of Sotai were a family of Solomon's servants who returned with Zerubbabel (Ezr. ii. 55; Neh. vii. 57).

* SOUTH, QUEEN OF THE. [SHEBA.]

SOUTH RAMPOTH (טַה רַמְפֹת; by פַעַר רַמְפֹת: Alex. εν τῇ στίφει: Remoth ad meridiam). One of the places frequentedy by David and his band of outlaws during the latter part of Saul's life, and to his friends in which he showed his gratitude when opportunity offered (1 Sam. xxx. 27). The towns mentioned with it show that Ramoth must have been on the southern confines of the country—the very border of the desert Bethel, in ver. 27, is almost certainly not the well-known sanctuary, but a second of the same name, and Helon was probably the most norther of all the places in the list. It is no doubt identical with Ramoth of the South, a name the same in every respect except that by a dialectical or other change it is made plural, Ramoth instead of Ramoth.

G.

SOW. [SWINE.]

SOWER, SOWING. The operation of sowing with the hand is one of so simple a character, as to need little description. The Egyptian paintings furnish many illustrations of the manner in which it was conducted. The sower held the vessel or basket containing the seed, in his left hand, while with his right he scattered the seed broadcast (Wilkinson's Anc. Egy. ii. 12, 18, 39; see Agriculture for one of these paintings). The "drawing out" of the seed is noticed, as the most characteristic action of the sower, in Ps. xxxiii. 6 (A. V. ¹precious¹) and Am. iv. 13: it is uncertain whether this expression refers to drawing out the handful of seed from the basket, or to the dispersion of the seed in regular rows over the ground (Gesen. Thes. p. 827). In some of the Egyptian paintings the sower is represented as preceding the plough: this may be simply the result of bad perspective, but we are told that such a practice actually prevails in the East, in the case of sandy soils, the plough serving the purpose of the harrow for covering the seed (Russell's Alex., i. 74). In wet soils the seed was trodden in by the feet of animals (Is. xxxii. 20), as represented in Wilkinson's Anc. Egy. ii. 12. The sowing season was usually in October, but occasionally in November. The sowings were not made before February, wheat being put in before, and barley after the beginning of January (Russell, i. 74). The Mosaic law prohibited the sowing of mixed seed (Lev. xix. 19; Dent. xix. 9); Josephus (Ant. iv. 8, § 20) supposes this prohibition to be based on the repugnancy of nature to intermixture, but there would appear to be a further object of a moral character, namely, to impress on men's minds the general lesson of purity. The regulation offered a favorable opportunity for Rabbinical refinement, the results of which are embodied in the treatise of the Mishna, entitled Kilaiia, §§ 1-3. That the ancient Hebrews did not consider themselves prohibited from planting several kinds of seeds in the same field, appears from Is. xxviii. 25. A distinction is made in Lev. vi. 37, 38, between dry and wet seed, in respect to contact with a corpse: the latter, as being more susceptible of contamination, would be rendered unclean thereby, the former would not. The analogy between the germination of seed and the effects of a principle or a course of action on the human character for good or for evil is frequently noticed in Scripture (Prov. xi. 18; Matt. xiv. 24; 2 Cor. iv. 6; Gal. vi. 7).

W. L. B.

SPAIN (Σπανία: Hispania). The Hebrews were acquainted with the position and the mineral wealth of Spain from the time of Solomon, whose alliance with the Phcenicians enlarged the circle of their geographical knowledge to a very great extent. Tarsish, the local designation, Tarsish, representing the Tarthons of the Greeks, probably prevailed until the fame of the Roman wars in that country reached the East, when it was superseded by its classical name, which is traced back by Bochart to the Semitic yāhpin, "rabbit," and by Humboldt to the Basque Espania, descriptive of its position on the edge of the continent of Europe (Dict. of Geog. i. 1074). The Latin form of this name is represented by the Ἱσπανία of 1 Mac. viii. 3 (where, however, some copies exhibit the Greek form), and the Greek by the Σπανία of Rom. xxv. 24, 28. The passages cited contain all the Biblical notices of Spain: in the former the con quests of the Romans are described in somewhat exaggerated terms; for though the Carthaginians were expelled as early as u. c. 206, the native tribes were not finally subdued until u. c. 29, and not until then could it be said with truth that "they had conquered all the place" (1 Macce. viii. 4). In the latter, St. Paul announces his intention of visiting Spain. Whether he carried out this intention is a disputed point connected with his personal history. [PAUL.]. The mere intention, however, implies two interesting facts, namely, the establishment of a Christian community in that country, and that by means of Hellenistic Jews resident there. We have no direct testimony to either of these facts; but as the Jews had spread along the shores of the Mediterranean as far as Cyrene in Africa and Rome in Europe (Acts ii. 10), there would be no holds by one hand, while he carries his long goad in the other. This peculiarity makes the Saviour's expression precisely accurate: "He that putteth his hand to the plough," etc. (Luke ix. 62); whereas, with the plough constructed as among us, the plural would be more natural than the singular. H.
difficultly in assuming that they were also found in the commercial cities of the eastern coast of Spain. The early introduction of Christianity into that country is attested by Irenæus (i. c.) and Pertiullus (Acts, Jud. 7). An inscription, purporting to record a persecution of the Spanish Christians in the reign of Nero, is probably a forgery (Gieseler's Ecclesi. Hist. i. 82, note 5).

* SPAN. [Weights and Measures, II. 1 (L)]

** SPARROW **

(τίππος, ἄππος, ἄριδίων, ἁπτενα, σπαρτοδίων; χίμαρος in Neh. v. 18, where LXX. probably read ΜΩΙΩΓΡΙΩΝ: aris, coluvis, passer.) The above Heb. word occurs upwards of forty times in the O. T. In all passages excepting two it is rendered by A. V. indiscriminately "bird" or "fowl." In Ps. lixxv. 3, and Ps. cii. 7, A. V. renders it "sparrow." The Greek σπαρτοδίων ("sparrow," A. V.) occurs twice in N. T., Matt. x. 29, Luke xii. 6, 7, where the Vulg. has passerres. Τιππος (ΤΙΠΠΟΣ), from a root signifying to "chirp" or "twitter," appears to be a phonetic representation of the call note of any passerine bird.* Similarly the modern Arabs use the term "şar" (زرا) for all small birds which chirp, and "σαروا" (زورا) not only for the singing, but for any other bird with a harsh, shrill twitter, both these being evidently phonetic names.

Τιππος is therefore properly transliterated by the LXX. σπαρτοδίων, explained by Moscopoulus ἀπὸ μακάρα τῶν ἀρίδιων, although it may sometimes have been used in a more restricted sense. See Athen. Deipn. ix. 391, where two kinds of σπαρτοδία in the more restricted significance are noted.

It was reserved for later naturalists to discriminate the immense variety of the smaller birds of the passerine order. Excepting in the cases of the thrushes and the larks, the natural history of Aristotle scarcely comprehends a longer catalogue than that of Moses.

Yet in few parts of the world are the species of passerine birds more numerous or more abundant than in Palestine. A very cursory survey has supplied a list of above 100 different species of this order. See Isl. vol. i. p. 26 ff. and vol. iv. p. 277 ff.

But although so numerous, they are not generally noticeable for any peculiar brilliancy of plumage beyond the birds of our own climate. In fact, with the exception of the denizens of the mighty forests and fertile alluvial plains of the tropics, it is a popular error to suppose that the nearer we approach the equator, the more gorgeous necessarily is the coloration of the birds. There are certain tropical families with a brilliancy of plumage which is unrivalled elsewhere; but every relating members of these groups, as for instance the kingfisher of Britain, or the bee-eater and roller of Europe, are not surpassed in brilliancy of dress by any of their southern relations. Ordinarily in the warmer temperate regions, especially in those which like Palestine possess neither dense forests nor morasses, there is nothing in the brilliancy of plumage which especially arrests the attention of the beholdant. It is therefore no matter for surprise if, in an unscientific age, the smaller birds were generally grouped indiscriminately under the term "τιππος, ἄππος or passer." The proportion of bright to obscure colored birds is not greater in Palestine than in England: and this is especially true of the southern portion. Judea, where the wilderness with its bare hills and arid ravines affords a home chiefly to those species which rely for safety and concealment on the modesty and inconspicuousness of their plumage.

Although the common sparrow of England (Passer domesticus, L.) does not occur in the Holy Land, its place is abundantly supplied by two very closely allied Southern species (Passer sylvicola, Vieill. and Passer ciepalus, Tem.). Our English Tree Sparrow (Passer montanus, L.) is also very common, and may be seen in multitudes on Mount Olivet, and also about the sacred inclosure of the mosque of Omar. This is perhaps the exact species referred to in Ps. lixxxv. 3, "Yea, the sparrow hath found an house."

Though in Britain it seldom frequents houses, yet in the lands which country its eastern range extends, Mr. Swinhoe, in his Ornithology of Arabia, informs us its habits are precisely those of our familiar house sparrow. Its shyness here may be the result of persecution; but in the East the Mussulmans hold in respect any bird which roosts to their houses, and in reverence such as build in or about the mosques, considering them to be under the Divine protection. This natural veneration has doubtless been inherited from antiquity. We learn from 2 Egin (Iv. Hist. v. 17) that the Atheists condemned a man to death for molesting a sparrow in the temple of Eschapias. The story of Aristocrates of Cyme, who rebelled the cowardly advice of the oracle of Branchide to surrender a suppliant, by his symbolic act of driving the sparrows out of the temple, illustrates the same sentiment (Herod. i. 150), which was probably shared by David and the Israelites, and is alluded to in the psalm. There can be no difficulty in interpreting "τιππος," not as the altar of sacrifice exclusively, but as the place of sacrifice, the sacred inclosure generally, το τιππος. "Sanctum." The interpretation of some commentators, who would explain "τιππος" in this passage of certain sacred birds, kept and preserved by the priests in the temple like the Sacred Isis of the Egyptians, seems to be wholly without warrant. See Bochart, iii. 21, 22.

Most of our commoner small birds are found in Palestine. The startling, chaffinch, greenfinch, linnet, goldfinch, corn-bunting, pipits, blackbird, song-thrush, and the various species of wagtail abound. The wood lark (Alauda arbores), crested lark (Ticorhina cristata, Boie), Calandra lark (Melanocorypha calandra, Rb.), short-toed lark (Calandra bronchopus, Kaup.), Isabel lark (Alauda deserti, Lich.), and various other desert species, which are scarred in great numbers for the mark, are far more numerous on the southern plains than the skylark in England. In the olive-yards, and among the brushwood of the hills, the Orotolan hunting (Emberiza Hortulana), and especially Cretzschmar's hunting (Emberiza Cretcia, Cretz.), take the place of our common yellow-hammer, an exclusively northern species. Indeed, the second is seldom out of the traveller's
SPARROW

sight, hopping before him from bough to bough with its simple but not unpleasing note. As most of our warblers (Sylviidae) are summer migrants, and have a wide eastern range, it was to be expected that they should occur in Syria; and accordingly upwards of twenty of those on the British list have been noted there, including the robin, redstart, whitethroat, blackcap, nightingale, willow-cren, Dartford warbler, whinchat, and stonechat. Besides these, the Palestine lists contain fourteen others, more southern species, of which the most interesting are perhaps the little finch (Calliptitha blookiptitha, Lp.), the orpehan (Corvus orphan, Rf.), and the Sardinian warbler (Sylvia melanocephala, Lanc.).

The chats (Saccicoths), represented in Britain by the wheatear, whinchat, and stonechat, are very numerous in the southern parts of the country. At least nine species have been observed, and by their lively motions and the striking contrast of black and white in the plumage of most of them, they are the most attractive and conspicuous bird-inhabitants which catch the eye in the hill country of Judea, the favorite resort of the genus. Yet they are not recognized among the Bedouin inhabitants by any name to distinguish them from the birds.

The rock-sparrow (Petronia stove, Strick.) is a common bird in the barren portions of Palestine, nesting woods, and generally to be seen perched alone on the top of a rock or on any large stone. From this habit it has been conjectured to be the bird alluded to in Ps. ci. 7, as "the sparrow that

Petroeossippus cyanus.
sitteth alone upon the house-top;" but as the rock sparrow, though found among ruins, never resorts to inhabited buildings, it seems more probable that the bird to which the psalmist alludes is the blue thrush (Petroeossippus cyanus, Boie.), a bird so conspicuous that it cannot fail to attract attention by its dark-blue dress and its plaintive monotonous note; and which may frequently be observed perched on houses and especially on outbuildings in the villages of Judea. It is a solitary bird, eating the society of its own species, and rarely more than a pair are seen together. Certainly the allusion of the psalmist will not apply to the sable and curious house or tree-sparrows.

Among the most conspicuous of the small birds of Palestine are the shrikes (Lani), of which the red-backed shrike (Laniia collurio, L.) is a familiar example in the south of England, but there represented by at least five species, all abundantly and generally distributed, namely, Enneocotonus rufus, Lp., the woodchat shrike, Laniia meridionalis, L.; L. minor, L.; L. personatus, Tem.; and Telephonus cuculoides, Gr. There are but two allusions to the singing of birds in the Scriptures, Eccl. xii. 4 and Ps. iv. 12: "By them shall the fowls (תּוֹם) of the heaven have their habitation, which sing among the branches." As the psalmist is here speaking of the sides of streams and rivers ("By them"), he probably had in his mind the bulbul (חאולי) of the country, or Palestine nightingale (Leos zonathypogius, Hempr.), a bird not very far removed from the thrush tribe, and a closely allied species of which is the true bulbul of Persia and India. This lovely songster, valued for its volume and variety of notes, is the "nightingale," orplumi, mentioned in the Psalms, "a flower, as the lily among the thorns." (Ps. cv. 14.)

As with the sparrow, the more elaborate form of the bird is that of the nightingale, catching the ear by its melodic notes, and"crying among the branches." In one passage (Ez. xxxix. 4, teqwa is joined with the epithet טּוֹם (ravenous), which may very well describe the raven and the crow, both passerine birds, yet carrion-feeders. Nor is it necessary to stretch the interpretation so as to include raptorial birds, which are distinguished in Hebrew and Arabic by so many specific appellations.

With the exception of the raven tribe, there is no prohibition in the Levitical law against any passerine birds being used for food; while the wanton destruction or extirpation of any species was guarded against by the humane provision in Deut. xxii. 6. Small birds were therefore probably as an ordinary article of consumption among the Israelites as they still are in the markets both of the Continent and of the East. The inquiry of our Lord, "Are not five sparrows sold for two farthings?" (Luke xi. 5), "Are not two sparrows sold for a farthing?" (Matt. x. 29), points to their ordinary exposure for sale in his time. At the present day the markets of Jerusalem and Jaffa are attended by many "towers" who offer for sale long strings of small birds, chiefly sparrows, wagtails, and larks. These are also frequently sold ready plucked, trussed in rows of about a dozen on slender wooden skewers, and are cooked and eaten like kabobs.

It may well excite surprise how such vast numbers can be taken, and how they can be vended at a price too small to have purchased the powder required for shooting them. But the gun is never used in their pursuit. The ancient methods of bowing to which we find so many allusions in the Scriptures are still pursued, and, though simple, are none the less effective. The art of bowing is spoken of no less than seven times in connection with "צְרִיתָם, e. g., "a bird caught in the snare," or "a bird hasteth to the snare," "fall in a snare," "escaped out of the snare of theowler." There is also one still more precise allusion, in Ezek. xi. 30, to the well-known practice of using decoy or call-birds, מִדְבָּר תֵּרָהוּנָה וְאֶפֶרָדָה. The references in Jer. v. 27, "A cage is full of birds" (צְרִיתָם), is probably to the same mode of snaring birds.
There are four or five simple methods of fowling practiced at this day in Palestine which are probably identical with those alluded to in the O.T. The simplest, but by no means the least successful, among the dexterous Bedouins, is fowling with the throw-stick. The only weapon used is a short stick, about 18 inches long and half an inch in diameter, and the chase is conducted after the fashion in which, as we read, the Australasian natives pursue the kangaroo with their homong. When the game has been discovered, which is generally the red-legged great partridge (Cuculus sativit, Mey.), the desert partridge (Ammonotritix Hegi, Gr.), or the little bustard (this tetrax, L.), the stick is hurled with a revolving motion so as to strike the legs of the bird as it runs, or sometimes at a rather higher elevation, so that when the victim, alarmed by the approach of the weapon, begins to rise, its wings are struck and it is slightly disabled. The fleet pursuers soon come up, and using their burrstones as a sort of net, catch and at once cut the throat of the game. The Musulmans rigidly observe the Mosaic injunctions (Lev. xxi. 33) to spill the blood of every slain animal on the ground. This precaution has been abandoned by the Bedouins, of whose birds which, like the red-legged partridges and bustards, rely for safety chiefly on their running powers, and are with difficulty induced to take flight. The writer once witnessed the capture of the little desert partridge (Ammonotritix Hegi) by this method in the wilderness near Hebron: an interesting illustration of the expression in 1 Sam. xxvi. 29, "as when one hunt a partridge in the mountains." A more scientific method of fowling is that adopted in Exod. x. 30, by the use of decoy-birds. The birds employed for this purpose are very carefully trained and perfectly tame, that they may utter their natural call-note without any alarm from the neighborhood of men. Partridges, quails, larks, and plovers are taken by this kind of fowling, especially the two former. The decoy-bird, in a cage, is placed in a concealed position, while the fowler is seated in the neighborhood, near enough to manage his guns and stores. For game-birds, a common method is to construct of brushwood a narrow run leading to the cage, sometimes using a sort of bag-net within the brushwood. This has a trap-door at the entrance, and when the dupe has entered to take up some lure, the dogs enter, and numbers of quail are taken in this manner in spring. Sometimes, instead of the more elaborate decoy of a run, a mere cage with an open door is placed in front of the decoy-bird, of course well concealed by grass and herbage, and the door is let fall by a string, as in the other method. For larks and other smaller birds the decoy-bird is found in a somewhat different manner. The cage is placed without concealment on the ground, and springes, nets, or horse-hair nooses are laid round it to entangle the feet of those whom curiosity attracts to the stranger; or a net is so contrived as to be drawn over them, if the cage be placed in a thicket or among brushwood. Immense numbers can be taken by this means in a very short space of time. Traps, the door of which revolves as the weight of the bird, exactly like the traps used by the shepherds on the Sussex downs to take weathears and larks, are constructed by the Bedouin boys, and also the horse-hair springs so familiar to all English school-boys, though these devices are not wholesale enough to repay the professional fowler. It is to the noose on the ground that reference is made in Ps. cxxiv. 7: "The snare is broken and we are escaped." In the towns and gardens great numbers of birds, starlings and others, are taken for the markets at night by means of a large loose net on two poles, and a lantern, which startles the birds from their perch, when they fall into the net.

At the season of migration immense numbers of birds, and especially quails, are taken by a yet more simple method. When notice has been given of the arrival of a flight of quails, the whole village turns out. The birds, fatigued by their long flight, generally descend to rest in some open space a few acres in extent. The fowlers, perhaps twenty or thirty in number, spread themselves in a circle round them, and, extending their loose large burrstones with both arms before them, gently advance toward the centre, or to some spot where they take care there shall be some low brushwood. The birds, not seeing their pursuers, and only slightly alarmed by the clacks spread before them, begin to run together without taking flight, until they are hemmed into a very small space. At a given signal the whole of the pursuers make a din on all sides, and the flock, not seeing any mode of escape, rush together into the bashes, when the burrstones are thrown over them, and the whole are easily captured by hand.

Although we have evidence that dogs were used by the ancient Egyptians, Assyrians, and Indians in the chase, yet there is no allusion in Scripture to their being so employed among the Jews, nor does it appear that any of the ancients employed the Sagacity of the dog, as we do, in that of the policeman and setter, as an auxiliary in the chase of winged game. At the present day the Bedouins of Palestine employ, in the pursuit of larger game, a very valuable race of greyhounds, resembling the Scottish stag-hound in size and strength: but the inhabitants of the towns have a strong prejudice against the unclean animal, and never cultivate its instinct for any further purpose than that of protecting their houses and flocks (Is. iv. 10; Job xxx. 1), and of removing the offid from their towns and villages. No wonder, then, that its use has been neglected for purposes which would have entailed the constant danger of defilement from an unclean animal, besides the risk of being compelled to reject as foul game which might be torn by the dogs (cf. Ex. xxiii. 41). Whether falconry was ever employed as a mode of falconry or not is by no means so clear. Its antiquity is certainly much greater than the introduction of dogs in the chase of birds; and from the statement of Aristotle (Anim. Hist. ix. 24), "In the city of Thrace, formerly called Celidomus, men hunt birds in the woods with the help of hawks," and from the allusion to the use of falconry in India, according to Photius' abridgment of Ctesias, we may presume that the art was known to the neighbors of the ancient Israelites (see also Elkan, Hist. Isiv. iv. 26; and Pliny, x. 3). Falconry, however, requires an open and not very rugged country for its successful pursuit, and Palestine west of the Jordan is in many respects ill adapted for this species of chase. At the present day falconry is practiced with much care and skill by the Arab inhabitants of Syria, though not in Judea proper. It is indeed the favorite amusement of all the Bedouins of Asia and Africa, and esteemed an exclusively noble sport, only to be indulged in by wealthy shelf. The rarest and most valuable species of hunting falcon (Falco Lanneri, L.), the Lanner, is a native of

SPARTA

Lebanon and of the northern hills of Palestine. It is highly prized by the inhabitants, and the young are taken from the nest and sold for a considerable price to the chitahins of the Hurram. Forty pounds sterling is a common price for a well-trained falcon. A description of falconry as now practiced among the Arabs would be out of place here, as there is no direct allusion to the subject in the O. T. or N. T.

H. B. T.

SPARTA (Σπάρτη [read, σπάρτη]). 1 Macc. xvi. 16; Apoc. I. xiv. 15; 2 Macc. v. 9: A. V. "Lacedaemonians". In the history of the Macedonians mention is made of a remarkable correspondence between the Jews and the Spartans, which has been the subject of much discussion. The alleged facts are briefly these. When Jonathan endeavored to strengthen his government by foreign alliances (cir. B. C. 144), he sent to Sparta to renew a friendly intercourse which had been begun at an earlier time between Areus and Onias (Aulius Onias), on the ground of their common descent from Abraham (1 Macc. xii. 5-23). The embassy was favorably received, and after the death of Jonathan "the friendship and league" was renewed with Simon (1 Macc. xiv. 16-23). No results are deduced from this correspondence, which is referred to in 2 Macc. iv. 39 in connection with the Macedonians; and imprecise copies of the official documents are given as in the case of similar negotiations with the Romans. Several questions arise out of these statements as to (1) the people described under the name Spartans, (2) the relationship of the Jews and Spartans, (3) the historic character of the events, and (4) the persons referred to under the names Onias and Areus.

1. The whole context of the passage, as well as the independent reference to the connection of the "Lacedaemonians" and Jews in 2 Macc. v. 9, seem to prove clearly that the reference is to the Spartans, properly so called; Josephus evidently understood the records in this sense, and the other interpretations which have been advanced are merely conjectures to avoid the supposed difficulties of the literal interpretation. Thus Michaelis conjectured that the words in the original text were ΛΕΔΕΚΑΟΝΔΟΝΙΑΙ and thus substituted Sparta for Sabrakad [Sephakad]. And Frankel, again (Montescriphiit, 1835, p. 456), endeavors to show that the name Spartans may have been given to the Jewish settlement at Nishia, the chief center of the Armenian Dispersion. But against these hypotheses it may be urged conclusively that it is incredible that a Jewish colony should have been so completely separated from the mother state as to need to be reminded of its kindred, and also that the vicissitudes of the government of this strange city (1 Macc. xii. 20, βασιλεύς; xiv. 20, βασιλεύς; καὶ δὲ πολίτης) should have corresponded with those of Sparta itself.

2. The actual relationship of the Jews and Spartans (2 Macc. v. 9, συγγενεία) is an ethnological error, which it is difficult to trace to its origin. It is possible that the Jews regarded the Spartans as the representatives of the Pelasgi, the supposed descendants of Pele gr the son of Eber (Stillingfleet,Origins Secrec, iii. 4, 157; Gréard, Gesch. iv. 277, note), just as in another place the Pergamenes trace back their friendship with the Jews to a connection in the time of Abraham (Joseph. Ant. xiv. 10, § 22); if this were so, they might easily spread their opinion. It is certain, from an independent passage, that a Jewish colony existed at Sparta at an early time (1 Macc. xvi. 23), and the important settlement of the Jews in Cyrene may likewise be compared to the more intimate connection between the two races. The belief in this relationship appears to have continued to later times (Joseph. B. J. i. 20, § 1), and, however mistaken, may be paralleled by other popular legends of the eastern origin of Greek states. The various hypotheses proposed to support the truth of the statement are examined by Werniger (De pede Lib. Macc. § 94), but probably no one now would maintain it.

3. The incorrectness of the opinion on which the intercourse was based is obviously no objection to the fact of the intercourse itself; and the very obscurity of Sparta at the time makes it extremely unlikely that any forger would invent such an incident. But it is urged that the letters said to have been exchanged are evidently not genuine, since they betray their fictitious origin negatively by the absence of characteristic forms of expression, and positively by actual inaccuracies. To this it may be replied that the Spartan letters (1 Macc. xii. 20-23, xiv. 29-23) are extremely brief, and exist only in a translation of a translation, so that it is unreasonable to expect that any Doric peculiarities should have been preserved. The Hebrew translator of the Hebrew original would naturally render the text before him without any regard to what might have been its original form (xii. 22-25, συγγενεία, συγγενεία xiv. 29, δεῖξθαι). On the other hand the absence of the name of the second king of Sparta in the first letter (1 Macc. xii. 29), and of both kings in the second (1 Macc. xiv. 20), is probably to be explained by the political circumstances under which the letters were written. The text of the first letter, as given by Josephus (Ant. xii. 4, § 10), contains some variations, and a very remarkable additional clause at the end. The second letter is apparently only a fragment.

4. The difficulty of fixing the date of the first correspondence is increased by the recurrence of the names involved. Two kings bore the name Areus, one of whom is said to have died B.C. 299-295, and the other, his grandson, died B.C. 237, being only eight years old. The same name was also borne by an adventurer, who occupied a prominent position at Sparta, cir. B.C. 184 (Polyb. xxiii. 11, 12). In Judaea, again, three high-priests bore the name Onias, the first of whom held office B.c. 330-300 (or 300); the second, B.C. 240-220; and the third, cir. B.C. 198-171. Thus Onias I. was for a short time contemporary with Areus I., and the correspondence has been commonly assigned to them (Palmer, De Epist. etc., Darms. 1828; Grimm, in 1 Macc. xii.). But the position of Judaea at that time was not such as to make the contraction of foreign alliances a likely occurrence; and the special circumstances which are said to have directed the attention of the Spartan king to the Jews as likely to effect a diversion against Demetrius Poliorcetes when he was engaged in the war with Cassander, cir. B.C. 592 (Palmer, quoted by Grimm, c. 4), are not completely satisfactory, even if the priesthood of Onias can be extended to the later date.a

a Ewald (Gesch. iv. 276, 277, note) supposes that the letter was addressed to Onias II. during his 

1828;
This being so, Josephus is probably correct in fixing the event in the time of Onias III. (Ant. xii. 4, § 10). The last-named Ages may have assumed the royal title, if that is not due to an exaggerated translation, and the absence of the name of a second king is at once explained (Ussher, Antiqui. A. C. 183; Herzfeld, Gesch. d. V. Ins. i. 215-218). At the time when Jonathan and Simon made negotiations with Sparta, the succession of kings had ceased. The last absolute ruler was Nabás, who was assassinated in n. c. 192. (Wernstedt, De Röde Bäumen. Met. §§ 93-112; Grima, l.c.; Herzfeld, l.c. The early literature of the subject is given by Wernstedt.) B. F. W.

**SPEAR.** [Arms.]

**SPEAR MEN (δεξιολάθος).** The word thus rendered in the A. V. of Acts xxiii. 23 is of very rare occurrence, and its meaning is extremely obscure. Our translators followed the loco'mir of the Vulgate, and it seems probable that their rendering approximates most nearly to the true meaning. The reading of the Codex Alexandrinus is δεξιολάθος, which is literally followed by the Syriac-Syriac, where the word is translated "darters with the right hand." Lachmann adopts this reading, which appears also to have been that of the Arabic in Walton's Polyzotic. Two hundred δεξιολάθος formed part of the escort which accompanied St. Paul in the night-march from Jerusalem to Cesarea. They are clearly distinguished both from the στρατιώται, or heavy-armed legionaries, who only went as far as Antipatris, and from the ἱππεῖς, or cavalry, who continued the journey to Cesarea. As nothing is said of the δεξιολάθος to Jerusalem after their arrival at Antipatris, we may infer that they accompanied the cavalry to Cesarea, and this strengthens the supposition that they were irregular light-armed troops, so lightly armed, indeed, as to be able to keep pace on the march with mounted soldiers. Meyer (Komentar, ii. 3, s. 404, 29th Ed.) conjectures that they were a particular kind of light-armed troops (called by the Romans Velites, or Rosarii), probably either javelin-men or slingers. In a passage quoted by the Emperor Constantine Porphyrogeneta (Them. i. 1) from John of Philopæphila, they are distinguished both from the archers and from the pelestai, or targets, and these are described as forming a body of light-armed troops, who in the 10th century were under the command of an officer called a turmaeth. Grotius, however, was of opinion that at this late period the term had merely been adopted from the narrative in the Acts, and that the usage in the 10th century is no safe guide to its true meaning. Others regard them as body-guards of the governor, and Mæursis, in his Glossarium Graeco-Romano, supposes them to have been a kind of military locutors, who had the charge of arresting prisoners; but the great number (200) employed is against both these suppositions. In Sindas and the Eymologion Magnion παραπόλεμως is given as the equivalent of δεξιολάθος. The word occurs again in one of the Byzantine historians, Theophylactus Simocatta (iv. 1), and is used by him of soldiers who were employed on skirmishing duty. It is probable, therefore, that the δεξιολάθος were light-armed troops of some kind, but nothing is certainly known about them.

* **SPEAR.** [Rye.]

**SPICE.** Under this head it will be desirable to notice the following Hebrew words, *hacatān, neqoth, and amunim.*

1. *hacatān, bacsan, or baca (בַּכָּסָן, בַּכֵּא, or הבכא: בַּכָּסְאָתָן, בַּכֵּא: אֲמֻנִּים. The first formed term of the Hebrew term, which occurs only in Cant. i. 1, "I have gathered my myrrh with my spice," points apparently to some definite substance. In the other places, with the exception perhaps of Cant. i. 1, vi. 2, the words refer more generally to sweet aromatic odors, the principal of which was that of the balsam, or, in the Midian: the tree which yields this substance is now generally admitted to be the *Amyris (Balsamum-drynum) odybolosmos* though it is probable that other species of *Amyriberus* are included under the terms. The identity of the Hebrew name with the Arabic *busram* (버סם) or *Balsam* (בַּכָּסָם) leaves no reason to doubt that the substances are identical. The *Amyris odybolosmos* was observed by Forskål near Mecca; it was called by the Arabs *Abu-acham,* i. e. "very odoriferous." But whether this was the same plant that was cultivated in the plains of Jericho, and celebrated throughout the world (Phyll. II. N. XII. 23; Theophrastus, Hist. Plunt. ix. 6; Josephus, Ant. xv. 4, § 2; Strabo, xvi. 367; &c.), it is difficult to determine; but being a tropical plant, it
cannot be supposed to have grown except in the warm valleys of the S. of Palestine. The shrub mentioned by Burekhardt (Tract, p. 323) as growing in gardens near Tiberias, and which he was informed was the balsam, cannot have been the tree in question. The A. V. never renders Balsam by "balm"; it gives this word as the representative of the Hebrew ṭexr, or ṭevúr [Balm]. The form ṭexr or ṭwew, which is of frequent occurrence in the O. T., may well be represented by the general term of "spices," or "sweet odors," in accordance with the renderings of the LXX. and Vulg. The balm of Gilead tree grows in some parts of Arabia and Africa, and is seldom more than fifteen feet high, with straggling branches and scanty foliage. The balsam is chiefly obtained from incisions in the bark, but the substance is procured also from the green and ripe berries. The balsam orchards near Jericho appear to have existed at the time of Titus, by whose legion they were taken formal possession of, but no remains of the balm have been discovered. (See Scripture Herbod, p. 33.)

2. Nēqēth (נְקֶתָה: θυμαίνα: aromato). The company of Ishmaelites merchants to whom Joseph was sold were on their way from Gilead to Egypt, with their camels bearing nēqēth, ṭexr [Balm], and lot (lithuan) (Gen. xxxvii. 25); this same substance was also among the presents which Jacob sent to Joseph in Egypt (see Gen. xliii. 11). It is probable from both these passages that nēqēth, if a name for some definite substance, was a product of Palestine, as it is named with other "best fruits of the land," the lot in the former passage being the gum of the Cistus creticus, and not "myrrh," as the A. V. renders it. [MYRRH.] Various opinions have been formed as to what nēqēth denotes, for which see Chahou, Hierod, i. 548, and Rosenmiller, Schol. in Gen. (l. c.): the most probable explanation is that which refers the word to the substance "karpēkēnt (καρπηκέντ), i.e. "the gum obtained from the fragrant tree" (Astragalus), three or four species of which genus are enumerated as occurring in Palestine; see Strand's Flora Palestina, No 413-416. The gum is a natural exudation from the trunk and branches of the plant, which, on being "exposed to the air grows hard, and is formed either into lumps or slender pieces curled and winding like worms, more or less long according as matter offers" (Toumefort, Voyages, i. 58, ed. Lond. 1741).

It is uncertain whether the word nēqēth in 2 K. xx. 13; Is. xxxix. 2, denotes spice of any kind. The A. V. reads in the text "the house of his precious things," the myrrhin gives "spicery," which has the support of the Vulg., Aqu., and Symm. It is clear from the passages referred to that Hezekiah possessed a house or treasury of precious and useful vegetable productions, and that nēqēth may be in these places denote, though perhaps not exclusively, tragacanth gum. Keil (Comment. l. c.) derives the word from an unused root (נְקָת, "implies cartilage"), and renders it by "treasure." 3. Sammim (סְמִים: θυμάρια: θυμάρια: more frangranis, bemi skoris, gretissimus aromato). A general term to denote those aromatic substances which were used in the preparation of the anointing oil, the incense offerings, etc. The root of the word, according to Gesenius, is to be referred to the Arabic Sāmān, "olfecit," whence Sāna, "an odoriferous substance." For more particular information on the various aromatic substances mentioned in the Bible, the reader is referred to the articles which treat of the different kinds: Frankincense, Galbanum, Myrrh, Spicery, Cinnamon, etc.

The spices mentioned as being used by nicodemus for the preparation of our Lord's body (John xix. 39, 40) are "myrrh and aloes," by which latter word must be understood, not the aces of medicine (Aloe), but the highly-scented wood of the Apipera-vicia agathocoma (but see Aloe, i. 71 f.). The enormous quantity of 100 lbs. weight of which St. John speaks, has excited the incredulity of some authors. Josephus, however, tells us that there were five hundred spice-bearers at Herod's funeral (Ant. viii. 8, § 3), and in the Talmud it is said that 80 lbs. of opobalsamum were employed at the funeral of a certain Rabbi; still there is no reason to conclude that 100 lbs. weight of pure myrrh and aloes was consumed; the words of the Evangelist imply a preparation (μεθύμονα) in which perhaps the myrrh and aloes were the principal or most costly aromatic ingredients; again, it must be remembered that Nicodemus was a rich man, and perhaps was the owner of large stores of precious substances; as a constant through timid disciple of our Lord, he probably did not scruple at any sacrifice so that he could show his respect for Him.

W. H.

SPIDER. The representative in the A. V. of the Hebrew words 'avvēlīth and samdēmīth.

1. 'Avvēlīth (אַבְלִית: ἀβελίθ: aromenon) occurs in Job viii. 14, of the ungodly (A. V. hypocrite) it is said his "hope shall be cut off, and his trust shall be the house of an 'avvēlīth,;" and in Is. lx. 5, where the wicked Jews are allegorically said to "weave the web of the 'avvēlīth." There is no doubt of the correctness of our translation in rendering this word "spider." In the two pas-
 SPIKENARD

V. H.

SPIKENARD

The plant, which has been called Nard, is doubtless this order is abundantly represented.

$2. \text{Simulith (Σίμουλιθ): κακάλαγης: stellio),}$

We are much indebted to the late lamented Dr. Royle for helping to clear up the doubts that had long existed as to what particular plant furnished the aromatic substance known as "spikenard." Of this substance mention is made twice in the O. T., namely, in the Cant. i. 12, where its sweet odor is alluded to, and in iv. 13, 14, where it is enumerated with various other aromatic substances which were imported at an early age from Arabia or India and the far East. The ointment with which our Lord was anointed as He sat at meat in Simon's house at Bethany consisted of this precious substance, the costliness of which may be inferred from the indignant surprise manifested by some of the witnesses of the transaction (see Mark xiv. 3-5; John xii. 3-5). With this may be compared Horace, i. Carus. xii. 16, 17—

"Nardo tina mercede.
Nardi parus auct ciecit cadum."

Discoiresse speaks of several kinds of $\text{vaphos},$ and gives the names of various substances which composed the ointment (l. 77). The Hebrew $\text{vaphel},$ according to Gesenius, is of Indian origin, and signifies the $\text{stolk} \text{a} \text{of a plant: hence one of the Arabic names given by Avicenna as the equivalent of nard is simbul, }$ 

"spica;" comp. the Greek $\text{σφηναργείον,}$ and our "spikenard." But whatever may be the derivation of the Heb. $\text{Simulith,}$ there is no doubt that $\text{simbul}$ is by Arabian authors used as the representative of the Greek $\text{σφηναργείον},$ as Sir Wm. Jones has shown (A Discourse p. 416). It appears, however, that this great oriental scholar was unable to obtain the plant from which the drug is procured, a wrong plant having been sent him by Roxburgh. Dr. Royle, who directed the E. I. Company's botanical garden at Sahlarmapore, about 30 miles from the foot of the Himalayan Mountains, having ascertained that the $\text{jatunumace,}$ one of the Hindu synonyms for the $\text{simbul,}$ was annually brought from the mountains overhanging the Ganges and Jumna rivers down to the plains, purchased some of these fresh roots and planted them in the botanical garden. They produced the same plant which in 1825 had been described by Don from specimens sent by Dr. Wallis from Nepal, and named by him $\text{Patrinia jatunumac (see the Prodromus Flore Nepalensi, etc., occ. p. 116.)}$ The identity of the $\text{jatunumace}$ with the $\text{Simalh kindle}$ of the Arabs is established beyond a doubt by the form of a portion of the rough stem of the plant, which the Arabs describe as being like the tail of an ermine (see wood-cuts). This plant, which has been called Nard, is doubtless this order is abundantly represented.

W. H.

The plant, which has been called Nard, is doubtless this order is abundantly represented.

$\text{Spikenard.}$

$\text{Spikenard.}$

$\text{Spikenard.}$

The notices of spinning in the Bible are confined to Ex. xxxv 25; 26; Matt. vi. 26; and Prov. xxxi. 19. The latter passage implies (according to the A. V.) the use of the same instruments which have been in vogue for hand-spinning down to the present day, namely, the distaff and spindle. The distaff, however, appears to have been dispersed with, and the term "so rendered means the spindle itself, while that rendered "spindle" represents the white rectidilla, "linn. xxxvii. 11) of the spindle, a button or circular ring which was affixed to it, and gave steadiness to its circular motion. The "whirl"
SPIRIT, THE HOLY

of the Strymon women was made of amber in the time of Pliny (i. c.e.). The spindle was held perpendicularly in one hand, while the other was employed in drawing out the thread. The process is exhibited in the Egyptian paintings (Wilkinson, ii. 85). Spinning was the business of women, both among the Jews (Ex. ii. 24), and for the most part among the Egyptians (Wilkinson, ii. 84).

W. L. B.

SPIRIT, THE HOLY. In the O. T. He is generally called סpirit, רוח, or נֵפֶשׁ רוח; the Spirit of God, the Spirit of Jehovah; sometimes the Holy Spirit of Jehovah, as Ps. li. 11; Isa. xlii. 10; or the Good Spirit of Jehovah, as Ezek. xlii. 11; Neh. iv. 48. In the N. T. He is generally הֵנֶפֶשׁ רוח, or simply הֵנֶפֶשׁ רוח, the Holy Spirit; sometimes the Spirit of God, of the Lord, of Jesus Christ, as in Matt. iii. 16; Acts v. 3; Phil. i. 19, &c.

In accordance with what seems to be the general rule of Divine Revelation, that the knowledge of heavenly things was given chiefly, and more clearly in later ages, the person, attributes, and operations of the Holy Ghost are made known to us chiefly in the New Testament. And in the light of such later revelation, words which when heard by patriarchs and prophets were probably misunderstood or neglected by them, become full of meaning to Christians.

In the earliest period of Jewish history the Holy Spirit was revealed as co-operating in the creation of the world (Gen. i. 2), as the Source, Giver, and Sustainer of life (Job xxvii. 3, xxxiv. 3; Gen. ii. 7); as resisting the evil inclinations of men (Gen. vi. 3); as the Source of intellectual excellence (Gen. xlii. 38; Deut. xxxiv. 9); of skill in handicraft (Ex. xxviii. 3, xxxii. 34, xxxiii. 31); of supernatural knowledge and prophetic gifts (Num. xxii. 24; of valor and those qualities of mind or body which give one man acknowledged superiority over others (Judg. iii. 10, vi. 34, xi. 29, xii. 25).

In that period which began with Samuel, the effect of the Spirit coming on a man is described in the remarkable case of Saul as change of heart (1 Sam. x. 10; cf. 1 Sam. x. 19; 1 Sam. xix. 20). He departs from a man whom He has once changed (1 Sam. xvi. 14). His departure is the departure of God (xvi. 14, xviii. 12, xxvii. 15). His presence is the presence of God (xvi. 13, xviii. 12). In the period of the Kingdom the operation of the Spirit was recognized chiefly in the inspiration of the prophets (see Wis. 9:9; Ecclesiast. Sir, vi. 1; J. Smith, "Select Discourses," p. 6; "Prophesie: Knobel, Prophetismus der Hebräer"). Separated more or less from the common occupations of men to a life of special religious exercise (H. Bull's "Sermoons," p. 187, ed. 1840), they were sometimes workers of miracles, always foretellers of future events, and guides and advisers of the social and political life of the people who were contemporary with them (2 K. iii. 9; 2 Chr. xxiv. 20; Neh. ix. 30, &c.). In their writings are found abundant predictions of the ordinary operations of the Spirit which were to be most frequent in later times, by which holiness, justice, peace, and consolation were to be spread throughout the world (Isa. xxvi. 13; Ex. xxiii. 20). They found a confirmation of the Scriptures in the nature and results of the miraculous operations of the Spirit which are related in the pages of the Bible (Acts x. 34, xxii. 21; John xiv. 16, xxvii. 13; Acts x. 49). They were not prepared to receive the Holy Spirit in the Person of Jesus Christ, nor did they know the Holy Spirit in the Person of Jesus Christ, after the miraculous conception of the Redeemer (Matt. i. 18) was the work of the Spirit, by the Spirit He was anointed in the womb or at baptism (Acts x. 38; cf. Pearson, "On the Creed," Art. ii. p. 126, ed. Oxon. 1843); and the gradual growth of his perfect human nature was in the Spirit (Luke i. 40, 52). A visible sign from heaven showed the Spirit descending on and abiding with Christ, whom He therefore filled and led (Luke iv. 1), co-operating with Christ in his miracles (Matt. xii. 18). The multitude of disciples are taught to pray for and expect the Spirit as the best and greatest boon they can seek (Luke xi. 13). He inspires with miraculous powers the first teachers whom Christ sends forth, and He is repeatedly promised and given by Christ to the Apostles (Matt. x. 20, xii. 28; John xiv. 16, xxii. 22; Acts i. 8).

Perhaps it was in order to correct the grossly defective conceptions of the Holy Spirit which prevailed commonly among the people, and to teach them that this is the most awful possession of the heirs of the kingdom of heaven, that our Lord himself pronounced the strong condemnation of blasphemers of the Holy Ghost (Matt. xii. 31).
This has roused in every age the susceptibility of tender consciences, and has caused much inquiry to be made as to the specific character of the sin so denounced, and of the human actions which fall under so terrible a ban. On the one hand it is argued that no one now occupies the exact position of the Pharisees whom our Lord condemned, for they had not entered into covenant with the Holy Spirit by baptism; they did not merely disobey the Spirit's promptings within them, but shamefully and deliberately spurned an inward motion to the devil; they resisted not merely an inward motion but an outward call, supported by the evidence of miracles wrought before their eyes. On the other hand, a moral conscience is prone to apprehend the unpardonable sin in every, even unintentional, resistance of an inward motion which may proceed from the Spirit. This subject is referred to in Article XVI. of the Church of England, and is discussed by Burnet, Beveridge, and Harold Browne, in their _Expositions of the Articles_.

But the Ascension of our Lord is marked (Eph. iv. 8; John vii. 39, 40) as the commencement of a new period in the history of the inspiration of men by the Holy Ghost. The interval between that event and the end of the world is often described as the Dispensation of the Spirit. It was not merely (as Diodorus *Alex., De Tribusae_, iii. 34, p. 431, and others have suggested) that the knowledge of the Spirit's operations became more general among mankind. It cannot be allowed (though Bp. Heber, _Lectures_, viii. 24 and vii. 488, and Warburton have maintained it) that the Holy Spirit has sufficiently redeemed his gracious promise to every succeeding age of Christians only by presenting us with the New Testament. Something more was promised, and continues to be given.

Under the old dispensation the gifts of the Holy Spirit were unevangelized, not universal, intermittent. All this changed, when our Lord, by ordaining (Matt. xxv. 19) that every Christian should be baptized in the name of the Holy Ghost, indicated at once the absolute necessity from that time forth of a personal connection of every believer with the Spirit: and (in John xvi. 7-15) he declares the internal character of the Spirit's work, and (in John xiv. 15, 17, &c.) his permanent stay. And subsequently the Spirit's operations under the new dispensation are authoritatively announced as universal and internal in two remarkable passages (Acts ii. 16-21; Heb. vili. 8-12). The different relations of the Spirit to believers severally under the old and new dispensation are described by St. Paul under the images of a master to a servant, and a father to a son (Rom. viii. 15): so much deeper and more intimate is the union, so much higher the position (Matt. xi. 25) of a believer in the later stage than in the earlier (see J. G. Welch, _Miscellanea Sacra_, p. 763; _De Spiritu Adiuvionis_, and the opinions collected in note H in Hare's _Mission of the Comforter_, vol ii. p. 433). The rite of imposition of hands, not only on teachers, but also on ordinary Christians, which has been used in the Apostolic (Acts xi. 19, xii. 11; xiii. 3, xii. 6, &c.) and in all subsequent ages, is a testimony borne by those who come under the new dispensation to their belief of the reality, permanence, and universality of the gift of the Spirit.

Under the Christian dispensation it appears to be the office of the Holy Ghost to enter into and dwell within every believer (Rom. viii. 9, 11; 1 John iii. 24). By Him the work of Redemption is (so to speak) appropriated and carried out to its completion in the case of every one of the elect people of God. To believe, to profess sincerely the Christian faith, and to walk as a Christian, are his gifts (2 Cor. iv. 13; 1 Cor. xii. 3; Gal. v. 18) to each person severally; not only does He bestow the power and faculty of doing, but He concepts (1 Cor. ix. 9; Phil. ii. 13) in every particular action so far as it is good (see South's _Sermons_, xxxv., vol ii. p. 292). His inspiration brings the true knowledge of all things (1 John ii. 27). He unites the whole multitude of believers into one regularly organized body (1 Cor. xii., and Eph. iv. 4-16). He is not only the source of light to us on earth (1 Cor. ii. 9; Eph. iv. 13), but the power by whom God raises us from the dead (Rom. viii. 11). All Scripture, by which men in every successive generation are instructed and made wise unto salvation, is inspired by Him (Eph. iii. 5; 2 Tim. iii. 16; 2 Pet. i. 21): He cooperates with suppliants in the utterance of every effectual prayer that ascendeth on high (Eph. iii. 18, 19; Rom. viii. 26); He strengthens (Eph. iii. 16), sometimes (2 Thes. ii. 13), and seals the souls of men unto the day of completed redemption (Eph. i. 13, iv. 30).
SPIRIT, THE HOLY

(Matt. ii. 12) and the case of Cornelius, with the declaration of St. Peter (Acts x. 35) thereon, are instances showing that the Holy Spirit bestowed his gifts of knowledge and holiness in some degree even among heathen nations; and if we may go beyond the attestation of Scripture, it might be argued from the various actions of some heathens, from their sacerdote, who whatever good was in them to the influence of a present Deity (see the references in Heber's Lectures, vi. 446), and from their tenacious preservation of the rite of animal sacrifice, that the Spirit whose name they knew not must have girded them, and still girds such as they were, with secret blessings.

Thus far it has been attempted to sketch briefly the work of the Holy Spirit among men in all ages as it is revealed to us in the Bible. But after the closing of the canon of the N. T. the religions sanctity of oriental Christians led them to scrutinize, with the most intense accuracy, the words in which God has, incidentally as it were, revealed to us something of the mystery of the Being of the Holy Ghost. It would be vain now to condemn the superstitions and erroneous curiosity with which these researches were sometimes prosecuted, and the scurrilous contentions which they caused. The result of them was the formation and general acceptance of certain statements as inferences from Holy Scripture which took their place in the established creeds and in the teaching of the Fathers of the Church, and which the great body of Christians throughout the world continue to adhere to, and to guard with more or less vigilance.

The Sabellians are sometimes mentioned as proceeding any professed Christians in denying the personal existence of the Holy Ghost. Such was the inference of Epiphanius (Heres. xlix.), Gregory Nazianzen (Oratio, xxxi. § 3, p. 558, ed. Cerin.), and others, from the testimony of St. Luke (Acts xxii. 8). But it may be doubted whether the error of the Sabellians did not rather consist in asserting a corporeal Deity. Passing over this, in the first youthful age of the Church, when, as Neander observes (Ch. Hist. ii. § 37, Bohn's ed.), the power of the Holy Spirit was so mightily felt as a new creative, transforming principle of life, the knowledge of this Spirit, as identified with the Essence of God, was comparatively unimpressed on the understanding of Christians. Simon Magus, the Montanists, and the Manicheans, are said to have imagined that the promised Comforter was personified in certain human beings. The language of some of the primitive Fathers, though its deficiencies have been greatly exaggerated, occasionally shows itself of a full and complete acknowledgment of the Divinity of the Spirit. Their opinions are given in their own words, with much valuable criticism, in Dr. Burton's Testimonies of the Ante-Nicene Fathers to the Doctrine of the Trinity and the Divinity of the Holy Ghost (1831). Valentinus believed that the Holy Spirit was an angel. The Sabellians denied that He was a distinct Person from the Father and the Son. Eunomius, with the Arianism and the Arius, regarded Him as a created Being, Macedonius, with his followers the Pneumatarchi, also denied his Divinity, and regarded Him as a created Being attending on the Son. His procession from the Son as well as from the Father was the great point of controversy in the Middle Ages. In modern times the Jansenists and Spinozists have altogether denied the Personality, and have regarded Him as an influence or power of the Deity. It must suffice in this article to give the principal texts of Scripture in which these erroneous opinions are contradicted, and to refer to the principal works in which they are discussed at length. The documents in which various existing communities of Christians have stated their belief are specified by G. B. Winzer (Conventivale Darstellung des Lehrbegriffs, etc., pp. 41 and 80).

The Divinity of the Holy Ghost is proved by the fact that He is called God. Compare 1 Sam. xvi. 13 with xviii. 12; Acts v. 3 with v. 4; 2 Cor. iii. 17 with Ex. xxxv. 34; Acts xxviii. 25 with Is. vi. 8; Matt. xii. 28 with Luke xii. 20; 1 Cor. iii. 16 with vi. 19. The attributes of God are ascribed to Him. He creates, works miracles, inspires prophets, is the Source of holiness (see above), is everlasting (Heb. ix. 14), omnipresent, and omniscient (Ps. cxix. 7; and 1 Cor. ii. 10).

The personality of the Holy Ghost is shown by the actions ascribed to Him. He hears and speaks (John xvi. 13; Acts x. 9, xiii. 2, &c.). He wills and acts on his decision (1 Cor. xii. 11). He can choose a certain course of action (Acts xvi. 28). He knows (1 Cor. ii. 11). He teaches (John xiv. 26). He intercedes (Rom. viii. 26). The texts 2 Thes. iii. 5, and 1 Thes. iii. 12, 13, are quoted against those who confound the three persons of the Godhead.

The procession of the Holy Ghost from the Father is shown from John xiv. 26; xv. 26, &c. The tenet of the Western Church that He proceeds from the Son is grounded on John xv. 26; xvii. 7; Rom. viii. 9; Gal. iv. 6; Phil. i. 19; 1 Pet. i. 11; and on the action of our Lord recorded by St. John xx. 22. The history of the long and important controversy on this point has been written by Plaf. by J. G. Walke, Historia Controverse de Procausio, 1751, and by Neale, History of the Eastern Church, ii. 1603.

Besides the Expositiones of the Thirty-nine Articles referred to above, and Pearson, On the Creed, art. viii., the work of Barrow (De Spiritu Sancto) contains an excellent summary of the various heresies and their confutation. The following works may be consulted for more detailed discussion:

* * *

* * *

Though this subject hardly compasses the proper scope of the Dictionary, a few references may be added to writers of different theologians.

found on Bibles, and dogmatic theology.
A.

SPOILER = plonherer (Judg. ii. 14; Jer.
vi. 20, vii. 12, &c.). [SPOILY]

SPOHNE (σπογης: spongius) is mentioned
only in the N. T. in those passages which relate to
the incident of a "sponge filled with vinegar and
put on a reed" (Matt. xxvii. 48; Mark xv. 39),
or "on hyssop" (John xix. 29), being offered to
Our Lord on the cross. The commercial value of
the sponge is known from very early times; and
although there appears to be no notice of it in the
O. T., yet it is probable that it was used by the
ancient Hebrews, who could readily have obtained
it good from the Mediterranean. Aristotle men-
tions several kinds, and carefully notices those
which were useful for economic purposes (Hist.
Anim. v. 14). His speculations on the nature of
the sponge are very interesting.
W. H.

SPOUSE. [Marriage]

STACHYS (Στάχυς [say of own]; Stockeye),
A Christian at Rome, saluted by St. Paul in the
Epistle to the Romans (xvi. 9). The name is Greek.
According to a tradition recorded by
Nicephorus Callistus (H. E. viii. 6) he was ap-
pointed bishop of Byzantium by St. Andrew, held
the office for sixteen years, and was succeeded by
Onesimus.

STALL. [Chiv: Manager]

STACTE (Στακτας; στακτης: stacte), the
name of one of the sweet species which composed
the holy incense (see Ex. xxx. 34). The Hebrew
word occurs once again (Job xxxvi. 27), where it
is used to denote simply a drop of water. For
the various opinions as to what substance is in-
tended by στακτης, see Celsius (Hiv. e. i. 529);
Rosenmüller (Bib. Bot. p. 164) identifies the στακτης
with the gum of the storax tree (Styrax officinalis);
the LXX. στακτης (tourt στακτης, "to drop") is
the exact translation of the Hebrew word. Now
Dioscorides describes two kinds of στακτης;
one is the fresh gum of the storax tree (Styrax
afron manner) mixed with water and squeezed
out through a press (i. 74); the other kind, which
he calls, from the manner in which it is prepared,
σκαλακτικης στακτης, denotes the resin of the
storax adulterated with wax and fat. The true
state of the Greek writers points to the distillation
from the storax tree, of which, according to The
ophrastus (Fr. lv. 29, ed. Schneider), both a natural
and a artificial kind were known; this is the
νυξ δολιον (Πρια πλη) of Ex. xxx. 23. Perhaps
the σκαλακτικης στακτης denotes the storax gum; but all that
is positively known is that it signifies an odoriferous
distillation from some plant. For some account of
the storax tree see under Poplar.

* STAFF. [Sceptre]

* STARS, Neh. vii. 15; Acts xxi. 35. [Jer.

* STARGAZERS. [Magi; and see the next
article.]

STAR OF THE WISE MEN. Until the last
few years the interpretation of St. Matt. ii. 1-12,
by theologians in general, coincided in the
view that which would be given to it by any
person of ordinary intelligence who read the ac-
count with due attention. Some supernatural light
resembling a star had appeared in some country
(possibly Persia) far to the east of Jerusalem, to
men who were versed in the study of celestial
phenomena, conveying to their minds a supernat-
ural impulse to repair to Jerusalem, where they
would without delay, find that mystic sign
foretold by the laws of their religion, and come
in the person of the Jewish infant. On
arriving at Jerusalem, after diligent inquiry and
consultation with the priests and learned men who
could naturally best inform them, they are directed
to proceed to Bethlehem. The star which they
had seen in the east reappeared to them and pre-
ceded them (προσερχεσθαι τωνι), until it took up its
station over the place where the young child was.
ος επετροικες επανω ιπ το παιδιον. The whole
matter, that is, was supernatural; forming a portion of that divine prearrangement,
whereby, in his deep humiliation among men, the
child was introduced to the world. He was
claimed as the son of the Father, as his beloved Son in whom He was well
pleased. Thus the lowly shepherds who kept their
nightly watch on the hills near to Bethlehem,
together with all that remained of the highest and
best philosophy of the East, are alike the par-
takers and the witnesses of the glory of Him who
was "born in the city of David, a Saviour which
is Christ the Lord." Such is substantially the
account which, until the earlier part of the present
century would have been given by orthodox divines,
of the Star of the Magi. Latterly, however,
a very different opinion has gradually become pre-
dominant upon the subject. The star has been dis-
placed from the category of the supernatural, and
has been reduced to the ordinary astronomical
phenomenon of a conjunction of the planets Jupiter
and Saturn. The idea originated with Kepler,
who, among many other brilliant but untenable
fancies, supposed that if he could identify a con-
junction of the above-named planets with the Star
of Bethlehem, he would thereby be able to de-
termine, on the basis of certainty, the very difficult
and obscure point of the Annus Domini. Kepler's
suggestion was worked out with great care and no
very great inaccuracy by Dr. Ilder of Berlin, and the results of his calculations certainly do, on the first impression, seem to show a very specious accordance with the phenomena of the star in question. We purpose, then, in the first place, to state what celestial phenomena did occur with reference to the planets Jupiter and Saturn, at a date assuredly not very distant from the time of our Saviour's birth; and then to examine how far they fulfilled, or fail to fulfill, the conditions required by the narrative in St. Matthew.

In the month, n. c. 7, a conjunction of the sun with Jupiter and Saturn occurred, not far from the first point of Aries, the planets rising in Chaldea about 33 hours before the sun. It is said that on astrological grounds such a conjunction could not fail to excite the attention of men like the Magi, and that in consequence partly of their knowledge of Baham's prophecy, and partly from the meager persuasion then said to be prevalent that some great one was to be born in the East, these Magi commenced their journey to Jerusalem. Supposing them to have set out at the end of May n. c. 7 upon a journey for which the circumstances will be seen to require at least seven months, the planets were observed to separate slowly until the end of July, when their motions becoming reverse, the joint conjunction came again by the end of September. At that time there can be no doubt Jupiter would present to astronomers, especially in so clear an atmosphere, a magnificent spectacle. It was then at its most brilliant apparition, for it was at its nearest approach both to the sun and to the earth. Not far from it would be seen its duller and much less conspicuous companion Saturn, the two planets being in conjunction almost unalterd for several days, when the planets again slowly separated, then came to a halt, when, by a resuming a direct motion, Jupiter again approached to a conjunction for the third time with Saturn, just as the Magi may be supposed to have entered the Holy City. And, to complete the fascination of the tale, about a month and a half after setting off the two planets almost come again to Jerusalem, hanging as it were in the meridian, and suspended over Bethlehem in the distance. These celestial phenomena thus described are, it will be seen, beyond the reach of question, and at the first impression they assuredly appear to fulfill the conditions of the Star of the Magi.

The first circumstance which created a suspicion to the contrary, arose from an exaggeration, unaccountable for any man having a claim to be ranked among astronomers, on the part of Dr. Ilder himself, who described the two planets as wearing the appearance of one bright but diffused light to person having weak eyes. — "So dass fur ein schwaches Auge der eine Planet fast in den Zenitstromungskreis der andern trat, wahin beide als ein einzigar Stern erschienen kamen;" p. 407, vol. ii. Not only is this imperfect eyesight inflected upon the Magi, but it is quite certain that had they possessed any remains of eyesight at all, they could not have failed to see, not a single star, but two planets, at the very considerable distance of double the moon's apparent diameter. Had they been even twenty times closer, the duplicity of the two stars must have been apparent: Saturn, moreover, rather confusing than adding to the brilliance of his companion. This forced blending of the two lights into one by Ilder, was still further improved by Dr. Alford in the first edition of his very valuable and suggestive Greek Testament, who indeed restores ordinary sight to the Magi, but represents the planets as forming a single star of surpassing brightness, although they were certainly at more than double the distance of the sun's apparent diameter. Exaggerations of this description induced the writer of this article to undertake the very formidable labor of calculating after Encke's method of the planets Jupiter and Saturn, and of the sun, from May to December n. c. 7. The result was to confirm the fact of there being three conjunctions during the above period, though somewhat to modify the dates assigned to them by Dr. Ilder. Similar results, also, have been obtained by Ecke, and the December conjunction has been confirmed by the Astronomer-Royal, no celestial phenomena, therefore, of ancient date are so certainly ascertained as the conjunctions in question. We shall now proceed to examine to what extent, or, as it will be seen, to how slight an extent the December conjunction fulfills the conditions of the narrative of St. Matthew. We can hardly avoid a feeling of regret at the dissipation of so fascinating a subject of speculation, if we are in pursuit of the truth, rather than of a picture, however beautiful.

(a.) The writer must confess himself profoundly ignorant of any system of astrology; but supposing that some system did exist, it nevertheless is inconceivable that solely on the ground of astrological reasons men would be induced to undertake a seven months' journey. And as the Magi and their attendants spread and prove the expectation of some powerful personage about to show himself in the East, the fact of its existence depends on the testimony of Tacitus, Suetonius, and Josephus. But it ought to be very carefully observed that all these writers speak of this expectation as applying to Vespasian, in A. D. 69, which date was seventy-five years, or two generations after the first planets mentioned in this passage were observed in the part of Persia. The eighteen known and often quoted words of Tacitus are "eo ipso tempore;" of Suetonius, "eo tempore;" of Josephus, "κατα των ναυσιν εκδοχην;" all pointing to A. D. 69, and not to B. C. 7. Seeing, then, that these writers refer to no general unexeay expectation as prevailing in B. C. 7, it can have formed no reason for the departure of the Magi. And, further more, it is quite certain that in the February of B. C. 66 (Pritchard, in Trans. R. Ast. Soc. vol. xxv.), a conjunction of Jupiter and Saturn occurred in the constellation Pisces, closer than the one on December 4, B. C. 7. If, therefore, astrological reasons alone impelled the Magi to journey to Jerusalem in the latter instance, similar considerations would have impelled their fathers to take the same journey fifty-five years before.

(b.) But even supposing the Magi did undertake the journey at the time in question, it seems impossible that the conjunction of December, B. C. 7 can on any reasonable grounds be considered as fulfilling the conditions in St. Matt. ii. 9. The circumstances are as follows: On December 4, the sun set at Jerusalem at 5 p. m. Supposing the Magi to have then commenced their journey to Bethlehem, they would first see Jupiter and his dull and somewhat distant companion 11 hour distant from the meridian, in a S. E. direction, and decidedly to the east of Bethlehem. By the time they came to Rachel's tomb (see Robinson's Bibl. Res. ii. 568, a. The atmosphere in parts of Persia is so transparent that the Magi may have seen the satelites of Jupiter with their naked eyes.
the planets would be due south of them, on the meridian, and no longer over the hill of Bethlehem (see the maps of Van de Velde and of Tolder), for that village (see Robinson, as above) bears from Rachel's tomb S. 5° E. + 60° declension = S. 13° E. The road then takes a turn to the east, and ascends the hill near to its western extremity; the planets therefore would now be on their right hands, and a little behind them: the "star," therefore, ceased altogether to go "before them" as a guide. Arrived on the hill and in the village, it became physically impossible for the star to stand over any house whatever close to them, seeing that it was now visible far away beyond the hill to the west, and far off in the heavens at an altitude of 57°. As they advanced, the star would of necessity recede, and under no circumstances could it be said to stand "over" ("ἐπάνω") any house, unless at the distance of miles from the place where they were. Thus the two heavenly bodies altogether fail to fulfill either of the conditions implied in the words "προφητεύειν αὐτοῖς" or "προφητεύειν ἀπάνω." A star, if vertical, would appear to stand over any house or object to which a spectator might chance to be near, but a star at an altitude of 57° would appear to stand over no house or object in the immediate neighborhood of the observer. It is scarcely necessary to add that if the Magi had left the Jaffa Gate before sunrise, they would not have seen the planets at the outset, and if they had left Jerusalem later, the "star" would have been a more useless guide than before. Thus the beautiful legend of Kepler and Tolder, which has delighted so many writers, vanishes before the more perfect daylight of investigation.

A modern writer of great ability (Dr. Wordsworth) has suggested the antithesis to Kepler's speculation regarding the star of the Magi, namely, that the star was visible to the Magi alone. It is difficult to see what is gained or explained by the hypothesis. The song of the multitude of the heavenly host was published abroad in Bethlehem; the journey of the Magi thither was no secret whispered in a corner. Why, then, should the heavenly light, standing as a beacon of glory over the place where the young child was, be concealed from all eyes but theirs, and form no part in that series of wonders which the Virgin Mother kept and pondered in her heart?

The original authorities on this question are Kepler, De Jesu Christi revo anno natalitio, Frankfurt, 1614; Ideler, Handbuch der Chronologie, ii. 398; Pritchard, Memoirs of Royal Ant. Society, vol. xxv. C. P.

A. STATER (στατήρ; stater; A. V. "a piece of money, a cressus")
1. The term stater, from στατήρ, is held to signify a coin of a certain weight, but perhaps means a standard coin. It is not restricted by the Greeks to a single denomination, but is applied to standard coins of gold, electrum, and silver. The gold staters were didrachms of the later Phœnician and Attic talents, which, in this denomination, differ only about four grains from the former talent. If the former talent were the Baric staters or Daries (στατήρες Δαρείων, Δαρείων), the famous Persian gold pieces, and those of Cæcusan (Καρσαύνων), of the latter, the stater of Athens. The electrum staters were coined by the Greek towns on the west coast of Asia Minor; the most famous were those of Cyzicus (στατήρες Κυζηνειοῦ Κυζηνειοῦ), which weigh about 248 grains. They are of gold and silver mixed, in the proportion, according to ancient authority,—for we believe these rare coins have not been analyzed,—of three parts of gold to one of silver. The gold was above reckoned in the value, for it is said that one of these coins was equal to 28 Athenian silver didrachms, while the Athenian gold stater, weighing about 132 grains, was equal to 20 (20: 184: 25: 28 184 1-2): or of a (Cyzicus stater). This stater was thus of 184+ grains, and equivalent to a didrachm of the Egeietum talent. Thus for the stater is always a didrachm. In silver, however, the term is applied to the tetradrachm of Athens, which was of the weight of two gold staters of the same currency. There can therefore be no doubt that the same stater was applied to the standard denomination of both metals, and does not positively imply either a didrachm or a tetradrachm.

2. In the N. T. the stater is once mentioned, in the narrative of the miracle of the sacred tribute-money. At Capernaum the receivers of the didrachms (τὰ διδράχμα Αμαλήθησας) asked St. Peter whether his master paid the didrachms. The didrachm refers to the yearly tribute paid by every Hebrew into the treasury of the Temple. The sum was half a shekel, called by the LXX. τὸ ἕλκαν τοῦ διδράχμου. The plain inference would therefore be, that the receivers of sacred tribute took their name from the ordinary coin or weight of metal, the shekel, of which each person paid half. But it has been supposed that as the coined equivalent of this didrachm at the period of the Evangelist was a tetradrachm, and the payment of each person was therefore a current didrachm [of account], the term here applied to single payments of didrachms. This opinion would appear to receive some support from the statement of Josephus, that the Vespasian fixed a yearly tax of two didrachms on the Jews instead of that they had formerly paid into the treasury of the Temple (Downloaded by [2002] 6. 8). But this passage loses its force when we remember that the common current silver coin in Palestine at the time of Vespasian, and that in which the civil tribute was paid, was the denarius, the tributemoney, then equivalent to the desiccated Attic drachm. It seems also most unlikely that the use of the term didrachm should have so remarkably changed in the interval between the date of the LXX. translation of the Pentateuch and that of the writing of St. Matthew's Gospel. To return to the narrative. St. Peter was commanded to take up a fish which should be found to contain a stater, which he was to pay to the collectors of tribute for our Lord and for himself. (Matth. 17:24.) The stater here mentioned is a silver tetradrachm; and the only tetradrachms then current in Palestine were of the same weight as the Hebrew shekel. And it is observable, in confirmation of the minute accuracy of the Evangelist, that at that period the silver currency in Palestine consisted of Greek imperial tetradrachms, of which the Stater was described as being of quarter's value, didrachms having fallen into disuse. Had two didrachms been found by St. Peter the receivers for freedom from the payment seems to be completely missed.

* It has been supposed by some ancient and modern commentators that the civil tribute is here referred to; but by this explanation the force of our Lord's reason...
STEEL

of tribute would scarcely have taken them; and, no doubt, the ordinary coin paid was that miraculously supplied. (2 S. P. 7.)

STEEL. In all cases where the word "steel" occurs in the A. V., the true rendering of the Hebrew is "copper." °a "nâbbîâhâ, except in 2 Sam. xxii. 35, Job xx. 24, Ps. xviii. 34 [35], is always translated "brass"; as is the case with the cognate word °âbîâhâ, with the two exceptions of Jer. xv. 12 (A. V. "steel") and Ezr. vii. 27 (A. V. "copper"). Whether the Hebrews were acquainted with steel is not perfectly certain. It has been inferred from a passage in Jeremiah (xv. 12), that the iron from the north, there spoken of denoted a superior kind of metal, hardened in an unusual manner, like the steel obtained from the Chaldaeans of the Persia, the iron-smiths of the ancient world. The hardening of iron for cutting instruments was practiced in Pontus, Lydia, and Laconia (Eustath. H. ii. p. 214, s. 56. quoted in Muller, Icon. d. Arch. d. Kunst. § 297, n. 4). Justin (ib. 3. 5) mentions making steel by rivers in Spain, the Eulobus (the Sado, or Xusband, a tributary of the Ebro) and Chaldaea, the water of which was used for hardening iron (comp. Plin. xxxiv. 41). The same practice is alluded to both by Homer (Od. ix. 363) and Sophocles (Jj. 650). The Celtiberians, according to Diodorus Siculus (v. 53), had a singular custom. They buried sheets of iron in the earth till the week past, when Diodorus calls it, was consumed by rust, and what was hardest remained. This firmer portion was then converted into weapons of different kinds. The same practice is said by Beckmann (Hist. of Anc. ii. 328, ed. Baum) to prevail in Japan. The last-mentioned writer is of opinion that of the two methods of making steel, by fusion either from iron-stone or raw iron, and by cementation, the ancients were acquainted only with the former.

There is, however, a word in Hebrew, °bîhâhâ, which occurs only in Nah. ii. 3 [4], and is there rendered "turbines," but which most probably denotes steel or hardened iron, and refers to the flashing scythes of the Assyrian chariots in Syria and Arabia. The cognate words (°alîbîhâ, °alûbîhâ, °alîbîhâ) signify a kind of iron of excellent quality, and especially steel.

Steel appears to have been known to the Egyptians. The steel weapons in the tomb of Rameses III., says Wilkinson, are pointed blue, the bronze red (Anc. Ep. iii. 247).

W. A. W.

STEPHANAS (Στεφάνας: Stephónas). A Christian convert of Corinth whose household Paul baptized as the "first fruits of Achaia" (1 Cor. i. 16, xvi. 15). He was present with the Apostle at Ephesus when he wrote his First Epistle to the Corinthians, having gone thither either to consult him about matters of discipline connected with the Corinthian Church (Chrysost. Hom. 44), or on some charitable mission arising out of the "service for the saints" to which he and his family had devoted themselves (1 Cor. xvi. 17, 18).

W. L. B.

STEPHEN (ΣΤΕΦΑΝΟΣ [a crown]: Stephenos), the First Martyr. His Hebrew a (or rather Syriac) name is traditionally said to have been Cheld or Chiel (a crown).

He was the chief of the Seven (commonly called Deacons) appointed to rectify the complaints in the early Church of Jerusalem, made by the Hellenistic against the Hebrew Christians. His Greek name indicates his own Hellenistic origin.

His importance is stamped on the narrative by a reiteration of emphatic, almost superstitious phrases: "all of faith and of the Holy Ghost" (Acts vi. 5); "full of grace and power" (ibid. 8); irresistible "spirit and wisdom " (ibid. 10); "full of the Holy Ghost " (vii. 55). Of his misjudgments amongst the poor we hear nothing. But he seems to have had an instance, such as is not uncommon in history, of a new energy derived from a new sphere. He shot far ahead of his six companions, and far above his particular office. First, he arrests attention by the "great wonders and miracles that he did." Then begins a series of disputes with the Hellenistic Jews of North Africa, Alexandria, and Asia Minor, his companions in race and birthplace. The subject of these disputes is not expressly mentioned; but, from what follows, it is evident that he struck into a new vein of teaching, which eventually caused his martyrdom.

Down to this time the Apostles and the early Christian community had hung in their worship, not merely to the Holy Land and the Holy City, but to the holy place of the Temple. This local worship, with the Jewish customs belonging to it, he now denounced. So we must infer from the accusations brought against him, confirmed as they are by the temper of his defense. The actual words of the charge may have been false, as the sinister and malignant intention which they ascribed to him was undoubtedly false. "Phaenomena" (βαλάνημαν), that is, "carnivorous" words, "against Moses and against God " (vi. 11), is not likely to have used. But the overthrow of the Temple, the cessation of the Mosaic ritual, is no more than Stephó showed openly, or than is implied in Stephen's own speech: "against this holy place and the Law " — "that Jesus of Nazareth shall destroy this place, and shall change the customs that Moses delivered us" (vi. 13, 14).

For these sayings he was arrested at the instigation of the Hellenistic Jews, and brought before the Sanhedrin, where, as it would seem, the Pharisaic party had just before this time (v. 34, vii. 51) gained an ascendency.

"When the charge was formally lodged against him, his composure kindled as if with the view of the great prospect which was opening for the Church; the whole body even of assembled judges was transfixed by the sight, and saw his face as it had been the face of an angel " (vi. 19).

For a moment, the account seems to imply, the judges of the Sanhedrin were awed at his presence; then the high-priest that presided appealed to him (as Caliphas had in like manner appealed to the

a Basil of Seleucia, Ovrat. de S. Stephano. See Stephanos in voci b. a B. D, and most of the versions, read χαριστήρ. The Rev. Text reads πιστήριον.

b 4 Of Toldelma. In Conybeare and Howson, Life of S. Paul, 174: the poetic aspect of it beautifully given in Tenneyson's Two Forces.
Great Trial in the gospel history) to know his own complaints on the accusations brought against him. To this Stephen replied in a speech which has every appearance of being faithfully reported. The peculiarities of the style, the variations from the Old Testament history, the abruptness which, by breaking off the argument, prevents us from easily doing it justice, are all indications of its being handed down to us substantially in its original form.

The framework in which his defense is cast is a summary of the history of the Jewish Church. In this respect it has only one parallel in the N. T., the 11th chapter of the Epistle to the Hebrews—a likeness that is more noticeable, as in all probability the author of that epistle was, like Stephen, a Hellenist.

In the facts which he selects from this history, he is guided by two principles—at first more or less latent, but gradually becoming more and more apparent as he proceeds. The first is the endeavor to prove that, even in the previous Jewish history, the presence and favor of God had not been confined to the Holy Land or the Temple of Jerusalem. This he illustrates with a copiousness of detail which makes his speech a summary almost as much of sacred geography as of sacred history—the appearance of God to Abraham "in Mesopotamia before he dwelt in Canaan" (vii. 2); his successive migrations to Haran and to Canaan (vii. 4); his want of even a resting-place for his feet in Canaan (vii. 5); the dwelling of his seed in a strange land (vii. 6); the details of the stay in Egypt (vii. 8-13); the education of Moses in Egypt (vii. 20-22); his exile in Midian (vii. 29); the appearance in Sinai, with the declaration that the desert ground was holy earth (γη Ἱλά), (vii. 39-33); the forty years in the wilderness (vii. 36, 44); the long delay before the preparation for the tabernacles of David (vii. 43); the proclamation of spiritual worship even after the building of the Temple (vii. 47-50).

The second principle of selection is based on the attempt to show that there was a tendency from the earliest times toward the same neglect of his spirit that had appeared in this last stage of their political existence. And this rigid, suspicious disposition he contrasts with the freedom of the Divine grace and of the human will, which were shown in the exaltation of Abraham (vii. 4), Joseph (vii. 10), and Moses (vii. 21), and in the jealousy and rebellion of the nation against these their greatest benefactors, as clearly seen in the bitterness against Joseph (vii. 9) and Moses (vii. 27), and in the long neglect of true religious worship in the wilderness (vii. 39-43).

Both of these selections are worked out on what may almost be called critical principles. There is no allegorizing of the text, nor any forced constructions. Every passage quoted yields fairly the sense assigned to it.

Besides the direct illustration of a freedom from local restraints involved in the general argument, there is also an indirect illustration of the same doctrine, from his mode of treating the subject in detail. No less than twelve of his references to the Mosaic history differ from it either by variation or addition.

1. The call of Moses before the :aggravation to Haran, (vii. 2), not, as according to Gen. xii. 1, in Haran.

2. The death of his father after the call (vii. 4), not, as according to Gen. xi. 32, before it.

3. The 75 souls of Jacob's migration (vii. 11), not (as according to Gen. xvi. 27) 70.

4. The godlike kindness (ἀντέχεις τῷ Θεῷ) of Moses (vii. 21), not, simply, as according to Ex. ii. 2, the statement that "he was a goodly child."

5. His Egyptian education (vii. 22) as contrasted with the silence on this point in Ex. iv. 10.

6. The same contrast with regard to his secular greatness, "mighty in words and deeds" (vii. 22, comp. Ex. ii. 10).

7. The distinct mention of the three periods of forty years (vii. 23, 29, 36) of which only the last is specified in the Pentateuch.

8. The terror of Moses at the bush (vii. 32), not mentioned in Ex. iii. 3.

9. The supplementing of the Mosaic narrative by the allusions to Amos to their neglect of the truth of the desert (vii. 42, 43).

10. The intervention of the angels in the giving of the law (vii. 52), not mentioned in Ex. xix. 16.

11. The burial of the twelve Patriarchs at Shechem (vii. 16), not mentioned in Ex. i. 6.

12. The purchase of the tomb at Shechem by Abraham from the sons of Emmor (vii. 16), not, as according to Gen. xxiii. 15, the purchase of the cave at Machpelah from Ephron the Hittite.

To which may be added:

13. The introduction of Remphan from the LXX. of Amos v. 25, not found in the Hebrew.

The explanation and source of these variations must be sought under the different names to which they refer; but the general fact of their adoption by Stephen is significant, as showing the freedom with which he handled the sacred history, and the comparative impertinence assigned by him and by the sacred historian who records his speech, to minute accuracy. It may almost be said that the whole speech is a protest against a rigid view of the mechanical exactness of the inspired records of the O. T. "He had regard," as St. Jerome says, "to the meaning, not to the words."

It would seem that, just at the close of his argument, Stephen saw a change in the aspect of his judges, as if for the first time they had caught the drift of his meaning. He broke off from his calm address, and turned suddenly upon them in an impassioned attack which shows that he saw what was in store for him. Those heads thrown back on their unbending necks, those ears closed against any penetration of truth, were too much for his patience: "Ye stiffnecked and uncircumcised in heart and ears! ye do always resist the Holy Ghost: as your fathers did, so do ye. Which of the prophets did not your fathers persecute? . . . the Just One: of whom ye are the betrayers and murderers." As he spoke they showed by their faces that their hearts (to use the strong language of the narrative) "were being swain assaular;" and they

ο Other verbal likenesses to this epistle are pointed out by Dr. Howson, i. 77 (quoting from Mr. Humphry, Com. on the Acts).

οο This is overstating the idea. The dative is that of opinion, decision, i. e., ἀπειροις in God's view, hence "truly beautiful;" cf πάλιν ἅγιάλαν τῷ Θεῷ, Ion. iii. 3, in Sept. See Winer's Gr. of the N. T., p. 217 (Thayer's ed.), and Green's Gr. of the N. T. p. 272 It is a form of the Hebrew superlativa.
Stephen spoke as if to himself, describing the glorious vision: and, in so doing, alone of all the speakers and writers in the N. T. except only Christ himself, uses the expressive phrase, "the Son of Man." As his judges heard the words, expressive of the Divine exaltation of Him whom they had sought so lately to destroy, they could forbear no longer. They broke into a loud yell; they chapped their hands to their ears, as if to prevent the entrance of any more blasphemous words, they flew as with one impulse upon him, and dragged him out of the city to the place of execution.

This scene was questioned by what right the Sanhedrin proceeded to this act without the concurrence of the Roman government; but it is enough to reply, that the whole transaction is one of violent excitement. On one occasion, even in our Lord's life, the Jews had nearly stoned Him even within the precincts of the Temple (John viii. 59). "Their vengeance in other cases was confined to those subordinate punishments which were left under their own jurisdiction: imprisonment, public scourging in the synagogue, and excommunication" (Milman's Hist. of Latin Christianity, i. 400). See Conybeare and Howson's St. Paul, i. 74.

On this occasion, however, they determined for once to carry out the full penalties enjoined by the severe code of the Mosaic ritual.

Any violator of the law was to be taken outside the gates and there, as if for the sake of giving to each individual member of the community a sense of his responsibility in the transaction, he was to be crushed by stones, thrown at him by all the people.

These, however, were to take the lead in this wild and terrible act who had taken upon themselves the responsibility of deposing him (Acts vii. 7; comp. John viii. 7). These were, in this instance, the witnesses who had reported or misrepresented the words of Stephen. They, according to the custom, for the sake of facility in their dreadful task, stripped themselves, as is the eastern practice on commencing any violent exertion; and one of the prominent leaders in the transaction was deputed by custom to signify his assent to the act by taking the clothes into his custody, and standing over them whilst the bloody work went on. The person who officiated on this occasion was a young man from Tarsus—one probably of the Cilician Hellenists who had disputed with Stephen. His name, as the narrative significantly adds, was Saul.

Everything was now ready for the execution. It

a Comp. "I was standing by and consenting to his death," and kept the raiment of those that slew him" (Acts xxii. 20).
b Those conflicting versions are well given in Conybeare and Howson, St. Paul, i. 80.
c The date of Stephen's death is unknown. But ecclesiastical tradition fixes it in the same year as the Crucifixion, on the 29th of December, the day after Christmas. It is beautiful also in allusion to the juxtaposition of the two festivals, that men would not have had the courage to die for God if God had not become man to die for them (Tillemont S. Ebrani, art. 4).
the event is mentioned in all the chief writers of the
time. Parts of his remains were afterwards trans-
ported to different parts of the coast of the West —
Minore, Portugal, New North Africa, Arcona, Con-
stantinople, — and in 460 what were still left at Jeru-
salem were translated by the Empress Eudocia to a
splendid church called by his name on the supposed
scene of his martyrdom (Tillemont, S. Eutene, art. 2,9, which all the authorities are agreed).
The importance of Stephen's career may be briefly
summed up under three heads: —

I. He was the first great Christian ecclesiastic.
The appointment of "the Seven," commonly
(though not in the Bible) called Deacons, formed the
first direct institution of the nature of an or-
ganized Christian ministry, and of these Stephen
was the head, — the Archdeacon, — as he is called
in the Eastern Church, — and in this capacity rep-
resented as the companion or precursor of Laure-
nce, Archdeacon of Rome in the Western Church.
In this sense allusion is made to him in the Angli-
can Ordination of Deacons.

II. He is the first martyr — the proto-martyr.
To him the name "martyr" is first applied (Acts
xxvi. 20), which afterwards grew to a height not
regarded by all Christians as excessive. A beauti-
ful hymn by Reginald Heber commemorates this
side of Stephen's character.

III. He is the forerunner of St. Paul. So he
was already regarded in ancient times. Παπαύ
διδάσκαλος is the expression used for him by
Basili of Cæsærea. But it is an aspect that has
been much more forcibly drawn out in modern
times. Not only was his martyrdom (in all prob-
ability) the first means of converting St. Paul, his
prayer for his murderers not only was fulfilled in
the conversion of St. Paul — the blood of the first
martyr the seed of the greatest Apostle, the josses
of remorse for his death amongst the sting-

ing conscience against which the Apostle vainly
writhe (Acts ix. 5) — not only thus, but in his
doctrine also he was the anticipator, as, had
he lived, he would have been the propagator, of
the new phase of Christianity, of which St. Paul
became the main support. His denunciations of local
worship, the stress which he lays on the spiritual
side of the Jewish history, his freedom in treating
that history, the very turns of expression that he
uses, are all Pauline.

The history of the above account is taken from
Acts (vi. 1—viii. 2; xxii. 19, 20); the legends from
Tillemont (ii. 1—24); the more general treatment
from Neander's Pleading of the Christian Church,
and from Howson and Conybeare in The Life of
St. Paul, ch. 2.

* It is impossible that all the facts in regard to
the Divine dealings with man can have been pre-

cised in the sacred records. The memory of
many circumstances, additional to the original rec-
ort, must have been long kept alive by tradition;
and, although gradually overlaid by a mass of hu-
man fictions, later writers have frequently rescued

them to us in a truthful form. For examples of
this, see Ps. ev. 18; 2 Tim. iii. 8; 2 Pet. i. 7, 8;
Gal. iii. 19; Heb. ii. 2; Deut. xxvii. 2; Acts xx.
35, 36. [Tradition, Amer. ed.] It is not

surprising, therefore, to find St. Stephen mention-
ing some minor details, evidently already familiar
to his audience, not recorded in the Mosiac narrat-
ive. Our Lord's promise to his disciples (John
xiv. 26), when placed in the situation of Stephen,
arranged to increase the accuracy of such sup-
plementary information.

Stephen's speech, however, contains some appor-

tional variations from the Mosiac narrative, pointed
out in the preceding article, of a different kind, and
worthy of a closer examination. One of these re-
lates to the time of Abram's call, represented by
Stephen as occurring in Mesopotamia, before
the sojourn in Haran. The alleged inconsistency does
not appear in Gen. xii. 1, according to the A. V.;
for the verb is very properly rendered as pluperfect
and not as perfect. The Hebrew verb has in fact
no specific form for the pluperfect; and the form
in Gen. xii. 1 supplies the place of several tense
of our western tongues. For other instances of the
same form of this verb as pluperfect (necessarily,
"to have said"), see Ex. xxxiii. 5; 1 K. xxiv. 21,
xxvii. 22. The same remark applies of course
to the corresponding forms of other Hebrew verbs.
The truth in this matter, therefore, must depend
not on the Hebrew tense, but the context, and
other Scripture notices.

The most probable reason for the migration of
Terah and his family is the one assigned by
Stephen — the Divine command made known to
Abram in Ur. We are not left, however, to mere
conjecture here; but have explicit statements, both
in the Mosiac narrative, and in other parts of
Scripture. "I am the Lord that brought thee
out of Ur of the Chaldees" (Gen. xv. 7); "I took
your father Abraham from the other side of the
Euphrates" (Josh. xxiv. 2); "who did choose Abram,
and brought him forth out of Ur of the Chal-
dees" (Neh. ix. 7). The positive assertions so
often made according to Gen. xii. 1, and xi. 32,
the call of Abram was not before his migration to
Haran, and not before the death of his father, are
utterly gratuitous. They are founded upon an un-
justifiable limitation of the Hebrew tense, and are
contradictory to other parts of the narrative.
Viewing the Divine dealings as a plan prophetically
of ability, addressing Jews familiar with their own
history, it is inconceivable that he should have
blurred so grossly the facts of that history and
the meaning of words in the sacred language of
his nation, as to be open to correction at the dis-
tance of 1,500 years by men of another tongue.

Another difficulty is about the age of Abram's
father at the time of his marriage. Gen. xi. 28
asserts: "Terah lived 75 years and begat Abram,
Nahor, and Haran;" Gen. xii. 4, "Abram was
75 years old when he departed out of Haran;" Gen.
xi. 32, Terah died at the age of 205 years and
Abram removed from Haran after the death of
his father (Acts vii. 4). Now since 205 — 75
= 130, either Abram, in contradiction to Stephen's
statement, was never Abram before the death of
his father, or else — as was really the case —
Terah must have been at least 130 at the time
of his birth. It is neither to be assumed that Terah's

a * For the expression of this view by Philo, and
by the Christian fathers, see the references given by
Wordsworth in loco.
three sons were all born in one year, nor that Abram was the eldest because his name is mentioned first. In a parallel case, Gen. v. 32, it is said "Noah was 500 years old, and Noah begat Shem, Ham, and Japheth; but in Gen. x. 21, it is expressly said that Japheth was older than Shem, but by comparing v. 32 with vii. 11 and xi. 10, we see that Noah was at least 502 at Shem's birth. In both cases the facts are not necessarily in connection with the birth of the eldest; and that one is mentioned first from whom the Jews were descended. It is nowhere stated in terms that Abram was the younger brother, but the facts of the narrative show that he must have been very much the younger. Nahor married the daughter of Haran (Gen. xi. 29), and was therefore probably many years his junior; Isaac, Abraham's son, married Rebekah, the granddaughter of Nahor through Bethuel the youngest of his eight sons (Gen. xxii. 20-21). This would make Abram — notwithstanding his advanced age at the birth of Isaac — much younger than Nahor, as he in turn was much younger than Haran. These facts put together imply that Abram was at least the sixty years younger than Haran required by the facts mentioned at the outset, and hence that Terah was at least 130 years old at his birth. In accordance with this was the Jewish tradition (mentioned by Lightfoot, *Brev. Heb.* in Acts vii. 4, H.) that Abram was the youngest of the brothers. In accordance with this, also, is the fact that Haran, already the father of a family (Gen. xi. 29, 31), died before his father left Ur (xi. 28), while Abram must have been still a comparatively young man.

Again, Stephen puts the murder who went down into Egypt at 75, in accordance with the LXX.; but whether he took this number from the LXX., or the text of that version has been altered to correspond with his speech, does not matter. In Gen. xvi. 26, the number is given as 66, and again in the following verse as 70. All these statements are the result of looking at the same facts from different points of view. Now, Jacob himself and Joseph with his two sons already in Egypt are excluded from the number to make 60; now they are included to make 70; and now with them are also included (as in the LXX.) the children of Joseph's sons — the sons themselves having been taken for heads of tribes — to make 75. Obviously by including the wives, and in another place in different numbers might be obtained. Stephen, not stopping to discuss the matter, merely gives the reckoning then in most common use.

The Egyptian education of Moses is surely a necessary consequence of his being the adopted son of Pharaoh's daughter (Ex. ii. 16), while the statement that he was 'mighty in words and deeds' (Pent. xxvii. 3) is of the same character of Moses, and there is no man in history of whom it could more truly be affirmed. We know that his entire age was 120 years, during the last forty of which he was the leader and lawgiver of his people. At exactly what age he fled from the court of Pharaoh is not recorded. Probability would point to the age of about forty, according to his declaration, thus making the three periods prominent mentioned by Stephen (vii. 23, 30, 36). The same tradition appears to have kept alive the memory of his fear at the blast (ver. 32), as similar fear at Mount Sinai is elsewhere recorded (Heb. xii. 21).

As Stephen does not profess to confine himself to the Mosaic narrative he was quite free to make use of what was true in these traditions, as well as to embody in his speech any additional information contained in the prophetic writings (Am. v. 25, 26), or in other parts of Scripture, such as "the intervention of angels in the giving of the law" mentioned in Deut. xxxii. 2, and well known to the Jews, as appears from Gen. iii. 19, and Heb. ii. 2. The burial of (— not explicitly, "the twelve patriarchs") "our fathers" at Shechem must have been a fact within the knowledge of every Jew at the time, and in regard to one of them, Joseph, we have the express record of it in Josh. xxiv. 32.

The only point in Stephen's speech that involves any real difficulty is the purchase of the tomb at Shechem by Abraham of the sons of Eumor (Acts vii. 16). The facts recorded are, that Abraham bought the cave of Machpeleth, with the adjoining field, "for a possession of a burying-place of the sons of Ephron the Hittite" (Gen. xxxvi. 3-20), and that Jacob also bought a field near Shechem of the sons of Eumor (xxxix. 18, 19). These purchases were made at some distance of time from each other, and were made by different parties. In the former Jacob was buried (l. 13); in the latter Joseph (Josh. xxxv. 32), and according to constant tradition, Jewish as well as Christian, also his brothers. Is it possible that Stephen can have confused the two places and transactions together? On the supposition that he makes one common statement in regard to the burial-place of Jacob and his sons, and that he refers to the purchases mentioned above, the difficulty is palpable. As to the first, his words are: "So Jacob went down into Egypt, and died, he and our fathers, and were carried over into Sychem and laid in the sepulchre," etc. (Acts vii. 15, 16). The sentence may, in itself, be understood in either of two ways: either as referring throughout to both Jacob and the patriarchs; or as, in the number of its clauses, dropping out Jacob from the latter ones, and predicating them only of "our fathers." In the original this is much plainer; indeed, by placing a period after πατέρες ἡμῶν, the following μετέτειθαναι καὶ κτίσαναι would naturally take πατέρες for their nominative, and the meaning; if at all doubtful in the written text, would have been clear when spoken by the living voice. There was, too, the less need of explicitness because the burial-places were so familiarly known to every one in the audience. In this therefore there is no real difficulty. But Stephen continues, "in the sepulchre that Abraham bought for a sum of money of the sons of Eumor the father of Sychem." It is certain that this does not refer to the cave of Machpeleth which was purchased of Ephron, and which the twelve patriarchs were a part of the property of. A conjectural emendation of the text, substituting the name of Jacob for that of Abraham has been suggested, but is not necessary, since the same result follows from the supposition that Abraham did actually purchase this field, which, being reclaimed by the Shechemites, was afterwards purchased again by Jacob; and there is some ground for this supposition. From Gen. xii. 6, we learn that there God appeared to Abram, and there he "built an altar unto the Lord." Now while he might have done this without hesitation in an uninhabited place (as Jacob afterwards did at Bethel, Gen. xxviii. 11-22, xxxv. 1), it is unlikely that one so scrupulous in matters of property (see e. g. xiv. 23) would have done so.
without purchase in an inhabited region, where rights of property already existed. That this was the case at Sychem appears from the statement (xii. 6), "the Canaanite was then in the hand," and from the subsequent purchase by Jacob in this very locality, and apparently for the same purpose (xxviii. 13-20). It is in itself, therefore, not unlikely that Abraham did resell the field. Again, this probability is increased by the fact of Jacob's purchase. For in the prolonged absence of Abram and his descendants, the field would almost certainly have been reoccupied by the Shechemites, just as the Philistines stopped the wells dug by Abraham (Gen. xxvi. 13, 18). And just as Isaac reopened those wells (ver. 18), so Jacob would have desired to resell the field and to rebuild the altar of his grandfather. A reason is thus found for his purchase of this particular locality; and it is not probable that he would have built another altar there if Abram's remained undisturbed. Further, if in Acts vii. 16 we translate according to the all but universal Greek usage (in the N. T. quite universal), we must read, not "Esther," but "Esther the mother of Herod." Of course it is possible that Hamor's father and son may both have been named Sychem, but it is more likely that a different Hamor is referred to; if so, then it is evident that Stephen had in mind distinctly a purchase made by Abram of the sons of one Hamor, quite distinct from the subsequent repurchase by Jacob of the same field from the sons of another Hamor. Such repetitions of names are of no uncommon occurrence in oriental—or for that matter, in accidental—genealogies. On the whole, then, it seems that while, negatively, there is no reason whatever to deny the previous purchase of this field by Abraham, there is positively no considerable reason in favor of the supposition.

Thus in Stephen's speech we find no loose and inaccurate references to the Mosaic narrative; but rather a most careful and conscientious, as well as able, use of the facts in the ancient history of his people. Some of these facts, but for Stephen, might have been lost to us: preserved as they are, they lead to still further knowledge of the details of the patriarchal story.

F. G.

STOCKS (τάξιον, τάξης: 交易中心). The term "stocks" is applied in the A. V. to two different articles, one of which (the Hebrew melapeos) answers rather to our pillory. Inasmuch as its name implies that the body was placed in a bent position by the confinement of the neck and arms as well as the legs; while the other (and) answers to our "stocks," the feet alone being confined in it. The former may be compared with the Greek καφές, as described in the Scholia ad Aristoph. Plut. 479: the latter with the Roman nervous (Phist. Atta. 5; var. v. 3, 40), which admitted, however, of being converted into a species of torture, as the legs could be drawn assunder at the will of the jailer (Biscoe on Acts, p. 229). The prophet Jeremiah was confined in the first sort (Jer. xx. 2), which appears to have been a common mode of punishment in his day (Jer. xxix. 20), as the prisioners contained a chamber for the special purpose, termed "the house of the pillory" (2 Chr. xvii. 11; A.V., "prison-house"). The stocks (melapeos) are noticed in Job xii. 37, xxxii. 11, and Acts xvi. 24. The term used in Prov. vii. 22 (A. V. "stocks") more properly means a fetter.

W. L. B.

STOICS. The Stoics and Epicureans, who are mentioned together in Acts xvii. 18, represent the two opposite schools of practical philosophy which survived the fall of higher speculation in Greece (Philosophy). The Stoic school was founded by Zeno of Citium (c. r. c. 280), and derived its name from the pointed stakes (πενταγώνα ἄμβατα, Deg. L. viii.) in which it was taught. Zeno was followed by Chneusites (c. r. c. 260), Chneusites by Chrysippe (c. r. c. 240), who was regarded as the intellectual founder of the Stoic system (Diog. La. viii. 183). Stoicism soon found an entrance at Rome. Diogenes Babylonius, a scholar of Chry- sippus, was its representative in the famous embassy of philosophers (c. r. c. 161 (Aulus Gellius, x. c. 11); and not long afterwards L. Munatus was the friend of Scipio Africanus the younger, and many other leading men at Rome. His successor Posidonius numbered Cicero and Pompey among his scholars; and under the empire stoicism was not unnaturally connected with republican virtue. Seneca (A. D. 65) and Musonius (Fasc. Hist. iii. 81) both had respected the chief teachers of the school by their writings; but the true glory of the later Stoics is Epicetus (c. r. c. 115), the records of whose doctrine form the noblest monument of heathen morality (Epictetus Phile. Mon. ed. Schweighäuser, 1799). The precepts of Epicetus were adopted by Marcus Aurelius (A. D. 121-180) who endeavored to shape his public life by their guidance. With this last effort stoicism reached its climax and its end.

The ethical system of the Stoics has been commonly supposed to have a close connection with Christian morality (Gataker, Antoninus, Pref.; Meyer, Stoic. Lib. c. Christ. comp., 1829), and the outward similarity of isolated precepts is very close and worthy of notice. But the morality of stoicism is essentially based on pride, that of Christianity on humility; the one upholds individual independence, the other absolute faith in another: the one looks for consolation in the issue of fate, the other in Providence: the one is limited by periods of casuistical ruin, the other is consummated in a personal resurrection (Acts xvi. 18).

But in spite of the fundamental error of stoicism, which lies in a supreme egoism, the teaching of

B. F. W. * See Merivale, History of the Romans (vi. 190-239), for an account of the Stoics and their principles. Some have supposed that Seneca may have been one of the members of the emperor's household, to whom Paul refers in Phil. iv. 22. On this question of the possibility of an acquaintance between the Apostle and the philosopher during Paul's captivity at Rome, Professor Lightfoot has an extended Dissertation in his Commentary on Philippians (pp. 268-331). The discussion involves an elaborate examination of the spirit and teachings of Stoicism as compared with those of the Christian. The forty-four letters said to be written by Seneca to St. Paul are undoubtedly forgeries. H.

STOMACHER (Στόμαχας). The Heb. path-hil describes some article of female attire (Is. iii. 24); the character of which is a mere matter of conjecture. The LXX describes it as tunica (περασματοσαρης); the Vulg. as a species of girdle (fissa pectoralis). The word is evidently a compound, but its elements are uncertain.

Gesenius (Thes. p. 1137) derives it from τιμάω, with very much the same sense as in the LXX.: Sandeckis (Archd. i. 30) from περασάω, with the sense of "undisguised lust," as applied to some particular kind of dress. Other explanations are given in Gesen. Thes. i. c. W. L. B.

STONES (Ιχθύς). The uses to which stones were applied in ancient Palestine were very various. (1.) They were used for the ordinary purposes of building, and in this respect the most noticeable point is the very large size to which they occasionally run (Mark xiii. 1). Robinson gives the dimensions of one as 24 feet long by 6 feet broad and 3 feet high (Rcs. i. 233; see also p. 284, note). For most public edifices weigh stones were used: an exception was made in regard to altars, which were to be built of unhewn stone (Ex. xx. 22; Deut. xxvii. 5; Josh. viii. 31), probably as being in a more natural state. The Phariseans were particularly famous for their skill in hewing stone (2 Sam. v. 11; 1 K. v. 18). Stones were selected of certain colors in order to form ornamental string-courses: in 1 Chr. xxix. 2 we find enumerated "onyx stones and stones to be set, glittering stones (lit. stones of eye-paint), and of divers colors (lit. such as blackened with veins), all manner of precious stones, and marble stones" (comp. 2 Chr. iii. 6). They were also employed for pavements (2 K. xvii. 17; comp. Esth. i. 6). (2.) Large stones were used for closing the entrances of caves (Josh. x. 18; Dan. vi. 17). sepulchres (Matt. xxvii. 60; John xi. 38, xx. 1), and springs (Gen. xxix. 2). Flint stones occasionally served the purpose of a knife, particularly for circumcision and similar objects (Ex. iv. 25; Josh. v. 3, 11; comp. Herod ii. 86; Plutarch, Vict. p. 13; Catull. Caru. lxxi. 10). (3.) Stones were further used as a munition of war for slingstones (1 Sam. xvi. 40, 49), catapults (2 Chr. xxvi. 14), and hobs (Wind. v. 22; comp. 1 Mann. vii. 51); as boundary marks (Deut. xix. 14, xxvii. 17; Josh. xiv. 2; Prov. xxvi. 28, xxix. 10); such was the custom of the king of Beersheba (Is. vi. 7, xxvii. 17), the stone of Abel (1 Sam. v. 15, 18), the stone Ezel (Sam. xx. 19), the great stone by Gibeah (2 Sam. xx. 8), and the stone Zoheth (1 K. i. 9); as weights for scales (Deut. xxv. 13; Prov. xvi. 11); and for mills (2 Sam. xi. 21). (5.) Large stones were set up to commemorate any remarkable events, as by Jacob after his interview with Jehovah (Gen. xxviii. 18, xxxix. 14), and again when he made the covenant with Lalan (Gen. xxxi. 45); by Joshua after the passage of the Jordan (Josh. iv. 19); and by Samuel in token of his victory over the Philistines (1 Sam. vii. 12). Similarly the Egyptian monarchs erected their stele at the furthest point they reached (Herod. ii. 106). Such stones were occasionally consecrated by anointing, as is stated in the stone erected at Bethel (Gen. xxviii. 18). A similar practice existed in heathen countries, and by a singular coincidence these stones were described in Phenicia by a name very similar to Bethel, namely, beletin (בִּלְטֵינ), whence it has been surmised that the heathen name was derived from the Scriptural one, or vice versa. (Kicch. Comment. in Gen. Lamen.) But neither are the names actually identical, nor are the associations of a kindred nature: the beletin were meteoric stones, and derived their sanctity from the belief that they had fallen from heaven, whereas the stone at Bethel was simply commemorative. [BETHEL: IOLE.] The only point of resemblance between the two consists in the custom of anointing — the anointed stones (Ahlu Amrapol), which are frequently mentioned by ancient writers as objects of divine honor (Aram. adu. Gent. i. 39; Erash. Prop. Evan. i. 10, § 18; Philn. xxxii. 51), being probably acrolites. (6.) That the worship of stones prevailed among the heathen nations surrounding Palestine, and was borrowed from them by apostate Israelites, appears from Is. xii. 6, according to the ordinary rendering of the passage; but the original b admits of another sense, "in the smooth (clear of wood) places of the valley," and no reliance can be placed on a peculiar term introduced partly for the sake of alliteration. The eben mecithel noticed in Lev. xxvi. 1 (A. V. "image of stone"), has again been identified with the beletin,
the doubtfal term "marahith" (comp. Num. xxxiii. 52, "picture"); Ez. viii. 12, "imagery") being sup-
inposed to refer to devices engraved on the stone. [IDOL.] The statue ("molstedah the") of Beld is said
to have been of stone and of a conical shape (Movers, 
Phan. i. 673), but this is hardly reconcilable with
the statement of its being burnt in 2 K. x. 26 (the
correct reading of which would be moltesherh, and
not molstedah). (7.) Heads of stones were piled
up on various occasions, as in token of a treaty
(Gen. xxvi. 36), in which case a certain amount of
sanctity probably attached to them (cf. Hon. Ob.
xvi. 471); or over the grave of some notorious of-
fender (Josh. vii. 26, viii. 29; 2 Sam. xvii. 17; see
Propert. iv. 3, 79, for a similar custom among the
Romans). The size of some of these heaps becomes
great very common to the Arabs that each passer-by adds a stone:4 Burek-
hardt mentions one near Damascus 29 ft. long, 2 ft.
high, and 3 ft. broad (Syrius, p. 46). (8.) The
"white stone" noticed in Rev. ii. 17 has been va-
riously regarded as referring to the pebble of acqui-
tual used in the Greek courts (Ov. Met. xix. 41); to
the lot cast in elections in Greece; to both these
cases, the shade concealing the notion of acqui-
tual, the stone that of election (Hengel, Gnms.); to
the stones in the high-priest's breastplate (Zullig);
to the tickets presented to the victors at the public
games, securing them maintenance at the public
expense (Hammond); or, lastly, to the custom of
writing on stones (Afishon 11 c. v. c.). (9.) The use
of stones for tablets is alluded to in Ex. xxiv. 12,
and Josh. viii. 32. (10.) Stones for striking fire
are mentioned in 2 Macc. x. 3. (11.) Stones were
prejudicial to the operations of husbandry: hence the
custom of spoiling an enemy's field by throwing
quantities of stones upon it (2 K. iii. 19, 25); and,
again, the necessity of gathering stones previous to
cultivation (Is. v. 2): illustration is made to both these
practices in Ezek. iii. 5 ("a time to cast away
stones, and a time to gather stones"). (12.) The
notice in Zeck. xii. 3 of the "hardened stone" is
referred by Jerome to the custom of lifting stones
as an exercise of strength, which he describes as
being practiced in Judaea in his day (comp. Exclus.
vi. 21): but it may equally well be explained of a
large corner-stone as a symbol of strength (Is.
xvii. 19). Stones are used metaphorically to denote har-
dness or insensibility (1 Sam. xxx. 37; Ez. xi. 19,
xxxvi. 26), as well as firmness or strength, as in
Gen. xlix. 24, where "the stone of Israel" is equiva-
 lent to "the rock of Israel" (2 Sam. xxiii. 3; 1 S.
xxx. 20). The members of the Church are called
"living stones," as contrasting to fear that living
temple in which Christ, himself, "a living stone,
is the chief or head of the corner (Ephes. ii. 20-22),
1 Pet. ii. 4-8). W. L. B.

The LXX., Vulg., and Josephus, are all agreed
as to the names of the stones; there is, however,
not a little difference as to their relative value
in the breastplate: thus the 
"har specification, which, according to
Josephus, occupies the second place in the triune
row, is by the LXX. and Vulg. put in the third
place; a similar transposition occurs with respect to the
"har specified at the top of the second row.

out it is probable that the Jasper is intended. Sir G. Wilkinson is of opinion that the ancient Egyptians were acquainted with the diamond, and used it for engraving (ii. 67). Beckmann, on the other hand, maintains that the use of the diamond was unknown even to the Greeks and Romans: "I must confess that I have found no proofs that the ancient Egyptians cut stones with a diamond (Hist. of Art, ii. 87, Berlin, et.), The substance used for polishing precious stones by the ancient Hebrews and Egyptians was emery powder or the emery stone (Corundum), a mineral inferior only to the diamond in hardness [Adaman]. There is no proof that the diamond was known to the ancient Orientals, and it certainly must be banished from the list of engraved stones which made the korebatal breastplate; for the diamond can be cut only by abrasion with its own powder, or by friction with another diamond; and this, even in the hands of a well-practised artist, is a work of most patient labor and of considerable difficulty; and it is not likely that the Hebrews, or any other oriental people, were able to engrave a name upon a diamond except in a sigil ring. Again, Josephus tells us (Ant. iv. 5, § 5) that the twelve stones of the breastplate were of great size and extraordinary beauty. We have no means of ascertaining their size; probably they were nearly an inch square; at any rate a diamond only half that size, with the five letters of עזalin (Zeblum) engraved on it—so, as he was the sixth son of Jacob (Gen. xxx. 28), his name would occupy the third place in the second row—is quite out of the question, and cannot possibly be the Zeblum of the breastplate. Perhaps the stone called "figure" by the A. V. has been the subject of more discussion than any other of the precious stones mentioned in the Bible. In our article on that subject we were of opinion that the stone denoted was probably smaragdine. We objected to the "hyacinth stone" representing the hyacinthus of the ancients, because of its not possessing attractive powers in any marked degree, as we supposed and had been informed by a well-practised jeweler. It appears, however, that this communication kindled much of us to Mr. King, that the hyacinth (Zicron) is highly electric when rubbed. He states that he is practically convinced of this fact, although he allows that highly electric powers are not usually attributed to it by mineralogists. Mr. King asserts that our hyacinth (petition, zircon) was greatly used for engraving on by Greeks, Romans, and Persians, and that numerous intaglios in it exist of the age of Theophrastus. The ancient hyacinthus was our sapphire, as Solomon shows.

Precious stones are used in Scripture in a figurative sense, to signify value, beauty, durability, etc., in those objects with which they are compared (see Cant. v. 14; Is. lix. 11; Lom. iv. 7; Rev. iv. 3, xxi. 10-21). As to the precious stones in the breastplate of the high-priest, see Josephus, Ant. iii. 7, § 5; Ewald, Phenomena artium, p. 249. The stone of the breastplate is a large emerald, 827360 feet high. The breastplate is the name of the sacred gold office, etc., Targ. 1395; and by Mat. Miller, the author of the Hier,opysicus, in his Syntagmata Hieremiaticum, p. 84; Tubing. 1711; Beza, De Visita Sacraedaeon Hieremiam (Amst. 1689 and 2d ed. 1698), lib. ii. caps. 7 and 8; Bellerinus, De Utrum et Thannum die Adelissimum Gemmam, Berlin, 1824; Rosenmüller, "The Mineralogy of the Bible," Biblical Cabinet, vol. xxvii W. H.

* STONE-SQUARERS. [Giblet.

* STONE-CITIES. (προλόγια, πολείς ἀρχαίας, A. V. "treasure-cities" once, Ex. i. 20). The rendering store-cities for Προλόγια seems therefore more appropriate than store. According to 2 Chr. xxxii. 28, they were for the products of the soil. But whether the provisions thus stored were designed chiefly for purposes of trade (Ewald, Gesch. d. Altertums, ii. p. 16), or for the benefit of travellers and their beasts (Herhman on 2 Chr. viii. 4, 6), or for times of need (Knoedel on Ex. i. 11; Themuns on 1 K. ix. 19), or for purposes of war (Bush on Ex. i. 11; Kuritz, Gesch. d. Altertums, ii. 167), and, if for the latter purpose, whether fortified (LXX. Busl, l.c. Hengstenberg, Die Bücher Moses u. Aegypten, p. 46; Hawks, Egypt and its Monuments, p. 178) or not (Kuritz, l.c., and Keil on Ex. i. 11), is disputed. The conjecture that the store cities had a military object, is favored by the position of ἱσθαμόν and ἱσταμέναι, Ex. i. 11, and of ἱσταμέναι, 1 K. ix. 19, 2 Chr. viii. 4: and by the mention of the building of store cities in connection with that of fortresses, as illustrated (Josephus' greatness, 2 Chr. xxvii. 12. C. M. M.

STORK (παρθένος, chudhulat: translated differently by LXX. αἰόλος, ἀποφάσις, ἁπλοσ, δεκαερος, πέλαγος, Volg. κεραυνος, kevoralos, molyca: A. V. "stork," except in 2 Sam. xxviii. 14, where it is translated "wing," "wing," "wing," "wing," "wing," in the margin). But there is some question as to the correct reading in this passage. The LXX. do not seem to have recognized the stork under the Hebrew term παρθένος; otherwise they could scarcely have missed the obvious rendering of παρθένος, or have adopted in two instances the phonetic representation of the original. αἰόλος (whence no doubt Hesych. ἀιλος, eius ὕπερος). It is singular that a bird so conspicuous and familiar as the stork must have been both in Egypt and Palestine should have escaped notice by the LXX. but there can be no doubt of the correctness of the rendering of A. V. The Heb. term is derived from the root פָּרָשָׁה, whence פָּרָשָׁה, "kindness," from the maternal and filial affection of which this bird has been in all ages the type.

The White Stork (Ciconia alba, L.) is one of the largest and most conspicuous of land birds standing nearly four feet high, the jet black of its wings and its bright red legs and contrasting assigned to Clement Eirago, by others to J. de Tronco, Philip II.'s engraver. C. W. King.
have been equally recognized by the ancients. Seneca, Rufius, who first ventured to bring young storks to table, gained the following epigram, on the failure of his candidature for the praetorship:—

"Quamquam est dudum eleganter Plancis saffragorum pumeta non tulit septum. Ciconiarnus populius altus est mortuus."

Horace contemptuously alludes to the same sacrifice in the lines

"Tartoeo circino nido,Donee vos auctor ducitis praetorius" (Sat. ii. 2, 49).

Pliny (Nat. Hist. x. 21) tells us that in Thessaly it was a capital crime to kill a stork, and that they were thus valued equally with human life, in consequence of their warfare against serpents. They were not less honored in Egypt. It is said that at Fèz in Morocco, there is an endowed hospital for the purpose of assisting and nursing sick women and storks, and of burying them when dead. The Marocains hold that storks are human beings in that form from some distant islands (see note to Brown’s Fawnd. Epist. iii. 27, § 3). The Turks in Syria point to the stork as a true follower of Islam, from the preference he always shows for the Turkish and Arab over the Christian quarters. For this undoubted fact, however, there may be two other reasons—the greater amount of oil in the body, and the persecution suffered from the traditional Greeks, who rob the nests, and show some of the gentle consideration towards the lower animals which often reposes with the Turkish character. Strickland, Mem. and Papcs, vol. ii. p. 227, states that it is said to have quite deserted Greece, since the expulsion of its Mohammedan protectors. The observations of the writer corroborated this remark. Similarly the rocks were said to be so attached to the old régime, that most of them left France at the Revolution: a true statement, and accounted for by the clearing of most of the fine old timber which used to surround the châteaux of the nobility.

The derivation of Ciconia nigra points to the paternal and filial attachment of which the stork seems to have been a type among the Hebrews no less than among the Greeks and Romans. It was believed that the offspring of the year would care for the parent when old, and that their parents would do the same for them. The stork is said to have been very offensive in his visitation, and to have attacked the diners themselves for life, and in old age. Hence it was commonly called among the Latinus avis pia. (See Laborus in Petronius Arbiter: Aristotle, Hist. Anim. ix. 14; and Pliny, Nat. Hist. x. 32.) Pliny also notices their habit of always returning to the same nest. Probably there is no foundation for the notion that the stork so far differs from other birds as to recognize its parents after it has become mature; but of the fact of these birds returning year after year to the same spot, there is no question. Unless when destroyed by man, storks’ nests all over the world are re-built, or rather required, for generations on the same site, and in Holland the same individuals have been recognized for many years. That the parental attachment of the stork is very strong, has been proved on many occasions. The tale of the stork which, at the burning of the town of Delta, vainly endeavored to carry off her young, and at length sacrificed her life with theirs rather than desert them, has been often repeated, and seems corroborated by extraordinary evidence. Its watchfulness over its young is unceasing, and often shown in a somewhat droll manner. The writer was once in camp next

White Stork (Ciconia ciconia).

The claim of the stork to protection seems to have been equally recognized by the ancients. Seneca, Rufius, who first ventured to bring young storks to table, gained the following epigram, on the failure of his candidature for the praetorship:—

"Quamquam est dudum eleganter Plancis saffragorum pumeta non tulit septum. Ciconiarnus populius altus est mortuus."

STORK

STRAIN AT

an old ruined tower in the plain of Zaan, south of
the Atlas, where a pair of storks had their nest.
The young might often be seen from a little
distance, surveying the prospect from their lonely
height; but whenever any of the human party
happened to stroll near the tower, one of the old storks,
visible before, would instantly appear, and, light-
ing on the nest, put its foot gently on the necks of
all the young, so as to hold them down out of sight
till the stranger had passed, snapping its bill mean-
while, and assuming a grotesque air of indiffer-
cence and unconsciousness of that being anything under
its charge.

Few migratory birds are more punctual to the
time of their reappearance than the white stork, or
at least, from its familiarity and conspicuousness,
its migrations have been more accurately noted.
"The stork in the heaven knoweth her appointed
times" (see Virgil, Georg. ii. 319, and Petron. Sat.). Flinn states that it is rarely seen in Asia Minor after the middle of August. This is prob-
ably a slight error, as the ordinary date of its ar-
ival in Holland is the second week in April, and
it remains until October. In Denmark Judge Hole
noted its arrival on the 12th of March, and the latest the 12th
April (Kjærbølling, Danmarks Fugle, p. 292). In
Palestine it has been observed to arrive on the 22d
March. Immense flocks of storks may be seen on
the banks of the Upper Nile during winter, and
some few further west, in the Sahara; but it does
not appear to migrate very far south, unless indeed
the birds that are seen at the Cape of Good Hope in
December be the same which visit Europe.
The stork has no note, and the only sound it
emits is that caused by the sudden snapping of
its long mandibles, well expressed by the epithet
"cervidistris" in Petron. (quasi κορυφαίς, to rattle the castanets).
From the absence of voice probably arose the error alluded to by Flinn, "Sunt
qui dicunt: non loesse linguis confident."*

Some unnecessary difficulty has been raised re-
specting the expression in Ps. civ. 17, "As for the
stork, the fir-trees are her house." In the west of
Europe the home of the stork is connected with the
dwellings of man, and in the East, as the eagle
is mentally associated with the most sublime scenes
in nature, so to the traveler at least, is the stork
with the ruins of man's sedentary works. Avoid the
desolation of his fallen cities throughout Eastern
Europe and the classic portions of Asia and Africa,
we are sure to meet with them surmounting his
temples, his theatres or baths. It is the same
in Palestine. A pair of storks possess the only
tall piece of ruin in the plain of Jericho: they
are the only tenants of the noble tower of Richard
the Lion at Al-Balby, and they gaze on the
ruin of Sharon from the lofty tower of Ramleh
(the ancient Armathas). So they have a pillar at
Tiberias, and a corner of a ruin at Nehi Montsce.
And no doubt in ancient times the senate shared
the watch-tower of Samaria or of Jerizel with
the cherished storks. But the instinct of the stork
seems to be to select the loftiest and most
conspicuous spot he can find where his huge nest may
be supported; and whenever he can combine this
state with his instinct for the society of man, he
naturally selects a tower or a roof. In bands of
ruins, which from their neglect and want of drain-
gage supply him with abundance of food, he finds
a column or a solitary arch the most secure position
for his nest; but where neither towers nor ruins
abound he does not hesitate to select a tall tree, as
both storks, swallows, and many other birds must
have done before they were tempted by the artificial
conveniences of man's buildings to desert their
natural places of nidification. (Nest, Amer. ed.)
Thus the golden eagle builds, according to circum-
stances, in cliffs, on trees, or even on the ground;
and the common heron, which generally associates
on the top of the tallest trees, builds in West-
moreland and in Galway on bushes. It is therefore
needless to interpret the text of the stork merely
percibit on trees. It probably was no less numer-
ous in Palestine when David wrote than now; but
the number of suitable towers must have been far
lower, and it would therefore resort to trees.
Though it does not frequent trees in South Judea,
yet it still builds on trees by the Sea of Galilee,
given to several travellers; and the writer may
remark, that while he has never seen the nest ex-
cept on towers or pillars in that kind of ruins, Tusni,
the only nest he ever saw in Morocco was on a tree.
Varro (De Rustic. iii. 5) observes, "Advena
vulures pullos facult, in agra clavis, in testa
hirundinum." All modern authorities give the same
character to the stork building on trees. Degland
mentions several pairs which still breed in a marsh
near Chindoune-Marine (Orn. Europ. i. 153).
Kjærbølling makes a similar statement with re-
spect to Denmark, and Nilsson also as to Sweden.
Bödker observes, "That in Germany the white
stork builds in the gables, etc., and in trees, chiefly
the tops of poplars and the strong upper branches
of the oak, binding the branches together with
twigs, turf, and earth, and covering the flat surface
with straw, moss, and feathers." (Eier Eur. pl.
xxvii.).
The black stork, no less common in Palestine,
has never relinquished its natural habit of building
upon trees. This species, in the southeastern
portion of the land, is the most abundant of the
other (Harmer's Obs. iii. 323). Of either, how-
ever, the expression may be taken literally, that
"the fir-trees are a dwelling for the stork."

* STORY, 2 Chr. xiii. 22, xxiv. 27, is used in
the sense of history (Ital. storia). So "story-
writer" for historiog. I Esdr. ii. 17.

A. STRAIN AT. The A. V. of 1611 renders
Matt. xxiii. 24, Ye kind of vipers, which serpents at a
judder, and swallow a camel." There can be little
doubt, as Dean Trench has supposed, that this ob-
serve phrase is due to a printer's error, and that
the true reading is "strain out." Such is the
sense of the Greek Σπαίρει, as used by Phalarus
(Op. Mor. p. 692 lb, Synopsis Probl. vi. 7, § 1)
and Posid. (11. 45), namely, to clarify by passing
through a strainer (ἀφεργητής). "Strain out," is the
reading of Tychylas (1538), Cranmer's (1539),
the Bishops' (1568), and the Geneva (1557) Bibles,
and "strain at," which is neither correct nor intelli-
gible, could only have crept into our A. V.,
and been allowed to remain there, by an oversight.
Dean Trench gives an interesting illustration of the
passage from a private letter written to him by a
recent traveller in North Africa, who says: "In a
ride from Tangier to Tetuan, I observed that a
Moorsall soldier who accompanied me, when he
drank, always unfolded the end of his turban and
placed it over the mouth of his bottle, drinking
through the muslin, to strain out the quarts, whose
harrow swarm in the water of that country." (On
The Auth., v. of the N. T. pp. 172, 173). If one finds
conjecture the cause which led, even erroneously, to the substitution of for out, it is perhaps to be found in the marginal note of the Greek Version, which explains the verse thus: "Ye stay at that which is nothing, and let pass that which is of greater importance."

* STRAITLY is often used in the A. V. in the now obsolete sense of closely (Josh. vi. 1; Wisd. xvi. 16; Gen. xliii. 7); and strictly (Matt. xviii. 33; Acts v. 28, etc.).

A. * STRANGE, as used for foreign, in some passages of the A. V. may not be understood by all readers; e. g. "strange vanity," Jer. viii. 19, for "foreign idols." The "stranger woman" in Prov. ii. 16 is so designated as being the wife of another (ver. 17), or at least, as one who has no business with the person whom she tempts.

A. STRANGER (ἡ ἕξορροις). A "stranger" in the technical sense of the term may be defined to be a person of foreign, i.e. non-Israelitish, extraction, resident within the limits of the promised land. He was distinct from the proper "foreigner," as inasmuch as the latter still belonged to another country, and would only visit Palestine as a traveler; he was still more distinct from the "nationless," or non-Israelitish people, who held no relationship with the chosen people of God. The term answers most nearly to the Greek ἴδιος, and may be compared with our expression "naturalized foreigner," in as far as this implies a certain political status in the country where the foreigner resides: it is opposed to one "born in the land," or, as the term more properly means, "not transplanted," in the same way that a naturalized foreigner is opposed to a native. The terms applied to the "stranger" have special reference to the fact of his residing in the land. The existence of such a class of persons among the Israelites is easily accounted for: the "mixed multitude" that accompanied them out of Egypt (Ex. xii. 38) formed one element; the Canaanitish population, which was never wholly exterminated from their native soil, formed another and a still more important one: captives taken in war formed a third; fugitives, hired servants, merchants, etc., formed a fourth. The number from these various sources must have been at all times very considerable; the census of them in Solomon's time gave a return of 550,000 males (2 Chr. ii. 17), which was equal to a tenth of the whole population. The enactments of the Mosaic Law, which regulated the political and social position of resident strangers, were conceived in a spirit of great liberality. * With the exception of the Moabites and Ammonites (Deut. xix. 3), all nations were admissible to the rights of citizenship under certain conditions. It would appear, indeed, to be a consequence of the prohibition of intermarriage with the Canaanites (Deut. vii. 3), that these would be excluded from the rights of citizenship; but the Rabbinical view that this exclusion was superseded in the case of proselytes seems highly probable, as we find Degan

the Edomite (1 Sam. xvi. 7, xxii. 9); Ish-bosheth (2 Sam. xi. 6), and Aramath the Jobitean (2 Sam. xxiv. 18), assigning to all appearance the full rights of citizenship. Whether a stranger could ever become legally a landowner is a question about which there may be doubt. Theoretically the whole of the soil was portioned out among the twelve tribes, and Ezekiel notices it as a peculiarity of the division which he witnessed in vision, that the strangers were entitled to an inheritance with the Israelites, and should thus become as those "born in the country" (Ez. xxii. 22). Indeed the term "stranger" is more than once applied in a pointed manner to signify one who was not a landowner (Gen. xxviii. 4; Lev. xxv. 45); while on the other hand ezrechh (A. V. "born in the land") may have reference to the possession of the soil, as it is borrowed from the image of a tree not transplanted, and so occupying its native soil. The Israelites, however, never succeeded in obtaining possession of the whole, and it is possible that the Canaanitish occupants may in course of time have been recognized as "strangers," and had the right of retaining their land conceded to them. There was of course nothing to prevent a Canaanite becoming a true Israelite by the mere assumption of a plot, but this would not constitute him a proper landowner, inasmuch as he would lose all interest in the property when the year of Jubile came round. That they possessed land in one of these two capacities is clear from the case of Aramath above cited. The stranger appears to have been eligible to all civil offices, that of hireling (Deut. xviii. 15). In regard to religion, it was absolutely necessary that the stranger should not infringe any of the fundamental laws of the Israelite state: he was forbidden to blaspheme the name of Jehovah (Lev. xxiv. 16), to work on the Sabbath (Ex. xx. 10), to eat leavened bread at the time of the Passover (Ex. xii. 19), to commit any breach of the marriage laws (Lev. xviii. 26), to worship Moloch (Lev. xx. 2), or to eat blood or the flesh of any animal that had died otherwise than by the hand of man (Lev. xii. 10, 15). He was required to release a Hebrew servant in the year of Jubilee (Lev. xxv. 47-51), to observe the day of atonement (Lev. xvi. 27), to perform the rites of purification when necessary (Lev. xvii. 15; Num. xix. 10), and to offer sacrifices and oblations according to the laws (Lev. xxv. 21). If the stranger was a bondman he was obliged to submit to circumcision (Ex. xii. 44); if he was independent, it was optional with him: but if he remained uncircumcised, he was prohibited from partaking of the Passover (Ex. xii. 48), and could not be regarded as a full citizen. Liberty was also given in regard to the use of prohibited food to an uncircumcised stranger; for on this ground alone can we harmonize the statements in Deut. xiv. 21 and Lev. xiv. 10. Assuming, however, that the stranger was circumcised, no distinction existed in regard to legal rights between the stranger and the Israelite: "one law" for both classes is a principle affirmed in respect to religious

by hiring. John (Acts xix. 1, § 18) explains ἰδιον of one who, whether Hebrew or foreigner, was destined of a home. We see no evidence for either of these opinions. In the LXX. these terms are most, frequently rendered by ἰδιος, the Alexandrian substitute for the classical ἴδιος. Soncino adopts this rendering also. Arose is used, and in two passages (Ex. xii. 19; Lev. xiv. 1) ἰδιον, as representing the διδώκει form of the word ἰδιος
observations (Ex. xii. 49; Num. xv. 16), and to legal proceedings (Lev. xxiv. 22), and the judges are strictly warned against any partiality in their decisions (Deut. i. 16; xxiv. 17, 18). The Israelite is also enjoined to treat him as a brother (Lev. xix. 34; Deut. x. 19), and the precept is enforced in each case by a reference to his own state in the land of Egypt. Such precepts were needed in order to counteract the natural tendency to treat persons in the position of strangers with rigor. For though there was the possibility of a stranger acquiring wealth and becoming the owner of Hebrew slaves (Lev. xxv. 47), yet his normal state was one of poverty, as implied in the numerous passages where he is coupled with the fatherless and the widow (e. g. Ex. xxii. 21-25; Deut. x. 18, xxiv. 17), and in the special directions respecting his leaving a share in the feasts that accompanied certain religious festivals (Deut. xvi. 11, 14, xxvi. 11), in the leasing of the cornfield, the vineyard, and the olive-branch (Lev. xix. 10, xxiii. 22; Deut. xxiv. 20), in the produce of the tithe (Deut. xxiv. 28, 29), in the forgotten sheaf (Deut. xxiv. 19), and in the spontaneous production of the soil in the sabbatical year (Lev. xxv. 6). It appears from this that the "stranger" formed the class whence the hirings were drawn: the terms being coupled together in Ex. xii. 45; Lev. xxv. 10, xxvi. 6, 40. Such hirings were engaged either by the day (Lev. xix. 15; Deut. xxiv. 15), or by the year (Lev. xxv. 55), and appear to have been conscientiously treated, for the condition of the Hebrew slave is favorably compared with that of the hired servant and the sojourner in contradistinction to the bondsman (Lev. xxv. 39, 40). A less formidable class of strangers, probably captives in war or for debt, were reduced to slavery, and were subject to be bought and sold (Lev. xxv. 45), as well as to be put to task-work, as was the case with the Gibeonites (Josh. i. 21) and with those whom Solomon employed in the building of the Temple (2 Chr. ii. 18). The liberal spirit of the Mosaic regulations respecting strangers presents a strong contrast to the rigid exclusiveness of the Jews at the commencement of the Christian era. The growth of this spirit dates from the time of the Babylonish Captivity, and originated partly in the outrages which the Jews suffered at the hands of foreigners, and partly through a fear lest their nationality should be swamped by constant admixture with foreigners: the latter notion appears to have dictated the stringent measures adopted by Nehemiah (Neh. ix. 2, xii. 3). Our Lord condemns this exclusive spirit in the parable of the good Samaritan, where He defines the term "neighbor" in a sense new to his hearers (Luke x. 30). It should be observed, however, that the prolepsis of the New Testament is the true representative of the stranger of the Old Testament, and towards this class a cordial feeling was manifested. [Prolepsis.] The term "stranger" (πρόξενος) is generally used in the New Testament in the general sense of foreigner, and occasionally in its more technical sense as opposed to a citizen (Eph. ii. 19).b

a The term πρόξενος occurs in the LXX. as = εἰκόνες in Ex. xii. 19, xx. 10, xxii. 21, xxiii. 9.

b St. Chrys. "Strangers of Rome" (οἱ ἐμβατονεῖται Ῥω-

and camel (Gen. xxiv. 25; 1 K. iv. 28; Is. xi. 7 (xxv. 29)). The straw was probably often chopped and mixed with barley, beans, etc., for provender (see Harmer's Observations, i. 423, 424; Wilkin-

son, Ant. Egy. ii. 48, Lond. 1854). There is no intimation that straw was used for litter: Harmer thinks it was not so employed; the litter the people now use in these countries is the animals' dung, dried in the sun and bashed between their hands, which they heap up again in the morning, sprinkling it in the summer with fresh water to keep it from corrupting (Oba. p. 424, Lond. 1797). Straw was employed by the Egyptians for making bricks (Ex. v. 7, 16): it was chopped up and mixed with the clay to make them more compact and to prevent their cracking (Ant. Egy. ii. 194). [Brock.] The ancient Egyptians reapled their corn close to the ear, and afterwards cut the straw close to the ground (ibid. p. 48) and laid it by. This was the straw that Pharaoh refused to give to the Israelites, who were therefore compelled to gather "stubble" (πρόξενα, Kisch) instead, a matter of considerable dif-

iculty, seeing that the straw itself had been cut off near to the ground. The "stubble" frequently alluded to in the Scriptures may denote either the short standing straw, mentioned above, which was commonly set on fire, hence the allusions in Is. v. 24; Joel ii. 5, or the small fragments that would be left behind after the reaping, hence the expression, "as the straw before the wind" (Is. lxxixi. 13; Es. xii. 2; Jer. xiii. 24).

W. 11.

STREAM OF EGYPT (Ἡρακλεῖα τῆς Ἑλλάντος: Ἑρακλεία τῆς Ἑλλά-

νίας) In the ancient geography we frequently find that streams of Egypt were called after their course, and sometimes after their mouths, the names of which were familiar, being generally narrow, tortuous, and gloomy, even in the best towns, such as Cairo (Lane, i. 25), Damascus (Porter, i. 30), and Aleppo (Russell, i. 14). Their character is mainly fixed by the climate and the style of architecture, the narrowness being due to the extreme heat, and the gloominess to the circumstance of the windows looking for the most part into the inner court. As these same influences existed in ancient times, we should be inclined to think that the streets were much of the same character as at present. The opposite opinion has, indeed, been maintained on account of the Hebrew term ῥεῖδος, frequently applied to streets, and properly meaning a wide space. The specific signification of this term is rather a court-yard or square: it is applied in this sense to the broad open space adjacent to the gate of a town, where public business was transacted (Deut. xiii. 16), and, again, to the court before the Temple (Ex. x. 9) or before a palace (Esth. iv. 6). Its application to the street may point to the considerate width of the main street, or it may per-

haps mean Acts ii. 10, are literally "Romans who are sojourners." "e., as the subjoined apposition shows, "Jews and proselytes" who had come to Jerusalem from Rome.
haps convey the idea of publicity rather than of width, a sense well adapted to the passages in which it occurs (e. g. Gen. xix. 2; Judg. xix. 15: 2 Sam. xxi. 12). The street called "Straight," in Damascus (Acts ix. 11), was an exception to the rule of narrowness: it was a noble thoroughfare, 100 feet wide, divided in the Roman age by colonnades into three avenues, the central one for foot passengers, the side passages for vehicles and horsemen going in different directions (Porter, i. 47).

The shops and warehouses were probably collected together into bazars in ancient as in modern times: we read of the bakers’ bazar (Jer. xxxvii. 21), and of the wool, brazier, and clothes bazars (נזוגפ) in Jerusalem (Joseph. B. J. v. 8, § 1), and perhaps the agreement between Benjamin and Ahab, that the latter should "make streets in Damascus" (1 K. xx. 34), was in reference rather to bazars (the term חֲלָשׁ here used being the same as in Jer. xxxvii. 21), and thus amounted to the establishment of a j̄aḥ commercēr. A lively description of the bazars at Damascus is given by Porter (i. 38-60).

The broad and narrow streets are distinguished under the terms רצָחַד and חלָשׁ in the following passages, though the point is frequently lost in the A. V. by rendering the latter term "abroad" or "without" : Prov. v. 16, vii. 12, xxi. 13; Jer. v. 1, ix. 21; Am. v. 16; Nah. ii. 4. The same distinction is apparently expressed by the terms רצָחַד and חלָשׁ in Cant. iii. 2, and by זַעְרֵא and פְּגָע in Luke xiv. 21: but the etymological sense of פְּגָע points rather to a place of converse, such as a market-place, while פְּגָע is applied to the "Straight" street of Damascus (Acts ix. 11), and is also used in reference to the Pharisees (Matt. vi. 2) as a place of the greatest publicity: it is therefore doubtful whether the contrast can be sustained: Josephus describes the alleys of Jerusalem under the term פהָרָשָא (B. J. v. 8, § 1). The term חלָשׁ occurs elsewhere only in Prov. vii. 18; Ecc. xii. 3, 4. The term חלָשׁ, already noticed, applies generally to that which is outside the residence (as in Prov. vii. 12, A. V. "she is without"), and hence to other places than streets, as to a pasture-ground (Job xviii. 17, where the A. V. requires emendation). That streets occasionally had names appears from Jer. xxxvii. 21; Acts ix. 11. That they were generally impraved may be inferred from the notices of the pavement laid by Herod the Great at Antioch (Joseph. Ant. xvi. 5, § 3), and by Herod Agrippa II. at Jerusalem (Jot. xx. 9, § 7). Hence pavement forms one of the peculiar features of the ideal Jerusalem (Tob. xiii. 17; Rev. xxii. 21). Each street and bazar in a modern town is looked up at night (Lane, i. 29; Russell, i. 21), and hence a person cannot pass without being observed by the watchman: the same custom appears to have prevailed in ancient times (Cant. iii. 3).

W. L. B. *

**STRIKING THE MOUTH.** [Punishments.], Amer. ed.]

° פַּעַל, A. V. "elders." The word has exactly the signification of the Arabic ṣṭrāḥ, an old man, and hence the head of a tribe.

* "Gideon as he was pursuing Zophah and Zalmunna, king of Moab, Dreasc of Midian, to the head of the princes of Suceoth," because they refused to supply his men with bread (Judg. viii. 8 f.). On returning from his victory he executed that menace. He took the elders of the city and thorns of the wilderness and briars, and with them he taught pun-

**STRIPES.** [Punishments.]

SU'AH (טַעַה) [הָעָה]: Zau̇ā; [Var. corrupt:] Zau̇a. Son of Zophah, an Asherite (1 Chr. vii. 36).

SUBA (טוּבָה): [Var. Alex. Σωβᾶς: Suba). The sons of Suba were among the sons of Sobolom, foremen who returned with Zerubbabel (1 Esd. v. 34). There is nothing corresponding to the name in the Hebrew lists of Ezra and Nehemiah.

**SU'BAI (סּוּבָי): [Var. Alex. Σωβᾶς: Subai)): = SHMAYM (1 Esd. v. 30; comp. Ezr. ii. 30).

* SUBURBS, as the composition of the word (sub and arb) would imply, designates anything, as land or buildings, under the walls of a town, i.e. lying close around it. In several O. T. passages it designates land given to the Levites in connection with their cities as pastureage for their animals and for other purposes. See Lev. xxv. 34; Num. xxxv. 3 ff. and elsewhere. Num. xxxv. 5 gives the extent of the territory designated as sub urbs. The usual Hebrew term denoting such dependencies is שַׂבָּעַה, properly a place whither flocks and herds are driven. R. D. C. R.

**SUCCOOTH (סֶכְכּות [sochot]): Σωκαθ in Gen. [and Ps.], elsewhere Σωκάθ, Σωκαθί; [Var. in 2 Chr. iv. 17]: Σωκαθ. Alex. Σωκαθ [in Jost. xxii. 27, Σωκώθ]: in Gen. Succoth, id est, bazar-via: [Succoth], Soccoth, [Sococh, Socbat]. A town of ancient date in the Holy Land, which is first heard of in the account of the homeward journey of Jacob from Padan-aram (Gen. xxxiii. 17). The name is fancifully derived from the fact of Jacob’s having there put up "booths." (Succoth, 살כוות) for his cattle, as well as a house for himself. Whether that occurrence originated the name of Succoth (and, following the undue connection of the name, it is not probable that it did), the mention of the house and the booths in contrast to the "tent" of the wandering life indicates that the Patriarch made a lengthened stay there — a fact not elsewhere alluded to.

From the itinerary of Jacob’s return it seems that Succoth lay between Penhes, near the ford of the torrent Jabshak, and Shechem (comp. xxxii. 20, and xxxvii. 18, which latter would be more accurately rendered "came safe to the city Shechem"). In accordance with this is the mention of Succoth in the narrative of Gideon’s pursuit of Zelah and Zalmunna (Judg. v. 17). His course is onward — the reverse of Jacob’s — and he comes first to Succoth, and then to Penuel, the latter being further up the mountain than the former (ver. 8, "went up thence"). Its importance at this time is shown by the organization and number of its seventy-seven head-men — chiefs and sheikhs — and also by the defiance with which it treated Gideon on his first application.°

° "Hamath," the more probable reading of Kitto’s "Hamath Hamath," the name of a place near the head of the Hauran (Laud. viii. 20). Such thicknesses however are by no means peculiar to any one locality in Palestine.
It would appear from this passage that it lay on the east of Jordan, which is corroborated by the fact that it was allotted to the tribe of Gad (Josh. xiii. 27). In the account of Jacob's journey, all mention of the Jordan is omitted.

Succoth is named once again after this — in 1 K. i. 2 — as marking the spot at which the brass foundries were placed for casting the metal-work of the Temple, "in the district of Jordan, in the flat or soft ground between Succoth and Zarthan." But, as the position of Zarthan is not yet known, this notice has no topographical value beyond the mention of the Jordan.

It appears to have been known in the time of Jerome, who says (Quaed. in Gen., 5. 7) that there was then a town named Sochoth besides the Jordan (vortas Jorboin), in the district (juxta) of Scythopolis. Nothing more, however, was heard of it till Burckhardt's journey. He mentions it in a note to p. 345 (July 2). He is speaking of the places about the Jordan, and, after naming three ruined towns on the west side of the river to the north of Rysum, he says: "Near where we crossed to the south are the ruins of Sukkot (Σοκκοθ). On the western bank of the river there are no ruins between Ain Sultan (which he has just said was the southernmost of the three ruined places north of Byzan) and Blecha or Jericho." There can, therefore, be no doubt that the Sukkot of Burckhardt was on the east of the Jordan. The spot at which he crossed he has already stated (pp. 343, 344) to have been "two hours from Rysum, which bore N. N. W."

Dr. Robinson (Bibl. Res. iii. 329, &c.) and Mr. Van de Velde (Spr. and Pol. ii. 343) have discovered a place named Sukkát (Σοκκαθ), evidently entirely distinct both in name and position from that of Burckhardt. In the accounts and maps of these travellers it is placed on the west side of the Jordan, less than a mile from the river, and about 10 miles south of Beisan. A fine spring bubbles out on the east side of the low bluff on which the ruins stand. The distance of Sukkát from Beisan is too great, even if it were on the other side of the Jordan, to allow of its being the place referred to by Jerome. The Sukkot of Burckhardt is more suitable. But it is doubtful whether either of them can be the Sukkoth of the Old Testament. For the events of Gideon's story the latter of the two is not unsuitable. It is in the line of flight and pursuit which we may suppose the Midianites and Gideon to have taken, and it is also near a ford. Sukkát, on the other hand, seems too far south, and is also on the west of the river. But both appear to face to the north for the Succoth of Jacob, lying at that date between the Jabalak and Shechem, especially if we place the Wady Zekrò (usually identified with the Jabalok) further to the south than it is placed in Van de Velde's map, as Mr. Beke a proposes to do. Jacob's direct road from the Wady Zekrò to Shechem would have led him by the Wady Ferkeh, on the one hand, or through Yerusha, on the other. If he went north as far as Sukhát, he must have ascended by the Wady Machal to Tema's, and so through Tubah and the Wady Birha. Perhaps his going north was a true to escape the dangerous proximity of Esau; and if he made a long stay at Succoth, as suggested in the outset of this article, the detour from the direct road to Shechem would be of little importance to him.

Until the position of Succoth is more exactly ascertained, it is impossible to say what was the VALLEY OF SUCCOTH mentioned in Ps. xx. 6 and xviii. 7. The word rendered "valley" is " Governed in both cases (ἡ κοίλος τῶν σινορίων: Tovs Sochoth) by which sense is employed (Josh. xiii. 27) in specifying the position of the group of towns amongst which Succoth occurs, in describing the allotment of God. So that it evidently denotes some marked feature of the country. It is not probable, however, that the main valley of the Jordan, the Ghor, is intended, that being always designated in the Bible by the name of "the Arabah."}

Succoth (σοκκουθ [booths]): Sochoth (Ex. xxxii. 37). Num. xxxii. 5, 6). This place was apparently reached at the close of the first day's march. It can scarcely be doubted that each of the three stations marks the end of a single journey. Raimes, the starting-place, we have shown probably near the western end of the Wadi-el-Trengiyf. We have calculated the distance traversed in each day's journey to have been about fifteen miles, and as Succoth was not in the desert, the next station, Etham, being "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxii. 6), it must have been in the valley, and consequently nearly due east of Raimes, and fifteen miles distant in a straight line. If Raimes may be supposed to have been near the mound called El-Wadiyagal, the position of Succoth can be readily determined within moderate limits of uncertainty. It was probably, to judge from its name, a resting-place of caravans, or a military station, or a town named from one of the two. We find similar names in Scene Mandra (tm. Ant.), Scene Mandra (Not. Diaign.) or Σακκαθ Μανδρα (Not. Geogr. Epipetoum). Scene Veteranorum (R. Ant. Not. Diaign.), and Scene Carv studying (Herm. Not. Diyin). See, for all these places, Parthey, Zie Erkundung des alten Egypten, p. 555. It is, however, evident that such a name would be easily lost, and even if preserved, hard to recognize, as it might be concealed under a corresponding name of similar signification, though very different in sound, as that of the settlement of Ionian and Carian mercenaries, called τά Σακκάθ Ταρκολίσια (Herv. Diaign.).

We must here remark upon the extreme carelessness with which it has been taken for granted that the whole journey to the Red Sea was through the desert, and an argument against the authenticity of the sacred narrative based upon evidence which it not only does not state but contradicts. For, as we have seen, Etham, the second camping-place, us here is to say that he has fixed the latitude of the mouth of the Wady Zekrò at 32° 13', or more than about fifteen miles south of its position in Van de Velde's map Mr. Beke's paper and map will be published in the Journal of the R. Geogr. Society for 1858.
UN PHILIPPE.

SUCCHOTH-BENOTH

(=houses of daughters): [See also Berit: [Vat. Pho- 

chos and Baruch: Alex. SCXyt-: Nochodo- 

benoth] occurs only in 2 K. xvii. 39, where the 

Babylonish settlers in Samaria are said to have 

up the worship of Succoth-benoth in their own 

in that country. It has generally been supposed 

that this term is pure Hebrew, and signifies 

the booths in which the daughters of the Baby- 

lonians prostituted themselves in honor of their 

idol," others as "small tabernacles in which were 

contained images of female deities" (compare Ge- 

senius and S. Newman, ad voc. ףף): Winer, 

Relatbederthcb, ii. 543; Calmet, Commentaire 

Littoriel, 8. 897). It is a strong objection to both 

these explanations, that Succoth-benoth, which 

in the passage in Kings occurs in the same con- 

struction with Nergal and various other gods, is 

not a deity at all, nor, strictly speaking, an object 

of worship. Perhaps therefore the suggestion 

of Sir H. Rawlinson, against which this objection 

does not lie, may be admitted to deserve some 

attention. This writer thinks that Succoth-benoth represents 

the Chaldean goddess Zeit-bint, the wife of Mer- 

odach, who was especially worshipped at Babylon, 

in conjunction with her husband, and who is called 

the "queen" of the place. Succoth he supposes 

to be either a "Hamite term equivalent to Zeit," 

or possibly a Semitic mistranslation of the term 

Zeit, "supreme," being confounded with Zeit 

"tents." (See the Essay of Sir H. Rawlin- 

son in Rawlinson's Herodotus, vol. i. p. 69.)

G. R.

SUCCHATITES (ןַעַתַיָּה [patr. whence 

unknown]: [See also; Vat. Alex.] SCA7A/7US: in 

tabernacula communes). One of the families 

of scribes at Jabez (1 Chr. ii. 59).

SUD (סוד): [See]. A river in the immediate 

neighborhood of Babylon, on the banks of which 

Jewish exiles lived (Ezr. 4: 4). No such river is 

known to geographers; but if we assume that 

the first part of the book of Baruch was written in 

Hebrew, the original text may have been Suri, 

the final ה having been changed into ה. In 

this case the name would represent, not the town of 

Sora, as suggested by Bochart (Phalæg, i. 8), but 

the river Euphrates itself, which is always named 

by Arab geographers "the river of Suri," a cor- 

ruption probably of the "Sippura" of the inscrip- 

tions (Rawlinson's Herodot. i. 611, note 4). 

W. L. B.

SUD (סוד: [Vat. סוד]: Alex. סודא: 

[Att. סוד:]: Su = סוד, or סחא [1 Esdr. v. 

6]: comp. Neh. vii. 47; Ezr. ii. 44).

SUDIFAS (סודיפש: Sordifus or Editas): 

HODAVIAH 3 and HODEYAH (1 Esdr. v. 23; 

comp. Ezr. iii. 10; Neh. vii. 43).

SUKKIM (סוקים [booth-dwellers]: [Rom. 

Vat. Τρογύδια: Alex.] Τρογύδια: Troglu-

dites), a nation mentioned (2 Chr. xii. 3; with 

the Lubim and Cushim as supplying part of the army 

which came with Shishak out of Egypt, also 

invaded Judah. Gesenius (xxvii. 33) suggests 

that their name means "dwellers in tents," in 

which case it might perhaps be better to suppose 

them to have been an Arab tribe like the Scenite, 

than Ethiopians. If it is borne in mind that 

Zerah was apparently allied with the Arabs south 

of Palestine (Zerah), whom we know Shishak to 

have subdued [Shishak], our conjecture does not 

seem to be improbable. The Sukkium may cor- 

respond to some one of the shepherd or wandering 

races mentioned on the Egyptian monuments, but 

we have not found any name in hieroglyphics re- 

sembling their name in the Bible, and this some- 

what favors the opinion that it is a Sianite ap- 

pellation.

R. S. P.

SUMMER.

[Agriculture, p. 40 b; 

Palestine, p. 2317; Rain.]

* SUMMER-PARLOR. [House, p. 1105.]

SUN (שמש). In the history of the creator 

the sun is described as the "greater light" in con- 

trast to the moon or "lesser light." It is 

in conjunction with which it was to serve for signs 

and for seasons, and for days, and for years, 

while its special office was "to rule the day" (Gen. 

i. 14-16). The "signs" referred to were prob- 

ably such extraordinary phenomena as eclipses 

which were regarded as signifying premonitions 

of coming events (Jer. x. 2; Matt. xxiv. 23; with Luk 

xxvi. 20). The joint influence assigned to the sun 

and moon in deciding the "seasons," both for 

agricultural operations and for religious festivals, 

and also in regulating the length and subdivisions 

of the "years," correctly describes the combina- 

tion of the lunar and solar year, which prevailed 

at all events subsequently to the Mosaic period — 

the moon being the measure of time, and the sun 

being the measure of periods of the time by the 

subdivisions of months and weeks, while the sun 

was the ultimate regulator of the length of the year by means of the 

recurrence of the feast of Pentecost at a fixed agricul- 

tural season, namely, when the corn became ripe. 

The sun ruled the days of the July, sharing the dom- 

ination of the stars with the moon, the brilliancy 

and utility of which for journeys and other pur- 

poses enhances its value in eastern countries. If 

the sun ruled the day," not only in reference to its 

powerful influences, but also as deciding the length 

of the day and supplying the means of calculating 

its progress, sun-rise and sun-set act as the 

defined points of time in the absence of artificial 

contrivances for telling the hour of the day: and 

as these points are less variable in the latitude of 

Palestine than in our country, they served the pur- 

pose of marking the commencement and conclu- 

sion of the working day. Between these two 

points the Jews recognized three periods, namely, when the sun became hot, about 9 A. M. to 3 P. M. 

the "noon" or moon (Gen. xi. 9; Neh. vii. 3), the "seventh point of the sun" or moon (Gen. 

xi. 9; Neh. vii. 3; the "cool of the day" shortly before sunset (Gen. iii. 8). The sun also 

served to fix the quarters of the heliograph, east 

west, north, and south, which were represented 

respectively by the rising sun, the setting sun (Is. 

xlv. 6; Ps. i. 1), the dark quarter (Gen. xiii. 14; 

Joel ii. 20), and the brilliant quarter (Rom. xvi.

23; Job xxxvii. 17; Ez. xl. 24); or otherwise by
their position relative to a person facing the rising
sun — before, behind, on the left hand, and on the
right hand (Job xxiii. 8, 9). The apparent notion
of the sun is frequently referred to in terms that
would imply its reality (Josh. x. 13; 2 K. xx. 11;
Ps. xii. 6; Eed. i. 5; Hab. iii. 11). The ordinary
name for the sun, abweesh, is supposed to refer to
the extreme brilliancy of its rays, producing stupor
or oblivishment in the mind of the beholder — the
poetical names, chommah (Job xxx. 28; Cant. vi.
10; Is. xxx. 11) and chever (Judg. xiv. 18; Job ix.
7) have reference to its heat, the beneficial
effects of which are duly commemo rated (Deut.
xxxiii. 14; Ps. xii. 6), as well as its beneficent
influence when in excess (Ps. cxxxi. 6; Is. xii. 10; Jon.
iv. 8; Ecclus. xiii. 3, 4). The vigor with which
the sun traverses the heavens is compared to that
of a "bridegroom coming out of his chamber," and
of a "giant rejoicing to run his course" (Ps. xii.
5). The speed with which the beams of the rising
sun dart across the sky, is expressed in the term "wings" applied to them (Ps. cxxxi. 9; Mal. iv. 2).

The worship of the sun, as the most prominent
and powerful agent in the kingdom of nature, was
widely diffused throughout the countries adjacent
to the sun, and appears to have been a direct worship to it without the intervention of any
statue or symbol (Job xxxi. 26, 27; Strab. xvi.
p. 784), and this simple style of worship was proba-
bly familiar to the ancestors of the Jews in
Chaldea and Mesopotamia. In Egypt the sun
was worshipped under the title of Re or Ra. and as was supposed by ancient writers under
the form of Osiris (Died. Sis. i. 11; see Wilkinson's
Anc. Egyp. iv. 289); the name came consequently
forward as the title of the kings, Pharaoh, or rather
Phra, meaning "the sun" (Wilkinson, iv. 287).
The Hebrews must have been well acquainted with
the idolatrous worship of the sun during the cap-
tivity in Egypt, both from the contiguity of On, the
chief seat of the worship of the sun as implied in the
ame itself (On = the Hebrew Beth-sher-
mesh, "house of the sun," Jer. xliii. 13), and also
from the connection between Joseph and Poti-
pherah (the he who belongs to Re"), the priest of
On (Gen. xlii. 45). After their removal to Canaan,
the Hebrews came in contact with various forms of
idolatry, which originated in the worship of the
sun; such as the Baal of the Phoenicians (Movers,
Phen. p. 180), the Mech or Melcom of the Am-
nonites, and the Hashal of the Syrians (Jeh. xxxvii.
71). These idols were, with the exception of the
last, introduced into the Hebrew commonwealth at
various periods (Judg. ii. 11; 1 K. xi. 5); but it
does not follow that the object symbolized by them
was known to the Jews themselves. If we have
any notice at all of conscious sun-worship in the
ear East, that notice is in their history, in the dou-
terol name chammah appears in Lev. xxvi. 30; Is.
xvii. 8, 8, cetera), which was itself significant of the sun, and probably described the stone pillars or statues
under which the solar Baal (Baal-Haman of the
Punic inscriptions, Gesen. Thes. i. 489) was wor-
shipped at Baal-Haman (Cant. viii. 11) and other
places. The sun-worship appears to have been
introduced by the Assyrians (e.g., the Assyr.
images) to have become formally established by Manasseh (2 K. xx. 3, 5, 9), in contravention of the prohibitions of Moses (Deut.
iv. 19, xvii. 3). Whether the practice was bor-
rowed from the Sephardites of Samar (2 K. xii.
31), whose gods Adrammelech and Amsuamelech
are supposed to represent the male and female sun,
and whose original residence (the Helopolis of
Eremon) was the chief seat of the worship of the
sun in Babylonia (Rawlinson's Herod. i. 611), or
whether the kings of Judah drew their model of
worship more immediately from the east, is uncer-
tain. The dedication of chariots and horses to the
sun (2 K. xxii. 11) was perhaps borrowed from the
Persians (Herod. i. 189; Curt. iii. 3, § 11; Xen.
Cyrop. viii. 3, § 21), who honored the sun under
the form of Mithras (Strab. xv. p. 732). At
the same time it should be observed that the horse
was connected with the worship of the sun in other
countries, as among the Masseggetes (Herod. i.
210), and the Armenians (Xen. Anab. iv. 5, § 55), both
of whom used it as a sacrifice. To judge from
the few notices we have on the subject in the
Bible, we should conclude that the Jews derived
their mode of worshipping the sun from several
quarters. The practice of burning incense on the
house-tops (2 K. xxii. 5, 12; Jer. xiii. 13; Zeph.
1. 10) might have been borrowed from the Arameans
(Strab. xvi. p. 784), as also the simple act of adora-
tion directed towards the rising sun (Ps. cxiv. 2),
comp. Job xxxi. 27). On the other hand, the use
of the chariots and horses in the processions on
festivals days came, as we have observed, from Per-
sia; and so also the custom of "putting the branch
to the nose" (Ez. xvii. 17), according to the gen-
erally received explanation, which identifies it with
the Persian practice of holding in the left hand a
bundle of twigs called Hasmon while worshipping
the sun (Strab. xv. p. 733; Hyde, Rel. Per. p.
345). This, however, is very doubtful, the expres-
ion being otherwise understood of "putting the
knife to the nose," i.e., producing self-mutilation
(Hitzig, On Ezck.). An objection lies against
the former view from the fact that the Persians are
not said to have held the branch to the nose. The
importance attached to the worship of the sun by
the Jewish kings, may be inferred from the fact
that the horses were stalled within the precincts of
the temple (the term pereruje meaning not "suburb"
as in the A. V., but either a portico or an out-
building of the temple). They were removed thence
by Josiah (2 K. xxii. 11).

In the metaphorical language of Scripture the
sun is emblematic of the law of God (Ps. xix. 7),
of the cheering presence of God (Ps. lxxiv. 11),
of the person of the Saviour (John i. 9; Mal. iv.
2), and of the glory and purity of heavenly beings
(Rev. i. 16, x. 1, xii. 1).

* SUN-DIAL. [* Dial.]
* SUPPER. [* LORD'S SUPPER; MEALS.]
* SUPPER. THE LAST. [* Passover, iii.]

SUR (Σαμής: [Vat. Ασαμής, Sin. Temp.] Vulg.
omits). One of the places on the sea coast of Pal-
estine, which are named as having been disturbed,
at the approach of Holfernus with the Assyrian
army (Jud. ii. 28). It cannot be Tyre, the mod-
eren Sin, since that is mentioned immediately be-
fore. Some have suggested Iver, others a place
nominated by Steph. Byz. as in Phoenicia, which they would identify with Adull.
SURETISHIP

other), again, Surethat. But none of these are satisfactory.

SURETISHIP. (1) The A. V. rendering for dokbi'um2, lit. in marg. "those that strike (hands);" (2) The phrase sauath sell, "depositing in the hand," i.e. giving in pledge, may be understood to apply to the making of pledges, or virtual though not personal suretiship (Lev. vi. 2, in Heb. v. 21). In the entire absence of commerce the law laid down no rules on the subject of suretiship, but it is evident that in the time of Solomon commercial dealings had become so multiplied that suretiship in the commercial sense was common (Prov. xi. 15, xvii. 18, xx. 16, xxvii. 13). But in older times the notion of one man becoming a surety for a service to be discharged by another was in full force (see Gen. xlv. 32), and it is probable that the same form of undertaking existed, namely, the giving the hand (striking hands with), not, as Michaels represents, the person who was to discharge the service — in the commercial sense the debtor — but the person to whom it was due, the creditor (Job. xvii. 3; Prov. vi. 1; Michellis, Lives of Moses, § 151, ii. 322, ed. Smith). The surety of course became liable for his client's debts in case of his failure. In later Jewish times the system had become common, and caused much distress in many instances, yet the duty of suretiship in certain cases is recognized as valid (Exclus. viii. 19, xvi. 14, 15, 16, 18, 19). [Loan.]

* SURETY. [SURETISHIP; PLEDGE.]

SUSA [Susa]. Esth. xi. 3, xvi. 18. [SUSIAN]

SUSAN'NA [{Theoed.} Σουσανα, {Alex.} Σουσάνα] [LXX. Σουσάνα] i.e. "a lily"). 1. The heroine of the story of the Judgment of Daniel. [DANIEL, APOCRYPHAL ADDITIONS TO.] The name occurs in Bihol. Sic. as that of the daughter of Ninus (ii. 6), and Sheshan (1 Chr. ii. 31, 34, 35) is of the same origin and meaning (Gen. Theor. s. v.). 2. One of the women who ministered to the Lord (Lake viii. 3). B. F. W.

SUSI [Σούσι: Σουsi [Vat.-gera]: Susa]. The father of Gaddi the Manasseh spy (Num. xiii. 11).

SWALLOW, a bird, and "swallow," both thus translated in A. V. 

vii. 7 occurs twice, Ps. lxxxiv. 3, and Prov. xxvi. 2: transl. by L.XX. ouragio and otrouphio; Vulg. tort.(er) and passar.
SWAN

SWEAT. BLOODY.

One of the physical phenomena attending our Lord's agony in the garden of Gethsemane is described by St. Luke (xxii. 44): "His sweat was as it were great drops of blood falling down to the ground." The genuineness of this verse and of the preceding has been doubted, but is now generally acknowledged. They are omitted in A and B, but are found in the Codex Sinaiticus (S), Codex Bezae, and others, and in the Peshito, Philoxenian, and Curetonian Syriac (see Tregelles, Greek New Test.; Scrivener,Intro. to theCrit. of the N. T. p. 434), and Tregelles points to the notation of the section and canon in ver. 42 as a trace of the existence of the verse in the Codex Alexandrinus.

Of this malady, known in medical science by the term phlepsis, there have been examples recorded both in ancient and modern times. Aristotle was aware of it (De Part. Anim. iii. 5). The cause assigned is generally violent mental emotion. "Kammeisser," quoted by Dr. Strond (Phys. Cause of the Death of Christ, p. 86), remarks, "Violent mental excitement, whether occasioned by uncontrollable anger or vehement joy, and in like manner sudden terror or intense fear, forces out a violent accompaniment with sweat of anxiety or hilarity." After ascribing this sweat to the unequal constriction of some vessels and dilatation of others, he further observes: "If the mind is seized with a sudden fear of death, the sweat, owing to the excessive degree of constriction, often becomes bloody."" Dr. Millingen (Curiosities of Medical Experience, p. 489, 2d ed.) gives the following explanation of the phenomenon: "It is probable that this strange disorder arises from a violent commotion of the nervous system, turning the streams of blood out of their natural course, and forcing the red particles into the cutaneous excretories. A mere relaxation of the fibres could not produce so powerful a revolution. It may also arise in cases of extreme debility, in connection with a thinner condition of the blood."

The following are a few of the instances on record which have been collected by Calmet (Dis. sur la Scur au Song), Millingen, Strond, Trusen (Die Sitten, Gebwzhe, und Krankhheiten d. alt. Hebr., Breslau, 1834). Schenkius (Obs. Med. lib. iii. p. 438) mentions the case of a man who was so terrified at falling into the hands of soldiers that blood oozed from all the pores of her body. The same writer says that in the plague of Miseno, in 1554, a woman who was seized sweated blood for three days. In 1552, Conrad Lyceosthes (de Prophelia, p. 623, ed. 1557) reports, a woman sick of the plague sweated blood from the upper part of her body. Maldonato (Coma. in Evag.) gives an instance, attested by eye-witnesses, of a man at Paris in full health and vigor, who, hearing the sentence of death, was covered with a bloody sweat. According to De Thon (lib. xi. vol. i. p. 326, ed. 1626), the governor of Montemano, being seized by stra- gen and threatened with death, was so moved thereat that he sweated blood and water. Another case, recorded in the same historian (lib. XXXII. vol. iv. p. 44), is that of a Florentine youth who was dismayedly condemned to death by Pope Sixtus V. The death of Charles IX. of France was attended by the same phenomenon. Mezeyr (Hist. de France, ii. 1170, ed. 1646) says of his last moments "Il s'agitoit, et se remoait sans cesse, et le sang lui jaillissait par tous les conduits mesme par les
pores, de sorte qu'on le trouva une fois qui baignait dehors. * A sailor, during a fearful storm, is said to have fallen with terror, and when taken up his whole body was covered with white sweat (Millingen, p 488). In the *Meninges of History* (iii. 179), by Don Bonaventure d'Argencoe, the case is given of a woman who suffered so much from this madly that, after her death, no blood was found in her veins. Another case, of a girl of 18 who suffered in the same way, is reported by Messepari, a physician at Genoa, accompanied by the observations of Valleri, Professor of Medicine at Padua. It occurred in 1705 (Phil. Trans. No. 393, p. 2144). There is still, however, wanted a well-authenticated instance in modern times, observed with all the care and attested by all the exactness of later medical science. That given in Caspar's *Weisenschriffl*, 1845, as having been observed by Dr. Schneider, appears to be the most recent, and resembles the phenomenon mentioned by Theo- phrastus (*London Med. Gaz.*, 1848, vol. ii. p. 935). For further reference to authorities, see Cohn's *Dict. of Medicine*, iii. 72.

W. A. W.

**SWINE (****λ), choric: ευς, συς: χρως in N. T.: ans, aper.** Allusion will be found in the Bible to these animals, both (1) in their domestic and (2) in their wild state.

(1.) The flesh of swine was forbidden as food by the Levitical law (Lev. xi. 7; Pent. xiv. 8): the abhorrence which the Jews as a nation had of it may be inferred from Is. lv. 4, where some of the idolatrous people are represented as "eating swine's flesh," and as having the "breath of abominable things in their vessels;" see also lxxvi. 3, 17, and 2 Macc. vi. 18, 19, in which passage we read that Eleazar, an aged scribe, when compelled by Antiochus to receive in his mouth swine's flesh, "spit it forth, choosing rather to die gloriously than to live stained with such an abomination." The use of swine's flesh was forbidden to the Egyptian priests, to whom, says Sir G. Wilkinson (*Jew. Egypt*, i. 222), "above all meats it was particularly obnoxious" (see Herodotus, ii. 47; Elinm, de Niat. Anim. x. 16: Josephus, *Contr. Apion*, ii. 14), though it was occasionally eaten by the people. The Arabs also disapproved the use of swine's flesh (see Phyl. viii. H. N. 52: Koran, ii. 175), as were also the Philosophers, *Esolians*, and other nations of the East.

No other reason for the command to abstain from swine's flesh is given in the Law of Moses beyond the general one which forbade any of the mammal-ia as food which did not literally fulfill the terms of the definition of a "clean animal," namely, that it was to be a cloven hoofed. The pig, therefore, though it divides the hoof, but does not chew the cud, was to be considered unclean; and consequently, insusceptible, as unlike the ass and the horse in the time of the Kings, no use could be made of the animal when alive, the Jews did not breed swine (Lactant. *Insth*. iv. 17). It is, however, probable that dietetical considerations may have influenced Moses in his prohibition of swine's flesh; it is generally believed that its use in hot countries is liable to induce cutaneous disorders; hence in a people liable to leprosy the necessity for the observance of a strict rule. The reason of the meat not being eaten was its unwholesomeness, on which account it was forbidden to the Jews and Moslems (Sir G. Wilkinson's *note in Robertson's Herodotus*, ii. 47). Ham. Smith, however (Kitto's Cyclo. art. "Swine"), maintains that this reputed unwholesomeness of swine's flesh has been much exaggerated; and recently a writer in *Columbia's New Monthly Magazine* (July 1, 1862, p. 256) has endorsed this opinion. Other conjectures for the reason of the prohibition, which are more curious than valuable, may be seen in Bochart (*Hiero*. i. 896, l. 1). Cellarius (apud Philarch. *Sympos. iv. 6) suspected that the Jews did not use swine's flesh for the same reason which, he says, influenced the Egyptians, namely, that this animal was sacred, insusceptible as by turning up the earth with its snout it first taught men the art of ploughing (see Bochart, *Hiero*. i. 896, and a dissertation by Cassel, entitled De Jabalomina eido et oblationum sacrifici, Paris, 1750). Although the Jews did not breed swine, during the greater part of their existence as a nation, there can be little doubt that the heathen nations of Palestine used the flesh as food.

At the time of our Lord's ministry it would appear the Jews occasionally violated the law of Moses with respect to swine's flesh. Whether "the herd of swine" into which the devils were allowed to enter (Matt. viii. 22; Mark v. 13) were the property of the Jewish or Gentile inhabitants of Gadara does not appear from the sacred narrative; but that the practice of keeping swine did exist amongst some of the Jews seems clear from the enactment of the law of Hyrcanus, "ne cui porcum alio locito" (*Grotius, Annot. ad Matt*. l. c.). Allusion is made in 2 Pet. ii. 22 to the fondness which swine have for "wallowing in the mire," this, it appears, was a proverbial expression, with which may be compared the "amans intra usus" of Horace (*Ep. i. 2. 26). Solomon's comparison of a "jewel of gold in a swine's snout" to "a fair woman without discretion" (*Prov. xi. 22), and the expression of our Lord, "neither cast ye your pearls before swine," are so obviously intelligible as to render any remarks unnecessary. The transgres- sion of the destruction of the herd of swine already alluded to, like the burning of the barren fig-tree, has been the subject of most unfavourable opinion: it is well answered by Trench (Miracles, p. 173), who observes that "a man is of more value than many swine:" besides which it must be remembered that it is not necessary to suppose that our Lord

* So the name is given in the P. E. Trans. Calmet writes it "M. Saperitius."
Sword

A sword or scythe was used in ancient times for cutting and harvesting crops. The verb "sod" is used by Pliny, W., 1 to describe the use of a scythe. In later times, the scythe was replaced by the mulberry tree (Morus nigra) in Greece, which was used for the purpose of cutting and harvesting. The scythe was also used in Palestine and Syria, where it was known as the "sycamine" or "sycamore". The Hebrew word for the scythe, "sycamine", is mentioned in the O.T. only in the plural form, as in Ps. Ixxxviii. 47; and it is in the LXX. always translated by the Greek word "sycamine". The two Greek words occur only once each in the N. T., "sycamine" (Luke xvi. 6), and "sycamore" (Luke xix. 4). Although it may be admitted that the sycamine is properly, and in Luke xvi. 6, the mulberry, and the sycamine the fig-mulberry, or sycamore-fig (Ficus sycomorus), yet the latter is the tree generally referred to in the O. T., and called by the LXX. sycamine, as 1 K. x. 27; 1 Chr. xxviii. 28; Ps. Ixxxviii. 47; Am. vii. 14. Dioscorides expressly says "Syca'moporo, taino de eai toouto to sycamono kastroi", lib. i. cap. 180. Compare Gesenius, Thesaurus Heb. p. 1476 b; Winer, Rer. bib. ii. 65 b; Rossmüller, Alterthumskunde, B. iv. p. 281 f.; Celsius, Hierob. i. 310. The sycamine, or fig-mulberry (from συκών, fig., and μούρος, mulberry), is in Egypt and Palestine a tree of great importance and very extensive use. It attains a size of a walnut tree, has wide-spreading branches, and affords a delightful shade. On this account it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the under side, and fragrant. The fruit grows directly from the trunk itself on little spurs, and in clusters like the grape. To make it eatable, each fruit, three or four days before gathering, must, he said, be punctured with a sharp instrument or the finger nail. Comp. Theophrastus, De Cons. Plant. i. 17, § 9; Hist. Pl. iv. 2, § 1; Pliny, H. N. xiii. 7; Forskål, Desr. Plant. p. 182. This was the original employment of the prophet Amos, as he says, vii. 14. Hasselquist (Tract. p. 260; Lond. 1756) says, "The fruit of this tree tases a pretty well; when quite ripe it is soft, watery, somewhat sweet, with a very little portion of an aromatic taste." It appears, however, that a species of gall insect (Cynips sycomori) often spoils much of the fruit. "The tree," Hasselquist adds, "is wounded or cut by the inhabitants at the time it bears, without this precaution, as they say, it will not bear fruit" (p. 281). In form and smell and inward structure it resembles the fig, and hence its name. The tree is always verdant, and bears fruit several times in the year without being confined to fixed seasons, and is thus, as a permanent food-feeder, invaluable to the poor. The wood of the tree, though very porous, is exceedingly durable. It suffers neither from moisture nor heat. The

W. H.

SWORD. [Arms.] SYCAMINE TREE (sucúdamos: morus) is mentioned once only, namely, in Luke xvii. 6, "If ye had faith as a grain of mustard-seed, ye might say to this sycamine tree, Be thou plucked up," etc. There is no reason to doubt that the suúdamos is distinct from the sucúdamos of the same Evangelist (xix. 4) [SYCAMORE], although we learn from Dioscorides (i. 180) that this name was sometimes given to the suúdamos. The sycamine is the mulberry tree (Morus), as is evident from Dioscorides, Theophrastus (H. P. i. 6, § 1; 10, § 10; 13, § 4, &c.), and various other Greek writers; see Celsius, Hierob. i. 288. A form of the same word, suúdamos, is still one of the names for the mulberry tree in Greece (see Heidelberg's Naturphänomen-Grückschau, Athen. 1862, p. 19. "Morus alta L., and M. nigra L. ἡ Μορφή, Μουρφή, and Μουρφῶν, = pecking, more, — ed."). Both black and white mulberry trees are common in Syria and Palestine, and are largely cultivated there for the sake of supplying food to the cattle-lairs of the silk-worm, which are bred in great numbers. The mulberry tree is too well known to render further remarks necessary.

W. H.

SYCAMORE (περγάω, sikh'midh: συκα'mo's, συκοφαίρα, or συκοφαίρα, in the N. T.: sycamorus, morus, fœtunus). The Hebrew word occurs in the O. T. only in the plural form, and once len., Ps. lviii. 47; and it is in the LXX. always translated by the Greek word συκα'mo's. The two Greek words occur only once each in the N. T., συκα'mo's (Luke xvii. 6), and συκοφαίρα (Luke xix. 4). Although it may be admitted that the sycamine is properly, and in Luke xvi. 6, the mulberry, and the sycamine the fig-mulberry, or sycamore-fig (Ficus sycomorus), yet the latter is the tree generally referred to in the O. T., and called by the LXX. sycamine, as 1 K. x. 27; 1 Chr. xxviii. 28; Ps. lviii. 47; Am. vii. 14. Dioscorides expressly says συκα'mo's, taino de eai touto suúdamos kastroi, lib. i. cap. 180. Compare Gesenius, Thesaurus Heb. p. 1476 b; Winer, Rer. bib. ii. 65 b; Rossmüller, Alterthumskunde, B. iv. p. 281 f.; Celsius, Hierob. i. 310. The sycamine, or fig-mulberry (from συκών, fig., and μούρος, mulberry), is in Egypt and Palestine a tree of great importance and very extensive use. It attains a size of a walnut tree, has wide-spreading branches, and affords a delightful shade. On this account it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the under side, and fragrant. The fruit grows directly from the trunk itself on little spurs, and in clusters like the grape. To make it eatable, each fruit, three or four days before gathering, must, he said, be punctured with a sharp instrument or the finger nail. Comp. Theophrastus, De Cons. Plant. i. 17, § 9; Hist. Pl. iv. 2, § 1; Pliny, H. N. xiii. 7; Forskål, Desr. Plant. p. 182. This was the original employment of the prophet Amos, as he says, vii. 14. Hasselquist (Tract. p. 260; Lond. 1756) says, "The fruit of this tree tases a pretty well; when quite ripe it is soft, watery, somewhat sweet, with a very little portion of an aromatic taste." It appears, however, that a species of gall insect (Cynips sycomori) often spoils much of the fruit. "The tree," Hasselquist adds, "is wounded or cut by the inhabitants at the time it bears, without this precaution..." It does not bear fruit "(p. 281). In form and smell and inward structure it resembles the fig, and hence its name. The tree is always verdant, and bears fruit several times in the year without being confined to fixed seasons, and is thus, as a permanent food-feather, invaluable to the poor. The wood of the tree, though very porous, is exceedingly durable. It suffers neither from moisture nor heat. The

This writer supposes the sycamine and sycamore tree to be one and the same.

ii.

a The size of this tree made it a fitting emblem for the Saviour's use (Luke xvii. 6). "Its ample girth, its wide-spread arms branching off from the parent trunk only a few feet from the ground, its enormous roots, as thick as numerous, and as wide-spread into the deep soil below as the branches extend into the air above, made it the very best type of invincibly steadfastness" (Thomson, Land and Book, i. 24).
SYCHAR

Egyptian mummy coffins, which are made of it, are
still perfectly sound after an entombment of thou-
sands of years. It was much used for doors, and
large furniture, such as soles, tables, and chairs. So
great was the value of these trees, that David
appointed for them in his kingdom a special over-
seer, as he did for the olives (1 Chr. xxvii. 28); and
it is mentioned as one of the heaviest of Egypt’s
calmities, that her sycamores were destroyed by
hailstones (Ps. lxviii. 47). That which is called
sycamore in N. America, the *Oncidum* or
button-wood tree, has no resemblance whatever to
the sycamore of the Bible; the name is also applied
to a species of maple (the *Acer palmatum* or
False-plantain), which is much used by turners and
millwrights.\(^5\)

C. E. S.

SYCHAR (Σαχάρ) in N. A. C. D.; but Rec.
Text Σαχάρ with B: Sychar; but Codd. Am. and
Fuld. Sychar: Syrac, Soceor). A place named

only in John iv. 5. It is specified as a city of
Samaria, called Sychar, near the ground which
Jacob gave to Joseph his son; and there was the
well of Jacob.”

Jerome believed that the name was merely a
copticist’s error for Sychem; but the unanimity of
the MSS. is sufficient to dispose of this supposition.

Sychar was either a name applied to the town of
Shechem, or it was an independent place. The
first of these alternatives is now almost universally
accepted. In the words of Dr. Robinson (Bibl. Res.
ii. 219), “In consequence of the hatred which ex-
isted between the Jews and the Samaritans, and in
allusion to their idolatry, the town of Shechem re-
cieved, among the Jewish common people, the by-
name Sychar.” This theory may be correct, but
the only support which can be found for it is the
very imperfect one afforded by a passage in Isaiah
(xlviii. 1, 7), in which the prophet denounces the
Ephraimites as *shcecbirin* — “drunks!” and by
a passage in Habakkuk (ii. 18) in which the words
*mich shker.* C. a teacher of lies,” are supposed to
contain an allusion to Moreh, the original name of
the district of Shechem, and to the town itself.
But this is surely arguing in a circle. And had
such a nickname been applied to Shechem soologi-
cally as its occurrence in St. John would seem to
 imply, there would be some trace of it in those
passages of the Talmud which refer to the Samari-
tans, and in which every term of opprobrium and
ridicule that can be quoted or inferred is heaped
on them. It may be affirmed, however, with cer-
tainty that neither in Targum nor Edom is there
any mention of such a thing. Lightfoot did not
know of it. The numerous treatises on the Sa-
maritans are silent about it, and recent close search
has failed to discover it.

Presuming that Jacob’s well was then, where it is
now shown, at the entrance of the valley of
Nablus, Shechem would be too distant to answer
to the words of St. John, since it must have been
more than a mile off.

“A city of Samaria called Sychar, near to the
plot of ground which Jacob gave to Joseph” —
surely these are hardly the terms in which such a
place as Shechem would be described; for though it
was then perhaps at the lowest ebb of its fortunes,
then the nobility of places in Syria to name and
time is almost proverbial.

There is not much force in the argument that St.
Stephen uses the name Sychem in speaking of
Shechem, for he is recapitulating the ancient his-
tory, and the names of the Old Testament narrative
(in the LXX. form) would come most naturally to
his mouth. But the earliest Christian tradition, in
the persons of Eusebius and the Bordeau Pilgrim
— both in the early part of the 4th century —
discriminates Shechem from Sychar. Eusebius
(Chron. *Sachara* and *Laogala*) says that Sychar

\(5\) Trench states after Robinson (see *Bibl. Res.* ii.
200), that “There are no sycamores now in the Pain
of Jericho!” *Studies in the Gospel,* p. 291, Amer. ed.).

*Itinerarium Laurentii de Israele,* p. 509: says: “Here
(near Jericho) was a fine old sycamore fig-tree, perhaps
a linear descendant, and nearly the last, of that into
which Zaccheus climbed.” In his Nat. Hist. of the
*Bible,* p. 236, he says that this tree “is very easy to
climb by a short trunk, its side lateral branches
forking out in all directions; and would naturally
be selected by Zaccheus (Luke xix. 4) as the most accessible
position from which to obtain a
view of our Lord as he passed”
SYCHEM

was in front of the city of Neapolis; and, again, that it lay by the side of Lanza, which was about three miles from Neapolis. Sychem, on the other hand, he places in the suburbs of Neapolis by the tomb of Joseph. The Bordeaux Pilgrim describes Se-

chim as at the foot of the mountain, and as contain-
ing Joseph's monument and plot of ground (village). And he then proceeds to say that a thou-

sand paces thence was the place called Secher.

And I noted that there is a passage that has been said on the prediction of Oriental for the water of certain springs or wells (Porter, *Handbook*, p. 342), it does appear remarkable, when the very large number of sources in *NJobus* is considered, that a woman should have left them and come out a distance of more than a mile. On the other hand, we need not suppose that it was her habit to do so: it may have been a casual visit.

2. In favor of Sychar having been an independent place is the fact that a village named *Askor* (אָסְכּוּר) still exists at the southeast foot of Elah, about northeast of the Well of Jacob, and about half a mile from it. Whether this is the village alluded to by Eusebius, and Jerome, and the Bordeaux Pilgrim, it is impossible to tell. The earliest notice of it which the writer has been able to discover is in Quaresmius (†Euchelieus, ii. 808 h.). It is uncertain if he is speaking of himself or quoting Boccardus. If the latter, he had a different copy from that which is published. It is an im-
portant point, because there is a difference of more than four centuries between the two, Boccardus having written about 1280, and Quaresmius about 1690. The statement of the latter is, I think, the one to be preferred, especially in the national (villam). It is certain if he is speaking of himself or quoting Boccardus. If the latter, he had a different copy from that which is published. It is an im-
portant point, because there is a difference of more than four centuries between the two, Boccardus having written about 1280, and Quaresmius about 1690. The statement of the latter is, I think, the one to be preferred, especially in the early, 1275.
SUN which

SYNAGOGUE (Συναγωγή: Synagogue). It may be well to note at the outset the points of contact between the history and ritual of the synagogues of the Jews, and the facts to which the inquiries of the Biblical student are principally directed. (1) They met us as the great characteristic institution of the later phase of Judaism. More even than the Temple and its services, in the time of which the N. T. treats, they at once represented and determined the religious life of the people. (2) We cannot separate them from the most intimate connection with our Lord's life and ministry. In them He worshipped in His youth, and in His manhood. Whatever we can learn of the ritual which then prevailed tells us of a worship which He recognized and sanctioned; which for that reason, if for no other, though, like the stricter services of the Temple, it was destined to pass away, is worthy of our respect and honor. They were the scenes, too, of too small portion of his work. In them were wrought some of his mightiest works of healing (Mark i. 23; Matt. xii. 9: Luke xiii. 11). In them were spoken some of the most glorious of his recorded words (Luke iv. 16; John vi. 59); many more, beyond all reckoning, which are not recorded (Matt. iv. 23, xiii. 54; John xviii. 24, etc., etc.). (3) There are the questions, leading us back to a remoter past: in what did the worship of the synagogue originate? what type was it intended to reproduce? what customs, alike in nature, if not in name, served as the starting-point for it? (4.) The synagogue, with all that belonged to it, was connected with the future as well as with the past. It was the order with which the first Christians were conversant, the most familiar, from which they were most likely to take the outlines, or even the details, of the worship, organization, government of their own society. Widely divergent as the two words and the things they represented afterwards became, the Ecclesia had its starting-point in the Synagogue.

- Keeping these points in view, it remains to deal with the subject in a somewhat more formal manner.

I. None. (1.) The Aramaic equivalent אסנה first appears in the Targum of Onkelos as a substitute for the Hebrew בָּתָן (בָּתָן the congregation) in the Pentateuch (Leyser, ut [infra]). The more precise local designation, אֶשְׁנָה הָרְצִית (בָּתָה לְכָהנָשִׁית = House of gathering), belongs to a yet later date. This is, in itself, tolerably strong evidence that nothing precisely answering to the later synagogue was recognized before the Exile. If it had been, the name was quite as likely to have been perpetuated as the more familiar, yet it is the more likely to have arisen too readily into a fetish-religion, sacrifices to ephod and teraphim (Judg. viii. 27, xvii. 5) in groves and

SYNAGOGUE (Συναγωγή: Synagogue). It may be well to note at the outset the points of contact between the history and ritual of the synagogues of the Jews, and the facts to which the inquiries of the Biblical student are principally directed. (1) They met us as the great characteristic institution of the later phase of Judaism. More even than the Temple and its services, in the time of which the N. T. treats, they at once represented and determined the religious life of the people. (2) We cannot separate them from the most intimate connection with our Lord's life and ministry. In them He worshipped in His youth, and in His manhood. Whatever we can learn of the ritual which then prevailed tells us of a worship which He recognized and sanctioned; which for that reason, if for no other, though, like the stricter services of the Temple, it was destined to pass away, is worthy of our respect and honor. They were the scenes, too, of too small portion of his work. In them were wrought some of his mightiest works of healing (Mark i. 23; Matt. xii. 9: Luke xiii. 11). In them were spoken some of the most glorious of his recorded words (Luke iv. 16; John vi. 59); many more, beyond all reckoning, which are not recorded (Matt. iv. 23, xiii. 54; John xviii. 24, etc., etc.). (3) There are the questions, leading us back to a remoter past: in what did the worship of the synagogue originate? what type was it intended to reproduce? what customs, alike in nature, if not in name, served as the starting-point for it? (4.) The synagogue, with all that belonged to it, was connected with the future as well as with the past. It was the order with which the first Christians were conversant, the most familiar, from which they were most likely to take the outlines, or even the details, of the worship, organization, government of their own society. Widely divergent as the two words and the things they represented afterwards became, the Ecclesia had its starting-point in the Synagogue.

- Keeping these points in view, it remains to deal with the subject in a somewhat more formal manner.

I. None. (1.) The Aramaic equivalent אסנה first appears in the Targum of Onkelos as a substitute for the Hebrew בָּתָן (בָּתָן the congregation) in the Pentateuch (Leyser, ut [infra]). The more precise local designation, אֶשְׁנָה הָרְצִית (בָּתָה לְכָהנָשִׁית = House of gathering), belongs to a yet later date. This is, in itself, tolerably strong evidence that nothing precisely answering to the later synagogue was recognized before the Exile. If it had been, the name was quite as likely to have been perpetuated as the more familiar, yet it is the more likely to have arisen too readily into a fetish-religion, sacrifices to ephod and teraphim (Judg. viii. 27, xvii. 5) in groves and

become prominent in that of the Hellenists. It appears in the LXX. as the translation of not less than twenty-one Hebrew words in which the idea of a gathering is implied (Fromm. Concordant, s. v.). With most of these we have nothing to do. Two of them are more noticeable. It is used 130 times for παρενθήμου, where the prominent idea is that of an appointed meeting (Gesenius, s. v.), and 25 times for συνελήφθη, a meeting called together, and therefore more commonly translated in the LXX. by έκκλησία. In one memorable passage (Prov. v. 14), the two words, ἐκκλησία and συναγωγή, destined to have such divergent histories, to be representatives of such contrasting systems, appear in close juxtaposition. In the books of the Apocrypha the word, as in those of the O. T., retains its general meaning, and is not used specifically for any recognized place of worship. For this the received phrase seems to be τόπος προσευχῆς (1 Macc. iii. 46, iv. Macc. vii. 29). In the N. T., however, the local meaning is the dominant one. Sometimes the word is applied to the tribunal which was connected with the ancient synagogue in the meaning of a place of worship (Matt. x. 17, xviii. 34; Mark xiii. 9; Luke xii. 11). Within the limits of the Jewish Church it perhaps kept its ground as denoting the place of meeting of the Christian brethren (Acts ii. 2). It seems to have been claimed by some of the pseudo-Judaizing, half-fanatical sects of the Asiatic churches for their meetings (Rev. ii. 9). It was not altogether obsolete, as applied to Christian meetings, in the time of Ignatius (Ep. ad Trall. c. 5, ad Polyc. c. 3). Even in Clement of Alexandria the two words appear united as they had done in the LXX. (ἐκκλησίας καὶ συναγωγῆς, Strom. vi. p. 639). Afterwards, when the chasm between Judaism and Christianity became wider, Christian writers were fond of dwelling on the meanings of the two words which practically represented them, and showing how far the Synagogue was excelled by the Ecclesia (August. Enarr. in Ps. LXX.: Trench, Synagogas of N. T. 7. § i.). The cognate word, however, συναγωγής, was formed or adopted in its place, and applied to the highest act of worship and communion for which Christians met (Suicer, Thes. s. v.; Sophocles, tr. Luc. s. v.).

II. History. (1.) Jewish writers have claimed for their synagogues a very remote antiquity. In well-nigh every place where the phrase "before the Lord" appears, they recognize in it a known sanctuary, a fixed place of meeting, and therefore a synagogue (Vitringa, De Synagog. pp. 271 et seq.). The Targum of Onkelos finds in Jacob's "dwelling in tents" (Gen. xxv. 27) his attendance at a synagogue or house of prayer. That of Jonathan finds them in Judg. v. 9, and in "the calling of assemblies" of Is. i. 13 (Vitringa, pp. 271-315).

(2.) Apart from these far-fetched interpretations, we know too little of the life of Israel, both before and under the monarchy, to be able to say with certainty which of several places best correspond to the synagogues of later date. On the one hand, it is probable that if new moons and Sabbaths were observed at all, they must have been attended by some celebration apart from, as well as at, the Tabernacle or the Temple (1 Sam. xxv. 5; 2 K. iv. 25). On the other, so far as we find traces of such local worship, it seems to have taken too readily into a fetish-religion, sacrifices to ephod and teraphim (Judg. viii. 27, xvii. 5) in groves and
SYNAGOGUE

on high-places, offering nothing but a contrast to the "reasonable service." The prayers, psalms, instruction in the Law, of the later synagogue. The special mission of the Priests and Levites under Jehoshaphat (2 Chr. xviii. 7-9) shows that there was no regular provision for reading the book of the Law of the Lord "to the people, and makes it probable that even the rule which prescribed that it should be read once every seven years at the feast of Tabernacles had fallen into disuse (Dent. xxvi. 10). With the rise of the prophetic order we trace a more distinct though still a partial approximation. Wherever there was a company of such prophets there must have been a life analogous in many of its features to that of the latter Essenes and Therapeutæ, to that of the seven and monasteries of Christendom. In the abnormal state of the polity of Israel under Samuel, they appear to have aimed at purifying the worship of the high-places from idolatrous associations, and met on fixed days for sacrifice and psalmody (1 Sam. ix. 12; x. 5). The scene in 1 Sam. xix. 20-24 indicates the meetings were of the worshippers who might choose to come, as well as to of the sons of the prophets," the brothers of the order themselves. Later on in the time of Elisha the question of the Shunammite's husband (2 K. iv. 23), "Wherefore wilt thou go to him (the prophet) today? It is neither rain nor snow, nor had Sabbath," implies frequent periodical gatherings, instituted or perhaps regulated by Elijah and his successors as a means of sustaining the religious life of the northern kingdom, and counteracting the prevalent idolatry. The date of Ps. cxlv. is too uncertain for us to draw any inference as to the nature of the "synagogues of God" (םַעֲגוֹנָתָיו), meeting-places of God), which the invaders are represented as destroying (v. 8). It may have beclouded to the time of the Assyrian or Chaldean invasion (Vitr. Synagog. pp. 396-405). It has been referred to that of the Macabeæ (De Wette, Paulus, in loc.), or to an intermediate period when Jerusalem was taken and the land inhabited by the army of Hagesand, under Artaxersæus H. (Eckh. Pont. Ech. ii. 338). The "assembly of the elders," in Ps. cxvi. 32, leaves us in like uncertainty.

(3.) During the exile, in the abeyance of the Temple-worship, the meetings of devout Jews probably became more systematic (Vitr. De Synagog. pp. 414-429; Jos. Jochatham, i. 163; Barnittus, De Synagog. in Urtvill, Thes. ii.), and must have helped forward the change which appears so conspicuously at the time of the Return. The repeated mention of gatherings of the elders of Israel, sitting before the prophet Ezekiel, and hearing his word (1 Ez. vii. 1. xiv. 1. xx. 1. xxxii. 31), implies the transfer to the land of the captivity of the custom that had originated in the schools of the prophets. One remarkable passage may possibly contain a more distinct reference to them. Those who still remained in Jerusalem taunted the prophet and his companions with their exile, as outliers from the blessings of the sanctuary. "Get ye far from the Lord; unto us is this land given is a possession." The prophet's answer is, that it was not so. Jehovah was as truly with them in their "little sanctuary" as He had been in the Temple at Jerusalem. His presence, not the outward glory, was itself the sanctuary (Ez. vi. 15-16)." The whole history of Ezra presupposes the habit of sedentary, probably of periodic meetings (Ezr. viii. 15; Neh. vii. 2. ix. 1; Zech. vii. 5). To that period accordingly we may attribute the revival, if not the institution of synagogues. The "ancient days" of which St. James speaks (Acts xxvi. 21) may, at least, go back so far. Assuming Ewald's theory as to the date and occasion of Ps. cxlv., there must, at some subsequent period, have been a great destruction of the buildings, and a consequent suspension of the services. It is, at any rate, striking that they are not in any way prominent in the Macabæan history, either as objects of attack, or rallying points of defense, unless we are to see in the gathering of the persecuted Jews at Maspha (Micha) as at a "place where they prayed aforetime in Israel (1 Macc. iii. 40), not occupied by the presence of its old god, and then the only place, but the continuance of a more recent custom. When that struggle was over, there appears to have been a freer development of what may be called the synagogue parochial system among the Jews of Palestine and other countries. The influence of John Hyrcanus, the growing power of the Pharisees, the authority of the Scribes, the example, and probably, of the Jews of the "dispersion" (Vitr. p. 426), would all tend in the same direction. Well-nigh every town or village had one or more synagogues. Where the Jews were not in sufficient numbers to be able to erect and fill a building, there was the ποιεῖν εἰς τὰς πΡοφητές, or place of prayer, sometimes open, sometimes covered in, commonly by a running stream or on the sea-shore, in which devout Jews and proselytes met to worship, and, perhaps, to read (Acts xvi. 13; Jos. Ant. xiv. 10, 25; Jud. Tut. iii. 286). Sometimes the term ποιεῖν εἰς τὰς πΡοφητές was applied even to an actual synagogue (Jos. Tiber. c. 54).

(4.) It is hardly possible to overestimate the influence of the system thus developed. To it we may ascribe the tenacity with which, after the Macabæan struggle, the Jews adhered to the religion of their fathers, and never again relapsed into idolatry. The people were now in no danger of forgetting the Law, and the external ordinances that hedged it round. If pilgrimages were still made to Jerusalem at the great feasts, the habitual religion of the Jews in, and yet more out of Palestine, was connected much more intimately with the synagogue than with the Temple. Its simple, edifying devotion, in which mind and heart could alike enter, attracted the heathen proselytes who might have been repelled by the bloody sacrifices of the Temple, or would certainly have been driven from it unless they could make up their minds to submit to circumcision (Acts xxvi. 28; comp.

The language of the later Jews applied the term "sanctuary" to the ark-end of the synagogue (infra). We must observe, perhaps, that this word, like its synonyms, frequently, like the "serai fonts nemen" of Jer. Tut. iii. 13, the reappearance, freed from its old abominations, of the attachment of the Jews to the worship of the groves, of the charm which led them to bow down under "every green tree" (Jer. i. 29)."
The practice of a fixed Kibbêl (as direction) in prayer was clearly very ancient, and commenced itself to some special features of the eastern character. Ps. xxxviii., ascribed to David, we have probably the earliest trace of it (De Wette, in loc.). It is recognized in the dedication prayer of Solomon (1 K viii. 29, et al.). It appears as a fixed rule in the devotions of Daniel (Dan. vii. 9). It was adopted afterwards by Mohammad, and the point of the Kibbêl, after some lingering reverence to the Holy City, transferred from Jerusalem to the Kaabah of Mecca. The early Christians, in their own customs, not indicating a like feeling, and probably originating in the adoption by the churches of Europe and Africa of the structure of the synagogue. The position of the altar in these churches rested on a like analogy. The primitive Christian witness of the Old Testament New Covenant, took the place of the Ark which contained the Law that was the groundwork of the Old.

a The practice of a fixed Kibbêl (as direction) in prayer was clearly very ancient, and commenced itself to some special features of the eastern character. Ps. xxxviii., ascribed to David, we have probably the earliest trace of it (De Wette, in loc.). It is recognized in the dedication prayer of Solomon (1 K viii. 29, et al.). It appears as a fixed rule in the devotions of Daniel (Dan. vii. 9). It was adopted afterwards by Mohammad, and the point of the Kibbêl, after some lingering reverence to the Holy City, transferred from Jerusalem to the Kaabah of Mecca. The early Christians, in their own customs, not indicating a like feeling, and probably originating in the adoption by the churches of Europe and Africa of the structure of the synagogue. The position of the altar in these churches rested on a like analogy. The primitive Christian witness of the Old Testament New Covenant, took the place of the Ark which contained the Law that was the groundwork of the Old.

b Here also the customs of the Eastern Church, the violet silver lamps hanging before the shrines and holy places, bring the old practice vividly before our eyes.

c The custom, it may be noticed, connects itself with the memorable history of those who "brought young children" to Jesus that He should bless them (Mark vii. 16). For this see Ex. x. 11 ff.

d If this practice existed as is probable, in the first century, it throws light upon the special stress laid by St Paul on the collection for the "poor saints" in Jerusalem (1 Cor. xvi. 2). The Christian Churches were not to be behind the Jewish Synagogues in their contributions to the Palestine Relief Fund.

* For reminiscences of ancient synagogues in Galilee, see also on Jewish Synagogue, by W. W. Willson (Quarterly Statement of the Palestine Exploration Fund, No. ii. 1884).
SYNAGOGUE

often but one Rabbi (Vitringa, p. 549). Where a
fuller organization was possible, there was a college
of Elders (ἐπιστάται, Luke vii. 3) pre-

sided over by one who was κατ᾽ ἐπίσκοπον, δὲ ἄρχων
sacerdotes (Luke xii. 14; Acts xviii. 26). To these elders belonged a variety of
synagogues, each with a special significance. They
were ἔρημοι (Parasites = οἰκομένες, Eph. iv. 11), watching over their flock, πρώτοι, ἔρημοι,
placing it over (1 Tim. v. 17; Heb. xiii. 7). With the head, they formed a kind of Chap-
tor, managed the affairs of the synagogue, possessed the power of excommunicating (Vitringa, pp. 549—
621, 727).

(2.) The most prominent functionary in a large
synagogue was known as the סנהדרין (Skoliarch = legatus), the officiating minister who acted as the
delate of the congregation, and was therefore the
chief reader of prayers, etc. in their name. The
conditions laid down for this office remind us of St.
Paul’s rule for the choice of a bishop. He was to be
active, of full age, the father of a family, not rich or eorren with the leperies possessing a good voice,
and to reach τραχύς (1 Tim. iii. 1-7; Tit. i. 6-9). In
him we find, as the name might lead us to expect, the prototype of the ἕγερες ἔρημοι (Rev. i.
20), ii. 1, ἐκ (Vitringa, p. 934).

(3.) The CHAZAN (חזנים), or ἐπιφάνεια of the
synagogue (Luke iv. 29) had duties of a lower kind
resembling those of the Christian deacon, or sub-
decan. He was to open the doors, to get the
building ready for service. For him too were there
conditions like those for the legatus. Like the legatus and the elders, he was appointed by the im-
position of hands (Vitringa, p. 896). Practically he
often acted during the week as school-master of
the town or village, and in this way came to gain
a prominence which placed him nearly on the same
level as the legatus.α

(4.) Besides these there were ten men attached
every synagogue, whose functions have been the
subject-matter of voluminous controversy.β They
were known as the Bahaim (באהים = θυσίαι), and
no synagogue was complete without them. They
were to be men of leisure, not obliged to la-
brary for their livelihood, able therefore to attend the
weekly-day as well as the Sabbath services. By some
(Lichte, Huc. Hdb. in Matt. iv. 21; and, in part,
Vitringa, p. 532) they have been identified with
the above officials, with the addition of the alms-
collectors.γ Ephrussi, however (Ugolini, Thes. vol.

α With the account here given of the functions of the Skoliarch or legatus, and of the Chazan, should be compared the more detailed statements of Dr. Gins-
bury in his valuable and elaborate art. Synagogue, in the 3d ed. of Kitto’s Cyclo. of Bibl. Lit. He makes the
office of the Chazan in the time of Christ, and for se-
veral centuries later, more like that of the sexton or bo-
ibel in our churches, than that of deacon, and de-
nies that either he or the legatus was appointed by the
imposition of hands. The function of the legatus, he
says, "was not permanently vested in any individ-
ual ordained for this purpose, but was alternately con-
firmed upon any lay member who was supposed to
possess the qualifications necessary for offering up
prayer in the name of the congregation."

β The two prelates De decem Ommone, by Ephrussi and
Vitringa in Ugolini’s Thesaurum, vol. xxii., occupy
more than 700folio pages. The present writer has

not read them through. Is there any one living who has?

c) Lightfoot’s classification is as follows. The Ten
consisted of three Judges, the Legatus, whom this
writer identifies with the Chazan, three Parasites, which
he identifies with ains-electors and compares to the
decans of the church, the Archipresbyter, or inter-

tor, the schoolmaster and his assistant. The whole
is, however, very conjectural.

δ This was based on a fantastic inference from Num
xix. 27. "The ten unfaithful spies were spoken of as
an evil congregation." Synod. iv. 6, in Lightfoot,
loc. c.

ε Dr. Ginsburg, art. Synagogue in the 3d ed. of
Kitto’s Cyclop. of Bibl. Lit., iii. 567, note, denies that
the Jewish priests could "curse against Christians
under the name of Epicureans." His account of the
Jewish liturgy is very full and interesting. A.
SYNAGOGUE

enough, in this place, to notice in what way the ritual, no less than the organization, was connected with the facts of the N. T. history, and with the life and order of the Christian Church. Here too we meet with multiplied coincidences. It would hardly be an exaggeration to say that the worship of the Church was identical with that of the Synagogue, modified (1) by the new truths, (2) in the new institution of the Sower of the Lord, (3) by the spiritual Charismata.

(2) From the synagogue came the use of fixed forms of prayer. To that the first disciples had been accustomed from their youth. They had asked their Master to give them a distinctive one, and He had complied with their request (Luke xi. 1), as the Baptist had done before for his disciples, as every Rabbi did for his. The forms might be and were abused. The Pharisee might in synagogues, or, when the synagogues were closed, in the open street, recite aloud the devotions appointed for hours of prayer, might gallop through the Shema ("Hear O Israel, etc.", from Deut. vi. 4), his Koublish, his Shemoni Anvei, the eighteen Benedictions of Judaism, with whom the same repetition which had reappeared in Christian worship. But for the disciples this was, as yet, the true pattern of devotion, and their Master sanctioned it. To their minds there would seem nothing inconsistent with true heart worship in the recurrence of a fixed order (aaron tasmos, 1 Cor. xiv. 40), of the same prayers, hymns, doxologies, such as all liturgical study leads us to think of as existing in the Apostolic Age. If the gifts of utterance which characterized the first period of that age led for a time to greater freedom, to unprescribed prayer, if that was in its turn succeeded by the renewed predominance of a formal fixed order, the alternation and the struggle which have reappeared in so many periods of the history of the Church were not without their parallel in that of Judaism. There was also a protest against the rigidity of an unyielding form. Eliezer of Lydda, a contemporary of the second Gamaliel (c. A. D. 80-115), taught that the legions of the Synagogue should discard even the Shemoni Anvei, the eighteen fixed prayers and benedictions of the daily and Sabbath services, and should pray as his heart prompted him. The offense against the formalism of Judaism still remained, as it were, and too great to be forgiven. He was excommunicated (not, indeed, avowedly on this ground,) and died at Caesarea (Josch. Jud. 20, 34, 45).

(3) The large admixture of a didactic element in Christian worship, that by which it was distinguished from all Gentile forms of adoration, was derived from the older order. "Moses was " (Acts xx. 21), the whole Law being read consecutively, so as to be completed, according to one cycle, in three years, according to that which ultimately prevailed and determined the existing divisions of the Hebrew text (Bible, and Lexyer, l. c.), in the 52 weeks of a single year. The writings of the Prophets were read as second lessons in a corresponding order. The Sermon was followed by the Deut., the Leviticus and Numbers (Acts xiii. 15), the exposition, the sermon of the synagogue. The first Christian synagogues, we must believe, followed this order with but little deviation. It remained for them before long to add "the other Scriptures" which they had learned to recognize as more precious even than the Law itself, the "prophetic word of the New Testament, which not less truly than that of the Old, came, in epistle or in narrative, from the same Spirit [Scripture]." The synagogue use of Psalms again, on the plan of selecting those which had a special fitness for special times, answered to that which appears to have prevailed in the Church of the first three centuries, and for which the simple consecutive repetition of the whole Psalter, in a day as in some Eastern monasteries, in a week as in the Latin Church, in a month as in the English Prayer-book, is, perhaps, a less satisfactory substitute.

(4.) To the ritual of the synagogue we may probably trace a practice which has sometimes been a stumbling-block to the student of Christian antiquity, the subject-matter of fierce debate among Christian controversialists. Whatever account may be given of it, it is certain that Prayers for the Dead appear in the Church's worship as soon as we have any trace of it after the immediate records of the Apostolic age. It had been described by a writer, whom no one can suspect of Roshani tendencies, as an "immunorial practice." Though "Silence is golden, yet antiquity plainly speaks," and the prayers which "have slumbered a place in every early liturgy, the world over." (Ellicott, "The Early Christian Creeds," vii. 37). How, indeed, may we ask, could it have been otherwise? The strong feeling shown in the time of the Maccabees, that it was not "superfluous and vain" to pray for the dead (2 Macc. xii. 44), was sure, under the influence of the dominant Pharisaic Scribles, to show itself in the devotions of the synagogue. So far as we trace back these devotions, we may probably say that silence also the practice is "immunorial," as old at least as the traditions of the Rabbinic fathers (Buxtorf, De Synagog. pp. 709, 710; McCaul. Old Psalms, ch. xxxviii.). There is a probability indefinitely great that prayers for the departed (the Koublish of later Judaism) were familiar to the synagogues of Palestine and other countries, that the early Christian believers were not startled by them as an innovation, that they passed uncondemned even by our Lord himself. The writer already quoted sees a probable reference to them in 2 Tim. i. 18 (Ellicott, Post. Epistles, in loc.). St. Paul remembering Onesiphorus as one whose "house" had been bereaved of him, prays that he may find mercy of the Lord Jesus on the day of redemption. How the prayer in its simplest form can fairly, therefore, be looked upon as anti-Scrip,

however. If the English Church has wisely and rightly eliminated them from her services, it is not because Scripture says nothing of them, or that their antiquity is not primitive, but because, in such a matter, experience is a truer guide than the silence of the books of Scripture, or than the voice of the most profound

(5.) The conformity extends also to the times of prayer. In the hours of service this was obviously the case. The third, sixth, and ninth hours were, in the times of the N. T. (Acts iii. 1, x. 3, 9), and had been, probably, for some time before (Ps. iv. 17; Dan. vi. 10), the fixed times of devotion, known then, and still known, respectively as the Sinchdithis, the Mincha, and the 'Arriba; they had not only the prestige of an authoritative tradition, but were connected respectively with the names of Abraham, Isaac, and Jacob, to whom, as to the first originators, their institution was ascribed (Buxtorf, Synag. p. 280). The same hours, it is well known, were recognized in the Church of the second, probably in that of the first century also (Chrys. Al. Strom. l. c.; Tertull. De Oeit. c. xxv.).
SYNAGOGUE

The sacred days belonging to the two systems seem, at first, to present a contrast rather than a resemblance; but here, too, there is a symmetry which points to an original connection. The solemn days of the synagogue were the second, the fifth, and the seventh, the last or Sabbath being the conclusion of the whole. In whatever way the change was brought about, the transfer of the sanctity of the Sabbath to the Lord's Day involved a corresponding change in the order of the week; and the first, the fourth, and the sixth became to the Christian society what the other days had been to the Jews.

(6.) The following suggestion as to the mode in which this transfer was effected, involves, it is believed, fewer arbitrary assumptions than any other [comp. LORD'S DAY, SABBATH], and connects itself with another interesting custom, common to the Church and the Synagogue. It was a Jewish custom to end the Sabbath with a feast, in which they did honor to it as to a parting king. The feast was held in the synagogue. A cup of wine, over which a special blessing had been spoken, was handed round (Last, Gracch. Judith, i. 180). It is obvious that, so long as the Apostles and their followers continued to use the Jewish mode of reckoning, so long, i.e. as they fractionalized with their brethren of the stock of Abraham, this would coincide in point of time with their διήκονον on the first day of the week. A supper on what we should call Sunday evening would have been to them on the second. By degrees, as has been shown elsewhere [LORD'S SUPPER], the time became later, passed on to midnight, to the early dawn of the next day. So the Lord's Supper ceased to be a supper really. So, as the Church rose out of Judaism, the supper gave its holiness to the coming, instead of deriving it from the departing day. The day came to be apocalypsic, because it began with the διήκονον συναγωγή. Gradually the Sabbath ceased as such to be observed at all. The practice of observing both, as in the Church of Rome up to the 11th century, gives us a trace of the transition period.

(7.) From the synagogue lastly came many less conspicuous practices, which meet us in the liturgical life of the first three centuries. Abduction, entire or partial, before entering the place of meeting (Tertull. De Ord. cap. xi.); standing and not kneeling, as the attitude of prayer (Luke xviii. 11; Tertull. ibid. cap. xix.); the arms stretched out (Tertull. ibid. cap. xix.); the face turned toward the Kibbeh of the East (Lem. Al. Strom. l. c.); the responsive Amen of the congregation to the prayers and benedictions of the elders (1 Cor. xiv. 16). In one strange exceptional custom of the Church of Alexandria we trace the wilder type of Jewish, of oriental devotion. There, in the closing responsive choras of the prayer, the worshippers not only stretched out their necks and lifted up their heads, but leapt up with wild gestures (τοις τε πόδας σπειράμενας), as if they would thus rise with their prayers to heaven itself (Chren. Al. Strom. vii. 40). This, too, reproduced a custom of the synagogue. Three times did the whole body of worshippers leap up simultaneous as they repeated the great Ter-sacred hymn of Isaiah vi. (Vitriola, p. 1100 ff.; Butzler, cap. x.).

VI. Judicial Functions.—(1.) The language of the N. T. shows that the officers of the synagogue, exercised in certain cases a judicial power. The function of the synagogue was the place of trial (Luke xii. 11, xii. 12); even, strange as it may seem, of the actual punishment of scourging (Matt. x. 17: Mark xiii. 9). They do not appear to have had the right of inflicting any severer penalty, unless, under this head, we may include that of excommunication, or "putting a man out of the synagogue." (John xii. 42, xvi. 2); placing him under an anathema (1 Cor. xvi. 22; Gal. i. 8, 9), "delivering him to Satan." (1 Cor. v. 5; 1 Tim. i. 20). (Meyer and Stanley, in loc.) In some cases they exercised the right, even outside the limits of Palestine, of seizing the persons of the accused, and sending them in chains to take their trial before the Supreme Council at Jerusalem (Acts iv. 2. xiii. 5).

(2.) It is not quite so easy, however, to define the nature of the tribunal, and the precise limits of its jurisdiction. In two of the passages referred to (Matt. x. 17; Mark x. 9) they are carefully distinguished from the συνεφεδρόν, or councils, yet both appear as instruments by which the spirit of religious persecution might fasten on its victims. The explanation commonly given that the council sat in the synagogue, and thus identified with it, is hardly satisfactory (Lever, in Herzog's Real-Encyk. s.v. CONCILIUM). It seems more probable that the council was the larger tribunal of 25, which sat in every city (GROTIUS), identical with that of the seven, with two Levites as assessors to each, which Josephus describes as acting in the smaller provincial towns (Ant. iv. 8, § 14; B. J. ii. 20, § 5); and that under the term synagogue we are to understand a smaller court, probably that of the Ten judges mentioned in the Talmud (Gem. Hieros. Sanhedr. l. c.); consisting either of the elders, the chazan, and the legatus, or otherwise (as Herzfeld conjectures, i. 329) of the ten Banim, or Olotos (see above, IV. 4).

(3.) Here also we trace the outline of a Christian institution. The εκκλησία, either by itself or by appointed delegates, was to act as a Court of Arbitration in all disputes among its members. The elders of the Church were not, however, to descend to the trivial disputes of daily life (a. βασιλικά). For these any one of the public synagogues was the place of judgment. The military and political power, however destitute of official honor and position (οἱ ευθερμοφόροι) would be enough (1 Cor. vi. 1-8).

* * *

a It has always to be borne in mind that the word was obviously coined for the purposes of Christian life, and is applied in the first instance to the supper (1 Cor. xii. 20), afterwards to the day (Rev. i. 10).

b One point of contrast is as striking as these points of resemblance. The Jew prayed with his head covered, with the Θείον drawn over his ears and reaching to the shoulders. The Greek, however, habitually worshipped as in other acts, wore barehead; and the Apostle of the Gentile churches, renouncing all such prejudices, recognizes this as more fitting, more natural, more in harmony with the right relation of the sexes (1 Cor. xi. 4).

c The same curious practice existed in the 17th century, and is perhaps not yet extinct in the Church of Thailand, in this, as in other things, preserving more than any other Christian society, the type of Judaism (Ludolf, Hist. Ethip. iii. 6; Stanley, Eastern Church, p. 12).

d The identification of these two is due to an im-

cenous conjecture by Grotius (on Matt. x. 21). The addition of two scribes or secretaries makes the num-

ber in both cases equal.
SYNAGOGUE, THE GREAT

SYNAGOGUE, THE GREAT

For the elders, as for those of the synagogue, was reserved the graver offenses against religion and morals. In such cases they had power to excommunicate, to "put out of" the Ecclesia, which had taken the place of the synagogue, sometimes by their own authority, sometimes with the consent of the under-priests (Acts x. 4). It is true that it has been maintained that the pronouncement that Hammond and other commentators have seen a reference to these judicial functions in James ii. 2-4. The special sin of those who prevailed upon the rich was, on this view, that they were "judges of evil thoughts," carrying respect of persons into their administration of justice. The interpretation, however, though ingenious, is hardly sufficiently supported.

* Synagogues as related to the Spread of Christianity.—That the first preachers of the gospel made much use of the synagogues in spreading the new faith is evident from many passages in the book of Acts. Thus Paul in Damascus (ix. 20), immediately after his conversion, "preached Christ in the synagogues, that he is the Son of God." So Paul and Barnabas at Salamis in Cyprus (xiii. 5), "preached the word of God in the synagogues of the Jews;" and again at Antioch in Pisidia (xiii. 14-16), and yet again at Iconium (xiv. 1). When Paul and Silas had come to Amphipolis (xvii. 1, 2), "where was a synagogue of the Jews," it is stated that "Paul, ask[ing] was, went in unto them, and three sabbath-days reasoned with them out of the Scriptures." Coming thence to Berea (xvii. 10), they "went into the synagogue of the Jews." At Athens (xviii. 16, 17), while Paul was waiting for his companions, "he disputed in the synagogue with the Jews, and with the devout" (Greeks). At Corinth (xviii. 4), "he reasoned in the synagogue every sabbath, and persuaded the Jews and the Greeks." At Ephesus (xviii. 19) "he himself entered into the synagogue, and reasoned with the Jews." In like manner, Apollos at Ephesus (xviii. 24) "began to speak boldly in the synagogue;" and when, in Achaia (xviii. 28), "he mightily convinced the Jews, and that publicly, showing by the Scriptures that Jesus was Christ," it was, doubtless, in the synagogues that he did so. That this use of the place was sometimes long continued is seen in the statement of xiv. 8, that in Ephesus Paul "went into the synagogue, and spake thither for the space of three months, disputing and persuading the things concerning the kingdom of God." These passages are more than sufficient to show that in the early diffusion of Christianity the synagogues bore a very important part. To its first preachers they afforded a pulpit and an audience, a place where they could set forth their new doctrine, and an assembly prepared to hear it. In the free and pliable order of the synagogue service, an opportunity of Scripture-reading, exposition, or exhortation seems to have been offered to any who wished it. Of such opportunities our Lord had much habitual use (Matt. iv. 23, xiii. 54; Mark i. 21; John vi. 53; John vi. 53), that he "ever taught in the synagogues." John xviii. 20. In Luke iv. 16, it is said of Jesus at Nazareth, that "he durst hardly be, he went into the synagogue on the sabbath-day, and stood up to read;" and after the reading began an address to the people. When Paul and Barnabas were at Antioch in Pisidia (Acts xiii. 15), it is stated that, "after the reading of the law and the prophets, the word of the synagogue sent unto Paul; saying, Ye men of Israel, and Gentiles, if ye have any word of exhortation for the people, say on." The opposition of the Jews to Christianity was not for some time so developed that its apostles were excluded from this privilege of the synagogue. In every Jewish community (and one was found in almost every city of the civilized world) there were persons ready to hear and receive a faith which offered itself as the revelation of God to the Jewish religion and scriptures. But the synagogues brought together many gentiles, who had either become members of the Jewish body by circumcision, or had adopted the belief and worship of the Jews without submitting to the ritual law (Pseudolettes). The latter class were, doubtless, more open than the Jews themselves to the truths and aims of Christianity.

It was under the influences of the synagon that the Greek language assumed the peculiar character which fitted it to be the vehicle for Christian teaching. That process of translating Jewish ideas into Greek words, which we see first in the Septuagint, must have gone on wherever Jewish worship was conducted in the Greek language: that is, in most synagogues out of Palestine, and, to some extent certainly, in those of Palestine itself. [LANGUAGE OF THE NEW TESTAMENT.] Hence arose the idiom of the New Testament writers, colored by Semitic forms of speech, and thoroughly imprest with the religious conceptions common to both the Old and New Testaments. The possession of such an idiom, fully developed and widely understood, was an advantage to the first preachers of Christianity. Many new words must be formed, many old words taken in new connections and senses, before the language of Xenophon could express the doctrine of Christ. But changes like these require time for their accomplishment: if it had been left for the apostles to make and introduce them, the spread of the new religion must have been seriously retarded. It is not easy to overestimate the value of these preparations and opportunities for the preaching of the gospel. Unquestionably, they had much to do with its immediate and rapid progress. The New Testament accounts of this progress will not seem incredible to any one who duly appreciates these favorable influences. Among the causes which by divine arrangement paved the way for the spread of Christianity, we may claim as high a place for the general diffusion of the Jewish synagogues, as for the universal diffusion of the Greek language, or the uniting conquests of the Roman Empire.

J. H.

SYNAGOGUE, THE GREAT

The institution thus described, though not Biblical in the sense of occurring as a word in the Canonical Scriptures, is yet too closely connected with a large number of Biblical facts and names to be passed over. In the absence of direct historical data, it will be best to put together the traditions or conjectures of Rabbinic writers.

(1.) On the return of the Jews from Babylon, a great council was appointed, according to these traditions, to reorganize the religious life of the people. It consisted of 120 members (Megilloth, 17 b, 18 c), and these were known as the men of the Great Synagogue, the successors of the prophets, themselves, in their turn, succeeded by scribes prominent, individually, as teachers (Pirk. Aboth, i. 1). Ezra was recognized as president. Among the other members, in part together, in part successively, were Joshua, the high-priest, Zerubbabel,
SYNTYCHE

and their companions, Daniel and the three children, unto the prophets Haggai, Zechariah, Malachi, the rulers Nehemiah and Mordecai. Their aim was to restore again the "crown or glory of Israel, L. c. by the means of the former, viz. by the Great, Mighty, Terrible (Deut. vii. 17: Neh. i. 5, ix. 22: Jer. xxxii. 18: Dan. ix. 4). To this end they collected all the sacred writings of former ages and their own, and so completed the canon of the OT. Their work included the revision of the text, and this was settled by the introduction of the vocal points, which have been handed down to us by the Masoretes and Rabbinics. They instituted the feast of Purim. They organized the ritual of the synagogue, and gave their sanction to the "Sheninich Eshch, the eighteen solemn benedictions in it (Ewald, Gesch. iv. 197). Their decrees were quoted afterwards as those of the elders (the μετσωρετικον of Mark viii. 3, the ἀρχιδοξα of Matt. vi. 21, 27, 33), the "Biblei Niphrēth (περὶ φρόνεις) which were of more authority than the Law itself. They left behind them the characteristic saving, handed down by Simon the high-priest, the last member of the order, "Be cautious in judging; trust up many scholars; set a hedge about the Law" ("Pike Abodath, i. 1. [Scheers]."

(2) Much of this is evidently uncertain. The absence of any historical mention of such a body, not only of the OT, and the Apocrypha, but in Josephus, Philo, and the Septuagint, so that the earliest record of it is found in the "Pike Abode, the second century after Christ, had led some critics (e. g. De Wette, J. D. Michaelis) to reject the whole statement as a Rabbinic invention, resting on no other foundation than the existence, after the exile, of a Sanhedrim of 71 or 72 members, charged with supreme executive functions. Ewald (Gesch. iv. iv. 192) is disposed to adopt this view, and looks on the number 120 as a later element, introduced for its symbolic significance. Jost (Gesch. des Judenth. l. 41) maintains that the Greek origin of the word Sanhedrim points to its later date, and that its functions were predominantly judicial, while those of the so-called Great Synagogue were prominently legislative. He recognizes, on the other hand, the probability that 120 was used as a round number, never actually made up, and thinks that the term of the institution is to be found in the 85 names of those who are recorded as having joined in the solemn league and covenant of Neh. x. 1-27. The narrative of Neh. viii. 13 clearly implies the existence of a body of men acting as counsellors under the presidency of Ezra, and these may have been (as Jost, following the idea of another Jewish critic, suggests) an assembly of delegates from all provincial synagogues—a synod (to use the terminology of a later time) of the National Church. The "Pike Abodath, it should be mentioned, speaks of the Great Synagogue as ceasing to exist before the historical origin of the Sanhedrim (x. 1), and it is more probable that the latter rose out of an attempt to reproduce the former than that the former was only the mythical transfer of the latter to an earlier time. (Comp. Leverer, s. v. Synagoge, die grosse, in Herzog’s Enzyklop.)

E. H. P.

SYNTYCHE (Συντύχη [accident, event]; Synytche), a female member of the Church of Philippi, mentioned (Phil. iv. 2, 3) along with another named Ecmas or rather Ecmasia. To what has been said under the latter head the following may be added. The Apostle’s injunction to these two women is, that they should live in harmony with one another: from which we infer that they had, more or less, failed in this respect. Such harmony was doubly important, if they held an office, as deaconesses, in the church: and it is highly probable that this was the case. They had afforded to St. Paul active cooperation under difficult circumstances (καὶ τῷ ἐν συνέχειᾳ συνέθεσαν μοι, ver. 2), and perhaps there were at Philippi other women of the same class (μαζίς, υπόθηκα). At all events this passage is an illustration of what the Gospel did for women, and women for the Gospel, in the Apostolic times. It is the more interesting, as having reference to that church which was the first founded by St. Paul in Europe, and the first member of which was Lydia. Some thoughts on this subject will be found in Ehilliet, Commen sur l’Epître aux Philippiens, pp. 311-314. J. S. H.

SYRACUSE (Σύρακουσα ανατολικα: Συρακούσα). The celebrated city on the eastern coast of Sicily. St. Paul arrived thither in an Alexandrian ship from Malta, on his voyage to Rome (Acts xxviii. 12). The narrative of the voyage of this vessel describes as still remaining in his time, was then no doubt greatly improved. The whole of the resources of Sicily had been exhausted in the civil wars of Caesar and Pompey, and the piratical warfare which Sextus Pompeius, the youngest son of the latter, subsequently carried on against the triumvirs Octavius, Augustus restored Syracuse, as also Catana and Centurias, which last had contributed much to the successful issue of his struggle with Sextus Pompeius. Yet the island Ostryan, and a very small portion of the mainland adjoining, sufficed for the new colonists and the remnant of the former population. But the site of Syracuse rendered it a convenient place for the African corn-ships to touch at, for the harbor was an excellent one, and the fountain Arethusa in the island furnished an unfailing supply of excellent water. The prevalent wind in this part of the Mediterranean is the W. N. W. This wind would carry the vessels from the corn region lying eastward of Cape Bon, round the southern point of Sicily, Cape Pachynus, to the eastern shore of the island. Creeping up under the shelter of this, they would be either in the harbor of Messana, or at Rhegion. Having changed to the west point and enabled them to fetch the Campanian harbors, Puteoli or Gaeta, or to proceed as far as Ostia. In crossing from Africa to Sicily, if the wind was excessive, or varied two or three points to the northwest, they would naturally bear up for Malta,—and this had probably been the case with the "Twins," the ship in which St. Paul found a passage after his shipwreck on the coast of that island. Arrived in Malta, they watched for the opportunity of a wind to take them westward, and with such a one they readily made Syracuse. To proceed further while it continued blowing would have exposed them to the dangers of a lee-shore, and accordingly they remained three days. Then, the wind having probably shifted into a western quarter so as to give them a smooth water, steered the shore and made (περιπλανάται καταρτίσας εἰς) Rhegium. After one day there, the wind got round still more and blew from the south; they therefore weighed, and arrived at Puteoli in the course of the second day of the run (Acts xxviii. 12-14).

In the time of St. Paul’s voyage, Sicily did not supply the Romans with corn to the extent it had done in the time of King Hiero, and in a less degree
SYRIA

as late as the time of Cicero. It is an error, however, to suppose that the soil was unproductive; for Strabo expressly says, that for corn, and some other productions, Sicily even surpassed Italy. But the country had become depopulated by the long series of wars, and when it passed into the hands of Rome, her great nobles turned vast tracts into pastures. In the time of Augustus, the whole of the centre of the island was occupied in this manner, and among its exports (except from the neighbourhood of the volcano region, where excellent wine was produced), fat stock, hides, and wool appear to have been the prominent articles. These grazing and horse-breeding farms were kept up by slave labor; and this was the reason that the whole island was in a chronic state of disturbance, owing to the slaves continually running away and forming bands of brigands. Sometimes these became so formidable as to require the aid of regular military operations to put them down; a circumstance of which Tiberius Gracchus made use as an argument in favor of his measure of an Agrarian law (Appian, B. C. i. 9), which would have recovered the spacious grass-lands into small arable farms cultivated by proprietor families.

In the time of St. Paul there were only five Roman colonies in Sicily, of which Syracuse was one. The others were Catana, Tarcentum Thermae, and Tylaris. Messana too, although not a colony, was a town filled with a Roman population. Probably its inhabitants were merchants connected with the wine trade of the neighborhood, of which Messana was the shipping port. Syracuse and Xeramus were important as strategic points, and a Roman force was kept up at each. Steele, Sionna, Morgetes, and Ierere (aboriginal inhabitants of the island, or very early settlers), still existed in the interior, in what exact political condition it is impossible to say; but most likely in that of villains. Some few towns are mentioned by Pliny as having the Latin franchise; and some as paying a fixed tribute; but with the exception of the five colonies, the owners of the soil of the island were mainly great absentee proprietors, and almost all its produce came to Rome (Strabo, vi. c. 2; Appian, B. C. iv. 84 ff., v. 15-118; Cicero, Verr. iv. 53; Plin. H. N. ii. 8).

SYRIA (ṣūpīr; Συρία: Syrē) is the term used throughout our version for the Hebrew Aram, as well as for the Greek Συρία. The Greek writers generally regarded it as a contraction or corruption of Assyria (Herod. vii. 63; Sir. 11.1; Dio. 89.4; Periég. ii. 75; Euseb. Comm. ad loc., etc.). But this derivation is exceedingly doubtful. Most probably Syria is for Turgia, the country about Taur (タル), or Tyre, which was the first of the Syrian towns known to the Greeks. The resemblance to Assyria (암시야) is thus purely accidental; and the two words must be regarded as in reality completely distinct.

1. Geographical Extent. — It is very difficult to fix the limits of Syria. The Hebrew Aram seems to commence on the northern frontier of Palestine, and to extend thence northward to the skirts of Taurus, westward to the Mediterraneum, and eastward probably to the Khabour River. Its chief divisions are Aram-Dammesek, or "Syria of Damascus," Aram-Zobah, or "Syria of Damascus," Aram-Naharaim, "Mesopotamia," or "Syria of the Euphrates," and Padan-Aram, "the plain of the mountains." Of these, we cannot be mistaken in identifying the first with the rich country about Damascus, lying between Anti-Libanus and the desert, and the last with the district about Harran and Orphah, the flat country stretching out from the western extremity of Mesopotamia toward the true source of the Khabour at Roz e-Bani. Aram-Naharaim seems to be a term including this last tract, and extending beyond it, though how far beyond is doubtful. The "two rivers" intended are probably the Tigris and the Euphrates, which approach very near each other in the neighborhood of Durbars; and Aram-Naharaim may have originally been applied especially to the mountain tract which here separates them. If so, it no doubt gradually extended its meaning; for in Gen. xxiv. 10 it clearly includes the district about Harran, the Padan-Aram of other places.

Whether the Scriptural meaning ever extends much beyond this is uncertain. It is perhaps most probable that, as the Mesopotamia of the later Greeks, so the Aram-Naharaim of the Hebrews was limited to the northwestern portion of the country contained between the two great streams. [See MapoNpOyT.] It certainly appears from between the Euphrates and Cilce-Syria; since, on the one hand, it reaches down to the Great River (2 Sam. viii. 3, x. 16), and on the other includes Hamath (2 Sam. viii. 10). The other divisions of Aram, such as Aram-Macchah and Aram-Jebel-Recob, are more difficult to locate with any certainty. Probably they were portions of the tract intervening between Anti-Libanus and the desert.

The Greek writers used the term Syria still more vaguely than the Hebrews did Aram. On the one hand they extended it to the Euxine, including in it Cappadocia, and even Bithynia (Herod. i. 2, 75, ii. 104; Strab. xvi. 1, § 2; Dionys. Perieég. 972); on the other they carried it to the borders of Egypt, and made it comprise Philistia and Eilam (Herod. iii. 5; Strab. xvi. 2, § 2). Again, through the omission in their minds between the Syrians and the Assyrians, they sometimes included the country of the latter, and even its southern neighbor Baby- lonia, in Syria (Strab. xvi. 1, § 2). Still they seem always to have had a feeling that Syria Proper was a narrower region. Herodotus, while he calls the Cappadocians and the Assyrians Syrians, gives the name of Syria only to the country lying on the Medi terranean between Cilicia and Egypt (ii. 106, 157, 159, iii. 6, 91). Dionysius, who speaks of two Syriases, an eastern and a western, assigns the first place to the latter (Perieég. 895). Strabo, like Herod otus, has one Syria only, which he defines as the maritime tract between Egypt and the Gulf of Issus. The ordinary use of the term Syria, by the LXX. and New Testament writers, is even more restricted than this. They distinguish Syria from Phoenicia on the one hand, and from Samaria, Judea, Idumea, etc., on the other. In the present article it seems best to take the word in this narrow sense, and to regard Syria as bounded by Aramans and Taurus on the north, by the Euphrates and the Arabian desert on the east, by Palestine, or the Holy Land, on the south, by the Mediterraneum only to the country lying near the mouth of the Orontes, and then by Phoe nicia upon the west. The tract thus circumscribed is about 300 miles long from north to south, and from 50 to 150 miles broad. It contains an area of about 30,000 square miles.

2. General Physical Features. — The general character of the tract is mountainsome, as the Ihe
SYRIA

brow name Aram (from a root signifying “height”) sufficiently implies. On the west, two longitudinal chains running parallel with the coast are a great distance from one another, extend along two thirds of the length of Syria, from the latitude of Tyre to that of Antiöch. These chains, toward the south, were known respectively as Libanus and Anti-Libanus, after which, about lat. 35°, the more western chain, Libanus, became Barúghus, while the eastern, shining into comparative insignificance, was without any special appellation. In the latitude of Antiöch the longitudinal chains are met by the chain of Amanus, an outlying barrier of Taurus, having the direction of that range, which in this part is from southwest to northeast. From this point northward to the true Taurus, which here bounds Syria, and eastward to the Emphrates about Bâr-dûk and Sumâm, the whole tract appears to consist of mountains infinitely ramified; below which, toward Sýyur and Aleppo, are some elevated plains, diversified with ranges of hills, while south of these, in about lat. 36°, you enter the desert. The most fertile and valuable tract of Syria is the long valley intervening between Libanus and Anti-Libanus, which slopes southward from a point a little north of Baalbek, and is there divided into two branches, while, as the slope is northward, and the streams form the Orontes, whose course is in that direction. The northern mountain region is also fairly productive; but the soil of the plains about Aleppo is poor, and the eastern flank of the Anti-Libanus, except in one place, is peculiarly sterile. The exception is at the lower or southern extremity of the chain, where the course of the Barada forms the rich and delightful tract already described under the head of Damascus.

3. The Mountain Ranges.—(a.) Lebanon. Of the various mountain ranges of Syria, Lebanon possesses the greatest interest. It extends from the mouth of the Litany to Arûk, a distance of nearly 100 miles, and is composed chiefly of Jura limestone, but varied with sandstone and basalt. It culminates toward its northern extremity, half-way between Tripoli and Beyrut, and at this point attains an elevation of nearly 10,000 feet (Robinson, Bibl. Researches, iii. 547). Anciently it was thickly wooded with cypresses, cedars, and firs; but it is now very scantily clothed. As a minute description of its present condition has been already given in the proper place, it is unnecessary to prolong the present account. [LEBANON.] (b.) Anti-Libanus. This range, as the name implies, stands over against Lebanon, running in the same direction, i.e. nearly north and south, and extending the same length. It is composed of Jura limestone, dolite, and Jura dolomite. The culminating point is Hermon, at the southern, or rather the southeastern end of it; the Anti-Libanus, unlike Libanus, bifurcates at its lowest extremity, dividing into two distinct ridges, between which flows the stream of the Hâshbeiye. Hermon is thought to exceed the height of 9,000 feet. (c.) Barúghus. Mount Barúghus, called now Jebel Noûr, stands toward the north, and toward the north Jebel Krouót, extends from the mountain parallel with the Anti-Libanus (Eleuthera), nearly opposite Homs, to the vicinity of Antiöch, a distance of rather more than 100 miles. It is separated from Lebanon by a comparatively level tract, 15 or 20 miles broad (el-Bîsîkh), through which flows the stream called el-Kelûr. Mount Barúghus is broader than Lebanon, and throws out a number of short spurs east and west both toward the sea and toward the valley of the Orontes (one of the mountain spurs terminating in the hâll Lânh). Known as Mount Casius, and now called Jebel el-Akrû, or the “Bold Mountain,” which rises abruptly from the sea to a height exceeding 5,000 feet. At the northern extremity of Barúghus, where it overhangs the lower course of the Orontes, was Diphue, the delicious suburb of Antiöch, and the favorite haunt of its luxurious populations. (d.) Amanus. North of the mouth of the Orontes, between its course and the eastern shore of the Gulf of Issus (Iaktivóren), lies the range of Amanus, which extends from the southwest end of the gulf, in a northeasterly direction, a distance of 55 or 90 miles, and finally forms a junction with Taurus in about long. 36° 25'. Amanus divides Syria from Cilicia, and is a stony range with bold rugged peaks and conical summits, formed of serpentines and other secondary rocks supporting a tertiary formation. Its average elevation is 5,000 feet, and it terminates abruptly at Ros el-Khânor, in a high cliff overhanging the sea. There are only two or three passes across it; and one alone, that of Ifîbin, is tolerably commodious. Amanus, like Anti-Libanus, bifurcates at its southern extremity, and continues to the Baalbek, or Anti-Libanus, another, now called Mejna Dugh, which approaches within about six miles of the mouth of the Orontes, and seems to be the Pietro of Strabo (xvi. 2, § 8). This spur is of limestone formation. The flanks of Amanus are well clothed with forests of pine, oak, and larch, or copses of myrtle, arious, okenolier, and other shrubs. The range was called by the ancients the mountain which called it KIvanus, and not uncuriously cut timber in it, which was conveyed thence to their capital. 4. The Rivers.—The principal rivers of Syria are the Litany and the Orontes. The Litany springs from a small lake situated in the middle of the Cilcy-Syrian valley, about six miles to the southwest of Baalbek. Here it descends the valley called el-Kákon, with a course a little west of south, sending out on each side a number of canals for irrigation, and receiving rills from the opposite ranges of Libanus and Anti-Libanus, which compose for the water given off. The chief of these is called el-Bârûndag, and descends from Lebanon near Zaouia. The Bridik narrows as it proceeds southward, and terminates in a garge, through which the Litany forces itself with a course which is still to the southwest, flowing deep between high precipices, and spanned by a bold bridge of a single arch, known as the Jor Barúghus. Having emerged from the ravine, it flows first southwest by west, and then nearly due south, till it reaches the latitude of Tyre, where, meeting the mountains of Upper Galilee, it is forced to bend to the west, and, passing with many windings through the low coast tract, enters the sea about 5 miles north of the great Phœnician city. The entire course of the stream, exclusive of small windings, is about 50 miles. The source of the Orontes is but about 15 miles from that of the Litany. A little north of Baalbek, the highest point or watershed of the Cilcy-Syrian valley is reached, and the ground begins to descend northward. A small rill breaks out from the foot of Anti-Libanus, which, after flowing nearly due north for 15 miles across the plain, meets another greater source given out by Lebanon in lat. 34° 22', which is now considered
the true "head of the stream." The Orontes from this point flows down the valley to the northeast, and passing through the Bahr el-Khiba—a lake about 6 miles long and 2 broad—approaches Homs (Emesa), which it leaves on its right bank. It then flows for 20 miles nearly due north: after which, on approaching Hamath (Hamath), it makes a slight bend to the east round the base of the Jebel Eynabough; and then, entering the rich pasture country of el-Khub, runs north-west and north to Juse Halid. The tributaries which it receives in this part of its course are many but small, the only one of any importance being the Wuly el-Noraj, which enters it from the west a little below Hamath. At Juse Halid, or "the Iron Bridge," the course of the Orontes suddenly changes. Prevented by the range of Amanus from flowing any further to the north, it sweeps round boldly to the west, and receiving a large tributary—the Kuro-Su—from the northeast, the volume of whose water exceeds its own, it enters the broad valley of Antioch, "doubling back here upon itself, and flowing to the southwest." In this part of its course the Orontes has been所说的 "the wide channel (Sinow and Palæstine, p. 409). The entire length of the stream is estimated at about 250 miles. Its modern name is the Nahr el-Ali, or "Reed Stream," an appellation given to it on account of its violence and impetuosity in many parts of its course.

The other Syrian streams of some consequence, besides the Litany and the Orontes, are the Bi'rantes, or River of Damascus, the Kovech, or River of Aleppo, and the Sojur, a tributary of the Ephrates. The course of the Kovech has already been described under the head of Damascus. [DAMASCUS.] The Kovech rises in the highlands south of Ain-Tobb, from two sources, one of which is known as the Bok Почк-Su, or "the Fisk River." It seems to be the Chalas of Xenophon (Anab. i. 4, § 9). Its course is at first east, but soon becomes south, or a little west of south, through which it meanders considerably through the high plain south of that city, finally terminating in a marsh known as el-Batch. The Sojur rises a little further to the north, in the mountains south of Ain-Tobb. Its course for the first 25 miles is south-west, and then turns north-west. This part of its course is 15, or 20 miles, finally resuming its first direction, and flowing by the town of Sojur into the Ephrates. It is a larger river than the Kovech, though its course is scarcely so long.

5. The Lakes. The principal lakes of Syria are the Aga-Dengia, or Lake of Antioc; the Sibkhand, or Salt Lake, between Aleppo and Bal:; the Bahr el-Khiba, on the Upper Orontes; and the Bahr el-Menji, or Lake of Damascus. (a.) The Lake of Antioc is an oblong fresh-water basin, 10 miles long by 7 broad, situated to the north of the Orontes, where it sweeps round through the plain of Unak, before receiving the Kuro-Su. It is formed by the waters of three large streams—the Kuro-Su, the Afeiran, and the Aseini—which collect the drainage of the great mountain tract lying northeast and east of Antioc, between the 36th and 37th parallels. It has been argued, from the silence of Xenophon and Strabo, that this lake did not exist in ancient times (Rennell, Illustrations of the Expedition of Cyrus, p. 65), but modern investigations pursued upon the spot are thought to prove this theory (Anisworth, Researches in Mesopotamia, p. 219). The waters flow into the lake on the east and north, and flow out of it at its southwestern edge by a broad and deep stream, known as the Kuro-Su, which falls into the Orontes a few miles above Antioc. (b.) The Sabakhdh is a salt lake, into which only insignificant streams flow, and which has no outlet. It lies midway between Bal: and Antioc, the route between these places passing along its northern shore. It is longer than half a mile wide, but narrower, being about 10 miles from east to west, and 4 miles only from north to south, even where it is widest. (c.) The Bahr el-Khiba is smaller than either of the foregoing lakes. It has been estimated at 8 miles long and 3 broad (Ptolemeus, Description of the East, i. 140), and again at 6 miles long and 2 broad (Bisamier, Encyclop. Exp. i. 394), but has not been accurately measured. Ptolemeus conjectures that it is of recent formation; but his only reason seems to be the silence of ancient writers, which is scarcely sufficient to prove the point. (d.) The Bahr el-Menji, like the piece of water in which the Kovech or River of Aleppo ends, scarcely deserves to be called a lake, since it is little better than a large water hole. It is, according to Colonel Chenevix, only 9 miles, and the breadth of miles (Journ. xvi. i. 505); but the size seems to vary with the seasons, and with the extent to which irrigation is used along the course of the Baraba. A recent traveler, who traced the Baraba to its termination, found it divide a few miles below Damascus, and observed that each branch terminated in a marsh of its own; while a neighboring stream, the Aareli, commonly regarded as a tributary of the Baraba, also lost itself in a third marsh separate from the other two (Porter in Geograp. Journ. xvi. 43-46).

6. The Great Valley. By far the most important part of Syria, and on the whole its most striking feature, is the great valley which reaches from the plain of Unak, near Antioc, to the narrow gorge on which the Litany enters in about lat. 35° 50'. This valley, which runs nearly parallel with the Syrian coast, extends the length of 250 miles, and has a width varying from 6 or 8 to 15 or 20 miles. The more southern portion of it was known to the ancients as Cilic-Syria, or "the Hollow of Syria," and has been already described. [CILICIA.] The northern part of it, more than 100 miles, terminating with a screen of hills a little south of Hama, at which point the northeastern direction of the valley also ceases, and it begins to bend to the northeast. The lower valley from Hama downward is broader, generally speaking, and richer than the upper portion. Here was "Hamath the Great" (Am. vi. 2), now Hamah; and here too was Apamea, a city not little inferior to Antioc, surrounded by rich pastures, where Seleucus Nicator was wont to feed 500 elephants, 300 stallion horses, and 30,000 mares (Strab. xvi. 2, § 10). The whole of this region is fertile, being watered not only by the Orontes, but by the numerous affluent streams which flow into it from the mountain ranges inclosing the valley on either side.

7. The Northern Highlands. Northern Syria, especially the district called Commagene, between Taurus and the Ephrates, is still very insufficiently explored. It seems to be altogether an elevated tract, consisting of twisted spurs from Taurus and Amanus, with narrow valleys between them, which open out into bare and sterile plains. The valleys themselves are not very fertile. They are
SYRIA

watered by small streams, producing often abundant fish, and, for the most part, flowing into the Orontes or the Euphrates. A certain number of the more central ones, however, unite, and constitute the "river of Aleppo," which, unable to reach either of the oceanic streams, forms (as we have seen) a lake or marsh, wherein its waters evaporate. Along the course of the Euphrates, where the level is really sandy and abundant vegetation; but the character of the country thence to the valley of the Orontes is bare and woodland, except in the vicinity of the towns, where fruit-trees are cultivated, and orchards and gardens make an agreeable appearance. Most of this region is a mere sheep-walk, which grows more and more harsh and repulsive as we approach the south, where it gradually narrows with the desert. The highest elevation of the plateau between the two rivers is 1500 feet; and this height is reached soon after leaving the Euphrates, while toward the west the decline is gradual.

8. The Eastern Desert. — East of the inner mountain-chain, and south of the cultivated ground about Aleppo, is the great Syrian Desert, an elevated dry upland, for the most part of gravel and marls, producing nothing but a few sparse bushes of wormwood, and the usual aromatic plants of the wilderness. Here and there bare and stony ridges of no great height cross this arid region, but fail to draw water from the sky, and have, consequently, no streams flowing from them. A few wells supply the nominal population with a brackish fluid. The region is traversed with difficulty, and has never been accurately surveyed. The most remarkable oasis is at Palmyra, where there are several small streams and abundant palm-trees. [See Palmyra.] Toward the eastern western part of the region along the foot of the mountain range which there bounds it, is likewise a good deal of tolerably fertile country, watered by the streams which flow eastward from the range, and after a longer or a shorter course are lost in the desert. The best known and the most productive of these tracts, which seem stolen from the desert, is the famous plain of Damascus — the El-Ghoub and El-Mezy of the Arabs — already described in the account given of that city. [DAMASCUS.] No rival to this "earthly paradise" is to be found along the rest of the chain, since no other stream flows down from it at all comparable to the Barada; but wherever the eastern side of the chain has been visited, a certain amount of cultivable territory has been found at its foot; corn is grown in places, and olive-trees are abundant (Burckhardt, Travels in Syria, pp. 124-129; Poole, Description of the East, ii. 146). Further from the hills all is bare and repulsive; a dry, hard desert like that of the Sinaitic peninsula, with a soil of sand and gravel, only rarely diversified with sand.

9. Chief Divisions. — According to Strabo, Syria Proper was divided into the following districts: (1.) Comagene; (2.) Cypriote; (3.) Seleucia; (4.) Cilicia; and (5.) Damascus. If we take its limits, however, as laid down above (§ 1), we must add to these districts three others: Chalybotitis, or the country about Aleppo; Chaldeia, or Chaldeia, a small tract south of this, about the lake in which the river of Aleppo ends; and Polemygeton, or the desert so far as we consider it to have been Syrian. (n.) Comagene a lay to the north. Its capital was Samosata or Samosaites. The territory is said to have been fairly fertile, but small; and from this we may gather that it did not descend lower than about Ain-Tub. (b.) From Ain-Tub, or perhaps from a point a higher up, commenced Cypriote or Cypriote. It was bounded on the north by Comagene, on the northwest by Amaseia, on the west and southwest by Seleucia, and on the south by Chaldeia or the region of Chalcyon. Both it and Comagene reached eastward to the Euphrates. Cypriote was so called from its capital Cyprian, which seems to be the modern Cynus. It included Hierapolis (Babylone), Batane (Botalla?), and Gindarus (Gindaro). (c.) Chalybotitis adjoined Cypriote on the south, lying between that region and the desert. It extended probably from the Euphrates, about Balis, to Mount St. Simeon (Aunulph Lysh). Like Cypriote, it derived its name from its capital city, which was Chalcyon, now corrupted into Halob or Aleppo. (d.) Chaldeia was south of the more western portion of Chalybotitis, and was named from its capital, Chaldeia, which seems to be marked by the modern El-Chaldeia. (e.) Polemygeton was the region of the River of Aleppo ends (Dioscor., Travels, i. 149). (f.) Seleucia lay between Cypriote, Chalybotitis, and Chaldeia on the one side, and the Mediterranean on the other. It was a large province, and contained four important subdivisions: (1.) Seleucia Proper or Phœlia, the little corner between Amaseia and the Orontes, with its capital, Seleucia, on the coast, above the mouth of the Orontes; (2.) Antiochis, the region about Antioch; (3.) Laodicea, the coast tract between the mouth of the Orontes and Hierapolis, named after its capital, Laodicea (still called Lodiskhyk), which was an excellent port, and situated in a most fertile district (Strab. xvi. 2, § 9); and (4.) Apameia, consisting of the valley of the Orontes from Ise to Hamath, or perhaps to Hierapolis, and having Apameia (now Firnich) for its chief city. (g.) Coele-Syria lay south of Apameia, being the continuation of the Great Valley, and extending from Euphrates to the gorge in which the valley ends. The chief town of this region was Heliopolis (Baalbeck). (h.) Damascus included the whole cultivable tract between the bare range which breaks away from Anti-Libanus on the north, and in the plains which slant down in the valley of the Awey on the south. It lay east of Coele-Syria and southwest of Palmyra. (i.) Palmyra was the name applied to the whole of the Syrian Desert. It was bounded on the east by the Euphrates, on the north by Chalybotitis and Chaldeia, on the west by Apameia and Coele-Syria, and on the south by the great desert of Arabia.

Onomastics. They dwell, however, east of the Euphrates, between Coele-Syria and Deirahus.
Cush, another formed among the Amorites, etc., are connected in Scripture with Egypt and Ethiopia, Cush and Mitzrain (Gen. x. 6 and 15-18); and even independently of this evidence, there seems to be sufficient reason for believing that the races in question stood in close etnic connection with the Cushite stock (Rawlinson's Herodotus, iv. 243-245). These races were not Palestinian only, but also Lower Syria, in very early times, as we may gather from the fact that Hamath is assigned to them in Genesis (x. 18). Aftersward they seem to have become possessed of Upper Syria also, for when the Assyrians first push their conquets beyond the Euphrates, they find the Hittites [Khroti] established in strength on the right bank of the Great River. After a while the first conquerors, who were still to a great extent nomads, received a Semitic infusion, which most probably came to them from the southeast. The family of Abraham, whose original domicile was in Lower Babylonia, may, perhaps, be best regarded as furnishing us with a specimen of the migratory movements of the period. Another example is that of Chedorlaomer, with his confederate kings, of whom one at least — Amraphel — must have been a Shemitic. The movement may have begun before the time of Abraham, and hence, perhaps, the Semitic names of many of the inhabitants when Abraham first comes into the country, as Abimelech, Melchizedek, Eliezer, etc. The only Syrian town whose existence we find distinctly marked at this time is Damascus (Gen. xiv. 15, xv. 2), which appears to have been already a place of some importance. Indeed, in one tradition, Abraham is said to have been king of Damascus for a time (Nie. Dam. Fr. 30); but this is quite unworthy of credit. Next to Damascus must be placed Hamath, which is mentioned by Moses as a well-known place (Num. xiii. 21, xxiv. 8), and appears to have been one of the chief cities of the eighteenth dynasty (Cambridge Essays, 1858, p. 289). Syria at this time, and for many centuries afterwards, seems to have been broken up among a number of petty kingdoms. Several of these are mentioned in Scripture, as Damascus, Rehob, Maacha, Zobaht, Gezer, etc. We also hear occasionally of "the kings of Syria and of the Hittites" (1 K. x. 29; 2 K. vii. 6)—an expression indicative of that extensive subdivision of the tract among numerous petty chieftains which is exhibited to us very clearly in the early Assyrian inscriptions. At various times different states had the preeminence; but none was ever strong enough to establish an authority over the others. The Jews first establish hostile contact with the Syrians, under that name, in the time of David. The wars of Joshua, however, must have been with Syrian chiefs, with whom he disputed the possession of the tract about Lebanon and Herman [Josh. xi. 2-18]. After the time the Syrians were apparently undisputed, until David began his aggressive wars upon them. Claiming the frontier of the Euphrates, which God had promised to Abraham, David made war on Hadadezer, king of Zobah, whom he defeated in a great battle, killing 18,000 of his men, and taking from him 1,000 chariots, 700 horsesmen, and 20,000 footmen (2 Sam. viii. 3, 4, 13). The Damascus Syrings, having endeavored to succor their kinsmen, were likewise defeated with great loss (2 Sam. viii. 6); and the blow so weakened them that they shortly afterwards submitted and became David's subjects (ver. 6). Zobah, however, was far from being subdued as yet. When, a few years later, the Ammonites determined on engaging in a war with David, and applied to the Syrians for aid, Zobah, together with Beth-Elah, sent them 20,000 footmen, and two other Syrian kingdoms furnished 13,000 (2 Sam. x. 6). This army being completely defeated by Joab, Hadadezer obtained aid from Mesopotamia (2 Sam. ver. 16), and tried the chance of a third battle, which likewise went against him, and produced the general submission of Syria to the Jewish monarch. The submission thus begun continued under the reigns of Solomon, who reigned over all the kingdoms from the river (Euphrates) unto the land of the Philistines and unto the border of Egypt; they brought presents and served Solomon all the days of his life" (1 K. iv. 21). The only part of Syria which Solomon lost seems to have been Damascus, where an independent kingdom was set up by Rezon, a native of Zobah (1 K. x. 17-25). On the separation of the two kingdoms, Syria passed from the Syrian to the Persian, and after the conquest of Babylon, the remainder of Syria no doubt shook off the yoke. Damascus now became definitely the leading state, Hamath being second to it, and the northern Hittites, whose capital was Carrhium near Barabul, third. [Carrhium] The wars of this period fall most properly into the history of Damascus, and have already been described in the account given of that city. [DAMASCUS]. Their result was to attach Syria to the great Assyrian empire, from which it passed to the Babylonians, after a short attempt on the part of Egypt to hold possession of it, which was frustrated by Nebuchadnezzar. From the Babylonians Syria passed to the Persians, under whom it formed a satrapy in conjunction with Phoenicia. The power and greatness of Damascus, whose resources were still great, and probably it was its confidence in them which encouraged the Syrian satrap, Megabuzas, to raise the standard of revolt against Artaxerxes Longimanus (B.C. 447). After this we hear little of Syria till the year of the battle of Issus (B.C. 333), when it submitted to Alexander without a struggle. Upon the death of Alexander Syria became, for the first time, the head of a great kingdom. On the division of the provinces among his generals (B.C. 321), Seleucus Nicator received Mesopotamia and Syria; and though, in the twenty years of struggle which followed, this country was lost and won repeatedly, it remained finally, with the exception of Coele-Syria, in the hands of the prince to whom it was originally assigned. That prince, whose dominions reached from the Mediterranean to the Indus, and from the Oxus to the Southern Ocean, having, as he believed, been exposed to great dangers on account of the distance from Greece of his original capital, Babylon, resolved immediately upon his victory of Ipsus (B.C. 301) to fix his metropolis in the West, and settled upon persons, which names might in that ease have been Hamitic.

a It is possible, however, that these names may be the Shemitic equivalents of the real names of these

— 198 —
SYRIA

Syria as the fittest place for it. Antioch was begun in B.C. 300, and, being finished in a few years, was made the capital of Seleucus' kingdom. The whole realm was thenceforth ruled from this centre, and Syria, which had long been the prey of stranger countries, and had been exhausted by their extortions, was now freed from the wealth and glory that flowed into it on all sides. The luxury and magnificence of Antioch were extraordinary. Broad straight streets, with colonnades from end to end, temples, statues, arches, bridges, a royal palace, and various other public buildings dispersed throughout it, made the Syrian capital by far the most splendid of all the cities of the East. At the same time, in the provinces, other towns of large size were growing up. Seleucia in Pieria, Apameia, and both Laodicea were foundations of the Seleucids, as their names sufficiently indicate. Weak and indolent as were many of these monarchs, it would seem that they had a hereditary taste for building; and so each aimed at outdoing his predecessors in the number, beauty, and magnificence of his constructions. As the history of Syria under the Seleucid princes has been already given in detail, in the articles treating of each monarch [Antiochus, Demetrius, Seleucus, etc.], it will be unnecessary here to do more than sum it up generally. The most flourishing period was the reign of the founder, Nicator. The empire was then almost as large as that of the Achemenian Persians, for it at one time included Asia Minor, and thus reached from the Euxine to India. It was organized into extrayps, of which the number was 72. Trade flourished greatly, old lines of traffic being restored and new ones opened. The reign of Nicator's son, Antiochus I., called Soter, was the beginning of the decline, which was progressive from his date, with only one or two slight interruptions. Soter lost territory to the kingdom of Pergamus, and failed in an attempt to subj ect Bithynia. He was also unsuccessful against Egypt. Under his son, Antiochus II., called Θέσσα λίνος, or "the God," who ascended the throne in B.C. 261, the disintegration of the empire proceeded more rapidly. The revolt of Parthia in B.C. 256, followed by that of Bactria in B.C. 251, brought the Syrian kingdom into one of its best provinces, and gave it a new enemy which shortly became a rival and finally a superior. At the same time the war with Egypt was prosecuted without either advantage or glory. Fresh losses were suffered in the reign of Seleucus II. (Callinicus), Antiochus the Second's successor. While Callinicus was engaged in Egypt against Ptolemy Euergetes, Emenues of Pergamus obtained possession of a great part of Asia Minor (B.C. 242); and about the same time Arses II., king of Parthia, conquered Hyrcania and annexed it to his dominions. An attempt to recover this latter province cost Callinicus his crown, as he was deposed and made prisoner by the Parthians (B.C. 226). In the next reign, that of Seleucus III. (Ceramus), a slight reaction set in. Most of Asia Minor was recovered for Ceramus by his wife's nephew, Achaeus (B.C. 224), and he was preparing to invade Pergamus when he died poisoned. His successor and brother, Antiochus III., though he gained the surname of Great from the grandeur of his expeditions and the partial success of some of them, can scarcely be said to have really done anything towards raising the empire from its declining condition, since his conquests on the side of Egypt, consisting of Cela-Syria, Phoenicia, and Palestine, formed no sufficient compensation for the loss of Asia Minor, which he was forced to cede to Rome for the aggrandizement of the rival kingdom of Pergamus (B.C. 190). Even had the territorial balance been kept more even, the ill policy of making Rome an enemy of the Syrian kingdom, with which Antiochus the Great is taxed, in engaging in a great war, and the excessive pride which prevailed among the princes, would have been a serious blow to the Syrian territories. The eastern provinces, the rich countries, of which near the Euphrates and the fertile basin of the Tigris, were in the hands of the Medes, Parthians, and others, who had succeeded the Persians, and the western provinces, the Phoenicia, Syria, Cilicia, and parts of Ionia, had been reduced to a condition of subjection to their respective monarchs, and were the prey of theavarous kings. This was a result of the imperial ambition of the Seleucids, who, by their unsettled contests with Pergamus, with Egypt, and with Rome, and the continual wars among themselves, had been no more able to defend their own dominions than to extend them. In the instance of their losses to the Parthians, at any rate to protect his empire from their aggressions. But the exhaustion consequent upon his constant wars and signal defeats — more especially those of Raphia and Magnesia — left Syria far more feeble at his death than she had been at any former period. The almost eventless reign of Seleucus IV. (Philopator), his son and successor (B.C. 187-175), is sufficient proof of this feebleness. It was not till twenty years of peace had recruited the resources of Syria in men and money, that Antiochus IV. (Epiphanes), brother of Philopator, ventured on engaging in a great war (B.C. 171) — a war for the conquest of Egypt. At first it seemed as if the attempt would succeed. Egypt was on the point of yielding to her foe for so many years, when Rome, following out her traditions of hostility to Syrian power and influence, interposed her mediation, and deprived Epiphanes of all the fruits of his victories (B.C. 168). A greater injury was, about the same time (B.C. 168), inflicted on Syria by the folly of Epiphanes himself. Not content with replenishing his treasury by the plunder of the Jewish temple, he madly ordered the desecration of the Holy of Holies, and thus caused the revolt of the Jews, which proved a permanent loss to the empire and an aggravation of its weakness. After the death of Epiphanes the empire rapidly verged to its fall. The real power fell into the hands of an infant, Antiochus V. (Eupator), son of Epiphanes (B.C. 164); the nobles contended for the regency: a pretender to the crown started up in the person of Demetrius, son of Seleucus IV.; Rome put in a claim to administer the government; and amid the troubles thus caused, the Parthians, under Tigranes I., invaded the eastern provinces (B.C. 164), conquered Media, Persis, Susiana, Babylonia, etc., and advanced their frontier to the Euphrates. It was in vain that Demetrius II. (Nicator) made an attempt (B.C. 142) to recover the lost territory; his boldness cost him his liberty; while a similar attempt on the part of his successor, Antiochus VII. (Sidetes), cost that monarch his life (B.C. 128). Meanwhile, in the shorn Syrian kingdom, disorders of every kind were on the increase; Commagene revolted and established her independence; civil wars, murders mutinies of the troops, rapidly succeeded one another; the despoiled Jews were called in by both sides in the various struggles; and Syria, in the space of about ninety years, from B.C. 154 down to B.C. 64, had no fewer than ten sovereigns. All the wealth of the country had been by this time dispersed; much had flowed Romeward in the shape of bribes; more, probably, had been spent on the wars; and still more had been wasted by the kings in luxury of every kind. Under these circumstances the Romans showed no eagerness to occupy the exhausted region, which passed under the power of Tigranes, king of Armenia, in B.C. 85; and was not made a province of the Roman Empire till after Pompey's complete defeat of Mithridates and his ally Tigranes, B.C. 64.
The chronology of this period has been well worked out by Clinton (F. H. vol. iii. pp. 308-346), from whom the following table of the kings, with the dates of their accession, is taken:

<table>

As Syria holds an important place, not only in the Old Testament, but in the New, none account of its condition under the Romans must now be given. That condition was somewhat peculiar. While the country generally was turned into a Roman province, under governors who were at first proprietors of the country, and finally, after it was annexed to the direct rule of the Romans, into a number of "free cities," which retained the administration of their own affairs, subject to a tributary levied according to the Roman principles of taxation; and finally, a number of tracts, which were assigned to petty princes, that is, city-states, native to be ruled at their pleasure, subject to the same obligations with the free cities as to taxation (Appian, Syr. 50). The free cities were Antioch, Seleucia, Apamea, Epiphanes, Tripolis, Nisibis, and Nisibis. The principalities, Commagene, Chalced ad Belum (near Bard- bek), Aranthis, Abila or Adliden, Palmyra, and Damascus. The principalities were sometimes called kingdoms, sometimes tetrarchies. They were established where it was thought that the natives were so inextricably wedded to their own customs, and so well disposed for revolt, that it was necessary to consult their feelings, to flatter the national vanity, and to give them the semblance without the substance of freedom. (a) Commagene was a kingdom (regnans). It had broken off from Syria during the later troubles, and become a separate state under the government of a branch of the Seleucidae, who affected the names of Antiochus and Mithridates. The Romans allowed this condition of things to continue till A. D. 17, when, upon the death of Antiochus III, they made Commagene a province: in which condition it continued till A. D. 38, when Caligula gave the crown to Antiochus IV. (Epiphanes), the son of Antiochus III. Antiochus IV. continued king till A. D. 72, when he was deposed by Vespasian, and Commagene was finally absorbed into the Empire. He had a son, called also Antiochus and Epiphanes, who was betrothed to Drusilla, the sister of King Agrippa, and afterwards the wife of Felix, the procurator of Judaea. (b) Chalced ad Belum was not the city so called near Aleppo, which gave name to the district of Chaldia, but a town of a less importance near Heliopolis (Bardbek), whence probably the suffix "ad Belum." It is mentioned in this connection by Strabo (xvi. 2, § 10), and Josephus says that it was under Leucius (Ant. xiv. 7, § 4), so that there cannot be much doubt as to its position. It must have been in the "Hollow Syria" — the modern Libanon — to the south of Bardbek (Joseph. B. J. i. 9, § 2), and therefore probably at or near, where there are large ruins (Robinson, Bibl. Res. iii. 496, 497). This too was generally, or perhaps always, a "kingdom." Pompey found it under a certain Polycrates, "the son of Menneas," and allowed him to retain possession of it, together with certain adjacent districts. From it he passed to his son, Lyueas, who was put to death by Antony at the instigation of Cleopatra (ab. b. c. 34), after which we find its revenues farmed by Lyueas's steward, Zenodoros, the royalty being in abeyance (Joseph. Ant. xx. 10, § 1). In it, in 19 B.C., Agrippa was not only the vassal, but also the de facto ruler of the "kingdom of the Herods," where it probably passed to his son Philip (Bibl. xxii. 11, § 4). Philip died A. D. 34; and then we lose sight of Chalced, until Claudius in his first year (A. D. 41) bestowed it on a Herod, the brother of Herod Agrippa I, still as a "kingdom." From this Herod it passed (A. D. 49) to his nephew, Herod Agrippa II, who held it only three or four years, being promoted from it to a better government (ibid. xx. 5, § 1). Chalced then fell to Agrippa's cousin Aristobulus, son of the first Herodian king, under whom it remained till A. D. 73 (Joseph. B. J. vii. 7, § 1). About this time, or soon after, it ceased to be a distinct government, being finally absorbed into the Roman province of Syria. (c) Aranthis (now Resana) was for a time separated from Syria, and governed by phylarchs. The city lay on the right bank of the Orontes between Hamah and Homs, rather nearer to the former. In the government were included the Emisini, or people of Homs (Eunus, so that we may regard it as comprising the Orontes valley from the Jebel Borkhan to the high ground on the Homs road), the lake of Homs. Only two governors are known, Samphaseum and Haschib, his son (Strabo. xvi. 2, § 10). Probably this principality was one of the first absorbed. (d) Adliden, so called from its capital Abila, was a "tetrarchy." It was situated to the east of Anti-Libanus, on the route between Bardbek and Damascus (Ros. Ant.). Ruins and inscriptions mark the site of the capital (Robinson, Bibl. Res. iii. 470-482), which was at the village called el-Soke, on the river Barada, just where it breaks forth from the mountains. The limits of the territory are uncertain. We first hear of this tetrarchy in St. Luke's Gospel (iii. 1), where it is said to have been in the possession of a certain Lysanias at the commencement of St. John's ministry, which was probably A. D. 27. Of this Lysanias nothing more is known; he certainly cannot be the Lysanias who once held Chalced; since that Lysanias died above sixty years previously. Eleven years after the date mentioned by St. Luke, A. D. 38, the heir of Caligula bestowed the "tetrarchy of Lysanias," by which Adliden is no doubt intended, on the elder Agrippa (Joseph. Ant. xvi. 6, § 10); and four years later Claudius confirmed the same prince in the possession of the 1st "tith of Lysanias."
Finally, in A.D. 53, Claudius, among other grants, conferred on the younger Agrippa "Abila, which had been the territory of Lyonsia" (ibid. xx. 7, § 1). Abila was taken by Placidus, one of the generals of Vespasian, in N. c. 69 (Joseph. Bell. Jud. iv. 7, § 6), and thenceforth was annexed to Syria. (c.) Palmyra appears to have occupied a different position from the rest of the Syrian principalities. It was in no sense dependent upon Rome (Plin. H. N. v. 25), but relying on its position, chased and exercised the right of self-government from the breaking up of the Syrian kingdom to the reign of Trajan. Antony made an attempt against it, n. c. 41, but failed. It was not Trajan's successes against the Parthians, between A. d. 114 and A. d. 116, that Palmyra was added to the Empire. (f.) Damascus is the last of the principalities which it is necessary to notice here. It appears to have been left by Pompey in the hands of an Arabian prince, Aretas, who, however, was to pay a tribute for it, and to allow the Romans to occupy it at their pleasure with a garrison (Joseph. Ant. 19: 5 § 1: 11, § 7). This state of things continued most likely to the settlement of the Empire by Augustus, when Damascus was attached to the province of Syria. During the rest of Augustus' reign, and during the entire reign of Tiberius, this arrangement was in force; but it seems probable that Caiulina on his accession separated Damascus from Syria, and gave it to another Aretas, who was king of Petra, and a relation (son?) of the former. [See Aretas.] Hence the fact, noted by St. Paul (2 Cor. xi. 52), that at the time of his conversion Damascus was held by an "ethnarch of king Aretas." The semi-independence of Damascus is thought to have continued through the reigns of Caiulina and Claudius (from A. d. 57 to A. d. 64), but to have come to an end under Nero, when the district was probably reattached to Syria.

The list of the governors of Syria, from its conquest by the Romans to the destruction of Jerusalem, has been made out with a near approach to accuracy, and is as follows:—

</table>

The history of Syria during this period may be summed up in a few words. Down to the battle of Pharsalia, Syria was fairly tranquil, the only troubles being with the Arabs, who occasionally attacked the eastern frontier. The Roman governors labored hard to raise the condition of the province, taking great pains to restore the cities, which had gone to decay under the Later Seleucids. Gabinius, proconsul in the years 56 and 55 n. c., made himself fairly popular in works of this kind. After Plancus (in n. c. 44) the troubles seem to have been renewed. Julius Caesar gave the province to his relative Sextus in n. c. 47; but Pompey's party was still so strong in the east, that in the next year one of his adherents, Cecilius Bassus, put Sextus to death, and established himself in the government so firmly that he was able to resist for three years three proconsuls appointed by the Senate to dispossess him, and only finally yielded upon terms which he himself offered to his antagonists. Many of the petty princes of Syria sided with him, and some of the nomadic Arabs took his pay and fought under his banner (Strab. xvi. 2, § 10). Bassus had but just made his submission, when, upon the assassination of Caesar, Syria was disputed between Cassius and Drusilla, the friend of Antony, a dispute terminated by the suicide of Dolo- bella, n. c. 43, at Lodicea, where he was besieged by Cassius. The next year Cassius left his province and went to Philip, where, after the first unsuccessful engagement, he too committed suicide. Syria then fell to Antony, who appointed as his legate L. Decidius Saxa, in n. c. 47. The troubles of the eastern provinces tempted the Parthians to seek a further extension of their dominions at the expense of Rome, and Parthas, the crown-prince, son of Arses XIV., assisted by the Roman refugee, Labienus, overran Syria and Asia Minor, defeating Antony's generals, and threatening Rome with the loss of all her Asiatic possessions (n. c. 40-39). Ventidius, however, in n. c. 38, defeated the Parthians near Pacorus, and recovered the territory that he had taken from the Parthian. A quiet time followed. From n. c. 38 to n. c. 51 Syria was governed peaceably by the legates of Antony, and, after his defeat at Actium and death at Alexandria in that year, by those of Augustus. In n. c. 27 took place that formal division of the provinces between Augustus and the Senate, from which the imperial Roman authorities derived their legitimate right. Syria, being from its exposed situation among the provinci principia, continued to be ruled by legates, who were of consular rank (consulares) and bore severally the

SYRIA

SYRO-PHŒNICIAN 3149

full title of "Legatus Augusti pro praetore." During the whole of the period the province enlarged or contracted its limits according as it pleased the reigning emperor to bestow tracts of land on the native princes, or to resume them and place them under his legate. Judea, when annexed in this way to Syria, occupied a peculiar position. Partly perhaps on account of its remoteness from the Syrian capital, Antioch, partly no doubt, because of the peculiar character of its people, it was thought best to make it, in a certain sense, a separate government. A special procurator was therefore appointed to rule it, who was subordinate to the governor of Syria, but within his own province had the power of a legatus. [See JUDEA.] Syria continued without serious disturbance from the expulsion of the Parthians (B. C. 38) to the breaking out of the Jewish war (A. D. 66). In B. C. 19 it was visited by Augustus, and in A. D. 18-19 by Germanicus, who died at Antioch in the appointed year. In A. D. 44-47 it was the scene of a severe famine. [See AGRABUS.] A little earlier Christianity had begun to spread into it, partly by means of those who were scattered at the time who were spared at the hands of Stephen's persecution (Acts xi. 19), partly by the exertions of St. Paul (Gal. i. 21). The Syrian Church soon grew to be one of the most flourishing (Acts xii. 1, xv. 23, 35, 41, &c.). Here the name of "Christian" first arose—at the outset no doubt a gibe, but thenceforth a glory and a bond: Antioch the capital, became as early probably as A. D. 44 the see of a bishop, and was soon recognized as a patriarchate. The Syrian Church is accused of laxity both in faith and morals (Neumann, Arianus, p. 10); but, if it must admit the disgrace of having given birth to Lucian and Paulus of Samosota, it can claim on the other hand the glory of such names as Ignatius, Theophilus, Ephraim, and Eulogius. It suffered without shrinking many grievous persecutions; and it helped to make that emphatic protest against worldliness and luxuriousness of living at which monasticism, according to its original conception, must be considered to have aimed. The Syrian monks were among the most earnest and most self-denying; and the names of Hilary and Simon Syrii are enough to prove that the Syrian Church, so important a part was played by Syria in the acetic movement of the 4th and 5th centuries. (For the geography of Syria, see Pockocke's Description of the East, vol. ii. pp. 88-209; Burckhardt's Travels in Syria and the Holy Land, pp. 1-503; Robinson's Later Biblical Researches, pp. 410-625; Stanley's Sinai and Palestine, pp. 495-511; Porter's Five Years in Damascus; Wheel- world's Travels in the Trench of the Ten Thousand, pp. 57-70; Researches, etc., p. 230 ff. For the history under the Seleucids, see (besides the original sources) Clinton's Fasti Hellenici, vol. iii. Appendix iii. pp. 308-416; Vaillant's Imperium Seleucidarum, and Friedich's Annales Recens et Regnum Syriæ. For the history under the Romans, see Nolli's, Cenographia Pannonica, Op. vol. iii. pp. 428-531.)

SYRIAC VERSIONS. [Versions, SYRIAC.]

* SYRIAN (זָרָּעָה) Zara'ah: Syrian, a native or inhabitant of Syria (Gen. xxvii. 20, xxviii. 5, xxii. 24, Gen. xxxii. 5; 2 K. ii. 20). The parochial, "Syrians," is commonly the translation of זָרָּעָה, Zara'ah; e. g. 2 Sam. viii. 5-13, x. 6-19, &c.; but of זָרָּעָה, Zara'ah, 2 K. viii. 28, 29, ix. 15; comp. 2 Chr. xxii. 5. "In the Syrian language" or "tongue," 2 K. viii. 26; Is. xxxix. 11; Ezr. iv. 7; or in "Syrians," Dan. ii. 4, is זוּרָּעָה Zara'ah, "Syrians," "Syrian tongues," "Syria;" in 2 Mac. xxe. 36, תַּוּרָאָה צַרְיָא צַרְיָא, vose Syriasin A.

* SYRIA-MA'ACHAH, 1 Chr. xix. 6. [Aram: Ma'achah].

SYRO-PHŒNICIAN (Σωροφινικεῖα Λαυκου, Tisch., 8th ed.), Σωροφινικεῖα [Rec. Text: Συροφινικεία or Συροφινικ. Tisch., 14th ed.] (Syro-Phœnician or Prochæian). The name Σωροφινικεῖα (Syro-Phœnician) occurs only in Mark vii. 21. The coinage of the words "Syro-Phœnician," and "Syro-Phœnicians," seems to have been the work of the Romans, though it is difficult to say exactly what they intended by the expressions. It has generally been supposed that they wished to distinguish the Phœnicians of Syria from those of Africa (the Carthaginians); and the term "Syro-Phœnician" has been regarded as the exact converse to "Libyphœnician" (Aldrov., in loc.). But the Libyphœnicians are not the Phœnicians of Africa generally—they are a peculiar race, half-African and half-Phœnician ("mixtum Punicum Africum genus"). Liv. xxii. 22. The Syro-Phœnicians, therefore, should, on this analogy, be a mixed race, half-Phœnician and half-Syrians. This is probably the sense of the word in the satirists Lucilius (ep. Non. Marc. De propriet. sera, iv. 431) and Juvenal (Sat. viii. 150), who would regard a mongrel Oriental as peculiarly contemptible. In later times a geographical sense of the terms superseded the ethnic one. The Emperor Hadrian divided Syria into three parts, Syria Proper, Syria Phœnic, and Syria Palistina; and henceforth a Syro-Phœnician meant a native of this sub-province (Lucian, De Conv. Discr. § 4), which included Phœnic Proper, Damascus, and Palmyrene. As the geographical sense had not come into use in St. Mark's time, and as the ethnic one would be a renunciation of the sacred writers, it is perhaps most probable that he really wrote Συροφινικα, "a Phœnician Syrian," which is found in some copies. [The reading Σωροφινικα is much better supported. — A.]

St. Matthew uses "Canaanith" (Kanaanith) in the place of St. Mark's "Syro-Phœnician," or Phœnician Syrian, "on the same ground that the LXX. translate Canaan into a sacred writer, it is perhaps most probable that he really wrote Σωροφινικα, a Canaanite, just as Englishmen are called Britons." No conclusion as to the identity of the Canaanites with the Phœnicians can properly be drawn from the indifferent use of the two terms. (See Reisin son's Herodotus, iv. pp. 243-245.) G. R.

SYRTIS. [Quicksands.]

SYZYGGUS or SYZZGYGUS. Phil. iv. 3. [Yoke-fellow, Amor. ed.]

TA'ANACH (תַּאֲנָךְ) [perh. castle, Dietr.]:

TA'ANACH: [perh. castle, Dietr.]:

Zachax [Vat. Zacchax], Zachax, Zachax, [Tobacco, VAT. corrpt.]: Alex. Thoax, Tobac, thooxax, Thoax, Thooxax: [Themoc, Themoc, Themoe].

An ancient Canaanitish city, whose king was enumerated amongst the thirty-one conquered by Joshua (Josh. xii. 21). It came into the hands of the half tribe of Manasseh (Josh. xiii. 21, xxxi. 25); 1 Chr. xxvii. 28, though it would appear to have lain outside their boundary and within the allotment of either Issachar or Asher (Josh. xii. 11), probably the former. It was bestowed on the Kohathite Levites (Josh. xxii. 25). Taanach was one of the places in which, either from some strength of position, or from the ground near it being favorable for their mode of fighting, the Aborigines succeeded in making a stand (Josh. xii. 12; Judg. i. 27); and in the great struggle of the Canaanites under Sisera against Deborah and Barak, it appears to have formed the head-quarters of their army (Judg. v. 19). After this defeat the Canaanites of Taanach were probably made, like the rest, to pay a tribute (Josh. xvii. 13; Judg. 1. 28), but in the town they appear to have remained to the last. Taanach is almost always named in company with Megiddo, and they were evidently the chief towns of that fine rich district which forms the western portion of the great plain of Esdraelon (1 K. iv. 12).

There it is still to be found. The identification of Ta'anach with Taanach, may be taken as one of the surest in the whole Sacred Topography. It was known to Eusebius, who mentions it (twice) in the Omnominac (Greek and Arabic) as a "very large village." standing between 3 and 4 Roman miles from Levio — the ancient Megiddo. It was known to hap Paréch, the Jewish medieval traveller, and it still stands about 4 miles southeast of Lejiana, retaining its old name with hardly the change of a letter. The ancient town was planted on a large mound at the termination of a long spur or prominence, which runs outward from the hills of Manasseh into the plain, and leaves a recess or bay, subordinate to the main plain on its north side and between it and Lejiana. The modern hamlet clings to the S. W. base of the mound (Rob. li. 310, 325; Van de Veche, i. 398; Stanley, Jewish Church, pp. 321, 322).

In one passage the name is slightly changed both in [the original] and A. V. [TANACH].

TA'ANATH-SHILOH (תַּאֲנָתָה שִלֹה) [sirce of Shiloh, First]: Thoana, nat Szilhou [Vat. Szilhoo]; Alex. Tannath szilho: Tannath-Szeho.

A place named only once (Josh. xvi. 6) as one of the landmarks of the boundary of Ephraim, but of which boundary it seems impossible to ascertain. All we can tell is, that at this part the enumeration is from west to east, Janniah being east of Taanath Shiloh. With this agrees the statement of Eusebius (Omnominac), who places Janniah 12, and Thenath, or as it was then called Themah, 10 Roman miles east of Neapolis. Janniah has been identified with some probability at Yoman, on the road from Nusbah to the Jordan Valley. The name Tann, or Ain Tann, seems to exist in that direction. A place of that name was seen by Robinson N. E. of Mejejil (Bibl. Res. ii. 265), and it is mentioned by Barth (Bitter, Jordan, p. 471), but without any indication of its position. Much stress cannot however be laid on Eusebius' identification.

In a list of places contained in the Talmud (Jerumsed Megillah i.), Taanath Shiloh is said to be identical with Shiloh. This has been recently revived by Kurtz (Gereeh, des Allt. Biblcs, ii. 70). His view is that Taanath was the ancient Canaanite name of the place, and Shiloh the Hebrew name, conferred on it in token of the "rest" which allowed the Tabernacle to be established there after the conquest of the country had been completed. This is ingenious, but at present it is a mere conjecture, and it is at variance with the identification of Eusebius, with the position of Janniah, and, as far as it can be inferred, of Mishmetha, which is mentioned with Taanath Shiloh in Josh. xvi. 6.

G.

TABAOTH (Tabothe; Alex. Taboeth; Toboeth). TABAOTH (1 Esdr. v. 29).

TABAOTH (תבּאוֹת) [rings, Grs.]: Tabo-  

TABAOTH (1 Esdr. v. 29).

TABAOTH (תבּאוֹת) [perh. celebrated]:

Tabo: Alex. Taboeth; Toboeth.

A place mentioned only in Judg. vii. 22, in describing the flight of the Midianite host after Gideon's night attack. The host fled to Beth-shittah, to Zererah, to the brink of Abel-meholah on (Tah) Tabitha. Beth-shittah may be Shattath, which lies on the open plain between Jebel Fakha and Jebel Daby, 4 miles east of Ain Jadid, the probable scene of Gideon's onslaught. Abel-meholah was no doubt in the Jordan Valley, though it may not have been so much as 8 miles south of Beth-shan, where Enschel and Jerome would place it. But no attempt seems to have been made to identify Tabitha, nor does any name resembling it appear in the books or maps, unless it be Tabubkhal-Fahel, i. e., "Terrace of Fahel." This is a very striking natural bank, 600 ft in height (Rob. iii. 325), with a long, horizontal, and apparently flat top, which is embanked against the western face of the mound east of the Jordan, and descends with a very steep front to the river. It is such a remarkable object in the whole view of this part of the Jordan Valley that it is difficult to imagine that it did not bear a distinctive name in ancient as well as modern times. At any rate, there is no doubt that, whether this Tabukhish represents Tabitha or not, the latter was somewhere about this part of the Ghor.

G.

TABEAL (גְּבָא ל [God is good]): Tabolah; Tobol.

Property "Tabeal," the pathouch being chief towns of the district of Samaria (cap. 16, quoted in Radd., Pat. p. 403).
TABEEL

TABERNACLE

due to the pause (Gesen. Lecry, § 52, 1 b; Hdb. Gr. § 29, 4 c). The son of Tabel was apparently an Ephraimitic in the army of Pekah the son of Remaliah, or a Syrian in the army of Rezin, when they went up to besiege Jerusalem in the reign of Ahaz (Is. vii. 6). The Aramaic form of the name favors the latter suggestion (comp. TARGUMIM). The Targum of Jonathan renders the name as an appellative, "and we will make king in the midst of her whom seems good to us" (יְשָׁבֵא יֶפֶרֶת אַֽלְיָֽהוּ). Rashi 1 by Geonatri turns the name into יָשָׁבֵא יֹפֶרֶת, Rima, by which apparently he would understand Remaliah.

TABEEL ([תֶּבֶל] see above): Tabetha: Tabael. An officer of the Persian government in Susamia in the reign of Artaxerxes (Est. iv. 7). His name appears to indicate that he was a Syriac, for it is really the same as that of the Syrian vassal of Rezin who is called in our A. V. "Tabael." Add to this the letter which he and his companions wrote to the king was in the Syrian or Aramaic language. Gesenius, however (Jes. i. 280), thinks that he may have been a Samaritan. He is called TABELLIUS in 1 Esdr. ii. 16. The name of Tobit the father of Tobit is probably the same.

W. A. W.

TABELLIUS (טֶבֶלִיעַשׁ): Tabelliaus. 1 Esdr. ii. 16. [TBEEL].

TABERAH (תֶּבֶרָה) [תָּבֵיקָרְאָה]: tabora).

The name of a place in the wilderness of Paran, given from the fact of a "burning among the people by the fire of the Lord" which took place (Num. xi. 3, Dent. iv. 22). It has not been identified, and is not mentioned among the list of encampments in Num. xxxii.

TABERING (תֶּבֶרְנָה): fegyegeumaei: maceruente.

The obsolete word thus used in the A. V. of Nah. ii. 7 requires some explanation. The Hebrew word connects itself with תֵֽבֶרְנָה, a timbrel, and the image which it brings before us in this passage is that of the women of Nineveh, led away into captivity, mourning with the plaintive tones of drums, and beating on their breasts in anguish, as women beat upon timbrels (comp. Ps. lixii. 25 [26], where the same verb is used). The LXX. and Vulg., as above, make no attempt at giving the exact meaning. The Targum of Jonathan gives a word which, like the Hebrew, has the meaning of "typanizantes." The A. V. in like manner reproduces the original idea of the words. The "toburn" or "tabor" is a musical instrument of the drum type, which with the pipe formed the band of a country village. We retain a trace at once of the word and of the thing in the "taborine" or "tambourine" of modern music, in the "tabor" of the A. V. and older English writers. To "tabor," accordingly, is to beat with loud strokes as men beat upon such an instrument. The verb סְאָה (in this sense in Be'erm and Fletch. The Targum Tynanch, which would labor her), and answers with a singular felicity to the exact meaning of the Hebrew.

E. H. P.

TABERNACLE (תֶּבֶרְנָה, שֵׁכָּה, טֶבֶרְנָה): tabernaculum.

The description of the Tabernacle and its materials will be found under "TEAPE." The writer of that article holds that he cannot deal satisfactorily with the structural order and proportions of the one without discussing also those of the other. Here, therefore, it remains for us to treat — (1) of the word and its synonyms; (2) of the history of the Tabernacle itself; (3) of its relation to the religious life of Israel; (4) of the theories of later times respecting it.

1. The Word and its Synonyms. — (1.)

The first word thus used (Ex. xxv. 9) is תֶּבֶרְנָה (Tabernacle), formed from תַּבֵּרְנָה to settle down or dwell, and thus itself = dwelling. It connects itself with the Jewish, though not Scriptural, word Schenchin, as describing the dwelling-place of the Divine Glory. It is noticeable, however, that it is not applied in prose to the common dwellings of men, the tents of the Patriarchs in Genesis, or those of Israel in the wilderness. It seems to belong rather to the speech of poetry (Ps. lxxvii. 2; Cant. i. 8). The loftier character of the word may obviously have helped to determine its religious use, and justifies translators who have the choice of synonyms like "tabernacle" and "tent" in a like preference.

(2.) Another word, however, is also used, more connected with the common life of men: תַּבֵּרְנָה (chafel), the "tent" of the Patriarchal age, of Abraham, and of Isaac, and of Jacob (Gen. iv. 21, &c.). For the most part, as needing something to raise it, it is more often applied to the Sacred Tent, with some distinguishing epithet. In one instance (Ex. xxvii. 10, K. i. 29) it does appear with this meaning by itself. The LXX. not distinguishing between the two words gives σκηφή for both. The original difference appears to have been that תַּבֵּרְנָ which represented the outermost covering, the black goat's hair curtains; תַּבֵּרְנָה, the inner covering, the curtains which rested on the beams (Gesenius, s. v.)
The words are accordingly sometimes translated in Ex. xxxiv. 3, 2 x, 5, 20 (A. V. "the tabernacle of the tent"). Even here, however, the LXX. gives σκηφή only, with the exception of the eue. lecl. of ἡ σκηφὴ τῆς σκηφῆς in Ex. xx. 26.

(3.) תַּבֵּרְנָ בַּבְרְנָה (Ezr. i. 6; akk: abow). ezwa: abow, is applied to the Tabernacle in Ezr. xxiii. 19, xxviii. 24; Josiah vi. 21; iv. 23; 24: Juse. xviii. 31, xx. 18, as it had been, apparently, to the tents of the Patriarchs (Gen. xxvi. 17). So far as it differs from the two preceding words, it expresses more definitely the idea of a fixed, settled habitation. It was therefore fitted for the sanctuary of Israel after the people were settled in Canaan, than during their wanderings.

For us the chief interest of the word lies in its having descended from a yet older order, the first word ever applied in the O. T. to a local sanctuary, "Bet-ha-sil," "the house of God" (Ixxv. xvii. 22), keeping its place, side by side, with other words, tent, tabernacle, palace, temple, synagogue, and at last outliving all of them, rising, in the Christian Ecclesiast, to yet higher uses (1 Tim. iii. 15).

(4.) סְאָה (Kinnah), סְאָה (Milhah): סְאָה, סְאָה (Mishnah), סְאָה, סְאָה: sancta-cum. the holy, consecrated place, and therefore applied, according to the graduated scale of holiness of which the Tabernacle bore witness, to some to the whole structure (Ex. xxv. 8; Lev. xii. 4), sometimes to the court into which none but the priests might enter (Lev. iv. 6; Num. iii. 38; iv. 12), sometimes to the innermost sanctuary of all, the Holy of Holies (Lev. iv. 6?HQ). Here also the word
had an earlier starting-point and a far-reaching history. Ex-Mishpat, the city of judgment, the seat of some old oracle, had been also Kadesh, the sanctuary (Gen. xiv. 7; Ewald, Gesch. Isr. ii. 307). The name el-Khuds clings still to the walls of Jerusalem.

(5.) ড; ́ (Hiclad): ναός; temple, as meaning the stately building, or palace of Jehovah (1 Chr. xxix. 1, 19), is applied more commonly to the Temple (2 K. xiv. 13, etc.), but was used also (probably at the period when the thought of the Temple had attained the religious significance of the time) of the Tabernacle at Shiloh (1 Sam. i. 9, iii. 3) and Jerusalem (Ps. v. 7). In either case the case that the word which embodies, that the "tent," the "house," is royal, the dwelling-place of the great king.

(6.) The two words (a) and (b) receive a new meaning in combination (a) with ́ (mō'cād), and (b) with ́, ́ (kā'led). To understand the full meaning of the distinctive titles thus formed is to possess the key to the significance of the whole Tabernacle. (a.) The primary force of ́ is "to meet by appointment," and the phrase ́, ́ has therefore the meaning of "a place of or for a fixed meeting." Acting on the belief that the meeting in this case was that of the worshipers, the A. V. has uniformly rendered it by "tabernacle of the congregation" (so Sch. Schmidt, "tendarium conventus," and Luther, "Stiftshausen," while the LXX. and Vulg. confounding it with another epithet, have rendered both by ́ and ́, and "tabernacularum testimini." None of these renderings, however, bring out the real meaning of the word. This is to be found in what may be called the locus classicus, as the interpretation of all words connected with the Tabernacle. «This shall be continued burnt-offering ... at the door of the tabernacle of meeting (́) where I will meet you (́), ́, ́, ́ among the children of Israel. And I will meet (́, ́, ́) the tabernacle of meeting ... and I will dwell (́, ́) among the children of Israel, and will be their God. And they shall know that I am the Lord their God" (Ex. xxiv. 44-46). The same central thought occurs in Ex. xxiv. 22. «There I will meet with thee (comp. also Exxxv. 6, 35; Num. xxvii. 8).» It is clear, therefore, that "congregation" is inadequate. Neither the gathering of the worshipers only, but the meeting of God with his people, to commune with them, to make himself known to them, was what the name embodied. Ewald has accordingly suggested Officien-templi = Tent of Revelation, as the best equiv.

a a InActs vii 46, "tabernacle" in the A. V. is archaistic. It should be "habitation" or "place of abode" (see Scholdfield's Hebrewsfor the Layman, p. 49). David desired to build a Temple for Jehovah; the Tabernacle had already existed for generations.

b An interesting parallel is found in the preparations for the Temple. There also the extreme cisterns were among the things which the Lord made David (Afterbäumer, p. 139). This made the place a sanctuary. Thus it was that the tent was the dwelling, the house of God (Bühr, Symbolik, i. 81).

(7.) The other compound phrase, (b,) ́, ́, as connected with ́ (to bear witness), is rightly rendered by ́, ́, tabernaculum testimonii, the Wörterbuch des Zeugnisses, the tent of the testimony" (Num. ix. 15), "the tabernacle of witness" (Num. xiii. 7, xviii. 2). In this case the tent derives its name from that which is the centre of its holiness. The two tables of stone within the ark are emphatically the testimony (Ex. xxv. 16, 21, xxxi. 18). They were to all Israel the abiding witness of the nature and will of God. The tent, by virtue of its relation to them, become the witness of its own significance as the meeting-place of God and man. The probable connection of the two distinct names, in sense as well as in sound (Bühr, Symbol. i. 83; Ewald, Alt. p. 230), gave, of course, a force to each which no translation can represent.

II. History. — (1.) The outward history of the Tabernacle begins with Ex. xxv. It comes after the first great group of Laws (xix.-xxiii.), after the covenant with the people, after the vision of the Divine Glory (xiv.). For forty days and nights Moses is in the mount. Before him there lay a problem, as measured by human judgment, of gigantic difficulty. In what fit symbols was he to embody the great truths, without which the nation would sink into brutality? In what way could those symbols be guarded against the evil which he had seen in Egypt, of idolatry the most degrading? He was not left to solve the problem for himself. There rose before him, not without points of contact with previous associations, yet in no degree formed out of them, the "pattern" of the Tabernacle. The lower analogies of the painter and the architect seeing, with their inward eye, their completed work, before the work itself begins, may help us to understand how it was that the vision on the mount included all details of form, measurement, materials, the order of the ritual, the apparel of the priests. He is directed in his choice of the two chief artists, Bezaleel of the tribe of Judah, Aholibab of the tribe of Dan (xxxi.). The sin of the golden calf apparently postpones the execution. For a moment it seems as if the people were to be left without the Divine Presence itself, without any recognized symbol of it (Ex. xxxiii. 3). As in a transition period, the whole future depending on the patience of the people, on the intercession of their leader, a tent is pitched, probably that of Moses himself, outside the camp, to be provisionally the Tabernacle of Meeting. There the mind of the Lawgiver could be passed on to every offender fellowship with the mind of God (Ex. xxxiii. 11), learns to think of Him as "merciful and gracious" (Ex. xxxiv. 6), in the strength of that thought is led back to the fulfillment of the plan which had seemed likely to end, as it began, in vision. Of this provisional
The Tabernacle

Tabernacle it has to be noticed, that there was as yet no ritual and no priesthood. The people went out to it as to an oracle (Ex. xxxiii. 7). Joshua, though the tribe of Ephraim, had free access to it (Ex. xxxii.)

(2) Another outline Law was, however, given; another period of solitude, like the first, followed. The work could now be resumed. The people offered the necessary materials in excess of what was wanted (Ex. xxxvi. 5, 6). Other workmen (Ex. xxxvii. 2) and work-women (Ex. xxxviii. 25) placed themselves under the direction of Bezalel and Aholiah. The parts were completed separately, and then, on the first day of the second year from the Exodus, the Tabernacle itself was erected and the ritual appointed for it begun (Ex. xli. 2).

(3) The position of the new tent was itself significant. It stood, not, like the provisional Taber- nacle, at a distance from the camp, but in its very centre. The multitude of Israel, hitherto scattered with no fixed order, were now, within a month of its erection (Num. ii. 2), grouped round it, as around the dwelling of the unseen Captain of the Host, in a fixed order, according to their tribal rank. The Priests on the east, the other three families of the Levites on the other sides, were closest in approxi- mately the order of their preference, which is marked in the precept:

[LEVITES.] In the wider square, Judah, Zebulun, Issachar, were on the east; Ephraim, Manassés, Benjamin, on the west; the less conspicuous tribes, Dan, Asher, Naphtali, on the north; Reuben, Simeon, Gad, on the south side. When the army put itself in order of march, the position of the Taber- nacle, carried by the Levites, was still central, the tribes of the east being on the north and west in the rear (Num. xii. 14). Upon it there rested the symbolic cloud, dark by day, and fiery red by night (Ex. xl. 38). When the cloud removed, the host knew that it was the signal for them to go forward (Ex. xl. 36, 37; Num. ix. 17).

As long as it remained, whether for a day, or month, or year, they continued where they were (Num. xii. 1-23). Each march, it seems, was the same, in the order and sequence. The Levites, under the direction of the High-Priest, the sons of Aaron, prepared the removal by covering everything in the Holy of Holies with a purple cloth (Num. iv. 6-15).

(4) In all special facts connected with the Taber- nacle, the original thought reappears. It is the place where men meet with God. There the Spirit "comes upon" the seventy Elders, and they prophesy (Num. xi. 24, 25). Thither Aaron and Miri- am are called out, when they rebel against the servant of the Lord (Num. xii. 4). They are the "sons of the Lord" who appear after the unfaithful- ness of the twelve spies (Num. xiv. 10), and the rebellion of Korah and his company (Num. xvi. 10, 42), and the sin of Meribah (Num. xx. 6). Thither, when there is no sin to punish, but a difficulty to be met, do the daughters of Zelophehad come to bring their case "before the Lord" (Num. xxvi. 2). There, when the death of Moses draws near, is the solemn "charge" given to his successor (Num. xxvii. 14).

(5) As long as Canaan remained unoccupied, and the people were still therefore an army, the Tabernacle was probably moved from place to place, wherever the host of Israel was, for the time, encamped, at Gilgal (Josh. iv. 19), in the valley between Ebal and Gerizim (Josh. viii. 30-35); again, at the headquarters of Gilgal (Josh. ix. 6, x. 15, 43); and, finally, as at "the place which the Lord had chosen," at Shiloh (Josh. ix. 27, xviii. 1). The reasons of the successive changes are not given. Partly, per- haps, its central position, partly its connection to the powerful tribe of Ephraim, the tribe of the great captain of the host, may have determined the preference. There it continued during the whole period of the Judges, the gathering-point for "the heads of the fathers" of the tribes (Josh. xxi. 5), for councils of peace or war (Josh. xxi. 12; Judg. xxvi. 12), for annual solemn dances, in which the women of Shiloh were conspicuous (Judg. xxi. 21).

There, too, as the religion of Israel sunk towards the level of an orphic heathenism, troops of women assembled, shameless as those of Midian, worshippers of Jehovah, and, like the ἱερόπολοι of heathen temples, concubines of his priests (1 Sam. ii. 22). It was far, however, from being what it seemed to be, only one of those pagan sanctuaries, the witness against a localized and divided worship. The old religion of the high places kept its ground. Altars were erected, at first under protec- tion, and with reserves, as being not for sacrifice (Josh. xxi. 26); afterwards freely and without scruple (Judg. vi. 24, xvii. 19). Of the names by which the one special sanctuary was known at this time, the "Holy Place," or the "Temple," of Jeroham (1 Sam. i. 9, 24, iii. 3, 15) are most prominent.

(6) A state of things which was rapidly assimilating the worship of Jehovah to that of Ash- saroth, or My butterfly, needed to be broken up. The Ark of God was taken and the sanctuary lost its glory; and the Tabernacle, though it did not perish, never again recovered its former position. Samuel, at once the Luther and the Alfred of Is- rael, who had grown up within its precincts, treats it as an abandoned shrine (so Ps. lxxxviii. 60), and sacrifices elsewhere, at Mizpeth (1 Sam. vii. 9), at Ramah (ix. 12, x. 14), at Gilgal (x. 8, xi. 15). It probably became once again a miracle sanctuary, less honored as no longer possessing the symbol of the Divine Presence, yet cherished by the priest- hood, and some portions, at least, of its ritual kept up. For a time it seems, under Saul, to have been settled at Nibeth (1 Sam. xxvi. 1-6), which thus became what it had not been before—a priestly city. The massacre of the priests and the flight of Abiathar must, however, have robbed it yet further of its glory. It had before lost the Ark. It now lost the presence of the High-Priest, and with it the oracular ephod, the Urim and the Thummim (1 Sam. xxix. 20, xxix. 6). What change of fate then followed we do not know. The fact that all Israel was encamped, in the last days of Saul, at Gilboa, and that there Saul, though with- out success, inquired of the Lord by Urim (1 Sam. the original practice (comp. Ewald, Art. "Israel") in the dances of Judg. xxvi. 21, we have a stage of transition.

a The occurrence of the same distinctive word in Ex. xxxviii. 8, implies a recognized dedication of some temple of a town to the service of the Tabernacle, probably as singers and dan- cers. What we find under Eil was the corruption of the original practice (comp. Ewald, Art. "Israel").

b Ewald (Geschichte, ii. 549) infers that Shiloh itself was conquered and laid waste.
xxviii. 4-6) makes it probable that the Tabernacle, as of old, was in the encampment, and that Abiathar had returned to it. In some way or other, it found its way to Gibeon (1 Chr. xvi. 39). The anomalous separation of the two things which, in the original order, had been joined, brought about yet greater anomalies; and, while the ark remained at Kephirah-jeulin, the Tabernacle at Gibeon connected itself with the worship of the high-places (1 K. iii. 4). The capture of Jerusalem and the erection there of a new Tabernacle, with the ark, of which the old had been deprived (2 Sam. vi. 17: 1 Chr. xv. 1), left it little more than a traditional, historical sanctity. It retained only the old altar of burnt-offerings (1 Chr. xxi. 29). Such as it was, however, neither king nor people could bring themselves to sweep it away. The double service went on: Zadok, as high-priest, officiated at Gibeon (1 Chr. xvi. 20); the more recent, more prophetic service of psalms and hymns and music, under Asaph, gathered round the Tabernacle at Jerusalem (1 Chr. xvi. 4, 37). The divided worship continued all the days of David. The sanctity of both places was recognized by Solomon on his accession (1 K. iii. 15: 2 Chr. i. 9). But it was not wise that they should be thus united; and, as long as it was simply Tent against Tent, it was difficult to divide between them. The purpose of David fulfilled by Solomon, was that the chias of both should merge in the higher glory of the Temple. Some, Abiathar probably among them, clung to the old order, in this as in other things [SOLMONS, Urim and Thummim], but the final day at last came, and the Tabernacle of Meeting was either taken down, or left to perish and be forgotten. So a page in the religious history of Israel was closed. So the disaster of Shiloh led to its natural consumption.

III. Relation to the Religious Life of Israel. —

(1) Whatever connection may be traced between other parts of the ritual of Israel and that of the nations with which Israel had been brought into contact, the thought of the Tabernacle meets us as entirely new. a The " house of God " [Bethleem] of the Patriarchs had been the large " pillar of stone " (Gen. xxviii. 18, 19), bearing record of some high spiritual experience, and tending to lead men upward to it (Köhr, Symbol piasim, i. 93), or the grove which, with its dim, doubtful light, attuned the souls of men to a divine awe (Gen. xxx. 34). The temples of Egypt were stately and colossal, hewn in the solid rock, or built of huge blocks of granite, as unlike as possible to the sacred tent of Israel. The command was one in which we can trace a special fitness. The stately temples belonged to the house of bondage which they were hallowing. The sacred places of their fathers were in the land toward which they were journeying. In the midst, while they were to be wanderers in the wilderness. To have set up a Bethel after the old pattern would have been to make that a resting-place, the object then or afterwards of devout pilgrimage; and the multiplication of such places at the different stages of their march would have led inevitably to polytheism. It would have failed utterly to lead them to the thought which they needed most — of a Divine Presence never absent from them, protecting, ruling, judging. A sacred tent, a moving Bethel, was the fit sanctuary for a people still nomadic. b It was capable of being united afterwards, as it actually came to be, with the " grove " of the older cultus (Josh. xxiv. 26).

(2) The structure of the Tabernacle was obviously determined by a complex and profound symbolism; but its meaning remains one of the things at which we can but dimly guess. No interpretation is given in the Law itself. The explanations of Jewish writers long afterwards are manifestly wile of the mark. That which meets us in the Epistle to the Hebrews, the application of the types of the Tabernacle to the mysteries of Redemption, was latent till those mysteries were made known. And yet we cannot but believe that, as each portion of the wonderful order rose before the inward eye of the lawgiver, it must have embodied distinctly manifold truths which he apprehended by himself and transmitted long after it had entered, indeed, into the order of a divine education for Moses and for Israel: and an education by means of symbols, no less than by means of words, presupposes an existing language. So far from shrinking, therefore, as men have timidly and unwisely shrunk (Witsius, Egyptiogon, in Ugdomi, Thes. vol. i.) from asking what thoughts the Egyptian education of Moses would lead him to connect with the symbols he was now taught to use, we may see in it a legitimate method of inquiry — almost the only method possible. Where that fails, the gap may be filled up (as in Bahr, Symbol piasim) from the analogies of other nations, indicating, where they agree, a widespread primal symbolism. So far from blaring to prove, at the price of ignoring or distorting facts, that everything was till then unknown, we shall as little expect to find it so, as to see in Hebrew a new and heaven-born language, spoken for the first time on Sinai, written for the first time on the Two Tables of the Covenant.

(3) The thought of a graduated sanctity, like that of the outer court, the Holy Place, the Holy of Holies, had its counterpart, often the same number of stages, in the structure of Egyptian temples (Böhr, i. 210). The interior Adytum (to proceed from the innermost recess outward) was small in proportion to the rest of the building, and commonly, as in the Tabernacle (Joseph. Ant. ii. 6, § 3), was at the western end (Spencer, ii. 2), and was unlighted from without.

In Israel, as at least, was the sacred Aytum, the culminating point of holiness, containing the highest and most mysterious symbols, winged figures, generally like those of the cherubim (Wilkinson, Ant. Egypt. v. 275: Kenrick, Egypt. i.

a The language of 2 Chr. v. 5, leaves it doubtful whether the Tabernacle there referred to was that at Jerusalem or Gibeon. (But see Joseph. Ant. viii. 4, § 1.)

b Spencer (De leg. Hebrew. iii. 3) labors hard, but not successfully, to prove that the tabernacles of Moab (Josh. xii. 20), were the prototype of the Tent of Meeting. It has to be remembered, however, (1) that the word used in Amos (sixthis) is never used of the Tabernacle, and means something very different; at

(2) that the Moloch-worship represented a defect of the people, not of the direction of the Temple. On these grounds, then, and not from any abstract repugnance to the idea of such a transfer, I abide by the statement in the text.

c Analogies of like wants met in a like way, with no considerable historical connection, are to be found among the Goths and other tribes of northern Africa (S'il. Ital. iii. 280), and in the Sacred Tent of the Carthagean encampments (Bod. Sic. xx. 65).
The Tabernacle, the emblem of stability and life. Here were outward points of resemblance of all elements of Egyptian worship this was one which could be transferred with least hazard, with most gain. No one could think that the Ark itself was the likeness of the God he worshipped. When we ask what gave the Ark its holiness, we are led on at once to the infinite difference, the great gulf between the two systems. That of Egypt was predominantly consitent, starting from the productive powers of nature. The symbols of these powers, though not originally involving what we know as impiety, tended to it fatally and rapidly (Spencer, iii. 1; Warburton, Divine Legation, II. 4, note). That of Israel was predominantly ethical. The nation was taught to think of God, not chiefly as revealed in nature, but as manifesting himself in and to the spirits of men. In the Ark of the Covenant, as the highest revelation then possible of the Divine Nature, were the two tables of stone, on which were graven, by the teaching of the Divine Spirit, and therefore by "the finger of God," the great unchanging laws of human duty which had been proclaimed on Sinai. Here the lesson taught was plain enough. The highest knowledge was as the simplest, the esoteric as the exoteric. In the depths of the one was goodness, and may be said to have been, for the typical and symbolic bottoms of all Israel, there was the revelation of a righteous Will requiring righteousness in man (Saussure, Archäol. c. 77). And over the Ark was the Copheth (Mercy-Seat), so called with a twofold reference to the root-meaning of the word. It covered the Ark. It was the witness of a mercy covering sins. As the "footstool" of God, the "throne" of the Divine Glory, it declared that over the Law which seemed so rigid and unblemish there rested the compassion of One forgiving "iniquity and transgression." And over the Mercy seat were the Cherubim, reproducing, in part at least, the symbolism of the great Hittite races, forms familiar to Moses and Israel, needing no description for them, interpreted for us by the fuller vision of the later prophets (Ez. 1. 5-11, x. 8-16, xii. 19), or by the winged forms of the imagery of Egypt. Representing as they did the manifold powers of nature, created life in its highest form (Ehr, i. 341), their "overshadowing wings," "meeting" as in token of perfect harmony, declared that nature as well as man found its highest glory in subjection to a Divine Law, that men might take refuge in that Order, not as "the shadow of the wings" of God (Stanley, Jewish Church, p. 98). Placed where those and other like figures were, in the temples of Egypt, they might be hindrances and not help, might sensitize instead of purifying the worship of the people. But it was part of the wisdom which we may reverently trace in the order of the Tabernacle, that while Egyptian symbols are retained, as in the Ark, the Cherubim, the URIM and the THUMMIM, their place is changed. They remind the high-priest, the representative of the whole nation, of the truths on which the order rests. The people cannot bow down and worship that which they neither see.

The material not less than the forms, in the Holy of Holies was significant. The aerin or shittim wood, least liable, of woods then accessible, to decay, might well represent the imperishability of Divine Truth, of the Laws of Duty (Bähr, i. 286). Ark, mercy-seat, cherubim, the very walls, were all overlaid with gold, the noblest of all metals, the symbol of light and purity, sun-light itself as it were, fixed and embossed, the token of the incorruptible, of the glory of a great king (Bähr, i. 292). It was not without meaning that all this lavish expenditure of what was most costly was placed where none might gaze on it. The gold thus offered taught man, that the noblest acts of tenderness and sacrifice are not those which are done that man may be rich, but those for the sake of which are known only to Him who "swoth in secret" (Matt. vi. 4). Dimensions also had their meaning. Difficult as it may be to feel sure that we have the key to the enigma, there can be but little doubt that the older religious systems of the world did attach a mysterious significance to each separate number; that the training of Moses, as afterwards the far less complete initiation of Pythagoreans in the symbolism of Egypt, must have made that transparently clear to him, which to us is almost impenetrably dark. To those who think over the words of two great teachers, one heathen ("Pituarch, De Is. et Os. p. 411), and one Christian (Ch. M. Strom. vi. pp. 84-87), who had at least studied as far as they could the mysteries of the religion of Egypt, and had inherited part of the old system, the precision of the numbers in the plan of the Tabernacle will no longer seem unaccountable. If in a cosmic system, a right angled triangle with the sides three, four, five, represented the triad of Osiris, Isis, Orus, creative force, receptive matter, the universe of creation ("Pituarch, l. c.), the perfect curve of the Holy of Holies, the constant recurrence of the numbers 3 and 4, may well be accepted as

480. "The equivalence of the two phrases, "by the Spirit of God," and "by the finger of God," is seen by comparing Matt. xii. 28 and Lu. xvi. 25. Comp. also the language of Clement of Alexandria (Strom. vi. § 122) on the use of the "hand of the Lord," in 1 K. xviii. 46; 2 K. iii. 15; Ez. i. 3, iii. 14; 1 Chr. xxviii. 19.

537. These, or an edition, of the root of Copheth, the meaning of "to scrape," "eraser," derives from that meaning the idea implied in the LXX. άναρτησις, and denies that the word ever signified καθοπτρις (Althus. pp. 128, 129).

577. A full discussion of the subject is obviously impossible here, but it may be useful to exhibit briefly the chief thoughts which have been connected with the numbers that are most prominent in the language of symbols. Arbitrarily some of them may seem, a sufficient indication to establish each will be found in Bähr's elaborate dissertation, i. 128-255, and other

works: Comp. Wilkinson, Ant. Ec. 1. 150-159, Leyer in H.-Erg's Fortluft, ii. 307, and appendix. One - The Godhead, Eternity, Life, Creative Force the Sun, Moon. Two - Matter, Time, Death, Receptive Capacity, the Moon, Woman. Three - (as a number, or in the triangle) - The Universe in connection with God, the Absolute in itself, the Unconditioned, God. Four - (as the number, or in the square or cube) - Conditioned Existence, the World as created, Divine Order, Revelation. Seven - (as 3+4) - The Union of the World and God, Rest (as in the Sabbath), Peace, Blessing, Purification. Ten - (as 2+2+2+2) - Completeness, moral and physical, Perfection. Five - Perfection half attained, Incompleteness. Twelve - The Signs of the Zodiac, the Cycle of the Senses; in Israel the ideal number of the people, of the Covenant of God with them.
symbolizing order, stability, perfection (Bähr, i. 225).a

(4.) Into the inner sanctuary neither people nor the priests as a body ever entered. Strange as it may seem, that it which everything represented light and life was left in utter darkness, in profound solitude. Once only in the year, on the DAY OF ATONEMENT, might the high-priest enter, and in its holiest, its life paralleled in the spiritual life. Death and life, light and darkness, are wonderfully united. Only through death can we truly live. Only by passing into the "thick darkness," where God is (Ex. xx. 21; I K. viii. 12), can we enter at all into the Light inaccessible," in which He dwells everlastingly. The solemn annual entrance, like the withdrawal of symbolic forms from the gaze of the people, was itself part of a wise and divine order. Intercourse with Egypt had shown how easily the symbols of Truth might become common and familiar things, yet without symbols, the truths themselves might be forgotten. Both dangers were met. To enter once, and only once in the year, into the awful darkness, to stand before the Law of Duty, before the presence of the God who gave it, not in the stately rites that became the representative of God to man, but as representing man in his humiliation, in the garb of the lower priest, bare-footed and in the linen ephod, to confess his own sins and the sins of the people, this was what connected the Atonement-day (Cyparix) with the Mercy-seat (Cyparix a). And to come there with blood, the symbol of life, touching with that blood the mercy-seat, with libation, the symbol of intercession (Lev. xvi. 12-14), what did that express but the truth: (1) that man must draw near to the righteous God with no lower offering than the pure worship of the heart, with the living sacrifice of body, soul, and spirit: (2) that could such a perfect sacrifice be found, it would have a mysterious power working beyond itself, in proportion to its perfection, to cover the multitude of sins?

(5.) From all others, from the high-priest at all other times, the Holy of Holies was shrouded by the double Veil, bright with many colors and strange forms, even as curtains of golden tissue were to be seen hanging before the Altar of a Egyptian temple, a strange contrast often to the bestial form behind them (Clem. Al. Ped. iii. 4). In one memorable instance, indeed, the veil was the witness of higher and deeper thoughts. On the shrine of Isis at Sais, there were to be read words which, though pointing to a pantheistic rather than an ethical religion, were yet wonderful in their lottiness, "I am all that has been (μαρ γος γεγονος), and is, and shall be, and my veil no mortal hath withdrawn" (ʌρεάδραφος) (De Zeyt. Or. p. 384). Like, and yet never, unlike the truth, we feel that no such words could have appeared on the veil of the Ta'bernacle. In that identification of the world and God, all idolatry was latest, as in the faith of Israel in the LAM, all idolatry was excluded.8 In that dispair of any withdrawal of the veil, of any revelation of the Divine Will, there were latent all the arts of an unselecting priestcraft, subduing symbols, poses, rituals for such a revelation. But what then was the meaning of the veil which met the gaze of the priests as they did service in the sanctuary? Colors in the art of Egypt were not less significant than number, and the four bright colors, probably, after the fashion of that art, in parallel bands, blue symbol of heaven, and purple of kingly glory, and crimson of life and joy, and white of light and purity (Bähr, i. 355-356), formed in their combination no remote similitude of the rainbow, which of old had been a symbol of the Divine covenant with man, the pledge of peace and hope, the sign of the Divine Presence (Ex. i. 28; Ezek. Alterh. p. 333). Within the veil, light and truth were seen in their unity. The veil itself represented the infinite variety, the πολυτοικλον σκοτίa of the divine order in Creation (Eph. iii. 19). And there again were seen copied upon the veil, the mysterious forms of the cherubim; how many, or in what attitude, or of what size, or in what material, we are not told. The words "cuming work" in Ex. xxxvi. 35. applied elsewhere to combinations of embroidery and metal (Ex. xxviii. 15, xxxvi. 4), justify perhaps the conjecture that here also they were of gold. In the absence of any other evidence it would have been, perhaps, natural to think that they reproduced on a larger scale, the number and the position of those that were over the mercy-seat. The visions of Ezekiel, however, reproducing, as they obviously do, the forms with which his priestly life had made him familiar, indicate not less than four (c. i. and x.), and those not all alike, having severally the faces of a man, a lion, an ox, and an eagle, strange symbolic words, which elsewhere we should have identified with idolatry, but which here were bearing witness against it, emblems of the manifold variety of creation as at once manifesting and concealing God.

(6.) The outer sanctuary was one degree less awful in its holiness than the inner. Silver, the type of Human Purity, took the place of gold, the type of the Divine glory (Bähr, i. 284). It was to be trodled daily by the priests, as by men who lived in the perpetual consciousness of the nearness of God, of the mystery behind the veil. Barefooted and in garments of white linen, like the priests of Isis [priests], they accomplished their ministrations. And here, too, there were other emblems of Isis [priests]: Would it not open at the sight of light from without, it was illumined only by the golden LAMP with its seven lights, one taller than the others, as the Sabbath is more sacred than the other days of the week, never all extinguished together, the perpetual symbol of all derived gifts of wisdom and holiness in man, reaching their mystical perfection when they shine in God's sanctuary to his glory (Ex. xxx. 24, xxvii. 20; Zech. iv. 1-14). The SHIL-HLEED, the "braid of faces," of the Divine Presence, not unlike in outward form to the sacred cakes which the Egyptians placed before the shrines of their gods, served as a token that, though there was no form or likeness of the Godhead, He was yet there, accepting all offerings, recognizing in particular that special offering which represented the life of the nation at once in the distinctness of its tribes and in its

---

a The symbol reappears in the most startling form in the closing visions of the Apocalypse. There the heavenly Jerusalem is described, in words which absolutely exelude the literalism which has sometimes been blindly applied to it, as a city four-square, 12,000 furlongs in length and breadth and height (Rev. xxi. 15).

b The name Jehovah, it has been well said, was the reading number of the veil of Sais." (Stanley Jewish Church, p. 110.)
anity as a people (Ewald, Alcette, p. 120). The meaning of the Altar of Incense was not less obvious. The cloud of fragrant smoke was the natural, almost the universal, emblem of the heart’s adoration (Ps. xxviii. 2). The incense sprinkled on the sheen-bread and the lamp taught men that all other offerings needed the intermingling of that adoration. Upon that altar no “strange fire” was to be kindled. When fresh fire was needed it was to be taken from the Altar of Burn-offering in the outer court (Lev. ix. 24, x. 1). Very striking, as compared with what is to follow, is the sublimity and the purity of these symbols. It is as though the priestly order, already leading a consecrated life, were capable of understanding a higher language which had to be translated into a lower for those that were still without (Satalshitz, Archiv. § 77).

(7.) Outside the tent, but still within the consecrated precincts, was the Court, fenced in by an enclosing gateway, yet open to all the congregation as well as to the Levites, those only excepted who were ceremonially unclean. No Gentile might pass beyond the outermost of the holy curtains which every member of the priestly nation might thus “draw near” to the presence of Jehovah. Here therefore stood the Altar of Burn-offerings, at which Sacrifices in all their varieties were offered by penitent or thankful worshippers (Ex. xxvii. 1–5, xxxviii. 1), the brazen Laver at which those worshippers purified themselves before they sacrificed, the priests before they entered into the sanctuary (Ex. xxx. 17–21). Here the graduated scale of holiness ended. What Israel was to the world, fenced in and set apart, that the Court of the Tabernacle was to the surrounding wilderness, just as the distinction between it and the sanctuary answered to that between the sons of Aaron and other Israelites, just as the idea of holiness culminated personally in the high-priest, locally in the Holy of Holies.

IV. Theories of Later Times.—(1.) It is not probable that the elaborate symbolism of such a structure was understood by the rude and sensual multitudes that came out of Egypt. In its fullness perhaps no mind but that of the lawgiver himself ever entered into it, and even for him, one half, and that a half of the meaning of it, must have been altogether latent. Yet it was not the less, was perhaps the more fitted, on that account to be an instrument for the education of the people. To the most ignorant and disturbed it was at least a witness of the nearness of the Divine King. It met the craving of the human heart which prompts to worship, with an order which was neither idolatrous nor impure. It taught men that their fleshly nature was the hindrance to worship; that it rendered them useless: that only by subduing it, killing it, as they killed the bullock and the goat, could they offer up an acceptable sacrifice; that such a sacrifice was the condition of forgiveness, — a higher sacrifice than any they could offer the ground of that forgiveness. The sins of the past were considered as belonging to the fleshly nature which was slain and offered, not to the true inner self of the worships. More thoughtful minds were led inevitably to higher truths. They were not slow to see in the Tabernacle the parable of God’s presence manifested in Creation. Darkness as his pavilion (2 Sam. xxii. 12). He has made a Tabernacle for the Sun (Ps. xix. 4). The heavens were spread out like its curtains. The beams of his chambers were in the mighty waters (Psa. civ. 2, 3; Is. xi. 22; Louwth, De Sac. Pos. viii.). The majesty of God seen in the storm and tempest was as of one who rides upon a cherub (2 Sam. xxiii. 11). If the words, “He that dwelleth in the tabernacle,” spoke on the one side of a special, localized manifestation of the Divine Presence, they spoke also on the other of that Presence as in the heaven of heavens, in the light of setting suns, in the blackness and the flashes of the thunder-clouds.

(2.) The thought thus uttered, essentially poetical in its nature, had its fit place in the psalms and hymns of Israel. It lost its beauty, it led men on a false track, when it was formalized into a system. At a time when Judaism and Greek philosophy were alike effete, when a feeble physical science which could read nothing but its own thoughts in the symbols of an older and deeper system, was after its own fashion rationalizing the mystery of the universe, there were sound Jewish writers willing to apply the same principle of interpretation to the Tabernacle and its order. In that way, it seemed to them, they would secure the respect even of the men of letters who could not bring themselves to be Prophets. The result appears in Josephus and in Philo, in part also in Clement of Alexandria and Origen. Thus interpreted, the entire significance of the Two Tables of the Covenant and their place within the ark disappeared, and the truths which the whole order represented became nominal instead of ethical. If the special idolatry of one writer (Philo, De Praef.) led him to see in the Holy of Holies and the Sanctuary that which answered to the Hellenic distinctions between the visible (ophyn) and the spiritual (opsyard), the coarser, less intelligent Josephus goes still more completely into the new system. The Holy of Holies is the visible firmament in which God dwells, the Sanctuary as the earth and sea which men inhabit (Act. iii. 6, § 4, 7; § 7). The twelve leaves of the sheen-bread represented the twelve months of the year, the twelve signs of the Zodiac. The seven lamps were the seven planets. The four colors of the veil were the four elements (στοιχεῖα), air, fire, water, earth. Even the wings of the cherubim were, in the eyes of some, the two hemispheres of the universe, or the constellations of the Greater and the Lesser Bears (Clem. Alex. Strom. v. § 35). The table of sheen-bread and the altar of incense stood on the north, because north winds were most fruitful, the lamp on the south because the motions of the planets were southward (ibid. §§ 34, 35). We need not follow such a system of interpretation further. It was not unnatural that the authority with which it started should secure for it considerable respect. We find it reappearing in some Christian writers, Chrysostom (Hom in John, Bp.); and Theodot (Quœrat, in 1 Cor.); — in some Jewish, Ben Uziel, Kimchi, Akbaranel (Jähr. i. 103 f.). It was well for Christian thought that the Church had in the Epistle to the Hebrews and the Apocalypse of St. John that which helped to save it from the pedantic purities of this physical-theology.4

4 It is curious to note how in Clement of Alexandria the two systems of interpretation cross each other, leading sometimes to extravagances like those in the text, sometimes to thoughts of a more lofty and true
Non vagandum di lor, ma guarda e passa.

(5.) It is not quite as open to us to ignore a speculative hypothesis which, though in itself unsubstantial enough, has been lately revivified under circumstances which have given it prominence. It has been maintained by Von Bohlen and Vatke (Bahr, i 117, 275) that the commandments and the descriptions relating to the Tabernacle in the Books of Moses are altogether unhistorical, the result of the effort of some late compiler to emblazon the orbit of his people's history by transferring to a remote antiquity what he found actually existing in the Temple, modified only so far as was necessary to fit it in to the theory of a migration and a wandering. The structure did not belong to the time of the Exodus, if indeed there ever was an Exodus. The Tabernacle thus becomes the mythical aftergrowth of the Temple, not the Temple the historical sequel to the Tabernacle. It has lately been urged as tending to the same conclusion that the circumstances connected with the Tabernacle in the Pentateuch are manifestly unhistorical. The question to which these remarks are directed is, whether a court which could not have contained more than a few hundred men (Cf. Deuteron. Penenatech and Book of Joshua, P. l. c. iv. v.) the number of priests was utterly inadequate for the services of the Tabernacle (ibid. c. xx.). The narrative of the head-money collection, of the gifts of the people, is full of anachronisms (ibid. c. xiv.).

(6.) Some of these objections—those, e.g., as to the number of the first-born, and the disproportionate smallness of the priesthood, have been met by anticipation in remarks under PRIESTS and LEPITIDES, written some months before the objections, in their present form, appeared. Others bearing upon the general veracity of the Pentateuch history it is impossible to discuss here. It will be sufficient to notice such as bear immediately upon the subject of this article. (1.) It may be said that this theory, like other similar theories as to the history of Christianity, adds to instead of diminishing difficulties and anomalies. It may be possible to make out plausibly that what purports to be the first period of an institution, is, with all its docents, the creation of the second; but the question then remains how to reconcile the existence of the second. The world rests upon an elephant, and the elephant upon a tortoise, but the footing of the tortoise is at least somewhat insecure. (2.) Whatever may be the weight of the argument drawn from the alleged presence of the whole congregation at the door of the Tabernacle tells with equal force against the historical existence of the Temple and the narrative of its dedication. There also when the population numbered some seven or eight millions (2 Sam. xxiv. 9), "all the men of Israel" (1 K. viii. 2), "all the congregation" (ver. 5), all the children of Israel (ver. 65) were assembled, and the king "blessed" all the congregation (xx. 14. 55). (3.) There are, it is believed, undesignated touches indicating the nominal. The wood employed for the Tabernacle is not the sycamore of the valleys nor are, as might be expected, full of interest. As in a vision, which looks sight of all time limits, the Temple of the Tabernacle is seen in heaven (Rev. xv. 5) and yet in the heavenly Jerusalem there is no Temple seen (xxi. 22). And in the heavenly Temple there is no longer any veil: it is open, and the ark of the covenant is clearly seen (xxi. 19).
the cedar of Lebanon, as afterwards in the Temple, but the shittim of the Sinaiatic peninsula. [SHITTAM TREE, SHITTIM.] The abundance of fine lines points to Egypt, the seal or dolphin skins ("badgers") in A. V. but see Gesenius s. v. מִזְרָךְ] to the shores of the Red Sea. [BADGER-SKINS.] The Levites are not to enter on their office till the age of thirty, as needing for their work as bearers a man's full strength (Num. iv. 23, 30). Afterwards when their duties are chiefly those of singers and gate-keepers, they were to begin at twenty (1 Chr. xxiii. 24). Would a later history again have excluded the priestly tribe from all share in the structure of the Tabernacle, and left it in the hands of mythical persons belonging to Judah, and to a tribe then so little prominent as that of Dan? (4.) There remains the strong Egyptian stamp impressed upon well-nigh every part of the Tabernacle and its ritual, and implied in other incidents [Comp. Priests, Levites, Urim and Thummim, Brazen Serpent.] Whatever bearing this may have on our views of the things themselves, it points, beyond all doubt, to a time when the two nations had been brought into close contact, when not jewels of silver and gold only, but treasures of wisdom and knowledge were "borrowed" by one people from the other.

To what other period in the history before Samson than that of the Exodus of the Pentateuch can we refer that intercourse? When was it likely that a wild tribe, with difficulty keeping its ground against neighboring nations, would have adopted such a complicated ritual from a system so alien to its own? So far as the written records confirm the period, the facts which when urged by Spencer, with or without a hostile purpose, were denounced as daring and dangerous and unsettling, are now seen to be witnessed to the antiquity of the religion of Israel, and so to the substantial truth of the Mosaic history. They are useful as such by theologians who in various degrees enter their protest against the more destructive criticism of our own time (Hengstenberg, Egypt and the Books of Moses; Stanley, Jewish Church, lect. iv.). (5.) We may, for a moment, put an imaginary case. Let us suppose that the records of the O. T. had given us in 1 and 2 Sam. a history like that which men now seek to substitute for what is actually given, had represented Samuel as the first great preacher of the worship of Elohim; God, or some later prophet as introducing for the first time the name and worship of Jehovah, and that the O. T. began with this (Colenso, P. II. c. xxi.). Let us then suppose that some old papyrus, freshly discovered, slowly deciphered, gave us the whole or the greater part of what we now find in Exodus and Numbers, that there was thus given an explanation both of the actual condition of the people and of the Egyptian element so largely interwined with their ritual. Can we not imagine what jubilant zeal the books of Samuel would then have been "critically examined," what incon sistencies would have been detected in them, how eager men would have been to prove that Samuel had had credit given him for a work which was not his, that not he, but Moses, was the founder of the polity and creed of Israel, that the Tabernacle on Zion, instead of coming fresh from David's creative mind, had been preceded by the humbler Tabernacle in the Wilderness?

1. The following are the principal passages in the Pentateuch which refer to it: Ex. xxiii. 16, where it is spoken of as the Feast of Ingathering, and is brought into connection with the other festivals under their agricultural designations, the Feast of Unleavened Bread and the Feast of Harvest; Lev. xxiii. 34-36, 39-43, where it is mentioned as commemorating the passage of the Israelites through the desert; Deut. xvi. 13-15, in which there is no allusion to the eight day of the octave, and it is described as thanksgiving for the harvest; Num. xxix. 12-38, where there is an enumeration of the sacrifices which belong to the festival; Deut. xxxi. 10-13, where the injunction is given for the public reading of the Law in the Sabbatical year, at the Feast of Tabernacles. In Neh. viii. there is an account of the observance of the feast by Ezra, from which several additional particulars respecting it may be gathered.

2. The time of the festival fell in the autumn, when the whole of the chief fruits of the ground, the corn, the wine, and the oil, were gathered in (Ex. xxiii. 16; Lev. xxiii. 39; Deut. xiii. 13-15). Hence it is spoken of as occurring in the end of the year, when thou hast gathered in thy labors out of the field. Its duration was strictly only seven days (Deut. xvi. 13; Ex. xlv. 25). But it was followed by a day of holy convocation, distinguished by sacrifices of its own, which was sometimes spoken of as an eighth day (Lev. xxiii. 36; Neh. viii. 18).

During the seven days the Israelites were commanded to dwell in booths or hills "formed of the boughs of trees. These huts, when the festival was celebrated in Jerusalem, were constructed in the courts of houses, on the roofs, in the court of the Temple, in the street of the Water Gate, and in the street of the Gate of Ephraim. The boughs were of the olive, palm, pine, myrtle, and other trees with thick foliage (Neh. viii. 15, 16). The command in Lev. xxiii. 40 is said to have been so understood, that the Israelites, from the first day of the feast to the seventh, carried in their hands the fruit (as in the margin of the A. V., not branches, as in the text) of goodly trees, with branches of palm trees, boughs of thick trees, and willows of the brook."

According to Rabbinical tradition, each Israelite used to take ten branches into a bunch, to be carried in his hand, to which the name lulab was given. 

---

A The word מִזְרָךְ means "a hut," and is to be distinguished from מִזְרָךְ, "a tent of skins or cloth," which is the term applied to the Tabernacle of the Congregation. See Gesen. s. v.

B This is the view of the Rabbinites, which appears to be countenanced by a comparison of v. 40 with v. 42. But the Karaites held that the boughs here mentioned were for no other purpose than to cover the huts, and that the willow branches were merely for tying the parts of the huts together.

C The word מָזוּזָה strictly means simply a palm.
The Feast of Tabernacles, and Carpzov, and lambs, offerings according wooden of in batical are ferred by xxxi. (Deut. branch. Buxt. Lex. Talm. c. 1143; Carpzov, App. Crit. p. 416; Drusius, Not. Meg. in Lev. xxiii.]

See Buxt. Lex. Talm. sub 277.7.

The notion of Münster, Godwin, and others, that the eighth day was called "the day of palms," is utterly without foundation. No trace of such a designation is found in any Jewish writer. It probably resulted from a theory that the Feast of Tabernacles must, like the Passover and Pentecost, have a festival to answer to it in the calendar of the Christian Church, and that "the day of palms" passed into Palm Sunday in the Old. These were, the ceremony of pouring out some water of the pool of Siloam, and the display of some great lights in the court of the women.

We are told that each Israelite, in holiday attire, having made up his lulab, before he broke his fast (Fagius in Lev. xxiii.), repaired to the Temple with the lulab in one hand and the citron in the other, at the time of the ordinary morning sacrifice. The parts of the victim were laid upon the altar. One of the priests fetched some water in a golden ever from the pool of Siloam, which he brought into the Court of the Women by the Water Gate. As he entered the trumpets sounded, and he ascended the slope of the altar. At the top of this were fixed two silver basins with small openings at the bottom. Wine was poured into that on the eastern side, and the water into that on the western side, whence it was conducted by pipes into the Kidron (Maimon. ap. Carpzov, p. 419). The holitl was then sung, and when the singers reached the first verse of Ps. xxviii., all the company shook their labas. This gesture was repeated at the 25th verse, and again when they sang the 29th verse. The sacrifices which belonged to the day of the festival were then offered, and special passages from the Psalms were chanted.

In the evening it would seem after the day of holy convocation with which the festival had commenced (had ended), both men and women assembled in the court of the women, expressly to hold a rejoicing for the drawing of the water of Siloam. On this occasion, a degree of unrestrained hilarity was permitted, such as would have been unholying while the ceremony itself was going on, in the presence of the altar and in connection with the offering of the morning sacrifice (Succoth, iv. 9, v. 1, and the passages from the Gem. given by Lightfoot, Temple Service, § 4).

At the same time there were set up in the court two lofty stands, each supporting four great lamps. These were lighted on each night of the festival. It is said that they cast their light over nearly the whole compass of the city. The wicks were furnished from the cast-off garments of the priests, and the supply of oil was kept up by the sons of the priests. Many in the assembly carried flambeaux. A body of Levites, stationed on the fifteen steps leading up to the women's court, played instruments of music, and chanted the fifteen psalms which are called in the A. V. Songs of Degrees (Ps. cxv-cxxviii.). Singing and dancing were afterwards continued for some time. The same ceremonies in the day, and the same joyous meeting in the evening, were renewed on each of the seven days.

It appears to be generally admitted that the c A story is told of Agrippa, that when he was once performing this ceremony, as he came to the words "thou mayst not set a stranger over thee which is not thy brother," the thought of his foreign blood occurred to him, and he was affected to tears. But the bystanders encouraged him, crying out "Fear not Agrippa! Thou art our brother." Lightfoot, T. S. c xvii.

d Dean Alford considers that there may be a referonce to the public reading of the Law at the Feast of Tabernacles, John vii. 19 — "Did not Moses give you the law? and yet none of you keepeth the law" — even if that year was not the Sabbatical year, and the observance did not actually take place at the time
**TABERNACLES. THE FEAST OF**

words of our Saviour (John vii. 37, 38) — "If any man thirst, let him come unto me and drink. He that believeth on me, as the Scripture hath said, out of his belly shall flow rivers of living water." — were suggested by the pouring out of the water of Siloam. The Jews seem to have regarded the rite as symbolical of the water miraculously supplied to their fathers from the rock at Meribah. But they also gave to it a more strictly spiritual significance, in accordance with the use to which our Lord appears to have put it. The seventh, as the number that signifies perfection, must be referred to by our Lord (Is. xi. 3) — "Therefore with joy shall ye draw water out of the wells of salvation." The two meanings are of course perfectly harmonious, as is shown by the use which St. Paul makes of the historical fact (1 Cor. x. 4) — "they drank of that spiritual rock that followed them: and that rock was Christ." But it is very doubtful what is meant by "the last day, that great day of the feast." It would seem that either the last day of the feast itself, that is the seventh, or the last day of the religious observances of the series of annual festivals, the eighth, must be intended. But there seems to have been nothing, according to ancient testimony, to distinguish the seventh, as a great day, compared with the other days: it was scarcely inferior, in not being a day of holy convocation, and in its number of sacrifices, to the first day. On the other hand, it is near certainly that the ceremony of pouring out the water did not take place on the eighth day, though the day might have been, by an easy license, called the great day of the feast, (2 Mac. x. 6; Joseph. Ant. iii. 10, § 4; Philo, De Sect. § 24), Dean Alford reasonably supposes that the eighth day may be meant, and that the reference of our Lord was to an ordinary and well-known observance of the feast, though it was not, at the very time, going on.

We must resort to some such explanation, if we adopt the notion that our Lord's words (John viii. 12) — "I am the light of the world" — refer to the great lamps of the festival. The suggestion must have arisen in the same way, or else from the apparatus for lighting not being removed, although the festival had come to an end. It should, however, be remarked that Bengel, Stier, and some others, think that the words refer to the light of morning which was then dawning. The view that may be taken of the genuineness of John viii. 1-11 will modify the probability of the latter interpretation.

IV. There are many directions given in the Mishna for the dimensions and construction of the huts. They were not to be lower than ten cubits, nor higher than twenty cubits. They were to stand by themselves, and not to rest on any external supports, nor to be under the shelter of a larger building, or of a tree. They were not to be covered with skins or cloth of any kind, but only with bunches, or in port, with reed-cloth or bulrushes. They were to be constructed expressly for the festival, out of new materials. Their forms might vary in accordance with the taste of the owners. According to some authorities, the Israelites built in them during the whole period of the festival (Sifri, in Genesis), but others said it was sufficient if they ate fourteen meals in them, that is, two on each day (Succeh, ii. 6). Persons engaged in religious service, the sick, nurses, women, slaves, and minors, were excepted altogether from the obligation of dwelling in them, and some indulgence appears to have been given to all in very temperaments. (Succeh, ii. 11; Midrash on Lev. xxiii. 40; Buxt. Syn. Jud. c. xxii.).

The furniture of the huts was to be, according to most authorities, of the plainest description. There was to be nothing which was not fairly necessary. It would seem, however, that there was no strict rule on this point, and that there was a considerable difference according to the habits or circumstances of the occupant (Carpzov, p. 415; Buxt. Syn. Jud. p. 451).

It is said that the altar was adorned throughout the seven days with sprigs of willows, one of which each Israelite who came into the court brought with him. The great number of the sacrifices has been already referred to. The number of the victims offered on the first day exceeded those of any day in the year (M.T.nach. xiii. 5). But besides these, the Chazaghis or private peace-offerings (Passover, iii. 2446 f.) were more abundant than at any other time; and there is reason to believe that the whole of the sacrifices nearly outnumbered all those offered at the other festivals put together.

It belongs to the character of the feast that on each day the trumpets of the Temple are said to have sounded twenty-one times. V. Though all the Hebrew annual festivals were seasons of rejoicing, the Feast of Tabernacles was, in this respect, distinguished above them all. The huts and the lahdah must have made a gay and striking spectacle over the city by day, and the lamps, the flutes, the music, and the joyous gatherings in the court of the Temple must have given a still more festive character to the night. Hence, it was called by the Rabbis 377, the festa liri. kar. εζεργος. There is a proverb in Succoth (v. 1) — "Who has never seen the rejoicing at the pouring out of the water of Siloam has never seen rejoicing in his life." Maimonides says that he who failed at the Feast of Tabernacles in contributing to the public joy according to the means, incurred especial guilt (Carpzov, p. 419). The feast is designated by Josephus (Ant. viii. 4, § 1) ἵππην ἐνάταται καὶ μεγαίτα, and by Philo, ὑπερ ἑπτα μεγαίτα. Its thoroughly festive nature is shown in the accounts of its observance in Josephus (Ant. viii. 4, § 1, xv. 33), as well as in the accounts of its celebration by Solomon, Ezra, and Judas Maccabees. From this fact, and its connection with the ingathering of the fruits of the year, especially the vintage, it is not wonderful that it should have been likened to the Dionysiac festivals, calling it θυσαρισσία and κρατηροβαρος.

a But Buxtorf, who contends that St. John speaks of the seventh day, says that the modern Jews of his time called that day "the Great Hosanna," and distinguished it by a greater attention than usual to their personal appearance, and by performing certain peculiar rites in the synagogue (Sun. Jud. xvii.).

b M. Jebus, however, said that the water was poured out on eight days. (Succeh, iv. 9, with Bar tenor's note.)

c There are some curious figures of different forms of huts, and the great light of the Feast of Tabernacles, in Streniusus's Mishna, vol. ii.

d There is a lively description of some of the huts used by the Jews in modern times in La Vie Juive en Albanie, p. 170, &c.
VI. The main purposes of the Feast of Tabernacles are plainly set forth (Ex. xxiii. 16, and Lev. xxiii. 34-35). It was to be once a thanksgiving for the harvest, and a commemoration of the time when the Israelites dwelt in tents during their passage through the wilderness. In one of its meanings, it stands in connection with the Passover, as the Feast of Aboth, the month of green ears, when the first sheaf of barley was offered before the Lord; and with Pentecost, as the feast of harvest, when the first loaves of the year were waved before the altar; in its other meaning, it is related to the Passover as the great yearly memorial of the deliverance from the destroyer, and from the tyranny of Egypt. The tents of the wilderness furnished a home of freedom compared with the home of bondage out of which they had been brought. Hence the Divine Word assigns as a reason for the command that they should dwell in tents during the festival, "that your generations may know that I made the children of Israel to dwell in booths, when I brought them out of the land of Egypt." (Lev. xxiii. 43).

But naturally connected with this exultation in their regained freedom, was the rejoicing in the more perfect fulfillment of God's promise, in the settlement of his people in the Holy Land. Hence the festival became an expression of thanksgiving for the rest and blessing of a settled abode, and, as connected with it, for the regular annual cultivation of the ground, with the storing up of the corn and the wine and the oil, by which the prosperity of the nation was promoted and the fear of famine put into a remoter distance. Thus the agricultural and the historical ideas of the feast became essentially connected with each other.

But besides this, Philo saw in this feast a witness for the original equality of all the members of the chosen race. All, during the week, poor and rich, the inhabitant alike of the palace or the hovel, lived in tents which, in strictness, were to be of the plainest and most ordinary materials and construction. From this point of view the Israelite would be compared with still greater sublimity of the patriarchs and tosmose March of his forefathers through the desert, when the nation seemed to be more immediately dependent on God for food, shelter, and protection, while the completed harvest stored up for the coming winter set before him the benefits he had derived from the possession of the land flowing with milk and honey which had been of old promised to his ancestors.

But the culminating point of this blessing was the establishment of the central spot of the national worship in the Temple at Jerusalem. Hence it was evidently fitting that the Feast of Tabernacles should be kept with an unwonted degree of observance at the dedication of Solomon's Temple (1 K. viii. 2, 65; Joseph. Ant. viii. 4, § 3), again, after the rebuilding of the Temple by Ezra ( Neh. viii. 15-18), and a third time by Judas Maccabaeus when he had driven out the Syrians and restored the Temple to the worship of Jehovah (2 Macc. x. 5-8).

The origin of the Feast of Tabernacles is by some connected with Succoth, the first halting-place of the Israelites on their march out of Egypt; and the huts are taken not to commemorate the tents in the wilderness, but the leafy booths (succeoth) in which they lodged for the last time before they entered the desert. The feast would thus call to mind the transition from settled to nomadic life (Stanley, Sinait and Palestina, Appendix, § 89).

TABITHA (תַּבְּיתָה [gazelle]; Tabitha), also called Dorcas (Δορκία) by St. Luke; a female disciple of Joppa, "full of good works," among which that of making clothes for the poor is specifically mentioned. While St. Peter was at the neighboring town of Lydda, Tabitha died, upon which the disciples at Joppa sent an urgent message to the Apostle, beggimg him to come to them without delay. It is not quite evident from the narrative whether they looked for any exercise of miraculous power on his part, or whether they simply wished for Christian consolation under what they regarded as the common calamity of their Church: but the miracle recently performed on Eunus (Acts xi. 34), and the expression in ver. 38 (בַּיְתָה בְּיָשָׁן) lead to the former suppose. Upon his arrival Peter found the deceased already prepared for burial, and laid out in an upper chamber, where she was surrounded by the recipients and the tokens of her charity. After the example of our Saviour in the house of Jairus (Matt. iv. 25; Mark v. 40, "Peter put them all forth," prayed for the Divine assistance, and then commanded Tabitha to arise (comp. Mark v. 41; Luke viii. 54). She opened her eyes and sat up, and then, assisted by the Apostle, rose from her couch. This great miracle, as we are further told, produced an extraordinary effect in
The name of "Tabitha" (תביתא) is the Aramaic form answering to the Hebrew תבנית, a "female gazelle," the gazelle being regarded in the East, among both Jews and Arabs, as a standard of beauty—indeed, the word תבנית properly means "beauty." St. Luke gives us "Dorcas" as the Greek equivalent of the name. Similarly we find בַּדָּכָס as the LXX. rendering of תבנית in Deut. xii. 15, 22; 2 Sam. ii. 18; Prov. vi. 5. It has been inferred from the occurrence of the two names, that Tabitha was a Hellenist (see Whitby, in loc.). This, however, does not follow, even if we suppose that the two names were actually borne by her, as it would seem to have been the practice even of the Hebrew Jews at this period to have a Gentile name in addition to their Jewish name. But it is by no means clear from the language of St. Luke that Tabitha actually bore the name of Dorcas. All he tells us is that the name of Tabitha means "gazelle" (בַּדָּכָס), and, for the benefit of his Gentile readers, he afterwards speaks of her by the Greek equivalent. At the same time it is very possible that she may have been known by both names; and we learn from Josephus (B. J. iv. 3, § 5) that the name of Dorcas was not unknown in Palestine. Among the Greeks, also, as we gather from Lucret. iv. 1154, it was a term of endearment. Other examples of the use of the name will be found in Wetstein, in loc. W. B. J.

### TABLE

See under other heads for important information connected with this word (MEANS; MONEY-CHANGERS; SHREW BREAD; TANENAXCLE). The earliest Hebrew term may have been skholde (from תְבִיתָא, to stretch out), being simply a piece of leather or cloth spread on the ground on which the food was placed. The word naturally passed to other applications so as to denote a table of any kind. We read in Judg. i. 7 that the vassals of Abdon-bezech (which see) "gathered their meat under his table," apparently therefore a raised cushion or tripetum at that early period. A table formed part of the furniture of the prophet Elisha's chamber (2 K. iv. 10). The table and its entertainments stand figuratively for the soul's wealth and provisions for its people (1 Ps. xxviii. 5, lxix. 22); and also for the enjoyments of Christ's perfected kingdom in heaven (Matt. viii. 11; Luke xiii. 29). To "serve tables" (Acts vi. 2) meant to provide food, or the means of purchasing it, for the poor, as arranged in the primitive Church at Jerusalem. The "table of the Lord" (1 Cor. x. 21) designates the Lord's Supper as opposed to the "table of demons" (参股Ianv) or feasts of heathen reveling. The "writing-table" on which Zacharias wrote the name of John (Luke i. 63) was no doubt a "tablet" (עֲרָבָיָה) covered with wax, on which the ancients wrote with a stylus. As Tertullian says: "Zacharias loquitor in stylo, auditor in cerere." In Matt. xix. 21, "in the name of the Lord" (תֹּאָלָמ) is a translation for "hearts" or "conches." The same Greek term (αὐτής) is rendered "bed" in the nine other passages where it occurs (Matt. ix. 2, 6; Mark iv. 21).

---

a The full form occurs in Judg. ix. 6, 12, 14; that of Tabor only, in Josh. xix. 22; Judg. viii. 18; Ps. lxxix. 12; Jer. xvi. 18; Hos. v. 1.

**Tabor and Mount Tabor**

The name of "Tabitha" (תביתא) is probably = "height," as in Simonia's Qumminiasm, p. 300: Παρθένος [Alex. Targum], Σουλαβαρ, Σαμβά, but ἄρα Παρθένων in Jer. and Hosea, and in Josephus, who has also ἄρα Παρθένων: Thumos, one of the most interesting and remarkable of the single mountains in Palestine. It was a Rabbinic saying (and shows the Jewish estimate of the attractions of the locality), that the Temple ought of right to have been built here, but was reserved for a later day and a revelation to the Gentiles, and reserved for the Gentiles on Mount Moriah. It rises abruptly from the north-eastern arm of the plain of Esdraelon, and stands entirely isolated, except on the west, where a narrow ridge connects it with the hills of Nazareth. It presents to the eye, as seen from a distance, a beautiful appearance, being so symmetrical in its proportions, and rounded off like a hemisphere or the segment of a circle, yet varying somewhat as viewed from different directions. The body of the mountain consists of the peculiar lime-stone of the country. It is studded with a comparatively dense forest of oaks, pistaces, and other trees and bushes, with the exception of an occasional opening on the sides, and a small moor tract on the summit. The summit itself is a natural elevation, forming a kind of wild bears, lynxes, and various reptiles. Its height from the base is estimated at 1,000 feet, but may be somewhat more rather than less.b Its ancient name, is already suggested, indicates its elevation, though it does not rise much. If at all, above some of the other summits in the vicinity. It is now called Jebel El-Tair. It lies about six or eight miles as the crow can fly, the most distant point from Nazareth. The writer, in returning to that village toward the close of the day (May 3, 1852), found the sun as it went down in the west shining directly in his face, with hardly any deviation to the right hand or the left by a single turn of the path. The ascent is usually made on the west side, near the little village of De- bernali, and by the ancient highway of Cæsarea to Tiberias (vii. 12), though it can be made with entire ease in other places. It requires three-quarters of an hour or rather two and a half to reach the top. The path is circuitous at 2

---

b * Tristram (Land of Israel, p. 430) says 1,200 feet from the base, and 1,855 feet from the sea-level. The latter is Van de Velde's estimate.
at times steep, but not so much so as to render it difficult to ride the entire way. The trees and bushes are generally so thick as to intercept the prospect; but now and then the traveller as he ascends comes to an open spot which reveals to him a magnificent view of the plain. One of the most pleasing aspects of the landscape, as seen from such points, in the season of the early harvest, is that presented in the diversified appearance of the fields. The different plots of ground exhibit various colors, according to the state of cultivation at the time. Some of them are red, where the land has been newly plowed up, owing to the natural properties of the soil; others yellow or white, where the harvest is beginning to ripen, or is already ripe; and others green, being covered with grass or springing grain. As they are contiguous to each other, or intermixed, these parti-colored plots present, as looked down upon from above, an appearance of gay checkered work which is singularly beautiful.

The top of Tabor consists of an irregular platform, embracing a circuit of half an hour's walk, and commanding wide views of the subjacent plain from end to end. A copious dew falls here during the warm months. Travellers who have spent the night there have found their tents as wet in the morning as if they had been drenched with rain.

It is the universal judgment of those who have stood on the spot that the panorama spread before them as they look from Tabor includes as great a variety of objects of natural beauty and of sacred and historic interest as any one to be seen from any position in the Holy Land. On the east the waters of the Sea of Tiberias, not less than fifteen miles distant, are seen glittering through the clear atmosphere in the deep bed where they repose so quietly. Though but a small portion of the surface of the lake can be distinguished, the entire outline of its basin can be traced on every side. In the

same direction the eye follows the course of the Jordan for many miles; while still further east it rests upon a boundless perspective of hills and valleys, embracing the modern Hauran, and further south the mountains of the ancient Gilead and Bashan. The dark line which skirts the horizon on the west is the Mediterranean; the rich plains of Galilee fill up the intermediate space as far as the foot of Tabor. The ridge of Carmel lifts its head in the northwest, though the portion which lies directly on the sea is not distinctly visible. On the north and northwest we behold the last ranges of Lebanon as they rise into the hills about Safed, overtopped in the rear by the snow-capped Hermon, and still nearer to us the Horns of Hattin, the reputed Mount of Beatitudes. On the south are seen, first the summits of Galilee, which David's touching elegy on Saul and Jonathan has fixed forever in the memory of mankind and further onward a confused view of the mountains and valleys which occupy the central part of Palestine. Over the heads of Philistia and Galilee the spectator looks into the valley of the Jordan in the neighborhood of Beisan (itself not within sight), the ancient Beth-shean, on whose walls the Philistines hung up the headless trunk of Saul, after their victory over Israel. Looking across a branch of the plain of Esdraelon, we behold Endor, the abode of the sorceress whom the king consulted on the night before his fatal battle. Another little village clings to the hill-side of another ridge, on which we gaze with still deeper interest. It is Nain, the village of that name in the New Testament, where the Saviour touched the bier, and restored to life the widow's son. The Saviour must have passed often at the foot of this mount in the course of his journeys in different parts of Galilee. It is not surprising that the Hebrews looked up with so much admiration to this glorious work of the Creator's hand. The
same beauty rests upon its brow to-day, the same richness of verdure refreshes the eye, in contrast with the bleaker aspect of so many of the adjacent mountains. The Christian traveller yields spontaneously to the influence of Mount Tabor and devotion, and appropriates as his own the language of the psalmist (xxxiii. 11, 12): —

"The heavens are thine, the earth also is thine; The world and the fulness thereof, thou hast found them."

Tabor does not occur in the New Testament, but makes a prominent figure in the Old. The book of Joshua (xix. 22) mentions it as the boundary between Issachar and Zebulun (see ver. 12). Birkak, at the command of Deborah, assembled his forces on Tabor, and, on the arrival of the opportune moment, descended thence with "ten thousand men after him" into the plain, and conquered Sisera on the banks of the Kishon (Judg. iv. 6-15). The brothers of Gideon, each of whom "resembled the children of a king," were murdered here by Zelah and Zummah (Judg. viii. 18, 19). Some twenty years after Sisera, it is recorded that Tabor is intended when it is said by Issachar and Zebulun in Deut. xxxii. 19, that "they shall call the people unto the mountain; there they shall offer sacrifices of righteousness." Stanley, who adopts this view (Samoi and Palestine, p. 351), remarks that he was struck with the aspect of the open glades on the summit as specially fitted for the conventicle of festive assemblies, and could well believe that in some remote age it may have been a sanctuary of the northern tribes, if not of the whole nation. The prophet in Hosea v. 1, reproaches the priests and royal family with having "been a snare to Mesopotamia and a net spread upon Tabor." The charge against them probably is that they had set up idols and practiced heathen rites on the high places which were usually selected for such worship. The comparison in Jer. xvi. 18, "as Tabor is among the mountains and Cariad by the sea," imports apparently that those heights were proverbial for their completeness, beauty, and strength.

Dr. Robinson (Researches, ii. 353) has thus described the position which are to be seen even yet on the summit of Tabor. "All around the top are the foundations of a thick wall built of large stones, some of which are bevelled, showing that the entire wall was perhaps originally of that character. In several parts are the remains of towers and bastions. The chief remains are upon the ledge of rocks on the south of the little basin, and especially towards its eastern end; here are — in indeterminate confusion — walls, and arches, and foundations, apparently of dwelling-houses, as well as other buildings, some of hea\n
These latter fortifications belong to the era of the Crusades; but the large beveled stones we refer to a style of architecture not later than the times of the Romans, before which period, indeed, a town or city existed on Mount Tabor; and we may, on the days of the crusaders, too, and earlier, there were here churches and monasteries. The summit has many cisterns, now mostly dry." The same writer found the thermometer here at 10 a.m. (June 18th) at 98 F., at sunrise at 64°, and at sunset at 74°. The Latin Christians have now an altar here, at which their priests from Nazareth perform the annual mass. The Greeks also have a chapel, where, on certain festivals, they assemble for the celebration of religious rites.

Most travellers who have visited Tabor in recent times have found it utterly solitary so far as regards the presence of human occupants. It happened to the writer on his visit here (1852) to meet, unexpectedly, with four men who had taken up their abode in this retreat, so well suited to encourage the devotion of pilgrims descends. One of them was an aged priest of the Greek Church, a native of Wallachia, named Ermia, according to his own account more than a hundred years old, who had come here to await the final advent of Christ. Dean Stanley found the old hermit still living in 1862. According to his own story, Ermia "in his early years received an instruction in his sleep that he was to build a church on a mountain shown to him in his dreams. He wandered through many countries, and found his mountain at last in Tabor. There he lived and collected money from pilgrims, which at his death, a few years ago, amounted to a sufficient sum to raise the church, which is approaching completion. He was remarkable for his long beard and for a tame panther, which, like the ancient hermits, he made his constant companion." (Researches in the East, p. 191 f.). He was a man of huge physical proportions, and stood forth as a good witness for the efficacy of the diet of milk and herbs, on which, according to his own account, he subsisted. The other three men were natives of the same province. Two of them, having been to Jerusalem and the Jordan on a pilgrimage had taken Tabor in their way on their return homeward, where, finding unexpectedly the priest, who had resided there for years, they resolved to remain with him for a time. One of them was deliberating whether he should not take up his permanent abode there. The fourth person was a young man, a relative of the priest, who seemed to have taken on himself the filial office of caring for his aged friend in the last extremity. In the morning of Tabor, in consequence, partly of a belief that it was the scene of the Saviour's transfiguration, was crowded with hermits. It was one of the shrines from the earliest period which pilgrims to the Holy Land regarded it as a sacred duty to honor with their presence and their prayers. Jerome, in his Itinerary of Paula, writes, "Some debat montem Tabor, in quo transfiguratis est Domini, quaerunt paulum Hieronymum et Hieronymum et ipsi eum transfiguratis est Domini."

"The fortress of which the ruins crown the summit had evidently four gateways, like those by which the great Roman camps of our own country were entered. By one of these gateways my attention was called to an Arabic inscription, said to be the only one on the mountain which records former travelers. It reads in translation roughly, "This blessed fortress is the order of the Sultan Abu Bazel on his return from the East."
TA'BOR, H.

This idea that our Saviour was transfigured on Tabor prevailed extensively among such of the early Christians as adopted legends of this nature (though not earlier than the 6th century), and reappears often still in popular religious works. If one might choose a place which he would deem peculiarly fitting for so sublime a transaction, there is none certainly which would so entirely satisfy our feelings in this respect as the lofty, majestic, beautiful Tabor. It is impossible, however, to reconcile in the correctness of this opinion. It is susceptible of proof from the Old Testament, and from later history, that a fortress or town existed on Tabor from very early times down to n. c. 50 or 51; and as Josephus says (Bell. Jud. iv. 1, § 8), that he strengthened the fortifications of a city there, about x. b. 69, it is morally certain that Tabor must have been inhabited during the intervening period, that is, in the days of Christ. Tabor, therefore, could not have been the Mount of Transfiguration; for when it is said that Jesus took his disciples "up into a high mountain apart, and was transfigured before them" (Matt. xviii. 1, 2)," it appears not that he understood any hill to be the summit of the mountain, where they were alone by themselves (ark Jezre). It is impossible to ascertain with certainty what place is entitled to the glory of this marvelous scene. The evangelists record the event in connection with a journey of the Saviour to Cesarea Philippi, near the sources of the Jordan. It is conjectured that the Transfiguration may have taken place on one of the summits of Mount Hermon in that vicinity. [HERMON, Amer. ed.] See Ritter's Erdkunde, iv. 394 e; and Lichtenstein's Leben Jesu, p. 328. For the history of the tradition which connects Tabor with the Transfiguration, consult Robinson's Researches, ii. 558, 559. [TRANSFIGURATION, Amer. ed.]

TA'BOR [tah-brər] (height); [Vat.] Ταξιμάς; [Rom.] Alex. Θαμάς; (Theodor) is mentioned in the lists of 1 Chr. vi. as a city of the Merarite Levites, in the tribe of Zebulun (ver. 77). The catalogue of Levitical cities in Josh. xiii. mentions a small place answering to this (comp. vers. 34, 35). But the list of the towns of Zebulun (ch. xix.) contains the name of CHISLOT- TA'BOR (ver. 12). It is, therefore, possible, either that Chisloth-Tabor is abbreviated into Tabor by the chronicler, or that by the time these later lists were compiled, the Merarites had established themselves on the sacred mountain, and that Tabor is Mount Tabor.

TA'BOR, THE PLAIN OF [Τάβαρης]: [Vat.] Λαοί; [Rom.] Alex. Θαμάς. [Theodor] It has been already pointed out [see PALM iii. 2547 f.], that this is an incorrect translation, and should be the OAK OF TABOR. It is mentioned in 1 Sam. x. 3, only as one of the points in the homeward journey of Saul after his anointing by Samuel. It was the next stage in the journey after "Rachel's sepulchre at Zelachel." But unfortunately, like so many of the other spots named in this interesting passage, the position of the Oak of Tabor has not yet been fixed.

Ewald seems to consider it certain (geochsis) that Tabor and Deborah are merely different modes of pronouncing the same name, and he accordingly identifies the Oak of Tabor with the tree under which Deborah, Rachel's nurse, was buried (Gen. xxxv. 8), and that again with the palm, under which Deborah the prophetess delivered her oracles (Gesch. iii. 29, i. 390, ii. 489), and this again with the Oak of the old Prophet near Bethel (ib. iii. 444). But this, though most ingeniously, can only be received as a conjecture, and the position on which it would land us — "between Ramah and Bethel" (Judg. iv. 5), is too far from Rachel's sepulchre to fall in with the conditions of the narrative of Saul's journey, as long as we hold that to be the traditional sepulchre near Bethel alone. A further opportunity for examining this most puzzling route will occur under ZEL'ZAH; but the writer is not sanguine enough to hope that any light can be thrown on it in the present state of our knowledge. [See RAMAH, Amer. ed.]

TABRET. [Ταβρέτ]-

TA'BIRMON (tah-bir-mən; Taβηρόμην; Taboron). Properly, Tabrimon, i.e. "a good is Rimmon," the Syrian god; compare the analogous forms Tobel, Tobiah, and the Phenician Rimmon, (Gen. Mon. Phen. p. 496). The father of Benhadad I, king of Syria in the reign of A Round K. x. 18).

TACHE (tah-ke; πᾶχος; πᾶχος; πᾶχος, philo). The word thus rendered occurs only in the description of the structure of the Tabernacle and its fittings (Exx. xxvi. 6, 11, 33, xxxv. 11, xxxvi. 13, xxix. 33), and appears to indicate the small hooks by which a curtain is suspended to the rings from which it hangs, or connected vertically, as in the case of the veil of the Holy of Holies, with the hoops of another curtain. The history of the English word is philologically interesting, as presenting points of contact with many different languages. The Greek and Latin branches of the Kelitic family give toc, or tuk, in the sense of a nail or hook. The latter meaning appears in the attestatio, stucco, of Italian, in the attacher, logo, of French. On the other hand, in the Bok of Dutch, and the Zelde of German, we have a word of like sound and kind derived from the Anglo-Saxon steaca and English take (to seize as with a hook? are probably connected with it. In later use the word has slightly altered both its form and meaning, and the tuck is no longer a hook, but a small flat-headed nail (comp. Diz. Roman, Wortlist. s. v. Tacko). E. H. P.

TACHMONITE, THE (tak-mon-it). [see below; el Xwvavat: (Komp el wov Θεοκατηγιανος; apo+)

"The Tachmonite (properly, Tachmonicon) that sat in the seat," chiefl among David's captains (2 Sam. xxiii. 8), is in 1 Chr. xi. 11 called "Jashobeam an Hachimonite," er, as the margin gives it, "son of Hachmoni." The Geneva version has in 2 Sam. xxiii. 8, "He that sat in the seat of wisdom, being chiefe of the princes, was Adino of Ezem," regarding "Tachmonite" as an adjective derived from הַשֹּׁבֵא, chābān, "wise," and in this derivation following Kimchi. Kennicott has shown, with much appearance of probability, that the words הַשֹּׁבֵא, yishvat hareshobelah, "he that sat in the seat," are a corruption of Jashobeam, the true name of the hero, and that the mistake arose from an error of the transcriber, who carelessly inserted גָּאוֹן from the previous verse where it
occurs. He further considers the Tazmonite a corruption of the appellation in Chronicles, "son of Hachmoni," which was the family or local name of Jashobeam. The name here in Samuel was at first יָּדָם the article י in Chronicles is regularly supplied in Samuel by that article (Dissert. p. 82). Therefore he concludes Jashobeam the Hachmonite" to have been the true reading. Josephus (Ant. vii. 12, § 4) calls him Περσάρας κόσον, which favors Kennicott's emendation. W. A. W. * TACKLING. For this nautical term in Acts xxvii, 17, see Ship (6). It occurs also in xxi. 25, where in the prophet's allegory it (תַּדְמוֹר) refers to the ropes connected with the vessel's mast and sails.

**TADMOR (תַּדְמוֹר) [prob. city of palms]:** [in 1 K. ix. 18, Koom. Vat. omit; Alex. Osea in 2 Chr. xxxv. 18, Παμφιάραν; in the διδομέναι, called "Tadmor" in the wilderness of the Arabians (2 Chr. viii. 4). There is no reasonable doubt that this city, said to have been built by Solomon, is the same as the one known to the Greeks and Romans and to modern Europe by the name, in some form or other, of Palmyra (Παμφιάραν, Παμφιάρα, Πάμφιαρα, Palmita). The identity of the two cities results from the following circumstances: 1st. The same city is specially mentioned by Josephus (Ant. viii. 6, § 1) as bearing in his time the name of Tadmor among the Syrians, and Palmyra among the Greeks; and in his Latin translation of the Old Testament, Jerome translates Tadmor by Palmita (2 Chr. viii. 4). 2dly, The modern Arabic name of Palmyra is substantially the same as the Hebrew word, being Tadmur or Tadunor. 3dly, The word Tadunor has nearly the same meaning as Palmyra, signifying probably the "City of Palms," from Tamar, a palm; and this is confirmed by the Arabic word for palm, a Spanish town on the Guadalquivir, which is said to be called Tadmor [see Gesenius in his Thesaurus, p. 345]. 4thly, The name Tadunor or Tadmor actually occurs as the name of the city in Aramaic and Greek inscriptions which have been found there. 5thly, In the Chronicles, the city is mentioned as having been built by Solomon after his conquest of Hamath Zobah, and it is named in conjunction with "all the store-cities which he built in Hamath." This accords fully with the situation of Palmyra [Παμφιάραν]; and there is no other known city, either in the desert or not in the desert, which can lay claim to the name of Tadmor.

In addition to the passage in the Chronicles, there is a passage in the book of Kings (1 K. ix. 18) in which, according to the marginal reading (Keri), the statement that Solomon built Tadmor likewise occurs. But on referring to the original text (Codd.), the word is found to be not Tadmor, but Tamar. Now, as all the other towns mentioned in this passage with Tamar are in Palestine (Gezér, Beth-horon, Jaret), as it is said of Tamar that it was "in the wilderness in the land," and as, in Ezekiel's prophetic description of the Holy Land, there is a Tamar mentioned as one of the borders of the land on the south (Ez. xlvii. 19), where, as is notorious, there is a desert, it is probable that the author of the book of Kings did not really mean to refer to Palmyra, and that the marginal reading of "Tadmor" was founded on the passage in the Chronicles (see Nethane, Exegiaticus Haenrici, 1 K. ix. 18).

If this is admitted, the suspicion naturally suggests itself, that this compiler of the Chronicles may have misapprehended the original passage in the book of Kings, and may have incorrecly written "Tadmor" instead of "Tamar." On this hypothesis there would have been a curious circle of mistakes: and the final result would be, that any supposed connection between Solomon and the foundation of Palmyra must be regarded as purely imaginary. This conclusion is not necessarily incorrect or unreasonable, but there are sufficient reasons for adopting it. In the first place, the Tadmor of the Chronicles is not mentioned in connection with the same cities as the Tamar of the Kings, so there is nothing cogent to suggest the inference that the same city was intended. Second, it was copied from the Kings. Secondly, admitting the historical correctness of the statement that the kingdom of Solomon extended from Gaza, near the Mediterranean Sea, to Tiphsah or Taibsaun, on the Euphrates (1 K. iv. 24; comp. Ps. xxxii. 9, 8), it would be in the highest degree probable that Solomon occupied and garrisoned such a very important station for controlling different parts of his dominions as Palmyra. And, even without reference to military and political considerations, it would have been a masterly policy in Solomon to have secured Palmyra as a point of commercial communication with the Euphrates, Babylon, and the Persian Gulf. It is evident that Solomon had large views of commerce; and as we know that he availed himself of the nautical skill of the Tyrians by causing some of his own subjects to accompany them in distant voyages from a port on the Red Sea (1 K. ii. 27, 28, 29, x. 52), it is unlikely that he should have neglected trade by land with such a centre of wealth and civilization as Babylon. But that great city, though so nearly in the same degree as Palmyra, is not mentioned in the passages of the Bible as a city of commerce. The confluence of even one degree between them, was separated from Jerusalem by a great desert, so that regular direct communication between the two cities was impracticable. In a celebrated passage, indeed, of Isaiah (xi. 3), connected with the voice of him that crieth in the wilderness, images are introduced of a direct return of the Jewish exiles from Babylon through the desert. Such a route was known to the Bedouin of the desert; and may have been exceptionally passed over by others; but evidently these images are only poetical, and it may be deemed indisputable that the successive excursions of Jews who returned to their own land from Babylon arrived from the same quarter as Nebuchadnezzar and the Chaldeans (Jer. l. 14, 15 x. 22, xxv. 9), namely, from the North. In fact, Babylon thus became so associated with the North in the minds of the Jews, that in one passage of Jeremiah (xiii. 8) it is called "the North country," and it is by no means impossible that many
of the Jews may have been ignorant that Babylon was nearly due east from Jerusalem, although somewhat more than 600 miles distant. Now, the way in which Palmyra would have been made to Solomon in trade between Babylon and the west is evident from a glance at a good map. By merely following the road up the stream on the right bank of the Euphrates, the traveller goes in a north- west-terly direction, and the width of the desert becomes proportionally less, till at length, from a point on the Euphrates, there are only about 120 miles across the desert to Palmyra, and thence about the same distance across the desert to Damascus. From Damascus there were ultimately two roads into Palestine, one on each side of the Jordan; and there was an easy communication with Tyre by Panias, or Casarea Philippi, now Binyas. It is true that the Assyrian and Chaldean armies did not cross the desert by Palmyra, but took the more circuitous road by Hamath on the Orontes; but this was doubtless owing to the greater facilities which that route afforded for the subsistence of the cavalry of which those armies were mainly composed. For more purposes of trail, the shorter road by Palmyra had some decided advantages, as long as it was thoroughly secure. See Movers, Das Phönizische Alterthum, Ster Theil, p. 245, &c.

Hence there are not sufficiently valid reasons for denying the statement in the Chronicles that Solomon built Tadmor in the wilderness, or Palmyra. As, however, the city is nowhere else mentioned in the whole Bible, it would be out of place to enter into a long, detailed history of it on the present occasion. The following leading facts, however, may be mentioned. The first author of antiquity who mentions Palmyra is Pliny the Elder (Hist. Nat. v. 26), who says, "Palmyra nobilis urbs sita, divitis soli et aquis amnis vasto multique ambitu arenis inclusit amoris;" and then proceeds to speak of it as placed apart, as it were between the two empires of the Romans and the Parthians, and as the first object of solicitude to each at the commencement of war. Afterwards it was mentioned by Appian (De Bell. Civil. v. 9), in reference to a still earlier period of time, in connection with a design of Mark Antony to let his cavalry plunder it. The inhabitants are said to have withdrawn themselves and their effects to a strong position on the Euphrates — and the cavalry entered an empty city. In the second century A.D. it seems to have been beautified by the Emperor Hadrian, as may be inferred from a statement of Stephanius of Byzantium as to the name of the city having been changed to Hadrianopolis (s. v. Παλμυρα). In the beginning of the third century A.D. it became a Roman colony under Caracalla (211-217 A.D.), and received the jus Italicum. Subsequently, in the reign of Gallienus, the Roman Senate invested Odenathus, a senator of Palmyra, with the regal dignity, on account of his services in defeating Sapor king of Persia. On the assassination of Odenathus, his celebrated wife Zenoba seems to have conceived the design of erecting Palmyra into an independent monarchy; and in prosecution of this object, she for a while successfully resisted the Roman arms.

She was at length defeated and taken captive by the Emperor Aurelian (A.D. 273), who left a Roman garrison in Palmyra. This garrison was massacred in a revolt; and Aurelian punished the city by the execution not only of those who were taken in arms, but likewise of common peasants, of old men, women, and children. From this blow Palmyra never recovered, though there are proofs of its having continued to be inhabited until the downfall of the Roman Empire. There is a fragment of a building, with a Latin inscription, bearing the name of Diocletian; and there are existing walls of the city of the age of the Emperor Justinian. In 1173, Benjamin of Tudela found 4,000 Jews there; and at a later period Abulfeda mentioned it as full of splendid ruins. Subsequently its very existence had become unknown to modern Europe, when, in 1691 A.D., it was visited by some merchants from the English factory in Aleppo; and an account of their discoveries was published in 1693.

a The exact latitude and longitude of Palmyra do not seem to have been scientifically taken. Mr. Wood mentions that his party had no quadrant with them, and there is a disagreement between various maps and geographical works. According to Mr. Johnson the position is, lat. 34° 15' N., and long. 38° 13' E.
in the Philosophical Transactions (vol. xix. No. 217, p. 83, No. 218, p. 129). In 1751, Robert Wood took drawings of the ruins on a very large scale, which he published in 1754, in a splendid folio work, under the title of The Ruins of Palmyra, otherwise, Tabarz in the Desert. This work still continues to be the best on Palmyra; and its valuable engravings fully justify the powerful impression which these ruins make on every intelligent traveller who crosses the desert to visit them. The colonnaded and individual temples are inferior in beauty and majesty to those which may be seen elsewhere —such, for example, as the Parthenon, and the remains of the Temple of Jupiter, at Athens: and there is evidently no one temple equal to the Temple of the Sun at Eiallea, which, as built both at about the same period of time and in the same order of architecture, suggests itself most naturally as an object of comparison. But the long lines of Corinthian columns at Palmyra, as seen at a distance, are peculiarly imposing; and in their general effect and apparent vastness, they seem to surpass all other ruins of the same kind. All the buildings to which these columns belonged were probably erected in the second and third centuries of our era. Many inscriptions are of later date, but no inscription earlier than the second century seems yet to have been discovered.

For further information consult the original authorities for the history of Palmyra in the Scriptores Historiae Augs. II. 29. 32. 36. 42. Dic.s Arabicorum, xxviii. Entropis, ix. cap. 10. 11. 12. In 1696 A. D., Abraham Seller published a most instructive work entitled, The Antiquities of Palmyra, containing the History of the City and its Emperors, which contains several Greek inscriptions, with translations and explanations. The Preface to Wood's work likewise contains a detailed history of the city; and Gibbon, in the 11th chapter of the Decline and Fall, has given an account of Palmyra with his usual vigor and accuracy. For an interesting account of the present state of the ruins see Porter's Handbook for Syria and Palestine, pp. 543—549, and Beartont's Egyptian Sepulchres, etc., vol. i.

TAHAN (תָּחָן) [tent-place, camping-place]: Tahav, Tahax, Tahon, Taham. A descendant of Ephraim, but of what degree is uncertain (Num. xxvi. 55). In 1 Chr. vii. 25 he appears as the son of Tahah.

TAHANITES. THE (תָּחָנִים) [pl.]: Tavaxi [Vat. -χαί] (Tahcitim). The descendants of the preceding, a branch of the tribe of Ephraim (Num. xxvi. 55).

TAHAPANES. [TAHAPANES.]

TAHATH (תָּחָת) [place, station]: Tadath; [Vat. in ver. 24. Kzath]. 1. A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. ii. 41, 37 [9, 22]).
2. (Tadath; [Vat. omits] Alex. Εναθ) According to the present text, son of Hered, and grandson of Ephraim (1 Chr. vii. 20). Burlington, however (Genal. i. 273), identifies Tahath with Tahalan, the son of Ephraim.
3. (Qath; [Vat. Naqath] Alex. Naqeh) Grandson of the preceding, as the text now stands (1 Chr. vii. 20). But Burlington considers him as a son of Ephraim (ib. tab. xlix). In this case Tahath was one of the sons of Ephraim who were slain by the men of Gath in a raid made upon their cattle.

TAHATH (תַּחָת) [see below]: Kardadh: (Thathath). The name of a desert-station of the Israelites between Makeloth and Tarah (Num. xxviii. 20). The name, signifying "under," or below, is perhaps to relate to the level of the ground. The site has not been identified.

Tachon, from the same root, is the common word employed to designate the lower one of the double villages so common in Syria, the upper one being fokr. Thus Beitar elfokr is the upper Bethhoron, Beitar elfachta the lower one. H. 11.

TAHAPANES. TEHAPHNEHES. 

TAHAPANES (תַּחַפַּנְאֵים, תַּחַפַּנָּה, תַּחַפְּאָה, תַּחַפְּעָה), the last form in text, but Keri has first (see below): Tapharos, Taphoros, Taphinos, Taphone. A city of Egypt, of importance in the time of the prophets Jeremiah and Ezekiel. The name is evidently Egyptian, and closely resembles that of the Egyptian queen Tahpanes. The Coptic name of this place, Taphliс., (Quatremere, Mem. Géogr. et Hist. i. 297, 298), is evidently derived from the LXX. form: the Gr. and Lat. forms, Δάφνος, Δαφνῆς, Steph. Byz., Steph. Att., are perhaps nearer to the Egyptian original (see Parthey, Zur Erfurzdente des Aus Egyptens, p. 528).

Taiphanes was evidently a town of Lower Egypt near or on the eastern border. When Ammon and the other captives went into Egypt they came to Taiphanes" (Jer. xxiii. 7). Here Jeremiah prophesied the conquest of the country by Nebuchadnezzar (8—13). Ezekiel foretells a battle to be there fought apparently by the king of Sidon just mentioned (xxx. 18). The Jews in Jeremiah's time remained here (Jer. xlv. 1). It was an important town, being twice mentioned by the latter prophet with Noph or Memphis (ii. 16, xvi. 14), as well as in the passage last previously cited. Here stood a house of Pharaoh Hophra before which Jeremiah hid great stones, where the throne of Nebuchadnezzar would afterwards be set, and his pavilion spread (xliii. 8—10). It is mentioned with "Rhames and all the land of Cen" in Am. i. 9. Here also called Pelusion, this place of the Egyptian Δαφνῆς or Δαρφανθ, and relates that Psammeth- chus I, here had a garrison against the Armenians and Syrians, as at Elephantine against the Ethiopians, and at Marea against Libya, adding that in his own time the Persians had garrisons at Daphne and Elephantine (ii. 39). Daphne was therefore a very important post under the XXIVth dynasty. According to Stephano it was near Pelusium (s. e.).

In the Itinerary of Antoninus this town, called Daphion, is placed 16 Roman miles to the southwest of Pelusium (ap. Parthey, Map vi., where observe that the name of Pelusium is omitted). This position seems to agree with that of Tel-al-Beamoun, which Sir Gardner Wilkinson supposes to mark the site of Daphne (Modern Egypt and Tunisia, i. 447, 448). This identification favors the inland position of the site of Pelusium, if we may trust to the distance stated in the Itinerary. [SIN.] Sir G. Wilkinson (l. c.) thinks it was an outpost of Pelusium. It may be observed that the Camps, γαρ ζητητικὰδιὰ, the fixed garrison of Roman and Ca- rian origin established by Psammethchus I., may possibly have been at Daphne, can the name be of Greek origin? If the Hanes mentioned by Isaiah (xxx. 4) be the same as Taiphanes, as we have
TALMON

suggested (s. v.), this conjecture must be dismissed. No satisfactory Egyptian etymology of this name has been suggested, Jahnck's ΤΑΗΡΕΛΕΣ, "the head" or "beginning of the age" (Oxyr. i. 340), being quite untenable, nor has any Egyptian name resembling it been discovered. The name of Queen Tahpenes throws no light upon this matter.

R. S. P.

TAHENES (ταγήνες) [see above]: Θηκε-μια: [Vat. θηκαμια]; Tahpenes, a proper name of an Egyptian queen. She was wife of the Pharaoh who received Hadas the Edomite, and who gave her his sister in marriage (I K. xi. 18-20). In the LXX. the latter is called the elder sister of Thekemina, and in the addition to ch. xii. Shishak (Sauschek) is said to have given Ane, the elder sister of Thekemina his wife to Jeroboam. It is obvious that this and the earlier statement are irreconcilable, even if the evidence from the probable repetition of an elder sister be set aside, and it is scarcely necessary to add that the name of Shishak's chief or only wife, KARÁMA MAT, does not support the LXX. addition. [Suishak.] There is therefore but one Tahpenes or Thekemina. At the time to which the narrative refers there were probably two, if not three, lines ruling the thirty-first dynasty, the primogeniture, the sahur or eldest brother in the lower country, the high-priest kings at Thebes, but possibly they were of the same line, and perhaps one of the last foundations of the Nubian families.

To the Theban line, as apparently then the most powerful, and as holding the territory nearest Palestine, the Pharaoh in question, as well as the father-in-law of Nebaunon, probably belonged. If Marthias's list be correct he may be conjectured to have been Taniffe. [Thekemina] No name that has any near resemblance to either Tahpenes or Thekemina has yet been found among those of the period (see Lepsius, Königsbuch). R. S. P.

TAHREA (ταρέα) [croy, cunning]: Θα-ρα-κα: Alex. Θαρακα: [Comp. Adj. Θαρακαν]: Tharaca, Son of Miran, and grandson of Mephibosheth (1 Chr. xiv. 41). In the parallel list of 1 Chr. viii. 35 his name appears as Talaia.

TAH TIM HOD'SHI, THE LAND OF

(ταθονοιός η τονοιός έ τονοιός) [see below]: εις γιγάντων θα- τανων δι εκστρατάθαιναι [Vat. Naβα]: Alex. γιγάντων εκστρατίων τετεριν οὗτοι: Those of the places visited by Joshua during his census of the land of Israel. It occurs between Gilead and Dan-Jaam (2 Sam. xxiv. 6). The name has puzzled all the interpreters. The old versions throw no light upon it. 1 Sam. iii. 20 (Hebde'ny) proposes to separate the "land of the Tabnitites," from "a Heshbon," and to read the latter as Harshli—the people of Harsheith (comp. Judg. iv. 2). Thenius restores the text of the LXX, to read "the Land of Bashan, which is Edrei." This in itself is feasible, although it is certainly very difficult to connect it with the Hebrew. Faissel (gesc. iii. 297) proposes to read Harshili for Hodshil, and Leesons (Thes. p. 450) to dismiss the passage with a εις γιγάντων οἷον ήτοι.

There is a district called the Ael et-talitis, to the E. N. E. of Damascas, which recalls the old name—but there is nothing to show that any Israelite was living so far from the Holy Land in the time of David.

G.

TALEN (τάλαντον: talentum), the greatest weight of the Hebrews. Its Hebrew name properly signifies "a cinciple" or "gold," perhaps given it on an account of a form in which it was anciently made. The Assyrian name of the talent is elamon according to Dr. Hincks.

The subject of the Hebrew talent will be fully discussed in a later article [WEIGHTS].

R. S. P.

TALITHA CUMI (ταλίθα κομί): Συνάδελφος τον δυον: [Vat. Συναδέλφος του δυον]; Two Syriac words (Mark v. 41), signifying "Da'masel, arise."

The word ταλίθα occurs in the Chaldean paraphrase of Prov. ix. 3, where it signifies a girl; and Lightfoot (Horae Heb. Mark v. 41) gives an instance of its use in the same sense by a Rubbinical writer. Gesenius (Theodorus, p. 550) derives it from the Hebrew א-לון, a lamb. The word κομί is both Hebrew and Syriac (2 p. fem. Imperative, Kal, and Peil), signifying stand, arise.

As might be expected, the last clause of this verse, after Cumi, is not found in the Syriac version.

Jerome (Ep. iii. ad Paschasium, Opp. tom. i. p. 308, ed. Vallars.) records that St. Mark was blamed for a false translation on account of the insertion of the words, "as I said unto thee:" but Jerome points to this as an instance of the superiority of a free over a literal translation, insomuch as the words inserted serve to show the emphasis of our Lord's manner in giving this command on his own personal authority.

W. T. B.

TALMAI (2 syl.) ταλμαί [firmed]: Θε- λαμαί, Θελαμαί, Θελαμί: [Vat. Θελαμαί, Θελαμαί, Θελαμέ]: Alex. Θελαμαί, Θελαμεί, Θελαμί: Thebamai. 1. One of the three sons of "the Amalekites," who were driven out from the "cattle-settlements in Kirjath-Arba, and slain by the men of Judah, under the command of Caleb (Num. xiii. 22; Josh. xv. 14; Judg. i. 19).

2. (Θελαμί [Vat. Θελαμαί, Θελαμεί]: in 2 Sam. [Vat. Θελαμαί]: in 1 Chr. Alex. Θελαμεί, Θελαμί, Θελαμί: Thebama, Thebama): Son of Ammiel, king of Geshaur (2 Sam. iii. 3, xiii. 67; 1 Chr. iii. 2). His daughter Mahalath was one of the wives of David and mother of Absalom. He was probably a petty chieftain dependent on David, and his wild retreat in Bashan afforded a shelter to his grandson after the assassination of Ammon.

TALMON (ταλμόν) [pressed]: τελάμων, but Τελαμων in Neh. xi. 19: [in 1 Chr. Vat. Ταλα- μων; in Neh. xi. 19, Vat. F.A. Ταλαμων: xii. 25, Rom. Vat. Alex. F.A. omit, F.A.3 Ταλαμων]: Alex. Τελαμαί, Τελαμων, Τελαμών: Talamon. The head of a family of doorkeepers in the Temple, "the porters for the courts of the sons of Levi" (1 Chr. ix. 17; Neh. xi. 19). Some of his descendants returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45), and were employed in their hereditary office in the days of Nehemiah and Ezra (Neh. xii. 25). For the proper names in this passage must be considered as the names of families.

2 Dr. Brugsch, following Mr. Heath (Exodus Par- p. 36), identifies the text TALMON with Tahpenes; but this name does not seem to us sufficiently
TALMUD

1. TAMAR: Thamar.) The wife successively of the two sons of Judah, Er and Onan (Gen. xxxviii. 5-30). Her importance in the sacred narrative depends on the great anxiety to keep up the lineage of Judah. It seemed as if the family were on the point of extinction. Er and Onan had successively perished suddenly. Judah's wife Bath-shua died; and there only remained a child Shelah, whom Judah was unwilling to trust to the dangerous union, as it appeared, with Tamar, lest he should meet with the same fate as his brothers. That he should, however, remain childless, seems to have been regarded as part of the fixed law of the tribe, whence its incorporation into the Mosaic Law in after times (Deut. xxv. 5; Matt. xxii. 24): and, as such, Tamar was determined not to let the opportunity escape through Judah's parental anxiety. Accordingly she resorted to the desperate expedient of entrapping the father himself into the union which he feared for his son, on the first emergence from his mourning for his wife, went to one of the festivals often mentioned in Jewish history as attendant on sheep-shearing. He wore on his finger the ring of his chief-wench; he carried his staff in his hand; he wore a collar or necklace round his neck. He was encountered by a weald woman on the road leading to Timnah, the nearest commercial place of Samson, amongst the hills of Dan. He took her for one of the unfortunate women who were consecrated to the impure rites of the Canaanite worship. [SODOMITES.] He promised her, as the price of his intercourse, a kid from the flocks to which he was going, and left as his pledge her ornaments and his staff. The kid he sent back by his chamberlain (LXX.), Hithoh of Judah. The woman could nowhere be found. Months afterwards it was discovered to be his own daughter-in-law Tamar who had thus concealed herself under the veil or mantle, which she cast off on her return home, where she resumed the seclusion and dress of a widow. She was sentenced to be burned alive, and was only saved by the discovery, through the pledges which Judah had left, that her seducer was no less than the chief-wench of the tribe. He had the magnanimity to recognize that she had been driven into this crime by his own neglect of his promise to give her in marriage to his youngest son. "She hath been more righteous than I . . . and I knew her again no more" (Gen. xxxviii. 26). The first cup struck was here turned, Pharez and Zerah, and through Pharez the sacred line was continued. Hence the prominence given to Tamar in the nuptial benediction of the tribe of Judah (Ruth iv. 12), and in the genealogy of our Lord (Matt. i. 3).

The story is important (1) as showing the significance, from early times, attached to the continuance of the line of Judah; (2) as a glimpse into the rough manners of the patriarchal time; (3) as the germ of a famous Mosaic law.

2. (טמרא: [Alex.ходимא] [see 1 Chr. 3.10] [Joseph. חומרא: תמה] Daughter of David and Mahalath the Gushemite princess, and thus sister of Absalom (2 Sam. xiii. 1-32; 1 Chr. i. 9 Joseph. Ant. vii. 8, § 1). She and her brother were alike remarkable for their extraordinary beauty. Her name ("Palm-tree") may have been given her on this account. This fatal beauty inspired a frantic passion in her husband Amnon, the eldest son of David by Ahinoam. He wasted away from the feeling that it was impossible to gratify his desire, "for she was a virgin:"—the narrative leaves it uncertain whether from a scruple on his part, or from the seclusion in which in her unmarried state she was kept. Meaning by morning, as he received the visits of his friend Joab, he is older and thinner (Joseph. Ant. vii. 8, § 1). Jonathah discovers the cause, and suggests to him the means of accomplishing his wicked purpose. He was to feign sickness. The king, who appears to have entertained a considerable affection, almost awe, for him, as the eldest son (2 Sam. xiii. 5. 21; LXX.,) came to visit him, and Amnon entreated him to come in with all his heart, and to be present at a banquet which the king was about to give for him that he would eat. What follows is curious, as showing the simplicity of the royal life. It would almost seem that Tamar was supposed to have a peculiar art of making palatable cakes. She came to his house (for each prince appears to have had a separate establishment), took the dough and kneaded it, and then in one of the upper rooms (for this was the custom, for there were something exquisite in the manner of her performing the work) kneaded it a second time into the form of cakes. The name given to these cakes (lechibah, "heart cakes," has been variously explained: "hollow cakes"—"cakes with some stimulating spices" (like our word curdled)—cakes in the shape of a heart like the Moravian "ekziken," "Hutina, ad loc.")—cakes "the delight of the heart." Whatever it be, it implies something special and peculiar. She then took the pan, in which they had been baked, and poured them all out in a heap before the prince. This operation seems to have gone on in an outer room, on which Amnon's bedchamber opened. He chased his attendants, and called her to the room, and there accomplished his design. In her touching remonstrance two points are remarkable. First, the expression of the infamy of such a crime in Israel," implying the holier standard of morals that prevailed, as compared with other countries at that time; and, secondly, the belief that even this standard might be overcome lawfully by royal authority—"Speak to the king, for he will not withhold me from thee." This expression has led to much needless explanation, from its contradiction to Lev. xviii. 9. xx. 17; Deut. xxii. 22; as, e. g., that, her mother Mahalath not being a Jewess, there was no proper legal relationship between her and Amnon; or that she was ignorant of the purpose, or that the Mosaic law was not then in existence. (Themi, ad loc.) It is enough to suppose, what evidently her whole speech implies, that the king had a dispensing power, which was conceived to cover even extreme cases.

The brutal hatred of Amnon succeeding to his brutal passion, and the indignation of Tamar at his barbarous insult, even surpassing her indignation at his shameful outrage, are pathetically and
TAMAR

graphically told, and in the narrative another glimpse is given us of the manners of the royal household. The unmarried princesses, it seems, were distinguished by robes or gowns with sleeves (so the LXX., Josephus, etc., take the word translated in the A. V. "divers colors"). Such was the dress worn by Tamar on the present occasion, and when the guard at Ammon's door had thrust her out and closed the door after her to prevent her return, she, in her agony, snatched handfuls of ashes from the ground and threw them on her hair, then tore off her royal sleeves, and clasped her bare hands upon her head, and rushed to and fro through the streets screaming aloud. In this state she encountered her brother Absalom, who took her to his house, where she remained as if in a state of widowhood. The king was afraid or unwilling to interfere with the heir to the throne, but she was avenged by Absalom, as Dinah had been by Simeon and Levi, and out of that vengeance grew the series of calamities which darkened the close of David's reign.

The story of Tamar, revolting as it is, has the interest of revealing to us the interior of the royal household beyond that of any other incident of those times. (1.) The establishments of the princes. (2.) The simplicity of the royal employments. (3.) The dress of the princesses. (4.) The relation of the king to the princes and to the law.

3. (Osmat. Alex. Osmat. Tannah: Thonorr.) Daughter of Absalom, called probably after her beautiful aunt, and inheriting the beauty of both aunt and father (2 Sam. xiv. 27). She was the sole survivor of the house of Absalom: and ultimately, by her marriage with Uriah of Gibeah, became the mother of Manoah, the future queen of Judah, or wife of Abijah (1 K. xv. 2). Manoah being called after her great-grandmother, as Tamar after her aunt.

A. P. S.

TAMAR (נָהָר [palm-tree]): Othmamı̄a in both MSS.: Thonorr. A spot on the southeastern frontier of Judah, named in Ez. xlv. 19, xlvii. 28 only, evidently called from a palm-tree. If not Hazazon Tamar, the old name of En-gedi, it may be the place called Thonorr in the Osmat. (=: Hazazon Tamar), a day's journey south of Hebron. The Pentateuch Gables give Tamar in the same direction; and Robinson (Bibl. Res. ii. 298, 291) identifies the place with the ruins of an old fortress at Thonorr. De Saussure (N. S. xlix. 198) endeavors to establish a connection between Tamar and the Ktub el cemel, at the mouth of the ravine of that name on the S. W. side of the Dead Sea, on the ground (amongst others) that the names are similar. But this, to say the least, is more than doubtful.

A. P. S.

TAMMnz (תְּמַ֫מְז [see below]): ּ Othmamı̄a: Abbas). [Ex. viii. 14.] Properly "the Tammuz," the article indicating that at some time or other the word had been regarded as an appellative, though at the time of its occurrence and subsequently it may have been applied as a proper name. As it is found once only in the O. T., and in a passage of extreme obscurity, it is not surprising that many conjectures have been formed concerning it; and as none of the opinions which have been expressed rise above the importance of conjecture, it will be the object of this article to set them forth as clearly as possible, and to give at least a history of what has been said upon the subject.

In the sixth year of the captivity of Jehoiachin, in the sixth month, and on the fifth day of the month, the prophet Ezekiel, as he sat in his house surrounded by the elders of Judah, was transported in spirit to the far distant Temple at Jerusalem. The hand of the Lord God was upon him, and led him "to the door of the gate of the house of Jehovah, which was towards the north: and behold there the women sitting, weeping for the Tammuz."

Some translate the last clause "causing the Tammuz to weep," and the influence which this rendering has upon the interpretation will be seen hereafter. If תְּמַ֫מְז be a regularly formed Hebrew word, it must be derived either from a root תְּמַ֫מְז or תְּמַ֫מְז (comp. the forms תְּמַ֫מְז, תְּמַ֫מְז), which is not known to exist. To remedy this defect First (Hebr. Heb. s. v.) invents a root to which he gives the signification "to be strong, mighty, victorious," and transitively, "to overpower, annihilate." It is to be regretted that this lexicographer cannot contend to confess his ignorance of what is unknown. Roselinger (in Gesen. Thes. s. v.) suggests the derivation from a root תְּמַ֫מְז, according to which תְּמַ֫מְז is a contraction of תְּמַ֫מְז, and signifies a melting away, dissolution, departure, and so the הָעַמְמָדָס Abaddon, or disappearance of Adonis, which was mourned by the Phoenician women, and after them by the Greeks. But the etymology is unsound, and is evidently contrived so as to connect the name Tammuz with the general tradition regarding it.

The ancient versions supply us with no help. The LXX., the Targum of Jonathan Ben Uzziah, the Peshito Syriac, and the Arabic in Walton's Polyglot, merely reproduce the Hebrew word. The Vulgate alone gives Abbas as a modern equivalent, and this rendering has been eagerly adopted by subsequent commentators, with but few exceptions. It is at least as old, therefore, as Jerome, and the fact of his having adopted it shows that it must have embolded the most credible tradition. In his note upon the passage he adds that since, according to the Gentile table, Adonis had been slain in the month of June, the Syrians give the name of Tammuz to this month, when they celebrate to him an anniversary solemnity, in which he is lamented by the women as dead, and afterwards coming to life again is celebrated with songs and praises. In another passage (of Pseudo-Clement, ed. Basili, 1653) he laments that Bethlehem was overshadowed by a grove of Tammuz, that is, of Adonis, and that "in the cave where the infant Christ once cried, the lover of Venus was bewailed." Cyril of Alexandria (in Ossia, Op. iii. 79, ed. Paris, 1698), and Theodoret (in Ezck., give the same explanation, and are followed by the author of the Chronicon Paschale. The only exception to this uniformity is in the Syriac translation of Melito's Apology, edited by Dr. Cureton in his Spicilegium Syriacum. The date of the translation is unknown; the original if genuine must belong to the second century. The following is a literal rendering of the Syriac text:

"The son of Adonis was endowed with the household of Balthi, the queen of Cyprus. For she loved Tammuz, the son of Cuthat, the king of the Phoenicians, and forsook her king-
Jom, and came and dwelt in Gezulot, a fortress of the Phenicians. At that time she made all the villages "subject to Othnar the king. For before Tammuz she had loved Ars, and committed adultery with him, and Hephas-tus her husband caught her, and was jealous of her. And he (i. e. Ars) came and slew Semlon, while he made a hunting among the wild bears. And from that time Belahi remained in Gezulot, and died in the city of Aphaza, where Tammuz was buried" (p. 25 of the Syriac text). We have here very clearly the Greek legend of Adonis reproduced with a simple change of name. Whether this change is due to the translator, as is not improbable, or whether he found "Tammuz" in the original of Melito, it is impossible to say. Be this as it may, the tradition embodied in the passage quoted is probably as valuable as that in the same author which regards Serapis as the dedication of Joseph. The Syriac lexicographer Bar Bahul (10th cent.) gives the legend as it had come down to his time. "Tammaus was, as they say, a hunter shepherd and herder of wild beasts; when a woman loved him took her away from her husband. And when her husband went forth to seek her Tammuz slew him. And with regard to Tanna also, there met him in the desert a wild bear and slew him. And his father made for him a great lamentation and weeping in the month Tappaun and Belahi his wife, she too made a lamentation and mourning over him. And this tradition was handed down among the heathen people during her lifetime and after her death, which same tradition the Jews received with the rest of the evil festivals of the people, and in that month Tannaus used to make for him a great feast. Tammuz also is the name of one of the months of the Syrians." In the next century the legend assumes for the first time a different form in the hands of a Rabbinical commentator. Rabbi Solomon benkii (Rashi) has the following note on the passage in Ezekiel: "An image which the women made hot in the inside, and its eyes were of lead, and it melteth by reason of the heat of the burning, and it seemed as if it wept; and they (the women) said, He asketh for offerings. Tannauz is a word signifying burning, as הַלָּיָה (Dan. iii. 19), and כַּלֶּה (ibid. ver. 22)." And instead of rendering "weeping for the Tannaus," he gives, what appears to be the equivalent in French, "les larmes pleurent l’échantillon." It is clear, therefore, that Rashi regards Tannaus as an appellative, derived from the Chaldee root סֵדָה, "to make hot." It is equally clear that his etymology cannot be defended for an instant. In the 12th century (c. 1120) Dr. Castelio, in Simones, and in later times by J. D. Michaelis, Gesenius, Ben Zeb, Rosenmuller, Maurer, Ewald, Hufnagel, Hitzig, and Movers. Luther and others regarded Tannaus as a name of Bacchus. That Tannaus was the Egyptian Osiris, and that his worship was introduced to Jerusalem from Egypt, was held by Calvin, Piscator, Junius, Lensden, and Plessier. This view depends chiefly upon a false etymology proposed by Kircher, which

a No. "Cyprians," as Dr. Cureton translates.

b Dr. Cureton’s emendation of this corrupt passage seems the only one which can be adopted.

c In this translation I have followed the MS. of Bar

---

Bablius in the Cambridge University Library, the readings of which seem preferable in many respects to those in the extract furnished by Bernstein to Chwolson (Die Sabatai, etc. ii. 206).
connects the word Tammuz with the Coptic Tammuz, to hide, and so makes it signify the hidden or concealed one; and therefore Osiris, the Egyptian king slain by Typhon, whose loss was commemorated by Isis to her son Osiris, may in Egypt be called Tammuz. The woman weeping for Tammuz are in this case, according to Junius, the priestesses of Isis. The Egyptian origin of the name Tammuz has also been defended by a reference to the god Anum, mentioned by Plutarch and Herodotus, who is identified with Osiris. There is good reason, however, to believe that Anum is a mistake for Amun. That something corresponding to his name is found in Egyptian names, as they appear in Greek, cannot be denied.

Tamā́us, an Egyptian, appears in Thucydides (viii. 31) as a Persian officer, in Xenophon (Anab. i. 4, § 2) as an admiral. The Egyptian priest who heard the mysterious voice bidding him proclaim, "Great Pan is dead," was called Θαμαύς (Plutarch, De Defect. Orient. 17). The names of the Egyptian kings, Seti, Σετεϊμείς, Télephos, and Θαμαύς, mentioned by Manetho (c. A.D. 14, 15), have in turn been compared with Tammuz; but unless some more certain evidence be brought forward than is found in these apparent resemblances, there is little reason to conclude that the worship of Tammuz was of Egyptian origin.

It seems perfectly clear, from what has been said, that the name Tammuz affords no clue to the identification of the deity whom it designated. The slight hint given by the prophet of the nature of the worship and worshippers of Tammuz has been sufficient to connect them with the yearly mourning for Adonis by the Syrian damsels. Beyond this we can attach no special weight to the explanation of Jerome. It is a conjecture and nothing more, and does not appear to represent any tradition. All that can be said therefore is that it is not impossible that Tammuz may be a name of Adonis the sun-god, but that there is nothing to prove it. The town of Byblos in Phoenicia was the headquarters of the Adonis-worship a The feast in his honor was celebrated each year in the temple of Aphrodite on the Lebanon b (Lucian, De Deá Sýgρα, § 6), with rites partly sorrowful, partly joyfull.

The Emperor Julian was present at Antioch when the festival closed, and one of the last customs of the ancient festival was held (Ann. Mar. xxi. 3, 13). It lasted seven days (Ann. Marc. xx. 1), the period of mourning among the Jews (Eccles. xxii. 12; Gen. l. 10; 1 Sam. xxi. 13; Jud. vi. 21), the Egyptians (Heliobor. Athl. vii. 11), and the Syrians (Lucian, De Deá Sýgρα, § 52), and began with the disappearance (ἀναφωτισμός) of Adonis.

Then followed the search (ὑγιάς) made by the women for him. His body was represented by a wooden image placed in the so-called 'gardens of Adonis' (Ἀθώνας ιύγειας), which were cuterness-ware vessels filled with wool, and planted with wheat, barley, lettuce, and fennel. They were exposed to the heat of the sun, at the house-door or in the 'porches of Adonis;' and the withering of the plants was regarded as symbolic of the slaying of the youth by the fire-god Mars. In one of these gardens Adonis was found again, whence the oracle says he was slain by the bear in the lettuce (ἀπέκτα = ἀθώνα;), and was there found by Aphrodite. The finding again (ἐπι\(\)) was the commencement of a wake, accompanied by all the usages which in the East attend such a ceremony—prostration, cutting off the hair (comp. Lev. xvi. 28, 29, xi. 5; Dent. xiv. 1), cutting the breast with knives (Jer. xxvi. 6), and playing on pipes (comp. Matt. ix. 23). The image of Adonis was then washed and anointed with spices, placed in a coffin on a bier, and the woman made by the bear was shown on the figure. The people sat on the ground round the bier, with their clothes rent (comp. Fp. of Jer. 31, 32 [or Par. vi. 31, 32]), and the women howled and cried aloud. The body was then terminated with the image of Adonis and the burial of the figure of Adonis (see Movers, Φωινίκις, i. c. 7). According to Lucian, some of the inhabitants of Byblos maintained that the Egyptian Osiris was buried among them, and that the mourning and orgies were in honor of him, and not of Adonis (De Deá Sýgρα, § 7). This is in accordance with the legend of Osiris as told by Plutarch (De Is. et Os.). Lucian further relates that, on the same day on which the women of Byblos every year mourned for Adonis, the inhabitants of Alexandria sent them a letter, inclosed in a vessel which was wrapped in rushes or papyrus, announcing that Adonis was found. The vessel was cast into the sea, and carried by the current to Byblos (Prosopon on Is. xviii.). It is called by Lucian Παγαιοντας, but it is said to have traversed the distance between Alexandria and Byblos in seven days. Another marvel related by the same narrator is that of the river Adonis (Ναυκ Βραχίου), which flows down from the Lebanon, and once a year was tinged with blood, which, according to the legend, came from the wounds of Adonis (comp. Miller, P. L. i. 469); but a rationalist of Byblos gave him a different explanation, how that the soil of the Lebanon was naturally very red-colored, and was carried down into the river by violent winds, and so gave a bloody tinge to the water; and to this day, says Mr. Porter (Handb. p. 187), "after every storm that breaks upon the brow of Lebanon, the Adonis still runs purple to the sea." The rushing waters tear from the banks red soil enough to give the water a slowly tinged, which poetic fancy, aided by popular credulity, converted into the blood of Tammuz. c

The time at which these rites of Adonis were celebrated is a subject of much dispute. It is not so important with regard to the passage in Ezekiel, for there does not appear to be any reason for supposing that the time of the prophet's vision was coincident with the time at which Tammuz was worshipped. Movers, who maintained the contrary, endeavored to prove that the celebration was in the late autumn, the end of the Syrian year, and corresponded with the time of the autumnal equinox. He relies chiefly for his conclusion on the account given by Ammianus Marcellinus (xxi. 9, § 13) of the feast of Adonis, which was being held at Antioch when the Emperor Julian entered the city. It is clear, from a letter of the emperor's (Ep. Jul. 52), that he was in Antioch before the first of August, and his entry may therefore have taken place in July, the Tammuz of the Syrian year. This time agrees moreover with the explanation of the symbolic meaning of the rites given by Ammianus Marcellinus (xxii. 9, § 15), that they were a token of the fruits cut down in their prime. Now

a There was a temple at Amathus, in Cyprus, sanctified to Aphrodite (Appian, H. C. x. 41, § 2); and the worship of Adonis is said to have come from Cyprus to Athens in the time of the Persian War.

b Said to have been founded by Knyrus, the reputed father of Adonis.
at Aleppo (Russell, *Ar. 1, 72) the harvest is all over before the end of June, and we may fairly conclude that the same was the case at Antioch. Add to this that in Hebrew astronomical works Shv'phath Tamn_u-u, the *summer solstice,* and it seems more reasonable to conclude that the Athenian feast of the Phœnicians and Syrians was celebrated rather as the summer solstice than as the autumnal equinox. At this time, the sun begins to descend among the winter signs (Kurtz, *Phœnicians, p. 310*).

The identification of Tamnuz with an idolatrous prophet, which has already been given in a quotation from Maimonides, who himself quotes from *the Agriculture of the Nontheists,* has been recently revived by Professor Chwolson of St. Petersburg (*Ueber Tammuz,* etc. 1860). An Arabic writer of the 16th century, Ep-Nelini, in his book called *Shiferat el-Ulion,* says (quoting from Ahi Saul Wahb ben Ibrahim) that in the middle of the month Tamnuz is held in honor of the god Tā'ūz. The women bewailed him because his lord slew him and ground his bones in a mill, and scattered them to the winds. In consequence of this the women made nothing doing during the month that had been ground in a mill (Chwolson, *Die Schiller,* etc. lii. 27). Professor Chwolson regards Tā'ūz as a corruption of Tamnuz, but the most important passage in his eyes is from the old Babylonian book called *the Agriculture of the Nontheists,* to which he attributes a fabulous antiquity. It was written, he maintains, by one Qiti'ânî, towards the end of the 14th century B.C., and was translated into Arabic by a descendant of the ancient Chaldeans, whose name was Ibn Washiyah. As Professor Chwolson's theory has been strongly attacked, and as the chief materials upon which it is founded are not yet before the public, it would be equally premature to take him as an authority, or to pronounce positively against his hypothesis, though, judging from present evidence, the writer of this article is more than skeptical as to its truth. Qiti'ânî then, in that dim antiquity from which he speaks to us, tells the same story of the prophet Tamnuz as has already been given in the quotation from Kimchi. It was read in the temples after prayers, to an audience who wept and wailed; and so great was the magic influence of the tale that Qiti'ânî himself thought it would work no evil, that it would not strain his tears. A part, he thought, might be true, but it referred to an event so far removed by time from the age in which he lived that he was compelled to be skeptical on many points. His translator, Ibn Washiyah, adds that Tamnuz belonged neither to the Chaldeans nor to the Caunitics, nor to the Hebrews, nor to the Assyrians, but to the ancient people of Damascus, and would like to see the Chaldean conjectures, may be the Semitic name given to the gigantic Cushiote aborigines of Chaldea, whom the Semitic Nalathueans found when they first came into the country, and from whom they adopted certain elements of their worship. Thus Tamnuz, or Tamnûzi, belongs to a religious epoch in Babylon which preceded the Sumerian (*Chwolson, Ueberreste, 2, Alltd. L., p. 19*). Ibn Washiyah says moreover that all the Sabians of his time, both those of Babylonia and of Harran, wept and wailed for Tamnuz in the month which was named after him, but that none of them preserved any tradition of the origin of the worship. This fact alone appears to militate strongly against the truth of Ibn Washiyah's story as to the manner in which he discovered the works he professed to translate. It has been due to Professor Chwolson's reputation to give in brief the substance of his explanation of Tamnuz; but it must be confessed that he throws little light upon the obscurity of the subject.

In the fragment of Jonathan on Gen. viii. 5, "the tenth month" is translated "the mouth Tamnûzi." According to Castell (*Lex. Hept.,*) Tamnûzi is used in Arabic to denote "the feast of summer," and Tamnûzi is the name given to the Pharaoh who cruelly treated the Israelites.

W. A. W.

TANACH (תנ"ך) (perh. castle, Distr.): יָעַּרְשָּׁא; אַלְכָּא. A slight variation, in the vowel-points alone, of the name *TANACH.* It occurs in Josh. xxvi. 2** only. G.

TANHU'METH (תָּנְחֻמֶת) [confront]: תָּנָהּמֶת, תָּנָּהָמֶת; [Vat. THANHUM, THANHUMAHT.] Alex. *Thenuamaht* in 2 K.: *Thannehaemeth,* the father of Sebna in the time of Godoliah (2 K. xxi. 25; Jer. xl. 8). In the former passage he is called *the Netophathite,* but a reference to the parallel narrative of Jeremiah will show that some words have dropped out of the text.

TANIS (תָּנִיס) (Jeh. i. 10. [Zos.]*

*TANNER.* This was Simon's occupation with whom Peter lodged at Joppa at the time of his vision on the house-top, and of the arrival of the messengers from Cornelius (Acts 5). He is termed *Sorites,* for which the more descriptive equivalent is *Soritisq* (from *Soros,* a skin, and *Dhavo,* to soften, make supple): while *Soritisq* (from *Soros,* a dressed hide) designates the operation with reference to its result or product. Among the Jews, as well as the Greeks and Romans, the tanning process included the removal of the hair from the skins, and also the making of the skins smooth and soft. (For the manipulations of the art and the debilatory astringents used, see especially Walch's *Dissectiones in Acta Apostolicium,* ii. 91-128.) Skins tanned and dyed were used for covering the Tabernacle (Ex. xxv. 5, xxvi. 14). *BADGER.* The occupation of the tanner was ill-repute among all the ancient nations, especially the Jews. The Jews considered the entering into this business and canceling the feast before marriage, or the entering into it after marriage, a sufficient cause for divorce. It was also one of the few interdicted trades from which they held that no one could be taken for the office of high-priest or king. For other reasons as well as the disrepute of the business, tanners were required to live, or at least to carry on their work, outside of the cities. The Greeks and Romans made it a law that they should remove their houses and workshops out of the towns and establish themselves near streams or other bodies of water. "Apud veteres corum plerumque extra urbes, prope flumina, officinam et domos stabat habituram, non solum ob morbum animalium, quorum sumus ipsos corum quipliicis ratio exigitur, sed etiam ob fortis in corum officinis obdolor utque soretes; tum vero, quod aqua lingua, cori propraeget, multo fuere pauci careve potenter" (Walen). Yet such restrictions, from the nature of the case, would be more or less severe in different places, and in the same place be enforced or relaxed very much as a variable public feeling might dictate. Generally in the East at present
"such establishments are removed to a distance beyond the walls, because they are offensive as well as prejudicial to health" (Thomson, Land and Book, ii. 281). Yet even at Jerusalem a tannery is tolerated, near the Church of the Holy Sepulchre, a nuisance and offense to all the neighborhood (Fohrer, Handwörterbuch der alttestamentlichen Sprache, ii. 242). Peter in being the guest of Simon may have been less scrupulous than most of the Jews. According to the Talmud the house of a tanner was considered like that of a heathen. It has been suggested that as both the host and the guest bore the name of Simon they may have been related to each other, and that Peter acted the more freely on that account. It certainly was not this relation that helped Peter to Joppa (from Lydda, but information of the death of Dorcas (Acts iv. 38). The two places (now Jaffa and Lod) are within sight of each other.

The house of Simon was "by the sea-side" (Acts v. 6), and though Peter is said to have dined with him in Joppa (Acts x. 43), we may understand this expression of the sublunary as well as of the terrestrial itself. Stanley seriously thinks that the house at Jaffa now shown as Simon's may occupy the original site. It is "close on the sea-shore: the waves beat against the low wall. In the courtyard is a spring of fresh water, such as was always had for the purposes of bathing. There is a tradition which describes the premises to have been long employed as a tannery." (Sin. and Pidi p. 226). Scal sweeps with more probability that it may have been further out of the town, though at no very great distance from it, near the mouth of a brook where there are now four tanneries still in operation (Jews. a. den heil. Land, ii. 11).

TAPPHAH (תַּפָּחַה) [apple]: Teφώ (Josh. xvi. 11). The daughter of Solomon, who was married to Ben-Abinadab, one of the king's twelve commissariat officers (1 K. iv. 11).

* TAPHNES (Tapnai): Jud. i. 9. [TAPPHANES-]

TAPPHON (תפפון): Joseph. Taphon or Taphou (Thapou; Syr. T. fua). One of the cities in Judaea fortified by Archelaus (1 Macc. iv. 59). It is probably the Batteh-Tapham of the Old Test. which lay near Hebron. The form given by Josephus suggests Tephon, but Gurius (Exeg. Humbl.ck) has pointed out that his equivalent for that name is Θέφων; and there is besides too much unanimity among the Versions to allow of its being accepted.

TAPPUAH (תַּפּוּעָה) [apple, apple-tree]: [in Josh. xii. 17, Taphου, Alex. Θάφου: in xv. 34.] I.xx. omits in both MSS. [but Comp. Ald. Tap fou]: Taphamun. 1. A city of Judah, in the district of the Shefelah, or lowland (Josh. xv. 94). It is a member of the group which contains Zerah, Zanoah, and Jarimath; and was therefore no doubt situated on the lower slopes of the mountains of the N. W. portion of Judah, about 12 miles W. of Jerusalem, where these places have all been identified with tolerable probability. It is remarkable that the name should be omitted in both MSS. of the LXX. The Syriac Peshito has Pathuch.

which, when connected with the Exum that follows it in the list, recalls the Pathuch-ergyma of Gen. xxxviii. 14, long a vexed place with the commentators. [See EXUM, i. 752.] Neither Tappuah nor Pathuch have however been encountered. The former seems to have either with the Beth-Tappuah near Hebron, or with the Land of Tappuah in the territory of Ephraim. It is uncertain which of the three is named in the list of the thirty-one kings in Josh. xii.

2. (Tαφου, Θάφω): Alex. Θάφου, Θάφωθ: [Comp. Θαφοῦ]: Taphow. A place on the boundary of the children of Joseph (Josh. xvi. 8, xvii. 18). Its full name was probably En-tappuah (xvii. 7), and it lay attached to it a district called the Land of Tappuah (xvii. 8). This document is evidently in so imperfect or confused a state that it is impossible to ascertain from it the situation of the places it names, especially as comparatively few of them have been yet met with on the ground. But from the apparent connection between Tappuah and the Nachal Kanah, it seems natural to look for the former somewhere to the SW. of Nablus, in the neighborhood of the Wady Falitik, the most likely claimant for the Kanah. We must await further investigation in this hitherto unexplored region before attempting to form any conclusion.

G. TAPPUAH (תַּפּוּעָה) [land of the apple]: Vat. omits; [so also Rom. Alex.: i terva Taphow]. A district named in the specification of the boundary between Ephraim and Manasseh (Josh. xvii. 8). It apparently lay near the torrent Kanah (probably the Wady Folik), but the name has not yet been met with at all in the central district of Palestine.

G. TAPRAH (תַּפּּוּה) [turning or wondering]: Tapud: [Alex. Θαφω: Thāra]: Num. xxxiii. 27). A desert-station of the Israelites between Beth and Mith喀, not yet identified with any known site.

H. H. TARALAH (תָּרָלָה) [feeling, drunkenness, Ges., First]: Θαράλα: Alex. Θαρά: Θαρά: One of the towns in the allotment of Benjamin (Josh. xviii. 37, only). It is named between Ipeled and Zelah: but nothing certain is known of the position of either of those places, and no name at all resembling Taralah has yet been discovered. Schwarz's identification with "Thaniel" Donagi (near Lydol, is far fetched in etymology, and unsuitable as to position; for there is nothing to lead to the conclusion that the Benjamites had extended themselves so far to the west when the lists of Joshua were drawn up.

G. TAREA (תָּרָה) [Right, First]: Θάραξα: [Vat. Θαραξά: Alex. Θαραξ: Θαραν]. The same.

b The principal valley of the town of Hebron is called the Deir (Map to Rosen's paper in ZEIT., D. M. G. xiii. and p. 451).
TARES

TARPELITES, THE

I Taresa, the son of Micah (1 Chr. viii. 35), the Hebrew letters  Sarah and  being interchanged, a phenomenon of rare occurrence (Gesen. Thes. p. 2).

TARES (Σινία: zizania). There can be little doubt that the zizania of the parable (Matt. xiii. 25) denote the weed called "darnel" (Lolium tenuifolium), a widely distributed grass, and the only species of the order that has deleterious properties. The word used by the Evangelist is an Oriental, and not a Greek term. It is the Arabic zanid (317), and the zānīa (317) of the Talmud (Buxtorf, Lex. Talm. s. v.). The derivation of the Arabic word, from zās (317), "nausea," is well suited to the character of the plant, the grains of which produce vomiting, purging, convulsions, and even death. Volney (Trans. ii. 306) experienced the ill effects of eating its seeds; and the whole of the inmates of the Sheffield workhouse were attacked some years ago

tall green stalks, still called by the Arabs zandū. "These stalks," he continues, "if sown designately throughout the fields, would be inseparable from the wheat, from which, even when growing naturally and by chance, they are at first sight hardly distinguishable." See also Thomson (Land and Book, p. 120); "The grain is just in the proper stage to illustrate the parable. In those parts where the grain has headed out, the darnels have done the same, and then a child cannot mistake them for wheat or barley; but where both are less developed, the closest scrutiny will often fail to detect them. Even the farmers, who in this country generally weet their fields, do not attempt to separate the one from the other." The grain-growers in Palestine believe that the zanāna is merely a degenerate wheat; that in wet seasons the wheat turns to tares. Dr. Thomson asserts that this is their fixed opinion. It is curious to observe the retention of the falshay through many ages. "Wheat and zania," says Lightfoot (Hor. Heb. on Matt. xiii. 25), quoting from the Talmud, "are not seeds of different kinds." See also Buxtorf (Lex. Talem. s. v. 317): "Zania, species tritici degeneris, sic diet, quod scortando cum lomo triticum, in pejorem naturam degenerat." The Roman writers appear to have entertained a similar opinion with respect to some of the cereals: thus Pliny (H. N. xvi. 17) borrowing probably from Theophrastus, asserts that "barley will degenerate into the oat." The notion that the zanāna of the parable are merely diseased or degenerate wheat has been contested by P. Broderer (see his letter to Schultetus in Exercit. Beqau. ii. cap. 65), and strangely adopted by Trench, who (Notes on the Parables, p. 91, 4th ed.) regards the distinction of these two plants to be "a falsely assumed fact." If the zanāna of the parable denote the Lolium tenuifolium, and there cannot be any reasonable doubt about it, the plants are certainly distinct, and the L. tenuifolium has as much right to specific distinction as any other kind of grass.

* TARGET. [Arms, i. 2. b; II. 6. b; Armory.]

TARGUMS. [Versions, Chaldee.]

TARPELITES, THE (377):

Tarphalaios; Alex. Tarphalaiaos; Tharphalus. A race of colonists who were planted in the cities of Samaria after the captivity of the northern kingdom of Israel (Exx. iv. 9). They have not been identified with any certainty. Jumins and others have found a kind of resemblance in name to the Tarpilites in the Targi (Tarpowey) of Ptolomy (vi. 2, § 6), a tribe of Media who dwelt eastward of Elymais, but the resemblance is scarcely more than apparent. They are called by Strabo Tarpowey (xi. 514, 515, 520, 523). Others, with as little probability, have sought to recognize the Tarpilites in the Tarpetes (Tarpowyes, Strab. xii. 405), a Maetic race. In the Peskito-Syrie the resemblance is greater, for they are there called Tarpiti. First (Hamb. ed.) says in no case can Tarpel, the country of the Tarpetes, be the Phcenician Tripolis. W. A. W.

a The zizania is described in the Genopon (li. c. 13) as a plant which "destroys the wheat, and when mixed with bread produces blindness in those

200

Bearded Darnel.
TARSHISH

TARSHISH  [ταρσίσιον]  [prob. fortress, Dietr.]: [generally] θόραξ [or θάραξ]; in Is. xxlii. Καρικήδων; in Ez. Καρικηδών, exc. Alex. in Ez. xxxviii. 13, χρυσός; lxvi. in Is. 16, θάλασσας] Thür. [in Is. xxiii. 1b, lxvii., and lxviii. 13, nor θαρσίσιον; in Ez. xxvii. 13, Carthaginienses,] Gen. x. 4. 1. Probably Tar- tassium: Gk. Ταρσίσιον. A city and emporium of the Phoenicians in the south of Spain. In psalm lxvi. 10, it seems applied to a large district of country: perhaps, to that portion of Spain which was known to the Hebrews when that psalm was written. And the word may have been likewise used in this sense in Gen. x. 4, where Knobel (Vol- kertsfeld der Genesis, Giessen, 1856) etc., applies it to the Tuscans, though he agrees with nearly all biblical critics in regarding it elsewhere as syn- onymous with Tartessus. The etymology is un- certain.

With three exceptions in the book of Chronicles, which will be noticed separately (see below, No. 2), the following are references to all the passages in the Old Testament, in which the word — Tarshish — occurs; commencing with the passage in the book of Jonah, which shows that it was accessible from Yapho, Yaffo, or Joppa, a city of Palestine with a well-known harbor on the Mediterranean Sea (Jon. i. 3; iv. 2; Gen. x. 4; 1 Chr. i. 7; Is. li. 16, xxvii. 1, 6, 10, 14, lx. 9, lxvi. 19; Jer. x. 9; Ez. xxxvii. 12, 25, xxxviii. 13; 1 K. v. 22, xxii. 45 [49]; [iu. 14, A. V. TALSHISHI] Ps. viii. 7, lxvii. 10). On a review of these passages, it will be seen that not one of them furnishes direct proof that Tarshish and Tartassus were the same cities. But their identity is rendered highly probable by the following circumstances. 1st, There is a close simi- larity of name between them, Tartassus being merely Tarshish in the Aramaic form, as was first pointed out by Bochart (Phlegy, lib. iii. cap. 7). Thus the Hebrew word Partner — Assyria, is in the Aramaic form Athir, Attir, and in Greek Αρούση (Strabo, xvi. 1, 2), and 'Артвυ (Dion Cass. xxviii. 25) — though, as is well known, the ordinary Greek form was 'Αρούση. Again, the Hebrew name Ashdun, translated in the same form in the A. V. of the Old Testament, is 'Araunah in Aramaic, and Aroïne in Greek; where also Æsa- tanca in Latin (see Buxtorfii Lexicon Chaldaicum Talmudicum et Rabbinicum, s. vv.). Moreover, there are numerous changes of the same kind in common words; such as the Aramaic numera 8, tamaci, which corresponds with the Hebrew word shechem; and teby, the Aramaic word for "snow," which is the same word as the Hebrew snow (see Genesis, Thucydides, p. 194). And it is likely that in some way which cannot now be explained, the Greeks received the word "Tarshish" from the Phoenicians in a partly Aramaic form, just as they received in that form many Hebrew letters of the alphabet. The last sh of Tarshish a would naturally be represented by the double s in the Greek ending, as the sound and letter sh was unknown to the Greek language. [SHIHOLIETS]

a. It is unsafe to lay any stress on Tarselum (Tar- sium), which Stephanus of Byzantium (a. d. 420) was a city near the Columns of Hercules. Stephanus was probably misled by a passage to which he refers in an appeal to Tarshish to assert its independence (see the notes of Rosenmüller, Gesenius, and Ewald, in verses 18). And Arrian (De expedit. Alexandr. ii. 16, § 3) expressly states that Tarshassus was founded or colonized by the Phoenicians, saying, Φωνικὸς κτίσμα ἡ Πατριγιός. It has been suggested that this is a mistake on the part of Arrian, because Diochorus (xxvi. 14) represents Hanecar as defat- ting the Iberians and Tartessians, which has been thought to indicate that the latter were not Phoeni- cians. But it is to be remembered that there was a river in Hispania Betica called Tarshassus, as well as a city of that name (Strabo, iii. 145), and it may easily have been the case that tribes which dwelt on its banks may have been called Tartassians, and may have been mentioned under this name, as depicted by Hanecar. Still, this would be perfectly com- patible with the fact, that the Phoenicians estab- lished there a factory or settlement called Tartessus, which had dominion for a while over the adjacent territory. It is to be borne in mind, likewise, that Arrian, who must be pronounced on the whole to be a judicious writer, had access to the writings of Menander of Ephesus, who translated some of the Tyrian archives into Greek (Joseph. Ant. ix. 14, 15), and it is quite possible that those writings when he undertook to give some ac- count of Tyre, in reference to its celebrated siege by Alexander, in connection with which he makes his statement respecting Tarshassus.

3dly. The articles which Tarshassus is stated by the prophet Ezekiel to have supplied to Tyre are precisely such as we know through classical writers to have been productions of the Spanish Peninsula. Ezekiel specifies silver, iron, lead, and tin (Ez. xxvii. 12), and in regard to each of these metals as con- nected with Spain, there are the following au- thorities. As to silver, Diosorus, who (v. 35) speaks of Spain as possessing this metal in the greatest abundance and of the greatest beauty (σχεδόν τι πλείστων καὶ κάλλιστων), and particular mentions that the Phoenicians made a great profit by this metal, and established colonies in Spain on its account, at a time when the mode of working it was unknown to the natives (comp. Arist. de Min. 153, 87). This is confirmed by Pline, who says (Hist. Nat. xxxii. 33), " Ar- gentum reperitur — in Hispaniâ pulcherrimum; id quoque in sterili solo, atque etiam montibus;" and he proceeds to say that wherever one vein has been found, another vein is found not far off. With re- gard to iron and lead, Pline says, "metallis plumbi, ferrī, oris, argenti, auri tota fert Hispania scatet" (Hist. Nat. iii. 4). And as to lead, more especially, this is so true even at present, that a writer on Mines and Mining in the last edition of A. Enrico. Britannicus, p. 242, states as follows: "Spain possesses numerous and valuable lead mines. The most important are those of Linares, which are situated to the east of Balien near the Sierra Morena. They have been long celebrated, and perhaps no known mineral field is so rich in lead as this." And, lastly, in regard to tin, the trade of Tarshass in this metal is peculiarly significant, and taken in conjunction with similarity of name and other circumstances already men- tioned, is reasonably conclusive as to its identity Polybios, iii. 24. The Ταρσίσιον of Polybius could scarcely have been very far from the Pulcherum Pro- montorium of Carthage.
with Tarshish. For even now the countries in Europe, or on the shores of the Mediterranean Sea where tin is found are very few; and in reference to ancient times, it would be difficult to name any such countries except Iberia or Spain, Lusitania, which was somewhat less in extent than Portugal, and Cornwall in Great Britain. Now if the Phoenicians, for purposes of trade, really made coasting voyages on the Atlantic Ocean as far as to Great Britain, no emperor was more favorably situated for such voyages than Tarshish. If, however, in accordance with the views of Sir G. Cornewall Lewis, it is deemed unlikely that Phoenician ships made such distant voyages (Historical Summary of the Astronomy of the Ancients, p. 436), it may be added, that it is improbable, and not to be admitted as a fact without distinct proof, that nearly six hundred years before Christ, when Ezekiel wrote his prophecy against Tyre, they should have supplied the nations on the shores of the Mediterranean with British tin obtained by the mouths of the Rhone. Diodorus indeed mentions (v. 38), that in his time tin was imported into Gaul from Britain, and was then conveyed on horseback by traders across Gaul to Massilia, and the Roman colony of Narbon. But it would appear to be a very different thing to suppose that this was the case so many centuries earlier, when Rome, at that time a small and insignificant town, did not possess a foot of land in Gaul; and when, according to the received systems of chronology, the settlement of Massilia had only just been founded by the Phoenicians. As countries then from which Tarshish was likely to obtain tin, there remain only Lusitania and Spain. And in regard to both of these, the evidence of Pliny the Elder at a time when they were flourishing provinces of the Roman empire, remains on record, to show that tin was found in each of them (Hist. Nat. xxxiv. 47). After mentioning that there were two kinds of lead, namely, black lead and white lead, the latter of which was called "Coastier" by the Greeks, and was fabulously reported to be obtained in islands of the Atlantic Sea, Pliny proceeds to say, "Nine certain est in Lusitania gigni, et in Gallia;" and he goes on to describe where it is found, and the mode of extracting it (compare Pliny himself, iv. 34, and Diodorus, l.c. as to tin in Spain). It may be added that Strabo, on the authority of Poseidonius, had made a previous statement to the same effect (iii. 157), though it is likely that his time tin was likewise brought to the Mediterranean, through Gaul by Massilia, from the supposed Cassiterides or Tin Islands. Moreover, as confirming the statement of Strabo and Pliny, tin mines now actually exist in Portugal; both in parts which belonged to ancient Lusitania, and in a district which formed part of the earlier district of Galicia. It is true he bears in mind that Seville on the Guadalquivir, which has free communication with the sea, is only about 80 miles distant from the Portuguese frontier. Subsequently, when Tyre lost its independence, the relation between it and Tarshish was probably altered, and for a while, the exaltation of Iosiph (xxiii. 10) may have been realized by the inhabitants passing through Galicia. Thus it is borne in mind that Tarshish, combined with the overshadowing growth of the Carthaginian power, would explain why in after times the learned Jews did not seem to have known where Tarshish was. Thus, although in the Septuagint translation of the Pentateuch the Hebrew word was as closely followed as it could be in Greek (ἐξαρχίας, in which the θ is merely without a point, and ε is equivalent to η; according to the pronunciation in modern Greek), the Septuagint translators of Isaiah and Ezekiel carried it in word by "Carrheg, and "the Carthaginians" (Is. xxii. 1, 10; 14: Ez. xxxvii. 12, xxxviii. 13; and in the Targum of the book of Kings and of Jeremiah, it is translated "Yirea," as is pointed out by Gesenius (1 K. xxii. 18; Jer. x. 9). In one passage of the Septuagint (Is. ii. 16), and in others of the Targum, the word is translated σωμη, which receives apparently some countenance from Jerome, in a note on Is. ii. 16, wherein he states that the Hebrews believe that Tharsis is the name of the sea in their own language. And Josephus, misled, apparently, by the Septuagint translation of the Pentateuch, which he misinterpreted, regarded Tharsis as Tarshus in Cicilia (Jot. i. 6, § 1), in which he was followed by other Jews, and (using Tarshus in the sense of all Cicilia) by one learned writer in modern times. See Hartmann's Aufklärungen über Asia, vol. i. p. 68, as quoted by Winer, s. v."

Thus, although in the Septuagint translation of the Pentateuch, the Hebrew word was as closely followed as it could be in Greek (ἐξαρχίας, in which the θ is merely without a point, and ε is equivalent to η; according to the pronunciation in modern Greek), the Septuagint translators of Isaiah and Ezekiel carried it in word by "Carrheg," and "the Carthaginians" (Is. xxii. 1, 10; 14; Ez. xxxvii. 12, xxxviii. 13; and in the Targum of the book of Kings and of Jeremiah, it is translated "Yirea," as is pointed out by Gesenius (1 K. xxii. 18; Jer. x. 9). In one passage of the Septuagint (Is. ii. 16), and in others of the Targum, the word is translated σωμη, which receives apparently some countenance from Jerome, in a note on Is. ii. 16, wherein he states that the Hebrews believe that Tharsis is the name of the sea in their own language. And Josephus, misled, apparently, by the Septuagint translation of the Pentateuch, which he misinterpreted, regarded Tharsis as Tarshus in Cicilia (Jot. i. 6, § 1), in which he was followed by other Jews, and (using Tarshus in the sense of all Cicilia) by one learned writer in modern times. See Hartmann's Aufklärungen über Asia, vol. i. p. 68, as quoted by Winer, s. v.

It tallies with the ignorance of the Jews respecting Tarshish, and helps to account for it, that in Strabo's time the emperor of Tarshish had long ceased to exist, and its precise site had become a subject of dispute. In the absence of positive proof, we may conjecture in the statement of Strabo (iii 149), that the river Betis (now the Guadalquivir) was formerly called Tarshis, that the city Tarshassus was situated between the two arms by which the river flowed into the sea, and that the adjoining country was called Tarshassus. But there were two other cities which some deemed to have been Tarshassas: one, Gadira, or Gadiria (Cadiz) (Sallust, Flor. lib. ii.; Pliny, Hist. Nat. iv. 56, and Aelius, Descrip. Orb. Terr. p. 614); and the other, Curtia, in the bay of Gibraltar (Strabo, iii. 151; Itol. ii. 4; Pliny, iii. 3; Mela, ii. 6). Of the three, Carteitn, which has found a learned supporter in the present day (Ersch and Gruber's Encyclopaedia, s. v.), seems to have the weakest claims; for in the earliest Greek prose work extant, Tarshassus is placed beyond the Columns of Hercules (Herod. iv. 152); and in a still earlier fragment of the Chronicle of Strabo (lect. 158), mentioned as a branch of the river Tarshassus, whereas there is no stream near Curtia (= El Rocadello) which deserves to be called more than a rivulet. Strictly speaking, the same objection would apply to Gadira; but, for poetical use, the Guadalquivir, which is only 20 miles distant, would be sufficiently near. It was, perhaps, in reference to the claim of Gadira that Cicero, in a letter to Atticus (vii. 3), jealously calls Balbus, a native of that town, "Tarshassus iustum tunc." But Tarshassus was, likewise, used by poets to express the extreme west where the sun set (Ov., Metam. xiv. 416; Silius Italicus, x. 358; compare Sil. Ital. iii. 399).

2. If the book of Chronicles is to be followed, there would seem to have been a Tarshish, accessible from the Red Sea, in addition to the Tarshish.
of the south of Spain. Thus, with regard to
the ships of Tarshish, which Jehoshaphat caused to be
constructed at Ezion-geber on the Ebanitic Gulf of
the Red Sea (1 K. xxii. 48), it is said in the Chronic-
les (2 Chr. xx. 50) that they were made to
go to Tarshish; and in like manner the navy of
ships which Solomon had previously made in Ezion-
geber (1 K. ix. 20) is said in the Chronicles
(2 Chr. ix. 21) to have gone to Tarshish with the
servants of Hiram. It is not to be supposed that
the author of these passages in the Chronicles con-
templated a voyage to Tarshish in the south of
Spain by going round what has since been called
the Cape of Good Hope. Sir G. Cornwall Lewis
(Notes and Queries, 23 series, vol. vi. pp. 61-64, 81-83) has shown reasons to doubt whether
the circumnavigation of Africa was ever effected by
the Phoenicians, even in the celebrated voyage which
Herodotus says (iv. 42) they made by Neo's orders;
but at any rate it cannot be seriously supposed
that, according to the Chronicles, this great voyage
was regularly accomplished once in three years in
the reign of Solomon. Keill supposes that the
vessels built at Ezion-geber, as mentioned in 1 K.
xxii. 43-50, were really destined for the trade to
Tarshish in Spain, but that they were intended to
be transported across the isthmus of Suez, and to
be launched in one of the havens of Palestine on the
Mediterranean Sea. (See his Notes on loc. cimam.
Engl. transl.) But this seems improbable; and
the two alternatives from which selection should be
made seem to be: Ist, that there were two or more
large or districts called Tarshish, namely, one in the
south of Spain, and one in the Indian Ocean; or, 2ndly,
that the compiler of the Chronicles, misapprehen-
ding the expression "ships of Tarshish," supposed
that they meant ships destined to go to Tarshish;
whereas, although this was the original meaning
the words had come to signify large Phoenician
vessels, of a particular size and description, destined
for long voyages, just as in English "East Indian
man" was a general name given to vessels, some
of which were not intended to go to India at all.
The first alternative was adopted by Bochart, Phy-
leg, lib. iii. c. 7, and has probably been the ordinary
view of those who have perceived a difficulty in the
passages of the Chronicles; but the second, which
was suggested by Vitringa, has been adopted by the
accredited Biblical critics of our own time, such as De Wette, Introduction to the Old Testa-
ment, Parker's translation, Boston, 1843, p. 207,
vol. ii.; Winer, Bibliches Realwörterbuch, s. v.;
Genovis, Theaurus Lingue Heb. et Chald. s. v.,
and Ewald, Geschichte des Volkes Israel, vol. iii.
1st ed. p. 76; and is acknowledged by Movers,
Feder die brief, ChroUis, 1834, 254, and Havemann,
Spezelle Eindiehning in das Alte Testament, 1839,
vol. ii. p. 237. This alternative is in itself by far
the most probable, and ought not to occasion any
surprise. The compiler of the Chronicles, who
probably lived in the time of Alexander's succe-
sors, had the book of Kings before him, and in
抄ing its accounts, occasionally used later and more
modern accounts of the same vessel, as more un-
usual (De Wette, loc. c. p. 266). It is probable that
during the Persian domination Tarshessus was in-
dependent (Herodotus i. 163); at any rate, when
first visited by the Geycks, it appears to have had
its own kings. It is not, therefore, by any means
unnatural that the old trade of the Phoenicians
with Tarshish had ceased to be understood; and
the compiler of the Chronicles, when he read of
"ships of Tarshish," presuming, as a matter of
course, that they were destined for Tarshish, con-
sulted, as he thought, the convenience of his readers
by inserting the explanation as part of the text.
Although, however, the point to which the fleet
of Solomon and Hiram went once in three years did
not bear the name of Tarshish, the question here
arises of what that point was, however it was
called? And the reasonable answer seems to be,
India, or the Indian islands. This is shown by the
nature of the imports with which the fleet returned,
which are specified as "gold, silver, ivory, apes,
and peacocks" (1 K. x. 22). The gold might
possibly have been obtained from Africa, or from
Ophir in Arabia (Ophim), and the ivory and the
apes might likewise have been imported from
Africa; but the peacocks point conclusively, not to
Africa, but to India. The compilers of the tran-
sators of Cuvier's Animal Kingdom, London, 1829,
vol. viii. p. 136, says, in reference to this bird:
"It has long since been decided that India was
the cradle of the peacock. It is in the countries
of Southern Asia, and the vast archipelago of the
Eastern Ocean, that this bird appears to have fixed
its dwelling, and to live in a state of freedom. All
travellers who have visited these countries make
mention of these birds. Thenceon encountered
great numbers of them in the province of Guzerat;
Tavernier throughout all India, and Payrard in
the neighborhood of Calcutta. Labillardiere tells us
that peacocks are common in the island of Java." To
this may be added the statement of Sir William
"There are only two species known; both inhabit
the continent and islands of India" — so that the
mention of the peacock seems to exclude the possi-
bility of the voyage having been to Africa. Mr.
Crawford, indeed, in his excellent Descriptive Di-
cionary of the Indian Islands, p. 310, expresses
an opinion that the birds are more likely to have been
imported than peacocks; but he objects to the peac-
cock, that, independent of its great size, it has
a delicate constitution, which would make it nearly
impossible to convey it in small vessels and by a
long sea voyage. It is proper, however, to mention,
on the authority of Mr. Gould, whose splendid
works on birds are so well known, that the peacock
is by no means a bird of delicate constitution,
and that it would bear a sea voyage very well. Mr.
Gould observes that it might be easily fed during
a long voyage, as it lives on grain; and that it would
merely have been necessary, in order to keep it in
a cage, to have cut off its train; which, it is to be
observed, falls off of itself, and is naturally renewed
once a year.

The inference to be drawn from the importation
of peacocks is confirmed by the Hebrew name for
the ape and the peacock. Neither of these names
is of Hebrew, or even Semitic origin; and each
points to India. Thus the Hebrew word for ape is

a Sir Emerson Tennent has pointed out and trans-

b The word "shanabho" = ivory, is likewise

~

3850

TARSHISH

TARSHISH

kind of admiration which every one feels who be-
comes acquainted for the first time with the arrange-
ments of an English man-of-war. See Encyl. Bri-
nanica, 6th ed. s. v. "Tarshish."

The word "shanabho" = ivory, is likewise
Kaph, while the Sauskritic word is kapi (see Gesenius and First, s. v., and Max Müller, On the Science of Language, p. 190). Again, the Hebrew word for peacock is takki, which cannot be explained in Hebrew, but is akin to taka in the Tamil, in which it is likewise capije of explanation. Thus, the Rev. Dr. R. Caldwell, than whom there is no greater authority on the Tamil language, writes as follows from Palamcottah, Madras, June 12, 1862: "taka is a well recognized Tamil word for peacock, though now used only in poetry. The Sauskritic word, takki, refers to the peacock of the peacock, and means (avīs) crisātos; the Tamil taka refers to the other and still more marked peculiarity of the peacock, its tail (i.e. its train), and means (avīs) candāto. The Tamil taka signifies, according to the dictionaries, plumage, the peacock's tail, the peacock, the end of a skirt, a flag, and, lastly, a woman (a comparison of gaily-dressed women with peacocks being implied)." The explanation of all these meanings is, that taka literally means that which hangs—a hanging. Hence hāköri, another form of the same word in provincial use in Tamil (see also the hākpi of Régier in Gesenius's Thesaurus, p. 1502), means 'skirt,' and in Telugu, tāko means a tail. It is to be observed, however, that in ancient India, the name was always used positively, until the voyage having been to Africa, the Indian origin of the Hebrew name for ape and peacock would not be of much weight, as it cannot be proved that the Hebrews first became acquainted with the names of these animals through Solomon's naval expeditions from Ezion-geber. Still, this Indian origin of those names must be regarded as important in the absence of any evidence in favor of Africa, and in conjunction with the fact that the peacock is an Indian and not an African bird.

It is only to be added, that there are not sufficient data for determining what were the ports in India or the Indian islands which were reached by the fleet of Hiram and Solomon. Sir Emerson Tennent has made a suggestion of Point de Galle, in Ceylon, on the ground that from three centuries before the Christian era there is an unbroken chain of evidence down to the present time, to prove that it was the gran emporium for the commerce of all nations east of the Red Sea. [See article Tarsus, above.] But however reasonable this suggestion may be, it can only be received as a pure conjecture, inasmuch as there is no evidence that any emporium at all was in existence at the Point de Galle 700 years earlier. It can scarcely be doubted that there will always henceforth be an emporium at Singapore; and it might seem a spot marked out by nature for the commerce of nations; yet we know how favours it would be, under any circumstances, to argue 2,000 years hence that it must have been a great emporium in the twelfth century, or even previous to the nineteenth century of the Christian era.

E. T.

8 In addition to the two cities in the extreme East and West, there were others called Tarsish. One of these, Tarsus of Cilicia, has a fair claim to recognition as mentioned in the O. T., and the N. T. That the name is the same is shown on the one hand by the Sept. rendering of ἀψίς in Gen. x. 4, Jon. i. 3, ἄφαινες, and by the same rendering by other Greek interpreters in other passages (Is. ii. 16, xxii. 10; Ez. xxvii. 33); and on the other hand, by the fact that in the N. T. the Greek ῦαρσος is uniformly rendered in the ancient Syriac of Acts ix. 11, 30, xi. 25, xxi. 39, xxii. 3, καὶ ὁ ἄπντας, and in the modern Hebrew TARSHISH. Now Tarsus of Cilicia is said to have been founded by the Assyrian king Sardanapalus (Smith's Dict. of Greek and Rom. Geography, s. v.), and therefore in the time of Jonah would naturally have been in active communication with Nineveh. If we may suppose Tarsus of Cilicia to be the Tarsish of the book of Jonah, we readily see how the prophet might have found at Joppa a vessel bound for this port. The prophet's story, carried by the ship's crew to Tarsus, would then have gone on before him to Nineveh, and would have prepared the city to receive his preaching. It is interesting to think of this city as thus possibly connected with the ancient prophet sent to the heathen, and with the Christian Apostle sent to the Gentiles.

TARSUS (Tarapis). The chief town of Cilicia, "no mean city" in other respects, but illus- trious all to time as the birthplace and early residence of the Apostle Paul (Acts ix. 11, xxi. 39, xxii. 3). It is simply in this point of view that the place is mentioned in the three passages just referred to. And the only other passages in which the name occurs are Acts ix. 30 and xi. 25, which give the limits of that residence in his native town which succeeded the first visit to Jerusalem after his conversion, and preceded his active ministerial work at Antioch and elsewhere (compare Acts xxii. 21 and Gal. i. 21). Though Tarsus, however, is not actually mentioned elsewhere, there is little doubt that St. Paul was there at the beginning of his second and third missionary journeys (Acts xv. 41, xviii. 23).

Even in the flourishing period of Greek history it was a city of some considerable consequence (Xen. Anab. i. 2, § 28). After Alexander's conquests had swept this way (O. Curt. iii. 5), and the Seleucid kingdom was established at Antioch, Tarsus usually belonged to that kingdom, though for a time it was under the Ptolemaic. In the civil wars at Rome

usually regarded as of Indian origin, "ibba" being in Sanskrit, "elephant." But "shobhambum," or "shoubhum," as the word would be without points, is nowhere used for ivory except in connection with this voyage, the usual word for ivory being sāha by twelve centuries for conjecture of Régier in Gesenius's Thesaurus, s. v. is very probable, that the correct reading is sāha, ivory (and) ebony as shobhum, which is remarkably confirmed by a passage in Rakiel (xxvii. 15), where he speaks of the men of India "saving brought to Tyre horns of ivory and ebony. "

םלועה שָׁכוּב, "ivory (and) ebony as shobhum, which is remarkably confirmed by a passage in Rakiel (xxvii. 15), where he speaks of the men of India saving brought to Tyre horns of ivory and ebony."

♀ This The Greeks received the peacock through the Persians, as is shown by the Greek name tāris, which is nearly identical with the Persian name tāris, TARSUS. The fact that the peacock is mentioned for the first time in Aristophanes, Aes. 192, 289 (being unknown to the Homeric poets), agrees with this Persian origin.

♀ When it is said (2 Chr. ix. 21) that "once every three years come the ships of Tarshish," it is fairly implied that the length of a voyage corresponded in some measure with the interval of time at which it was repeated. This accords very well with a Tarshish in India, but not with a Tarshish in Spain. F. G.
it took Caesar's side, and on the occasion of a visit from him had its name changed to Julipolis (Ces. Bell. Alex. 66; Dion Cass. xlvii. 29). Augustus made it a "free city." We are not to suppose that St. Paul had, or could have, his Roman citizenship from this circumstance, nor would it be necessary to mention this, but that many respectable commentators have fallen into this error. We ought to note, on the other hand, the circumstances in the social state of Tarsus, which had, or may be conceived to have had, an influence on the Apostle's training and character. It was renowned as a place of education under the early Roman emperors. Strabo compares it in this respect to Athens and Alexandria, giving, as regards the zeal for learning showed by the residents, the preference to Tarsus (xiv. 673). Some eminent Stoics resided here, among others Athenodorus, the tutor of Augustus, and Nestor, the tutor of Tiberius. Tarsus also was a place of much commerce, and St. Basil describes it as a point of union for Syrians, Cilicians, Isaurians, and Cappadocians (Basil, Ep. 130. "Somn. Episc.").

Tarsus was situated in a wide and fertile plain on the banks of the Cydnus, the waters of which are famous for the dangerous fever caught by Alexander when bathing, and for the meeting of Antony and Cleopatra. This part of Cilicia was intersected in Roman times by good roads, especially one crossing the Taurus northwards by the "Cilician Gates" to the neighborhood of Lystra and Iconium, the other joining Tarsus with Antioch, and passing eastwards by the "Amanian" and "Syrian Gates." No ruins of any importance remain. The following authorities may be consulted: Belley in vol. xxvii. of the Académie des Inscriptions.; Beaufort's Inscriptions, p. 275; Leake's Asia Minor, p. 214; Barker's Love and Penates, pp. 31, 173, 187. J. S. H.

**TARTAN** [see below]: Taphs [Vat. Q. 902], Tarakār [in Is., Vat. 2 Sim. Alex. Natur.] Thathorn, which occurs only in 2 K. xviii. 17, and Is. xx. 1, has been generally regarded as a proper name. (Gesen. Lex. Hebr. s. v.; Winer Realwörterbuch: Kito Bibl. Cyclop. s. v.)
a Surenas, the Parthian term for "a general," was often mistaken for a proper name by classical writers (ibid., xv. 8, 33; Appian, Bell. Parth. p. 140; Dion Cass. xvi. 16; Plut. Crass. p. 501, E. etc.)

Tactius is the first author who seems to be aware that it is a title [Ann. vi. 42].

Winer assumes, on account of the identity of name, that the same person is intended in the two places. Kitto, with more caution, notes that this is uncertain. Recent discoveries make it probable that in Tartan, as in Ralshar and Radshakhe, we have not a proper name at all, but a title or official designation, like Pharaoah or Surena. [Tarte] The Assyrian Tartan is a general, or commander-in-chief. It seems as if the Greek translator of 2 Kings had an inclusion of the truth, and therefore prefixed the reference to all three names (Apistis Tapaion to Sevaidha, &c.) which he very rarely prefixes to the names of persons where they are first mentioned.

If this be the true account of the term Tartan, we must understand in 2 K. xviii. 17, that Sennacherib sent "a general," together with his "chief eunuch" and "chief cup-bearer," on an embassy to Hezekiah, and in ix. 1 that "a general"— probably a different person—was employed by Sargon against Ashdod, and succeeded in taking the city.

TAXES.

In the history of Israel, as of other nations, the student who desires to form a just estimate of the social condition of the people must take into account the taxes which they had to pay. According as these are light or heavy may vary the happiness and prosperity of a nation. To them, though lying in the background of history, may often be traced, as to the true motive-power, many political revolutions. Within the limits of the present article, it will not be possible to do more than indicate the extent and form of taxation in the several periods of which history and its influence on the life of the people.

I. Under the Judges, according to the theoretical government contemplated by the law, the only payments obligatory upon the people as of permanent obligation were the Tithes, the First Fruits, the Redemption-Money of the first-born, and other offerings as belonging to special occasions [Priests]. The payment by each Israelite of the half-shelak of "atonement-money," for the service of the Tabernacle, on taking the census of the people (Ex. xxx. 13), does not appear to have had the character of a recurring tax, but to have been supplementary to the free-will offerings of Ex. xxv. 1–7, levied for the one purpose of the construction of the sacred tent. In later times, indeed, after the return from Babylon, there was an annual payment for maintaining the fabric and services of the Temple; but the fact that this begins by the voluntary compact to pay one third of a shekel (Neh. x. 32) shows that till then there was no such payment recognized as necessary. A little later the third became a half, and under the name of the didrachmai (Matt. xvii. 24) was paid by every Jew, in whatever part of the world he might be living (Jos. Ant. xvi. ix. 9, § 1). Large sums were thus collected in Jerusalem and other eastern cities, and were sent to Jerusalem under a special escort (Jos. Ant. l. c.; Civ. pro Flacc. c. 28). We have no trace of any further taxation than this during the period of the Judges. It was not in itself heavy: it was lightened by the feeling that it was paid as a religious act. In return for it the people secured the celebration of their worship, and the presence among them of a body of men acting more or less efficiently as priests, judges, teachers, perhaps also as physicians. [Priests.] We cannot wonder that the people should afterwards look back to the good old days when they had been so lightly burdened.

II. The kingdom, with its centralized government and greater magnificence, involved, of course, a larger expenditure, and therefore a heavier taxation. This may have come, during the long history of the monarchy, in many different forms, according to the financial necessities of the times. The chief burdens appear to have been: (1.) The tithe of the produce both of the soil and of live stock, making, together with the ecclesiastical tithe, 20 per cent. on incomes of this nature (1 Sam. xiii. 15, 17). (2.) Forced military service for a month every year (1 Sam. viii. 12; 1 K. ii. 22; 1 Chr. xviii. 1). (3.) Gifts to the king, theoretically free, like the old Benevolences of English taxation, but expected as a thing of course, at the commencement of a reign (1 Sam. x. 27) or in time of war (comp. the gifts of Jesse, 1 Sam. xvi. 20, xvii. 18). In the case of subject-princes the gifts, still made in kind, armor, horses, gold, silver, etc., appear to have been regularly assessed (1 K. x. 25; 2 Chr. iv. 24). Whether this was ever the case with the presents from Israelite subjects must remain uncertain.

(4.) Import duties, chiefly on the produce of the spice districts of Arabia (1 K. x. 15). (5.) The monopoly of certain branches of commerce, as, for example, the export of cedars (1 K. x. 28, 29; 2 Chr. vi. 7–18; Ezek. xxv. 26), oil, silver, linen, or silver bullion, from Egypt (1 K. x. 28), and horses (Ezr. xvi. 29). (6.) The appropriation to the king's use of the early crop of hay (Am. viii. 7). This may, however, have been peculiar to the northern kingdom or occasioned by a special emergency (Ezra, 7. 24).

It is obvious that burdens such as these, coming upon a people previously unaccustomed to them, must have been almost intolerable. Even under Saul exemption from taxes is looked on as a sufficient reward for great military services (1 Sam. xvi. 23). Under the outward splendor and prosperity of the reign of Solomon they lay the deep discontent of an over-taxing people, and it contributed largely to the revolution that followed. The people complain not of Solomon's industry, but of their taxes (1 K. xii. 4). Of all the king's officers he whom they hate most is Adoniram or the history of the drought in the reign of Ahab (1 K. xvii. 5) shows that in such cases a policy like this must have been essential to the support of the cavalry of the royal army.
TAXES

ADONIRAM, who was "over the tribute" (1 K. xii. 18). At times, too, in the history of both the kingdoms there were special burdens. A tribute of 50 shekels a head had to be paid by Menahem to the Assyrian king (2 K. xv. 20), and under his successor Hosea, this assumed the form of a nominal tribute (2 K. xx. 18; 2 Chron. xxxii. 24; amount not stated). After the defeat of Josiah by Pharaoh-Necho, in like manner a heavy income-tax had to be imposed on the kingdom of Judah to pay the tribute demanded by Egypt (2 K. xiii. 35), and the change of masters consequent on the battle of Carchemish brought in this respect no improve-
ment (Jos. Ant. x. 9, §§ 1-3).

III. Under the Persian empire, the taxes paid by the Jews were, in their broad outlines, the same in kind as those of other subject races. The financial system which gained for Darius Hystaspis the name of the "shopkeeper king" (καταπιόντης, Herod. iii. 80), involved the payment by each state of a fixed sum as the tribute due from his province (dék.), and placed him accordingly in the position of "shopkeeper" or former of the revenue, exposed to all the temptation to extortion and tyranny inseparable from such a system. Here, accordingly, we get glimpses of taxes of many kinds. In Judaea, as in other provinces, the inhabitants had to provide in kind for the maintenance of the governor's household (comp. the case of Themistocles, Thuc. i. 158, and Herod. i. 192, ii. 99), besides a money-payment of 40 shekels a day (Neh. vi. 14, 15). In Ezr. iv. 13, 20, vii. 24, we find a formal enumeration of the three great branches of the revenue. (1.) The μέτρημα, fixed, measured payment, probably direct taxation (Gro- tius). (2.) θέσις, the excise or φόρος on articles of consumption (Geuen. s. v.). (3.) θησυχία, probably the toll payable at bridges, fords, or certain stations on the high road. The influence of Ezra secured for the whole ecclesiastical order, from the priests down to the Nethinim, an immunity from all three (Ezr. vii. 24); but the burden pressed heavy on the great body of the people, and they complained bitterly of this imposition (Ezr. vii. 25, 30). Γαργαρία, or forced service, to which they and their cattle were liable (Neh. ix. 37). They were compelled to mortgage their vineyards and fields, borrowing money at 12 per cent., the interest being payable apparently either in money or in kind (Neh. v. 1-11). Falling payment, the creditors exercised the power (with or without the mitigation of the year of Jubilee) of seizing the per-
sions of the debtors and treating them as slaves (Neh. v. 5; comp. 2 K. iv. 1). Taxation was leading at Jerusalem to precisely the same evils as those which appeared from like causes in the early history of Rome. To this cause may probably be ascribed the incomplete payment of tithes or offerings at this period (Neh. xiii. 10, 12; Mal. iii. 8), and the consequent necessity of a special poll-tax of the third part of a shekel for the services of the Temple (Neh. x. 32). What could be done to mitigate the evil was done by Nehemiah, but the taxes continued, and oppression and injustice marked the government of the province accordingly (Ezcl. v. 8).c

IV. Under the Egyptian and Syrian kings the taxes paid by the Jews became yet heavier. The "farming" system of finance was adopted in its worst form. The Persian governors had had to pay a fixed sum into the treasury. Now the taxes were put up to auction. The contract sum for those of the Persian period, Judas Maccabaeus, amounted at about 8,000 talents. An unscrupulous adventurer (v. y. Joseph, under Ptolemy Euergetes) would bid double that sum, and would then go down to the province, and by violence and cruelty like that of Turkish or Hindoo collectors, squeeze out a large margin of profit for himself (Jos. Ant. xiii. 4, § 1-5).

Under the Syrian kings we meet with an ingenious variety of taxation. Direct tribute (φοροί), an excise duty on salt, crown-taxes (στέφανα), golden crowns, or their value, sent yearly to the king, one half the produce of fruit trees, one third of that corn, a tax of some kind on cattle: these, as the heaviest burdens, are ostentatiously enumerated in the decrees of the two Demetriuses reuniting the empire, 1 Mace. i. 29, 30, 33). Even this, however, the golden crown and scarlet robe continue to be sent (1 Mace. xiii. 39). The proposal of the apostate Jason to farm the revenues at a rate above the average (400 talents, while Jonathan — 1 Mace. xi. 28 — pays 300 only), and to pay 150 talents more for a license to open a circus (2 Mace. iv. 9), gives us a glimpse of another source of revenue. The exemption given by Antiochus to the priests and other ministers, with the deduction of one third for all the residences in Jerusalem, was apparently only temporary (Jos. Ant. xiii. 3, § 3).

V. The pressure of Roman taxation, if not absolutely heavier, was probably more galling, as being more thorough and systematic, more distinctively a mark of bondage. The capture of Jerusalem by Pompey was followed immediately by the imposition of a tribute, and within a short time the sum thus taken from the resources of the country amounted to 10,000 talents (Jos. Ant. xiv. 4, §§ 4, 5). The decrees of Julius Caesar showed a characteristic desire to lighten the burdens that pressed upon the subjects of the republic. The tribute was not to be farmed. It was not to be levied at all in the Sabine year. One fourth was to be levied only in the year that followed (Jos. Ant. xiv. 10, §§ 5, 6). The people, still under the government of Hyrcanus, were thus protected against their own rulers. The struggle of the republican party after the death of the Dictator brought fresh burdens upon the whole of Syria, and Cassius levied not less than 700 talents from Judaea alone. Under Herod, as might be expected from his lavish expenditure in public buildings, the taxation became heavier. Even in years of famine a portion of the produce of the soil was seized for the royal revenue (Jos. Ant. xv. 9, § 1), and it was not till the discontent of the people became formidable that he ostentatiously diminished this by one third (Jos. Ant. xv. 10, § 4). It was no wonder that when Herod wished to found a new city in Trachonitis, and to attract a population of residents, he found that the most effective bait was to promise immunity from taxes (Jos. Ant. xvii. 2, § 1), or that on his death the people should be loud in their demands that Archelaus should release them from their burdens, compiling especially the duty levied on all sales (Jos. Ant. xvii. 8, § 4).

When Judaea became formally a Roman prov-

c The later date of the book is assumed in this reference. Comp. Ecclesiastes.
TAXING 3185

TAXING. I. (א) ἀναγγελικαὶ ἀναγγελίας, Luke ii. 2; professio, Acts v. 37) The cognate verb ἀναγγέλω (in like manner is rendered by "to be taxed" in the A. V."") while the Vulgate employs "ut describeretur universis oribus" in Luke ii. 1, and "ut professeretur singuli" in ver. 3. Both the Latin words thus used are found in classical writers with the meaning of a registration or formal return of population or property (Cic. Ver. ii. 3, § 47; de Off. i. 7; Sueton. Tib. p. 30). The English word conveys to us more distinctly the notion of a tax or tribute actually levied, but it appears to have been used in the 9th century for the simple assessment of a subsidy upon the property of a person given one quality (Baron, Hist. VII. p. 57), or the registration of the people for the pur-

pose of a poll-tax (Camden, Hist. of Eliz.). This may account for the choice of the word by Justin in lieu of "description" and "profession." Wickliffe, following the Vulgate, had given. Since then "taxing" has kept its ground in most English versions with the exception of "tribute" in the Geneva, and "enrollment" in the Rhemish of Acts v. 37. The word ἀναγγέλω by itself leaves the question whether the returns made were of population, property and their determination "plus,-minus," using the words ἀναγγέλω τινων οἰκονομῶν (Acts xvii. 1, § 1) as an equivalent, shows "the taxing" of which Gannad speaks included both. That connected with the matrity, the first step toward the complete statistical returns, was probably limited to the former (Greswell, Hymn., i. 542). In either case "census" would have served the most natural Latin equivalent, but in the Greek of the N. T., and therefore probably in the familiar Latin of the period, as afterwards in the Vulg., that word slides off into the sense of the tribute actually paid (Matt. xvii. 24, xxi. 17).

II. Two distinct registrations, or taxing, are mentioned in the N. T., both of them by St. Luke. The first is said to have been the result of an edict of the Emperor Augustus (at that time the Roman empire) should be taxed ἀναγγέλωσθαι πάνω τίνι οἰκονομῷ (Luke ii. 1), and is connected by the Evangelist with the name of Cyrenius, or Quirinius. The second, and more important (ἀναγγελίας, Acts v. 37), is referred to in the report of Gamaliel's speech, and is there distinctly referred, in point of time, with the revolt of Judas of Galilee. The account of Josephus (Jos. xviii. 4, § 1; B. J. ii. 8, § 1) brings together the two names which St. Luke keeps distinct, with an interval of several years between them. Cyrenius comes as governor of Syria after the deposition of Archelaus, accompanied byCoponius as procurator of Judaea. He is sent to make an assessment of the value of property in Syria (no infliction being given of its extension to the οἰκονομῷ, and it is this which rouses Judas and his followers to their rebellion. The chronological questions presented by these apparent discrepancies have been discussed, so far as they are connected with the name of the governor of Syria, under CYRENIUS. An account of the tumults caused by the taxing will be found under ROCKS OF GALILAE.

III. There are, however, some other questions connected with the statement of Luke ii. 1-3, which call for some notice.

(1.) The truth of the statement has been questioned by Strauss (Leben Jesu, i. 28) and De Wette (Comm. in loc.), and others, on the ground that neither Josephus nor any other contemporary writer mentions a census extending over the whole empire at this period (A. E. v. 759). An edict like this, causing a general movement from the cities where men resided to those in which, for some reason or other, they were to be registered, must, it is said, have been a conspicuous fact, such as no historian would pass over. (2.) Palestine, it is urged further, was, at this time, an independent kingdom under Herod, and therefore would not have come under the operation of an imperial edict. (3.) If such a measure, involving the recognition of Roman sovereignty, had been attempted under Herod, it would...
have raised the same resistance as the undisputed census under Quirinius did at a later period. (4.) The statement of St. Luke that "all went to be taxed, every one into his own city," is said to be inconsistent with the rules of the Roman census, which took cognizance of the place of residence only, not of the place of birth. (5.) Neither in the Jewish nor the Roman census would it have been necessary for the wife to travel with her husband in order to appear personally before the registrar (censitor). The conclusions from all these objections are, that this statement belongs to legend, not to history: that it was a contrivance, more or less ingenious, to account for the birth at Bethlehem (that being assumed in popular tradition as a pre-conceived necessity for the Messiah) of one whose kindred lived, and who himself had grown up at Nazareth: that the whole narrative of the Infancy of our Lord, in St. Luke's Gospel, is to be looked on as mythical. A sufficient defense of that narrative may, it is believed, be presented within comparatively narrow limits.

It must also be remembered that our history of this portion of the reign of Augustus is defective. Tacitus begins his Annals with the emperor's death. Suetonius is gossipping, inaccurate, and ill-arranged. Dion Cassius leaves a gap from A. C. 748 to 756, with hardly any incidents. Josephus does not profess to give a history of the empire. It might easily be that a general census, cir. A. C. 749-756, should remain unrecorded by them. If the measure was one of frequent occurrence, it would be the more likely to be passed over. The testimony of a writer, like St. Luke, obviously educated and well informed, giving many casual indications of a study of chronological data (Luke i. 5, iii. Acts xxiv. 27), and of acquaintance with the Herodian family (Luke viii. 5, xxiii. 8: Acts xii. 20, xiii. 1) and other official people (Acts xiii. xxii.), recognizing distinctly the later and more conspicuous ἀνομογραφής must be admitted as fair presumptive evidence, hardly to be set aside in the absence of any evidence to the contrary. How hazardous such an inference from the silence of historians would be, we may judge from the fact that there was unquestionably a geometrical survey of the empire at some time in the reign of Augustus, of which none of the two writers take any notice (comp. the extracts from the Hist Agric Scriptores in Gesenw, Harmony, i. 557). It has been argued further that the whole policy of Augustus rested on a perpetual communication to the central government of the statistics of all parts of the empire. The inscription on the monument of Ancyra (Gruter, Corpus Inscrip. i. 230) names three general censuses in the years A. C. 728, 746, 767 (comp. Sueton. Octav. c. 25; Gesenw, Hermes, i. 555). Dion Cass. (iv. 13) mentions another in Italy in A. C. 757. Others in Gaul are assigned to A. C. 727, 741, 767. Strabo (vi. 4, § 2) writing early in the reign of Tiberius, speaks of μία τῶν καὶ ἦς θάνατος, as if they were common things. In A. C. 728, when Augustus offered to resign his power, he laid before the senate a "ratio-narium imperii" (Sueton. Octav. c. 28). After his death, in like manner, a "brevisimum totius imperii" was produced, containing full returns of the population, wealth, resources of all parts of the empire, a careful digest apparently of facts collected during the labors of many years (Sueton. Octav. c. 101: Dion Cass. iv. : Tacit. Ann. i. 11). It will hardly seem strange that one of the routine official steps in this process should only be mentioned by a writer who, like St. Luke, had a special reason for noticing it. A census, involving property returns, and the direct taxation consequent on them, might excite attention. A mere ἀνομογραφή would have little in it to disturb men's minds, or force itself upon a writer of history.

There is, however, some evidence, more or less circumstantial, in confirmation of St. Luke's statement. (1.) The inference drawn from the silence of historians may be legitimately made by an inference drawn from the silence of objectors. It never occurred to Celsus, or Lucian, or Porphyry, questioning all that they could in the Gospel history, to question this. (2.) A remarkable passage in Suidas (s. v. ἀνομογραφή) mentions a census, obviously differing from the three of the Ancyrian monument, and agreeing, in some respects, with that of St. Luke's. It was made by Augustus himself, but by his own imperial authority (βασιλεύς ἀριστοφι; comp. εἰς τὰ πλήρη δύναμεν, Luke ii. 1). The returns were collected by twenty commissioners of high rank. They included property as well as population, and extended over the whole empire. (3.) Tertullian, incidently, writing controversially, not against a heathen, but against Marchon, appeals to the returns of the census for Syria under Quintus Saturninus as accessible to all who cared to search them, and proving the birth of Jesus in the city of David (Tert. adv. Marc. iv. 19). Whatever difficulty the difference of names may present (comp. Cyprian), here is, at any rate, a strong indication of the fact of a census of population, cir. A. C. 749, and therefore in harmony with St. Luke's narrative. (4.) Gesenw (Hermes, i. 476, iv. 6) has pointed to some circumstances mentioned by Josephus in the last year of Herod's life, and therefore coinciding with the time of the Nativity, which imply some special action of the Roman government in Syria, the nature of which the historian carelessly or deliberately suppresses. When Herod attends the council at Berytus there are mentioned as present, besides Saturninus and the Procurator, οἱ προφανείς ἑπτάθ′ προήχοντες, as though the office thus named had come, accompanied by other commissioners, for some purpose which gave him for the time almost exclusive influence with the governor of Syria himself (B. J. i. 27, § 2). Just after this again, Herod, for some unexplained reason, found it necessary to administer to the whole people an oath, not of allegiance to himself, but of good-will to the emperor; and this oath 6,000 of the Pharisees refused to take (Joseph. Ant. xvii. 2, § 4: B. J. i. 29, § 2). This statement implies, it is urged, some disturbing cause affecting the public tranquillity, a formal appearance of all citizens before the king's officers, and, lastly, some measure specially distasteful to the Pharisees. The narrative of St. Luke offers an undesignated explanation of these phenomena.

(2.) The second objection admits of as satisfactory an answer. The statistical document already referred to included subject-kings and allies, no less than the provinces (Sueton. l. c.). If
Augustus had any desire to know the resources of Judea, the position of Herod made him neither willing nor able to resist. From first to last we meet with repeated instances of subservience. He does not dare to try or punish his sons, but refers their cause to the emperor's cognizance (Joseph. Ant. xvi. 4, § 1, xvii. 5, § 8). He holds his kingdom on condition of paying a fixed tribute. Permission is ostentatiously given him to dispose of the succession to his throne as he sees best (Joseph. Ant. xvi. 4, § 5). He binds his people, as we have seen, by an oath of allegiance to the emperor (Joseph. Ant. xvii. 2, § 4). The threat of Augustus that he would treat Herod no longer as an ally but as a subject (Joseph. Ant. xvi. 9, § 3) would be followed naturally enough by some such step as this, and the desire of Herod to regain his favor would lead him to acquiesce in it.

(3.) We need not wonder that the measure should have been carried into effect without any popular outbreak. It was a return of the population only, not a valuation of property; there was no immediate taxation as the consequence. It might offend a party like the Pharisaes. It was not likely to excite the multitude. Even if it seemed to some the consecration of a census, a change, and of direct government by the Roman emperor, we know that there was a large and influential party ready to welcome that change as the best thing that could happen for their country (Joseph. Ant. xvii. 11, § 2).

(4.) The alleged inconsistency of what St. Luke narrates is precisely what might be expected under the known circumstances of the case. The census, though Roman in origin, was effected by Jewish instrumentalities, and in harmony therefore with Jewish customs. The alleged practice is, however, doubtful, and it has been maintained (Huschke, über den Census, etc. in Winer "Schatzung") that the inhabitants of the provinces were, as far as possible, registered in their fœnum originis—that is, in the place in which they were only residents. It may be noticed incidentally that the journey from Nazareth to Bethlehem belongs to a time when Galilee and Judaea were under the same ruler, and would therefore have been out of the question (as the subject of one prince would certainly not be registered as belonging to another) after the death of Herod the Great. The circumstances of the Nativity narrative, if they do not prove, that Joseph went there only for personal enrolment, not because he was the possessor of house or land.

(5.) The last objection as to the presence of the Virgin, where neither Jewish nor Roman practice would have required it, is perhaps the most trivial and vexatious of all. If Mary were herself of the house and lineage of David, there may have been special reasons for her appearance at Bethlehem. In any case the Scripture narrative is consistent with itself. Nothing could be more natural, looking to the unsettled state of Palestine at this period, than that Joseph should keep his wife under his own protection, instead of leaving her by herself in an obscure village, exposed to danger and reproach. In proportion to the hopes he had been taught to cherish of the birth of a Son of David, in proportion also to his acceptance of the popular belief that the Christ was to be born in the city of David (Matt. ii. 5; John vii. 42), would be his desire to guard against the accident of birth in the despised Nazareth out of which "no good thing" would come (John i. 49).

The literature connected with this subject is, w. might be expected, very extensive. Every commented text contains something on it. Meyer, Wordsworth, and Alford may be consulted as giving the latest summaries. Good articles will be found under εὐαγγέλιον in Winet, Redeb.; and Herzog's Real-Encyklop. A very full and exhaustive discussion of all points connected with the subject is given by Spenheim, Juben Exegy. ii. 3–9; and by Marquardt, Richardus, Disc. de Census Augusti, in Menthon's Thesaurus, ii. 123; comp. also Elliott, Biblical Lectures, p. 57.

E. H. P.

TEBAH

had been subject to tribute from Pompey's time. Turn to the appointment of Herod as king, and there are indications that this subject to Roman taxation did not cease at his accession. Comp. Wiecker, u. s., pp. 67, 69 E. If made under the direction of the president of Syria by Jewish officers, it would not greatly differ from a similar registration made by Herod, nor need it have alarmed the Jews, if carefully managed.

Some find it hard to believe that Joseph, if living at Nazareth, could be obliged to go to Bethlehem to be registered. We are forced to say that nothing is known of the relations of men to the tribes and towns of their fathers at this period of Jewish history. The difficulty here is an argument from our ignorance and cannot be removed. Tertullian, a lawyer of no mean learning, accepted the statement. If it be called mythical, we can fairly say that the myth does not invent new names but grows up around old ones. So, then, if the history of our Lord's birth were a myth, this passage itself would prove that Joseph might have gone to Bethlehem to be registered, consistently with prevailing usage in Judea. Add to this that family genealogies were still kept up, as is shown by the entries in Zachariah, father of John, of Anna, daughter of Hinnom (Luke iii. 36), though belonging to one of the ten tribes, of our Lord's family (Eiseb. Hist. iii. 20), and by the family registers of Matthias and Luke, which at least show that it was then supposed that descent might be sought to be traced a good way backwards.

One more remark: in the discussions on the taxing and some other historical difficulties, Luke is brought to the stand by a certain class of writers, as if he had no independent authority in himself. But this is unfair. Luke's honesty is more than that of Josephus, and his accuracy in many respects is shown by modern research to be great. If one puts against a statement of his the absence of all mention by Josephus, or other historians, this is unfair, and proceeds upon the assumption that there is a great balance of probability against the truth of the Gospels. Such a one should also remember too, that Josephus despatches the whole reign of Archelaus in a few passages; that Dion Cassius is decisive just where we want his testimony, and that Tactitus begins his annals after the birth of Christ, and notes only that which is politically important to Rome.

T. D. W.

TEBAH (תְֵבָה) [daughter: Təḇāh' (Tabach, Tabah)]. Eldest of the sons of Nahor, by his concubine Reukah (Gen. xxii. 24). Josephus calls him Təḇādōr (Ant. i. 6, § 5).

TEBALAH (תְֵבָלָה) [Jebus immemorata or purificata, Ges.]: Təḇālāh: Alex. Təḇelādōs; Təḇeāloa. Third son of Hondah, the children of Merari (1 Chr. xxvi. 11).

TE'BETH. [MONTH.]

* TEHAPH'NEHES, Ez. xxx. 18. [TAH-PANESHS.]

TEHIN'NAH (תְֵהִנָּה) [cry for mercy, mercy]: Təḥənāv: Alex. Təḥənāv; [Comp. Təḥənāv:] Tekunim. The father or founder of Ir-Nahos, the city of Nahash, and son of Edon (1 Chr. iv. 12). His name only occurs in an obscure genealogy of the tribe of Judah, among those who are called "the men of Reelah."
TEKOA

by a special voice from heaven to leave his occupation as a herdsman and a gatherer of wild figs, and was sent forth thence to Bethel to testify against the sins of the kingdom of Israel (Amos vii. 14). Accustomed as Amos was to a shepherd's life, he must have been familiar with the solitude of the desert, and with the dangers there incident to such an occupation. Some effect of his peculiar training amid such scenes may be traced, as critics think (De Wette, Einl. ins Alte Test. p. 336), in the content and style of his prophecy. Jerome (vi. Am. i. 2) says, "etiam Amos propheta quia pastor de pastorisibus fuit et pastor non in locis cultis et arborebus sed vinis consitit, aut inter sylvas et prata virentia, sed in latae eremi vastitiae, in qua vestrum human feritas et interdicta pecorum, utas non vane esse accustomas." "The imagery of his visions," says Stanley, "is full of his country life, whether in Judaea or Ephraim. The locus in the royal meadows, the basket of fruit, vineyards and fig-trees, the herds of cows rushing heedlessly along the hill of Samaria, the shepherds fighting with lions for their prey, the lion and the bear, the heavy laden wagon, the shifting of the hills and the falling of the mountains (Jeremiah Church, i. 399, Amer. ed.). See, also, the striking remarks of Dr. Pusey (Intro. to Amos). Compare Am. ii. 13, iii. 4, 12, iv. 1, vi. 12, vii. 1, etc.

In the genealogies of Judah (1 Chr. ii. 24, and iv. 5), Ashur, a posthumous son of Hezon and a brother of Caleb, is mentioned as the father of Tekoa, which appears to mean that he was the founder of Tekoa, or at least the owner of that village. (See Roediger in Gesen. Thea. iii. 1518.) If he was the owner of the village, it was of course in his capacity as the prince or sheik of Tekoa (Bertiheu, Buecher der Chr. p. 17).

Tekoa is known still as Tek'leh, and, though it lies somewhat aside from the ordinary route, has been visited and described by several recent travelers. The writer was there on the 21st of April, 1852, during an excursion from Jerusalem by the way of Bethlehem and Urvat. Its distance from Beit Lehan agrees precisely with that assigned by the early writers as the distance between Tekoa and Bethlehem. It is within sight also of the "Frank Mountain," beyond question the famous Herodium, or site of Herod's Castle, which Josephus (B. J. iv. 9. 3) represents as near the ancient Tekoa. It lies on an elevated hill, which spreads itself out into an irregular plain of moderate extent. Its "high position" (Robinson, Bibl. Res. i. 430) "gives it a wide prospect. To the northeast the land slopes down toward Wady Khirbetih; on the other side the hill is surrounded by a belt of level table-land, beyond which are valleys, and then other, higher hills. On the south, at some distance, another deep valley runs off southeast toward the Dead Sea. The view in this direction is bounded only by the level mounds of Moab, with frequent bursts of the Dead Sea, seen through openings among the rugged and desolate intervening mountains." The scene, on the occasion of the writer's journey above referred to, was, minutely, a pastoral scene and gave back no doubt a faithful image of the olden times. There were two encampments of shepherds there, consisting of tents covered with the black goat-skins so commonly used for that purpose; they were supported on poles and turned in part on one side, so as to enable a man without to look into the interior. Flocks were at pasture near the tent and on the remoter hillsides in every direction. There were horses and cattle and camels also, though these were not so numerous as the sheep and goats. A well of living water, on the outskirts of the village, was a centre of great interest and activity; women were coming and going with their pitchers, and men were filling the troughs to water the animals which they had driven thither for that purpose. The general aspect of the region was sterile and unattractive; though here and there were patches of verdure, and some of the fields, which had yielded an early crop, had been recently ploughed up as it for some new species of cultivation. Fleecy clouds, white as the driven snow, were floating toward the Dead Sea, and their shadows, as they chased each other over the landscape, seemed to be fit emblems of the changes in the destiny of men and nations, of which there was so much to remind one at such a time and in such a place. Various ruins exist at Tekoa, such as the walls of houses, cisterns, broken columns, and heaps of building-stones. Some of these stones have the so-called "beveled" edges which are supposed to show a Hebrew origin. There was a convent here at the beginning of the 6th century, and a Christian settlement in the time of the Crusaders; and undoubtedly most of these remains belong to modern times rather than ancient. Among these should be mentioned a baptismal font, sculptured out of a limestone block, three feet and nine inches deep, with an internal diameter at the top of four feet, and designed evidently for baptism as administered in the Greek Church. It stands in the open air, like a similar one which the writer saw at Jaffa, near Betlah, the ancient Bethel. [Opini, Amer. ed.] See more fully in the Christian Review (New York, 1853, p. 519).

Near Tek'leh, among the same mountains, on the brink of a frightful precipice, are the ruins of Khireitun, which some have thought may be a corruption of Kerieth, or the birthplace of Judas the Cruzzader, and another called Iscarab, i.e. "man of Kerieth." It is impossible to survey the scenery of the place, and not feel that a dark spirit would find itself in its own element amid the seclusion and wildness of such a spot. High up from the bottom of the ravine is an opening in the face of the rocks which leads into an immense subterranean labyrinth, which many suppose may have been the cave of Adullam, in which David and his followers sought refuge from the pursuit of Saul. [ADULLAM.] It is large enough to contain hundreds of men, and is capable of defense against almost any attack that could be made upon it from without. When a party of the Turks fell upon Tek'leh and sacked it, A. D. 1185, most of the inhabitants, anticipating the danger, fled to this cavern, and thus saved their lives. It is known among the Arabs as the "Cave of Refuge." It may be questioned

---

a * It was a journey of 6 or 7 hours only, being part the same distance (12 miles) north of Jerusalem that Tekoa was south of it.

b * A stillness almost fearful hangs over the deep.

c * It was a journey of 6 or 7 hours only, being part the same distance (12 miles) north of Jerusalem that Tekoa was south of it.

H. Von Schubert tells us in his characteris-
TEKAOA

(See Culmct on Ez. iii. 18, and Winer, ad voc.)

The whole scene of Ezekiel's preaching and visions seems to have been Chaldea Proper; and the river Chebar, as already observed (see Chebar), was not the Khabour, but a branch of the Euphrates.

Ptolemy has in this region a Thel-heneane and a Thel-hall (T. 2, 20), but neither name can be identified with Tel-abib, unless we suppose a serious corruption. The element "Tel" in Tel-abib, is undoubtedly a "hill." It is applied in modern times by the Arabs especially to the mounds or heaps which mark the site of ruined cities all over the Mesopotamian plain, an application not very remote from the Hebrew use, according to which "Tel" is "especially a heap of stones" (Gen., ad voc.). It thus forms the first syllable in many modern, as in many ancient names, throughout Babylonia, Assyria, and Syria. (See Assmann, Bild. Orient. ii. pt. ii. p. 784.)

The LXX. have given a translation of the term, by which we can see that they did not regard it as a proper name, but which is quite inexplicable.

The Persic "Tel" implies that the name was of sufficient length to be "phonetic" enough, so far as Hebrew scholarship is concerned; but there seems to be no reason to doubt that the word is really a proper name, and therefore ought not to be translated at all.

G. R.

TELAH (תל에는) [breach]: Θαλές; Alex. Θαλής: Theobald. A descendant of Ephraim, and ancestor of Josua (1 Chron. vii. 25).

TELAIM (تلיאים), with the article [lamb]; τὸ Γαλέγονα in both MSS., and so also Josephus: γαλέγονα (γαλέγονον). The place at which Saul collected and numbered his forces before his attack on Amalek (1 Sam. xv. 4, only). It may be identical with Tell el-Ful, the southern position of which would be suitable for an expedition against Amalek; and a certain support is given to this by the mention of the name (Thallam or Thehiam) in the LXX. of 2 Sam. iii. 12. On the other hand the reading of the LXX. in 1 Sam. xi. 4 (not only in the Vatican MS., but also in the Alex., usually so close an adherent of the Hebrew text,) and of Josephus (Jact. vii. 7, § 2), who is not given to follow the LXX. slavishly — namely, Gilgal, is remarkable: and when the frequent connection of that sanctuary with Saul's history is recollected, it is almost sufficient to induce the belief that in this case the LXX. and Josephus have preserved the right name, and that instead of Tellam we should, with them, read Gilgal. It should be observed, however, that the Hebrew MSS. exhibit no variation in the name, and that, excepting the LXX. and the Targum, the Versions all agree with the Hebrew. The Targum renders it "lamb of the Passover," according to a curious fancy, mentioned elsewhere in the Jewish books (Vul. on 1 Sam. iv. 4, &c.), that the army met at the Passover, and that the census was taken by counting the lambs. This is partly indorsed by Jerome in the Vulgate.

G.

TELASSAR (תלעsar) [Asymmetric hill]: Θαλασσα; Θαλασσά; [Alex. Θαλασσαρ, Θαλάσσα, literally as meaning "broken pieces of pottery," by which, as by counters, the numbering was effected.

Bezek and Telassar are considered by the Talmudists as two of the ten numberings of Israel, past and future.

G.
TELEM

31a. In Is., Θελαμα: Thelamah, Thelassar; is mentioned in 2 K. xix. 12 and in Is. xxxvii. 12 as a city inhabited by "the children of Eden," which had been conquered, and was held in the time of Sennacherib by the Assyrians. In the former passage the name is rather differently given both in Hebrew and English. [Tel-Ahmar]. In both it is connected with Gozan (Gonzanitis), Harran (Carchar, now Harran), and Rezeph (the Resgup of the Assyrian Inscriptions), all of which belong to the hill country above the Upper Mesopotamian plain, the district from which rise the Khabur and Beliê rivers. [See Mesopotamia, Gozan, and Harran.] It is quite in accordance with the indication of the prophetic text which arises from this connection, to find Eden joined in another passage (Ex. xxvii. 23) with Haran and Assur. Telassar, the chief city of a tribe known as the Bodi Eden, must have been in Western Mesopotamia, in the neighborhood of Harran and Orfa. It would be unceremonial to attempt to fix the locality more exactly. The name is one which might have been given by the Assyrians to any place where they had built a temple to Assur, and hence perhaps its application by the Targums to the Resen of Gen. x. 12, which must have been on the Tigris, near Nineveh and Calah. [Resen.] G. R.

TELEM (תלעמא) [oppression]: Madeus,

Alex. Telam; Telam. One of the cities in the extreme south of Judah (Josh. xvi. 24). It occurs between Ziph (not the Ziph of David's escape) and Bealoth: but has not been identified. The name Dhallian is found in Van de Velde's map, attached to a district immediately to the north of the Kubbet el-Biwas, south of el-Maleh and Ar'aron—a position very suitable; but whether the coincidence of the name is merely accidental or not, is not at present ascertainable. Telam is identified by some with Tellam, which is found in the Hebrew text of 1 Sam. xv. 4; but there is nothing to say either for or against this.

The LXX. of 2 Sam. iii. 12, in both MSS., exhibits a singular variation from the Hebrew text. Instead of "on the spot." (וֹלַעמקוּ), A. V. incorrectly, "on his behalf") they read "to Thalaim (or Thelam) where he was." If this variation should be substantiated, there is some probability that Telem or Telam is intended. David was at the time king, and a quarter of a century in the wilderness there is no reason to suppose that he had relinquished his marauding habits; and the south country, where Telam lay, had formerly been a favorite field for his expeditions (1 Sam. xxxvii. 8-11).

The Vat. LXX. in Josh. xix. 7, adds the name Θαλαμά, between Emmun and Ether, to the towns of Sion. This is said by Eusebius (Onomast. and Jerome) to have then existed in a very large village called Tellah, 16 miles south of Telam. It is however claimed as equivalent to Tochen. G.

TELEM (תלע наш) [oppression]: Telimei; [Vat. Telam]; FA. [Alex. Telami; Telam]. A porter or doorkeeper of the Temple in the time of Ezra, who had married a foreign wife (Ex. x. 24). He

is probably the same as Talmon in Neh. xii. 25 the name being that of a family rather than of an individual. In 1 Esdr. ix. 25 he is called Tobi-

BANES.

TEL-HARSHA, or TEL-HARESHA [תל-ארשת] [see below]: Θελαρσά (in Exzr., Vat. corrupt; in Neh., Vat. FA. Apera, Alex. Θελαρά): Thelarsa was one of the Idulyonian towns, or villages, from which some Jews, who "could not show their father's house, nor their seed, whether they were of Israel," returned to Judaea with Zerubbabel (Exzr. ii. 54; Neh. vii. 61). Gesenius renders the term "Hill of the Wood ([aed. ad voc.). It was probably in the low country near the sea, in the neighborhood of Tel-Melah and Cherub; but we cannot identify it with any known site. G. R.

TEL-MELAH (תל-מלא) [hill of salt]: Θελαμαλή, Θελαμαλήθ (in Exzr., Vat. Harela: Alex. Θελαμαλή, Θελαμαλή: FA. in Neh., Θελαμαλή). Tel-Melah is joined to Tel-Hara in the two passages already cited under Tel-Harsha. It is perhaps the Thelam of Ptolemy (v. 20), which some wrongly read as Theame (Θεαμή) for Θελαμή, a city of the low salt tract near the Persian Gulf, whence probably the name, which means "Hill of Salt." (Genes. Lex. Heb. sub voc.). Cherub, which may be pretty surely identified with Ptolemy's Chirhipha (Χερώπα), was in the same region.

TEMA (תמא) [on the right, south]: Onemah: Telom; [near Anti].

The ninth son of Ishmael (Gen. xxv. 15; 1 Chr. i. 30); whence the tribe called after him, mentioned in Job vi. 19, "The troops of Tema looked, the companies of Sheba waited for them," and by Jeremiah (xxv. 23), "Deban, Tema, and Buz;" and also the land occupied by this tribe: "The burden upon Arabia. In the forest in Arada shall ye drink, O ye travelling companies of Dedanians. The inhabitants of the land of Tema brought water to him that was thirsty, they prevented with their bread him that flot" (Is. xxi. 13, 14).

The name is identified satisfactorily with Tequm, אֵתָקִים, a small town on the confines of Syria, between it and Wadi el-Karî, on the road of the Damascus pilgrim-caravan (Marvâdî, s. v.). It is in the neighborhood of Doumar el-Liwelel, which agrees etymologically and by tradition with the Ishmaelite Dumah, and the country of Keydar, or Kidare. Tequî is a well-known town and district, and is appropriate in every point of view as the chief settlement of Ishmael's son Tema. It is commanded by the castle called el-Abâk (or el-Abd el-Farîd), of Essenâwi-al (Samuel) Hârî, the Jew, a contemporary of Imri el-Kays (A. D. 530 cir.) but according to a tradition it was built by Solomon, which points at any rate to its antiquity (comp. el-Bîrî, in Marvâdî, iv. 23); in ruins, as described as being made of rubble and crude bricks, and said to be named el-Abak from having whiteness and redness in its structure.

b The passage is in such confusion in the Vat. MS., that it is difficult rightly to assign the words and impossible to infer anything from the equiv-

scent.
TEMAN

(Masarisel, s. v. Aledb). This fortress seems, like that of Domat el-Jevedel, to be one of the strongholds that must have protected the caravan route along the northern frontier of Arabia: and they recall the passage following the enumeration of the sons of Ishmael: These are the sons of Kedar: and they are the twelve princes according to their nations (Gen. xxv. 15).

Teymaid signifies "a desert," "an untilled district," etc. Freytag (s. v.) writes the name without a long final diph, but not so the Masarisel.

Polyenon (six. 6) mentions Teymaid in Arabia Deserta, but it has not been the place of the existing Teymaid. The LXX. reading seems to have a reference to Teman, which see.

E. S. P.

* "The troops of Tema," the companies of Sheba (Job vi. 19), elsewhere referred to as "preatory bands" (Sheba), were, probably, companies of travellers, or caravans, crossing the wilderness in the dry season. Parched with thirst, they pressed forward with eager hope to the remembered beds of winter-streams, only to find that under the extreme heat the winding brooks had disappeared—evaporated and absorbed in the sands—leaving its channel as dry as the contiguous desert. Their keen disappointment was a lively image of the experience of Job, when in his deep affliction he looked for sympathy from his brethren, and listened to cease in order to condescending. The simple, poetic and vivid, is scarcely less forcible in its broader application to the illusiveness of the fairest earthly promises and to the fading hopes of mortals. [Deceitfully, Amer. ed.: River, 2.]

S. W.

TE' MAN (טמנ) [on the right bank, south]; Θαμών: Temple.

1. A son of Eliphaz, son of Esau by Adah (Gen. xxxvi. 11; 1 Chr. i. 36, 55), afterwards named as a duke (phylarch) of Edom (ver. 15), and mentioned again in the separate list (vv. 40–43) of "the names of the rulers [that came] of Esau, according to their families, after their places, by their names;" ending, "these be the dukes of Edom, according to their habitations in the land of their possession: he [Is] Esau the father of the Edomites." 2. [Eun. Vat. Θαμών, Am. i. 12; Fa. and Sin. Θαμών, Jer. xlix. 7, Ob., Hab.: Θαμών, amouer, meredic.] A country, and probably a city, named after the Edomite phylarch, or from which the phylarch took his name, as may be perhaps inferred from the verses of Gen. xxxvi. just quoted. The Hebrew signifies "south," etc. (see Job ix. 18; xiii. 6; besides the use of it to mean the south side of the Tabernacle in Ex. xxvi. and xxviii., etc.); and it is probable that the land of Teman was a southern portion of the land of Edom, or, in a wider sense, that of the sons of the East, the Bene-kedem. Teman is mentioned in five places by the Prophets, in four of which it is connected with Edom, showing it to be the same place as that indicated in the list of the dukes: twice it is named alone: the two others, in the names of Ishmael: [these [n. m. S.] the sons of (phylarch) Teymaid."

"Concerning Edom, thus saith the Lord of hosts: [Is] wisdom no more in Teman? is counsel perished from the prudent? is their wisdom van-

ished? Flee ye, turn back, dwell deep, O inhabitants of Dedan" (Jer. xxix. 7, 8); and "I will make it [Edom] desolate from Teman; and they of Dedan shall fall by the sword" (Ex. xxxv. 13). This connection with the great Keturahite tribe of Dedan gives additional importance to a Teman, and helps to fix its geographical position. This is further defined by a passage in the chapter of Jer. already cited, vi. 20, 21, where it is said of Edom and Teman, "The earth is moved at the noise of their fdt; at the cry the noise thereof was heard in the Red Sea (gen. Safe)." In the sublime prayer in Habakkuk, it is just written, "Ah, they of Edom from Teman, and the Holy One from Mount Paran." (iii. 3). Jeremiah, it has been seen, speaks of the wisdom of Teman: and the prophecy of Olaedah implies the same (vv. 8, 9), "Shall I not in that day, saith the Lord, even destroy the wise (men) out of Edom, and understanding out of the mount of Esau? And they [mighty] men, O Teman, shall be dismayed." In wisdom, the descendants of Esau, and especially the inhabitants of Teman, seem to have been preeminent among the sons of the East.

In common with most Edomite names, Teman appears to have been lost. The occupation of the country by the Nabataeans seems to have obliterated almost all of the traces (always obscure) of the maternal tribe of the desert. It is not likely that much can ever be done by modern research to clear up the early history of this part of the "east country." True, Eusebii and Jerome mention Teman as a town in their day distant 15 miles (according to Eusebius) from Petra, and a Roman post. The identification of the existing Maan (see Burchardt) with this Teman may be geographically correct, but it cannot rest on etymological grounds.

The gentilic noun of Teman is Τεμάνη (Job ii. 11; xxiii. 1), and Eliphaz the Temanite was one of the wise men of Edom. The gent. n. occurs also in Gen. xxxvi. 34, where the land of Temanii (so in the L. V.) is mentioned.

E. S. P.

TE' MANI. [Teman.]

TE' MANI'TE. [Teman.]
and its peculiarities were the watchwords and rallying points of all associations of builders. Since the revival of learning in the 16th century its arrangements have employed the pens of numberless learned antiquarians, and architects of every country have wasted their science in trying to reproduce its forms.

But it is not only to Christians that the Temple of Solomon is so interesting; the whole Mohammedan world look to it as the foundation of all architectural knowledge, and the Jews still recall its glories and sigh over their loss with a constant tenderness unmatched by that of any other people to any other building of the ancient world.

With all this interest and attention it might fairly be assumed that there was nothing more to be said on such a subject—that every source of information had been ransacked, and every form of restoration long ago exhausted, and some settlement of the disputed points arrived at which had been generally accepted. This, however, far from being the case, and few things would be more curious than a collection of the various restorations that have been proposed, as showing what different meanings may be applied to the same set of simple architectural terms.

The most important work on this subject, and that which was principally followed by restorers in the 17th and 18th centuries, was that of the brothers Pradì, Spanish Jesuits, better known as Villalpandii. Their work was published in folio at Rome, 1596—1604, superbly illustrated. Their idea of Solomon's Temple was, that both in dimensions and arrangement it was very like the Escurial in Spain. But it is by no means clear whether the Escurial being larger, while there was nothing in the press, in order to look like the Temple, or whether its authors took their idea of the Temple from the palace. At all events their design is so much the more beautiful and commodious of the two, that we cannot but regret that Herrera was not employed on the book, and the Jesuits set to build the palace.

When the French expedition to Egypt, in the first years of this century, had made the world familiar with the wonderful architectural remains of that country, every one jumped to the conclusion that Solomon's Temple must have been designed after an Egyptian model, forgetting entirely how hateful that kind of bondage was to the Israelites, and how completely all the ordinances of their religion opposed to the idolatries they had escaped from—forgetting, too, the centuries which had elapsed since the Exode before the Temple was erected, and how little communication of any sort there had been between the two countries in the interval.

The Assyrian discoveries of Botta and Layard have within the last twenty years given an entirely new interest to the study of the ancient Orient, and this time with a very considerable prospect of success, for the analogies are now true, and whatever can be brought to bear on the subject is in the right direction. The original seats of the progenitors of the Jewish races were in Mesopotamia. Their language was practically the same as that spoken on the banks of the Tigris. Their historical traditions were consonant, and, so far as we can judge, almost all the outward symbolism of their religion was the same, or nearly so. Unfortunately, however, no Assyrian temple has yet been examined of a nature to throw much light on this subject, and we are still forced to have recourse to the later buildings at Persepolis, or to general deductions from the style of the nearly contemporary secular buildings at Nineveh and elsewhere, for such illustrations as are available. These, however, nearly suffice for all that is required for Solomon's Temple. For the details of that erected by Herod we must look to Rome.

Of the intermediate Temple erected by Zerubbabel we know very little, but, from the circumstance of its having been erected under Persian influences contemporaneously with the buildings at Persepolis, it is perhaps the one of which it would be most easy, if not to restore the details with anything like certainty.

Before proceeding, however, to investigate the arrangements of the Temple, it is indispensable first carefully to determine those of the Tabernacle which Moses caused to be erected in the Desert of Sinai immediately after the pronouncement of the Law from that mountain. For, as we shall presently see, the Temple of Solomon was nothing more nor less than an exact repetition of that earlier Temple, differing only in being erected of more durable materials, and with exactly double the dimensions of its prototype, but still in every essential respect so identical that a knowledge of the one is indispensable in order to understand the other.

Tabernacle.
The written authorities for the restoration of the Tabernacle are, first, the detailed account to be found in the 26th chapter of Exodus, and repeated in the 36th, verses 8 to 33, without any variation beyond the slightest possible abbreviation. Secondly, the account given of the building by Josephus (Ant. iii. 6), which is so nearly a repetition of the account found in the Bible that we may feel assured that he had no really important authority before him except the one which is equally accessible to us. Indeed we might almost put his account on one side, if it were not that, being a Jew, and so much nearer the time, he may have had access to some traditional accounts which may have enabled him to realize its appearance more nearly than we can do, and his knowledge of Hebrew technical terms may have enabled him to understand what we might otherwise be unable to explain.

The additional indications contained in the Tal- mud and in Philo are so few and indistinct, and are besides of such doubtful authenticity, that they practically add nothing to our knowledge, and may safely be disregarded.

For a complete architectural building these written authorities probably would not suffice without some reminiscents or other indications to supplement them; but the arrangements of the Tabernacle were so simple that they are really all that are required. Every important dimension was either an exact average of the whole, or double it, and all the arrangements in plan were either squares or double squares, so that there really is no difficulty in putting the whole together, and none would ever have occurred were it not that the dimensions of the sanctuary, as obtained from the "beards" that formed its walls, appear at first sight to be one thing, while those obtained from the dimensions of the curtains which covered it appear to give another, and no one has yet succeeded in reconciling these with one another or with the text of Scripture. The apparent discrepancy is, however, easily explained, as we shall presently see, and never
would have occurred to any one who had lived long under canvas or was familiar with the exigencies of tent architecture.

Outer Enclosure.—The court of the Tabernacle was surrounded by canvas screens—in the East called Kannauts—and still universally used to enclose the private apartments of important personages. Those of the Tabernacle were 5 cubits in height, and supported by pillars of brass 5 cubits apart, to which the curtains were attached by hooks and fillets of silver (Ex. xxvii. 9, &c.). This enclosure was only broken on the eastern side by the entrance, which was 20 cubits wide, and closed by curtains of fine twined linen wrought with needlework, and of the most gorgeous colors.

The space inclosed within these screens was a double square, 56 cubits, or 75 feet north and south, and 160 cubits or 150 ft. east and west. In the outer or eastern half was placed the altar of burnt-offerings, described in Ex. xxvii. 1–8, and between it and the Tabernacle the laver (Ant. iii. 6, § 2), at which the priests washed their hands and feet on entering the Temple.

In the square towards the west was situated the Temple or Tabernacle itself. The dimensions in plan of this structure are easily ascertained. Josephus states them (Ant. iii. 6, § 3) as 30 cubits long by 10 broad, or 45 feet by 15, and the Bible is scarcely less distinct, as it says that the north and south walls were each composed of twenty upright boards (Ex. xxvi. 15, &c.); each board one cubit and a half in width, and at the west end there were six boards equal to 9 cubits, which, with the angle boards or posts, made up the 10 cubits of Josephus. Each of these boards was furnished with two tenons at its lower extremity, which fitted into silver sockets placed on the ground. At the top at least they were jointed and fastened together by bars of shittim or acacia wood run through rings of gold (Ex. xxvi. 26). Both authorities agree that there were five bars for each side, but a little difficulty arises from the Bible describing (ver. 28) a middle bar which reached from end to end. As we shall presently see, this bar was probably applied to a totally different purpose, and we may therefore assume for the present that Josephus’ description of the mode in which they were applied is the correct one: “Every one,” he says (Ant. iii. 6, § 3), “of the pillars or boards had a ring of gold affixed to its front outwards, into which were inserted bars gilt with gold, each of them 5 cubits long, and these bound together the boards; the head of one bar running into another after the manner of one tenon inserted into another. But for the wall behind there was only one bar that went through all the boards, into which one of the ends of the bars on both sides was inserted.”

So far, therefore, everything seems certain and easily understood. The Tabernacle was an oblong rectangular structure, 30 cubits long by 30 cubits wide, open at the eastern end, and divided internally into two apartments. The Holy of Holies, into which no one entered—not even the priest, except on very extraordinary occasions—was a cube, 10 cubits square in plan, and 10 cubits high to the top of the wall. In this was placed the Mercy-seat, surmounted by the cherubim, and on it was placed the Ark, containing the tables of the Law. In front of these was an outer chamber, called the Holy Place—20 cubits long by 10 broad, and 10 high, appropriated to the use of the priests. In it plain the peculiarities of Herod’s Temple as Josephus who is our principal authority regarding it, most certainly did always employ the Greek cubit of 18 inches, or 400 to 1 stadium of 500 Greek feet; and the Talmud, which is the only other authority, always gives the same number of cubits where we can be certain they are speaking of the same thing; so that we may feel perfectly sure they both were using the same measure. Thus, whatever other cubits the Jews may have used for other purposes, we may rest assured that for the buildings referred to in this article the cubit of 18 inches, and that only, was the one employed.

\[ a \] The cubit used throughout this article is assumed to be the ordinary cubit, of the length of a man’s forearm from the elbow-joint to the tip of the middle finger, or 18 Greek inches, equal to 31 English inches. There seems to be little doubt but that the Jews also used occasionally a shorter cubit of 5 handbreadths, or 15 inches, but only (so far as can be ascertained) in speaking of vessels or of metal work, and never applied it to buildings. After the Babylonish Captivity they seem to have adopted the Babylonian cubit of 7 handbreadths, or 21 inches. This, however, can evidently have no application to the Tabernacle or Solomon’s Temple, which was erected before the Captivity; nor can it be available to ex-
The roof of the Tabernacle was formed by 3, or rather 4, sets of curtains, the dimensions of two of which are given with great minuteness both in the Bible and by Josephus. The innermost (Ex. xxvi. 1, &c.), of fine twined linen according to our translation (Josephus calls them wool: ἐπίπεδη, Int. iii. 6, § 4), were ten in number, each 4 cubits wide and 28 cubits long. These were of various colors, and ornamented with cherubins of "cunning work." Five of these were sewn together so as to form larger curtains, each 29 cubits by 28, and these two again were joined together, when used, by fifty gold buckles or clasps.

Above these were placed curtains of goats' hair each 4 cubits wide by 30 cubits long, but eleven in number; these were also sewn together, six into one curtain, and five into the other, and, when used, were likewise joined together by fifty gold buckles.

Over these again was thrown a curtain of rams' skins with the wool on, dyed red, and a fourth covering is also specified as being of badgers' skins, so named in the A. V., but which probably consisted of seal-skins. [BADGER-SKINS, vol. i. p. 224 E] This did not of course cover the rams' skins, but most probably was only used as a coupling or ridge piece to protect the junction of the two curtains of rams' skins which were laid on each slope of the roof, and probably only laced together at the top.

The question which has hitherto proved a stumbling block to restorers is, to know how these curtains were applied as a covering to the Tabernacle. Strange to say, this has appeared so difficult that, with hardly an exception, they have been content to assume that they were thrown over its walls as a pall is thrown over a coffin, and they have thus cut the Gordian knot in defiance of all probabilities, as well as of the distinct specification of the Pentateuch. To this view of the matter there are several important objections.

First. If the inner or ornamental curtain was so used, only about one third of it would be seen; 9 cubits on each side would be entirely hidden between the walls of the Tabernacle and the goats'-hair curtain. It is true that Bähr (Symbolik des altesten Cothens, Neumann (Der Stiftsbücher, 1861), and others, try to avoid this difficulty by hanging this curtain as to drape the walls inside; but for this there is not a shadow of authority, and the form of the curtain would be singularly awkward and unsuitable for this purpose. If such a thing were intended, it is evident that one curtain would have been used as wall-hangings and another as a ceiling, not one great range of curtains all joined the same way to hang the walls all round and form the ceiling at the same time.

A second and more cogent objection will strike any one who has ever lived in a tent. It is, that every drop of rain that fell on the Tabernacle would fall through; for, however tightly the curtains might be stretched, the water could never run over the edge, and the sheep-skins would only make the matter worse, as when wetted their weight would depress the centre, and probably tear any curtain that could be made, while snow lying on such a roof would certainly tear the curtains to pieces.

But a third and fatal objection is, that this arrangement is in direct contradiction to Scripture. We are there told (Ex. xxvi. 9) that half of one of the goats'-hair curtains shall be doubled back in front of the Tabernacle, and only the half of another (ver. 12) hang down behind; and (ver. 13) that one curtain shall hang down on each side—whereas this arrangement makes 10 cubits hang down all round, except in front.

The solution of the difficulty appears singularly obvious. It is simply, that the tent had a ridge, as all tents have had from the days of Moses down to the present day; and we have also very little difficulty in predicating that the angle formed by the two sides of the roof at the ridge was a right angle—not only because it is a reasonable and usual angle for such a roof, and one that would most likely be adopted in so regular a building, but because its adoption reduces to harmony the only abnormal measurement in the whole building. As mentioned above, the principal curtains were only 28 cubits in length, and consequently not a multiple of 5; but if we assume a right angle at the ridge, each side of the slope was 14 cubits, and 14° + 14° = 28, and 28 x 2800, two numbers which are practically identical in tent-building. The base of the triangle, therefore, formed by the roof was 29 cubits, or in other words, the roof of the Tabernacle extended 5 cubits beyond the walls, not only in front and rear, but on both sides; and it may be added, that the width of the Tabernacle thus became identical with the width of the entrance to the enclosure; which but for this circumstance must appear to have been disproportionately large.

With these data it is easy to explain all the other difficulties which have met previous restorers.

First. The Holy of Holies was divided from the Holy Place by a screen of four pillars supporting curtains which no one was allowed to pass. But strange to say, in the entrance there were five pil
ars in a similar space. Now, no one would put a pillar in the centre of an entrance without a motive; but the moment a ridge is assumed it becomes indispensable.

No. 3.—Diagram of the Dimensions of the Tabernacle in Section.

It may be assumed that all the five pillars were spaced within the limits of the 10 cubits of the breadth of the Tabernacle, namely, one in the centre, two opposite the two ends of the walls, and the other two between them; but the probabilities are so infinitely greater that those two last were beyond those at the angles of the tent, that it is hardly worth while considering the first hypothesis; the one here adopted the pillars in front would, like everything else, be spaced exactly 5 cubits apart.

Secondly, Josephus twice asserts (Ant. iii. 6, § 4) that the Tabernacle was divided into three parts, though he specifies only two—the Adytum and the Porch. The third was of course the porch, 5 cubits deep, which stretched across the width of the house.

Thirdly. In speaking of the western end, the Bible always uses the plural, as if there were two sides there. There was, of course, at least one pillar in the centre beyond the wall,—there may have been five,—so that there practically were two sides there. It may also be remarked that the Pentateuch, in speaking (Ex. xxxvi. 12) of this after part calls it Mischem, or the dwelling, as contradistinguished from Ohel, or the tent, which applies to the whole structure covered by the curtains.

Fourthly. We now understand why there are 10 breadths in the under curtains, and 11 in the upper. It was that they might break joint—in other words, that the seam of the one, and especially the great joining of the two divisions, might be over the centre of the lower curtain, so as to prevent the rain penetrating through the joints. It may also be remarked that, as the two cubits which were in excess at the west hung at an angle, the depth of fringe would be practically about the same as on the sides.

With these suggestions, the whole description in the Book of Exodus is so easily understood that it is not necessary to dilate further upon it; there are, however, two points which remain to be noticed, but more with reference to the Temple which succeeded it than with regard to the Tabernacle itself.

The first is the disposition of the side bars of shittim-wood that joined the boards together. At first sight it would appear that there were four short and one long bar on each side, but it seems impossible to see how these could be arranged to accord with the usual interpretation of the text, and very improbable that the Israelites would have carried about a bar 45 feet long, when 5 or 6 bars would have answered the purpose equally well, and 3 rows of bars are quite unnecessary, besides being in opposition to the words of the text.

The explanation hinted at, above seems the most reasonable one—that the five bars named (vers. 26 and 27) were joined end to end, as Josephus asserts, and the bar mentioned (ver. 28) was the ridge-rod of the roof. The words of the Hebrew text will equally well bear the translation—a and the middle bar which is between, instead of in the midst of the boards, shall reach from end to end. This would appear a perfectly reasonable solution but for the mechanical difficulty that no pole could be made stiff enough to bear its own weight and that of the curtains over an extent of 45 feet, without intermediate supports. A ridge-rod could easily be stretched to twice that distance, if required for the purpose, though it too would drop in the centre. A pole would be a much more appropriate and likely architectural arrangement—so much so, that it seems more than probable that one was employed with supports. One pillar in the centre where the curtains were joined would be amply sufficient for all practical purposes; and if the centre board at the back of the Holy of Holies was 15 cubits high (which there is nothing to contradict), the whole structure would be easily constructed. Still, as no intermediate supports are mentioned either by the Bible or Josephus, the question of how the ridge was formed and supported must remain an open one, incapable of proof with our present knowledge, but it is one to which we shall have to revert presently.

The other question is—were the sides of the Verandah which surrounded the Sanctuary closed or left open? The only hint we have that this was done, is the mention of the western sides always in the plural, and the employment of Mischem and Ohel throughout this chapter, apparently in opposition to one another, Mischem always seeming to apply to an inclosed space, which was or might be dwelt in, Ohel to the tent as a whole or to the covering only; though here again the point is by no means clear as to being solved.

The only really tangible reason for supposing the sides were inclosed is, that the Temple of Solomon was surrounded, on all sides but the front, by a range of small cells five cubits wide, in which the priests resided who were specially attached to the service of the Temple. It would have been so easy to have done this in the Tabernacle, and its convenience—at night at least—so great, that I cannot help suspecting it was the case.

It is not easy to ascertain, with anything like certainty, at what distance from the tent the tent-pegs were fixed. It could not be less on the sides than 7 cubits, it may as probably have been 10. In front and rear the central peg could hardly have been at a less distance than 20 cubits; so that it is by no means improbable that from the front to the rear the whole distance may have been 80 cubits, and from side to side 40 cubits, measured from peg to peg; and it is this dimension which seems to have governed the pegs of the inclusions, as it would just allow room for the fastenings of the inclosure on either side, and for the pillar and later in front. It is scarcely worth while, however, insisting strongly on these and some other minor points.

Enough has been said to explain with the woodcuts all the main points of the proposed restoration.
TEMPLE

and to show that it is possible to reconstruct the Tabernacle in strict conformity with every word and every indication of the sacred text, and at the same time to show that the Tabernacle was a reasonable tent-like structure, admirably adapted to the purposes to which it was applied.

SOLOMON'S TEMPLE.

The Tabernacle accompanied the Israelites in all their wanderings, and remained their only Holy Place or Temple till David obtained possession of Jerusalem, and erected an altar in the threshing-floor of Araunah, on the spot where the altar of the Temple always afterwards stood. He also brought the Ark out of Kirjath-jearim (2 Sam. vi. 2; 1 Chr. xiii. 6) and prepared a tabernacle for it in the new city which he called after his own name. Both these were brought up thence by Solomon (2 Chr. v. 5); the Ark placed in the Holy of Holies, but the Tabernacle seems to have been put on one side as a relic (1 Chr. xxix. 32). We have no account, however, of the removal of the original Tabernacle of Moses from Gibeon, nor anything that would enable us to connect it with that one which Solomon removed out of the City of David (2 Chr. v. 5). In fact, from the time of the building of the Temple, we lose sight of the Tabernacle altogether. It was David who first proposed to replace the Tabernacle by a more permanent building, but was forbidden for the reasons assigned by the prophet Nathan (2 Sam. vii. 5, &c.), and though he collected materials and made arrangements, the execution of the task was left for his son Solomon.

He, with the assistance of Hiram king of Tyre, commenced this great undertaking in the fourth year of his reign, and completed it in seven years, about 1005 B.C. according to the received chronology.

0n comparing the Temple, as described in 1 Kings vi. and 2 Chronicles iii. and by Josephus vi. 3, with the Tabernacle, as just explained, the first thing that strikes us is that all the arrangements were identical, and the dimensions of every part were exactly double those of the preceding structure. Thus the Holy of Holies in the Tabernacle was a cube, 10 cubits each way; in the Temple it was 20 cubits. The Holy Place, or outer hall was 10 cubits wide by 20 long and 10 high in the Tabernacle. In the Temple all these dimensions were exactly double. The porch in the Tabernacle was 5 cubits deep, in the Temple 10; its width in both instances being the width of the house. The chambers round the House and the Tabernacle were each 5 cubits wide on the ground-floor, the difference being that in the Temple the two walls taken together made up a thickness of 5 cubits, thus making 10 cubits for the chambers.

Taking all these parts together, the ground-plan of the Temple measured 80 cubits by 40: that of the Tabernacle, as we have just seen, was 40 by 20; and what is more striking than even this is that though the walls were 10 cubits high in the one

No. 4. — Southeast View of the Tabernacle, as restored.

No. 5. — Plan of Solomon's Temple, showing the relative position of the chambers in two stories.

and 20 cubits in the other, the whole height of the Tabernacle was 15, that of the Temple 30 cubits; the one roof rising 5, the other 10 cubits above the height of the internal walls. So exact indeed is this

* In the Apocrypha there is a passage which bears curiously and distinctly on this subject. In Wisd ix.
coincidence, that it not only confirms to the fullest extent the restoration of the Tabernacle which has just been explained, but it is a singular confirmation of the minute accuracy which characterized the writers of the Pentateuch and the books of Kings and Chronicles in this matter: for not only are we able to check the one by the other at this distance of time with perfect certainty, but, now that we know the system on which they were constructed, we might almost restore both edifices from Josephus' account of the Temple as reerected by Herod, of which more hereafter.

The proof that the Temple, as built by Solomon, was only an enlarged copy of the Tabernacle, goes far also to change the form of another important question which has been long agitated by the students of Jewish antiquities, inasmuch as the inquiry as to whence the Jews derived the plan and design of the Temple must now be transferred to the earlier type, and the question thus stands, Whence did they derive the scheme of the Tabernacle?

From Egypt?
There is not a shadow of proof that the Egyptians ever used a movable or tent-like temple; neither the pictures in their temples nor any historical records point to such a form, nor has any one hitherto ventured to suggest such an origin for that structure.

From Assyria?
Here too we are equally devoid of any authority or tangible data, for though the probabilities certainly are that the Jews would rather adopt a form from the kindred Assyrians than from the hated strangers whose land they had just left, we have nothing further to justify us in such an assumption.

From Arabia?
It is possible that the Arabs may have used movable tent-like temples. They were a people nearly allied in race with the Jews. Moses' father-in-law was an Arab, and something he may have seen there may have suggested the form he adopted. But beyond this we cannot at present go.\(^a\)

\(^8\), it is said, "Thou hast commanded me (i. e. Solomon) to build a Temple in Thy Holy Mount, and an altar in the city wherein Thou dwellest, a resemblance of the Holy Tabernacle which Thou hast prepared from the beginning."
For the present, at least, it must suffice to know that the form of the Temple was copied from the Tabernacle, and that any architectural ornaments that may have been added were such as were usually employed at that time in Palestine, and more especially at Tyre, whence most of the architects were obtained who assisted in its erection.

So far as the dimensions above quoted are concerned, everything is as clear and as certain as anything that can be predicated of any building of which no remains exist, but beyond this there are certain minor points upon which no means are easy to rest, but fortunately they are of much less importance. The first is the —

Height. — That given in 1 K. vi. 2 — of 30 cubits — is so reasonable in proportion to the other dimensions, that the matter might be allowed to rest there without for the assertion (2 Chr. iii. 4) that the height, though apparently only of the porch, was 120 cubits or 180 feet (as nearly as may be the height of the steeples of St. Martin's in the Fields). This is so unlike anything we know of in ancient architecture, that, having no counterpart in the Tabernacle, we might at first sight feel almost justified in rejecting it as a mistake or interpolation, but for the assertion (2 Chr. iii. 9) that Solomon overlaid the upper chambers with gold, and 2 K. xxiii. 12, where the altars on the top of the upper chambers, apparently of the Temple, are mentioned. In addition to this, both Josephus and the Talmud persistently assert that there was a superstructure on the Temple equal in height to the lower part, and the total height they, in accordance with the book of Chronicles, call 120 cubits or 180 feet (Ant. viii. 3, § 2). It is evident, however, that he obtains these dimensions first by doubling the height of the lower Temple, making it 60 instead of 30 cubits, and in like manner exaggerating every other dimension to make up this quantity. Were it not for these authorities, it would satisfy all the real exigencies of the case if we assumed that the upper chamber occupied the space between the roof of the Holy Place and the roof of the Temple. Ten cubits or 15 feet, even after deducting the thickness of the two roofs, is sufficient to constitute such an apartment as history would lend us to suppose existed there. But the evidence that there was something beyond this is so strong that it cannot be rejected.

In looking through the monuments of antiquity for something to suggest what this might be, the only thing that occurs is the platform or Talur that existed on the roofs of the Palace Temples at Persepolis — as shown in Wood-cut No. 6, which represents the Tomb of Darius, and is an exact reproduction of the façade of the Palace shown in plan, Wood-cut No. 9. It is true there were erected five centuries after the building of Solomon's Temple; but they are avowedly copies in stone of older Assyrian forms, and as such may represent, with more or less exactness, contemporary buildings. Nothing in fact could represent more correctly "the altars on the top of the upper chambers" which Josiah beat down (2 K. xxiii. 12) than this, nor could anything more fully meet all the architectural or devotional exigencies of the case; but its height never could have been 60 cubits, or even 30, but it might very probably be the 20 cubits which incidentally Josephus (xx. 11, § 3) mentions as "sinking down in the failure of the foundations, but was so left till the days of Nero." There can be little doubt but that the part referred to in this paragraph was some such superstructure as that shown in the last wood-cut; and the incidental mention of 20 cubits is much more to be trusted than Josephus' heights generally are, which he seems systematically to have exaggerated when he was thinking about them. 

Arthur and Bosan. — There are no features connected with the Temple of Solomon which have given rise to so much controversy, or been so difficult to explain, as the form of the two pillars of brass which were set up in the porch of the house. It has even been supposed that they were not pillars in the ordinary sense of the term, but obelisks; for this, however, there does not appear to be any authority. The porch was 30 feet in width, and a roof of that extent, even if composed of a wooden beam, would not only look painfully weak without some support, but be in fact, almost impossible to construct with the imperfect science of those days. Another difficulty arises from the fact that the book of Chronicles nearly doubles the dimensions given in Kings; but this arises from the systematic adaption of the height which misled Josephus; and if we assume the Temple to have been 60 cubits high, the height of the pillars, as given in the book of Chronicles, would be appropriate to support the roof of its porch, as those in Kings are the proper height for a temple 30 cubits high, which there is every reason to believe was the true dimension. According to 1 K. vii. 15 ff., the pillars were 18 cubits high and 12 in circumference, with capitals five cubits in height. Above this was (ver. 19) another member, called also chapter of Ily-work, four cubits in height, but which from

The Carthaginians were a Semitic people, and seem to have carried their Holy Tent about with their armies, and to have performed sacrifices in front of it previously as was done by the Jews, excepting, of course, the nature of the victims. 

![Diagram of Temple](image-url)
the second mention of it in ver. 22 seems more probable to have been an eulogium, which is necessary to complete the order. As these members make out 27 cubits, leaving 3 cubits or 45 feet for the slope of the roof, the whole design seems reasonable and proper.

If this conjecture be correct, we have no great difficulty in suggesting that the hilly-work must have been something like the Persepolitan corona (Wood-cut No. 7), which is probably nearer in style to that of the buildings at Jerusalem than anything else we know of.

It seems almost in vain to try and speculate on what was the exact form of the decoration of these celebrated pillars. The nets of checker-work and wreaths of chain-work, and the pomegranates, etc., are all features applicable to metal architecture; and though we know that the old Tartar races did use metal architecture everywhere, and especially in bronze, from the very nature of the material every specimen has perished, and we have now no representations from which we can restore them. The styles we are familiar with were all derived more or less from wood, or from stone with wooden ornaments repeated in the harder material. Even at Persepolis, though we may feel certain that everything we see there had a wooden prototype, and may suspect that much of their wooden ornamentation was derived from the earlier metal forms, still it is so for removed from the original source that in the present state of our knowledge, it is dangerous to insist too closely on any point. Notwithstanding this, the pillars at Persepolis, of which Wood-cut No. 8 is a type, are probably more like those at Nineveh than any other pillars which have reached us from antiquity, and give a better idea of the immense capitals of these columns than we obtain from any other examples: but being in stone, they are far more simple and less ornamental than they would have been in wood, and infinitely less so than their metal prototypes.

*Internal Supports.*—The existence of these two pillars in the porch suggests an inquiry which has hitherto been entirely overlooked: Were there any pillars in the interior of the Temple? Considering that the clear space of the roof was 20 cubits, or 30 feet, it may safely be asserted that no cedar beam could be laid across this without sinking in the centre by its own weight, unless trussed or supported from below. There is no reason whatever to suppose that the Tyrians in those days were acquainted with the scientific forms of carpentry implied in the first suggestion, and there is no reason why they should have resorted to them even if they knew how; as it cannot be doubted but that architecturally the introduction of pillars in the interior would have increased the apparent size and improved the artistic effect of the building to a very considerable degree.

If they were introduced at all, there must have been four in the sanctuary and ten in the hall, not necessarily equally spaced, in a transverse direction, but probably standing 6 cubits from the walls, leaving a centre side of 8 cubits.

The only building at Jerusalem whose construction throws any light on this subject is the House of the Forest of Lebanon. [PALACE.] There the pillars were an inconvenience, as the purposes of the hall were state and festivity; but though the pillars in the palace had nothing to support above the roof, they were spaced, in the hall, certainly not more than 12, cubits apart. If Solomon had been able to roof a clear space of 20 cubits, he certainly would not have neglected to do it there.

At Persepolis there is a small building, called the Palace or Temple of Darius (Wood-cut No. 9), which more closely resembles the Jewish Temple than any other building we are acquainted with. It has a porch, a central hall, an aisle and a plan of which cannot now be made out — and a range of small chambers on either side. The principal difference is that it has four pillars in its porch instead of two, and consequently four rows in its interior hall instead of half that number, as suggested above.

All the buildings at Persepolis have their floors equally crowned with pillars, and, as there is no doubt but that they borrowed this peculiarity from Nineveh, there seems no a priori reason why Solomon should not have adopted this expedient to get over what otherwise would seem an insuperable constructive difficulty.

The question, in fact, is very much the same that met us in discussing the construction of the Tabernacle. No internal supports to the roof of either of these buildings are mentioned or shown. But the difficulties of construction without them would have been so enormous, and their introduction so usual and so entirely unobjectionable, that we can hardly understand their not being employed. Either building was possible without them, but certainly neither in the least degree probable.

It may perhaps add something to the probability of their arrangement to mention that the ten laves for the lavers which Solomon made would stand one within each inter-column on either hand, where they would be beautiful and appropriate ornaments. Without some such accentuation of the space, it seems difficult to understand what they were, and why ten.

*Chambers.*—The only other feature which remains to be noticed is the application of three tiers of small chambers to the walls of the Temple externally on all sides, except that of the entrance. Though not expressly so stated, these were a sort of monastery, appropriated to the residence of the priests who were either permanently or in turn devoted to the service of the Temple. The lowest story was only 8 cubits in width, the next 6, and
TEMPLE

the upper 7, allowing an offset of 1 cubit on the side of the Temple, or of 6 inches on each side, on which the flooring joists rested, so as not to cut into the walls of the Temple. Assuming the wall of the Temple at the level of the upper chambers to have been 2 cubits thick, and the outer wall one,—it could not well have been less,—this would exactly make up the duplication of the dimension found as before mentioned for the verandah of the Tabernacle.

It is, again, only at Perspolis that we find anything at all analogous to this; but in the plan last quoted as that of the Palace of Darius, we find a similar range on either hand. The palace of Xerxes possesses this feature also; but in the great hall there, and its counterpart at Susa, the place of these chambers is supplied by lateral porotices outside the walls that surrounded the central palaux of pillars. Unfortunately our knowledge of Assyrian temple architecture is too limited to enable us to say whether this feature was common elsewhere, and though something very like it occurs in Buddhist Viharas in India, these latter are comparatively so modern that their disposition hardly bears on the inquiry.

Outer Court.—The inclosure of the Temple consisted, according to the Bible (1 K. vi. 36), of a low wall of three courses of stones and a row of cedar beams, both probably highly ornamented. As it is more than probable that the same duplication of dimensions took place in this as in all the other features of the Tabernacle, we may safely assume that it was 10 cubits, or 15 feet, in height, and almost certainly 100 cubits north and south, and 200 and east.

There is no mention in the Bible of any porticoes or gateways or any architectural ornaments of this inclosure, for though names which were afterwards transferred to the gates of the Temple do occur in 1 Chr. ix., xxiv., and xxvi., this was before the Temple itself was built: and although Josephus does mention such, it must be recollected that he was writing five centuries after its total destruction, and he was too apt to confound the past and the present in his descriptions of buildings which did not then exist. There was an eastern porch to Herod's Temple, which was called Solomon's Porch, and Josephus tells us that it was built by that monarch; but of this there is absolutely no proof, and as neither in the account of Solomon's building nor in any subsequent repairs or incidents is any mention made of such buildings, we may safely conclude that they did not exist before the time of the great rebuilding immediately preceding the Christian era.

TEMPLE OF ZERUBBABEL.

We have very few particulars regarding the Temple which the Jews erected after their return from the Captivity (cir. 529 B.C.), and no description that would enable us to realize its appearance. But there are some dimensions given in the Bible and elsewhere which are extremely interesting as affording points of comparison between it and the temples which preceded it, or were erected after it.

The first and most authentic are those given in the book of Ezra (vi. 3), when quoting the decree of Cyrus, wherein it is said:—Let the house be built, the place where they offered sacrifice, and let the foundations thereof be strongly laid; the height thereof threescore cubits, and the breadth thereof threescore cubits, with three rows of great stones and a row of new timber." Josephus quotes this passage almost literally (vi. 4, § 6), but in doing so enables us with certainty to translate the word here called "row" (thydios) —as indeed the sense would lead us to infer—for it could only apply to the three stories of chambers that surrounded Solomon's, and afterwards Herod's Temple, and with this again we come to the wooden Talar which was mounted the Temple and formed a seventh story. It may be remarked in passing, that this dimension of 60 cubits in height accords perfectly with the words which Josephus puts into the mouth of Herod (xv. 11, § 1) when he makes him say that the Temple built after the "Captivity wastel 60 cubits of the height of that of Solomon. For as he had adopted, as we have seen above, the height of 120 cubits, as written in the Chronicles, for that Temple, this one remained only 60.

The other dimension of 60 cubits in breadth is 20 cubits in excess of that of Solomon's Temple, but there is no reason to doubt its correctness, for we find both from Josephus and the Talmud that it was the dimension adopted for the Temple when rebuilt, or rather repaired, by Herod. At the same time we have no authority for assuming that any increase was made in the dimensions of either the Holy Place or the Holy of Holies, since we find that these were retained in the description of an ideal Temple—and were afterwards those of Herod's. And as this Temple of Zerubbabel was still standing in Herod's time, and was more strictly speaking repaired than rebuilt by him, we cannot conceive that any of its dimensions were then diminished. We are left therefore with the alternative of assuming that the porch and the chambers all round were 20 cubits in width, including the thickness of the walls, instead of 10 cubits, as in the earlier building. This may perhaps to some extent be accounted for by the introduction of a passage between the Temple and the rooms of the priest's lodgings instead of each being a through-
The vision of a Temple which the prophet Ezekiel saw while residing on the banks of the Chebar in Babylonia in the 23rd year of the Captivity, does not add much to our knowledge of the subject. It is not a description of a Temple that ever was built or ever could be erected at Jerusalem, and consequently only be considered as the been ideal of what a Shemitic temple ought to be. As such it would certainly be interesting if it could be correctly restored, but unfortunately the difficulties of making out a complicated plan from a mere verbal description are very great indeed, and are enhanced in this instance by our imperfect knowledge of the exact meaning of the Hebrew architectural terms, and it may also be from the prophet describing not what he actually knew, but only what he saw in a vision.

Temple of Solomon.

This alteration in the width of the Pteron mata made the Temple 100 cubits in length by 60 in breadth, with a height, it is said, of 60 cubits, in each story. It is unnecessary to detail the difficulties of making out a complicated plan from a mere verbal description are very great indeed, and are enhanced in this instance by our imperfect knowledge of the exact meaning of the Hebrew architectural terms, and it may also be from the prophet describing not what he actually knew, but only what he saw in a vision.

The last dimension is exactly what we obtained above by doubling the width of the Tabernacle inclosure as applied to Solomon's Temple, and may therefore be accepted as tolerably certain, but the 50 feet in length exceeds anything we have yet reached by 200 feet. It may be that at this age it was found necessary to add a court for the women or the Gentiles, a sort of Nareth or Galilee for those who could not enter the Temple. If or these together were 160 cubits square, it would make up the "nearby 3plethra" of our author. Hecataeus also mentions that the altar was 20 cubits square and 10 high. And although he mentions the Temple itself, he unfortunately does not supply us with any dimensions.

From these dimensions we gather, that if the Priests and Levites and Elders of families were disconsolate at seeing how much more sumptuous the old Temple was than the one which on account of their poverty they had just been able to erect (Ez. iii. 12; Joseph. Ant. xi. 4, § 2), it certainly was no, because it was smaller, as almost every dimension has been increased one third; but it may have been that sparing the gold, and other ornaments of Solomon's Temple far surpassed this, and the pillars of the porch and the veils may all have been far more splendid, as also probably were the vessels; and all this is what a Jew of modern times might have thought more than the more architectural splendor. In speaking of these temples we must always bear in mind that their dimensions were practically very far inferior to those of the heathen. Even that of Ezra is not larger than an average parish church of the last century—Solomon's was smaller. It was the lavish display of the precious metals, the elaboration of carved ornament, and the beauty of the textile fabrics, which made up their splendor and rendered them so precious in the eyes of the people, and there can consequently be no greater mistake than to judge of them by the number of cubits they measured. They were temples of a Shemitic, not of a Celtic people.

Temple of Ezekiel.

The vision of a Temple which the prophet Ezekiel saw while residing on the banks of the Chebar in Babylonia in the 23rd year of the Captivity, does not add much to our knowledge of the subject. It is not a description of a Temple that ever was built or ever could be erected at Jerusalem, and consequently only be considered as the been ideal of what a Shemitic temple ought to be. As such it would certainly be interesting if it could be correctly restored, but unfortunately the difficulties of making out a complicated plan from a mere verbal description are very great indeed, and are enhanced in this instance by our imperfect knowledge of the exact meaning of the Hebrew architectural terms, and it may also be from the prophet describing not what he actually knew, but only what he saw in a vision.

Temple of Herod.

For our knowledge of the last and greatest of the Jewish Temples we are indebted almost wholly to the works of Josephus, with an occasional hint from the Talmud.

The Bible unfortunately contains nothing to assist the researches of the antiquary in this respect. With true Shemitish indelicacy to such objects, the writers of the New Testament do not furnish upon, but both the Hebrew and LXX are so clear that it was in the "street," or "place," of the Temple, that we cannot base any argument upon it, though it is curious as indicating what was passing in the mind of Josephus.
a single hint which would enable us to ascertain either what the situation or the dimensions of the Temple were, nor any characteristic feature of its architecture. But Josephus knew the spot personally, and his horizontal dimensions are so minutely accurate that we almost suspect he had before his eyes, when writing, some ground-plan of the building prepared in the quartermaster-general's department of Titus's army. They form a strange contrast with his dimensions in height, which, with scarcely an exception, can be shown to be exaggerated, generally doubled. As the buildings were all thrown down during the siege, it was impossible to convict him of error in respect to elevations, but as regards plan he seems always to have had a wholesome dread of the knowledge of those among whom he was living and writing.

The Temple or mas itself was in dimensions and arrangement very similar to that of Solomon, or rather that of Zerubbabel — more like the latter; but this was surrounded by an inner inclosure of great strength and magnificence, measuring as nearly as can be made out 180 cubits by 240, and adorned by porches and ten gateways of great magnificence; and beyond this again was an outer inclosure measuring externally 400 cubits each way, which was adorned with porches of greater splendor than any we know of attached to any temple of the ancient world; all showing how strongly Roman influence was at work in enveloping with heathen magnificence the simple temple arrangements of a Semitic people, which, however, remained nearly unchanged amidst all this external incrustation.

No. 10.—Temple of Herod restored. Scale of 200 feet to 1 inch.

It has already been pointed out [Jerusalem, vol. ii. pp. 1313–14] that the Temple was certainly situated in the S. W. angle of the area now known as the Haram area at Jerusalem, and it is hardly necessary to repeat here the arguments there induced to prove that its dimensions were what Josephus states them to be, 400 cubits, or one stadium, each way.

At the time when Herod rebuilt it he included a space 'twice as large' as that before occupied by the Temple and its courts (B. J. i. 21, § 1), an expression that probably must not be taken literally, at least if we are to depend on the measurements of Heerden. According to them the whole area of Herod's Temple was between four and five times greater than that which preceded it. What Herod did apparently was to take in the whole space between the Temple and the city wall on its eastern side, and to add a considerable space on the north and south to support the porticoes which he added there. [See Palestine, vol. iii. p. 2895, note, Amer. ed.]
As the Temple terrace thus became the principal defense of the city on the east side, there were no gates or openings in that direction, and being situated on a sort of rocky brow as evidenced from its appearance in the vaults that bound it on this side—it was at all future times considered unattackable from the eastward. The north side, too, where not covered by the fortress Antonia, became part of the defenses of the city, and was likewise without external gates. But it may also have been that, as the tombs of the kings, and indeed the general cemetery of Jerusalem, were situated immediately to the northward of the Temple, there was some religious feeling in preventing too ready access from the Temple to the burying-places (Ez. xiii. 7-9).

On the south side, which was inclosed by the wall of Ophel, there were double gates nearly in the centre (Ant. xv. 11, § 5). These gates still exist at a distance of about 365 feet from the southwestern angle, and are perhaps the only architectural features of the Temple of Herod which remain in situ. This entrance consists of a double archway of Cyclopean architecture on the level of the ground, opening into a square vestibule measuring 46 feet each way. In the centre of this is a pillar crowned by a capital of the Greek—rather than Roman—Corinthian order (Wood-cut No. 11): the acanthus alternating with the water-leaf, as in the Tower of the Winds at Athens, and other Greek examples, but which was an arrangement abandoned by the Romans as early as the time of Augustus, and never afterwards employed. From this pillar spring four flat segmental arches, and the space between these is roofed by flat domes, constructed apparently on the horizontal principle. The walls of this vestibule are of the same leveled masonry as the exterior; but either at the time of erection or subsequently, the projections seem to have been chiselled off in some parts so as to form piliasters. From this a double tunnel, nearly 260 feet in length, leads to a flight of steps which rise to the surface in the court of the Temple, exactly at that gateway of the inner Temple which led to the altar, and is the one of the four gateways on this side by which any one arriving from Ophel would naturally wish to enter the inner inclosure. It seems to have been this necessity that led to the external gateway being placed a little more to the eastward than the exact centre of the inclosure, where naturally we should otherwise have looked for it.

We learn from the Talmud (Mid. ii. 6), that the gate of the inner Temple to which this passage led was called the "Water Gate;" and it is interesting to be able to identify a spot so prominent in the description of Nehemiah (xiii. 37). The Water Gate is more often mentioned in the mediavil references to the Temple than any other, especially by Mohammedan authors, though by them frequently confounded with the outer gate at the other end of this passage.

Towards the westward there were four gateways to the external inclosure of the Temple (Ant. xv. 11, § 6), and the positions of three of these can still be traced with certainty. The first or most southern led over the bridge the remains of which were identified by Dr. Robinson (of which a view is given in art. JERUSALEM, vol. ii. p. 1318), and joined the Stoa Basilica of the Temple with the royal palace (Ant. vii. 7). The second was that discovered by Dr. Berosy, 270 feet from the S. W. angle, at a level of 17 feet below that of the southern gates just described. The site of the third is so completely covered by the buildings of the Meckin that it has not yet been seen, but it will be found between 200 and 250 feet from the N. W. angle of the Temple area; for, owing to the greater width of the southern portico beyond that on the northern, the Temple itself was not in the centre of its inclosure, but situated more towards the north. The fourth was that which led over thecauseway which still exists at a distance of 600 feet from the southwestern angle.

In the time of Solomon, and until the area was enlarged by Herod, the ascent from the western valley to the Temple seems to have been by an external flight of stairs (Neh. xii. 37; 1 K. x. 5, 6), similar to those at Persepolis, and which probably placed laterally so as to form a part of the architectural design. When, however, the Temple came to be fortified "modo axim" (Tacit. Hist. ii. 12), the causeway and the bridge were established to afford communication with the upper city; and the two intermediate lower entrances to lead to the lower city, or, as it was originally called, "the city of David."

Cloisters.—The most magnificent part of the Temple, in an architectural point of view, seems certainly to have been the cloisters which were added to the outer court when it was enlarged by Herod. It is not quite clear if there was not an eastern porch before this time, and if so, it may

b Owing to the darkness of the place, blocked up as it now is, and the mined state of the capital, it is not easy to get a correct delineation of it. This is to be regretted, as a considerable controversy has arisen as to its exact character. It may therefore be interesting to mention that the drawing made by the architectural draughtsman who accompanied M. Renan in his late scientific expedition to Syria confirms to the fullest extent the character of the architecture, as shown in the view given above from Mr. Aruaille's drawing.

d The Talmud, it is true, does mention a gate as existing in the eastern wall, but its testimony on this point is so unsatisfactory and in such direct opposition to Josephus and the probabilities of the case, that it may safely be disregarded.
have been nearly on the site of that subsequently erected: but on the three other sides the Temple area was so extended at the last rebuilding that there can be no doubt but that from the very foundations the terrace walls and cloisters belonged wholly to the last period.

The cloisters in the west, north, and east side were composed of double columns of Corinthian columns, 25 cubits or 37 feet 6 inches in height (B. J. v. 5, § 2), with flat roofs, and resting against the outer wall of the Temple. These, however, were immeasurably surpassed in magnificence by the royal porch or Stoa Basilea which overhung the southern wall. This is so minutely described by Josephus (Ant. xv. 11, § 5) that there is no difficulty in understanding its arrangement or ascertaining its dimensions. It consisted (in the language of Gothic architecture) of a nave and two aisles, that towards the Temple being open, that towards the country closed by a wall. The breadth of the centre aisle was 45 feet; of the side aisles 39 from centre to centre of the pillars; their height 54 feet, and that of the centre aisle 24 cubits. Its section was thus something in excess of that of York Cathedral, while its ground length was one stadium or 600 Greek feet, or 100 feet in excess of York, or our largest Gothic cathedrals. This magnificent structure was supported by 162 Corinthian columns, arranged in four rows, forty in each row — the two old pillars forming apparently a screen at the end of the bridge leading to the palace, whose axis was coincident with that of the Stoa, which thus formed the principal entrance from the city and palace to the Temple.

At a short distance from the front of these cloisters was a marble screen or inclosure, 3 cubits in height, beautifully ornamented with carving, but bearing inscriptions in Greek and Roman characters forbidding any Gentile to pass within its boundaries. Again, at a short distance within this was a flight of steps supporting the terrace or platform on which the Temple itself stood. According to Josephus (B. J. v. 5, § 2) this terrace was 15 cubits or 22½ feet high, and was approached first by fourteen steps, each we may assume about one foot in height, at the top of which was a bench or platform, 10 cubits wide, called the Chel; and there were again in the depth of the gateways five or six steps more leading to the inner court of the Temple, thus making 20 or 21 steps in the whole height of 22½ feet. To the eastward, where the court of the women was situated, this arrangement was reversed; five steps led to the Chel, and fifteen from that to the court of the Temple.

The court of the Temple, as mentioned above, was very nearly a square. It may have been exactly so, for we have not all the details to enable us to feel quite certain about it. The Meoboth says it was 187 cubits E. and W., and 137 N. and S. (ii. 6). But on the two last sides there were the gateways with their colonnades and chambers, which may have made up 25 cubits each way, though, with such measurements as we have, it appears they were something less.

To the eastward of this was the court of the women, the dimensions of which are not given by Jospehus, but in the Meoboth, as 15 cubits square — a dimension which we may reject, first, from the extreme improbability of the Jews allotting to the women a space more than ten times greater than that allotted to the men of Israel or to the Levites, whose courts, according to the same authority, were respectively 137 by 11 cubits; but, more than this, from the impossibility of finding room for such a court while adhering to the other dimensions given. If we assume that the inclosure of the court of the Gentiles, or the Chel, was nearly equidistant on all four sides from the cloisters, its dimension must have been about 35 or 40 cubits east and west, most probably the former.

The great ornament of these inner courts seems to have been their gateways, the three especially on the north and south leading to the Temple court. According to Josephus (B. J. v. 5, § 6), 50 cubits square and 15 cubits high, with an ascent to it by an inclined plane. The Talmud reduces this dimension to 32 cubits (Meoboth, iii. 3), and adds a number of particulars, which makes it appear that it must have been like a model of the Babylonian or other Assyrian temples. On the north side were the rings and stakes to which the victims were attached which were brought in to be sacrificed; and to the south an inclined plane led down, as before mentioned, to the Water Gate — so called because immediately in front of it was the great cistern excavated in the rock, first explored and described by Dr. Barclay (City of the Great King, p. 521), from which water was supplied to the Altar and the Temple. And a little beyond this, at the S. W. angle of the Altar was an opening (Meoboth, iii. 3), through which the blood of the victims flowed to westward and southward to the king’s garden at Siloam.

Both the Altar and the Temple were inclosed by a low parapet one cubit in height, placed so as to keep the people separate from the priests while the latter were performing their functions.

Within this last inclosure towards the westward for the external dimensions, they had 100 cubits to spare, and introduced them where no authority existed to show they were wrong.

b Handbook of Architecture, p. 30 ff.

c A channel exactly corresponding to that described in the Talmud has been discovered by Signor Pierotti, running towards the southwest. In his published accounts he mistakes it for one flowing north-east, in direct contradiction to the Talmud, which is our only authority on the subject.
stood the Temple itself. As before mentioned, its internal dimensions were the same as those of the Temple of Solomon, or of that seen by the prophet in a vision, namely, 20 cubits or 30 feet, by 60 cubits or 90 feet, divided into a cubical Holy of Holies, and a holy place of 2 cubies; and there is no reason whatever for doubting but that the Sanctuary always stood on the identically same spot in which it had been placed by Solomon a thousand years before it was rebuilt by Herod.

Although the internal dimensions remained the same, there seems no reason to doubt but that the whole plan was augmented by the Poromonta or surrounding parts being increased from 10 to 20 cubits, so that the third Temple like the second, measured 60 cubits across, and 100 cubits east and west. The width of the façade was also augmented by wings or shoulders (B. J. v. 5, § 4) projecting 20 cubits each way, making the whole breadth 100 cubits, or equal to the length. So far all seems certain, but when we come to the height, every measurement seems doubtful. Both Josephus and the Talmud seem delighted with the truly Jewish idea of a building which, without being a cube, was 100 cubits long, 100 broad, and 100 high — and everything seems to be made to bend to this simple ratio of proportion. It may also be partly owing to the difficulty of ascertaining heights as compared with horizontal dimensions, and the tendency that always exists to exaggerate these latter, that may have led to some confusion, but from whatever cause it arose, it is almost impossible to believe that the dimensions of the Temple as regards height, were what they were asserted to be by Josephus, and specified with such minute details in the Mishrah (vi. 6). This authority makes the height of the floor 6, of the hall 40 cubits; the roofing 5 cubits in thickness; then the conuaculum or upper room 40, and the roof, parapet, etc., 91 — all the parts being named with the most detailed particularity.

As the styxum was certainly not more than 20 cubits high, the first 40 looks very like a duplication, and so does the second; for a room 20 cubits wide and 40 high is so absurd a proportion that it is impossible to accept it. In fact, we cannot help suspecting that in this instance Josephus was guilty of systematically doubling the altitude of the building he was describing, as it can be proved he did in some other instances.

From the above it would appear, that in so far as the horizontal dimensions of the various parts of this celebrated building, or their arrangement in plan is concerned, we can restore every part with very tolerable certainty; and there does not appear either to be very much doubt as to their real height. But when we turn from actual measurement and try to realize its appearance or the details of its architecture, we launch into a sea of conjecture with very little indeed to guide us, at least in regard to the appearance of the Temple itself.

We know, however, that the cloisters of the outer court were of the Corinthian order, and from the appearance of nearly contemporary cloisters at Paonia and Baalbec we can judge of their effect. There are also in the Haram area at Jerusalem a number of pillars which once belonged to those colonnades, and so soon as any one will take the trouble to measure and draw them, we may restore the cloisters at all events with almost absolute certainty.

We may also realize very nearly the general appearance of the inner fortified enclosure with its gates and their accompaniments, and we can also restore the Altar, but when we turn to the Temple itself, all is guess work. Still the speculation is so interesting, that it may not be out of place to say a few words regarding it.

In the first place we are told (Ant. vi. 11, § 5) that the priests built the Temple itself in eighteen months, while it took Herod eight years to complete his part, and as only priests apparently were employed, we may fairly assume that it was not a rebuilding, but only a repair — it may be with additions — which they undertook. We know also from Maccabees, and from the unwillingness of the priests to allow Herod to undertake the rebuilding at all, that the Temple, though at one time desecrated, was never destroyed; so we may fairly assume that a great part of the Temple of Zerubabel was still standing, and was incorporated in the new.

Whatever may have been the case with the Temple of Solomon, it is nearly certain that the style of the second Temple must have been identical with that of the buildings we are so familiar with at Persepolis and Susa. In fact the Woodcut No. 6 correctly represents the second Temple in so far as its details are concerned; for we must not be led away with the modern idea that different people built in different styles, which they kept distinct and practiced only within their own narrow limits. The Jews were too closely connected with the Persians and Babylonians at this period to know of any other style, and in fact their Temple was built under the superintendence of the very parties who were erecting the contemporary edifices at Persepolis and Susa.

The question still remains how much of this building or of its details were retained, or how much of Roman feeling added. We may at once dismiss the idea that anything was borrowed from Egypt. That country had no influence at this period beyond the limits of her own narrow valley, and we cannot trace one vestige of her taste or feeling in anything found in Syria at or about this epoch.

Turning to the building itself, we find that the only things that were added at this period were the wings to the façade, and it may consequently be surmised that the façade was entirely remodeled at this time, especially as we find in the centre a great arch, which was a very Roman feature, and very unlike anything we know of as existing before.
This, Josephus says, was 25 cubits wide and 70 high, which is so monstrous in proportion, and, being wider than the Temple itself, so unlikely, that it may safely be rejected, and we may adopt in its stead the more moderate dimensions of the Miqdath (iii. 7), which makes it 20 cubits wide by 40 high, which is not only more in accordance with the dimensions of the building, but also with the proportions of Roman architecture. The temple occupied the centre, and may easily be restored; but what is to be done with the 37 cubits on either hand? Were they plain like an unfinished Egyptian propylon, or covered with ornament like an Indian Gopura? My own impression is that the façade on either hand was covered with a series of small arches and panels four stories in height, and more like the Tāk Kreṣa at Cæsiphion a than any other building now existing. It is true that nearly five centuries elapsed between the destruction of the one building and the erection of the other. But Herod’s Temple was not the last of its race, nor was Nushtirvan’s the first of its class, and its pointed arches and clumsy details show just such a degradation of the type as we should expect from the interval which had elapsed between them. We know so little of the architecture of this part of Asia that it is impossible to speak with certainty on such a subject, but we may yet recover many of the lost links which connect the one with the other, and so restore the earlier examples with at least proximate certainty.

Whatever the exact appearance of its details may have been, it may safely be asserted that the triple Temple of Jerusalem—the lower court, standing on its magnificent terrace—the inner court, raised on its platform in the centre of this—and the Temple itself, rising out of this group and crowning the whole—must have formed, when combined with the beauty of its situation, one of the most splendid architectural combinations of the ancient world.

Paine, Solomon’s Temple, etc., Boston, 1861 (21 plates); Keil’s Art. Tempel zu Jerusalem, in Herzog’s Real-Encyk. xx. 500–516; and the literature referred to under EZEKIEL, vol. i. p. 801 b.

A.

* TEMPLE, CAPTAIN OF THE [CAPTAIN.]  

* TEMPT (Lat. temptare, venture) is very often used in the A. V. in the sense of “to try,” “put to the test.” Thus God is said to have tempted “Abraham when he tried his faith by commanding the sacrifice of Isaac (Gen. xxii. 1). The Israelites “tempted God” in the wilderness when they put his patience and forbearance to the proof by murmuring, distrust, and disobedience (Exod. xii. 9, 7; Num. xiv. 22; Deut. vi. 16; Ps. xxxvi. 18, 41, 56, xcv. 9, cix. 14). The lawyer is said to have tempted “Christ when he asked him a question to see how he would answer it (Matt. xxii. 35; Luke x. 25). So the word is used in reference to the ensuing questions of the Pharisees (Matt. xvi. 1, xix. 3; Mark xii. 15; Luke xx. 23). [TEMPTATION.] A.

* TEMPTATION is often used in the A. V. in its original sense of “trick” (e. g. Luke xxii. 28; Acts xx. 19; James i. 2, 12; 1 Pet. i. 6; Rev. iii. 10). The plagues of Egypt are called temptations (Deut. iv. 34, vii. 19, xxiii. 3), because they tested the extent to which Pharaoh would carry his obstinacy. [TEMPT.] A.

** TEN COMMANDMENTS. (1.) The popular name in this, as in so many instances, is not that of Scripture. There we have the “ten words” (Deut. vi. 7; Ps. cviii. 2; τα δικαία πράξεις; verba decem), not the Ten Commandments (Ex. xxiv. 12; Deut. iv. 13, x. 4, Heb.). The difference is not altogether an unmeaning one. The word of God, the “word of the Lord,” the constantly recurring term for the fullest revelation, was higher than any phrase expressing merely a command, and carried with it more the idea of a self-fulfilling power. On this one side there was the special contrast to which our Lord refers between the commandments of God and the traditions of men (Matt. xxi. 3), the arrogance of the Rabbis showed itself, on the other, in placing the words of the Scribes on the same level as the words of God. [Camp. Scrips.] Nowhere in the later books of the O. T. is any direct reference made to their number. The treatise of Philo, however, περὶ τῶν δικαίων ἀργυρίων, shows that it had fixed itself on the Jewish mind, and later still, it gave occasion to the formation of a new word ("The Decalogue") ἡ δεκάδος, first in Clem. Al. Pen. iii. 12), which has perpetuated itself in modern languages. Other names are even more significant. These, and these alone, are “the words of the covenant,” the unchanging ground of the union between Jehovah and his people, all else being as a superstructure, accessory and subordinate (Ex. xxxi. 18). They are also the Tables of Testimony so prized by the Jews. This arch occasion and the Temple, which was the witness to men of the Divine will, righteous itself, demanding righteousness in men’s life (Ex. xxv. 16, xxxi. 18, &c.). It is by virtue of their presence in it that the Ark becomes, in its turn, the Ark of the Covenant (Num. xiii. 33, &c.), that the sacred text became the Tabernacle of Witness, to Testimony (Ex. xxvii. 21, &c.). [Tabernacle.] They remain there, throughout the history of the kingdom, the primal relics of a holy antiquity (1 K. viii. 9), their material, the writing on them, the sharp incisive character of the laws themselves presenting a striking contrast to the more expanded teaching of a later time. Not less did the commandments themselves speak of the earlier age when not the silver and the gold, but the awe and the fear, the representatives of wealth (comp. 1 Sam. xii. 3).

(2.) The circumstances in which the Ten great perhaps, such a conjecture possible. Scholia which modern commentators put into the margin are in the existing state of the O. T. incorporated into the text. Obviously both forms could not have appeared written on the two Tables of Stone, yet Deut. v. 15, 22 not only states a different reason, but affirms that “all these words” were thus written. Neil (Comment. on Ex. xxx) seems on this point disposed to agree with Ewald.

** Handbook of Architecture, p. 375.  

Ewald is disposed to think that even in the form in which we have the Commandments there are some marks of interpolation, and that the arch occasion and the fourth commandment were originally as briefly imperative as the sixth or seventh (Gesen. Is. ii. 206). The difference between the reason given in Ex. xx. 11 for the fourth commandment, and that stated to have been given in Deut. v. 15, makes
TEN COMMANDMENTS

Words were first given to the people surrounded them with a awe which attached to no other precept. In the midst of the cloud, and the darkness, and the flashing lightnings, and the fiery smoke, and the thunder, like the voice of a trumpet, Moses was called to receive the Law without which the people would cease to be a holy nation. Here, as elsewhere, Scripture unites two facts which men separate. God, and not man, was speaking to the Israelites in those terrors, and yet in the language of later inspired teachers, other instrumentality was not excluded. a The law was "ordained by angels" (Gal. iii. 19), "spoken by angels" (Heb. ii. 2), received as the ordinance of angels (Acts vii. 54). The agency of whom those whom the Psalmist connected with the winds and the flaming fire (Ps. civ. 4; Heb. i. 7) was present also on Sinai. And the part of Moses himself was, as the language of St. Paul (Gal. iii. 19) affirms, that of "a mediator." He stood "between" the people and the Lord, "to show them the word of the Lord" (Deut. v. 5), while they stood afar off, to give form and distinctness to what would else have been terrible and overwhelming. The "voice of the Lord" which they heard in the thunderings and lightnings, and the voice of a trumpet, "dividing the flames of fire" (Ex. xxi. 3–9), was for him a Divine word, the testimony of an Eternal will, just as in the parallel instance of John xii. 29, a like testimony led some to say, "it thundered," while others received the witness. No other words were proclaimed in like manner. The people shrank even from this nearness to the awful presence, even from the very echoes of the Divine voice. And the record was as exceptional as the original revelation. Of no other words could it be said that they were written as these were written, engraved on the Tables of Stone, not as originating in man's contrivance or sagacity, but by the power of the Eternal Spirit, by the "finger of God" (Ex. xxxi. 18, xxxii. 16; comp. note on TABLETNAILE).

(3.) The number Ten was, we can hardly doubt, itself significant to Moses and the Israelites. The received symbol, then, and at all times, of completeness (Bähr, Symbolik, i. 175–183), it taught the people that the Law of Jehovah was perfect (I's. xix. 7). The fact that they were written not on one, but on two tables, probably in two groups of five each (infra), taught men (though with some variations, from the classification of later critics) the great division of duties toward God, and duties toward our neighbor, which we recognize as the groundwork of every true moral system. It taught them also, five being the symbol of imperfection (Bähr, i. 183–187), how incomplete each set of duties would be when divorced from its companion. The recurrence of these unaltered in the Pentateuch is at once frequent and striking. Ezekiel (Ezech. xxiv. 12–21) is shown by a large induction how continually laws and precepts meet us in groups of five or ten. The numbers, it will be remembered, meet us again as the basis of all the proportions of the Talmud. [TEMPLE.] It would show an ignorance of all modes of Hebrew thought to exclude this symbolic aspect. We need not, however, shut out altogether what some writers (e. g. Grotius, De Decal. p. 36) have substituted for it, the connection of the Ten Words with a decimal system of numeration, with the ten fingers on which a man counts. Words which were to be the rule of life for the poor as well as the learned, the groundwork of education for all children, might well be connected with the simplest facts and processes in man's mental growth, and thus stamped more indelibly on the memory. b

(4.) In what way the Ten Commandments were to be divided has, however, been a matter of much controversy. At least four distinct arrangements present themselves.

(a.) In the received teaching of the Latin Church, resting on that of St. Augustine (Quaest. in Ex. 71. Ep. ad Januari. c. xi., De Decal. etc., etc.), the first Table contained three commandments, the second the other seven. Partly on mystical grounds, because the Tables thus symbolized the Trinity of Divine Persons, and the Eternal Sabbath, partly as seeing in it a true ethical division, he adopted this classification. It involved, however, and in part proceeded from an alteration in the received arrangement of the laws, not known to the ancient Hebrews, but known to later commentators, and consequently the Sabbath law appeared at the close of the First Table as the third, not as the fourth commandment. The completeness of the number was restored in the Second Table by making x separate (the ninth) command of the precept, "Thou shalt not covet thy neighbour's wife," which with us forms part of the tenth. It is an almost fatal objection to this order that in the First Table it confounds, where it ought to distinguish, the two sins of polytheism and idolatry: and that in the Second it introduces an arbitrary and meaningless distinction. The later theology of the Church of Rome apparently adopted it as seeming to prohibit image-worship only so far as it accompanied the acknowledgment of another God (Ustech. Tribünt. iii. 2, 29).

(b.) The familiar division, referring the first four to our duty toward God, and the six remaining to our duty toward man, is, on ethical grounds, simple and natural enough. If it is not altogether satisfying, it is because it fails to recognize the symmetry which gives to the number five so great a prominence, and, perhaps also, because it locks on the duty of the Fifth Commandment the point of view of modern ethics rather than from that of the ancient Israelites, and the first disciples of Christ (infra).

(c.) A modification of (c) has been adopted by later Jewish writers (Jonathan ben Uziel, Achen Ezra, Moses ben Nachman, in Sefuer, Thes. s. v. הגדנהו). Retaining the combination of the first and second commandments of the common order, they have made a new "word " of the opening declaration, "I am the Lord thy God which brought thee out of the land of Egypt, out of the house of bondage," and so have avoided the necessity of the subdivision of the tenth. The objection to this division is, (1) that it rests on no adequate

---

a Buxtorf, it is true, asserts that Jewish interpreters, with hardly an exception, maintain that "Deus verba Decalogi per se in immediate locutum esse" (Dict. de Decal. The language of Josephus, however (Ant. xv. i. 13–217) has shown by a large induction how continually laws and precepts meet us in groups of five or ten. The numbers, it will be remembered, meet us again as the basis of all the proportions of the Talmud. Temple. It would show an ignorance of all modes of Hebrew thought...

b Bähr, absorbed in symbolism, has nothing for this natural suggestion but two notes of admission (c.). The law of Shakespeare and the command of the Buddha is the law of Buddhism might have shown him how naturally men crave for a number that thus helps them. A true system was as little likely to ignore the natural craving as a false. (Comp. note in Ewald, Gesch. Isr. ii. 207.)
authority, and (2) that it turns into a single precept what is evidently given as the groundwork of the whole body of laws.

(6) Rejecting these three, there remains that recognized by the older Jewish writers, Josephus (iii. 6, § 6) and Philo (De Decal. i.), and supported also and thoughtfully by Kwell (Tev. Lev. ii. 238), which places five commandments in each Table; and thus preserves the portion and decal grouping which pervades the whole code. A modern jurist would perhaps object that this places the fifth commandment in a wrong position, that a duty to parents is a duty toward all other neighbors. From the Jewish point of view, it is believed, the place thus given to that commandment was essentially the right one. Instead of duties toward God, and duties toward our neighbors, we must think of the First Table as containing all that belonged to the *Elohim* of the Greeks, to the *Patera* of the Romans, duties i. e. with no corresponding rights, while the second deals with duties which involve rights, and come therefore under the head of *Justicia.* The duty of honoring, i. e. supporting, parents came under the former head. As soon as the son was capable of it, and the parents required it, it was an absolute, unconditional duty. His right to any maintenance from them had ceased. He acquired a reverence for and a love toward his father in heaven (Heb. xii. 2). He was to show piety (Heb. i. 26) to them (1 Tim. v. 4). What made the 'Corban' casuistry of the scribes so specially evil was, that it was, in this way, a sin against the piety of the First Table, not merely against the lower obligations of the second (Mark vii. 11; comp. Deut. xvi. 21). It at least harmonizes with this division that the second, third, fourth, and fifth commandments, all stand on the same footing as having special sanctions attaching to them, while the others that follow are left in their simplicity by themselves, as though the reciprocity of rights were in itself a sufficient ground for obedience.

(5.) To these Ten Commandments we find in the Samaritan Pentateuch an eleventh added:

"But the Lord thy God shall bring thee into the land of Canaan, whither thou goest to possess it, thou shalt set thee up two great stones, and shalt plaster them with plaster, and shalt write upon these stones all the words of this Law. Moreover, after that thou shalt have passed over Jordan, thou shalt set up those stones which I command thee this day, on Mount Gerizim, and thou shalt build there an altar to the Lord thy God, an altar of stones: thou shalt not lift up any iron thereon. Of unhewn stones thou shalt build that altar to the Lord thy God, and thou shalt offer on it burnt-offerings to the Lord thy God, and thou shalt sacrifice peace-offerings, and shalt eat them there, and thou shalt rejoice before the Lord thy God in that mountain beyond Jordan, by the way where the sun goeth down, in the land of the Canaanites that dwelleth in the plain country over against Gilgal, by the oak of Moreh, towards Shebon" (Walton, Bibl. Polyglott., p. 3209).

The absence of any distinct reference to the Ten Commandments in such as the *Pirke Abot* (= Maxims of the Fathers) is both strange and significant. One chapter (ch. v.) is expressly given to an enumeration of all the Scriptural facts which may be grouped in decades, the ten words of Creation, the ten generations from Adam to Noah, and from Noah to Abraham, the ten trials of Abraham, the ten plagues of Egypt, and the like, but the ten Divine words find no place in the list. With all their ostentation of profound reverence for the Law,

*"Thou shalt love thy neighbor as thyself," enumerates the last five commandments, but makes no mention of the fifth.*

A further confirmation of the truth of this division is found in Rom. xiii. 9. St. Paul, summing up the duties "briefly comprehended" in the one great Law, 202.
the teaching of the Rabbis turned on other points than the great laws of duty. In this way, as in others, they made void the commandments of God that they might keep their own traditions. — Compare Stanley, Jewish Church, Lect. vii., in illustration of many of the points here noticed. E. H. P.

* TENDER, as a verb, is used in 2 Macc. iv. 2 (A. V.) in the sense of "to care for." For similar examples, see Richardson's Dictionary. A.

TENT. Among the leading characteristics of the nomad races, those two have always been numbered, whose origin has been ascribed to Jashal the son of Lamech (Gen. iv. 20), namely, to tent-dwellers and keepers of cattle. The same may be said of the forefathers of the Hebrew race; nor was it until the return into Canaan from Egypt that the Hebrews became inhabitants of cities, and it may be remarked that the tradition of tent usage survived for many years later in the Tabernacle of Shiloh, which consisted, as many Arab tents still consist, of a walled enclosure covered with curtains (Mishna, Zebachim, xiv. 6; Stanley, S. of P. p. 233). Among tent-dwellers of the present day must be reckoned (1) the great Mongol and Tartar hordes of central Asia, whose tent-dwellings are sometimes of gigantic dimensions, and who exhibit more contrivance both in the dwellings themselves and in their method of transporting them from place to place than is the case with the Arab races (Marco Polo, Trav. pp. 128, 135, 211, ed. Bohn; Hor. i (ed. xxiv. 10; Gibbon, c. xxvi., vol. iii. 298, ed. Smith). (2.) The Bedouin Arabic tribes, who inhabit tents which are probably constructed on the same plan as those which were the dwelling-places of Abraham and of Jacob (Heb. xi. 9). A tent or pavilion on a magnificent scale, constructed for Potemkin Philadelphia at Alexandria, is described by Athenaeus, v. 196, foll. An Arab tent is minutely described by Burck.

Arab Tent (Layard).

...hand. It is called bilt, "a house," its covering consists of stuff, about three quarters of a yard broad, made of black goats' hair (Cant. i. 5; Shaw, Trav. p. 220), laid parallel with the tent's length. This is sufficient to resist the heaviest rain. The tent-poles, called amâd, or columns, are usually nine in number, placed in three groups, but many tents have only one pole, others two or three. The ropes which hold the tent in its place are fastened not to the tent-cover itself, but to loops consisting of a leather thong tied to the ends of a stick round which is twisted a piece of old cloth, which is itself sewed to the tent-cover. The ends of the tent-ropes are fastened to short sticks or pins, called veed or wayed, which are driven into the ground with a mallet (Judg. iv. 21). [PESC.] Round the back and sides of the tents runs a piece of stuff removable at pleasure to admit air. The tent is divided into two apartments, separated by a carpet partition drawn across the middle of the tent and fastened to the three middle posts. The men's apartment is usually on the right side of entering, and the women's on the left; but this usage varies in different tribes, and in the Mesopotamian tribes the contrary is the rule. Of the three side posts on the men's side, the first and third are called ged (hand); and the one in the middle is rather higher than the other two. Hooks are attached to these posts for hanging various articles (Gen. xviii. 10; Jud. xiii. 6; Niebuhr, Fag. i. 187; Layard, Nim. and Bab. p. 261). [PILLER.] Few Arabs have more than one tent, unless the family be augmented

---

* 1. אֲבֵאָז; אֶבֶן, אֶבֶן; tabernaculum, tentorium; often in A. V. "tabernacle."

2. אֲבֵעָן; אֶבֶן; tentorium; opposed to גַּל, "a house."

3. גַּל (gâlal), only once "tent" (2 Sam. xi. 7).

4. גַּל; אֲבֵעָן; לָעָנוּר; Aram: כַּל; whence, with art. prefixed, comes aleph (Span.) and "alcora" (Russell, Aleppo, i. 30); only once used (Num. xxv. 3).
by the families of a son or a deceased brother, or in case the wifes disgree, when the master pitches a tent for one of them adjoining his own. The separate tents of Sarah, Leah, Rachel, Zilpah, and Bilhah, may thus have been either separate tents or apartments in the principal tent in each case (Gen. xxiv. 67, xxxii. 33). When the pasture near an encampment is exhausted, the tents are taken down, packed on camels and removed (Is. xxviii. 12; Gen. xlv. 17, 22, 25). The beauty of an Arab encampment is noticed by Shaw (Proc. p. 221) see Xatr. xvi. 481, "together with men who cannot afford more complete tents, it is customary to hang a cloth from a tree by way of shelter. In choosing places for encampment, Arabs prefer the neighborhood of trees, for the sake of the shade and coolness which they afford (Gen. xviii. 4, 8; Nichbtur, l. c.). In observing the directions of the Law respecting the Feast of Tabernacles, the Rabbinical writers laid down as a distinction between the ordinary tent and the booth, succoth, that the latter must in no case be covered by a cloth, but he restricted to boughs of trees as its shelter (Succoth, i. 3). In hot weather the Arabs of Mesopotamia often strike their tents and betake themselves to sheds of reeds and grass on the bank of the river (Layard, Ninev. i. 195, note on xxvi. 10, 11). Voynr, Trav. i. 39; Layard, Nin. and Bab, pp. 174, 175; Nichbtur, Voy. i. l. c.). H. W. F.*

*As we might expect, the use of tents by the Hebrews, and their familiarity with nomadic life, became a fruitful source of illustration to the sacred writers. The pitching of the tent at night, the stretching out of the goat-skint roof, the driving of the tent-pins, and fastening the curtains, altogether conjure up the imagery of numerous passages. Lainh, referring to God as the Creator, says: "He stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in" (Is. xl. 22). The prophet, as he looks forward to a happier day for the people of God, says: "Thine eyes shall see Jerusalem a quiet habitation, a tabernacle that shall not be taken down; nor one of the stakes thereof shall ever be removed, neither shall any of the cords thereof be broken" (Is. xxxiii. 20). Again, in anticipation of accessions to their number, he exclaims: "Enlarge the place of thy tent, and stretch forth the curtains of thy habitations; spare not, lengthen thy cords and strengthen thy stakes; for thy son shall be made strong, the prince of many nations; and they shall rule over theundance of many nations" (Is. lv. 2). The taking down as well as putting up of the tent suggested instructive analogies to the Hebrew pilgrim. The traveller in the East erects his temporary abode for the night, takes it down in the morning, and journeys onward. The shepherds of the country are constantly moving from one place to another. The brook falls on which they had rested their water, or the grass required for the support of their flocks is consumed, and they wander to a new station. "There is something very melancholy," writes Lord Lindsay, "in our morning fillings. The tent-pins are plucked up, and in a few minutes a dozen holes, a heap or two of ashes, and the marks of the camels' knees on the ground, are all that is left of what had been, for a while, our home" (Letters from the Holy Land, p. 165). Hence, this rapid change of situation, this removal from one spot to another, without being able to foresee to-day where the wanderer will rest to-morrow, affords a striking image of man's life — so brief, fleeting, uncertain. Thus Ezekiel felt in the near prospect of death: "Mine age is departed, and is removed from me as a shepherd's tent" (Is. xxviii. 12). Jacob calls his life a pilgrimage (Gen. xlviii. 9), with reference to the same expectative idea. The body, as the temporary home of the soul, is called a "tent" or "tabernacle," because it is so frail and perishable. Thus Paul says, in 2 Cor. v. 1: "For we know that if our earthly house of this tabernacle (σπέραμα, θύσινος) were dissolved" ("taken down" is more correct), we have a building of God, an house not made with hands, eternal in the heavens." The Apostle Peter utters the same figure: "Yea, I think it meet, as long as I am in this tabernacle (σπέραμα), to stir you up, by putting you in remembrance; knowing that shortly I must put off this my tabernacle, even as our Lord Jesus Christ hath showed me" (2 Pet. i. 15).

The A. V. obscures many of the references to the tent-life of the patriarchs. Thus in Gen. xii. 9, where it is said, "Abraham journeyed, going on still," a stricter translation would be, "He pulled up," namely, his tent-pins, "going and pulling up," as he advanced from one station to another. So, in Gen. xxi. 13, instead of "Let us take our journey and go," it is literally, "Let us pull up the pins of our tents and let us go." See also Gen. xxxv. 21, xvi. 1; Ex. xiii. 20. For the tent of Kedor, see Kedah. H.*

* TENT-MAKERS (σπεραμαρια). According to the custom of his age and nation, that every male child should be taught some trade, the Apostle Paul had learned that of a tent-maker (Acts xviii. 3). It was not the weaving of the fabric of goats-skin, which, for the most part, was probably done by women in his native Cilicia, but the construction of the tents themselves from the cloth. Yet we need not suppose that Paul confined himself to the use of this particular fabric; for, in that case, he would not have found ready occupation in all places (see Hemen's Der Apostel Paulus, p. 52.) [Paul.] This was the occupation also of Aquila, with whom Paul worked at Corinth, as a means of support (Acts xviii. 3). R. D. C. R.**

TERAH (**τεραθ): Ῥαθα, Ραθα in Jos.; Alex. Ῥαθα, exc. Gen. xii. 28: Therec). The father of Abram, Nahor, and Haran, and through them the ancestor of the great families of the Israelites, Ishmael, of Ishmaelites, Halifs, Moabites, and Ammonites (Gen. xxii. 21-32). The account given of him in the O.T. narrative is very brief. We learn from it simply that he was an idolater (Josh. xxiv. 2), that he dwelt beyond the Emiprates in Ur of the Chaldees (Gen. xi. 28), and that in the southwesterly migration, which from some unexplained cause he undertook in his old age, he went with his son Abram, his daughter-in-law Sarai, and his grandson Lot, "to go into the land of Canaan, and they came unto Haran, and dwelt there" (Gen. xi. 31). And finally, "the days of Terah were two hundred and five years: and Terah died in Haran" (Gen. xi. 32). In connection with this last-mentioned event a chronological difficulty has arisen which may be noticed here. In the speech of Stephen (Acts vii. 4) it is said that the further migration of Abram from Haran to the land of Canaan did not take place till after his father's death. Now as Terah was 205 years old when he died, and Abram

** The Sam. text and version make him 150, and avoid this difficulty.
was 75 when he left Haran (Gen. xii. 4), it follows that, if the speech of Stephen I is correct, at Abram's birth Terah must have been 130 years old; and therefore that the order of his sons — Abram, Nahor, Haran — given in Gen. xi. 25, 26, is not their correct point of age. [See Litt. ii. 1660, note a.]

Lord Arthur Harvey says (General, pp. 82, 83), "The difficulty is easily got over by supposing that Abram, though named first on account of his dignity, was not the eldest son, but probably the youngest of the three, born when his father was 130 years old — a supposition with which the marriage of Nahor with his elder brother Haran's daughter, Milcah, at the age of 49, is shrewdly in keeping. Between Abram and Lot, and the three generations from Nahor to Rebecca corresponding to only two from Abraham to Isaac, are in perfect harmony." From the simple facts of 'Terah's' life recorded in the O. T. has been constructed the entire legend of Abram which is current in Jewish and Arabian traditions. Terah the idolater is turned into a maker of images, and 'Ur of the Chaldees' is the original of the 'burnt' into which Abram was cast (comp. Ez. x. 2).

Rashi's note on Gen. xii. 28 is as follows: "In the presence of Terah his father; in the lifetime of his father. And the Midrash Hagedah says that he died beside his father, for Terah had complained of Abram his son, before Nimrod, that he had broken his images, and he cast him into a furnace of fire. And Haran was sitting and saying in his heart, If Abram overcome I am on his side, and if Nimrod overcome I am on his side. And when Abram was saved they said to Haran, On whose side art thou? He said to them, I am on Abram's side. So they cast him into the furnace of fire and he was burned; and this is [what is meant by] 'Ur Kasdim (Ur of the Chaldees)." In Bevisch's Riddles (Par. 17) the story is told of Abram being left to sell idols in his father's stead, which is repeated in Well's Biblical Legends, p. 49. The whole legend depends upon the ambiguity of the word 'זוע', which signifies 'to make' and 'to serve or worship,' so that Terah, who in the Biblical narrative is only a worshipper of idols, is in the Jewish tradition an image-maker; and about this single point the whole story has grown. It certainly was unknown to Josephus, who tells nothing of Terah, except that it was grief for the death of his son Haran that induced him to quit Ur of the Chaldees (Ant. i. 6, § 6).

In the Jewish traditions Terah is a prince and a great man in the palace of Nimrod (Jellinek, Beth ha-Midrash, p. 27), the captain of his army (Stefer Haggadot), his son-in-law according to the Arabs (Beer, Levi Abraham, p. 97). His wife is called in the Talmud ('Beqa Bethra, ed. 91 a) Ameleki, or Enachai, the daughter of Carnoeh. In the book of the Jubilees she is called Edna, the daughter of Areui, or Aram; and by the Arabs Adra (D'Heriot, ed. Abraham, p. 97). According to D'Heriot, the name of Abraham's father was Azar in the Arabic traditions, and Terah was his grandfather. Elmukin, quoted by Hottinger (Scylymus Orientale, p. 281), says that, after the death of Yama, Abraham's mother, Terah took another wife, who bore him Sarah. He adds that in the days of Terah the king of Babylon made wider scope of age. [See Litt. ii. 1680, note a.]

Haran, the brother of Terah, went out against him and slew him; and the kingdom of Babylon was transferred to Nineveh and Mosul. For all these traditions, see the book of Josuah, and the works of Hottinger, D'Heriot, Weil, and Beer above quoted. Philo (De Souanis) indulges in some strange speculations with regard to Terah's name and his migration. W. A. W.

**TERTIUS** (Στερτιος, θεραφίμ, το θεραφίνιν, το θεραφίνιν, κατοικία, είδωλα, ειλιττα, δόμησις, ἀρώπος ευγενέσσια, θεραφίνι, θεραφίνινι, ἀλειπτήρα, εἰδωλολατρία, εἰδωλολατρία), only in plural, images connected with magical rites. The origin of teraphim has been fully discussed in Walckenaer (iii. 1743 ff.), and it is therefore unnecessary here to do more than repeat the results there stated. The derivation of the name is obscure. In one case a single statue seems to be intended by the plural (1 Sam. xix. 15, 16). The teraphim carried away from Laban by Rachel do not seem to have been very small; and the image (if one be intended), hidden in David's bed by Michal to deceive Saul's messengers, was probably of the size of a man, and perhaps in the head and shoulders, if not lower, of human or like form; but David's sleeping-room may have been a mere cell without a window, opening from a large apartment, which would render it necessary to do no more than fill the bed. Laban regarded his teraphim as gods; and, as he was permitted to take them with him, God, in the natural course of things, would no more appear that they were used by those who added corrupt practices to the patriarchal religion.

Teraphim again are included among M'kah's images, which were idolatrous objects connected with heretical corruptions rather than with heathen worship (Judg. xvii. 3, 5, xviii. 17, 18, 20). Teraphim were counselled for oracular answers by the Israelites (Zech. x. 2; comp. Judg. xviii. 5, 6; 1 Sam. xv. 22, 25, xix. 13, 16, 1 LXX.; and 2 K. xxiii. 24), and by the Babylonians, in the case of Nebuchadnezzar (Ex. xx. 23). There is no evidence that they were ever worshipped. Though not frequently mentioned, we find they were used by the Israelites in the time of the Judges and of Saul, and until the reign of Josiah, who put them away (2 K. xxiii. 4), and apparently again after the Captivity (Ez. xii. 2).

**TERESH** (Σερις, θεραφίμ, θεραφίμινι, Gen.): com. in Vat. and Alex.: FA. third hand has Θεραφίς, Θεραφίς (Theres): One of the two eunuchs who guarded the doors of the palace of the king, and whose plot to assassinate the king was discovered by Mordecai (Esth. ii. 21, vi. 2). He was hanged. Josephus calls him Theodotes (Ant. xi. 6, § 4), and says that the conspiracy was detected by Barmabanzus, a servant of one of the eunuchs, who was a Jew by birth, and who revealed it to Mordecai. According to Josephus, the conspirators were crucified.

**TERTIUS** (Τερτιος, Teritus): The amanuensis of Paul in writing the Epistle to the Romans (Rom. xvi. 22). He was at Corinth, therefore, and Conon, the port of Corinth, at the time when the Apostle wrote to the Church at Rome. It is noticeable that Tertius interrupts the message which Paul sends to the Roman Christians, and inserts a greeting of his own in the first person singular (παρακολουθείν εὐχαριστίαν). Both that circumstance and the frequency of the name among the Romans seems to show that Tertius was a Roman, and was known to those whom Paul salutes at the close of the letter. Secundus (Acts xx. 4) is another instance of the familiar usage of the Latin ordinal
employed as proper names. The idle pedantry which would make him and Silas the same person because tertius and τρεῖτος mean the same in Latin and Hebrew, hardly deserves to be mentioned (see Wolf, Curæ Philologicae, tom. iii. p. 251). In regard to the actual practice of writing letters from dictation, see Leckier's utilitas, p. 180. [Epist.-E.] Nothing certain is known of Tertullus apart from this passage in the Roman. No credit is due to the writers who speak of him as bishop of Leonium (see Fabriicius, Lib. Evangelii, p. 118). H. B. H.

TERTULLUS (Τέρτοςλος), a diminutive form from the Roman name Tertius, analogous to Lucius from Lucius, Fabullus from Fabius, etc., "a certain orator" (Acts xxiv. 1) who was retained by the high-priest and Sanhedrin to accuse the Apostle Paul at Caesarea before the Roman Procurator Antonius Felix. [Paul.] He evidently belonged to the class of professional orators, multitudes of whom were to be found not only in Rome, but in other parts of the empire, to which they had betaken themselves in the hope of finding occupation at the tribunals of the provincial magistrates. Both from his name, and from the great probability that the proceedings were conducted in Latin (see especially Milman, Romana Lectures for 1827, p. 185, note), we may infer that Tertullus was of Roman, or at all events of Italian origin. The Sanhedrin would naturally desire to secure his services on account of their own ignorance both of the Latin language and of the ordinary procedure of a Roman law-court.

The oration of his speech is designed to conciliate the good will of the Procurator, and is accordingly overcharged with flattery. There is a strange contrast between the opening clause — ὁ τετράρχης τοῦ Ἰουδαίου ἔργα ἐπιτέλεσεν — and the brief summary of the Procurator's administration given by Tertullus (Hist. v. 9): "Antonius Felix per omnem saevitiam usque Hildinem, jus regium servill insignio exercent." (comp. Tac. Ann. xii. 54). But the commendations of Tertullus were not altogether unfounded, as Felix had really succeeded in putting down the rabid political usurpations. The difficulty is not very easy to determine whether St. Luke has preserved the oration of Tertullus entire. On the one hand we have the elaborate and artificial opening, which can hardly be other than an accurate report of that part of the speech; and on the other hand we have a narrative which is so very dry and concise, that if there were nothing more, it is not easy to see why the orator should have been called in at all. The difficulty is increased if, in accordance with the greatly preponderating weight of external authority, we omit the words in ver. 6-8, καὶ κατὰ τὸν ἑλέσθον ... ἐργαζόμεν ἐκείνη. On the whole it seems most natural to conclude that the historian, who was almost certainly an eye-witness, merely gives an abstract of the speech, giving however in full the most salient points, and these which had the most forcibly impressed themselves upon him, such as the oration, and the character ascribed to St. Paul (ver. 5).

The doubtful reading in ver. 6-8, to which reference has already been made, seems likely to remain an unsolved difficulty. Against the external evidence there would be nothing to urge in favour of the emended passage, were it not that the statement which remains after its removal is not merely extremely brief (its brevity may be accounted for in the manner already suggested), but abrupt and awkward in point of construction. It may be added that it is easier ὁ τετράρχης τοῦ Ἰουδαίου ἔργα ἐπιτέλεσεν (ver. 8) to the Tribune Lysias than to Paul. For arguments founded on the words καὶ κατὰ ... καὶ κατὰ (ver. 6) — arguments which are dependent on the continuance of the disputed words — see Lardner, Critical History of the Gospel History, b. i. ch. 2; Bis-

TETRARCH (τέταρτος), properly the sovereign or governor of the fourth part of a province. On the use of the title in the Isthmus, Galatia and Syria, consult the Dictiinary of Greek and Roman Antiquities, "Tetrarch," and the authorities there referred to. In the later period of the
TETRARCH

and under the empire, the Romans seem to have used the title (as also those of eumarch and kypherarch) to designate these tributary princes who were not of sufficient importance to be called kings. In the New Testament we meet with the designation, either actually or in the form of its derivative tetrarchia, applied to three persons:

1. Herod Antipas (Matt. xiv. 1; Luke iii. 1, 19, ix. 7; Acts xiii. 1), who is commonly distinguished as "Herod the tetrarch," although the title of "king" is also assigned to him both by St. Matthew (xiv. 9) and by St. Mark (vi. 14, 22 ff.). St. Luke, as might be expected, invariably adheres to the formal title, which would be recognized by Gentile readers. Herod is described by the best named Evangelist (ch. iii. 1) as a "tetrarch of Galilee," but his dominions, which were bequeathed to him by his father Herod the Great, embraced the district of Perea beyond the Jordan (Joseph. Antiq. xvii. 3, § 1): this bequest was confirmed by Augustus (Joseph. B. J. ii. 6, § 3). After the division of the kingdom of Herod, Antipas' tetrarchy was added by Caligula to the kingdom of Herod Agrippa I. (Ant. xviii. 7, § 2). [HEROD ANTIPAS.]

2. Herod Philip (the son of Herod the Great and Cleopatra, not the husband of Herodias), who is said by St. Luke (ii. 1) to have been a "tetrarch of Iturea, and of the region of Trachonitis." Josephus tells us that his father bequeathed to him Trachonitis, Trachonitis, and Paneas (Ant. xvii. 8, § 1), and that his father's bequest was confirmed by Augustus, who assigned to him Batanea, Trachonitis, and Auranitis, with certain parts about Jamnia belonging to the "house of Herod" (B. J. ii. 6, § 3). Accordingly the territories of Philip extended eastward from the Jordan to the wilderness, and from the borders of Perea northward to Lebanon and the neighborhood of Damascus. After the death of Philip his tetrarchy was added to the province of Syria by Tiberius (Ant. xviii. 4, § 6), and subsequently conferred by Caligula on Herod Agrippa I, with the title of king (Ant. xviii. 6, § 10). [HEROD PHILIP I.; HEROD AGrippa I.]

3. Lysanias, who is said (Luke iii. 1) to have been a "tetrarch of Abilene," a small district surrounding the town of Abila, in the fertile valley of the Batara or Chrysorrhous, between Damascas and the mountain-range of Anti-Libanis. [ABILENE.] There is some difficulty in fixing the limits of this tetrarchy, and in identifying the person of the tetrarch. [LYSANIUS.] We learn, however, from Josephus (Ant. xvii. 6, § 10, xix. 5, § 1) that a Lysanias had been tetrarch of Abila before the time of Caligula, who added this tetrarchy to the dominions of Herod Agrippa I, an addition which was confirmed by the emperor Claudius.

It remains to inquire whether the title of tetrarch, as applied to these princes, had any reference to its etymological significance. We have seen that it was at this time probably applied to petty princes without any such determinate meaning. But it appears from Josephus (Ant. xvii. 11, § 4; B. J. ii. 6, § 3) that the tetrarchies of Anti-

THANK-OFFERING

pas and Philip were regarded as constituting each a fourth part of their father's kingdom. For we are told that Augustus gave one half of Herod's kingdom to his son Archelaus, with the appellation of eumarch, and with a promise of the regal title; and that he divided the remainder into the two tetrarchies. Moreover, the revenues of Archelaus, drawn from his territory, which included Judea, Samaria, and Bithynia, amounted to 400 talents, the tetrarchies of Philip and Antipas producing 200 talents each. We conclude that in these two cases, at least, the title was used in its strict and literal sense.

W. B. J.

THADDÆUS (Θαδδαῖος; Thaddæus), a name in St. Mark's catalogue of the twelve Apostles (Mark iii. 18) in the great majority of MSS. In St. Matthew's catalogue (Matt. x. 3) the corresponding place is assigned to Θαδδαίον by the Vatican MS. (B), and to Λεβάνος by the Codex Bezae (D). The Received Text, following the first correction of the Codex Ephraemi (C)—where the original reading is doubtful—as well as several cursive MSS., reads Λεβάνος or ἔκκλησις Θαδ- δαίος. We are probably to infer that Λεβάνος alone, is the original reading of Matt. x. 3, and Θαδδαίος of Mark iii. 18.3 By these two Evangelists the tenth place among the Apostles is given to Lebæus or Thaddæus, the eleventh place being given to Simon the Canaanite. St. Luke, in both his catalogues (Luke vi. 15; Acts i. 13), places Simon Zelotes tenth among the Apostles, and assigns the eleventh place to "Thelema Iacabism." As the other names recorded by St. Luke are identical with those which appear (though in a different order) in the first two Gospels, it seems scarcely possible to doubt that the three names of Judas, Lebæus, and Thaddæus were borne by one and the same person. [JUDE; LEUÆUS.]

W. B. J.

THAHASH (Tha'hash; Tô-hôs; Tho'hus), Son of Nahor by his concubine Reumah (Gen. xxiv. 24). He is called Thaňáos by Josephus (Ant. i. 6, § 6).

THAMÁKH (Thamack; Samar. daughter) (Thahâkk): Thamae (Thamar). The children of Thamath3 were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 53). The name elsewhere appears in the L. V. as TAMAI.

THAMÁMAR (Thama'mar). TAMAR I (Matt. i. 3).

THAMNATHA (Thamnatha; Thamnata). One of the cities of Judah fortified by Bochabeel after he had driven the Macedes over the Jordan (1 Macc. ix. 50). Thamnatha no doubt represents an ancient Thamnath, possibly the present Tînch, half-way between Jerusalem and the Mediterranean. Whether the name should be joined to Pharthath, which follows it, or whether they should be independent, is matter of doubt. [THANATHON.]

THANK-OFFERING, or PEACE-OFFERING (πρόθυσις, προύποιτος, or simply προύποιτος, and in Amos v. 22, ἴσπαρ : θυσία σαρπινός, σαρπινός, occasionally εἰσπραγχ : ἱστιν περιποίημα), reading in both places are sustained by Tischendorf in his eighth edition of the Greek New Testament.
The proper eucharistic offering among the Jews, in its theory resembling the **Meat-offerings**, and therefore indicating that the offering was already reserved to, and right belonged with, God. Its ceremonial is described in Lev. iii. The nature of the victim was left to the sacrificer: it might be male or female, of the flock or of the herd, provided that it was undeniably; the hand of the sacrificer was bid on its head, the fat burnt, and the blood sprinkled, as in the burnt-offering; of the ashes and the breast, and right shoulder, were given to the priest; the rest belonged to the sacrificer, to be eaten, either on the day of sacrifice, or on the next day (Lev. vii. 11-29, 31), except in the case of the firstlings, which belonged to the priest alone (xxii. 29). The setting of the flesh of the meat-offering was considered a partaking of the "table of the Lord," and on solemn occasions, as at the dedication of the Temple of Solomon, it was conducted on an enormous scale, and became a great national feast.

The peace-offerings, unlike other sacrifices, were not ordained to be offered in fixed and regular course. The meat-offering was regularly ordained as the eucharistic sacrificer; and the only constantly recognized and observed was that of the two firstlings brought at Pasch (Lev. xix. 19). The general principle of the peace-offering seems to have been, that it should be entirely spontaneous, offered as occasion should arise, from the feeling of the sacrificer himself; "if ye offer a sacrific of peace-offerings to the Lord, ye shall offer it at your own will" (Lev. xix. 5). On the first institution (Lev. vii. 11-17), peace-offerings are divided into "offerings of thanksgiving," and "vows or free-will offerings;" of which latter class the offering by a Nazarite, on the completion of his vow, is the most remarkable (Num. vi. 14). The very names of both divisions imply complete freedom, and show that this sacrifice differed from others, in being considered not a duty, but a privilege.

We find accordingly peace-offerings offered for the people on a great scale at periods of national solemnity or rejoicing: as at the first inauguration of the covenant (Ex. xxv. 4), at the first consecration of Aaron and of the Tabernacle (Lev. ix. 18), at the solemn reading of the Law in Canaan by Joshua (Josh. iv. 1, vi. 25), at the consecration of Solomon (1 Sam. viii. 15), at the bringing of the ark to Mount Zion by David (2 Sam. vii. 17), at the consecration of the Temple, and thrice every year afterwards, by Solomon (1 K. viii. 63, ix. 24), and at the great passover of Hezekiah (2 Chr. xxvii. 22). In two cases only (1 Sam. xxv. 26; 2 Sam. xxiv. 25) peace-offerings are mentioned as offered with burnt-offerings at a time of national sorrow and fasting. Here their force seems to have been precocious rather than eucharistic. [See SACRIFICE.]

A. B.

**THARA** (θαρά): Sheerah. A. B.

**THARSHISH** (thèr'fis) [prob. fortress, Dict.]: [Rom. θαρσίς: Vat. Alex.] θαρσίς: *Tharsis*. 1. In this more accurate form the translators of the A. V. have given in two passages (1 K. x. 22, xxv. 48) the name elsewhere presented as TARSUS. In the second passage the name is omitted in both MSS. of the LXX., while the Vulgate has in mori.

2. [([Rom. θαρσίς: Vat. Alex.] θαρσίς: *Tharsis*)] A Benjamite, one of the family of Bilhan and the house of Jedid (1 Chr. vii. 10 only). The variation in the Vatican LXX. (May) is very remarkable.

**THASSI** (θασσί): [Sin. θασσίς: Alex.] θασσί: *Thaissi*. The surname of Simon the son of Mattathias (1 Mac. ii. 27). [Mai. ib. b. 1711.] The derivation of the word is uncertain. Michaelis suggests τάξις, Chal. "the fresh grass springs up," i.e. "the spring is come," in reference to the tranquility first secured during the supremacy of Simon (Grimm, *Ad 1 Mac. ii. 3*). This seems far-fetched. Winer (Realeh. "Simon") suggests a connection with τάξις, *ferreus*, as Gratias (ad loc.) seems to have done before him. In Josephus (*Ant.* xii. 6, § 1) the surname is written *Matthias*, with various readings τάσσεσθαι, τάσσης.

B. F. W.

**THEATRE** (θεάτρον: theatre). For the general subject, see Dict. of Ant. pp. 995-998. For the explanation of the Biblical allusions, two or three points only require notice. The Greek term, like the corresponding English term, denotes the place where dramatic performances are exhibited, and also the scene of performance which is witnessed there. It occurs in the first or broad sense in Acts xix. 29, where it is said that the multitude at Ephesus rushed to the theatre, on the occasion of the excitement stirred up against Paul and his associates by Demetrius, in order to consider what should be done in reference to the charges against them. It may be remarked also that although the word does not occur in the original text or in our English version it that it was in the theatre at Cesarea that Herod Agrippa I gave audience to the Tyrian deputies, and was himself struck with death, because he heard so gladly the impious accusations of the people (Acts xxii. 21-23). See the remarkably confirmatory account of this event in Josephus (Ant. xix. 8, § 2). Such a use of the theatre for public assemblies is found also in the passage of Sallust known among the Romans, was a common practice among the Greeks. Thus Vater. Maxim. ii. 2: "Legati in theatrum, ut est concordiae Graeciae, introducunt." Justin xxii. 2: "Veluti reipublicae statum fundamenta in theatrum ad continentiam occuri justi." Corn. Nep. Tionel, § 2: "Veniunt in theatrum, cum libi concilium plebis haberetur." The other sense of the term "theatre" occurs in 1 Cor. iv. 9, where the Common Version renders: "God hath set forth us as Apostles last, as it were appointed to death: for we are made rather, {we are made, θεάτριον} εγερθησανς α επαναλήψεως το θεά των ματαιων, as in Timothy, Cranmer, and the Geneva version. But the latter would be now inappropriate, if it includes the idea of scorn or humiliation, since the angels look down upon the sufferings of the martyrs with a very different interest. Whether "theatre" denotes more here than to be an object of earnest attention (δείγμα), or refers at the same

---

**THARA** (θάρα): The proper eucharistic offering among the Jews, in its theory resembling the Meats-offerings, and therefore indicating that the offering was already reserved to, and right belonged with, God. Its ceremonial is described in Lev. iii. The nature of the victim was left to the sacrificer: it might be male or female, of the flock or of the herd, provided that it was undeniably; the hand of the sacrificer was bid on its head, the fat burnt, and the blood sprinkled, as in the burnt-offering; of the ashes and the breast, and right shoulder, were given to the priest; the rest belonged to the sacrificer, to be eaten, either on the day of sacrifice, or on the next day (Lev. vii. 11-29, 31), except in the case of the firstlings, which belonged to the priest alone (xxii. 29). The setting of the flesh of the meat-offering was considered a partaking of the "table of the Lord," and on solemn occasions, as at the dedication of the Temple of Solomon, it was conducted on an enormous scale, and became a great national feast.

The peace-offerings, unlike other sacrifices, were not ordained to be offered in fixed and regular course. The meat-offering was regularly ordained as the eucharistic sacrificer; and the only constantly recognized and observed was that of the two firstlings brought at Pasch (Lev. xix. 19). The general principle of the peace-offering seems to have been, that it should be entirely spontaneous, offered as occasion should arise, from the feeling of the sacrificer himself; "if ye offer a sacrific of peace-offerings to the Lord, ye shall offer it at your own will" (Lev. xix. 5). On the first institution (Lev. vii. 11-17), peace-offerings are divided into "offerings of thanksgiving," and "vows or free-will offerings;" of which latter class the offering by a Nazarite, on the completion of his vow, is the most remarkable (Num. vi. 14). The very names of both divisions imply complete freedom, and show that this sacrifice differed from others, in being considered not a duty, but a privilege.

We find accordingly peace-offerings offered for the people on a great scale at periods of national solemnity or rejoicing: as at the first inauguration of the covenant (Ex. xxv. 4), at the first consecration of Aaron and of the Tabernacle (Lev. ix. 18), at the solemn reading of the Law in Canaan by Joshua (Josh. iv. 1, vi. 25), at the consecration of Solomon (1 Sam. viii. 15), at the bringing of the ark to Mount Zion by David (2 Sam. vii. 17), at the consecration of the Temple, and thrice every year afterwards, by Solomon (1 K. vii. 63, ix. 25), and at the great passover of Hezekiah (2 Chr. xxvii. 22). In two cases only (1 Sam. xxv. 26: 2 Sam. xxiv. 25) peace-offerings are mentioned as offered with burnt-offerings at a time of national sorrow and fasting. Here their force seems to have been precocious rather than eucharistic. [See SACRIFICE.]
THEBES

H. B. 11.

* The taste for theatrical amusements was never strongly developed among the Jews, though some of their later rulers, especially the Herods, favored them, and established theatres in Palestine. Herod the Great introduced Greek actors at his court in Jerusalem, and gave him the scandal of the Jews, which is says in which Christians are viewed as running a race, and not the theatre or stage where the eyes of the spectators are fixed on them.

II.

THEBES (Τῆβαις, Δωμοτολο), απο Αιγύπτιος: in Jér. τον ἑαυτὸν τοῖς ἐκεί: Aristot., N. pop. 10 τούτος Ἀλεξανδρινός, Νο. Αμονος: A. V., No. the multitude of Νο. polybeans. A chief city of ancient Egypt, long the capital of the upper country, and the seat of the Heliopolitan dynasty, which ruled over all Egypt at the era of its highest splendor. Upon the monuments this city bears three distinct names — that of the Nome, a sacred name, and the name by which it is commonly known in profane history. Of the twenty Nomoi or districts into which Upper Egypt was divided, the fourth in order, proceeding northward from Nubia, was designated in the hieroglyphics as Ζούν — the Phthiakite of the Greeks — and Thebes appears as the "Zoonicity," the principal city or metropolis of the Zoon Nome. In history, the name Zou or Zoon was applied in common speech to a particular locality on the western side of Thebes.

The sacred name of Thebes was P'μοι, "the abode of Amon," which the Greeks reproduced in their Dionysos (Διός πάρις), especially with the addition the great θης μεγαλη, denoting that it was the chief seat of Jupiter-Amon, and distinguishing it from Dionysia the Less (Acts 19:13). No-Amon is the name of Thebes in the Hebrew Scriptures (Jer. xlv. 25; Nah. iii. 8). Ezekiel uses No simply to designate the Egyptian seat of Zeus, which the Septuagint translates by Dionysopolis (Ex. xxx. 14). Genesis defines this name by the phrase "portion of Amon," i.e. the possession of the god Amun, as the chief seat of his worship.

The name of Thebes in the hieroglyphics is explained under No-Amon.

The origin of the city is lost in antiquity. Niebuhr is of opinion that Thebes was much older than Memphis, and that "after the centre of Egyptian life was transferred to Lower Egypt, Memphis acquired its greatness through the ruin of Thebes." (Lecture on Ancient History, Lect. xvi.) Other authorities assign priority to Memphis. But both cities date from our earliest authentic knowledge of Egyptian history. The first allusion to Thebes in classical literature is the family passage of the Iliad (ix. 385-388): "Egyptian Thbes, where are vast treasures laid up in the houses: where are a hundred gates, and from each two hundred men go forth with horses and chariots." Homer—speaking with a poet's license, and not with the accuracy of a statistician — no doubt incorporated into his verse the gloating accounts of the Egyptian capital current in his time. Wilkinson thinks it conclusive against a literal understanding of Homer, that no traces of an ancient city wall can be found at any point as probable the suggestion of Diodorus Siculus that the "gates" of Homer may have been the propylaea of the temples: "Non centum portas habuisse urbem, sed multa et ingenium templum vestibula" (i. 45, 7). In the time of Diodorus, the city-wall, if any there was, had already disappeared, and the question of its existence in Homer's time was in dispute. But, on the other hand, to regard the "gates" of Homer as temple porches is to make these the barracks of the army, since from these gates the horsemen and chariots issue forth to war. The most universal custom of walking the cities of antiquity, and the poet's reference to the gates as pouring forth troops, point strongly to the supposition that the vast array of Thebes was surrounded with a wall having many gates.

Homer's allusion to the treasures of the city, and to the size of its standing army, numbering 20,000 chariots, shows the early repute of Thebes for wealth and power. Its fame as a great capital had crossed the sea when Greece was yet in its infancy as a nation. It has been questioned whether Herodotus is right in saying (Diod. v. 40), "Thebes was the second city of the Greeks," but says, "I went to Helipolis and to Thebes, expressly to try whether the priests of these places would agree in their accounts with the priests of Memphis." (Herod. ii. 37.) Afterwards he describes the features of the Nile valley, and the chief points and distances upon the river, as only an eye-witness would be likely to record them. He informs us that from Helipolis to Thebes is nine days sail up the river, the distance 4000 stadia . . . and the distance from the sea inland to Thebes 6120 stadia." (Herod. ii. 8, 9.) In chap. 29 of the same book he states that he ascended the Nile as high as Elephantine. Herodotus, however, gives no particular account of the city, which in his time had lost much of its ancient grandeur. He alludes to the temple of Jupiter there, with its ram-headed image, and to the fact that goats, never sheep, were offered in sacrifice. In the 1st century before Christ, Diodorus visited Thebes, and he devotes several sections of his general work to its history and appearance. Though he saw the city when it had sunk to quite secondary importance, he preserves the tradition of its early grandeur — its circuit of 140 stadia, the size of its public edifices, the magnificence of its temples, the number of its monuments, the dimensions of its private houses, some of them four or five stories high — all giving it an air of grandeur and beauty surpassing not only all other cities of Egypt, but of the world. Diodorus deplores the spoiling of its buildings and monuments by Cambyses (Diod. i. 45, 46). Strabo, who visited Egypt a little later — at about the beginning of the Christian era — thus describes (xiv. 816) the city under the name Dionsopolis: "Vestiges of its magnitude still exist which extend 80 stadia
Thebes

In length. There are a great number of temples, many of which Canbysses mutilated. The spot is at present occupied by villages. One part of it, in which is the city, lies in Arabi; another is in the country on the other side of the river, where i-th Memoiimun. Strabo here makes the Nile the dividing line between Libya and Arabi. The temples of Karnak and Luxor are on the eastern side of the river, where was probably the main part of the city. Strabo gives the following description of the twin colossi still standing upon the western plain: "Here are two colossal figures near one another, each consisting of a single stone. One is eminently like a human face, the other, like a lion's. From these the country conceives, producing Strabo. When skepticismrising, unobserved upon the chair, are fallen down - the effect, it is said, of an earthquake. It is believed that once a day a noise, as of a slight blow, issues from the part of the statue which remains in the seat, and on its base. When I was at those places, with Khins tallins, and numerous friends and soldiers about him, I heard a noise at the first hour of the day, but whether proceeding from the last, or from the colossus, or produced on purpose by some of those standing around the base, I cannot confidently assert. For, from the uncertainty of the cause, I am inclined to believe anything rather than that the stones disposed in that manner could send forth sound (xxvii. § 46). Simple, honest, skeptical Strabo! Eight centuries later, the present writer interrogated these same stones as to the ancient mystery of sound; and not at sunrise, but in the glaring noon, the statue emitted a sharp, clear sound like the ringing of a disc of brass under a sudden concussion. This was produced by a ragged urchin, who, for a few pistoles, champed up the knees of the "sacred Memnon," and there effectually concealing himself from observation, struck with a hammer a sonorous stone in the lap of the statue. Wilkinson, who was one of the first to describe this sounding stone, conjectures that the priests had a secret chamber in the body of the statue, from which they could strike it unobserved at the instant of surprise: thus producing in the cushions multitude the notion of an effigy of man, or even the whole body. To conceive, however, that such a trick, performed in open day, could have escaped detection, and we are therefore left to share the mingled wonder and skepticism of Strabo (see Wilkinson; also Thompson's Photographic Views of Egypt, Past and Present, p. 156)." 

Pliny speaks of Thebes in Egypt as known to fame as "a hanging city," i.e., built upon arches, so that an army could be led forth from beneath the city while the inhabitants above were wholly unconscious of it. He means also that the river flows through the middle of the city. But he questions the story of the arches, because "if this had really been the case, there is no doubt that Homer would have mentioned it, seeing that he has celebrated the hundred gates of Thes. Do not the two stories possibly explain each other? May there not have been near the river-line arches buildings used as barracks, from whose gateways issued forth 20,000 chariots of war?"

But, in the uncertainty of these historical allusions, the memorial of Thes. are the most reliable witnesses for the ancient grandeur of the city. These are found in almost equal proportions upon both sides of the river. The parallel ridges which skirt the narrow Nile valley upon the east and west from the northern limit of Upper Egypt, here sweep outward upon either side, forming a circular plain whose diameter is nearly ten miles. Through the centre of this plain flows the river, usually at this point about half a mile in width, but at the inundation overflowing the plain, especially upon the western bank, for a breadth of two or more miles. Thus the two colossal statues, which are several hundred yards from the bed of the low Nile, have accumulated about their bases alluvial deposit to the depth of seven feet.

The plan of the city, as indicated by the principal monuments, was nearly quadrangular, measuring two miles from north to south, and four from east to west. The two colossal statues, which are south of Luxor upon the eastern or Arabian side, and Qoornah and Medeueet Hasso upon the western or Libyan side. There are indications that each of these temples may have been connected with those facing it upon two sides by grand avenues, lined with sphinxes and other colossal figures. Upon the western bank there was almost a continuous line of temples and palaces for a distance of two miles, from Qoornah to Medeueet Hasso; and Wilkinson conjectures that from a point near the latter, perhaps in line of the colossal, the "Royal Street" ran down to the river, which was crossed by a ferry terminating at Luxor on the eastern side. The recent excavations and discoveries of M. Mariette in course of completing his plan may enable us to restore the ground-plan of the city and its principal edifices with at least proximate accuracy.

It does not enter into the design, nor would it fall within the limits of this article, to give a minute description of these stupendous monuments. Not only are verbal descriptions everywhere accessible through the pages of Wilkinson, Kneriek, and other standard writers upon Egypt, but the magnificently illustrated work of Lepsius, already completed, the companion work of M. Mariette, just referred to, and multiplied photographs of the principal ruins, are within easy reach of the scholar through the munificence of public libraries. A mere outline of the groups of ruins may be sufficient to convey to the initiated an idea of the size and grandeur. The magnificence of the western bank, the first conspicuous ruins are those of a palace temple of the nineteenth dynasty, and therefore belonging to the middle style of Egyptian architecture. It bears the name Menepthahemun, suggested by Champollion because it appears to have been founded by Menepthah (the Osire of Wilkinson), though built principally by his son, the great Rameses. The plan of the building is much obscured by mounds of rubbish, but some of the bas-reliefs are in a fine state of preservation. There are traces of a dromos, 128 feet in length, with sphinxes, whose fragments here and there remain. This building stands upon a slight elevation, nearly a mile from the river, in the now deserted village of old Qoornah.

Nearby a mile southward from the Menepthahemun are the remains of the combined palace and temple known since the days of Strabo as the Memnonium. An examination of its sculptures shows that this name was inaccurately applied, since the building was clearly erected by Rameses II. Wilkinson suggests that the title Memnon attached to the name of this king misled Strabo in his designation of the building. The general form of the Memnonium is that of a parallelogram in three main sections, the interior areas being successively narrower than the first court, and the whole ter
minating in a series of sacred chambers beautifully sculptured and ornamented. The proportions of this building are remarkably fine, and its remains are in a sufficient state of preservation to enable one to reconstruct its plan. From the first court or area, nearly 180 feet square, there is an ascent by steps to the second court, 140 feet by 179. Upon three sides of this area is a double colonade, and on the south side a single row of Osiride pillars, facing a row of like pillars on the north. The other columns are circular. Another ascent leads to the hall, 100 + 133, which originally had 48 huge columns to support its solid roof. Beyond the hall are the sacred chambers. The historical sculptures upon the walls and columns of the Memnonium are among the most finished and legal of the Egyptian monuments. But the most remarkable feature of these ruins is the gigantic statue of Rameses III, once a single block of syenite carved to represent the king upon his throne, but now scattered in fragments upon the floor of the first hall. The weight of this statue has been computed at 887 tons, and its height at 77 feet. By measurement of the fragments, the writer found the body 51 feet around the shoulders, the arm 11 feet 6 inches from shoulder to elbow, and the foot 10 feet 10 inches in length, by 4 feet 8 inches in breadth. This stupendous monolith must have been transported at least a hundred miles from the quarries of Assouan. About a third of a mile further to the south are the two colossal statues already referred to, one of which is familiarly known as "the vocal Memnon." The height of each figure is about 53 feet above the plain.

Proceeding again toward the south for about the same distance, we find at Medeinet Habu ruins upon a more stupendous scale than at any other point upon the western bank of Thebes. These consist of a temple founded by Thothmes I, but which also exhibits traces of the Phoenician architecture in the shape of pyramidal towers, gateways, colonnades and vestibules, inscribed with the memorials of the Roman era in Egypt. This temple, even with all its additions, is comparatively small; but adjacent to it is the magnificent

Plan of Memnonium

Hall of Columns in the Memnonium

A temple known as the southern Ramesesion the palace temple of Rameses III. The general plan of this building corresponds with those above described; a series of grand courts or halls adorned with columns, conducting to the inner pavilion of the king or sanctuary of the god. The second court is one of the most remarkable in Egypt for the massiveness of its columns, which measure 24 feet in height by a circumference of nearly 23. Within this area are the fallen columns of a Christian church, which once established the worship of the true God in the very sanctuary of idols and amid their sculptured images and symbols. This temple presents some of the grandest effects of the old Egyptian architecture, and its battle-scenes are a valuable contribution to the history of Rameses III.

Behind this long range of temples and palaces are the Liyan hills, which, for a distance of five miles, are excavated to the depth of several hundred feet for sepulchral chambers. Some of these are of vast extent—one tomb, for instance, having a total area of 22,217 square feet. A retired valley in the mountains now known by the name of Medmor seems to have been appropriated to the sepulchres of kings. Some of these, in the number and variety of their chambers, the finish of their sculptures, and the beauty and freshness of their frescoes, are among the most remarkable monuments of Egyptian grandeur and skill. It is from the tombs especially that we learn the manners and customs of domestic life, as from the temples we gather the records of dynasties and the history of battles. The preservation of these sculptured and pictorial records is due mainly to the dryness of the climate. The sacredness with which the Egyptians regarded their dead preserved these mountain catacombs from molestation during the long succession of native dynasties, and the sealing up of the entrance to the tomb for the concealment of the sarcophagi from human observation until its mummmied occupant should resume his long-suspended life, has largely secured the city of the dead from the violence of invaders and the ravages of time. It is from the adoraments of these subterranean tombs, often distinct and fresh as when prepared by the hand of the artist, that we derive our principal knowledge of the manners and customs of the Egyptians. Herodotus himself is not more minute and graphic than these silent but most descriptive walls. The illustration and confirmation which they bring to the sacred narrative, so we, discussed by Hengstenberg, Osborn, Poole, and others, is capable of much ampler treatment than it has yet received. Every incident in the pastoral and agricultural life of the Israelites in Egypt and in the exactions of their servitude, every art employed in the fabrication of the tabernacle in the wilderness, every allusion to Egyptian rites, customs, laws, finds some counterpart or illustration in this picture-history of Egypt; and whenever the Theban cemetery shall be thoroughly explored, and its symbols and hieroglyphics fully interpreted by science, we shall have a commentary of unrivalled interest and value upon the books of Exodus and Leviticus, as well as the later historical books of the Hebrew Scriptures. The art of photography is already contributing to this result by furnishing scholars with materials for the study of the pictorial and monumental records of Egypt.

The eastern side of the river is distinguished by
THEBES

the remains of Luxor and Karnak, the latter being of itself a city of temples. The main colonnade of Luxor faces the river, but its principal entrance looks northerly towards Karnak, with which it was originally connected by a dromos 6,000 feet in length, lined on either side with sphinxes. At this entrance are two gigantic statues of Rameses II, one upon each side of the grand gateway; and in front of these formerly stood a pair of beautifully wrought obelisks of red granite, one of which now graces the Place de la Concorde at Paris.

The approach to Karnak from the south is marked by a series of massive gateways and towers, which were the appendages of later times to the original structure. The temple properly faces the river, i.e. toward the northwest. The courts and propylaea connected with this structure occupy a space nearly 1,800 feet square, and the buildings represent almost every dynasty of Egypt, from Neosoutern I. to Ptolemy Euergetes I. Courts, pylons, obelisks, gates, statues, pillars, everything pertaining to Karnak, are on the grandest scale. Nearest the river is an area measuring 257 feet by 328, which once had a covered corridor on either side, and a double row of columns through the centre, leading to the entrance of the hypostyle hall, the most wonderful monument of Egyptian architecture. This grand hall is a forest of sculptured columns; in the central avenue are twelve, measuring each 66 feet in height by 12 in diameter, which formerly supported the most elevated portion of the roof, answering to the clerestory in Gothic architecture; on either side of these are seven rows, each column nearly 42 feet high by 9 in diameter, making a total of 134 pillars in an area measuring 170 feet by 330. Most of the pillars are yet standing in their original site, though in many places the roof has fallen in. A moonlight view of this hall is the most weird and impressive scene to be witnessed among all the ruins of antiquity — the Colosseum of Rome not excepted.

With our imperfect knowledge of mechanic arts among the Egyptians, it is impossible to conceive how the outer wall of Karnak — forty feet in thickness at the base, and nearly a hundred feet high — was built; how single blocks weighing several hundred tons were lifted into their place in the wall, or hewn into obelisks and statues to adorn its gates; how the massive columns of the Grand Hall were quarried, sculptured, and set up in mathematical order; and how the whole stupendous structure was reared as a fortress in which the memory of the civilization of the world, as it were petrified or fossilized in the very flower of its strength and beauty, might defy the desolations of war, and the decay of centuries. The grandeur of Egypt is here in its architecture, and almost every pillar, obelisk, and stone tells its historic legend of her greatest monarchs.

We have alluded, in the opening of this article, to the debated question of the priority of Thebes to Memphis. As yet the data are not sufficient for its satisfactory solution, and Egyptologists are not agreed. Upon the whole we may conclude that before the time of Memes there was a local sovereignty in the Thebaid, but the historical nationality of Egypt dates from the founding of Memphis. It is likely that the most ancient Memes and Thebes differed in their representations of early history, and that each sought to extol the glory of their own city. The history of Herodotus turns about Memphis as a centre; he mentions Thebes only incidentally, and does not describe or allude to one of its monuments — Ptolemies, on the contrary, is full in his description of the monuments of Thebes, and says little of Memphis. But the distinction of Upper and Lower Egypt exists in geological structure, in language, in religion, and in historical tradition' (Kenrick).

A careful digest of the Egyptian and Greek authorities, the Turin papyri, and the monumental tablets of Abydos and Karnak, gives this general outline of the early history of Egypt: That before Memphis was built, the nation was mainly confined to the valley of the Nile, and subdivided politically into several sovereignties, of which Thebes was one; that Memes, who was a native of This in the Thebaid, centralized the government at Memphis, and united the upper and lower countries; that Memphis retained its preeminence, even in the hereditary succession of sovereigns, until the twelfth and thirteenth dynasties of Manetho, when Dissolutely kings appear in his lists, who brought Thebes into prominence as a royal city; that when the Shepherd or Hyksos, a nomadic race from the east, invaded Egypt and fixed their capital at Memphis, a native Egyptian dynasty was maintained at Thebes, at times tributary to the Hyksos, and at times in military alliance with them; that, when the Hyksos were expelled, and Thebes became the capital of all Egypt under the resplendent eighteenth dynasty. This was the golden era of the city as we have already described it from its monuments. The names and deeds of the Thothmes and the Amenophis figure upon its temples and palaces, representing its wealth and grandeur in architecture, and its process in arms. Then it was that Thebes extended her sceptre over Libya and Ethiopia on the one hand, and on the other over Syria, Media, and Persia; so that the walls of her palaces and temples are crowded with battlescenes.
THEBES

in which all contiguous nations appear as captives or as suppliants. This supremacy continued until the close of the nineteenth dynasty, or for a period of more than five hundred years; but under the twentieth dynasty—the Diospolitan house of Ramesses numbering ten kings of that name—the glory of Thebes began to decline, and after the close of that dynasty the name no more appears in the lists of kings. Still the city was retained as the capital, in whole or in part, and the achievements of Shishonk the Bullsteater, of Tirhakah the Ethiopian, and other monarchs of celebrity, are recorded upon its walls. The invasion of Palestine by Shishonk is graphically depicted upon the outer wall of the grand hall of Karnak, and the names of several towns in Palestine, as well as the general name of "the land of the king of Judah," have been deciphered from the hieroglyphics. At the later invasion of Assur by Sennacherib, we find Tirhakah, the Ethiopian monarch of the Thebaid, a powerful ally of the Jewish king. But a century later, Ezekiel proclaims the destruction of Thebes by the arm of Babylon: "I will execute judgments in Nubia," he says, "and cut off the multitude of No, and Pharaoh, with their gods and their kings." The Persian invader completed the destruction that the Babylonians had begun; the hammer of Cambyses levelled the proud statue of Ramesses, and his torch consumed the temples and palaces of the city of the hundred gates. No-Amun, the shrine of the Egyptian Jupiter, "that was situate among the rivers, and whose rampart was the sea," sunk from its metropolitan splendor to the position of a mere provincial town; and, notwithstanding the spasmodic efforts of the Ptolemies to revive its ancient glory, became at last only the desolate and ruined sepulchre of the empire it had once embodied. It lies to-day a nest of Arab hovels amid crumbling columns and driftings sand.

* Three names of Thebes are made prominent in the hieroglyphic monuments of the city. The first is the sacerdotal name 𓇪𓊣𓊚𓎛𓏫𓏢𓎜𓏫 𓎠𓏫𓎚𓏫𓏥, the abode of Re. The second is 𓇨𓊣𓊚𓎛𓏫𓏢𓎜𓏫 𓏩𓏫𓎚𓏫𓏥, which corresponds even more exactly with the title 𓏩𓏫𓎚𓏫𓏥, which is found in the sallier Papyrus, No. Xl. Ill., showing that the Hebrew prophets used a well-known designation of the city. At Thebes Ammon was worshipped preeminently under the type of the sun.

A second designation of Thebes was the city of Ap-tu. Some have attempted to derive the name Thebes from this title, thus: "Tek-iptes, or more simply Tek-ipt, by contraction Typt, which the Greeks softened into Ṣebes. But this derivation is hypothetical, and at best it seems plain from the hieroglyphics that the name Ap-tu was given to but a single quarter of ancient Thebes, — a section of the eastern bank embracing the great temple of Karnak. The name Ap-tu has not been found upon any monument of the old empire.

There is a third designation, or perhaps more properly a representation, of the city in the hieroglyphics, from which it is conjectured that the Greeks derived its name. This capital is pictured as a martial city, thoroughly equipped, and armed with divine power for dominion over all nations. These symbols give the name Oε, which with the feminine article becomes Θέος or Θέβε, which appears in the Greek form Θῆβαι. Θεός and not Άπετ, was the city of Ammon, who dwelt in Ap-tu, which was probably the great temple of Karnak.

The foregoing is the substance of a monograph by Mons. F. Chatel, entitled Recherches sur le nom égyptien de Thébais, and is the latest contribution to the literature of the subject.

The explorations of M. Mariette-Bey, M. Dümichen, and others, have brought to light some curious memorials of Thebes that serve to illustrate its ancient history and renown, and to verify the surviving fragments of its literature. The Abbot papyrus relates to the conviction and punishment of a lord of robbers that in the reign of Ramesses IX. spoiled the necropolis of Thebes of treasures deposited in tombs of the priestesses of Ammon and in the royal sepulchres. In the vicinity of Gournah, M. Mariette has identified three of ten royal tombs named in the papyrus. This fixes definitely the quarter of the city referred to in the papyrus.

M. Mariette's excavations within the temple of Karnak have restored to the eye of scholars valuable inscriptions that had long been hidden under the sand. In particular he has restored as far as possible the famous Annals of Thothmes III., from the sanctuary which that monarch built in the centre of the great temple as a memorial of his victories. Under the date of each year of this inscription follows a narrative of the wars and expeditions of the year, which is followed by an enumeration of the spoils. The minute accuracy of these returns may be judged by an example of the tribute paid by Cush: gold, 154 pounds 2 ounces; slaves, male and female, 134; beef-cattle, young, 114; buffaloes, 365; total 419, e. These at once shed light upon ancient geography, and upon the Biblical and other accounts of the wars of Egypt in the East. From one hundred and fifteen names we inscribe Arabia, Cush, Ezlon, Gaza, Megiddo, Mesopotamia, Nineveh, Taanak, in the list of battle or conquest. In one inscription it is stated that the king set up a monument in Mesopotamia to mark the eastern boundary of Egypt.

The commerce of antiquity is also illustrated by these inscriptions. Cush returns a tribute of gold, silver, and cattle; the Rotemmon, ivory, cattle, horses, goats, metals, armor, precious woods; the Syrians, silver, iron, lapis-lazuli, and leather; an unknown people, precious vases, dates, honey, wine, fatima, perfumes, asses, and instruments of iron. Mention is made also of chariots ornamented with silver, and of shiploads of ivory, ebony, leopard-skins, etc. All this confirms the story of Herodotus touching the immense wealth and the vast military power of Thebes. Fifteen successive campaigns are here recorded in which the monarch himself carried his triumphant arms to the very heart of Asia. In some of these campaigns he marched through Cæde-Syria, and subdued the region of Lebanon. The entire inscription of Thothmes III. is translated in the Revue Archéologique, Nouvelle Série, vol. ii.

The inscription of Shishak upon the outer wall of Karnak in the same way illustrates the power and grandeur of Thebes, even when bordering upon its decline.

THEBEZ (THEBES) [brightness]: Ṣebes. Quaera: Alex. Θεσσαλία, Θηβαί: Thebes. A place memorable for the death of the brave Abimelek.
THEOE, WILDERNESS OF THEOPHILUS

3221

Geh (Judg. ix. 50). After subduing a thousand of the Shechemites in the hold of Baal-berith by the smoke of green wood — an exploit which recalls the notorious feat of a modern French general in Algeria (Eccle. i. 9, 10) — he went off with his band to Thebes. The town was soon taken, all but one tower, into which the people of the place crawled, and which was strong enough to hold out. To this he forced his way, and was about to repeat the barbarous stratagem which had succeeded so well at Shechem, when the fragment of millstone descended and put an end to his turbulent career. The story was well known in Israel, and gave the point to a familiar maxim in the camp (2 Sam. xi. 21).

Thebes is not mentioned again in the Bible. But it was known to Eusebius and Jerome. In their day the village still bore its old name, and was situated "in the district of Neapolis," 13 Roman miles thencefrom, on the road to Scythopolis (Ossian, Θηβα). There it still is: its name survives. The village has been a rising ground to the left of the town, a thriving, compact, and strong-looking place, surrounded by immense woods of olives, and by perhaps the best cultivated land in all Palestine. It was known to hap-haparch in the 13th century (Zinz's Benjamin, ii. 425); and is mentioned occasionally by later travellers. But Dr. Robinson appears to have been the first to recognize its identity with Thebes (B. T. ix. 56). G.

THEOE, THE WILDERNESS OF THEOPHILUS (τὸν ἑρμανὸν Θεσκαί: desertæ Theosco). The wild, uncultivated pastoral tract lying around the town of Teboa, more especially to the east of it (1 Macc. xii. 31). In the Old Test. (2 Chr. xx. 21) it is mentioned by the term Μιλβας, which answers to the Greek Θεσκαν. Thebes is merely the Greek form of the name Teboa. G.

THELASAR (Θελασάρ) [hill of Assosia, Ges., Fürst]: ἰασάριν: Alex. Ωθαλσάταν. Thelaphs was a name given to the village on a rising ground to the left of the town, a thriving, compact, and strong-looking place, surrounded by immense woods of olives, and by perhaps the best cultivated land in all Palestine. It was known to hap-haparch in the 13th century (Zinz's Benjamin, ii. 425), and is mentioned occasionally by later travellers. But Dr. Robinson appears to have been the first to recognize its identity with Thebes (B. T. ix. 56). G.

THELERASAN (Θελεράσαν) [Phil. xiv. 36]. The Greek equivalent of the name Tel-Harsan. G.

THEMAN (Θημαν: Theman), Bar. iii. 22. [Temac.]

THEODOTUS (Θεοδότους [given by God]: Theodosius, Theodoros). An envoy sent by Nicanor to Judas Macc. c. e. c. 162 (2 Macc. xiv. 18).

B. F. W.

THEOPHILUS (Θεοφίλος [friend of God]). 1. The person to whom St. Luke inscribes his Gospel and the Acts of the Apostles (Luke i. 3; Acts i. 1). The important part played by Theophilus, as having immediately occasioned the composition of these two books, together with the influence of Scripture concerning him, has at once stimulated conjecture, and left the field clear for it. Accordingly we meet with a considerable number and variety of theories concerning him.

(1.) Several commentators, especially among the Fathers, have been disposed to doubt the personality of Theophilus, regarding the name either as that of a fictitious person, or as applicable to every Christian reader. Thus Origen (Hom. i. in Luc.) raises the question, but does not discuss it, his object being merely practical. He says that all who are beloved of God are Theophilus, and may therefore appropriately to themselves the Gospel which was addressed to Theophilus. Ephraem (Herm. ii. 349) addressed Theophilus as "the beloved of God," and addressed him "to the beloved Theophilus, the disciple of Christ." Salianus (Epist. iv. ad Salaminum) apparently assumes that Theophilus had no historical existence. He justifies the composition of a work addressed "to Ad Eclepa, Eclepas," under the name of Timotheus, by the example of the Evangelist St. Luke, who addressed his Gospel nominally to a particular name only, really to "the love of God," "a man sicut Theophilus vocatum amor, sic Timothei honor divinitatis exprimitur." Even Theophylact, who believes in the existence of Theophilus, takes the opportunity of moralizing upon his head, that πας δὲ ἄνθρωπος Θεοφίλος ἢ καὶ Κορνων κατὰ τῶν παθῶν ἀνδρεύει, Θεοφίλος ἢ καὶ ἄνθρωπος κατὰ τῶν παθῶν ἀνδρεύει. But it is clear that Theophilus is here merely a name

(2.) From the honorable epithet κρατίστας, applied to Theophilus in Luke i. 5, compared with the use of the same epithet as applied to Lysias and Tertullus severally to Felix, and by St. Paul to Festus (Acts xxiii. 26, xxiv. 3, xxvi. 25), it has been argued with much probability, but not quite conclusively, that he was a person in high official position. Thus Theophylact (Argum. in Luc.) conjectures that he was a Roman governor, or a person of senatorial rank, grounding his conjecture both on the use of the epithet κρατίστας and on the omission of the personal name (mut. est. Apost. i. 1) tells us that he was a governor, but gives no authority for the assertion. The traditional connection of St. Luke with Antioch has disposed some to look upon Antioch as the abode of Theophilus, and possibly as the seat of his government. Bengel believes him to have been an inhabitant of Antioch, "ut veteres testabant." The belief may partly have grown out of a story in the so-called Recognitision of St. Clement (iii. x.), which represents a certain nobleman of Antioch of that name to have been converted by the preaching of St. Peter, and to have dedicated his own house as a church, in which, as we are told, the Apostle fixed his episcopal seat. Bengel thinks that the omission of κρατίστας in Acts i. 21 proves that St. Luke was on more familiar terms with Theophilus than when he composed his Gospel.

(3.) In the Syrian Lexicon extracted from the Lexicon Heptaglotta of Castell, and edited by Michaelis (p. 913), the following description of Theophilus is quoted from Bar Bahad, a Syrian lexicographer of the 10th century: "Theophilus, prince cælorum et cælestium apud Alexand-
THEOPHILUS

THESSALONIANS

Briesses, qui eum illius "Egyptius Lucan rogatus, ut eiis Evangelium scriberet." In the inscription of the Gospel according to St. Luke in the Syriac version we are told that it was published at Alexandria. Hence it is inferred by Jacob Hase (Bibl. Brevisciss. Libri, iv. Fasc. iii. Diss. 4, quoted by Michaelis, Introd. to the N. T., vol. iii. ch. vi. § 4, ed. Munch) and by Heugel (Ordo Temporum, p. 196, ed. 2), that Theophilus was, as asserted by Bar Rahbil, a convert of Alexandria. This writer ventures to advance the startling opinion that Theophilus, if an Alexandrian, was no other than the celebrated Philo, who is said to have been the Hebrew name of Jedidiah (�\(\gamma\)\(\delta\)ί\(\delta\)ι). It hardly seems necessary to refute this theory, as Michaelis has refuted it, by chronological arguments.

(4.) Alexander Morris (All quodsum hoc Nor. Folk. Nota. in Luc. i. 1) makes the rather hazardous conjecture that the Theophilus of St. Luke is identical with the person who is recorded by Tacitus (Ann. ii. 55) to have been condemned for fraud at Athens by the court of the Areopagus. Grodinius also conjectures that he was a magistrate of Achaia baptized by St. Luke. The conjecture of Grodinius must rest upon the assertion of Jerome (an assertion which, if it is received, renders that of Alex. Morris possible, though certainly most improbable), namely, that Luke published his Gospel in the parts of Achaia and Bithynia (Jerome, Comm. in Matth. Proem.).

(5.) It is obvious to suppose that Theophilus was a Christian. But a different view has been entertained. In a series of Dissertations in the Bibl. Brevisciss. of which Michaelis gives a résumé in the section already referred to, the notion is presented that he was not a Christian is maintained by different writers, and on different grounds. Hase, one of the contributors, assumes, that he was a Roman governor, argues that he could not be a Christian, because no Christian would be likely to have such a charge entrusted to him. Another writer, Theodore Hase, believes that the Theophilus of Luke was no other than the deceased high-priest Theophilus the son of Ananus, of whom more will be said presently. Michaelis himself is inclined to adopt this theory. He thinks that the use of the word καρυάας in Luke i. 4, proves that Theophilus had an imperfect acquaintance with the facts of the Gospel (an argument of which Bishop Marsh very properly disposes in his note upon the passage of Michaelis), and further contends, from the ἐν ἵματι of Luke i. 1, that he was not a member of the Christian community. He thinks it probable that the Evangelist wrote his Gospel during the imprisonment of St. Paul at Caesarea, and addressed it to Theophilus as one of the heads of the Jewish nation. According to this view, it would be regarded as a sort of historical apology for the Christian faith.

In surveying this series of conjectures, and of traditions which are nothing more than conjectures, we must carefully to determine what is to be rejected than what we are to accept. In the first place, we may safely reject the Patriotic notion that Theophilus was either a fictitious person, or a mere personification of Christian love. Such a personification is alien from the spirit of the New Testament writers, and the epithet εὐπρεπής is a sufficient evidence of the historical existence of Theophilus. It does not, indeed, prove that he was a governor, but it makes it most probable that he was a person of high rank. His supposed connection with Antioc, Alexandria, or Achaia, rests on too slender evidence either to claim acceptance or to need refutation; and the view of Theodore Hase, although endorsed by Michaelis, appears to be incontestably negatived by the positive complication of the Third Gospel. The grounds alleged by Heugel for his hypothesis that Theophilus was not a Christian are not at all trustworthy, as consisting of two very disputable premises. For, in the first place, it is not at all evident that Theophilus was a Roman governor; and in the second place, even if we assume that at that time no Christian would be appointed to such an office (an assumption which we can scarcely venture to make), it does not at all follow that no person in that position would become a Christian. In fact, we have an example of such a conversion in the case of Sergius Paulus (Acts xii. 12). In the article on the GOSPEL OF LUKE (vol. ii. p. 1037 a), reasons are given for believing that Theophilus was "not a native of Palestine. . . . not a Roman senator, nor a private individual." But that he was a native of Italy, and perhaps an inhabitant of Rome, is probable from similar data. But all that can be conjectured with any degree of safety concerning him, comes to this, that he was a Gentle of rank and consideration, who came under the influence of St. Luke, or (not improbably) under that of St. Paul, at Rome, and was converted to the Christian faith. It has been observed that the Greek of St. Luke, which elsewhere approaches more nearly to the classical type than that of the other Evangelists, is purer and more elegant in the dedication to Theophilus than in any other part of his Gospel.

2. A Jewish high-priest, the son of Annas or Ananus, brother-in-law to Caiaphas (Annas; Caiaphas), and brother and immediate successor of Jonathan. The Roman Prefect Vitellius came to Jerusalem at the Passover (A. D. 37), and deposed Caiaphas, appointing Jonathan in his place. In the same year, at the feast of Pentecost, he came to Jerusalem, and deprived Jonathan of the high-priesthood, which he gave to Theophilus (Joseph. Ant. xvii. 4, § 3, xviii. 5, § 3). Theophilus was removed from his post by Herod Agrippa I., after the accession of that prince to the government of Judæa in 42, and it is asserted that he must have held that office about five years (Joseph. Ant. xix. 6, § 2). Theophilus is not mentioned by name in the New Testament; but it is most probable that he was the high-priest who granted a commission to Saul to proceed to Damascus, and to take into custody any believers whom he might find there. W. D. J.

THE'ERAS (Θεράς; [in ver. 41, Vat. omits: Thysa &c. Str. Theron]. The equivalent in 1 Esdr. iv. 41, 41, of the Syriac of the parallel passage in Ezra. Nothing whatever appears to be known of it.

THER'MELETH (Θερμέλη: Themelae), 1 Esdr. v. 36. The Greek equivalent of the name Tel-selah.

THESSALONIANS, FIRST EPISTLE TO THE. 1. The date of the epistle is made out approximately in the following way. During the course of his second missionary journey, probably in the year 52, St. Paul founded the Church of Thessalonica. Leaving Thessalonica he passed on to Berea. From Berea he went to Athens, and from Athens to Corinth (Acts xvi. 10-xvii. 18). With this visit to Corinth, which extends over a
period of two years or thereabouts, his second missionary journey closed, for from Corinth he returned to Jerusalem, paying only a brief visit to Ephesus on the way (xviii. 20, 21). Now it appears that, when this epistle was written, Silvanus and Timothy were in the Apostle’s company (1 Thess. i. 1; comp. 2 Thess. i. 1) — a circumstance which confines the date to the second missionary journey, for though Timothy was with him on several occasions afterwards, the nature of Silvanus’ appas for the last time in connection with St. Paul during this visit to Corinth (Acts xviii. 5, 7). The epistle then must have been written in the interval between St. Paul’s leaving Thessalonica and the close of his residence at Corinth, i.e., according to the received chronology within the years 52-54.

The following considerations however narrow the limits of the possible date still more closely. (1) When St. Paul wrote, he had already visited, and probably left Athens (1 Thess. iii. 1). (2) Having made two unsuccessful attempts to revisit Thessalonica, he had dispatched Timothy to obtain tidings of his converts there. Timothy had returned before the Apostle wrote (ii. 2, 6). (3) St. Paul speaks of the Thessalonians as “examples to all that believe” (i. 7). Timothy’s dispatching that “in every place their faith to Godward was spread abroad” (i. 1, 8) — language prompted indeed by the overflowing of a grateful heart, and therefore not to be rigorously pressed, but still implying some lapse of time at least. (4) There are several traces of a growth and progress in the condition and circumstances of the Thessalonian Church. Perhaps the mention of “rulers” in the church (v. 12) ought not to be advanced as proving this, since some organization would be necessary from the very beginning. But there is other evidence besides. Questions had arisen relating to the state of those who had fallen asleep in Christ, so that one or more of the ‘Thessalonian converts must have died in the interval (iv. 14-18). The storm of persecution which the Apostle had discerned gathering on the horizon had already burst upon the Christianss of Thessalonica (iii. 4, 7). Irregularities had crept in and sullied the infant purity of the church (iv. 4, v. 14). The lapse of a few months however would account for these changes, and a much longer time cannot well be allowed. For (5) the letter was evidently written by St. Paul immediately on the return of Timothy, in the fulness of his gratitude for the joyful tidings (iii. 6). Moreover, (6) the second epistle was also written before he left Corinth, and there must have been a sufficient interval between the two to allow of the growth of fresh difficulties, and of such communication between the Apostle and his converts as the earlier supposes. We shall not be far wrong, therefore, in placing the writing of this epistle early in St. Paul’s residence at Corinth, a few months after he had founded the church at Thessalonica, at the close of the year 52 or the beginning of 53. The statement in the subscription appearing in several MSS. and versions, that it was written from Athens, is a superficial inference from 1 Thess. iii. 1, in which Paul immediately on the return of Timothy, in the fulness of his gratitude for the joyful tidings, enunciates his views of critics who have assigned to this epistle a later date than the second missionary journey are stated and refuted in the Introductions of Keph (p. 23, etc.), and Lünemann § 3).

2. The epistles to the Thessalonians then (for the second followed the first after no long interval) were the earliest of St. Paul’s writings — perhaps the earliest written records of Christianity. They belong to that period which St. Paul elsewhere styles “the beginning of the Gospel” (Phil. iv. 15). They present the disciples in the first flush of love and devotion, yearning for the day of deliverance, and straining their eyes to catch the first glimpse of their Lord descending amidst the clouds of heaven, till in their feverish anxiety they forget the sober business of life, absorbed in this one engrossing thought. It will be remembered that a period of about two years intervened before the first group of epistles — those to the Corinthians, Galatians, and Romans — were written, and about twice that period to the date of the epistles of the Roman captivity. It is interesting therefore to compare the Thessalonian Epistles with the later letters, and to note the points of difference. These differences are mainly threefold. (1) In the general style of these earlier letters there is greater simplicity and less exuberance of language. The brevity of the opening salutation is an instance of this. “Paul . . . . to the Church of the Thessalonians in God the Father and the Lord Jesus Christ, grace and peace to you” (1 Thess. i. 1; comp. 2 Thess. i. 1). The closing benediction is correspondingly brief: “The grace of our Lord Jesus Christ be with you” (1 Thess. v. 28; comp. 2 Thess. iii. 18). And throughout the epistles there is much more evenness of style, words, are not accumulated in the same way, the syntax is less involved, parentheticals are not so frequent, the turns of thought and feeling are less sudden and abrupt, and altogether there is less intensity and variety than we find in St. Paul’s later epistles. (2) The antagonism to St. Paul is not the same. The direction of the attack has changed in the interval between the writing of these epistles and those of the next group. Here the opposition comes from Jews. The admission of the Gentiles to the hopes and privileges of Messiah’s kingdom on any condition is repulsive to them. They “forbid the Apostle to speak to the Gentiles that they might be saved” (ii. 16). A period of five years changes the aspect of the controversy. The opponents of St. Paul are now no longer Jews, so much as Judaizing Christians (Ewald, Jobes. iii. 249; Stendler, p. 14). The question of the admission of the Gentiles has been solved by St. Paul for the of heaven by storm.” But the antagonism to the Apostle of the Gentiles, having been driven from its first postition, entrenched itself behind a second barrier. It was now urged that though the Gentiles may be admitted to the Church of Christ, the only door of admission is the Mosaic covenant-rite of circumcision. The language of St. Paul, speaking of the Jewish Christians in this epistle, shows that the opposition to his teaching had not at this time assumed this second phase. He does not yet regard them as the disturbers of the peace of the church, the false teachers who by imposing a badge of ceremonial observances frustrate the free grace of God. He can still point to them as examples to his converts at Thessalonica (3. 14). The change indeed was imminent, the signs of the gathering storm had already appeared to his teaching (had not at this hitherto they were faint and indistinct, and had scarcely darkened the horizon of the Gentile churches. (3.) It will be no surprise that the doctrinal teaching of the Apostle does not bear quite the same aspect in these as in the later epistles. Many of the distinctive doctrines of Christianity which are inerparable connected with
THESSALONIANS.

First Epistle to the Thessalonians.

St. Paul's name, though implicitly contained in the teaching of these earlier letters—indeed they follow the design of the true conception of the Person of Christ—were yet not evolved and distinctly enunciated till the needs of the church drew them out into prominence at a later date. It has often been observed, for instance, that there is in the Epistles to the Thessalonians no mention of the characteristic contrast of faith and works: "that the word "justification" does not once occur; that the idea of dying with Christ and rising with Christ, so frequent in St. Paul's later writings, is absent in these. It was in fact the opposition of Judaising Christians, insisting on a strict ritualism, which led the Apostle somewhat later to dwell at greater length on the true doctrine of a saving faith, and the true conception of a godly life. But the time had not yet come, and in the epistles to the Thessalonians, as has been truly observed, the Gospel preached is that of the coming of Christ, rather than the cross of Christ. There are many reasons why the subject of the second advent should occupy a larger space in the earliest stage of the Apostolical teaching than afterwards. It was closely bound up with the fundamental fact of the Gospel, the resurrection of Christ, and thus it formed the climax of all the earlier teaching of the Church. It afforded the true satisfaction to those Messianic hopes which had drawn the Jewish converts to the fold of Christ. It was the best consolation and support of the infant church under persecution, which must have been most keenly felt in the first abandonment of worldly pleasures and interests. More especially, as telling of a righteous Judge who would not overlook humanity, it was essential to that call to repentance which must everywhere precede the direct and positive teaching of the Gospel. "Now He commands all men everywhere to repent, for He hath appointed a day in which He will judge the world in righteousness by that man whom He hath ordained, whereof He hath given assurance unto all men, that He raised Him from the dead" (Acts xvi. 30, 31). 3. The occasion of this epistle was as follows: St. Paul had twice attempted to revisit Thessalonica, and both times had been disappointed. Thus prevented from seeing them in person, he had sent Timothy to inquire and report to him as to their condition (ii. 1-5). Timothy returned with.most favorable accounts, reporting not only their steady growth in Christian faith and practice, but also their strong attachment to their old teacher (iii. 6-10). The First Epistle to the Thessalonians is the outpouring of the Apostle's gratitude on receiving this welcome news. At the same time the report of Timothy was not unmixed with alarm. There were certain features in the condition of the Thessalonian Church which called for St. Paul's intense solicitude, to which he addresses himself in his letter. (1.) The very intensity of their Christian faith, dwelling too exclusively on the day of the Lord's coming, had been attended with evil consequences. On the one hand a practical inconvenience had arisen. In their feverish expectation of this great crisis, some had been led to neglect their ordinary business, as though the daily concerns of life were of no account in the immediate presence of so vast a change (iv. 11; comp. 2 Thess. i. 1, iii. 6, 11, 12). On the other hand a theoretical difficulty had been felt. Certain members of the church had died, and there was great anxiety lest they should be excluded from any share in the glories of the Lord's advent (iv. 13-18). St. Paul rebukes the irregularities of the former, and dissipates the fears of the latter. (2.) The flame of persecution had broken out, and the Thessalonians needed consolition and encouragement under their sore trial (ii. 14, iii. 2-4). (3.) An unhealthy state of feeling with regard to spiritual gifts was manifesting itself. Like the Corinthians at a later day, they needed to be reminded of the superior value of "prophesying," compared with other gifts of the Spirit which they excited at its coming (iv. 6, 29). (4.) There was the danger, which they shared in common with most of the churches, of relapsing into their old heathen profligacy. Against this the Apostle offers a word in season (iv. 4-8). We need not suppose however that Thessalonica was worse in this respect than other Greek cities.

4. Yet notwithstanding all these drawbacks, the condition of the Thessalonian Church was highly satisfactory, and the most cordial relations existed between St. Paul and his converts there. This honorable distinction it shares with the other great church of Macedonia, that of Philippi. At all times, and amidst every change of circumstance, it is to his Macedonian churches that the Apostle turns for sympathy and support. A period of long and friendly intercourse with these churches is followed by his Epistle to the Thessalonians and the Epistle to the Philippians, and yet no two of his letters more closely resemble each other in this respect. In both he drops his official title of Apostle in the opening salutation, thus appealing rather to their affection than to his own authority; in both he commences the body of his letter with hearty and indulgent sympathy, as if he and they were both the same spirit of confidence and warm affection breathe throughout.

5. A comparison of the narrative in the Acts with the allusions in this and the Second Epistle to the Thessalonians is instructive. With some striking coincidences, there is just that degree of diversity which might be expected between a writer who had borne the principal part in the scenes referred to, and a narrator who derives his information from others, between the casual half-expressed allusions of a familiar letter and the direct account of the professional historian. Passing over patent coincidences, we may single out one or two more subtle and delicate kind. It is suggested that there are points of reference against St. Paul and his companions at Thessalonica taken in the Acts: "All these do contrary to the decrees of Caesar, saying that there is another king, one Jesus" (xvii. 7). The allusions in the Epistles to the Thessalonians enable us to understand the ground of this accusation. It appears that the kingdom of Christ had entered largely into his oral teaching, and to this side of the scene was represented in a hostile light by St. Paul and his companions at Thessalonica. He had charged his new converts to await the coming of the Son of God from heaven, as their deliverer (i. 10). He had dwelt long and earnestly (προετοιμάσει και διεπαραγενέστερον) on the terrors of the judgment which would overtake the wicked (iv. 6). He had even explain'd at length the signs which would usher in the last day (2 Thess. ii. 5). Either from malice or in ignorance such language had been misrepresented, and he was accused of setting up a rival sovereign to the Roman emperor.

On the other hand, the language of these epistles diverges from the narrative of St. Luke on two or three points in such a way as to establish the inde-
PENDENCE OF THE TWO ACCOUNTS, AND EVEN TO REQUIRE SOME EXPLANATION. (1) THE FIRST OF THESE RELATES TO THE COMPOSITION OF THE CHURCH OF THESALONICA.

In the first epistle St. Paul addresses his readers distinctly as "gentiles" who had been led from idolatry to the Gospel (i. 9, 10). In the Acts we are told that "some of the Jews (i. e. proselytes) a great multitude, and of the chief women, but a few!" (xvii. 4). IF FOR 

SOME OF THE GENTILES, WE READ "SOME OF THE JEWISH WOMEN," THE PROSLEYTES AND GREEKS: THE DIFFERENCE IS NOT OBSERVED IN THE TEXTUAL EDITIONS, BUT ALTHOUGH INTERNAL PROBABILITIES ARE SOMEWHAT IN FAVOR OF THIS READING, THE ARGUMENT OF DIRECT EVIDENCE (NOW REINFORCED BY THE COI. SINAITICUS) IS AGAINST IT. BUT EVEN IF WE RETAIN THE COMMON READING, THE ACCOUNT OF ST. JUICE DOES NOT EXCLUDE A NUMBER OF BELIEVERS CONVERTED DIRECTLY FROM HEATHENISM INDEED, IF WE MAY ARGUE FROM THE PARALLEL CASE AT BEREAN (XVII. 12), THE "WOMEN" WERE CHIEFLY OF THIS CLASS, AND, IF ANY DIVERGENCE REMAINS, IT IS NOT GREATER THAN MIGHT BE EXPECTED IN TWO INDEPENDENT WRITERS, ONE OF WHOM, NOT BEING AN EYE-WITNESS, POSSESSED ONLY A PARTIAL AND INDIRECT KNOWLEDGE. BOTH ACCOUNTS ALIKE CONVEY THE IMPRESSION THAT THE GOSPEL MADE BUT LITTLE PROGRESS WITH THE JEWS THEMSELVES. (2)

In the epistle the persecutors of the Thessalonian Christians are represented as their fellow-countrymen, i.e., as heathens (μη τοις Ἰουδαίοις συμφωλοκέται, ii. 14), whereas in the Acts the Jews are regarded as the bitterest opponents of the faith (xvii. 5). THIS IS FAIRLY MET BY PALEY (HOMH PRR. IX. NO. 5), WHO POINTS OUT THAT THE JEWS WERE THE INSTIGATORS OF THE PERSECUTION, WHICH HOWEVER THEY WERE POWERLESS OF THEMSELVES TO CARRY OUT WITHOUT AID FROM THE HEATHENS. WE MAY THEREFORE LEAVE THE ACCOUNT OF THE NARRATIVE OF ST. PAUL WE MAY ALSO ADD, THAT THE EXPRESSION Ἰουδαίοι συμφωλοκέται NEED NOT BE RESTRICTED TO THE HEATHEN POPULATION, BUT MIGHT INCLUDE MANY HELLENIST HEATHENS WHO MIGHT HAVE BEEN CITIZENS OF THE FREE TOWN OF THESALONICA. (3) THE NARRATIVE OF ST. PAUL APPEARS TO STATE THAT ST. PAUL REMAINED ONLY THREE WEEKS AT THESALONICA (XVII. 2), WHEREAS IN THE EPISODE, THOUGH THERE IS NO MENTION OF THE LENGTH OF HIS RESIDENCE THERE, THE WHOLE LANGUAGE (i. 4, ii. 4-11) POINTS TO A MUCH LONGER PERIOD. THE LATTER PART OF THE ASSERTION SEEMS QUITE CORRECT; THE FORMER NEEDS TO BE MODIFIED. IN THE ACTS IT IS STATED SIMPLY THAT FOR THREE SABBATH DAYS (THREE WEEKS) ST. PAUL TAUGHT IN THE SYNAGOGUE. THE SILENCE OF THE WRITER DOES NOT EXCLUDE SUBSEQUENT LABOR AMONG THE GENTILE POPULATION, AND INDEED AS MUCH SEEMS TO BE IMPLIED IN THE SUCCESS OF HIS PREACHING, WHICH EXALTED THE JEWS AGAINST HIM. (4) THE NOTICES OF THE MOVEMENT OF SILAS AND TIMOTHIDES IN THE TWO DOCUMENTS DO NOT ACCORD AT FIRST SIGHT. IN THE ACTS ST. PAUL IS CONVEYED AWAY SECRETLY FROM BEREAN TO ESCAPE THE JEWS. ARRIVED AT ATHENS, HE SENDS TO SILAS AND TIMOTHIDES, WHOSE HE LEFT BEHIND AT BEREAN, URGING THEM TO JOIN HIM AS SOON AS POSSIBLE (XVII. 14-16). IT IS EVIDENT FROM THE LANGUAGE OF ST. PAUL THAT THE APOSTLE EXPECTS THEM TO JOIN HIM AT ATHENS. YET WE HEAR NOTHING MORE OF THEM FOR SOME TIME, WHEN AT LENGTH, AFTER ST. PAUL HAD PASSED ON TO CORINTH, AND SEVERAL INCIDENTS HAD OCCURRED SINCE HIS ARRIVAL THERE, WE ARE TOLD THAT SILAS AND TIMOTHIDES CAME FROM MACEDONIA (XVII. 5). FROM THE FIRST EPISTLE, ON THE OTHER HAND, WE GATHER THE FOLLOWING FACTS. ST. PAUL THERE TELLS US THAT THEY (μητρία, i.e. HIMSELF, AND PROBABLY SILAS) NO LONGER ABLE TO ENDURE THE SUSPENSE, "CONSENTED TO BE LEFT ALONE AT ATHENS, AND SENT TIMOTHIDES TO THESSALONICA (III. 1, 2). TIMOTHIDES RETURNED WITH GOOD NEWS (III. 4) (WHETHER TO ATHENS OR CORINTH DOES NOT APPEAR), AND WHEN THE TWO EPISTLES TO THE THESALONICANS WERE WRITTEN, BOTH TIMOTHIDES AND SILAS WERE WITH ST. PAUL (1 THESS. I. 1; 2 THESS. I. 1; COMP. 2 COR. I. 19). NOW, THOUGH WE MAY NOT BE PREPARED WITH PALEY TO CONSTRUCT AN UNDESIGNED COINCIDENCE OUT OF THESE MATERIALS, YET ON THE OTHER HAND THERE IS NO INSOLUBLE DIFFICULTY; FOR THE EVENTS MAY BE ARRANGED IN TWO DIFFERENT WAYS, EITHER OF WHICH WILL BRING THE NARRATIVE OF THE ACTS INTO ACCORDANCE WITH THE ALIENON OF THE EPISTLE. (5) TIMOTHIDES WAS DESPATCHED TO THESSALONICA, NOT FROM ATHENS, BUT FROM BEREAN, A SUPPOSITION QUITE CONSISTENT WITH THE APOSTLE'S EXPRESSION OF "CONSENTING TO BE LEFT ALONE AT ATHENS." IN THIS CASE TIMOTHIDES WOULD TAKE UP SILAS SOMEWHERE IN MACEDONIA ON HIS RETURN, AND THE TWO WOULD JOIN ST. PAUL IN COMPANY; NOT HOWEVER AT ATHENS, WHERE HE WAS EXPECTING THEM, BUT LATER ON AT CORINTH, SOME DELAY HAVING ARISEN. THIS EXPLANATION HOWEVER SUGGESTS THAT THE PROLAPSE "WE CONSENTED, WE SENT," SAID IN THE HEART OF "ΣΩΤΙΚΑΣΜΟΣ, ΕΠΙΤΥΧΩ ΜΕΝ," CAN REFER TO ST. PAUL ALONE. THE ALTERNATIVE MODE OF RECONCILING THE ACCOUNTS IS AS FOLLOWS: (6) TIMOTHIDES AND SILAS MAY HAVE JOINED THE APOSTLE AT ATHENS, WHERE WE LEARN FROM THE ACTS THAT HE WAS EXPECTING THEM. FROM ATHENS HE DESPATCHED TIMOTHIDES TO THESSALONICA, SO THAT HE AND SILAS (μητρία) HAD TO FOREGO THE SERVICES OF THEIR FELLOW-LABOR FOR A TIME. THIS MISSION IS MENTIONED IN THE EPISTLE, BUT NOT IN THE ACTS. SUBSEQUENTLY HE SENDS SILAS ON SOME OTHER MISSION, NOT RECORDED EITHER IN THE HISTORY OR THE EPISTLE; PROBABLY TO ANOTHER MACEDONIAN CHURCH, PHILIPPI FOR INSTANCE, FROM WHICH HE IS KNOWN TO HAVE RECEIVED CONTRIBUTIONS ABOUT THIS TIME, AND WITH WHICH THEREFORE AS HE WAS IN COMMUNICATION (2 COR. VI. 9; COMP. PHIL. IV. 14-16; SEE KOCH, P. 15). SILAS AND TIMOTHIDES RETURNED TOGETHER FROM MACEDONIA AND JOINED THE APOSTLE AT CORINTH. THIS LATER SOLUTION, IF IT ASSUMES MORE THAN THE FORMER, HAS THE ADVANTAGE THAT IT PRESERVES THE PROPER SENSE OF THE PHRASE "WE CONSENTED, WE SENT," FOR IT IS AT LEAST DOUBTFUL WHETHER ST. PAUL EVER USES THE PHRASE "THESSALONIAN" ALONE. THE SILENCE OF ST. PAUL MAY IN THIS CASE BE EXPLAINED EITHER BY HIS POSSESSIONING ONLY A PARTIAL KNOWLEDGE OF THE CIRCUMSTANCES, OR BY HIS PASSING OVER INCIDENTS OF WHICH HE WAS AWARE, AS UNIMPORTANT.

6. THIS EPISTLE IS FARTHER PRACTICAL THAN DOCTRINAL. IT WAS SUSPECTED RATHER BY PERSONAL FEELING, THAN BY ANY URGENT NEED, WHICH MIGHT HAVE FORMED A GREAT MULTITUDE OF PROSLEYTES CONVERTED TO THE CHRISTIAN FAITH, WOULD NATURALLY REGARD THEM AS HAVING BEEN ORIGINALLY HEATHENS, RATHER THAN JEWS. THEIR JUDAISM HAD BEEN BUT A TEMPORARY AND TRANSITIONAL STAGE; AND THIS ADDRESS IN THE EPISTLE IS ALSOGETHER CONSISTENT WITH THE FACT THAT THEY HAD BEEN PREPARED FOR CHRISTIANITY BY A PREVIOUS RECEPTION OF JUDAISM.
centre of unity, and impressed a distinct character on the whole. Under these circumstances we need not expect to trace unity of purpose, or a continuous argument, and any analysis must be more or less artificial. The body of the epistle, however, may conveniently be divided into two parts, the former of which, extending over the first three chapters, is chiefly taken up with a retrospect of the Apostle's relation to his Thessalonian converts, and an explanation of his present circumstances and feelings, while the latter, comprising the 4th and 5th chapters, contains some seasonable exhortations. At the close of each of these divisions is a prayer, commencing with the same words, "May God himself," etc., and expressed in somewhat similar language.

The following is a table of contents:—

Salutation (i. 1).
1. Narrative portion (i.-iii. 13).
   (1.) i. 2-10. The Apostle gratefully records their conversion to the Gospel and progress in the faith.
   (2.) ii. 1-12. He reminds them how pure and blameless was his life and ministry among them had been.
   (3.) ii. 13-16. He repeats his thanksgiving for their conversion, dwelling especially on the persecutions which they had endured.
   (4.) ii. 17-iii. 10. He describes his own suspense and anxiety, the consequent mission of Timothy to Thessalonica, and the encouraging report which he brought back.
   (5.) iii. 11-13. The Apostle's prayer for the Thessalonians.
   (1.) iv. 1-8. Warning against impurity.
   (2.) iv. 9-12. Exhortation to brotherly love and sobriety of conduct.
   (3.) iv. 13-v. 11. Touching the advent of the Lord.
   (a.) The dead shall have their place in the resurrection, iv. 13-18.
   (b.) The time however is uncertain, v. 1-3.
   (c.) Therefore must be watchful, v. 4-11.
   (5.) v. 16-22. Injunctions relating to prayer and spiritual matters generally.
   (6.) v. 23, 24. The Apostle's prayer for the Thessalonians.

The epistle closes with personal injunctions and a benediction (v. 25-28).

7. The external evidence in favor of the genuineness of the First Epistle to the Thessalonians is chiefly negative, but this is important enough. There is no trace that it was ever disputed at any age or in any section of the Church, or even by any individual, till the present century. On the other hand, the allusions to it in writers before the close of the 2d century are confessedly faint and uncertain—a circumstance easily explained, when we remember the character of the epistle itself, its comparatively simple diction, its silence on the most important doctrinal questions, and, generally speaking, the absence of any salient points to arrest the attention and provoke reference. In Clement of Rome there are some slight coincidences of language, perhaps not purely accidental (c. 38, κατά πάντα εἰσήγαγεν στόχευ, comp. 1 Thess. v. 18; ἰδον, συνείσεξεν σὺν ἤμιν διόν το σώμα ἐν X. 1. comp. 1 Thess. v. 23). Ignatius in two passages (Polyc. c. 1, and Ephes. c. 10) seems to be reminded of St. Paul's expression "άπελεπίσπιον συνεισέγαγε" (1 Thess. v. 17), but in both places Ignatius uses the word "άπελεπίσπιον," in which the similarity mainly consists, is absent in the Syriac, and is therefore probably spurious. The supposed references in Polycarp (c. iv. to 1 Thess. v. 17, and c. ii. to 1 Thess. v. 22) are also unsatisfactory. It is more important to observe that the epistle was included in the Old Latin and Syriac version, and it is found in the Canon of the Muratorian fragment, and that it was also contained in that of Marcion. Towards the close of the 2d century from Irenaeus downwards, we find this epistle directly quoted and ascribed to St. Paul.

The evidence derived from the character of the epistle itself is so strong that it may fairly be called irresistible. It would be impossible to enter into the question of style here, but the reader may be referred to the Introduction of Jowett, who has handled this subject very fully and satisfactorily. An equally strong argument may be drawn also from the matter contained in the epistle. Two instances of this must suffice. In the first place, the fineness and delicacy of touch with which the Apostle's regard towards his Thessalonian converts are drawn—his yearning to see them, his anxiety in the absence of Timothy, and his heartfelt rejoicing at the good news—are quite beyond the reach of the clumsy forgeries of the early Church. In the second place, the writer uses language which, however it may be explained, is certainly colored by the anticipation of the speedy advent of the Lord—language natural enough on the Apostle's own lips, but quite inconceivable in a forgery written after his death, when time had disappointed these anticipations, and when the revival or mention of them would serve no purpose, and might seem to discredit the Apostle. Such a position would be an anachronism in a writer of the 2d century.

The genuineness of this epistle was first questioned by Schrader (Apocel Paulus), who was followed by Baur (Paulus, p. 480). The latter writer has elaborated and systematized the attack. The arguments which he alleges in favor of his view have already been anticipated to a great extent. They are briefly contrived by Lienemann, and more at length and with great fairness by Joest. The following is a summary of Baur's arguments: (i.) He attributes great weight to the general character of the epistle, the difference of style, and especially the absence of distinctive Pauline doxologies—a peculiarity which has already been remarked upon and explained, § 2. (ii.) In the mention of the "wrath" overtaking the Jewish people (vi. 16), Baur sees an allusion to the destruction of Jerusalem, and therefore a proof of the later date of the epistle. The real significance of these words will be considered below in discussing the apocalyptic passage in the second epistle. (iii.) He urges the contradictions to the account in the Acts—a strange argument surely to be brought forward by Baur, who postulates and discredits the authority of the New Testament. The real extent and bearing of these divergences has been already considered. (iv.) He discovers references to the Acts, which show that the epistle was written later. It has been seen however that the coincidences are subtle and
Incidental, and the points of divergence and prin
decus contradictions, which Baur himself allows, and
indeed insists upon, are so numerous as to pre
clude the supposition of copying. Schleiermacher
(Lobd. v. N. T. p. 1)90 rightly infers the inde
pendence of the epistle on these grounds. (c.)
He supposes passages in this epistle to have been borrowed from the acknowledged letters of St.
Paul. The resemblances however which he points
out are not greater than, or indeed so great as,
those in other epistles, and bear no traces of imita
tion.

8. A list of the Patristic commentaries comprising
the whole of St. Paul’s epistles, will be found in the article on the Epistle to the Romans.

To this list should be added the work of Theodore of Mopsuestia, a portion of which containing the
shorter epistles from Galatians onward is preserved in a Latin translation. The part relating to the
Thessalonians is at present only accessible in the
compilation of Rabanus Maurus (where it is quoted
under the name of Ambrose), which ought to be
read with the corrections and additions given by
Donitz & Lachmann. Schenkel’s Commentary on
the Epistle to the Romans is attributed by Pitra to Hilary of Poitiers, but its true authorship was pointed out by
Hort (Journal of Class. and Sac. Phil., iv. p.
302). The portion of Cranmer’s Catena relating to
this epistle seems to be made up of extracts from
Chrysostom, Severianus, and Theodore of Mop
suestia.

For the more important recent works on the
whole of St. Paul’s epistles the reader may again be referred to the article on the Epistle to the Ro
mans. The notes on the Thessalonians in Meyer’s
Commentary are executed by Lüneburg (2d ed.,
1897). Of special annotators on the Thessalonian
epistles, the chief are, in Germany, Flatt (1829);
Pelt (1830), Schott (1834), and Koch (2d ed. 1855,
the First Epistle alone), and in England, Jewett
(2d ed. 1853) and Ellicott (2d ed. 1862).

I. B. L.

* On the critical questions relating to this epistle
the following writers deserve mention: W. Grewe,
Die Ehelckth d. Briefe an d. Thess. (against Baur);
R. A. Lipsius, Uber Zweck u. Verhältniss des
ersten Thessaloniecherb. ibid. 1854, pp. 905-
934 (comp. Lüneburg’s criticisms, in Meyer’s
Komment. Abth. x. p. 5 ff., 5th Aufl.); F. C. Baur,
Die beiden Briefe an d. Thess., ihre Aethet. u.
Beleucht. f. d. Lehre von d. Parousie Christi, in
Baur and Zeller’s Thed. Jahrh. 1856, xiv. 141-169,
reprinted in the 2d ed. of his Paulus (1867), ii.
341 ff.; Hilgenfeld, Die beiden Briefe an d. Thess.,
noch Inhalt u. Ursprung, in his Zeitschrif. f.
Wiss. Thed., 1862, v. 325-364; J. C. Laurent,
Notizen, Stuttgart, Gotha, 1856 (short several arti
les); Holzmann in Bunsen’s Bibelchrist, vii. 429-
434 (1869); and Reuss, Heek, and Davidson in
their respective Introductions. The so-called “Secondary Epistle to the Thessalonians” is regarded by
Baur, Hilgenfeld, Ewald, Laurent and Davidson as
the first written. Among the recent Commentaries
we may name J. C. K. Hofmann, Die heil.
Schrift. N. T. zusammenhängend niederge
Stett. i. (1862); and C. A. Wurcel and C. J.
Riegenlaub, Die beiden Briefe an die Thes.
Thiel x. of Lange’s Bibelvorsch (1864), translated
with large additions by Dr. John Lillie, in vol. vii.
of the Amer. ed. of Lange’s Commentary (N. Y.
1863), to which the reader is referred for a fuller
view of the literature pertaining to this epistle.

A. THESALONIANS, SECOND EPISTLE TO THE.

(The present attempt to have been written by Corinth not very long after the first, for Silvanus and Timotheus were still with
St. Paul (i. 1). In the former letter we saw chiefly
the outpouring of strong personal affection, occa
sioned by the renewal of the Apostle’s intercourse
with the Thessalonians, and the doctrinal and hor
toriary portions are there subordinate. In the sec
ond epistle, on the other hand, his leading theme is
dead correcting errors in the Church of Thessalonica. We notice two
points especially which call forth his rebuke. First,
it seems that the anxious expectation of the Lord’s
advent, instead of subsiding, had gained ground
since the writing of the first epistle. They now
looked upon this great crisis as imminent, and their
daily aecotions were neglected in consequence.
There were expressions in the first epistle which,
taken by themselves, might seem to favor this
view; and at all events such was falsely repre
sented to be the Apostle’s doctrine. He now
writes to soothe this restless spirit and quell their
apprehensions by showing that many things must
happen first, and that the end was not yet, refer
ning at first to his teaching in the Thessalonian
mation of this statement (ii. 1-12, iii. 6-12). Sec
ondly, the Apostle had also a personal ground of
complaint. His authority was not denied by any,
but it was tampered with, and an unauthorized use
was made of his name. It is difficult to ascertain
the exact circumstances of the case from casual and
indirect allusions, and indeed we may perhaps infer
from the vagueness of the Apostle’s own language
that he himself was not in possession of definite
information; but at all events his suspicions were
aroused. Designing men might misrepresent his
teaching in two ways, either by suppressing what
he actually had written or said, or by forging letters
and in other ways representing him as teaching
what he had not taught. St. Paul’s language hints in two different places at both these modes of
false dealing. He seems to have entertained
suspicious of this dishonesty even while he wrote the
first epistle. At the close of that epistle he
binds the Thessalonians by a solemn oath, “in
the name of the Lord,” to see that the epistle is
read “to all the holy brethren” (v. 27) — a charge
unintelligible in itself, and only to be explained by
supposing some misgivings in the Apostle’s mind.
Before the second epistle is written, his suspicions
seem to have been confirmed, for there are two pas
gages which allude to these misrepresentations of
his teaching. In the first of these he tells them in
vague language, which may refer equally well to
a false interpretation put upon his own words in
the first epistle, or to a supplemental letter forged
in his name, “not to be troubled either by spirit
or by word or by letter, as coming from us, as it
the day of the Lord were at hand.” They are not
to be deceived, he adds, by any one whatever means
he employs (κατα μηθενα τροπον, ii. 2, 3). In
the second passage at the close of the epistle he
says, “the salutation of Paul with mine own hand,
which is a token in every epistle: so I write.”
(ii. 17) — evidently a precaution against forgery.
With these two passages should be combined the
expression in iii. 14, from which we infer that
now entertained a fear of direct opposition: “It
any man obey not our word conveyed by our epistle, note that man.

It will be seen then that the teaching of the second epistle is corrective of, or rather supplemental to, that of the first, and therefore presupposes it. Moreover, the first epistle bears on its face evidence that it is the first outpouring of his affectionate yearnings towards his converts after his departure for Macedonia; while on the other hand the second epistle contains a direct allusion to a previous letter, which may suitably be referred to the first: "Hold fast the tradition which ye were taught either by word or by letter from me" (2i. 15). We can scarcely be wrong therefore in maintaining the received order of the two epistles. It is due however to the great names of Grotius and of Ewald (Jahrb. iii. p. 250; Schwabe, p. 16) to mention that they reverse the order, placing the second epistle before the first in point of time — on different grounds indeed, but both equally insufficient to disturb the traditional order, as it is by the considerations already adduced. 

(2.) This epistle, in the range of subject as well as in style and general character, closely resembles the first; and the remarks made on that epistle apply for the most part equally well to this. The structure also is somewhat similar, the main body of the epistle being divided into two parts in the same way, and each part closing with a prayer (ii. 16, 17, iii. 16: both commencing with aitò ἄνευ). The following is a table of contents:

The opening salutation (i. 1, 2).
1. A general expression of thankfulness and interest, leading up to the difficulty about the Lord's advent (i. 3-ii. 17).

(a.) The Apostle pours forth his thanksgiving for their progress in the faith; he encourages them to be patient under persecution, reminding them of the judgment to come, and prays that they may be prepared to meet it (i. 3-12).

(b.) He is thus led to correct the erroneous idea that the judgment is imminent, pointing out that much must happen first (ii. 1-12).

(c.) He prepares his thanksgiving and exhortation, and concludes this portion with a prayer (ii. 13-17).

2. Direct exhortation (iii. 1-16).

(a.) He urges them to pray for him, and confidently anticipates their progress in the faith (iii. 1-9).

(b.) He reproves the idle, disorderly, and disobedient, and charges the faithful to withdraw from such (iii. 6-15).

This portion again closes with a prayer (iii. 16).

The epistle ends with a special direction and benediction (iii. 17, 18).

(3.) The external evidence in favor of the second epistle is somewhat more definite than that which can be brought in favor of the first. It seems to refer to in one or two passages of Polycarp (iii. 15, in Polyc. e. 11, and possibly i. 4 in the same chapter; cf. Polyc. e. 3, and see Lardner, pt. ii. c. 6); and the language in which Justin Martyr (Dial. p. 336 n) speaks of the Man of Sin is so similar that it can scarcely be independent of this epistle. The second epistle, like the first, is found in the canons of the Syriac and Old Latin Versions, and in those of the Muratorian fragment and of the heretic Marcion; is quoted expressly and by name by Irenæus and others at the close of the second century, and was universally received by the Church. The internal character of the epistle too, in the former case, bears the strongest testimony to its Pauline origin. (See Jowett, i. 143.)

Its genuineness in fact was never questioned until the beginning of the present century. Objections were first started by Christ. Schmidt (Eidol. nos N. T. 1804). He has been followed by Schröder (Apostel Paulus, Kern (Tubing, Zeitschr. f. Theol. 1839, ii. p. 145), and Bour (Paulus der Apostel). De Wette at first condemned this epistle, but afterward withdrew his condemnation and frankly accepted it as genuine.

It will thus be seen that this epistle has been rejected by some modern critics who acknowledge the first to be genuine. Such critics of course attribute no weight to arguments brought against the first, such as we have considered already. The apocalyptic passage (ii. 1-12) is the great stumbling-block to them. It has been objected to, either as alluding to events subsequent to St. Paul's death, the Neronian persecution, for instance; or as betraying religious views derived from the Montanism of the second century; or lastly, as contradicting St. Paul's anticipations expressed elsewhere, especially in the first epistle, of the near approach of the Lord's advent. That there is no reference to Nero, we shall endeavor to show presently. That the doctrine of an Anti-christ did not start into being with Montanism, is shown from the allusions of Jewish writers even before the Christian era (see Bertholdt, Christ, p. 69; Gfrner, Jahrb. des Heils, pt. ii. p. 257); and appears still more clearly from the passage of Justin Martyr referred to in a former paragraph. That the language used of the Lord's coming in the second epistle does not contradict, but rather supplement the teaching of the first — postponing the day indeed, but still anticipating its approach as probable within the Apostle's lifetime — may be gathered both from expressions in the passage itself (e. g. ver. 7, "is already working"); and from other parts of the epistle (i. 8). The special objections to the epistle will scarcely command a hearing, and must necessarily be passed over here.

(4.) The most striking feature in the epistle is this apocalyptic passage, announcing the revelation of the "Man of Sin" (ii. 1-12); and it will not be irrelevant to investigate its meaning, bearing as it does on the circumstances under which the epistle was written, and illustrating this aspect of the Apostle's teaching. He had dwelt much on the subject; for he appeals to the Thessalonians as knowing this truth, and reminds them that he had told them these things when he was yet with them.

(1.) The passage speaks of a great apostasy which is to usher in the advent of Christ, the great judgment. There are three prominent figures in the picture, Christ, Antichrist, and the Restrainner. Antichrist is described as the Man of Sin, the Son of Perdition, as the Adversary who exalteth himself above all that is called God, as making himself out to be God. Later on (for apparently the reference is the same) he is styled the "mystery of lawlessness," "the lawless one." The Restraint is in one place spoken of in the masculine as a person
it and I shall have more to say about this subject in a future article.

II. Many different explanations have been offered of this passage. By one class of interpreters it has been referred to circumstances which passed within the circle of the Apostle's own experience, the events of his own lifetime, or the period immediately following. Others again have seen in it the prediction of a crisis yet to be realized, the end of all things. The former of these, the Prerestrians, have identified the "Man of Sin" with divers historical characters — with Caligula, Nero, Titus, Simon Magus, Simon son of Giora, the high-priest Ananias, etc., and have sought for a historical counterpart to the Restriiner in like manner. The latter, the Futurists, have also given various accounts of the Antichrist, the mysterious power of evil which is already working. To Protostrians, for instance, it is the Papacy; to the Greek Church, Mohammedanism. And in the same way each generation and each section in the Church has regarded it as a prophecy of that particular power which seemed to them and in their own time to be most fraught with evil to the true faith. A good account of these manifold interpretations will be found in Linnemann's Commentary on the Epistle. p. 294; Schlesius, ed. 11, 12. See also Alford, Proleg., (III.) Now in arbitrating between the Prerestrians and the Futurists, we are led by the analogy of other prophetic announcements, as well as by the language of the passage itself, to take a middle course. Neither is wholly right, and yet both are to a certain extent right. It is the special character of prophecy to speak of the distant future through the present and immediate. The persons and events falling within the horizon of the prophet's own view, are the types and representatives of greater figures and crises far off, and as yet but dimly visible. With this in view, and speaking of a delivery from the temporary oppression of Egypt or Babylon, spoke also of Messiah's kingdom. Thus our Lord himself, foretelling the doom which was even then hanging over the holy city, glanced at the future judgment of the world as typified and portrayed in this; and the two are so interwoven that it is impossible to disentangle them. Following this analogy, we may agree with the Prerestrians that St. Paul is referring to events which fell under his own cognizance; for indeed the Restriiner is said to be restraining now, and the mystery of iniquity is to be already working; while at the same time we may accept the Futurist view, that the Apostle is describing the end of all things, and that therefore the prophecy has not yet received its most striking and complete fulfillment. This commingling of the immediate and partial with the final and universal manifestation of God's judgments, characteristic of all prophecy, is rendered more easy in St. Paul's case, because he seems to have contemplated the end of all things as possibly, or even probably, near at hand; and therefore the particular manifestation of Antichrist, which he witnessed with his own eyes, would naturally be merged in and identified with the final Antichrist, in which the opposition to the Gospel will culminate.

(IV.) If this view be correct, it remains to inquire what particular adversary of the Gospel, and what particular restraining influence, St. Paul may have had in view. But, before attempting to approximate to an explanation, we may clear the way by laying down two rules. First, the imagery of the passage must be interpreted mainly by itself, and by the circumstances of the time. The symbols may be borrowed in some cases from the Old Testament; they may reappear in other parts of the New. But we cannot be sure that the same image denotes exactly the same thing in both cases. The language describing the Man of Sin is borrowed from some extent from the representation of Antitheta Epiaphones in the book of Daniel, but Antitheta cannot be meant there. The great adversary in the Revelation seems to be the Roman power; but it may be widely different here. There were even in the Apostolic age "many Antichrists;" and we cannot be sure that the Antichrist present to the mind of St. Paul was the same with the Antichrist contemplated by St. John. Secondly, in figurative passages it is arbitrary to assume that a person is denoted where we find a personification. Thus the "Man of Sin" here need not be an individual man; it may be a body of men, or a power, a spiritual influence. In the case of the Restriiner we seem to have positive ground for so interpreting it, since in one passage the heterer gender is used, "the thing which restrains" (ὁ τῆς ἡμετερίας), as if synonymous. (See Jowett's Essay on the Man of Sin, i. 178, rather for suggestions as to the mode of interpretation, than for the conclusion he arrives at.)

(V.) When we inquire then, what St. Paul had in view when he spoke of the "Man of Sin," and the Restriiner, we can only hope to get even an approximate answer by investigating the circumstances of the Apostle's life at this epoch. Now we find that the chief opposition to the Gospel, and especially to St. Paul's preaching at this time, arose from the Jews. The Jews had conspired against the Apostle and his companions at Thessalonian, and he only saved himself by secret flight. Thence he was forced to Berea, which he hurriedly left in the same way. At Corinth, where the Apostles to the Thessalonians were written, they persecuted him still further, raising a cry of treason against him, and bringing him before the Roman proconsul. These incidents explain the strong expressions he uses of them in these epistles: "They slew the Lord Jesus and the prophets, and persecuted the Apostles; they are hateful to God, the common enemies of mankind, whom the Divine wrath (ἡ ἀγέρπα) at length overtakes" (1 Thess. ii. 15, 16). With these facts in view, it seems on the whole probable that the Antichrist is represented especially by Judaism. With a prophetic insight the Apostle foresaw, as he contemplated the moral and political condition of the race, the approach of a great and overwhelming catastrophe. And it is not improbable that our Lord's predictions of the vengeance which threatened Jerusalem blended with the Apostle's vision, and gave a color to this passage. If it seem strange that "lawlessness" should be mentioned as the distinguishing feature of those whose vexed zeal for "the law" stimulated their opposition to the Gospel, we may appeal to our Lord's own words (Matt. xxiii. 28), describing the Jewish teachers: "within them are full of hypocrisy and lawlessness (δραματικά)". Corresponding to this view of the Antichrist, we
small probably be correct in regarding the Roman Empire as the restraining power, for so it was taken by many of the Fathers, though without altogether understanding its bearing. It was to Roman justice and Roman magistrates that the Apostle had recourse at this time to shield him from the enmity of the Jews, and to check their violence. At Philippi, his Roman citizenship extorted an ample apology for ill-treatment. At Thessalonica, Roman law secured him fair play. At Corinth, a Roman proconsul acquitted him of frivolous charges brought by the Jews. It was only at a later date under Nero, that Rome became the antagonist of Chris
tendom, and then she also in turn was falsely portrayed by St. John as the type of Antichrist.

Whether the Jewish opposition to the Gospel entirely exhausted St. Paul's conception of the "mystery of iniquity" as he saw it "already working" in his own day, or whether other elements did not also combine with this to complete the idea, it is impossible to say. Moreover at this distance of time and with our imperfect information, we cannot hope to explain the exact bearing of all the details in the picture. But following the guidance of his
testimony, we seem justified in adopting this as a probable, though only a partial, explanation of a very difficult passage. [Antichrist.] 5. A list of commentators has been given in the article on the First Epistle. J. B. L.

**THESAULONICA (Θεσσαλονίκη).** The original name of this city was Therma; and that part of the Macedonian shore on which it was situated ("Medusa flexu littoris sinus Thermae"), Plin. H. N. iv. 10; retained through the Roman period the designation of the Thracian Gulf. The history of the city under its earlier name was of no great note (see Herod. vii. 128 ff.; Thucyd. i. 61, ii. 28; Esch. De jfils, Leg. p. 31). It rose into importance with the decay of Greek nationality. Cassander the son of Antipater rebuilt and enlarged it, and named it after his wife Thessalonike, the sister of Alexander the Great. The first author in which the new appellation occurs is Polybius (xviii. 5). The name ever since, under various slight modifications, has been continuous, and the city itself has never ceased to be eminent. Solimani (though Adrianople may possibly be larger) is still the most important town of European Turkey, next after Constantinople.

Under the Romans, when Macedonia was divided into four governments, Thessalonica was made the capital of the second (Liv. xlv. 29); afterwards, when the whole was consolidated into one province, this city became practically the metropolis. Notices of the place now become frequent. Cleone was here in his exile (Phil. ii. 14-16); and some of his letters were written from hence during his journey to and from his own province of Cilicia. During the first Civil War it was the headquarters of the Pompeian party and the Senate (Dion Cass. xli. 29). During the second it took the side of Octavius (Pit. Brut. 46; Appian, B. C. iv. 118), whence apparently it reaped the honor and advantage of being made a "free city" (libera civitas, Plin. H. N. iv. 22, 23); a privilege which is commemorated on some of its coins. Strabo in the first century speaks of Thessalonica as the most populous city in Macedonia (μεγάλος τῶν ἀλλων εὐαρέστης), similar language to which is used by Lucian in the second century (Abb. 46).

Thus we are brought to St. Paul's visit (with Silas and Timothy) during his second missionary journey, and to the introduction of Christianity into Thessalonica. Three circumstances must here be mentioned, which illustrate in an important manner this visit and this journey, as well as the two Epistles to the Thessalonians, which the Apostle wrote from Corinth very soon after his departure from his new Macedonian converts. (1.) This was the chief station on the great Roman Road, called the Via Egnatia, which connected Rome with the whole region to the north of the Ægean Sea. St. Paul was on this road at Neapolis (Acts xvi. 11) and Philippi (xvi. 12-40), and his route from the latter place (xvii. 1) had brought him through two of the well-known minor stations mentioned in the Itineraries. [ΑΜΦΙΘΗΣΙΟΣ; ΑΠΩΛΟΛΙΝ] (2.) Placed second on this list, and in connection with other important Roman ways ("posita in gremio imperii Romanus," to use Cicero's words), Thessalonica was an invaluable centre for the spread of the Gospel. And it must be remembered that, besides its inland communication with the rich plains of Macedonia and with far more remote regions, its maritime position made it a great emporium of trade by sea. In fact it was nearly if not quite, on a level with Corinth and Ephesus in its share of the commerce of the Levant. Thus we see the force of what St. Paul says in his first epistle, shortly after leaving Thessalonica—ἀρ' ὑμῶν ἐκχύτηκα ὁ Κυρίος τού Καινίου οὐ μόνον ἐν τῇ Μακεδονίᾳ καί ἐν τῇ Ἀχαΐᾳ, ἀλλ' ἐν παντὶ τόπῳ (i. 8). (3.) The circumstance noted in Acts xvii. 1, that here was the synagogue of the Jews in this part of Macedonia, had evidently much to do with the Apostle's plans, and also doubtless with his success. Trade would inevitably bring Jews to Thessalonica: and it is remarkable that, ever since, they have had a prominent place in the annals of the city. They are mentioned in the seventh century during the Schatonic wars; and again in the twelfth by Eustathius and Benjamin of Tudela. In the fifteenth century there was a great influx of Spanish Jews. At the present day the numbers of residents in the Jewish quarter (in the southeast part of the town) are estimated at 10,000 or 20,000, out of an aggregate population of 60,000 or 70,000.

The first scene of the Apostle's work at Thessalonica was the Synagogue. According to his custom he began there, arguing from the Ancient Scriptures (Acts xvi. 2:); and the same general results followed, as in other places. Some believed, both Jews and proselytes, and it is particularly added, that among these were many influential women (ver. 4); on which the general body of the Jews, stirred up with jealousy, excited the Gentile population to persecute Paul and Silas (ver. 5-10). It is stated that the misinformations among the Jews continued for three weeks (ver. 2). Not that we are obliged to limit to this time the whole stay of the Apostles at Thessalonica. A flourishing church of Timothy is not mentioned in any part of the direct narrative of what happened at Thessalonica, though he appears as St. Paul's companion before at Philippi (Acts xvi. 12, and afterwards at Berea xvii. 14, 15); but from his subsequent mission to Thessalonica (I. Thess. i. 7; see Acts xviii. 5), and the mention of his name in the opening sentence of both epistles to the Thessalonians, we can hardly doubt that he had been with the Apostle through out.
was certainly formed there; and the epistles show that its elements were much more Gentile than Jewish. St. Paul speaks of the Thessalou

niots as having turned "from idols;" and he does not here, as in other epistles, quote the Jewish Scriptures. In all respects it is important to compare these two letters with the narrative in the Acts; and such references have the greater freshness from the short interval which elapsed between visiting the Thessalonians and writing to them. Such expressions as ευ θανατοὺς πολίτες (1 Thess. 1, 6), and ευ πολίτες ἄμφισσας (ib. 2), sum up the suffering and conflict which Paul and Silas and their converts went through at Thessalonica. (See also 1 Thess. ii. 14, 15, iii. 3, 4; 2 Thess. i. 4-7.) The persecution took place through the instrumentality of worthless idlers (των ἄχριστων ἄρχασ τινάς πουρασίων, Acts xvii. 5), who, instigated by the Jews, raised a tumult. The house of Jason, with whom the Apostles seem to have been residing, was attacked; they themselves were not found, but Jason was brought before the authorities on the accusation that the Christians were trying to set up a new King in opposition to the Emperor; a guarantee (ἐκ ὶ ἑαυτοῦ) was taken from Jason and others for the maintenance of the peace, and Paul and Silas were sent away by night southwards to Berea (Acts xvii. 5-10). The particular charge brought against the Apostles receives an illustration from the epistles, where the kingdom of Christ is prominently mentioned (1 Thess. ii. 12; 2 Thess. i. 5). So again, the doctrine of the Resurrection is conspicuous both in St. Luke's narrative (xvii. 3), and in the first letter (i. 10, iv. 14, 15). If we pass from these points to such as are personal, we are enabled from the epistles to complete the picture of St. Paul's conduct and attitude at Thessalonica, as regards his love, tenderness, and zeal, his care of individual souls, and his disinterest.

Of the first Christians of Thessalonica, we are able to specify by name the above-mentioned Jason (who may be the same as the Apostle's own kinsman mentioned in Rom. xvi 21), Demas (at least conjecturally; see 2 Tim. iv. 10), Gains, who shared some of St. Paul's perils at Ephesus (Acts xix. 25), Secundus (who accompanied him from Macedonia to Asia on the eastward route of his third missionary journey, and was probably concerned in the business of the collection; see Acts xx. 4), and especially Aristarchus (who, besides being mentioned here with Secundus, accompanied St. Paul on his voyage to Rome, and had therefore probably been with him during the whole interval, and is also specially referred to in two of the epistles written during the first Roman imprisonment. See Acts xxvii. 2; Col. iv. 10; Philom. 24; also Acts xix. 29, for his association with the Apostle at Ephesus in the earlier part of the third journey).

We must recur, however, to the narrative in the Acts, for the purpose of noticing a singular acca-
The Travellers to whom it is most important to refer, as having given full accounts of this place, are Clarke (Travels in Europe, etc., 1810–1823), Sir H. Holland (Travel in the Ionian Isles, etc., 1815), Coninxley (Voyage dans la Macedoine, 1821), and Leake (Northern Greece, 1835). An antiquarian essay on the subject by the Abbé Belley will be found in the Mémoires de l’Académie des Inscriptions, tom. xxxvii. Sect. Hist. pp. 121–146. But the most elaborate work is that of Tafel, the first part of which was published at Tubingen in 1825. This was afterwards reprinted as "Prolegomena" to the Dissertationes Thessalonicae et jacante Agro geographico, Berlin, 1839. With this should be compared his work on the "Via Egnatia." The Commentaries on the Epistles to the Thessalonians of course contain useful compilations on the subject. Among these, two of the most copious are those of Kosch (Berlin, 1849) and Lüneumann (Göttingen, 1850).

**THEUDAS (Theod: Theudas: and probably (Πορφυρίος), the name of an insurgent mentioned in Gamaliel’s speech before the Jewish council (Acts v. 35–39) at the time of the arraignment of the Apostles. He appeared, according to Luke’s account, as the leader of about four hundred men, who, according to the apparent eagerness of his followers to lead the people astray by false doctrine, but to accomplish his designs by violence, he undertook a high conceit of himself (λέγεται εἰς τὸν τάξον): was slain at last (ἀποκρίθη), and his party was dispersed and brought to nothing (διεπλήθεσαν καὶ εὑρεστοῦ ἐπὶ οὐδὲν). Josephus (Ant. xx. 5, § 1) speaks of a Theudas who played a similar part in the time of Claudius, about A.D. 44, i. e., some ten or twelve years at least later than the delivery of Gamaliel’s speech; and since Luke places his Theudas, in the order of time, before Judas the Galilean, who made his appearance soon after the death of Archelaus, i. e., A.D. 6 or 7 (Jos. B. J. ii. § 1; Ant. xvii. 1, § 6, xx. 5, § 30), it has been charged that the writer of the Acts either fabricated the speech put into the mouth of Gamaliel, or has wrought into it a transaction which took place thirty years or more after the time when it is said to have occurred (see Zeller, Die Apostelgeschichte, pp. 132 ff.). Here we may protest at the outset against the injustice of hastily imputing to Luke so gross an error; for having established his character in so many decisive instances in which he has allied himself to the course of the Acts, to persons, places, customs, and events in sacred and profane history, he has a right to the presumption that he was well informed also as to the facts in this particular passage. Every principle of just criticism demands that, instead of distrusting him as soon as he goes beyond our means of verification, we should avail ourselves of the support of his authority, for the purpose of upholding his credibility which the conditions of the case will allow.

Various solutions of the difficulty have been offered. The two following have been suggested as especially commendable themselves by their fulfillment of every reasonable requisition, and as ap.
proced by learned and judicious men: (1.) Since Luke represents Thesus as having preceded Judas the Galilæan [see vol. ii. p. 1495], it is certain that he could not have appeared later, at all events, than the latter part of the reign of Herod the Great. The very year, now, of that monarch’s death was remarkably turbulent; the land was overrun by belligerent parties, under the direction of insurrectionary chiefs or fanatics. Josephus mentions but three of these disturbers by name; he passes over the others with a general allusion. Among those whom the Jewish historian has omitted to name, among them, the Theudas whom Luke mentions, as an example of unsuccessful innovation and insubordination, the name was not an uncommon one (Winer, Realb. ii. 609); and it can excite no surprise that one Theudas, who was an insurgent, should have appeared in the time of Augustus, and another, fifty years later, in the time of Claudius. As analogues to this supposition is the fact that Josephus gives an account of four men named Simon, who followed each other within forty years, and of three named Judas, within ten years, who were all instigators of rebellion. This mode of reconciling Luke with Josephus is affirmed by Lardner (Credibility, vol. i. p. 429). Bengel, Kist, Ohlhausen, August (de Temp. in Act. Apost. Rec. p. 185), Winer, and others, support it, which is a matter of much learning and ability. He argues that the Theudas referred to by Gamaliel is the individual who occurs in Josephus under the name of Simon (R. J. ii. 4, § 2; Ant. xvii. 10, § 6), a slave of Herod, who attempted to make himself king, and the confusion which attended the vacancy of the throne when that monarch died. He urges the following reasons for that opinion with regard to this Simon:—The last, and among those who disturbed the public peace at that time, would be apt to occur to Gamaliel as an illustration of his point. secondly, he is described as a man of the same lofty pretensions (καὶ τάμα ἐκτένεις παν διστασα — λέγων εἶνα τιν υπέρ τιν —); thirdly, he died a violent death, which Josephus does not mention as true of the other two insurgents: fourthly, he appears to have had comparatively few adherents, in conformity with Luke’s λάτετε περασσόμενοι: and, lastly, his having been originally a slave accounts for the twofold appellation, since it was very common among the Jews to assume a different name on changing their occupation or mode of life. It is very possible, therefore, that Gamaliel speaks of him as Thesus, because, having borne no valid name so long at Jerusalem, he was best known by it to the members of the Sanhedrin; and that Josephus, on the contrary, who wrote for Romans and Greeks, speaks of him as Simon, because it was under that name that he set himself up as king, and in that way acquired his foreign notoriety (see Fœd. Hist. v. 9).

There can be no objection to either of the foregoing suppositions: both are reasonable, and both must be disproved before Luke can be justly charged with having committed an anachronism in the passage under consideration. So impartial a witness as Josephus, the historian of the Jews (Geschichte der Israelticher, ii. Anh. p. 76), admits the reasonableness of such combinations, and holds, in this case to the credibility of Luke, as well as that of Josephus. The considerate Lardner (Credibility, vol. i. p. 481), therefore, could well say here, "It is impossible to say whether one Theudas himself may have misplaced the time of Thesus, instead of Luke, who is charged with that oversight. Calvin’s view that Judas the Galilæan appeared not after but before Thesus (μετά τοῦ θεοῦ: non super vel praebent), and that the examination of the Apostles before the Sanhedrim occurred in the time of Claudius (contrary to the manifest chronological order of the Acts), deserves mention only as a mark of the progress which has been made in Biblical exegesis since his time. Among other writers, in addition to those already mentioned, who have discussed this question or touched upon it, are the following: Wieseler, Chronologie der Apost. Zeitalters, p. 138; Neumer, Geschichte der Pflanzung, i. 73, 76; Guericke, Beiträge zur Kritik, ins T. Th., p. 90; A. Köhler, Herizg’s Real-Enzyk. xvi. 29-41; Baumgart, Apostelgeschichte, i. 114; Lightfoot, Holm. ii. 704; Biscove, History of the Acts, p. 428; and Wordsworth’s Commentary, ii. 26.

H. B. H.

THIEVES, THE TWO

The men who under this name appear in the history of the Crucifixion were robbers (Ἀπαράτα) rather than thieves (ἀπεταῖ), belonging to the lawless bands by which Palestine was at that time and afterwards infested (Jos. Ant. xvii. 10, § 8, xx. 8, § 10). Against these brigands every Roman procurator had to wage continual war (Jos. B. J. ii. 13, § 2). The parliament of the Good Samaritan shows how common it was for them to attack and plunder travellers even on the high-road from Jerusalem to Jericho (Luke x. 30). It was necessary to use an armed police to encounter them (Luke xxii. 52). Often, as in the case of Barabbas, their wild life was connected with a fanatical zeal for freedom, which turned the marauding attack into a popular insurrection (Mark xv. 7). For crimes such as these the Romans had but one sentence. Crucifixion was the penalty at once of the robber and the rebel (Jos. B. J. ii. 13, § 2).

Of the previous history of the two who suffered on Golgotha we know nothing. They had been tried and condemned, and were waiting their execution before our Lord was accused. It is probable enough, as the death of Barabbas was clearly expected at the same time, that they were among the σαρακαςαρατί who had been imprisoned with him, and had taken part in the inscription in which zeal, hate, and patriotism, and lust of plunder were mingled in wild confusion.

They had expected to die with Jesus Barabbas. [Comp. Barabbas.] They find themselves with one who bore the same name, but who was described in the superscription on his cross as Jesus of Nazareth. They could hardly fail to have heard something of his fame as a prophet, of his triumphal entry as a king. They now find Him sharing the
same fate as themselves, condemned on much the same charge (Luke xxiii. 5). They too would bear their crosses to the appointed place, while He smiled by the way. Their garments would be parted among the soldiers. For them also there would be the drugged wine, which He refused, to dull the sharp pain of the first phers of the Cross. They catch at first the prevailing tone of scorn. A king of the Jews who could neither save himself nor help them, whose followers had not even fought for him (John xiii. 30), was strangely unlike the many chieftains whom they had probably known claiming the same title (Jos. Ant. xxii. 10, § 8); strangely unlike the "notable prisoner" for whom they had not hesitated, it would seem, to incur the risk of bloodshed. But over one of them there came a change. The darkness which, at noon, was beginning to steal over the sky, awed him, and the Divine patience and silence and meekness of the sufferer touched him. He looked back upon his past life, and saw an infinite evil. He looked to the man dying on the cross beside him, and saw an infinite compassion. There indeed was one, unlike all other "kings of the Jews" whom the robber had ever known. Such a one must be all that He had claimed to be. To be forgotten by that king seems to him now the most terrible of all punishments: to take part in the triumph of his return, the most blessed of all hopes. The yearning prayer was answered, not in the letter, but in the spirit. To him alone, of all the myriad who had listened to Him, did the Lord speak of Paradise [comp. Paradisus], waking with that word the thoughts of a purer past and the hopes of an immediate rest. But its joy was to be more than that of fair groves and pleasant streams. "Thou shalt be with me." He should be remembered there.

We cannot wonder that a history of such wonderful interest should at all times have fixed itself on men's minds, and led them to speculate and ask questions which we have no data to answer. The simplest and truest way of looking at it has been that of those who, from the great Alexandrian thinker (Origen, in Hom. iii.) to the writer of the most popular hymn of our own times, have seen in the flying thief "the first great typical instance that the passion justified by faith within the deeds of the law." Even those whose thoughts were less deep and wide acknowledged that in this and other like cases the baptism of blood supplied the place of the outward sign of regeneration (Hilar. De Tr. Bapt. c. x.; Jerome, Ep. xiii.). The logical speculations of the Pelagian controversy overloaded, in this as in other instances, the clear judgment of Augustine. Maintaining the absolute necessity of baptism to salvation, he had to discuss the question whether the penitent thief had been baptized or not, and he oscillates, with melancholy indecision, between the two answers. At times he is disposed to rest contented with the solution which had satisfied others. Then again he ventures on the conjecture that the water which sprang forth from the pierced side had sprinkled him, and so had been a sufficient baptism. Finally, yielding to the inexorable logic of a sacramental theory, he rests in the assumption that he probably had been baptized before, either in his prison or before he entered on his robber-life (comp. De Animæ, i. 11, iii. 12; Seren. de Temp. 156; Retract. i. 26, iii. 18, 55).

The conjecture that a turn never took on the circumstances of the history. Bengel, usually acute, here oversteps the mark, and finds in the Lord's words to him, dropping all mention of the Messianic kingdom, an indication that the penitent thief was a Gentile, the impenitent a Jew, and that thus the scene on Calvary was typied of the position of the two Churches (Iwano N. T. in Luke xiiiii.). Instead, he perceives in the Lord the mark all the language of one who had all along listened with grief and horror to the revilings of the multitude, the burst of an indigation previously suppressed. The Apocryphal Gospels, as usual, do their best to lower the Divine history to the level of a legend. They follow the repentant robber into the unseen world. He is the first to enter Paradise of all mankind. Adam and Seth and the patriarchs find him already there bearing his cross. Michael the archangel had led him to the gate, and the fiery sword had turned aside to let him pass (Evron. N. c. ii. 10). Names were given to the two robbers. Demas or Diomas was the penitent thief, hanging on the right, Gestas the impenitent on the left (Evron. N. c. ii. 10; Nicolas. Josephus c. 3). The cry of entreaty is expanded into a long wordy prayer (Varr. Jos. i. 67), and the promise suffers the same treatment. The history of the Infancy is made prophetic of that of the Crucifixion. The holy family, on their flight to Egypt, come upon a band of robbers. One of them, Titus (the names are different here), has compassion, purchases the silence of his companion, Demasius, and the infant Christ prophesies that after thirty years Titus shall be excommunicated with him, and shall go before him into Paradise (Evron. Infrat. c. 23). As in other instances (comp. Macri), so in this, the fancy of inventors seems to have been fertile in names. Bede (Collect. gives Matha and Joca as those which prevailed in his time. The name given in the Gospel of Nicodemus has, however, kept its ground, and St. Diosibus takes his place in the legend of the Syrian, the Greek, and the Latin Churches.

All this is, of course, pedantic enough. The captious objections to the narrative of St. Luke as inconsistent with that of St. Matthew and St. Mark, and the inference drawn from them that both are more or less legendary, are hardly less puerile. Strachan (De Joe, ii. 519; Ewald, Christus, grch. v. 438) The obvious answer to this is that which has been given by Origen (Hom. 35 in Matt.), Chrysostom (Hom. 88 in Matt.), and others (Comp. Suer. a. P. 10). Both began by reviling. One was subsequently touched with sympathy and awe. The other explanation, given by Cyprian (De Passione Domini), Augustine (De Cons. intuit. iii. 163), and others, which forces the statement of St. Matthew and St. Mark into agreement with that of St. Luke by assuming a symphonic, or symposia, or commixtus, is, it believed, far less satisfactory. The technical word does but thinly veil the contradiction which this hypothesis admits but does not explain.

E. H. P.

THINNATHAH (থিন্নাথাহ): Thinnarthi. A town in the allotment of Damascus (Josh. xix. 43 only). It is named between Eon and Ekron. The name is the same as that of the residence of Samson's wife (inaccurately given in A. V. Timnah); but the position of that place which seems to agree with the modern Zerkeb, is not so suitable, being fully ten miles from Akko, the representative of Ekron. Timnah appears to have been almost as
common a name as Gilbeach, and it is possible that there may have been another in the allotment of Dan besides that represented by Tobiah.

THIBBE (Θιμήθη [Alex.] Θιμάθη). A name found only in Tob. i. 2, as that of a city of Naphthali which Tobit's ancestor had been carried captive by the Assyrians. The real interest of the name resides in the fact that it is maintained by some interpreters (Hiller, Comm. pp. 256, 947; Rehfeld, Patr. p. 1055) to be the place which had the glory of giving birth to Elijah the Tishbite.

This, however, is, at the best, very questionable, and derives its main support from the fact that the word employed in I K. xvii. 1 to denote the relation of Elijah to Gilbeach, if pointed as it now stands in the Received Hebrew Text, signifies that he was not a native of Gilbeach but merely a resident there, and was not in both the different and foreign district, but it is also possible to point the word so that the sentence shall mean "from Tishbi of Gilbeach," in which case all relation between the great Prophet and Thibbe of Naphthali at once falls to the ground. [See Tishbite.]

There is, however, a truly singular variation in the text of the passage in Tobit, a glance at which will show how hazardous it is to base any definite geographical conclusions upon it:

A.V. | Vulgate | LXX | Revised Greek Text | Vetus Latina
--- | --- | --- | --- | ---
Out of Thibbe which is at the right hand of that city which is called properly Naphthali in Gilbeach above Galilee of Abser. (Morgen, behind see above Abser. Kedesh of Naphthali in Gilbeach, Judg. iv. 6.]

* L. e. probably, Hazor.

Assuming that Thibbe, and not Thibbe, is the correct reading of the name, it has been conjectured (apparently for the first time by Keil, Comm. ober die Könige, p. 217) that it originated in an erroneous rendering of the Hebrew word 실phan, which word in fact occurs in the Hebrew version of the passage, and may be pointed in two ways, so as to mean either "from the inhabitants of," or "from Tishbi," i. e. Thibbe. The reverse suggestion, in respect of the same word in I K. xvii. 1, has been already alluded to. [Tishbite.]

This, but though very ingenious, and quite within the bounds of possibility, is at present a mere conjecture, since none of the texts support it, and there is no other evidence in its favor.

No name resembling Thibbe or Thibbe has been yet encountered in the neighborhood of Kedesh or Sejuf, but it seems impossible to suppose that the name of Shihul in Judg. xxi. 19 — can be more invention.

G.

THISTLE. [THOMAS AND THISTLED.]

THOMAS (Θωμᾶς: Thomas), one of the Apostles. According to Eusebius (H. E. i. 13) his real name was Judas. This may have been a mere confusion with Thaddæus, who is mentioned in the extract. But it may also be that Thomas was a twin.

The word 实phan, Thoma, a twin; and so it is translated in John xi. 16, xii. 2, ῥαθή: Thoma, of this name has grown the "tradition that he had a twin-sister Lydia (Petres Apos. p. 272), or that he was a twin-brother of our Lord (Thilo, Acts Thomas, p. 94); which last, again, would confirm his identification with Judas (comp. Matt. xiii. 55). He is said to have been born at Antioch (Petres Apos. p. 272). In the catalogue of the Apostles he is coupled with Matthew in Matt. x. 3, Mark iii. 18, Luke vi. 15, and with Philip in Acts i. 13.

All that we know of him is derived from the Gospel of St. John; and this amounts to three traits, which, however, so exactly agree together, that, slight as they are, they place his character before us with a precision which belongs to no other of the twelve Apostles, except Peter, John, and Judas Iscariot. This character is that of a man slow to believe, seeing all the difficulties of a case, subject to despondency, viewing things on the darker side, and yet full of ardent love for his Master.

The first trait is his speech when our Lord determined to face the dangers that awaited Him in Judea on his journey to Bethany. Thomas said to his fellow-disciples, "Let us also go (καλείτω) that we may die with Him" (John xi. 16). He entertained no hope of His escape — he looked on the journey as leading to total ruin; but he determined to share the peril. "Though He slay me, yet will I trust in Him." The second was his speech during the Last Supper. "Thomas saith unto Him, Lord, we know not whither thou goest, and how can we know the way" (xiv. 5)? It was the prosaic, incredulous doubt as to moving a step in the unseen future, and yet an eager inquiry to know how this step was to be taken.

The third was after the Resurrection. He was absent — possibly by accident, perhaps characteris-

* In Cant. vii. 4 [A. V. 3], it is simply ἑξῆς, exactly our "Twin." The frequency of the name in England is derived not from the Apostle, but from St. Thomas of Canterbury.
tionally—from the first assembly when Jesus and appeared. The others told him what they had seen. He broke forth into an exclamation, the terms of which convey to us at once the vehemence of his doubt, and at the same time the vivid picture that his mind retained of his Master’s form as he had last seen Him lifeless on the cross. “Except I see in my hands the print of the nails, and put my finger into the print of the nails, and thrust my hand into his side, I will not, I cannot believe” (John xx. 25).

On the eighth day he was with them at their gathering, perhaps in expectation of a recurrence of the visit of the previous week; and Jesus stood amongst them. He uttered the same exclamation, “Peace be unto you;” and then turning to Thomas, as if this had been the special object of his appearance, uttered the words which convey as strongly the sense of condemnation and tender reproof, as those of Thomas had shown the sense of hesitation and doubt. “Bring thy finger hither [λάβε as if Himself pointing to his wounds] and see my hands; and bring thy hand and thrust it in my side.” He was habitually unbelieving (ἁμαρτάνοντας).” He answers to the words that Thomas had spoken to the ears of his fellow-disciples only; but it is to the thought of his heart rather than to the words of his lips that the Searcher of hearts answers. . . . Eye, ear, and touch, at once appealed to, and at once satisfied— the form, the look, the voice, the solid and actual body; and not the senses only, but the mind satisfied too: the knowledge that searches the very reins and the heart: the light that becometh to the end, infinite and eternal” (Arnold’s Sermon vi. 238).

The effect on Thomas is immediate. The conviction produced by the removal of his doubt became deeper and stronger than that of any of the other Apostles. The words in which he expressed his belief contain a further assertion of his Master’s Divine nature than is contained in any other expression used by Apostolic lips. "My Lord, and my God.” Some have supposed that κύριος refers to the human, ἄνθρωπος to the Divine nature. This is too artificial. It is more to the point to observe the exact terms of the sentence, uttered (as it were) in unexpressed voice. “It is then my Lord and my God!” And the word "my” gives it a personal application to himself. Additional emphasis is given to this declaration from its being the last incident narrated in the direct narrative of the Gospel (before the supplement of ch. xxii.), thus corresponding to the opening words of the prologue. “Thus Christ was acknowledged on earth to be what St. John had in the beginning of his Gospel declared him to be from all eternity; and the words of Thomas at the end of the 28th chapter do not repeat the truth which St. John had stated before in his own words at the beginning of the first” (Arnold’s Sermon vi. 401).

The answer of our Lord sums up the moral of the whole narrative: “Because” θνατxr3 he had seen me, Thomas last believed: blessed are they that have not seen me, and yet have believed” (xx. 29). By this incident, therefore, Thomas, “the Doubting Apostle,” is raised at once to the Theologian in the original sense of the word. “Ab eo dubitatum est,” says Augustine, “ne nobis dubitaretur.” It is this feature of his character which has been so much remarked in later ages, when for the first time its peculiar lesson became apparent. In the famous statue of him by Thorwaldsen in the church at Copenhagen, he stands, the thoughtful, meditative skeptic, with the rule in his hand for the due measuring of evidence and argument. This scene was one of the favorite passages of the English theologian who in this century gave so great an impetus to the progress of free inquiry combined with fervent belief, of which Thomas is so remarkable an example. Two discourses on this subject occur in Dr. Arnold’s published volumes of Sermons (v. 312, vi. 233). Amongst the last words which he repeated before his own sudden death (Life and Correspondence, 7th ed. p. 617) was the blessing of Christ on the faith of Thomas.

In the N. T. we hear of Thomas only twice again, once on the Sea of Galilee with the seven disciples, where he is ranked next after Peter (John xxii. 2), and again in the assemblage of the Apostles after the Ascension (Acts i. 13).

The close of his life is filled with traditions or legends; which, as not resting on Biblical grounds, may be briefly dispatched.

The earlier traditions, as believed in the 4th century (Eds. H. E. i. 13, i. 1: Socrat. H. E. i. 19), represent him as preaching in Parthia or Persia, and finally buried at Edessa (Socr. H. E. i. 18). Chrysostom mentions his grave at Edessa, as being one of the four genuine tombs of Apostles; the other three being Peter, Paul, and John (Hom. in Heb. 29). With his burial at Edessa agrees the story of his sending Thaddeus to Abgarus with our Lord’s letter (Eus. H. E. i. 13).

The later traditions carry him further East, and ascribe to him the foundation of the Christian church in Malabar, which still goes by the name of the Christians of St. Thomas; and his tomb is shown in the neighborhood. This, however, is now usually regarded as arising from a confusion with a later Thomas, a missionary from the Nestorians.

His martyrdom (whether in Persia or India) is said to have been occasioned by a lance; and is commemorated by the Latin Church on December 21, by the Greek Church on October 6, and by the Indians on July 1.

For these traditions and their authorities, see Butler’s Lives of the Saints, December 21. An apocryphal “Gospel of Thomas” (chiefly relating to the Infancy) published in Tischendorf’s Evangelia Apocrypha. The Apocryphal “Acts of Thomas” by Thilo (Codex Apocryphon) A. P. S.

THOMAS (Θωμᾶς; [Vat. Θωμᾶς])

THOMAS of TAMIH (1 Esdras v. 32).
THORN IN THE FLESH

THORNS AND THISTLES. There appear to be eighteen or twenty Hebrew words which point to different kinds of prickly or thorny shrubs, but the context of the passages where the several terms occur afford, for the most part, scarcely a single clue whereby it is possible to come to anything like a satisfactory conclusion with regard to their respective identifications. These words are variously rendered in the A. V. by "thorns," "briers," "thistles," etc. It was a hopeless task to enter into a discussion of these numerous Hebrew terms; we shall not therefore attempt it, but confine our remarks to some of the most important names, and those which seem to afford some slight indications as to the plants they denote.

1. *Abid (אبيد; אבד: *rihanus) occurs as the name of some spinous plant in Judges, ix. 14, 15, where the A. V. renders it by "bramble" (Marg. "thistle"), and in Ps. lxi. 9 (A. V. "thorns"). The plant in question is supposed to be Lycium Europaeum, or L. africum (box-thorn), both of which species occur in Palestine (see Strand, Flora Palestina. Nos. 124, 125). Dioscorides (i. 119) thus speaks of the *Palamos*: "The rhamnus, which some call *rhamnosus*, others *laevocladus*, the Romans white thorn, or *Ceratia*, and the Carthaginians *aviana*, is a shrub which grows around hedges; it has erect branches with sharp spines, like the *vulgus* (hawthorn?), but with small, oblong, thick soft leaves." Dioscorides mentions three kinds of rhamnus, two of which are identified by Sprengel, in his Commentary, with the two species of Lycium mentioned above. See also Helianthus su vetus, *Ps. Song, etc.* ii. ch. 78; Ramwell, Trav. Lib. iii. ch. 8; Prosper Alpinus, *De Plent. Egyp*. p. 21; Celsius, Hierob. i. 199. The Arabic name of this plant (أبيذ, ابيد) is identical with the Hebrew; but it was also known by the name of *Atrej (*أبرج).

*Lycium Europaeum* is a native of the south of Europe and the north of Africa; in the Grecian lands it is common in hedges (English Cytop. - *Lycium*) See also the passages in Deirou and Ramwoll cited above.

2. *Chidek* (חידק; *Cheikh, *χιδηκας: *spina, poliarius) occurs in Prov. xv. 19, "The way of the slothful is as an hedge of *Chidek*" (A. V. "thorns"), and in Mic. vii. 4, where the A. V. has "brier." The Alexand. LXX., in the former passage, interprets the meaning thus: "The ways of the slothful are strewed with thorns." Celsius (Hierob. i. 35), referring to the Heb. term to the Arabic *Chidek* (*حيدك*), is of opinion that some spinous species of the *Sodomium* is intended. The Arabic term clearly denotes some kind of *Sodomium*; either the S. melongena, var. excentranum, or the S. sodomaeum ("apple of Sodom"). Both these kinds are beset with prickles; it is hardly probable, however, that they are intended by the Heb. word.

Several varieties of the egg-plant are found in Palestine, and some have supposed that the famed Dead Sea apples are the fruit of the *S. sodomaeum* when sufferling from the attacks of some insect; but see on this subject V/ine or *Sodom*. The Heb. term may be generic, and intended to denote any thorny plant suitable for hedges.

3. *Chidek* (חידק: אֲבָדָא, אבָדָא, אָבָדָי, קאַדוֹף: *poliuros, pygon, spinis, tribulacae*), a word of very uncertain meaning which occurs in the sense of some thorny plant in L. xxxiv. 13; Hos. i. 6; Prov. xvii. 9; Cant. ii. 2; 2 K. iv. 9, the *chidek* of Lebanon sent to the cedar of Lebanon," etc. See also Job xxxi. 40: "Let *chidek* (A. V. "thistle")...
THORNS AND THISTLES

plants indicated by the Greek ἀπόκλισις and the Latin tribulus. Of the two kinds of land tribuli mentioned by the Greeks (Dioscorides, iv. 151), Theophrastus, Hist. Plant. vi. 7, § 5, one is supposed by Sprengel, Stackhouse, Roxle, and others, to refer to the Tribulus terrestris, Linnaeus, the other to the Poegonia Cretica; but see Schneider's Comment. on Theophrastus l.c., and Du Mollin (Flore Poetique Ancienne, p. 305), who identifies the tribulus of Virgil with the Centaurea calcitrapa, Linnaeus, ("star-thistle"). Ceilus (Hierob. ii. 128) argues in favor of the Poegonia Arctica, of which a figure is given in Shaw's Travels (Catal. Plant. No. 229), see also Forskal, Flor. Arabia, p. 88. It is probable that either the Tribulus terrestris, which, however, is not a spiny or thorny plant, but has spines on the fruit, or else the C. calcitrapa, is the plant which is more particularly intended by the word dardar.

Tribulus Terrestris.

neb' brings the banks of the Jordan, and flourishes on the marshy banks of the Lake of Tiberias; it forms either a shrub or a tree, and, indeed, is quite common all over the country. The Arabs have the terms Sijman, Sider, Dhal, Nabot, which appear to denote either varieties or different species of Pulinas and Zizyphus, or different states perhaps of the same tree; but it is a difficult matter to assign to each its particular significance. The Nativitis (חַלֵּית) of Is. vii. 19, iv. 13, probably denotes some species of Zizyphus. The "crown of thorns" which was put in derision upon our Lord's head just before his crucifixion, was probably composed of the thorny twigs of the neb' (Zizyphus Spina Christi) mentioned above; being sharpest everywhere, they could readily be procured. "This point," says Hasselquist (Trav. p. 288), was very suitable for the purpose, as it has many sharp thorns, and its flexible, plant, and round branches might easily be plaited in the form of a crown: and what, in my opinion, seems to be the greatest proof of, that the leaves much resemble those of ivy, as they are a very deep green. A Perhaps the enemies of Christ would have left a plant somewhat resembling that with which emperors and generals were used to be crowned, that there might be calamity even in the punishment." Still, as Rosenmuller (Bibl. Bot. p. 291) remarks, "there being so many kinds of thorny plants in Palestine, all conjectures must remain uncertain, and can never lead to any satisfactory result." Although it is not possible to fix upon any one definite Hebrew word as the representative of any kind of "thistle," yet there can be no doubt this plant must be occasionally alluded to. Hasselquist (Trav. p. 290), noticed six species of Ormont (Orobus) and Cici (Zizyphus Spina Christi); this latter plant is the neb' of the Arabs, which grows abundantly in Syria and Palestine, both in wet and dry places; Dr. Hooker noticed a specimen nearly 40 feet high, spreading as widely as a good Quercus ilex in England. The

a Hasselquist must have intended to restrict the similarity here spoken of entirely to the color of the leaves; for the plants do not in the slightest degree resemble each other in the form of the leaves.

5. Shāmīr (שְׁמָיר), almost always found in connection with the word šulḥān (שְׁלֹחַ), occurs in several places of the Hebrew text; it is variously rendered by the LXX, χῆρας, χῆρας, δῆμος, δυνατοτητα, ἀγαθά. According to Abr. Al'awi, cited by Ceilus (Hierob. ii. 138), "the Saumur (سمير) of the Arabs is a thorny tree; it is a species of Sidra which does not produce fruit." No thorny plants are more conspicuous in Palestine and the Bible lands than different kinds of Rhamnus such as Rhamnus nestorius (Christ's Thorn), and Zizyphus Spina Christi; this latter plant is the neb' of the Arabs, which grows abundantly in Syria and Palestine, both in wet and dry places; Dr. Hooker noticed a specimen nearly 40 feet high, spreading as widely as a good Quercus ilex in England. The
are never cut up, but set on fire where they grow. They are cut up only for the lime-kiln." See also p. 342 for other scriptural allusions. 2 W. 11.

* THOROW, Ex. xiv. 16 (A. V.), in the ed. of 1611, the old form for "through." 11.

* THOROWOUT, originally in Num. xxviii. 29, but superseded by "throughout." 11.

* THOUGHT. The phrase "to take thought" is used in the A. V. (1 Sam. ix. 5; Matt. vi. 25), 27, 28, 31, 34, x. 19, and the parallel passages) in the sense of "to be anxious" (Gr. μεταρρύθμ. So often in the older English writers. A.

THRACIA (Ωπαίας, Φίλ). A Thracian horseman is incidentally mentioned in 2 Macc. xii. 35, apparently one of the body-guard of Gorgias, governor of Ilmeneus under Antiochus Epiphanes. Thrace at this period included the whole of the country within the boundary of the Strymon, the Danube, and the coasts of the Egean, Propontis, and Euxine — all the region, in fact, now comprehended in Bulgaria and Romelia. In the early times it was inhabited by a number of tribes each under its own chief, having a name of its own and preserving its own customs, although the same general character of ferocity and addiction to plunder prevailed throughout. Thucydides describes the limits of the country at the period of the Peloponnesian war, when Sitalces king of the Odrysae, who inhabited the valley of the Hebrus (Μύρικας), had acquired a predominant power in the country, and derived for that was for those days a large revenue from it. This revenue, however, seems to have arisen mainly out of its relations with the Greek trading communities established on different points of its seacoast. Some of the clans, even within the limits of his dominion, still retained their independence; but after the establishment of a Macedonian dynasty under Lyssimachus, the central authority became more powerful; and the wars on a large scale which followed the death of Alexander furnished employment for the martial tendencies of the Thracians, who found a demand for their services as mercenaries everywhere. Cavalry was the arm which the chiefly furnished, the rich pastures of Romelia abounding in horses. From that region came the greater part of Sitalces' cavalry, amounting to nearly 50,000.

The only other passage, if any, containing an allusion to Thrace, to be found in the Bible, is Gen. x. 2, where — on the hypothesis that the sons of Japhet, who are enumerated, may be regarded as the eponymous representatives of different branches of the Japhetic family of nations — Tilus has by some been supposed to mean Thrace; but the only ground for this identification is a fancied similarity between the two names. A stronger likeness, however, might be urged between the name Traas and that of the Tyres or Tyrsen, the ancestors of the Italian Etruscans, whom, on the strength of a local tradition, Herodotus places in Lydia in the ante-historical times. Strabo brings forward several facts to show that, in the early ages, Thracians existed on the Asiatic as well as the European shore; but this circumstance furnishes very little help towards the identification referred to.

a * On the Biblical names of thorn and thistle, see Dietrich's Abhandlungen fur Semitische Wortforschung, pp. 53-95 (Leips. 154).

THRESHOLDS, THE 3239 (Herodotus, i. 94, v. 3 ff; Thucydides, ii. 97-101, Tacitus, Annal. iv. 35; Horat. Sat. i. 6.) J. W. B.

THRA'CEAS (Θρακιας: Tharaces). Father of Apollonius (1). 2 Macc. iii. 5. [Απολλονίου]

* THREAD. [Handicraft, 6; Lace.]

THREE TAVERNS (Τρεις Ταβερνάς: Tres Tuberaria), a station on the Appian road, along which St. Paul travelled from Puteoli to Rome (Acts xviii. 15). The distances, reckoned southward from Rome, are given as follows in the Antiochene Itinerary: "to Acria, 16 miles; to Three Taverns, 17 miles; to Appi Forum, 10 miles;" and, comparing this with what is observed still along the line of road, we have no difficulty in coming to the conclusion that "Three Taverns" was near the modern Citerne. For details see the Dict. of Greek and Rom. Geog. ii. 1226 b, 1291 b.

Just at this point a road came in from Antium on the coast. This we learn from Cicero says of a journey from that place to his villa at Formiae (iii. ii. 12). There is no doubt that "Three Taverns" was a frequent meeting-place of travellers. The point of interest as regards St. Paul is that he met there a group of Christians who had in a previous group whom he had met at Appi Forum came from Rome to meet him in consequence of having heard of his arrival at Puteoli. A good illustration of this kind of intercourse along the Appian Way is supplied by Josephus (Ant. xvii. 12, § 1) in his account of the journey of the pretender Herod-Alexander. He landed at Puteoli (Hecatearchus) to gain over the Jews that were there; and when the report went about him that he was coming to Rome, the whole multitude of the Jews that were there went out to meet him, ascribing it to Divine Providence that he had so unexpectedly escaped." J. S. H.

THRESHING. [Agriculture, i. 43 ff.]

* THRESHING — FLOOR. [Agriculture; Ruth, Book of.]

THRESHOLD. 1. (See Gate.) 2. Of the two words so rendered in A. V., one, vulnum, seems to mean sometimes, as the Targum explains it, a projecting beam or corbel, at a higher point than the threshold properly so called (Ex. ix. 3, x. 4, 18).

THRESHOLDS, THE (Ἐρυθραίατοι: in transl. ωυαγαυριν: ωτώδες). This word, άρυθραίατος appears to be inaccurately rendered in Neh. xii. 25, though its real force has perhaps not yet been discovered. The "house of the Asuppim" (γίνεται άρυθραίατος), or simply "the Asuppim," is mentioned in 1 Chr. xxvi. 15, 17, as a part, probably a gate, of the enclosure of the "house of Jehohavah, i. e. the Tabernacle, as established by David — apparently at its S. W. corner. The allusion in Neh. xii. 25 is undoubtedly to the same place, as is shown not only by the identity of the name, but by the reference to David (ver. 24; compare 1 Chr. xxvi. 1). Asuppim is derived from a root signifying

a άρυθραίατος: adhærere: timor (see Gen. p. 1141.)
"to gather" (Gesenius, Thek. p. 131), and in the absence of any indication of what the "house of the Assyrum" was, it is variously explained by the lexicographers as a store-chamber (Gesenius), or a place of assembly (Fürst, Lehmann). The LXX. in 1 Chr. xxvi. have ἀλέας Ερειπίων: Vulg. dominum sanctorum concilium. On the other hand the Targum renders the word by ריעון, "a lintel," as if deriving it from ריעון.

The Hebrew term close applies to any elevated seat occupied by a person in authority, whether a high-priest (1 Sam. i. 9), a judge (1 Sa. xxiii. 5), or a military chief (Jer. i. 15). The use of a chair in a country where the usual postures were squattting and reclining, was at all times regarded as a symbol of dignity (2 K. iv. 19: Prov. ix. 14). In order to specify a throne in our sense of the term, it was necessary to add to close the notion of royalty; hence the frequent occurrence of such expressions as "the throne of the kingdom" terms ריעון and the Hophal form ריעוןו occur nowhere else. The king sat on his throne on state occasions, as when granting audiences (1 K. ii. 19, xxi. 10; Esth. v. 1), receiving honour (2 K. xi. 19), or administering justice (Prov. xx. 8). At such times he appeared in his royal robes (1 K. xxi. 10; Jon. iii. 6; Acts xii. 21). The throne was the symbol of supreme power and dignity (Gen. xxviii. 40), and hence was attributed to Jehovah both in respect to his heavenly abode (Ps. xi. 4, ciii. 19; Is. lix. 1: Acts vii. 49; Rev. iv. 2), or to his earthly abode at Jerusalem (Jer. iii. 17), and more particularly in the Temple (Jer. xviii. 12; Ez. xliii. 7). Similarly "to sit upon the throne" implied the exercise of regal power (Deut. xvii. 18; 1 K. xvi. 11; 2 K. xx. 30; Esth. v. 2), and "to sit upon the throne of another person," succession to the royal dignity (1 K. i. 13). In Neh. iii. 7, the term close is applied to the official residence of the governor, which appears to have been either on or near to the city wall.

W. L. B.

THUMMIM. [Urim and Thummim.]

THUNDER (ריעון). In a physical point of view, the most noticeable feature in connection with thunder is the extreme rarity of its occurrence during the summer months in Palestine and the adjacent countries. From the middle of April to the middle of September it is hardly ever heard. Robinson, indeed, mentions an instance of thunder in the early part of May (Researches, i. 430), and Russell in July (Alleppe, ii. 289), but in each case it is stated to be a most unusual event. Hence it was selected by Samuel as a striking expression of the Divine displeasure towards the Israelites: "Is it not wheat harvest to-day? I will call upon the Lord, and he shall send thunder and rain" (1 Sam. xii. 17). Rain in harvest was deemed as extraordinary as snow in summer (Prov. xxvi. 1), and Jeremiah asserts that he had never witnessed it in the latter part of June or in July (Comm. on Am. iv. 7): the same observations apply equally to thunder which is rarely unaccompanied with rain (Russell, i. 72, ii. 285). In the imaginative philosophy of the Hebrews, thunder was regarded as the voice of Jehovah (Job xxxvii. 2, 4, 5, xl. 9; Ps. xviii. 13, xix. 3-9; Is. xxx. 30, 31), who dwelt behind the thunder-cloud (Ps. lxvii. 7). Hence thunder is occasionally described in the Hebrew by the term "voices" (Ex. ix. 29, 28; 1 Sam. xii. 17). Hence the people in the Gospel supposed that the voice of the Lord was the sound of thunder (John xii. 29). Thunder was, to the mind of the Jew, the symbol of Divine power (Ps. xxix. 3, &c.), and vengeance (1 Sam. ii. 10; 2 Sam. xxii. 14; Ps. lxvii. 18; Is. xxxii. 6; Rev. viii. 5). It was either the sign or the instrument of his wrath on numerous occasions, as when the plague of hail in Egypt (Ex. xii. 19, 28), the shaking of the Hill of Phæacia by the Lord at the destruction of the Philistines (1 Sam. vii. 10), and when the Israelites demanded a king (1 Sam. xii. 17). The term thunder was transferred to the war-shout of a military leader (Job xxxix. 25), and hence Jehovah is described as "causing his voice to be heard" in the battle (Is. xxx. 30). It is also used as a superlative expression in Job xxxiv. 14, where the "thunder of his power" is contrasted with the "little portion," or rather the gentle whisper that can be heard. In Job xxxix. 19, "thunder" is a mistranslation for "a flowing mantle.

W. L. B.
Thyatira

Thyatira scarcely appears in history; and of the various inscriptions which have been found on the site, now called Ab Hisar, not one unequivocally belongs to earlier times than those of the Roman empire. The prosperity of the city seems to have received a new impulse under Vespasian, whose acquaintance with the East, previously to mounting the imperial throne, may have directed his attention to the development of the resources of the Asiatic cities. A bilingual inscription, in Greek and Latin, belonging to the latter part of his reign, shows him to have restored the roads in the domain of Thyatira. From others, between this time and that of Commodus, there is evidence of the existence of many corporate guilds in the city. Bakers, potters, tanners, weavers, robenakers, and dyers (of \( \betaαρες \)) are specially mentioned. Of these last there is a notice in no less than three inscriptions, so that dyeing apparently formed an important part of the industrial activity of Thyatira, as it did of that of Colossae and Laodicea. With this guild there can be no doubt that Lydia, the seller of purple stuffs (\( \tauαπαροευ\pi\alpha\lambda\)), from whom St. Paul met with so favorable a reception at Ephesus (Acts xvi. 14), was connected.

The principal deity of the city was Apollo, worshipped as the sun-god under the surname Tyrius. He was no doubt introduced by the Macedonian colonists, for the name is Macedonian. One of the three mythical kings of Macedonia, whom the genealogists placed before Perdiccas — the first of the Temenidae that Herodotus and Thucydides recognize — is so called; the other two being Caranus and Coma, manifestly impersonations of the chief and the tribe. The inscriptions of Thyatira give Tyrius, the titles of \( \pi\rho\omega\\nu\\tau\alpha\u03b1\u03be\u03a4\u03be\u03b1\u03b1\u03af\u03c1\) and \( \pi\rho\\alpha\u03b1\u03b1\u03b1\u03af\u03c1 \u03b9\u03b1\u03b1\u03b1\u03af\u03c1 \u03b1\u03b1\), and a special priesthood was attached to his service. A priestess of Artemis is also mentioned, probably the administratrix of a cult derived from the earlier times of the city, and similar in its nature to that of the Ephesian Artemis. Another superstition, of an extremely curious nature, which existed at Thyatira, seems to have been brought thither by some of the corrupted Jews of the dis
pursed tribes. A fane stood outside the walls, dedicated to Sambaztha — the name of the sibyl who is sometimes called C TABE — in the midst of an enclosure designated "the Chaldaeum's court" (γυναικίστα Ἰωάννας πρόστατος). This seems to lend an illustration to a passage in Rev. ii. 20, 21, which Græcis interprets of the wife of the bishop. The drawback against the commendation bestowed upon the angel of the Thyatirian church is that he tolerates "that woman, that Jezebel, who, professing herself to be a prophetess, teaches and seduces my servants into committing fornication and eating things offered to idols." Time, however, is given her to repent: and this seems to imply a form of religion which had become condemned from the admixture of foreign alloy, rather than one idolatrous ab initio. Now there is evidence to show that in Thyatira there was a great amalgamation of races. Latin inscriptions are frequent, indicating a considerable influx of Italian immigrants; and in some Greek inscriptions many Latin words are introduced. Latin and Greek names, too, are found accumulated on the same individuals, — such as Titus Antonius Alexianus Arignatus, and Julia Severina Stratonicus. But amalgamation of different races, in pagan nations, always went together with a syncretism of different religions, every relation of life having its religious sanction. If the sibyl Sambaztha was really a Jewess, leading her cult to this proceeding, and not disconscencened by the authorities of the Jewish-Christian church at Thyatira, both the censure and its qualification become easy of explanation.

It seems also not improbable that the imagery of the description in Rev. ii. 18, 6 ἐκείνη τοῦ ἁρπαγμοῦ αὐτῶν ὡς φάλαγγα πυρός, καὶ οἱ πόδες αὐτῶν ὡς χαλασμένα, may have been suggested by the current pagan representations of the tutelary deity of the city. See a parallel case at Smyrna. [SMYRNA.]

Besides the cults which have been mentioned, there is evidence of a dedication of Rome, of Hadrian, and of the imperial family. Games were celebrated in honor of Tyrimnas, of Hercules, and of the reigning emperor. On the coins before the imperial times, the heads of Bocchus, of Athenes, and of Cybele, are also found: but the inscriptions only indicate a cult of the last of these. (Strabo, xiii. c. 4; Pliny, H. N. v. 31; Liv. xxxvii. 8, 21, 44; Polybius, xvi. i., xxxii. 25; Steph- annus Byzant, sub v. θεάτερα; Bocchus, Inscript. Gev. Thyatir., especially Nos. 3484-3499; Suidas, v. Σαμβάζαθα; Albian, Var. Hist. xii. 35; Clinton, F. H. ii. 221; Hoffmann, Grieckenhund, ii. 1714.)

J. W. B.

THYINE WOOD (ἐλατὶς ἔλατος; ἐλατον θύμιον) occurs once only, namely, in Rev. xviii. 12, where the margin has "sweet (wood)." It is mentioned as one of the valuable articles of commerce that should be found no more in Babylonia (Rome), whose fall is here predicted by St. John. There can be little doubt that the wood here spoken of is that of the Thyra or Thymonia. Desfont., the Cutharvis qvadrivella of present botanists. This tree was much prized by the ancient Greeks and Romans, on account of the beauty of its wood for various ornamental purposes. It is the θυμών of Theophrastus (Hist. Plant. iii. 4, §§ 2, 6); the θύμιον θύμων of Dioscorides (i. 21). By the Romans this was called citrus, the wood "citrus." It is a native of Harlay, and grows to the height of 15 to 25 feet. Pliny (H. N. xiii. 15, says that the citrus is found abundantly in Mauritania. lie speaks of a mania amongst his countrymen for tables made of its wood; and tells us that when the Roman ladies were upholstered by their husbands for their extravagance in pearls, they retorted upon them their excessive fondness for tables made of this wood. Fabulous prices were given for tables and other ornamental furniture made of citrus wood (see Pliny, l. c.). The Greek and Roman writers frequently allude to this wood. See a number of references in Celsius, Hierob. ii. 25. The roof of the mosque at Cordova, built in the 9th cent., is of "thyine wood" (Loudon's Arboratum, iv. 2463). Lady Calkett says the wood is dark nut-brown, close grained, and very fragrant. The resin known by the name of Sandarach is the produce of this tree, which belongs to the cypress tribe (Cupressaceae), of the nat. order Conifera.

W. H.

TIBERIAS (Τηβη'ριας; Tiberias), a city in the time of Christ, on the Sea of Galilee; first mentioned in the New Testament (John vi. 1, 23, 24, 1), and then by Josephus (Ant. xvii., Bk. Jud. ii. 9, § 1), who states that it was built by Herod Antipas, and was named by him in honor of the emperor Tiberius. It was probably a new town, and not a restored or enlarged one merely; for "Rakath" (Jos. xix. 35), which is said in the Talmud to have occupied the same position, lay in the bay of Naphtali (if we insist on the boundaries as indicated by the clearest passages), whereas Tiberias appears to have been within the limits of Zebulun (Matt. iv. 13). See Winer Realta, ii. 619. The same remark may be made respecting Jerome's statement, that Tiberias succeeded to the place of the earlier Chinnereth (Onomasticon, sub voce): for this latter town, as may

\[ "It is highly balsamic and odoriferous, the resin, without preventing the corrosive action of insects as well as the influence of the air" \] (Loudon's Arb. i. c.).
be argued from the name itself, must have been further north than the site of Tiberias. The tenacity with which its Roman name has adhered to the spot (see infra) indicates the same fact; for, generally speaking, foreign names in the East applied to towns previously known under names derived from the native dialect, as e.g. Epiphania for Hannath (Jos. xix. 35), Palmyra for Talmud (2 Chr. viii. 4), Ptolemais for Akko (Acts xxi. 7), lost their foothold as soon as the foreign power passed away which had imposed them, and gave place again to the original appellations. Tiberias was the capital of Galilee from the time of its origin until the reign of Herod Agrippa II., who changed the seat of power back again to Sepphoris, where it had been before the founding of the new city. Many of the inhabitants were Greeks and Romans, and foreign customs prevailed there to such an extent as to give offense to the stricter Jews. [HERODIAN.] Herod, the founder of Tiberias, had passed most of his early life in Italy and had brought with him thence a taste for the amusements and magnificent buildings, with which he had been familiar in that country. He built a stadium there, like that in which the Roman youth trained themselves for feats of rivalry and war. He erected a palace, which he adorned with figures of animals, "contrary," as Josephus says (I.iti. §§ 12, 13, 64), "to the law of our countrymen." The place was so much the less attractive to the Jews, because, as the same authority states (Ant. xviii. 2, § 3), it stood on the site of an ancient burial-ground, and was viewed, therefore, by the more scrupulous among them almost as a polluted and forbidden locality. Coins of the city of Tiberias are still extant, which are referred to the times of Tiberius, Trajan, and Hadrian.

The ancient name has survived in that of the modern Tiberiak, which occupies unquestionably the original site, except that it is confined to nar

---

Town and Lake of Tiberias from the Southwest.
TIBERIAS

Promised Land, but they are greatly inferior in size and beauty to those seen in Egypt. The
climatic grows here profusely, almost rivalling that
flower so much admired as found on the neighboring
plain of Gennesaret. The people, as of old, draw their subsistence in part from the adjacent
lake. The spectator from his position here com-
mmands a view of almost the entire expanse of the
sea, except the southern part, which is cut off by
a slight projection of the coast. The precipices
on the opposite side appear almost to overhang the
water, but on being approached are found to stand
at some distance, so as to allow travellers to pass
to and from the water. The lofty Her-
mon, the modern Jebel ed-Sheikh, with its glisten-
ing snow-beads, forms a conspicuous object of the
landscape in the northeast. Many rock-tombs ex-
ist in the sides of the hills, behind the town, some of
them no doubt of great antiquity, and con-
structed in the best style of such monuments. The
climate here in the warm season is very hot and
unhealthy; but most of the tropical fruits, as in
other parts of the valley of the Jordan, become
tive, and, with industry, might be culti-
vated in great abundance and perfection. The
article on Gennesaret [vol. i. p. 895] should be
read in this connection, since it is the relation of
Tiberias to the surrounding region and the lake,
which gave to it its chief importance in the first
Christian age. The place is four and a half hours
from Nazareth, one hour from Meadelphia, probably
the ancient Medailla, and thirteen hours, by the
shortest route, from Baniyas or Caesarea Philippi.

It is remarkable that the Gospels give us no
information that the Saviour, who spent so much
of his public life in Galilee, ever visited Tiberias.
The nearer meaning of the expression, "He went
away beyond the sea of Galilee of Tiberias in
John vi. 1 (στηλαν της Ἱαλαμας της Της σεβητος)," is not that Jesus embarked from
Tiberias, but, as Meyer remarks, that He crossed
from the west side of the Galilean sea of Tiberias
to the opposite side. A reason has been assigned
for this singular fact, which may or may not ac-
count for it. As Herod, the murderer of John the
Baptist, resided most of the time in this city, the
Saviour may have kept purposely away from it, on
account of the danger and misery and jealousy and
espect of that ruler. It is certain, from
Luke xxiii. 8, that though Herod had heard of the
name of Christ, he never saw Him in person until
they met at Jerusalem, and never witnessed any of
his miracles. It is possible that the character of
the place, so much like that of a Roman colony,
may have been a reason why He who was sent
in the best sheep of the house of Israel, performed
so little labor in its vicinity. The head of the lake,
and especially the plain of Gennesaret, where
the population was more dense and so thoroughly Jew-
ish, formed the central point of his Galilcan in-
ustry. The feast of Herod and his courtiers, before
whom the daughter of Herodias danced, and in
fulfillment of the tetrarch's rash oath demanded
the head of the dauntless reformer, was held in all
probability at Tiberias, the capital of the province.
If, as Josephus mentions (Ant. xviii. 5, § 2), the
Baptist was imprisoned in the time of the castle of
Machærus beyond the Jordan, the order for his
execution could have been sent thither, and the
bloody trophy forwarded to the implacable Herodina
at the palace where she usually resided. Gams
(Johannes der Täufer in Gefängniss, p. 47, &c.)
suggests that John, instead of being kept all the
time in the same castle, may have been confined in
different places, at different times. [Machanus, Amer. ed.] The three passages already referred
to show the only ones in the New Testament which
mention Tiberias by name, namely, John vi. 1, and
xxi. 1 (in both instances designating the lake
on which the town was situated), and John vi.
23, where boats are said to have come from
Tiberias near to the place at which Jesus had
supplied miraculously the wants of the multitude.
Thus the lake in the time of Christ, among its
other appellations, bore also that of the principal
city in the neighborhood; and in like manner,
at the present day, Bahr Tiberiach, "Sea of Tibe-
riach," is almost the only name under which it
is known among the inhabitants of the country.
Tiberias has an interesting history, apart from its
strictly Biblical associations. It bore a conspicu-
oun part in the wars between the Jews and the Ro-
man empire, and its history in the lifetime of
Josephus, is perfectly contemporaneous with that of
Jerusalem, after a temporary sojourn at Jarmnia and
Sepphoris, became fixed there about the middle of
the 2nd century. Celebrated schools of Jewish learn-
ing flourished there through a succession of several
centuries. The Mishna was compiled at this place
by the great Rabbi Judah Hakkodesh (A. D. 190).
The Masora, or body of traditions, which trans-
mitted the readings of the Hebrew text of the Old
Testament, and preserved by means of the vowel
system the pronunciation of the Hebrew, originated
in a great measure at Tiberias. The place passed,
under Constantine, into the power of the Christians;
and during the period of the Crusades was lost and
won repeatedly by the different combatants. Since
that time it has been possessed successively by Per-
sians, Arabs, and Turks; and contains now, under
the Turkish rule, a mixed population of Moham-
medans, Jews, and Christians, variously estimated
at from two to four thousand. The Jews constit-
tute, perhaps, one fourth of the entire number.
They regard Tiberias as one of the four holy places
(Jerusalem, Hebron, Safed, are the others), in
which, as they say, prayer must be offered without
an abridgment of the ancient ceremonial. Tiberias
had a claim to be ranked among the most sacred
churches. One of their singular opinions is that the
Messiah when He appears will emerge from the
waters of the lake, and, landing at Tiberias, proceed
to Safed, and there establish his throne on the
highest summit in Galilee. In addition to the
language of the particular country, as Poland, Ger-
many, Spain, from which they or their families em-
grated, most of the Jews here speak also the Rabi-
bic Hebrew, and modern Arabic. a They occupy
a quarter in the middle of the town, adjacent to the
lake; just north of which, near the shore, is a
Latin convent and church, occupied by a solitary
Italian monk. Tiberias suffered terribly from the
great earthquake in 1837, and has not yet recovered
by any means from the effects of that disaster.
In 1852, the writer of this article (later travellers
report but little improvement) rode into the city
over the dilapidated walls; in other parts of them
not overthrown, rents were visible from top to
bottom, and some of the towers looked as if they
had been shattered by battering-rams. It is sup-
tent as at Tiberias. (See Tobler, Denkblatter aus Jeru-
alem, p. 254.)

a * Probably no place in the world is the He-
REW spoken as a vernacular language to such an ex-
H.
posed that at least seven hundred of the inhabitants were destroyed at that time. This earthquake was severe and destructive in other parts of Gaulles, it was a similar calamity no doubt, such as had left a strong impression on the minds of the people, to which is reference at the beginning of his prophecy, as forming a well-known epoch from which other events were reckoned. There is a place of interment near Tiberius, in which a distinguished Rabbi is said to be buried with 14,000 of his disciples around him. The grave of the Arabian philosopher Lohman, as Barchardt states, was pointed out here in the 14th century. Tae- mor's P.Tiberius (p. 125) mentions some of the foregoing facts, and others of a kindred nature. The later fortunes of the place are sketched somewhat at length in Dr. Robinson's Biblical Researches, iii. 267-274 (col. 1841). It is unnecessary to specify other works, as Tiberias lies in the ordinary route of travellers in the East, and will be found noticed more or less fully in most of the books of any completeness in this department of authorship.

Professor Stanley, in his Notices of some Localities, etc. (p. 193), has added a few charming touches to the admirable description already given in his Sin. and Pal. (308-82).

TIBERIAS, THE SEA OF (ἡ δαμασκανοῦ τῆς Τίβεριδος: more Tiberindis). This term is found only in John xxvi. 1, the other passage in which it occurs in the A. V. (Vul. vi. 1) being, if the original is accurately rendered, of the sea of Galilee, of Tiberias." St. John probably uses the name as more familiar to non-residents in Palestine than the indigenous name of the sea of Galilee," or "sea of Gennesaret," attuned no doubt by the same motive which has induced him so constantly to translate the Hebrew names and terms which he uses (such as Rabbi, Rabbiôni, Messias, Cephas, Siloam, etc.) into the language of the Gentiles.

[GENNESARET, SEA OF.] G.

TIBERIUS (τίβεριος: in full, Tiberius Claudius Nero), the second Roman emperor, successor of Augustus, who began to reign A. D. 14, and reigned until A. D. 37. He was the son of Titus Claudius Nero and Livia, and hence a nephew of Augustus. He was born at Rome on the 16th of November, b. c. 45. He became emperor in his fifty-fifth year, after having distinguished himself as a commander in various wars, and having evinced talents of a high order as an orator, and an administrator of civil affairs. His military exploits and those of Drusus, his brother, were sung by Horace (Carm. iv. 4, 14). He even gained the reputation of possessing the sterner virtues of the Roman character, and was regarded as entirely worthy of the imperial honors to which his birth and supposed personal merits at length opened the way. Yet on being raised to the supreme power, he suddenly became, or showed himself to be, a very different man. His subsequent life was one of inactivity, sloth, and self-indulgence. He was despotic in his government, cruel and vindictive in his disposition. He gave up the affairs of the state to the vilest favorites, while he himself wallowed in the very kennel of all that was low and degrading. The only pillage of his monstrous crimes and vices which can be offered is, that his duration of life, occasioned by his early domestic troubles, may have driven him at last to despair and insanity. Tiberius died at the age of seventy-eight, after a reign of twenty-three years. The ancient writers who supply most of our knowledge respecting him are Suetonius, Tacitus (who describes his character as one of studied dissimulation and hypocrisy from the beginning), Annal. u. vii.; Vell. Patern. i. 94, &c.; and Dion Cass. xvi.-xviii. The article in the Diet. of Gr. and Rom. Bion. (vol. iii. pp. 1117-1127) furnishes a copious outline of the principal events in his life, and holds him up in his true light as deserving the scorn and abhorrence of men. For an extended sketch of the character and administration of Tiberius, the reader is referred to Merivale's History of the Romans, iv. 170 ff., and v. 1 ff. (N. Y., 1865). It is claimed for Tiberius that the Jews in Palestine suffered much less during his reign from the violence and rapacity of the Roman governors, than during the reign of other emperors. He changed the rulers there only twice, alluding that as the governor who anticipates but a short harvest, makes the most of his term and extends as much as he is able in the shortest possible period ("Milmam's Hist. of the Jews, ii. 126).

The city of Tiberias took its name from this emperor. It will be seen that the Savior's public life, and some of the introductory events of the apostolic age, must have fallen within the limits of his administration. The memorable passage in Tacitus (Annal. xvi. 46) respecting the origin of the Christian sect, places the crucifixion of the Redeemer under Tiberius; "Elgo abelando rumori (that of his having set fire to Rome) Nero subditum reos, et questissimis penis affligit, quos per flagitia invos vulgos Christianos appellat. Auctor nonnul- minus ejus Christus Tiberio imperante per procuratorem Pontium Plautum supplicio affectus erat." The martyrdom of Stephen belongs in all probability to the last year, or last but one of this reign. In Luke iii. 1. he is termed Tiberius Caesar: John the Baptist, it is there said, began his ministry in the fiftieth year of his reign (ἐπετειλα). This chronological notation is an important one in determining the year of Christ's birth and entrance on his public vocation (Jesp. vol. ii. p. 188). Augustus admitted Tiberius to a share in the empire two or three years before his own death; and it is a question, therefore, whether the fiftieth year of which Luke speaks, should be reckoned from the time of the co-partnership, or from that when Tiberius began to reign alone. The former is the computation more generally adopted; but the data which relate to this point in the chronology of the Savior's life, may be reconciled easily with the one view or the other. Some discussion, more or less extended, in reference to this inquiry will be found in Kraft's Chronologie, p. 66; Scep's Leben Christi, i. 1, &c.; Friedlich's Leben Jesu Christi, p. 47, &c.; Eichard's Krönk, p. 184; Tischendorf's Synoptik, xvi.; Greswell's Dissertation, i. 534; Robinson's History of the Gospels, p. 181; Ellicott's Life of Christ, p. 106, note, Amer. ed.; Andrews's Life of our Lord, p. 24 ff.; and Wieseler's Beiträge zur richtigen Würdigung der Evangelien (1863), p. 177 ff.

TIBHATH (תבתה) [extensive, loral, First].

Mareβôth; Vat. Μαραβότης. Alex. Μαραββήθ; Thuboth, a city of Hadezer, king of Zobah (1 Chr. xviii. 8), which in 2 Sam. xviii. 8 is called Bezbah, probably by an accidental transposi-
tion of the first two letters. Its exact position is unknown, but if Aram-Zobah is the country between the Embrates and Cadeseria [see Syria], we must look for Tibnah on the eastern skirts of the Anti-Libanus, or of its continuation, the Jebel Shokodah and the Jebel Rieka.

G. R.

TIBNI (טִיבְנִי [intelligent, Fürst]: Θαμων [Vat. -res]: Θάμων). After Zimri had burnt himself in his palace, there was a division in the northern kingdom, half of the people following Tibni the son of Gham, and half following Omri. (1 K. xxvi. 21, 22). Omri was the chosen one of the asylum. Tibni was probably put forward by the people of Tirzah, which was then besieged by Omri, and his host. The struggle between the contending factions lasted four years (comp. 1 K. xvii. 23); but the only record of it is given in the few words of the historian: "The people that followed Omri prevailed against the people that followed Tibni the son of Gham, concerning the king's throne." The LXX. add that Tibni was bravely succoured by his brother Jerom, for they tell us, in a clause which Ewald pronounces to be undoubtedly genuine, "and Taminni and Jerom his brother died at that time; and Amri reigned after Taminni." W. A. W.

TIDAL (תִּדְלָל [splendido, renovam, Fürst]: Θαυγόλα: [Alex. Θαλγά, Θαλγά]: Θαθόλα). It is mentioned only in Gen. xiv. 1, 9. It there appears among the kings confederated with, and subordinate to, Chedorlomer, the sovereign of Elam, who leads two expeditions from the country about the mouth of the Tigris into Syria. The name, Tidal, is certainly an incorrect representation of the original. If the present Hebrew text is accepted, the king was called Thorgal; while, if the Septuagint more nearly represents the original, its name was Thorgal, or perhaps Thargal. This last rendering is probably to be preferred, as the name is then a significant one in the early Hebrew idiom of the lower Tigris and Lepartis country. Thorgal being "the chief" — βασιλεύς ὁ μέγας (μάγας ἀνακριτής) of the Persians. Thargal is called "king of nations" ( الخليجان, by which it is reasonable to understand that he was a chief over various nomadic tribes to whom no special tract of country could be assigned, since at different times of the year they inhabited different portions of Lower Mesopotamia. This is the case with the Arabs of these parts at the present day. Thargal, however, should from his name have been a Taurus.

TIGLATH-PILESER (טִכְלָת-פִּילֶשֶׁר [see below]: όλαγαθφελλασαρ; [Vat. also Άλαγαθ-

φελλασαρ, Θαλγαθφελλασαρ: Alex Άλαγαθ φελλασαρ: Theb-Methods). In 1 Chr. v. 26, and again in 2 Chr. xxvii. 20, the name of this king is written הָלֶשֶׁר, "Tiglath-pileseser;" but in this form there is a double corruption. The native word reads as Tiglat-pileser, for which the Tiglath-piles of 2 Kings is a fair equivalent. The signification of the name is some what doubtful. M. Oppert renders it, "Adorius [sit filio Zobadi]," and explains "the son of the Zobadi" as Via, or Hercules (Exposition Scientifique en Mesopotamie, ii. 532).

Tiglath Piles was the name of the Assyrian king mentioned in Scripture as having come into contact with the Israelites. He attacked Samaria in the reign of Pekah, on what ground we are not told, but probably because Pekah withheld his tribute, and, having entered his territories, "took Ion, and Ahbel-beth-marneh, and Janach, and Keledis, and Hazor, and Gilgal, and all the land of Naphtali, and carried them captive to Assyria." (2 K. xv. 29); thus "lighting the land of Zebulon and the land of Naphtali" (Is. lx. 1), the most northern, and so the most exposed portion of the country. The date of this invasion cannot at present be fixed; but it was, apparently, many years afterwards that Tiglath-piles made a second expedition into these parts, which had more import. He inflicted on them, and thereby on his former one. It appears, that after the date of his first expedition, whose league was formed between Rezin, king of Syria, and Pekah, having for its special object the humiliation of Judah, and intended to further generally the interests of the two allies. At first great successes were gained by Pekah and his confederate (2 K. xv. 37; 2 Chr. xxviii. 6-8); but, on their proceeding to attack Jerusalem itself, and to threaten Ahaz, who was then king, with deposition from his throne, which they were about to give to a pretender, "the son of Tabeel" (Is. xvii. 6), the Jewish monarch applied to Assyria for assistance, and Tiglath-piles, consenting to aid him, again appeared at the head of an army in these regions. He first marched, naturally, against Damascus, which he took (2 K. xvii. 9), raising it (according to his own statement) to the ground, and killing Rezin, the Damascus monarch. After this, probably, he proceeded to chastise Pekah, whose country he entered on the northeast, where it bordered on "Syria of Damascus." Here he overran the whole district to the east of Jordan, no longer "lightly affecting" Samaria, but fighting her for "more peacefully, by the way of the sea, in Gilead of the Gentiles" (Is. xix. 11). Carrying into captivity the Damascus, the Gadites, and the half tribe of Manassheh" (1 Chr. v. 28, who had previously held this country, and placing them in Upper Mesopotamia from Harran to about Nisibis (ibid.) Thus the result of this expedition was the absorption of the kingdom of Damascus, and of an important portion of Samaria, into the Assyrian empire; and it further brought the kingdom of Judah into the condition of a mere tributary and vassal of the Assyrian monarch.

Before returning into his own land, Tiglath-piles had an interview with Ahaz at Damascus. (2 K. xvi. 10). Here doubtless was settled the amount of tribute which Judaea was to pay annually: and it may be suspected that here too it was explained to Ahaz by his scribe that a cer-
TIGLATH-PILESER

Tigris

3247

Tiglath-Pileser. He appears to have succeeded Pul, and to have succeeded by Shalmanasser; to have been contemporary with Bichos, Pekah, and Ahaz: and therefore to have ruled Assyr a during the latter half of the eighth century before our era. From his own inscriptions we learn that his reign lasted at least seventeen years; that, besides warri ng in Syria and Samaria, he attacked Babylon, Media, Armenia, and the independent tribes in the upper regions of Mesopotamia, thus, like the other great Assyrian monarchs, warring along the whole frontier of the empire; and finally, that he was (probably) not a legitimate prince, but an usurper and the founder of a dynasty. This last fact is gathered from the circumstance that, whereas the Assyrian kings generally glory in their ancestry, Tiglath-Pileser omits all mention of his, not even recording his father's name upon his monuments. It accords neither with the statement of the apocryphal books (Isa. xiv. 24; Ezck. xiv. 1), and probably even in the earliest notation (in Ezech. Chron. Com. i. 4) and Herodotus (i. 355, that about this time, i.e. in the latter half of the eighth century B.C., there was a change of dynasty in Assyr a, the old family, which had ruled for 425 (526) years, being succeeded by another not long before the accession of Sennacherib. The authority of these two writers, combined with the monumental indications, justifies the conclusion in question. The founder of the Lower Dynasty, if the empire, the first monarch of the New Kingdom, was the Tiglath-Pileser of Scripture, whose date must certainly be about this time, and whose monuments show him to have been a self-elected sovereign. The exact date of the change cannot be positively fixed; but it is probably marked by the era of Nabonassar in Babylon, which synchronizes with B.C. 745. According to this view, Tiglath-Pileser reigned certainly from B.C. 747 to B.C. 739, and possibly a few years longer, being succeeded by Shalmanasser at least as early as B.C. 725. [SHALMANESER.] The circumstances under which Tiglath-Pileser obtained the crown have not come down to us from any ancient authority; but there is a tradition on the subject which seems to deserve mention. Alexander Polyhistor, the friend of Sylla, who had access to the writings of Berossus, related that the first Assyrian dynasty continued from Ninus, its founder, to a certain Belelus (Pul), and that he was succeeded by Beldaruns, a man of low rank, a mere vine-dresser (φοινικός), who had the charge of the gardens attached to the royal palaces. Berossus, he said, having acquired the sovereignty in an extraordinary way, fixed it in his own family, in which it continued to the time of the destruction of Nineveh (Fr. Hist. Gr. iii. 210). It can scarcely be doubted that Beldaruns here is intended to represent Tiglath-Pileser, Beldeear being in fact another mode of expressing the native Pul-ṭurian or Pul-lu-ṭur (Upptur), which the Hebrews represented by Pileser. Whether there is any truth in the tradition may perhaps be doubted. It bears too near a resemblance to the oral stories of Cyrus, Gyges Amasis, and others, to have in itself much claim to our acceptance. On the other hand, it harmonizes with the remarkable fact — unparallelled in the rest of the Assyrian records — that Tiglath-Pileser is absolutely silent on the subject of his ancestry, neither mentioning his father's name, nor making any allusion whatever to his birth, descent, or parentage.

Tiglath-Pileser's wars do not, generally, appear to have been of much importance. In Babylonia he took Sippara (Sepharvaim), and several places of less note in the northern portion of the country: but he does not seem to have penetrated far, or to have come into contact with Nabonassar, who reigned from B.C. 747 to B.C. 739 at Babylon. In Media, Armenia, and Upper Mesopotamia, he obtained certain successes, but made no permanent conquests. It was on his western frontier only that his victories advanced the limits of the empire. The destruction of Damascus, the absorption of Syria, and the extension of Assyrian influence over Judaea, are the chief events of Tiglath-Pileser's reign, which seems to have had fewer external triumphs than those of most Assyrian monarchs. Probably his usurpation was not endured quite without hesitation and domestic troubles or dangers acted as a check upon his expeditions against foreign countries.

No police or great building can be ascribed to this king. His slabs, which are tolerably numerous, show that he must have built or adorned a residence at Calah (Nimrud), where they were found; but, as they were not discovered in situ, we cannot say anything of the edifice to which they originally belonged. They bear marks of wanton defacement; and it is plain that the later kings purposely injured them; for not only is the writing often erased, but the slabs have been torn down, broken, and used as building materials by Esar-haddon in the great palace which he erected at Calah, the southern capital (see vol. i. p. 701 c). The dynasty of Sargon was hostile to the first two princes of the Lower Kingdom, and the result of their hostility is that we have far less monumental knowledge of Shalmaneser and Tiglath-Pileser than of various kings of the Upper Empire.

Tig.ris (Tigris) [see below]: Tigris, Tigris is used by the LXX. as the Greek equivalent of the Hebrew Hubbelot (חָבְבֵלָל); and occurs also in several of the apocryphal books, as in Tobit (vi. 1), Judith (i. 6), and Ecclesiasties (xxiv. 25). The meaning, and various forms, of the word have been considered under Hubbelot. It only remains, therefore, in the present article, to describe the course and character of the stream.

The Tigris, like the Euphrates, rises from two principal sources. The most distant, and therefore the true, source is the western one, which is in lat. 38° 10' N., long. 48° 20' nearly, a little to the south of the high mountain lake called Göy skeptical Göy skeptical, in the peninsula formed by the Euphrates where it sweeps round between Puhab and Pulka. The Tigris’ source is near the southwestern angle of the lake, and cannot be more than two or three miles from the channel of the Euphrates. The course of

a In the Assyrian Chronological Canon, of which there are four copies in the British Museum, all more or less fragmentary, the reign of Tiglath-Pileser seems to be reckoned at either 14 or 17 years. (See ASSYRIAN, No. 1812, p. 34.)
the Tigris is at first somewhat north of east, but after pursuing this direction for about 25 miles it makes a sweep round to the south, and descends by Arqoun Marsh upon Diarbeirk. Here it is altered a river of considerable size, and is bordered by a bridge of ten arches a little below that city (Niccolari, Visage en Arabia, p. 326). It then turns suddenly to the east, and flows in this direction, past Osma Kioti to Til, where it once more alters its course and takes that southerly direction, which it pursues, with certain slight variations, to its final junction with the Euphrates. At Osma Kioti it receives the southeastern or Eastern Tigris, which descends from Niphates (the modern Tabriq) with a course almost due south, and, collecting on its way the waters of a large number of streams, unites with the Tigris half-way between Diarbeirk and Til, in long. 41° north. The courses of the two streams to the point of junction are respectively 350 and 100 miles. A little below the junction, and before any other tributary of importance is received, the Tigris is 150 yards wide and from three to four feet deep. Near Til a large stream flows into it from the northeast, bringing with it almost as much water as the main channel ordinarily holds (Layard, Nimrud and Bablyon, p. 49). This branch rises near fully, in northern Kurdistan, and runs at first to the northeast, but presently sweeps round to the north, and then makes a bend to the south, and flows a distance of thirty-five miles through the deserts of Shobak and Bekban with a general westwardly course, crossing and recrossing the line of the 38th parallel, nearly to Sert, where it flows southwest and south to Til. From Til the Tigris runs southward for 20 miles through a broad, narrow, and deep gorge, at the end of which it emerges upon the comparatively flat but still hilly country of Mesopotamia, near Jericho. Through this it flows with a course which is south-southeast to Haifa, thence nearly south to Kibeh-Sherghat, and again south-southwest to Samarra, where the hills end and the river enters the great alluvium. The course is now more irregular. Between Samarra and Baghdad a considerable bend is made to the east; and, after the Shat-ul-Her is thrown off in left, the course begins to rise. From this point, the regular southeasterly course being only resumed a little above the 324 parallel, from which point the Tigris runs in a tolerably direct line to its junction with the Euphrates at Karwah. The length of the whole stream, exclusive of meanders, is reckoned at 1136 miles. It can be descended on rafts during the flood season from Diarbeirk, which is only 150 miles from its source; and it has been used by steamers of small draught nearly up to Mosul. From Diarbeirk to Samarra the navigation is much impeded by rapids, rocks, and shallows, as well as by artificial buoys or dams, which in ancient times were thrown across the stream, probably for purposes of irrigation. Below Samarra there are no obstructions; the river is deep, with a bottom of soft mud; the stream moderate; and it is very meandering. The average width of the Tigris in this part of its course is 200 yards, while its depth is very considerable.

Besides the three head-streams of the Tigris, which have been already described, the river receives, along its middle and lower course, no fewer than five important tributaries. These are the river of Arqoun, the river of the Kukur, the river Zab (Zob Art), the Lesser Zab (Zob Asfah), the Alivan, and the Diyala or ancient Gynis. All these rivers flow from the high range of Zagros, which shuts in the Mesopotamian valley on the east, and is able to sustain so large a number of great streams from its inexhaustible springs and abundant snows. From the west the Tigris obtains no tributary of the slightest importance, for the Shattan, which is said to have once reached it, now ends in a salt lake, a little below Tekrit. Its volume, however, is continually increasing as it descends, in consequence of the great bulk of water brought into it from the west, particularly by the Great Zab and the Diyala: and in its lower course it is said to be a larger stream and to carry a greater body than the Euphrates. At the time the river reaches Bagdad it is often extensively flooded, not, however, so much from the Tigris as from the overflow of the Euphrates, which is here poured into the eastern stream through a channel. Further down the river, in the territory of the Druze-Lords Arabs, between the 32° and 32° 15' north, it presents a series of small annual inundations on both banks. About the middle of May the Tigris begins to fall, and by midsummer it has reached its natural level. In October and November there is another rise and fall in consequence of the autumnal rains; but compared with the spring flood that of autumn is insignificant.

The Tigris is at present better fitted for purposes of traffic than the Euphrates (Layard, Nimrud and Bablyon, p. 475); but in ancient times it does not seem to have been much used as a line of trade. The Assyrians probably floated down it the timber which they wore in the habit of cutting in Ananaus and Lebanon, to be used for lumbering purposes in their capital: but the general line of communication between the Mediterranean and the Persian Gulf was by the Euphrates. See vol. i., p. 784. According to the historians of Alexander (Arrian, Exp., lI., vi. 7; comp. Strabo. xv. 3, § 4), the Persians purposely obstructed the navigation of the lower Tigris by a series of dams which they threw across from bank to bank between the embouchure and the city of Opis, and such trade as there was along its course proceeded by land (Strabo. lib. xi.). It is probable that the dams were in reality made for another purpose, namely, to raise the level of the waters for the sake of irrigation; but they would undoubtedly have also the effect ascribed to them, unless in the spring flood time, when they might have been swept away by boats descending the river. Thus there may always have been a certain amount of traffic down the stream; but up it trade would scarcely have been practicable at any time further than Samara or Tekrit, on account of the natural obstructions, and of the great force of the stream. The lower part of the course was opened by Alexander (Arrian, vii. 7); and Opis, near the mouth of the Diyala, became thenceforth known as a mart (Euripides), from which the neighboring districts drew theornament of India and merchandise (Strabo. xvi. 1, § 4). Seleucia, too, which grew up soon after Alexander, derived no doubt a portion of its prosperity from the facilities for trade offered by this great stream.
We find but little mention of the Tigris in Scripture. It appears indeed under the name of Huldekel, among the rivers of Eden (Gen. ii. 14), and is there correctly described as "running eastward to Assyria." But after this we hear no more of it, if we except one doubtful allusion in Nahum (ii. 13), where it is said to have been well known to the prophet Daniel, who had to cross it in his journeys to and from Susa (Shushan). With Daniel it is "the Great River" — יָבֹאַי הָרוֹנָן — an expression commonly applied to the Euphrates; and by its side he sees some of his most important visions (Dan. x. to xii.). No other mention of the Tigris seems to occur except in the apocryphal books; and there it is unconnected with any real history.

The Tigris, in its upper course, anciently ran through Armenia and Assyria. Lower down, from about the point where it enters on the alluvial plain, it separated Babylonia from Susiana. In the wars between the Romans and the Parthians, we find it constituting, for a short time (from A. D. 114 to A. D. 117), the boundary line between these two empires. Otherwise it has scarcely been of any political importance. The great chain of Zagros is the natural boundary between Western and Central Asia; and beyond this, the next defendable line is the Euphrates. Historically it is found that either the central power pushes itself westward to that river; or the power ruling the west advances eastward to the mountain barrier.

The water of the Tigris, in its lower course, is yellowish, and is regarded as unwholesome. The streams turning with frequent banks which are often of a large size (see Tobit vi. 2, and compare Estr.) xi. 14, § 8). Abundant water-fowl dwell on the waters. The banks are fringed with palm-trees and pomegranates, or clothed with jungle and reeds, the haunt of the wild bear and the lion.

The (most important notices of the Tigris to be found in the classical writers are the following: Strabo, xi. 14, § 8, and xvii. 1, §§ 9-13; Arrian, Exped. Alex. vii. 7; and Ptolemy, H. V. vi. 27. The best modern accounts are those of Col. Chesney, Empires Exploration, i. 16, etc., and Winer, Real-lexicon, ii. 622, 623; with which may be compared Layard, Niniveh and Babylon, 43-51, and 464-476; Lotius, Clitophon and Suse, 3-8; Jones in Transactions of the Geographical Society of London, vol. v.: in Journal of the Geographical Society, vol. iv.; and Rawlinson's Herodotus, i. 552, 553.)

TIKVAH (תִּקְוָה) [cowl, expectation; 1: cowl.] (Vat. Θεόκρας: Alex. Θεόκρας: Theoclistus.)
1. The father of Shalman the husband of the prophetess Huldah (2 K. xxii. 14). He is called Tikwathi in the A. V. of 2 Chr. xxxix. 22.
2. (Θεόκρας; Vat. F. A. Ekecou; Alex. Théocrou: Theoclistus.) The father of Jahnazh (Ezr. x. 15). In 1 Esdr. ix. 14 he is called Theokranes.

TIKVATH (תִּקְוָת) [obedience; Keri, תִּקְוָת; properly Tikkoth or Tikhoth; Θεόκρας: Vat. καθωλικά: Alex. Θεόκρας: Theoclistus.) Tikvai the father of Shalman (2 Chr. xxxix. 22).

TILE. For general information on the subject, see the articles BRICK, POTTERY, SEAL. The expression in the A. V. rendering of Luke v. 19 through the tilling," has given much trouble to expositors, from the fact that Syrian houses are in general covered, not with tiles, but with plaster or terraces. Some suggestions toward the solution of this difficulty have been already given. [Hosea, vol. ii. p. 191.] An additional one may here be offered. 1. Terrace-roofs, if constructed improperly, or at the wrong season of the year, are apt to crack and to become so saturated with rain as to be easily permeable. May not the roof of the house in which our Lord performed his miracle, have been in this condition, and been pierced, or, to use St. Mark's word, "broken up," by the beams of the paralytic? (Arnimoll, Tract. in Assia Mony, l. 171; Russell, Allegys, l. 35.)

2. Or may the phrase "through the tilling," be accounted for thus? Greek houses were often, if not always, roofed with tiles (Pollux, viii. 161; Vitruvius, iii. 3). Did not St. Luke, a native, probably, of Greek Antioch, use the expression "tiles," as the form of roof which was most familiar to himself and to his Greek readers without reference to the particular material of the roof in question? (Eusebius, C. E. e. 4; Jerome, Post. de Circu, and St. Mith. vol. vii. 4; Conpere and Howson, St. Paul, p. 357.) It may perhaps be worth remarking that houses in modern Antioch, at least many of them, have tiled roofs (Fisher, Trees in Syria, i. 19, vi. 56). [See House, note 6, i. 104, Amer. ed.]

TIL/GA TH/PILNE/SER (תִּילְגַ'א/פִּיל'נְסָר) [Rom. Συγκαφελλαζάω, Συγκαφελλαζάω: Val.] Θαληϕαλλαζάω, Θαληϕαλλαζάω: VAL. Συγκαφελλαζάω: Thebaphylalaro.) A variation, and probably a corruption, of the name ΤΙΛΓΑΘΠΙΛΝΕΣΡ. It is peculiar to the books of Chronicles, being found in 1 Chr. vi. 60; 2 Chr. xxvii. 29.

G.

TI L/LA G/E (Agriculture.)

TILON (תילון; Keri, תילון [perh. gift]; 'Ilo: Alex. Θεόκρας: Thôn.) One of the four sons of Shimon, whose family is reckoned in the genealogies of Judah (1 Chr. vi. 20).

TIMELUS (Τίμελος: Timoës.) The father of the blind man, Bar-timaeus, who was restored to sight by Jesus as he left Jericho (Mark x. 46). outerly is the Greek translation. On the circumstances of the writer, see PASTEURS (Amer. ed.).

TIMBREL, TABRET. By these words the A. V. translates the Heb. תִּקְוָת, which is derived from an imitative root occurring in many languages not immediately connected with each other. It is the same as the Arabic and Persian تَيْرَف, duff, which in Spanish becomes aduf, a tambourine. The root, which signifies to beat or strike, is found in the Greek τικανός of τίκανος. Lat. tympanum, R. tambour, Sp. tambor, Fr. tambour, Prov. tambor, Eng. tabor, zuinbad, timbrel, tambourine, A.S. dulfan, to strike, Eng. tap, and many others. In Old English tabor was used for
TIMBREL

any drum. Thus Rob. of Gloucester, p. 396 (d. Hearne, 1810): —

"Vor de trompes and of takear the Sarneens made there·
So gret noise, that Cristeumen al disturbed were."'

In Shakespeare's time it seems to have become an instrument of peace, and is thus contrasted with the drum: "I have known when there was no music with him but the drum and file: and now had he rather hear the taber and the pipe" (Much Ado, ii. 3). Taboret and tabawire are diminutives of taber; and denote the instrument now known as the tambourine; —

"Ur Minoes's whistling to his tabaret, Selling a laughtar for a cold meat's meat." — Hall, Sat. iv. 1, 78.

Taboret is a contraction of tabawire. The word is retained in the A. V. from Coverdale's translation in all passages except Is. xxx. 32, where it is omitted in Coverdale, and Ez. xxviii. 13, where it is rendered "beauty.

The Heb. taph is undoubtedly the instrument described by travellers as the "doff or did of the Arabs. It was used in very early times by the Syrians of Padan-aram at their merry-making (Gen. xxvi. 27). It was played principally by women (Ex. xv. 20; Judg. xi. 34; 1 Sam. xviii. 6; Ps. lxvii. 25 [26]) as an accompaniment to the song and dance (comp. Jud. iii. 7), and appears to have been worn by them as an ornament (Jer. xxxi. 4). The taph was one of the instruments played by the young prophets whom Saul met on his return from Samuel (1 Sam. x. 5), and by the Levites in the Temple-band (2 Sam. vii. 5; 1 Chr. xii. 8). It accompanied the movement of feasts (Is. v. 12, xivv. 8), and the joy of triumphal processions (Judg. xi. 34; 1 Sam. xviii. 6), when the women came out to meet the warriors returning from victory, and is everywhere a sign of happiness and peace (Job xxxi. 12; Is. xxx. 32; Jer. xxxi. 4). So in the grand triumphal entry of God into His Temple described in strong figures in Is. lxvii., the procession is made up by the singers who marched in front, and the players on stringed instruments who brought up the rear, while round them all danced the young maidens with their tambrels (Ps. lxvii. 25 [26]).

The did of the Arabs is described by Russell (Alg. p. 94, 1st ed.) as "a hoop (sometimes with pieces of brass fixed in it to make a jingling) over which a piece of parchment is distended. It is beat with the fingers, and is the true tympanum of the ancients, as appears from its figure in several reliefs, representing the orgies of Bacchus and rites of Cybele."

The same instrument was used by the Egyptian dancing-women whom Hassephidus saw (Trov. p. 59, ed. 1766). In Barcley it is called tabor, and is made like a sieve, consisting (as bidore describes the tympanum) of a rim or thin hoop of wood with a skin of parchment stretched over the top of it. This serves for the bass in all their concerts, which they accordingly touch very artfully with their fingers, or with the knuckles or palms of their hands, as the time and measure require, or as force and softness are to be communicated to the several parts of the performance" (Shaw, Trov. p. 202).

TIMNAH

The tympanum was used in the feasts of Cybele (Her. iv. 76), and is said to have been the invention of Dionysus and Rhea (Eur. Bacch. 59). It was played by women, who beat it with the palms of their hands (Ovid, Met. iv. 29), and Juvena (Sat. iii. 64) attributes to it a Syrian origin: —

"Jan philem Syry in Tiberim defixit Orontes Fr Lingam, et nunc et emus et tibi tibiorem choridas Obilipos, neeun gentina tympana secum voxit."

In the same way the taber is said to have been introduced into Europe by the Crusaders, who adopted it from the Saracens, to whom it was peculiar (see Du Cange's note on De Joinville's Hist. du Roy Saint Louis, p. 61).

The author of Shilde Heygabrin (c. 2) gives the Greek 

as the equivalent of taph, and says it was a hollow basin of metal, beaten with a stick of brass or iron.

The passage of Ezekiel (xxviii. 13) is obscure, and appears to have been early corrupted. Instead of

they tabets, the Vulg. and Targum read

they beauty, which is the rendering adopted in Coverdale's and Cranmer's Bibles.

The LXX. seem to have read 

as in ver. 16. If the ordinary text be adopted, there is no reason for taking taph, as Jerome suggests, in the sense of the setting of a gem, "pola qua gemma contintur."

W. A. W.

TIM'NAH (טימ'נה) [perh. re-'stria
d or inaccessible]: Θαμαρ; [In 1 Chr. i. 39, Vat. corrupt: θαμαριν], 1. A concubine of Eliphas son of Esau, and mother of Amalek (Gen. xxxvi. 12; in 1 Chr. i. 36 named as a son of Eliphas): It may be presumed that she was the same as Timma, sister of Lotan, and daughter of Seir the Horite (Gen. xxxvi.) ver. 22, and 1 Chr. i. 39).

2. [In 1 Chr. Vat. θαμαριν: Alex. θαμάρα.]

A duke, or phylarch, of Edom in the last list in Gen. xxxvi. 40-45 (1 Chr. i. 54-54), where the dukes are named according to their families, after their places, by their names — according to their habitations: — where we may conclude, as in the case of Timnah, that Timna was also the name of a place or a district.

E. S. P.

TIM'NAH (טימ'נה) [lot. portion].

A name which occurs, simple and compounded, and with slight variations of form, several times, in the topography of the Holy Land. The name is derived by the lexicographers (Genessius, Simonis, Furst) from

same with the Rubh. Heb. taba, and Span. tabló, a kettle-drum. The instrument and the word may have come to us through the Saracens.

a Orig. iii. 81.
TIMNATH

a root signifying to "portion out, or di-ide;" but its frequent occurrence, and the analogy of the topographical names of other countries, would rather imply that it referred to some natural feature of the country.

1. (Afz'n, Ḥω'ar; [in 2 Chr. Vit. 20:18] Θωμανα; Alex. Ἰωάννα; G. Θωμαν). A place which formed one of the landmarks on the north boundary of the allotment of Judah (Josh. xv. 10). It was obviously near the western end of the boundary, being between Beth-shemesh and the "shoulder of Ekron." It is probably identical with the TIMNATHHAI of Josh. xix. 43, one of the towns of Dan, also named in connection with Ekron, and that again with the Timnath, or more accurately Timnathah, of Samson, and the Thamnatha of the Maccabees. Its belonging at that time to Dan would explain its absence from the list of the towns of Judah (Josh. xv.), though mentioned in describing the course of the boundary.

The modern representative of all these various forms of the same name is probably Ti'mnah, a village about two miles west of Ain Shenon (Beth-shemesh), among the broken undulating country by which the central mountains of this part of Palestine descend to the maritime plain. It has been shown in several other cases (Keilah, etc.) that this district contained towns which in the lists are enumerated as belonging to the plain. Timnah is probably another instance of the same thing, for in 2 Chr. xxviii. 18 a place of the same name is mentioned as among the cities of the Shephelah, which from its occurrence with Beth-shemesh, Gederoth, Gimzo, more or less in the neighborhood of Ekron, is probably the same as that just described as in the hills. After the Danites had deserted their original allotment for the north, their towns would naturally fall into the hands of Judah, or, of the Philistines, as the continuance struggle between them might happen to fluctuate.

In the later history of the Jews Timnath must have been a conspicuous place. It was fortified by Bcchecides as one of the most important military posts of Judaea (1 Macc. ix. 50), and it became the focus of the district or province, for it was called after its name, and was reckoned the fourth in order of importance among the fourteen into which the whole country was divided at the time of Vespasian's invasion (Joseph. B. J. iii. 3, § 5; see Phyn, v. 14).

Tibneh is now spoken of as a "deserted site" (Rob. ii. 16), and not a single western traveller appears to have visited it, or even to have seen it, though its position is indicated with tolerable certainty. [TIMNATH]

2. Θωμανά (in Alex. Ἰωάννα; Thamnith). A town in the mountain district of Judah (Josh. xv. 57). It is named in the same group with Maon, Ziph, and Carmel, which are known to have been south of Asher. It is, therefore, undoubtedly a distinct place from that just examined. [TIMNATH]

TIMNATH-SERAH

The form in which the translators of the A. V. incorrectly present two names which are certainly distinct, though it is possible that they refer to the same place.

1. TIMNATH (צִמְנָת). i. e. Timnah [lot. portion; Θωμανα; Θωμαναθ]. The scene of the adventure of Judah with his daughter-in-law Tamar (Gen. xxxviii. 12, 13, 14). There is nothing here to indicate its position. The expression "went up to Timnath" (ver. 12) indicates that it was on higher ground than the spot from which Judah started. But as we are ignorant where that was, the inference is of no value. It seems to have been the place where Judah's flocks were watered. There was a road to it (A. V. "way"). It may be identified either with the Timnath in the mountains of Judah, which was in the neighborhood of Carmel where Nabal kept his huge flocks of sheep; or with the Timnathah so familiar in the story of Samson's conflicts. In favor of the latter is the doubtful suggestion made under Ex. xxi and xxiv. that in the words translated "an open place" there is a reference to these two towns. In favor of the former is the possibility of the name in Gen. xxxviii. being not Timnath but Timnathas (as in the Vulgate), which is certainly the name of the Philistine place connected with Samson. More than this cannot be said.

The place is named in the specification of the allotment of the tribe of Dan, where the A. V. exhibits it accurately as TIMNATHHAI, and its name doubtless survives in the modern Tibneh which is said to lie below Zareek, about three miles to the S. W. of it, where the great Wady es-Sheer issues upon the plain.

2. TIMNATHHAI (צִמְנָתָה): Θωμανάδα (in Alex. Ἰωάννα; Θαμναθα; Thamnath). The residence of Samson's wife (Judg. xiv. 1, 2, 5). It was then in the occupation of the Philistines. It contained vineyards, bounded however by such savage animals as indicate that the population was but sparse. It was on higher ground than Askelon (xiv. 19), but lower than Zorah, which we may presume was Samson's starting-point (xiii. 25).

TIMNATH-HERES (צִמְנָתָה-הֶרֶס; portion of the vine, Gen.); Θαμναθαιρα; Ἰακωβίανσσα; Αλεξ. Ἰωάννακα δαί μανία; Θαμναθαιρα; Timnath Sera); The name under which the city and burial-place of Joshua, previously called TIMNATH-SERAH, is mentioned in Judg. ii. 9. The constituent consonants of the word are the same, but their order is reversed. The authorities differ considerably in their explanations. The Jews adopt Heres (Heres, or "oak," in modern Arabic) for the real meaning of the name; interpret it as meaning the sun; and see in it a reference to the act of making the sun stand still, which is to them the greatest exploit of Joshua's life. Others (as Fürst, i. 412), while accepting Heres as the original form, interpret it as "clay," and as originating in the character of the soil. Others again, like Tischendorf (Gesch. ii. 347, 348), and Bertheau (On Judges), take Sera to be the original form, and Heres an ancient but unintentional error. [TIMNATH-SERAH]
TIMONITE

to indicate that it was the tomb of the man who had caused the sun to stand still (Rashi, Comment. on both passages). Accordingly, they identify the place with Kefer cheva, which is said by Rabbi Jacob (Targum Yerushalmi, etc., p. 186), hap-Parchi (Asher's Benj. p. 434), and other Jewish travellers down to Schwarz in our own day (p. 151), to be about 5 miles S. of Shechem (Vat.) in the Shechem tract. No place with that name appears on the maps, the closest approach to it being Kefer-Ha'ovot, which is merely a nearly double that distance S. S. W. of Nabez. Wherever it be, the place is said by the Jews still to contain the tombs of Joshua, of Nun, and of Caleb (Schwarz, p. 151).

Another and more promising identification has, however, been suggested in our own day by Dr. Eli Smith (Jebel, Sucre, 1844). In his journey from Jifna to Mrisik-Yebbi, about six miles from the former, he discovered the ruins of a considerable town on a gentle hill on the left (south) of the road. Opposite the town (apparently at a distance) was a much higher hill, in the north side of which are several excavated sepulchres, which in size and in the richness and character of their decorations resemble the so-called "tombs of the Kings" at Jerusalem. The whole bears the name of Tilimah, and although without further examination it can hardly be affirmed to be the Tumah of Joshua, yet the identification appears probable. [Gaas, Amer. ed.]

Timnath-Serah and the tomb of its illustrious owner were shown in the time of Jerome, who mentions them in the Epistola Prophetae (§ 13). Beyond its being south of Shechem, he gives no indication of its position, but he dismisses it with the following characteristic remark, a fitting tribute to the simple self-denlial of the great soldier of Israel: "Satnque mirata est, quod distributor possidens sita montana et aspera delegisset."

TIMOTHEUS (Τιμότηθος). The name of Timon stands in the catalogue. Nothing further is known of him with certainty; but in the Synopsis of Vita et Morti Prophetarum Apostolorum et Discipulorum Domini, ascribed to Dorotheus of Tyre (Fuld, Patrum, iii. 149), we are informed that he was one of the seventy-two disciples (the catalogue of whom is a mere congeries of New Testament names), and that he afterwards became bishop of Bostra (? Dostra Arabum), where he suffered martyrdom in the circus. W. B. J.

TIMOTHY

1. A "captain of the Ammonites" (1 Mac. v. 8) who was defeated on several occasions by Judas Macabaeus, n. c. 164 (1 Mac. v. 6, 11, 34-44). He was probably a Greek adventurer (comp. Jos. Ant. xii. 8, § 1), who had gained the leadership of the tribe. Thus Josephus (Ant. xiii. 8, § 1, quoted by Grimm, on 1 Mac. v. 6) mentions one "Zeno, surround Cotylas, who was despot of Rabbah" in the time of Judahs Hyrcanus.

2. In 2 Mac. a leader named Timotheus is mentioned as having taken part in the invasion of Nicanor (b. c. 166: 2 Mac. viii. 50, ix. 3). At a later time he made great preparations for a second attack on Judas, but was driven to a stronghold, Gazzara, which was stormed by Judas, and there Timotheus was taken and slain (2 Mac. 14. 24-37).

It has been supposed that the events recorded in this latter narrative are identical with those in 1 Mac. v. 6-8, an idea rendered more plausible by the similarity of the names Jazer and Gazzara (in Lat. Gazzer, Jazar, Gazzara). But the name Timotheus was very common, and it is evident that Timotheus the Ammonite leader was not slain at Jazer (2 Mac. 14. 24) and Jazer was on the east side of Jordan, while Gazzara was probably the same as Gezer. [JAZZER; GAZZARA.]

It may be urged further, in support of the substantial accuracy of 2 Mac., that the second campaign of Judas against Timothaeus (1) (1 Mac. v. 27-44) is given in 2 Mac. xii. 2-24, after the account of the capture of Gazzara and the death of Timothaeus (2) there. Wernhorr assumes that all the differences in the narratives are blunders in 2 Mac. (De fide Lit. Macc. § lx.), and in this he is followed by Grimm (on 2 Mac. xx. 24, 52). But, if any reliance is to be placed on 2 Mac., the differences of place and circumstances are rightly taken by Patrius to mark different events (De Lit. Macc. § xxii. p. 250).

3. The Greek name of Timothy (Acts xvi. 1, xvi. 14, &c.) is. He is called by this name in the A. V. in every case except 2 Cor. i. 1, Philon. i, Heb. xiii. 23, and the epistles addressed to him. B. F. W.

TIMOTHY (Τιμόθεος [honor-ING God]): Timothaeus. The disciple thus named was the son of one of these mixed marriages which, though condoned by stricter Jewish opinion, and placing their offspring on all but the lowest step in the Jewish scale of precedence, were yet not uncommon in the later periods of Jewish history. The father's name is unknown: he was a Greek, i.e. a gentle by descent (Acts xvi. 1, 3). If in any sense a proselyte, the fact that the issue of the marriage did not receive the sign of the covenant would render it probable that he belonged to the class of half-converts, the so-called Proselytes of the Gate, not those of Righteousness [comp. Proselytes]. The absence of any personal allusion to the father in the Acts or Epistles suggests the inference that he must have died or disappeared during his son's infancy. The care of the boy thus devolved upon his mother Funee and her mother Lous (2 Tim. i. 5). Under their training his education was emphatically Jewish. "From a child he learnt (probably the LXX. version) to know fol. 84, in Lightfoot, Hor. Heb. in Matt. xxiii. 14; and the education of Timothy (2 Tim. iii. 15) may therefore have helped to overcome the prejudices which the Jews naturally have against him on this ground.
the Holy Scriptures" daily. The language of the Acts leaves it uncertain whether Lystra or Derbe were the residence of the devout family. The letter has been inferred, but without much likelihood, from a possible construction of Acts xx. 4, the former from Acts xxi. 1, 2 (comp. Neander, PfL. und Lett. i. 288; Alford and Huther, iv. loc.). In either case the absence of any indication of the existence of a synagogue makes this devout consistency more noticeable. We may think here, as at Philippi, of the few devout women going forth to their daily worship at some river-side oratory (Conybeare and Howson i. 211). The reading ἄγα μάρτυρα, in 2 Tim. iii. 14, adopted by Lachmann and Tischendorf, indicates that it was from them as well as from the Apostle that the young disciple received his first impression of Christian truth. It would be natural that a character thus fashioned should retain throughout something of a feminine piety. A constitution far from robust (2 Tim. v. 24), a worldly shrinking from opposition and responsibility (1 Tim. iv. 12-16, v. 20, 21, vi. 11-14; 2 Tim. ii. 1-7), a sensitiveness even to tears (2 Tim. i. 4), a tendency to an ascetic rigor which he had not strength to bear (1 Tim. v. 23), united, as it often is, with a temperament exposed to some risk from "youthful lusts" (2 Tim. ii. 22) and the softer emotion (1 Tim. ii. 2) — these may we well think of as characterizing the youth as they afterwards characterized the man.

The arrival of Paul and Barnabas in Lycaonia (Acts xiv. 6) brought the message of glad tidings to Timothy and his mother, and they received it with "unfeigned faith" (2 Tim. i. 5). If at Lystra, as seems probable from 2 Tim. iii. 11, he may have witnessed the half-united sacrifice, the half-finished martyrdom, of Acts xiv. 19. The preaching of the Apostle on his return from his short circuit prepared him for a life of suffering (Acts xiv. 22). From that time his life and education must have been under the direct superintendence of the body of elders (ibid. 21). During the interval of seven years between the Apostle's first and second journeys, we may guess up to manhood. His zeal, probably his asceticism, became known both at Lystra and Iconium. The mention of the two churches as united in testifying to his character (Acts xvi. 2), leads us to believe that the early work was prophetic of the latter that he had been already employed in what was afterwards to be the great labor of his life, as "the messenger of the churches," and that it was his tried fitness for that office which determined St. Paul's choice. Those who had the deepest insight into character, and spoke with a prophetic utterance, pointed to him (1 Tim. i. 18, iv. 14), as others had pointed before to Paul and Barnabas (Acts xiii. 2), as specially fit for the missionary work in which the Apostle was engaged. Personal feeling led St. Paul to the same conclusion (Acts xvi. 3), and he was solemnly set apart (the whole assembly of the elders laying their hands on him, as did the Apostle himself) to do the work and possibly to bear the title of Evangelist (1 Tim. iv. 14: 2 Tim. i. 6, iv. 5). A great obstacle, however, presented itself. Timothy, though inheriting, as it were, from the nother side (Wetstein, in loc.), and therefore reckoned as one of the seed of Abra- ham, had been allowed to grow up to the age of manhood without the sign of circumcision, and in this point he might be thought to be disclaiming the Jewish blood that was in him, and choosing to take up his position as a heathen. Had that been his real position, it would have been utterly inconsistent with St. Paul's principle of action to urge on him the necessity of circumcision (1 Cor. vii. 19; Gal. ii. 3, 9). A soul like this, that of a negligent, almost of an apostate Israelite; and, though circumcision was nothing, and uncircumcision was nothing, it was a serious question whether the scandal of such a position should be allowed to frustrate all his efforts as an Evangelist. The fact that no offense seems to have been felt hitherto is explained by the prominence of the Gentile element in the churches of Lycaonia (Acts xiv. 27). But his wider work would bring him into contact with the Jews, who had already shown themselves so ready to attack, and then the scandal would come out. They might tolerate a heathen, as such, in the synagogue or the church, but an uncircumcised Israelite would be to them a horror and a portent. With this view to the loss of the only sacrifice of principle, the Apostle, who had refused to permit the circumcision of Titus, "took and circumcised" Timothy (Acts xvi. 5); and then, as consciences of inconsistency, went on his way distributing the decrees of the council of Jerusalem, the great charter of the freedom of the Gentiles (ibid. 4). Henceforth Timothy was one of his most constant companions. Not since he parted from Barnabas had he found one whose heart so answered to his own. If Barnabas had been as the brother and friend of early days, he had now found one whom he could claim as his own true son by a spiritual parentage (1 Cor. iv. 17; 1 Tim. i. 2; 2 Tim. i. 2). They and Sil- vanus, and probably Luke also, journeyed to Philip- pi, and (Acts xvi. 22) and there the already young Evangelist was conspicuous at once for his filial devotion and his zeal (Phil. ii. 22). His name does not appear in the account of St. Paul's work at Thessalonica, and it is possible that he remained some time at Philippi, and then acted as the messenger by whom the members of that church sent what they were able to give for the Apostle's wants (Phil. iv. 15). He appears, however, at Berea, and remains there when Paul and Silas are obliged to leave (Acts xvii. 14), going on afterwards to join his master at Athens (1 Thess. iii. 2). From Athens he is sent back to Thessalonica (ibid.), as having special gifts for comforting and teaching. He returns from Thessalonica, not to Athens but to Corinth; and his name appears united with St. Paul's in the opening words of both the letters written from that city to the Thessalonians (1 Thess. i. 1; 2 Thess. i. 1). Here also he was apparently active as an Evangelist (2 Cor. i. 19), and on him, probably, with some exceptions, devolved the duty of baptizing the new converts (1 Cor. i. 14). Of the next five years of his life we

a Comp. the elaborate dissertation, De praecocis episcopis, by Bodinus, in which he shows, vol. ii. 303, that the scenes of the ordination

b Conybeare and Howson ii. 289 as the probable scene of the ordination of Timothy, though the record of the Acts of the Apostles (xv. 29) leaves the matter undecided.

c Dr. Wordsworth infers from 2 Cor. ix. 11, and Acts xvii. 16, that the letter which Barnabas carried in support of the Apostle from the Macedonian churches, and thus released him from his continuous labors as a tent-maker.
TIMOTHY

have no record, and can infer nothing beyond a continuance of his active service as St. Paul's companion. When we next meet with him it is as being sent on in advance when the Apostle was contemplating the long journey which was to include Macedonia, Achaia, Jerusalem, and Rome (Acts xix. 22). He was sent to "bring," the churches into remembrance of the ways of the Apostle (1 Cor. iv. 17). We trace in the words of the "father" an anxious desire to guard the son from the perils which, to his eager but sensitive temperament, would be so exact trying (1 Cor. xvi. 10).

His route would take him through the churches which he had been instrumental in founding, and this would give him scope for exercising the gifts which were afterwards to be displayed in a still more responsible office. It is probable, from the passages already referred to, that, after accomplishing the special work assigned to him, he returned by the same route, and met St. Paul according to a previous arrangement (1 Cor. xvi. 11), and was thus with him when the second epistle was sent to the Church of Corinth (1 Cor. xiv. 19).

He returns with the Apostle to that city, and joins in messages of greeting to the disciples whom he had known personally at Corinth, and who had since found their way to Rome (Rom. xvi. 21). He forms one of the company of friends who go with St. Paul to Philippi and then sail by themselves, waiting for his arrival by a different ship (Acts xx. 6-6). Whether he continued his journey to Jerusalem, and what became of him during St. Paul's two years' imprisonment, are points on which we must remain uncertain.

The language of St. Paul's address to the elders of Ephesus (Acts xx. 17-35) renders it unlikely that he was then left there with authority. The absence of his name from Acts xxvii. in like manner leads to the conclusion that he did not share in the perilous voyage to Italy. He must have joined him, however, apparently soon after his arrival in Rome, and was with him when the epistles to the Philippians, to the Colossians, and to Philemon were written (Phil. i. 1, ii. 19; Col. i. 1; Phil. i. 1). All the indications of this period point to incessant missionary activity. As before, so now, he is to provide the teaching and exhortation of the Apostle, inspecting, advising, reporting (Phil. i. 19-23), caring especially for the Macedonian churches as no one else could care. The special messages of greeting sent to him at a later date (2 Tim. iv. 21), show that at Rome also, as elsewhere, he had gained the warm affection of those among whom he ministered. Among those most eager to be thus remembered to him, we find, according to a fairly supported hypothesis, the names of a Roman noble (Tudens), of a future bishop of Rome (Linus), and of the daughter of a British king (Claudia) (Williams, Claudius and Paulus; Conybeare and Howson, ii. 501; Alford, Excursus in Greek Text iii. 104). It is interesting to think of the young Evangelist as having been the instrument by which one who was surrounded by the fathomless impurity of the Roman world was called to a higher life, and the names which would otherwise have appeared only in the four epistles of St. James (1: 22, iv. 13, v. 8, xi. 53) raised to a perpetual honor in the salutations of an apostolic epistle.

Assuming the genuineness and the later date of the two epistles addressed to him (comp. the following article), we are able to put together a few notices as to his later life. It follows from 1 Tim. i. 3 that he and his master, after the release of the latter from his imprisonment, revisited the pros- consular Asia, that the Apostle then continued his journey to Macedonia (Acts xx. 3) and thence the disciples hurried, half-hastily, even weeping at the separation (2 Tim. i. 4), at Ephesus, to check, if possible, the outgrowth of heresy and licentiousness which had sprung up there. The time during which he was thus to exercise authority as the delegate of an Apostle—a true apostolic rather than a bishop—was of uncertain duration (1 Tim. iii. 14). The position in which he found himself might well make him anxious. He had to rule presbyters, most of whom were older than himself (1 Tim. iv. 12), to assign to each a stipend in proportion to his work (ibid. v. 17), to receive and decide on charges that might be brought against them (ibid. v. 19, 20), to regulate the almsgiving and the brotherhoods of the Church (ibid. v. 3-10), to ordain presbyters and deacons (ibid. iii. 1-13). There was the risk of being entangled in the disputes, prejudices, covetousness, sensuality of a great city. There was the risk of injuring health and strength by an overstrained asceticism (ibid. iv. 4, v. 27).

Leaders of rival sects were there—Hymenaeus, Philetus, Alexander—to oppose and thwart him (1 Tim. i. 20; 2 Tim. ii. 17, iv. 14, 15). The position in which he found himself might well have caused a sharper, firmer, more critical, and at the same time more tender-minded treatment of him than he had ever seen. If the times were harsher, it was for a reason; if the charge of Paul's aged had been made known, with the object of winning for him the love and confidence of his flock. The time during which he was thus called to exercise authority was a time of great danger, and a time of great opportunity as well. We may believe that he was thus called to be the instrument of that kindling of a thousand fires which was to spread the light of the Christian to every corner of the earth.
TIMOTIY

The warnings, should follow each other in rapid and
rehearse the occasion (1 Tim. i. 18, iii. 15, iv. 14, v. 21, vi. 11). In the second epistle to this
deep personal feeling utterings itself yet more fully.
The friendship of fifteen years was drawing to a
close, and all memories connected with it throng
upon the mind of the old man, now ready to be
offered, the blameless youth (2 Tim. iii. 15), the
holy household (ibid. i. 5), the solemn ordination
(ibid. ii. 3). In the second part of the letter
the last recorded words of the Apostle express the
earnest hope, repeated yet more earnestly, that he
might see him once again (ibid. iv. 9, 21). Timo-
theus is to come before winter, to bring with him
the cloak for which in that winter there would be
need (2 Tim. iv. 13). We may hazard the con-
jecture that he reached him in time, and that the
last hours of the teacher were soothed by the
presence of the disciple whom he loved so truly.
Some writers have even seen in Heb. xiii. 23 an
indication that he shared St. Paul's imprisonment
and was released from it by the death of Nero
(Conybeare and Howson, ii. 502; Neander, Pfl.
und Litt. i. 552). Beyond all this is apochryphal
and uncertain. He continues, according to the
old traditions, to act as Bishop of Ephesus (Acts,
II. E. iii. 14), and dies a martyr's death under
Domitian or Nerva (Nepos. H. E. iii. 11). The
great festival of Artemis (the καταψυκτής of that
godless) led him to protest against the license and
fruity which accompanied it. The mob were raised
to fury, and put him to death with clubs (comp.
Polyocrates and Simeon Metaphr. in Hesychius's
Acts Structurae, Jan. 24). Some later critics —
Schliermacher, Mayerhoff — have seen in him
the author of the whole or part of the Acts (Oblhausen,
Commentar. ii. 612).
A somewhat startling theory as to the inter-
vening period of his life has found favor with
Calhoun (s. v. Timotheus), Tillemont (ii. 147),
and others. If he continued, according to the received
tradition, to be bishop of Ephesus, then he, and no
other, must have been the "angel" of that church
to whom the message of Rev. ii. 1—7 was ad-
dressed. It may be urged, as in some degree
confirming this view, that both the praise and the
blame of that message are such as harmonize with
the impressions as to the character of Timotheus
derived from the Acts and the Epistles. The
reputation of Ephesus, the abhorrence of the deeds of
the Nicolaists, the unwearied labor, all this belongs to
"the man of
God" of the Pastoral Epistles. And the fault is
no less characteristic. The strong language of St.
Paul's entreaty would lead us to expect that the
temptation of such a man would be to fall away
from the glow of his "first love," the zeal of his
first faith. The promise of the Lord of the
Churches is in substance the same as that implied
in the language of the Apostle (2 Tim. ii. 4—6).
The conjecture, it should be added, has been
passed over unnoticed by most of the recent
commentators on the Apocalypse (comp. Alland
and Wordsworth, in loc.). Trench (Seven Churches of
Asia, p. 64), contrasts the "angel" of Rev. ii.
and iii. to Timotheus as an "earlier angel," who, with
the generation to which he belonged, had passed
away when the Apocalypse was written. It must
be remembered, however, that at the time of
St. Paul's death, Timotheus was still younger,
probably not more than thirty-five, that he might,
therefore, well be living, even on the assumption of
the later date of the Apocalypse, and that the
tradition (colleges gregantium) place his death after
that date. Bengel admits this, but urges the objection that he was not the bishop of any single
diocese, but the superintendent of many churches.
This however may, in its turn, be traversed, by
the answer that the death of St. Paul may have
made a great difference in the work of one who had
litherto been employed in travelling as his repre-
sentative. The special charge committed to him in
the Pastoral Epistles might not unnaturally
give fixity to a life which had previously been
wandering.
An additional fact connected with the name of
Timotheus is that two of the treaties of the Pseudo-
Dionysius the Areopagite are addressed to him (De
Incarnatione, Ccl. i. 1; comp. Le Nourry, Diserti,
c. ix., and Hallois, Quoest. iv. in Maguin's edition).
E. H. P.

TIMOTIIY, EPISTLES TO. — Authority
The question whether these epistles were written
by St. Paul was one to which, till within the last
half-century, hardly any answer but an affirmative
one was thought possible. They are reckoned among
the Pauline Epistles in the Muratorian Canon and
the Epistola Ignatia, and the Epistle to the Pastoral
Epistles places them among the ἀγωγιάσματα of the N. T.,
and, while recording the doubts which affected the
Second Epistle of St. Peter and the other ἀποκά-
γώμενα, knows of none which affect these. They
are cited as authoritative by Tertullian (De Prescr.
c. 25; ad Hieron. i. 7), Clement of Alexandria
Strom. ii. 11), Irenæus (Adv. Haer. iv. 6, § 3,
ii. 14, § 8). Parallelisms, implying quotation, in
some cases with close verbal agreement, are found
in Clem. Rom. 1 Cor. c. 20 (comp. 1 Tim. i. 8);
Ignat. ad Magn. c. 8 (1 Tim. i. 4); Polycarp, c. 4
(comp. 1 Tim. vi. 7, 8); Theophilus of Antioch
ad Autol. iii. 126 (comp. 1 Tim. ii. 1, 2). There
were indeed some notable exceptions to this con-
sequence. The three Pastoral Epistles were all re-
jected by Marcellus (Tertull. adv. Marc. c. 21;
Iren. i. 29), Basilides, and other Gnostic teachers
(Hieron. Progn. in Timotheos). Tatian, while strongly
maintaining the genuineness of the Epistle to Titus,
denied that of the other two (Hieron. ib.). In
these instances we are able to discern a dogmatic
reason for the rejection. The sects which these
leaders represented could not but feel that they
were at variance with the teaching of the Pastoral
Epistles. Origen mentions some who excluded 2 Tim.
from the Canon for a very different reason.
The names of James and Jambres belonged to
an apocryphal history, and from such a history
St. Paul never would have quoted (Origen, Contra
in Mabh. 117).

The Pastoral Epistles have, however, been sub-
jected to a more elaborate scrutiny by the criticism of
Germany. The first doubts were uttered by J. C.
Schmidt. These were followed by the Schrift-
schreiiber of Schliermacher, who, assuming the
genuineness of 2 Tim. and Titus, undertook, on
that hypothesis, to prove the spuriousness of 1 Tim.
Bohler critics saw that the position thus taken was
untenable, that the three epistles must stand or
fall together. Eichhorn (Eul. iii.) and H. Weisse
(Fund. et. Epist.), denied the Pauline authorship of all three.
There was still, however, an attempt to maintain
their authority as embodying the substance of the
Apostle's teaching, or of letters written by him, on
the hypothesis that they had been sent forth after
his death by some over-seas provincial, who
TIMOTHY, EPISTLES TO

wished, under the shadow of his name, to attack the prevailing errors of the time (Eichhorn, ib.). One writer (Schatz, Evangel Hist. Crit. p. 324) ventures on the hypothesis that Luke was the writer. Ramm (Die sogenannten Pastoral-Briefe), here as elsewhere more daring than others, assigns them to no earlier period than the latter half of the second century, after the death of Polycarp in A. D. 155 (p. 152). On this hypothesis 2 Tim was the latest of the three, and probably by a different writer (pp. 72-74). They grew out of the state supplied by the Epistle to the Philippian, the writers, first of 2 Tim, then of Titus, and lastly of 1 Tim, aimed, by the insertion of personal incidents, messages, and the like, at giving to their compilations an air of verisimilitude (p. 70).

It will be seen from the above statement that the question of authorship is here more than usually important. There can be no solution as regards these epistles like that of an obviously dramatic and therefore legitimate personification of character, such as is possible in relation to the authorship of Ecclesiastes. If the Pastoral Epistles are not Pauline, the writer clearly meant them to pass as such, and the animus decipendi would be there in its most flagrant form. They would have to take their place with the Pseudo-Clementine Homilies, or the Pseudo-Igнатian Epistles. Where we now see the traces, full of life and interest, of the character of 'Paul the aged,' firm, tender, zealous, loving, we should have to recognize only the trysts, sometimes skilful, sometimes clumsy, of some unknown and dishonest controversialist.

Consequences such as these ought not, it is true, to lead us to suppress or distort one iota of evidence. They may well make us cautious, in examining the evidence, not to admit conclusions that are wider than the premises, nor to take the premises themselves for granted. The task of examining is rendered in some measure easier by the fact that, in the judgment of most critics, hostile as well as friendly, the three Pastoral Epistles stand on the same ground. The intermediate hypotheses of Schliechmann (supra) and Gréther (Ecol. in N. T.), which looks on Titus as genuine, 2 Tim. as uncertain, and 1 Tim. as altogether spurious, may be dismissed as individual eccentricities, hardly requiring a separate notice. In dealing with objections which take a wider range, we are meeting those also which are confined to one or two out of the three epistles.

The chief elements of the alleged evidence of spuriousness may be arranged under two styles, as it is urged, in different from that of the acknowledged Pauline Epistles. There is less logical continuity, a want of orioe and plan, subjects brought up, one after the other, abruptly (Schliechmann). Not less than fifty words, most of them striking and characteristic, are found in these epistles which are not found in St. Paul’s writings (see the list in Croiset, Recent andModern, App. I., and Huther’s Eichthei.). The formulas of salutation (χάριν, αἰεών, εἰρήνη), half-technical words and phrases, like εὐσεβίας and its cognates (1 Tim. i. 15, iii. 1, iv. 9; 2 Tim. ii. 11), the use of ἡγίσαμαι as the distinctive epithet of a true teaching, these and others like them appear here for the first time (Schlieferm. and Baur). Some of these words, it is urged, ϕασίνων, ἐκποίησεν, ὑποτελεύσας, διηγεῖσθαι, φῶς ἀποκριθεῖν, belong to the Gnostic terminology of the 2d century.

On the other side it may be said, (1) that there is no test so uncertain as that of language and style, thus applied; is it uncertain and nebulous? the fact that Schliechmanner and Neander find no stumbling-blocks in 2 Tim. and Titus, while they detect an un-Pauline character in 1 Tim. A difference like that which marks the speech of men divided from each other by a century may be conclusive against the identity of authorship, but short of that there is hardly any conceivable divergence which may not coexist with it. The style of one man is stereotyped, formed early, and enduring long. The sentences move after an unvarying rhythm; the same words recur. That of another changes, more or less, from year to year. As his thoughts expand they call for a new vocabulary. The last works of such a writer, as those of Bacon and of Burke, may be shrewd, redundant, figurative, while the earlier works are less meagre in expression by proportion as the man is a solitary thinker, or a strong assertor of his own will, will be tend to the former state. In proportion to his power of receiving impressions from without, of sympathizing with others, will be his tendency to the latter. Apart from all knowledge of St. Paul’s character, the alleged peculiarieties are but of little weight in the adverse scale. With that knowledge we may see in them the natural result of the intercourse with men in many lands, of that readiness to become all things to all men, which could hardly fail to show itself in speech as well as in action. Each group of his epistles has, in like manner, its characteristic words and phrases. (2.) If this is true generally, it is so yet more emphatically when the circumstances of authorship are different. The language of a bishop’s charge is not that of his letters to his private friends. The epistles which St. Paul wrote to the churches as societies, might well differ from those which he wrote, in the full freedom of open speech, to a familiar friend, to his own ‘true son.’ It is not strange that we should find in the latter a Luther-like vehemence of expression (c. g. κακωτάτας κατασκευασμένον, 1 Tim. iv. 2, διαπαραγόμενοι διαφωτισθείμενοι ἀνάκριτον τοῦ νόμου, 1 Tim. vi. 5, σπαραγόμενος ἀκριτάτατο.c 2 Tim. iii. 6), mixed sometimes with words that imply that few great men have been without, a keen sense of humor, and the capacity, at least, for satire (c. g. γραφῆς μέθοδος, 1 Tim. iv. 7: φίλοι μου καὶ πεπίστευσα, 1 Tim. v. 10: τετέλεσαν τὰ παρ' ἐμοί, 1 Tim. vi. 12, ἀγράφες ἀγάπης, 1 Tim. v. 12). These epistles, again, are detested to an amanuensis. These have every appearance of having been written with his own hand, and this can hardly have been without its influence on their style, rendering it less diffuse, the transitions more abrupt, the treatment of each subject more concise. In this respect it may be compared with the other two autograph epistles, those to the Titians and Philemon. A list of words given by Alford (iii. Proleg. c. v. i.) shows a considerable resemblance between the former of the two and the Pastoral Epistles. (4.) It may be added, that to whatever extent a forger of spurious epistles would be likely to form his style after the pattern of the recognized ones, so that
men might not be able to distinguish the counterfeit from the true, to that extent the diversity which has been dwelt on is, within the limits that have been above stated, not against, but for the genuineness of these epistles. (5.) Lastly, there is the positive argument that there is a large common element, both of thoughts and words, shared by these epistles and the others. The grounds of faith, the law of life, the tendency to digress and go off at a word, the personal, individualizing affectation, the free reference to his own sufferings for the truth, all these are in both, and by them we recognize the identity of the writer. The evidence can hardly be gathered at the limits of this article, but its weight will be felt by any careful student. The coincidences are precisely those, in most instances, which the forger of a document would have been unlikely to think of, and give but scanty support to the perverse ingenuity which sees in these resubbilances a proof of compilation, and therefore of spuriousness.

II. It has been urged (chiefly by Eichhorn, t. i. p. 315) against the reception of the Pastoral Epistles that they cannot be fitted in to the records of St. Paul's life in the Acts. To this there is a threefold answer. (1.) The difficulty has been enormously exaggerated. If the dates assigned to them must, to some extent, be conjectural, there are at least two hypotheses which can each suggest (i.e. which rest on) reasonably good grounds. (2.) If the difficulty were as great as it is said to be, the mere fact that we cannot fix the precise date of three letters in the life of one of whose ceaseless labors and journeys we have, after all, but fragmentary records, ought not to be a stumbling-block. The hypothesis of a release from the imprisonment with which the history of the Acts ends removes all difficulties; and if this be rejected (Baur, p. 67), as itself not resting on sufficient evidence, there is, in any case, a wide gap of which we know nothing. It may at least claim to be a theory which explains phenomena. (3.) Here, as before, the reply is obvious, that a man composing counterfeit epistles would have been likely to make them square with the acknowledged record of St. Paul's life.

III. The three epistles present, it is said, a more developed state of church organization and doctrine than that belonging to the lifetime of St. Paul. (1.) The rule that the bishop is to be "the husband of one wife" (1 Tim. iii. 2; Tit. i. 6) indicates the strong opposition to second marriages which characterized the 21st century (Baur, pp. 113-129). (2.) The "younger widows" of 1 Tim. v. 11 cannot possibly be literally widows. If they were, St. Paul, in advising them to marry, would be excluding them, according to the rule of 1 Tim. v. 9, from all chance of sharing in the church's bounty. It follows therefore that the word χήρας is used, as it was in the 21st century, in a wider sense, as denoting a consecrated life (Baur, pp. 42-49). (3.) The rules affecting the relation of the bishop and elders indicate a hierarchic development characteristic of the Petrine element, which became dominant in the Church of Rome in the post-Apostolic period, but foreign altogether to the genuine epistles of St. Paul (Baur, pp. 50-59). (4.) The term αἰτιτέρων is used in its later sense, and a formal procedure against the heretic is recognized, which belongs to the 21st century rather than the 1st. (5.) The upward progress from the office of deacon to that of presbyter, implied in 1 Tim. iii. 13, belongs to a later period (Baur, l. c.).

It is not difficult to meet objections which contain so large an element of mere arbitrary assumption. (1.) Admitting Baur's interpretation of 1 Tim. iii. 2 to be the right one, the rule which makes monogamy a condition of the episcopal office is very far removed from the harsh, sweeping censures of all second marriages which we find in Athenagoras and Tertullian. (2.) There is not a shadow of proof that the "younger widows" were not literally such. The χήρας of the Pastoral Epistles are, like those of Acts vi. i, ix, 39, women dependent on the alms of the church, not necessarily deserters, or engaged in active labor. The rule fixing the age of sixty for an individual is all the more conclusive against Baur's hypothesis. (3.) The use of ἔπισκοποι and μισθιστήρων in the Pastoral Epistles as equivalent (Tit. i. 5, 7), and the absence of any intermediate order between the bishops and deacons (1 Tim. iii. 1-8), are quite unlike what we find in the Ignatian Epistles and other writings of the 21st century. They are in entire agreement with the language of St. Paul (Acts xx. 17, 28; Phil. i. 1). Few features of these epistles are more striking than the absence of any high hierarchic system. (4.) The word αἰτιτέρων has its counterpart in the αἰτάσεις of 1 Cor. xi. 19. The sentence upon Hymenaeus and Alexander (1 Tim. i. 20) has a precedent in that of 1 Cor. v. 5. (5.) The best interpreters do not see in 1 Tim. iii. 9 any division from one office to another (comp. Ellicott, in loc., and Deacon). If it is there, the assumption that such a change is foreign to the Apostolic age is entirely an arbitrary one.

IV. Still greater stress is laid on the indications of a later date in the descriptions of the false teachers noticed in the Pastoral Epistles. These points it is said, unmistakably to Marcion and his followers. In the ἀντισιτίς τῆς Φαντασμοῦ γνώσεως (1 Tim. vi. 20) there is a direct reference to the treatise which he wrote under the title of Ἀντίσιτίτις, setting forth the contradiction between the Old and New Testament (Baur, p. 26). The "genealogies" of 1 Tim. i. 4, Tit. iii. 9, in like manner, point to the Ευαγγελία τῶν Βαλεντίνους and Άλεξάνδρουs (1 Tim. v. 16). The "women of the firstlings of the flock, who are taught and commanding to abstain from meats," fits in to Marcion's system, not to that of the Judaizing teachers of St. Paul's time (ibid., p. 24). The assertion that the "law is good" (1 Tim. i. 8) implies a denial, like that of Marcion, of its Divine authority. The doctrine that the "Resurrection was past already" (2 Tim. ii. 18) was thoroughly Gnostic in its character. In his eagerness to find tokens of a later date everywhere, Baur sees in the writer of these epistles not merely an opponent of Gnosticism, but one in part infected with their teaching, and appeals to the doxologies of 1 Tim. i. 17, vi. 15, and their Christology throughout, as having a Gnostic stamp on them (pp. 28-53).

Carefully elaborated as this part of Baur's attack has been, it is perhaps the weakest and most unpersuasive of all. The false teachers of the Pastoral Epistles are predominantly Jewish, ρωμαίοι διάκοις (1 Tim. i. 7), belonging altogether to a different school from that of Marcion, giving heed to "Jewish fables" (Tit. i. 14) and "disputes connected with the Law" (Tit. iii. 9). Of all manufactories of excesses few are more willful and fantastic than that which finds in ρωμαίοι διάκοι Antinomian teachers and in μαγιάς ρωμαίς Antinomian doctrine (Baur, p. 17). The natural suggestion that in Acts xx. 39, 31, St. Paul contemplates the rise and -
progress of a like perverse teaching, that in Col. ii. 8-23 we have the same combination of Judaism and a self-styled "prophet" (1 Tim. vi. 20) or φασιστας (Col. ii. 8), leading to a like false asceticism, is set aside summarily by the rejection both of the speech and its author. Even the denial of the Resurrection, we may remark, belongs as naturally to the mingling of a Sadducean element with an eastern mysticism as to the teaching of Marcion.

The self-contradictory hypothesis that the writer of 1 Tim. is at once the strongest opponent of the Gnostics, and that he adopts their language, need hardly be refuted. The whole line of argument, indeed, first misrepresents the language of St. Paul in these epistles and elsewhere, and then assumes the entire absence from the first century of even the germ of the teaching which characterized the second (comp. Neander, Pf. und Leit. i. p. 301; Heydenreich, p. 64).

Dote. — Assuming the two epistles to Timothy to have been written by St. Paul, to what period of his life are they to be referred? The question as it affects each epistle may be discussed separately.

First Epistle to Timothy. — The direct data in this instance are very few. (1.) i. 3, implies a journey of St. Paul from Ephesus to Macedonia, Timothy remaining behind. (2.) The age of Timothy is described as πεθυμός (iv. 12). (3.) The general resemblance between the two epistles indicates that they were written at or about the same time. Three hypotheses have been maintained as fulfilling these conditions.

(A.) The journey in question has been looked on as an unrecorded episode in the two years' work at Ephesus of Acts xix. 10.

(B.) It has been identified with the journey of Acts xx. 1, after the tumult at Ephesus.

On either of these suppositions the date of the epistle has been fixed at various periods after St. Paul's arrival at Ephesus, before the conclusion of his first imprisonment at Rome.

(C.) It has been placed in the interval between St. Paul's first and second imprisonments at Rome.

Of these conjectures, A and B have the merit of bringing the epistle within the limit of the authentic records of St. Paul's life, but they have scarcely any other. Against A, it may be urged that a journey to Macedonia would hardly have been passed over in silence either by St. Luke in the Acts, or by St. Paul himself in writing to the Corinthians. Against B, that Timothy, instead of remaining at Ephesus when the Apostle left, had gone on into Macedonia before him (Acts xix. 22). The hypothesis of a possible return is traversed by the fact that he is with St. Paul in Macedonia at the time when 2 Cor. was written and sent off. In favor of C as compared with A or B, is the internal evidence of the contents of the epistle. The errors against which Timothy is warned are present, dangerous, portentous. At the time of St. Paul's visit to Milevis in Acts xx., i.e., according to these hypotheses, subsequent to the epistle, they are still only looming in the distance (ver. 30). All the circumstances referred to, moreover, imply the prolonged absence of the Apostle. Discipline had become lax, heresies rife, the economy of the church disorderly. It was necessary to check the chief offenders by the sharp sentence of excommunication (1 Tim. vi. 20). Other churches called for his counsel and directions, or a sharp necessity took him away, and he hastens on, leaving behind him, with full delegated authority, the disciple in whom he most confides. The language of the epistle also has a bearing on the date. According to the hypotheses A and B, it belongs to the same periods as the previous passages and therefore to the latest, to the same group as Philippians and Ephesians: and, in this case, the differences of style and language are somewhat difficult to explain. Assume a later date, and then there is room for the changes in thought and expression which, in a character like St. Paul's, were to be expected as the years went by. The only objections to the position of iii., are — (1) the doubtfulness of the second imprisonment altogether, which has been discussed in another place (Paul), and (2), the "youth" of Timothy at the time when the letter was written (iv. 12). In regard to the latter, it is sufficient to say that, on the assumption of the later date, the disciple was probably not more than 34 or 35, and that this was young enough for one who was to exercise authority over a whole body of Bishop-presbyters, many of them older than himself (v. 1).

Second Epistle to Timothy. — The number of special names and incidents in the 2d epistle make the chronological data more numerous. It will be best to bring them, as far as possible, together, noticing briefly what other facts each connects itself, and to what conclusion it leads. Here also there are the conflicting theories of an earlier and later date, (A) during the imprisonment of Acts xxviii. 30, and (B) during the second imprisonment already spoken of.

(1.) A paring apparently recent, under circumstances of special sorrow (i. 4). Not decisive. The scene at Miletus (Acts xx. 37) suggests itself, if we assume A. The paring referred to in 1 Tim. i. 3 might meet B.

(2.) A general desertion of the Apostle even by the disciples of Asia (i. 15). Nothing in the Acts indicates anything like this before the imprisonment of Acts xxviii. 30. Everywhere in Acts xix. and xx., and not less the language of the Epistle to the Ephesians, speaks of general and strong affection. This, therefore, so far as it goes, must be placed on the side of B.

(3.) The position of St. Paul as suffering (i. 12), in bonds (ii. 9), expecting "the time of his departure" (iv. 6), forsaken by almost all (iv. 16). Not quite decisive, but tending to B rather than A. The language of the epistles belonging to the first imprisonment implies, it is true, bonds (Phil. i. 13, 19; Eph. iii. 1, vi. 29), but in all of them the Apostle is surrounded by many friends, and is hopeful, and confident of release (Phil. i. 25; Philen. 22).

(4.) The mention of Onesiphorus, and of services rendered by him both at Rome and Ephesus (i. 16-18). Not decisive again, but the tone is rather that of a man looking back on a past period of his life, and the order of the names suggests the thought of the administrations of Ephesus being subsequent to those at Rome. Possibly too the mention of "the household," instead of Onesiphorus himself, may imply his death in the interval. This therefore tends to B rather than A.

(5.) The abandonment of St. Paul by Demas (iv. 10). Strongly in favor of B. Demas was with the Apostle when the Epistle was written to the Colossians (Col. ii. 24) were written. 2 Tim. must therefore, in all probability, have been written after
TIMOTHY, EPISTLES TO

them; but, if we place it anywhere in the first imprisonment, we are all but compelled a by the mention of Mark, for whose coming the Apostle asks in 2 Tim. iv. 11, and who is with him in Col. iv. 10, to place it at an earlier age.

(6.) The presence of Luke (iv. 11). Agrees well enough with A (Col. iv. 14), but is perfectly compatible with B.

(7.) The request that Timothy would bring Mark (iv. 11). Seems at first, compared as above, with Col. iv. 14, to support A, but, in connection with the mention of Deinas, tendsdecidedly to B.

(8.) Mention of Tychicus as sent to Ephesus (iv. 12). Appears, as connected with Eph. vi. 21, 22, Col. iv. 7, in favor of A, yet, as Tychicus was continually employed on special missions of this kind, may just as well fit in with B.

(9.) The request that Timothy would bring the cloak and books left at Troas (iv. 13). On the assumption of A, the last visit of St. Paul to Troas would have been at least four or five years before, during which there probably have been opportunities enough for his regaining what he had lost. In that case, too, the circumstances of the journey present no trace of the haste and suddenness which the request more than half implies. On the whole, then, this must be reckoned as in favor of B.

(10.) a Alexander the coppersmith did me much evil. b greatly withstood our words. " (iv. 14, 15). The part taken by a Jew of this name in the uproar of Acts xix., and the natural connection of the χαλκοσάμι with the artisans represented by Demetrius, suggest a reference to that event as something recent and so far support A. On the other hand, the name Alexander was too common to make us certain as to the identity, and if it were the same, the hypothesis of a later date only requires us to assume what was probable enough, a renewed hostility.

(11.) The abandonment of the Apostle in his first defense (παραβολή), and his deliverance "from the mouth of the lion" (iv. 16, 17). Fits in as a possible contingency with either hypothesis, but, like the mention of Deinas in (5), most belong at any rate, to a time much later than any of the other epistles written from Rome.

(12.) a Erastus abode at Corinth, but Trophimus I left at Miletus sick. b I am sick. (iv. 20). Language, as in (9), implying a comparatively recent visit to both places. If, however, the latter were written during the first imprisonment, then Trophimus had not been left at Miletus but had gone on with St. Paul to Jerusalem (Acts xxi. 29), and the mention of Erastus as remaining at Corinth would have been superfluous to one who had left that city at the same time as the Apostle (Acts xx. 4).

(13.) a Hasten to come before winter. b Winter. Assuming A, the presence of Timothy in Phil. i. 1; Col. i. 1; Philem. 1 might be regarded as the consequence of this; but then, as shown in (5) and (7), there are almost insuperable difficulties in supposing this epistle to have been written before those three.

(14.) The salutations from Fabricius, Pudens, Linus, and Claudia. Without laying much stress on this, it may be said that the absence of these names from all the epistles, which, according to A belong to the same period, would be difficult to explain. It leaves it open to conjecture that they were converts of more recent date. They are mentioned too as knowing Timothy, and this implies, as at least probable, that he had already been at Rome, and that this letter to him was consequently later than those to the Philippian and Colossians.

On the whole, it is believed that the evidence preponderates strongly in favor of the later date, and that the epistle, if we admit its genuineness, is therefore a strong argument for believing that the imprisonment of Acts xxviii. was followed by a period first of renewed activity and then of suffering.

Places. — In this respect as in regard to time 1 Tim. leaves much to conjecture. The absence of any local reference but that in i. 3, suggests Macedonia or some neighboring district. In A and other MSS. in the Peshito, Ethiopic, and other versions, Laodicea is named in the inscription as the place whence it was sent, but this appears to have grown out of a traditional belief resting on very insufficient grounds, and incompatible with the conclusion which has been above adopted, that this is the epistle referred to in Col. iv. 16 as that from Laodicea (Theophyl. ix. 304.). The Coptic version with as little likelihood states that it was written from Athens (Huther, Einlclk). The Coptic epistle is free from this conflict of conjectures. With the solitary exception of Bützger, who suggests Cæsarea, there is a consensum in favor of Rome, and everything in the circumstances and names of the epistle leads to the same conclusion (ibid.).

Structure and Characteristics. — The peculiarities of language, so far as they affect the question of authorship, have been already noticed. Assuming the genuineness of the epistles, some characteristic features remain to be noticed.

(1.) The ever deepening sense in St. Paul's heart of the Divine Mercy, of which he was the object, as shown in the insertion of δόξα in the salutations of both epistles, and in the υπερεπίσκοπος 1 Tim. i. 3.

(2.) The greater abruptness of the second epistle. From this is to infer there is a more pronounced treatment of subjects currently thought out. All speak of strong overwhelming emotion, memories of the past, anxieties about the future.

(3.) The absence, as compared with St. Paul's other epistles, of Old Testament references. This may connect itself with the fact just noticed, that these epistles are not argumentative, possibly also with the request for the "books and parchments," which had been left behind (2 Tim. iv. 13). He may have been separated for a time from the εἰρήνη γραμματιστή, which were commonly his companions.

(4.) The conspicuous position of the "faithful sayings" as taking the place occupied in other epistles by the O. T. Scriptures. The way in which these are cited as authoritative, the variety of subjects which they cover, suggest the thought that in them we have specimens of the prophecies of the Apostolic Church which had most impressed themselves on the mind of the Apostle, and of the disciples generally. I Cor. xiv. shows how deep a reference he was likely to feel for such spiritual

a The qualifying words might have been omitted, but for the fact that it has been suggested that Deinas, having forsaken St. Paul, repeated and returned. Larder, vi. 368.)
TIN

TIN (τιντίς; kασσίτερον; stannum). Among the various metals found among the spoils of the Midianites, tin is enumerated (Num. xxxi. 24). It was known to the Hebrew metal-workers as an alloy of other metals (Is. i. 25; Ez. xxii. 18, 20). The markets of Tyre were supplied with it by the ships of Tarshish (Ez. xxxii. 12). It was used for pinnacles (Zech. iv. 10), and was so plentiful as to furnish the writer of Ecclesiastes (xviii. 18) with a figure by which to express the wealth of Solomon, whom he apostrophizes thus: "Thou didst gather gold as tin, and didst multiply silver as lead." In the Homeric times the Greeks were familiar with it. Twenty layers of tin were in Agamemnon's cuirass given him by Kingres (H. xi. 25), and twenty bosses of tin were upon his shield (H. xi. 34). Copper, tin, and gold were used by Hephaestus in welding the famous shield of Achilles (H. viii. 474). The fence round the vineyard in the device upon it was of tin (H. xvii. 541), and the oxen were wrought of tin and gold (ibid. 574). The greaves of Achilles, made by Hephaestus, were of tin beaten fine, close-fitting to the limbs (H. xiii. 512, xxi. 502). His shield had two folds or layers of tin between two outer layers of bronze and an inner layer of gold (H. xx. 271). Tin was used in ornamenting chariots (H. xiii. 503), and a cuirass of bronze overlaid with tin is mentioned in H. xiii. 501. No allusion to it is found in the Odyssey. The melting of tin in a smelting-pit is mentioned by Herodotus (i. 89). Tin is not found in Palestine. Whence, then, did the ancient Hebrews obtain their supply? "Only three countries are known to contain any considerable quantity of it: Spain and Portugal, Cornwall and the adjacent parts of Devonshire, and the islands of Junc, Captina, and Baune, in the Straits of Malacca." (Kenrick, Phœnicia, p. 212). According to Dioscorides (v. 43) there were tin-mines in the island of Ceylon, off the east coast of Arabia, but the metal was not exported. There can be little doubt that the mines of Britain were the chief source of supply to the ancient world. Mr. Cooley, indeed, writes very positively (Maritime and Island Discovery, i. 131): "There can be no difficulty in determining the country from which tin first arrived in Egypt. That metal has been in all ages a principal export of India; it is enumerated as such by Arrian, who found it abundant in the ports of Arabia, at a time when the supplies of Rome flowed chiefly through that channel. The tin-mines of Baune are probably the richest in the world; but tin was unquestionably brought from the West at a later period." But it has been shown conclusively by Dr. George Smith (The Cussiterides, Lond. 1862) that, so far from such a statement being justified by the authority of Arrian, the facts are all the other way. After examining the commerce of the ports of Abyssinia, Arabia, and India, it is abundantly evident that, "instead of its coming from the East to Egypt, it has been invariably exported from Egypt to the East." (p. 29.) With regard to the tin obtained from Spain, although the metal was found there, it does not appear to have been produced in sufficient quantities to supply the Phœnician markets. Posidonius (in Strab. iii. 147) relates that in the country of the Artabini, in the extreme N. W. of the peninsula, the ground was bright with silver, tin, and white gold (wrought with silver), which were brought down by the rivers; but the quantity thus obtained could not have been adequate to the demand. At the present day the whole surface bored for mining in Spain is little more than a square mile (Smith, Cussiterides, p. 46). We are therefore driven to conclude that it was from the Cussiterides, or tin districts of Britain, than the Phœnicians obtained the great bulk of this commodity (Sir G. C. Lewis, Hist. Sources of the Arts, p. 155), and that this was done by the direct voyage from Gades. It is true that at a later period (Strabo, iii. 147) tin was conveyed overland to Marseilles by a thirty days' journey (Fried. Sic. v. 2); but Strabo (iii. 175) tells us that the Phœnicians alone carried on this traffic in former times from Gades, concealing the passage from every one; and that on one occasion, when the Romans followed one of their vessels in order to discover the source of supply, the master of the ship ran upon a shoal, leading those who followed him to destruction. In course of time, however, the Romans discovered the passage. In Ezekiel, "the trade in tin is attributed to Tarshish, as 'the merchant for the commodity, without any mention of the place whence it was procured' (Cussiterides, p. 74); and it is after the time of Julius Caesar that we first hear of the overland traffic by Marseilles. Pliny (vi. 36) identifies the cussiteres of the Greeks with the plumbo album or convarium of the Romans, which is our tin. Stoman, he says, is obtained from an ore containing lead and silver and is the first to become melted in the furnace, and is the same which the Germans call Herk, and is apparently the meaning of the Hebr. bedil in Is. i. 25. The etymology of cussiteres is uncertain.
TIPHSAS

From the fact that in Sanskrit bhatra signifies 'hin,' an argument has been derived in favor of India being the source of the ancient supply of this metal, but too much stress must not be laid upon it. [LEAD.]

W. A. W.

TIPHSAS (θηφσας [forl.]; [in 1 K. Rom. Vat. omit: in 2 K. ἡφθαοι; [Alex. ἡφθαοι, ἡφθαος]: Thaphne, Theoper] is mentioned in 1 K. ix. 24 as the limit of Solomon's empire towards the Ephraims, and in 2 K. xvi. 16 it is said to have been attacked by Nebuchadnezzar, king of Babylon. Tiphass and all that were therein, and all the coasts thereof. It is generally admitted that the town intended, at any rate in the former passage, is that which the Greeks and Romans knew under the name of Thapsacus (θηφσαος), situated in Northern Syria, at the point where it was usual to cross the Euphrates (Strab. xvi. i. § 21). The name is therefore, reasonably enough, connected with θῆφσας "to pass over" (Winer, Redekerüechbuch, ii. 651), and is believed to correspond in meaning to the Greek ἀπόσας, the German fort, and our "fort."

Thapsacus was a town of considerable importance in the ancient world. Xenophon, who saw it in the time of Cyrus the younger, calls it "great and prosperous" (ἀρχαίαν εἰς ἱππακούσιον. Aene. i. 4, § 11). It must have been a place of considerable trade, the land-traffic between East and West passing through it, first on account of its fordway (which was the lowest of the Ephraims), and then on account of its bridge (Strab. xvi. i. § 22), while it was likewise the point where goods were both embarked for transport down the stream (Q. Curt. x. 1), and also disembarked from boats which had come up to it, to be convoyed on to their final destination by land (Strab. xvi. 3, § 4). It is a fair conjecture that Solomon's occupation of the place was connected with his efforts to establish a line of trade with Central Asia directly across the continent, and that Tadmor was intended as a resting-place on the journey to Thapsacus.

Thapsacus was the place at which armies marching east or west usually crossed the Great River. It was there that the Ten Thousand first learned the real intentions of Cyrus, and, consenting to aid him in his enterprise, passed the stream (Xen. Aene. i. 4, § 11). There too Darius Codomannus commenced his flight from Xerxes (Arr. Esp. Hist. i. 13); and Alexander, following at his leisure, made his passage at the same point (ibid. iii. 7). A bridge of boats was usually maintained at the place by the Persian kings, which was of course broken up when danger threatened. Even then, however, the stream could in general be forded, unless in the flood-season.6

It has been generally supposed that the site of Thapsacus was the modern Deir (D'Anville, Rossellini, Vaux, etc.). But the Ephraims expedition proved that there is no ford at Deir, and indeed showed that the only ford in this part of the course of the Ephraims is at Sarqish, 45 miles below Halil, and 163 above Deir (Ainsworth, Travels in the Track of the Ten Thousand, p. 70). This then must have been the position of Thapsacus. Here the river is exactly of the width mentioned by Xenophon (4 stades or 800 yards), and here for four months in the winter of 1841-1842 the river had but 20 inches of water (ibid. p. 72.

"The Ephraims is at this spot full of beauty and majesty. Its stream is wide, and its waters generally clear and blue. Its banks are now and level to the left, but undulate gently to the right. Previous to the approach at this point, the course of the river is smoother, but here it turns to the east, expanding more like an inland lake than a river, and quitting (as Xerxes has described it) the Palmyrene solitudes for the fertile Mydonion." (ibid.). A paved causeway is visible on either side of the Ephraims at Sarqish, and a long line of mounds may be traced, disposed, something like those of Nineveh, in the form of an irregular paralellogram. Those mounds probably mark the site of the ancient city.

G. R.

TIRAS (τηρᾶς [perh. longer, desire]: θηρᾶς; [Rom. in 1 Chr. Ὠρᾶς: Tiris]). The youngest son of Japheth (Gen. 2. 8). As the name occurs only in the ethnological table, we have no clue, as far as the Bible is concerned, to guide us to the identification of it with any particular people. Ancient authorities generally fixed on the Thracians, as presenting the closest verbal approximation to the name Jepheth. Act. i. 9, § 1; Jerome, in Gen. x. 2; Targums Pseudo-J. and Jerus. on Gen. i. 1; Targ. on 1 Chr. i. 5): the occasional rendering Persis probably originated in a corruption of the original text. The correspondence between Thrace and Tiras is not so complete as to be convincing; the gentle form φῆλει brings them nearer together, but the total absence of the ρ in the Greek name is observable. Granted, however, the verbal identity, no objection would arise on ethnological grounds to placing the Thracians among the Japhetic races. Their precise ethnic position is indeed involved in great uncertainty; but all authorities agree in their general Indo-European character. The evidence of this is circumstantial rather than direct. The language has disappeared, with the exception of the ancient names and the single word bois, which forms the termination of Meosuria, Selymbria, etc., and is said to signify "town" (Strab. vii. p. 319). The Thracian stock was represented in later times by the Galatae, and these again, still later, by the Dacians, which each of them inherited the name (Strab. vii. p. 392). But this circumstance throws little light on the subject; for the Dacian language has also disappeared, though fragments of its vocabulary may possibly exist either in Wallachian dialects or perhaps in the Albanian language (Die senneb., Or. Ethn. p. 683). If Griinm's identifications of the tribe with the Goths were established, the Teutonic affinities of the Thracians would be placed beyond question (Gesch. Duits. Spr. I. 178); but this view does not meet with general acceptance. The Thracians are associated in ancient history with the Paeonians (Strab. ix. 401), and the Paeonians, with whom they had many names in common (Strab. xiii. 300); in Asia Minor they were represented by the Bithynians (Herod. i. 28, vii. 53). These circumstances lead to the conclusion that they belonged to the Indo-European family, but do not warrant us in assigning them to any

---

6 This is clear from the very name of the place, and is confirmed by modern researches. When the natives told Cyrus that the stream had acknowledged him as its king, having never been forded until his army waded through it, they calculated on his ignorance, or thought he would not examine too strictly into the groundwork of a compliment. (See Xen. Aene. i. 3, § 11).
particular branch of it. Other explanations have
been offered of the name Tirus, of which we may
notice the Agathus, the first part of the name
('Agathos') being treated as a liturgical term. In
Tirathites and the various tribes occupying
that Tyrus (Kalsch, Comn. p. 246); the river Ty-
ras, Damascus, with its cognominaustrians, the
Tirite (Havernick, Einl. ii. 231; Schult-
ness, Petrol. p. 194); and, lastly, the maritime
Tyrreni (Tuch, in Gen. l. c.).

W. L. B.

TIRATHITES. THE ( פֶּרֶטִיתֵי ) [From a
place as "gate," Ges.]; [Rom. Θυερωτίς : Vat. ]
Pathé: Alex. Apthtith: Correctus. One of the
three families of Scribes residing at Jahaz (1
Ch. xi. 55), the others being the Shemihites and
Shuahites. The possession is hopelessely obscure,
and it is perhapsimpossible to discover whose
these three families derived their names. The
Jewish commentators, playing with the names in
trew Semitic fashion, interpret them thus: " They
called them Tirathim, because their voices when
they sang resounded loud ( פֶּרֶטִיתֵי ) ; and Shumi-
hites because they made themselves heard ( פֶּרֶטִיתֵי)
in reading the Law."
The SHENIHITES having been inadvertently
omitted in their proper place, it may be as well to
give here the equivalents of the name ( פֶּרֶטִיתֵי)
שֶּמֶטַתֵי : Remants.

TIRE ( פֶּרֶטָה ) An ornamental head-dress worn
on festive occasions (Ex. xxiv. 17, 23). The term
 yarı is elsewhere rendered "goodly" (Ex. xxxix.
28); " bonnet " (Is. iii. 20; Ez. xi. 18); and "or-
nament " (Is. xli. 10). For the character of the
article, see HEAD-DRIESS.

TIRHAKAH ( פִּרְחַקָה ) [serb. brought
fifth, exiled, Sin.]: Qapd/x: [Vat. in 2 K.,
Qapd/x: Sin. Alex. in Is.. Qapd/x: Aethiopia].
Thirhu. King of Ethiopia. Cash (Barnes Alibi!
axio. i., the opponent of Semachoth (2 K. xix.
9; Is. xxvii. 9). While the king of Assyria was
warring against Libanus, in the south of Palestine, he heard
of Tirhakah's advance to fight him, and sent a
second time to demand the surrender of Jerusalem.
This was B. c. cir. 713, unless we suppose that the
expedition took place in the 24th instead of the
14th year of Hezekiah, which would bring it to
B. c. cir. 703. If it were an expedition later than
that of which the date is mentioned, it must have
ever been before B. c. cir. 698. Hezekiah's last
year. But if the reign of Manasseh is reduced to 55 years,
these dates would be respectively B. c. cir.
693, 683, and 678, and these numbers might have to be
slightly modified, the fixed date of the capture of
Samaria, B. c. 721, being abandoned.

According to Manetho's epitomists, Taros or
Tarakos was the third and last king of the XXVth
dynasty, which was of Ethiopians, and-reigned 18
(Mer.), or 20 (Ezra) years. [Stu.] From one of the
Apis-tablets we learn that a bull Apsis was born in
his 26th year, and died at the end of the 20th of
Pœanütches l. of the XXVth dynasty. Its life
exceeded 20 years, and no Apsis is stated to have
lived longer than 26. Taking that sum as the
most probable, we should date Tirhakah's accession
B. c. cir. 605, and assign him a reign of 55 years.
In this case we should be obliged to take the later
reckoning of the Biblical events, were it not for the
possibility that Tirhakah ruled over Ethiopia before
becoming king of Egypt. In connection with this
theory it must be observed, that an earlier Ethi-
opian of the same dynasty is called in the Bikl
( So. king of Egypt), while this ruler is called
Tirhakah, king of Ethiopia," and that a Pharaoh
is spoken of in Scripture at the period of the latter,
and also that Herodotus represents the Egyptian
opponent of Semachoth as Sethos, a native king,
who may however have been a vassal under the
Ethiopian.

The name of Tirhakah is written in hierogly-
phics TEHARKA. Sculptures at Thbes commemorate
his rule, and at Gebel-Berlek, or Napata, he
constructed one temple and part of another.
Of the events of his reign little else is known, and the
account of Megathenes (vp. Strabo, xv, p. 688),
that he invaded Sesostris as a warrior and reached
the Pillars of Herakles, is not supported by other
evidence. It is probable that at the close of his
reign he found the Assyrians too powerful, and
referred to his Ethiopian dominions.
R. S. P.

TIRHANAH ( פִּרְחַנָה ) [incitiation or for-
var, Ges.]: Qapd/x: Alex. Apzjdy: Thea-
comai. Son of Caleb ben-Hezron by his concubine
Manachah (1 Ch. ii. 48).

TIRIA ( פִּרְחָא ) [serf, Ges.]: Qapd/x: [Vat.
Zara]: Alex. Apzjdy: Thrin. Son of Jehdehel of
the tribe of Judah (1 Ch. iv. 16).

TIRSHATHA (always written with the ar-
ticle, פִּרְחָא see below): hence the LXX
give the word Ανθρωπατα [Alex. FA. Ανθρωπατα,
Vat. other forms] (Ezr. B. 64; Neh. vii. 60), and
Μωϋσεατα [Alex. FA. omit] (Neh. x. 1) [Vulg.
Moseba]. The title of the governor under the Persians,
derived by Gesenius from a Persian root signifying "storm," "severe." He
computes the title Stresthe, formerly
given to the magistrates of the free and imperial
cities of Germany. Compare also our expression,
"most dread sovereign.
"It is added as a title after the name of Nehemiah (Neh. vii. 9, 11 [Heb.
2]): and occurs also in three other places, Ezr. ii.
(ver. 63), and the repetition of that account in Neh.
ii. (vv. 65-70), where probably it is intended to
denote Zerubbabel, who had held the office before
Nehemiah. In the margin of the A. V. (Ezr. ii.
63; Neh. vii. 65, x. 1) it is rendered "governor;"
an explanation justified by Neh. xii. 26, where
"Nehemiah the governor," פִּרְחָא, pos-
sibly from the same root as the word we write Pa-
cha, or Pasha; occurs instead of the more usual
expression, "Nehemiah the Tirshatha."
This word, פִּרְחָא, is one of very common occurrence. It is
twice applied by Nehemiah to himself (vv. 14, 18),
and by the prophet Haggai (i. 1, ii. 21) to Ze-
rubbabel. According to Gesenius, it denotes the
prefect or governor of a province of less extent than
a satrapy. The word is used of officers and gov-
ernors under the Assyrian (2 K. xviii. 24; Is. xxxvii. 9), Babylonian (Jer.
ii. 57; Ezx. xxii. 6, 23; see also Ezr. v. 3, 11, vi. 7: Dan. iii. 2, 3, 27, vi.
7 [Heb. 8], Median (Jer. ii. 28), and Persian (Esth.
ii. 9, 18, 3) monarchies. And under this last we
find it applied to the rulers of the provinces bor-
der in Egypt (Ezra. viii. 30; Neh. ii. 7, 9, iii. 7), and to the governors of Judea, Zerubba-
bel and Nehemiah (compare Mal. i. 8). It is
found also at an earlier period in the times of Solo-
TIRZAH

The youngest of the five daughters of Zelophehad, whose case originated the law that in the event of a man dying without male issue his property should pass to his daughters (Num. xxv. 33; xxxiv. 2; Josh. xviii. 3). (Zelophehad)

TIRZAH (תִּירְצָה). [Delight]: Θερσά: Thersa). The name naturally points to a place called Tishbesh (Thirsa), or Tishba, or Tiszata, or Tiszathia, of which see Tirsatha, as distinguished from the Tirsathah from others of the same class, governors, captains, princes, rulers of provinces.

TISHBITE, THE (תישbite, the): [Gen.]: [Rom.]: [LXX.]: [Vulga.]: [A.].

The name Tirzah reappears as a royal city — the residence of Jeroboam I (1 K. xiv. 17) and of his successors, Baasha (xxi. 21, 32), Elah (xiv. 8, 9), and Zimri (ibid. 15). It contained the royal sepulchres of one (xvi. 6), and probably all the first four kings of the northern kingdom. Zimri was besieged there by Omri, and perished in the flames of his palace (ibid. 18). The new king continued to reside there at first, but after six years he removed to a new city which he built and named Shomron (Samaria), and which continued to be the capital of the northern kingdom till its fall. Once, and only once, does Tirzah reappear, as the seat of the conspiracy of Menahem ben-Gadi against the wretched Shallum (2 K. xxv. 14, 15); but as soon as his revolt had proved successful, Menahem removed the seat of his government to Samaria, and Tirzah was again left in obscurity. Its reputation for beauty throughout the country must have been widespread. It is in this sense that it is mentioned in the Song of Solomon, where the juxtaposition of Jerusalem is sufficient proof of the estimation in which it was held — "Beautiful as Tirzah, comely as Jerusalem" (Cant. vi. 4). The LXX. (Codd.) and Vulg. (sorit). do not, however, take tirzah as a proper name in this passage.

Eusebius (Onomast. Θερσάζ) mentions it in connection with Menahem, and identifies it with a "village of Samaritans in Baanea." There is, however, nothing in the Bible to lead to the inference that the Tirzah of the Israelite monarchs was on the east of Jordan. It does not appear to be mentioned by the Jewish topographers, or any of the Christian travellers of the Middle Ages, except Ptolemy, who places "Tersa on a high mountain, three leagues (cheta) from Samaria to the east" (Ptol. & Str. cap. vii.). This is exactly the direction, and very nearly the distance, of Tel-tirzah, a place in the mountains north of Nablus, which was visited by Dr. Robinson and Mr. Van de Velde in 1832 (Bibl. Res. iii. 392; Not. and Pol. iii. 934). The town is on an eminence, which towards the east is exceedingly lofty, though, being at the edge of the central highlands, it is more approachable from the west. The place is large and thriving, but without any obvious marks of antiquity. The name may very probably be a corruption of Tirzah: but beyond that similarity, and the general agreement of the site with the requirements of the narrative, there is nothing at present to establish the identification with certainty.

G.

Assuming, however, that a town is alluded to as Elijah's native place, it is not necessary to infer that it was itself in Gilgal, as Ephraimites, Adrie-
TITANS

This lexicographer pretends to have been in possession of some special information as to the situation of the place. He says (Lex. Hor. ed. Michaelis), "Urbs in tribu Gela, Jelua inter et Sarum." Jelua should be Jecbha (i.e. dog-eat-dog) and this strange lot of "confused" toponymy is probably taken from the map of Abrahamins, made on the principle of inserting every name mentioned in the Bible, known or unknown.

There is no doubt that this is the meaning of תינון, which in the A. V. is rendered by the general term "inhabitant," has really the special force of "resident" or even "stranger." This, and the fact that a place with a similar name is not elsewhere mentioned, has induced the conjectures and lexicographers, with few exceptions, to adopt the name "Tishbite" as referring to the place Θηβή in Naphtali, which is found in the LXX. text of Tobit i. 2. The difficulty in the way of this is the great uncertainty in which the text of that passage is involved, as has already been shown under the head of Θηβίς: an uncertainty quite sufficient to destroy any dependence on it as a topographical record, although it bears the traces of having originally been extremely minute. Benson (Bibl. crit., note i 1. xii.) suggests in support of the reading the "Tishbite from Tisba of Gilead" (which however he does not adopt in his text), that the place may have been purposely so described, in order to distinguish it from the town of the same name in Galilee.

TIITHE.

Without inquiring into the reason for which the number ten has so frequently preferred as a number of selection in the cases of tribute-offerings, both sacred and secular, voluntary and compulsory, we may remark that numerous instances of its use are found both in profane and also in Biblical history, prior to or independently of the appointment of the Levitical tithes under the Law. In Biblical history, the two prominent instances are—1. Abram presenting the tenth of all his property, according to the Syriac and Arabic versions of Heb. vii. and x. xarchi in his Con., but as the passages themselves appear to show, of the spoils of his victory, to Melchizedec (Gen. xiv. 20; Heb. vii. 2, 6; Joseph. Ant. i. 10, 30; Selden On Titles, c. 1). 2. Jacob, after his vision at Luz, devoting a tenth of all his property to God in case he should return home in safety (Gen. xxviii. 22). These instances bear witness to the antiquity of tithes, in some shape or other, previous to the Mosaic title-system. But numerous instances are to be found of the practice of heathen nations, Greeks, Romans, Carthaginians, Arabs, of applying tenths derived from property in general, from spoil, from consecrated goods, or from commercial profits, to sacred, and quasi-sacred, and also to fiscal purposes, namely, as consecrated to a deity, public.
seated as a reward to a successful general, set apart as a tribute to a sovereign, or as a permanent source of revenue. Among other passages, the following may be cited: 1. Macr. xi. 51; Howell, ii. 39. iv. 192, v. 77, vii. 132. ix. 81; Didot. Sec. v. 12, xi. 33, xx. 14; Paus. v. 10, § 2, x. 10, § 1; Ulysses. Hal. i. 19, 23; Justin, xviii. 7, xx. 3; Arist. Econ. ii. 2; Liv. v. 21; Polyb. ix. 39; Cic. Ver. iii. 3, 6, and (where titles of wine, oil, and "minute fruges," are mentioned), Pro Leg. Manil. 6; Plut. Ages. c. 10. p. 66; Selden, iii. xii. 14; Macrob. Sat. i. 14; Xen. Hell. i. 7, 10, iv. 3, 21; Tose. Inscr. Gr. p. 215; Gibson, vol. iii. p. 301, ed. Smith: and a remarkable instance of fruits tithe and offered to a deity, and a feast made, of which the people of the district partook, in Xen. Exp. Cypr. v. 3, 9, answering thus to the Hebrew poor man's tithe-feast to be mentioned below.

The first enactment of the Law in respect of title is the declaration that the tenth of all produce, as well as of flocks and cattle, belongs to Jehovah, and must be offered to Him. 2. That the tithe was to be paid in kind, or, if redeemed, with an addition of one fifth to its value (Lev. xxvii. 30-33). This tenth, called Teremeth, is ordered to be assigned to the Levites, as the reward of their service, and it is ordered further, that they are therefore not to sell these receipts, which is to be devoted to the maintenance of the high-priest (Num. xviii. 21-28).

This legislation is modified or extended in the book of Deuteronomy, i.e. from thirty-eight to forty years later. Commands are given to the people, — 1. to bring their tithes, together with their vintage and other offerings, i.e. first-fruits, to the closed centre of worship, the metropolis, there to be eaten in festive celebration in company with their children, their servants, and the Levites (Deut. xii. 5-18). 2. After warnings against idolatrous or virtually idolatrous practices, and the definition of clean as distinguished from unclean animals, among which latter class the swine is of obvious importance in reference to the subject of tithe, the legislator proceeds to stipulate that all the increase of the soil shall be tithe every year (ver. 17 seems to show that corn, wine, and oil alone are intended), and that these tithes with the firstfruits of the flock and herd are to be eaten in the metropolis. 3. But in case of distance, permission is given to convert the produce into money, which is to be taken to the appointed place, and there had out in the purchase of food for a festive celebration, in which the Levite is, by special command, to be included (Deut. xiv. 22-27). 4. Then follows the direction, that at the end of three years, i.e. in the course of the third and sixth years of the Sabbatical period, all the title of that year is to be gathered and laid up "within the gates," i.e. probably in some central place in each district, not at the metropolis: and that a festival is to be held, in which the stranger, the fatherless, and the widow, together with the Levite, are to partake (bibil. vv. 28, 29). 5. Lastly, it is ordered that after taking the tithe in each third year, "which is the year of tithing," an exemplary declaration is to be made by every Israelite, but he has done his best to fulfill the Divine command (Deut. xxvi. 12-14).5

From all this we gather, 1. That one tenth of the whole produce of the soil was to be assigned for the maintenance of the Levites. 2. That out of this the Levites were to dedicate a tenth to God, for the use of the high-priest. 3. That a title, in all probability a second title, was to be applied to festival purposes. 4. That in every third year, either this festival tithe or a third tithe was to be eaten in company with the poor and the Levites. The question arises, were there three tithes taken in this third year: or is the third tithe only the third under a different description? That there were two yearly tithes seems clear, both from the general tenor of the directions and from the LXX. rendering of Dent. xxvi. 12. But it must be allowed that the third tithe is not without support. 1. Josephus distinctly says that one tenth was to be given to the priests and Levites, one tenth was to be applied to feasts in the metropolis, and that a tenth besides those (τοιαύτη τίπος αυτων) was every third year to be given to the poor (Ant. iv. 8, § 8, and 22). Tobit says, he gave one tenth to the priests, one tenth he sold and spent at Jerusalem, i.e. converted according to Dent. xiv. 24, 29, and another tenth he gave away (Tobit i. 7, 8). 3. St Jerome says one tenth was given to the Levites, of which they gave one tenth to the priests (θεσαυρομενος); a second tithe was applied to festival purposes, and a third was given to the poor (προσθηκης) (Con. on Ezek. xlv. vol. i. p. 565). Spencer thinks there were three tithe. Jennings, with Meir, thinks there were only two complete tithes, but that in the third year an addition of some sort was made (Spencer, De Leg. Hebr. 727; Jennings, loc. cit. 183).

On the other hand, Mannheim says the third and fourth years' tithe was shared between the poor and the Levites, i.e. that there was no third tithe (De iher. Paup. vi. 4). Selden and Michaelis remark that the burden of three titles, besides the first-fruits, would be excessive. Selden thinks that the third year's title denotes only a different application of the second or festival tithe, and Michaelis, that it meant a surplus after the consumption of the festival tithe (Selden, De Titibus, c. 2, p. 13; Michaelis, Laws of Moses, § 192, vol. iii. p. 143, ed. Smith). Against a third tithe may be added Ruckard, Ant. Hebr. p. 550; Judah, Ant. § 389; Godwyn, Moses and Aaron, p. 136, and Carpozy, pp. 621, 622; Keil, Bibl. Arch. § 71, i. 337; Salzschütz, Hebr. Arch. t. 70; Winer, Redeb. s. v. Zehnme. Knobel thinks the title was never taken in full, and that the third year's title only meant the portion contributed in that year (Con. on Dent. xiv. 29, in Konvyn. Exeg. Handb.). Beadl thinks that for two years the title was left in great measure to free-will, and that the third year's title only was compulsory (Afterthiam. p. 446).

Of these opinions, that which maintains three separate and complete tithes imposes an excessive burden on the land, and not easily reconcilable with the other directions: yet there seems no reason for rejecting the notion of two yearly tithes, when we recollect the special promise of fertility to the soil, conditional on the observance of the command of the Law (Deut. xxviii. 2). There would thus be, 1. a yearly tithe for the Levites; 2. a second yearly tithe, and imposing an excessive burden on the land, which last would every third year be shared by the Levites.
with the poor. It is this poor man's title which Rabbinical writers may be observed as likely to be converted to the king's use under the royal dynasty (1 Sam. vii. 15, 17; Micht. Laws of Moses, vol. i. p. 239). Ewald thinks that under the kings the ecclesiastical title-system reverted to what he supposes to have been its original free-will character. It is plain that during that period the title-system partook of the general neglect into which the observance of the Law declined, and that Hezekiah, among his other reforms, took efficacious means to revive its use (2 Chr. xxxi. 5, 12). Similar measures were taken after the Captivity by Nehemiah (Neh. xii. 41), and in both these cases special officers were appointed to take charge of the stores and storehouses for the purpose. The practice of tithing especially for relief of the poor appears to have subsisted even in Israël, for the prophet Amos speaks of it, though in an ironical tone, as existing in his day (Am. iv. 4). But as any degeneracy in the national faith would be likely to have an effect on the title-system, we find complaint of neglect in this respect made by the prophet Malachi (iii. 8, 10). Yet, notwithstanding partial evasion or omission, the system itself was continued to a late period in Jewish history, and was even carried to excess by those who, like the Pharisees, esteemed exactness in observance of the Law (Heb. vi. 5-8; Matt. xxiii. 23; Luke xvii. 12; Josephus, Ant. xx. 9, § 2; Tit. c. 15).

Among details relating to the title payments mentioned by Rabbinical writers may be noticed:
(1.) That in reference to the permission given in case of distance (Deut. xiv. 24), Jews dwelling in Babylonia, Amman, Moab, and Egypt, were considered as subject to the law of title in kind (Koelos, iii. 9, 2, p. 555). (2.) In tithing sheep the custom was to inclose them in a pen, and as the sheep went out at the opening, every tenth animal was marked with a rod dipped in vermilion. This was the "passing under the rod." The Law ordered that no inquiry should be made whether the animal were good or bad, and that if the owner changed it, both the original and the changeling were to be regarded as devoted (Lev. xxvii. 32, 33; Jer. xxxiii. 13; R . v . c . 7; Godwyn, M. and A. p. 139, vi. 7). (3.) Cattle were tithed in and after August, corn in and after September, fruits of trees in and after January (Godwyn, p. 137, § 9); Buxtorf. Syn. Jud. c. xii. pp. 282, 283. (4.) "Corners" were exempt from tithe (Deut. i. 9). (5.) The general rule was that all edible articles not purchased, were tithable, but that produce not specified in Deut. xxiv. 23, were regarded as doubtful. Title of them was not forbidden, but was not required (Mausoccrh. i. 1; Democ. i. 1; Carpzov. App. Bibl. pp. 619, 620). H. W. P.

* TITLLE is the diminutive of ἀλίτης, the very least of a thing. It stands for the Greek ἀξίαν, the very least of a thing. It stands for the Greek κεφαν (Matt. v. 18; Luke xvi. 17), a little horn, denoting the slightly curved hooks attached to the head of the Hebrew letters, especially ל and נ, more noticeable in Hebrew manuscripts than in the ordinary printed Hebrew. It signified a letter or an entire copy to omit this appendage where it belonged. The ἂτο of the same connection was the Greek μουριν, or Hebrew גוות, the smallest letter.

a His birthplace may have been here; but this is quite uncertain. The name, which is Roman, proves nothing

of the Greek and Hebrew alphabets. It will be seen how strong, therefore, was the Saviour's assertion: "one jot or one tittle shall in no wise pass from the law till all be fulfilled." (Matt. v. 18.)

TITUS MANLIUS. [MANLIUS.]

TITUS (Titos; Titoz). Our materials for the biography of this companion of St. Paul must be drawn entirely from the notices of him in the Second Epistle to the Corinthians, the Galatians, and to Titus himself, combined with the Second Epistle to Timothy. He is not mentioned in the Acts at all. The reading Titus θαυσότος in Acts xvii. 7 is two premature for any inference to be drawn from it. Wiseman indeed lays some slight stress upon it (Chronol. des Apoc. Zeit. Gtt. 1848, p. 294), but this is in connection with a theory which needs every help. As to a recent hypothesis, that Titus and Timothy were the same person (H. King, Who was St. Titus? Dublin, 1853), it is certainly ingenious, but quite untenable.

Taking the passages in the epistles in the chronological order of the events referred to, we turn first to Gal. ii. 1, 3. We suppose the journey mentioned here to be identical with that (recorded in Acts xvi.) in which Paul and Barnabas went from Antioch to Jerusalem to the conference which was to decide the question of the necessity of circumcision to the Gentiles. Here we see Titus in close association with Paul and Barnabas at Antioch. He goes with them to Jerusalem. He is in fact one of the Twelve (Acts xxi. 2), who were deputed to accompany them from Antioch. His circumcision was either not insisted on at Jerusalem, or, if demanded, was firmly resisted (οὐδὲ ἐκκαινία τοῦ γενομένου). He is very emphatically spoken of as a gentile (Ἐλαχρός), by which is most probably meant that both his parents were Gentiles. Here is a double contrast from Timothy, who was circumcised by St. Paul's own directions, and one of whose parents was Jewish (Acts xvi. 1; 2 Tit. 1, 5, iii. 15). Titus would seem, on the occasion of the council, to have been specially a representative of the church of the uncircumcision.

It is to our purpose to remark that, in the passage cited above, Titus is so mentioned as apparently to imply that he had become personally known to the Galatian Christians. This, again, will combine with the previous circumcisions, namely, that of the Epistle to the Galatians and the Second Epistle to the Corinthians were probably written within a few months of each other (Galatians, Epistle to Titus), and both during the same journey. From the latter of these two epistles we obtain fuller notices of Titus in connection with St. Paul.

After leaving Galatia (Acts xi. 23), and spending a long time at Ephesus (Acts xix. 1-xx. 1), the Apostle proceeded to Macedonia by way of Troas. Here he expected to meet Titus (2 Cor. ii. 13), who had been sent on a mission to Corinth. In this hope he was disappointed (Troas), but in Macedonia Titus joined him (2 Cor. vii. 6, 7, 13-16). Here we begin to see not only the above-mentioned fact of the mission of this disciple to Corinth, and the strong personal affection which subsisted between him and St. Paul (ἐν τῇ παμφώτιον ἀδίκως, vii. 7), but also some part of the purport of the mission itself. It had reference to the immorality of Corinth rebuked in the first epistle, and to the effect of that first epistle on the offending church. We learn further that the mission was so far suc
a There is some danger of confusing Titus and the brother (2 Cor. xii. 18), i.e. the brethren of 1 Cor. xvi. 12, who (according to this view) took the first letter.
before in the discussion of the mission from Ephesos to Corinth.

The movements of St. Paul, with which these later instructions to Titus are connected, are considered elsewhere. [PAUL; TIMOTHY.] We need only observe here that there would be great difficulty in inserting the visits to Crete and Nicopolis in any of the journeys recorded in the Acts, to say nothing of the other objections to giving the epistle any date anterior to the voyage to Rome. [TITUS. EPISTLE TO.] On the other hand, there is no difficulty in arranging these circumstances, if we suppose St. Paul to have travelled and written after being liberated from Rome, while thus we gain the further advantage of an explanation of what Paul has well called the affinity of this epistle and the first to Timothy. Whether Titus did join the Apostle at Nicopolis we cannot tell. But we naturally connect the mention of this place with what St. Paul wrote at a great interval of time afterwards, in the last of the pastoral epistles (Titus i. 12; Dalmatia, 2 Tim. iv. 10) for Dalmatia. This, by no means, at the north of Nicopolis, at no great distance from it. [NICOPOLIS.] From the form of the whole sentence, it seems probable that this disciple had been with St. Paul in Rome during his final imprisonment: but this cannot be asserted confidently. The tradition which is simply the result of this passage might seem to imply some repriev for the capital, and we might infer from them the conclusion that Titus became a second Demas; but on the whole this seems a harsh and unnecessary judgment.

Whatever else remains is legendary, though it may contain elements of truth. Titus is connected by tradition with Dalmatia, and he is said to have been an object of much reverence in that region. This, however, may simply be a result of the passage quoted immediately above: and it is observable that of all the churches in modern Dalmatia (Neale's Ecclesiastical Notes on Dalm. p. 175) not one is dedicated to him. The traditional connexion of Titus with Crete is much more specific and constant, though here again we cannot be certain of the facts. He is said to have been permanent bishop in the island, and to have died there at an advanced age. The modern capital, Candia, appears to claim the honor of being his burial-place (Cave's Apostolic, 1716, p. 42). In the fragment, De Tit. i Acti Titii, by the lawyer Zeunus (Fabric. Col. Apis. N. T. ii. 831, 852), Titus is called Bishop of Gortyna: and on the old site of Gortyna is a ruined church, of ancient and splendid masonry, which bears the name of St. Titus, and where service is occasionally celebrated by priests from the neighboring hamlet of Metropolis (E. Pallisner, Remains in Crete, from a MS. History of Con- do by Cyprian Belli, p. 22). The cathedral of Mc- goho-Castello, in the north of the island, is also dedicated to this saint. Lastly, the name of Titus was the watchword of the Cretans when they were invaded by the Venetians and the Venetians themselves, after their conquest of the island, adopted him to some of the honors of a patron saint; for, as the response after the prayer for the deceased of Venice was "Sancte Marce, tu nos adjuna," so the response after that for the Duke of Candia was "Sancte Titia, tu nos adjuna" (Pashley's Travels in Crete, i. 6, 179)."

---

α The day on which Titus is commemorated is January 4 in the Latin Calendar, and August 25 in the Greek.

We must not leave unnoticed the striking, though extravagant, panegyric of Titus by his successor in the see of C'rete, Andreas Cretensis (published, with Chrysostom, by L. Hieronymi, hist. Hier. Cre't. 1644). This panegyric has many excellent points: e. g. it incorporates well the more important passages from the Second Epistle to the Corinthians. The following are stated as facts. Titus is related to the Proconsul of the island: among his ancestors are Mnios and Klamathunios (οι ει Διαί). Early in life he obtains a copy of the Jewish Scriptures, and learns Hebrew in a short time. He goes to Judea, and is present on the occasion mentioned in Acts i. 15. His conversion takes place before that of St. Paul himself, but afterwards he attaches himself closely to the Apostle. Whatever the value of these statements may be, the following description of Titus (p. 156) is worthy of quotation: ὁ πρῶτος τῆς Κρήτης ἑκάστηρα ὑπελείπον τῆς ἀληθείας ὁ στέλει τῇ πίνουσι ἔρευναι οὐκ εὐφρενοῖς εἰκονισμοῖς ὡς ἀπίστως εἰλικριντος εὐφήμορος τῷ ὄρθοις τῇ Παλλίου ἀλήθείας ἀπήχυρας. J. S. II.

TITUS. EPISTLE TO. There are no specialties in this epistle which require any very elaborate treatment distinct from the other Pastoral letters of St. Paul. [TIMOTHY, EPISTLES TO]. If there were not genuine, it would be difficult confidently to maintain the genuineness of this. On the other hand, if the epistles to Timothy are received as St. Paul's, there is not the slightest reason for doubting the authorship of that to Titus. Amidst the various combinations which are found among those who have been skeptical on the subject of the pastoral epistles, there is no instance of the rejection of that before us on the part of those who have accepted the other two. So far indeed as these doubts are worth considering at all, the argument is more in favor of this than of either of those. Tatian accepted the Epistle to Titus, and rejected the other two. Origen mentions some who excluded 2 Tim., but kept 1 Tim. with Titus. Schleiermacher and Neander invert this process of doubt in regard to the letters addressed to Timothy, but believe that St. Paul wrote the present letter to Titus. Credner too believes it to be genuine, though he pronounces 1 Tim. to be a forgery, and 2 Tim. a compound of two epistles.

To turn now from opinions to direct external evidence, this epistle stands on quite as firm a ground as the others of the pastoral group, if not a firmer ground. Nothing can well be more explicit than the quotations in Irenæus, C. Herc. i. 16, 3 (see Tit. iii. 10), Clem. Alex. Strom. i. 350 (see i. 12), Tertull. De Prescr. Har. c. 6 (see iii. 10, 11), and the reference, also Adv. Marc. v. 21: to say nothing of earlier allusions in Justin Martyr, Dial. c. Tryph. 47 (see iii. 4), which can hardly be doubted, Theoph. Ad Autol. ii. p. 95, (see ii. 5), iii. 120 (see iii. 1), which are probable, and Clem. Rom. i. 20, 2 (see iii. 1), which is possible.

As to internal features, we may notice, in the first place, that the Epistle to Titus has all the characteristics of the other pastoral epistles. See, for instance, οὐκ ὁ δόγμα (iii. 8), δυσκινούσα διδακτική (i. 9, ii. 1, comparing i. 13, ii. 8), σωφρονίς, σφικτοίς, σωφρονίς (i. 8, ii. 5, 6, 12), σωφρός, σφικτοίς (Bar. i. 4, ii. 10, 11, 13, iii. 4, 6), ἄλληδρον ἄλληδρον (i. 14, comparing iii. 9), ἔμπρακτα (iii. 13), ἐνίβειμαι (i. 1), ἐξε (iii. 5; in i. 4 the word is doubtful). All this tends to show
that this letter was written about the same time and under similar circumstances with the other two. But, on the other hand, this epistle has marks in its phraseology and style which assimilate it to the general body of the epistles of St. Paul. Such may fairly be reckoned the following: κρήνηματι ὅ ἐπιστεύθη ἐγὼ (i. 3): the quotation from a heathen poet (i. 12); the use of αὐτόκεια (i. 11); the "going off at a word" (στιχίας ... ἐπιστεύσεως ... ii. 10, 11); and the modes in which the doctrines of the Atonement (Titus iii. 3-7) come to the surface. As to any difficulty arising from supposed indications of advanced hierarchical arrangements, it is to be observed that in this epistle πρεσβυτέροι and ἑπισκόποι are used as synonyms ("οἱ καταστάθησις πρεσβυτέροι ... διὶ γὰρ τῶν ἑπισκόπων ... i. 5, 7"); just as they are in the address at Miletus about the year 58 A. D. (Acts xx. 17, 28).

Concerning the contents of this epistle, something has already been said in the article on Titus. No very exact subdivision is either necessary or possible. After the introductory salutation, which has marked peculiarity (i. 1-4), Titus is instructed to appoint suitable presbyters in the Cretan Church, and specially such as shall be sound in doctrine and able to refute error (5-9). The Apostle then proceeds to a description of the whole character of the Cretans, as testified by their own writers, and the mischief caused by Judaising error among the Christians of the island (10-16). In opposition to this, Titus is to urge sound and practical Christianity on all classes (ii. 1-10), on the elder men (ii. 2), on the older women, and especially in regard to their influence over the younger women (3-5), on the younger men (6-8), on slaves (9, 10), taking heed meanwhile that he himself is a pattern of good works (ver. 7). The grounds of all this are given in the first seven verses of the Christian's self-denying and active piety (11, 12), in the glorious hope of Christ's second advent (ver. 13), and in the atonement by which He has purchased us to be his people (ver. 14). All which lessons Titus is to urge with fearless decision (ver. 15). Next, obedience to rulers is enjoined, with gentleness and forbearance towards all men (iii. 1, 2), these duties being again emphasized in the case of presbyters (vers. 3-7), and on the gift of new spiritual life and free justification (4-7). With these practical duties are contrasted those idle speculations which are to be carefully avoided (8, 9); and with regard to those men who are positively heretical, a peremptory charge is given (10, 11). Some personal allusions then follow (ii. 2, 3, 4, 5) expected at Crete, and on the arrival of either of them Titus is to hasten to join the Apostle at Nicopolis, where he intends to winter; Zenas the lawyer also, and Apollos, are to be provided with all that is necessary for a journey in prospect (12, 13). Finally, before the concluding messages of salutation, an admonition is given to the Cretan Christians, that they give heed to the duties of practical, used piety (14, 15). As to the time and place and other circumstances of the writing of this epistle, the following scheme of filling up St. Paul's movements after his first imprisonments will satisfy all the conditions of the case: We may suppose him (possibly after accomplishing his long-projected visit to Spain) to have gone to Ephesus, and taken voyages from thence, first to Macedonia and then to Crete, during the former to have written the First Epistle to Timothy, and to have been returning from his imprisonment before he went to Crete, being at the time of despatching it on the point of starting for Neopolis, to which place he went, taking Miletus and Corinth on the way. At Neopolis we may conceive him to have been finally apprehended and taken to Rome, whence he wrote the Second Epistle to Timothy. Other possible combinations may be seen in Birks (Herre Apostelbriefe, at the end of his edition of the Herre Paulusin, pp. 219-301), and in Wordsworth (Greek Testament, ii, pp. 418, 421). It is an undoubted mistake to endeavor to insert this epistle in any period of that part of St. Paul's life which is recorded in the Acts of the Apostles. There is in this writing nothing of that misunderstanding of different styles (as compared with the earlier epistles) which associates the Pastoral Letters with one another, and with the latest period of St. Paul's life; and it seems strange that such a letter as this should have been so strikingly observed by good scholars and exact chronologists, e. g. Archib. Evans (Script. Bong. iii, 327-333), and Wieseler (Chrom. des Apost. Zeit., pp. 332-355), who, after full and minute discussion of the style itself, are in thinking that this letter was written at Ephesus (between 1 and 2 Cor.), when the Apostle was in the early part of his third missionary journey (Acts xix.).

The following list of commentaries on the Pastoral Epistles may be useful for 1 and 2 Tim., as well as for Titus. Besides the general Patristic commentaries on all St. Paul's epistles (Chrysostom, Theodoret, Theophylact, Jerome, Bede, Alcuin, the Medialval (Eunomius, Eugenius, Aquinas), those of the Reformation period (Luther, Melanchthon, Calvin), the earlier Roman Catholic (Justinius, Cornelius a Lapide, Estius), the Protestant commentaries of the 17th century (Coccineus, Bonum, etc.), and the more recent German and French writers, to mention the whole Greek Testament (Rosenmuller, De Wette, Alford, Wordsworth, etc.), the following on the Pastoral Epistles may be specified: Daillé, Exposition (1 Tim. Gen. 1861, 2 Tim. Gen. 1859, Tit. Par. 1865); Heydenreich, Die Pastoralbriefe (Habdan. 1826, 1828); Flatt, Verk. über die Br. F. (2 Tim. u. 1. Tim. 1841); MacLen, Die Apostolischen Briefe (GHH); Estius, Ephesus, etc., after the Pastoralbriefe (Tub. 1856); Matthies, Erklärung der Pastoralbriefe (Greifsw. 1840); Huthcr (part. xi.) of Meyer's Commentary, Göt. 1830 (3d Auf. 1866); Wieseler (in continuation of Olshausen, Koenigshof, 1860), translated (with the exception of 2 Tim.) in Clark's Foreign Theology, Lib. (Edinb. 1851.) Trench, The First Letter to the Corinthians (ii. vi. of the Amer. ed. of Olshausen, N. Y. 1858), and especially Elliott (Pastoral Epistles, 2d ed., London, 1861), who mentions in his preface a Danish commentary by pp.oller, and one in modern Greek, Ζωοδοχος Ιπποτιδος, by Coray (Par. 1841). Besides these, there are commentaries on 1 Tim. and 2 Tim. by Mosheim (Hamb. 1755, 1855).
TIZITE, THE

(Lips. 1857, 1859), on 1 Tim. by Heeschmann (Tub. 1791), and Weischedel (Göt. 1810), on 2 Tim. by J. Barlow and T. Hall (Lond. 1862 and 1858), and by Blicher (Halm 1829), on Tit. by J. Taylor (Lond. 1868), Van Haven (Halm 1742), and Kuinem (Comment Theol. ed. Velthaus, Ruperti et Kuinem [p. 292 ff.]). To these must be added what is found in the Critical Notes, Supp. ii., v., viii., and a still fuller list is given in Barling’s Cyclopædia Bibliographica; Pr. ii. Subjects, pp. 155, 1555, 1574, S. H. * The earlier literature of the controversy on the genuineness of the Pastoral Epistles is referred to in the art. TIMOTHY, EPISLES TO. Among the more recent essays on the subject we may mention: C. F. Scharling, Die neuen Untersuchungen ab. die sogenannten Pastoralbriefe, aus dem Dänischen, Jena, 1846 (unpublished). Th. Radon, Die Argumente historisch, quibus recitac Epistolam Past. Origo Paulina impugnata est, a prize essay, Gotting, 1852 (reprints 1 Tim., with Lincke and Bleek, but delists 2 Tim. and Titus). W. Mangold, Die Erklärer der Pastoralbriefe, Marb. 1856. C. W. Otto, Die geschichtlichen Verhältnisse der Pastoralbriefe aufs Neu erstaut, Leipz. 1860, pp. xvii., 406, (defends the genuineness of the epistles, but weakens the arguments by denying the copyist’s release from his first imprisonment); comp. the review by Weiss, Theol. Stud. u. Krit., 1861, pp. 575-577, and Huther’s criticism in the 3d ed. of his Krit. exeg. Homiliocr. (1866). L. Rufflet, Saint Paul, ou, double expériences de Rome, Paris, 1869. Reuss, Geschichte der Schriften N. T. (4th Ausg. 1864), pp. 76 ff., 112 ff. (defends the genuineness of the epistles). Wieseler, art. Titus, in Th. u. T., die Briefe Pauli an. in Herzog’s Real-Encycl. vii. 276-342 (1866). Holzmann, in Bunsen’s Bibelwerk. viii. 486-512 (1866), reviewing the recent literature. Laurent, Neuest. Studien (1866), p. 104 ff., chiefly on the point of Paul’s release from his first imprisonment, which he maintains: so Ewald, Geschichte, vi. 620 f. 5th Ausg. It may be noted here that recent ex- aminations of the Alexandrine MS. show that the reading ἐν τῷ τῆς ἀδικίας in the Epist. of Clement of Rome to the Corinthians (e. 5) is unquestionable. See on the passage Lightfoot’s note, in his excellent edition of the epistle (1869). L. Meyer, in the 3d ed. of the art. De Wette’s Kurszef. exeg. Homiliocr. (3d. Thell v.), which contains the Pastoral Epistles, observes that, though formerly holding a pretty firm conviction of their spuriousness, renewed study has satisfied him of the unlikelihood or altogether too subjective char- acter of many of the objections to them, though he cannot yet feel that confidence in their genuineness which the recent commentators (Wieseler, Huther, Osterzee) express (Pref. p. x). Guericke, Neuest. Isagoge, 5th Ausl. (1868), pp. 350- 361, defends the genuineness of these epistles, as in his earlier works. Davidson, Intro. to the Study of the N. T. (Lond. 1868), ii. 144-195, repeats the arguments of the Tübingen school against them. To the list of commentaries on the Pastoral Epistles given above, we may add that of J. J. van Oosterzee, Thell xi. of Lange’s Bibliothek (2d Aufl. 1844), translated with additions by Dr. E. A. Washburn and Dr. E. Harwood, in vol. viii. of the Amer. ed. of Lange (N. Y. 1868). A.

TIZITE, THE [τίτιτις] [patr.]: Vat. and F.A. a leser: [Kou. Θαυρά]: Alex. Θαυρά: Thamiel). The designation of Joha, the brother of Jeduel and son of Shimri, one of the heroes of David’s army named in the supplementary list of 1 Chr. xii. 46. It occurs nowhere else, and nothing is known of the place or family it denotes.

TOBIAH [Thiia], Tobia, Tobiah: [Vat. Θοία]: [Alex. Θαού]: Thohoa. A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. vi. 34 [19]). The name as it now stands may be a fragment of "Naahath" (comp. vs. 26, 34).

TOB-ADONIYAH [Ṭob-/wp̄bdnîyāh]: Tobadonias, [Vat. Tobadonias: Alex. Ṭob澳大利亚]: Tobadonias, 2 m., a. (Thadonias). One of the Levites sent by Jehoshaphat through the cities of Judah to teach the Law to the people (2 Chr. xvii. 8).

TOB, THE LAND OF [Ṭb]: [land of goodness, fruitful]: Ṭb Ṭeb: terra Teb. The place in which Jephthah took refuge when expelled from home by his half-brother (Judg. xi. 3); and where he remained, at the head of a band of free- booters, till he was brought back by the sheiks of Gilead.

The narrative implies that the land of Teb was not far distant from Gilead: at the same time, from the nature of the case, it must have lain out- towards the eastern deserts. It is undoubtedly mentioned again in 2 Sam. x. 6, 8, as one of the petty Aramean kingdoms or states which supported the Ammonites in their great conflict with David. In the Authorized Version the name is presented as Isiobai, i.e. Man of Teb, meaning, according to a common Hebrew idiom, the man of Gilead.

After an immense interval it appears again in the Maccabean history (1 Macc. v. 13). Tob or Tebie was then the abode of a considerable colony of Jews, numbering at least a thousand males. In 2 Macc. xii. 17 its position is defined very exactly as at or near Charax, 750 stade from the strong town Caspius, though, as the position of neither of these places is known, we are not there- by assisted in the recovery of Tob. [TOBIEH]

Polemy (Geogr. v. 19) mentions a place called Qoibba as lying to the S. W. of Zohah, and therefore possibly to the E. or N. E. of the country of Annonus proper. It is described as in Zobah, in the land of the Zobahites (Rodini, 332), the names of Tobieh and Tobiani occur.

No identification of this ancient district with any modern one has yet been attempted. The name Tell Dobah (Burekhait, Syrii, April 23) or, as it is given by the latest explorer of these regions, Tell Doba (Wetstein, Map), attached to a ruined site at the south end of the Leju, a few miles N. W. of Kantewa, and also that of ed-Dob, some twelve hours east of the mountain ed-Kuleib, are both suggestive of Tob. But nothing can be said, at present, as to their connection with it.

TOBIAH [Ṭb], Tobis, Tob凶手: [Vat. Tobis]: Tobia. L. The "children of Tobiah" were a family who returned with Zerubbabel, but were unable to prove their connection with Israel (Ezr. ii. 69; Neh. vii. 62).
The Greek form of the name Tobias. 1. (Tobias; Thobias, Thobitas,) The son of Tobit, and central character in the book of that name. [Tobit, Book of] 2. The father of Hyrcanus, apparently a man of great wealth and reputation at Jerusalem in the time of Seleucus Philopator (cir. n. c. 187). In the high priestly schism which followed afterwards [Menelaus], "the sons of Tobias" took a conspicuous part (Joseph. Ant. xii. 5, § 1). One of these, Joseph, who raised himself by intrigue to high favor with the Egyptian court, had a son named Hyrcanus (Joseph. Ant. xii. 4, § 2). It has been supposed that this is the Hyrcanus referred to in 2 Mac. iii. 11; and it is not impossible that, for some unknown reason (as in the case of the Maccabees), the whole family were called after their grandfather, to the exclusion of the father's name. On the other hand, the natural recurrence of names in successive generations makes it more probable that the Hyrcanus mentioned in Josephus was a nephew of the Hyrcanus in 2 Mac. (Comp. Ewald, Gesch. d. V. V. iv. 309; Grimm, adv Marce. i. e.).
TOBIT, BOOK OF

Latin MSS. It is styled Tobis, Liber Tobias, Libor Tobias (Saluator, p. 706), Tobit et Tobias, Liber outruiique Tobit (Fritzsche, Einl., § 1). The contents at the beginning differ greatly in Greek, Latin, Syriac, and Hebrew texts, which differ more or less from one another in detail, but yet on the whole are so far alike that it is reasonable to suppose that all were derived from one written original, which was modified in the course of translation or transcription. The Greek text is found in two distinct recensions. The one is followed by the MSS. of the LXX., and gives the oldest text which remains. The other is only fragmentary, and manifestly a revision of the former. Of this, one piece (1. ii. 2) is contained in the Cod. Simplicius = Cod. Fuld. August. And, another in three later MSS. (44, 106, 107, Holmes and Parsons; vi. 9-13; Fritzsche, Extr. Hebr. iv. 71-110). The Latin texts are also of two kinds. The common (Vulgata) text is due to Jerome, who formed it by a very hastily revised of the old Latin version with the help of a-headed copy, which was transcribed into Hebrew for him by an assistant who was master of both languages. The treatment of the text in this recension is very arbitrary, as might be expected from the description which Jerome gives of the mode in which it was made (comp. Tobit, § 1). It is of no critical value, for it is impossible to distinguish accurately the different elements which are incorporated in it. The anti-Hieronymian (Vetus Latina) texts are far more valuable, though these present considerable variations among themselves, as generally happens, and represent the revised and not the original Greek text. Salatier has given one text from these MSS. of the eighth century and added various readings from another MS., formerly in the possession of Christina of Sweden, which contains a distinct version of a considerable part of the book, i.-vi. 12 (Bibl. Lat. ii. 706). A third text is found in the quotations of the Speculum, published by Mai, Spec. c. Rom. ii. 21-23. The Hebrew versions are of no great weight. One, which was published by P. Faber (1542), after a Constantino-politan edition of 1547, is closely modeled on the common Greek text without being a servile translation (Fritzsche, § 4). Another, published by S. Munster (1542, etc.), is based upon the revised text, but is extremely free, and is rather an adaptation than a version. Both these versions, with the Syriac, are reprinted in Walde's Polyglot, and are late Jewish works of uncertain date (Fritzsche, L. c. Heng. ch. xvi. 4). The Syriac version is of a composite character. As far as ch. vii. 9 it is a close rendering of the common Greek text of the LXX., but from this point to the end it follows the revised text, a fact which is noticed in the margin of one of the MSS.

2. Contents. — The outline of the book is as follows. Tobit, a Jew of the tribe of Naphtali, who strictly observed the Law and remained faithful to the Temple, resided at Jerusalem (1. 4-8), was carried captive to Assyria by Shalmaneser. While in captivity he exercised himself to relieve his countrymen, who, his favorable position at court (ἀγαβάζεται, i. 13, "pursuer") enabled him to do, and at this time he was rich enough to lend ten talents of silver to a countryman, Gabel of Lages in Media. But when Sennacherib succeeded his father Shalmaneser, the fortune of Tobit was changed. He was accused of marrying the Jews whom the king had put to death, and was only able to save himself, his wife Anna, and his son Tobias, by flight. On the ac-

Tobit, BOOK OF

cession of Esarhaddon he was allowed to return to Nineveh, at the intercession of his nephew, Achil- itemes, and after his death he settled in the king's household (i. 22); but his zeal for his countrymen brought him into a strange misfortune. As he lay one night in the court of his house, being unclean from having buried a Jew whom his son had found strangled in the market-place, sparrows "mused warm dung into his eyes," and he became blind. Being thus disabled, he was for a time supported by Achilitemes, and after his departure (read "Eusebi", i. 106, by the labor of his wife. On one occasion he falsely accused her of stealing a kid which had been added to her wages, and in return she reproached him with the miserable issue of all his righteous deeds. Grieved by her taunts he prayed to God for help; and it happened that on the same day Sara, his kinswoman (vi. 10, 11), the only daughter of Raguel, also sought help from God against the reproaches of her father's household. For seven young men wedded to her had perished on their marriage night by the power of the evil spirit Asmodeus [Asmudus]; and she thought that she should "bring her father's old age with sorrow unto the grave" (vii. 10). So Raphael was sent to deliver both from their sorrow. In the mean time Tobit called unto the money which he had lent to the church, and despatched it to his wife and many wise counsellors, to reclaim it (iv.). On this Raphael (under the form of akinsman, Azarias) offered himself as a guide to Tobias on his journey to Media, and they "went forth both, and the young man's way with them," and Anna was comforted for the absence of her son (v.). When they reached theDigiteis, Tobias was commanded by Raguel to take "the heart, and liver, and gall of a fish, which leaped out of the river, and would have devoured him," and instructed how to use the first against Asmodeus, for Sara, Raphael said, was appointed to be his wife (vi.). So when they reached Ecatana they were entertained by Raguel, and in accordance with the words of the angel, Sara was given to Tobias in marriage that night, and Asmodeus was "driven to the utmost parts of Egypt," where "the angel bound him" (vii. viii.). After this Raphael recovered the loan from Gabriel (ix.), and Tobias then returned with Sara and half her father's goods to Nineve (x.). Tobit, informed by Anna of her son's approach, hastened to meet him, Tobias by the command of the angel applied the fish's gall to his father's eyes and restored his sight (x.). After this Raphael, addressing to both words of good counsel, revealed himself, and "they saw him no more" (xii.). On this Tobit expressed his gratitude in a fine psalm (xiii.); and he lived to see the long prosperity of his son (xiv. 1, 2). After his death Tobias, according to his instruction, returned to Ecatana, and "before he died he heard of the destruction of Nineve," of which "Jonas the prophet spake" (xiv. 14, 15).

3. Historical Character. — The narrative which has been just sketched, seems to have been received without inquiry or dispute as historically true till the rise of free criticism at the Reformation. Luther, while warmly praising the general teaching of the book (comp. § 6), yet expressed doubts as to its literal truth, and these doubts gradually gained a wide currency among Protestant writers. Bengel (Einl. § 5) has given a summary of alleged errors in detail (cf. g. i. 1, 2, of Nychothol., compared with 2 K. xx. 29; vi. 9, Lages, said to have been founded by Sel. Nicator), but the question turns rather upon
the general complexion of the history than upon minute objections, which are often captions and rather perversely anterior to the Hebrew document. This, however, is fatal to the supposition that the book could have been completed shortly after the fall of Nineveh (2. c. 660; Tob. xiv. 15), and written in the main some time before (Tob. xii. 21). The whole tone of the narrative bespeaks a later age; and above all, the doctrine of good and evil spirits is elaborated in a form which belongs to a period considerably posterior to the Babylonian Captivity. (Asmodeus, iii. 8, vv. 14, viii. 3; Raphael, xii. 15.) The incidents, again, are completely isolated, and there is no reference to them in any part of Scripture (the supposed parallels, Tob. iv. 16 || Matt. vii. 12; Tob. xii. 16-18 || Rev. xxi. 18, are more general ideas), nor in Josephus or Philo. An I though the extraordinary character of the details, as such, is no objection against the reality of the occurrences, yet it may be fairly urged that the character of the alleged miraculous events, when taken together, is alien from the general character of such events in the historical books of Scripture, while there is nothing exceptional in the circumstances of the persons as in the case of Daniel (Daniel, vol. i. 540), which might serve to explain this difference. As the groundwork it cannot certainly be concluded that the narrative is not simply history, and it is superfluous to inquire how far it is based upon facts. It is quite possible that some real occurrences, preserved by tradition, furnished the basis of the narrative, but it does not follow by any means that the elimination of the extraordinary details will leave behind pure history (so Igen). As the book stands it is a distinct, didactic narrative. Its point lies in the moral lesson which it conveys, and not in the incidents. The incidents furnish lively pictures of the truth which the author wished to inculcate, but the lessons themselves are independent of them. Nor can any weight be laid on the minute exactness with which apparently unimportant details are described (e. g. the genealogy and dwelling-place of Tobit, i. i., the marriage festival, vi. 18, 19, quoted by Igen and Wetze), as proving the reality of the events, for such particularity is characteristic of Eastern romance, and appears again in the book of Judith. The writer in composing his story necessarily observed the ordinary form of a historical narrative. 4. Original Language and Revisions. — In the absence of all direct evidence, considerable doubt has been felt as to the original language of the book. The superior clearness, simplicity, and accuracy of the LXX. text prove conclusively that this is nearer the original than any other text which is known, if it be not, as some have supposed (Galin and Fritzsche doubtfully), the original itself. Indeed, the arguments which have been brought forward to show that it is a translation are far from conclusive. The supposed contradictions between different parts of the book, especially the change from the first (i—iii. 6) to the third person (iii. 7—xiv.), from which Igen endeavored to prove that the narrative was made up of distinct Hebrew documents, carelessly put together, and afterwards rendered by one Greek translator, are easily explicable on other grounds; and the alleged mistranslations (iii. 6; iv. 19, etc.) depend rather on errors in interpreting the Greek text, than on errors in the text itself. The style, again, though harsh in parts, and far from the classical standard, is not more so than some books which were undoubtedly written in Greek (e. g. the Apocalypse); and there is little, if anything, in it which points certainly to the immediate influence of an Aramaic version. (i.e. παρα οι συγκρισης τω αλμως, comp. Eph. iii. 22; Jer. xlix. 22, on δεζερας; ii. 15, τα τι μω των ουνων μεν οπιοιοι διοινει; xiv. 3, προσιετον φοβεσθαι, etc.) To this it may be added that Origen was not acquainted with any Hebrew original (Ep. ad Afric. 13); and the Chaldee copy which Jerome used, as far as its character can be ascertained, was evidently a later version of the story. On the other hand, there is no internal evidence against the supposition that the Greek text is a translation. Some difficulties appear to be removed by this supposition (e. g. ix. 6); and if the consideration of the date and place of the composition of the book favor this view, it may rightly be admitted. The Greek offers some peculiarities in vocabulary: i. 6, πρατονομια, i.e. η παρας των κοινων, Deut. xvii. 1, αποτρεπτικαι: i. 21, ελεγουσα: ii. 3, στραγγαλοια, etc.; and in construction, xii. 7, ουκ αλατησαν η τη μεγαλοτητι: xii. 4, διακοινωνη των: vi. 13, προσευχηται (intrins.): vi. 6, εγειτην ετω. But these furnish no argument on either side. The various texts which remain have already been thoroughly examined. Of these, three varieties may be distinguished: (1) the LXX.: (2) the revised Greek text, followed by the Old Latin in the main, and by the Syriac in part; and (3) the Vulgate Latin. The Hebrew versions have no critical value. (1.) The LXX. is followed by A. V., and has beenalready characterized as the standard to which the others are to be referred. (2.) The revised text, first brought distinctly into notice by Fritzsche (End. § 5), is based on the LXX. Greek. It is at one time extended, and then compressed, with a view to greater fulness and clearness. A few of the variations in the first chapter will indicate its character: Ver. 2. ὄραξ, add. διότι δεμαυε λανω ες ἀρσετων Φογαρ: ver. 8, νη καθηκε, given at length των ορισκον ταις χαρις, a. τ. λ.; ver. 18, ἐν της Ιουδαιας, add. ἐν ημιας της των ιουδαιων, by ἐκ των των ουνων τω παλαισθης ἐκ την Βαλασσης μν ἐνδιαικησεις: ver. 22. οοικισχος, ἐρχοικοσχος. (3.) The Vulgate text was derived in part from a Chaldee copy which was translated by word of mouth into Hebrew for Jerome, who in turn dictated a Latin rendering to a secretary. (Pref. in Tob.: . . . . . . . Exegis et habrit Chaldeo sermonem conscriptum ad Latinum stylinum traduam . . . . . nec nisi desiderio vestro, non tamen noso studio . . . . . Et quia visima et Chaldeorum lingua sermone Hebræico, utrisque linguae peritissimam loquemque requinser reinsis dei laevae arbitrati, et quipquid ille melius Hebraicus verbis expressit, hoc ego, accedto notariis, sermonibus Latins expusi.) It is evident that in this process Jerome made some use of the Old Latin version, which he follows almost verbally in a few places: iii. 3—6; iv. 6, 7, 11, 23, etc.; but the greater part of the version seems to be an independent work. On the whole, it is more concise than the Old Latin; but it contains interpolations and changes, many of which mark the asceticism of a late age: ii. 12—14 (parallel with Job); iii. 17—23 (expansion of iii. 11); vi. 17 ff. (expansion of vi. 18); ix. 11, 12, xii. 19 (et quia acceptas eras Deum necesse sit ut tentatice probaret te). 5. Date and Place of Composition. — The data for determining the age of the book and the place where it was compiled are scanty and consequently
very different opinions have been entertained on these points. Eichhorn (Ebd., pp. 408 & 49) places the author of the time of Darius Hystaspis without fixing any further limit of age or country. Heil (Ebd., p. 311). Ewald (p. 233-238) fixes the composition in the far East, towards the close of the Persian period (cir. 350 B. C.). This last opinion is almost certainly correct. The superior and inferior limits of the date of the book seem to be defined with fair distinctness. On the one hand the detailed doctrine of evil spirits points closely to some time after the Babylonian Captivity; and this date is definitely marked by the reference to a new Temple at Jerusalem, "not like the first" (Tob. xiv. 5; comp. Ezr. iii. 12). On the other hand, there is nothing to show that the Jews were threatened with any special danger when the narrative was written (as in Judith), and the manner in which Media is mentioned (xiv. 4) implies that the Persian monarchy was still strong. Thus its date will fall somewhere within the period between the close of the work of Nehemiah and the invasion of Alexander (cir. B. C. 430-334). The contents of the book furnish also some clue to the place where it was written. Not only is there an accurate knowledge of the scenes described (Ewald, p. 233), but the incidents have a local coloring. The continual reference to uninspiring and the burial of the dead, and the stress which is laid upon the right performance of worship at Jerusalem by those who are afar off (i. 4), can scarcely be due to an effort of imagination, but must rather have been occasioned by the immediate experience of the writer. This would suggest that he was living out of Palestine, in some Persian city, perhaps Babylon, where his countrymen were exposed to the capricious cruelty of heathen governors, and in danger of neglecting the Temple-service. Clusions are also given of the presence of the Jews at court, not only in the history (Tob. i. 22), but also in direct counsel (xii. 7, μανθήσω βασιλεύς καλόν κράτος), which better suit such a position than any other (comp. xiii. 3). If these conjectures as to the date and place of writing be correct, it follows that we must assume the existence of a Hebrew or Chaldee original. And even if the date be brought much lower, to the beginning of the second century B.C., which seems to be the latest possible limit, it is equally certain that it must have been written in some Aramean dialect, as the Greek literature of Palestine belongs to a much later time; and the references to Jerusalem seem to show that the book could not have been composed in Egypt (i. 4, xiv. 5), an inference, indeed, which may be deduced from its general contents. As long as the book was held to be strict history it was supposed that it was written by the immediate actors, in accordance with the direction of the angel (xii. 20). The passages where Tobit speaks in the first person (i.-iii. 6, xiii.) were assigned to his authorship. The intervening chapters to Tobit or Tobias. The description of the close of the life of Tobit to Tobias (xiv. 1-11); and the conclusion of the second episode (xiv. 12-14), are assigned to Tobias himself. The history of the narrative is set aside, there is no trace of the person of the author.

6. History.—The history of the book is in the main that of the LXX. version. While the contents of the LXX., as a whole, were received as canonical, the book of Tobit was necessarily included without further inquiry among the books of Holy Scripture. [Canon.] The peculiar merits of the book contributed also in no small degree to gain for it a wide and hearty reception. There appears to be a clear reference to it in the Latin version of the Epistle of Polycarp (c. 10, alem.munm.de morte liberti, Tob. iv. 16, xii. 9). In a scheme of the Ophites, if there be no corruption in the text, Tobit appears among the prophets (Iren. i. 30, 11). Clement of Alexandria (Strom. II. 23, § 130, "etao brochoe tων γεγραμμενων ειρηματων, Tob. iv. 16) and Origen practically use the book as canonical; but Origen distinctly notices that neither Tobit nor Judith were received by the Jews, and rests a part of Tobit on the usage of the churches (Ep. ad Afric. 13, "Εραθίω της Τωβίας ό χρησταί ... διαλύσω της Τωβίας αις εκκλησια ... De Ord. 1, § 14, της του Τωβίου βιβλίων αντιλήψεων αι δι περίτοιος ως αι υπερθενθ. ...). Even Athanasius when writing without any critical regard to the Canon quotes Tobit as Scripture (Apoll. c. Arius, § 11, δι γεγραται, Tob. xii. 7); but when he gives a formal list of the sacred books, he absolutely excludes it from the Canon, and places it with other apocryphal books among the writings which were "to be read by those who were but just entering on Christian teaching, and desirous to be instructed in the rules of piety" (Ep. Fest. p. 1177, ed. Migne). In the Latin Church Tobit found a much more decided acceptance. Cyprian, Hilary, and Lucifer quote it as authoritative (Cypri. De Orat. Dom. 32; Hil. Pict. in Psal. exxix. 71; comp. Prov. in Ps. xxv. 6; Lucif. Psa Altar. i. p. 871). Augustine includes it with the other apocrypha of the LXX. among "the books which the Christian Church received" (De Doctr. Christ. ii. 8), and in this he was followed by the mass of the later Latin fathers [comp. CANON, vol. i. p. 564, &c.]. Ambrose in especial wrote an essay on Tobit, treating of the evils of usury, in which he speaks of the book as "prophetic" in the strongest terms (De Tobit, i. 1; comp. Hierem. vi. 4). Jerome however, followed by Rufinus, maintained the purity of the Hebrew Canon of the O. T., and, as has been seen, treated it very summarily (for later authorities see CANON). In modern times the moral excellence of the book has been rated highly, except in the heat of controversy. Luther pronounced it, if only a fiction, yet "a truly beautiful, wholesome, and profitable fiction, the work of a gifted poet. . . . A book useful for Christian reading " (ap. Fritzsche, Ebd. § 11). The same view is held also in the English Church. A passage from Tobit is quoted in the Second Book of Homilies as the teaching

a This is expressed still more distinctly in the Syonnon (p. 1127, C., ed. Pat. 1859): "Non sunt commissi ei hic [hier] quos quidem ante Salvatoris adventum constitut esse conscripsit, sed eos non receptavit a Judaeis recte tamen ejusdem Salvatoris ecclesia." The preference from which words are taken is also followed to quotations from Wisem. Ecclesiasticus, and Tobit.
of the Holy (Ghost) in Scripture" (Of Alenbeads, ii. p. 294, ed. Corrie); and the Prayer-book offers several indications of the same feeling of respect for the book. Three verses are retained among the sentences used at the Office (Tob. iv. 7-9); and the Preface to the Marriage Service contains a plain adaptation of Jerome's version of Tob, vi. 17 (H nauque qui conjungi sua susceptam ut Denua a te et a sua mente excitandam, et sae Bibilini its vacant, sicut eurus et multis quibus non est intellectus, hadet postulatam damnitionum super eos). In the Services Book of the Sarum Rite, a reference to the blessing of Tobias and Sara by Raphael was retained in the same service from the old office in place of the present reference to Abraham and Sarah; and one of the opening clauses of the Litany, introduced from the Sarum Breviary, is a reproduction of the Vulgate version of Tob. iii. 3 (Ne vindicantam summae de peccatis mea, neque reminiscantur delicta mea vel potentiam meam).

7. Religious Character. - Few profoundly can read the book in the i.xx text without ascertaining heartily to the favorable judgment of Luther on its merits. Nowhere else is there preserved so complete and beautiful a picture of the domestic life of the Jews after the Return. There may be symptoms of a tendency to formal righteousness of works, but as a whole, the book is as a mirror of the living faith. The devotion due to Jerusalem is united with definite acts of charity (i. 8-9) and with the prospect of wider blessings (xiii. 11). The giving of alms is not a mere scattering of wealth, but a real service of love (l. 16, 17, i. 1-7, iv. 7-11, 16), though at times the emphasis which is laid upon the duty is exaggerated (v. 4). It seems from the context that the one who was placed (xiii. 9, xiv. 10) of the special precepts one (iv. 15, ß μοτείν μηδείν παρέμερον) contains the negative side of the golden rule of conduct (Matt. vii. 12), which in this partial form is found among the maxims of Confucius. But it is chiefly in the exquisite tenderness of the portraiture of domestic life that the book excels. The parting of Tobias and Sara is one of the most beautiful scenes of Tob. (xv. 17-22), the affection of Raguel (vii. 4-8), the anxious waiting of the parents (x. 1-7), the son's return (ix. 4, xi.), and even the unjust suspicions of the sorrow of Tobit and Anna (ii. 11-14) are painted with a simplicity worthy of the best times of the patriarchs. Almost every family relation is touched upon with natural grace and affection: husband and wife, parent and child, kindness, near or distant, master and servant, are presented in the most varied action, and always with life-like power (iii. 13, 14, v. 17-22, vii. 16, viii. 4-8, x. 1-7, xi. 1-13, ii. 22, iv. 10, vii. 3-8, v. 14, 15, xii. 1-5, &c.). Prayer allows the whole conduct of life (iv. 19, vi. 17, viii. 5-8, &c.); and even in distress there is confidence that in the end all will be well (iv. 6, 14, 19), though there is no clear anticipation of a future personal existence (iii. 6). The most remarkable doctrinal feature in the book is the prominence given to the action of spirits, who, while they are conceived to be subject to the passions of men and material influences (Asmodeus), are yet not affected by bodily wants, and manifested only by their own will (Raphael, xii. 10). Powers of evil (Sarum, Raphael, Raguel, angelus Tobias juvenis . . . . a relationes gratae crudelitate affectua).

In... impossible... though... TheoL.,... Armenia... (Gen. xxvii.)... were... language... (Steph. Byz. s. c. "ARGVIA") that... the Phrygians... resemble the Phrygians in many respects in language (περὶ φωνῆς πολλά φωνήσων) tends in "the same direction." It is hardly necessary to understand the statement of Herodotus as implying more than a common origin of the two peoples; for, looking at the general westward progress of the Japhetic races, and on the central position which Armenia held in regard to their movements, we should rather infer that Phrygia was colonized from Armenia, than vice versa. The Phrygians were indeed reputed to have had their first settlements in Europe, and thence to have crossed into Asia (Herod. vii. 73), but this must be regarded as simply a retrograde movement of a section of the great Phrygian race in the direction of their original home. The period of this movement is fixed subsequently to the Trojan war (Strab. xiv. p. 980), whereas the Phrygians appear as an important race in Asia Minor at a far earlier period (Strab. vii. p. 921; Herod. vii. 8, 11). There can be little doubt but that they were once the dominant race in the peninsula, and that they spread westward from the confines of Armenia to the shores of the Egean. The Phrygian language is undoubtedly to be classed with the Indo-European family. The resemblance between words in the Phrygian and Greek tongues was noticed by the Greeks themselves (Plat. Cratyl. p. 410), and the inscriptions still existing in the former are decidedly Indo-European (Rawlinson's Herod. i. 696). The Armenian language presents many peculiarities which distinguish it from other branches of the Indo-European family; but these may be accounted for by the physical character of the country, and partly by the large amount of foreign admixture that it has experienced. In spite of this, however, no hesitation is felt by philologists in placing Armenian among the Indo-European languages (Pott, Elgna. Forsch. Introd. p. 32; Diec- 

Toch, in Geogr. p. 43). With regard to the ancient inscriptions at Van, some doubt exists as to some of them, but apparently not the most ancient, are thought to bear a Turanian character (Layard's Nin. and Bab. p. 402; Rawlinson's Herod. i. 652); but, even were this fully established, it fails to prove the Turanian character of the population, inasmuch as they may have been set up by foreign conquerors. The Armenians themselves have associated the name of Togarmah with their early history in that they represent the founder of their race, Haik, as a son of Thorosoon (Moses Chrenn. i. 4, §§ 9-11).

TOCHEN (Ţečen) [tosh, measure]: ΘΟΓΑΡΜΑ: Alex. Θυργαμά: Tochon. A place mentioned (1 Chr. iv. 32 only) amongst the towns of Simeon. In the parallel list of Josh. (xix. 7) there is nothing corresponding to Tochen. In the LXX, however, adds the name Tochlea between Rennim and Ether in the latter passage; and it is not impossible that this may be the remnant of a Tochon anciently existing in the Hebrew text, though it has been considered as an indication of Telem. G. TOGARMAM (Ţogarmam): ΘΟΓΑΡΜΑ: in 1 Chr. i. 6, Θογαρμα: Vat. in Ez., Θογαρμα, Θογαρμα] Thugrman). A son of Gomer, and brother of Ashkenaz and Riphath (Gen. x. 3). It has been already shown that Togarmah, as a geographical term, is connected with Armenia, and that the subsequent notices of the name (Ez. xxvii. 14, xxxvii. 6) accord with this view. [ARMENIA]. It remains for us to examine into the ethnology of the Armenians with a view to the position assigned to them in the Mosaic table. The most decisive statement respecting them in ancient literature is furnished by Herodotus, who says that they were Phrygian colonists, that they were armed in the Phrygian fashion, and were associated with the Phrygians under the same commander (Herod. vii. 73). The remark of Eudoxus (Steph. Byz. s. c. "ARGVIA") that the Armenians resemble the Phrygians in many respects in language (περὶ φωνῆς πολλά φωνήσων) tends in the same direction. It is hardly necessary to understand the statement of Herodotus as implying more than a common origin of the two peoples; for, looking at the general westward progress of the Japhetic races, and on the central position which Armenia held in regard to their movements, we should rather infer that Phrygia was colonized from Armenia, than vice versa. The Phrygians were indeed reputed to have had their first settlements in Europe, and thence to have crossed into Asia (Herod. vii. 73), but this must be regarded as simply a retrograde movement of a section of the great Phrygian race in the direction of their original home. The period of this movement is fixed subsequently to the Trojan war (Strab. xiv. p. 980), whereas the Phrygians appear as an important race in Asia Minor at a far earlier period (Strab. vii. p. 921; Herod. vii. 8, 11). There can be little doubt but that they were once the dominant race in the peninsula, and that they spread westward from the confines of Armenia to the shores of the Egean. The Phrygian language is undoubtedly to be classed with the Indo-European family. The resemblance between words in the Phrygian and Greek tongues was noticed by the Greeks themselves (Plat. Cratyl. p. 410), and the inscriptions still existing in the former are decidedly Indo-European (Rawlinson's Herod. i. 696). The Armenian language presents many peculiarities which distinguish it from other branches of the Indo-European family; but these may be accounted for by the physical character of the country, and partly by the large amount of foreign admixture that it has experienced. In spite of this, however, no hesitation is felt by philologists in placing Armenian among the Indo-European languages (Pott, Elgna. Forsch. Introd. p. 32; Diec-
TO LAD (תלד) [birth, generation]: [Vat.] Θαλακής; [Rom.] Alex. Θελάδ: Tholath. One of the towns of Simeon (1 Chr. iv. 29), which was in the possession of the tribe up to David's reign, probably to the time of the census taken by Josue. In the lists of Joshua the name is given in the fuller form of EL-TOLAD.

G.

TO LAITES, THE (תלאת [from TOLAD]): δ Θαλάτ [Vat. -ε]: Tholáte. The descendants of Tohan the son of Issachar (Num. xxvi. 23).

TOLIANES (Τολιανείς): Tolianes. To-lay, one of the porters in the days of Ezra (1 Esdr. iv. 25).

* TOLL. [Taxes; Tribute.]

TOMB: Although the sepulchral arrangements of the Jews have necessarily many points of contact with those of the surrounding nations, they are still on the whole — like everything else that people did — so essentially different, that it is most unsafe to attempt to elucidate them by appealing to the practice of other races. It has been hitherto too much the fashion to look to Egypt for the prototype of every form of Jewish art; but if there is one thing in the Old Testament more clear than another, it is the absolute antagonism between the two peoples, and the abhorrence of everything Egyptian that prevailed from first to last among the Jewish people. From the burial of Sarah in the cave of Machpelah (Gen. xxiii. 19) to the funeral rites prepared for Herod (Acts ix. 57), there is no mention of any sarcophagi, monuments, or monuments. No pyramid was raised as separate sepulchra of any individual king, and what is most to be regretted by modern investigators, no inscription or painting which either recorded the name of the deceased, or symbolized the religious feeling of the Jews towards the dead. It is true of course that Jacob, lying in Egypt, was embalmed (Gen. i. 2), but it was only in order that he might be brought to be entombed in the cave at Hebron, and Joseph, as a naturalized Egyptian and a ruler in the land, was embalmed; and it is also mentioned as something exceptional that he was put into a coffin, and was so brought by the Israelites out of the land, and laid with his forefathers. But those, like the burning of the body of Saul [see BURIAL], were clearly exceptional cases.

Still less were the rites of the Jews like those of the Pelasgi or Etruscans. With that people the graves of the dead were, or were intended to be, in very respect similar to the homes of the living. The locumus lay in his roles, the warrior in his armor, on the bed on which he had repose in life, surrounded by the furniture, the vessels, and the ornaments which had adorned his dwelling when alive, as if he were to live again in a new world, with the same wants and feelings as before. Besides this, no tall stile, and no sepulchral mound, has yet been found in the hills or plains of Judæa, nor have we any hint either in the Bible or Josephus of any such existing which could be traced to a strictly Jewish origin.

In very distinct contrast to all this, the sepulchral rites of the Jews were worked with the same simplicity that characterized all their religious observances. They were washed and anointed (Mark iv. 8, xvi. 1; John xix. 39, &c.), wrapped in a clean linen cloth, and borne without any funeral pomp to the grave, where it was laid without any ceremonial or form of prayer. In addition to this, with kings and great persons, there seems to have been a "great burning" (2 Chr. xvi. 14, xix. 2); a form of funeral which seems more suggested by sanitary exigencies than by any hankering after ceremonial pomp.

This simplicity of rite led to what may be called the distinguishing characteristic of Jewish sepulchres — the deep loculus, which, so far as is now known, is universal in all purely Jewish rock-cut tombs, but hardly known elsewhere. Its form will be understood by referring to the appended diagram, representing the forms of Jewish sepulchre.

No. 1.—Diagram of Jewish Sepulchre.

In the apartment marked A, there are twelve such loculi, about 2 feet in width by 3 feet high. These generally open on the level of the floor; when in the upper story, as at B, on a ledge or platform, on which the body might be laid to be anointed, and on which the stones might rest which closed the outer end of each loculus. The shallow loculus is shown in chamber B, but was apparently only used when sarcophagi were employed, and therefore, so far as we know, only during the Greco-Roman period, when foreign customs came to be adopted. The shallow loculus would have been singularly inappropriate and inconvenient, where an unembalmed body was haid out to decay — as there would evidently be no means of shutting it off from the rest of the catacomb. The deep loculus on the other hand was as strictly conformable with Jewish customs, and could easily be closed by a stone fitted to the end and luted into the groove which usually exists there.

This fact is especially interesting as it affords a key to much that is otherwise hard to be understood in certain passages in the New Testament. Thus in John xix. 39, Jesus says, "Take away the
stone," and (ver. 41) " they took away the stone without difficulty, apparently; which could hardly have not the case had it been such a rock as would be required to close the entrance of a cave. And ch. xx. 1, the same expression is used, " the stone is taken away," and though the Greek word in the other three Evangelists certainly implies that it was rolled away, this would equally apply to the stone at the mouth of the bethus, into which the Maries must have then stooped down to look in. In fact the whole narrative is infinitely more simple, and intelligible if we assume that it was a stone closing the end of a rock-cut grave, than if we suppose it to have been a stone closing the entrance or door of a hypogeum. In the latter case the stone to close a door—say 6 feet by 3 feet, could hardly have weighed less than 3 or 4 tons, and could not have been moved without machinery.

There is one catacomb—known as the "Tomb of the Kings"—which is closed by a stone rolling across its entrance; but it is only one, and the immense amount of contrivance and fitting which it has required is sufficient proof that such an arrangement was not applied to any other of the numerous rock-tombs around Jerusalem, nor could the traces of it have been obliterated had it not disappeared from the memory of the openers where they are natural caverns, and the ornamental form of their doorways where they are architecturally adorned, it is evident, except in this one instance, that they could not have been closed by stones rolled across their entrances; and consequently it seems only to be to the closing of the facade that these expressions can refer. But until a more careful and scientific exploration of these tombs is made than hath hitherto been given to the public, it is difficult to feel quite certain on this point.

Although, therefore, the Jews were singularly free from the pomps and vanities of terrestrial magnificence, they were at all stages of their independent existence an eminently burying people. From the time of their entrance into the Holy Land till their expulsion by the Romans, they seem to have attached the greatest importance to the possession of an undisturbed resting-place for the bodies of their dead, and in all ages seem to have shown the greatest respect, if not veneration, for the sepulchres of their ancestors. Few, however, of them care even to represent more of a rock-cut tomb, and the larger part, even all that are known, and all that are likely to be discovered, are not probably 500, certainly not 1000, rock-cut tombs in or about Jerusalem, and as that city must in the days of its prosperity have possessed a population of from 30,000 to 40,000 souls, it is evident that the bulk of the people must, then as now, have been content with graves dug in the earth and the more scientific tombs which by a temple or sepulchral place as near the holy places as their means would allow them obtaining a place. The bodies of the kings were buried close to the Temple walls (Ex. xiii. 7-9), and however little they may have done in their life, the place of their burial is carefully recorded in the Chronicles of the Kings, and the cause why that place was chosen is generally pointed out, as if that reason were the more important event, but the final judgment on the life of the king.

Tomb of the Patriarchs. — Turning from these considerations to the more strictly historical part of the subject, we find that one of the most striking events in the life of Abraham is the purchase of the field of Ephron the Hittite at Hebron, in which was the cave of Nachpehah, in order that he might therein bury Sarah his wife, and that it might be a sepulchre for himself and his children. His request to acquire the privilege of burying there at a gift when offered to him, shows the importance Abraham attached to the transaction, and his insisting on purchasing and paying for it (Gen. xxiii. 20), in order that it might be "made sure unto him for the possession of a burying-place." There he and his immediate descendants were hid 3700 years, and no doubt there their remains now exist; but no one in modern times has seen their remains, or been allowed to enter into the cave where they rest.

A few years ago, Signor Pierotti says, he was allowed, in company with the Pasha of Jerusalem, to ascend the steps to the iron grating that closes the entrance, and to look into the cave. What he seems to have seen was—that it was a natural cavern, untonched by the chisel and marbled by art in any way. Those who accompanied the Prince of Wales in his visit to the Mosque were not permitted to see even this entrance. All they saw was the round hole in the floor of the Mosque which admits light and air to the cave below. The same round opening exists at Nebi Samwil, the rock-cut tomb of the Prophet Samuel, and at the Prophet Samuel's tomb, and at Jerusalem there is a similar opening into the tomb under the Dome of the Rock. In the former it is used by the pious votaries to drop petitions and prayers into the tombs of patriarchs and prophets. The latter having lost the tradition of its having been a burying-place, the opening only now serves to admit light into the cave below.

Unfortunately none of those who have visited Hebron have had sufficient architectural knowledge to be able to say when the church or mosque which now stands above the cave was erected; but there seems no great reason for doubting that it is a Byzantine church erected there between the age of Constantine and that of Justinian. From such indications as can be gathered, it seems of the later period. On its floor are sarcophagi purporting to be those of the patriarchs; but, as is usual in eastern tombs, they are only cenotaphs representing those that stand below, and which are esteemed too sacred for the vulgar to approach.

Though it is much more easy of access, it is also much more difficult to ascertain the exact facts. Taking the age of the wall that incloses the sacred precincts of these tombs. From the account of Josephus (B. J. iv. 7), it does not seem to have existed in his day, or he surely would have mentioned it; and such a monument could hardly fail to have been of warlike importance in those troubled times. Besides this, we do not know of any such inclosure enclosing any tombs or sacred place in Jewish times, nor can we conceive any motive for so subduing these graves.

There are not any architectural mounds about this wall which would enable an archaeologist to approximate its date; and if the beveling is assumed to be a Jewish arrangement (which is very far from being exclusively the case), on the other hand it may be contended that no buttressed wall of Jewish masonry exists anywhere. There is in fact nothing known with sufficient exactness to decide the question, but the probabilities certainly tend towards a Christian or Saracenic origin for the whole structure both internally and externally.

Aaron died on the summit of Mount Hor (Num. xx. 28, xxxii. 39). and we are led to infer he was
buried there, though it is not so stated; and we have no details of his tomb which would lead us to suppose that anything existed there earlier than the Mohammedan Kubb which now covers the hill overlooking Petra, and it is at the same time extremely doubtful whether that is the Mount Hor where the high-priest died.

Moses died in the plains of Moab (Deut. xxxiv. 6), and was buried there, "but no man knew where he was buried" (Josh. xxi. 33). His sepulchre is carefully concealed, as being the only instance in the Old Testament of a sepulchre being concealed, or of one being admitted to be unknown.

Joshua was buried in his own inheritance in Thinnath-Serah (Josh. xxi. 35), and Samuel in his own house at Ramah (1 Sam. xix. 19), an expression which we may probably interpret as meaning in the garden attached to his house, as it is scarcely probable it would be the dwelling itself. We know, however, so little of the feelings of the Jews of that age on the subject that it is by no means improbable but that it may have been in a chamber or locus attached to the dwelling, and which, if closed by a stone carefully cemented into its place, would leave nothing to the imagination of posterity. Joshua (1 K. ii. 34) was also buried "in his own house in the wilderness." In fact it appears that from the time when Abraham established the burying-place of his family at Hebron till the time when David fixed that of his family in the city which bore his name, the Jewish rulers had no fixed or favorite place of sepulture. Each was buried on his own property, or where he died, without much caring either for the sanctity or convenience of the place chosen.

Tomb of the Kings. — Of the "extensive twain of Judah who reigned at Jerusalem from 1048 to 590 B.C., eleven, or exactly one half, were buried in one hypogeeum in the city of David." The names of the kings so lying together were David, Solomon, Rehoboam, Abijah, Asa, Jehoshaphat, Ahaziah, Amaziah, Jehoram, and Josiah, together with the good priest Jehoiada. Of all these it is merely said that they were buried "in the sepulchres of their fathers" or "of the kings" in the city of David, except of two — Asa and Hez- ekiah. Of the first it is said (2 Chron. xiv.), "they buried him in his own sepulchre which he had made for himself in the city of David, and laid him in the bed (locus?)," which was filled with "sweet odors and divers spices prepared by the apothecaries' art, and they made a very great burning for him." It is not quite clear, however, from this, whether this applies to a new chamber attached to the older sepulchre, or to one entirely distinct, though in the same neighborhood. If Hezekiah it is said (2 Chron. xxxii. 33), they buried him in "the chiefest or highest of the sepulchres of the sons of David," as if there were several apartments in the hypogeum, though it may merely be that they excavated for him a chamber or above the others, as we find frequently done in Jewish sepulchres.

Two more of these kings (Jehoram and Josiah) were buried also in the city of David, "but not in the sepulchres of the kings." The first because of the sore diseases of which he died (2 Chron. xx. 21); the second apparently in consequence of his dis- poses and (2 Chron. xxiv. 25); and one king, Uzziiah (2 Chron. xxvi. 23), was buried with his fathers in "the field of the burial of the kings," because he was a leper. All this evinces the extreme care the Jews took in the selection of the burying-places of their kings, and the importance they attached to the record. It should also be borne in mind that the highest honor which could be bestowed on the good priest Jehoiada (2 Chron. xxiv. 16) was that "they buried him in the city of David among the kings, because he had done good in Israel, both toward God and toward his House."

The passage in Neh. iii. 16, and in Ez. xliii. 7, 9, together with the reiterated assertion of the books of Kings and Chronicles that these sepulchres were situated in the city of David, have no doubt but that they were on Zion [see JERUSALEM], or the Eastern Hill, and in the immediate proximity of the Temple. They were in fact certainly within that insecure now known as the "French Area;" but if it is asked on what exact spot, we must pause for further information before a reply can be given. This area has been so altered by Roman, Christian, and Moslem, during the last eighteen centuries, that, till we can explore freely below the surface, much that is interesting must be hidden from us. It is quite clear, however, that the spot was careful, if not scientifically, by the whole of the Jewish period, inasmuch as the sepulchres were again and again opened as each king died: and from the tradition that Herod and Herod opened these sepulchres (Jos. xiii. 8, § 4; xvii. 7, § 1). The accounts of these last openings are, it must be confesssed, somewhat apocryphal, resting only on the authority of Josephus; but they prove at least that he considered there could be no difficulty in finding the place. It is very improbable, however, from what we know of the extreme simplicity of the Jewish sepulchral rites, that any large sum should have been buried in David's tomb, and have escaped not only the Persians invaders, but their own successors. For it would be a wondrous habitation, and in the time of their extremest need. It is much more probable that Hyrcanus borrowed the treasure of the Temple, and invented this excuse; whereas the story of Herod's descent is so like that told more than 1,000 years afterward, by Benjamin of Tudela, that both may be classed in the same category. It was a secret transaction, if it took place, regarding which rumor might fashion whatever wondrous tales it pleased, and no one could contrive to test their truth by having a look at it (Jos. xvii. 7, § 1) in front of the tomb may have been a fact within the cognizance of Josephus, and would at all events serve to indicate that the sepulchre was rock-cut, and its site well known.

So far as we can judge from this and other indications, it seems probable there was originally a natural cavern in the rock in this locality, which may afterward been improved by art, and in the sides of which loculi were sunk, in which the bodies of the eleven kings and of the good high-priest were laid, without sarcophagi or cofins, but surrounded with linen clothes with the spices, as the manner of the Jews is to bury it (John xix. 40).

Besides the kings above enumerated, Manasseh was, according to the book of Chronicles (2 Chr. xxxiii. 20) buried in his own house, which the book of Kings (2 K. xxvi. 18) explains as the "garden of his own house, the garden of Uzza," where his son Amon was buried, also, it is said, in his own sepulchre (ver. 29), but we have nothing that would enable us to indicate where this was: and Ahaz, the
wicked king, was, according to the book of Chronicles (2 Chr. xxviii. 27) "buried in the city, even in Jerusalem, and they brought him not into the sepulchres of the kings of Israel." The fact of these three last kings having been idolaters, though one reformed, and their having all three been buried apparently in the city, proves what importance the Jews attached to the locality of the sepulchre, but also tends to show that burial within the city, or the inclosure of a dwelling, was not so repulsive to their feelings as is generally supposed. It is just possible that the rock-cut sepulchre under the western wall of the present Church of the Holy Sepulchre may be the remains of such a cemetery as that in which the wicked kings were buried.

No. 2. — Plan of the "Tombs of the Prophets." From De Saulcy.

This, with many other cognate questions, must be relegated for further information; for up to the present time we have not been able to identify one single sepulchral excavation about Jerusalem which can be said with certainty to belong to a period anterior to that of the Maccabees, or, more correctly, to have been used for burial before the time of the Romans.

The only important hypogeum which is wholly Jewish in its arrangements, and may consequently belong to an earlier or to any epoch, is that known as the Tombs of the Prophets in the western flank of the Mount of Olives. It has every appearance of having originally been a natural cavern improved by art, and with an external gallery some 140 feet in extent, into which twenty-seven deep or Jewish loculi were placed. Other chambers and loculi have been commenced in other parts, and in the passages there are spaces where many other graves could have been located, all which would tend to show that it had been disused before completed, and consequently was very modern; but be this as it may, it has no architectural markings — no sarcophagi or shallow loculi, nothing to indicate a foreign origin, and may therefore be considered, if not an early, at least as the most essentially Jewish of the sepulchral excavations in this locality — every other important sepulchral excavation being adorned with architectural features and details betraying most unmistakably their Greek or Roman origin, and fixing their date consequently as subsequent to that of the Maccabees; or in other words, like every other detail of pre-Christian architecture in Jerusalem, they belong to the 140 years that elapsed from the advent of Pompey till the destruction of the city by Titus.

Greek-Roman Tombs. — Besides the tombs above enumerated, there are around Jerusalem, in the valleys of Hinnom and Jehoshaphat, and on the plateau to the north, a number of remarkable rock-cut sepulchres, with more or less architectural decoration, sufficient to enable us to ascertain that they are of nearly the same age, and to assert with very tolerable confidence that the epoch to which they belong must be between the introduction of Roman influence and the destruction of the city by Titus. The proof of this would be easy if it were not that, like everything Jewish, there is a remarkable absence of inscriptions which can be assumed to be integral. The excavations in the Valley of Hinnom with Greek inscriptions are comparatively modern, the inscriptions being all of Christian import and of such a nature as to render it extremely doubtful whether the chambers were sepulchral at all, and not rather the dwellings of ascetics, and originally intended to be used for this purpose. These, however, are neither the most important nor the most architectural — indeed none of those in that valley are so remarkable as those in the other localities just enumerated. The most important of those in the Valley of Hinnom is that known as the

No. 2. — Plan of the "Tombs of the Prophets." From De Saulcy.
Retreat-place of the Apostles,"—It is an unfinished excavation of extremely late date, and many of the others look much more like the dwellings for the living than the resting-places of the dead.

In the village of Siloea there is a monolithic cell of singularly Egyptian aspect, which De Sanlely (Voyage autour de le Mer Morte, ii. 306) assumes to be a chapel of Solomon's Egyptian wife. It is probably of very much more modern date, and is more Assyrian than Egyptian in character; but as he is probably quite correct in stating that it is not sepulchral, it is only necessary to mention it here in order that it may not be confounded with those that are so. It is the more worthy of remark as one of the great difficulties of the subject arises from travellers too readily assuming that every cutting in the rock must be sepulchral. It may be so in Egypt, but it certainly was not so at Cyrene or Petra, where many of the excavations were either temples or domestic establishments, and it certainly was not universally the case at Jerusalem, though our information is frequently too scanty to enable us always to discriminate exactly to which class the cutting in the rock may belong.

The principal remaining architectural sepulchres may be divided into three groups.

First, those existing in the valley of Jehoshaphat, and known popularly as the Tombs of Zechariah, of St. James, and of Absalom. Second, those known as the Tombs of the Judges, and the so-called Jewish tomb about a mile north of the city.

Third, that so-called as the Tombs of the Kings, about half a mile north of the Damascus Gate.

Of the three first-named tombs the most southern is known as that of Zechariah, a popular name which there is not even a shadow of tradition to justify. It consists of a square solid basement, measuring 18 feet 6 inches each way, and 23 feet high to the top of the cornice. On each face are four engaged Ionic columns between which, and these are surmounted, not by an Egyptian cornice, as is usually asserted, but by one of purely Assyrian type, such as is found at Khorsabad (woodcut No. 4). As the Ionic or voluted order came also from Assyria, this example is in fact a more pure specimen of the Ionic order than any found in Europe, where it was always used by the Greeks with a quasi-Doric cornice. Notwithstanding this, in the form of the volutes—the egg-and-dart molding on the outside, the flute on the inside, and every detail—No. 4—Section of Styl.—it is so distinctly Roman in style as to be confounded with the tomb that it is impossible to assume that it belongs to an earlier age than that of their influence.

Above the cornice is a pyramid rising at rather a sharp angle, and hewn out of the solid rock. It may further be remarked that only the outward face, or that fronting Jerusalem, is completely finished, the other three being only blocked out (De Sanlely, ii. 303), a circumstance which would lead us to suspect that the works may have been interrupted by the fall of Jerusalem, or some such catastrophe, and this may possibly account for there being no sepulchre on its rear, if such be really the case.

To call this building a tomb is evidently a misnomer, as it is absolutely solid—hewn out of the living rock by cutting a passage round it. It has no internal chambers, nor even the semblance of a doorway. From what is known of the explorations carried on by M. Renan about Byblos, we should expect that this tomb, properly so called, would be an excavation in the passage behind the monolith—but none such has been found, probably it was never looked for—and that this monolith is the stèle or indicator of that fact. If it is so, it is very singular, though very Jewish, that any one should take the trouble to carve out such a monument without cutting an inscription or symbol on it to mark its destination or to tell in whose honor it was erected.

The other, or so-called Tomb of Absalom, figured in vol. i. p. 17, is somewhat larger, the base being about 21 feet square in plan, and probably 23 or 24 to the top of the cornice. Like the other, it is of the Roman Ionic order, surmounted by a cornice of Ionic type, but between the pillars and the cornice a triglyph, unmistakably of the Roman Doric order, is introduced, so Roman as to be in itself quite sufficient to fix its epoch. It is by no means clear whether it had originally a pyramidal top like its neighbor. The existence of a square blocking above the cornice would lead us to suspect it had not; at all events, either at the time of its excavation or since then, this tomb, properly so called, would be a very peculiar termination erected, raising its height to over 60 feet. At the time this was done a chamber was excavated in the base, we must assume for sepulchral purposes, though how a body could be introduced through the narrow hole above the cornice is by no means clear, nor, if inserted, how disposed of in the very narrow loculi that exist.

The great interest of this excavation is that immediately in rear of the monolith we do find just such a sepulchral cavern as we should expect. It is called the Tomb of Jehoshaphat, with about the same amount of discrimination as governed its nomenclature of the others, but is now closed by
of a verandah with two Doric pillars in antis, which may be characterized as belonging to a very late Hellenistic order rather than a Roman example. Behind this screen are several apartments, which in another locality we might be justified in calling a rock-cut monastery appropriated to sepulchral purposes, but in Jerusalem we know so little that it is necessary to pause before applying any such designation. In the rear of all is an apartment, apparently unfinished, with three shallow loculi meant for the reception of sarcophagi, and so indicating a post-Jewish date for the whole or at least for that part of the excavation.

The hypogeum known as the Tombs of the Judges is one of the most remarkable of the catacombs around Jerusalem, containing about sixty deep loculi, arranged in three stories; the upper stories with ledges in front to give convenient access, and to support the stones that closed them; the lower flush with the ground; \(^{9}\) the whole, consequently, so essentially Jewish that it might be of any age if it were not for its distance from the town, and its architectural character. The latter, as before stated, is identical with that of the Tomb of Jehoshaphat, and has nothing Jewish about it. It might, of course, be difficult to prove this, as we know so little of what Jewish architecture really is; but we do know that the pediment is more essentially a Greek invention than any other part of their architecture, and was introduced at least not previously to the age of the Cypselidae, and this peculiar form not till long afterwards, and this particular example not till after an age when the defaced ornament of the Tomb of Absalom had become possible.

The same remarks apply to the tomb without a name, and merely called "a Jewish Tomb." In this neighborhood, with beveled faces over its façade, but with late Roman Doric details at its angles, sufficient to indicate its epoch; but there is nothing else about these tombs requiring special mention.

Tombs of Herod. — The last of the great groups enumerated above is that known as the Tombs of the Kings — Kebrar es-Sultan — or the Royal Tombs, so called because of their magnificence, and also because that name is applied to them by Josephus, who in describing the third wall mentions them (B. J. v. 4, § 2). He states that "the wall reached as far as the Tower Psephinus, and then extended till it came opposite the Monuments (anepitheuma) of Helena. It then extended further to a great length till it passed by the Sepulchral
Cavern of the Kings," etc. We have thus first the Tower Psephinus, the site of which is very tolerably ascertained on the ridge above the Pool of Bethesda. The entrance to the Monument of Herod, and then at some distance eastward these Royal Caverns.

They are twice again mentioned under the title of 'Ερωδίου μνημείων. First, when Titus, approaching from the north, ordered the ground to be cleared from Scopus — which is tolerably well known — up to those Monuments of Herod (B. J. v. 3, § 2); and lastly in the description of the circumstance (B. J. v. 12, § 2), where they are mentioned after passing the Monument of Ananus and Pompey's Camp, evidently on the ridge where Psephinus afterwards stood, and on the north of the city.

These three passages refer so evidently to one and the same place, that no one would probably ever have doubted — especially when taken in conjunction with the architecture — but that these caverns were the tombs of Herod and his family, were it not for a curious contradiction of himself in the works of Josephus, which has led to considerable confusion. Herod died at Jericho, and the most probable account (Ant. viii. 8, § 5) would lead us to suppose (it is not so stated) that his body was brought to Jerusalem, where the funeral procession was formed on a scale and with a magnificence which would have been impossible at such a place as Jericho without long previous preparation: and it then goes on to say, "and so they went eight stadia to [the] Herodium, for there, by his own command, he was to be buried" — eight stadia, or one mile, being the exact distance between the royal palace and these tombs.

The other account (B. J. i. 33, § 9) repeats the details of the procession, and nearly in the same words, but substitutes 240 for 8, which has led to the belief that he was buried at Jebel Furbel, where he had erected a palace 60 stadia south of Jerusalem, and 170 from Jericho. Even then the procession must have passed through Jerusalem, and this hardly would have been the case without its being mentioned; but the great difficulty is that there is no hint anywhere else of Herod's intention to be buried there, and the most extreme improbability that he should wish to be interred so far from the city where all his predecessors were laid. Though it would be unprecedented, to alter the text in order to meet any particular view, still when an author makes two statements in direct contradiction the one to the other, it is allowable to choose the most conformable with probability; and this, added to his assertion that Herod's tombs were in this neighborhood, seems to settle the question.

The architecture (wood-cut No. 8) exhibits the same ill-understood Roman or primitive arrangement as are found in all these tombs, mixed with bunches of grapes, which first appear on Macedonian coins, and foliage which is local and peculiar, and, so far as anything is known elsewhere, might be of any age. Its connection, however, with that of the Tombs of Jehovahhat and the Judges fixes it to the same epoch.

The entrance doorway of this tomb is below the level of the ground, and concealed, as far as anything can be said to be so which is so architecturally adorned; and it is remarkable as the only instance of this quasi-concealment at Jerusalem. It is closed by a very curious and elaborate contrivance of a rolling stone, often described, but very clumsily answering its purpose. This also is characteristic of its age, as we know from Pausanias that the structural marble monument of Queen Helena of Adiabene was remarkable for a similar piece of misplaced ingenuity. Within, the tomb consists of a vestibule or entrance-chall about 20 feet square, from which three other square apartments open, each surrounded by deep benches. These again possess a peculiarity not known in any other tomb about Jerusalem, of having a square apartment either beyond the head of the loculus on one side: as, for instance (wood-cut No. 9), A A have their inner chambers A' A' within, but B and C, at n' n', on one side.

What the purpose of these was it is difficult to guess, but at all events it was not Jewish. But perhaps the most remarkable peculiarity of the hypogeum is the sarcophagi chamber, in which two sarcophagi were found, one of which was brought home by De Saulcy, and is now in the Louvre. It is of course quite natural that a Roman king who was buried with such Roman pomp should have adopted the Roman mode of sepulture; and if this and that of St. James are the only sarcophagi chambers at Jerusalem, this alone should settle the controversy; and all certainly tends to make it more and more probable that this was really the sepulture of Herod.

If the sarcophagus now in the Louvre, which came from this chamber, is that of Herod, it is the most plausible illustration that has yet come to light of a theory which has recently been forcing itself on the attention of antiquarians. According to this new view, it is not necessary that furniture, or articles which can be considered as such, must always follow the style of the architecture of the day. They must have done so always in Egypt, in Greece, or in the Middle Ages; but might have deviated from it at Rome, and may probably have done so at Jerusalem, amongst a people who had no art of their own, as was the case with the Jews. The disorder in fact may not have been more offensive to them than the Louis Quatorze furniture is to us, with which we adorn our classical and Gothic buildings with such cosmopolitan impartiality. If this is so, the sarcophagi may have been made for Herod. If this hypothesis is not tenable, it may belong to any age from the time of the Macedons to that of Justinian, most probably the latter, for it certainly is not Roman, and has no connection with the architecture of these tombs.

Be this as it may, there seems no reason for
TOMB

3284

Doubting but that all the architectural tombs of Jerusalem belong to the age of the Romans, like everything that has yet been found either at Petra, Baalbec, Palmyra, or Damascus, or even among the stone cities of the Haran. Throughout Syria, in fact, there is no important architectural example which is anterior to their day; and all the specimens which can be called Classical are strongly marked with the impress of the peculiar forms of Roman art.

Tomb of Helena of Adiabene. — There was one other very famous tomb at Jerusalem, which cannot be passed over in silence, though not one vestige of it exists — for the simple reason that though Queen Helena of Adiabene was converted to the Jewish faith, she had not so fully adopted Jewish feelings as to think it necessary she should be buried under ground. On the contrary, we are told that she with her brother were buried in the pyramids which she had ordained to be constructed at a distance of three stadia from Jerusalem " (Ant. xx. 4, § 7). This is confirmed by Pausanias (viii. 16), who, besides mentioning the marble door of very apocryphal mechanism which closed its entrance, speaks of it as a Taphos in the same sense in which he understands the mausoleum at Heliopolis to have been a structured tomb, which he could not have done if this were a cave, as some have supposed.

The specification of the locality by Josephus is so minute that we have no difficulty in ascertaining whereabouts the monument stood. It was situated outside the third wall, near a gate between the Tower Psephinus and the Royal Caverns (E. J. v. 22, and v. 4, § 2). These last are perfectly known, and the tower with very tolerable approximate certainty, for it was placed on the highest point of the ridge between the hollow in which the Birkeet Ma'nilia is situated and the upper valley of the Kedron; they were consequently either exactly where marked on the plan in vol. ii. p. 1312, or it may be a little more to the eastward.

They remained sufficiently entire in the 4th century to form a conspicuous object in the landscape, to be mentioned by Eusebius, and to be remarked by those who accompanied St. Paula (Euseb. ii. 12: Hieron. Epist. Panae) on her journey to Jerusalem. There is no difficulty in forming a tolerably distinct idea of what the appearance of this remarkable monument must have been, if we compare the words descriptive of it in the various authors who have mentioned it with the contemporary monuments in the Valley of Jehoshaphat. If we place together in a row three such monuments as the Tomb of Zechariah, or rather two such, with the monument of Absalom between them, we have such an edifice as will answer to the Pyramid of Josephus, the Taphos of Pausanias, the Sedié of Eusebius, or the Mausoleum of Jerome. But it need hardly be added, that not one of these expressions applies to an underground excavation. According to this view of the matter, the entrance would be under the Central Cippus, which would thus form the ante-room to the two lateral pyramids, in one of which Helena herself reposed, and in the other the remains of her brother.

Since the destruction of the city by Titus, none of the native inhabitants of Jerusalem have been in a position to indulge in much sepulchral magnificence, or perhaps had any taste for this class of display; and we in consequence find no rock-cut hypogeum, and no structural monuments that arrest attention in modern times. The people, however, still cling to their ancient cemeteries in the Valley of Jehoshaphat with a tenacity singularly characteristic of the East. The only difference being, that the erection of the Wall of Agrippa, which now forms the eastern boundary of the Haram Area, has pushed the cemetery further toward the Kedron, or at least cut off the upper and mold part of it. And the contraction of the city on the north has enabled the tombs to approach nearer the limits of the modern town than was the case in the days when Herod the Great and
Helena of Adiabene were buried "on the side... of the north." The only remarkable exception to this assertion is that splendid Mausoleum which Constantine erected over what he believed to be the tomb of Christ, and which still exists at Jerusalem, known to Moslems as the Dome of the Rock; to Christians as the Mosque of Omar.

The arguments for its authenticity have already been sufficiently insisted upon in the article JERUSALEM, in the second volume; and its general form and position shown in the wood-cut, p. 1316. It will not, therefore, be necessary to go over this ground again. Externally its appearance was very much altered by the repairs of Suleiman the Magnificent, when the city had returned to the possession of the Moslems after the retreat of the Crusaders, and it has consequently lost much of its original Byzantine character; but internally it remains much as it was left by its founder; and is now—with the exception of a few Indian tombs—the most magnificent sepulchral monument in Asia, and is, as it ought to be, the most splendid Christian sepulchre in the world. J. F.

Fund, accompanied by drawings (Lond. 1869); Toiber, Denkblätter aus Jerusalem, pp. 609-655, and Dritte Wanderung nach Palästina, pp. 344-352; Sepp, Jerusalem u. die blt, Lond., i. 217 ff.; Rev. George Williams, Holy City, more especially in regard to tombs in and around Jerusalem, iii. 129 ff.; and in this Dictionary, Jerusalem, ancient and modern.

TONGUES, CONFUSION OF. The unity of the human race is most clearly implied, if not positively asserted, in the Mosaic writings. The general declaration, "So God created man in his own image, ... male and female created He them" (Gen. i. 27), is limited as to the mode in which the act was carried out, by the subsequent narrative of the creation of the procreative Adam, who stood alone on the earth amidst the beasts of the field, until he pleased Jehovah to create "an helper for him" out of the very substance of his body (Gen. ii. 22). From this original pair sprang the whole antediluvian population of the world, and hence the author of the book of Genesis conceived the unity of the human race to be of the most rigid nature—not simply a generic unity, nor again simply a specific unity (for unity of species may not be inconsistent with a plurality of original centres), but a specific based upon a numerical unity, the species being nothing else than the enlargement of the individual. Such appears to be the natural meaning of the first chapters of Genesis, when taken by themselves—much more so when read under the reflected light of the New Testament; and not only do we meet with references to the historical fact of such an origin of the human race—e. g. in St. Paul's declaration that God "hath made of one blood every nation of men to dwell on all the face of the earth" (Acts xvii. 26)—but the same is evidently implied in the numerous passages which represent Jesus Christ as the counterpart of Adam in respect to the universal of his connection with the human race. Attempts have indeed been made to show that the idea of a plurality of original pairs is not inconsistent with the Mosaic writings; but there is a wide distinction between a view not inconsistent with, and a view drawn from, the words of the author: the latter is founded upon the facts he relates, as well as his mode of relating them; the former takes advantage of the weaknesses arising out of a concise or unmethodical style of composition. Even if such a view could be sustained in reference to the narrative of the original creation of man, it must inevitably fail in reference to the history of the separation of the world in the postdiluvian age; for whatever objections may be made to the historical accuracy of the history of the Flood, it is at all events clear that the historian believed in the universal destruction of the human race with the exception of Noah and his family, and consequently that the unity of the human race was once more reduced to one of a numerical character. To Noah the historian traces up the whole postdiluvian population of the world: "These are the three sons of Noah; and of them was the whole earth overspread." (Gen. ix. 19).

Unity of language is assumed by the sacred historian apparently as a corollary of the unity of race. No explanation is given of the origin of speech, but its exercise is evidently regarded as coeval with the creation of man. No support can be obtained in behalf of any theory on this subject from the first recorded instance of its exercise: ("Adam gave names to all cattle") for the simple reason that this notice is introductory to what follows: "but for Adam there was not found an help-meet for him" (Gen. ii. 20). It was not so much the intention of the writer to state the fact of man's power of speech, as the fact of the inferiority of all other animals to him, and the consequent necessity for the creation of woman. The proof of that inferiority is indeed most appropriately made to consist in the authoritative assignment of names, implying an act of reflection on their several natures and capacities, and a recognition of the offices which they were designed to fill in the economy of the world. The exercise of speech is thus most happily connected

* * * The author of this article has introduced into it two points which are distinct, the one which is connected with him, namely, that the Dome of the Rock, or the Mosque of Omar, and Constantine's Church of the Holy Sepulchre are identical; and that Mount Moriah, or the Eastern Hill, and Mount Zion, are identical; and, consequently, that the royal sepulchres of Judah were somewhere within the present Haram Area. The grounds of utter dissent from these views have been given by the writer of this in the article JERUSALEM, New p. 153 ff., Amer. ed. The assertion above, which is not at all consistent with the historical support, that the Wall of Agrippa now forms the eastern boundary of the Haram Area," contracting the ancient cemetery, is disproved by Capt. Warren's explorations, who finds no

substructions in Jerusalem more ancient and massive than portions of the Eastern Wall, layers of which remain in situ.

The Quarterly Statement No. V. of the Pal. Expl. Fund (pp. 245-251) contains an account, by Dr. Ch. Sandweiss, of the rock-tombs of el-Mdyyeh, a village near Lydda, and his research for identifying this site with Morin, and these tombs, known as Kubler el-Yahud, with the Macabean mausoleum. The suggestion appears quite plausible. [Moses, iii. 1939.]

* The force of the Apostle's statement is inadequately given in the A. V., which gives "for to dwell" as the result, instead of the direct object of the pronominal verb.
with the exercise of reflection, and the relationship between the inner act of the mind (λόγος ἐνθιάσεως) and the outward expression (λόγος προφορικός) is fully recognized. Speech being thus interwoven in man as a reflecting being, was regarded as handed down from father to son by the same process of imitation by which it is still perpetuated. Whatever divergences may have arisen in the antediluvian period, no notice is taken of them, intersuch as their effects were obliterated by the universal cataclysm of the Flood. The original unity of speech was preserved in Noah, and would naturally be retained by his descendants as long as they were held together by social and local bonds. Accordingly we are informed that for some time “the whole earth was of one language and the same words” (Gen. xi. 1), i.e. both the vocal sounds and the vocabularies were identical—an exhaustive, but not, as in the A.V., a tautological description of complete unity. Disturbing causes were, however, early at work to dissolve this twofold union of community and speech. The human family "endeavored to check the tendency to separation by the establishment of a great central edifice, and a city which should serve as the metropolis of the whole world. They attempted to carry out this project in the wide plain of Babylonia, a beauty admirably suited to such an object from the geographical and geographical features of the country. The project was defeated by the interposition of Jehovah, who determined at confound their language, so that they might not understand one another's speech."

Contemporaneously with, and perhaps as the result of, this confusion of tongues, the people were scattered abroad from thence upon the face of all the earth, and the nations, the language of each event, was preserved in the name Babel (= confusion). The ruins of the tower are identified by M. Oppert, the highest authority on Babylonian antiquities, with the basement of the great mound of Birn-Nunrûd, the ancient Borsippos.²

Two points demand our attention in reference to this narrative, namely, the degree to which the confusion of tongues may be supposed to have extended, and the connection between the confusion of tongues and the dispersion of nations.

1. It is unnecessary to assume that the judgment inflicted on the builders of Babel amounted to a loss, or even a suspension, of articulate speech. The desired object would be equally attained by a miraculous fore-stallment of these dialectical differences of language which are constantly in process of production, but which, under ordinary circumstances, require time and variations of place and habits to reach such a point of maturity that people are unable to understand one another's speech. The elements of the one original language may have remained, but so disguised by variations of pronunciation, and by the introduction of new combinations, as to be practically obliterated. Each section of the human family may have spoken a tongue unintelligible to the remainder, and yet containing a substratum which was common to all. Our own experience suffices to show how completely even dialectical differences render strangers unintelligible to one another; and if we further take into consideration the differences of habits and associations, of which dialectical differences are the exponents, we shall have no difficulty in accounting for the result described by the sacred historian.

2. The confusion of tongues and the dispersion of nations are spoken of in the Bible as contemporaneous events, "so the Lord scattered them abroad" is stated as the execution of the Divine counsel, "Let us confound their language." The divergence of the various families into distinct tribes and nations ran parallel with the divergence of speech into dialects and languages, and the result which is claimed on Genesis is posterior in historical sequence to the events recorded in the 11th chapter. Both passages must be taken into consideration in any disposition on the early fortunes of the human race. We propose therefore to inquire, in the first place, how far modern researches into the phenomena of language favor the idea that there was once a time when "the whole earth was of one speech and language"; and, in the second place, whether the ethnological views exhibited in the Mosaic table accord with the evidence furnished by history and language, both in regard to the special facts recorded in it, and in the general Scriptural view of a historical or more properly a gentile unity of the human race. These questions, though independent, yet exercise a remarkable influence on each other. The evolution of speech does not necessarily involve unity of race, nor yet vice versa, but each enhances the probability of the other, and therefore the arguments derived from language, physiology, and history, may ultimately furnish a cumulative amount of probability which will fall but little below demonstration.

A. The advocate of the historical unity of language has to encounter two classes of opposing arguments: one arising out of the differences, the other out of the resemblances of existing languages. On the one hand, it is urged that the differences are of so decisive and specific a character as to place the possibility of a common origin wholly out of the question; on the other hand, that the resemblances do not necessitate the théory of a historical unity, but may be satisfactorily accounted for on psychological principles. It will be our object to discuss the amount, the value, and the probable origin of the varieties exhibited by languages, with a view to meet the first class of objections. But before proceeding to this, we will make a few remarks on the second class, insufficient as these, if established, would nullify any conclusion that might be drawn from the other.

A psychological unity is not necessarily opposed to a gentle unity. It is perfectly open to any theorist to combine the two by assuming that the language of the one protoplast was founded on strictly psychological principles. But, on the other hand, a psychological unity does not necessitate a gentile unity. It permits of the theory of a plurality of protoplasts, who under the influence of the same psychological laws arrived at similar independent results. Whether the phenomena of language are consistent with such a theory, we think extremely doubtful; certainly they cannot furnish the basis of it. The whole question of the origin of the text, it interferes with the ulterior object for which the narrative was probably inserted, namely, to reconcile the manifold diversity of language with the idea of an original unity.

² See the Appendix to this article.
of language lies beyond the pale of historical proof, and any theory connected with it admits neither of being proved nor disproved. We know, as a matter of fact, that language is communicated from one generation to another solely by force of imitation, and that there is no play whatever for the inventive faculty in reference to it. But in what manner the substance of language was originally produced, we do not know. No argument can be derived against the common origin from analogies drawn outside the field. Aeschylus compares similarities of language with those of the cries of animals (v. Holden's 'Ital. to Greek,' ii. 278), he leaves out of consideration the important fact that language is not identical with sound, and that the words of a rational being, however originally produced, are perpetuated in a manner wholly distinct from that whereby animals learn to utter their cries. Nor does the internal evidence of language itself reveal the mystery of its origin; for though a very large number of words may be referred either directly or mediately to the principle of onomatopoeia, there are others, as, for instance, the first and second personal pronouns, which do not admit of such an explanation. In short, the farther we go back, the more difficult it becomes to reconcile the intimate connection existing between reason and speech, and words are so well expressed in the Greek language by the application of the term θρης to each, reason being nothing else than inward speech, and speech nothing else than outward reason, neither of them possessing an independent existence without the other. As we conceived reason to be the organ of language (as opposed to the organ of sense, unity involves questions connected with the origin of language, we can only say that in this respect it falls outside the range of our inquiry.

Reverting to the other class of objections, we proceed to review the extent of the differences observable in the languages of the world, in order to ascertain whether they are such as to preclude the possibility of a common origin. Such a view must necessarily be imperfect, both from the magnitude of the subject, and also from the position of the linguistic science itself, which as yet has hardly advanced beyond the stage of infancy. On the latter point we would observe that the most important links between the various language families may yet be discovered in languages that are eternally unexplored, or, at all events, unplaced. Meanwhile, no one can doubt that the tendency of all linguistic research is in the direction of unity. Already it has brought within the bounds of a well-established relationship languages so remote from each other in external guise, in age, and in geographical position as Sanscrit and English, Celtic and Greek. It has done the same for other groups of languages equally widely extended, but presenting less opportunities of investigation. It has recognized affinities between languages which the ancient Greek ethnologist would have classed under the head of "barbarian" in reference to each other, and even in many instances where the modern philologist has anticipated no relationship. The lines of research have been drawn anew, and favor the expectation that the various families may be combined by the discovery of connecting links into a single family, comprehending in its capacious bosom all the languages of the world. But should such a result never be attained, the probability of a common origin would still remain unshaken; for the failure would simply be due to the absence, in many classes and families, of that chain of historical evidence, which in the case of the Indo-European and Semitic families enables us to trace their progress for above 3,000 years. In many languages no literature at all, in many others no ancient literature exists, to supply the philologist with materials for comparative study: in these cases it can only be by laborious research into existing dialects that the original forms of words can be detected, amidst the intermixture and transmutation with time which has obscured them.

In dealing with the phenomena of language, we should duly consider the plastic nature of the material out of which it is formed, and the numerous influences to which it is subject. Variety in unity is a general law of nature, to which even the most stubborn physical substances yield a ready obedience. In the case of language it would be difficult to lay any bounds to the variety which we might a priori expect it to assume. For in the first place it is brought into close contact with the spirit of man, and reflects with amazing fidelity its endless variations, adapting itself to the expression of each feeling, the designation of each object, the working of each cast of thought or stage of reasoning power. Secondly, its sounds are subject to external influences, such as either the organ of speech, the result either of natural construction, of geographical position, or of habits of life and associations of an accidental character. In the third place, it is generally affected by the state of intellectual and social culture of a people, as manifested more especially in the presence or absence of a certain internal dialect, and in the processes of verbal and syntactical structure, which again react on the very core of the word, and produce a variety of sound-mutations. Lastly, it is subjected to the wear and tear of time and use, obliterating, as in an old coin, the original impress of the word, reducing it in bulk, producing new combinations, and occasionally leading to singular interchanges of sound and idea. The varieties, resulting from the modifying influences above enumerated, may be reduced to two classes, according as they affect the formal or the radical elements of language. On each of these subjects we propose to make a few remarks.

I. Widely as languages now differ from each other in external form, the raw material (if we may use the expression) out of which they have appeared to have been in all cases the same. A substratum of significant monosyllabic roots underlies the whole structure, supplying the materials necessary not only for ordinary predication, but also for what is usually termed the "growth" of language out of its primary into its more complicated forms. It is necessary to point this out clearly in order that we may not be led to suppose that the elements of one language are in themselves endowed with any greater vitality than those of another. Such a distinction, if it existed, would go far to prove a specific difference between languages, which could hardly be reconciled with the idea of their common origin. The appearance of vitality arises out of the manipulation of the roots by the human mind, and is not inherent in the roots themselves.

The proofs of this original equality are furnished by the languages themselves. Adopting for the present the treecold morphological classification into isolating, agglutinative, and inflecting languages, we shall find that in original element exists
in the one which does not also exist in the other.

With regard to the isolating class, the terms "monosyllabic" and "radical," by which it is otherwise described, are decisive as to its character. Languages of this class are wholly unsusceptible of grammatical mutations: there is no formal distinction between verb and noun, substantive and adjectival, preposition and conjunction: there are no inflections of case or personal termination of any kind, the bare root forms the sole and whole substance of the language. In regard to the other two classes, it is necessary to establish the two distinct points, (1) that the formal elements represent roots, and (2) that the roots both of the formal and the radical elements of the word are monosyllabic.

Now, it may be satisfactorily proved by analysis that all the component parts of 14th inflected and agglutinative languages are reducible to two kinds of roots, predicative and pronominal; the former supplying the material element of verbs, substantives, and adjectives; while each kind, but more particularly the pronominal, supply the formal element, or, in other words, the terminations of verbs, substantives, and adjectives. The full proof of these assertions would involve nothing less than a treatise on comparative grammar: we can do no more than adduce in the accompanying note a few illustrations of the various points to which we have adverted.

Whether the two classes of roots, predicative and pronominal, are further reducible to one class, is a point that has been discussed, but has not, as yet, been established (Bopp's Comparative Gram., § 105; Max Miller's Lectures, p. 289). We have further to show that the roots of agglutinative and inflecting languages are monosyllabic.

This is an acknowledged characteristic of the Indo-European family; monosyllabism is indeed the only

---

1. That prepositions are reducible to pronominal roots may be illustrated by the following instances. The Greek τὸν and ὧν, with its cognates the German ab and our an, is derived from the demonstrative base an, whence also the Sanskrit या (Bopp, § 1000); या and यन are akin to the Sanskrit या and यन, secondary formations from the pronominal या (Bopp, § 880). The preposition which appears to spring from a predictable base is through, with its cognates through and throughout, which are referred to the verbal root tor (Bopp, 1018).

2. That conjunctions are similarly reducible may be illustrated by the familiar instances of ἀπό, quod, and "that," indifferently used as pronouns or conjunctions. The Latin su is connected with the pronom suici and su, together with the Sanskrit यादि, the relative base for (Bopp, § 194).

3. That the suffixes forming the inflections of verbs and nouns are nothing else than the relics of either predicative or pronominal roots, will appear from the following instances, drawn (1) from the Indo-European languages, and (2) from the Ural-Altaic languages. (1).

The *in* in *διὰ* is connected with the root whence the oblique cases of the personal pronoun *ἐγὼ*; the *ἐν* in *διὰ* is the remains of *ο̂*; and the *ἐν* in *ἐν* (for which an *o* is substituted in *διὰ*), represents the Sanskrit *tā*, which happens in another and in the oblique cases of the article (Bopp, §§ 424, 443, 459). So again, the *ν* in the nominative λόγος represents the Sanskrit pronominal root *sa*, and the *δ* of the neuter *νομος* and the Sanskrit *sas* (Schleicher, § 245); the genitive terminations of *κόσμος* (or  *κός*o), and hence  is the Sanskrit *κον*, another form of *κον* (Schleicher, § 252); the dative (or more properly the locative) *ν* or *π* is reducible to the demonstrative root *κον* (Schleicher, § 251), and the accusative *ν* (originally *νο̂*l) to a pronominal base, probably *ον*, which no longer appears in its simple form (Schleicher, § 249).

(2) In the Ural-Altaic languages, we find that the terminations of the verbs, gerunds, and participles are referable to significant roots; as in Turkish the active suffix *i* or *d* to a root signifying "to do" (Eydel, "Die einzelnen mute Türk. Suffixe," § 200), and in Manchurian *i* or *a* (Bopp, § 10). It is impossible to draw from the affix *i* to *τη* to "become," the affix of possibility *ή* to *καρε* to "to work," etc. (Pulezky, in Philol. Trans. 1859, p. 115).

---

4. Monosyllabic substantives are not unusual in Hebrew, as in *מִצְבָּה* (Heb.; *Mittwoh*) and *אָבִּי* (Heb.; *Abi*). They are now often used as adverbs.

5. The Shemitic languages, including those that the Semitic languages actually ever existed in a state of monosyllabism is questioned by Renan, partly because the surviving monosyllabic languages have never emerged from their primitive condition, and partly because he conceives synthesis and complexity to be anterior in the history of language to analysis and simplicity (Hist. G.-u. 1 98-100). The first of these objections is based upon the assumption that languages are developed only in the direction of synthesis: but this, as we shall hereafter show, is not the only possible form of development, and it is just because the monosyllabic languages have adopted another method of perfecting themselves, that they have remained in their original stage. The second objection seems to involve a violation of the natural laws of development, and to be refuted by the actual fact of the continued existence of a language in the face of language for, though there is undoubtedly a tendency in language to pass from the synthetic to the analytical, it is no less clear from the elements of synthetic forms that they must have originally existed in an analytical state.
In the agglutinative class the relational elements are attached to the principal or predicative stem by a mechanical kind of junction, the individuality of each being preserved even in the combined state. In the inflecting class the junction is of a more perfect character, and may be compared to a chemical combination, the separate elements being thus fused together as to present the appearance of a single and indivisible word. It is clear that there exists no insuperable barrier to original unity in these differences, from the simple fact that every inflecting language must once have been agglutinative, and every agglutinative language once isolating.

If the predicative and relational elements of an isolating language be linked together, either to the eye or the ear, it is rendered agglutinative; if the material and formal parts are promiscuously used as one word, eliminating, if necessary, the sounds that resist incorporation, the language becomes inflecting.

(2) In the second place, it should be noted that these three classes are not separated from each other by any sharp line of demarcation. Clearly, there are many degrees of measurement which may be predicated of each other, but moreover each graduates into its neighbor through its bordering members. The isolating languages are not wholly isolating: they avow themselves of certain words as relational particles, though these still retain elsewhere their independent character; they also use composites, though not strictly compound words. The agglutinative are not wholly agglutinative: the Finnish and Turkish classes of the Ural-Altaic family are in certain instances inflectional, the relational adjunct being fully incorporated with the predicative stem, and having undergone a large amount of attrition for that purpose. Nor again are the inflecting languages wholly inflectional: Hebrew, for instance, abounds with agglutinative forms, and also avails itself largely of separate particles for the expression of relational ideas: our own language, though classed as inflectional, retains nothing more than the vestiges of inflection, and is in many respects as isolating and juxtapositional as any language of that class. While, therefore, the classification holds good with regard to the predominating and dissociated characters of the whole, it is possible to predetermine the elements of a specific nature. (3) But further, the morphological varieties of language are not confined to the exhibition of the single principle hitherto described. A comparison between the westerly branches of the Ural-Altaic on the one hand, and the Indo-European on the other, belonging respectively to the agglutinative and inflectional classes, will show that the quantitative amount of syn-
thesis is fully as prominent a point of contrast as the qualitative. The combination of primary and subordinate terms may be more perfect in the Indo-European, but it is more extensively employed in the Ural-Altaic family. The former, for instance, appends to its verbal stems the notions of time, number, person, and occasionally of interroga-
tion; the latter further adds suffixes indicative of negation, hypothesis, causativeness, reflexivity, and other similar ideas, whereby the word is built up tier on tier to a marvelous extent. The former appends to its substantial stems suffixes of case and number; the latter adds governing particles, rendering them post-positional instead of pre-positional, and combining them synthetically with the predicative stem. If, again, we compare the Semitic with the Indo-European languages, we shall find a truly morphological distinction of an equally diverse character. In the former the grammatical category is expressed by internal vowel-changes, in the latter by external suffixes. So marked a distinction has not unnaturally been constituted the basis of a classification, wherein the languages that adopt this system of internal flexion stand by themselves as a separate class, postulated as the isolated by either use terminations added for the same purpose, or which dispense wholly with inflectional forms (Bopp's Comp. Gr. i. 102). The singular use of preformative in the Coptic language is, again, a morphological peculiarity of a very decided character. And even within the same family, say the Indo-European, each language exhibits an idio-
synery in its morphological character, whereby it stands out apart from the other members with a decided impress of individuality. The inference to be drawn from the number and character of the differences we have noticed is favorable, rather than otherwise, to the theory of an original unity. Starting from the same common ground of monosyllabic roots, each language family has carried out its own special lines of development. But the pulse, the causes and nature of which must remain probably forever a matter of conjecture. We can perceive, indeed, in a general way, the adaptation of certain forms of speech to certain states of society. The agglutinative languages, for instance, seem to be specially adapted to the nomadic state by the promiscuity and division with which they connote the leading idea in each word, an arrangement whereby communication would be facilitated between tribes or families that associate only at intervals. We might almost imagine that these languages derived their impress of uniformity and solidarity from the monotonous steps of Central Asia, which have in all ages formed their proper habitat. So, again, the inflective class reflects cultivated thought and social organization, and its languages have hence been termed "state" or "political". Monosyllabism, on the other hand, is pronounced to be suited to the most primitive stage of thought and society, wherein the family or the individual is the standard by which things are regulated (Max Muh-
ero, in Philos. of Hist. i. 285). We should hesi-
tate, however, to press this theory without an adequate explanation of the differences observable in language-families. The Indo-European languages attained their high organization amid the same scenes and in the same nomad state as those wherein the agglutinative languages were nurtured, and we should be rather disposed to regard both the language and the higher social status of the former as the concurrent results of a higher mental organization. If from words we pass on to the varieties of syn-
tactical arrangement, the same degree of analogy will be found to exist between class and class, or between family and family in the same class; in other words, no peculiarity exists in one which does not admit of explanation by a comparison with others. The distribution of all grammatical forms in an isolating language necessitates a rigid classification of the words in a sentence according to logical principles. The same law prevails to a very great extent in our own Language, wherein the subject, verb, and object, or the subject, copula, and predicate, generally hold their relative positions in the order ex-
hibited, the exceptions to such an arrangement being easily brought into harmony with that general law.
In the agglutinative languages the law of arrangement is that the principal word should come last in the sentence, every qualifying clause or word preceding it, and being as it were sustained by it. The syntactical is thus the reverse of the verbal structure, the principal notion taking the precedence in the latter (Ewald, *Sprachleh.* Abb. ii. 29). There is in this nothing peculiar to this class of languages, beyond the greater uniformity with which the arrangement is adhered to: it is the general rule in the classical, and the occasional rare exception of the Teutonic languages. In the Semitic family the reverse arrangement prevails: the qualifying adjectives follow the noun to which they belong, and the verb generally stands first: short sentences are necessitated by such a collocation, and hence more room is allowed for the influence of emphasis in deciding the order of the sentence. In illustration of grammatical peculiarities, we may notice that in the agglutinative class adjectives qualifying substantives, or substantives placed in apposition with substantives, remain undeclined: in this case the process may be compared with the formation of compound words in the Indo-European languages, where the final member alone is inflected. So again the personal terminations of the nouns following a numeral may be parallelized with a similar usage in our own language, where the terms "a pound" or "a head" are used collectively after a numeral. We may again cite the peculiar manner of expressing the genitive in Hebrew. This is effected by one of the two following methods — placing the governing noun in the status construction, or using the relative pronouns following a numeral may be paralleled with a similar usage in our own language, where the terms "a pound" or "a head" are used collectively after a numeral. We may again cite the peculiar manner of expressing the genitive in Hebrew. This is effected by one of the two following methods — placing the governing noun in the status construction, or using the relative pronouns.

The following is an example of each case:

**Status Construction:**

1. **The noun in the genitive case:**
   - מַלְאוֹן (ma'le) — "the son of David"
   - רְעָיָה (r'ayah) — "the leader of the people"

2. **Relative pronouns:**
   - מַלְאַה (ma'lah) — "the daughter of David"
   - רְעִיָּה (r'iyah) — "the leader of the people"

The action of this law is as follows: The vowels are divided into three classes, which we may term **sharp**, **medial**, and **flat**: the first and the last cannot be considered as fully formed word, but all the vowels must be either of the two first, or of the two last classes. The suffix must always accord with the root in regard to the quality of its vowel-sounds, and hence the necessity of having double forms for all
operation of fixed laws of some kind or other, producing results of a uniform character; here too actual variety may not be inconsistent with original unity.

II. Before entering on the subject of the radical identity of languages, we must express our conviction that the time has not yet arrived for a decisive opinion as to the possibility of establishing it by proof. Let us briefly review the difficulties that beset the question. Every word as it appears in an organic language, whether written or spoken, is reposed in a system of affixes which are either arbitrary or conventional, and we have termed predictable and formal, the first being what is commonly called the root, the second the grammatical termination. In point of fact both of these elements consist of independent roots; and in order to prove the radical identity of two languages, it must be shown that they agree in both respects, that is, in regard both to the predictable and the formal roots. As a matter of experience it is found that the formal elements, consisting for the most part of pronominal bases, exhibit a greater tenacity of life than the others; and hence agreement of inflectional forms is justly regarded as furnishing a strong presumption of general radical identity. Even foreign elements are forced into the formal mode of expression, which they originally were not, and thus bear testimony to the original character of that language. But though such a formal agreement supplies the philologist with a most valuable instrument of investigation, it cannot be accepted as a substitute for complete radical agreement; this would still remain to be proved by an independent examination of the unpredictable elements. The difficulties connected with these latter are many and varied. Assuming that two languages or language-families are under comparison, the phonological laws of each must be investigated in order to arrive, in the first place, at the primary forms of words in the language in which they occur, and, in the second place, at the corresponding forms in the language which constitutes the other member of comparison, as done by Grimm for the Teutonic as compared with the Sanskrit and the classical languages. The genealogy of sound, as we may term it, must be followed up by a genealogy of significations, a mere outward accordance of sound and sense in two terms being of no value whatever, unless a radical affinity be proved by an independent examination of the cognate words in each case. It still remains to be inquired how far the ultimate accordance of sense and sound may be the result of onomatopoeia, of mere borrowing, or of a possible mixture of languages on equal terms. The final stage in etymological inquiry is to decide the limit to which comparison may be carried in the primitive strata of language—in other words, how far roots, as ascertained from groups of words, may be compared with roots, and reduced to yet simpler elements, or forms. Any theory described will of course invalidate the whole result. Even where the philologist is provided with ample materials for inquiry in stores of literature ranging over long periods of time, much difficulty is experienced in making good each link in the chain of agreements; and yet in such cases the diatetic varieties have been kept within some degree of restraint by the existence of a literary language, which, by impressing its authoritative stamp on certain terms, has secured both their general use and their external integrity. Where no literature exists, as is the case with the general mass of languages in the world, the difficulties are infinitely increased by the combined effects of a prolific growth of dialectic forms, and an absence of all means of keeping track of their progress. Whether under these circumstances we may reasonably expect to establish a radical unity of language, is a question which each person must decide for himself. Much may yet be done by a larger induction and a scientific analysis of languages that are yet comparatively unknown. The tendency hitherto has been to encourage the formation of large theoretical classes according as the elements of affinity have been recognized in underlying members. These limits may perhaps be still more enlarged by the discovery of connecting links between the language families, whereby the criteria of relationship will be modified, and new elements of internal unity be discovered amid the manifold appearances of external diversity.

Meanwhile we must content ourselves with stating the present position of the linguistic science in reference to this important topic. In the first place the Indo-European languages have been reduced to an acknowledged and well-defined relationship: they form one of the two families included under the head of "inflectional" in the morphological classification. The other family in this class is the (so-

gnus, and may have as true a genealogy as any other terms not bearing that character. For instance, the Hebrew šāmā' (שָׁמָּא) expresses in its very sound the notion of swallowing or gulping, the word consisting, as Renan has remarked (Le Livre IV), of a lingual and a gutural, representing respectively the tongue and the throat, which are chiefly engaged in the operation of swallowing. In the Indo-European lan-
guages we meet with a large class of words containing the same elements and conveying, more or less, the same meaning, such as śāma, šemūna, šemana, šemana, śēma, "hearken," and others. These words may have had a "common source, but, because they are onomatopoeic in their character, they are excluded as evidence of lingual affinity. This method of proof may be carried too far, though it is difficult to point out where it should stop. But even onomatopoeic words bear a specific character, and the names given in imitation of the notes of birds differ materially in different languages, which shows the perception of sounds with previously existing sounds or ideas. The subject is one of great interest, and may yet play an important part in the history of language.

a Grimm was the first to discover a regular system of displacement of sounds (lautverschiebung) pervading the Gothic and Low German languages as compared with Greek and Latin. According to this system, the Gothic substitutes aspirates for tenses (k for Gr. k or Lat. c, th for t, and f for p); tenses for medials (l for d, p for h, and k for g); and medials for aspirates (x for Gr. th or Lat. h, d for Gr. th, and b for Lat. f or Gr. ph). (Gesch. Deutsch. Spr. I, 283). We may illustrate the changes by comparing heart with kar or karōna; then with tran; fire with karōna; for with far; and so forth.

b It is a delicate question to decide whether in any given language the onomatopoeic words that may occur are original or derived. Numerous coincidences of sound and sense occur in different languages to which a common etymology is attached. Many of these words are onomatopoeic, on the ground that they are onomatopoeic. But evidently these may have been handed down from generation to generation, and from language to lan-

uation of the cognate words in each case. It still remains to be inquired how far the ultimate accordance of sense and sound may be the result of onomatopoeia, or of mere borrowing, or of a possible mixture of languages on equal terms. The final stage in etymological inquiry is to decide the limit to which comparison may be carried in the primitive strata of language—in other words, how far roots, as ascertained from groups of words, may be compared with roots, and reduced to yet simpler elements, or forms. Any theory described will of course invalidate the whole result. Even where the philologist is provided with ample materials for inquiry in stores of literature ranging over long periods of time, much difficulty is experienced in making good each link in the chain of agreements; and yet in such cases the diatetic varieties have been kept within some degree of restraint by the existence of a literary language, which, by impressing its authoritative stamp on certain terms, has secured both their general use and their external integrity. Where no literature exists, as is the case with the general mass of languages in the world, the difficulties are infinitely increased by the combined effects of a prolific growth of dialectic forms, and an absence of all means of keeping track of their progress. Whether under these circumstances we may reasonably expect to establish a radical unity of language, is a question which each person must decide for himself. Much may yet be done by a larger induction and a scientific analysis of languages that are yet comparatively unknown. The tendency hitherto has been to encourage the formation of large theoretical classes according as the elements of affinity have been recognized in underlying members. These limits may perhaps be still more enlarged by the discovery of connecting links between the language families, whereby the criteria of relationship will be modified, and new elements of internal unity be discovered amid the manifold appearances of external diversity.

Meanwhile we must content ourselves with stating the present position of the linguistic science in reference to this important topic. In the first place the Indo-European languages have been reduced to an acknowledged and well-defined relationship: they form one of the two families included under the head of "inflectional" in the morphological classification. The other family in this class is the (so-

gnus, and may have as true a genealogy as any other terms not bearing that character. For instance, the Hebrew šāmā' (שָׁמָּא) expresses in its very sound the notion of swallowing or gulping, the word consisting, as Renan has remarked (Le Livre IV), of a lingual and a gutural, representing respectively the tongue and the throat, which are chiefly engaged in the operation of swallowing. In the Indo-European lan-
guages we meet with a large class of words containing the same elements and conveying, more or less, the same meaning, such as śāma, šemūna, šemana, šemana, śēma, "hearken," and others. These words may have had a "common source, but, because they are onomatopoeic in their character, they are excluded as evidence of lingual affinity. This method of proof may be carried too far, though it is difficult to point out where it should stop. But even onomatopoeic words bear a specific character, and the names given in imitation of the notes of birds differ materially in different languages, which shows the perception of sounds with previously existing sounds or ideas. The subject is one of great interest, and may yet play an important part in the history of language.

a Grimm was the first to discover a regular system of displacement of sounds (lautverschiebung) pervading the Gothic and Low German languages as compared with Greek and Latin. According to this system, the Gothic substitutes aspirates for tenses (k for Gr. k or Lat. c, th for t, and f for p); tenses for medials (l for d, p for h, and k for g); and medials for aspirates (x for Gr. th or Lat. h, d for Gr. th, and b for Lat. f or Gr. ph). (Gesch. Deutsch. Spr. I, 283). We may illustrate the changes by comparing heart with kar or karōna; then with tran; fire with karōna; for with far; and so forth.

b It is a delicate question to decide whether in any given language the onomatopoeic words that may occur are original or derived. Numerous coincidences of sound and sense occur in different languages to which a common etymology is attached. Many of these words are onomatopoeic, on the ground that they are onomatopoeic. But evidently these may have been handed down from generation to generation, and from language to lan-

Shemitic, but native between the Hebrew, Arabic, and Ethiopic languages are distinctive enough: but the connection between the Shemitic and the Egyptian is not definitely established. Some philologists are inclined to claim for the latter an independent position, intermediate between the Indo-European and Shemitic families (Bunsen's Phil. of Hist. I. 155 ff.). The ambiguities of the Semitic languages are explained by Prof. M. Müller, in one family named Turanian. It is conceded that the family bond in this case is a loose one, and that the agreement in roots is very partial (Lectures, pp. 290-292). Many philologists of high standing, and more particularly Potter (Ungleich, Mench. Russen, p. 392), deny the family relationship altogether, and break up the agglutinative languages into a great number of families. Certain it is that within the Turanian circle there are languages, such, for instance, as the Ural-Altaic, which show so close an affinity to each other as to be entitled to form a separate division, either as a family or a subdivision of a family: and this being the case, we should hesitate to put them on a parity of footing with the remainder of the Turanian languages. The Ugric group again differs so widely from the other members of the family as to make the relationship very dubious. The monosyllabic languages of south-eastern Asia are not included in the Turanian family by Prof. M. Müller (Lect. pp. 290, 320), apparently on the ground that they are not agglutinative; but as the Chinese appears to be connected radically with the Burmeis (Humboldts Forsch., p. 368), with the Tibetan (Ph. of Hist. i. 363-395), and with the Ural-Altaic languages (Schott in Abh. Ab. K. 1861, p. 172), it seems to have a good title to be placed in the Turanian family.

With regard to the American and the bulk of the African languages, we are unable to say whether they can be brought under any of the heads already mentioned, or whether they stand by themselves as distinct families. The former are referred by writers of high eminence to an Asiatic or Turanian origin (Bunsen, Phil. of Hist. ii. 111; Latham's Men and his Migrations, p. 186); the latter to the Shemitic family (Latham, p. 148).

a Several of the terms compared by him are onomatopoeic, as *parax* (prostrare), *patakk* (passare), and *kalip*, and in each of these cases the initial letter forms part of the onomatopoeia. In the other the initial letter in the Greek is radical, as in *ballein* (Pottr's Dict. i. ii. 272), *epispa* (i. 229), and *stalakos* (i. 155). In others again it is euphonic, as in *balle- leon*. Lastly, we are unable to say how *etap* and *etarp* with *kalip* compared with *epispa* and *stalakos*.

It shows the uncertainty of such analogies that the- nius compares *tarp* with *epispa*, and *kalip* (172) with *talar*, which Deltzehs compares with *kalip* (172). An attempt to establish a large amount of radical identity by means of a resolution of the Hebrew word into its component and significant elements may be seen in the Paitolag. Trans., for 1858, where, for instance, the *be* in the Hebrew *hakah* is compared with the Teutonic prefix *be*; the *dir* in *dirach* and *dirach* is compared to *chaphas* with the Welsh *caf* in *cafuros*.

b These groups are sufficiently common in Hebrew.

The problem that awaits solution is, whether the several families above specified can be reduced to a single family by demonstrating their radical identity. It would be unreasonable to expect that this identity should be coextensive with the vocabularies of the various languages: it would naturally be confined to such ideas and objects as are common to mankind generally. Even within this circle the difficulty of proving the identity may be infinitely enhanced by the absence of materials. There are indeed but two families in which these materials are found in anything like sufficiency, namely, the Indo-European and the Turanian; even these furnish us with no historical evidence as to the earlier stages of their growth. We find each, at the most remote literary period, already exhibiting its distinctive character of stem- and word-formation, leaving us to infer, as we best may, from these phenomena the processes by which they had reached that point. Hence there arises abundance of room for difference of opinion, and the extent of the radical identity will depend very much on the view adopted as to these earlier processes. If we could accept in its entirety the system of etymology propounded by the analytical school of Hebrew scholars, it would not be difficult to establish a very large amount of radical identity; but the system is too narrow: established as it is on the rational force of the initial letters, as stated by Deltzeh in his *Jubenra* (pp. 166, 173, note), still less the correspondence between these and the initial letters of Greek and Latin words (pp. 170-172). The striking uniformity of bsa]lymism in the verbal stems is explicable only on the assumption that a single principle underlies the whole; and the existence of groups of words differing slightly in form, and having the same radical sense, leads to the presumption that this principle was one not of composition, but of euphonom and practical convenience. This presumption is still further favored by an analysis of the letters forming the stems, showing that the third letter is in many instances a reduplication, and in others a liquid, nasal or a simple consonant as the initial, the medial, or the final letter. The Hebrew alphabet admits of a classification based on the radical character of the letter according to its position in the stem. The effect of composition would have been to produce, in the first place, a greater inequality in the length of the words.

We will take as an instance the following one: דָּבָּר, יְתָרְשָּׁר, וּכְאֹרְס, וְמַעְרָשָׁר, all conveying the idea of "dash" or "strike." Or, again, the following group, with the radical sense of apposition, דָּבָּר, מַעְרָשָׁר, וְאָרְשָׁר, etc. A classificatory lexicon of such groups would assist the etymological inquiry.

c Such a classification is attempted by Boetticher, in Bunsen, *Phil. of Hist.* ii. 551. After stating what he believes to be coextensive with the vocalizations or end of the root, he enumerates those which are always radical in the several positions: ב, for instance, in the beginning and middle, but not at the end; ג in the beginning only and ב in the middle and at the end, but not in the beginning; and ג, referred to as the vowel of the stem, or as the radical vowel only, is said to be correct, but we adduce it in illustration of the point above noticed.
TONGUES, CONFUSION OF

and, in the second place, a greater equality in the use of the various organic sounds.

After deducting largely from the amount of etymological correspondence based on the analytical texts, there still remains a considerable amount of radical identity which appears to be above suspicion. It is impossible to produce in this place a complete list of the terms in which that identity is manifested. In the subjoined note we cite some instances of agreement, which cannot possibly be explained on the principle of direct onomatopoeia, and which would therefore seem to be the common inheritance of the Indo-European and Semitic families. Whether this agreement is, as Renan suggests, the result of a keen susceptibility of the onomatopoetic faculty in the original tracers of the words (Hist. Gén. i. 464), is a point that can neither be proved nor disproved. But even if it were so, it does not follow that the words were not framed before the separation of the families. Our list of comparative words might be much enlarged, if we were to include comparisons based on the reduction of Semitic roots to a bisyllabic form. A list of such words may be found in Delitzsch's Jesuwar, pp. 177-180. In regard to pronouns and numerals, the identity is but partial. We may except the numeral *sesh and *shesh, for *six" and "seven," accord with the Indo-European forms; those representing the numbers from *one" to *five" are possibly, though not evidently, identical. With regard to the other language-families, it will not be expected, after the observations already made, that we should attempt the proof of their radical identity. The Urals-Altaic languages have been extensively studied, but are hardly ripe for comparison. Occasional resemblances have been detected in grammatical forms and in the vocabularies; but the value of these remains to be proved, and we must await the results of a more extended research into this and other regions of the world of language.

(8.) We pass on to the second point proposed for consideration, namely, the etymological views expressed in the Bible, and more particularly in the 10th chapter of Genesis, which records the dispersion of nations consequent on the Confusion of Tongues.

1. The Mosaic table does not profess to describe the process of the dispersion; but assuming that dispersion as a fait accompli, it records the ethnical relations existing between the various nations affeced by it. These relations are expressed under the guise of a genealogy; the ethnical character of the document is, however, clear both from the humane some of which are gentile in form, as Ludim, Japhite, etc., others geographical or local, as Mizraim, Salmon, etc.; and again from the formula, which concludes each section of the subject "after their families, after their tongues, in their countries, and in their nations" (vv. 5, 20, 31). Incidentally, the table is geographical as well as ethnological; but this arises out of the practice of designating nations by the countries they occupy. It has indeed been frequently surmised that the arrangement of the table is purely geographical, and this idea is to a certain extent favored by the possibility of explaining the names Shen, Ham, and Japheth on this principle: the first signifying the "high" lands, the second the "hot" or "low" lands, and the third the "breast," or undefined regions of the north. The three families may have been so located, and such a circumstance could not have been unknown to the writer of the table. But neither internal nor external evidence satisfactorily prove such to have been the leading idea or principle embodied in it; for the Japhetites are mainly assigned to the "isles" or maritime districts of the west and northwest, while the Semites press down into the plain of Mesopotamia, and the Hamites, on the other hand, occupy the high lands of Canaan and Lebanon. We hold, therefore, the geographical as subordinate to the ethnographical element, and avail ourselves of the former only as an instrument for the discovery of the latter.

The general arrangement of the table is as follows: The whole human race is referred back to Noah's three sons, Shem, Ham, and Japheth. The Semites are described last, apparently that the continuity of the narrative may not be further disturbed; and the Hamites stand next to the Semites, in order to show that these were more closely related to each other than to the Japhetites. The comparative degrees of affinity are expressed,
partly by coupling the names together, as in the cases of Elisah and Tarshish, Kittita and Dobath (ver. 4), and partly by representing a genealogical descent, as, when the nations just mentioned are said to be "sons of Javan." An inequality may be observed in the length of the genealogical lines, which in the case of Japheth extends only to one, in Ham to two, in Shem to three, and even four degrees. This inequality clearly arises out of the varying interest taken in the several lines by the author of the table, and by those for whom it was designed. We may lately observe, that the occurrence of the same name in two of the lists, as in the case of Lud (vv. 13, 22), and Sheba (vv. 7, 28), possibly indicates a fusion of the races.

The identification of the Biblical with the historical or classical names of nations, is by no means an easy task, particularly where the names are not subsequently noticed in the Bible. In these cases comparisons with ancient or modern designations are the only resource, and where the designation is one of a purely geographical character, as in the case of Riphat compared with Ripi muntus, or Mash compared with Masis mous, great doubt must exist as to the historic force of the name, as much as several nations may have successively occupied the same district. Equal doubt arises where names admit of being treated as appellatives, and so of being transferred from one district to another. Recent research into Assyrian and Egyptian records has in many instances thrown light on the Biblical titles. In the former we find Meshech and Tubal noticed under the terms Med, koi and Tophai, while Javan appears as the appellation of Cyprus, which the Assyrians first met with Greek civilization. In the latter the name Punt appears under the form of Pount, Hittite as Khita, Cushi as Kcsh, Canaan as Ammon, etc.

1. The Japhethite list contains fourteen names, of which seven represent independent, and the remainder affiliated nations, as follows: (i.) Gomer, connected ethnically with the Cannae, Cimmer (7), and Cypry; and geographically with Crema. Associated with Gomer are the three following: (a.) Ashkenaz, generally compared with the Akshun in Bithynia, but by Knobel with the tribe As, or Asyloss in the Caspiian district. On the whole we prefer Hasse's suggestion of a connection between this name and that of the Aksun, later the Encius Pontus. (b.) Riphat, the Ripi Montes, which Knobel connects etymologically and geographically with Carpathus Mons. (c.) Togarnath, undoubtedly Armenia, or a portion of it. (ii.) Magog, the Sephiros. (iii.) Madai, Medi. (iv.) Javan, the Ionians, as a general appellation for the Hellenic race, with whom he associated the four following: (a.) Elisah, the Javan, less probably identified with the district Elia. (b.) Tarshish, at a later period of Biblical history certainly identified with Tarctessa in Spain, to which, however, there are objections as regards the table, partly from the too extended area thus given to the Med. (c.) Kittita, the town of Citino in Cyprus. (d.) Dola-then, the Torethusi of Hylia and My sia: Dobath is sometimes compared. (e.) Tubal, the Tiberion in Pontus. (f.) Meshech, the Mochoi in the northwestern part of Armenia. (vii.) Tiras, perhaps

2. The Hamitic list contains thirty names, of which four represent independent, and the remainder affiliated nations, as follows: (b.) Cush, in two branches, the western or African representing Ethiopia, the Kesh or the old Egyptian, and the eastern or Asiatic being connected with the names of the tribe Cocei, the district Cisir, and the present Siwin or Khaziti. With Cush are associated: (a.) Sela, the Sela of Genesis in the south Arabia. (b.) Havilah, the district Khedah in the same part of the peninsula. (c.) Sabtah, the town Subath in Hadramaut. (d.) Raamah, the town Reuqam on the southeastern coast of Arabia, with whom are associated: (c.) Sela, a tribe probably connected ethnically or commercially with the one of the same name already mentioned, but located on the west coast of the Persian Gulf. (e.) Dedan, also on the west coast of the Persian Gulf, where the name perhaps still survives in the island Doda. (f.) Sabteca, perhaps the town Songabe on the coast of the Indian Ocean eastward of the Persian Gulf. (f.) Nimrod, a personal and not a geographical name, the representation of the eastern Cushites in Egyptian by the term enishi or tenishi, "northern district," converted by the Hebrews into Ammon. (g.) Naphthum, variously explained as the people of Nephthys, i.e. the northern coast district (Bechert), and as the worshippers of Pthath, meaning the inhabitants of Memphis. (h.) Pharaoh, Upper Egypt, the name being explained as meaning in the Egyptian "the south" (Knobel), (f.) Cashnem, Cu- sisis mous, Casiris, and Cosass, eastward of the Delta (Knobel); the Cokchians, according to Bochart, but this is unlikely. (f.) Caphtor, most probably the district about Cephas in Upper Egypt (CAPHTOR); the island of Crete according to many modern critics, Cappadocia according to the older interpreters. (g.) Phin, the Pint of the Egyptian Historian, meaning the Libyan (Poly.), the Canaan, the geographical position of which calls for no remark in this place. The name has been variously explained as meaning the "low" land of the coast district, or the "subjection" threatened to Canaan personally (Gen. ix. 25). To Canaan belong the following eleven: (a.) Sidon, the well-known town of that name in Phoenicia. (b.) Heth, or the Hites of Biblical history. (c.) The Ealanites, of Je- bus or Jerusalem. (d.) The Amorite frequently mentioned in Biblical history. (f.) The Gisgates, the same as the Ghasheshites. (f.) The Hivite, variously explained to mean the occupants of the "interior" (Kwall), or the dwellers in "villages" (Gesen.). (g.) The Arkbite, of Arc, north of Tri polis, meaning the Libyans (Poly.), the Canaan, or Sin or Sinjen, places in the Lebanon district. (f.) The Araudite of Aravos on the coast of Phoenicia. (f.) The Zemarite, of Simyros on the Euctheus. (h.) The Humathite, of Hamath, the classical Epi phania, on the Orontes.

3. The Shemitic list contains twenty-five names of which five refer to independent, and the remain-
TONGUES. CONFUSION OF

To allied tribes, as follows: (i.) Elam, the tribe Elamut and the district Elamut in Susiana. (ii.) Asshir, Assurin between the Tigris and the range of Zagros. (iii.) Arabhav, Aramabrittis in northern Assyria, with whom are associated: (o.) Sahal, a personal and not a geographical title, indicating a migration of the people represented by him; Sahal's son (o.) Eber, representing geographically the district Assur (v., easterly of) the Euphrates; and Eber's two sons (o.) Peleg, a personal name indicating a "division" of this branch of the Shemitic family, and (b.) Joktan, representing generally the inhabitants of Arabia, with the following thirteen sons of Joktan, namely: (a.) Amod, probably representing the tribe of Abmond near Mecca, whose leader was named Idhah, (a.) Eber, representing geographically the district Uiklah. The latter is identified by Knobel as the Semir in the southwest. (b.) Aham, doubtfully connected with the district Mad, eastward of Assurut in, and with the towns Meera and Malii. (f.) Sheba, the Sabii of southwestern Arabia, about Ma'ath. (a.) Ophir, probably Aube in the southern coast, but see article. (f.) Havilah, the district Khadid in the northwest of Yemen (a.t). Jobab, possibly the Tobilit of Ployn (yi, 7, § 24), for which Jobabite may originally have stood. (iv.) Lud generally compared with Lydia, but explained by Knobel as referring to the various aboriginal tribes in and about Palestine, such as the Amalies, Ephraims, Emins, etc. We cannot consider either of these views as well est. est. Lydia itself lay beyond the horizon of the Mosic table: as to the Shemitic origin of its population, conflicting opinions are entertained, to which we shall have occasion to advert hereafter. Knobel's view has in its favor the probability that the tribes referred to would be represented in the table; it is, however, wholly devoid of historical confirmation, while the connection of the Arabian tribes with the Arabian "Ambic" was one of the sons of Len of Laqar, the son of Shem. (v.) Amram, the general name for Syria and northern Mesopotamia, with whom the following are associated: (o.) Uz, probably the A'dah of Ployn. (b.) Hul, doubtful, but best connected with the name Halach, attaching to a district north of Lake Merom. (c.c) Geber, not identified. (d.) Maseh, Musian Mese, in the north of Mesopotamia.

There is yet one name noticed in the table, namely, Philitum, which occurs in the Hamitic division, but without any direct assertion of Hamitic descent. The terms used in the A. V. "out of whom (Casshmm) came Philitum" (ver. 11), would naturally induct a descent, but the Hebrew text only warrants the conclusion that the Philitines sojourned in the land of the Casdulm. Without mentioning this, we believe the intention of the author of the table to have been to affirm the Hamitic origin of the Philitines, leaving unmarked the particular branch, whether Casalhinis or

TONGUES. CONFUSION OF

Caphlustin, with which it was more immediately connected.

The total number of names noticed in the table including Philitum, would thus amount to 79, which was raised by pristic writers to 72. These totals afforded scope for numerical comparisons, and also for an estimate of the number of nationalities and languages to be found on the earth's surface. It is needless to say that the Bible itself furnishes no ground for such calculations, inasmuch as it does not in any case specify the numbers.

Before proceeding further, it would be well to discuss a question materially affecting the historical value of the Mosic table, namely, the period to which it refers. On this point various opinions are entertained. Knobel has endeavored to represent the commercial geography of the Phenicians assigns it to about 1200 n. c. (Fellner, pp. 4-9, 1, and Roman supports this view (Hist. Gen. i. 40) while others allow it no higher an antiquity than the period of the Babylonian Captivity (v. Bohlen's Gen. ii. 167; Winer, Rel. ii. 693). Internal evidence leads us to refer it back to the age of Abraham suffering no ground for such calculations, inasmuch as it does not in any case specify the numbers.

The Mosic table is supplemented by ethnological notices relating to the various divisions of the Terahite family. These belonged to the Shemitic division, being descended from Arphaxad, the son of Peleg, with whom the line terminates in the table. Gen. Sogu, and Nahor form the immediate links between Peleg and Terah (Gen. xi. 18-25), with whom began the movement that terminated in the occupation of Canaan and the adjacent districts by certain branches of the family. The original word opinion of its originator, there was an element which was another Ishmaelite war Joktan (Bohlin, Hist. 1. 336, note).
Whether supported Deut. 045, or, according to the Hebrew nomenclature, the Kasdim, were found in that neighborhood, is indicated by the name Chezèd as one of the sons of Nahor (Gen. xxii. 22), and possibly by the name Arphaxad itself, which, according to Ewald (Gench. i. 357), means "fortress of the Chaldees." In classical times we find the Kasdim still occupying the mountains adjacent to Arraphbathe, the Biblical Arphaxad, under the names Chabkai (Xen. Anab. iv. 3, § 1-4) and Kadagri or Kasdachi (Strab. xvi. p. 747), and here the name still has a vital existence under the form of Kasd. The name Kasdim is explained by Oppert as meaning "two rivers," and thus as equivalent to the Hebrew Naharaim and the classical Meopotamia (Eckh. Mon. Ges. ix. 137). We receive this explanation with reserve: but, as far as it goes, it favors the northern locality. The evidence for the antiquity of the southern settlement appears to be but small. In the tenses of Arphaxad, as well as in the Aramaic inscriptions until the 9th century B. C. (Rawlinson. L. 449), we therefore conceive the original seat of the Chaldees to have been in the north, whence they moved southward along the course of the Tigris until they reached Babylon, where we find them dominant in the 7th century B. C. Whether they first entered this country as mercenaries, and then conquered their employers, as suggested by Renan (Hist. G, i. 68), must remain uncertain: but we think the suggestion supported by the circumstance that the name was afterwards transferred to the whole Babylonian population. The sacral character of the Chaldees is certainly difficult to reconcile with this or any other hypothesis on the subject.

Returning to the Terachites, we find it impossible to define the geographical limits of their settlements with precision. They intermingled with the previously existing inhabitants of the countries intervening between the Red Sea and the Euphrates, and hence we find an Aram, an Uz, and a Chedeth among the descendants of Nahor (Gen. xxii. 21, 22), and a Dedan and a Sheha among those of Abraham by

* A connection between the names Terah and Terach-natia, Haran and Harran, is suggested by Renan.

Keturah (Gen. xxv. 3), and an Amalek among the descendants of Esau (Gen. xxvi. 12). Few of the numerous tribes which sprang from this stock attained historical celebrity. The Israelites must of course be excepted from this description; so also the Nabateans, if they are to be regarded as represented by the Nabathæi of the Bible, as to which there is some doubt (Quatremère, Mélanges, p. 59). Of the rest, the Medesites, Ammonites, Midianites, and Edomites are chiefly known for their hostilities with the Israelites, to whom they were close neighbors. The memory of the western migration of the Israelites was perpetuated in the name Hebrew, as referring to their residence beyond the river Euphrates (Josh. xix. 3).

Besides the nations whose origin is accounted for in the Bible, we find other early populations mentioned in the course of the history without any notice of their ethnology. In this category we may place the Horites, who occupied Edom before the descendants of Esau (Deut. ii. 12, 22); the Amalekites of the Sinaitic peninsula; the Zinjids and Zammunmim of Perea (Gen. xiv. 5; Deut. ii. 2, 24); the Midianites, and of the valley near Jerusalem named after them (Gen. xiv. 5; 2 Sam. v. 18); the Enlities eastward of the Dead Sea (Gen. xiv. 5); the Avims of the southern Phœnician plain (Deut. ii. 23); and the Amakims of southern Palestine (Josh. xi. 21). The question arises whether these tribes were Hamites, or whether they represented an earlier population which preceded the entrance of the Hamites. The latter view is supported by Knobel, who regards the majority of these tribes as Semites, who preceded the Cannanites, and communicated to them the Semitic tongue (Tol. loc. cit. pp. 294, 315).

No evidence can be adduced in support of this theory, which was probably suggested by the double difficulty of accounting for the name of Laod, and of explaining the apparent anomaly of the Hamites and Terachites speaking the same language. Still less evidence is there in favor of the Turanian origin, which would, we presume, be assigned to these tribes in common with the Cannanites proper, in accordance with a current theory that the first wave of population which overspread western Asia bore the Turanian branch of the human family (Hiss. des Herr. i. 645, note). To this theory we shall presently advert: meanwhile we can only observe, in reference to these fragmentary population traditions, that, as they intermingled with the Cannanites, they probably belonged to the same stock (comp. Num. xxii. 22; Judg. i. 10). They may perhaps have belonged to an earlier migration than the Cannanithes, and may have been subdued by the later comers: but this would not necessitate a different origin. The names of these tribes and of their abodes, as instanced in Gen. xiv. 5; Deut. ii. 23; Num. xxii. 22, bear a Semitic character (Ewald, Gench. i. 311), and the only objection to their Canaanithic origin arising out of these names would be the connection with Zammunim, which, according to Renan (Hist. G, p. 35, note), is formed on the same principle as the Greek Basileus, and in this case implies at all events a dialectical difference.

Having thus surveyed the ethnological statements contained in the Bible, it remains for us to inquire how far they are based on, or accord with, physiological or linguistic principles. Knobel maintains

(Quatremère, Mélanges, p. 59). Of the rest, the Medesites, Ammonites, Midianites, and Edomites are chiefly known for their hostilities with the Israelites, to whom they were close neighbors. The memory of the western migration of the Israelites was perpetuated in the name Hebrew, as referring to their residence beyond the river Euphrates (Josh. xix. 3).

Besides the nations whose origin is accounted for in the Bible, we find other early populations mentioned in the course of the history without any notice of their ethnology. In this category we may place the Horites, who occupied Edom before the descendants of Esau (Deut. ii. 12, 22); the Amalekites of the Sinaitic peninsula; the Zinjids and Zammunmim of Perea (Gen. xiv. 5; Deut. ii. 2, 24); the Midianites, and of the valley near Jerusalem named after them (Gen. xiv. 5; 2 Sam. v. 18); the Enlities eastward of the Dead Sea (Gen. xiv. 5); the Avims of the southern Phœnician plain (Deut. ii. 23); and the Amakims of southern Palestine (Josh. xi. 21). The question arises whether these tribes were Hamites, or whether they represented an earlier population which preceded the entrance of the Hamites. The latter view is supported by Knobel, who regards the majority of these tribes as Semites, who preceded the Cannanites, and communicated to them the Semitic tongue (Tol. loc. cit. pp. 294, 315).

No evidence can be adduced in support of this theory, which was probably suggested by the double difficulty of accounting for the name of Laod, and of explaining the apparent anomaly of the Hamites and Terachites speaking the same language. Still less evidence is there in favor of the Turanian origin, which would, we presume, be assigned to these tribes in common with the Cannanites proper, in accordance with a current theory that the first wave of population which overspread western Asia bore the Turanian branch of the human family (Hiss. des Herr. i. 645, note). To this theory we shall presently advert: meanwhile we can only observe, in reference to these fragmentary population traditions, that, as they intermingled with the Cannanites, they probably belonged to the same stock (comp. Num. xxii. 22; Judg. i. 10). They may perhaps have belonged to an earlier migration than the Cannanithes, and may have been subdued by the later comers: but this would not necessitate a different origin. The names of these tribes and of their abodes, as instanced in Gen. xiv. 5; Deut. ii. 23; Num. xxii. 22, bear a Semitic character (Ewald, Gench. i. 311), and the only objection to their Canaanithic origin arising out of these names would be the connection with Zammunim, which, according to Renan (Hist. G, p. 35, note), is formed on the same principle as the Greek Basileus, and in this case implies at all events a dialectical difference.

Having thus surveyed the ethnological statements contained in the Bible, it remains for us to inquire how far they are based on, or accord with, physiological or linguistic principles. Knobel maintains
that the threefold division of the Mosaic table is founded on the physiological principle of color; Shem, Ham, and Japheth representing respectively the red, black, and white complexions prevailant in the different regions of the then known world (Tödker, pp. 11-15). He confines etymological support for this view in respect to Ham ("=dark") and Japheth (="light"), but not in respect to Shem, and he adduces testimony to the fact that such differences of color were noted in ancient times. The red, black, and white complexions prevailant in the Mediterranean Phoenicians are well-defended Harv. by the Shemitic class of languages, and that any theory which obliterates this distinction must fail to the ground. The Hamitic type is most highly developed, as we might expect, in the country which was, per excellent, the land of Ham, namely Egypt; and whatever elements of original unity with the Shemitic type may be detected by philologists, practically the two were as distinct from each other in historical times, as any two languages could possibly be. We are not therefore prepared at once to throw overboard the linguistic element of the Mosaic table. At the same time we recognize the extreme difficulty of explaining the anomaly of Hamitic tribes speaking a Shemitic tongue. It will not suffice to say that these tribes were mixed with the Shemites; for again the correctness of the Mosaic table is vindicated by the differences of social and artistic culture which distinguish the Shemites proper from the Phoenicians and Cushites using a Shemitic tongue. The former are characterized by habits of simplicity, isolation, and adherence to patriarchal ways of living and thinking; the latter, on the contrary, are a mixed, frequently a commercial people; and the Cushites are identified with the massive architectural erections of Babylonia and South Arabia, and with equally extended ideas of empire and social progress.

The real question at issue concerns the language, not of the whole Hamitic family, but of the Canaanites and Cushites. With regard to the former, various explanations have been offered—such as Knobel's, that they required a Shemitic language from a prior population, represented by the Retinates, Zuzaun, Zambunmin, etc. (Tödker, p. 315); or Bunsen's, that they were a Shemitic race who had long sojourned in Egypt (Phil, of Hist. i. 191)—neither of which are satisfactory. With regard to the latter, there is an anomaly explaining the division of a Joktanid immigration superintended on the original Hamitic population, the result being a combination of Cushitic civilization with a Shemitic language (Kenan, i. 322). Nor is it unimportant to mention that peculiarities have been discovered in the Shemitic Semitic of Southern Arabia which suggest a close affinity with the Phoenician forms (Kenan, i. 318). We are not, however, without expectation that time and research will clear up much of the mystery that now envelops the subject. There are two directions to which we may hopefully turn for light, namely, Egypt and Babylon, with regard to each of which we make a few remarks.

That the Egyptian language exhibits many points of resemblance to the Semitic type is acknowledged on all sides. It is also allowed that the resemblances are of a valuable character, being observable in the pronouns, numerals, in aggregative forms, in the treatment of vowels, and other such points (Kenan, i. 84, 85). There is, not, however, an equal degree of agreement among scholars as to the directions to be drawn from these resemblances. While many recognize
them the proofs of a substantial identity, and hence regard Hamilton as an early stage of Semitism, others deny, either on general or on special grounds, the probability of such a connection. When we find such high authorities as Bunsen on the former side (Phil. of Hist. i. 186–189, ii. 3) and Renan (i. 80) on the other, not to mention a long array of scholars who have adopted each view, it would be presumption dogmatically to assert the correctness or the correctness of either. We can only point to the possibility of the identity being established, and to the further possibility that connecting links may be discovered between the two extremes, which may serve to bridge over the gulf, and to render the use of a Semitic language by a Hamitic race less of an anomaly than it at present appears to be.

Turning eastward to the banks of the Tigris and Euphrates, and the adjacent countries, we find ample materials for research in the inscriptions recently discovered, the examination of which has not yet yielded undisputed results. The Mosaic table places a Semitic population in Assyria and Elam, and a Cushitic one in Babylon. The probability of this being ethnically (as opposed to geographically) true depends partly on the language assigned to the table. There can be no question that at a late period Assyria and Elam were held by non-Semitic, probably Arayan conquerors. But if we carry the table back to the age of Abraham, the case may have been different; for though Elam is regarded as ethnologically identified with Iran (Renan, i. 41), this is not conclusive as to the Iranian character of the language in early times. The sufficient evidence is afforded by language that the basis of the population in Assyria was Semitic (Renan, i. 70; Knobel, pp. 154–156); and it is by no means improbable that the inscriptions belonging more especially to the neighborhood of Susa may ultimately establish the fact of a Semitic population in Elam. The presence of a Cushitic population in Babylon is an opinion generally held on linguistic grounds; and a close identity is said to exist between the old Babylonian and the Meder language, a Semitic tongue of an ancient type still living in a district of Badrwanat, in Southern Arabia (Renan, ii. G. ii. 60). In addition to the Cushitic and Semitic elements in the population of Babylonia and the adjacent districts, the presence of a Semitic element inferred from the linguistic character of the early inscriptions. We must here express our conviction that the ethnology of the countries in question is considerably clouded by the undefined use of the term Turanian, Syecthie, and the like. It is frequently difficult to decide whether these terms are used in a linguistic sense, or in an ethnic sense, or in an ethnic sense, or in an ethnic sense, or in an ethnic sense. The presence of a certain amount of Turanianism in the former does not involve its presence in the latter sense. The old Babylonian and Susian inscriptions may be more suggestive than the later ones, but this is only a proof of their belonging to an earlier stage of the language, and does not of itself indicate a foreign population; and it is evident that Babylonian inscriptions gradually into the Semitic, as asserted even by the advocates of the Turanian theory (Rawlinson's Herod., i. 442, 445), the presence of an ethnic Turanianism cannot possibly be inferred. Added to this, it is inexplicable how the presence of a large Semitic population in the Ashkenazian period, to which many of the Susian inscriptions belong, could escape the notice of historians. The only Syecthian tribes noticed by Herodatus in his review of the Persian empire are the Parthians and the Sace, the former of whom are known to have lived in the north, while the latter probably lived in the extreme east, where a memorial of them is still supposed to exist in the name Scethim, representing the ancient Sacatan. Even with regard to these, Syecthie may not mean Turanian; for they may have belonged to the Syecthians of history (the Skodets), for whom an Indo-European origin is claimed (Rawlinson's Herod., iii. 197). The impression conveyed by the supposed detection of so many heterogeneous elements in the old Babylonian tongue (Rawlinson, i. 412, 444, 616 notes) is not favorable to the general results of the researches.

With regard to Arabia, it may safely be asserted that the Mosaic table is confirmed by modern research. The Cushitic element has left memorials of its presence in the south in the vast ruins of Medinh and Susa (Renan, i. 318), as well as in the influence it has exercised on the Hararitic and Meder languages, as compared with the Hebrew. The Jok坦dian element forms the basis of the Arabian population, the Semitic character of whose language is highly probable, with regard to the Semitic element in the north, we are not aware of any linguistic proof of its existence, but it is confirmed by the traditions of the Arabs themselves. It remains to be inquired how far the Japhetic stock represents the linguistic characteristics of the Indo-European and Turanian families. Adopting the twofold division of the former, suggested by the names itself, into the eastern and western; and subdividing the eastern into the Indian and Iranian, and the western into the Celtic, Hellenic, Illyrian, Italian, Slavonian, and Lithuanian classes, we are able to assign Meder (Meder) and Tagaran (Aramaic) to the Iranian class; Javan (Javan) and Elahsh (Elahsh) to the Helenian; Gotom, conceptually to the Celtic; and Vandez, also conceptually, to the Illyrian. According to the old interpreters, Ashkenaz represents the Teutoonic class, while, according to Knobel, the Italian would be represented by Tarsilshi, whom he identifies with the Etrusci; the Slavonian by Magog; and the Lithuanian possibly by Tiris (pp. 96, 68, 130). The same writer also identifies Raphapth with the Gauls, and identifies the Scythians or the Scyths (pp. 108, 109) with the Scyths. Kitto is referred by him not improbably to the Cariani, who at one period were predominant on the islands adjacent to Asia Minor (p. 98). The evidence for these identifications varies in strength, but in no instance approaches to demonstration beyond the general probability that the main branches of the human family would be represented in the Mosaic table, we regard much that has been advanced on this subject as highly precarious. At the same time it must be conceded that the subject is an open one, and that as there is no possibility of proving, so also none of disproving, the correctness of these conjectures. Whether the Turanian family is fairly represented in the Mosaic table may be doubted by those who advocate the theory that the Hebrews, the Scythians would naturally employ Magog as the representative of this family; and even those who dissent from the Mongolian theory may still not unreasonably conceive that the title Magog applied broadly to all the nomadic tribes of Northern Asia, whether Indo-European or Turanian. Tubal and Meshech remain to be considered; Knobel identifies them respectively with the Iberians and the Ligurians (pp. 111, 119); and if
TONGUES, CONFUSION OF

The Finnish character of the Basque language was established; he would regard the Iberians as certainly, and the Ligurians as probably Turanian, the relics of the first wave of population which is supposed to have once overspread the whole of the European continent, and of which the Flum in the north, and the Basques in the south, are the sole surviving representatives. The Turanian character of the two Biblical races above mentioned has been other- 

The new fact of the unity of the human race, which underlies the Mosaic system. The chief and in many instances the only instrument at our command for ascertaining the relationship of nations is language. In its general results this instrument is thoroughly trustworthy, and in individual cases to which it is applied it furnishes a strong probative evidence; but its evidence, if unsupported by other means, is in many cases no proof of the consequence of the mueanest instances of adopted languages which have occurred within historical times. This drawback to the value of the evidence of language will not materially affect our present inquiry, inasmuch as we shall confine ourselves as much as possible to the general results.

The nomenclature of modern ethnology is not identical with that of the Bible, partly from the enlargement of the area, and partly from the general adoption of language as the basis of classification. The term Shemitic is indeed retained, not, however, to indicate a descent from Shem, but the use of languages allied to that which was current among the Israelites in historical times. Hamitic also finds a place in modern ethnology, but as subordinate to, or coordinate with, Shemitic. Japhetic is superseded mainly by Indo-European or Aryan. The various nations, or families of nations, which find no place under the Biblical titles are classed by certain ethnologists under the broad title of Turanian, while by others they are broken up into divisions more or less numerous.

The first branch of our subject will be to trace the extension of the Shemitic family beyond the limits assigned to it in the Bible. The most marked characteristic of this family, as compared with the Indo-European or Turanian, is its indelicacy. Henmed in both by natural barriers and by the superior energy and expansiveness of the Arvam and Turanian races, it retains to the present day the stipulations of early times. The only direction in which it has exhibited any tendency to expand has been about the shores of the Mediterranean, and even here its activity was of a sporadic character, limited to a single branch of the family, namely, the Phenicians, and to a single phase of expansion, namely, commercial colonies. In Asia Minor we find tokens of Shemitic presence in Cilicia, which

was connected with Phenicia both by tradition (Herod. vii. 90), and by language, as attested by existing inscriptions (Gesen, Mon. Picta, iii. 2: in Pumplia, Pisidia, and Lydia, parts of which were occupied by the Seleucidae (Pllin. vii. 24; Herod. i. 173), whose name bears a Shemitic character, and who are reported to have spoken a Shemitic tongue (Euseb. P cepv. ir. 9), a statement confirmed by the occurrence of other Shemitic names, such as Phoenicia and Cabilia, though the subsequent predominance of an Aryan population in these same districts is attested by the existing Lycian inscriptions: again in Caria, though the evidence arising out of the supposed identity of the names of the gods Osogo and Chrysaor with the Osuktss and Xwvrdpl of Synchroniathion is called in question (Renan, H. G. i. 40); and, lastly, in Lydia, where the descendants of Luš are located by many authorities, and where the prevalence of a Shemitic language is asserted by scholars of the highest standing, among whom we may specify Bunsen and Lassen, in spite of tokens of the contemporaneous presence of the Aryan element, as attested in the name Sirios, and in spite also of the historical notices of the Biblical ecclesiastic (Herod. i. 171). Whether the Shemitics ever occupied any portion of the plateau of Asia Minor may be doubted. In the opinion of the ancients the later occupants of Cappadocia were Syrians, distinguished from the mass of their race by a lighter hue, and hence termed Leucovolos (Strab. xii. p. 542); but this statement is traversed by the evidence of Aramassian affinities in the names of the kings and deities, as well as by the Persian character of the religion (Strab. xv. p. 733). If therefore the Shemitics ever occupied this district, they must soon have been brought under the dominion of Aryan conquerors (Diod. Sic. p. 44). The Phenicians were ubiquitous on the islands and shores of the Mediterranean: in Cyprus, where they have left tokens of their presence at Citium and other places; in Crete; in Malta, where they were the original settlers (Diod. Sic. v. 12); on the mainland of Greece, where their presence is attested by the name Caldeans; in Samos, Same, and Samothrace, which bear Shemitic names; in Ios and Tenedos, once known by the name of Phenice; in Sicily, where Panormus, Motya, and Segesta were occupied by Shemitic settlements; in Sardeia (Diod. Sic. v. 35); on the eastern and southern coasts of Spain; and on the north coast of Africa, which was lined with Phenecian colonies from the Syrtis Major to the Pillars of Hercules. They must also have penetrate deeply into the interior, to judge from Strabo's statement of the destruction of three hundred towns by the Pharnamites and Nigritians (Strab. xvii. p. 826). Still in none of the countries we have mentioned did they supplant the original population: they were conquerors and settlers, but no more than this. The bulk of the North African languages, both in ancient and modern times, though not Shemitic in the proper sense of the term, so far resemble

---

a The total amount of the Shemitic population at present is computed to be only 30 millions, while the Indo-European is computed at 400 millions (Renan, i. 43, note).

b Eastward of the Tigre a Shemitic population has been supposed to exist in Afganistan, where the Pashto language has been regarded as bearing a Shemitic character. A theory consequently has been started that the people speaking it represent the ten tribes of Israel (Forster's Princip. Lenin, iii. 241). We believe the supposed Shemitic resemblance to be unfounded, and that the Pashto language holds an intermediate place between the Iranian and Indian classes, with the latter of which it possesses in common the lingual or cerebral sounds (Bedeutsch. d. Z. E. p 35).
that type as to have obtained the title of sub-
Shemitic. In the north the old Numidian language
appears, from the prevalence of the syllable M is in
the name Binsidh, etc., to be allied to the modern
Berber; and the same conclusion has been drawn
with regard to the Libyan tongue. The Berber,
in turn, together with the Tamurick and the great
body of the North African dialects, is closely allied
to the Coptic of Egypt, and therefore falls under
the title of Hamitic, or, according to the more usual
nomenclature, sub-Shemitic (Renan, H. G. i. 291, 292).
Southwards of Egypt the Semitie type is
reproduced in the majority of the Abyssinian lan-
guages, particularly in the Gheez, and in a less
marked degree in the Abbara, the Soho, and the
Galla; and Semitic influence may be traced along
the whole east coast of Africa as far as Mosambique
(Renan, i. 395-349). As to the languages of the
interior and of the south there appears to be a con-
flict of opinions, the writer from whom we have
just quoted denying any trace of resemblance to
the Semitic type, while Dr. Latham asserts very
confidently that connecting links exist between the
sub-Shemitic languages of the north, the Negro
languages in the centre, and the Caffio languages
of the south, even the Monaka language is not so isolated as has been generally supposed
(Men and his Migr., pp. 134-148). Bunsen sup-
ports this view as far as the languages north of the
equator are concerned, but regards the southern as
rather approximating to the Tunisian type (Phil.
of Hist. i. 178, ii. 29). It is impossible as yet to
form a decided opinion on this large subject.
A question of considerable interest remains yet
to be noticed, namely, whether we can trace the
Shemitie family back to its original cradle. In
the case of the Indo-European family this can be done
with a high degree of probability; and if an original
unity existed between these stocks, the domicile of
the one would necessarily be that of the other.
A certain community of ideas and traditions favors
this assumption, and possibly the frequent allusions
to the east in the early chapters of Genesis may contain a reminiscence of the direction in which
the principal abode by (Renan, H. G. i. 476). The
position of this abode we shall describe presently.
The Indo-European family of languages, as at
present constituted, consists of the following nine
classes: Indian, Iranian, Celtic, Itailian, Albanian,
Greek, Teutonic, Libyan and Saharan. Geo-
graphically, these classes may be grouped together
in two divisions—Eastern and Western—the former
comprising the two first, the latter the seven re-
main ing classes. Schleicher divides what we have
termed the Western into two—the southwest
European, and the north European—in the former
of which he places the Greek, Albanian, Itailian,
and Celtic, in the latter the Sa
tonian, Libyan,
and Teutonic (Compend. i. 5). Prof. M. Miiller
combines the Sa
tonian and Libyan classes in the
Windic, thus reducing the number to eight. These
classes exhibit various degrees of affinity to
each other, which are described by Schleicher in the
following manner: The earliest deviation from the
common language of the family was effected by
the Tavonian-Teutonic branch. After another in-
terval a second bifurcation occurred, which separated
what we may term the Graeco-Italo-Celtic branch
from the Arvyan. The former held together for a
while, and then threw off the Greek (including
probably the Albanian), leaving the Celtic and
Italian still connected: the final division of the two
latter took place after another considerable interval.
The first-mentioned branch—the Tavonian-
Teutonic—remained intact for a period somewhat longer
than that which witnessed the second bifurcation
of the original stock, and then divided into the
Teutonic and Tavonian-Lithuanian, which latter
finally broke up into its two component elements.
The Arvyan branch similarly held together for a
lengthened period, and then bifurcated into the
Italian and Iranian. The conclusion Schleicher
draws from these linguistic affinities is that the
more easterly of the European nations, the Shan-
tonians and Tavtons, were the first to leave the
common home of the Indo-European race: that they
were followed by the Celts, Italians, and Greeks;
and that the Indian and Iranian branches were the
last to undertake their migrations. We feel unable
to accept this conclusion which appears to us to
be based on the assumption that the antiquity of a
language is to be measured by its approximation to
Sanskrit. Looking at the geographical position of
the representatives of the different language-
classes, we should infer that the most westerly were
the earliest immigrants into Europe, and therefore
probably the earliest emigrants from the praevalent
seat of the race; and we believe this to be con-
formed by linguistic proofs of the high antiquity of
the Celtic as compared with the other branches of
the Indo-European family (Bunsen, Phil. of
Hist. i. 168).

The original seat of the Indo-European race was
on the plateau of Central Asia, probably to the
northwest of the Indus and Phratry, ranges. The
Indian branch can be traced back to the slopes of
Himalaya by the geographical allusions in the Vedic
hymns (M. Miiller's Lect. p. 201): in confirmation
of which we may adduce the circumstance that the
only tree for which the Indians have an appellation
in common with the western nations, is one which
in India is found only on the southern slope of that
range (Vatt. Phil. Forsch. i. 110). The westerly
progress of the Indian tribes is a matter of history,
and though we cannot trace this progress back to its
fountain-head, the locality above mentioned best
accords with the traditional belief of the Asiatic
Arvans, and with the physical and geographical
requirements of the case (Renan, H. G. i. 481).
The routes by which the various western branches
reached their respective localities, can only be con-
templated. We may suppose them to have success-
ively crossed the plateau of Iran until they reached
Armenia, whence they might follow either a north-
therly course across Caucasas, and by the shore of the
Black Sea, or a direct westerly one along the plateau
of Asia Minor, which seems declined by nature to be
the bridge between the two continents of Europe

a We use the qualifying expression "at present," partly because it is not improbable that new classes will be separated for, as far as the author is aware, not only has the division of the languages into class has been
affected by the discovery of the various new languages to which the title of "Asborne" was originally assigned, but the class of Sa
tonian is of one, and not of single languages. More-
over, in common usage, the term "class" does not necessarily carry the idea of a class.

b Professor M. Miiller adopts the termination -ic, in order to show that classes are intended. This appears unnecessary, and it is supposed that the termination is one of classes, and not ot single languages. More-
over, in common usage, the term "class" does not necessarily carry the idea of a class.
TONGUES, CONFUSION OF

and Asia. A third route has been surmised for a portion of the Celtic stock, namely, along the north coast of Africa, and across the Straits of Gibraltar into Spain (Bunsen, Ph. of H. l. 148), but we have little confirmation of this opinion beyond the fact of the early presence of the Celts in that peninsula, which is certainly difficult to account for.

The era of the several migrations are again very much a matter of conjecture. The original movements belong for the most part to the ante-historic age, and we can only guess at the period at which we first encounter the several nations. That the Indian Aryans had reached the mouth of the Indus at all events before 1000 B.C., appears from the Sanskrit names of the articles which Solomon imported from that country [India]. The presence of Aryans on the Scythian frontier is as old as the composition of the Moscou table; and, according to some authorities, is proved by the names of the confederate kings in the age of Abraham (Gen. xiv. 1; Renan, H. G. i. 61). The Aryan Modes are mentioned in the Assyrian annals about 900 B.C. The Greeks were settled on the peninsula named after them, as well as on the islands of the Jaspican, long before the dawn of historic times. The name of Rhynes, or Sarmatians, was insinuated in the case of the Brahms of the north. Not only this, but the Indian class of languages possesses a peculiarity of sound (the lingual or cerebral consonants) which is supposed to have been derived from this population, and to betoken a fusion of the competitors and the conquerors (Schréleher, Conspenol. i. 141). The languages of this early population are classed as Turanian (M. Müller, Lenz. p. 269). We are unable to find decided traces of Turanians on the plateau of Iran. The Saecs, of whom we have already spoken, were Sarmatians, and so were the Parthians, both by reputed descent (Justin, xii. 1) and by habits of life (Strab. xi. 513); but we cannot positively assert that they were Turanians, inasmuch as the name, which has been thrown out recently, was not the case of the Slokots, to Indo-Europeans. In the Caucasian district the Bernians and others may have been Turanians in early as in later times; but it is difficult to unravel the entanglement of races and languages in that district. In Europe there exists in the present day an undoubted Turanian population eastward of the Baltic, namely, the Finns, who have been located there certainly since the time of Tacitus (Germ. 46), and who probably at an earlier period had spread more to the southwards, but had been gradually thrust back by the advance of the Teutonic and Slavonic nations (Dietenbach, O. E. p. 269). There exists again in the south a population whose language (the Basque, or, as it is entitled in its own land, the Esquiar) presents numerous points of affinity to the Finnish in grammar, though its vocabulary is wholly distinct. We cannot consider the Turanian character of this language as fully established, and we are therefore unable to divine the ethnic affinities of the early Bernians, who are generally regarded as the progenitors of the Basques. We have already adverted to the view that the Finns and the Basques in the south are the surviving monuments of a Turanian population which overspread the whole of Europe before the arrival of the Indo-European. This is a mere theory which can neither be proved nor disproved. It would be difficult, if not impossible, to assign to the various subdivisions of the Indo-European stock their respective areas, or, where admixture has taken place, their relative proportions. Language and race are, as already observed, by no means coextensive. The Celtic race, for instance, which occupied Gaul, Northern Italy, large portions of Spain and Germany, and even penetrated across the Hellespont into Asia Minor, where it has been located, have been named the provinces of the former and the latter now represented linguistically by the insignificant populations among whom the Welsh and the Gaelic or Irish languages retain a lingering existence. The Italian race, on the other hand, which must have been well-nigh annihilated by or absorbed in the

* We must be understood as speaking of linguistic and ethnological proofs furnished by populations existing within historical times, without reference to the geological questions regarding to the antiquity of men.
overwhelming masses of the northern hordes, has imposed its language outside the bounds of Italy over the peninsulas of Spain, France, and Wallachia. But, while the races have so intermingled as in many instances to lose all trace of their original individuality, the broad fact of their descent from one or other of the branches of the Indo-European family remains unaffected. It is, indeed, impossible to affiliate all the nations whose names appear on the roll of history, to the existing divisions of that family. In consequence of the absence or the obscure condition of the morphological criteria, and, for instance, shall we place the languages of Asia Minor and the adjacent districts? The Phrygian approximates perhaps to the Greek, and yet it differs from it materially both in form and vocabulary (Rawlinson's Herod. i. 606); still more is this the case with the Lycaean, which appears to possess a vocabulary wholly distinct from its kindred languages (ibid. i. 618, 639-679). The Armenian is ranged under the Iranian division; yet this, as well as the language of the Caucasian Osset, whose indigenous name of Iv or Irmen seems to indicate for them the same relationship, are so distinctive in their features as to render the connection dubious. The languages prevalent in the mountainous districts, such as the Avar, the Abchas, and the Circassian (Hedenbach, O. E. p. 51.), passing toward the westward we encounter the Thracians, reputed by Herodotus (v. 3) the most powerful nation in the world, the Indians excepted; yet but one word of their language (briga = 'town') has survived, and all historical traces of the people have been obliterated. It is true that they are represented in later times by the Gete and the Daces, in turn connected with the Sarmatian branch. The remains of the Seythian language are sufficient to establish the Indo-European affinities of that nation (Rawlinson's Herod. iii. 266-295), but insufficient to assign to it a definite place in the family. The Seythians, as well as most of the nomad tribes associated with them, are lost to the eye of the ethnologist, having been either absorbed into other nationalities or swept away by the ravages of war. The Sarmatian can be traced down to the Izygys of Hungary and Podolicia, in which latter district they survived until the 18th century of our era (ibid. of Geog. lii. 8), and then they also vanished. The Albanian language presents a problem of a different kind; materials for research are not wanting in this case, but no definite conclusions have as yet been drawn from them: the people who use this tongue, the Skëphtarë as they call themselves, are generally regarded as the representatives of the old Illyrians, who, in turn, are said to have been closely connected with the Thracians (Strab. vii. 315; Justin. xi. 1.), and the name Pandi being found both in Illyria and on the shores of the Hellespont: it is not, therefore, improbable that the Albanian may contain whatever vestiges of the old Thracian tongue still survive (Hedenbach, O. E. p. 63.). In the Italian peninsula the Etruscan tongue remains as great an enigma as ever: its Indo-European character is supposed to be established, together with the probability of its being a mixed language (Husenien's Ph. of H. i. 85-88). The result of researches into the Umbrian language, as represented in the Eugubine tablets, the earliest of which date from about 490 B.C.; into the Sabellian, as represented in the tablets of Tellae and Antium; and into the Ocean, of which the remains are numerous, have decided their position as members of the Italic class (ibid. i. 90-94). The space cannot be allotted to the Messapian or Iapygian language, which stands apart from all neighboring dialects. Its Indo-European character is affirmed, but no ethno-linguistic conclusion can as yet be drawn from the scanty information afforded us (ib. i. 94). Lastly, within the Celtie area there are ethnological problems which we cannot pretend to solve. The Ligurians, for instance, present one of these problems: were they really a Celtic migration than the Celts? Their name has been referred to a Welsh original, but on this no great reliance can be placed, as it would be in this case a local (ze = continent) and not an ethnical title, and might have been imposed on them by the Celts. They evidently hold a posterior place to the Iberians, inasmuch as they are said to have driven a section of this people across the Alps into Italy. That they were distinct from the Celts is asserted by Strabo (ii. 128), but the distinction may have been no greater than exists between the British and the Celtic branches of that race. The admixture of the Celts and Iberians in the Spanish peninsula is again somewhat intricate question, which Dr. Latham attempts to explain on the ground that there is a pure race, the Kabyle (Elton. of Eur. p. 55). That such questions as these should arise on a subject which carries us back to times of hoar antiquity, forms no ground for doing the general conclusion that we can account ethnologically for the population of the European continent.

The Cimbri and Indo-European families cover all but an insignificant portion of the earth's surface: the large areas of northern and eastern Asia, the numerous groups of islands that line its coast and stretch the Pacific in the direction of South America, and again the immense continent of America itself, stretching well-nigh from pole to pole, remain to be accounted for. Historical aid is almost wholly denied to the ethnologist in his researches in these quarters; physiology and language are his only guides. It can hardly, therefore, be matter of surprise, if we are unable to obtain certain, or even a reasonable degree of probability, on this part of our subject. Much has been done; but far more remains to be done before the data for forming a conclusive opinion can be obtained. In Asia, the languages fall into two large classes—the agglutinative, and the agglutinative. The former are represented ethnologically by the Chinese, the latter by the various nations classed together by Prof. M. Müller under the common head of Turanian. It is unnecessary for us to discuss the correctness of his view in regarding these as representing two distinct stocks: the one aboriginal, the other foreign. Whether we accept or reject his theory, the fact of a gradation of linguistic types and of connecting links between the various branches remains unaffected, and for our present purpose the question is of comparatively little moment. The amissyllabic type apparently betokens the earliest movement from the common home of the human race, and we should therefore assign a chronological priority to the settlement of the Chinese in the east and southeast of the continent. The agglutinative languages fall geographically into two divisions, a northern and southern. The northern consists of a well-defined group, or family, designated by German ethnologists the Ural-Altaic...
it consists of the following five branches: (1.) The Tunisian, between lake Baikal, and the Tungusia (2.) The Mongolian, which prevails over the Great Desert of Gobi, and among the Kalmucks, wherever their nomad habits lead them on the steppes either of Asia or Europe, in the latter of which they are found about the lower course of the Volga. (3.) The Turkish, covering an immense area from the Mediterranean in the southwest to the Pacific Ocean in the north; it is spoken by the Osmanli, who form the governing class in Turkey; by the Nogai, between the Caspian and the Sea of Azov; and by various Caucasian tribes. (4.) The Samoiedic, on the coast of the Arctic Ocean, between the White Sea in the west and the river Anabar in the east. (5.) The Finnish, which is spoken by the Fins and Lapps; by the inhabitants of Esthonia and Livonia to the south of the Gulf of Finland; by various tribes about the Volga (the Tcheremenski and Mordvinians); and the Kama (the Votikes and Pernians); and, lastly, by the Magyars of Hungary. The southern branch is subdivided into the following four classes: (1.) The Tartarian, of the south of Hindostan. (2.) The Sino-Turkic, the northern district (Nepali and Bhotani), and the Hottentote languages of the Brahmaputra. (3.) The Tai, in Siam, Laos, Anam, and Pegu. (4.) The Malay, of the Malay peninsula, and the adjacent islands; the latter being the original settlement of the Malay race, whence they spread in comparatively modern times to the mainlands.

The early movements of the races representing these several divisions can only be divined by linguistic tokens. Prof. M. Müller assigns to the northern tribes the following chronological order: Tunisian, Mongolian, Turkish, and Finnish: and to the southern division the following: Tai, Malay, Bhotiya, and Tartarian (Ph. of H. ii. 481). Geographically it appears more likely that the Malay preceded the Tai, inasmuch as they occupied a more southerly district. The later movements of the European branches of the northern division can be traced historically. The Turkish race commenced their westerly migration from the neighborhood of the Altai range in the 1st century of our era. The Tartarian and the Tungusia, and the Volga: in the 11th and 12th the Turco-Mongols took possession of their present quarters south of Caucasus: in the 13th the Osmanli made their first appearance in Western Asia; about the middle of the 14th they crossed from Asia Minor into Europe; and in the middle of the 15th they had established themselves at Constantinople. The Turkish race is supposed to have been originally settled about the Urals, and thence to have migrated westward to the shores of the Baltic, which they had reached at a period anterior to the Christian era; in the 7th century a branch pressed southwards to the Danube, and founded the kingdom of Bulgaria, where, however, they have long since been subjugated to European tribes, who are the early representatives of the Hungarian Magyars, approached Europe from Asia in the 5th and settled in Hungary in the 9th century of our era. The central point from which the various branches of the Turanian family radiated would appear to be about lake Baikal. With regard to the ethnology of Oceania and America we can say little. The languages of the former were generally supposed to be connected with the Malay class (Bausen, Ph. of H. ii. 114), but the relations, both linguistic and ethnological, existing between the Malay and the black, or Negro, population, which is found on many of the groups of islands, are not well defined. The approximation in language is far greater than in physiology (Latham's Essays, pp. 213, 218; Garnett's Essays, p. 310), and in certain cases amounts to identity (Kennedy's Essays, p. 85); but the whole subject is at present unsolved in obscurity. The polymorphous races of North America are regarded as emanating from the Mongol stock (Bausen, Ph. of H. ii. 111), and a close affinity is said to exist between the North American and the Kamtschadal and Korean languages on the opposite coast of Asia (Latham, Mon and his Mige, p. 185). The conclusion drawn from this would be that the population of America entered by way of Behring's Straits. Other theories have, however, been broached on this subject. It has been conjectured that the chain of islands which stretches across the Pacific may have conducted a Malay population to South America; and, again, an African origin has been claimed for the Caribs of Central America (Kennedy's Essays, pp. 100-123).

In conclusion, we may safely assert that the tendency of all ethnological and linguistic research is to discover the elements of unity amidst the most striking external varieties. Already the myriads of the human race are massed together into a few large groups. Whether it will ever be possible to go beyond this and to show the historical unity of these groups, is more than we can undertake to say. But we entertain the firm persuasion that in their broad results these sciences will yield an increasing testimony to the truth of the Bible.

W. L. B.

APPENDIX. — TOWER OF BABEL.

The Tower of Babel forms the subject of a previous article [BAVIEL, TOWER OF]; but in consequence of the importance of the subject, in which the tower is mentioned in connection with the Confusion of Tongues, the eminent cuneiform scholar Dr. Oppert has kindly sent the following addition to the present article.

The history of the confusion of languages was preserved at Babylon, as we learn by the testimonies of classical and Biblical authors (Homer, Hesiod, Herodot, Estryn, Hist. Grec. ed. Dibot vol. iv.). Only the Chaldeans themselves did not admit the
Hebrew etymology of the name of their metropolis: they derived it from Babel, the door of E} (Kronos or Saturnus), whom Diodorus Siculus states to have been the planet most adored by the Babylonians.

The Talmudists say that the true site of the Tower of Babel was at Borsippa, the Greek Borsip, or Borsippa, the Babylonian name of this locality is Borsippa or Borsippa, which we explain by Tower of Tongues. The French expedition to Mesopotamia found at the Borsippa a clay cake, dated from Borsippa the 30th day of the 6th month of the 16th year of Nabonid, and the discovery confirmed the hypothesis of several travellers, who had supposed the Borsippa to contain the remains of Borsippa.

Borsippa (the Tongue Tower) was formerly a suburb of Babylon, when the old temple was merely restricted to the northern ruins, before the great exultation or the city, according to ancient writers, was the greatest that the sun ever warmed with its beams. Nebuchadnezzar included it in the great circumvallation of 480 stades, but it stood out of the second wall of 360 stades; and when the exterior wall was destroyed by Durian, Borsippa became independent of Babylon. The historical writers respecting Alexander, where it was a great sanctuary dedicated to Apollo and Artemis (Strab. xvi. 739; Stephens Byz. 

The temple consisted of a large substructure, a state (600 Babylonian feet) in breadth, and 75 feet in height, over which were built seven other stages of 25 feet each. Nebuchadnezzar gives notice of this building in the Borsippa inscription. He named it the temple of the Seven Lights of the Earth (a sky, the planets. The top was the temple of Nebo, and in the substructure (tayer) was a temple consecrated to the god Sin, god of the month. This building, mentioned in the East India House inscription (col. iv. l. 61), is spoken of by Herodotus (i. 181, &c.).

Here follows the Borsippa inscription: "Nabuchodonosor, king of Babylon, shepherd of peoples, who afflicts the inmutable affection of Merodach, the mighty ruler-exalting Neb; the saviour, the wise man who lends his ears to the orders of the highest god; the lieutenant without reproach, the roeper of the Pyramid and the Tower, eldest son of Nabopulassar, king of Babylon.

"We say: Merodach, the great master, has created me; he has imposed on me to reconstruct this building. Nebu, the guardian over the legs of the heaven and the earth, has charged my hands with the sceptre of justice.

"The Pyramid is the temple of the heaven and the earth, the seat of Merodach, the chief of the gods: the place of the oracles, the spot of his rest, I have adorned in the form of a cupula, with shining gold.

"The Tower, the eternal house, which I founded and built, I have completed its magnificence with silver, gold, other metals, stone, channelled bricks, sir, and pine.

"The first, which is the house of the earth's base, the most ancient monument of Babylon, I built and finished it: I have highly exalted its head with bricks covered with copper."

"We say for the other, that is, this edifice, the house of the Seven Lights of the Earth, the most ancient monument of Borsippa: A former king built it (200 years back 42 ages), but he did not complete its head. Since a remote time people had abandoned it, without order expressing their words. Since that time, the earthquake and the thunder had dispersed its sun-dried clay: the bricks of the casing had been split, and the earth of the interior had been scattered over the house. Merodach, the great lord, excelled my mind to repair this building; I did not change the site, nor did I take away the foundation-stone. In a fortunate month, an auspicious day, I undertook to build porticoes around the crude brick masses, and the casing of burnt bricks I adapted the circuits. I put the inscription of my name in the Kitho of the porticoes."

"I set my hand to finish it, and to exalt its head. As it had been in former times, so I founded; I made it: as it had been in ancient days, so I exalted its summit.

"Nebo, son of himself, ruler who exalts Merodach, be propitious to my works to maintain my authority. Grant me a life until the remotest time, a sevenfold progeny, the stability of my throne, the victory of my sword, the pacification of foes, the triumph over the hands! In the columns of thy eternal table, that fixes the destinies of the heaven and of the earth, bless the course of my days, inscribe the fecundity of my race.

"Imitate, O Merodach, king of heaven and earth, the father who beget thee: bless my buildings, strengthen my authority. May Nebuchadnezzar, the king-repairer, remain before thy face!"

This allusion to the Tower of the Tongues is the only one that has as yet been discovered in the cuneiform inscriptions. The story is a Sennacherib and not only a Hebrew one, and we have no reason whatever to doubt of the existence of the same story at Babylon.

The ruins of the building elevated on the spot where the story placed the tower of the dispersion of tongues, have therefore a more modern origin, but interest nevertheless by their tremendous appearance. Oppert.

TONGUES, GIFT OF

TONGUES, GIFT OF.—1. The history of a word which has been used to express some special, wonderful fact in the spiritual life of men is itself full of interest. It may be a necessary preparation for the study of the fact which the word represents. Παρασιμία, or γλώσσα, the word employed throughout the N. T. for the gift now under consideration, is used — (1) for the bodily organ of speech; (2) for a foreign word, imported and half naturalized in Greek (Acts ἄνθρωπος, ii. 2, § 14), a meaning which the words “gloss” and “glossary” preserve for us; (3) in Hellenistic Greek, after the pattern of the corresponding Hebrew word (וּלְשָׁנָה), for “speech” or “language” (Gen. x. 5; Dan. i. 4, &c.).

Each of these meanings might be the starting-point for the application of the word to the gift of tongues, and such accordingly has found those who have maintained that it is so. (A.) Ellicott and Bardill (cited by Bleek, Stow. u. Krit. 1824, p. 89.), and to some extent Bunsen (Hippolytus, i. 9), starting from the first, see in the so-called gift an inarticulate utterance, the cry as of a brute creature, in which the tongue moves while the lips refuse their office in making the sounds definite and distinct. (B.) Bleek himself (in supr. p. 33) adopts the second meaning, and gives an interesting collection of passages to prove that it was, in the time of the N. T., the received sense. He infers from this that to speak in tongues was to use unskillful, poetic language—that the speakers were in a high-strung excitement which showed itself in mystic figurative terms. In this view he has been particularly assisted by Ernst (Opruce, Thelos; see Morning Hetch, iv. 101) and Herder (Die Gibe der Sprache, pp. 47, 70), the latter of whom extends the meaning to special mystical interpretations of the O. T. (C.) The received traditional view starts from the third meaning, and sees in the gift of tongues a distinctly spiritual power.

We have to see which of these views has best to commend it. (A.), it is believed, does not meet the condition of answering any of the facts of the N. T., and errs in ignoring the more prominent meaning of the word in later Greek. (B.), though rare in some of its conclusions, and able, as far as they are concerned, to support itself by the authority of its own and of Christian (comp. Stow. u. Krit. ii. 8,”linguam esse quidquam loquatur obscuram et mysticam significationem”), appears faulty, as falling (1) to recognize the fact that the sense of the word in the N. T. was more likely to be determined by that which it bore in the LXX, than by its meaning in Greek historians or rhetoricians, and (2) to meet the phenomena of Acts ii. (C.) therefore commends itself, as in this respect, more clearly from the right point, and likely to lead us to the truth (comp. Olschewski, Stow. u. Krit. 1829, p. 538).a

II. The chief passages from which we have to draw our conclusion as to the nature and purpose of the gift in question, are—(1.) Mark xvi. 17; (2.) Acts ii. 1-13, x. 46, xiv. 8; (3.) Col. xiv. xiv. It deserves notice that the chronological sequence of these passages, as determined by the date of their composition, is probably just the opposite of that of the periods to which they severally refer. The first group is later than the second, the second than the third. It will be expedient, however, whatever modifications this fact may suggest afterward, to deal with the passages in their commonly received order.

III. The promise of a new power coming from the Divine Spirit, giving not only comfort and insight into truth, but fresh powers of utterance of some kind, is found in our Lord's teaching. The disciples are to take no thought what they shall speak for the Spirit of their Father shall speak in them (Matt. x. 19-20; Mark xiii. 11). The lips of Galilean peasants are to speak freely and boldly before kings. The only condition is that they are "not to premeditate"—to yield themselves altogether to the power that works on them. Thus they shall have given to them "a mouth and wisdom" which no adversary shall be able to "gain say or resist." In Mark xvi. 17 we have a more definite term employed: "They shall speak with new tongues" (καὶ ἐπιστρέφων). Starting, as above, from (C.), it can hardly be questioned that the obvious meaning of the promise is that the disciples should speak in new tongues which they had not learned as other men learn them. It must be remembered, however, that the critical questions connected with Mark xvi. 9-20 (comp. Meyer Tischendorf, Alford, in loc.) make it doubtful whether we have here the language of the Evangelist—doubtful therefore whether we have the quasi-"eppyphon" of the Lord himself, or the least approximation of some early transcriber to the contents of the section, no longer extant, with which the Gospel had originally ended. In this case it becomes possible that the later phenomena, or later thoughts respecting them, may have determined the language in which the promise is recorded. On either hypothesis, the promise determines nothing as to the nature of the gift, or the purpose for which it was to be employed. It was to be "a sign." It was not to belong to a chosen few only—to Apostles and Evangelists. It was to "follow them that believed"—to be among the fruits of the living intense faith which raised men above the common level of their lives, and brought them within the kingdom of God.

IV. The date of the day of Pentecost is, in its broad features, familiar enough to us. The days since the Ascension had been spent as in a ceaseless ecstasy of worship (Luke xxiv. 53). The 120 disciples were gathered together, waiting with eager expectation for the coming of power from on high—of the Spirit that was to give them new gifts of utterance. The day of Pentecost was come, which they, like all other Israelites, looked on as the witness of the revelation of the Divine Will given on Sinai. Suddenly there swept over them "the sound as of a rushing mighty wind," such as Ezekiel had heard in the visions of God by Chelbor (ii. xiii. 2) at all times the recognized symbol of a spiritual creative power (comp. Ez. xxxiii. 1-14; Gen. i. 2; 1 K. xix. 11; 2 Chr. v. 14; Ps. civ. 3, 4). With this there was another sign associated even more closely with their thoughts of the day of Pentecost. There appeared unto them "tongues like as of fire." Of old the brightness had been seen gleaming through the "thick cloud" (Ex. xix. 16), or "enfolding" the Divine glory (Ez. i. 4). Now the tongues were distributed (σπάφoς τῆς ἀνάξιας). Lighting upon each of

a Several scholars, we know, do not agree with us. We gave our reasons five years ago, and our antagonists have not yet refuted them.
TONGUES, GIFT OF

TONGUES, GIFT OF them. The outward symbol was accompanied by an inward change. They were filled with the Holy Spirit, as the Law and their Lord had been (Luke i. 15, iv. 1), though they themselves had as yet no experience of a like kind. They began to speak with other tongues as the Spirit gave them utterance. The narrative that follows leaves hardly any room for doubt that the writer meant to convey the impression that the disciples were heard to speak in languages of which they had no colloquial knowledge previously. The direct statement, "They heard them speaking, each man in his own dialect," the long list of nations, the words put into the lips of the hearers—these can scarcely be reconciled with the theories of Bleek, Herder, and Hunsen, without a wilful distortion of the evidence. What view are we to take of a phenomenon so marvelous and exceptional? What views have men actually taken? (1.) The prevalent belief of the Church has been, that in the Pentecostal gift the disciples received a supernatural knowledge of all such languages as they needed for their work as Evangelists. The knowledge was permanent, and could be used at their own will, as though it had been acquired in the common course of things. With this they went forth to preach to the nations. Differences of language were found as special points. Augustine thought that each disciple spoke in all languages (De Verb. Apost. chxxvi. 3); Chrysostom that each had a special language assigned to him, and that this was the indication of the country which he was called to evangelize (Hom. in Act. ii.). Some thought that the number of languages spoken was 70 or 75, after the number of the sons of Noah (Gen. x.), or the sons of Jacob (Gen. xlv.), or 120, after that of the disciples (comp. Baronius, Annal. i. 187). Most were agreed in seeing in the Pentecostal gift the antithesis to the confusion of tongues at Babel, the witness of a restored unity. "Penna linguarum diversitatem homines, dominus linguarum dispersias in munus populum colligit" (Grolius, in loc.).

Wholly different as this belief has been, it must be remembered that it goes beyond the data with which the N. T. supplies us. Each instance of the gift recorded in the Acts connects it, not with the work of teaching, but with that of praise and adoration—not with the normal order of men's lives, but with exceptional epochs in them. It came and went as the Spirit gave men the power of speaking in an other tongue— in this respect analogous to the other gift of prophecy with which it was so often associated (Acts ii. 16, 17, xix. 6)— and was possessed by them as a thing to be used this way or that, according as they chose. The speech of St. Peter which follows, like most of his speeches addressed to a Jerusalem audience, was spoken apparently in Aramaic. When St. Paul, who "spoke with tongues more than all," was at Lystra, there is no mention made of his using the language of Lyconia. It is almost implied that he did not understand it (Acts xiv. 11). Not one word in the discussion of spiritual gifts in 1 Cor. xii.—xiv. implies that the gift was used for this purpose. It had been, the Apostles would surely have told those who possessed it to go and preach to the only living nations of the heathen world, instead of disturbing the church by what, on this hypothesis, would have been a needless and offensive ostension (comp. Stanley, Corinithians, p. 201, 2d ed.). Without laying much stress on the tradition that St. Peter was followed in his work by Mark as an interpreter (παραπροφΗτης) (Papias, in Euscb. H. E. iii. 30), that even St. Paul was accompanied by Titus in the same character—quia non potuit divinorum sacramentum majestatem digno eucharistiae sermone explicare (Hieron, quoted by Euscb. in 2 Cor. iii. 1)—they must at least be excused for considering that the act nearest to the phenomenon did not take the same view of them as these have done who lived at a greater distance. The testimony of Irenaeus (Adv. Haer. vi. 6), sometimes urged in support of the common-view, in reality decides nothing, and, as far as it goes, tends against it (infra). Nor, it may be added, within the limits assigned by the presence of God to the working of the Apostolic Church, was such a gift necessary. Aramaic, Greek, Latin, the three languages of the inscription on the cross, were media of intercourse throughout the empire. Greek alone sufficed, as the N. T. shows us, for the Churches of the West, for Macedonia and Achaia, for Pontus, Asia, Phrygia. The conquests of Alexander and of Rome had made men digbytiter to an extent which has no parallel in history. (2.) Some interpreters, influenced in part by these facts, have seen their way to another solution of the difficulty by changing the character of the miracle. It lay not in any new power bestowed on the speakers, but in the impression produced on the hearers. Words which the Galilean disciples uttered in their own tongue were heard by those who listened as in their native speech. This view we had adopted by Gregory of Nyssa (De Spiri. Sanct.), discussed, but not accepted, by Gregory of

a The sign in this case had its starting-point in the traditional belief of Israelites. There had been it was said, tongues of fire on the original Pentecost (Schneckenburger, Ezecracy, p. 8, referring to Buxtorf, D. Spurg. and Philo, De Doctr.). The later Rabbis were not without their legends of a like "baptism of fire." Nicaenum ben Gorion and Judah ben Zaccai, men of great holiness and wisdom, went into an upper chamber to express the law, and the house began to be full of fire (Lightfoot, Hora... iii. 14); Schenkel, Hist. Rel. in Acts ii).

b It deserves notice that here also there are analogies in Jewish belief. Every word that went forth from the mouth of God on Sinai was said to have been dictated into the seventy languages of the sons of men (Wycliffe, Notes). There was also the "mode of the voice of God, was heard by every man in his own tongue (Schneckenburger, Briefer). So, as regards the power of speaking, there was a tradition that the great Rabbis of the Sanhedrin could speak all the seventy languages of the world.

c The first discussion whether the gift of tongues was bestowed "per sodum habitus" with which we are acquainted is found in Salmenius, De Ling. Hist. (quoted by Thilo, De Ling. Lingue, in Matthew's Theo... loc. 40), whose conclusion is in the negative. Even Calvin admits that it was not permanent (Comm. in loc.). Compare also Wesseln, in loc.; and Olshausen, Stat. u. Krit. 1829, p. 546.

d Dr. Stanley suggests to the Greek, as addressed to the Hellenistic Jews who were present in such large numbers (Eccurs. on Gift of Tongues, Corinithians, p. 290, 2d ed.) That St. Peter and the Apostles could speak a provincial Greek is probable enough; but in this instance the speech is addressed chiefly to the permanent at Jerusalem (Acts ii. 22, 23), and was likely, like that of St. Paul (Acts xvi. 40), to be spoken in their tongue. To most of the Hellenistic hearers this would be intelligible enough.
TONGUES. GIFT OF

Nathanael (Orat. xli.), and reproduced by Erasmus (in loc.). A modification of the same theory is presented by Schneckenburger (Biblurgia), and in part adopted by Olschanski (i. e.) and Neander (Philos. u. Leh. i. 15). The phenomenon of somnambulism, of the so-called mesmeric state, are referred to as analogous. The speaker was in support with his hearers; the latter shared the thoughts of the former, and so heard them, or seemed to hear them, in their own tongues.

There are, it is believed, weighty reasons against cold the earlier and later forms of this hypothesis. (1.) It is at variance with the distinct statement of Acts iv. 4, "They began to speak with other tongues." (2.) It at once multiplies the miracle, and degrades its character. Not the 120 disciples, but the whole multitude of many thousands, are in this case the subjects of it. The gift no longer connects itself with the work of the Divine Spirit, following on intense faith and earnest prayer, but is a mere physical prodigy wrought upon men who are altogether wanting in the conditions of capacity for such a supernatural power (Mark xvi. 17). (3.) It involves an element of falsehood. The miracle, on this view, was wrought to make men believe what was not actually the fact. (4.) It is altogether inapplicable to the phenomena of 1 Cor. xiv.

(5.) Critics of a negative school have, as might have been expected, given the easier course of rejecting the narrative altogether or in part. The statements do not come from an eye-witness, and may be an exaggerated report of what actually took place—a legend with or without a historical foundation. Those who recognize such a groundwork see in "the rushing mighty wind," the hurricane of the Spirit; in the "tongues like as of fire," the flashing of the electric fluid; in the "speaking with tongues," the loud screams of men, not all Galileans, but coming from many lands, overpowered by strong excitement, speaking in mystical, figurative, abrupt exclamations. They see in this the cry of the newborn Christ-embryo. (Bunsen, Hippolytus, i. 12; Pusey, in loc.; vi. the easier course of rejecting the narrative altogether or in part. From the position occupied by these writers, such a view was perhaps natural enough. It does not fall within the scope of this article to discuss in detail a theory which postulates the incredibility of any fact beyond the phenomenal laws of nature, and the falseness of St. Luke as a narrator.

(7.) What, then, are the facts actually brought before us? What inferences may be legitimately drawn from them?

(1.) The utterance of words by the disciples, in other languages than their own Galilean Aramaic, is, as has been said, distinctly asserted.

(2.) The words spoken appear to have been determined, not by the will of the speakers, but by the Spirit, which "gave them utterance." The outward tongue of flame was the symbol of the "burning fire" within, which, as in the case of the other prophets, could not be repressed (Jer. xx. 9).

(3.) The word used, ἀγαθοφωνεῖσθαι, not merely λαλεῖν, has in the LXX. a special though not an exclusive association with the oracular speech of true or false prophets, and appears to imply some peculiarity, perhaps musical, solemn intonation (comp. 1 Chr. xxv. 1; Ex. xiii. 9; Trumppr Gesammelte, l. v.; Grotius and Wetstein, in loc.: Andrews, Whitaker's Sermons, i.).

(4.) The "tongues" were used as an instrument, not of teaching but of praise. At first, indeed, there were none present to be taught. The disciples were by themselves, all sharing equally in the Spirit's gifts. When they were heard by others, it was as proclaiming the praise, the mighty and great works, of God (μακαρία). What they uttered was not a warning, or reproach, or exhortation, but a doxology (Stanley, i. e.: Raumgarten, Apostelgesch. § 3). When the work of teaching began, it was in the language of the Jews, and the utterance of tongues ceased.

(5.) Those who spoke them seemed to others to be under the influence of some strong excitement, as of a full of new wine. They were not as other men, or as they seemed to have been before; but it was recognized, indeed, that they were in a higher state, but it was one which, in some of its outward features, had a counterfeit likeness in the lower. When St. Paul uses—he in Eph. v. 18, 19 (παιδοποιεῖσθαι πνευματικά) the all but self-same word which St. Luke uses here to describe the state of the disciples (ἐκκλησίας πνευματικά άγιος), it is to contrast it with "they were drunk with wine," to associate it with "psalms and hymns, and spiritual songs."

(6.) Questions as to the mode of operation of a power above the common laws of bodily or mental life lead us to a region where our words should be "wary and few." There is the risk of seeming to reduce to the known order of nature that which is so far removed from it, and to subordinate all the narrative either altogether or in part. The statements do not come from an eye-witness, and may be an exaggerated report of what actually took place—a legend with or without a historical foundation. Those who recognize such a groundwork see in "the rushing mighty wind," the hurricane of the Spirit; in the "tongues like as of fire," the flashing of the electric fluid; in the "speaking with tongues," the loud screams of men, not all Galileans, but coming from many lands, overpowered by strong excitement, speaking in mystical, figurative, abrupt exclamations. They see in this the cry of the newborn Christ-embryo. (Bunsen, Hippolytus, i. 12; Pusey, in loc.; vi. the easier course of rejecting the narrative altogether or in part. From the position occupied by these writers, such a view was perhaps natural enough. It does not fall within the scope of this article to discuss in detail a theory which postulates the incredibility of any fact beyond the phenomenal laws of nature, and the falseness of St. Luke as a narrator.

(7.) The gift of tongues, the ecstatic burst of praise, is definitely asserted to be a fulfillment of the prediction of Joel ii. 28. The twice-repeated burden of that prediction is, "I will pour out my Spirit," and the effect on those who receive it is that "they shall prophesy." We may see therefore in this special gift that which is analogously, if not altogether, at least in part, the element of teaching is, as we have seen, excluded.

In 1 Cor. xiv. the gift of tongues and προφητεία (in this, the N. T. sense of the word) are placed in direct contrast. We are led, therefore, to look for that which answers to the Gift of Tongues in the other element of prophecy which is included in the O. T. use of the word; and this is found in the ecstatic praise, the burst of song, which appears under that name in the two histories of Saul (1 Sam. x. 5-13, xix. 20-24), and in the services of the Temple (1 Chr. xxxv. 3).

(8.) The other instances in the Acts offer essen-
TONGUES, GIFT OF

dullness of a formal ritual. The ecstasy of adoration which seemed to men madness, might be a refinement unappreciable to one who was weary with the subtle questionings of the intellect, to whom all familiar and intelligible words were fraught with recollections of controversial bitterness or the wanderings of doubt (comp. a passage of wonderful power as to this use of the gift by Edw. Irving, Morning Watch, v. p. 78).

The peculiar nature of the gift leads the Apostle into what appears, at first, a contradiction.

"Tongues are for a sign, not to believers, but to those who do not believe: yet the effect on unbelievers is not that of attracting but repelling. A meeting in which the gift of tongues was exercised without restraint, would seem to a heathen visitor, or even to the plain common-sense Christian (the ἴδιος, the man without a χάρισμα), to be an assembly of madmen. The history of the day of Pentecost may help us to explain the paradox. The tongues are a sign. They witness that the daily experience of men is not the limit of their spiritual powers. They disturb, startle, awaken, as τὸ ἔπαθλόντα (Chrysost. Hom. 56, in 1 Cor.); but they are not, and cannot be, the specialMarcionian demonstration of the understanding and the feelings. Therefore it is that, for those who believe already, prophecy is the greater gift. Five clear words spoken from the mind of one man to the mind and conscience of another, are better than ten thousand of these more startling and wonderful phenomena.

(5.) There remains the question whether these also were "tongues" in the sense of being languages, of which the speakers had little or no previous knowledge, or whether we are to admit here, though not in Acts ii., the theories which see in them only unusual forms of speech (Bleich), or miraculous ravings (Hansen), or all but inaudible whisperings (Wieseler, in Olshausen, in loc.). The question is not one for a dogmatic assertion, but it is believed that there is a preponderance of evidence leading us to look on the phenomena of Pentecost as representative. It must have been from them that the word τουγανεία derived its new and special meaning. The companion of St. Paul, and St. Paul himself, were likely to use the same kind of language: the same sense of the "gift that is not speech," as has been stated, leaves it hardly possible to look on the gift as that of a linguistic knowledge bestowed for the purpose of evangelizing.

(4.) The main characteristic of the "tongue" (now used, as it were, technically, without the epithet "new" or "other") is that it is unintelligible. The man speaks mysteries, prayers, blessings, greetings, in the tongue (Δυτικά) as equivalent to ἐν οἴνοις, 1 Cor. xiv. 16), but no one understands him (ἀκούει). He can hardly be said, indeed, to understand himself. The ἄγνωσα in him is acting without the cooperation of the νοησίς (1 Cor. xiv. 14). He speaks not to men, but to himself and to God (comp. Chrysost. Hom. 35, in 1 Cor.). In spite of this, however, the gift might and did constatve something of the building up of a man's own life (1 Cor. xiv. 4). This might be the only way in which some natures could be rescued out of the agony of a sensual life, or the
TONGUES, GIFT OF

recognition of the fatherhood of God (Rom. viii. 15; Gal. iv. 6). If we are to attach any definite meaning to the "tongues of angels" in 1 Cor. xiii. 1, it must be by connecting it with the words preserving human utterance, which St. Paul heard as in Paradise (2 Cor. xii. 1), and these again with the great Haliehah hymns of which we read in the Apocalypse (Rev. xix. 1-6; Stanley, L. E.; Ewald, Geschic. Isr. vi. 117). The retention of other words like Hesomas and Salloth in the worship of the Church, of the Greek formula of the Kyrie Eleison in that of the nations of the West, is an exemplification of the same feeling operating in other ways after the political power had ceased.

(6.) Here, also, as in Acts ii, we have to think of some peculiar intonation as frequently characterizing the exercise of the "tongues." The analogies which suggest themselves to St. Paul's mind are those of the pipe, the harp, the trumpet (1 Cor. xiv. 7, 8). In the case of one "singing in the spirit," (1 Cor. xiv. 15), but not with the understanding also, the strain of ecstatic melody must have been all that the listeners could perceive. To "sing and make melody" is specially characteristic of those who are filled with the Spirit (Eph. v. 19). Other forms of utterance less distinctly musical, yet not less mighty to "stir the minds of men, with power in the Holy Ghost," are also, "the form of a holy groanings" (Rom. viii. 15; Gal. iv. 6) and the "inarticulate groanings" (Rom. viii. 26) which are distinctly ascribed to the work of the Divine Spirit. To those who know the wonderful power of man's voice, as the organ of his spirit, the strange, unearthly charm which belongs to some of its less normal states, the influence even of individual words thus uttered, especially of words belonging to a language which is not that of our common life (comp. Hilary, Disc. Comn. in 1 Cor. xiv.) it will not seem strange that, even in the absence of a distinct impulse, and consciousness, the gift should take its place among the means by which a man "built up" his own life, and might contribute, if one were present to expand his utterances, to "edify" others also.

(7.) Connected with the "tongues," there was, as the words just used remind us, the corresponding power of interpretation. It might belong to any listener (1 Cor. xiv. 27). It might belong to the speaker himself when he returned to the ordinary level of conscious thought (1 Cor. xiv. 15). Its function, according to the view that has been here taken, must have been twofold. The interpreter had first to catch the foreign words, Aramaic or others, which had mingled more or less largely with what was uttered, and then to find a meaning and an order in what seemed at first to be without either, to follow the hottest flights and most intricate windings of the enraputured spirit, to trace the subtle associations which linked together words and thoughts that seemed at first to have no point of contact. Under the action of one with this insight the wild utterances of the "tongues" might become a treasure-house of deep truths. Sometimes, it would appear, not even this was possible. The power might be simply that of sound. As the pipe or harp, played bodily, the hand struck at random over the strings, but with no διαστορία, no musical interval, wanted the condition of distinguishable melody, so the "tongues," in their extremest form, passed beyond the limits of interpretation. There might be a strange audibility, or a strange sweetness as of "the tongues of angels," but what it meant was known only to God (1 Cor. xiv. 7-11).

VII. (1.) Traces of the gift are found, as has been said, in the epistles to the Romans, the Galatians, the Ephesians. From the Pastoral epistles, from those of St. Peter and St. John, they are altogether absent, and this is in itself significant. The life of the Apostle and of the Church has passed into a calmer, more normal state. Wide truths, abiding graces, these are what he himself lives in, and exhorts others to rest on, rather than exceptional καρποι of the Spirit, however marvelous. The "tongues" are already "ceasing" (1 Cor. xiii. 8), as a thing belonging to the past. Love, which even when "tongues" were mightiest, he had seemed to be above all gifts, has become more and more, all in all, to him.

(2.) It is probable, however, that the disappearance of the "tongues" was gradual. As it would have been impossible to draw the precise line of demarcation when the προφητεία of the Apostolic age passed into the διάκονοι πνευματικοί that remained permanent in the Church, so there must have been a time when "tongues" were still heard, though less frequently, and with less striking results. The testimony of Irenæus (adv. Haer. v. 6) that there were brethren in his time "who had prophetic gifts, and spoke through the Spirit in all kinds of tongues," though it does not prove, what it has sometimes been alleged to prove, the permanence of the gift in the individual, or its use in the work of evangelizing (Wordsworth on Acts ii), must be admitted as evidence of the existence of phenomena like those which we have met with in the church of Corinth. For the most part, however, the part which they had filled in the worship of the Church was supplied by the hymns and spiritual songs of the succeeding age. In the earliest of these, distinct in character from either the Hebrew psalms or the later hymns of the Church, marked by a strange mixture of mystic names, and half-coherent thoughts (such, e.g., as the hymn with which Clement of Alexandria ends his Παπάγωγος, and the earliest Sibylline verses), some have seen the influence of the ecstatic utterances in which the strong feelings of adoration had originally shown themselves (Nitzsch, Christ. Lehrb., ii. p. 268).

After this, within the Church we lose nearly all traces of them. The mention of them by Eusebius (Comm. in Ps. xlii.) is vague and uncertain. The tone in which Chrysostom speaks of them (Comm. in 1 Cor. xiv.) is that of one who feels the whole subject to be obscure, because there are no phenomena within his own experience at all answering to it. The whole tendency of the Church was to maintain reverence and order, and to repress all approaches to the ecstatic state. Those who yielded to it took refuge, as in the case of Tertullian (infir.), in sets outside the Church. Symptoms of what was then looked on as an evil, showed Anto.
TONGUES, GIFT OF

TONGUES, GIFT OF

themselves in the 4th century at Constantinople — wild, inarticulate cries, words passionate but of little meaning, almost convulsive gestures — and were met by Chrysostom with the sternest possible reproof (Hom. in Is. vi. 2, ed. Migne, vi. 100).

VIII. (1.) A wider question of deep interest presents itself. Can we find in the religious history of mankind any facts analogous to the manifestation of the "tongues:" recognizing, as we do, the great gap which separates the work of the Spirit on the day of Pentecost from all others, both in its origin and its fruits, there is, it is believed, no reason for rejecting the thought that there might be like phenomena standing to it in the relation of foreshadowings, approximations, counterparts. Other ἄρχονται of the Spirit, wisdom, prophecy, help, governments, law or have analogies, in special states of men's spiritual life, at other times and under other conditions, and so may these. The three characteristic phenomena are, as has been seen, (1) an ecstatic state of partial or entire unconsciousness, the human will being, as it were, swayed by a power above itself; (2) the utterance of words in tones startling and inexplicable, but not conveying any distinct meaning; (3) the use of languages which the speaker at other times was unable to converse in.

(2.) The history of the O. T. presents us with some instances in which the gift of prophecy has accompaniments of this nature. The word includes something more than the utterance of a distinct message of God. Saul and his messengers came under the power of the Spirit, and he, lying on the ground all night, stripped of his kingly armor, and joining in the wild chant of the company of prophets, or pouring out his own utterances to the sound of their music (1 Sam. xix. 24; comp. Stanley, L. c.).

(3.) We cannot exclude the false prophets and diviners of He-rod from the range of our inquiry. As they, in their work, dress, predictions, were counterparts of those who truly bore the name, so we may venture to trace in other things that which is needed, more or less closely, what had accompanied the exercise of the Divine gift. And here we have distinct records of strange, mysterious intonations. The ventriloquist wizards (οἱ ἐγγαστήμων, ὁ ἐν τῇ καλλία φωναίσας) "proph. and master" (Is. viii. 20). The "voice of one who has a familiar spirit," comes low out of the ground (Is. xix. 4). The false prophets simulate with their tongues (ἐκδιάλαται προφητείαι γλάσσης, L.X.) the low voice with which the true prophets announced that the Lord had spoken (der. xiiiil. 31; comp. Gesen. Thes. s. v. ἰ.κ.κ.κ.).

(4.) The quotation is from St. Paul (1 Cor. xiv. 21) from Is. xviii. 11. "With men of other tongues (ἐν ἐτρομογέλάσσοις) and other lips will I speak unto this people," has a significance of which we ought not to lose sight. The common interpretation sees in that passage only a declaration that those who had refused to listen to the prophets should be taught a sharp lesson by the lips of aliens as a People. The word, omitted in its place, deserves a separate notice. It is used in the A. V. of Is. viii. 19, x. 14, as the equivalent of ἄγγελον, "to chirp" or to cry." The Latin pipio, from which it comes, is, like the Hebrew, onomatopoetic, and is used to express the calling cry of young chickens or infant children

In this sense it is used in the first of these passages for the low cry of the false soothsayers, in the second for that of birds whom the hand of the spoiler snatches from their nests. In Is. xxxvii. 14, where the same word is used in the Hebrew, the A. V. gives, "like a trance or a swallow, so did I chatter."
Wilderness."

An Englishman, John Lay, became first a convert and then a leader. The convivial exotic utterances of the sect drew down the ridicule of Shaftesbury (On Eubolism). Calamy thought it necessary to enter the lists against their pretensions (Cursit against the New Prophets). They gained a distinguished proselyte in Sir R. Bulkeley, a pupil of Bishop Fell's, with no inconceivable learning who occupied in their proceedings a position which reminds us of that of Henry Drummond among the followers of Irving (Bulkeley's Defence of the Prophets). Here also there was a strong contagious excitement. Nicholson, the Baxter of the sect, published a confession that he had found himself unable to resist it (Epochs of the New Prophets), though he afterwards came to look upon his companions as "enthusiastic impostors." What is specially noticeable is, that the gift of tongues was claimed by them. Sir R. Bulkeley declares that he had heard Lay repeat long sentences in Latin, and another speak Hebrew, though, when not in the Spirit, they were quite incapable of it (Nor- rutite, p. 92). The characteristic thought of all the revelations was, that they were the true children of prophecy. In the vocabulary of discovery, and when the patient returns to his usual state, to the healthy equilibrium and interdependence of the life of sensation and of thought (Abercrombie, Intellectual Powers, pp. 140-143; Winslow, Obseure Diseases of the Brain, pp. 357, 399, 574; Watson, Principles and Practice of Physic, i. 128). The medicinal belief that this power of speaking in tongues belonged to those who were possessed by evil spirits rests, obviously, upon like psychological phenomena (Peter Martyr, Loc. Communs., i. c. 10; Bayle, Diction. s. v. "Grandler").

IX. These phenomena have been brought together in order that we may see how far they resemble, how far they differ from those which we have seen reason to believe constituted the outward signs of the Gift of Tongues. It need not startle or "offend" us if we find the likeness between the true and the counterfeit greater, at first sight, than we expected. So it was at the churches of Corinth and of Asia. There also the two existed in the closest approximation; and it was to no outward sign, to no speaking with languages, or prediction of the future, that St. John called the "other" tongues, which he spoke, a "triumphant chant" (ibid., pp. 46, 81). The man over whom they exercised so strange a power, has left on record his testimony, that to him they seemed to embody a more than earthly music, tending to this belief that the "tongues" of the Apostolic age had been the archetypal melodies of which all the Church's chants and hymns were but faint, poor echoes (Oliphant's Life of Irving, ii. 238). To those who were without, on the other hand, they seemed an unendurable gibberish, the yells and groans of madmen (Newspapers of 1831, passim). Sometimes who occupied in their proceedings a position of known languages, Spanish, Italian, Greek, Hebrew, were mingled together in the utterances of those who spoke in the power (Baxter, Norrutite, pp. 133, 134). Sometimes it was but a jargon of mere sounds

"Witless."

The speaker was commonly unable to interpret what he uttered. Sometimes the office was undertaken by another. A clear and interesting summary of the history of the whole movement is given in Mrs. Oliphant's Life of Irving, vol. ii. Those who wish to trace it through all its stages must be referred to the seven volumes of the Morning Watch, and especially to Irving's series of papers on the Gifts of the Spirit, in vol. i., iv., and v. Whatever other explanation may be given of the facts, there exists no ground for imputing a deliberate imposture to any of the persons who were most conspicuous in the movement.

(9.) In certain exceptional states of mind and body the powers of memory are known to receive a wonderful and abnormal strength. In the delirium of fever, in the ecstasy of a trance, men speak in their old age languages which they have never heard or spoken since their earliest youth. The accent of their common speech is altered. Women, ignorant and untrained, repeat long sentences in Greek, Latin, Hebrew, which they had once heard, without in any degree, understanding or intending to remember them. In all such cases the marvelous power is exercised by the imposition of the Spirit on the person. When the patient returns to his usual state, to the healthy equilibrium and interdependence of the life of sensation and of thought (Abercrombie, Intellectual Powers, pp. 140-143; Winslow, Obseure Diseases of the Brain, pp. 357, 399, 574; Watson, Principles and Practice of Physic, i. 128). The medicinal belief that this power of speaking in tongues belonged to those who were possessed by evil spirits rests, obviously, upon like psychological phenomena (Peter Martyr, Loc. Communs., i. c. 10; Bayle, Diction. s. v. "Grandler").
TONGUES, GIFT OF TOPAZ

of the life of the human soul to manifest its operations most clearly. Precisely because we believe in the reality of the Divine work on the day of Pentecost, we may conceive of it as using this state as its instrument, not as introducing phenomena, in all respects without parallel, but as carrying to its highest point, what, if good, had been a foreboding of it, presenting the reality of what, if evil, had been the unbalanced and counterfeit of good. And whatever resemblances there may be, the points of difference are yet greater. The phenomena which have been described are, with hardly an exception, morbid; the precursors or the consequences of clearly recognizible disease. The gift of tongues was bestowed on men in full vigor and activity, preceded by no frenzy, followed by no exhaustion. The Apostles went on with their daily work of teaching and organizing the Church. The form which the new power assumed was determined partly, it may be, by deep-lying conditions of man's mental and spiritual being, within which, as self-imposed limits, the Spirit pointed from on high was pleased to work, partly by the character of the people for whom this special manifestation was given as a sign. New powers of knowledge, memory, utterance, for which education and habit could not at all account, served to wake men to the sense of a power which they could not measure, a Kingdom of God into which they were called to enter. Lastly, let us remember the old rule holds good, "By their fruits ye shall know them." Other phenomena, presenting approximate resemblances, have ended in a sick man's dreams, in a lowered frenzy, in the narrowness of a sect. They grew out of a passionate brooding over a single thought, often over a single word; and the end has shown that it was not well to seek to turn back God's order and to revive the long-barred past. The gift of the day of Pentecost was the starting-point of the long history of the Church of Christ, the witness, in its very form, of a universal family gathered out of all nations. But it was the starting-point only. The newness of the truth then presented to the world, the power of the first experience of a higher life, the long ago expectation in men's minds of the Divine kingdom, may have made this special manifestation, at the time, at once inevitable and fitting. It belonged, however, to a critical epoch, not to the continuous life of the Church. It implied a disturbance of the equilibrium of man's normal state. The high-wrought ecstasy could not continue, might be glorious and blessed for him who had it, a sign, as has been said, for those who had it not; but it was not the instrument for building up the church. That was the work of another gift, the prophecy which came from God, yet was addressed from the mind and heart of one man to the minds and hearts of his brethren. When the overflown fullness of life had pressed away, when "tongues" had ceased, and prophecy itself, in its irresistible power, had failed, they left behind them the lesson they were meant to teach. They had borne their witness, and had done their work. They had taught much, had been the ministry of the gift of all good gifts, "dividing to every man severally as He wills;" to recognize his inspiration, not only in the marvel of the "tongues," or in the burning words of prophets, but in all good thoughts, in the right

a It can hardly be doubted that the interpolated word "unknown," in the A. V. of 1 Cor. xiv., was the judgment in all things, in the excellent gift of Charity.

E. H. P.

TOPARCHY (Tōparchía). A term applied in one passage of the Septuagint (1 Mac. xi. 28) to indicate three districts to which elsewhere (x. 30, xi. 34) the name νομός is given. In all these passages the English Version employs the term "governments." The three "toparchies" in question were Apherena (Ἀφερήνα), Lydda, and Ramath. They had been detached from Samaria, Peræa, and Galilee respectively, some time before the war between Demetrius Soter and Alexander Balas. Each of the two belligerents endeavored to win over Jonathan, the Jewish High-Priest, to their side, by allowing him, among other privileges, the sovereign power over these districts without any payment of land-tax. The situation of Lydda is doubtless, for the toparchy Lydda, of which Pliny speaks (v. 14), is situated not in Peræa, but on the western side of the Jordan. Apherena is considered by Grattus to denote the region about Bethel, captured by Abijah from Jeroboam (2 Chr. xiii. 19). Ramath is probably the famous strong-hold, the desire of obtaining which led to the unfortunate expedition of the allied sovereigns, Aban and John Hyrcanus (1 K. xiv. 39).

The "toparchies" seem to have been of the nature of οὐγδία, and the passages in which the word τοπάρχος occurs, all harmonize with the view of that functionary as the υπερ, whose duty would be to collect the taxes and administer justice in all cases affecting the revenue, and who, for the purpose of enforcing payment, would have the command of a small military force. He would thus be the lowest in the hierarchy of a despotic administration to whom troops would be entrusted; and hence the taunt in 2 K. xvii. 34, and lxxxvi. 9: Πατριάρχησι το πρόεστον τοπάρχων ενδυναμουσίων, ταν διαλείψαν τον κυρίον μου τοις ἑαυτοίς; "How wilt thou resist a single toparch, one of the very few of. my lord's princes?" But the essential character of the toparch is that of a fiscal officer, and his military character is altogether subordinate to his civil. Hence the word is employed in Gen. xxii. 34, for the "officers over the land," who were instructed to buy up the fifth part of the produce of the soil during the seven years of abundance. In Dan. iii. 3, Theodotion uses the word in a much more extensive sense, making it equivalent to "satraps," and the English Version renders the original by "princes;" but the original word here is not the same as in Dan. iii. 27, and vi. 7, in every one of which cases a subordinate functionary is contemplated.

J. W. B.

TOPAZ (Τοπάζ). Pidōs: τοπαζōν: topazion. The topaz of the ancient Greeks and Romans is generally allowed to be our chrysolite, while their chrysolite is our topaz. [CHRYSOLOITE] Belleman, however, (Die Urvor und Thunmv, p. 39), contends that the topaz and the chrysolite of the ancients are identical with the stones denoted by these terms at the present day. The account which Pliny (H. N. xxxvii. 2.19) gives of the gems, the gift of the Magi, leads to the conclusion that that stone is our chrysolite; "the topazos," he says, "is still held in high estimation for its green tints." According to the authority of Jata, cited by Pliny, the topaz is derived from an island in the Red Sea called
TOPHEL (תֹּפֶד, Topheth). A place mentioned Jer. vii. 1, which has been probably identified with Tophah on a wady of the same name running north of Beersa towards the N. W. into the Ghur and S. E. corner of the Dead Sea (Robinson, ii. 570). This latter is a most fertile region, having many springs and rivulets flowing into the Ghur, and large plantations of fruit-trees, whence figs are exported. The bird Katzah, a kind of partridge, is found there in great numbers, and the steinbocks pastures in herds of forty or fifty together (Bunchehard, Holy Land, 405, 406).

H. H.

TOPHETH, and once TOPHET (תֹּפֶת, Tophet) [perh. abomination, a place abhorred, Diict.]. Generally with the article (2 K. xxvii. 10; Jer. vii. 31, 32, xix. 6, 13, 14). Three times without it (Jer. vii. 32, xix. 11, 12). Only once without it, but with an affix, תֹּפֶת, Topheth (Is. xxx. 33). In Greek, [Rom. and Vet. 2 K. and Jer. vii.] Tophèth. [Comp. in Jer. xix. 11] Topheth, and [Alex. in 2 K.] Ὠψθέθ (Steph. Lex. 166. Peregrinat. Bibl. Theos.); [for the LXX. in Is. xxx. 33 and Jer. xix. see below.] In the Vulgate, [Tophet.] Topheth. In Jerome, Tophet. It is not mentioned by Josephus.

It lay somewhere east or southeast of Jerusalem, for Jeremiah went out by the Sun Gate, or East Gate, to go to it (Jer. xix. 2). It was in "the Valley of the Son of Hinnom." (vii. 31), which is "by the end of the gate," and hence it was not identical with Hinnom, as some have written, except in the sense in which Paradise is identical with Eden, the one being part of the other. It was in Hinnom, and was perhaps one of its chief groves or gardens. It seems also to have been part of the king's gardens, and watered by Siloam, perhaps a little to the south of the present Birket el-

Hevrana. The name Tophet only occurs in the Old Testament (2 K. xxvii. 10; Is. xxx. 33; Jer. vii. 31), and it is never to be referred to, nor the Apocrypha. Jerome is the first who notices it: but we can see that by his time the name had disappeared, for he discusses it very much as a modern commentator would do, only mentioning a green and fruitful spot in Hinnom, watered by Siloam, where he assumes it was: "Delahunam Saul, in Greek, Σηκές, Σίκη, τον ήδυτιναν." (Vulg. 168.) If this be the case, we must conclude that the valley or gorge south of Jerusalem, which usually goes by the name of Hinnom, is not the Ge-Hinnom of the Bible — indeed, until comparatively modern times, that southern ravine was never so named. Hinnom by old writers, western and eastern, is always placed east of the city, and corresponds to what we call the "South of the Pyriform," along the southern bed and banks of the Kedron (Jerome, De Locis Hebr. and Comm. in Matt. x. 28: Ibn Batutah, Travels; Jahl Addin's History of the Temple; Felix Fabri), and was reckoned to be somewhere between the Potter's Field and the Fuller's Pool.

Tophet has been variously translated. Jerome says hibbitum, others hibebbis; others Menab; others place of burning or burying; others的通知ation (Jerome, Nollius, Gesenius, Bochart, Simonis, Thirring). The most natural seems that suggested by the occurrence of the word in two consecutive verses, in the one of which it is a verb, and in the other Tophet. (Is. xxx. 33). The Hebrew words are nearly identical, and Tophet was probably the king's "mines grove" or garden, denoting originally nothing evil or hateful. Certainly there is no proof that it took its name from the drums beaten to drown the cries of the burning victims that passed through the fire to Molech. As Chin. mard, the hibebeset, So Tophet is the ibebeset-grove or valley. This might be at first part of the royal garden, a spot of special beauty, with a royal villa in the midst, like the Phasia's palace at Shiloh, near Cairo. Afterwards it was defiled by idols, and polluted by the sacrifices of Baal and the fires of Molech. Then it became the place of abomination, the very gate or pit of hell. The plougs defiled it, and threw down its altars and high places, pouring into it all the filth of the city. Still it became the "abhorrence" of Jerusalem, for to it, primarily, though not exhaustively, the prophet refers:

They shall go forth and gaze
On the carcases of the transgressors against me;
For their worm shall not die,
And their fire shall not be quenched,
And they shall be an abhorrence to all flesh. (Is. xix. 24.)

In Kings and Jeremiah the name is "the Tophet," but in Isaiah (xxx. 33) it is Topheth; yet the places are probably the same so far, only in Isaiah's time the grove might be changing its name somewhat, and with that change taking on the symbolic meaning which it manifestly possesses in the prophet's prediction:

Set in order in days past has been Tophet;
Surely for the king it has been made ready.
He hath deepened, he hath widened it; a
The pile thereof, fire and wood, he hath multiplied.

---
a Of the literal Tophet it is said, "They shall bury in Tophet, till there be no place" (Jer. vi. 32). Of the symbolical Tophet it is said above, "He hath widened and widened it."
Topheth

The breath of Jehovah, like a stream of broinstone, Doth set it on fire.

It is to be noticed that the LXX. translate the above passage in a peculiar way: τὸ ἄνεμον τὴν σεισιάν ἀπαντᾷ γὰρ, "that shall be required from of old," or perhaps "before the time;" but Jerome translates the LXX. as if their word had been ἀπαντώς (as ἀνεμός, as Procopius reads it), and not ἀπαντῶς "in unum dies diciōscipio," adding this comment: "Dicitur ad illum quod ab initio eclipse desert, regnum ssumo arbitrium spectans, mundum preparando sint Heckem et arenae simplicia." In that case the Alexandrian translators perhaps took ἀπαντώς for the second person singular masculine of the future of ἀπαντάω, to persuade or deceive. It may be noticed that Michaelis renders it thus: "Tophet ejus, q. d. regius ejus." In Jer. xix. 6, 15, the LXX. translate Tophet by δικαστήριον, δικαστήριον, which is not easily explained, except on the supposition of a marginal gloss having creep into the text instead of the proper name (see Jerome: and also Spald on the Greek version of Jer. iv. 31, and Notes on chaps. xix., xliii.)

In Jer. (vii. 32, xiv. 6) there is an intimation that both Tophet and Gehemmon were to lose their names, and to be called "the valley of slaughter." (Tophet, Genesis 25, 26-46.) Without venturing on the conjecture that the modern Deraw may be a relic of Harayol, we may yet say that this lower part of the Keshon is "the valley of slaughter," whether it ever bore here the name or not. It was not here, as some have thought, that the Assyrian was slain by the sword of the destroying angel. That slaughter seems to have taken place to the west of the city, probably on the spot afterwards called from the event, "the valley of the dead bodies" (Jer. xxxi. 46). The slaughter from which Tophet was to get its new name was not till afterards. In all succeeding ages, blood has flowed there in streams; corpses, buried and unburied, have filled up the hollows; and it may be that beneath the modern gardens and terraces there lie not only the debris of the city, but the houses and dust of millions,—Romans, Persians, Jews, Greeks, Crusaders, Moslems. What future days and events may bring is not for us to say. Perhaps the prophet's words are not yet exhausted.

Strange contrast between Tophet's first and last! Once the choice grove of Jerusalem's choicest valley; then the place of defilement and death and fire; then the "valley of slaughter!" Once the royal music-grove, where Solomon's singers, with voice and instrument, rejoiced the king, the court, and the city; then the temple of Baal, the high place of Molech, resounding with the cries of burning infants; then (in symbol) the place where is the wailing and gnashing of teeth. Once prepared for Israel's king, as one of his choicest villas; then degraded and defiled, till it becomes the place prepared for "the King," at the sound of whose voice the nations are to shake (Ez. xxxii. 16); and as Paradise and Eden passed into Babylonia, so Tophet and Ben Hinnom pass into Gehenna and the lake of fire. These scenes seem to have taken hold of Milton's mind: for three times over, within fifty lines, he refers to "the-opprobrious hill," the "hill

of scound," the "offensive mountain," and speaks of Solomon making his grove in the "pleasant valley of Hinnom, Tophet thence. And black Gehemmon called, the type of hell."

Many of the old travellers (see Felix Fabri, vol. i, p. 301) refer to Tophet, or Top as they call it, but they give no information as to the locality. Every vestige of Tophet — name and grove — is gone, and we can only guess at the spot; yet the references of Scripture and the present features of the locality enable us to make the guess with the same tolerable nearness as we do in the case of Gethsemane or Soqs.

B. B. 2

Torch. [Lamp; Lantern; Steel.]

Tor-ma-h (πυρός) [fixed, decided]: εἰρωτήριον: Alex. μετα εὑρέσας: chavm occurs only in the margin of LXX. ix. 31, as the alternative rendering of the Hebrew word which in the text is given as "privity." By a few commentators it has been conjectured that the word was originally the same with ARUMAH in ver. 41, — one or the other having been corrupted by the copists. This appears to have been first started by Kimchi. It is adopted by Junius and Tremellius; but there is little to be said either for or against it, and it will probably always remain a mere conjecture.

G.

Tortoise [ζωρ]. Tobál: ὁ σπάνιος κλάδος ὁ γράφησιν; crocodilus. The isib occurs only in Lev. xi. 29, as the name of some venomous animal. Beochart (Herb. ii. 432) with much reason refers the Heb. τοβάλ to the kindred Arabic akab (אכף), a "large kind of lizard," which, from the description of it as given by Bion, appears to be the Psephomus Scincus, or Monitor terrestris of Cuvier (R.

A. ii. 26). This lizard is the warm ehab-d of the Arabs, i.e. the land-warum, in contradistinction to the warm el-baker, i.e. the water-lizard (Monitor Niloticus). It is common enough in the deserts of Palestine and N. Africa. It is no doubt the spadonchus xeropogon of Herodotus (iv. 192). See also Dioscorides (ii. 71), who mentions it, or perhaps the Skincus officinalis, under the name of σκίνκος.

Geseum derives the Heb. word from ζωρ. "a to move slowly."

W. H.

Tou [τουλ]: Ewe: Alex: Θουλ: Theul. Tou, king of Hamath (1 Chr. xvii. 9, 10).

A. II. 26.
TOW.

Tower. For towers as parts of city-walls, or as strongholds of refuge for villages, see Fenced Cities, Jerusalem, ii. 1315-1322; and HANASHELL. Watch-towers or fortified posts in frontier or exposed situations are mentioned in Scripture, as the tower of Edom, etc. (Gen. xxxv. 21: Mic. iv. 8; Is. xxvi. 5, 8, 11; Hab. ii. 1; Jer. xvii. 2; Cant. vii. 4); the tower of Lebanon, perhaps one of David's "garrisons," utvide v. 2 S. viii. viii; Kammer, Pol. p. 29). Such towers or outposts for the defense of wells, and the protection of flocks and of commerce, were built by Uziah in the pasture-grounds (Mediat) (Dejeteet), and by his son Jotham in the forests (Chorephon) of Judah (2 Chr. xxvi. 10, xxvii. 4). Remains of such fortifications may still be seen, which, though not perhaps themselves of remote antiquity, yet very probably have succeeded to more ancient structures built in the same places for like purposes (Robinson, ii. 81, 85, 180; Roberts, Sketches, p. 95). Besides these military structures, we read in Scripture of towers built in vineyards as an almost necessary appendage to them (Is. v. 2; Matt. xxi. 35; Mark xii. 1). Such towers are still in use in Palestine in vineyards, especially near Jerusalem, and are used especially as lodges for the keepers of the vineyards. During the vintage they are filled with the persons employed in the work of gathering the grapes (Robinson, i. 215, ii. 81; Martineau, East. Lit., p. 474; De Sauley, Trav. i. 546).

* TOWER OF JABEEL. (Tongues, Confusion of.)

TOWNS-CLERK (γραμματεύς σειρού). The title ascribed in our Version to the magistrate at Ephesus who appended the mob in the theatre at the time of the tumult excited by Demetrius and his fellow-craftsmen (Acts xix. 35). The other primary English versions translate in the same way, except those from the Vulgate (Wydyll, the Rhenish), which render "scribe." A digest of Boeckel's views, in his Stadthaukungen, respecting the functions of this officer at Athens (there were three grades of the order there), will be found in Del. of Ant, p. 439 ff. The γραμματεύς or "town-clerk" at Ephesus was no doubt a more important person in that city than any of the public officers designated by that term in Greece (see Greswell's Dissertations, iv. 152). The title is preserved on various ancient coins (Weinstein, Nov. Test. ii. 586; Ackermann's Numismatic Illustrations, p. 53), which illustrate fully the rank and dignity of the office. It would appear that what may have been the original service of this class of men, namely, to record the acts and decrees of the state, and to read them in public, embraced at length, especially under the ascendency of the Romans in Asia Minor, a much wider sphere of duty, so as to make them, in some instances, in effect the heads or chiefs of the municipal government (Winer, Radecl. i. 649).

They were authorized to preside over the popular assemblies and submit votes to them, and are mentioned on marbles as acting in that capacity. In cases where they were associated with a superior magistrate, they succeeded to his place and discharged his functions when the latter was absent or had died. "On the subjugation of Asia by the Romans," says Baumstark (Paul's Encyclopaedia, iii. 494), "γραμματεῖς were appointed there in the character of governors of single cities and districts, who even placed their names on the coins of their cities, caused the year to be named from them, and sometimes were allowed to assume the dignity, or at least the name, of ἀρχιερέας." This writer refers as his authorities to Schwartz, Dissertatio de γραμματεσ, Magistretat Civitatam Aevi Proconsularis (Altorf, 1753); Van Dale, Dissertat. v. 425; Shemlick, De L'ta et First. Texam. i. 74. A good article on this topic will be found in the New Encyclopædia (U. S. V.), x. 144.

It is evident, therefore, from Luke's account, as illustrated by ancient records, that the Ephesian town-clerk acted a part entirely appropriate to the character in which he appears. The speech delivered by him, it may be remarked, is the model of a popular harangue. He argues that such excitement as the Ephesians excited was undeniably inauspicious as they stood above all suspicion in religious matters (Acts xix. 35, 39): that it was unjustifiable, since they could establish nothing against the men whom they accused (ver. 37); that if it was unnecessary, since other means of redress were open to them (ver. 38, 39); and, finally, if neither proper nor a sense of justice and anything, fear of the Roman power should restrained them from such illegal proceedings (ver. 40).

H. B. H.

TRACHONITIS (Τραχωνίτις). This place is mentioned only once in the Bible, Luke iii. 1. It is possible that Philip—was tetrarch of Ituraea, and Τραχωνίτις Χώρας— and it appears that this "Trachonite region," in addition to the little province of Trachonitis, included parts of Amurites, Galmaitis, and Batanea (Joseph. Ant., xvi. 7, 2, § 1, and ii. 4 § 4).

Trachonitis is, in all probability, the Greek equivalent for the Arameic Τραχωνίτης. The Tagmatai render the word ΤΡΑΧΩΝΙΤΗΣ in Pteu. iii. 14, by ΤΡΑΧΩΝΙΤΗΣ. According to Gesenius, ΤΡΑΧΩΝΙΤΗΣ signifies "a heap of stones," from the root ΤΡΑΧΩΝΙΤΗΣ, "to pile up stones." So ΤΡΑΧΩΝΙΤΗΣ or ΤΡΑΧΩΝΙΤΗΣ is a "ragged or stony...

a. 1. τοῖς, τοῖς, and τοῖς: εἵλοις: from θαλῆς, "search," "explore," a searcher or watcher; and hence the notion of a watch-tower. In Is. xxvii. 14, the tower of Ophel is probably meant (Neh. iii. 23; Jos. 198).

2. τοῖς, τοῖς, and τοῖς or τοῖς: τίραμεν: "tirare; from θαλῆς, "become great" (Gen. 24:5), med. sometimes as a proper name. (Mendel.)

3. τοῖς: τίραομαι: "beautify, beautify only once: "tower."" (Hab. ii. 1.)

4. ΤΡΑΧΩΝΙΤΗΣ: δόμος: domus: only in 2 K. v. 24 (Gebelyr.).

5. τοῖς, usually "corner," twice only: "tower." Zoph. i. 10; I. vi. 6: γωνίας: angulus.

6. ΤΡΑΧΩΝΙΤΗΣ: οἰκείωσα: "wax: "watch-tower." (Mendel.)

7. ΤΡΑΧΩΝΙΤΗΣ: ὀψιμία: "beau: only in poetry (Mendel.)

b. Such towers are numerous also at Bethlehem and form a striking feature of the landscape (Herodet, Illustrations of Scripture, p. 171 f.).

H.
TRACHONITIS

TRACT. — William of Tyre gives a curious etymology of the word Trachonitis: "Videtur autem soli vista tercynia dicta. Tractus enim dicuntur occulti et subterrami mentes, quibus ista regna abutunt." (Gest. Dei per Francos, p. 805). Be this as it may, there can be no doubt that the whole region abounds in caverns, some of which are of vast extent. Strabo refers to the caves in the mountains beyond Trachon (Geog. xvi.), and he affirms that some of them are so great that it would contain 100,000 men. The writer has visited some spacious caverns in Jebel Hawven, and in the interior of the Lejah.

The situation and boundaries of Trachonitis can be defined with tolerable accuracy from the notices in Josephus, Strabo, and other writers. From Josephus we gather that it lay south of Damascus, and east of Gaulanitis, and that it bordered on Anuranitis and Batanea (B. J. iv. 1, § 1; vi. 1, § 10, 17). Strabo says there were 10,000 Trachonites (Geog. xvi.). From Ptolemy we learn that it bordered on Batanea, near the town of Sucea (Geog. xvi.). In the Jerusalem Gemara it is made to extend as far south as Bostra (Lightfoot, Opp. ii. 473). Eusebius and Jerome, though they err in confounding it with Turena, yet the latter rightly defines its position, as lying between Bostra and Damascus (Onom. s. v.). Jerome also states that Kenath was one of its chief towns (Onom. s. v. "Canath").

From these data we have no difficulty in fixing the position of Trachonitis. It included the whole of the modern province called el-Lojeb (الملاجأ), with a section of the plain southward, and also a part of the western declivities of Jebel Hawrun. This may explain Strabo's two Trachons. The identity of the Lejeb and Trachonitis does not rest merely on presumptive evidence. On the northern border of the province are the extensive ruins of Massoura, where, on the door of a beautiful temple, Burckhardt discovered an inscription, from which it appears that this is the old city of Phoecea, and the capital of Trachonitis (αμφιορκώμενα Τραχώνων). Text. in Syr. 117). The Lejeb is bounded on the east by the mountains of Batanea (now Jebel Hawrun), on whose slopes are the ruins of Sucea and Kenath; on the south by Anuranitis (now Hawrun), in which are the extensive ruins of Bostra; on the west by Gaulanitis (now Judair) and Damascus. If all other proofs were wanting, a comparison of the features of the Lejeb with the graphic description Josephus gives of Trachonitis would be sufficient to establish the identity. The inhabitants, he says, "had neither towns nor fields, but dwelt in caves that served as a refuge both for themselves and their rocks. They had..." (Geog. xvi.), which this may be compared.

The notices of Trachonitis in history are few and brief. Josephus affirms that it was colonized by the son of Aram (Jud. ii. 8, § 4). His next reference to it is when it was held by Zenodorus the bandit-chief. Then its inhabitants made frequent raids, as their successors do still, upon the territories of Damascus (Ant. xv. 10, § 1). Augustus took it from Zenodorus, and gave it to Herod the Great, on condition that he should repress the robbers (Ant. xvi. 9, § 1). Herod bequeathed it to his son Philip, and his will was confirmed by Cæsar (B. J. ii. 6, § 8). This is the Philip referred to in Luke iii. 1. At a later period it passed into the hands of Herod Agrippa (B. J. iii. 3, § 5). After the conquest of this part of Syria by Cornelius Palma, in the beginning of the second century, we hear no more of Trachonitis (Burckhardt, Trav. in Syria, 110; Porter, Ilm. in Syria, 240-253; Journal. Geog. Soc. xxvii. 250-252.) Also, Porter, Guide Cities of Bashan, pp. 15, 93; and J. G. Wetstein, Reisebuch i. Ilm. in Syria u. die Trachoniten, p. 36. E. — H. J. L. P.

* TRADITION (παραδοσία, rendered once, in 1 Cor. xi. 2, "observances"). Primarily it denotes the act of delivering or transmitting, then the thing delivered; in the N. T. it has only the latter sense. It refers generally, if not always, to preceptive rather than to historical matters. Traditions may be either written or oral (2 Thess. ii. 15); and the term is perhaps used in Col. i. 14, so as to include even precepts of the canonical Scriptures. But the traditions alluded to by Christ in Matt. xv. and Mark vii. were probably for the most part oral; Josephus (Ant. xiii. 10, § 6) seems to imply this, and he furthermore distinguishes them from the Scriptures as being additions to, or explanations of the latter, handed down from the fathers. These were afterwards written in the Talmud. On the character of them, cf. Wetstein, Lightfoot and Schüttgen on Matt. vi. 2, 5, 20. [WASHING THE HANDS AND FEET: PHARISEES: SCHEHER.]

The authorship of traditions, according to the N. T., depends on their source. If they originated strictly with uninspired men, they were not authoritative, and might even be directly opposed to Divine commandments (Matt. xv. 6, Col. xi. 8). On the other hand παραδοσία which were derived from Christ or his apostles, were authoritative (1 Cor. xi. 2; 2 Thess. ii. 15). Here we may note also the frequent use of παραδοσία, said of injunctions or important communications delivered to the Christians (1 Cor. xi. 23, 25, 3; Acts xvi. 4; Rom. vii. 3; Col. ii. 4); and some of them bound to us by the oral tradition. But the whole substance of the Gospel is spoken of as thus delivered. And oral transmission is probably meant in most cases.

This suggests the inquiry, what traditional elements there are in the Bible itself. As regards the O. T., since the names of the authors of the historical books are not given and many of the histories cover a long period of time, there is no room for a bounded license in conjecturing how far the narratives are traditions reduced to writing a greater or less time after the occurrence of the events recorded. But the mention of histories now lost, made as early as Num. xxi. 14 ("the book of the wars of the Lord"); and especially in the books of Kings and Chronicles [KINOS] of annals of the several divisions, diminishes very much the probability of extensive resort to old traditions in the compilation of the histories. Where reference is made in one part of the O. T. to former events in the history of the people, we can generally find the events recorded in the earlier books. Cf. e.g. Jephthah's message to the Ammonites (Judg. xi.) with the
TRADITION

narrative in Num xx. and xxi., or Ps. Ixxxviii, with the history of the Exodus. It is more than doubtful whether we are to understand Mic. vi. 5-8 as containing a dialogue between Balaam and Balaam, preserved by tradition. This view, though advanced by Bishop Butler (Sermon on Balaam), and adopted in the article on Moab and by Stanley (Jewish Church, i. 212), is not generally accepted, and hardly seems to be suggested by the passage in Micah.

The time embraced in the N. T. histories does not allow much scope to tradition in the ordinary sense of the term. But if we take παράδοσις in the narrower sense in which the N. T. uses it, then it may be said that a considerable part of the historical books of the N. T. may be composed of traditions. The Gospel was at first preached, not written. What the apostles thus handed down was afterwards recorded by them or others. See Gospels; Westcott, Introduction, p. 212; and especially Luke i. 1 ff. Accordingly, the familiar passage Acts xx. 35, where Paul quotes a saying of Christ not elsewhere recorded, is strictly speaking no more a tradition than the other sayings of Christ which are found in the Gospels; for at that time when Paul used this language perhaps none, or not many, of the Gospels then were written. See Hackett, Acts, p. 343, and Introduction to Acts, p. 29. The same may be said of John viii. 11-12. This narrative, though belonging originally to none of the Gospels, was probably preserved in the recollection of the disciples and early incorporated into the text of John. See Meyer on this passage. Somewhat different is the case with the interpolation in John x. 3-4, which seems to be a tradition reflecting a popular belief, but for which John cannot be regarded as vouching. Still different is the tradition (John xxi. 23) respecting John's death, which is mentioned, only to be pronounced false. There are however a few instances of what seem to be traditions of longer standing. On 2 Tim. iii. 8 see JANES AND JANIBAS, and Westcott in loc. The phrase "a swan answered" in Heb. xi. 37 is doubtless founded on the tradition that Isaiah was thus put to death. On the dispute between Michael and the Devil, Jude 9, see MICHAEL: also De Wette and Huther in loc. Of a similar character is the quotation, in Jude 14, 15, from "Enoch, the seventh from Adam." On this see Enoch; Book of. The allusion in Jude 6 to the angels who kept not their first estate may also have been derived from the book of Enoch (xii. 4), though this again is probably derived from Gen. vi. 1-4 (on which see, besides the commentary, especially Kuritz, Die Ehen der Sibane Gottes, etc., in his Geschichte des Alten Bundes. 2 Pet. ii. 4 probably refers to the same thing. According to some, the verse may be an allusion to the famous tradition of the rock that the rock from which water sprang forth did actually follow the Israelites in their wanderings. But this, though a real Jewish tradition, cannot be proved to have existed before the time of Paul; and if it did, Paul does not indispose it,—at the most he only alludes to it. Cf. Neander and Meyer in loc. A more important instance of tradition is that respecting the mediation of angels in the giving of the Law. This is men-

TRANCE

TRANCE (ἐκποντισμός; exponemos). (1) In the only passage (Num xxiv. 16) in which this word occurs in the English of the O. T. there is, as the italics show, no corresponding word in Hebrew, simply בָּא אֶל, "falling," for which the LXX. gives ἐπὶ τούτῳ, and the Vulg. more literally qui collit. The Greek ἐκποντισμός is, however, used as the equivalent for many Hebrew words, signifying dread, fear, astonishment (Tommuni Concordant.). In the N. T. we meet with the word three times (Acts x. 10, xi. 5, xvii. 17), the Vulgate giving "excead" in the two former, "stupor mensis" in the latter. Luther uses "entzückt" in all three cases. The meaning of the Greek and Latin words is obvious enough. The ἐκποντισμός is the state in which a man has passed out of the usual order of his life, beyond the natural limits of consciousness and volition. "Excead," in like manner, though in classical Latin chiefly used as an euphemism for death, became, in ecclesiastical writers, a synonym for the condition of seeming death to the outer world, which we speak of as a trance. "Hanc videmus dicimus, exclamam sensum, et amnicライブ instar" (Tertull. de An. c. 45). The history of the English word presents an interesting parallel. The Latin "transitus" took its place also among the euphemisms for death. In early Italian "esser in transito," was to be as at the point of death, the passage to another world. Passing into French, it also, abbreviating itself to "trance," was applied, not to death itself, but to that which more or less resembled it (Diez, Roman. Worterbuch, s. v. "transito").

(2.) Used as the word is by Luke, in the physician," and, in this special sense, by him only, in the N. T., it would be interesting to inquire what precise meaning it had, and what the precise time of its use. From the time of Hippocrates, who uses it to describe the loss of conscious perception, it had probably borne the connotation which it has had, with shades of meaning for good or evil, ever since. Thus, Hesychius gives as the account of a man in an ecstasy, that he is ὁ ἐκποντισμός ὑπακοήν ἄποικος (Apologia) speaks of it as "a change from the earthly and carnal state and soul into a divine and spiritual condition both of character and life." Tertullian (l. c.) compares it to the dream-state in which the soul acts, but not through its usual instruments. Augustine (Confess. ix. 11) describes his mother in this state as "abstracta a presentis," and gives a description of like phenomena in the case of a certain Restitutus (de Civ. xvi. 29).

(3.) We may compare with these statements the answers obviously to that of later writers between pure and ecstatic catalyses (comp. Feistus, Εκπονημ. Μνημ. s. v. ἐκπονημείον).
more precise definitions of modern medical science.

There the ecstatic state appears as one form of catalepsy. In catalepsy pure and simple, there is a "sudden suspension of thought, of sensibility, of voluntary motion." "The body continues in any attitude in which it may be placed; there are no signs of any process of thought; the patient continues silent." In the ecstatic form of catalepsy, on the other hand, "the patient is lost to all external impressions, but wrapped and absorbed in some object of the imagination." The man is "out of the body." "Nervous and susceptible persons are apt to be thrown into these trances under the influence of what is called mesmerism. There is, for the most part, a high degree of mental excitement. The patient utters the most enthusiastic and fervid expressions or the most earnest warnings. The character of the whole trance is that of intense contemplative excitement. He believes that he has seen wonderful visions and heard singular revelations" (Watson, *Principles and Practice*, Lect. xxxix.; Copland, *Dict. of Medicine*, s. v. "Catalepsy").

The causes of this state are to be traced commonly to strong religious impressions; but some, though, for the most part, not the ecstatic phenomena of catalepsy are producible by the concentration of thought upon some object or of some vision upon a fixed point (Quot. Rec. xviii., pp. 510-522, by Dr. W. B. Carpenter; comp. *Unterg. und Themmm*), and, in some more exceptional cases, like that mentioned by Augustine (there, however, under the influence of sound, and imita- 

tis quod lamentosus compluvit hominis voce"; and that of Jerome of Cardam, *In *Revelation, vi.*, men have been able to throw themselves into a cataleptic state at will. [See Dr. W. A. Hammond on the *Physica und Physologia Spiritualis*, in the *N. A. Rec.* for April 1870; ex. 283-285, A.]

(4) Whatever explanation may be given of it, it is true of many, if not most, of those who have left the stamp of their own character on the religious history of mankind, that they have been liable to pass at times into this abnormal state. The union of intense feeling, strong volition, long-con- 

tinued thought (the conditions of all wide and last- 

ing influence), aided in many cases by the withdrawal from the lower life of the support which is needed to maintain a healthy equilibrium, appears to have been more than the "earthen vessel" will bear. The words which speak of "an ecstasy of adoration" are often literally true. The many visions, the journey through the heavens, the so-called ecstasy of Mohammed, were phenomena of this nature.

Of three great medieval teachers, St. Francis of Assisi, St. Thomas Aquinas, and Johnnes Scoto, it is recorded that they would fall into the ecstatic state, remain numerous, and that death, sometimes for a whole day, and then, returning to consciousness, speak as if they had drunk deep of divine mysteries (Galadmir, *Crit. Soc.* on Acts x. 10). The old traditions of Arius and Eumenides, the conflicts of Dunstan and Luther with the powers of darkness, the visions of Savon- 

re, and George Fox, and Swedenborg, and Deh- 

men, are generally analogous. Where there has been no extraordinary power to influence others, other conditions remaining the same, the phenomena have appeared among whole classes of men and women, and as far as the circumstances of their lives tended to produce an excursive susceptibility to religious or imaginative emotion. The history of monastic orders, of American and Irish revivals, gives countless examples. Still more noticeable is the fact that many of the *improvinciarii* of Italy are only able to exercise their gift when they are in a state of ecstatic trance, and speak of the gift itself as something without a (Copland, L. c.); while in strange contrast with their earlier history, and pointing perhaps to a national character that has become harder and less emotional, there is the testimony of a German physician (Frank), who had made catalepsy a special study, that he had never met with a single case of it among the Jews (Cop- 

land, L. c.).

(5) We are now able to take a true estimate of the trances of Biblical history. As in other things, so also here, the phenomena are common to higher and lower, to true and false systems. The nature of man continuing the same, it could hardly be that the awedness of the Divine presence, the ter- 

rors of Divine judgment, should leave it in the calm equilibrium of its normal state. Whatever magic or suggestion of a truth were involved, what- 

er ever gave him to whom it was revealed more power over the hearts of others, might well take its place in the Divine education of nations and individual men. We may not point to trances and ecstasies as proofs of a true Revelation, but still less may we think of them as at all inconsistent with it. Thus, though we have not the word, we have the thing in the "deep sleep" (Ez. xix., and, LXX.), the "hor- 

ror of great darkness," that fell on Abraham (Gen. xxx. 12). Baham, as if overcome by the constraining power of a Spirit mightier than his own, "sees the vision of God, falling, but with opened eyes" (Num. xxiv. 4). Saul, in like manner, when the wild chant of the prophets stirred the old depths of feeling, himself also "prophesied," and "fell down" (most, if not all, of his kingly clothing be- 

ing thrown off in the ecstasy of the moment), "all that day and all that night" (1 Sam. xix. 24). Sometimes there was in Jeremiah that made men say of him that he was as one that "is mad and makest himself a prophet" (Jer. xxix. 26). In Ezekiel the phenomena appear in more wonderful and awful forms. He sits motionless for seven days in the state of astonishment, till the word of the Lord comes to him (Ez. iii. 15). The "hand of the Lord" falls on him, and he too sees the "visions of God," and hears the voice of the Al- 

mighty, "whichareth between the earth and heaven," and passes from the river of Chebar to the Lord's house in Jerusalem (Ez. viii. 3).

(6) As other elements and forms of the pro- 

phetic work were revived in "the Apostles and Prophets" of the N. T., so also was this. More distinctly even than in the O. T. it becomes the medium through which men rise to see clearly what before was dim and doubtful, in which the mingled hopes and fears and perplexities of the waking state are dissipated at once. Though dif- 

ferent in form, the revelation to the same class of phe- 

nomena as the GIFT OF TONGUES, and is connected

a *Analogous to this is the statement of Aristotle *('Prot. c. 30) that the *skaphophanes* speak often in wild outbursts of poetry, and as the Sibyls and others who are inspired (Sibyll.).

b A fuller treatment of the whole subject than can be entered on here may be found in the chapter on *Les Mystiques in Man*, *La Magie et l'Alchimie*.
with visions and revelations of the Lord." In some cases, indeed, it is the chosen channel for such revelations. To the "trance" of Peter in the city, where all outward circumstances tended to bring the thought of an expansion of the Divine kingdom more distinctly before him than it had ever been brought before, we owe the indelible truth stamped upon the heart of Chri^n-Tendom, that God is no respecter of persons, that we may not fail any man "common or meek" (Acts x, xi). To the "trance" of Paul, when his work for his own people seemed utterly fruitless, we owe the mission which was the starting-point of the history of the Universal Church, the command which bade him "depart . . . far hence into the Gentiles" (Acts xxii. 17-21). Wisely for the most part did the Apostle draw a veil over these more mysterious experiences. He would not sacrifice to them, as others have often sacrificed, the higher life of activity, love, prudence. He could not explain them to himself. "In the body or out of the body" he could not tell, but the outer world of perception had passed away, and he had passed into a new world -"out of the third heaven" and had heard "unspeakable words" (2 Cor. xii. 1-4). Those trances too, we may believe, were not without their share in fashioning his character and life, though no special truth came distinctly out of them. United as they then were, but as they have seldom been since, with clear perceptions of the truth of God, with love wonderful in its depth and tenderness, with energy unceasing, and with that almost passing into "gaiety" they made him what he was, the leader of the Apostle band, emphatically the "master builder" of the Church of God (comp. Jowett, Fragment on the Character of St. Paul). E. H. P.

*TRANSFIGURATION.* The event in the earthly life of Christ which marks the culminating point in his public ministry, and stands midway between the temptation in the wilderness and the agony in Gethsemane. It is recorded, with very slight variations, by the Synoptists (Matt. xviii. 1-13; Mark ix. 2-13; Luke ix. 28-38), but is omitted by John, like many other events and miracles, as being already known from the gospel tradition.

1. The place mentioned by the Evangelists is "an high mountain," probably in Galilee, where the synoptical Gospels usually move, and where the events immediately preceding and succeeding occurred. The Lord was wont to withdraw to a mountain for prayer (Matt. xiv. 23; Luke xxi. 37; John vi. 15), and several of the greatest events in the history of revelation, from the legislation on Mount Sinai to the ascension from Mount Olivet, took place on mountains. An ancient tradition, first mentioned by Cyril of Jerusalem (Catech. xii. 16) about the middle of the fourth century, locates the Transfiguration on Mount Tabor, the highest in Galilee, which rises, like a truncated cone, 1310 Paris feet from the plain of Esdraelon, two hours and a quarter south of Nazareth, with an unbroken view to the sea of Galilee; but we may not believe the Transfiguration in the Old Testament (Judges iv. 6, 14, viii. 18; Ps. lxxxiv. 12; Jer. xiv. 18), though nowhere in the New. This tradition gained soon almost universal acceptance, while a earlier tradition, which places the event on the Mount of Olives near Jerusalem, stands isolated. It gave rise to the building of churches and monasteries on the summit of Tabor ("to correspond to the three tabernacles which Peter was not permitted to build"), and to the designation of the festival of the Transfiguration in the Greek Church, as Τὸ Θεαματικὸν. There is no evidence in favor of this tradition, but strong and decisive evidence against it; for the summit of Tabor was employed without intermission between the times of Antiochus the Great, 218 B. C., to the destruction of Jerusalem, A. D. 70, as a fortification, and hence unfit for quiet seclusion and meditation (Polybius v. 70; 6; Josephus, Ant. xvi. 6, 3; B. J. i. 8, 7, ii. 20, 6, iv. 18; comp. Ritter, Comparative Geography of Palestine, ii. 313, Eng. trans.: Robinson, Bibl. Rel. iii. 220-225; Herzog, Enzyk. art. Tabor; Truch, Studien in the gospels, p. 122). Modern commentators and critics favor Mount Hermon, the highest mountain-top in Canaanites, or one of the spurs of the Anti-Libanans. Hermon is the highest of all the Lebanon mountains, and was called Jebel es-Shikh, or the Sheikh's mountain.

2. As to the time, the Transfiguration probably took place in the night, because it could be seen to better advantage than in daylight, and Jesus usually went to mountains to spend there the night in prayer (Luke vi. 12, xxi. 37, xxii. 39; Matt. xiv. 23, 24). The apostles were asleep, and are described as having kept themselves awoke through the act of Transfiguration (Mark xvi. 13, Luke ix. 32), and they did not descend till the next day (Luke ix. 51).

3. The actors and witnesses. Christ was the central figure, the subject of the Transfiguration. Moses and Elijah appeared from the heavenly world, as the representatives of the Old Testament, the one of the Law, the other of Prophecy, to do homage to Him who was the fulfillment of both. They were the fittest persons to witness this anticipation of the heavenly glory, not only on account of their representative character, but also on account of their mysterious departure from this world; Moses having died on the mountain, as the rabbinical tradition has it, "of the kisses of Jehovah," in sight of the Holy Land, and out of sight of the world; Elijah having been translated alive from earth to heaven on chariots of fire. Both had endured, like Christ, a forty days' fast, both had been on the holy mount in the visions of God, and now they remained in the glories which He only had "solemnly to consign to his hands, once and for all, in a symbolical and glorious representation, their delegated and expiring power" (Alford). The recognition of the heavenly visitors by the disciples was probably by immediate intuition, and not by subsequent information.

Among the apostles, the three favorite disciples, Peter, James, and John, were the sole witnesses of the scene, as they were also of the raising of Jairus' daughter and of the agony in Gethsemane. Peter alludes to the event, in his second epistle (i. 16-18), where he speaks of having been an eye-witness of the majesty of the Lord Jesus when he was with Him on the holy mount and heard the heavenly voice of the Father declaring Him to be his beloved Son. John, the beloved, of Jesus, probably had in view this among other manifestations of his glory when he testified: "We beheld his glory, the glory as of the only begotten of the Father full of grace and truth" (John i. 14). And his brother James, as the protomartyr among the apostles, was the first to follow Him into that glory, of which the Transfiguration was a foretaste and a sure pledge.

4. The creed itself. The Transfiguration or
transfiguration, or, as the German divines call it, the glorification (Verkleinerung) consisted in a visible manifestation and effulgence of the inner glory of Christ's person, accompanied by an audible voice from heaven declaring Him to be the Son of God in whom the Father is well pleased. The expression used by Matthew and Mark, is that the Lord was transfigured (metamorphothesis). Luke, who wrote for Gentile readers, avoids this expression, perhaps (as Trench suggests), on account of the possible associations of the heathen mythology which would so easily attach themselves to it in the imagination of the Greeks, and he simply tells us "that the fashion of his countenance was altered as He prayed" (ἐγένετο τὸ εἶδος τοῦ προσώπου αὐτοῦ εὐφόρον). But it was not only his countenance which shone in supernatural splendor, even his mantle was white and gleaming," or as Mark, with his characteristic fondness for picturesque details, and borrowing one image from nature, and another from man's art, says, it "became shining, exceeding white as snow, such as no fuller on earth can whiten them." We have analogies in sculpture which may be used as illustrations. When Moses returned from the presence of Jehovah on Mount Sinai, the skin of his face shone (Ex. xxxiv. 29-35), which circumstance Hilary calls a figure of the Transfiguration. Stephen's face in view of his martyrdom shone like the face of an angel (Acts vi. 15). The human countenance is often lit up by joy, and the peace and blessedness of the soul, in moments of festive elevation, shine through it as through a mirror. In the case of Christ, the Transfiguration was the revelation and anticipation of his future state of glory which was concealed under the veil of his humanity in the state of humiliation. The cloud which overshadowed them was bright, or light-like, luminous (φαντασµάτισµον αὐτοῦ, of the same kind as the cloud at the ascension, or the clouds of heaven at the second advent of Christ (Matt. xxiv. 30; Mark xiii. 26; Luke xxi. 27), and symbolized the presence of God (Ex. xiv. 19, xix. 16; Is. xix. 1; Dan. vii. 13).

5. Different Explanations. — The event is described as a vision (βουκαία, Matt. xviii. 9). But this does not exclude its objective reality. It only places it above the sphere of sense and ordinary consciousness. It was an objective appearance, an actual visible visitation. The apostles saw the scene "in spirit" (comp. Acts x. 10; 1 Cor. xiv. 15; Rev. i. 10). They were in an ecstatic state of supernatural chiaroscuro, so to speak, "heavy with sleep," yet "keeping themselves awake throughout:" and Peter did "not know what he said," being only half conscious, overawed with fear and wonder, delighted so as to desire to be hold this glorious state yet "were afraid." (Mt. x. 11) The older orthodox writers describe it as a visible manifestation; some suppose that Moses and Elijah appeared in their own bodies; others that Moses, not yet having risen, assumed a foreign body resembling his former body (so Thomas Aquinas).

(6.) The rationalists resolve the transfiguration into a dream, or a meeting of Jesus with two secret disciples, on. whose account represents it as a pure myth, a poetical imitation of the description of Moses. Ex. xxiv. 1, xxxiv. 29 ff. (Reuss, in his Vie de Jesus, ignores the Transfiguration.) (d.) Ewald regards it as a rare occurrence, but with mythic embellishments. But the circumstantial agreement of the three Evangelists who narrate the event, its definite chronological date, its connection with what follows, and the reference to it by Peter, one of its witnesses (2 Pet. i. 16-18), as well as the many peculiar traits to which no parallel can be found in the transfiguration of Moses, refute the mythical hypothesis and confirm the historical character of the scene.

6. The significance of the Transfiguration. It was, as already remarked, a visible revelation of the hidden glory of the person of Christ in anticipation of his future state of exaltation, and at the same time a prophecy of the future glory of his people after the resurrection, when our mortal bodies shall be conformed to his glorified body (Phil. iii. 21). It served as a solemn inauguration of the history of the passion and final consummation of his work on earth. For, according to Luke's account, the Φοβος, the excessus of Christ, or, especially his death, the great mystery of the atonement for the sins of the world, and the following resurrection and return to the Father, was the topic of conversation between the two visitors from the other world with Jesus. The event bears a relation to the history of Christ's suffering, like that of his baptism in the river Jordan to his active ministry. On both occasions he was brought into contact with representatives of the Old Testament, and strengthened for his course by the solemn approval of the voice from heaven declaring him to be the well-beloved Son of the Father. The Transfiguration no doubt confirmed the faith of the three favorite disciples, and prepared them for the great trial which was approaching. It took away from them, as Leo the Great says (Sermon. xxiv.), the semblance of the cross. It furnished also to us all, a striking proof for the unity of the Old and New Testaments, for personal immortality, and the mysterious intercommunication of the visible and invisible worlds. Both meet in Jesus Christ: he is the connecting link between the O. and N. T., between heaven and earth, between the kingdom of grace and the kingdom of glory. It is very significant that, at the end of the scene, the disciples saw no man save Jesus alone. Moses and Elijah, the law and the promise, types and shadows pass away; the gospel, the fulfillment, of everything, is Christ. But Christ remains, the only one who can relieve the misery of earth and glorify our nature, Christ all in all.

The Transfiguration has given rise to one of the greatest works of art ever conceived by the genius of man, which is the best comment on this supernatural event. The picture under that name was the best work of Raphael, and was carried to his grave at his last breath. He died of the Transfiguration in his early manhood. The original is in St. Peter's at Rome, and has been multiplied in innumerable copies. It represents Christ soaring above the earth and swimming in glory, Moses with the tables of the Law on one hand, Elijah on the other, the three disciples with their characteristic features at their feet, gazing in a half-dreamy state at the central figure, the Sun of righteousness. But this picture, without that ideal peace, the painter represents in startling contrast the scene of the lunatic whose healing follows in the gospel narrative. So in our Christian experience we must ever descend from the heights of festive joy, and the foretaste of heaven which is granted us from time to time, to the hard work and misery of daily life, until we attain to final rest and to that.
TRIAL

In the trial of our Lord before Pilate, it was, in a legal sense, a trial for the offense ledge majestilis; one which, under the Julian Law, following out of that of the Twelve Tables, would be punishable with death (Luke xxiii. 38; John xit. 12, 13; Dig. iv. 1, 3).

2. The trials of the Apostles, of St. Stephen, and of St. Paul before the high-priest, were conducted according to Jewish rules (Acts iv. v. 27, vi. 12, xxii. 30, xxi. 1).

3. The trial it may be so called, of St. Paul and Sibas at Philippi, was held before the procurator, or, as they are called, στρατηγοί, praetors, on the charge of innovation in religion—a crime punishable with banishment or death (Acts xvi. 19, 22; Dict. of Antig. "Colonia," p. 318; Conybeare and Howson, i. 345, 353, 356).

4. The interrupted trial of St. Paul before the provincial Galilæa, was an attempt made by the Jews to establish a charge of the service of idols (Acts xviii. 12-17; Conybeare and Howson, i. 492-496).

5. The trials of St. Paul at Cesarea (Acts xxiv., xxv., xxvi.) were conducted according to Roman rules of judicature, of which the procurators Felix and Festus were the recognized administrators. (a.) In the first of these, before Felix, we observe the employment, by the plaintiffs, of a Roman advocate to plead in Latin. [Herald.] (b.) The postponement (ampliatio) of the trial after St. Paul's reply (Dict. of Antig. "Audit."") p. 647, (c.) The free custody in which the accused was kept, pending the decision of the judge (Acts xxiv. 23-26). The second formal trial, before Festus, was, probably, conducted in the same manner as the former one (Acts xxv. 7). (d.) The change of procurator presents two new features: (a.) the appeal, appellatio or provocatio, to Cæsar, by St. Paul as a Roman citizen. The right of appeal ad populam, or to the tribunes, became, under the Empire, transferred to the emperor, and, as a citizen, St. Paul availed himself of the right to which he was entitled, even in the case of a provincial governor. The effect of the appeal was to remove the case of once to the jurisdiction of the emperor (Conybeare and Howson, ii. 350; Dict. of Antig. "Appellatio," p. 107; Dig. xlix. 1, 4, 3). (k.) The conference of the procurator with "the council" (Acts xxv. 12). This council is usually explained to have consisted of the assessors, who sat on the bench with the procurator as consularii (Suét. Titi. 33; Dict. of Antig. "Asses- sor," p. 143; Græus, On Acts xxv.; Conybeare and Howson, ii. 358, 361). But besides the absence of any previous mention of any assessors (see below), the mode of expression ἀξιόλογοι ἀνεῖστα τῷ συμβαλων seems to admit the explanation of a conference with the deputies from the Senate (τῷ συμβαλλόν). St. Paul's appeal would probably be

TRESPASS-OFFERING. [Six-offering.]

TRIAL. Information on the subject of trials under the Jewish law will be found in the articles on JUDGES and SANDEHTEM, and also in Jesus Christ.

A few remarks, however, may here be added on judicial proceedings mentioned in Scripture, especially such as were conducted before the sages.

1. The trial of our Lord before Pilate was, in a legal sense, a trial for the offense _lege majestilis_; one which, under the Julian Law, following out of that of the Twelve Tables, would be punishable with death (Luke xxiii. 38; John xit. 12, 13; Dig. iv. 1, 3).

2. The trials of the Apostles, of St. Stephen, and of St. Paul before the high-priest, were conducted according to Jewish rules (Acts iv. v. 27, vi. 12, xxii. 30, xxi. 1).

3. The trial it may be so called, of St. Paul and Sibas at Philippi, was held before the procurator, or, as they are called, στρατηγοί, praetors, on the charge of innovation in religion—a crime punishable with banishment or death (Acts xvi. 19, 22; Dict. of Antig. "Colonia," p. 318; Conybeare and Howson, i. 345, 353, 356).

4. The interrupted trial of St. Paul before the provincial Galilæa, was an attempt made by the Jews to establish a charge of the service of idols (Acts xviii. 12-17; Conybeare and Howson, i. 492-496).

5. The trials of St. Paul at Cesarea (Acts xxiv., xxv., xxvi.) were conducted according to Roman rules of judicature, of which the procurators Felix and Festus were the recognized administrators. (a.) In the first of these, before Felix, we observe the employment, by the plaintiffs, of a Roman advocate to plead in Latin. [Herald.] (b.) The postponement (ampliatio) of the trial after St. Paul's reply (Dict. of Antig. "Audit.") p. 647, (c.) The free custody in which the accused was kept, pending the decision of the judge (Acts xxiv. 23-26). The second formal trial, before Festus, was, probably, conducted in the same manner as the former one (Acts xxv. 7). (d.) The change of procurator presents two new features: (a.) the appeal, appellatio or provocatio, to Cæsar, by St. Paul as a Roman citizen. The right of appeal ad populam, or to the tribunes, became, under the Empire, transferred to the emperor, and, as a citizen, St. Paul availed himself of the right to which he was entitled, even in the case of a provincial governor. The effect of the appeal was to remove the case of once to the jurisdiction of the emperor (Conybeare and Howson, ii. 350; Dict. of Antig. "Appellatio," p. 107; Dig. xlix. 1, 4, 3). (k.) The conference of the procurator with "the council" (Acts xxv. 12). This council is usually explained to have consisted of the assessors, who sat on the bench with the procurator as consularii (Suét. Titi. 33; Dict. of Antig. "Assessor," p. 143; Græus, On Acts xxv.; Conybeare and Howson, ii. 358, 361). But besides the absence of any previous mention of any assessors (see below), the mode of expression ἀξιόλογοι ἀνεῖστα τῷ συμβαλων seems to admit the explanation of a conference with the deputies from the Senate (τῷ συμβαλλόν). St. Paul's appeal would probably be

TRAP

A. TREE, 'tree' in Anglo-Saxon, was often used in early English in the sense of "wood" in general, as "vessels of tree" (Chancer), "cup of tree," and also specifically to denote something made of wood, particularly in a bar or beam, a meaning still preserved in the compounds _deod-tree, csrns-tree, chipped-tree._ It has the latter meaning, with a special application, in several passages of the A. V., e. g. Acts v. 30, "whom ye slew and hanged on a tree," rather, "whom ye slew by hanging him on a cross," literally, "on a beam of wood" (νῆσαζων); so Acts x. 39, xiii. 29; Col. iii. 13. (See Dr. Noye's note on Acts v. 30 in his Translation of the N. T.) In like manner the Geneva version reads, in reference to the proposed hanging of Mordecai, "Let them make a tree of fifty cubits high" (Esth. v. 14, comp. vi. 4, vii. 9, 10); and the cross in early English poetry is often called "Tristes tre." (Chancer), "God's tre," "the holy rode tre," or simply "the tree," as in the A. V., 1 Pet. ii. 24. Noah's ark is called in Wyche's version of Midr. x. 4, "a disposable tree," where the A. V. reads "a piece of wood of small value" (LXX. εἰς τὸ χνῶν.) A.
TRIBUTE

in the Latin language, and would require explanation on the part of the judge to the deputation of assessors, who had come into effect the inevitable result of the appeal, namely, the dismissal of the case so far as they were concerned. [APPEAL, Amer. ed.]

6. We have, lastly, the mention (Acts xix. 38) of a judicial assembly which held its session at Ephes- sus, in which occur the terms ἂγορᾶς (i.e. συμφο- νία) ἁγορᾶς, and ἀνθέωςτων. The former denotes the assembly, the latter, sitting of provincial citizens forming the conventus, out of which the procenium, ἄνθοςτων, selected "judges" to sit as his assis- sors. The ἄνθοςτων would thus be the judicial tribunal composed of the procenium and his assis- sors. In the former case, at Casarea, it is difficult to imagine that there could be any conventus and any provincial assessors. There the only class of men qualified for such a function would be the Roman officials attached to the procurator; but, in Proconsular Asia such assemblies are well known to have existed (Dict. of Antig: Provencia, pp. 956, 966, 967).

Early Christian practice discouraged resort to hecaton tribunals in civil matters (1 Cor. vi. 1).

H. W. P.

1. The chief Biblical facts connected with the payment of tribute have already been given under Taxes. A few remain to be added in connection with the word which in the above passage is thus rendered, inaccurately enough, in the L. A. V. The payment of the half-shekel (= halfsheker = two drachmas) was (as has been said) [TAXES], though resting on an ancient precedent (Ex.xxx. 13), yet, in its character as a fixed annual rate, of late origin. It was proclaimed according to Rabbinitic rules on the first of Adar, began to be collected on the 15th, and was due, at latest, on the first of Nisan (Mishna, Shekela, l. f. 7; Surenhusins, pp. 269, 281). It was applied to defray the general expenses of the Temple, the morning and evening sacrifice, the incense, wood, shew-bread, the red heifers, the scape-goat, etc. (Shekel, l. c. in Lightfoot, Hor. Heb. on Matt. xvii. 24). After the de- struction of the Temple it was sequestered by Vespasian and his successors, and transferred to the Temple of the Capitoline Jupiter (Joseph. B. J. vii. 6, § 6, viii. 2).

2. The explanation thus given of the "tribute" of Matt. xvii. 24, is beyond all doubt the true one. To suppose with Chrysostom, Augustine, Maklo- natus, and others, that it was the same as the tribute (κοῦνος) paid to the Roman emperor (Matt. xxii. 17), is at variance with the distinct statements of Josephus and the Mishna, and takes away the whole significance of our Lord's words. It may be questioned, however, whether the full significance of those words is adequately brought out in the popular interpretation of them. As explained by most commentators, they are simply an assertion by our Lord of his Divine Sonship, an implied rebuke of Peter for forgetting the truth which he had so recently confessed (comp. Wordsworth, Al- ford, and others): "Then are the children (κόπτε) free of traffic, and have not won the rights of the Son of the Living God, the Son of the Great King, of the Lord of the Temple, in whose honor men pay the Temple tribute: why, forgetting this, dost thou so hastily make answer as if I were an alien and a stranger? True as this exegesis is in part, it falls to account for some striking facts. (1) The plural, not the singular is used — "then are the children (κόπτε) free of traffic," as contrasted with a class of aliens. (2) The words of our Lord here must be interpreted by his lan- guage elsewhere. The "sons of the kingdom" are, as in the Hebrew speech of the O. T., those who belong to it, in the apostolic language "heirs of the kingdom (Matt. viii. 12, xiii. 38; Jam. ii. 8; Rom. viii. 17), "sons of God," "children of their Father in heaven" (1). The words would follow, "Give unto me for you and them," place the disciple as standing, at least in some degree, on the same ground as his Master. The principle in- volved in the words "then are the children free" extends to him also. Payment is made for both, not on different, but on the same ground.

3. A fuller knowledge of the facts of the case may help us to escape out of the tripe routine of commentators, and to rise to the higher and broader truth implied in our Lord's teaching. The Temple-rate, as above stated, was of comparatively late origin. The question whether the costs of the morning and evening sacrifice ought to be defrayed by such a fixed compulsory payment, or left to the free-will offerings of the people, had been a con- toted point between the Pharisees and Sadducees, and the former had carried the day after a long struggle and debate, lasting from the 1st to the 8th day of Nisan. So great was the triumph in the eyes of the whole party, that they kept the an- niversary as a kind of half festival. The Temple-rate question was to them what the Church-rate question has been to later Conservatives (Dost, Or- charch, etc. and Bttlhlehrer, p. 1. 213), and we have to remember this when we come to the narrative of St. Matthew. In a hundred different ways, on the questions of the Sabbath, of fasting, of unwashed hands and the like, the teaching of our Lord had been in direct antagonism to that of the Pharisees. The collectors of the rate, probably, from the nature of their functions, adherents of the Pharisees party, now come, half-expecting opposition on this point also. Their words imply that he had not as yet laid the rate for the current year. His life of con- stant wandering, without a home, might seem like an evasion of it. They ask tamely, "Will he be on this side, on point, with their Sadducean opponents and refuse to pay it altogether?" The answer of Peter, that of a man who looks on the payment as an essential part of his religion, is, "we have no idea of any higher principle, of any deeper truth, he answers at once, "His Master will of course pay what no other religious Israelite would refuse." The words of his Lord led him to the truth of which the Pharisees were losing sight. The offer- ings of the children of the kingdom should be free, and not compulsory. The Sanhedrim, by making the Temple-rate imply a claim of the Pharisees, were lowering, not raising the religious condition and character of the people. They were placing every Israelite on the footing of a "stranger," not on that of a "son." The true principle for all such offerings was that which St. Paul afterwards asserted, fol- lowing in his Master's footsteps, "not of necessity, for God loveth a cheerful giver." In proportion to the degree in which any man might claim the title of a Son of God, in that proportion was he "free" from this forced exac- tion. Peter, therefore, ought to have remembered that here at least, was one who, by his own co
TRIBUTE-MONEY

TRIPOLIS 3323

ession as the Son of the Living God, was ipso facto exempted.

4. The interpretation which has now been given leads us to see, in these words, a precept as wide and far-reaching as the yet more memorable one, "Render unto Caesar the things that be Caesar's, and unto God the things that be God's." Therefore, in lieu of sanctioning the compulsory payments which human policy has so often stumbled for the "cheerful giving," which alone God loves. But the words which follow condemn also the perversity which leads men to a spurious mortificatio in resisting such payments. "... lest we should offend them.... give unto them for me and thee." It is better to comply with the payment than to startle the weak brethren, or run counter to feelings that deserve respect, or lay an undue stress on a matter of little moment. In such quarrels, paradoxical as it may seem, both parties are equally in the wrong. If the quarrel is to find a solution, it must be by a mutual acknowledgment that both have been mistaken.

5. It is satisfactory to find that some interpreters at least, have drawn near to the true meaning of one of the most characteristic and pregnant sayings in the whole cycle of our Lord's teaching. Augustine (Questions Excerpt. lxxv.), though missing the main point, saw that what was true of the Lord and of Peter was true of all ("Sedator autem, cum pro se et Petri dixit, absolutus exercitare vindicta"). Jerome (ed. lat.) saw in the words a principle extending in some form or other to all believers ("Nos pro illius honore tribuna non reddimus, et quasi filii Regis a vestigibus immunes sumus"), though his words claim an exception which, if true at times of the Christian clergy, has never been extended to the body of Christian laity. Calvin, though adhering to the common explanation, is apparently determined chiefly by his dislike of the inferences drawn from the other explanation by Tipton on the one side, and Analogists on the other, as confining an exception from obedience in matters of taxation to the civil magistrate. Luther (Adnot. in Matt. xviii.) more boldly, while dwelling chiefly on the friendly plea to the Master, which the story represents as passing between the Master and the disciples, sets forth, with his usual acuteness, the true point. "Qui fit (this is his paraphrase of the words of Christ) mi Petre, ut a te petant, cum sis ille filius.... Vade et scito nos esse in aben regno regis et filios regis. Sunt filii summ regnum, in quo summus inespites. Filii regni suaves, sed non hujus regni mundani." Tindal (Marg. Note on Matt. xxi. 26) in like manner, extends the principle, "So is a Christian man free in all things.... yet payeth he tribute, and submitteth himself to all men for his brother's sake." E. H. P.

TRIBUTE-MONEY. [Taxes; Tribute.]

TRIPOLIS (ἡ Τριπόλις). The Greek name of a city of great commercial importance, which served at one time as a point of federal union for Aractus, Sidon, and Tyre. What its Phoenician name was is unknown; but it seems not impossible that it was Kadith, and that this was really the place occupied by Nemo of which Herodotus speaks (ii. 159, iii. 5). Kadith is the Greek form of the Syrian Kadadoth, "the holy," a name of which a

a "Et manus in ea dixit, fraternitate tibi efficiat semper quemvis inter Christianum et discordios suas."
tobacco, galls, and oil, grown in the lower parts of the mountain at the foot of which it stands; and performs, on a smaller scale, the part which was formerly taken by Tryphelis, and adapted for the propagation of the most fertile region (Diehl, Sie. xvi. 41; Strabo, xvi. c. 2; Vossius ad Melan. i. 12: Theophanes, Chronographiae, ad annum 6043).

J. W. B.

TROAS (Tryphelis). The city from which St. Paul first sailed, in consequence of a Divine intimation, to carry the Gospel from Asia to Europe (Acts xvi. 8, 11) — where he rested for a short time on the northward road from Ephesus (during the next missionary journey), in the expectation of meeting Titus (2 Cor. ii. 12, 13) — where on the return southwards (during the same missionary journey) he met those who had preceded him from Philippi (Acts xx. 5, 6), and remained a week, the close of which (before the journey to Assos) was marked by the raising of Eutychus from the dead during the protracted midnight discourse — where, after an interval of many years, the Apostle left (during a journey the details of which are unknown) a cloak and some books and parchments in the house of Carpus (2 Thm. iv. 13) — deserves the careful attention of the student of the New Testament.

The full name of the city was Alexandria Troas (I. xiv. xxxv. 42), and sometimes it was called simply Alexandria, as by Pliny (H. N. x. 34) and Strabo (xiii. p. 597), sometimes simply Troas (as in the N. T. and the Ant. Itin.). See Wesseling, p. 334.). The former part of the name indicates the period at which it was founded. It was first built by Antigonus, under the name of Antigonia Troas, and peopled with the inhabitants of some neighboring cities. Afterwards it was embellished by Lycurgus, and named Alexandria Troas. Its situation was on the coast of Mysia, opposite the S. E. extremity of the island of Tenedos.

Under the Romans it was one of the most important towns of the province of Asia. It was the chief point of arrival and departure for those who went by sea between Macedonia and the western Asiatic districts; and it was connected by good roads with other places on the coast, and in the interior. For the latter see the map in Leake's Asia Minor. The former cannot be better illustrated than by St. Paul's two voyages between Troas and Philippi (Acts xvi. 11, 12, xx. 6), one of which was accomplished in two days, the other in five. At this time Alexandria Troas was a colony with the Jas Helicona. This strong Roman connection can be read on its coins. The Romans had a peculiar feeling connected with the place, in consequence of the legend of their origin from Troy. Suetonius tells us that Julius Caesar had a plan of making Troas the seat of empire (Cas. 79). It may perhaps be inferred from the words of Horace (Carm. iii. 3, 57) that Augustus had some such dreams. And even the modern name Eski-Troas (or old Constantinople) seems to commemorate the thought which was once in Constantine's mind (Zosim. ii. 30: Zonar. xiii. 3), who, to use Gibbon's words, "before he gave a just preference to the situation of Byzantium, had conceived the design of erecting the seat of empire on this celebrated spot, from which the Romans derived their fabulous origin.

The ruins at Eski-Troas are considerable. The most conspicuous, however, especially the remains of the aqueduct of Herodes Atticus, did not exist when St. Paul was there. The walls, which may represent the extent of the city in the Apostle's time, include a rectangular space, extending above a mile from east to west, and nearly a mile from north to south. That which possesses most interest for us is the harbor, which is still distinctly traceable in a basin about 400 feet long and 200 broad. Descriptions in greater or less detail are given by Ptoecke, Chandler, Hunt (in Walpole's Memoirs), Clarke, Prokesch, and Fellows.

J. S. H.

TROGELLIUM. Sameos [which see] is exactly opposite the rocky extremity of the ridge of Mycale, which is called Trogelion in the N. T. (Acts xx. 15) and by Ptolemy (v. 2), and Trogelion by Strabo (xiv. p. 636). The channel is somewhat narrow. Strabo (l. c.) makes it about a mile broad, and this is confirmed by our Admixture Charts (1559 and 1555). St. Paul sailed through this channel on his way to Jerusalem at the close of his third missionary journey (Acts, l. c.). The navigation of this coast is intricate; and it can be gathered from Acts xx. 6, with subsequent notices of the days spent on the voyage, that it was the time of dark moon. Thus the night was spent at Trogelium. It is interesting to observe that a little to the east of the extreme point there is an anchorage, which is still called St. Paul's Port.

J. S. H.

TROOP, BAND. These words have a peculiar signification in many passages of the O. T., which is apt to be overlooked, and the knowledge of which throws a brighter light upon them. They are employed to represent the Hebrew word צְבָא, צְבָא, which has invariably the force of an irregular body of people, large or small, united not for the purpose of defense or regular aggression, like an army, but for the purpose of cruising and plundering. (See Deut. xi. 24; &c.; Ps. lxxvi. 6, 7; &c.; Jer. vi. 22; &c.; Hosea vi. 6; &c., &c.)

G. TROPHIMUS (Τροφίμως, a child). Of the three passages where this companion of St. Paul is mentioned, the first associates him very closely with Tychicus (Acts xx. 4), and the last seems in some degree to renew the association, and in reference to the same geographical district (2 Tim. iv. 20; see ver. 12), while the intermediate one separates him entirely from this connection (Acts xxii. 29).

From the first of these passages we learn that Trophimus, like Tychicus, was a native of Asia (Acts xx. 4), and that the two were among those companions who travelled with the Apostle in the course of the third missionary journey, and during part of the route which he took in returning from Miletus.
TRROUGHS

Macedonia toward Syria. From what we know concerning the collection which was going on at this time for the poor Christians in Judaea, we are disposed to connect these two men with the business of that contribution. This, as we shall see, suggests a probable connection of Trophimus with another circumstance.

Both he and Tychicus accompanied St. Paul from Macedonia as far as Asia (ἀπὸ Ἀσίας ἤκτειναι), but Tychicus seems to have remained there while Trophimus proceeded with the Apostle to Jerusalem. There he was the innocent cause of the tumult in which St. Paul was apprehended, and from which the voyage to Rome was ultimately resolved.

Certain Jews from the district of Asia saw the two Christian missionaries together, and supposed that Paul had taken Trophimus into the Temple (Acts xxii. 27-29). From this passage we learn two new facts, namely, that Trophimus was a Gentile, and that he was a native, not simply of Asia, but of Ephesus.

A considerable interval now elapses, during which we have no trace of either Tychicus or Trophimus; but in the last letter written by St. Paul, shortly before his martyrdom, from Rome, he mentions them both (Τοῖς Ἐφέσιοις δίδωμι τὸν μαθητὴν ὧν ἔχω tην πρόσωπον, 2 Tim. iv. 12: Τρόφιμος ἀπέστειλον ἐν Μιλησίῳ αὐτοῦ, 2 Tim. 4). From the last of these verses we learn that the Apostle had no long time before been in the Levant, that Trophimus had been with him, and that he had been left in infirm health at Miletus. Of the further details we are ignorant; but this we may say here, that while there would be considerable difficulty in accommodating this passage to any part of the recorded narrative previous to the voyage to Rome, all difficulty vanishes on the supposition of two imprisonments, and a journey in the Levant between them.

What was alluded to above as probable, is that Trophimus was one of the two brethren who, with Titus, conveyed the second epistle to the Corinthians (2 Cor. viii. 16-24). The argument is so well stated by Professor Stanley, that we give it in his words: "Trophimus was, like Titus, one of the few Gentiles who accompanied the Apostle; an Ephesian, and therefore likely to have been sent by the Apostle from Ephesus with the first epistle, or to have accompanied him from Ephesus now; he was, as is implied of this brother, the one where praise was in all the churches, well known; so well known that the Jews of Asia Minor at Jerusalem immediately recognized him; he was also especially connected with the Apostle on this very mission of the collection for the poor in Judæa. Thus far would appear from the description of him in Acts xxii. 29. From Acts xx. 4 it also appears that he was with St. Paul on his return from this visit to Corinth" (Stanley's Corinthians, 2nd edit. p. 492).

The story in the Greek Menology that Trophimus was one of the seventy disciples is evidently wrong; the legend that he was beheaded by Nero's orders is possibly true. J. S. H.

* TROUGHS. [Fountain: Well.]

* TROW (Luke xvii. 9) belongs to the period of

our English version, as synonymous with "think," "believe." It is from the A.-S. teócanian, to trust, altered of course to trővan in German. H.

* TRUE-BREAKERS. The Greek as rendered (ἀποκράτω) both in 2 Tim. iii. 3 and Rom. i. 61, means literally "without bittions," and as illusions accompanied truces or treaties, "without truces," i.e. making no truces, and hence im- placable.

R. K. C. E.

TRUMPET. [CORNET.]

TRUMPETS, FEAST OF (ἐἴλασσα, ἐλάσσα). Num. xxix. 1: ηицыα συναθροῖα: τὰς εἰλάσσας τὰς ταβοναρίας. Num. xxix. 24: μαρτυρίας σαλατιὰς: τὰς δεκατριάν μεμονυμένας τιμίους τιμίων (ἐλάσσας; in the Mishna ἐλάσσα, "the beginning of the year"); the feast of the new moon, which fell on the first of Tishri. It differed from the ordinary festivals of the new moon in several important particulars. It was one of the seven days of Holy Convocation. [FEASTS.] Instead of the mere blowing of the trumpets of the Temple at the time of the offering of the sacrifices, it was "a day of blowing of trumpets." In addition to the daily sacrifice and the evening sacrifice on the first of every month [New Moon], there were offered a young bullock, a ram, and seven lambs of the first year, with the accustomed meat-offerings, and a kid for a sin-offering (Num. xxix. 1-6). The regular monthly offering was thus repeated, with the exception of one young bullock.

It is said that both kinds of trumpet were blown in the Temple on this day, the straight trumpet (ἐἴλασσα) and the cornet (ἐλάσσα καὶ ἐλάσσα), and that elsewhere one, even a child, might blow a cornet (Rosenmuller, iv. 7; 2 Corrarp, p. 425: Ross. Hesch. i. 2; JUDEA, vol. ii. p. 1483, note e: Con- nert). When the festival fell upon a Sabbath, the trumpets were blown in the Temple, but not out of it (Rosh. Hesh. iv. 1).

It has been conjectured that Ps. lxxxvi., one of the songs of Asaph, was composed expressly for the Feast of Trumpets. The Psalm is used in the service for the day by the modern Jews. As the third verse is rendered in the LXX., the Vulgate, and the A. V., this would seem highly probable, "Blow up the trumpet in the new moon, the time appointed, on our solemn feast day." But the best authorities understand the word translated new moon (ἐἴλασσα) to mean full moon. Hence the psalm would more properly belong to the service for one of the festivals which take place at the full moon, the Passover, or the Feast of Tabernacles (Gen. Thes. v. v.; Rosenmüller and Hengsten- berg on Ps. lxxxvi.).

Various meanings have been assigned to the Feast of Trumpets. Maimonides considered that its purpose was to awaken the people from their spiritual slumber to prepare for the solemn humiliation of the Day of Atonement, which followed it within ten days. This may receive some countenance from Joel ii. 15, "Blow the trumpet (ἐἴλασσα) in Zion, sanctify a fast, call a solemn assembly."
Some have supposed that it was intended to introduce the seventh or Sabbatical month of the year, which was especially holy because it was the seventh, and because it contained the Day of Atonement and the Feast of Tabernacles (Fagius in Lec. xxiii. 24; Buxt. Syn. Jud. c. xxiv.). Thilo and some early Christian writers regarded it as a memorial of the giving of the Law on Sinai (Thilo, vol. v. p. 46, ed. Tauch.; Hill. in Ps. lxxix.; Theod. Quaest. xxxii. in Lec.). But there seems to be no sufficient reason to call in question the common opinion of Jews and Christians, that it was the festival of the New Year's Day, the first of Tisri, the month which commenced the Sabbatical year and the year of Jubilees. [Duches, ii. 1838 b.]

If the New Moon Festival was taken as the consecration of a natural division of time, the month in which the earth yielded the last ripe produce of the season, and began again to foster seed for the supply of the future, might well be regarded as the first month of the year. The fact that Tisri was the great month for sowing might thus easily have suggested the thought of commemorating on this day the finished work of Creation, when the sons of God shouted for joy (Job xxxviii. 7.). The Feast of Trumpets thus came to be regarded as the minimizing of the birthday of the world (Mishna, Rosh Hash. i. 1: Dupech., De FAST. HEB. ii. 13; Buxt. Syn. Jud. c. xxiv.).

It was an odd fancy of the Rabbis that on this day, every year, God judges all men, and that they pass before Him as a flock of sheep pass before a shepherd (Rosh Hash. i. 2). S. C.

TRYPHENA and TRYPHOSA (Τριφέννα και Τριφόσα [Τριφόσα; Volg. TRYPHENA and TRYPOSHA]). Two Christian women at Rome, who, among those that are enumerated in the conclusion of St. Paul's letter to that city, receive a special salutation, and on the special ground that they are engaged there in "labouring in the Lord." (Rom. xvi. 12). They may have been sisters, but it is more likely that they were fellow-deaconesses, and among the predecessors of that large number of official women who ministered in the Church of Rome at a later period (Euseb. Hist. Eccl. vi. 43); for it is to be observed that they are spoken of as 'the daughters of the church service' (τοις κοινωνιαῖς), while the salutation to Persis, in the same verse, is connected with past service (νηστίσα ἐκκοινωνια). We know nothing more of these two sister-workers of the apostolic time; but the name of these one of them occurs frequently, with other names familiar to us in St. Paul's Epistles, in the apocryphal Acts of Paul and Thecla. There Tryphena appears as a rich Christian widow of Antioch, who gives Thecla a refuge in her house, and sends money to Paul for the relief of the poor. (See Jones, On the Canon, ii. 371, 380.) It is impossible to discern any trace of probability in this part of the legend.

It is an interesting fact that the colobaria of "Caesar's household" in the Vigna Colonia, near Porta S. Sebastiana, contain the name Tryphena, as well as other names mentioned in this chapter, Philobosa and Julia (ver. 15), and also Amplias (ver. 8). Wardsworth's Tour in Italy (1862), ii. 73. J. S. H.

TRYPHON (Τριφών ἀμαρτωλός). A usurper of the Syrian throne. His proper name was Diodotus (Strabo. xvi. 2, 10; App. Syr. c. 68, and the surname Tryphon was given to him, or, according to Appian, adopted by him, after his accession to power. He was a native of Carmania, a fortified place in the district of Amaica, where he was brought up (Strab. l. c.). In the time of Alexander Balas he was attached to the court (App. l. c. διὸς τῶν βασιλέων: Diod. fr. xxi. ap. Mill. Hist. Gr. fr. 17, ἀπολογία: 1 Mac. x. 39, τῶν παρα 'Αλέξ:); but towards the close of his reign he seems to have joined in the conspiracy which was set on foot to transfer the crown of Syria to Ptolemy Philometor (1 Mac. x. 13; Diod. l. c.). After the death of Alexander Balas he took advantage of the unpopularity of Demetrius II. to put forward the claims of Antiochus VI., the young son of Alexander (1 Mac. x. 39; b. c. 140). After a time he obtained the support of Jonathan, who had been alienated from Demetrius by his ingratitude, and the young king was crowned (b. c. 144). Tryphon, however, soon revealed his real designs on the kingdom, and, fearing the opposition of Jonathan, he gained possession of his person by treachery (1 Mac. xii. 39-50), and after a short time put him to death (1 Mac. xiii. 23). As the way seemed now clear, he murdered Antiochus and seized the supreme power (1 Mac. xiii. 26, 32), which he exercised as far as he was able, with violence and rapacity (1 Mac. xiii. 34). His tyranny again encouraged the hopes of Demetrius, who was engaged in preparing an expedition against him (b. c. 141), when he was taken prisoner (1 Mac. xiv. 1-5), and Tryphon retained the throne (1 Mac. xxxvii. 1; Diod. Lyc. xxxii.) till Antiochus VI., the brother of Demetrius, drove him to Dora, from which he escaped to Orthosia in Phocis (1 Mac. xiv. 10-14; 37-39; b. c. 139). Not long afterwards, being hard pressed by Antiochus, he committed suicide, or, according to other accounts, was put to death by Antiochus (Strab. xiv. 3, 2; App. Syr. c. 68, Ἀντίοχος στρατιάς ἀποκτάει ἀπὸ τῶν πατέρων Αχαίας). Jos. Anti. xiii. 7, § 2) adds that he was killed at Amaica, the place where he made his headquarters (Strab. xiv. 2, 10). The authority of Tryphon was evidently very partial, as it appears from the growth of Jewish independence under Simon Maccabaeus; and Strabo describes him as one of the chief authors of Cilician piracy (xiv. 3, 2). His name occurs on the coins of Antiocles VI. (vol. i. p. 118), and he also struck coins in his own name. [ANTIOLCHES; DEMETRIUS.]

TRYPHENA and TRYPHOSA. [TRYPHENA and TRYPHOSA.]

TSEBAOTH. LORD OF

Coin of Tryphon.
where Rom. ζα σμαραγδ. Alex. τά σμαραγδά: TUBAL, but in Is. xvi. 19, Helel). In the ancient ethnological table of Genesis (xxxvi. 21) Tubal is reckoned with Javan and Meshech among the sons of Japheth (Gen. x. 5). The three are again associated in the enumeration of the sources of the wealth of Tyre: Javan, Tubal, and Meshech, brought slaves and copper vessels to the Phoenician markets (Ez. xxvii. 17). Tubal and Javan (Is. xvi. 19), Meshech and Tubal (Ez. xxvii. 21, xxviii. 2), and Tubal-Cabin (Is. xli. 21, xxxix. 1), are nations of the north (Ez. xxxiii. 19, xxxix. 2).

Josephus (Ant. i. 6, § 1) identifies the descendants of Tubal with the Iberians, that is, — not, as Jerome would understand it, Spaniards, but — the inhabitants of a tract of country, between the Caspian and Euxine Seas, which nearly corresponded to the modern Georgia. This approximates to the view of Bochart (Phlib. i. 12), who makes the Moschi and Tiberreni represent Meshech and Tubal. These two Colchian tribes are mentioned together in Herodotus on two occasions: first, as forming part of the 12th sestry of the Persian empire (iii. 34), and again as being in the army of Xerxes under the command of Arimanius the son of Doris (viii. 78). The Moschi and Tiberreni, moreover, were constantly intermarried, and ethnological names of Muskel and Tupali, in the Assyrian inscriptions" (Sir H. Rawlinson in Rawlinson's Hist. i. 555). The Tiberreni are said by the Scholiast on Apollonius Rhodius (ii. 1010) to have been a Sceytian tribe, and they as well as the Moschi are probably to be referred to that Turanian people, who in very early times spread themselves over the entire region between the Caspian and the Euxine, the Persian Gulf and the Caucasus (Rawlinson, Hist. i. 555). In the time of Sargon, according to the inscriptions, Ambris, the son of Khiliya, was hereditary chief of Tubal (the southern slopes of Taurus). He "had cultivated relations with the kings of Mirdak and Vararat (Meshech and Ararat, or the Moschi and Armeni) who were in revolt against Assyria, and this drew upon himself the hostility of the great king" (Tubal, i. 164, note 3). In former times the Tiberreni were probably more important, and the Moschi and Tiberreni, Meshech and Tubal, may have been names by which powerful heroes of Sceytians were known to the Hebrews. But in history we only hear of them as occupying the farther limits of their ancient settlements, and comprising merely a strip of coast along the Euxine. Their neighbors the Chaldaeans were in the same condition. In the time of Herodotus the Moschi and Tiberreni were even more closely connected than at a later period, for in Xenophon we find them separated by the Macedons and Messenians (Anab. v. 3, § 1; Plut. xvi. 4, § 1). When the two tribes became extinct the Tiberreni are extremely difficult to determine with any degree of accuracy. After a part of the 10,000 Greeks on their retreat with Xenophon had embarked at Cerasus (perhaps near the modern Kerosan Dv. Sa), the rest marched along the coast, and soon came to the boundaries of the Messenians (Anab. v. 4, § 2). They traversed the country occupied by this people in eight days and then came to the Chalybes, and after them to the Tiberreni. The eastern limit of the Tiberreni was therefore about 80 or 90 miles along the coast W. of Cerasus.

a Knobel connects these Iberians of the east coast, andrest, and considers the Tiberreni to have been a branch
TUBAL-CAIN

Two days' march through Tibareni brought the Greeks to Cotyora (Ptol. iv. 30). Now from C., Jasoninus to Ison, according to Arrian (Peripol. 10), the distance was 90 stadia, 90 more to Cotyora, and 60 from Cotyora to the river Melanthius, making in all a coast line of 240 stadia, or three days' march. Professor Rawlinson (Her. iv. 181) conjectures that the Tibareni occupied the coast between Cape Yason (Jasonium) and the River Melanthius (Mel i. 50, but if we follow Xenophon, we must place Ison as their western boundary, one day's march from Cotyora, and their eastern limit must be sought some 10 miles east of Mel i. 50, perhaps not far from the modern Aşir, which is 5½ hours from that river. The anonymous author of the Periploi of the Euxine says (339) that the Tibareni formerly dwelt west of Cotyora as far as Pomeonium, at the mouth of the Pomeonion chor. 14 miles east of Patara.

In the time of Xenophon the Tibareni were an independent tribe (Aub. vii. 8, § 29). Long before this they were subject to a number of petty chieftains which was a principal element of their weakness, and rendered their subjugation by Assuria more easy. Dr. Hickeis (quoted by Rawlinson, Herod. i. 589, note 1) has found as many as twenty-four kings of the Tibareni mentioned in the inscriptions. They are said by Apollonius Rhodius to have been rich in flocks (Arg. ii. 377). The traffic in slaves and vessels of copper with which the people of Tubal supplied the markets of Tyre (Ecclus. xxvii. 13) still further connects them with the Tubareni. It is well known that the regions bordering on the Pontus Euxinus furnished the most beautiful slaves, and that the slave traffic was an extensive branch of trade among the Cappadocians (Ptol. iv. 38, § 4; Hor. Ep. i. 6, 30; Pers. Sat. vi. 77; Mart. Ep. vi. 76, 176, &c.). The copper of the Mosynaei, the neighbors of the Tibareni, was celebrated as being extremely bright, and without any admixture of tin (Aris. De Mir. Aneccl., p. 92): and the Chalybes, who lived between these tribes, mined copper for the Cappadocians. We must not forget, too, the copper-mines of Chulvar in Armenia (Hamilton, Ar. Ins. ii. 175).

The Arabic Version of Gen. x. 2 gives Churbans and China for Nesheth and Tubal; in Eusebius (see Bechart) they are Illiria and Thessaly. The Talmudists (Tosefta, fol. 190, 2), according to Bechart, define Tubal as "the home of the Uniited (נֵּאֵבָּב)," whom he is inclined to identify with the Huns (Phylag. iii. 12). They may perhaps take their name from Oenoe, the modern Unioh, a town on the south coast of the Black Sea, not far from Cape Yason (Jasonium), and so in the immediate neighborhood of the Tibareni. In the Targum of R. Joseph on 1 Chr. (ed. Wilkinson) נֵּאֵבָּב is given as the equivalent of Tubal, and Wilkinson renders it by Bithynia. But the reading in this passage, as well as in the Targums of Jerusalem and of Jonathan on Gen. xx., is too doubtful to be followed as even a traditional authority.

W. A. W.

TUBAL-CAIN (תְּבָּלָכָּין) [see below]; G. الطبل: Tubbelân). The son of Lamech the Cainite by his wife Zillah (Gen. iv. 22). He is called "a fashioner of every cutting instrument of copper and iron." The Jewish legend of later times associates him with his father's song: "Jamech was blind," says the story as told by Rashi, "and Tubal-Cain was leading him; and he saw Cain, and he appeared to him like a wild beast, so he told his father to draw his bow, and he slew him. And when he knew that it was Cain his ancestor he smote his hands together and struck his son between them. So he slew him, and his wife withdrew from him, and he concludes them." In this story Tubal-Cain is the "young man" of the song. Rashi apparently considers the name of Tubal-Cain as an appellative, for he makes him director of the works of Cain for making weapons of war, and connects "Tubal" with תְּבָּלָכָּין, tâbél, to season, and so to prepare skillfully. He appears moreover to have pointed it תְּבָּלָכָּין, tâbél, which seems to have been the reading of the LXX and Josephus. According to the writer last mentioned (Ant. i. 2, § 2), Tubal-Cain was distinguished for his prodigious strength and his success in war.

The derivation of the name is extremely obscure. Hassel (Kantteckensungen, ii. 37, quoted by Knobel on Gen. iv. 22) identifies Tubal-Cain with Vulcan; and Bettmann (Mythol. i. 164) not only compares these names, but adds to the comparison the Telchites of Rhodes, the first workers in copper and iron (Strabo, iv. 654), and Dwalian, the demon smith of the Scandinavian mythology. Gesenius proposed to consider it a hybrid word, compounded of the Pers. تَبُلَت, iron slag, or scoria, and the Arabic مُلَت, musu, a smith; but this etymology is more than doubtful. The Scythian race Tubal, who were copper-smiths (Ecclus. xxvii. 13), naturally suggest themselves in connection with Tubal-Cain.

W. A. W.

TUBERIUS (טְבֶרְיוֹרִיס). The "Jews called Tuberiun" lived about Charax, 750 stadia from a strongly-fortified city called Caispis (2 Macc. xii. 17). They were doubtless the same who are elsewhere mentioned as living in the region of Toubou (A. V. Tophou), which name is probably the same with the Toun of the Old Testament.

* TUMULTI, Mark v. 38. [Mourning.]

* TURBANS. [Bonnets.]

TURPENTINE-TREE (περιμύδων, περιμυθός: terebinthus: terebinthus) occurs only once, namely, in the Apocrypha (Eccles. xxiv. 16), where wisdom is compared with the "terpentine-tree that stretcheth forth her branches." The περιμυδων or περιμυθός of the Greeks is the Pistacia terebinthus, terebinth-tree, common in Palestine and the East, supposed by some writers to represent the ἔμμι (מַז) of the Hebrew Bible. [O.A.] The terebinth, though not generally so conspicuous a tree in Palestine as one of the oaks, occasionally grows to a large size. See Robinson (D. R. ii. 222, 223), who thus speaks of it. "The Butam" ("the Arabic name of the terebinth") "is not an evergreen, as often represented, but its small lance-shape leaves fall in the autumn, and are renewed in the spring. The flowers are small, and followed by small oval berries, hanging in clusters from two to five inches long, resembling much those of the vine when the grape is just set. From incisions in the trunk there is said to flow a sort of transparent balsam, constituting a very pure and fine species of turpentine,
TURTLE

with a agreeable odor like citron or jassamine, and a mild taste, and hardening gradually into a transparent gum. In Palestine nothing seems to be known of this product of the battu." The terebith belongs to the Nat. Order Amaranthaceae, the plants of which order generally contain resinous secretions.

W. H.

TURTLE. TURTLE-DOVE (קְרִיְבָא, kor: τρυγείρα: turtur: generally in connection with לְבַנְיָה, lably, dove). [Dove.] The name is phonetic, evidently derived from the plaintive cooing of the bird. The turtle-dove occurs first in Scripture in Gen. xv. 9, where Abram is commanded to offer it along with other sacrifices, and with a young pigeon (לְבַנְיָה, lably). In the Levitical law a pair of turtle-doves, or of young pigeons, are constantly prescribed as a substitute for those who were too poor to provide a lamb or a kid, and these birds were admissible either as trespass, sin, or burnt-offering. In one instance, the case of a Nazarite having been accidentally defiled by a dead body, a pair of turtle-doves or young pigeons were specially enjoined (Num. vi. 10). It was in accordance with the provision in Lev. xii. 6 that the mother of our Lord made the offering for her purification (Luke ii. 24). During the early period of Jewish history, there is no evidence of any other bird except the pigeon having been domesticated, and up to the time of Solomon, who may, with the sheep, have introduced other gallinaceous birds from India, it was probably the only poultry known to the ancients. To this day enormous quantities of pigeons are kept in dove cotes in all the towns and villages of Palestine, and several of the fancy races so familiar in this country have been traced to be of Syrian origin. The offering of two young pigeons must have been one easily within the reach of the poor, and the offerer was acquiesced according to that he had, and not according to that he had not. The admission of a pair of turtle-doves was perhaps a yet further concession to extreme poverty for, unlike the pigeon, the turtle, from its migratory nature and timid disposition, has never yet been kept in a state of free domestication; but being extremely numerous, and resorting especially to gardens for nidification, its young might easily be found and captured by those who did not even possess pigeons.

It is not improbable that the palm-dove (Turtur), which inhabits Tenea) may in some measure have supplied the sacrifices in the wilderness, for it is found in amazing numbers wherever the palm-tree occurs, whether wild or cultivated. In most of the cases of North Africa and Arabia every tree is the home of two or three pairs of these tame and elegant birds. In the crown of many of the date-trees five or six nests are placed together; and the writer has frequently, in a palm-grove, brought down ten brace or more without moving from his post. In such camps as Elin a considerable supply of these doves may have been obtained.

From its habit of pairing for life, and its fidelity for its mate, it was a symbol of purity and an appropriate offering (comp. Plim. Nat. Hist. x. 52). The regular migration of the turtle-dove and its return in spring are alluded to in Jer. viii. 7, "The turtle and the crane and the swallow observe the time of their coming;" and Cant. ii. 11, 12, "The winter is past . . . and the voice of the turtle is heard in our land." So Pliny, "Hyene nutis, a mere vocaulums," and Arist. Hist. Am. ix. 8, "Turtle doves spend the summer in cold countries, the winter in warm ones." Although elsewhere (viii. 5) he makes it hibernate (κοπαῖς). There is, indeed, no more grateful proof of the return of spring in Mediterranean countries than the voice of the turtle. One of the first birds to migrate northwards, the turtle, while other songsters are heard chiefly in the morning, or only at intervals, immediately on its arrival pours forth from every garden, grove, and wooded hill its melodiously yet soothing ditty, uneasingly from early dawn till sunset. It is from its plaintive note doubtless that David in Ps. lxiv. 19, pouring forth his lament to God, compares himself to a turtle-dove.

From the abundance of the dove tribe and their importance as an article of food, the ancients disdained to except species of Columba in their domestication, and probably of many others. Aristotle enumerates five species, which are not all easy of identification, as but four species are now known commonly to inhabit Greece. In Palestine the number of species is probably greater. Besides the rock-dove (Colombus livia, L.), very common on all the rocky parts of the coast and in the inland ravines, where it remains throughout the year, and from which all the varieties of the domestic pigeon are derived, the ring-dove (Columba palmaria, L.) frequents all the wooded districts of the country. The stock-dove (Columba oenas, L.) is as generally, but more sparingly distributed. Another species, allied either to this or to Columba livia, has been observed in the valley of the Jordan, perhaps Col. hannahi, Vig. Sec. Susis, vol. ii. p. 35. The turtle-dove (Turtur arietis, L.) is, as has been stated, most abundant, and in the valley of the Jordan an allied species, the palm-dove, or Egyptian turtle (Turtur arietis, Tenea), is by no means uncommon. This bird, most abundant among the palm-trees in Egypt and North Africa, is distinguished from the common turtle-dove by its ruddy chestnut color, its long tail, smaller size, and the absence of the collar on the neck. It does not migrate, but from the similarity of its note and habits, it is not probable that it was distinguished by the ancients. The large
Indian turtle (Turtur gobata, Linn.) has also been stated, though without authority, to occur in Palestine. Other species, as the well-known colored dove (Turtur visio, L.), have been incorrectly included as natives of Syria. H. B. T.

Tyrannus

*Tyrannus* (Greek, τύραννος). A companion of St. Paul on some of his journeys, and one of his fellow-laborers in the work of the Gospel. He is mentioned in five separate books of the New Testament, and in four cases explicitly, in the fifth very probably, he is connected with the district of Asia. (1.) In Acts xx. 4, he appears as one of those who accompanied the Apostle through a longer or shorter portion of his return-journey from the third missionary circuit. Here he is expressly called (with Tychicus) ἄστεως; but while 'Tychicus' went with St. Paul to Jerusalem (Acts xxii. 25), Tychicus was left behind in Asia, probably at Miletus (Acts xx. 15, 38). (2.) How Tychicus was employed in the interval before St. Paul's first imprisonment we cannot tell; but in that imprisonment he was with the Apostle again, as we see from Col. iv. 7, 8. Here he is spoken of, not only as 'a beloved brother,' but as 'a faithful minister and fellow-servant in the Lord;' and he is to be made known to the Colossians the present circumstances of the Apostle (καὶ κατ' ἑαυτὸν πάσα τὸ αἰτία), and so bring comfort to the Colossians themselves (τας τοποθετήσαι τὰς καρδίας ὑμῶν). From this we gather that diligent service and warm Christian sympathy were two features of the life and character of Tychicus. Colossae was in Asia; but from the fact that of Onesimus who is mentioned immediately afterwards, it is said, εἰς ἱερον ἐποιεῖτο, whereas Tychicus is not so styled, we naturally infer that the latter was not a native of that city. These two men were doubtless the bearers both of this letter and the following, as well as to Philemon. (3.) The language concerning Tychicus in Eph. vi. 21, 22, is very similar, though not exactly in the same words. And it is the more important to notice this passage carefully, because it is the only personal allusion in the epistle, and is of some considerable value as a subsidiary argument for its authenticity. If this was a circular letter, Tychicus, who bore a commission to Colossae, and who was probably well known in various parts of the province of Asia, would be a very proper person to see the letter duly delivered and read. (4.) The next references are in the Pastoral Epistles, the first in chronological order being Tit. iii. 12. Here St. Paul (writing possibly from Ephesus) says that it is probable he may send Tychicus to Crete, about the time when he himself goes to Nicopolis. (5.) In 2 Tim. iv. 12 (written at Rome during the second imprisonment), he says, 'I am herewith sending Tychicus to Ephesus.' At least it seems natural with Dr. Wordsworth, so to render τάξις τῶν, though Bp. Elliott's suggestion is also worth considering, that this mission may have been connected with the carrying of the first epistle. (See their notes on the passage.) However this may be, we see this disciple at the end, as we saw him at the beginning, connected locally with Asia, while also cooperating with St. Paul. We have no authentic information concerning Tychicus in any period previous to or subsequent to these five Scriptural notices. The tradition which places him afterwards as bishop of Unedon in Bithynia is apparently of no value. But there is much probability in the conjecture (Stanley's *Christianities*, 2d ed. p. 452), that Tychicus was one of the two 'brethren' (Trophimus being the other) who were associated with Titus (2 Cor. viii. 16-24) in conducting the business of the collection for the poor Christians in Judea. As arguments for this view we may mention the association with Trophimus, the probability that both were Ephesians, the occurrence of both names in the Second Epistle to Timothy (see 2 Tim. iv. 20), Chiefly geographical agreement with the circumstances of the third missionary journey, and the general language used concerning Tychicus in Colossians and Ephesians. [Asia] *Ephesus: Trophimus.*

J. S. H.

**Tyrannus** (Greek, τυραννος, tyrant). The name of a man in whose school or place of residence Paul taught the Gospel for two years, during his sojourn at Ephesus (see Acts xix. 9). The halls or rooms of the philosophers were called ἀμφιθέατρα among the later Greeks (Liddell and Scott, s. v.); and as Luke applies that term to the αὐλή or courtyard in this instance, the presumption is that Tyrannus himself was a Greek, and a public teacher of philosophy or rhetoric. He and Paul must have occupied the room at different hours; but whether he hired it out to the Christians or gave it to them after hours (as it is also the case he may have been friendly to them) is left uncertain. Meyer is disposed to consider that Tyrannus was a Jewish rabbi, and the owner of a private synagogue or house to teaching (ΤΥΡΑΝΝΟΣ). But, in the first place,
TYRE

ais Greek name, and the fact that he is not mentioned as a few or proselyte, disagree with that supposition; and, in the second place, as Paul re- paired to this man’s address after having been com- pelled to leave the Jewish synagogue (Acts xix. 9), it is evident that he took this course as a means of gaining access to the heathen; an object which he would naturally seek through the operation of one of their own number, and not by associating himself with a Jewish congregation. There can be no doubt that the Greek Jews, as well as the Gentile, believed that by submitting himself to the influence of the city, he might become the resident of the Jewish faith.

2 Sam. xxiv.

In speaking of him merely as a cer-
tain Tyrean (Τήφανιον τιμωτόν), Luke indicates certainly that he was not a believer at first; though it is natural enough to think that he may have become such as the result of his acquaintance with the Apostle. Hensen (Der Apostel Paulus, p. 218) throws out the idea that the half may have belonged to the authorities of the city, and have derived its name from the original proprietor.

II. B. II.

TYRE (Τήφανιον; τύφαος; Tyre: Týra; Týros: Tyre) Jos. xix. 29 [ii Týra]; 2 Sam. xxiv 7.1. xxii. 11. 2. Ez. xxvi. 15. xxvii. 2. 3c. A celebrated commercial city of antiquity, situated in Phœnicia, on the eastern coast of the Mediterranean Sea, in latitude 34° 17' N. (Admiral Soutre’s Mediterranean, p. 463).

Its Hebrew name — Tôr — signifies a rock; which well agrees with the site of Sûr, the modern town, on a rocky peninsula, formerly an island. From the word — Tôr — were derived two names of the city, in which the first letters differed from each other, though both had a feature of their common parent: 1st, the Aramaic word Tòra, whence the Greek word Tûros, probably pronounced Tyros, which finally prevailed in Latin, and with slight changes, in the modern languages of the West; and, 2dly, Sûra, or Sarra, which occurs in Phœn. (Tyre), li. 6, 88, "parumram ex Sûra tibi attuli"); and which is familiar to scholars through the well-known line of Virgil, ut genua libat, et Sûrae dormient ostre " (Georg. ii. 508; comp. Ant. Gall. xiv. 6, Sullis Italics, xv. 263; Juvenal, x. 30). According to a passage of Pothinus (ad Virg. Georg. ii. 115), as quoted by Mr. Grote (History of Greece, 353), the form — Sûra — would seem to have occurred in one of the Greek epics now lost, which passed under the name of Homer. Certainly, this form accords best with the modern Arabic name of the place, PALÆTROY, or OLD TYRE. There is no doubt that, previous to the siege of the city by Alexander the Great, Tyre was situated on an island; but, according to the tradition of the inhabitants, if we may believe Justin (xi. 10), there was a city on the mainland before there was a city on the island; and the tradition receives some color from the name of Palætroy, or Old Tyre, which was borne in Greek times by a city on the continent, 30 stadia to the south (Strabo, xii. 11, 24). But a difficulty arises in supposing that Palætroy was built before Tyre, as the word Tyre evidently means "a rock," and few persons who have visited the site of Palætroy can seriously suppose that any rock on the surface there can have given rise to the name.

To escape this difficulty, Hengstenberg makes the suggestion that Palætroy meant Tyre that formerly existed: "que quoniam Tyrum nomen est antiquissimum et est illud, a quo nomen Tyra sunt prope Puteoli introdutum ad finem maioris partis urbium Tyri, quae a Nebuchadnezzare distinguitur a Tyra, quae Tyre, quae continuer e fint in existentiam (De rebus Tyriouum, p. 29). Movers, justly deeming this explanation unlikely, suggests that the original inhabitants of the city on the mainland possessed the island as part of their territory, and named the city on the characteristic features of the island, though the island itself was not then inhabited (De Phœniciae Alteritam, vol. ii. pt. i. p. 173). This explanation is possible; but other explanations are equally possible. For example, the Phœnician name of it may have been the Old City; and this may have been translated — Palætroy — in Greek. Or, if the inhabitants of the mainland migrated to the island, they may afterwards, at some time or other, have given to the city which they left the name of Old Tyre, without its being necessarily implied that the city had ever borne simply the name of Tyre. Or some accidental circumstance, now beyond the reach of conjecture, may have led to the name; just as for some unaccountable reason Tammuzea, or Old Rome, is called Retro in the name of the city. As for its origin, it is stated on the high authority of Mr. H. E. Bun- bury) to rurines of the age of Caracalla situated be- tween the ruins leading to Fruscilia and Alumna, although there are no traces there of any Old Town, and there is not the slightest reason to suppose that there is any historical foundation whatever for the name. And this again would tally with Mr. Grote’s remark, which observes (c. c.) that perhaps the Phœnician name which the city on the main- land bore may have been something resembling Pale-Troy in sound but not coincident in mean- ing. It is important, however, to bear in mind that this question regarding Palætroy is merely archaeologica. and that nothing in Biblical history is affected by it. Nebuchadnezzar necessarily be- sieged the portion of the city on the mainland, as he had no vessels with which to attack the island; but it is reasonably certain that, in the time of Isaiah and Ezekiel, the heart or core of the city was on the island. The city of Tyre was conscripted to Hercules (Melkarth) who was the principal object of worship to the inhabitants (Quintus Curtius, iv. 2. Strabo, xi. p. 557); and the city in later history says that the temple on the island was the name of ancient of all temples within the territory of man- kind (ii. 16). It cannot be doubted, therefore, that the island had long been inhabited. And with this agree the expressions as to Tyre being "in the midst of the sea" (Ez. xvii. 25, 26); and even the threat against it that it should be made like the top of a rock to spread nets upon (see Den Vigne’s Chronologie de l’Histoire Sainte, Berlin, 1758, vol. ii. p. 25). As, however, the space on the island was limited, it is very possible that the population on the mainland may have exceeded the population on the island (see Movers, l. e. p. 81).

Whether built before or later than Palætroy, the renowned city of Tyre, though it held claims to a very high city from the characteristics of Ezekiel 14: Quintus Curtius, iv. 41, is not mentioned either

a According to Herodotus, the priests at Tyre told him that their city had been founded 2,300 years be- fore his visit. Supposing he was at Tyre in 430 B.C., this would make the date of its foundation 2,530 B.C. ALEXANDER makes the more sober statement, probably founded on Memnon’s history, that it was founded 230 years before the commencement of the building of Solomon’s temple. Under any circumstances Josephus could not, with his ideas and chronology, have accepted the date of the Tyrian priests: & then Tyre

TYRE

-231-
TYRE

Hence for, of this Tyrian city (which was known by the generic name of Sidonians (Judg. xviii. 7; Is. xxiii. 2, 4, 12; Josh. xiii. 26; Ez. xxx. 30: and this name undoubtedly included Tyrians, the inhabitants being of the same race, and the two cities being less than 20 English miles distant from each other. Hence when Solomon sent to Hiram king of Tyre for cedars-trees out of Lebanon to be hewn by Hiram's subjects; he reminds Hiram that "there is not among us any that can skill to hew timber like the Sidonians"

(1 K. v. 6.) Hence Virgil, who, in his very first mention of Carthage, expressly states that it was founded by colonists from Tyre (L.En. i. 12), afterwards, with perfect propriety and consistency, calls it the Sidonian city (L. En. i. 67, 678, iv. 545). See Des Vergnies, L. c. p. 255. And in like manner, when Sidonians are spoken of in the Homeric Poems (H. vi. 290, xxiii. 743; Od. iv. 84, xviii. 424), this might comprehend Tyrians; and the mention of the city Sidon, while there is no similar mention of Tyre, would be fully accounted for — if it were necessary to account for such a circumstance at all in a poem — by Sidon's having been in early times more flourishing than Tyre. It is worthy, likewise, of being noted, that Tyre is not mentioned in the Pentateuch; but here, again, though an inference may be drawn against the importance, no inference can be legitimately drawn against the existence, of Tyre in the times to which the Pentateuch refers.

In the Bible, Tyre is named for the first time in the book of Joshua (xix. 29), where it is adverted to as a fortified city (in the A. V. "the strong city"), in reference to the boundaries of the tribe of Asher. Nothing historical, however, turns upon this mention of Tyre; for it is indisputable that the tribe of Asher never possessed the Tyrian territory. According to the injunctions of the Pentateuch, indeed, all the Canaanish nations ought to have been exterminated; but, instead of this, the Israelites dwelt among the Sidonians or Phoenicians, who were inhabitants of the land (Judg. i. 31, 32), and never seem to have had any war with that intelligent race. Subsequently, in a passage of Samuel (2 Sam. xxiv. 7), it is stated that the enumerators of the census in the reign of David went in pursuance of their mission to Tyre, amongst other cities, which must be understood as implying, not that Tyre was subject to David's authority, but merely that a census was thus taken of the Jews resident there. But the first passages in the Hebrew historical writings, or in ancient history generally, which afford glimpses of the actual condition of Tyre, are in the book of Samuel (2 Sam. v. 11), in connection with Hiram king of Tyre sending cedar-trees and workmen to David, for building him a palace; and subsequently in the book of Kings, in connection with the building of Solomon's temple.

One point at this period is particularly worthy of attention. In contradistinction from all the other most celebrated independent commercial cities out of Phoenicia in the ancient and modern world, Tyre was a monarchy and not a republi city, and, notwithstanding its merchant princes, who might have been deemed likely to favor the establishment of an aristocratical commonwealth, it continued to preserve the monarchical form of government until its final loss of independence. Another point is the skill in the mechanical arts which seems to have been already attained by the Tyrians. Under this head, admission is not specially made to the excellence of the Tyrians in telling trees; for through vicinity to the forests of Lebanon, they would as naturally have become skilled in that art as the backwoodsmen of America. But what is peculiarly noteworthy is that Tyrians had become workers in brass or copper to an extent which implies considerable advancement in art. In the enumeration of the various works in brass executed by the Tyrian artists whom Solomon sent for, there are lilies, palm-trees, even, lions, and cherubim (1 K. vii. 13-45). The manner in which the cedar-wood and fir-wood was conveyed to Jerusalem is likewise interesting, partly from the similarity of the sea voyage to what may commonly be seen on the Rhine at the present day, and partly as giving a vivid idea of the really short distance between Tyre and Jerusalem. The wood was taken in floats to Joppa (2 Chr. ii. 16; 1 K. v. 9), a distance of less than 74 geographical miles. In the Mediterranean during summer there are times when this voyage along the coast would have been perfectly safe, and when the Tyrians might have reckoned confidently, especially at night, on light winds to fill the sails which were probably used on such occasions. From Joppa to Jerusalem the distance was about 32 miles; and it is certain that by this route the whole distance between the two celebrated cities of Jerusalem and Tyre was not more than 100 or geographical, or about 122 English miles. Within such a comparatively short distance (which by land, in a straight line, was about 29 miles shorter) it would be easy for two sovereigns to establish personal relations with each other; more especially as the northern boundary of Solomon's kingdom, in one direction, was the southern boundary of Phoenicia. Solomon and Hiram may frequently have met, and thus laid the foundations of a political alliance in personal friendship. If by messengers they sent riddles and problems for each other to solve (Joseph. Ant. viii. 5, § 34; c. Apion. i. 17), they may previously have had, on several occasions, a keen encounter of wits in convivial intercourse. In this way, likewise, Solomon may have become acquainted with the Sidonian women who, with those of other nations, seduced him to Polytheism and the worship of Ashtore in his old age. Similar remarks apply to the circumstances which may have occasioned previously the strong affection of Hiram for David (1 K. v. 1).

However this may be, it is evident that under Solomon there was a close alliance between the Hebrews and the Tyrians. Hiram supplied Solomon

would have been founded before the era of the Deluge, see an instructive passage as to the chronology of Josephus in Ant. viii. 3, § 1.

It may be interesting to compare the distance from which the limestone was brought with which St. Paul's Cathedral was built. It was hewn from quarries in the Isle of Portland, and was sent to London round the North Foreland up the river Thames. The distance to London in a straight line from the North Foreland alone is of itself about twelve miles greater than from Tyre to Joppa; while the distance from the Isle of Portland to the North Foreland is actually three times as great.
TYRE

with cedar wood, precious metals, and workmen, and gave him sailors for the voyage to Ophir and India, while on the other hand Solomon gave Hiram supplies of corn and oil, cedal to him some cities, and permitted him to make use of some havens on the Red Sea (1 K. ix. 11-14; 26-28, x. 22). These friendly relations survived for a time the disastrous secession of the Ten Tribes, and a century later Ahab married a daughter of Ethbaal, king of the Sidonians (1 K. xvi. 31), who, according to Menan- der (Josephus, Ant. viii. 13, § 2), was daughter of Ethbaal, king of Tyre. As she was zealous for her national religion, she seems to have been regarded as an abomination by the pious worshippers of Jehovah; but this led to no special prophecical denunciations against Tyre. The case became dif- ferent, however, when mercantile rivalry induced the Tyrians and the neighboring Phoenicians to lay Hebrew captives from their enemies and to sell them as slaves to the Greeks (PHILO, iii. 2518 b) and Edomites. From this time commenced denunciations, and, at first, threats of retaliation (Jos iii. 4-8; Amos i. 9, 10); and indeed, though there might be some who were incapable of the friendly friendship between the two nations. But the Be- likkood of the denunciations being fulfilled first arose from the progressive conquests of the Assyrian monarchs. It was not probable that a powerful, victorious, and ambitious neighbor could resist the temptation of endeavoring to subjugate the small strip of land between the Lebanon and the sea, so insufficient in extent, but overflowing with so much wealth, which by the Greeks was called Phoenicia. Accordingly, when Shalmaneser, king of Assyria, had taken the city of Samaria, he had conquered the kingdom of Israel and carried its inhabitants into captivity, he turned his arms against the Phoenician cities. At this time, Tyre had reached a high point of prosperity. Since the reign of Hiram, it had planted the splendid colony of Carthage (143 years and eight months, Josephus says, after the building of Solomon's Temple, c. Apion. i. 18); it possessed the island of Cyprus, with the valuable mines of the metal "copper" (so named from the island); and, apparently, the city of Sidon was subject to its sway. But Shalmaneser seems to have taken advantage of a revolt of the Tyrians in 860 B.C. (Homer, Od. ii. 6, 7), to achieve the end of his contemporaries who translated the archives of Tyre into the Greek language (see Josephus, Ant. ix. 14, § 2): "Ethbaal reigned 36 years (over Tyre). This king, upon the revolt of the Kittaeans (Cyprians), sailed with a fleet against them, and reduced them to submission. On the other hand, the king of the Assyrians attacked in war the whole of Phoenicia, and 600 ships, and turned back. On this, Sidon and Ace (i.e., Akko or Acre) andPalestyn revolted from the Tyrians, with many other cities which delivered themselves up to the king of Assyria. Accordingly, when the Tyrians would not submit to him, the king returned and fell upon them again, the Phoenicians having fur- nished him with 60 ships and 800 rowers. Against these the Tyrians sailed with 12 ships, and, dis- persing the fleet opposed to them, they took five hundred men prisoners. The reputation of all the citizens in Tyre was hence increased. Upon this the king of the Assyrians, moving off his army, placed guards at their river and aqueducts to pre- vent the Tyrians from drawing water. This con- tinued for five years, and still the Tyrians held out, supplying themselves with water from wells." It is in reference to this siege that the prophecy against Tyre in the writings entitled Isaiah, chap. xxviil, was uttered, if it proceeded from the Prophet Isaiah himself: but this point will be again noticed.

After the siege of Tyre by Shalmaneser (which must have taken place not long after 721 b. c.), Tyre remained a powerful state with its own kings (Jer. xxvii, xxviii; Ez. xxviii; xxvii-12), remark- able for its wealth, with territory on the mainland, and protected by strong fortifications (Ez. xxviiil. 5, xxvii. 4, 6, 8, 16, 12, xxvii. 11; Zech. ix. 3). Our knowledge of its condition thenceforward until the siege by Nebuchadnezzar depends entirely on var- ious notices of it by the Hebrew prophets; but some of these notices are singularly full, and, especial- ly, the twenty-seventh chapter of Ezekiel furn- ishes us, on some points, with details such as have scarcely come down to us respecting any one city of antiquity, excepting Rome and Athens. One point especially arrests the attention, that Tyre, like its splendid daughter Carthage, employed &crnary soldiers (Ez. xxvii. 10, 11). This has been the general tendency in commercial cities on account of the high wages which may be obtained by the proletariat in a thriving community, compared with the ordi- nary pay of a soldier; and Tyre had been unable to resist the demoralizing temptation. In its service there were Phoenicians from Arvad, Ethiopians obtained through the commerce of Egypt, and hardy mountaineers from Persia. This is the first time that the name of Persia occurs in the remains of ancient literature, before its foundations as a great monarchy on the ruins of the Chaldean empire. We may conceive them like the Swiss, who, poor, faithful, and brave, have during many centuries, until the last few years, deemed enlistment in foreign service a legitimate source of gain inde- pendently, however, of this fact respecting Tyrian mercenary soldiers, Ezekiel gives interesting details respecting the trade of Tyre. On this head, without attempt ing to exhaust the subject, a few lead ing points may be noticed. The first question is as to the countries from which Tyre obtained the precious metals; and it appears that its gold came from Arabia by the Persian Gulf (v. 22), just as in the time of Solomon it came from Arabia by the Red Sea (OP. cit.). Whether the Arabian mer- chants, who used to come by the land route, were in classical times (Horace, Od. i. 29, 1), obtained their gold by traffic with Africa or India, or whether it was the product of their own country, is uncertain; but as far as the latter alternative is con- cerned, the point will probably be cleared up in the progress of geological knowledge. On the other hand, the silver, iron, lead, and tin of Tyre came from a very different quarter of the world, namely, from the south of Spain, where the Phoenicians had established their settlement of Tarshish, or Far- tessus. As to copper, we should have presumed that it was obtained from the valuable mines in Cyprus; but it is mentioned here in conjunction with Javan, Tubal, and Meshek, which points to the districts on the south of the Black Sea, in the neighborhood of Armenia, in the southern line of the Caucasus, between the Black Sea and the Caspian. The country whence Tyre was supplied with wheat was Palestine. This point has been already noticed elsewhere [PHILO, iii. 2518 a] as help- ing to explain why there is no instance on record of war between Tyre and the Israelis. It may be added that the value of Palestine as a wheat- country to Tyre was greatly enhanced by its pro-
TYRE

PYRE

inuity, as there was scarcely a part of the kingdom of Israel on the west of the river Jordan which was distant more than a hundred miles from that great commercial city. The extreme points in the kingdom of Judah would be somewhat more distant; and the wheat probably came from the northern part of Palestine. Tyre likewise obtained from Palestine oil, honey, and salt, but not wine apparently, notwithstanding the abundance of grapes and wine in Judah (Gen. xix. 11). The wine was imported from Damascus, and was called wine of Helson, which was probably not the product of the country adjoining the celebrated city of that name, but came from the neighborhood of Damascus itself (see Porter's *Handbook for Syria*, vol. ii. p. 493; compare Atheniens, i. 51). The Bedawin Arabs supplied Tyre with lands and runs and goats, for the rearing of which their mode of life was so well adapted. Egypt furnished linen for sails and double-fur or other purposes; and the dye from shell-fish, which afterwards became such a source of profit to the Tyrians, was imported from the Peloponnesus (compare the "Laconicas purpuras" of Horace, *Od.* ii. 18, 7, and Pliny, *ix.* 40). Lastly from Dedan in the Persian Gulf, an island occupied possibly by a Phoenician colony, horns of ivory and ebony were imported, which must originally have been obtained from India (Ex. xxvii. 19, 11, 22, 12, 19, 17, 18, 21, 27).

In the midst of great prosperity and wealth, which was the natural result of such an extensive trade (Ex. xxviii. 4), Nebuchadnezzar, at the head of an army of the Chaldees, invaded Judah, and captured Jerusalem. As Tyre was so near to Jerusalem, and as the conquerors were a fierce and formidable race (Hab. i. 6), led by a general of unlimited capacity, who had not long before humbled the power of the Egyptians, it would naturally be supposed that this event would have excited alarm and terror amongst the Tyrians. Instead of this we may infer from Ezekiel's statement (xxvi. 2) that their predominant feeling was one of exultation. At first sight this appears strange and almost incomprehensible; but it is rendered intelligible by some previous events in Jewish History. Only 34 years before the destruction of Jerusalem, commenced the celebrated Reformation of Josiah, b. c. 622. This momentous religious revolution, of which a detailed account is given in two chapters of the book of Kings (2 K. xxii., xxiii.), and which cannot be too closely studied by any one who wishes to understand the Jewish Annals, fully explains the exultation and confidence of the Tyrians. In that Reformation Josiah hadaped insults on the gods who were the objects of Tyrian veneration and love, he had consumed with fire the sacred vessels used in their worship, he had burnt their images and defiled their high places—not excepting even the high place near Jerusalem, which Solomon the friend of Hiram had built to Ashdorth the Queen of Heaven, and which for more than 350 years had been a striking memorial of the reciprocal good-will which once united the two monarchs and the two nations. Indeed, he seemed to have endeavored to exterminate their religion, for in Samaria (2 K. xxiii. 20) he had slain upon the altars of the high places all their priests. These acts, although in their ultimate results they may have contributed powerfully to the diffusion of the Jewish religion must have been regarded by the Tyrians as a series of sacrilegious and abominable outrages; and we can scarcely doubt that the death in battle of Josiah at Megido, and the subsequent destruction of the city and Temple of Jerusalem were hailed by them with triumphant joy, as instances of Divine retribution in human affairs.

This joy, however, must soon have given way to other feelings, when Nebuchadnezzar invaded Phoenicia, and laid siege to Tyre. That siege lasted thirteen years (Joseph. c. Apion. i. 22), and it is still a disputed point whether it will be noticed separately in this article, whether Tyre was actually taken by Nebuchadnezzar on this occasion. However this may be, it is probable that, on some terms or other, Tyre submitted to the Chaldees. This would explain, amongst other points, an expedition of Apries, the Pharaoh-Hophra of Scripture, against Tyre, which probably happened not long after, and which may have been dictated by obvious motives of self-defense in order to prevent the naval power of Tyre becoming a powerful instrument of attacking Egypt in the hands of the Chaldees. In this expedition Apries besieged Sidon, fought a naval battle with Tyre, and reduced the whole of the coast of Phoenicia, though this could not have lasted more than a year (Herod. ii. 51; Ptol. *Hist. i.* 22; *Diss. Phr. i.* 51). The rule of Nebuchadnezzar over Tyre, though real, may have been light, and in the nature of an alli- ance; and it may have been in this sense that Mer- lend, a subsequent Tyrian king, was sent for to Babylon (Joseph. c. Apion. i. 21). During the Persian domination the Tyrians were subject in name to the Persian king, and may have given him tribute. With the rest of Phoenicia, they had submitted to the Persians, without striking a blow; perhaps, through hatred of the Chaldees; perhaps, solely from prudential motives. But their connection with the Persian king was not dishonourable. Thus, when Cambyses ordered them to join in an expedition against Carthage, they refused compliance, on the ground of their соmmercial engagements and pa- rental relation to that colony: and Cambyses did not deem it right to use force toward them (Herod. iii. 19). Afterwards they fought with Persia against Greece, and furnished vessels of war in the expedition of Xerxes against Greece (Herod. vii. 98); and Mephen, the son of Sirom the Tyrian, is mentioned amongst those who, next to the con- mander, were the most renowned in the fleet. It is worthy of notice that at this time Tyre seems to have been inferior in power to Sidon. These two cities were less than twenty English miles distant from each other; and it is easy to conceive that in the course of centuries their relative importance might fluctuate, as would be very possible in our own country with two neighboring cities, such for example, as Liverpool and Manchester. It is possi- bly also that Tyre may have been seriously weakened by its long struggle against Nebuchadnezzar. Un- der the Persian dominion, Tyre and Sidon sup- plied cedar wood again to the Jews for the building of the Second Temple; and this wood was sent by sea to Joppa, and thence to Jerusalem, as had been the case with the materials for the First Temple in the time of Solomon (Ezra iii. 7). Un-

a It was owing to this Reformation of Josiah that when the Jews were carried into captivity, their Nebu- chadnezzar a generation had arisen untainted by idolatry, and yet many of them probably free from the in- tense scrupulosity in ceremonial observance which prevailed subsequently.
GER the Persians likewise Tyre was visited by an historian, from whom we might have derived valuable information respecting its condition (Herod. ii. 44.). But the information actually supplied by him is scanty, as the motive of his voyage seems to have been solely to visit the celebrated temple of Melkarth (the Phoenician Hercules), which was situated in the island, and was highly venerated. He gives no details as to the city, and merely specifies two columns which he observed in the temple, one of which was inscribed with the name of this Jupiter, the other of the Phoenician Melkarth. 

Subsequently, Gesenius, the compiler of the "Lexicon Tychaeum," has attempted to explain the name of the city, from its supposed resemblance to certain words in the Homeric poems; but the attempt is vain, for the circumstances which the poet describes of the Tyrian hero do not resemble those of the Tyrian city at all.

Towards the close of the following century, i.e. 332, Tyre was assaulted for the third time by a great conqueror; and if some uncertainty hangs over the siege by Nebuchadnezzar, the results of the siege by Alexander are clear and undeniable. It was essential to the success of his military plans that the Phoenician fleet should be at his command, and that he should not be liable through their hostility to have his communications by sea with Greece and Macedonia suddenly cut off; and he accordingly summoned all the Phoenician cities to submit to his rule. All the rest of them, including Aradsus, Byblus, and Tyre, in league with Sidon and Carthage, sent the seamen of those cities in the Persian fleet brought away their ships to join Tyre, alone, calculating probably at first on the support of those seamen, refused to admit him within its walls; and then ensued a memorable siege which lasted seven months, and the success of which was the greatest of all the achievements which Alexander up to that time had to his credit. It is not necessary to give here the details of that siege, which may be found in Arrian and Quintus Curtius, and in all good Grecian histories, such as those of Bishop Thirwall and Mr. Grote. It may be sufficient to say, that at that time Tyre was situated on an island nearly half a mile from the mainland—that it was completely surrounded by prodigious walls, the loftiest portion of which on the side facing the mainland reached a height not less than 150 feet; and that notwithstanding his persevering efforts, he could not have succeeded in his attempt, if the harbor of Tyre to the north had not been blocked by the Cyprians, and that to the south by the Phoenicians, thus affording an opportunity to the besieging party, which was joined by an enormous artificial mole. Moreover, owing to internal disturbances, Carthage was unable to afford any assistance to its parent state.

The immediate results of the capture by Alexander were most disastrous to it, as its brave defenders were put to death: and, in accordance with the barbarous policy of ancient times, 20,000 of its inhabitants, including slaves, free females and free children were sold as slaves (Arrian, iv. 24, § 9; Dio, lxxxvi. 46). It gradually, however, recovered its prosperity through the immigration of fresh settlers, though its trade is said to have suffered by the vicissitude and rivalry of Alexandria. Under the Macedonian successors of Alexander, it shared in the fortunes of the Seleucids, who bestowed on it many privileges; and there are still in existence coins of that epoch with a Phoenician and Greek inscription (Fehlhel, Dottor, Nummorum IV, vol. iii. p. 379, &c.; Gesenius, Monuments Phoenici, pp. 202–204, and Tab. 34). Under the Romans, at first it continued to enjoy a kind of freedom; for in the days of Alexander the Great the new Phoenician king Antiochus II. designed to include Tyre and Sidon in a gift of Phoenician and Jewish territory which he made to his family, of his nearest relations; but he steadily refused, knowning them to have been "free cities from their ancestors." (Ant. iv. 4, § 1). Subsequently, however, on the arrival of Augustus in the East, he is said to have deprived the two cities of their liberties for seditions committed (Josephus, Dion Cassius, lxxv. 7). Still the prosperity of Tyre in the time of Augustus was undeniably great. Strabo gives an account of it at that period (xvi. 2, 23), and speaks of the great wealth which it derived from the dyes of the celebrated Tyrian purple, which, as is well known, were extracted from shell-fish found on the coast, and of the variety of the shell-fish. Indeed, on some days of Ezekiel, the Tyrians had imported purple from the Egyptians; but they had since learned to extract the dye for themselves; and they had the advantage of having shell-fish on their coast better adapted for this purpose even than those on the Lacedemonian coast (Pausansis, iii. 21, § 6). Strabo adds, that the great number of dyeing works rendered the city unparalleled in a place of its size. He further speaks of the houses as consisting of many stories, even of more than in the houses at Rome—which is precisely what might be expected in a prosperous fortified city of limited area, in which ground-rent would be high. Pliny the Elder gives additional information respecting the city, for in describing it says that the circumference of the city proper (i.e. the city on the peninsula) was 22 stadia, while that of the whole city, including Paphyrus, was 19 Roman miles (Nat. Hist. v. 17). The accounts of Strabo and Pliny have a peculiar interest in this respect, that they tend to convey an idea of what the city must have been, when visited by Christ (Matt. xvi. 21; Mark vii. 24). It was perhaps more populous than Jerusalem [Jerusalem, ii. 1329], and if so, it was undoubtedly the largest city which he is known to have visited. It was not much more than thirty miles distant from Nazareth, where Christ mainly lived as a carpenter's son during the greater part of his life (Matt. iii. 23, iv. 12, 13, 15; Mark v. 5). We may readily conceive that He may often have gone to Tyre, while yet unknown to the world; and whatever uncertainty there may be as to the extent to which the Greek language was likely to be spoken at Nazareth, at Tyre, and in its neighborhood.

That Tyre was on an island, previous to its siege by Alexander, is one of the most certain facts of history; but on examining the locality at the present day few persons would suspect from existing appearances that there was anything artificial in the formation of the present peninsula.

b Pliny the elder gives an account of the Phoenician shell-fish (ix. 60, 61), and states that from the larger ones the dye was extracted, after taking off the shell; but that the small fish were crushed alive together with the shell. Mr. Wilde, an intelligent modern traveller, observed at Tyre numerous round holes cut in the solid sand-tone rock, in which shells seem to have been crushed. They were perfectly smooth on the inside; and many of them were shaped exactly like a modern iron pot, broad and flat at the bottom, and narrowing toward the top. Many of these were filled with a breccia of shells; in other places this breccia lay in heaps in the neighborhood. All these breccias were of one species, and were undoubtedly the Musca Trunculus. See Narrative of a Voyage to Mediterrene, Transfers, and along the Shores of the Mediterranean. Dublin, 1811.
hoood, there must have been excellent opportunities for conversation in that language, with which he seems to have been acquainted (Mark vii. 26). From the time of Christ to the beginning of the 5th century, there is no reason to doubt that, as far as was compatible with the irreparable loss of independence, Tyre continued in uninterrupted prosperity; and about that period Jerome has on record very striking testimony on the subject, which has been often quoted, and is a landmark in Tyrian history (see Gesenius's Acc. vol. i. p. 714). Jerome, in his Commentaries on Ezekiel, comes to the passage in which the prophet threatens Tyre with the approach of Nebuchadnezzar, king of Babylon (Ez. xxvi. 7); and he then, amongst other points, refers to the verse in which the prophet predicts of Tyre—"Thou shalt be built no more," saying that this raises a question as to how a city can be said not to be built any more, which we see at the present day the most noble and the most beautiful city of Phenicia. "Quoque sequitur: nec edificabis ultra, videlicet facere questionem quomodo non sit edificata, quam hodie cerniinm Phenicium nobilissimum est proculus terrae cibarum."

He afterwards, in his remarks on the 31st verse of the 27th chapter, in which Ezekiel speaks of Tyre as the exchange of the people of many cities, says that this continues down to his time, so that commercial dealings of almost all nations are carried on in that city—"Cuiusque urbis usque hodie perseverat, ut omnium sequens gentium in hac urbe commerces succinctur." Jerome's Commentaries on Ezekiel are supposed to have been written about the years 411-414 a. d. (see Smith's Dictionary of the Bible; and Smith and Wace's Biog. vol. ii. p. 450), so that his testimony respecting the prosperity of Tyre bears date almost precisely a thousand years after the capture of Jerusalem by Nebuchadnezzar, a. d. 588. As to the passage in which Ezekiel states that Tyre shall be built no more, Jerome says the meaning is, that—"Tyre will be no more the Queen of Nations, having its own king, as was the case under Hiram and other kings, but that it was destined to be always subject, either to the Chaldaens, or to the Macedonians, or to the Ptole-"menes, or to the Romans." At the same time Jerome notices a meaning given to the passage by some interpreters, that Tyre would not be built in the last days but he asks of such interpreters, "Who will be able to part attributed to Nebuchadnezzar, especially as we read in what follows, that Nebuchadnezzar besieged Tyre, but had no reward of his labor (xxix. 18); and that Egypt was given over to him because in besieging Tyre he had served the purpose of God."

When Jerome spoke of Tyre's subjection to the Romans, which had then lasted more than four hundred years, he could scarcely have anticipated that another subjugation of the country was reserved for it from a new conquering power, coming not from the north, but from the south. In the 7th century A. D. took place the extraordinary Arabian revolution under Mohammed, which has given a new religion to so many millions of mankind. In the years 636-638 A. D. all Syria and Palestine from the Dead Sea to Antioch was conquered by the Khalif Omar. This conquest was so complete, that in both those countries the language of Mohammed has almost totally supplanted the language of Christ. In Palestine, it is not the language of a single native: and in Jerusalem, to a stranger who understands what is involved in this momentous revolution, it is one of the most suggestive of all sounds to hear the Muezzein daily call Mohammeans to prayers in the Arabic language of Mohammed, within the sacred precincts where once stood the Temple, in which Christ worshipped in Hebrew, or in Aramaic. (As to the Syriac language, see Porter's Handbook for Syria and Palestine, vol. ii. p. 551.) But even this conquest did not cause the overthrows of Tyre. The most sagacious conditions on which peace was granted to Tyre, as to other Syrian cities, were the payment of a poll-tax, the obligation to give board and lodging for three days to every Muslim traveller, the wearing of a peculiar dress, the admission of Muslims into the churches, the doing away with all crosses and all sounds of bells, the avoiding of all insulting expressions towards the Mohammedan religion, and the prohibition to ride on horseback or to build new churches. (See Weil's Geschichte der Chal- ifer, bd. i. 81, 82.) Some of these conditions were humiliating, and nearly heart-breaking; but if submitted to, the lives and private property of the inhabitants remained untouched. Accordingly, at the time of the Crusades, Tyre was the principal city of the whole district, the most flourishing city, when it surrendered to the Christians on the 27th of June, 1124. It had early been the seat of a Christian bishopric, and Cassius, bishop of Tyre, is named as having been present at the Council of Constance towards the close of the 21st century (Reland, Palestine, 1854); and now, in the year after its capture by the Crusaders, William of Tyre makes it his archdiocese. This archbishop has left on record an account of the city, which gives a high idea of its wealth and great military strength. (See Wilhelmi Tyrosis Hystoric, lib. xiii. cap. 5.) And his statements are confirmed by Benjamin of Tudela, who visited it in the same century. (See Purchas's Pilgrimes, i. 144.) The litter writer, who died in 1173, says: "Nor do I think any haven in the world to be like unto this. The city itself, as I have said, is goodly, and in it there are about four hundred Jews, among whom are some very skillful in discip- linary readings, and especially Ephraim the Egyptian judge, and Mair, and Carehesom, and Abra- ham, the head of the university. Some of the Jews have ships at sea for the carrying grain. There are artificial winches to raise glass there, which he make glass, called Tyrian glass, the most excellent, and of the greatest estimation in all countries. The best and most approved sugar is also found there." In fact, at this period, and down to the close of the 13th century, there was perhaps no city in the known world which had stronger claims than Tyre to the title of the "Eternal City," if experience had not shown that cities as well as individuals were subject to decay and dissolution. Tyre had been the parent of colonies, which at a distant period had enjoyed a long life and had died; and it had survived more than fifteen hun- dred years its greatest colony, Carthage. It had outlived Egyptian Thebes, and Babylon, and an- cient Jerusalem. It had seen city walls rise and fall; and although older than them all, it was in a state of great prosperity when an illustrious Roman, who had been sailing from Eginina to Megara, told Cicero, in imperishable words, of the corpses or carcasses of cities, the spectacula mortuorum, by which in that voyage he had been in every direction encompassed (Ep. ad Familiares, iv.)
5) Rome, it is true, was still in existence in the 13th century; but, in comparison with Tyre, Rome itself was of recent date, its twice consecrated soil having been merely the haunt of shepherds or robbers for some hundred years after Tyre was wealthy and strong. At length, however, the evil day of Tyre undoubtedly arrived. It had been more than a century and a half in the hands of Christians, when in March, A.D. 1291, the Sultan of Egypt and Damascen invested Acre, then known to Europe by the name of Ptolemais, and took it by storm after a siege of two months. The result was told in the beginning of the next century by Marinus Sanitus, a Venetian, in the following words:—"On the same day on which Ptolemais was taken, the Tyrians, at vespers, leaving the city empty, without the stroke of a sword, without the tumult of war, embarked on board their vessels, and abandoned the city to be occupied freely by their conquerors. On the morrow the Saracens entered, no one attempting to prevent them, and they did what they pleased." (Liber Scutarum fidelium Crucis, lib. iii. cap. 22.)

This was the turning point in the history of Tyre, 1879 years after the capture of Jerusalem by Nebuchadnezzar; and Tyre has not yet recovered from the blow. In the first half of the 14th century it was visited by Sir John Mandeville, who says, speaking of "Tyre, which is now called Sir, here was once a great and gracious city of the Christians; but the Saracens have destroyed it in great part; and they guard that haven carefully for fear of the Christians" (Wright's Early Travels in Palestine, p. 141). About A.D. 1610-11 it was visited by Sandys, who said of it:—"But this once famous Tyre is now no other than a heap of ruins; yet have they a reverent aspect, and do instruct the pensive beholder with their exemplary frailty. It hath two harbors, that on the north side the fairest and best throughout all the Levant (which the curiosors enter at their pleasure); the other choked with the decays of the city." (Purchas's Pilgrimage, ii. 846.)

Towards the close of the same century, in 1697 A.D., Mambrell says of it, "On the north side it has an old Turkish castle, besides which there is nothing here but a mere Rebel of broken walls, pillars, vaults, etc., there being not so much as an entire house left. Its present inhabitants are only a few poor wretches that harbor in vaults and subsist upon fishing." (See Harris, Voyages and Travels, ii. 846.) Lastly, without quoting at length Dr. Richard Pococke, who in 1751-40 A.D. stated (see vol. x. of Pinkerton's Voyages and Travels, p. 470) that, except some janizaries, there were few other inhabitants in the city than two or three Christian families, the words of Hasselquist, the Swedish naturalist, may be recorded, as they mark the lowest point of depression which Tyre seems to have reached. He was there in May, 1751 A.D., and he thus speaks of his visit:—"We followed the sea-shore . . . . and came to Tyre, now called Zafir, where we lay all night. None of

A copy of this work is in Gesta Des pop Francos, Hanovia, 1811.

b M. Ernest Renan says there has been no subsidence of the land, owing to earthquakes or other causes; and that the west of the island has the same level as in ancient times. Mr. Wilde had spoken with great caution on this point, pp. 382-385. It is still very desirable that the peninsula and the adjoining coast should be minutely examined by an experienced practical geologist. There seems to be no doubt that the city has suffered from earthquakes. See Porter, t. c.; and
It is proper to consider two questions of much interest to the Biblical student, which have been already noticed in this article, but which could not then be conveniently discussed fully. (1) The date and authorship of the prophecy against Tyre in Isaiah, chap. xxiii.; and (2), the question of whether Nebuchadnezzar, after his long siege of Tyre, may be supposed to have actually taken it.

On the first point it is to be observed, that, as there were two sieges of Tyre contemporary with events mentioned in the Old Testament, namely, that by Shalmaneser, king of Assyria, in the reign of Hezekiah, and the siege by Nebuchadnezzar, king of the Chaldees, after the capture of Jerusalem in 588 B. C., and as Isaiah was living during the former siege, but must have been dead considerably more than a hundred years at the time of the latter siege, it is probable, without denying the predictive prophecy, that the prophecy relates to the first siege, if it was written by Isaiah. As the prophecy is in the collection of writings entitled "Isaiah," there would formerly not have been any doubt that it was written by that prophet. But it has been maintained by eminent Biblical critics that many of the writings under the title of his name were written at the time of the Babylonian Captivity. This seems to be the least open to dispute in reference to the prophecies commencing with "Comfort ye, comfort ye my people," in the 1st verse of the 40th chapter, concerning which the following facts seem to the writer of the present article to be well established.6 (1.) These prophecies are different in style from the undoubted writings of Isaiah. (2.) They do not pretend that the Jews will be carried away into captivity by Babylon, but they presuppose that the Jews are already in captivity there at the time when the prophecies are uttered; that Jerusalem is desolate, and that the Temple is burnt (Is. lviii. 10, 11, xlv. 26, 28, xlv. 14, xlvii. 5, 6, lii. 2, 9, li. 3, 11, 17-23). (3.) The name of Cyrus, who conquered Babylon probably at least a hundred and fifty years after the death of Nebuchadnezzar, is mentioned in them twice (xlv. 26, xlv. 1): and (4), there is no external contemporary evidence between the time of Isaiah and the time of Cyrus to prove that these prophecies were then in existence. But, although in this way the evidence of a later date is peculiarly cogent in reference to the 40th and following chapters, there is also reasonable evidence of the later date of several other chapters, such, for example, as the 13th and 14th (on which observe particularly the first four verses of the 14th chapter) and chapters xxiv.-xxvii. Hence there is no "a priori" difficulty in admitting that the 23d chapter, respecting Tyre, may likewise have been written at the time of the Chaldean invasion. Yet this is not to be assumed without something in the nature of probable proof, and the real point is whether any such proof can be adduced on this subject. Now although Hitzig (Der Prophet Jesaja, Heidelberg, 1853, p. 272) undertakes to show that there is a difference of language between Isaiah's genuine prophecies and the 23d chapter, and although Ewald (Die Propheten des Alten Bundes, vol. i. p. 238), who refers it to the siege of Tyre by Shalmaneser, believes the 23d chapter, on the grounds of style and language, to have been written by a younger contemporary and scholar of Isaiah, Hitzig, with whom the writer is in agreement, believes that the majority of scholars will be mainly influenced in their opinions as to the date of that chapter by their view of the meaning of the 13th verse. In the A. V. the beginning of the verse is translated thus: "Behold the land of the Chaldeans, this people was not the Assyrian founded it for them that dwell in the wilderness" — and this has been opposed by some scholars, such as Rosen-muller and Hitzig (ed. loc.), to imply that the enemies with which the Tyrians were threatened were the Chaldees under Nebuchadnezzar, and not the Assyrians under Shalmaneser. If this is the meaning, very few critics would now doubt that the prophecy was composed in the time of Nebuchadnezzer; and there is certainly something remarkable in a supposed mention of the Chaldees by such an early writer as Isaiah, inasmuch as, with the possible exceptions in the mention of Abraham and Abram's family as having belonged to "Ur of the Chaldees" (Gen. xi. 28, 31, xv. 7), the mention of the Chaldees by Isaiah would be the earliest in the Bible. The only other passage respecting which a doubt might be raised is in the book of Job (i. 17) — a work, however, which seems to the author of this article to have been probably written later than Isaiah.6 But the 13th verse of the chapter attributed to Isaiah by no means necessarily implies that the Chaldees under Nebuchadnezar were attacking Tyre, or were about to attack it. Accepting the ordinary version, it would be amply sufficient that the Chaldees should be formidable mercenaries in the Assyrian army. This is the intention in the present work maintains the unity of the book — Ed.}

a Doubts as to the authorship of these chapters were first suggested by Dibelius in 1781, in a review of the latter part of the book. Leech in 1783, in his dissertation on the Psalms, states that his later date has been accepted by Eichhorn, Rosenmüller, de Wette, Gesenius, Winer, Ewald, Hitzig, Knobel, Herzfeld, Bleek, Geiger, and Davidson, and many other Biblical scholars. The evidence has been more clearly set forth by Gesenius in his Jesaja (part iii. pp. 18-35, Leipzig, 1821).

b In the total absence of external evidence nothing in favor of an earlier date can be adduced to outweigh the overwhelming evidence of Isaiah himself, to whom it is said by others by Gesenius (Geschichte der Hebräischen Sprache und Schrift), that the Aramaic plural בָּדָד occurs twelve times in the book (iv. 2; xii. 11; xv. 13; xvii. 2; xxvi. 4; xxxi. 11, 14; xxxiii. 8, 32; xxxiv. 3; xxxvi. 16; xxxviii. 2). But there are strong reasons for assigning an earlier date to the book: see Foh, ii. p. 1498 ff. — Ed.
explanation of Gesenius (Commentator über den De- 

statement, ad loc.), who goes still further. Founding his 

that he 

Nebuchadnezzar, as a bold, warlike, and predatory tribe in the 

neighborhood of Armenia, and collecting scattered 

notices round this fundamental fact, he conjectures that bands of them, having served either as 

mercenaries or as volunteers in the Assyrian army, 

had received lands for their permanent settlement 

on the banks of the Euphrates not long before the 

invasion of Nebuchadnezzar or Xenophon, Cyropo- 

lil. 2, §§ 7, 12; Aesch. iv. 3, § 4, v. 5, § 5, vii. § 14). So great is our ignorance of the Chaldees 

previous to their mention in the Bible, that this 

conjecture of Gesenius cannot be disproved. There 

is not indeed sufficient positive evidence for it to 

justify its adoption by an historian of the Chaldees; 

but the possibility of its being true should make us 

hesitate to assume that the 13th verse is incomple- 

table with the date ordinarily assigned to the propi-

ecy in which it occurs. But, independently of these 

considerations, the beginning of the 13th verse 

is capable of a totally different translation from 

that in the A. V. It may be translated thus: " 

Behold the land of the Chaldees, the people is 

more, Assyria has given it [the land] to the dwell-

ers of the Chaldees, and its capital is to be 

in accordance with Ewald's translation, not following him 

in the substitution of "Communities" (which he 

deems the correct reading) for "Chaldees" — and 

then the passage might refer to an unsuccessful re-

bellion of the Chaldees against Assyria, and to a 

consequent debasement of the land of the Chaldees 

by their victorious rulers. One point may be men- 

tioned in favor of this view, that Nebuchadnezzar 

was not warned to look at the Chaldees in the way that 

Habakkuk threatens his contemporaries with the 

hostility of that "terrible and dreadful motion," 

but the Tyrians are warned to look at the land 

of the Chaldees. Here, again, we know so little of 

the history of the Chaldees, that this interpretation, 

likewise, cannot be disproved. And, on the whole, 

as the burden of proof rests with any one who 

denies Isaiah to have been the author of the 24th 

chapter, as the 13th verse is a very obscure passage, and 

as it cannot be proved incompatible with Isaiah's 

authority, it is permissible to acquiesce in the 

Jewish tradition on the subject. 

12th. The question of whether Tyre was actually 

taken by Nebuchadnezzar after his thirteen years' 

seige, has been keenly discussed. Gesenius, Winer, 

and Hitzig decide it in the negative, while Hen- 

stenberg has argued most fully on the other side. 

Without attempting to exhaust the subject, and 

assuming, in accordance with Movers, that Tyre, as 

well as the rest of Phenicia, submitted at last to 

Nebuchadnezzar, the following points may be ob-

served respecting this event (278). The 

evidence of Ezekiel, a contemporary, seems to be 

against it. He says (xxix. 18) that "Nebuchad-

nezzer king of Babylon caused his army to serve a 
great service against Tyre;" that "every head was 

made bald, and every shoulder was peeled, yet had he no wages, nor his army for Tyrus, for the service 

that he served against it;" and the obvious inference 

is that, however great the exertions of the 

army may have been in digging intrenchments or 

Taiping, p. 25) says 

that this silence of the Greek and Phenician histori-

rians proves too much, as there is no doubt that the 

city was besieged by Nebuchadnezzar. To this Hitzig 

in casting up earthworks, the siege was unsuccess-

ful. This is confirmed by the following verses (19, 

20), in which it is stated that the land of Egypt 

will be given to Nebuchadnezzar as a compensation, 
or wages, to him and his army for having 

served against Tyre. Movers, indeed, asserts that 

the only meaning of the expression that Nebuchad-

nezzer and his army had no wages for their service 

against Tyre is, that they did not plunder the 

city. But to a virtuous commander the best reward of 

besieging a city is to capture it; and it is a strong 

sentiment to attribute to the Supreme Being, or to 

a prophet, that a general and his army received 

no wages for capturing a city, because they did not 

plunder it. (22) Josephus, who had access to his- 

torical writings on this subject which have not 

reached our times, although he quotes Phenician 

writers who say that Nebuchadnezzar besieged 

Tyre (Ant. x. II, § 1; c. Apion, 29), neither states 

on his own authority, nor quotes any one else as 

stating that Nebuchadnezzar took it. (30) The capture 

of Tyre on this occasion is not mentioned by any Greek or Roman author whose writings are 

now in existence. (40) In the time of Jerome it 

was distinctly stated by some of his contemporaries 

that they had read, amongst other histories on this 

point, histories of Greeks and Phenicians, and es-

pecially of Nicolaus Damascenus, in which it was 

said of the siege of Tyre by the Chaldees, and 

Jerome, in noticing this fact, does not quote any 

authority of any kind for a counter-statement, but 

contents himself with a general allegation that many 

facts are related in the Scriptures which are not 

found in Greek works, and that "we ought not to 

acquire the authority of those whose work is 

falsehood and falsehood we detect." (see Comm. on Ez-

chiel, xxvi. 7). On this view of the question there 

would seem to be small reason for believing that 

the city was actually captured, were it not for 

another passage of Jerome in his Commentaries on 

the passage of Ezekiel already quoted (xxix. 18), in 

which he explains that the meaning of Nebuchad-

nezzer's having received no wages for his warfare 

against Tyre is, not that he failed to take the 

city, but that the Tyrians had previously removed 

everything precious from it in ships, so that when Neb-

uchadnezzar entered the city he found nothing 

there. This interpretation has been admitted by 

one of the most distinguished critics of our own 

day (Ewald, Die Propheten der Alteren Volker, ad loc.), 

who, deeming it probable that Jerome had obtained 

the information from some historian whose name is 

not given, accepts as historical this account of the 

termination of the siege. This account, therefore, 

as far as inquirers of the present day are concerned, 

rests solely on the authority of Jerome; and it thus 

becomes important to ascertain the principles and 

method which he has adopted in writing his Com-

mentaries. It is peculiarly fortunate that Jerome 

himself has left on record some valuable informa-

tion on this point in a letter to Augustine, for 

the understanding of which the following brief 

preliminary explanation will be sufficient: In Jerome's 

Commentaries on the second chapter of the Epistle 

to the Galatians, when advertting to the passage 

(xx. 11-14) in which St. Paul states that he had 

withdrew Peter to the face, "because he was to be 

replies, that the historians could only have omitted 

to mention the siege, because the siege had not been fol-

lowed by the capture of the city (De Prophetiis Jodi 

p. 278).
blamed " for requiring Christians to comply with the observances of the Jewish ritual law, Jerome deniers that there was any real difference of opinion between the two Apostles, except that they had merely made a preconceived arrangement of superficial difference, in order that those who approved of circumcision might plead the example of Peter, and that those who were unwilling to be circumcised might extol the religious liberty of Paul. Jerome then goes on to say that "the fact of simulation being useful, and occasionally permissible, is taught by the example of Jehu king of Israel, who never would have been able to put the priests of Baal to death unless he had feigned willingness to worship an idol, saying, 'Ahah served Baal a little, but Jehu shall serve him much.'" On this Augustine strongly denounced with Jerome in two letters which are marked 56 and 67 in Jerome's Correspondence. To these Jerome returned an answer in a letter marked 112, in which he repudiates the idea that he is to be held responsible for all that is contained in his Commentaries, and then frankly confesses how he composed them. Beginning with Origen, he enumerates several writers whose Commentaries he had read, specifying amongst others, Eusebius, who had lately left the Church, and Alexander, an old heretic. He then avows that he was satisfied with them and he sent for an amanuensis, to whom he dictated sometimes the words of those, without paying strict attention either to the order or the words, and sometimes not even to the meaning. "Itaque ut simpliciter factum, legi habeam unum, et in mente mei plurima concerente, nec notario, vel me, vel aliens dictaverat, nec ordines, nec verborum, interdum nec sensum meum." (see Migne's Edition of Jerome, vol. ii. p. 181). Now if the hearing of the remarks concerning simulation for a pious purpose, and of the method which Jerome followed in the composition of his Commentaries is seriously considered, it cannot but throw doubt on his uncorrected statements in any case wherein a religious or theological interest may have appeared to him to be at stake.

Jerome was a very learned man, perhaps the most learned of all the Fathers. He was also one of the very few among them who made themselves acquainted with the Hebrew language, and in this, as well as in other points, he deserves gratitude for the services which he has rendered to Biblical literature. He is, moreover, a valuable witness to facts, when he can be suspected of no bias concerning them, and especially when they seem contrary to his religious propensities. But it is evident, from the passages in his writings above quoted, that he had not a critical mind, and that he can scarcely be regarded as one of those noble spirits who prefer truth to supposed pious ends which may be attained by its violation. Hence, contrary to the most natural meaning of the prophet Ezekiel's words (xiv. 18), it would be unsafe to rely on Jerome's sole authority for the statement that Nebuchadnezzar and his army eventually captured Tyre.

Literature. — For information on this head, see PHOENICIANS, vol. iii. p. 2522. In addition to the works there mentioned, see Robinson's Bibl. Res. ii. 461-471; Stanley's Sinait Palistinae, 264-298; Porter's Handbook for Syria and Palistinae, pp. 390-396; Hengstenberg, De Rebus Tyriovum, Berlin, 1832; and Kitter's Erkundige, vol. xvii. 1st part, 3d book, pp. 320-579. Professor Robinson, in addition to his instructive history of Tyre, has published, in the Appendix to his third volume, a detailed list, which is useful for the knowledge of Tyre, of works by authors who had themselves travelled or resided in Palestine. See likewise an excellent account of Tyre by Gesenius in his Hebrew, i. 707-719, and by Winer, s. v., in his Bibl. Realwört. [TYLBIANS; TYRUS.] E. T.

* * *

In 2 Sam. v. 11, and 1 Chr. xiv. 1, we are told that Hiram king of Tyre sent cedar wood, and carpenters, and masons to David, to build him a palace; and, subsequently, that he sent materials and workmen to Solomon to build the Temple (1 K. v. 14; 2 Chr. iii. 14, 15). A striking confirmation of this unity between Hiram and the Hebrew kings has lately been brought to light. Certain writings or marks have been found on the bottom rows of the wall at the southeast angle of the Haram area, near where the ancient Temple must have stood, at the depth of about 90 feet, where the foundations lie on the limestone rock. Mr. F. Pentech, of the British Museum, who has examined these stones on the ground, decides (1) that these signs were cut or painted on the stones when they were laid in their present places; (2) that they do not represent any inscription; and (3) that they are certainly Phoenician. That they are Phoenician marks is beyond question, because they agree with those found on primitive substructions in the harbor of Sidon. It is certainly remarkable that Phoenician letters or etchings should be found on these stones at Jerusalem, thus suddenly brought to light; and the best explanation of the fact is that they were placed there by the Tyrian architects whom Hiram sent to Jerusalem to assist in the erection of the Temple. The precise value of the characters is not yet determined, but no doubt they were designed to guide the workmen in placing the stones in their proper position, or in cutting and shaping them so as to have them properly adjusted to each other (See Quart. St. of Pal. Explor. Fund, No. ii. 1869).

The N. T. references to Tyre are few, but interesting. The Saviour performed some of his miracles in the vicinity (Matt. xv. 21; Mark vii. 24). The Saviour's apostrophe to Chorazin and Bethsaida represents the inhabitants of these cities as more wicked than those of Tyre and Sidon, on account of the misuse of opportunities which the latter did not enjoy (Matt. xii. 20; Luke x. 13). The disciples who went to Phanæa after the death of Stephen undoubtedly made known the Gospel there (Acts xv. 19). Paul, on his last journey to

not have need at that period one common to them which solves the Phoenicians and other kindred tribes.

[ILLUS.] Coin of Tyre.

The N. T. references to Tyre are few, but interesting. The Saviour performed some of his miracles in the vicinity (Matt. xv. 21; Mark vii. 24). The Saviour's apostrophe to Chorazin and Bethsaida represents the inhabitants of these cities as more wicked than those of Tyre and Sidon, on account of the misuse of opportunities which the latter did not enjoy (Matt. xii. 20; Luke x. 13). The disciples who went to Phanæa after the death of Stephen undoubtedly made known the Gospel there (Acts xv. 19). Paul, on his last journey to

not have need at that period one common to them which solves the Phoenicians and other kindred tribes.
Jerusalem, went on shore at Tyre and sought out (ἀνεῴφωτες) the disciples in that city. The prophets there attempted, in vain, to dissuade him from going up to Jerusalem. The touching scene of the farewell on the beach (Acts xxii. 5) forms a memorable passage in Paul's history. Luke describes it with artistic precision. His word αἵπειδης (a smooth shore, — cf. Acts xxvii. 39, as distinguished from one rocky, precipitous, — on which they knelt down), is the proper one for the level, sandy beach on both the northern and southern sides of Tyre. Paul's company embarked at this point, and sailed thence to Pentecost where they finished the voyage (Acts xxii. 7).

* TYRANS (Τυρίας; Tyria), inhabitants of Tyre, Ecles. xvi. 18. The Heb. נַפְשֵׁי, נַפָּשׁ, LXX. Τυριαί, Τυρίαν, variously rendered "of Tyre," "men of Tyrii," and "they of Tyre" or "Tyrians," also occur 1 K. vii. 14; 1 Chr. xxii. 4; 2 Chr. ii. 14; Ezr. iii. 7; Neh. xiii. 18; 1 Esdr. v. 55; 2 Macq. iv. 49. [Tyre.]

* TYROPE'ON, THE (ἡ τῶν Τυροποιῶν φάωσις = the Valley of the Cheesemakers). This valley was an important feature in the ancient topography of Jerusalem, running from the point of the approach to the foundation of Saul, dividing the southern part of the city into two high and steep ridges, making it a double promontory. Although immense quantities of rubbish had accumulated in it, almost filling its upper part, Professor Robinson was able to point out its general course. His theory, demanded by the specifications of Josephus, that it curved around the northern brow of the southwest hill, was warmly disputed by some writers; but subsequent investigations have established its correctness. It has long been known that the most interesting part of Jerusalem was subterranean, and some of Capt. Warren's most valuable recent explorations have been in this valley. He has sunk shafts in it to depths of between 50 and 80 feet, going down to its rocky bed, in which he found drains and reservoirs cut, and tracing the foundations of the west Haram wall for several hundred feet. Opposite Robinson's Arch, on the other side of the valley, he found the other pier of the massive bridge which once spanned it, leading from the Temple to the upper city; and sixty feet below the present surface he found some of the ruins of the bridge itself. Further north he discovered the ruins of another similar bridge, built later, as he thinks, and, also, an ancient gateway in the western Haram wall — all now covered with "the débris of thousands of years." S. W.

TYRUS [τύρος, τυρίας; Týros, ex. Ez. xxvi., xxvii., Xer, 2 Macq. iv. 49, Týros: Tyrus, Tyrii]. This form is employed in the A. V. of the books of Jeremiah, Ezekiel, Hosea (Joel has "Tyre"), Amos, Zechariah, 2 Esdras, Judith, and the Maccabees, as follows: Jer. xxv. 22, xxvii. 3, xlvii. 4; Ezr. xxvi. 2, 3, 4, 7, 16, xxvii. 2, 3, 8, 32, xxviii. 2, 12, xxix. 18; Hos. ix. 13; Am. i. 9, 10; Zech. ix. 2, 3; 2 Esdr. i. 11; Jud. ii. 28; 1 Macq. v. 16; 2 Macq. iv. 18, 32, 44, 49.

* TYRUS, THE LADDER OF (ἡ κλίσις Τύρου; Joseph. κλίσις Τουρίων: terrae Tyrii), 1 Macq. xi. 59, is described by Josephus (B. J. ii. 10, § 2) as a high mountain on the coast of Pales-

UCAL 3341

UCAL (*28*), and in some copies *28* [see below]. According to the received text of Prov. xxx. 1, Hiel and Ucal must be regarded as proper names, and if so, they must be the names of disciples or sons of Azan the son of Jakes, an unknown sage among the Hebrews. But there is great obscurity concerning the passage. The LXX. translate τῶν πρώτων ονόματα καὶ πανομαξιότητα the Vulgate, qui quoque est Deus, et qui tuos aequos meconvenit. The Arabic follows the LXX. to some extent: the Tagarn reproduces Hiel and Ucal as proper names, and the Syrian is corrupt, Ucal being omitted altogether. Luther represents the names as Leithiel and Ueloth. De Wette regards them as proper names, as do most translators and commentators. Junius explains both as referring to Christ. The LXX. probably read *28* *28*. The Veneto-Greek has καὶ συνεστάσεως (*28*).

CECCEUS must have pointed the words thus, *28* *28* *28* *28* *28* "I have labored for God and have obtained," and this, with regard to the first two words must have been the reading of J. D. Michaelis, who renders, "I have wearied myself for God, and have given up the investigation," applying the words to a man who had bewildered himself with philosophical speculations about the Deity, and had been compelled to give up the search. Bertheau also (Die Syrische Syn. Einl. xvii.) sees in the words, "I have wearied myself for God, I have wearied myself for God, and have fainted," *28* *28*, an appropriate commencement to the series of proverbs which follow. Hitzig's view is substantially the same, except that he points the last word *28* and renders, "and I became dull"; applying it to the dimness which the investigation produced upon the eye of the mind (Die Sprach. Spr. p. 346). Bunsen (Hillichke, i. p. clxxv.) follows Bertheau's punctuation, but regards *28* *28* *28* *28* *28* on its first occurrence as a symbolical name of the speaker. "The saying of the man I have wearied myself for God," "I have wearied myself for God, and have fainted away." There is, however, one fatal objection to this view, if there were no others, and that is, that the verb *28* *28* "to be wearied," nowhere takes after it the "Cape, are comprised under the name of "Scela Tyrii" run. A
The general grounds on which the Eulens has been identified with the Chosapes, and so with the Kerkhoth (Salmasius, Rosenmüller, Wahl, Kitto, etc.) are, the mention of each separately by ancient writers as "the river of Susa," and (more especially) the statements made by some (Strabo, Pliny,) that the water of the Eulens, by others (Herod., Athien., Plut., Q. Curtius) that that of the Chosapes was the only water tasted by the Persian kings. Against the identification it must be noticed that Strabo, Pliny, Solinus, and Polybius (ap. Plin., N.H. vi. 22; Strab. xvi. 3, § 16; Pol. vi. 51; Pliny, N. H. vi. 91), all regarded the river as distinct, and that the lower course of the Eulens, as described by Arrian (Epit. M. vii. 7) and Pliny (N. H. vi. 26), is such as cannot possibly be reconciled with that of the Kerkhoth river.

The grounds for regarding the Eulens as the Kuran are decidedly stronger than those for identifying it with the Kerkhoth or Chosapes. No one can compare the voyage of Xerxes in Arrian's Immater with Arrian's own account of Alexander's descent of the Eulens (vii. 7) without seeing that the Eulens of the one narrative is the Pasitigris of the other; and that the Pasitigris is the Kuran is almost universally admitted. Indeed, it may be said that all accounts of the lower Eulens—those of Arrian, Pliny, Polybius, and Ptolemy—identify the uppermost or headstream with the lower Kuran, and that so far there ought to be no controversy. The difficulty is with respect to the upper Eulens. The Eulens, according to Pliny, surrounded the citadel of Susa (vi. 27), whereas even the Distal branch of the Kuran does not come within six miles of the ruins. It lay to the west, not only of the Pasitigris (Kuran), but also of the Condes (riv. of Distal), and Pliny (Epit. M. xix. 18, 19). So far, it might be the Shopyr, but for two objections. The Shopyr is too small a stream to have attracted the general notice of geographers, and its water is of so bad a character that it can never have been chosen for the royal table (Geograph. Journ. iv. 70). There is also an important notice in Pliny entirely incommensurate with the notion that the short stream of the Shopyr, which rises in the plain about five miles to the N. W. W. of Susa, can be the true Eulens. Pliny says (vi. 51) the Eulens rose in Medes, and flowed through Mesopotamia. Now this is exactly true of the upper Kerkhoth, which rises near Hambach (Babath), and flows down the district of Mahbanas (Mesopotamia). The result is that the various notices of ancient writers appear to identify the upper Eulens with the upper Kerkhoth, and the lower Eulens (quite unmistakably) with the lower Kuran. Does this apparent confusion and contradiction admit of explanation and reconciliation?

A recent survey of the ground has suggested a satisfactory explanation. It appears that the Kerkhoth once bifurcated at Poi Pul, about 20 miles N. W. W. of Susa, sending out a branch which passed east of the ruins, absorbing into it the Shopyr, and flowing on across the plain in a S. S. E. direction till it fell into the Kuran at Ahsar (Leftus, Chalda and Susaean, pp. 424, 425). Thus, the upper Kerkhoth and the lower Kuran were in old times united, and might be viewed as forming a single stream. The name Eulens (Ubal) seems to have applied most properly to the eastern branch stream from Poi Pul to Ahsar; the stream above Poi Pul was sometimes called the Eulens, but was more properly the Chosapes, which was also the
of the eastern branch (or present course) of the Kerkhoth from Pet-Pet to the Tigris. The name Pasisigris was proper to the upper Kuron from its source to its junction with the Eulaus, after which the two names were equally applied to the lower river. The Diclest stream, which was not very generally known, was called the Coprates. It is believed that this view of the river names will reconcile and make intelligible all the notices of them contained in the ancient writers.

It follows from this that the water which the Persian kings drank, both at the court, and when they travelled abroad, was that of the Kerkhoth, taken probably from the eastern branch, or proper Eulaus, which washed the walls of Susa, and (according to the Plasses) was used to strengthen its defences. This water was, and still is, believed to possess peculiar lightness (Strab. xv. 3, § 22; Geography, Journ. ix. 70), and is thought to be at one time more wholesome and more pleasant to the taste than almost any other. (On the controversy concerning this stream the reader may consult Kinneir, Persian Empire, pp. 100-106; Sir H. Rawlinson, in Geography, Journ. ix. 84-93; Layard, in the same, xvii. 91-94; and Lattis, Chaldea and Susiana, pp. 424-431.)

ULAM (VII. 28) [porch, vestibule]—Ωλάμ, (Ulama). 1. A descendant of Gilgal the grandson of Manasseh, and father of Bedn (1 Chr. vii. 17).

2. (Ala:—[Vat: in ver. 40, Alex: ALEX. Oloia.—Luma.) The first-born of Eldah, the brother of Azel, a descendant of the house of Saul. His sons were among the famous archers of Benjamin, and with their sons and grandsons made up the goodly family of 150 (1 Chr. viii. 39, 40).

ULR/X (VII. 27) [porth.—Odal: Alex. Eca: Olle.) An Asherite, head of a family in his tribe, a mighty man of valor, but how descended does not appear (1 Chr. vii. 34). Perhaps, as Jamin suggests, he may be a son of Hirah or Jaerah; and

a This looks at first sight like a misapplication of the name Reebah from its proper position further on in the verse. Reebah, however, is usually "Reebah." b Lev. xiii. 28-53 forbids eating the waste, the manna being always the tenant of the land, the lizard, the snail, and the mole. The LXX. has, in place of the termites, the χηριακείλας δ ἀχαλασίας, and instead of the snail (put before the lizard, σαλαγιαν τον χαλασίας.

c In the LXX. of Lev. xi. 14, two birds only are mentioned, έτεταμεν και των πετεριων, and in the parallel passage of Deut. xiv. 13 the same two; but in the Heb. of the latter passage only our present text has three birds' names. It is therefore probable that one of these, έτεταμεν, rendered "gilded" by the A. V., is a mere corruption of έτεταμεν, found both in Deut. and Lev., for which the LXX. gives γενημεν, and the Vulgate Multen. So Maxon, took it (Bochart, Heterot. ii. 33, 333). Thus we have twenty birds named as unclean, alike in the Heb. and in the LXX. of Lev. xi. 13-19, and of many of these the identification is very doubtful. Bochart says (p. 354), "nomen animi huminorum recurvat Maxon, interpretari est communiter idem. In the Heb. of Deut. xiv., we have nothing in the probable cognate of one name, the same twenty, but in the LXX. only nineteen; "every raven after his kind" (πτερα καταστη σαλαγιαν και αροχαιρολαχανια, of Lev. being omitted. and the other names, although some of those of Lev., yet having a different order and grouping after the first

we may further conjecture that his name may be a corruption of Arin.

UMMAH (VII. 22) [gathering]—[Rom. Αρ](χ): Βασιλεια; [Alex.] Αυξη: Αμμων.) One of the cities of the allotment of Asher (Josh. xix. 30 only). It occurs in company with Aphek and Rehob; but as neither of these have been identified, no clue to the situation of Ummah is gained thereby. Dr. Thomson (Bib. Schaer, 1855, p. 818, quoted by Van de Velde) was shown a place called "Unnith in the highlands on the coast, about five miles N. N. E. of Reus en-Nukhuran, which is not dissimilar in name, and which he conjectures may be identical with Ummah. But it is quite uncertain. "Ummith is described in Land and Book, chap. xx.

G. * UNCHORUMISSION. [Concision; Cancellation.] UNCLEAN MEATS. These were things strangled, or dead of themselves, or through beasts; and whatever birds there were did not eat with the hoof and chew the cud; and certain other smaller animals rated as "creeping things" by of certain classes of birds mentioned in Lev. xiv. and Deut. xiv. twenty or twenty-one in all; whatever in the waters had not both fins and scales; whatever winged insect had not besides four legs the two hind-legs for leaping; 8 besides things offered in sacrifice to idols; and all blood or whatever contained it (save perhaps the blood of fish, as would appear from that only of beast and bird being forbidden, Lev. vii. 28), and therefore flesh cut from the live animal; as also all fat, at any rate that disposed in masses among the intestines, and probably wherever discernible and separable among the flesh (Lev. iii. 14-17, vii. 23). The eating of blood was prohibited even to "the stranger that sojourneth among you." (Lev. xvii. 10, 12, 13, 14), an extension which we do not trace in other dietary precepts; o. y., the thing died of itself was right. Thus Lev. xi. 17, consists of the three, κατακολοθοί, κατακολοθοί, καταλείψαι; whereas Deut. xiv. 16, which should correspond, contains κατακολοθοί, κατακολοθοί, καταλείψαι. Also the ελαφροί, "hoopoe," ancient chaldaico = "hoopoe," figure in both the LXX. lists.

d In Lev. xi. 21 the Keri has ἐπιτίθεσαν against the ἐπιτίθενται of the Gkth. It is best to adopt the former and view the last part of the verse as constituting a class that may be eaten from among a larger doubtful class of "flying creeping-things," the differential consisting in their having four feet, and a pair of hind legs to spring with. The A. V. is here obscure. "All birds that creep, and every flying creeping thing," standing in Lev. xi. 20, 21 for precisely the same Heb. phrase, rendered by the LXX. ἐπιτίθενται ἰωμέναι; and "legs above their feet to leap," not showing that the distinct larger springing legs of the beast or aves are meant; where the Heb. ἐπιτίθενται, and LXX. ἐπιτίθενται seem to express the upward projection of these legs above the creature's back. So Bochart takes it (p. 452), who also prefers άναξ in the reading above given; "its entire Hebrew sentence;" and so he adds, the Samar. Pent. He states that beasts are salted for food in Egypt (iv. 7, 401, 402; comp. Hasselmans, 251-253). The edible class is enumerated in four species No perceiv is found in Deut. relating to these.
to be given "unto the stranger that is in thy gates" (Deut. xxi. 21). As regards blood, the prohibition indeed dates from the declaration to Noah again that flesh with the life thereof is the flesh thereof" (Gen. ix. 4), which was perhaps regarded by Moses as still binding upon all Noah's descendants. The grounds, however, on which the similar precept of the Apostolic Council, in Acts xiv. 20, is based, appears not to any obligation resting still unbroken on the Gentile world, but to the risk of profane and offensive to the Jews and Jewish Christians, "if Moses of old time hath in every city that preached him." Hence this abstinence is reckoned amongst "necessary things" (ta ἑπαργεῖς), and "things offered to idols," although not solely, it may be presumed, on the same grounds, are placed in the same class with "blood and things strangled" (ἀνατελέσθη σκύλον καὶ ἄγαντα καὶ παρθένον, xvi. 28, 29). Besides these, we find the prohibition twice recurring against "setting a kid in its mother's milk." It is added, as a final injunction to the code of dietary precepts in Deut. xiv., after the climbing declaration of ver. 21, "for thou art an holy people unto the Lord thy God;" but in Ex. xxiii. 11, xxxiv. 26, the context relates to the bringing first-fruits to the altar, and to the "Angel" who was to "go before the people." Connected with this precept we shall have occasion further to return.

The general distinction of clean and unclean is rightly observed by Michaelis (Smith's Translation, Art. ecli, etc.) to have its parallel amongst all nations, there being universally certain creatures regarded as clean, i.e. fit for food, and the rest as the opposite com. Lev. xvi. 47. With the greater mixture of idolatry, however, this is only a traditional usage based merely perhaps either on an instinct relating to health, or on a repugnance which is to be regarded as an ultimate fact in itself, and of which no further account is to be given. Thus Michaelis (as above) remarks that in a certain part of Germany rabbits are viewed as unclean, i.e. are advisedly excluded from diet. Our feelings as regards the fog and the snall, contracted with those of continentals, supply another close parallel. Now, it is not unfrequently that nothing more than this is intended in the distinction between "clean" and "unclean" in the directions given to Noah. The intention seems to have been that creatures recognized, on whatever ground, as unfit for human food, should not be preserved in so large a proportion as those whose number might be diminished by that consumption. The dietary code of the Egyptians, and the traditions which have descended amongst the Arabs, unfortified, certainly down to the time ofMohammed, and in some cases later, by any legislation whatever, so far as we know, may illustrate the probable state of the Israelsites. If the Law seized upon such habits as were current amongst the people, perhaps embracing their scope and range, the whole scheme of tradition, instinct, and usages so enlarged might become a ceremonial barrier, having a relation at once to the theocratic idea, to the general health of the people, and to their separateness as a nation.

The same personal interest taken by Jehovah in his subjects, which is expressed by the demand for a ceremonially pure state on the part of every Israelsite as in covenant with Him, regarded also

---

This particular detail of that purity, namely, diet. Thus the prophet (Is. xvi. 17), speaking in His name, denounces those that "sanctify themselves (consecrate themselves to idolatry), eating swine's flesh, and the abomination, and the morose," and those "which remain among the graves and lodge in the monuments, which eat swine's flesh, and both of abominable things is in their vessels" (xvii. 15). It remained for a higher Lawgiver to announce that "there is nothing from without a man that entering into him can defile him" (Mark vii. 15). The fat was claimed as a burnt-offering and the blood enjoyed the highest sacrificial esteem. In the two combined the entire victims was by representation offered, and to transfer either to human use was to deal presumptuously with the most holy things. But, besides this, the blood was externed as "the life" of the creature, and a mysterious sanctity beyond the sacrificial relation thereby attached to it. Hence we read, "whosoever soil it be that catcheth any manner of blood, even that soul shall be cut off from his people " (Lev. vii. 27, comp. xvii. 10, 14). Whereas the offender in other dietary respects was merely "unclean until even " (xi. 40, xvii. 15). Blood was certainly drunk in certain heathen rituals, especially those which related to the solemnization of the covenant, as also as a part of the national sacrificial worship (Ps. xvi. 4; Ez. xxxii. 25). Still there is no reason to think that blood has ever been a common article of food, and any lawgiver might probably reckon on a natural aversion effectually fortifying his prohibition in this respect, unless under some bewildering influence of superstition. Whether animal qualities, grosser appetites, and other tendencies might be supposed by the Hebrews transmitted into the perpetration of the blood of animals, we have nothing to show: see, however, Josiphs. Ant. iii. 11, § 2.

It is noteworthy that the practical effect of the rule laid down is to exclude all the quadrupeds among our grovellers, and, as far as we can interpret the nomenclature, the repreh that birds. This suggests the question whether they were excluded as being not adverse to human features, and in most eastern countries acting as the servants of the battle-field and the gibbet. Even swine have been known so to feel; and, further, by their constant rumination amongst whatever lies on the ground, suggest impurity, even if they were not generally foul feeders. Amongst fowls which were allowed contain unquestionably the most wholesome varieties, save that they exclude the oyster. Probably, however, sea-fishing was little practiced by the Israelites; and the Levitical rules must be understood as referring backwards to their experience of the produce of the Nile, and forward to their enjoyment of the Jordan and its upper lakes. The exclusion of the camel and the bare from allowable meats is less easy to account for, save that the former never was in common use, and is generally spoken of in reference to the semi-barbarous desert tribes on the eastern or southern border land, some of whom certainly had no inadmissible repugnance to his flesh; although it is so impossible to substitute any other creature for the camel as the "ship of the desert," that to eat him, especially where so many other creatures give meat so much preferable, would be the worst econ-
UNCLEAN MEATS

The... in the field, had a life somewhat emboldened and sanctified by that comradely. Thus it seems to have been quite unsound to say for sacrifice or food, as in 1 K. xiv. 21, the ox accustomed to the yoke. And perhaps in this case, as being tougher, the flesh was not roasted but boiled. The case of Aramaiah's ox was not similar, as cattle of all ages were useful in the threshing-floor (2 Sam. xxiv. 22). Many of these restrictions must be esteemed as merely based on usage, or arbitrary. Practically the law left among the allowed meats an ample variety, and no inconvenience was likely to arise from a prohibition to eat canals, horses, and camels; but for the heathen, the distinction was made nearly as possible to be extenuated in proportion as the law was observed, and their economic room filled by other creatures. Wunderbar (Hibbich. Tolda. Medizin, part ii. p. 50) refers to a notion that "the animal element might only with great circumspection and discretion be taken up into the life of man, in order to avoid defacing that human life by assimilation to a brutes level, and because the soul might become degraded, profaned, filled with animal affections, and disqualified for drawing near to God." He thinks also that we may notice a meaning in the distinction between creatures of a higher, nobler, and less intensely animal organization as clean, and those of a lower and incomplete organization as unclean," and that the incantations and prayers for fertility and healing are of a higher or more complete type than others, and relatively nearer to man. This seems fanciful, but may nevertheless have been a view current among Rabbincical authorities. As regards birds, the raptores have commonly tough and indigestible flesh, and some of them are in all warm countries the natural scavengers of all sorts of carrion and offal. This alone begot an instinctive repugnance towards them, and associates them with what was beforehand a defilement. Thus to kill them for food would tend to multiply various sources of uncleanness. 

Porphyry (Astron. iv. 7, quoted by Winer) says that the Egyptian priests abstained from all fish, from all quadrupeds with solid hoods, and of hewing, or which were not horned, and from all carrionous birds. Other curious parallels have been found amongst more distant nations.

But as Orientals have minds sensitive to teaching by types, there can be little doubt that such ceremonial distinctions not only tended to keep Jew and Gentile apart, but were a perpetual reminder to the former that he and the latter were not on one level before God. Hence, when that day would come, when they both should stand in the sight of God, this was the very symbol selected to instill St. Peter in the truth that God was not a "respecter of persons." The vessel filled with "four-footed beasts of the earth, and wild beasts, and creeping things, and birds of the air," was expressive of the Gentile world, to be put now on a level with the Israelites, through God's "purifying their hearts by faith." A sense of this their own preoccupation, however bitter, may have fortified the members of the privileged nation in their struggle with the persecutions of the Gentiles on this very point. It was no more a question of which among several means of supporting life a man chose to adopt, when the persecutor dictated the alternative of "swine's flesh" and "unclean meats..." He allowed that their prohibition would surrender the badge and type of that privilege by which Israel stood as the favored nation before God (1 Mac. i. 63; 2 Mac. vi. 18, vii. 1). The same feeling led to the exaggeration of the Mosaic regulations, until it was "unlawful for a man that was a Jew to keep company with or come unto one of another nation." (Acts x. 28; and that with such intensity were badges of distinction cherished, that the wine, bread, oil, cheese, or anything cooked by a heathen, were declared unclean for a Jew to eat. Nor was this strictness, however it might at times be pushed to an absurdity, without foundation in the nature of the case. The Jews, as, during and after the return from Captivity, they found the avenues of the world opening and the wind was found blowing among the Gentiles unknowingly increased, and their only way to avoid an utter relaxation of their code would lie in somewhat overcontaining the precepts of prohibition. Nor should we omit the tendency of those who have no scruples to "despise" those who have, and to paradoxe their liberty at the expense of these latter, and give pignor to the contrast by wanton tricks, designed to beguile the Jew from his strictness of observance, and make him unguardedly partake of what he abhorred, in order to heighten his confusion by derision. One or two instances of such unamusement at the Jew's expense would be

"The... coney," A. V., Lev. xi. 5; Deut. xiv. 7; Ps. civ. 13; Prov. xxx. 29, is probably the jackal. See a correspondence on the question in The Standard and most other London newspapers, April 21, 1913.

Bochart (Hieroz. ii. 33, 335, l. 43) mentions various symbolic meanings as conveyed by the precepts regarding birds: "Ars rapates, qui... vel vertexeris, nocturnae, ut aligmente opera tenentur, et se producere habe filios, incursae et ripariis, quam viridem est inimissimum, ut alio communi immuniti in arceret. Strummonium designing, qui a terris non stipuimur, ut idem sit et quae circum omnes salutis. Quae interpretantur non nostra sed sed veterum."

He refers to Barnabas, Epist. x.; Clemens of Alex., Strom. v.; Origen, Homil. in Levit., Novation, De Christianis, cap. i.; Cyril, contra Julian. lib. ix. 1. Winer and von Rohden (Gen. ii. 20) was finding the origin of the clean and unclean animals in the Zendavesta, in which the latter are the creation of Ahura, whereas man is ascribed to that of Ormuz. He rejects, however, and quite rightly, the notion that Persian institutions exercised any influence over Hebrew ones at the earliest period of the latter, and connects it with the efforts of some "den Nestorianischen..." the idea des Zendavesta recht alt in munchen. See UNCLEAN MEATS for other usages between Persian and Hebrew ritual.

Winer also refers to Amodius, k. ii. 2; 2; Hottinger, Leg. Hebr., pp. 117, 141.
to the foul feeling which produces it; and where the average heat is great, decomposition rapid, and malarial easily excited, this tendency in the animal is more univalveous than elsewhere. A mezol or mezel, from whom we have "parceled work," is the old English word for a "leper," and it is asserted that eating swine's flesh in Syria and Egypt tends to produce that disorder (Barthold, De ... B. Wunderley, p. 51). But there is an indefiniteness about these assertions which prevents our dealing with them scientifically. Mezel or mezol may well indeed represent "leper," but which of all the morbid symptoms sickened under that head it is to stand for, and whether it means the same, or at least a parallel disorder, in man and in pig, are indeterminate questions. [LEPER] The prohibition on eating fat was salubrious in a region where skin diseases are frequent and virulent, and that on blood had, no doubt, a similar tendency. The case of animals dying of themselves needs no remark: the mere wish to insure avoiding disease, in case they had died in such a state, would dictate the rule. Yet the beneficial tendency is veiled under a ceremonial difference, for the "stranger" dwelling by the braceth was allowed it, although the latter was forbidden. This is their distinctiveness before God, as a decided prohibition put prominently where more common motives appear to have their turn. As regards the animals allowed for food, comparing them with those forbidden, there can be no doubt on which side the balance of wholesomeness lies. Nor would any didactic economist fail to pronounce in favor of the Levitical dietary code as a whole, as insuring the maximum of public health, and yet of the least distinctiveness, procured, however, by a minimum of the inconvenience arising from restriction.

Brockh's Hieroglyphen: vork's Descriptionen Allmählich, etc., war im thron orientalischer Observat. mit his Icones Region Naturlagens. and Rosen- miller's Handbuch der Bibl. Alterthumskunde, vol. iv. Natural History, may be consulted on some of the questions connected with this subject: also more generally, Moses Meinhard, De Ovo Velutis: Heinrich, De Ovo biblicorum Prohibii... H. H.

* The distinction between clean and unclean, animals was divinely recognized, apparently as already familiar among men, before the Flood (Gen. vii. 2). Animal food, on the other hand, was not permitted to man after the Flood (Gen. ix. 3, cf. i. 29 and vi. 21); and that permission was couched in the most general terms without reference to clean or unclean. It is plain, therefore, that the basis of the distinction must be sought elsewhere than in the fitness or unfitness of the various animal's to be used for food. Indeed some more satisfactory way of ascertaining for human customs in regard to this use itself seems desirable than merely tradition, or sanitary instinct, or sentiment. Such a basis both for the original distinction, and also for the difference in regard to the use of animals for food seems to be furnished by the fact that immediately after the Flood Noah offered in sacrifice "every of every clean flesh" (Gen. viii. 20). There must then have already existed a recognized distinction among animals of clean and unclean according to their fitness or unfitness to be offered in sacrifice, — a point probably determined by Divine direction in the earliest ages. This seems also to...
to that which invested the Ark of the Covenant itself. It is as though Jehovah thereby would teach them that He is the very One whose "feet were all numbered" before Him, and that "in his book were all their members written." Thus was insinuated, so to speak, a bodily holiness. And it is remarkable indeed, that the solemn precept, "Ye shall be holy; for I am holy," is used not only where moral duties are enjoined, as in Lev. xix. 2, but equally so where purely ceremonial precepts are delivered, as in Ex. xvi. 14, 15. So the emphatic and recurring period, "I am the Lord your God," is found added to the clauses of positive observance as well as to those relating to the greatest ethical barriers of duty. The same weight of veto or injunction seems laid on all alike: e. g. "Ye shall not make any cuttings in your flesh for the dead, nor print any marks upon you: I am the Lord," and "Thou shalt raise up before the hoary head, and honor the face of the old man, and fear thy God: I am the Lord." (ix. 28, 32). They had his mark set in their flesh, and all flesh on which that had passed had received, as it were, the broad arrow of the king, and was really owned by him. They were preoccupied by that mark of ownership in all that was relative to life, so as to exclude the admission of any rival badge.

Nor were they to be only "separated from other people," but they were to be "a holy unto God" (xx. 24, 26), "a kingdom of priests, and a holy nation." Hence a number of such ordinances regarding outward purity, which in Egypt they had seen used only by the priests, were made publicly obligatory on the Hebrew nation.

The importance to physical well-being of the injunctions which required frequent ablution, under whatever special pretexts, can be but feebly appreciated in our coarser and damper climate, where there seems to be a less rapid action of the atmosphere, as well as a state of the frame less disposed towards the generation of contagion, and towards moral action generally. Hence the obvious utility of the ceremonial and moral aspects of the Old Testament law, by which we understand the office of the Levites among the arrangements of the sanctuary (Ex. xxx. 18-21; I K. vii. 38, 39; comp. Ex. xix. 10, 14; I Sam. xvi. 5; Joshua iii. 5; 2 Chr. xxxix. 17). The examples of parallel observances among the nations of antiquity, will suggest themselves easily to the classical student without special references. The choice of approximation, however, to the Mosaic ritual in the respect, is said to be found in the code of Memnon, as "Reigning." (313, note). To the priests was ordinarily referred the expulsion of the law of uncleanness, as may be gathered from Hagg. ii. 11. Uncleanness, as referred to man, may be arranged in three degrees: (1) that which defiled man's spirit until it ceased, or thence removed by bathing and washing the clothes at the end of it—such were all contacts with dead animals; (2) that

---

a Compare the view of the modern Persians in this respect. Chardin's "Voyages," vol. ii. p. 343. chap. iv. Le corps se présente devant Dieu comme Cène: il
graver sort which defined for seven days, and was removed by the use of the "water of separation"—such were all defilements connected with the human corpse: (4) uncleanness from the morbid, putrefac- 
ea or menstrual state, lasting as long as that morbid state lasted—but see further below—and in the case of leprosy lasting often for life.

It suffices barely to notice the spiritual signi
cance which the law of ceremonial ordinances 
bestows on the festal observances in regard to the sacred

Body.

It is not meant to be an encomium of the pious
tendencies of the Hebrew nation; but to prove that in
the arrangements of their ceremonial system, there
was nothing out of the natural order of human life.

The same spirit which assumed the form of the
spiritual and moral law in the land of Israel, shone in
daylight in the legislations of the nations of antiquity:
and what is more, it is not improbable that the

sanc
tuary was not only the type of the heavenly
sanctuary, but was also the image of the human

body, and, besides, of the affairs of the world, as a
whole. Here is seen the spirit of the law which
fixes the correct limits for each of the moments of
the public and private life of the Jew.

It is seen how the law was a law of health,
and of disease. It could neither allow nor countenance
any form of disorder, be it physical or moral. It
called upon the nation to be pure, both in
body and mind. It taught the people to
look upon their bodies as a temple of God,
and to take care of their health, with the
same care with which they would preserve the
sanctuary of the temple.

In fact, the law was the means by which the
people of Israel were taught the necessity of
keeping their bodies pure, and the knowledge of
the laws of health became an important part of
the education of the Hebrew youth. It was the
law which taught the people to take care of their
health, and to avoid all that might cause disease or
contagion.

The law of purification was in accordance with
the moral and religious ideas of the
people of Israel, and was an expression of
the spirit of their national character. It was
a law which emphasized the importance of
morality and hygiene, and which taught the
people to live a pure and holy life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.

And it is seen that the law of purification
was not only a law of health, but also a law of
morality. It was a law which taught the people
to keep their bodies pure, and to avoid all that
might cause disease or contagion. It was a law which
emphasized the importance of morality and hygiene,
and which taught the people to live a pure and holy
life.
As regards the propagation of uncleanness the Law of Moses is not quite clear. We read (Num. xix. 22), "Whatever the unclean person toucheth shall be unclean;" but there uncleanness from contact with the corpse, grave, etc., is the subject of the chapter which the injunction closes; and this is confirmed by Hagg. ii. 13, where "one that is unclean by a dead body" is similarly expressly mentioned. Also from the command (Num. v. 2-4) to "put the unclean out of the camp;" where the "leper," the one "that hath an issue," and the one "defiled by the dead," are particularized, we may assume that the minor pollution for one day only was not communicable, and so needed not to be "put forth." It is observable also that the major pollution of the "issue" communicated by contact the minor pollution only (Lev. xv. 5-11). Hence may perhaps be deduced a tendency in the contagiousness to exhaust itself; the minor pollution, whether engendered by the major or arising directly, being non-communicable. Thus the major itself would expel after one remove from its original subject. To this pertains the distinction mentioned by Lightfoot (Hor. Hebr. on Matt. xv. 2), namely, that between οὐκελαία, "unclean," and ἦθελεν, "profane" or "polluted," in that the latter does not pollute another beside itself nor propagate pollution. In the ancient commentary on Num., known as "Siphra," etc. (ed. Uechter, T. xxiv. 244), a greater transmissibility of polluting power seems assumed, the defilement being there traced through three removes from the original subject of it; but this is no doubt a Rabbinical extension of the original Levitical view.

Michaelis notices a medical tendency in the restriction kid on withal, whereby both parties were unclean until even: he thinks, and with some reason, that the law would operate to discourage polygamy, and, in monogamy, would tend to preserve the health of the parents and to provide for the healthiness of the offspring. The uncleanness similarly imposed upon self-pollution (Lev. xv. 16; Deut. xxiii. 10), even if involuntary, would equally exercise a restraint both moral and salutary to health, and suggest to parents the duty of vigilance over their male children (Michaelis, Art. cxiv.-cxvii.).

With regard to uncleanness arising from the lower animals, Lightfoot (Hor. Hebr. on Lev. xi.-xv.) remarks, that all which were unclean to touch when dead were unclean to eat, but not conversely; and that all which were unclean to eat were unclean to sacrifice, but not conversely: since "multi eclei licet que non sacrificari, et multa turgere licet que non edere." For uncleanness in matters of food, see UNCLEAN MEATS. All animals, however, if dying of themselves, or eaten with the blood, were unclean to eat. [BLOOD.] The carcass also of any animal unclean as regards diet, however dying, defiled whatever person it, or any part of it touched. By the same touch any garment, shoe, skin, or vessel, together with its contents, became unclean, and was to be purified by washing or scouring; or if an earthen vessel, was to be broken, just as the Brahmins break a vessel out of which a Christian has drunk. Further, the water in which such things had been purified communicated their uncleanness; and even seed for sowing, if water with, became unclean by touch of any carrion, or unclean animal when dead. All these defilements were "until even only, save the eating with the dead," the offender in which respect was to "be cut off" (Lev. xi., xiii., 1).

It should further be added, that the same sentence of "cutting off," was denounced against all who should "do presumptuously" in respect even of minor defilements; by which we may understand all contempt of the legal provisions regarding them. The comprehensive term "defilement," also includes the contraction of the unlawful marriages and the indulgence of unlawful lusts, as denominated in Lev. xviii. Even the sowing heterogeneous seeds in the same plot, the mixture of materials in one garment, the sexual admixture of cattle with a diverse kind, the polluting with diverse animals in one team, although not formally so classed, yet seem to fall under the same general notion, in so far as no specific term of defilement or mode of purification is prescribed (Lev. xix. 19; Deut. xxi. 1-11: comp. Michaelis, as above, cxxv.). In the first of these cases the fruit is pronounced "defiled," which Michaelis interprets as a consecration, i.e., confiscation of the crop for the use of the priests.

The fruit of trees was to be counted "as unclean," i.e., unclean for the first three years; in the fourth it was to be set apart as "holy to praise the Lord withal," and eaten commonly not till the fifth. Michaelis traces an economic effect in this regulation, it being best to pluck off the blossoms in the early years, and not allow the tree to bear fruit till it had attained to some maturity (cxl. cxxiv.).

The directions in Deut. xxiii. 19-13, relate to the avoidance of impurities in the case of a host encamped, as shown in ver. 9, and from the mention of "exterminates" in ver. 14. The health of the army would of course suffer from the neglect of such rules; but they are based on no such ground of expediency, but on the scrupulous ceremonial purity demanded by the God whose presence was in the midst of them. We must suppose that the rule held which excludes soldiers under a defilement from pollution from the camp for a whole day, was relaxed in the presence of an enemy, as otherwise it would have placed them beyond the protection of their comrades, and at the mercy of the hostile host. As regards the other regulation, it is part of the teaching of nature itself that an assembled community should reject whatever the human body itself expels. And on this ground the Levitical Law seems content to let such a matter rest, for it annexes no stated defilement, nor prescribes any purification.

Amongst causes of defilement should be noticed the fact that the ashes of the red heifer, burnt whole, which were mixed with water and became the standing resource for purifying uncleanness in the second degree, themselves became a source of defilement to all who were clean, even as of purification to the unclean, and so the water. Thus the priest and Levite, who administered this purification, as though it were required of the host of Israel, i.e., the whole body of the people, throughout the whole of their wandering in the wilderness (Num. xix. 19), etc. ch. vi. 39.
tion in their respective degrees, were themselves made unclean thereby, but in the first or lightest
degree only (Num. xix. 7, 11). Somewhat similarly
the scape-goat, who bore away the sins of the people, defiled him who led him into the wilderness,
and the bringing forth and burning the sacrifice
on the Great Day of Atonement had a similar
power. This lightest form of uncleanness was ex-
piated by bathing the body and washing the clothes.
Besides the water of purification which was affectioned
upon men and women in their "issues," were, after seven
days, reckoned from the cessation of the disorder,
to bring two turtule-doves or young pigeons to be
killed by the priests. The purification after child-
bear is well known from the N. T.; the Law, how-
ever, primarily required a lamb and a bird, and al-
lowed the poor to commute for a pair of birds as
before. That for the leper declared clean consisted
of two stages: the first, not properly sacrificial,
though involving the shedding of blood, consisted
in bringing two such birds, the one of which the
priest killed over spring-water with which its blood
was mingled, and the mixture sprinkled seven times
on the live leper, with an instrument made of cedar-
wood, scarlet wool, and hyssop; the living bird was
then dipped in it, and let fly away, symbolizing
properly the liberty to which the leper would be
entitled when his probation and sacrifice were com-
plete, even as the slaughtered bird signified the
discharge of the impurities which his blood had
contained during the diseased state. The leper
might now bathe, shave himself, and wash his
clothes, and come within the town or camp; nor
was ever placed which he entered any longer pol-
luted by him (Mishna, Nyst. xiii. 11: Tikk. ii.
4), he was, however, relegated to his own house or
tent for seven days. At the end of that time he
was scrupulously to shave his whole body, even to
his eyebrows, and wash and bathe as before. The
final sacrifice consisted of two birds, and an ewe
sheep of the first year with flour and oil, the poor
being allowed to bring one lamb and two birds as
before, with smaller quantities of flour and oil. For
the detail of the ceremonial, some of the features
of which are rather singular, see Lev. xiv. Lepers
were allowed to attend the synagogue worship
where separate seats were assigned them (Nyst. xiii.
12).

All these kind of uncleanness disqualified for
holiness; as the reason so affected might not
approach the congregation and the sanctuary, so any
priest who incurred defilement must abstain from
the holy things (Lev. xxii. 2-8). The high-priests
were forbidden the customary signs of mourning
for father or mother, "for the crown of the mour-
ning oil of his God is upon him" (Lev. xxi. 10-12),
and beside his case the same prohibition seems to
have been extended to the ordinary priests. At
least we have an example of it in the charge given
to Eleazar and Ithamar on their brethren's death
(Lev. x. 6). From the specification of "father or
mother," we may infer that he was permitted to
mourn for his wife, and so Maimonides (De Leu.
Lam. cap. ii., iv., v.) explains the text. Further, from

---

*In* conveying in symbol only a release from the
state to which the leper, whilst such, was subject. It
is probable, however, that the duties of the symbol
rose from the natural impossibility of representing life
and death in the same creature, and that both the
birds involve a complete representation of the death,
Resurrection, and Ascension which procure the Chris-

than Atonement. This would of course, however, es-
specially of course, the Christ with his own blood, "entered the holy places not made with
hands," as the living bird soared up to the visible
Atonement with the blood of its fellow. We may con-
consider the two events completing apparently one similar
joint symbol on the day of Atonement.
unto particulars which show a singularly close correspondence with the Levitical code. This will be seen by quoting merely the headings of some of his chapters and sections. Thus we find under "chap. iv. 1st partie, Des purifications which se font avec d'oeu; 2d partie, De l'immondicité: 1st section, De l'impurité which se contracte semain calme; 2d section, De l'impuréte qui arrive aux femmes par les pertes de sang, De l'impurité des pertes de sang extrordinaire, De l'impuréte des pertes de sang des couches. 3d partie, De la purification des corps morts." We may compare also with certain Levitical precepts the following: "Si un chien boit dans un vase ou fèche quelque plat, il faut ceurer le vase avec de la terre nette, et puis le laver deux fois d'eau nette, et il sera net." It is remarkable also that these precepts apply to the people not that they are Mohammedans, but that they are Persians, as they are said to shun even Mohammedans who are not of the same ritual in regard to these observances.

For certain branches of this subject the reader may be referred to the treatises in the Midrash together with the treatises of the Talmud, and in particular, of the Tiberthow. (Pardes), Zachar (the large Liddovites), Célia (Essay), Mischoth Aveh (aborious pratitudes), also to Maionin. lib. v. Issare Bish (prodibile coitones), Nidhe (nt sug.), Maccoloth Sancroth (coit proibit). H. H.

* UNCTION. [Anoint; Spirit, The Holy.]

* UNDERSETTERS, 1 K. vii. 30, 34, are props, supports.

II. * UNGRACIOUS, i.e. "graceless," "wicked," the translation (A. V.) in 2 Macc. iv. 19, viii. 34, xv. 3 of ἀγάπης and πράσαλπρος, epithets applied to Jason and Nicomen.

A. UNICORN (.Canvas, ῥέινας, ῥέινον, or ῥέινα μονοκράτος, ἄγαν: rhinoceros, unicorn), the unhappy rendering by the A. V., following the LXX., of the Hebrew Rēmā, a word which occurs seven times in the O. T. as the name of some large wild animal. More, perhaps, has been written on the subject of the unicorn of the ancients than on any other animal, and various are the opinions which have been given as to the creature intended. The Rēmā of the Hebrew Bible, however, has nothing at all to do with the onehorned animal mentioned by Celsius (Iulicet, iv. 25–27), Ἐλιαν (Nat. Anim. xvi. 20), Aristole (Hist. Anim. ii. 2, § 8), Pliny (H. N. viii. 21), and other Greek and Roman writers, as is evident from Deut. xxxiii. 17, where, in the blessing of Joseph, it is said, "His glory is like the flashing of his bullock, and his horns are like the horns of a unicorn." (Canvas, ῥέινον), not, as the text of the A. V. renders it, "the horns of unicorn." Three horns of the Rēmā are the ten thousand of Ephraim and the thousands of Manasseh — the two tribes which sprang from one, i.e. Joseph, as two horns from one head. This text, most appropriately referred to by Schultens (Comment. in Job. xxxix. 9), puts a one-horned animal entirely out of the question, and in consequence disposes of the opinion held by Bruce (Test. v. 89) and others, that some species of rhinoceros is meant, or that maintained by some writers, that the Rēmā is identical with some one-horned animal said to have been seen by travellers in South Africa and in Thibet (see Barrow's Travels in S. Africa, i. 312–218, and Asiatic Journal, xl. 154), and identical with the veritable unicorn of Greek and Latin writers! Bochart (Hieroz. ii. 335) contends that the Hebrew Rēmā is identical with the Arabic ᴴʳⁱⁿᵃ (Can), which is usually referred to the Oryx lernorhynce, the white antelope of North Africa, and at one time perhaps an inhabitant of Palestine. Bochart has been followed by Rosenmüller, and others. Arnold Boot (Aniial. Socr. iii. 8, Lond. 1614), with much better reason, conjectures that some species of ares or wild ox is the Rēmā of the Hebrew Scriptures. He has been followed by Schultens (Comment. in Job. xxiii. 9), who translates the term by ὑβαματιστος: this learned writer has a long and most valuable note on this question, by Parkhurst (Heb. Lex. s. v. ἐνον), Maurer (Comment. in Job. i. c.), Dr. Harris (Niv. Hist. of the Bible), and by Cary (Notes on Job. i. c.). Robinson (Bibl. Res. ii. 412) and Geomius (Thees. v.) have little doubt that the babirusa (Babirosa tattilis) is the Rēmā of the Bible. Before we proceed to discuss these several claimants to represent the Rēmā, it will be well to note the Scriptural allusions in the passages where the term occurs. The great strength of the Rēmā is mentioned in Num. xxvii. 22. Job xxix. 11: his having two horns in Deut. xxxiii. 17; his fierce nature in Ps. xxix. 18; his indomitable disposition in Job xxxix. 9–11; the active and playful habits of the young animal are alluded to in Ps. xxxix. 6; while in Is. xxxix. 6, where Jehovah is said to prepare a sacrifice in Bozrah, it is added, "the remaim shall come down, and the bullocks with the hulch." The claim of any animal possessed of a single horn to be the Rēmā has already been settled, for it is manifestly too much to assume, as some writers have done, that the Hebrew term does not always denote the same animal. Little can be urged in favor of the rhinoceros, for even allowing that the two-horned species of Abyssinia (R. bicornis) may have been an inhabitant of the woody districts of the Bible lands, these pachyderms must be out of the question, as none which would have been forbidden to be sacrificed by the Law of Moses, whereas the Rēmā is mentioned by Isaiah as coming down with bullocks and rams to the Lord's sacrifice. "Omnia animalia," says Rosenmüller (Schol. in Is. i. c.), "ad sacrificium idonea in unum congregantur." Again, the skipping of the young Rēmā (Ps. xxxix. 6) is scarcely compatible with the habits of a rhinoceros. Moreover this animal, when unmolested, is not generally an object of much dread, nor can we believe that it ever existed so plentiful in the Bible lands, or even would have allowed itself to have been sufficiently often seen so as to be the subject of frequent attention, the rhinoceros being an animal of retired habits. With regard to the chias of the Oryx lernorhynce, it must be observed that this antelope, like the rest of the family, is harmless unless wounded or hard pressed by the hunter, nor is it remarkable for the possession of any extraordinary strength. Figures of the oryx occur frequently on the Egyptian sculptures, "being among the animals named by the Egyptians and kept in great numbers in their preserves" (Wilkinson's Anc. Egypt. i. 227, ed
UNNI. 1. (יָאָרָי [expressed]: אַבּוֹרָי, דְּמַי [Var. FA. in ver. 20, with part of preceding word, הָעָרָי; FA. in ver. 18, תֹּאֵר; Alex. Αυθαινόται]). One of the Levite doorkeepers (A. V. "porters") appointed to play the psaltery "on astonished" in the service of the sacred Tent, as settled by David (1 Chr. xv. 18, 20).

2. (יָאָרָי, but in כֹּלֶר [Rom.] Var. and omit. FA. (אўה; Hanoud). A second Le- vite (unless the family of the foregoing be intended) is appointed in the sacred office after the Return from Babylon (Neh. xii. 9).

* UNTOWARD. Acts ii. 40, in the sense of "perverse, intretractable," "Toward" in parts of England is applied to animals as meaning "tame," "tractable." Bacon (Essay xii.) uses "towards," for docility. (Eastwood and Wright's Bible Word Book, p. 503.)

* UPHARSIN. [MENE, etc.]

UPHAZ (יָאָרָי: מְגֹאֵס, מְגָּאֵס; Ophiop, oberegus). Jer. x. 9; Dan. x. 5. [OPHIS, iii. 28.]

* UPPER-CHAMBER. [HOUSE, ii. 1106.]

* UPPER COASTS or proper PARTS (אשְׂפֹּרְיָאנהוּן). Acts xiv. 1, are the intermediate regions through which Paul passed (דָּאָרָי), on his way from Antioch to Ephesus, at the beginning of his third missionary tour. The lands more especially meant are Galatia and Phrygia (see xix. 25). The term ἀπορρήτων, as illustrated by Kypke (Theoret. Niezr., ii. 95), implies a twofold geographical reference: first, elevated, as compared with the south-west where Ephesus was; and, secondly, inland or eastern, with reference to the relative position of the places. Xenophon's familiar use of ἀπορρήτων and ἀπόρρητος is another example of a similar application of kindred words.

UR (יָאָרָי [see below]: Χώρα: Ur) occurs in Genesis only, and is there mentioned as the land of Haran's nativity (Gen. xi. 28), the place from which Terah and Abraham started "to go into the land of Canaan" (xii. 1). It is called in Genesis "Ur of the Chaldees" (גנָּבָר יְרָי), while in the Acts St. Stephen places it, by implication, in Mesopotamia (vii. 2, 4). These are all the indications which Scripture furnishes as to its locality. As they are clearly insufficient to fix its site, the chief traditions and opinions on the subject will be first considered, and then an attempt will be made to decide, by the help of the Scriptural notices, between them.

One tradition identifies Ur with the modern Ophir. There is some ground for believing that this city, called by the Greeks Edessa, had also the name of Orba or early as the time of Isidore (ib. p. 40); but the tradition connecting it with Abraham is perhaps not later than St. Ephraem (A. D. 330-570), who makes Nimrod king of Edessa, among other places (Comment. in Gen. Op. vol. i. p. 58, B.). According to Pocock (Descrip-

* UNKNOWN GOD. [ALTAR, AMER. ed.; MERE'S HILL.

a There appears to be no doubt that the ancient scribe-inhabitants of Switzerland towards the close of the stone period succeeded in taming the bears. In a tame state," says Sir C. Lyell (Antiquity of Man, p. 24), " its bone would have been seen to be much massive and heavy, and its horns were somewhat smaller than in wild individuals."

b The reader will find a full discussion of the "Unicorn of the Ancients" in the writer's article in the Ann. and Mag. of Nat. Hist. November, 1852.
A third tradition, which appears in the Talmud, and in some of the early Arabian writers, finds Ur in Warka, the Ḫorēy of the Greeks, and probably the Ezech of Holy Scripture (called Ḫorēγ by the LXX.). This place bears the name of Horvat in the native inscriptions, and was in the country known to the Jews as "the land of the Chaldeans.

A third tradition, less distinct than either of these, but entitled to at least equal attention, distinguishes Ur from Warka, while still placing it in the same region (see Journal of Asiatic Society, vol. xi. p. 481, note 2). There can be little doubt that the city whereinto this tradition points is that which appears by its bricks to have been called Hor by the natives, and which is now represented by the town of Muroor or Meroor, the right bank of the Euphrates, nearly opposite to its junction with the Shat-el-Hic. The oldest Jewish tradition which we possess, that quoted by Eusebius from Epenomus, "Prop. Fr. ix. 17," who lived about n. c. 150, may be fairly said to intend this place: for by identifying Ur (Urin) with the Babylonian city, known also as Camarin and Chaldaiin, it assigns to it a city of the Old Monarch, which Hor was - Kurnur being "the Moon" in Arabic, and Khabiti the same luninary in the Old Armenian.

An opinion, unsupported by any tradition, remains to be noticed. Bochart, Calmet, Benson, and others, identify "Ur of the Chaldees" with a place of the name, mentioned by a single late writer - Ammiarius Marcellinus - as "a castle" existing in his day in Eastern Mesopotamia, between Hatra (el-Hudher) and Nisibis (Amm. Mar. xxi. 8). The chief arguments in favor of this site seem to be the identity of name and the position of the place between Arraphachitis, which is thought to have been the dwelling-place of Abraham's ancestors, in the time of Abraham, and Harran (Horran), whither he went from Ur.

It will be seen, that of the four localities thought to have a claim to be regarded as Abraham's city, two are situated in Upper Mesopotamia, between the Tigris and the Sinjar range, while the other two are in the alluvial tract near the sea, at least 400 miles further south. Let us endeavor first to decide in which of these two regions Ur is more probably to be sought.

That Chaldea was, properly speaking, the southern part of Babylonia, the region bordering upon the gulf, will be admitted by all. Those who maintain the northern expanse of Ur argue, that with the extension of Chaldean power the name travelled northward, and became coextensive with Mesopotamia; but, in the first place, there is no proof that the name Chaldea was ever extended to the region above the Sinjar; and secondly, if it was, the Jews at any rate mean by Chaldea exclusively the lower country, and call the upper Mesopotamia or Pudan-Aram (see Job i. 17; Is. xliii. 19, xliii. 14, &c.). Again, there is no reason to believe that Babylonian power was established beyond the Sinjar in these early times. On the contrary, it seems to have been confined to Babylonia proper, or the alluvial tract below Hit and Ikrit, until the expulsion of the Chaldeans, which was later than the migration of Abraham.

The conjectures of Euphranor Syrus and Jerome, who identify the cities of Nimrod with places in the upper Mesopotamian country, deserve no credit. The names all really belong to Chaldea proper. Moreover, the best and earliest Jewish authorities place Ur in the low region. Epenomus has been already quoted to this effect. Josephus, though less distinct upon the point, seems to have held the same view (Ant. i. 6). The Talmudists also are on this side of the question: and local traditions, which may be traced back nearly to the Hegira, make the lower country the place of Abraham's birth and early life. If Osiris has a Mosque and a Lake of Abraham, Cutha near Babylon goes by Abraham's name; and this is the traditional scene of all his legendary miracles.

Again, it is really in the lower country only that a name closely corresponding to the Hebrew "Ur" is found. The cuneiform Hor represents "Ur" letter for letter, and only differs from it in the greater strength of the aspirate. Isidore's "Ur" (Ur) differs from "Ur" considerably, and the supposed Ur of Ammiarius is probably not Ur, but Adur.ο

The argument that Ur should be sought in the neighborhood of Arraphachis and Seruj, because the names Arphaxad and Serug occur in the genealogy of Abraham (Bansen, Egypt's Place, etc., iii. 365, 367), has no weight till it is shown that the lunar names in question are really connected with the places, which is at present assumed somewhat boldly. Arraphachis comes probably from Arraphin, an old Assyrian town of no great consequence on the left bank of the Tigris, above Nineveh, which has only three letters in common with Arphaxad (Ἀρφαξάδ) and Serug which does not appear in Mesopotamia till long after the Christian era. It is rarely, if ever, that we can extract geographical information from the names in a historical genealogy; and certainly in the present case nothing seems to have been gained by the attempt to do so.

On the whole, therefore, we may regard it as tolerably certain that "Ur of the Chaldees" was a place situated in the real Chaldees - the low country near the Persian Gulf. The only question that remains in any degree doubtful is, whether Warka or Wyheir is the true locality. These places are not far apart; and either of them is sufficiently suitable. Both are ancient cities, probably long anterior to Abraham. Traditions attach to both, but perhaps more distinctly to Warka.

ο The words of Epenomus are: "Ωρ(e)ν γνωτε φιλιστα" (Ephesos), ἐν πόλει τῆς Βαβυλώνου Καμαρίνη, ἡ των αὐτίων πόλις Οὐραὶ, εἶναι ἐν μεσοποταμίῳ Χαλδαιῶν πέλευς, ἐν τούτῳ δὲκαὶ γνωτε γενεαθα Αδερσαον.

ο The MS. reading is "Adur venere;" "so Ur" is an emendation of the commentators. The former is to be preferred, since Ammiarius does not use "so" after "vene."
other hand, it seems certain that Hurri, the native name of which was Hori, represents the Ezech of Genesis, which cannot possibly be the Ur of the same look. Mugheir, therefore, which bore the exact name of ‘Ur or Hor, remains with the best claim, and is entitled to be (at least provisionally) regarded as the city of Abraham.

If it be objected to this theory that Abraham, having to go from Mugheir to Palestine, would not be likely to take Haran (Haranum) on his way, more particularly as he must then have crossed the Euphrates twice, the answer would seem to be, that the movement was not that of an individual but of a tribe, travelling with large flocks and herds, whose line of migration would have to be determined by necessities of pastureage, and by the friendly or hostile disposition, the weakness or strength of the tribes already in possession of the regions which had to be traversed. Fear of Arab plunderers (Job i. 15) may very probably have caused the emigrants to cross the Euphrates before quitting Babylonia, and having done so, they might naturally follow the left bank of the stream to the Belik, up which they might then proceed, attracted by its excellent pastures, till they reached Haran.

As a pastoral tribe proceeding from Lower Babylonia to Palestine must ascend the Euphrates as high as the latitude of Aleppo, and perhaps would find it best to ascend nearly to Bir, Haran was but a little out of the proper route. Besides, the whole tribe which accompanied Abraham was not going to Palestine. Half the tribe were bent on a less distant journey; and with them the question must have been, where could they, on or near the line of route, obtain an unoccupied territory.

If upon the grounds above indicated Mugheir may be regarded as the true ‘Ur of the Chaldees,’ from which Abraham and his family set out, some

accout of its situation and history would seem to be appropriate in this place. Its remains have been very carefully examined, both by Mr. Loftus and Mr. Taylor, while its inscriptions have been deciphered and translated by Sir Henry Rawlinson.

‘Ur or Hur, now Mugheir, or Um-Mugheir, “the bitumened,” or “the mother of bitumen,” is one of the most ancient, if not the most ancient, of the Chaldean sites hitherto discovered. It lies on the right bank of the Euphrates, at the distance of about six miles from the present course of the stream, nearly opposite the point where the Euphrates receives the Shat-el-Nic from the Tigris. It is now not less than 125 miles from the sea; but there are grounds for believing that it was anciently a maritime town, and that its present inland position has been caused by the rapid growth of the alluvium. The remains of buildings are generally of the most archaic character. They cover an oval space, 1,000 yards long by 800 broad, and consist principally of a number of low mounds inclosed within an enceinte, which on most sides is nearly perfect. The most remarkable building is near the northern end of the ruins. It is a temple of the true Chaldean type, built in stages, of which two remain, and composed of brick, partly sun-burnt and partly baked, laid chiefly in a cement of bitumen. The bricks of this building bear the name of a certain ‘Urkh, who is regarded as the earliest of the Chaldean monumental kings, and the name may possibly be the same as that of Orchamus of Orvid (Met. iii. 212). His supposed date is n. s. 2000, or a little earlier. ‘Ur was the capital of this monarch, who had a dominion extending at least as far north as Niffer, and who, by the grandeur of his constructions, is proved to have been a wealthy and powerful prince. The great temple appears to have been founded by this king, who dedicated it to the Moon-god, Hurki, from whom the town itself seems to have derived its name, or ‘Urkh, completed the temple, as well as certain other of his father’s buildings, and the kings who followed upon these continued for several generations to adorn and beautify the city. ‘Ur retained its metropolitan character for above two centuries, and even after it became

Ruins of Temple at Mugheir (Lotus).
record to Babylon, was a great city, with an especially sacred character. The notions entertained of its superior sanctity led to its being used as a cemetery city, not only during the time of the early Chaldean officers, but throughout the whole Assyrian and even the later Babylonian period. It is in the main a city of tombs. By far the greater portion of the space within the cincture is occupied by graves of one kind or another, while outside the inclosure, the whole space for a distance of several hundred yards is a thickly-occupied Chaldean-garden, but thence to the east for 1 1/2 miles a site to which the dead were brought from vast distances, thus resembling such places as Kerbela and Najaf, or Mehad Ali, at the present day. The latest mention that we find of Ur as an existing place is in the passage of Eusebius already quoted, where we learn that it had changed its name, and was called Carmania. It probably fell into decay under the Persians, and was a mere ruin at the time of Alexander's conquests. Perhaps it was the place to which Alexander's informants alluded when they told him that the tombs of the old Assyrian kings were chiefly in the great marshes of the lower country (Arrian, Exp. Alex. vii. 22).

* UR (עָרָמ, light) Rom., with next word, Orphopodi: Vat. Orphopodi: Alex. Ópsis: V.A. Ópsis: 'Où, father of Eliphaz or Elipheth, one of David's valiant men (1 Chr. xli. 35).

UR' BANE [2 syl.] (Οὐρπανᾶς [Lat. urbânum, i.e. "urban" , "refined" ]; Urbânum). It would have been better if the word had been written in the Authorised Version. For undeveloped readers sometimes mistake the sex of this Christian disciple, who is in the long list of those whom St. Paul salutes in writing to Rome (Rom. xvi. 9). We have no means, however, of knowing more about Urbanus, except, indeed, that we may reasonably conjecture from the words that follow (τῆς ἀγνωστῆς ἴματος ἐκ Χριστοῦ) that he was in active religious cooperation with the Apostle. Each of those who are saluted just before and just after is simply called τὸ ἀγνωστὸν αὐτοῦ. The name is Latin. J. S. H.

URI (עֵרִי, burning:) Opiōsaś, Ex. xxxi. 2, [xxxviii. 22]: Opiās [Vat. -ερις], Ex. xxxv. 20; 2 Chr. i. 5: Opiā [Vat. -ερι], 1 Chr. ii. 20: Alex. Opoš, except in 2 Chr. : Urih. 1. The father of Bezelaa, one of the architects of the Tabernacle (Ex. xxxi. 2, xxxv. 20, xxxviii. 22: 1 Chr. ii. 20; 2 Chr. i. 5). He was the uncle of Judah, and grandson of Caleb ben-Hezron, his father being Hur, who, according to tradition, was the husband of Miriam.

2. (Ααχήλ.) The father of Geber, Solomon's commissariat officer in Gilead (1 K. iv. 19).

3. (Στριδί: Alex. Στριδί.) One of the gatekeepers of the Temple, who had a foreign wife in the time of Ezra (Ezra xii. 24).

URIHAI (עֵרִי-אָהִי, light of Jehovah; Opiōs [Vat. -ες: in 1 Chr. xi. 41; Opiā, Alex. Opoś, Vat. -ες: Opiōs] Urihāś). 1. One of the thirty commanders of the thirty bands into which the Israelite army of David was divided (1 Chr. xi. 41; 2 Sam. xxiii. 39). Like others of David's officers (Itai of Gath; Ishbi-besheth the Ammonite, 2 Sam. xiii. 8, LXX.; Zelek the Ammonite, 2 Sam. xxii. 37) he was a foreigner—a Hittite. His name, however, and his manner of speech (2 Sam. xii. 11) indicate that he had adopted the Jewish religion. He married Bathsheba, a woman of extraordinary beauty, the daughter of Eliam—possibly the same as the son of Abihuel, and one of his brother Assyrian and even the later Babylonian period. It is in the main a city of tombs. By far the greater portion of the space within the cincture is occupied by graves of one kind or another, while outside the inclosure, the whole space for a distance of several hundred yards is a thickly-occupied Chaldean-garden, but thence to the east for 1 1/2 miles a site to which the dead were brought from vast distances, thus resembling such places as Kerbela and Najaf, or Mehad Ali, at the present day. The latest mention that we find of Ur as an existing place is in the passage of Eusebius already quoted, where we learn that it had changed its name, and was called Carmania. It probably fell into decay under the Persians, and was a mere ruin at the time of Alexander's conquests. Perhaps it was the place to which Alexander's informants alluded when they told him that the tombs of the old Assyrian kings were chiefly in the great marshes of the lower country (Arrian, Exp. Alex. vii. 22).

* UR (עָרָמ, light) Rom., with next word, Orphopodi: Vat. Orphopodi: Alex. Ópsis: V.A. Ópsis: 'Où, father of Eliphaz or Elipheth, one of David's valiant men (1 Chr. xli. 35).

UR' BANE [2 syl.] (Οὐρπανᾶς [Lat. urbânum, i.e. "urban" , "refined" ]; Urbânum). It would have been better if the word had been written in the Authorised Version. For undeveloped readers sometimes mistake the sex of this Christian disciple, who is in the long list of those whom St. Paul salutes in writing to Rome (Rom. xvi. 9). We have no means, however, of knowing more about Urbanus, except, indeed, that we may reasonably conjecture from the words that follow (τῆς ἀγνωστῆς ἴματος ἐκ Χριστοῦ) that he was in active religious cooperation with the Apostle. Each of those who are saluted just before and just after is simply called τὸ ἀγνωστὸν αὐτοῦ. The name is Latin. J. S. H.

URI (עֵרִי, burning:) Opiōsaś, Ex. xxxi. 2, [xxxviii. 22]: Opiās [Vat. -ερις], Ex. xxxv. 20; 2 Chr. i. 5: Opiā [Vat. -ερι], 1 Chr. ii. 20: Alex. Opoś, except in 2 Chr. : Urih. 1. The father of Bezelaa, one of the architects of the Tabernacle (Ex. xxxi. 2, xxxv. 20, xxxviii. 22: 1 Chr. ii. 20; 2 Chr. i. 5). He was the uncle of Judah, and grandson of Caleb ben-Hezron, his father being Hur, who, according to tradition, was the husband of Miriam.

2. (Ααχήλ.) The father of Geber, Solomon's commissariat officer in Gilead (1 K. iv. 19).

3. (Στριδί: Alex. Στριδί.) One of the gatekeepers of the Temple, who had a foreign wife in the time of Ezra (Ezra xii. 24).

URIHAI (עֵרִי-אָהִי, light of Jehovah; Opiōs [Vat. -ες: in 1 Chr. xi. 41; Opiā, Alex. Opoś, Vat. -ες: Opiōs] Urihāś). 1. One of the thirty commanders of the thirty bands into which the Israelite army of David was divided (1 Chr. xi. 41; 2 Sam. xxiii. 39). Like others of David's officers (Itai of Gath; Ishbi-besheth the Ammonite, 2 Sam. xiii. 8, LXX.; Zelek the Ammonite, 2 Sam. xxii. 37) he was a foreigner—a Hittite. His name, however, and his manner of speech (2 Sam. xii. 11)
URIAS

She "mourned" with the usual signs of grief as a widow: and then became the wife of David (2 Sam. xi. 27).

Uriah remains to us, preserved by this tragic incident, an example of the chivalrous and devoted characters that were to be found amongst the Canaanites serving in the Hebrew army. A. P. S.

2. [Oqipas: Vat. Oppenius.] High-priest in the reign of Ahaz (Is. viii. 2; 2 K. xvi. 10-16). We first hear of him as a witness to Isaiah's prophecy concerning Maher-shalal-hash-bazz, with Zechariah, the son of Jehoiachin. He is probably the same as Urijah, the priest, who built the altar for Ahaz (2 K. xvi. 10). If this be so, the prophet summoned him as a witness probably on account of his position as high-priest, not on account of his personal qualities; though, as the incident occurred at the beginning of the reign of Ahaz, Uriah's religious subservience may not yet have manifested itself. When Ahaz, after his deliverance from Rezin and Pekah by Tiglath-Pileser, went to wait upon his new master at Damascus, he saw there an altar which pleased him, and sent the pattern of it to Uriah at Jerusalem, with orders to have one made like it against the king's return. Uriah zealously executed the idolatrous command, and when Ahaz returned, not only allowed him to offer sacrifices upon it, but lavishly complied with all his imperial directions. The new altar was accordingly set in the court of the Temple, to the east of where the brazen altar used to stand; and the daily sacrifices, and the burnt offerings of the king and people, were offered upon it; while the brazen altar, having been removed from its place, and set to the north of the Syrian altar, was reserved as a private altar for the king to inquire by. It is likely, too, that Uriah's compliances did not end here, but that he was a consenting party to the other idolatries and sacrilegious acts of Ahaz (2 K. xvi. 17, 18, xxiii. 5, 11, 12; 2 Chr. xxviii. 23-25).

Of the parentage of Uriah we know nothing. He probably succeeded Azariah, who was high-priest in the reign of Uzziah, and was succeeded by that Azariah who was high-priest in the reign of Hezekiah. Hence it is probable that he is the son of the former and father of the latter, it being by no means uncommon among the Hebrews, as among the Greeks, for the grandchild to have the grandfather's name. Probably, too, he may have been descended from that Azariah who must have been high-priest in the reign of Asa. But he has no place in the sacred genealogy (1 Chr. vi. 4-15), in which there is a great gap between Amariah in ver. 11, and Shallum the father of Hilkiah in ver. 13.

[High-priest. ii. 1071 b.] It is perhaps a legitimate inference that Uriah's line terminated in his successor, Azariah, and that Hilkiah was descended through another branch from Amariah, who was priest in Jehoshaphat's reign.

3. [Oqipas, gen.] A priest of the family of Hilk-joy (in A. V. wrongly Koz), the head of the seventh course of priests. (See 1 Chr. xxiv. 10.) It does not appear when this Uriah lived, which is only named as the father or ancestor of Meremoth in the days of Ezra and Nehemiah (Ezr. viii. 33; Neh. iii. 4, 21). In Neh. his name is URIAH.

A. C. H.

URIAS (Oqipas: Urias). 1. URIAH, the husband of Bathsheba (Matt. i. 6).

2. [Vat. Oppenius.] URIJAH, 3 (1 Esdr. ix. 43; comp. Neh. vii. 4).

URIM AND THUMMIM

URIEL, fire of God, an angel named only in 2 Esdr. iv. 1, 35, v. 20, x. 28. In the second of these passages he is called "the archangel." 2. In Ezek. a "Jehovah of the children of Assaf," and Josephus (Ant. xi. 12, § 3) Milton makes him "regent of the sun." A.

URIEL (יִרְיָאֵל [fire of God]: Oqipas: [Vat. Oppenius: Uriel].) 1. A Kohathite Levite, son of Tahath (1 Chr. vi. 24 [9]). If the genealogies were reckoned in this chapter from father to son, Uriel would be the same as Zechariah in ver. 36; but there is no reason to suppose that this is the case.

2. [In ver. 11, Vat. F.A. Apoll.] Chief of the Kohathites in the reign of David (1 Chr. xvi. 5, 11). In this capacity he assisted, together with 120 of his brethren, in bringing up the ark from the house of Obed-edom.

3. Uriel of Gibeon was the father of Maachah, or Michal, the favorite wife of Rehoboam, and mother of Abijah (2 Chr. xiii. 2). In 2 Chr. xii. 20 he is called "Maachah, the daughter of Assaf," and Josephus (Ant. xi. 10, § 1) explains this by saying that her mother was Tamar, Absalom's daughter. Rashi gives a long note to the effect that Michalah was called Maachah after the name of her daughter-in-law the mother of Asa, who was a woman of renown, and that her father's name was Uriel Absalom. There is no indication, however, that Absalom, like Solomon, had another name, although in the Targum of R. Joseph on Chronicles it is said that the father of Maachah was called Uriel that the name of Absalom might not be mentioned.

URIJAH (עיריאֹ [name of Jehovah]: Oqipas: [Vat. var-:] Urias). 1. Urijah the priest in the reign of Ahaz (2 K. xvi. 10), probably the same as URIAH, 2.

2. (Oqipas.) A priest of the family of Koz, or hok-koz [Neh. iii. 4, 21], the same as URIAS, 3.

3. (Oqipas: [Vat. Oppenius:] Urias.) One of the priests who stood at Ezra's right-hand when he read the Law to the people (Neh. viii. 4).

4. (עיריאֹ: Oqipas: [Vat. var-:] Urias.) The son of Shemiah of Kirjath-jearim. He proselyted in the days of Jehoshakim concerning the land and the city, just as Jeremiah had done, and the king sought to put him to death; but he escaped, and fled into Egypt. His retreat was soon discovered; Ethnath and his men brought him up out of Egypt, and Jehoshakim slew him with the sword, and cast his body forth among the graves of the common people (Jer. xxxi. 20-23). The story of Shemiah appears to be quoted by the enemies of Jeremiah as a reason for putting him to death: and, as a reply to the instance of Micah the Morasthite, which Jeremiah's friends gave as a reason why his words should be listened to and his life spared. Such, at least, is the view adopted by Rashi.

W. A. W.

URIM AND THUMMIM (ירימאֹ ותּומָמָא: דְלַוסָא וַדְלַוסָה: doctrina et veritas).

1. (L.) When the Jewish exiles were met on their return from Babylon by a question which they had no data for answering, they agreed to postpone the settlement of the difficulty till there should rise
in "a priest with Urin and Thummim" (Ex. ii. 33; Neh. vii. 63). The inquiry, what those Urin and Thummim themselves were, seems likely to wait as long for a final and satisfying answer. On every side we meet with confusing conjectures. "Non constant." (Kiiinuth). "Neeiniiiiim." (Aleni- Ezra), "Difficile est invenire." (Augustine) — varied only by wild and conflicting conjectures. It would be comparatively an easy task to give a catalogue of these hypotheses, and transcribe to any extent the learning which has gathered around them. To attempt to follow a true historical method, and so to construct a theory which shall, at least, include all the phenomena, is a more arduous, but may be a more profitable task.

(2) The starting-point of such an inquiry must be from the words which the L. V. has left untranslated. It will be well to deal with each separately.

(A.) In Urin Hebrew scholars, with hardly an exception, have seen the plural of שֵׁנָה (=light, or fire). The LXX translators, however, appear to have had reasons which led them to another rendering, because, instead of שֵׁנָה, for its cognates, give δίανοια (Ex. xxi. 30; Exod. xiv. 10), and διήνοια (Num. xxvii. 21: Dent. xxxii. 8: 1 Sam. xxvii. 6), while in Ex. ii. 63, and Neh. vii. 65, we have respectively plural and singular participles of פָּרֹשֵׁה. In Aquila and Theodotion we find the more literal παροιμίας. The Vulg. following the lead of the LXX, but going further astray, gives doctores in Ex. xxvii. 30 and Dent. xxxii. 8, omits the word in Num. xxvii. 21, paraphrases it by μέτα σωφρόνες" in 1 Sam. xxvii. 6, and gives οὐδὲνα (in Exed.xiv. 10, as the rendering of διήνοια. Luther gives Licht. The literal English equivalent would of course be "lights;" but the renderings in the LXX and Vulg. indicate, at least, a traditional belief among the Jews that the plural form, as in Edomian and other like words, did not involve numerical plurality.

(B.) Thummim. Here also there is almost a consensus as to the derivation from שָׁמַע (=perception, completeness); but the LXX, as before, uses the closer Greek equivalent τέλεαίας but once (Ex. i. 63), and adds elsewhere to אלָכֹף: and the Vulg. giving "perfectas" there, in like manner gives "ovvifiis" in all other passages. Aquila, more accurately chooses τελεόπιεσις. Luther, in his first edition, gave Tidigfelt, but afterward restored in Kedel. What has been said as to the plural of Urin applies here also. "Light and Perfection" would probably be the best English equivalent. The assumption of a henologies, so that the two words = perfect illumination" (Carpoos, App. Crit. i. 5; Bähr, Sogdolh, ii. 153), is unnecessary and it is believed, unsound. The mere phrase, as such, leaves it therefore uncertain whether each word by itself denoted many things of a given kind, or whether the two taken together might be referred to two distinct objects, or to one and the same object. The presence of the article τόν, and yet more of the demonstrative τόν before each, is rather in favor of distinctness. In Dent. xxxiiii. 8, we have separately, "Thy Thummim and thy Urin," the first order being inverted. Urin is found alone in Num. xxvii. 21: 1 Sam. xxxvii. 6; Thummim never by itself, unless with Zillig we find it in Ps. xvi. 5.

11. (1.) Scriptural Statements. — The mysterious words meet us for the first time, as if they needed no explanation. In the description of the high-priest's apparel, Over the "breastplate there is to be a "breastplate of judgment." (םוֹי הָרִאשָׁנָה) with gold, scarlet, purple, and fine linen, folded square and doubled, a "span" in length and width. In it are to be set four rows of precious stones, each stone with the name of a tribe of Israel engraved on it, that Aaron may "bear them upon his heart." Then comes a further order. Inside the breastplate, as the tables of the Covenant were placed inside the Ark (the preposition שַׁכַּת is used in both cases, Ex. xxi. 30, xxxii. 30, are to be placed the "the Urin and the Thummim," the Light and the Perfection; and they, too, are to be on Aaron's heart, when he goes in before the Lord (Ex. xxxii. 13-15. Not a word describes them. They are mentioned as things already familiar both to Moses and the people, connected naturally with the functions of the high-priest, as mediating between Jehovah and his people. The command is fulfilled (Lev. viii. 8). They pass from Aaron to Eleazar with the sacred ephod, and other punificulos (Num. xx. 28). When Joshua is solemnly appointed to succeed the great hero lawgiver, he is bidden to stand before Eleazar the priest, "who shall ask counsel for him after the judgment of Urin," and this counsel is to determine the movements of the host of Israel (Num. xxvii. 21). In the blessings of Moses, they appear as the crowning glory of the tribe of Levi ("Thy Thummim and thy Urin: the Lord dieth not One"). The reward of the zeal which led them to close their eyes to everything but the Law and the Covenant (Dent. xxxiiii. 8. 9). Once, and once only, are they mentioned by name in the history of the Judges and the monarchy. Saul, left to his self-chosen darkness, is answered "Neither by dreams, nor by Urin, nor by prophets" (1 Sam. xviii. 6). There is no longer a priest with Urin and Thummim (תור ופָּרֹשֵׁה הקוד טוֹלֵא), with the Thummim in his description of Aaron's garments, but throws no light upon their meaning or their use (Exed. xiv. 19)."
URIM AND THUMMIM

(2.) Besides these direct statements, there are others in which we may, without violence, trace a reference, if not to both, at least to the URIM. When questions precisely of the nature of those described in Num. xxvii. 21 are asked by the leader of the people, and answered by Jehovah (Judg. i. 1, xx. 18) — when like questions are asked by Saul of the high-priest Abinah, "wearing an ephod" (1 Sam. xiv. 3, 18) — by David, as soon as he has with him the presence of a high-priest with his ephod (1 Sam. xxvii. 2, 12, xxx. 7, 8) — we may legitimately infer that the answers which the ephod contained were the conditions and 

Urim and Thummim.

The questions are in almost all cases strategic. "Who shall go up for us against the Canaanites first?" (Judg. i. 1, so xx. 18). "Will the men of Keilah deliver me and my men into the hand of Saul?" (1 Sam. xxvii. 12); or, at least, national (2 Sam. xxii. 1). The answer is, in all cases, very brief, but more in form than a simple Yes or No. One question only is answered at a single stroke.

(3.) It deserves notice before we pass beyond the range of Scriptural data, that in some cases of detection from the established religious order, we find the ephod connected not with the URIM but with the TELMOTH, which, in the days of Elisha, if not earlier, had been conspicuous in Aramean worship. Micah, first consecrating one of his own sons, and then getting a Levite as his priest, makes for him "an ephod and teraphim" (Judg. xvii. 5, xviii. 29). Throughout the history of the northern kingdom their presence at Dan made it a sacred place (Judg. xviii. 39), and apparently determined Jeroboam, in the outset of his career, to a sanctified way of life. When the prophet Hosea foretells the entire sweeping away of the system which the Ten Tribes had cherished, the point of extremest destitution is, that they shall be many days, "without an ephod, and without teraphim" (Hos. iii. 4), deprived of all counterfeited oracles, in order that they may in the end "return and seek the Lord." It seems natural to infer that the teraphim were, in these instances, the unauthorized substitutes for the URIM. The inference is strengthened by the fact that the LXX. uses here, instead of teraphim, the same word (άπαρθή) which it usually gives for URIM. That the teraphim were thus used through the whole history of Israel may be inferred from their frequent occurrence in conjunction with other divinatory devices. Thus we have in 1 Sam. xxi. 23, "witchcraft," and "teraphim" (A. V. "idolatry"); in 2 K. xxii. 21, "familiar spirits," "wizards," and teraphim" (A. V. "images"). The king of Babylon, when he uses divination, consults them (Ez. xxii. 21). They speak vanity (Zech. x. 2).

III. Theories. — (1.) For the most part we have to do with ancient conjectures rather than with inferences from these data. Among the latter, however, may be noticed the notion that, as XM is not directed to make the URIM and Thummim, they must have had a natural origin, specially

Greek words back into the Hebrew, and gives "URIM and Thummim" if two were riddles or proprieties. As on this account, probably, the high-priest was to go out to battle (Num. xxxi. 6), as, in his absence, there was to be a Sacerdos Custodes, [Priest.] The writer cannot bring himself, with Pusey (Com. xii. 30), to refer the thummim of the prophet, partly to the true, partly to the false ritual: still less, with Spencer (Dis. de Ur. et Th.), to see in all of them things which the prophet recognizes as created, unlike anything upon earth (R. ben Na-

unn, and Hottentot in Buxtorf, Diss. de Ur. et T. in Eclogin, xii.). It would be profane to discuss so arbitrary an hypothesis.

(2.) A favorite view of Jewish and of some Christian writers has been, that the URIM and Thummim were identical with the twelve stones on which the names of the tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer. Josephus, II. ii., mentions, with the Plat

nomides, R. ben Nachman, in Buxtorf, c. d.; Druejus, in Crit. Sac. on Ex. xxviii.; Chrysostom, Grutius, et al.). Josephus (Ant. iii. 7, § 5) adopts another form of the same story, and, apparently identifying the URIM and Thummim with the sardanepales on the shoulders of the ephod, says that they were bright before a victory, or when the sacrifice was acceptable, dark when any disaster was impending. Epiphanius (De xii. gnostic.), and the writer quoted by Suidas (e. c. "?Soo66"). present the same thought in yet another form. A single diamond (άπαρθή) placed in the centre of the breastplate prognosticated peace when it was bright, war when it was red, death when it was dark. It is conclusive against such views (1) that, without any evidence but without even an analogy, they make unauthorized additions to the miracles of Scripture; (2) that the former identify things which, in Ex. xxviii.; are clearly distinguished; (3) that the latter makes no distinction between the URIM and the Thummim, such as the repeated article leads us to infer.

The theory, involving fewer gratuitous assumptions, is that in the middle of the ephod, or within its folds, there was a stone or plate of gold on which was engraved the sacred name of Jehovah, the Shecaniah phaleres of Jewish caballists; and that by virtue of this, fixing his gaze on it, or reading an invocation which was also engraved with the name, or standing in his ephod before the mercy-seat, or at least before the veil of the sanctuary, he became capable of prophesying, hearing the Divine voice within, or listening to it as it proceeded, in articulate sounds, from the glory of the Shechemim (Buxtorf, l. c. 7; Lightfoot, v. 278; Braurinus, de Voilum Hier. ii. Saalschütz, Archäol. i. 963). Another form of the same thought is propounded by the statement of Jewish writers, that the Holy Spirit spake sometimes by URIM, sometimes by prophecy, sometimes by the Bath-Kol (Seder Olam, c. xiv. in Braurinus, l. c.), or that the whole purpose of the unknown symbols was "an excitandum prophetam" (R. Levi ben Gerson, in Buxtorf, l. c. Kimech, in Spencer, l. c.). A more eccentric form of the "writing" theory was propounded by the Chaldean argo. who maintained that the URIM and Thummim were two confessions of faith in the Messiah and the Holy Spirit (Carpzov, App. Crit. i. 5).

(4.) Spencer (de Ur. et Th.) presents a singularly right and good. It is simpler to take them as de

sounding to the Amen or Amen, in which the northern kingdom had gloated, and of which it was to be deprived.

a A wilder form of this belief is found in the caballistic book Zohar. There the URIM is said to have been given to Moses by God, but the names of the Tribes of Israel were engraved in stone and put in the Holies. The writer of the Zohar quotes a verse from the Psalms, where the word is rendered "occult mixture."
URIM AND THUMMIM

A handful of diamond cubes, large enough to have words or monograms engraved on them, is a thing which has no parallel in Egyptian archaeology, nor, indeed, anywhere else.

(5.) The latest Jewish interpreter of eminence (Kittel, on Ex. xxviii. 31), combining parts of the views (1) and (3), identifies the Urinum and Thummum with the twelve tribal gems, looks on the name as one to be explained by a hypothesis (light and Perfection = perfect illumination), and believes his thoughts on the attributes they represented, to have diversified himself of all selflessness and prejudice, and so to have passed into a true prophetic style. In what he says on this point there is much that is both beautiful and true. Lightfoot, it may be added, had taken the same view (ii. 407; c. 278; and that given in (3) converges to the same result.

IV. One more Theory.—(1.) It may seem venturesome, after so many wild and conflicting conjectures, to add yet another. If it is believed that the risk of falling into one as wild and baseless need not deter us, it is because there are materials within our reach, drawn from our larger knowledge, and from our fuller insight into the less common phenomena of consciousness, which were not, to the same extent, within the reach of our fathers.

(2.) The starting point of our inquiry may be found in adhering to the conclusions to which the Scriptural statements lead us. The Urinum were not identified with the Thummum, neither of them with the tribal gems. The notion of a hekla (almost always the weak prop of a weak theory) may be discarded. And, seeing that they are mentioned with no description, we must infer that they and their meaning were already known, if not to the other Israelites, at least to Moses. If we are to look for their origin anywhere, it must be in the mysticism and the symbolism of Egypt.

(3.) We may start with the Thummum, as presenting the easier problem of the two. Here there is at once a potent and striking analogy. The priestly judges of Egypt, with whose presence and cult Moses must have been familiar, were, each of them, hanging on his neck, suspended on a golden chain, a figure which Greek writers satisfied themselves with. But, on the image of Truth ("Āgyāγη as in the LXX.) often with closed eyes, made sometimes of a sapphire or other precious stones, and, therefore necessarily small. They were to see in this a symbol of the purity of motive, without which they would be unmoving of their office. With it they touched the lips of the litigant as they bore him speck the truth, the whole, the perfect truth (Diol. Sec. i. 48, 57; Eilam, Der. Hist. xiv. 34). That this parallelism commended itself to the most learned of the Alexandrian Jews we may infer (1) from the deliberate but not obvious use by the LXX. of the word Aγyαγη as the translation of Thummum; (2) from a remarkable passage in Philo (de Lr. Mos. iii. 11), in which the writer states that the high-priest was made strong that he might bear as an image (τους αγαλματοσφη) the two virtues which were so needful for his office.

"the burnings, or fiery ones; " and Teraphim is but the same word, with an Arabic substitution of for ב, as the Hebrew term, in the corrected text, for תר, the name of the chief god of the Philistines, whose wooden images were supposed to possess divine power, and to answer to the name of Thummum in the Hebrew inscription on the stone images found in Egypt. The name was accordingly given to the wooden images of Baal, as well as to the stone images of the Egyptian gods, and the name of Teraphim was used to signify the images of the Egyptian gods, or images of any kind, as well as the images of Baal, or any idol.
The connection between the Hebrew and the Egyptian symbol was first noticed, it is believed, by Spencer (l.c.). It was met with cries of absurd. No single custom, rite, or symbol, could possibly have been transferred from an idolatrous system into that of Israel. There was no evidence of the antiquity of the Egyptian practice. It was probably suggested from Wilkinson's (ii. 10, 11, 12) in Udogini, i.e. Elhoudahcarn. In Urin et Th. in Udogini, xii. Patrick. Comm. in Ex. xxviii.). The discussion of the principle involved need not be entered on here. Spencer's view of putting the case, assuming that a deified form of religion was given in condescension to the superstitions of a deified people, made it, indeed, uselessly offensive, but it remains true that a revelation of any kind must, to be intelligible, use preexistent words, and that those words, whether spoken or symbolic, may therefore be taken from any language with which the recipients of the revelation are familiar. In this instance the prejudice has worn away. The most orthodox of German theologians accept the once startling theory, and find it not only in the variety of the symbols of which the Egyptian teche (Hengstenberg, Egypt and the Five Books of Moses, v. i.). It is admitted, partially at least, by a devout Jew (Kolisch, on Ex. xxviii. 31). And the missing link of evidence has been found. The custom was not, as had been said, of late origin, but is found on the older monuments of Egypt. There, round the neck of the judge, are seen the two figures of Thummis, the representative of Themis, Truth, Justice (Wilkinson, Ancient Egyptians, v. 28). The coincidence of sound may, it is true, be accidental, but it is at least striking. In the words which tell of the tribe of Levit, in close connection with the Thummis as its chief glory, that it is at the stern task of duty, blind to all that could turn it aside to evil, "saying to his father and his mother, I have not seen him" (Deut. xxxii. 9), we may perhaps trace a reference to the closed eyes of the Egyptian Thummis.

(4.) The way is now open for a further inquiry. We may legitimately ask whether there was any symbol of Light standing to the Urim in the same relation as the symbolic figure of Truth stood to the Thummis. There, round the neck of the judge, as has been observed, are the two figures of Thummis, the representative of Themis, Truth, Justice (Wilkinson, Ancient Egyptians, v. 28). The coincidence of sound may, it is true, be accidental, but it is at least striking. In the words which tell of the tribe of Levit, in close connection with the Thummis as its chief glory, that it is at the stern task of duty, blind to all that could turn it aside to evil, "saying to his father and his mother, I have not seen him" (Deut. xxxii. 9), we may perhaps trace a reference to the closed eyes of the Egyptian Thummis.

Creation and Resurrection. The material of the symbol varied according to the rank of the wearer. It might be of blue porcelain, or Jasper, or cornelian, or lapis lazuli, or amethyst. Prior to our knowing what the symbol was, we should probably think it natural and fitting that this, like the other, should have been transferred from the lower worship to the higher. Thus, from contact with falsehood and idolatry, Position, size, material, meaning, everything answers the conditions of the problem.

(5.) But the symbol in this case was the mystic Sacrifice; and it may seem to some startling and incredible to suggest that such an emblem could have been borrowed for such a purpose. It is perhaps quite as difficult for us to understand how it could ever have come to be associated with such ideas. We have to throw ourselves back into a stage of human progress, a phase of human thought; the most utterly unlike any that comes within our experience. Out of the mud which the Nile left in its flooding, men saw myriad forms of life issue. That of the Sacrifice was the most conspicuous. It seemed to them self-generated, called into being to destroy all human work, to put an end to the gods, and to establish a new order of things. The human races reflect the bright rays made it seem like the sun in miniature. It became at once the emblem of Levi, the sun, and its creative power (H. A. E. Str. v. 4, § 21; Euseb. Prep. Evang. iv. 4; Brugsch, Liber Metopaiporai, p. 53; Wilkinson, Ancient Egyptians, iv. 205, v. 26, 476). But it came also out of the dark earth, after the flood of waters, and was therefore the symbol of life rising out of death in new forms: of a resurrection and a metempsychosis (Brugsch, l. c. and Egyptian Mythology, p. 32). So it was that not in Egypt only, but in Ethiopia and Assyria and other countries, the same strange emblems reappeared (Dennis, Gods and Epitaphs of Ethiopia, Introd. xxiii.; Leitard, Nuestra, ii. 214). So it was that when, forgetting the actual in the ideal, invested it with the title of Maruyerm (Horapollo, Hierog. l. c. 10), that the more mystic, dreamy, Gaotic sects adopted it into their symbolic language, and that semi-Christian Sarcophagi are found with the sacred words dia,o, Salachor, or the names of angels engraved on them (Hellermam, Uber die Schriftliche, ii. 190; p. 77). Indeed, the Egyptian Seraph, appears, in spite of its original meaning, on the monuments of Christian Egypt (Wilkinson, Anc. Egypt., v. 283). In older Egypt it was, at any rate, connected with the thought of Divine illumination, found in frequent union with the symbolic eye, the emblem of the providence of God, and with the hieroglyphic invocation, "Tu radias dia vitam partis hominum" (Brugsch's translation, Liber Metopaiporai, p. 33). It is obvious in that such a case, as with the Cross asvasti, the Sarcophagi is neither an idol, nor identified with idolatry. It is simply a word, as much the mere exponent of a thought as if it were spoken with adopting Michaelis's view. In his Prophecies (l. 15) he speaks of the high-priest fixing his gaze on these to bring himself into the prophetic state.

The symbolic language of one nation or age, of course, often be unintelligible, and even seem incredible to another. They will take for granted that men have worshipped what they manifestly respected. Would it be easy to make a Molièrean understand clearly the meaning of the symbols of the four Evangelists as used in the ornaments of English churches? Would an English congregation, not archeologists, bear to be told that they saw in un

4 It may be reasonably urged indeed that in such cases the previous connection with a false system is a reason for, and not against the use of a symbol in itself expressive. The priests of Israel were taught that they were not to have lower thoughts of the light and perfection which they received than the priests of Egypt.

5 It is right to add that the Egyptian origin is rejected both by Bahr (Symbolik, ii. 114) and Ewald (Hier. Komm. pp. 357-359), but without sufficient grounds. Ewald's treatment of the whole subject is, indeed, at once superficial and inconsistent. In the 4th edition l. e. c. he speaks of the Urim and Thummim as only,
the lips, or written in phonetic characters. There is nothing in its Egyptian origin or its animal form which need startle us any more than the like origin of the Ark or the Thummim, or the like form in the Biblical serpents, or the four-legged symbolic figures of the Cherubim. It is to be added, that Joseph by his marriage with the daughter of the priest of On, the priest of the sun-god Ra, and Moses, as having been trained in the learning of the Egyptians, and probably among the priests of the same ritual, and in the same city, were certain to be acquainted with the sculptured cobra, and with its meaning. For the latter, at any rate, it would need no description, no interpretation. Deep set in the Chosen, between the genes that represented Israel, it would set forth that Light and Truth were the centre of the nation's life. Belonging to the breachplate of judgment, it would bear witness that the high-priest, in his onerous acts, needed all things spotless integrity and Divine illumination. It fulfilled all the conditions and taught all the lessons which Jewish or Christian writers have connected with the Coenobium.

(6.) (A.) Have we any data for determining the material of the symbol? The following tend at least to a definite conclusion: (1.) If the stone was to represent light, it would probably be one in which the object imitated is of the best form, colorless and clear, diamond or rock crystal. (2.) The traditions quoted above from Suidas and Epiphanius confirm this inference. (3.) It is accepted as part of Zohar's theory, by Dean Trench (Epistles to Several Churches, p. 125). The "white stone" of Rev. ii. 17, like the other rewards of him that overcometh, declared the truth of the Universal Priesthood. What had been the sacred, this special treasure of the house of Aaron should be bestowed freely on all believers.

(B.) Another fact connected with the symbol enables us to include one of the best supported of the Jewish conjectures. As seen on the bodies of Egyptian priests and others it almost always bore an inscription, the name of the god whose priest served, or, more commonly, an invocation, from the Book of the Dead, or some other Egyptian liturgy (Heges. Lib. Metaphys. i. c.). There would here, also, be an analogy. Upon the old emblem, ceasing it may be, to bear its old distinctive form, there might be the "new name written," the Tetragrammaton, the Sme-dou-moun-erouph of later Judaism, directing the thoughts of the priest to the true Lord of Life and Light, of whom, unlike the Lord of Life in the temples of Egypt, there was no form or similitude, a Spirit, to be worshipped therefore in spirit and in truth.

(7.) We are now able to approach the question, "In what way was the Coenobium instrumental in enabling the high-priest to give a true oracular response?" We may dispute, with the more thoughtful writers already mentioned (Kimchi, on the seal of a pelican or a fish, as a type of Christ) (Clem. Alex. Pædag. iii. 11, § 59. a) the words of Epiphanius are remarkable, η ἄγαλμαὑποτελημένον οἵτινς τὰ ἐλάχιστα καθίσταται τὰ ἄλλα ἀπὸ τοῦ Κωνικῆς καὶ τῆς Βυζαντινῆς. c) For the reasons stated above, in discussing Zohar's theory, the writer finds himself unable to agree with Dean Trench as to the diamond being certainly the stone in question. So far as he knows, no diamonds have as yet been found among the gems of Egypt. Rock crystal seems therefore the more probable of the two.

(2.) Sam. xxv., may be added, the gratuitous productions which have no existence but in the fancies of Jewish or Christian dreamers, the articulate voice and the illuminated letters. There remains the conclusion that in some way, they helped him to rise out of all selfishness and hypocrisy, out of all ceremonial routine, and to pass into a state analogous to that of the inter prophets, and so to become capable of a new spiritual illumination. The nobis operatus in this case may, it is believed, be at least illustrated by some lower analogies in the less complex phenomena of our own experience. Among the most remarkable of such phenomena is the change produced by concentrating the thoughts on a single idea, by gazing steadfastly on a single fixed point. The brighter and more dazzling the point upon which the eye is turned the more rapidly the change produced. The life of perception is interrupted. Sight and hearing fail to fulfill their usual functions. The mind passes into a state of profound abstraction, and loses all distinct personal consciousness. Though not asleep it may see visions and dream dreams. Under the singular influence of a will for the time stronger than itself, it may be played on like a thinking automaton. What so thoroughly placed on its mental state is determined by the "dominant ideas" which were impressed thereon. At the moment of the act, it brought about the abnormal change (Dr. W. B. Carpenter in Quarterly Rev. xiiii. 510, 522). (8.) We are familiar with these phenomena chiefly because they connect themselves with the lower forms of mysticism, with the tricks of electro-biologists, and other charlatans. Even as such they present points of contact with many facts of interest in Scriptural or Ecclesiastical History. Independent of many facts in monastic legends of which this is the most natural explanation, we may see in the last great controversy of the Greek Church a startling proof how terrible may be the influence of these morbid states when there is no healthy moral or intellectual activity to counteract them. For three hundred years or more the rule of the Abbot Simon of Syria, preserved, as it appeared, perfectly analogous to that described above, was adopted by myriads of monks in Mount Athos and elsewhere. The Christianity of the East seemed in danger of giving its sanction to a spiritual suicide like that of a Buddhist seeking, as his highest blessedness, the annihilation of the Nirvana. Drung in profound abstraction, their eyes fixed on the central objects of their own bodies, the Quietists of the 14th century (γυχαστης, οαπαλαφειον) enjoyed an unbreakable tranquility, believed themselves to be radiant with a Divine glory, and saw visions of the uncreated light which had shone on Tabor. Degrading as the whole matter seems to us, it was a serious danger then. The manna spread like an epidemic, even among the fathers, among their students, and artisans gave themselves up to it. It was in 1862 any actual resemblance to its original prototype are familiar to all students of symbolism. The Ouz cassata, the Tov, which was the sign of life, is, perhaps, the most striking instance (W. Robinson, Jr. Rev. ii. 233). Gesenius, in like manner, in his Monumenta Puteana, ii. 68, 70, gives engravings of scarabæi in which nothing but the oval form is left. (d) The word is used, of course, in its popular sense, as a toy moving by compressed spring, the speaking automatic force is just the element which was for the time disappered. 

URIM AND THUMMIM

A The prayer of Ps. xxxiii. 5. "Send out thy light and thy truth;" though it does not contain the words "Urim and Thummim," speaks obviously of that which they symbolized, and may be looked upon as an echo of the high-priest's prayer in a form in which it might be used by any devout worshipper.

The striking exclamation of Sam. 11. 13: "I have spoken in my anger;" that the Urim was no longer needed, was clearly an interruption of this process (1 Sam. xiv. 19).

"THAT the hand of the Lord was the recognized expression for his awful consciousness of the Divine will, and from the visions of Ezekiel (i. 3, 14, et al.), and 1 K. xviii. 45. It helps us obviously to determine the sense of the corresponding phrase "with the finger of God," in Ex. xxxii. 18. Comp. too, the equivalence, in our Lord's teaching of the two For the finger of God (Luke x. 20 = 'by the Spirit of God,' Matt. xii. 28) cast out de'ia

URIM AND THUMMIM

portant enough to be the occasion of repeated Sym-
sins, in which emperors, patriarchs, bishops were
to take part, and mostly in favor of the prac-
tives, and the corollaries deduced from it (Floury, Hist. Eccles. xve. 9; Gieseler, Ch. Hist. § 129;
Maury, La Magie et l'Astrologie, pp. 429, 430).

(9.) It is at least conceivable, however, that, within given limits, and in a given stage of human pro-
ress, the state which seems so abnormal might have a use as well as an abuse. In the opinion of one of the foremost among modern physiologists, the process of hypnotism would have their place in a perfect system of therapeutics (Quart. Rev. of Therapeutics, 1 c.). It is open to us to believe that they may, in the less perfect stages of the spiritual history of mankind, have helped instead of hindered. In this way only, it may be, the sense-bound spirit could abstain itself from the outer world, and take up the attitude of an expectant tranquillity. The en-
tire suppression of human consciousness, as in the analogous phenomenon of an ecstatic state [comp. Trance], the surrender of the entire man to be played upon, as the hand plays upon the harp, may, at one time, have been an actual condition of the inspired state, just as even now it is the only concep-
tion which some minds are capable of forming of the fact of inspiration in any form or at any time. However this may be, it may represent to one who seeks the process of seeking commingled by 'Urhm.' The question brought was one affecting the well-
being of the nation, or its army, or its king. The inquirer spoke in a low whisper, asking one question only at a time (Gen. Bab. Joma, in Mehe, L. c.). The high-priest, fixing his gaze on the "gems peculiar that lay on his heart," fixed his eye upon the "light and the perfection which they symbolized, on the Holy Name inscribed on them. The act was itself a prayer, and, like other prayers, it might be answered. After a time, he passed into the new, mysterious half-ecstatic state. All disturbing elements — selfishness, prejudice, the fear of man — were eliminated. He received the insight which he craved. Men trusted in his decisions as with his own trust. The judgment which he has been justified by prayer for the help of the Eternal Spirit, more than that which grows only out of debate, and policy, and calculation.

(10.) It is at least interesting to think that a like method of passing into this state of insight was practiced elsewhere in the country to which we have traced the Urim, and among the people whose education this process was adapted. We need not think of Joseph, the pure, the heaven-
taught, the blameless one, as adopting, still less as falsely pretending to adopt, the dark arts of a sys-
tem of imposture (Gen. xlv. 15). For one into whose character the dream-element of precision entered so largely, there would be nothing strange in his use of oubor by which he might superimpose at will the dream-state which had come to him in his youth unbidden, with no outward stimulus; and the use of the cup by which Joseph "divined" was precisely analogous to that which has been now de-
scribed. To fill the cup with water, to fix the eye on a gold or silver coin in it, or, more frequently, on the dazzling reflection of the sun's rays from it, was an essential part of the sakamakaria, the Ancient

paeia of ancient systems of divination (Maury, La Magie et l'Astrologie, pp. 426-428; Kalsius, Genesis, in loc.). In the most modern form of it, among the magicians of Cairo, the boy's fixed gaze upon the few drops of ink in the palm of his hand answers the same purpose and produces the same result (Lane, Med. Egypt, i. c. xii.). The differ-
ence between the true and the false in these cases is, however, far greater than the superficial res-
semblance. To enter upon that exceptional state with

urine, stupid curiosity, may lead to an inauthentic
which is the spirit of every casual suggestion. To pass into it with feelings of hatred, passion, lust, may add to their power a fearful intensity for evil, till the state of the soul is demonic rather than human. To enter upon it as the high-priest en-
tered, with the prayer of faith, might in more man-
ner intensity what was noblest and truest in him, and
fit him to be for the time a vessel of the Trih.

(11.) It may startle us at first to think that any physical media should be used in a divine order to bring about a spiritual result, still more that these media should be the same that are used in systems in which evil is at least preponderant; yet here too Scripture and History present us with very striking analogies. In other forms of worship, in the mysteries of his, in Orphic and Coryzian and revels, music was used to work the worshippers into a state of orgiastic frenzy. In the mystic frater-
ality of the Pythagoreans it was employed before sleep, and their visions might be sincere and pure (Plu-
tarch, De Is. et Osir. ad fin.). Yet the same in-
sance may be brought about a result analogous to
least at the latter, probably embracing elements of
both, was used from the first in the gatherings of
the prophets (1 Sam. x. 5). It soothed the vexed
spirit of Saul (1 Sam. xvi. 23): it wrought on him, when it came in his plead to, till he too burst into a

jewish fable upon him "(2 K. i. 13).
URIM AND THUMMIM

be placed on the assertion of other Jewish writers, that they continued in activity till the time of the Babylonian Exile (Sadd. p. 45; Midrash on Song of Solomon, in Buxtorf, l. c.). It is quite inexcusable, had it been so, that there should have been no single instance of an oracle thus obtained during the whole history of the monarchy of Judah. The facts of the case are few, but they are decisive. Never, after the days of David, is the ephod, with its appendages, connected with counsel from Jehovah (or Baveno, 2 Kings, xii. 5). Abiathar is the last priest who habitually uses it for that purpose (1 Sam. xxiii. 6, 9, xxviii. 6; probably also 2 Sam. xxi. 1). His name is identified in a strange tradition embodied in the Talmud (Shabbetha, f. 19, 1, in Lightfoot, xi. 386) with the departed glory of the Urim and the Thummim. And the explanation of these facts is not far to seek. Men had been taught by this time another process by which the spiritual might at once assert its independence of the sensuous life, and yet retain its distinct personal consciousness — a process less liable to perversion, leading to higher and more continuous illumination. Through the sense of hearing, not through that of sight, was to be wrought the subtle and mysterious change. Through the universe of its marvellous variety, its subtle sweetness, its spirit-stirring power — was to be, for all time to come, the lawful help to the ecstasy of praise and prayer, opening heart and soul to new and higher thoughts. The utterances of the prophets, speaking by the word of the Lord, were to supersede the oracles of the Urin. The change which about this period passed over the speech of Israel was a witness of the moral elevation which that other change involved. — 'He that is now called a prophet was beforetime called a seer' (1 Sam. ix. 9). To be the mouth-piece, the spokesman of Jehovah was higher than to see visions of the future, however clear, whether of the armies of Israel or the lost asses of Kish.

(13.) The transition was probably not made without a struggle. It was accompanied by, even if it did not in part cause the transfer of the Pontificate from one branch of the priestly family to another. The strange opposition of Abiathar to the will of David, at the close of his reign, is intelligible on the hypothesis that he, big accostmed, as holding the Ephod and the Urin, to guide the king’s counsels by his oracular answers, viewed, with some apprehension to judge from his growing influence of the prophets, and the accession of a prince who had grown up under their training. With him at any rate, so far as we have any knowledge, the Urin and the Thummim passed out of sight. It was well, we may believe, that they did so. To have the voices of the prophets in their stead was to gain and not to lose. So the old order changed, giving place to the new. If the final warning of the Israelites of the Captivity had been fulfilled, and a priest had once again risen with Urin and with Thummim, they would but have taken their place among the weak and haggard elements” which were to pass away. All attempts, from the Rule of Simon to the Spiritual Exercises of Loyola, to invert the Divine order, to purchase spiritual cestasies by the sacrifice of intellect and of conscience, have been steps backward into darkness, not forward into light. So it was that God, in many different manners and many different narratives (e.g. the Acts of Paul and the Acts of Simon Magus), spoke in time past unto the Fathers (Heb. vi. 1). So it is, in words that embody the same thought, and draw from it a needful lesson, that

“God fulfills himself in many ways,

Lost one good custom should corrupt the world.”

E. H. P.

* USURUM. * (USURAM). This is the name of the remarkable mountain of rock-salt near the southern end of the Dead Sea, called by the natives Hîyân Usūrum, Khôbán Usūrûm, and Jôdîl Usūrûm. The name is generally accepted as a tradition of Solomon. It has been fully described by Robinson and Tristram, and its probable connection with the saltiness and volume of the sea, and with the site of Solom, has been discussed in preceding articles. Travellers refer particularly to the fantastic shapes into which some of its pinacules and angles are worn by the action of the elements. The latest visitor, Captain Warren, collected amongst the beautiful spots of the salt cakes, only pointing towards the sky, which melted away at Jerusalem.” Captain W. has been the first, in modern times, to accomplish the ascent of the cliff Sûlbah (Masada) on the east (Quart. Storl. Pol. &c. Final, No. iv. pp. 141-150). [Masada; Smîth, Vale of; Solom.] N. W.

URSY. Information on the subject of lending and borrowing will be found under Loan. It need only be remarked here that the practice of mortgaging land, sometimes at exorbitant interest, grew up among the Jews during the Captivity, in direct violation of the Law (Lev. xxv. 36, 37; Ex. xxviii. 8, 13, 17). We find the rate reaching 1 in 100 per month, corresponding to the Roman centesima sore, or 12 per cent. per annum — a rate which Nicodemus considers to have been borrowed from abroad, and which is, or has been till quite lately, a very usual or even a minimum rate in the East (Neh. Hist. of Rome. iii. 37, Eng. Tr., Volney, Trav. ii. 254, note; Claudin, Voy. vi. 122). Yet the law of the Kurîm, like the Jewish, forbids all usury (Lam. H. E. i. 162; Sale, Kurîn, c. 30). The laws of Menû allow 18 and even 24 per cent. as an interest rate; but, as was the law in Egypt, accumulated interest was not to exceed twice the original sum lent (Laws of Menû, c. viii. 110, 111, 157; Sir W. Jones, Words, vol. iii. p. 255; Diod. i. 9, 79). This Jewish practice was annulled by Nekemiah, and an oath exacted to insure its discontinuance (Neh. v. 3-13; Secklin, De Jur. Nat. vi. 10; Holmann, Lez. “Usura.”)

H. W. P.

* The word *usury* has come in modern English to mean excessive interest upon money lent, either for a nominal or for many different reasons. At the time of the Anglian version, however, the word did not bear this sense, but simply meant interest of any kind upon money, thus strictly corresponding to the Hebrew *נפט* (and also *נַפְט* which is used in Neh. v. 7). It is to be remem-

[In addition to the authorities cited in the text, the references given above have also written, De Urin und Thummim, die absonb kommt, He apparently identifies the Urin and Thummim with the gem of the breastplate.]

3363
tered that the Jewish law prohibiting usury, forbid the taking of any interest whatever for money lent, without regard to the rate of interest; but this prohibition related only to the Jews, their brethren, and there was no command regulating either the taking of interest, or its amount, from foreigners.

F. G.

U'TA (Othâd: Uthâh), 1 Esdr. v. 30. It appears to be a corruption of Akkub (Ezr. ii. 45).

U'THAI (2 syl.) [גַּלְגַּל] [Jechovah success].

Gebri: [Vat. Paech]; Alex. Gebri: Othai. 1. The son of Anamul, of the children of Pharez, the son of Judah (1 Chr. ix. 4). He appears to have been one of those who dwelt in Jerusalem after the Captivity. In Neh. xi. 4 he is called "Aôthâh the son of Uziah."

2. (Othai): [Vat. Othâh]: Uthai. One of the sons of Buz, who returned in the second carava- van with Ezra (Ezr. viii. 14).

U'THI (Othâh), 1 Esdr. viii. 40. [Uthai, 2.]

* UTTER, Lev. v. 1, where he who does not "utter" iniquity is said to commit iniquity, e. c. if he does not make it known or disclose it. This sense of the word more seldom occurs except in speaking of the "utterance" or circulation of money and stocks.

II. UZ (גֵּד) [fruitful in trees, Dietr.]: Oze.

[Rom. Vat. om. in 1 Chr.]: Alex. Oze: "Uz, Hos.") This name is applied to 1. A son of Aram (Gen. x. 23), and consequently a grandson of Shem, to whom he is immediately referred in the more concise genealogy of the Chronicles, the name of Aram being omitted a (1 Chr. i. 17). 2. A son of Nahor by Milcah (Gen. xxii. 21): A. V. Huzai. 3. [וּז, אָוֹז: Hos.]: A son of Dishan, and grandson of Seir (Gen. xxxvi. 28): [1 Chr. i. 42].

4. [I'ôthâh]: Sin. אָוָה: Hos."

The country in which Job lived (Job i. 1). As the genealogical statements of the book of Genesis are undoubtedly ethnological, and in many instances also geographical, it may be fairly surmised that the coincidence of names in the above cases is accidental, but points to a fusion of various branches of the Shemite race in a certain locality. This surmise is confirmed by the circumstance that other connecting links may be discovered between the same branches. For instance, Nos. 1 and 2 have in common the names Aram (comp. Gen. x. 23, xxii. 21) and Maacha as a geographical designation in connection with the former (1 Chr. xix. 6), and a personal one in connection with the latter (Gen. xxii. 21). Nos. 2 and 4 have in common the names Buz and Buzite (Gen. xxii. 21; Job xxvii. 2). Chesed and Chushil (Gen. xxii. 22; Job i. 17, A. V. "Chaldæan"). Shuah, a nephew of Nahor, and Shuhaite (Gen. xxii. 2; Job ii. 11), and Kelem, as the country whither Abraham sent Shuah, together with his other children by Keturah, and also as the country where Job lived (Gen. xxv. 6; Job i. 3). Nos. 3 and 4 again, have in common Eliphaz (Gen. xxxvi. 10; Job ii. 11), and Teman and Temuanite (Gen. xxxvi. 11; Job. ii. 11). The ethnological fact embodied in the above coincidences of names appears to be as follows: Certain branches of the Aramaic family being both more ancient and occupying a more northerly position than the others, founded with branches of the later Abrahamids, holding some what central position in Mesopotamia and Pales- tine, and again with branches of the still later Edomites of the south, after they had become a distinct race from the Abrahamids. This conclusion would receive confirmation if the geographical position of Uz, as described in the book of Job, harmonized with the probability of such an amalgamation. As far as we can gather, it lay either east or southeast of Palestine (Job i. 3; see BENE-KEDEM); adjacent to the Salassites and the Chaldeans (Job i. 15, 17), consequently northward of the southern Arabsians, and westward of the Edomites; and, lastly, adjacent to the Edomites of Mount Seir, who at one period occupied Uz, probably as conquerors (Lam. iv. 21), and whose troglodyte habits are probably described in Job xxx. 6, 7. The position of the country may further be deduced from the native lands of Job's friends, Eliphaz the Temanite being an Idumæan, Elihu the Buzite being probably a neighbor of the Chal- deans, for Buz and Chedu were brothers (Gen. xxii. 21, 22), and Bihail the Shemite being one of the Bene-Keodem. Whether Zophar the Naamathite is to be identified with the tribe of Naamah in the list of Patriarchs (Num. xxv. 15), or the tribe of Judah (Josh. xv. 41) may be regarded as problematical; if he were, the conclusion would be further established. From the above data we infer that the land of Uz corresponds to the Arach Ebdeva of classical geography, at all events to so much of it as lies north of the 30th parallel of lati- tude. This district has in all ages been occupied by nomadic tribes, who roamed from the borders of Palestine to the Euphrates, and northward to the confines of Syria. Whether the name Uz survived to classical times is uncertain: a tribe named Esüe (Aôsirâ) is mentioned by Ptolemy (v. 19, § 2); this Bochart identifies with the Uz of Scrip- ture by altering the rendering into Aôsirâ (Phalæga, ii. 8); but, with the exception of the rendering in the LXX. (αὐςείρας Ἀσίρας, Job i. 1) comp. xxvii. 2), there is nothing to justify such a change. Gesenius (Thee. p. 1005) is satisfied with the form Esüe as sufficiently corresponding to it.

W. L. B.

U'ZAL (2 syl.) [זֵאָזָל] [redoubt]: Ezâzèl [Vat.]

F. A. Ezâzèl: Oxî."

The father of Palal, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 25).

U'ZAL (זזיס; see note): Samar. אָזָלן: [Rom. in Gen. Aôzîn]: in 1 Chr. omits: Alex.) Aôzîn, Aôzîn: Uzâl, Huzâl). The sixth son of Joktan (Gen. x. 27: 1 Chr. i. 21), whose settlements are clearly traced in the ancient name of Sanâ', the capital city of the Yemen, which was originally Aôzâl, אודא] (Num-Khaldoon, ap. Cossian, Ezeü, i. 40, foot-note: Marâbâil, s. v.): Gesen. Lex. s. v.: Bensens Bibelwerk, etc.b) It has disputed the right to be the chief city of the kingdom of Sheba from the earliest ages of which

Name Oozâl, and says, "It is said that its name was Oozâl because the Abyssinians arrived at it, and saw it to be beautiful, they said 'Sañâ', which means beautiful; therefore it was called Sûnâ.'"
any traditions have come down to us the rival cities being Sheba (the Arabic Saba), and Sefar (or Zafar). Unlike one or both of these cities which passed occasionally into the hands of the people of Hadramawt (Hadramuti), it seems to have always belonged to the people of Sheba; and from its position in the centre of the best portion of that kingdom, it must always have been an important city, though probably of less importance than Saba itself. Nebihr (Deur. p. 201 ff.) says that it is a walled town, situate in an elevated country, in lat. 15° 2' and 26′ 57″. (after strenuous running through it (from the mountain of Sawāya, El-Ibrēsee, 1-50), and another longer stream a little to the west, and country-houses and villages on its banks. It has a citadel on the site of a famous temple, called Beyt-Ghumdan, said to have been founded by Shoaobeel; which was razed by order of Othman. The houses and palaces of Sanaa, Nebihr says, are finer than those of any other town of Arabia; and it possesses many mosques, public baths, and caravanserais. El-Ibrēsee's account of its situation and flourishing state (i. 50, quoted also by Bochart, Pluget, xxi.) agrees with that of Nebihr. Yakoé says, "Sana is the greatest city in the Yemen, and the most beautiful of them. It repeats the buildings, on account of the abundance of its trees (or gardens), and the rippling of its waters" (Mashtrahk, s. v., comp. Ibn-El-Wardene MS.); and the author of the Merzāšl (said to be Yakoé) says, "It is the capital of the Yemen and the best of its cities; it resembles Damascus, on account of the abundance of its fruits" (s. c. San'ī).

Uzal, or Awzal, is most probably the same as the Azurra (A'Ẕṟa), or Ausras (A'Sṟa) of the classics, by the common permutation of l and r. Pliny (H. N. xii. 16) speaks of this as belonging to the Gebelante; and it is curious that the ancient division (or "mikhlah") of the Yemen in which it is situate, and which is called Sihkāan, belonged to a very old confederacy of tribes named Jebr, or (as M. R.Bochart) the Gebelante of the classics; another division being also called Mikhlab Jebr (Meryāšl, s. v. mikhlab and jebr, and Mashtrahk, s. v. jebr). Bochart accepts Ausras as the classical form of Uzal (Pluget, l. c.), but his derivation of the name of the Gebelante is purely fanciful.

Uzal is perhaps referred to by Ez. (xxvii. 19), translated in the A. V. "Jazer," going to and fro, Heb. נַעַה. A city named Yiyaw, or Yāwān, in the Yemen, is mentioned in the Kāna (see Gesenius, Lex. and Bochart, l. c.). Commentators are divided in opinion respecting the correct rendering of this passage; but the most part are in favor of the reference to Uzal. See also JAYAN.

E. S. P.

UZZA (אֶזֶר) [strength]: 1. A Benjamite of the sons of Elimelech (1 Chr. viii. 7). The Tarqum on Esther makes him one of the ancestors of Merodach.

2. (O'ẕer) Elsewhere called Uzzah (1 Chr. xiii. 9, 10, 11). One of the sons of Abinadab, in whose house at Kirjath-jearim the Ark rested for 20 years. The eldest, son of Abinadab (1 Chr. xxi. 15) is said to have been Eleazar, who was consecrated to look after the Ark. Uzzah probably was the second, and Ahio the third. They both accompanied its removal, when David first undertook to carry it to Jerusalem. Ahio apparently went before the cart — the new cart (1 Chr. xiii. 7) — on which it was placed, and Uzzah walked by the side of the cart. He presided, with all manner of respect, advanced as far as a spot variously called the "threshing-floor" (1 Chr. xiii. 9), "the threshing-floor of Chidon" (1 Kgs. vi. 12, L. X.); "the threshing-floor of Nachor" (2 Sam. vi. 6, 1 L. X.); "the threshing-floor of Nachon" (1 L. X.). At this point — perhaps slipping over the smooth cart, or (L. X.) "the cart" (Heb. or "overturning the Ark") (L. X.) — Uzzah caught it to prevent its falling. He died immediately, by the side of the Ark. His death, by whatever means it was accomplished, was so sudden and awful that, in the sacred lan-

a The LXX for "Ahiok," read "his brethren."
none
The Meluhon, or people of Maim, and the Arabs of Gurbaz. A fortified town named Uzziel still exists in Arabia Petraea, south of the Dead Sea. The situation of Gurbaz is unknown. (For conjectures, more or less probable, see Ewald, Gesch. i. 321; Meirzian; Guerarran.) Such enemies would hardly maintain a long resistance after the defeat of so formidable a tribe as the Edomites. Towards the west, Uzziah fought with equal success against the Philistines headed to the left by the walls of Gath, Jabneh, and Ashdod, and founded new fortified cities in the Philistine territory. Nor was he less vigorous in defensive than offensive operations. He strengthened the walls of Jerusalem at their weakest points, furnished them with formidable engines of war, and equipped an army of 307,500 men with the best inventions of military art. He was also a great patron of agriculture, dug wells, built towers in the wilderness for the protection of the flocks, and cultivated rich vineyards and arable land on his own account.

He never deserted the worship of the true God, and was much influenced by Zechariah, a prophet who is only mentioned in connection with him (2 Chr. xxv. 18). Yet nothing can be more certain than that Uzziah, he cannot be the same as the Zechariah of Is. viii. 2. So the southern kingdom was raised to a condition of prosperity which it had not known since the death of Solomon; and as the power of Israel was gradually falling away in the latter period of Hezekiel's dynasty, that of Judah extended itself over the Ammonites and Moabites, and other tribes beyond Jordan, from whom Uzziah exacted tribute. See 2 Chr. xxvi. 3, and Is. xvi. 1-5, from which it would appear that the annual tribute of sheep (2 K. iii. 4) was revived either during this reign or soon after. The end of Uzziah was less prosperous than his beginning. Elated with his splendid career, he determined to burn incense on the altar of God, but was opposed by the high priest, Azariah and eighty others. (See Ex. xxv. 7, 8; Num. xvi. 40, xviii. 7.) The king was enraged at the resistance, and, as he pressed forward with his censor, was suddenly smitten with leprosy, a disease which, according to Geruchus (in loc.), is often brought out by violent excitement. In 2 K. xxv. 5 we are merely told that "the Lord smote the king with leprosy" and that he was shut up in a "house of lepers." But his invasion of the sacred office is not specified. This catastrophe compelled Uzziah to reside outside the city, so that the kingdom was administered till his death by his son Jotham as regent. Uzziah was buried "with his fathers," yet apparently not actually in the royal sepulchres (2 Chr. xxvi. 25). During his reign an earthquake occurred, which, though not mentioned in the historical books, was apparently very serious in its consequences, for it is alluded to as a chronological epoch by Amos (i. 1), and mentioned in Zeoh. xiv. 5, as a conviction from which the people "feel." [Earthquakes.] Josephus (Ant. ix. 10, § 4) connects it with Uzziah's sufferings, a suggestion which, on this account, is very unlikely, as it had occurred later than the 17th year of his reign [Amos].

The first six chapters of Isaiah's prophecies belong to this reign, and we are told (2 Chr. xxvii. 22) that a full account of it was written by that prophet. Some notices of the state of Judah at this time may also be obtained from the contemporary prophet Hosea and Amos, though both of these books, more particularly in Israel. We gather from their writings (Hos. iv. 15, vi. 11; Am. vi. 1), as well as from the early chapters of Isaiah, that though the condition of the southern kingdom was far superior, morally and religiously, to that of the northern, yet that it was by no means free from the vices which are apt to accompany wealth and prosperity. At the same time Hosea conceives bright hopes of the blessings which were to arise from it: and though doubtless these hopes pointed to something far higher than the brilliancy of Uzziah's administration, and though the return of the Israelites to their own land was an absolute fact, it can only be adequately explained of Christ's kingdom, yet the prophet, in contemplating the condition of Judah at this time, was plainly cheered by the thought that there God was really honored, and his worship visibly maintained, and that therefore with it there was bound up every hope that his promises to his people would be at last fulfilled (Hos. i. 7, iii. 3). It is to be observed, with reference to the general character of Uzziah's reign, that the writer of the Second Book of Chronicles distinctly states that his holiness in the attempt to burn incense was the only exception to the excellence of his administration (2 Chr. xxvi. 19). His reign lasted from r. c. 808-739 B.C.

1. Uzziah (2 K. xxv. 8-15). A Kohathite Levite, and ancestor of Samuel (1 Chr. vi. 24 [9]).
2. [Uzziel], Father of Jehonathan, one of David's overseers (1 Chr. xxvii. 25).
3. A priest of the sons of Hananiah, who was given a foreign wife in the days of Ezra (Ezr. x. 21).
4. [Acaciel], Father of Asahah, who was appointed to the office; but was later called Ishi (Neh. xi. 4).
5. Uzziel (2 K. xxvi. 22). A priest of the house of Elizaphan, who was appointed to the office; but was later called Ishi (Neh. xiii. 6).
6. Uzziel (2 K. xxvii. 22). A Levite, the son of Jeduthun, who was in the days of King Hezekiah (Is. xxxv. 18).
UZZIELITES.

The seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the seat of the se
**VALLEY OF BACA**

growing promiscuously, perhaps crossed by a bridge of four or five arches, under the centre one of which branches along a thin stream, the sole remnant of the looser and rapid river which for months before might have carried away the structure of the bridge. Such is the nearest likeness to the valleys of Syria, excepting that—owing to the demolition of the wood which formerly shaded the country, and prevented too rapid evaporation after rain—many of the latter are now entirely and constantly dry. To test last it is obvious that the word "valley" is not inapplicable. It is employed in the A. V. to translate velhael, alternating with "brook," "river," and "stream." For a list of the occurrences of each see S.iiii and Pol. App. § 38.

4. *Bik'ith* (בִּקְיָית). This term appears to mean rather a plain than a valley, wider than the latter, though so far resembling it as to be inclosed by mountains, like the wide district between Lebanon and Anti-Lebanon, which is still called the Bek'hit, as it was in the days of Moses. [PLAIN, iii. 2548 b.]

It is rendered by "valley" in Dent. xxvii. 5; Josh. xi. 8, 17; Jer. xxii. 22; Zech. xii. 11.

5. *Ho's-She'libith* (הָזֶשֶּלִית): to πεδίον, ἣ πεδίνην. This is the only case in which the employment of the term "valley" is really unfortunate. The district to which alone the name Ho's-She'libith is applied in the Bible has no resemblance whatever to a valley, but is a broad swelling tract of many hundred miles in area, which sweeps gently down from the mountains of Judah.

"To mingle with the bounding main"

of the Mediterranean. [See PERSIA, iii. 2946; PLAIN, iii. 2547 b; *Sarpheia*, p. 2911, &c.]

It is rendered "the vale" in Dent. i. 7; Josh. x. 40; 1 K. x. 27: 2 Chr. i. 15; Jer. xxxiii. 12: and "the valley" or "valleys" in Josh. ix. i, 2, 16, xii. 8, xx. 33; Judg. i. 9; Jer. xxxii. 44.

- **VALLEY OF BACA.** [BACA, Amer. ed.]

- ** VALLEY OF SOREK.** [SOREK, VALLEY OF.]

- **VALLEY-GATE.** 2 Chr. xxvii. 9; Neh. iii. 13. [JERUSALEM, ii. 1322.]

**VAN'AH (בָּנַה): Oesoowd; [Vat. One-yah]; Alex. Oosowd; Fa. Ooste; Vavtt.** One of the sons of Ithni, who put away his foreign wife at Ezra's command (Ezr. x. 36).

- **VANITIES.** A frequent designation, in the Bible, of the false gods of the heathen, characterized as having no actual existence. The usual Hebrew terms so rendered are דִּבְרֵי הָאָדָם, and דִּבְרֵי הָשָׁמַע, in which the non-reality of the objects naturally sets forth at the same time the folly and wickedness of such worship (cf. 1 Cor. viii. 4 ff.).

In Acts xiv. 15, Paul places Jupiter and Mercury in this class of novelties (*τούτων τῶν κατανόησεν*).

Some, indeed, explain the term there of the vain practices of heathenism; but that destroys the evident opposition between the word and מִּזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּם מִזְכַּרְיָתֶּmonkey* (Erod. i. 135).)

- "It is the custom of us Persians, when we make a great feast, to invite both our concubines and our wives to sit down with us." [1 Cor. xii. 8.]

**VEIL.** Under the head of Dress we have already disposed of various terms improperly rendered "veil" in the A. V., such as *nippoth* (Ruth ii. 15; *tashph* [Gen. xxiv. 65, xxviii. 14, 15, and xlii. 27; Is. lii. 23]). These have been explained to be rather shawls, or mantles, which might at pleasure be drawn over the face, but which were not designed for the special purpose of veils. It remains for us to notice the following terms which describe the veil proper: (1.) *Marach*,
used of the veil, which Moses assumed when he came down from the mount (Ex. xxxiv. 33-35). A concrete word *sichel* occurs in Gen. xlii. 11 as a general term for a man's raincoat, leading to the inference that the *masech* also was an ample outer robe which might be drawn over the face when required. The context, however, in Ex. xxxiv. is conclusive as to the object for which the robe was assumed, and, whatever may have been its size or form, it must have been used as a veil. (2.) *Hiivernick's* or *syrians*, of the nearest relatives, are to be regarded as concealed by Greek skins (Tisch. p. 965) of cushions or mattresses, but the etymology (sigarekh, to pour) is equally, if not more, favorable, to the sense of a floorin veil, and this accords better with the notice that they were to be placed "upon the head of every stature," implying that the length of the veil was proportioned to the height of the wearer (Hast, Lex. s. v.; Hitzig in Ex. l. c.). (3.) *Reichel's* use of the light veils worn by females (Is. iii. 19; A. V. "mullers"), which were so called from their mistling motion. The same term is applied in the Mishina (Sedai, 6, § 6) to the veils worn by Arabian women. (4.) *Tovmead's* understanding of the A. V. of "robes" of (Cant. iv. 1, 3, vi. 7; Is. xxvi. 2), and so by Winer (Rechel, Schleier); but the contents of the passages in which it is used favor the sense of veil, the wearers of the article being in each case highly born and handsomely dressed. A cognate word is used in the Targum (Gen xxiv. 65) of the robe in which Rebecca enveloped herself. With regard to the use of the veil, it is important to observe that it was by no means so general in ancient as in modern times. At present, females are rarely seen without it in oriental countries, so much so that in Egypt it is deemed more requisite to conceal the face, including the top and back of the head, than other parts of the person (Lane, i. 72). Women are even delicate about exposing their heads to a physician for medical treatment (Russell's Medical Introduction, l. 245). In remote districts, and among the lower classes, the practice is not so rigidly enforced (Lane, i. 72). Much of the scrupulousness in respect to the use of the veil dates from the promulgation of the Koran, which forbade women appearing unveiled except in the presence of their nearest relatives (Kor. xviii. 59, 59). In ancient times, the veil was adopted only in exceptional cases, either as an article of ornamental dress (Cant. iv. 1, 3, vi. 7), or by betrothed maidens in the presence of their future husbands, especially at the time of the wedding (Gen. xxiv. 65, xix. 25 [Marriage]), or lastly, by women of loose character for purposes of concealment (Gen. xxxix. 14). But, generally speaking, women both married and unmarried appeared in public with their faces exposed, both among the Jews (Gen. xxxix. 14, xiv. 16, xix. 10; 1 Sam. i. 12), and among the Egyptians and Assyrians, as proved by the invariable absence of the veil in the sculptures and paintings of these peoples. Among the Jews of the New Testament age it appears to have been customary for the women to cover their heads (not necessarily their faces) when engaged in public worship. For, St. Paul reproduces the disease of the veil by the Corinthian women, as implying an assumption of equality with the men, and enforces the covering of the head as a sign of subordination to the authority of the man (1 Cor. xi. 5-15). The same passage leads to the conclusion that the use of the tothith, with which the Jewish males cover their heads in prayer, is a comparatively modern practice; inasmuch as the Apostle, putting a hypothetical case, states that every man having anything on his head dishonors his head, i. e., Christ, inasmuch as the use of the veil would imply submission to his follower rather than to the Lord (1 Cor. xi. 4).

W. L. HUG.

VERIL OF THE TABERNACLE AND TEMPLE. [TABERNACLE; TEMPLE.]

* VEIL, RENDING OF THE. [Jewish Church, B. 13796.]

* VERMILLION. [COLORS, 4.]

There were two things which, in the early centuries after the coming of our Lord Jesus Christ, were closely connected: the preaching of the Gospel, leading to the diffused profession of the Christian faith among nations of varied languages; and the formation of versions of the Holy Scriptures for the use of the Churches thus gathered in varied countries. In fact, for many ages the spread of Christianity and the appearance of vernacular translations seem to have gone almost continually hand in hand. The only exceptions, perhaps, were those regions in which the Christian profession did not extend beyond what might be called the civilised portion of the community, and in which also the Greek language, diffused through the conquests of Alexander, or the Latin, the commonest of the dominion of Rome, had taken a deeply-rooted and widely-extended hold. Before the Christian era, the Greek version of the Old Testament, commonly termed the Septuagint, and the earlier Targums (if, indeed, any were written so early) supplied every want of the Jews, so far as we can at all discover. And it cannot be doubted that the Greek translation of the Old Testament had produced some considerable effect beyond the mere Jewish pale: for thus the comparatively large class of Jews, which we find existing in the time of our Lord and his Apostles must apparently have been led to embrace a religion, not only commended by the holiness of its professors or by external advantages, but only accredited by its doctrines, which professed to be given by the revelation of God (as, indeed, they were); and which, in setting forth the unity of

* The term ιγωνα in 1 Cor. xii. 19 = sign of authority, just as σαματια in Did. Sic. i. 47 = sign of royalty. 
The Old Testament, as well as the New, was executed from the Greek.

In 1525 Potken published the Ethiopic Psalter at Rome; he received this portion of the Scriptures from some Abyssinians with whom he had met; whom, however, he called Chaldeans, and their language Chaldee.

In 1548—49, the Ethiopic New Test. was also printed at Rome, edited by three Abyssinians: they sadly complained of the difficulties under which they labored, from the printers having been occupied on what they were unable to render, or read, of God; and who knew that the New Testament contains the records of this religion, and the Old the preparation of God for its introduction through promises, types, and prophecies, did not long remain without possessing these Scriptures in languages which they understood. The appearance of vernacular translations was a kind of natural consequence of the formation of Churches.

We have also some indications that parts of the New Testament were translated, not by those who received the doctrines, but by those who opposed them; this was probably done in order the more successfully to guard Jews and proselytes to Judaism against the doctrines of the Cross of Chri.

Translations of St. John's Gospel and of the Acts of the Apostles into the Hebrew dialect are mentioned in the very curious narrative given by Ephraim (t. xxx. 3, 12) respecting Joseph of Tiberias; he speaks of their being secretly preserved by the Jewish teachers of that city. But these or any similar versions do not appear to have been examined by any Christian. They deserve a mention here, however, as being translations of parts of the New Testament, the former existence of which is recorded.

In treating of the ancient versions that have come down to us, in whole or in part, they will be described in the alphabetical order of the languages. It may be premised that in most of them the Old Test. is not a version from the Hebrew, but merely a secondary translation from the Septuagint in some one of its early forms. The value of these secondary versions is but little, except as bearing on the criticism of the text of the LXX., a department of Biblical learning in which they will be found of much use, whenever a competent scholar shall earnestly engage in the revision of that Greek version of the Old Test., pointing out the corrections introduced through the labors of Origen.

S. P. T.

ETHIOPIAN VERSION. — Christianity was introduced into Ethiopia in the 4th century, through the labors of Frumentius and Eusebius of Tyre, who had been made bishops by the king (Theodoret, Hist. Eccl. i. 23; Sozomen, ii. 24). Hence arose the episcopal see of Axum, to which Frumentius was appointed by Athanasius. The Ethiopic version which we possess is in the ancient dialect of Axum; hence some have ascribed to it the age of the earliest missionary; but from the general character of the version itself, this is improbable; and the Abyssinians themselves attribute it to a later period; though their testimony is of but little value by itself; for their accounts are very contradictory, and some of them even speak of its having been translated from the Arabic; which is certainly incorrect.

As it is, we find in the copies of the version, readings which show an affinity with the older class of Greek MSS., intermingled with others decidedly Byzantine. Some of the copies known show a stronger leaning to the one side or the other; and this gives a considerable degree of certainty to the conclusion on the subject of revision.

An examination of the version proves both that it was executed from the Greek, and also that the translator made such mistakes that he could hardly have been a person to whom Greek was the native tongue. The following instances (mostly taken from C. B. Michaelis) prove this: ἀραξα is confounded with ἀραξα (or ἀραξα); Matt iv. 15, 'in...

of the O. T. into Arabic.

his version of the Pentateuch was printed at Constantinople, in 1540. The Paris Polyglott contains the same version from a MS differing in many of its readings; this was reprinted by Walton. It seems as if copists had in parts altered the version considered.

The version of Isaiah by Saadiah was printed by Paulus, at Jonas, in 1791, from a Hebrew MS.; the same library contains a MS. of his version of Job and of the Psalms. Kimchi quotes his version of Hosen.

The book of Joshua in the Paris and Walton's Polyglott is also from the Hebrew; and this Kögler states to be the fact in the case of the Polyglott text of 1 K. xii.; 2 K. xii. 16; and of Neh. i.-xx.

Other portions, translated from Hebrew in later times, do not require to be even specified here.

But it was not the Jews only who translated into Arabic from the original. There is also a version of the Pentateuch of the Samaritans, made by Abu Said, which is believed to have been the first translation of Saadiah before him, the paraphrase of which he often follows, and at times he must have used the Samaritan version. It is considered that this work of Abu Said (of which a portion has been printed) is of considerable use in connection with the history of the text of the Samaritan Pentateuch. [See SAMARITAN PENTATEUCH, II. 3.]

This is the base of the Arabic texts contained in the Polyglotts of the books of Judges, Ruth, Samuel, Kings, and Nehemiah (with the exception mentioned above in these last-named books).

In some MSS., there is contained a translation from the Hexaplar-Syriac text, which (though a recent version) is of some importance for the criticism of the text.

C. Made from the Peshito Syriac.

vesungen*; Acts iii. 20, *proxhecypaivomos* is rendered as *"quem praecunctit* ("prokhexypaivomos") ii. 27, *katuphseupen* "sperit sust. quael cor corum* ("katuphseupen"); xvi. 23, *' ekipovno o aytwn oj 'Echpov* "ekpovno o aytwn oj 'Echpov." Matt. v. 25, *eipw* is rendered as *"intelligo* ("epiow"); Luke viii 23, and *padoi filosofwvwns*; *"en fylk06 custodism*; as if oadion. Rom. vii. 11, *'exotatw*; *"comenlevi*; as if *"exatw*; Rev. iv. 9, *lom", "auccolved*; as if *"apocly*; The meaning of words alike in spelling is confounded: thus, 1 Cor. xii. 28. *' Eposit Dominus aecm ecclesias*; from the differing meanings of OYJ. Also wrong renderings sometimes seem to have originated with false etymology: thus, Matt. v. 22. *"Qui autem dixert iratrum summ irammeinw* *"pwna* having been connected with *"pwna*.

Pilate's Latin version, to which reference has already been made, enabled critical scholars to use the Roman text with much confidence. The late Mr. L. A. Prevost, of the British Museum, executed for Mr. Tregelles a comparison of the text of Mr. Platt with the Roman, as reprinted in Walton, together with a literal rendering of the variations: this gave him the critical use of both texts.

The present editor, Mr. Elliott, speaking with the personal advantage possessed by a scholar himself able to use both Ethiopic texts of the New Testament, draws attention to the superiority of that edited by Mr. Platt: after speaking (Jobs to Faith, p. 381) of the non-paraphrastic character of the ancient versions of the New Testament in general, Dr. Elliott adds in a note: It may be noticed that we have specified the Ethiopic version as that edited by Mr. Pel1 Platt. The Ethiopic version found in Walton's Polyglott often degenerates into a paraphrase, especially in difficult passages.

The Old Testament, of this version, made from the LXX. (as has been already specified, has been selected apparently with the exception of the Psalms) is of very little critical examination. A complete edition of the Ethiopic Old Testament, has been commenced by Dillmann; the first portion of which appeared in 1853. [Tom. i. Octavum, 1853-55; tom. ii. 1 Summ.-Esther, 1861, &c. For editions of some other parts of the O. T. see De Wette, Eliab. § 61, 8th Aug. — A.]

versions, ancient (Armenian)

termed Osca', or Uscan, and described as being an Armenian bishop (Hugh, however, denies that Uscan was his name, and Eichhorn denies that he was a bishop). From this edition pribray others were printed, in which no attempt was made to do more than to follow its text; although it was more than suspected that Uscan had by no means faithfully adhered to MS. authority. Zohrab, in 1783, published at Venice an improved text of the Armenian New Test.; and in 1806 he and his coadjutors completed an edition of the entire Armenian Scriptures, for which not only MS. authority was used throughout, but also the results of collations of MSS. were subjoined at the foot of the pages. The basis was a MS. written in the 14th century, in Cicilia; the whole number employed is said to have been eight of the entire Bible, twenty of the New Test., with several more of particular portions, such as the Psalms. Tischendorf states that Ancher, of the monastery of St. Lazarus at Venice, informed him that he and some of his fellows knew that a new critical edition: this probably would contain a repetition of the various collations of Zohrab, together with those of other MSS. The critical editors of the New Test. appear all of them to have been unacquainted with the Armenian language: the want of a Latin translation of this version has made it thus impossible for them to use it as a critical authority, except by the aid of others. Some readings were thus communicated to Mill by Louis Pipps; Wettstein received still more from La Croze: Grafisch was aided by a collation of the New Test. of 1789, made by Fresnius of Hamburg. Scholz appears to have been furnished with a collation of the text of 1855; but either this was done very partially and incorrectly, or else Scholz made but little use (and that without real accuracy) of the collation. These partial collations, however, were by no means such as to supply what was needed for the real critical use of the version; and as it was known that Uscan's text was thoroughly untrustworthy for critical purposes, an exact collation of the Venice text of 1806 became a desideratum; Dr. Charles Rien of the British Museum undertook the task for Tregelles, thus supplying him with a valuable portion of the materials for his critical edition of the Greek Testament. By marking the words, and noting the import of the various readings, and the discrepancies of current text, Rien did all that was practicable to make the whole of the labor of Zohrab available for those not like himself Armenian scholars.

It had been long noticed that in the Armenian New Test. as printed by Uscan 1 John v. 7 is found: those who are only moderately acquainted with criticism would feel assured that this must be an error; and that it could not be part of the original translation. Did Uscan then introduce it from the Vulgate? he seems to have admitted that in some things he supplied defects in his MS. by translations from the Latin. It was, however, said that Haiitho king of Armenia (1224-70), had inserted this verse: that he revised the Armenian version by means of the Latin Vulgate, and that he translated the perfect of Jerome (and also those which are spurious) into Armenian. Hence a kind of salutem attached itself to the Armenian version, and its use was accompanied by a kind of doubt whether or not it was a critical authority which could be safely used. The known fact that Zohrab had omitted 1 John v. 7, was felt to be so far satis factory that it showed that he had not found it in his MSS., which were thus seen to be earlier than the introduction of this corrigendum. But the collation of Dr. Rien, and his statement of the Armenian authorities, set forth the character of the version distinctly in this place as well as in the text in general. Dr. Rien says of 1 John v. 7, that out of eighteen MSS. used by Zohrab, one only, and that written a. 1656, has the passage to which Stephani Greek text. In one ancient MS. the reading is found from a recent correction. Thus there is no ground for supposing that it was inserted by Haiitho, or by any one till the time when Uscan lived. The wording, however, of Uscan in this place, is not in accordance with the MS. of 1656; so that each seems to have been independently borrowed from the Latin. That Uscan did this, there can be no reasonable doubt; for in the immediate context Uscan accords with the Latin in opposition to all collated Armenian MSS.: thus in ver. 6, he follows the Latin "Christus est veritas;" in ver. 20 he has, instead of ἀντίφασις, the subjunctive answering to σίμων; even in this minute point the Armenian MSS. definitely vary from Uscan. In iii. 11, for ἀναγράφων, Uscan agrees with all known MSS. These variations in the two texts of Uscan and Zohrab, as well as the material readings of Armenian MSS. are inserted in Tregelles' Greek Test. on Dr. Rien's authority.

But systematic revision with the Vulgate is not to be found even in Uscan's text: they differ greatly in characteristic readings; though here and there throughout there is some mark of an influence drawn from the Vulgate. And as to accordance with the Latin, we have no reason to believe that there is any proof of alterations having been made in the days of King Haiitho.

Some have spoken of this version as though it had been made from the Peshito Syrian, and not from the Greek; the only grounds for such a notion can be the facts connected with part of the history of its execution. There are, no doubt, a few readings which show that the translators had made some use of the Syrian; but these are only exceptions to the general texture of the version; an addition from John xx. 21, brought into Matt. xxviii. 18, in both the Armenian and the Peshito, is probably the most marked.

The collations of MSS. show that some amongst the manuscripts come from the rest: it seems as if the variations did not in such cases originate in Arme nian, but they must have sprung from some rearranging of the text and its revision by Greek copies. There may perhaps be proofs of the difference between the MS. brought from Ephesus, and the copies afterwards used at Alexandria; but thus much at present a certain deduction, that comparison with Greek copies of different kinds must at some period have taken place. The omission of the last twelve verses of St. Mark's Gospel in the older Armenian copies, and their insertion in the liter, may be taken as a proof of some effective revision.
The Armenian version in its general texture is a
valuable aid to the criticism of the text of the New
Test.; it was a worthy service to rehabilitate it as
a reliable witness to the general reading of vari-
cious Greek copies existing in the former half of
the 5th century.

CHALDEE VERSIONS. [Targums, below.]

EGYPTIAN VERSIONS. — I. THE MEMP-
HITIC VERSION. — The version thus designated
was for a considerable time the only Egyptian trans-
lation known to scholars; Coptic was then regarded
as a sufficiently accurate and definite apocrypha.
But when the fact was established that there were
at least two Egyptian versions, the name Coptic
was found to be indefinite, and even uncertain for
the translation then so termed; for in the dialect
of Upper Egypt there was another; and it is from
the ancient Coptes in Upper Egypt that the term
Coptic is taken. Thus the Memphitic, or more
simply Memphitic, is the better name for the ver-
sion in the dialect of Lower Egypt.

When Egyptian translations were made we do
not know: we find, however, that in the middle of
the 4th century the Egyptian language was in
great use amongst the Christian inhabitants of that
country; for the rule of Pachomius for the monks
is stated to have been drawn up in Egyptian, and
to have been afterwards translated into Greek.
It was prescribed that every one of the monks (estimated
at seven thousand) for whom this rule in Egyptian
was drawn up, was to learn to read (whether so
disposed or not), so as to be able at least to read
the New Test, and the Psalms. The whole narra-
tion presupposes that there was in Upper Egypt a
translation.

So, too, also in Lower Egypt in the same century.
For Palladius found at Nitria the abbot John of
Lyopolis, who was well acquainted with the New
Test., but who was ignorant of Greek; so that he
could only converse with him through an inter-
preter. There seems to be proof of the ecclesiastical
use of the Egyptian language even before this
time. The Egyptian version of the Psalms, which
worship was, will feel how cogent is the proof that
the Scriptures had then been translated.

When the attention of European scholars was di-
rected to the language and races of modern Egypt,
it was found that while the native Christians used
only Arabic vernacularly, yet in their services and
in the public reading of the Scriptures they employ
a dialect of the Coptic. This is the version w
 termed Memphitic. When MSS. had been brought
from Egypt, Thomas Marshall, an Englishman,
prepared in the latter part of the 16th century an
edition of the Gospels; the publication of which
was prevented by his death. From some of the
readings having been noted by him Mill was able
to use them for insertion in his Greek Text; they
often differ (sometimes for the better) from the text
published by Wilkins. Wilkins was a Priest by
birth; in 1710 he published at Oxford the first
Memphitic New Test., founded on MSS. in the

Bolelian, and compared with some at Rome and
Paris. That he did not execute the work in a very
satisfactory manner would probably now be owned
by every one; but it must be remembered that no
one else did it at all. Wilkins gave no proper ac-
count of the MSS. which he used, nor of the vari-
ations which he found in them; his text seems to
be in many places a confused combination of what
he took from various MSS.; so that the sentences
do not properly connect themselves, even (it is said)
in grammatical construction. And yet for 150 years
this was the only Memphitic edition.

In 1846-48, Schwartz published at Berlin an edi-
tion of the Memphitic Gospels, in which he em-
ploved MSS. in the Royal Library there. These
were almost entirely modern transcripts; but with
these limited materials he produced a far more sa-
satisfactory work than that of Wilkins. At the foot
of the page he gave the variations which he found
in his copies; and subjoined there was a collation
of the Memphitic and Thebais versions with Lach-
mann's Greek Test. (1842), and the first of Tisch-
endorf (1841). There are also such references to
the Latin version of Wilkins, that it almost seems
as if he supposed that all who used his edition
would also have that of Wilkins before them.

The dependence established on the continu-
ation of his labors. Since then Boetticher's editions,
first of the Acts and then of the Epistles, have ap-
ppeared; these are not in a form which is available
for the use of those who are themselves unacquainted
with Egyptian; the editor gives as his reason for
issuing a bare text, that he intended soon to publish
a work of his own in which he would fully employ
the author's grace on the ancient versions. Several
have since passed, and Boetticher does not seem to
give any further prospect of the issue of such volume
on the ancient versions.

In 1848-52 a magnificent edition of the Mem-
phitic New Test., was published by the Society
for promoting Christian Knowledge, under the editorial
care of the Rev. R. P. Lieder of Cairo. In its prepa-
ration he followed MSS. without depending on
the text of Wilkins. There is no statement of the
variations of the authorities, which would have
hardly been a suitable accompaniment of an edition
intended solely for the use of the Coptic churches,
and in which, while the Egyptian text which is read
aloud is printed in large characters, there is at the
side a small column in Arabic in order that the
readers may themselves be able to understand some-
ting of what they read aloud.

It is thus impossible to give a history of this
version: we find proof that such a translation ex-
isted in early times, we find this now (and from
time immemorial) in church use in Egypt; when
speaking of its text, its internal character and its value
as to textual criticism (after the other Egyptian ver-
sions have been described), it will be found that
there are many considerations which go far to prove
the identity of what we now have, with that which must
have existed at an early period.

The Old Testament of this version was made
from the LXX. of this, Wilkins edited the Penta-
contateuch in 1738, the Psalms we published at Rome
in 1744. The Rev. Dr. Tatman edited the Minor
Propheacts in 1836, Job in 1846, and the Major
Propheacts in 1852. Bawdell published Daniel in

a It may be noted here that the later writings of
Boetticher have been published under the name of
Paul or Paul Anton de Lagarde. Among these is an

essay De Novo Testamento ad Versificationem Orientalen,
editio ex spectro, Berl. 1857, &c. A.
VERSIONS, ANCIENT (EGYPTIAN)

II. THE THERAIC VERSION. — The examination of Egyptian MSS. in the last century showed that besides the Memphitic there is also another version in a coopt Egyptian dialect. To this the name Sodilic was applied by some, from an Arabic designation for Upper Egypt and its ancient language. It is, however, far better to assign to this version a name not derived from the language of the Arabian occupants of that land: thus Copto-Thebaic (as styled by Giorgi), or simply Theliaic, is far preferable. The first who attended much to the subject of this version was Woide, who collected readings from MSS. which he communicated to Cranmer in 1779. In 1783 Mingarelli published a few portions of this version of the New Test, from the Naniic MSS. In 1784 Giorgi published a very valuable Greek and Theliaic fragments of St. John's Gospel, which appear to belong to the 5th century. Mr. J. was, in 1787, had published a fragment of Daniel in this version; and in 1789 he brought out portions of the Epistles to Timothy, together with readings which he had collected from MSS. in other parts of the New Test. In the following year Mingarelli printed Mark xi. 29-34, from MSS. which had recently been obtained by Nuni; but owing to the editor's death the unfinished sheets were never, properly speaking, published. A few copies only seem to have been circulated; they are the more valuable from the fact of the MSS. having been destroyed by the persons into whose hands they fell, and from their containing a portion of the New Test, not found, it appears, in any known MS. Woide was now busily engaged in the collection of portions of the Theliaic Scripture; he had even issued a Prospectus of such an edition in 1778. Woide's death took place before his edition was completed. In 1799, however, it appeared under the editorial care of Ford. In this work all the portions found by Woide himself were added, as well as those published by Mingarelli in his lifetime; but not only were Mingarelli's posthumous sheets passed by, but also all that had been published by Mjnter and Giorgi, as well as the transcript of Minter from the Borgian MSS., which Ford might have used for his edition. This collection of fragments contains the greater part of the Theliaic New Test. They might, however, be greatly amplified out of what are mentioned by Yozeg, as found in the Borgian MSS. now in the Propaganda, in his catalogue published in 1810 after his death. It could hardly have been thought that this definite account of existing Thelaiic fragments would have remained more than half a century without some Egyptian scholar having rescued the neglected portions of this version from their obscurity; and surely this would not have been the case if Biblical critics had been found who possess Egyptian learning.

In the Memphitic Gospels of Schwartz there is not only, as has been already mentioned, a collation subjotted of the Theliaic text, but also the criticisms of that learned editor on both Ford and Woide, neither of whom, in his judgment, possessed sufficient editorial competence. In this opinion he was perhaps correct; but still let it be observed, that if it had not been for the labors of Woide (of which Ford was simply the confirmer), there is no reason to suppose but that the Thebaic New Test would remain unprinted still. Had this been the ease the loss to textual criticism would have been great.

III. A THIRD EGYPTIAN VERSION. — Some Egyptian fragments were noticed by both Minter and Giorgi amongst the Borgian MSS., which in dialect differ both from the Memphitic and Thebaic. These fragments, of a third Egyptian translation, were edited by both these scholars independently in the same year (1780). In what part of Egypt this third dialect was used, and what should be its distinctive name, has been a good deal discussed. Aridab writers mention a third Egyptian dialect under the name of Rekhnaric, and this has by some been assumed as the appellation for this version. Giorgi supposed that this was the dialect of the Ammunitian Oasis; in this Minter agreed with him; and thus they called the version the Ammunit. There is in fact no certainty on the subject: but the affinities of the dialect are closely allied to the Theliaic. Now it is generally agreed that Rekhnaric is the district of Lower Egypt to the east of the Delta, it seems by no means likely that it can belong to a region so far from the Thebaic. Indeed it has been reasonably doubted whether the slight differences (mostly those of orthography) entitle this to be considered to be a really different dialect from the Thebaic itself.

After the first portions of this version, others were transcribed independently by Zuega and England, and their transcripts appeared respectively in 1810 and 1811. The latter of these scholars accompanied his edition with critical remarks, and the text of the other Egyptian versions on the same page for purposes of comparison.

The Character and Critical Use of the Egyptian Versions. — It appears that the Thebaic version may reasonably claim a higher antiquity than the Memphitic. The two translations are independent of each other, and both spring from Greek copies. The Thebaic has been considered to be the elder of the two, partly from it having been thought that a book in the Theliaic dialect quotes this version, and from what was judged to be the antiquity of the book so referred to. There are other grounds less precarious. If the Memphitic version exhibits a general agreement with the text current at Alexandria in the third century, it is not unreasonable to suppose that it either belongs to that age, or at least to one not very remote. Now while this is the case it is also to be noticed that the Thebaic seems to have been framed from a text in which there was a much greater admixture, and that not rising from the later revisions which moulded it into the transition text of the fourth century (commencing probably at Antioch), but exactly in the opposite direction: so that the contents of the two versions would seem to show that the antiquity of the Thebaic is most to be regarded, but that the Memphitic is often preferable as to the goodness of its readings, as well as in respect to dialect.

It is probable that the more Hellenized region of Lower Egypt would not require a vernacular version so early a period as would the more thoroughly Egyptian region of the Thebaic. There are some marks of want of polish in the Thebaic; the Greek words which are introduced into a barbarous form, the habitual introduction of an opening shows either an ignorance of the true Greek sounds, or else it seems like a want of polish.
n the dialect itself. That such a mode of expressing Greek words in Egyptian is not needed, we can see from its non-existence in the Memphitic.

The probable conclusions seem to be these: that the Thebaic version was made in the early part of the third century, for the use of the common people among the Christians in Upper Egypt; that it was formed from MSS., such as were then current in the regions of Egypt which were distant from Alexandria; that afterwards the Memphitic version was executed in what was the more polished dialect, from the Greek copies of Alexandria; and that thus in process of time the Memphitic remained alone in ecclesiastical use. Possibly the dialect of the Thebaic in the Egyptian churches did not take place until Arabic was fast becoming the vernacular tongue of that land. It will be well for those whose studies enable them personally to enter on the domain of Egyptian literature, to communicate to Biblical scholars the results of new researches.

The value of these versions in textual criticism, even though they are known only through defective channells, is very high. In some respects they afford the same kind of evidence relative to the text current in Egypt in the early centuries, as do the Old Latin and the version of Jerome for that in use in the West. [Velagte.]

A few remarks only need be made respecting the third Egyptian version. The fragments of this follow the Thebaic so closely as to have no independent character. This version does however possess critical value, as furnishing evidence in a small portion not known in the Thebaic. The existence of the third version is a further argument as to the early existence and use of the Thebaic, for this seems to be formed from it by muddling it into the colloquial use of some locality.

Gothic Version. In the year 318 the Gothic bishop and translator of Scripture, Ulphilas, was born. He succeeded Thoegilius as bishop of the Goths in 348, when he subscribed a confession rejecting the orthodox creed of Nicene; through him it is said that the Gothic in general adopted Arianism; it may be, however, more correct to consider that Arianism (or Semi-Arianism) had already spread amongst the Goths inhabiting within the Roman Empire, as well as amongst the Greeks and Latins. Thoegilius, the predecessor of Ulphilas, had been present at the council of Nicene, and had subscribed the Homoean confession. The great work of Ulphilas was his version of the Scriptures, a translation in which few traces, if any except in Phil. ii. 6), can be found of his peculiar and erroneous dogmas. In 353 Ulphilas visited Constantinople to defend his heterodox creed, and while there he died. In the 5th century the Eastern Goths occupied and governed Italy, while the Western Goths took possession of Spir, where they ruled till the beginning of the 8th century. Amongst the Goths in both these countries can the use of this version be traced. It must in fact have at one time been the vernacular translation of a large portion of Europe.

In the latter part of the 16th century the existence of a MS. of this version was known, through Morillon having mentioned that he had observed it in the library of the monastery of Werden on the Rhine in Westphalia. He transcribed the Lord's Prayer and some other parts, which were afterwards published, as were other verses copied soon after by Arnold Mercator.

In 1610, almost at the conclusion of the Thirty Years' War, the Swedes took that part of Prague on the left of the Moldan (Kleine Sorte), and amongst the spoils was sent to Stockholm a copy of the Gothic Gospels, known as the Codex Anglorum. This MS. is generally supposed to be the same that Morillon had seen at Werden: but whether the same or not, it had been lost at Prague when found there by the Swedes, for Stenius, who died in 1610, mentions it as being there. The Codex Anglorum was taken by the Swedes to Stockholm; but on the abdication of Queen Christina of Sweden, a few years later, it disappeared. In 1655 it was in the possession of Isaac Vossius in Holland, who had been the queen's librarian; to him therefore it is probable that it had been given, and not to the queen herself, by the general who brought it from Prague. In 1662 it was purchased for Sweden by Count Magnus Gabriel de la Gardie, who caused it to be splendidly bound, and placed it in the library of the University of Upsal, where it now remains.

While the book was in the hands of Vossius a transcript was made of its text, from which Jansson, his uncle, edited the first edition of the Gothic Gospels at Dort in 1655: the Anglo-Saxon Gospels, edited by Marshall, accompanied the Gothic text.

The labors of other editors succeeded: Sternheim, 1671; Benzei and Lye, 1760; and others comparatively recent. The MS. is written on velin that was once purple, in silver letters, except those of the Lord's Prayer, which are in gold. The Gospels have many lacunae; it is calculated that when entire it consisted of 329 folios: there are now but 188. The uniformity of the writing is wonderful: so that it has been thought whether each letter was not formed by a hot iron impressing the gold or silver, used just as bookbinders put on the lettering to the back of a book. It is pretty certain that this beautiful and elaborate MS. must have been written in the 6th century, probably in Upper Italy when under the Gothic sovereignty.

Some in the last century supposed that the language of this document is not Gothic, but Frankish—an opinion which was set at rest by the discovery in Italy of Ostro-Gothic writings, about which there could be no question raised. Some Visi-Gothic monuments in Spain were evidence on the same side.

Knitted, in 1762, edited from a Wolfenbuttel palimpsest some portions of the Epistle to the Romans in Gothic, in which the Latin stood by the side of the version of Ulphilas. This discovery first made known the existence of any part of a version of the Epistles. The portions brought to light were soon afterwards used by Thurn in the collection of remarks on Ulphilas edited in 1773 by Gesching.

But as it was certain that in obscure places the
Versions, Ancient (Greek)

Coddex Argenteus had been not very correctly read, their labored to copy it with exactitude, and to form a Latin text, which he had thus prepared, was edited by Zahn in 1805.

New light dawned on Ulphilus and his version in 1817. While the late Cardinal Mai was engaged in the examination of palimpsests in the Ambrosian Library at Milan, of which he was at that time a librarian, he noticed traces of some Gothic writing under that of one of the codices. This was found to be part of the books of Ezra and Nehemiah. In making further examination, four other palimpsests were found which contained portions of the Gothic Version. Mai deciphered these MSS., in conjunction with Count Carlo Ottavio Castiglione, and their labors resulted in the recovery, besides a few portions of the Old Testament, of almost the whole of the thirteen Epistles of St. Paul and some parts of the Gospels.

The edition of Gabelentz and Loche (1836-46) contains all that has been discovered of the Gothic Version, with a Latin translation, notes, and a Gothic Dictionary and Grammar. These editors were at pains to reexamine, at Upsal and Milan, the MS. themselves. They have thus, it appears, succeeded in avoiding the repetition of errors made by their predecessors. The Milan palimpsests were chemically restored when the mode of doing this was not as well known as it is at present: the whole texture of the vellum seems stained and spoiled, and thus it is not an easy task to read the ancient writing correctly. Those who have themselves looked at the Wollfenbiittel palimpsest from which Knittel edited the portions of Romans, and who have also examined the Gothic palimpsests at Milan, will probably agree that it is less difficult to read the unrestored MS. at Wollfenbiittel than the restored MS. at Milan. This must be borne in mind if we would appreciate the labors of Gabelentz and Loche.

In 1854, Uppstrom published an excellent edition of the text of the Coddex Argenteus, with a beautiful facsimile. Ten leaves of the MS. were then missing, and Uppstrom tells a rather ungratifying story that they had been stolen by some English traveler. It is a satisfaction, however, that a few years afterwards the real thief on his deathbed restored the missing leaves; and, though stolen, it was not by any one out of Sweden. Uppstrom edited the MS. in supplement in 1858.

In 1855-56 Massmann issued an excellent small edition of all the Gothic portions of the Scriptures known to be extant. He accompanies the Gothic text with the Greek and the Latin, and there are a Grammar and Vocabulary subjoined. This edition is said to be more correct than that of Gabelentz and Loche. Another edition of Ulphilus, [Text Version], by H. P. Stamm appeared at Paderborn in 1858 (4th Ausg., von M. Heyne, 1860).

As an ancient monument of the Gothic language, the version of Ulphilus possesses great interest; as a version, the use of which was once extended widely through Europe, it is a monument of the Christianization of the Goths; and as a version, it has been made in the 4th century, and transmitted to us in ancient MSS., it has its value in textual criticism, being thus a witness to readings which were current in that age. In certain passages it has been thought that there is some proof of the influence of the Latin; and this has been regarded as confirmed by the order of the Gospels in the Coddex Argenteus, being that of some of the Old Latin MSS. Matthew, John, Luke, Mark. But if the peculiarities pointed out were borrowed in the Gothic from the Latin, they must be considered as exceptional points, and not such as affect the general texture of the version, for its whole character is not to be mistaken. This is certain from the manner in which the Greek constructions and the forms of compound words are imitated. The very mistakes of rendering are proofs of Greek and not Latin origin. The marks of conformity to the Latin may have been introduced into the version in the case of MSS. copied in Italy during the earlier and later parts of the Gothic language. The Wollfenbiittel palimpsest has Latin by the side of the Gothic.

The Greek from which the version was made must in many respects have been what has been termed the transition text of the 4th century; another witness to which is the revised form of the Old Latin, such as is found in the Coddex Brixianus (this revision being in fact the Index). [Uppstrom.]

In all cases in which the readings of the Gothic confirm those of the most ancient authorities, the united testimony must be allowed to possess especial weight.

Greek Versions of the Old Testament.—I. Septuagint. — In addition to the special article on this version [Septuagint] a few points may be noted here.

1. Name. — In all discussions relative to the name of Septuagint, so universally appropriated to the Greek version of Alexandria, the scholion discovered by Ossian and published by Kittel ought to be considered. The origin of this Latin scholion is curious. The substance of it is stated to have been extracted from Callimachus and Eratosthenes, the Alexandrian librarians, by Tzetzes, and from his Greek note on an Italian of the 15th century has formed the Latin scholion in question. The writer has been speaking of the collecting of ancient Greek poems carried on at Alexandria under Ptolemy Philopator, and then he thus continues: "Nam, sed philosophia afficiens (corr. diffectissimus, Kittel, affectissimus, Thiersch) et catena omnium metrorum claris, dispositius impensa regis munificentius ubique terram quantum valetis monumenta opera D.'hren Philoleui ph x a semina duas bibliothecas lexit, alitera extra regionem aliter autem in regioni. The scholion then goes on to speak of books in many languages: "quae semina those at Milan; but of course he never saw the latter prior to their restoration.

a Such is the writer's judgment from his own examination of the palimpsest at Wollfenbiittel, and of
Jehovah's retranslation in itself may seem absurdly interpretable; "for" Barrois reads instead of "n'xxa emai, "n' et lxx xenoa, and this correction is agreed to by Thiersch, as it well may be: some correction is manifestly needed, and this appears to be right. This gives us seventy others associated in the formation of the library. The testimony comes to us from Alexandrian authority: and this, if true (or even if believed to be true), would connote the Samaritan with the Library; a designation which might most easily be applied to a version of the Scriptures there deposited; and, let the translation be once known by such a name, then nothing would be more probable than that the designation should be applied to the translatiors. This may be regarded as the first step in the formation of the faith. Let the Septuagint be first known as applying to the associates in the collection of the library, then to the library itself, and then to that particular book in the library which to so many had a far greater value than all the other contents. Whether more than the Pentateuch was thus translated and then deposited in the Royal Library is a separate question.

II. The Connection of the Pentateuch in the LXX. Barrow recently pointed out that in the Pentateuch the Samaritan copy and the LXX. agree in readings which differ from the Hebrew text of the Jews. This has been pointed out as occurring in perhaps two thousand places. The conclusion to which some came that was the LXX. must have been translated from a Samaritan copy, but on many grounds, it would be difficult to admit this, even if it were found impossible to explain the coincidences. For (i.) it must be taken into account that if the discrepancies of the Samaritan and Jewish copies be estimated numerically, the LXX. will be found to agree far more frequently with the latter than the former. (ii.) In the cases of considerable and marked passages occurring in the Samaritan which are not in the Jewish, the LXX. does not contain them. (iii.) In the passages in which slight variations are found, both in the Samaritan and LXX., from the Jewish text, they often differ amongst themselves, and the amplification of the LXX. is less than that of the Samaritan. (iv.) Some of the small amplifications in words or phrases are wished to be accorded to the LXX., and these in which the LXX. are in such incorrect and non-idiomatic Hebrew that it is suggested that these must be translations, and, if so, probably from the LXX. (v.) The amplifications of the LXX. and Samaritan often resemble each other greatly in character, as if similar false criticism had been applied to the text in each case. But as, in spite of all similarities such as these, the Pentateuch of the LXX. is more Jewish than Samaritan, we need not adopt the notion of translation from a Samaritan Codex, which would involve the subject in greater difficulties, and leave more points to be explained. (Of some of the supposed agreements of the LXX. with the Samaritan, I will not speak except the Bishop Fitzgerald in his Journal of Sacred Literature, Oct. 1848, pp. 224-225.)

III. The Literary Origin of Portions of the LXX. This is a subject for inquiry which has received but little attention, not so much, probably, as its importance deserves. It was noticed by

---

\[b\] Eichhorn and those who have followed him state the conclusions many years ago that the headings of certain psalms in the LXX. coincide with the liturgical directions in the Jewish Prayer-book: the results were at a later period communicated in Kitto's Journal of Sacred Literature, April, 1852, pp. 207-209. The results may be briefly stated: The 33rd Psalm, LXX. (24th, Hebrew), is headed in the LXX. της μου σαββατου: so too in Hebrew, in De Soli's Prayers of the Septuagint.

\[\text{Ps. xxii., LXX. (Heb. xlviii.)}

\(\text{δευτερα σαββατου, υιοι των υιων των προσαββατον, υιοι των αθικων.}\)

There appear to be no Greek copies extant which contain similar headings for Psalms lxvi. and lxxiv. (Heb. lxxxvi. and lxxxvii.), which the Jewish Prayer-book appplicates to the third and fourth days; but that such once existed in the case of the latter psalm seems to be shown from the Latin Psalm Version having the prefixed quinta sabbati.

Prof. Delitzsch, in his Commentary on the Psalms, has recently pointed out that the notation of these psalms in the LXX. is in accordance with certain passages in the Talmud.

It is worthy of inquiry whether variations in other passages of the LXX. from the Hebrew text cannot at times be connected with liturgical use, and whether they do not originate in part from rubriced directions. It seems to be at least plain that the psalms were translated from a copy prepared for synagogue worship.

2. 

Aquila. — It is a remarkable fact that in the second century there were three versions excepted of the Old Testament Scriptures into Greek. The first of these was made by Aquila, a native of Sinope in Pontus, who had become a proselyte to Judaism. The Jerusalem Talmud (see Barceloski, Bibliothese Rabb. ix. 281) describes him as a disciple of Rabbi Akiba; and this would place him in some part of the reign of the Emperor Hadrian (A. D. 117-138). It is supposed that the object of his version was to aid the Jews in their controversies with the Christians; and that as the latter were in the habit of employing the LXX., they would have a version of their own on which they could rely. It is very probable that the Jews in many Greek-speaking countries were not sufficiently acquainted with Hebrew to refer to themselves to the original, and thus they wished to have such a Greek translation as they might use with confidence in their discussions. Such controversies were (it must be remembered) a new thing. Prior to the preaching of the gospel, there were none besides the Jews who used the Jewish Scriptures as a means of learning God's revealed truth, except those who either partially or wholly became proselytes to Judaism. But now the Jews saw to their grief, that their Scriptures were made the instruments for teaching the principles of a religion which they regarded as nothing less than an apostasy from Moses.

This, then, is a probable account of the origin of this version. Extreme literalness and an occasional polemical bias appear to be its chief characteristics.
VERSIONS, ANCIENT (GREEK)

The idiom of the Greek language is very often violated in order to produce what was intended should be a very literal version: and thus, not only verbal grammar even was disregarded: a sufficient instance of this is found in his rendering the Hebrew particle רָאָ֫י by σίν, as in Gen. i. 1, σίν των ἀναμνήσεων καὶ σίν τῆς γῆς, "quod Graeca et Latina linguarum non recipit," as Jerome says. Another instance is furnished by Gen. v. 5, καὶ ἐφεξῆς ἦλθεν ἐκ τῶν κατακολουθίας ἡμών καὶ εὐαγγελίατον ἐκ τῶν Σαρακένων. It is sufficiently attested that this version was formed for controversial purposes: a proof of which may be found in the rendering of particular passages, such as Is. vii. 14, where ῥάκα, in the LXX. παράδοσις, is by Aquila translated πήγη: such renderings might be regarded perhaps rather as modes of avoiding an argument than as direct fabrication. There certainly was room for a version more accurate than was done by the LXX.: but if this had been thoroughly carried out it would have been found that in many important points of doctrine — such, for instance, as in the divinity of the Messiah and the rejection of Israel, the true rendering of the Hebrew text would have been in far closer accordance with the teaching of the Christian Testament than was the LXX. itself. It is probable, therefore, that one pedantic object was to make the citations in the New Testament from the Old appear to be incommunicable, by producing other renderings (often probably more literally exact) differing from the LXX., or even contradicting it. Thus Christianity might seem to the Jewish mind to rest on a false basis. But in many cases a really learned examiner would have found that in points of important doctrine the New Testament definitely rejects the reading of the LXX. (when utterly unmeaning to the matter in hand), and adopts the reading of the Hebrew.

It is mentioned that Aquila put forth a second edition (i.e. revision) of his version, in which, the Hebrew was yet more scrupulously followed, but it is not known if this extended to the whole, or only to three books, namely, Jeremiah, Ezekiel, and Daniel, of which there are fragments. Aquila often appears to have so closely sought to follow the etymology of the Hebrew words, that not only does his version produce no definite idea, but it does not even suggest any meaning at all. If we possessed it perfect it would have been of great value as to the criticism of the Hebrew text, though often it would be of no service as to its real understanding.

That this version was employed for centuries by the Jews themselves is proved indirectly by the 14th Novella of Justinian: πλῆρες δὲ τῆς Ἐρηνίας ἀπαραγένθεται τὰς ἐθνικότως χειραστιας παραδόθησιν. . . . πλὴν ἀλλ᾽ ἐν τῇ μνήμῃ αὐτῶν ἀποκεφαλώματε ἐξαιρέσεις, ἀθέτον διοίκης καὶ τῆς ἀθέτον κεραυνία, καὶ ἐν διάλεξι δικαίως καὶ ὀν κρητίᾳ ἐκ τῶν λείψεων ἐπὶ πρὸς τοὺς ἐθνικοῦς καὶ τοὺς ἑωφόρους.

9. THEODOTION. — The second version, of which we have information as executed in the second century, is that of Theodotion. He is stated to have been an Ephesian, and he seems to be most generally described as an Ebionite: if this is correct, his work was probably intended for those semi-Christians who may have desired to use a version of their own instead of employing the LXX. with the Christians, or that of Aquila with the Jews. But it may be doubted if the name of translation can be rightly applied to the work of Theodotion: it is rather a revision of the LXX. with the Hebrew text, so as to bring some of the copies then in use into more conformity with the original. This he was able to do (with the aid probably of some instructors) so as to eliminate portions which had been introduced into the LXX., without really being an integral part of the version; and also so as to bring much into accordance with the Hebrew in other respects. But his own knowledge of Hebrew was evidently very limited: and thus words and parts of sentences were left untranslated; the Hebrew being merely written with Greek letters.

Theodotion as well as Aquila was quoted by Irenaeus; and against both there is the common charge hid of corrupting texts which relate to the Messiah: some pedanctical intention in such passages can hardly be doubted. The statement of Epiphanius that he made his translation in the reign of Commodus accords well with its having been quoted by Irenaeus; but it cannot be correct if it is one of the translations referred to by Justin Martyr as giving interpretations contrary to the Christian doctrine of the New Testament. So that it seems that this version was much used by Christians: probably many changes in the text of the LXX. were adopted from Theodotion; this may have begun before the Biblical histories of Origen brought the various versions into one conspectus. The translation of the book of Daniel by Theodotion was substituted for that of the LXX. in ecclesiastical use as early as at least as part of the 3rd century. Hence Daniel, as rendered or revised by Theodotion, has so long taken the place of the true LXX., that their version of this book was supposed not to be extant; and it has only been found in one MS. In most editions of the LXX. Theodotion's version of Daniel is still substituted for that which really belongs to that translation.

6. SYMMACHUS is stated by Eusebius and Jerome to have been an Ebionite; so too in the Syrian accounts given by Asenassius; Epiphanius, however, and others style him a Samaritan. There may have been Ebionites from amongst the Samaritans, who constituted a kind of separate sect; and these may have desired a version of their own: or it may be that as a Samaritan he made this version for some of that people who employed Greek, and who had learned to receive more than the Pentateuch. But perhaps to such motives was added (if indeed this were not the only cause of the version) a desire for a Greek translation not so unintelligibly halff as that of Aquila, and not displaying such a want of Hebrew learning as that of Theodotion. If it be probable that if this translation of Symmachus had appeared prior to the time of Irenaeus, it would have been mentioned by him; and this agrees with what Epiphanius says, namely, that he lived under the Emperor Severus.

The translation which he produced was probably better than the others as to sense and general homoeology. When Jerome speaks of a second version he may probably mean some revision, more or less complete, which he executed after his translation was first made; it could hardly be a retabulation, or anything at all tantamount thereto.

5. THE FIFTH, SIXTH, AND SEVENTH VERSIONS. — Besides the translations of Aquila, Sy-
mackus, and Theodotion, the great critical work of Origen comprised as to portions of the Old Test.
three other versions, placed for comparison with
the 1.XX.; which, from their being anonymous,
are only known as the fifth, sixth, and seventh;
designations taken from the places which they re-
spectively occupied in Origen's columnar arrange-
ment. Ancient writers seem not to have been uni-
form in the notation which they applied to these
versions; and what is cited is from one by its
number of reference is quoted by others under a
different numeral.

These three partial translations were discovered by
Origen in the course of his travels in connection
with his great work of Biblical criticism. Euse-
bius says that two of these versions (but without
designating precisely which) were found, the one
at Jericho, and the other at Nicopolis on the Gulf
of Aethion. Epiphanius says, that what he terms
the fifth, was found at Jericho, and the sixth at
Nicopolis; while Jerome speaks of the fifth as hav-
ing been found at the latter place.

The contents of the fifth version appear to have
been the Pentateuch, Psalms, Canticles, and the
minor prophets; it seems also to be referred to in
the Syro-Hexaplar text of the Second Book of Kings:
it may be doubted if in all these books it was com-
plete, or at least if so much was adopted by
Origen. The existing fragments prove that the
translator used the Hebrew original; but it is also
certain that he was aided by the work of former
translators.

The sixth version seems to have been just the
same in its contents as the fifth (except 2 Kings);
and thus the two may have been confused: this
translator also seems to have had the other versions
before him. Jerome calls the authors of the fifth
and sixth "Judaeos translatores"; but the trans-
lator of this must have been a Christian when he
executed his work, or else the hand of a Chris-
tian reviser must have meddled with it before it
was employed by Origen; which seems from the
small interval of time to be hardly possible.

For in Hab. iii. 15 the translation runs, εξέλιθα
τοις εσόμαι την λαον σου δια άρσον του χρυσου
σου.

Of the seventh version very few fragments re-
main. It seems to have contained the Psalms of
the Minor prophets; and the translator was probably
a Jew.

From the references given by Origen, or by those
who copied from his columnar arrangement and its
results (or who added to such extracts), it has
been thought that other Greek versions were
spoken of. Of these & Eppimiion probably refers to
the Hebrew text or to something drawn from it;
& Ziphon to the Old Syriac version; & Σαμαρεια-
τικη probably a reference to the Samaritan text,
or some Samaritan gloss; & Ερανεριας, & Αξ-
λοι, & άυνεπιγραφα some unspecified version or
versions.

The existing fragments of these varied versions
are mostly to be found in the editions of the relics
of Origen's Hexapla, by Montfaucon and by Schubert,
and later, by F. Field, Oxford, 1807-70. See also
below, SYRIAC VERSIONS, L. (B.), on the editions
of the Syriac from the Hexaplar Greek text. — A.]
(For an account of the use made of these ver-
sions by Origen, and its results, see SEPULCHRA INT.)

6. THE VENERO-GREEK VERSION. — A MS. of
the fourteenth century, in the library of St. Mark
at Venice, contains a peculiar version of the Pent-
tateuch, Psalms, Ecclesiastes, Canticles, Ruth,
Lamentations, and Daniel. All of these books, ex-
cept the Pentateuch, were published by Vellison
at Strasburg in 1784; the Pentateuch was edited by
Anmou at Erlangen in 1709-41. The version
itself is thought to be four or five hundred years
older than the other MS, in which it has been trans-
mitted; this, however, is so thoroughly a matter
of opinion, that there seems no absolute reason
for not considering that this one MS, may not be the
original as well as the only one in existence.
It is written in one very narrow column on each page;
the leaves follow each other in the Hebrew order,
so that the book begins at what we should call the
call. An examination of the MS, suggested the
opinion that it may have been written on the
broad inner margin of a Hebrew MS.; and that for
some reason the Hebrew portion had been cut
away, leaving thus a Greek MS, probably unique
as to its form and arrangement. As to the trans-
lution itself, it is on some supposition too recent to
be of consequence in criticism. It may be said
briefly that the translation was made from the
Hebrew, although the present punctuation and accent-
uation is often not followed, and the translator
was no doubt acquainted with some other Greek
versions. The language of the translation is a most
strange mixture of astonishing and exocomphous
barbarism with attempts at Attic elegance and re-
mofement. The Doric, which is employed to an-
to the Talmudic portions of Daniel, seems to
be an indication of remarkable affection.

The Greek of St. Matthew's Gospel. — Any
account of the Greek versions of Holy Scrip-
ture would be incomplete without some allusion
to the fact, that if early testimonies and ancient
opinion unically are to have some weight when
wholly uncontradicted, then it must be admitted
that the original language of the Gospel of St.
Matthew was Hebrew, and that the text which has
been transmitted to us is really a Greek trans-
lution.

It may be briefly stated that every early writer
who mentions that St. Matthew wrote a Gospel at
all says that he wrote in Hebrew (that is, in the
Syro-Chaldean), and in Palestine in the first century;
so that if it be assumed that he did not write in
Hebrew but in Greek, then it may well be asked,
what ground there is for believing that he wrote any
narrative of our Lord's life on earth?

Every early writer that has come down to us
uses the Greek of St. Matthew, and this with the
definite recognition that it is a translation; hence
we may be sure that the Greek copy belongs to the
Apostolic age, having been thus authoritatively
used from and up to that time. Thus the ques-
tion is not the authority of the Greek translation,
which comes from the time when the churches en-
joyed Apostolic guidance, but whether there was a
Hebrew original from which it had been trans-

The witnesses to the Hebrew original were men
sufficiently competent to attest so simple a fact, es-
specially seeing that they are relied on in what is far
more important, — that St. Matthew wrote a Gos-

pel at all. Papias, in the beginning of the second
century, repeats apparently the words of John the
Presbyter, an immediate disciple of our Lord, that
"Matthew wrote the oracles in the Hebrew dia-
lc." Irenaeus, in the latter part of the same cen-
tury, is equally explicit; in connection with the
Indian mission of Panemus in the same age, we
learn that he found the Gospel of Matthew in the
very Hebrew letters. In the next century Origen, the laborious investigator and diligent inquirer, says, that the received account was that St. Matthew had written the first Gospel, and that it was in Hebrew. So too in the next century, Epiphanius and Jerome, both of whom, like Origen, were acquainted with Hebrew. Jerome also mentions the very copies of this Hebrew original which were extant in his time, and which he transcribed. He shows indeed that the copies then circulated amongst the Latins had been variously interpolated; but this shows only the accidental fact. So too Epiphanius shows that the document had been variously depraved: but this does not set aside what it originally was.

To follow the unanimous agreement of later writers is needless; but what can be said on the other side? What evidence is adduced that St. Matthew wrote in Greek? None whatever: but simply some a priori notions that he ought to have done so more advanced; then it is truly stated that the Greek Gospel does not read as though it had about it the constraint of a translation; and then it is said that perhaps the witnesses for the Hebrew original were mistaken. But (says Principal Campbell) is the positive testimony of witnesses, delivered as of a well-known fact to the ancient world, to be overthrown when a mere supposition, perhaps, that the copy is really as they suppose no shadow of evidence is pretended" (Works, ii. 171).

For another theory, that St. Matthew wrote both in Hebrew and also in Greek, there is no evidence: the notion is even contradicted by the almost ignorance of the early Christian writers as to Hebrew, which they accepted as authoritative. To them there was nothing self-contradictory (as some have said) in the notion of an authoritative translation. As it can be shown that the public use of the four Gospels in Greek was universal in the churches from the Apostolic age, it proves to us that Apostolic sanction must have been the ground of this usage; this surely is sufficient to authorize the Greek Gospel that we have.

Erasmus seems to have been the first to suggest that the Greek is the original of the Apostles: at least no writer earlier than Erasmus has been brought forward as holding the opinion; in this many have followed him on what may be called very subjective grounds. Erasmus also advanced the opinion that Irenæus Against Heresies was written by him in Latin. For this he has just as good grounds as for the Greek original of St. Matthew. As to Irenæus, no one appears to follow Erasmus: why should so many adhere to his bold opinion, and by so much evidence and supported by none) relative to St. Matthew? On the revival of letters there was much curiosity expressed for the recovery of a copy of St. Matthew's Hebrew original. Pope Nicholas V. is said to have offered five thousand ducats for a copy; this probably suggested the translations into Hebrew of this Gospel published in the following century by S. P. T. and others.

LATIN VERSIONS. [VULGATE.]

SAMARITAN VERSIONS. [SAMARITAN PENTATEUCH, p. 3291 a.]

SLAVONIC VERSION. In the year 862 there was a desire expressed, or an impious move, for Christian teachers in Moravia, and in the following year the labors of missionaries began amongst them. We need not consider the Moravia in which these services were commenced to be precisely restricted to or identified with the region which now bears that name, for in the ninth century Great Moravia was of far wider extent; and the Moravian Slavonic people held that whole region, that the effort for Christianization was put forth. But while this further extent of Moravia is admitted, it is also to be recollected that the province of Moravia, of which Brünn is the metropolis, is not only the nucleus of Moravia, but that also the inhabitants of that country, still retaining as they do their Slavonian tongue, rightly consider themselves as the descendants and successors of those who were then Christianized. Thus, in 862 they commemorated the thousandth anniversary of their having taken this step, and in 1863 they celebrated the thousandth from the actual arrival of missionaries amongst them. These missionaries were Cyril and Methodius, two brothers from Thessalonica: to Cyrilus is ascribed the invention of the Slavonian alphabet, and the commencement of the translation of the Scriptures. Neander truly says that he was honorably distinguished from all other missionaries of that period in not having yielded to the prejudice which represented the languages of rude nations as too profane for sacred uses; and by not having shrunk from any toil which was necessary in order to become accurately acquainted with the language of the peoples amongst whom he labored. Cyrilus appears to have died at Rome in 868, while Metho-

a The manner in which the testimony of competent witnesses has been not only excised in question, but established, is such as would cast doubt on any historical fact competently attested; and the terms applied to the witnesses themselves are such as seem to show that argument being vain, it is needless to have recourse to something else; not mere assertion as opposed to the definite evidence, but a mode of speaking of the witnesses themselves and of misrepresenting their words, which would not be ventured on in common matters. Thus a writer who is well and judiciously acquainted with the subjects, the Rev. Wm. Neander, sets aside the evidence and the statements of Jerome in this manner: "The one who says he had seen the [Hebrew] gospel is Jerome; but his evidence about it is so conflicting that it is not worth a rush. Perhaps he saw it, and perhaps he says that it is the original of the Greek gospel; then he softens down with 'it is called by most people Matthew's authentic' as must believe, and so on. Now he says, 'Who translated it into Greek is unknown' ; and presently, with amusing self-complacency and obliqueness, he tells us, 'I myself translated it into Greek and Latin!' Why there is not a small debt court in the country where such a witness would not be hooted to the door." Would such modes of reasoning be adopted if it were not designed to mystify the subject? Who cannot see that Jerome says that it is unknown who had made the Greek translation then current for centuries? And who imagines that he identified with that version the one which he had recently made from the Hebrew? But then it is that this is substituted for argument on this subject. Dr. Land, in the Journal of Sacred Literature, October, 1859, boldly asserts, 'We may safely say that there is, in probability as well as in direct testimony, a weight as heavy in the scale of the Greek text as in that of the Hebrew, not to go further.' But, in fact, there is no testimony, direct or indirect, for a Greek original of St. Matthew.
dus continued for many years to be bishop of the Slavonians. He is stated to have continued his brother's translation, although how much they others actually executed is quite uncertain; perhaps much of the Old Testament was not translated at all in that age, possibly not for centuries after.

The Old Testament is, as might be supposed, a version from the LXX., but what measure of revision it may since have received seems to be by no means certain. As the oldest MS. of the whole Bible is of the year 1490, it may reasonably be questioned whether this version may not in large portions be comparatively modern. This could only be set at rest by a more full and accurate knowledge being obtained of Slavonic Biblical MSS. Dobrovol'sky, however, mentions (Griesbach's Gr. Text, ii., xxviii.) that this MS. (his 1), and two others copied from it, are the only Slavonic MSS. of the entire Bible existing in Russia. If it be correct that the MSS. which he terms 2 and 3 are copied from this, there are strong reasons for believing that it was not completed for some years subsequently to 1499. The oldest MSS. of any part of this version is an Evangelarium, in Cyrillic Slavonic written at Ostragoth in Valachie; from this was taken the Moscow edition of 1605, in which, however, there was some revision, at least so far as the insertion of I. John v. 7 is concerned.

Veselovski cited a few readings from this version: After made more extems, which were used by Griesbach, together with the collations sent to him by Dobrovol'sky, both from MSS. and printed editions. We thus can say, with some confidence, that the general text is such as would have been expected in the ninth century: some readings from the Latin have, it appears, been introduced in places: this arises probably from the early Slavonian custom of reading the Gospel in Latin before they did it in their own tongue. Dobrovol'sky paid particular attention in his collations to the copies of the Apocalypse: it has been, however, long suspected that that book formed no portion of this version as originally made. We can now go further and say definitely that the Apocalypse, as found in some at least of the Slavonic copies, could not be anterior to the appearance of the first edition of the Gr. Text of Erasimus in 1516. For there are readings in the Apocalypse of Erasimus which are entirely devoid of any support from Greek MSS. This can be said confidently, since the one Greek copy used by Erasimus has been identified and described by Prof. Delitzsch. It is now therefore known that peculiarities as to error in Erasimus's text of the Apocalypse, as it first appeared, are in several places due not to the MS. from which he drew, but to the want of care in his edition. And thus, whatever agrees with such peculiarities must depend on, and thus be subservient to the Erasimian text. In Rev. ii. 13, the Erasimian text has the peculiar reading, ἐκαίνης ἤγας ἔθαις; for this no MS. was cited by Griesbach, and all his authority, besides the Erasimian edition, was in fact * Steph. 3, 4,* i.e. two MSS. collated by Dobrovol'sky; one of these is said by him to be copied from the oldest Slavonic MS. of the whole Bible; if, therefore, it agrees with it in this place, it shows that the Slavonic MS. must, in that part at least, be later than the year 1516. The only Greek authority for this reading, ἔθαις, is the margin of 92. the Dublin MS., famous as containing I. John v. 7: in which the Gospels belong to the end of the fifteenth century; the Acts and Epistles are somewhere after 1500, and the Apocalypse was added about the year 1580. There seems to be another Slavonic text of the Apocalypse contained in Dobrovol'sky's 10, but whether it is older than the one already mentioned is doubtful.

S. P. T.

SYRIAC VERSIONS. I. OF THE OLD TESTAMENT.

A. From the Hebrew.—In the early times of Syrian Christianity there was executed a version of the Old Testament from the original Hebrew, the use of which must have been as widely extended as was the Christian profession amongst that people. Ephraem the Syrian, in the latter half of the 4th century, gives abundant proof of its use in general by his countrymen. When he calls it our version, it does not appear to be in opposition to any other Syriac translation (for no other can be proved to have then existed); but in contrast to the original Hebrew text, or to those in other languages. At a later period this Syriac translation was designated Peshitta, (Simple); or, as in the preface of Barthelemy's Hebrews to his Theorum Arcorum, .

b This Greek authority is the one denoted by 92. Tischendorf (following a misprint in Tregelles' Greek and English Revision, 1844) gives it 92 **. That would signify a correction in a later hand in 91; which is the modern supplement to the Vatican MS., in which such a correction has been sought in vain.

c Ephraemi Opera Syr. l. 289 (on 1 Sam. xxiv. 4). He is simply comparing the Hebrew phrase and the Syriac version: ζòθοντες, (πρὶς ἐπὶ ὑπὲρ αὐτοῦ).
was marked with οὐσικὰ and ὅλη, from which the translation from the Hebrew was free. It might, therefore, be but natural for a later text to be thus designated, in contrast to the marks and the citations of the different Greek translators found in the version from the Hexaplar Greek. This translation from the Hebrew has always been the ecclesiastical version of the Syrians; and when it is remembered how in the 5th century divisions and divisions were introduced into the Syrian churches, and how from that time the Monophysite sites and those termed Nestorians have been in a state of undeclared opposition, it shows not only the antiquity of this version, but also the deep and abiding hold which it must have taken on the mind of the people, that this version was firmly held fast by both of these opposed parties, as well as by those who adhere to the Greek Church, and by the Maronites. Its existence and use prior to their divisions is sufficiently proved by Ephraem alone. But how much older it is than that descent of Eclesa we have no evidence. From Bar-Hebraeus (in the 5th century) we learn that there were two opinions as to its age: one saying that the version was made in the reign of Solomon and Hiram, some that it was translated by Assyria, the priest who was sent by the king of Assyria to Samaria, and some that the version was made in the days of Adad the apostle and of Algarus, king of Osroene (at which time, he adds, the Simple version of the New Testament was also made). The first of these opinions of course implies that the books written before that time were then translated; indeed, a limitation of somewhat the same kind would apply to the second. The ground of the first opinion seems to have been the belief that the Syrian king was a convert to the profession of the true and revealed faith held by the Israelites; and that the possession of Holy Scripture in the Syrian tongue (which they identified with his own) was a necessary consequence of this adoption of the true belief; this opinion is mentioned as having been held by some of the Syrians in the 4th century. The second opinion (which does not appear to have been cited from any Syrian writer prior to Bar-Hebraeus) seems to have some connection with the formation of the Samaritan Bible. As it is said that this translation is in an Aramaic dialect, any one who supposed that it was made immediately after the mission of the priest from Assyria might say that it was then first that an Aramaic translation was executed; and this might afterwards, in a sort of indefinite manner, have been connected with what the Syrians themselves used to call the Bible of Edessa (in the latter half of the 7th century) had held the third of the opinions mentioned by Bar-Hebraeus, who cites him in support of it, and accords with it.

It is highly improbable that any part of the Syriac version is older than the advent of our Lord; those who placed it under Algarus, king of Edessa, seem to have argued on the account that the Syrian people then received Christianity; and thus they supposed that a version of the Scriptures was a necessary accompaniment of such conversion. All that the account shows clearly is, then, that it was believed to belong to the earliest period of the Christian faith among them; an opinion with which all that we know on the subject accords well. Thus Ephraem, in the 4th century, not only shows that it was then current, but also gives the impression that this had even then been long the case. For in his commentaries he gives explanations of terms which were even then obscure. This might have been from age: if so, the version was made comparatively long before his days; or it might be from its having being in a dialect different from that to which he was accustomed at Edessa. In this case, then, the translation was made in some other part of Syria; which would hardly have been done, unless Christianity had at such a time been more diffused there than it was at Edessa. The dialect of that city is stated to have been the purest Syriac; if, then, the version was made for that place, it would no doubt have been a monument of such pure dialect. Folly the origin of the Old Syriac version is to be compared with that of the Old Latin [see Vulgate]; and that it differed as much from the polished language of Edessa as did the Old Latin, made in the African Province, from the contemporary writers of Rome, such as Tertullian.

Even though the traces of the origin of this version are lost, the Old Testament. It was, however, in a certain, it is of the uttermost importance that they should be remembered. For the Old Syriac has the peculiar value of being the first version from the Hebrew original made for Christian use: and, indeed, the only translation of the kind before that of Jerome, which was made subsequently to the time when Ephraem wrote. This Syriac commentator may have termed it "our version," in contrast to all others then current (for the Targums were hardly versions), which were merely reflections of the Greek and not of the Hebrew original.

The proof that this version was made from the Hebrew is twofold: we have the direct statements of Ephraem, who compares it in places with the Hebrew, and speaks of this origin as a fact; and who is confirmed (if that had been needful) by later Syrian writers; we find the same thing as evident from the internal examination of the version itself. Whatever internal change or revision it may have received, the Hebrew groundwork of the translation is unmistakable. Such indications of revision must be, afterwards, directly specified and compared; the version actually that appeared in the Paris Polyglot of Le Jay in 1645; it is said that the editor, Gabriel Sionita, a Maronite, had only an imperfect MS., and that, besides errors, it was defective as to whole passages, and even as to entire books. This last charge seems to be so made as if it were to imply that books were omitted besides those of the Apocrypha, a part which Sionita confessedly had not. He is stated to have supplied the deficiencies by translating into Syriac from the Vulgate. It can hardly be supposed but that there is some exaggeration in these statements. Sionita may have filled up an occasional hiatus in his MS.; but it requires very definite examination before we can fully credit that he thus supplied whole books. It seems needful to believe that the defective books were simply those in the Apocrypha, which he did not supply. The result, however, is, that the Paris edition is but an inshore groundwork for our speaking with confidence of the text of this version.

In Walton's Polyglott, 1657, the Paris text is reprinted, but with the addition of the Apocryphal books which had been wanting. It was generally said that Walton had done much to amend the texts upon MS. authority; but the late Prof. Les
denies this, stating that "the only addition made by Walton was some Apcryphal books." From Walton's Polyglott, Kirlich, in 1875, published a separate edition of the Pentateuch. The Syriac Peshitta there have been many editions. The first of these, as mentioned by Eichhorn, appeared in 1610; it has by the side an Arabic version. In 1625 there were two editions: the one at Paris edited by Gabriel Sionita, and one at Leyden by Erpenius from two MSS. These have since been repeated; but anterior to them all, it is mentioned that the seven pestaludus appeared at Rome in 1584.

In the punctuation given in the Polyglott, a system was introduced which was in part a peculiarity of Gabriel Sionita himself. This has to be borne in mind by those who use either the Paris Polyglott or that of Walton; for in many words there is a redundancy of vowels, and the form of some is thus exceedingly changed.

When the British and Foreign Bible Society proposed more than forty years ago to issue the Syriac Old Testament for the first time in a separate volume, the late Prof. Lee was employed to make such editorial preparations as could be connected with a text edition, through use of these MSS. would place this edition of the authorities. Dr. Lee collated for the purpose six Syriac MSS. of the Old Test, in general, and a very ancient copy of the Pentateuch: he also used in part the commentaries of Epiphanius and of Bar-Hebraeus. From these various sources he constructed his text, with the aid of that found already in the Polyglott. Of course the corrections depended on the editor's own judgment; and the want of a specification of the results of collations leaves the reader in doubt as to what the evidence may be in those places in which there is a departure from the Polyglott text. But though more in formation might be desired, we have in the edition of Lee a veritable Syriac text, from Syriac authorities, and free from the suspicion of having been formed in modern times, by Gabriel Sionita's translating portions from the Latin. [Prof. Lee's edition was published at London in 1823. — A.]

But we have now in this country, in the MS. treasures brought from the Nitranean valleys, the means of far more accurately editing this version. Even if the results should not appear to be striking, this version, as this early MS. has not been fully examined, will probably, as this Syriac text, will probably, as this version on such a basis of diplomatic evidence as would show positively how this earliest Christian translation from the Hebrew was read in the 5th or 7th century, or possibly still earlier; we thus could use the Syriac with a fuller degree of confidence in the criticism of the Hebrew text, just as we can the more ancient versions of the New for the criticism of the Greek.

In the beginning of 1849, the late excellent Biblical scholar, the Rev. John Rogers, Canon of Exeter, published Reasons why a New Edition of the Peshitto, or Ancient Syriac Version of the Old Testament, should be published. In this interesting pamphlet, addressed to the late Archbishop of Canterbury, Canon Rogers speaks of the value of the version itself, its importance in criticism, the existing editions, their defects, the sources of emendation now possessed by this country, in the

Notes Critical and Explanatory, by the Rev. Andrew Oliver, Boston, 1881. A.

a The Pentateuch could probably be given on a basis of the fifth century.
the Biblical materials which are at our hands, and of which the scholars of former ages had not the benefit.

There was a strong hope expressed soon after the issue of Canon Rogers's appeal, that the work would have been formally placed in a proper manner in the hands of the Rev. Wm. Cureton, and that thus it would have been accomplished under his superintendence, at the Oxford University Press. Canon Rogers announced this in an appendix to his pamphlet. But this has not been effected. It may still be hoped that Dr. Cureton will edit at least the Pentateuch from a very ancient copy; but there is not now in this country the practical encouragement to such Biblical studies as require the devotion of time, labor, and attention (as well as pecuniary expense), which in the last century Kennicott and Holmes received.

But if the printed Syriac text rests on by no means a really satisfactory basis, it may be asked, How can it be said positively that what we have in the same version substantially that was used by Ephraem in the 4th century? Happily, we have the same means of identifying the Syriac with that anciently used, as we have of showing that the modern Latin Vulgate is substantially the version executed by Jerome. We admit that the common printed Latin has suffered in various ways, yet at the bottom and in its general texture it is undoubtedly the work of Jerome: so with the Peshito of the Old Test., whatever errors of judgment were committed by Gabriel Mocaita, the first editor, and however little has been done by those who should have corrected these things on MS. authority, the identity of the version is too certain for it to be thus destroyed, or even (it may be said) materially obscured.

From the citations of Ephraem, and the single words on which he makes remarks, we have sufficient proof of the identity of the version: even though at times he also furnishes proof that the copies as printed are not exactly as he read. The following may be taken as instances of acquaintance; they are mostly from the places (see Wissenschaftliche Bibliographie, p. 122, &c.) in which Ephraem thinks it needful to explain a Syrian word in this version, or to discuss its meaning, either from its having become antiquated in his time, or from its being unused in the same sense by the Syrians of Elessa. Thus,

Gen. i. 1, לָאָדָי is used in Syrian as answering to the Hebrew אָדָי. The occurrence of this word Ephraem mentions, giving his own explanation:

i. 2, מַלְכָּא אָדָי; x. 9, for את אָדָי, the Syriac has אָדָי לָאָדָי, which Ephraem mentions as being a term which the Persians also use.

Gen. xxx. 14, for אָדָי therst is לָאָדָי, a word which Ephraem mentions as being there, and the possible meaning of which he discusses. Ex. xxviii. 4, לָאָדָי stands for the Hebrew אָדָי; Ephraem reads it לָאָדָי, and explains the meaning: xxviii. 4, לָאָדָי (רָדָי); xxviii. 40, לָאָדָי (רָדָי); Num. xi. 7, for אָדָי there is אָדָי (רָדָי).
Versions, Ancient (Syriac) 3387

Versions cannot be certainly known until the ancient text of the version is better established. Occasionally, however, it is clear that the Syriac translator read one consonant for another in the Hebrew, and translated accordingly; at times another vocalization of the Hebrew was followed.

A resemblance has been pointed out between the Syriac and the reading of some of the Chaldee Targums: if the Targum is the older, it is not unlikely that the Syriac translator, using every aid in his power to obtain an accurate knowledge of what he was rendering, examined the Targums in different passages. This is not the place for fully discussing the date and origin of the Targums [see below, TARGUMS]; but if (as seems almost certain) the Targums which have come down to us are almost without exception more recent than the Syriac version, still they are probably the successors of earlier Targums, which by amplification have reached their present shape. Thus, if existing Targums are more recent than the Syriac, it may happen that their coincidences arise from the use of a common source — an earlier Targum.

But there is another point of inquiry of more importance: it is, how far has this version been affected by the LXX.? and to what are we to attribute this influence? It is possible that the impulses in this partly to the Einheitsknappers and revisers: while in part this belonged to the version as originally made. For, if a translator had access to another version while occupied in making his own, he might consult it in cases of difficulty; and thus he might unconsciously follow it in other parts. Even knowing the words of a particular translation may affect the mode of rendering in another translation or revision. And thus a tinge from the LXX. may have easily existed in this version from the first, even though in whole books it may not be found at all. But when the extensive use of the LXX. is remembered, and how soon it was superstition imagined to have been made by direct inspiration, so that it was deemed canonical authority, we cannot feel wonder that readings from the LXX. should have been from time to time introduced; this may have commenced probably before a Syriac version had been made from the Hexaplar Greek text; because in such revised text of the LXX. the additions, etc., in which that version differed from the Hebrew, would be so marked that they would hardly seem to be the authoritative and genuine text.

Some comparison with the Greek is probable even before the time of Ephraem; for, as to the Apocryphal books, while he cites some of them (though not as Scripture), the Apocryphal additions to Daniel and the books of Maccabees were not yet found in Syriac. Whoever translated any of these books from the Greek, may easily have also compared with it in some places the books previously translated from the Hebrew.

In the books of Psalms this version exhibits many peculiarities. Either the translation of the Psalter must be a work independent of the Psaltus in general, or else it has been strangely revised and altered, not only from the Greek, but also from liturgical use. Perhaps, indeed, the Psalms are a different version; and that in this respect the practice of the Syrian churches is like that of the Roman Catholic Church and the Church of England in using liturgically a different version of the book so much read ecclesiastically.

It is stated that, after the divisions of the Syrian Church, there were revisions of this one version by the Monophysites and by the Nestorians; probably it would be found, if the subject could be fully investigated, that there were in the hands of different parties copies in which the ordinary accidents of transcription had introduced variations.

The Chaldee recension mentioned by Bar-Helemeus was only known by name prior to the investigations of Wiseman: it is found in two MSS. in the Vatican; it was formed for the use of Monophysites; there is peculiarity in the punctuation introduced, by a leaning towards the Greek; but it is, as to its substance, the Peshito version.

1. The Syriac version from the Hexaplar Greek Text. — The only Syriac version of the Old Testament, up to the 6th century was apparently the Peshito. The first definite intimation of a portion of the Old Testament translated from the Greek is through Moses Aghebas. This Syriac writer lived in the middle of the 6th century; he made a translation of the Gospels of Cyril of Alexandria from Greek into Syriac; and, in the prefixed Epistle, he speaks of the versions of the New Testament, and of the Psalter, which Polycarp (rest his soul!), the Chroesopoulos, made in Syriac for the faithful Xenian, the teacher of Mahang, worthy of the memory of the good. We thus see that a Syriac version of the Psalms had a similar origin to the Philoxenian Syriac New Testament. We know that the date of the latter was A.D. 568; the Psalter was probably a contemporaneous work. It is said that the Nestorian patriarch, Marabba, A.D. 552, made a version from the Greek; it does not appear to be in existence, so that, if ever it was completely executed, it was probably superseded by the Hexaplar version of Paul of Telh; indeed Paul may have used it as the basis of his work, adding marks of reference, etc.

The version by Paul of Telh, a Monophysite, was made in the beginning of the 7th century; for its basis he used the Hexaplar Greek text — that is, the LXX., with the corrections of Origen, the asterisks, obeli, etc., and with the references to the other Greek versions.

The Syro-Hexaplar version was made on the principle of following the Greek, word for word, as exactly as possible. It contains the marks introduced by Origen; and the references to the versions of Aquila, Symmachus, Theodotion, etc. In fact it is from this Syriac version that we obtain our most accurate acquaintance with the results of the critical labors of Origen.

Andreas Masius, in his edition of the book of Joshua, first used the results of this Syro-Hexaplar text; for, on the authority of a MS. in his possession, he revised the Greek, introducing asterisks and obeli, thus showing what Origen had done, a

a Perhaps as to this the version of the Psalms from the Greek made by Polycarp (to be mentioned presently) has not been sufficiently taken into account. Indeed, little attention appears to have been paid to the evidence that such a version existed.

b Assmann, Bibliotheca Orientalis, ii. 83; where however, the obscure Syriac is turned into still more obscure Latin.

c Josua in Testamenti historiae Illustrata atque explicant ab Andrea Mascia. Antwerp, 1574.
how much he had inserted in the text, and what he had marked as not found in the Hebrew. The Syriac MS. used by Masius has been long lost; though in this day, after the recovery of the Codex Runcellii of the Apocalypse (from which Erasmus first edited that book) by Prof. Delitzsch, it could hardly be a cause for surprise if this Syriac Codex were again found.

It is from a MS. in the Ambrosian Library at Milan that we possess accurate means of knowing this Syriac version. The MS. in question contains the Psalms, Joel, Proverbs, Ecclesiastes, Canticles, Wisdom, Ecclesiasticus, Minor Prophets, Jeremiah, Baruch, Daniel, Ezekiel, and Isaiah. Norberg published, at Lund in 1787, the books of Jeremiah and Ezekiel, from a transcript which he had made of the MS. at Milan. In 1788, Bagatti published at Milan the book of Daniel; he also edited the Psalms, the printing of which had been completed before his death in 1811; it was published in 1820. The rest of the contents of the Milan Codex (with the exception of the Apocryphal books) was published at Berlin in 1833, by Middendorff, from the transcript made by Norberg; Middendorff also added the 4th (2d) book of Kings from a MS. at Paris.

It besides these portions of this Syriac version, the MSS. from the Nitrian monasteries now in the British Museum would add a good deal more: amongst these are six, from which much might be drawn, so that part of the Pentateuch and other books may be recovered. These MSS. are like that at Milan, in having the marks of Orig- en in the text; the references to readings in the margin; and occasionally the Greek word itself is thus cited in Greek.

Dr. Antonio Ceriani, of the Ambrosian Library at Milan, after having for a considerable time proposed to edit the portions of the Syro-Hexaplar Codex of Milan which had hitherto remained in MS., commenced such a work in 1861 (Monumenta Sacra et Profana, Opera Coliugii Bibliothecae Ambrosianae), the first part of the Syriac text being Baruch, Lamentations, and the Epistle of Jeremiah. To this work Ceriani subjoined a collation of some of the more important texts, and critical notes. A second part has since appeared. It is to be hoped that he may thus edit the whole MS., and that the other portions of this version known to be extant may soon appear in print.

The value of this version for the criticism of the LXX. is very great. It supplies, as far as a version can, the lost work of Origen.

The list of versions of the Old Test. into Syriac often appears to be very numerous; but on examination it is found that many translations, the names of which appear in a catalogue are really either such as never had an actual existence, or they are either old versions from the Hebrew, or else that from the Hexaplar text of the LXX., under different names, or with some slight revision. To enumerate the supposed versions is needless. It is only requisite to mention that Thomas of Harkel, whose work in the revision of a translation of the New Test. will have to be mentioned, seems also to have made a translation from the Greek into Syriac of some portions of the Apocryphal books, at least, the subscriptions in certain MSS. state this.

In whatever forms the Syriac New Test. may have existed prior to the time of Philoxenus (the beginning of the sixth century), who caused a new translation to be made, it will be more convenient to consider all such most ancient translations or revisions together; even though there may be reasons afterwards assigned for not regarding the version of the earlier ages of Christianity as absolutely one.

It may stand as an admitted fact that a version of the New Test. in Syriac existed in the 2d century; and to this we may refer the statement of Eusebius respecting Hezodippus, that he "made quotations from the Gospel according to the Hebrews and the Syriac," εν τω του και Εβραιοις εις ουγκοικοι και τω Συριακων (Hist. Eccl. iv. 22). It seems equally certain that in the 4th century such a version was as well known of the New Test. as the Old. It was the companion of the Old Test. translation made from the Hebrew, and as such was in habitual use in the Syriac churches. To the translation in common use amongst the Syrians, orthodox, Monophysite, or Nestorian, from the 5th century and onward, the name of Peshibito has been as commonly applied in the New Test. as the Old. In the 7th century at least the version so current acquired the name of LXX. or, in contrast to that which was then formed and revised by the Monophysites.

Though we have no certain data as to the origin of the version it is probable on every ground that a Syriac translation of the New Test. was an ac companion of that of the Old; winterever there- fore bears on the one, bears on the other also.

There seem to be but few notices of the old Syriac version in early writers. Cosmas Indicopleustes, in the former half of the 6th century incidentally informs us that the Syriac translation

17,163, Judges and Ruth, defective (cent. vii. or viii.). Subscription to Judges, "According to the LXX.;" to Ruth, "From the Tetrapol of the LXX."

The notes on these MSS. made by the present writer in 1857, have been kindly compared and amplified by Mr. William Wright of the British Museum.

Kurdian issued at Copenhagen in 1859 the first portion; but none of the MSS. 17,163 another part has since been published. [Title: Libri Juicorum et Ruth secundum Versionem Syrio-Hexaplarum, etc. 2 fasc. Havn. 1859-61.] Some of these MSS. were written in the same century in which the version was made and do not appear to be dependent or as giving the text with general accuracy.
does not contain the Second Epistle of Peter, 2 and 3 John, and Jude. This was found to be correct when a thousand years afterwards this ancient translation became again known to Westermarians. In 1552, Moses of Mardin came to Rome to Pope Julius III., commissioned by Agapetus the Jacobite (Monophysite) patriarch, to state his religious opinions, to effect (it is said) a union with the Roman Church, and to get the Syriac New Testament, printed. In this last object Moses failed both at Rome and Venice. At Venice he was, however, successful. Wismarstadt, the chancellor of the Emperor Ferdinand I., had himself learned Syriac from Thomas of Melitene, and through his influence the emperor undertook the charge of an edition, which appeared in 1555, through the joint labors of Wismarstadt, Moses, and Postel. Some copies were afterwards issued with the date of 1562 on the back of the title.

In having only three Catholic epistles, this Syriac New Testament, agreed with the description of Conon, the Apocalypse was also wanting, as well as the section John viii. 1-11; this last omission, and some other points, were noticed in the list of errors. The editors appear to have followed their MSS. with great fidelity, so that the edition is justly valued. In subsequent editions endeavors were made conjecturally to amend the text by introducing changes that had not really belonged to the translation. One of the principal editions is that of Leiden and New York; in this the text is made as full as possible by supplying every lacuna from any source; in the punctuation there is a strange peculiarity, that in the former part Leiden chose to follow a sort of Chaldee analogy, while in his death Schinz introduced a regular system of Syriac vocalization through all the rest of the volume. The Lexicon which accompanies this edition is of great value. This edition was first issued in 1708; more copies, however, have the date 1709; while some have the false and dishonest statement on the title page, “Seconda editio a mendis purgata,” and the date 1717. The late Professor Lee published an edition in 1819, in which he correctly collated the text on the authority of a few MSS. This is so far independent of that of Wismarstadt. It is, however, very short of being really a critical edition. In 1828, the edition of Mr. William Greenfield (often reprinted from the stereotype plates) was published by Meares, Regent's Park. In this text of Wismarstadt was followed (with the words fully expressed), and with certain supplements within brackets from Lee's edition. For the collation with Lee's text Greenfield was not responsible. There are now in this country excellent materials for the formation of a critical edition of this version: it may, however, be said, that as in its first publication the MSS. employed were honestly used, it is in the text of Wismarstadt in a far better condition than the Peshito Old Testament.

This Syriac Version has been variously estimated: some have thought that in it they had a genuine and unaltered monument of the second, or perhaps even of the first century. They thus naturally upheld it as almost as valuable in authority with the Greek text, and as being of a period anterior to any Greek copy extant. Others finding in it inimitable marks of a later age, were inclined to deny that it had any claim to a very remote antiquity; thus La Croze thought that the commonly printed Syriac New Test. is not the Pedobito at all, but the Philoxenian executed in the beginning of the 6th century. The fact is, that this version as transmitted in its present state contains only more or less traces of a later age. The two things are so blended, that when either class of phenomena alone were regarded, the most opposite opinions might be formed. The opinion of Westmian was one of the most perverse that could be devised; he found in this version readings which accord with the Latin; and, acting on the strange system of text which he adopted in his later years, he asserted that any such accordance with the Latin was a proof of corruption from that version; so that with him the proof of antiquity became the tokens of later origin, and he thus assigned the translation to the 7th century. With him the real indications of later readings were only the marks of the change which was only reverence to certain points in the text, to that of Wismian; he upheld its antiquity and authority very strenuously. The former point could be easily proved, if one class of readings alone were considered; and this is confirmed by the contents of the version itself. But on the other hand there are difficulties, for very often readings of a much more recent kind appear; it was thus thought that it might be compared with the Latin as found in the Codex Brixianus, in which there is an ancient groundwork, but also the work of a reviser is manifest. Thus the judgment formed by Griesbach seems to be certainly the correct one as to the peculiarity of the text of this version; he says (using the terms proper to his system of recensions): a Vol. ii. Recensionem Syriacam, propterea quod in edd. cod. Palmarinorum veterum textus, omnes aliae dissimilissimae est. In multis concinit cum Alcaiania recensione, in pluribus cum Occidentali, in nonnullis etiam cum Constantinopolitana, ita tamen ut in line posteriores sequeantur seculis inventa sunt, plerique repudiat. Brevissima evidentia Graecis collata, plane diversa etiam hauriri recognita evenisse vel reducta (N. T. Test. Proleg., xxxv). In a note Griesbach introduced the comparison of the Codex Brixianus, "Illustrati hanc potest collinam nonnullorum Latinorum codicis, qui praeceps quidem versioem ad Occidentalem recensione accommodatum representat, sed paucis ad juniores libros Graecos retinet. Ex hae generis Brixianus Codex Latina, qui non rarum Graeco-Latinis, et vetustissimi Latinius collibus discordi, et in Graecorum partes transit." a

a The date of 1555 appears repeatedly in the body of the volume; at the end of the Gospels, May 18, 1555; St. Paul's Ep. July 18, 1555; Acts, Aug. 11, 1555; Cath. Ep. and the conclusion, Sept. 27, 1555. The volume is dedicated to the Emperor Ferdinand, and the contents mention three other dedications to other members of the imperial house. All of these three are often wanting, and two of them, addressed to the Archbishops Ferdinand and Charles, are not published together, being, but it is said is sufficient that no copy is known of it, which they are found.

b Griesbach's most mature judgment on this subject was thus given: "Interpolationes antea e locis Evangeliorum parallellis, quibus apud Syrimum Matth. xvi. 18, loc. iv. 23, iuxta Matt. xxii. 22, 23, Mar vii. 11, sine Hebr. loc. iv. 25, dependerunt, non magis quidam additamenta e hecatombarum libris in sacrum contextum traductis, velut Hebr. xx. 11, at liturgicam dict. Evang. Matt. vii. 13, vita sunt sicut viri sicut virginitas. Quin pluris interpres se seu secundo momenta sui mundi commentaria, cum aliis quodam generalius mox communi in versione Syrica extant, primitius ab ea ab
Some proof that the text of the common printed Peshito has been rewritten, will appear when it is compared with the Cairene Syriac Gospels.

Let it be distinctly remembered that this is no new opinion; that it is not the pseudo notion of Tregelles, or of any one individual; for as the question has been reopened, it has been treated as if it were some theory newly invented to serve a purpose. The Rev. F. H. Scrivener, whose labors in the collation of Greek MSS., and whose care in editing Codex Angeniensis of St. Paul's Epistles, deserves very high commendation, avowed himself many years ago an ardent admirer of the Peshito-Syriac version even then he set aside its authority very often when it happened to adhere to the ancient Greek text, to the other ancient versions, and to the early Fathers, in opposition to the later copies. But when the judgment of Griesbach respecting the common printed Syriac had been repeated and enforced by Tregelles (Horae Introd., vol. iv. p. 265), Scrivener came forward as its champion. In his last edition to Codex Angeniensis, Mr. Scrivener says, "How is this divergence of the Peshito version from the text of Codex B explained by Tregelles? He les of course the pressure of the argument against him, and meets it, if not successfully, with even more than his wonted boldness. The translation degenerates in his hands into the rendering "falsely printed by the Peshito." Now let us mark the precise nature of the demand here made on our faith by Dr. Tregelles. He would persuade us that the whole Eastern Church, distrusted as it has been, and split into hostile sections for the space of 1,400 years, orthodox and Jacobite, Nestorian and Maronite alike, those who could agree in nothing else, have had able, albeit better, jealousies in order to substitute in their monastic libraries and liturgical services, another and a spurious version in the room of the Peshito, that sole surviving monument of the first ages of the Gospel in Syria! Nay, more, that this wretched forgery has deceived Orientalists profound as Michaelis and Lowth, has passed without suspicion through the ordeal of searching criticism to which every branch of sacred literature has been subjected during the last half-century! We will require solid reasons, indeed, before we surrender ourselves to an hypothesis as novel as it appears vidently improbable (pp. iv., v.). Mr. Scrivener's warmth of declamation might have been spared; no one calls the Peshito "a spurious version," a "wretched forgery," etc., it is not suggested that the Syrian churches agreed in some strange substitution; all that is suggested, is that at the time of the translation Greek text, before the disruption of the Syrian churches, the then existing Syriac version was revised and modernized in a way analogous to that in which the Latin was treated in Cod. Brixianus. On part of Mr. Scrivener's statements the Rev. F. J. A. Hort has well remarked: "The text may have been altered and corrupted between the first or second, and fifth centuries. This is all that Dr. Tregelles has supposed, though Mr. Scrivener as sails him with unseemly violence, as if he had represented the vulgar text as a wretched forgery."

Mr. Scrivener's readiness is no less remarkable in calling this a "novel hypothesis," when in fact it is at least as old as Griesbach. . . . There is neither evidence nor internal probability against the supposition that the Old Syriac version was revised into its present form . . . in the 4th or even 3d century, to make it accord with Greek MSS. then current at Antioch, Edessa, or Nisibis; and without some such hypothesis the Syriac text must remain an inexplicable phenomenon, unless we bring the Greek and Latin texts into conformity with it, by contradicting the full and clear evidence which we do possess respecting them. All that we have now may have been alleged before the Cairene Syriac was discovered: the case is surely strengthened in a high degree by the appearance in a MS. assigned to the 5th century of a Syriac version of the Gospels, bearing clear marks of the highest antiquity in its manifest errors as well as in its choice readings. The appropriation of the "true Peshito," appears to us wholly unimportant, except for rhetorical purposes."

These remarks of Mr. Hort will suffice in resolving the opinion stated by Tregelles from the charge of noise or rashness. Indeed, the supposition as stated by Griesbach, is a simple solution of various difficulties; for it be not the fact, then every other ancient document or monument of the New Testament must have been strangely altered in its text. The number of difficulties (otherwise inexplicable), thus solved, is about a demonstration of its truth. Mr. Scrivener, however, seems incapable of apprehending that the revision of the Peshito is an opinion long ago held: he says since, "I know no other cause for suspending the Peshito, than that its readings do not suit Dr. Tregelles, and if this fact be enough to convict it of corruption, I am quite unable to vindicate it." Why, then, do not the readings "suit Dr. Tregelles? Because, if they were considered genuine, we should have to use Mr. Hort's words, to bring the Greek and Latin texts into conformity with it, by contradicting the full and clear evidence which we do possess respecting them." Whether the whole of this version proceeded from the same translator has been questioned. It appears to the present writer probable that the New Testament of the Peshito is not from the same hand as the Old. Not only may Michaelis be right in supposing a peculiar translator of the Epistle to the Hebrews, but also other parts may be from different hands; this opinion will become more general the more the version is studied. The revisions to which the version was subjected may have succeeded in part, but not wholly, in effacing the

a Even Michaelis did not think it necessary to assume that the Peshito had been transmitted without any change. In using the Syriac version, we must never forget that our present editions are very imperfect, and that little reliance can be placed upon the reading of the original printed text as the reading of the Greek MS. of the first century. Marsh's Micaiah, ii. 46.
b Journal of Classical and Sacred Philology (Cam- bridge), Feb. 1890, p. 378, 379.
factions of a plurality of translators. The Acts and Epistles seem to be either more recent than the Gospels, though far less revised; or else, if equal, far more corrected by later Greek MSS.

There is no sufficient reason for supposing that this version ever contained the four Catholic Epistles and the Apocalypse, now absent from it, not only in the printed editions but also in the MSS.

Some variations in copies of the Peshito have been regarded as if they might be styled Monophysite and Nestorian recensions; but the designation would be far too definite: for the differences are not such as to warrant the classification.

The MSS. of the Curetonian recension (as it has been termed) of the Peshito Old Testament contain also the New with a similar character of text. * The Peshito version of the N. T. has been translated into English by Dr. J. W. Etheridge, 2 vols. Lond., 1846-47, and by Dr. James Murdock, Vol. I. 1851.

The Curetonian Syriac Gospels — Comparative criticism, shows the true character of every document, whether previously known or newly brought to light, which professes to contain the early text of the New Test. By comparative criticism is not meant such a mode of examining authorities as that to which Mr. Scrivener has applied the terms, but such a mode of examining as was intended and defined by the critics in whom the expression was (for convenience sake) introduced: that is, the ascertainment that readings are in ancient documents, or rest on ancient evidence (whether early citations, versions, or MSS.), and then the examination of what documents contain such readings, and thus within what limits the inquiry for the ancient text may be bounded. Thus a document, in itself modern, may be proved to be ancient in testimony: a version, previously unknown, may be shown to uphold a very early text. For purposes of comparative criticism early readings, known to be false, have often as definite a value in the chain of proof as those which are true.

In the process of comparative criticism nothing is assumed, but point after point is established by its own independent testimony: and thus the character of the text of MSS., of ancient versions, and of patristic citations, is upheld by its accordance with facts attested by other witnesses, of known age and certain transmission.

It was reasonable to suppose with Griesbach that the Syriac version must at one time have existed in a form different from that in the common printed text: it was felt by Biblical scholars to be a mere assumption that the name Peshito carried with it some hallowed prestige: it was established that was a groundless imagination that this version, as edited, had been known from the earliest ages: the original monument of Syrian Christianity. Hence if it could be shown that an earlier version (or earlier basis of the same version) had existed, there was not only no a priori objection, but even a demonstrated probability (almost certainty) that this had been the case. When it is remembered how little we know historically of the Syriac versions, it must be felt as an assumption that the form of text common from the fifth century and onward was the original version. In 1848 Tregelles (see Davidson's Introduction to the New Test. Vol. i, p. 420) suggested that the Nitrian MSS. which collated may exhibit perhaps an earlier text.

This was written without any notion that it was an ascertained fact that such a MS. of the Gospels existed, and that the full attention of a thorough Syrian scholar had been devoted to its illustration and publication.

Among the MSS. brought from the Nitrian monasteries in 1842, Dr. Cureton noticed a copy of the Gospels, differing greatly from the common text: and this is the form of text to which the name of Curetonian Syriac has been rightly applied. Every criterion which proves the common Peshito not to exhibit a text of extreme antiquity, equally proves the early origin of this. The discovery is in fact that of the object which was wanted, the want of which had been precisely ascertained.

Dr. Cureton considers that the MS. of the Gospels is of the fifth century, a point in which all competent judges are probably agreed. Some persons indeed have sought to depreciate the text, to point out its differences from the Peshito, to regard all such variations as corruptions, and thus to stigmatize the Curetonian Syriac as a corrupt revision of the Peshito, barbarous in language and false in readings. This preposterous judgment is as reasonable as if the old Latin in the Codex Vercellensis were called an ignorant revision of the version of Jerome. The judgment that the Curetonian Syriac is older than the Peshito is not the peculiar opinion of Cureton, Alford, or Tregelles, or Biblical scholars of the school of ancient evidence in this country, for it has been propounded by excellent authorities, such as Eusebius, and apparently of the late Prof. Bleek.

The MS. contains Matt. i.—viii. 22, x. 21.—xiii. 25, Mark, the four last verses only, John i. 1-42, i. 6.—vii. 37, xiv. 11—22; Luke ii. 48—iii. 16, vii. 33—xx. 21, xvi. 24—xxiv. 41. It would have been a thing of much value if a perfect copy of this version had come down to us; but as it is, we have reason greatly to value the discovery of Dr. Cureton, which shows how truly these critics have argued who concluded that such a version must have existed; and who regarded this as a proved fact, even when not only no portion of the version was known to the translator. The last fourteen chapters of the book of Acts, as they have come down to us in the Peshito, present far more grounds for comment than an equal portion of the Curetonian. The Peshito is a very valuable version, although overpraised by some injudicious admirers, who even if they have read it have never closely and carefully examined it. Many have evidently never looked further than the glosses, even though added by Schlecht's Latin interpretation.

It is very certain that many who profess a peculiar admiration for the Peshito do this earlier from some traditional notion than from any personal acquaintance. They suppose that it has some prescriptive right to the first rank amongst versions, the praise is excellence, which they have not personally investigated, every version except the four Catholic, they do not care to know whether is defective. Every error in translation, every doubtful reading, every supposed defect in the one known MS. of the Curetonian Gospels, has been enumerated by those who wish to deprecate that version, and to detract from the ethical merits of its discoverer and editor. But many of the supposed defects are really the very opposite; and if they similarly examined the Peshito, they might find more fault with it and with

* It is very certain that many who profess a peculiar admiration for the Peshito do this earlier from some traditional notion than from any personal acquaintance. " Perhaps the earliest and most important of all the versions." Alford's Crit. Test. Proleg vol. i. p. 114,
be extant, but also when even the record of its existence was unnoticed. For there is a record showing an acquaintance with this version, to which, as well as to the version itself, attention has been directed by Dr. Cureton. Bar Salibi, bishop of Amidia in the 12th century, in a passage translated by Dr. C. (in discussing the omission of three kings in the genealogy in St. Matthew) says: "There is found occasionally a Syriac copy, made out of the Hebrew, which inserts these three kings in the genealogy; but that afterwards it speaks of fourteen and not of seven generations, because fourteen generations have been substituted for seven by the Hebrews on account of their holding to the septuagint number," etc.\(^{a}\)

It shows then that Bar Salibi knew of a Syriac text of the Gospels in which Abanaziz, Josch, and Amaziz were inserted in Matt. i. 8: there is the same reading in the Curetonian Syriac: but this might have been a coincidence. But in ver 17 the Curetonian text has, in contradiction to ver 8, fourteen generations and not seven: and so had the copy mentioned by Bar Salibi: the former point might be a mere coincidence; the latter, however, shows such a kind of union in contradiction as proves the identity very compellingly. Thus, though this version was unknown in Europe prior to its discovery by Dr. Cureton, it must in the 12th century have been known as a text sometimes found, and as mentioned by the Monophysite bishop, it might be more in use amongst his co-religionists than amongst others. Perhaps, as its existence and use is thus recorded in the 12th century, some further discovery of Syriac MSS. may furnish us with another copy so as to supply the defects of the one happily recovered.

In examining the Curetonian text with the common printed Peshito, we often find such identity of phrase and rendering as to show that they are not wholly independent translations: then, again, we meet with such variety in the forms of words, etc., as seems to indicate that in the Peshito the phraseology had been revised and refined.\(^{b}\) But the great it might be said characteristic difference between the Curetonian and the Peshito Gospels is in their readings: for while the latter cannot in the present state be deemed an unchanged production of the second century, the former bears all the marks of extreme antiquity, even though in places it may have suffered from the introduction of readings current in very early times.

The following are a few of the very many cases in which the ancient reading is found in the Curetonian, and the later or transition reading in the Peshito.

For the general authorities on the subject of each passage, reference must be made to the notes in critical editions of the Greek New Test.

Matt. xvi. 17, τι με ἔρταις πέρι τοῦ ἄγαθον: the ancient reading, as we find in the best authorities, and as we know from Origen; so the Curetonian: τι με λέγης ἄγαθον: the common text with the Peshito. Matt. xx. 22, the clause of the common text, καὶ τὸ βαπτίσμα τὸ ἐγένετο καὶ ἐτέρων (and the corresponding part of the following verse) are in the Peshito; while we know from Origen that they were in his day a peculiarity of St. Mark omitted in the Curetonian with the other best authorities. In fact, except the Peshito and some revised Latin copies, there is no evidence at all extant for the genealogy was not read in the 5th century. Matt. v. 4, 5: here the ancient order of the beatitudes, as supported by Origen, Tertullian, the canons of Eusebius, and Hilary, is that of placing μακάριοι τοῦ πραίσεως, κ. τ. λ. before μακάριοι τῶν πνευμάτων, κ. τ. λ.: here the Curetonian agrees with the distinct testimoniæ for this order against the Peshito. In Matt. i. 18, we know from Irenaeus that the great Hebrew text was not read in the 5th century; and this is confirmed by the Curetonian: in fact, the common reading, however widely supported, could not have originated until ἡ ἀνάρχας χράστος was treated as a combined proper name, otherwise the meaning of τοῦ δὲ ἡ ἀνάρχας χράστος ἡ γένεσις would not be the birth of Jesus Christ," but "the birth of Jesus as the Christ." Here the Curetonian reading is in full accordance with what we know of the second century in opposition to the Peshito. In Matt. vi. 4 the Curetonian omits αὐτῶς: in the same ver. and in ver 6 it omits ἐν τῷ φανερῷ in each case with the best authorities, but against the Peshito. Matt. v. 44, has been amplified by copyists in many extraordinary manner: the words in brackets show the amplifications, and the place which each was taken from which are given hereafter.\(^{c}\)

\(^{a}\) For the Syriac of this part of the passage from Bar Salibi, see Assessment, Bibliotheca Orientalis, ii. 195.

\(^{b}\) A collection of an ancient Syriac MS. of the Gospels Rich, 7157 in the British Museum showed that the Syrian were in the habit of reforming their copies in some respects. The grammatical forms, etc., of this MS. are much more ancient than those of the text of Wulstan, who has been followed by successive editors.

\(^{c}\) This is not a very old MS., but from a copy of the 5th century, and is the only existing example of the early origin of the Syriac text of the New Testament. It was discovered by Dr. E. T. Martin in 1871.
VERSIONS, ANCIENT (SYRIAC)

We know from Jerome that the Hebrew St. Matthew had ἡδονάζω where the Greek has εὐδοκιστάω. We do not find that word here, but we read for both εὐδοκιστάω and σφαίρασις at the end of the verse, ὡς ἂν ἐστὶν τῆς ἡμέρας. This might have sprung from the interpretation, "morrow by morrow," given to ἡμέρα; and it may be illustrated by Old Test. passages, e. g. Num. iv. 3, where ἡμέρα τῆς ἡμέρας is rendered by οὖν ἡμέρα τῶν ἡμερῶν. Those who think that if this Syriac version had been made from St. Matthew's Hebrew, we ought to find ἡμέρα here, forget that a translation is not a verbal transposition.

We know from Eusebius that Hegesippus cited from the Gospel according to the Hebrew, and from the Syriac. Now in a fragment of Hegesippus (Humph. 1. 219), there is the quotation, ἐξαποικισθεὶς ὄντως καὶ ταῦτα διὰ τοῦτο καὶ ταῦτα λέγει, words which might be a Greek rendering from Matt. xiii. 16, as it stands in this Syriac Gospel as we have it, or probably also in the Hebrew work of the Apostle himself. Every notice of the kind is important; and Dr. Cureton, in pointing it out, has furnished students with one of the varied data through which a right conclusion may be reached.

Every extensive investigation, on the part of competent scholars, aids in the proof that the Coptic gospels are an older form than those in the Peshito; that the Peshito is a revision replete with readings unknown in the 2nd century (and often long after); and that the Coptic text possesses the highest critical as well as historical value.

The more the evidence, direct and indirect, is weighed, the more it appears that the Coptic gospels are an older form than those in the Peshito; that the Peshito is a revision replete with readings unknown in the 2nd century (and often long after); and that the Coptic text possesses the highest critical as well as historical value.

the Apocalypse. No other MSS. appear to have yet come to light which contain any of this version beyond the Gospels. From the subscriptions we learn that the text was revised by Thomas with three (some copies say two) Greek MSS. One Greek copy is similarly mentioned at the close of the catholic epistles.

Ridley published, in 1761, an account of the MSS. in his possession, and a notice of this version. He had intended to have edited the text; this was however done by White, at different times from 1778 to 1803. After the publication of the Gospels, three volumes of Adler brought more copies into notice of that part of the Harleian text. From one of the MSS. in the Vatican, St. John's Gospel was edited by Bernstein in 1831. It will be noticed that this version differs from the Peshito, in containing all the seven catholic epistles.

In describing this version as it has come down to us, the text is the first thing to be considered. This is characterized by extreme literalism: the Syriac ideographs are constantly kept to suit the Greek, and everything is in some manner expressed in the Greek phrase and order. It is difficult to imagine that it could have been intended for ecclesiastical reading. It is not independent of the Peshito, the words, etc., of which are often employed. As to the kind of Greek text that it represents, it is just what might have been expected in the 4th century. The work of Thomas in the text itself is seen in the introduction of ὁ δὲ, by which passages which he rejected were condemned; and of ὅτε ἄλλοθι, with which his insertions were distinguished. His model in all this was the Hexaplar Greek text. The MSS. which were used by Thomas were of a different kind from those employed in making the version; they represented in general a much older and purer text. The margin of the Harleian recension contains (like the Hexaplar text of the LXX.) readings, mostly apparently from the Greek MSS. used. It has been questioned whether these readings are not a comparison with the Peshito: if any of them are so, they have probably been introduced since the time of Thomas. It is probable that the Philoxenian version was very literal, but that the older adaptation to the Greek is the work of Thomas; and that his text thus bore about the same relation to that of Philoxenos as the Latin Bible of Arius Montanus does to that of his predecessor Pagninus. For critical criticism this version is a good authority as to the text of its own time, at least where it does not merely follow the Peshito. The amplifications in the margin of the book of Acts bring a MS. used by Thomas into close comparison with the Codex Bezae. One of the MSS. of the Gospels sent to Ridley contains the Harleian text, with some revision by Bar Sahib.

C. Syriac Versions of Portions wanting in the

—1. The second Epistle of Peter, the second and third of John, and that of Jude. The fact has been already noticed, that the Old Syriac Version did not contain these epistles. They were published by Pococke in 1630, from a MS. in the Bodleian. The version of these epistles so often agrees with that which we have in the Harklean reception, that the one is at least dependent on the other. The suggestion of Dr. Davidson (Biblical Criticisms, ii. 191), that the text of Pococke is that of Philoxenos before it was revised by Thomas, seems most probable. But if it is objected, that the translation does not show as great a knowledge of Greek as might have been expected in the translation of the rest of the Philoxenian, it must be remembered that here he had not the Peshito to aid him.

In the Paris Polyglott these epistles were added to the Peshito, with which they have since been commonly printed, although they have not the slightest relation to that version.

4. The Apocalypse. — In 1627 De Dieu edited a Syriac version of the Apocalypse, from a MS. in the Leyden Library, written by one "Caspar from the land of the Indians," who lived in the latter part of the 16th century. A MS. at Florence, also written by this Caspar, has a subscription stating that it was copied in 1582 from a MS. in the writing of Thomas of Harkel, in a. d. 622. If this is correct, it appears that Thomas by himself would have been but a poor translator of the N. T. This subscription seems to be of doubtful authority; and until the Rev. B. Harris Cooper drew attention to a more ancient copy of the version, we might well be somewhat uncertain if this were really an ancient work. It is of small critical value, and the MS. from which it was edited is incorrectly written. It was in the MS. which Archbishop Ussher sent as a present to De Dieu in 1621, in which the whole of the Syriac N. T. is said to have been contained (of what version is unknown), that having been the only complete MS. of the kind described; and of this MS., in comparison with the text of the Apocalypse printed by De Dieu, Ussher says, "the Syriac lately set out at Leyden may be amended by my MS. copy," in the Philox. Res. i. 196, note.) This book from the Paris Polyglott and onward, has been added to the Peshito in this translation. Some have erroneously called this Syriac Apocalypse the Philoxenian, a name to which it has no title: the error seems to have originated from a verbal mistake in an old advertisement of Greenfield's edition (for which he was not responsible), which said "the Apocalypse and the Epistles not found in the Peshito, are given from the Philoxenian version."

III. The Syriac Version of John viii. 1-11. — From the MS. sent by Archbishop Ussher to De Dieu, the latter published this section in 1631 what was previously wanting; or the rehers, including such parts! It seems strange if this section of St. John stood in its own. This makes it seem as if the interpretation given above were the true one. Ussher's own description is this: "I have received the parcels of the N. T. [in Syriee] which hitherto we have wanting in the printed book. The text of the Apocalypse is apparently all found in No. 17, 127, a commentary upon the book of the 17th century. This also seems to be of the same text as the printed ditton."
FROM DE BILAN IT WAS INSERTED IN THE LONDON YOUTH, WITH A REFERENCE TO USHER'S MS., AND HENCE IT HAS PASSED WITH THE OTHER EDITIONS OF THE TEXT, WHERE IT IS A MORE INTERPRETATION.

A COPY OF THE SAME VERSION IS ESSENTIALLY FOUND IN RUTLEDGE'S MOLLERA, WHERE IT IS ATTRIBUTED TO MARAS, A.D. 622: ADEL FOUNDED IT ALSO IN A PARIS MS. AScribed TO ABHAS MAR PAUL.

D. THE JERUSALEM SYRIAN LECTIONARY.

THE MS. IN THE VATICAN CONTAINING THIS VERSION WAS PRETTY FULLY DESCRIBED BY S. E. ASEMANN IN 1750, IN THE CATALOGUE OF THE MSS. BELONGING TO THAT LIBRARY; BUT SO FEW COPIES OF THAT WORK ESCAPED DESTRUCTION BY FIRE, THAT IT WAS VIRTUALLY UNPUBLISHED, AND ITS CONTENTS ALMOST UNKNOWN. ADEL, WHO AT COPENHAGEN HAD THE ADVANTAGE OF STUDYING ONE OF THE FEW COPIES OF THIS CATALOGUE, DREW A PUBLIC ATTENTION TO THIS UNUSUAL DOCUMENT IN HIS ACCEP-

Uebersehr seiner biihdischkritischen Reise nach Roma, pp. 118-127 (ALBOM, 1783), AND STILL FURTHER, IN 1789, IN HIS VALUABLE EXAMINATION OF THE SYRIAC VERSIONS. THE MS. WROUGHT IN A D. 1390, IN PECCULIAR SYRIAC WRITING; THE PORTIONS ARE OF COURSE THOSE FOR THE DIFFERENT FESTIVALS, SOME PORTIONS OF THE GOSPELS NOT BEING THERE AT ALL. THE DIALECT IS NOT COMMON SYRIAC; IT WAS DERIVED FROM A SYRIAC QURIN, FROM ITS BEING SUPPOSED TO RESEMBLE THE JERUSALEM TALMUD IN LANGUAGE AND OTHER POINTS. THE GRAMMAR IS PECCULAR; THE FORMS ALMOST CHALDEE RATHER THAN SYRIAC; TWO CHARACTERS ARE USED FOR EXPRESSING F AND P.

FOR CRITICAL PURPOSES THIS LECTIONARY HAS A HIGHER VALUE THAN IT HAS FOR ANY OTHER: ITS READINGS OFTEN COINCIDE WITH THE OLDEST AND BEST AUTHORITIES. IT IS NOT YET KNOWN AS TO ITS ENTIRE TEXT; FOR EXCEPT A SMALL SPECIMEN, NO PART HAS BEEN PRINTED: ADEL, HOWEVER, SELECTED LARGE NUMBERS OF READINGS, WHICH HAVE BEEN COMMONLY USED BY CRITICS FROM THAT TIME AND ONWARD. IN ADEL'S OPINION ITS DATE AS A VERSION WOULD BE FROM THE 4TH TO THE 6TH CENTURY; BUT IT CAN BARELY BE SUPPOSED THAT IT IS OF SO EARLY AN AGE, OR THAT ANY SYRIANS THEN COULD HAVE HAD SUCH A DIALECT. IT MAY RATHER BE SUPPOSED TO BE A TRANSLATION MADE FROM A GREEK LECTIONARY, NEVER HAVING EXISTED AS A SUBSTANTIVE TRANSLATION; TO WHAT AGE ITS EXECUTION SHOULD BE ATTRIBUTED SEEMS WHOLLY UNCERTAIN. (A FURTHER ACCOUNT OF THE MS. OF THIS VERSION, DROWN UP FROM A COMPLEMENT OF ASEMANN'S DESCRIPTION IS IN THE VATICAN CATALOGUE, AND THAT OF ADEL, WITH THE MS. ITSELF IN THE VATICAN LIBRARY, MADE BY THE PRESENT WRITER, IS GIVEN IN HORNE'S Introdc. IV. 284-287, WHERE, HOWEVER, "JERUSALEM TARGUM" TWICE STANDS FOR "TALMUD").

IT APPEARS, FROM THE STATEMENT OF DR. CERIINI OF MILAN, THAT THE MS. "MOLINAE" [MINSINCDUSHI] HAS MET WITH A MS. OF THIS LECTIONARY, AND THAT HE HAS HAD THE INTENTION OF PUBLISHING IT. [IT WAS PUBLISHED IN VENICE IN 1861-64 BY COUNT MINISINCDUSHI-ERIZO, IN 2 VOLS. 4TO, THE FIRST CONTAINING THE TEXT, WITH A LATIN VERSION; THE SECOND STORIES AND Glossary. ACCORDING TO DAVIES

for which he is also reported to have fixed the Sabbath, the Mondays and Thursdays — the two latter the market and law-days, when the villagers came to town — of every week (Jer. Meg. 1:12; bitmap Kama, 82 a). The gradual development of the pure Hebrew vernacular, among the multitude at least, may be accounted for in many ways. The Mishnah very strikingly points out, among the characteristics of the long sojourn of Israel in Egypt, that they neither changed their language, nor their names, nor the shape of their garments, during all that time. The bulk of their Deut-

unquestionably, as it were, in the small province of Goshen, almost exclusively reduced to intercourse with their own race and tribes, devoted only to the pasture of their flocks, and perhaps to the tillage of their soil — were in a condition infinitely more favorable for the retention of all the signs and tokens of their nationality than were the Babylonian captives. The latter, scattered up and down the vast empire, seem to have enjoyed everywhere full liberty of intercommunication with the natives — very similar in many respects to themselves — to have been utterly unrestrained in the exercise of every profession and trade, and even to have risen to the highest offices of state; and thus, during the comparatively short space, they struck root so firmly in the land of their exile, that, when they were, on the whole, both to return to the Land of Promise, what more natural than that the immigrants under Zerubbabel, and still more those who came with Ezra — several generations of whose ancestors had been settled in Babylon — should have brought back with them the Aramaic, if not as their vernacular, at all events as an idiom with which they were perfectly familiar, and which they may partly have continued to use as their colloquial language in Palestine; as, in fact, they had had to use it in Babylonia? Continuing later immigrations from the "Captive" did not fail to reinforce and further to spread the use of the same tongue. All the decrees and official communications addressed to the Jews in Persia and elsewhere were in Aramaic (Ezr. Neh. penaius); Judaea being considered only as part of the Syrian satrapy. Nor must it be forgotten that the old colonies in Palestine (2 K. xviii. 24) were Samaritans, who had come from "Aram and Babylon," and who spoke Chaldee; that intermarriages with women from Ashdod, Ammon, and Moab had been common (Neh. xiii. 28); that Phoenicians, whose merchants (Tyrians, Neh. xiii. 18) appear to have settled in Palestine, and to have established commercial relations with Judaea and Galilee, contains large elements of Chaldee in its own idiom. Thus it came to pass that we find in the book of Daniel, for instance, a somewhat forced Hebrew, from which, as it would seem, the author

\[\text{Ezra,}\] on leaving Babylon, made it like unto sure base "םהינמ תולולש (8).\]
gladly lapes into the more familiar Aramaic (comp. ii. 4, etc.); that oracles were received by the highpriests Johnan and Simon the Just (Ezek. xliii), in the Holy Language (Targum) of Holies (during the Syrian wars) in Aramaic (Sotah, 33, a); and that, in short, some time before the Hasmonian period, this language was in which were conveyed not only popular sayings, proverbs, and the like.

Beres. R. 167 d; Tanach. 17 a; Midr. Tchith. 23 d; 51 f, etc., etc., but official and legal documents (Mishna Ketub. 4, 8; Tosseiah Sabah. c. 8; Eduith, 8, 4, c. 130 n. c.), even certain prayers — of Babylonian origin probably — and in which books destined for the great mass of the people were written. That, indeed, the Hebrew Language — the language of Genesis (Ex. xix. 18), or Jehovah (2 K. xviii. 23, 28; Is. xxxvi. 11) of the Bible — became more and more the language of the few, the learned, the Holy Language

, or, still more exactly, the Language of the Temple, set aside almost exclusively for the holy service of religion: it is the Divine Law and the works in which this was contained (like the Mishna, the B Noticed, etc.); the old Master-rabbinic, and very many portions of the Talmud, and the correspondence between the different academies (witness the Hebrew letter sent from Jerusalem to Alexandria about 100 n. c., Meg. Jer. ii. 2) of it. The sacred worship itself in Temple and synagogue, which was almost entirely carried on in pure Hebrew.

If the common people thus gradually had lost all knowledge of the tongue in which were written the books to be read to them, it naturally followed (in order "that they might understand them") that a recitance must be had to translation into the idiob with which they were familiar — the Aramaic. That further, since a bare translation could not in all cases suffice, it was necessary to add to the translation an explanation, more particularly of the more difficult and obscure passages. Both translation and explanation were designated by the term Targum. The course of time there was a special guild, whose special office it was to act as interpreters in both senses (Meturgemon a), while formerly the learned alone volunteered their services. These interpreters were subjected to certain bonds and regulations as to the form and substance of their renderings. Thus (comp. Mishna Meg. pos. 1. 1; mass. Sofer. xi. 1; Maimon. Hilch. Tephil. 12, § 11 f.; Orach Chaj. 145, 1, 2), "neither the reader nor the interpreter are to raise their voices one above the other;" "they have to wait for each other until each have finished its verse;" "the Meturgemon is not to lean against a pillar or a beam, but stands and with the feet and with reverence;" "he is not to use a written Targum, but he is to deliver his translation after voice" — lest it might appear that he was reading out of the Torah itself, and thus the Scriptures be held responsible for what are his own dicta; "no more than one verse in the Pentateuch, and three in the Prophets [a greater license is given for the book of Esther]: it shall be read and translated at a time;" "that there should be not more than one reader and one interpreter for the Law, while for the Prophets one reader and one interpreter, or two interpreters, are allowed," etc. (comp. I Cor. xiv. 21 f.; xii. 27; 28).

Again (Mishna Meg. and Tosseiah, ad loc.), certain passages liable to give offense to the multitude are specified, which may be read in the synagogue and translated; others, which may be read but not translated; others, again, which may neither be read nor translated. To the first class belong the account of the Creation — a subject not to be discussed publicly, on account of its most vital bearing upon the relation between the Creator and the kingdom; and the narrative of both: the deed of Lot and his two daughters (Gen. xxxi. 31); of Judah and Tamar (Gen. xxxix.); the first account of the making of the golden calf (Ex. xxxii.); all the curses in the Law; the deed of Amnon and Tamar (2 Sam. xiii.); the story of Absalom with his father's concubines (2 Sam. xvi. 22); the story of the woman of Gil-ead (Judg. xix.); These are to be read and translated — being mostly deeds which carried their own punishments with them. To be read but not translated are the deed of Reuben with his father's concubine (Gen. xxxvi. 22); the latter portion of the story of the golden calf (Ex. xxxiii.); the beneficiary of the priests (on account of its awful nature). And neither to be read nor translated are the deed of David and Bathsheba (2 Sam. xi. and xii.), and according to one of the story of Amnon and Tamar (2 Sam. xiii.). (Both the latter stories, however, are, in Mishna Meg. iv. 10, enumerated among those of the second class, which are to be read but not translated.)

Altogether these Meturgemanim do not seem to have been held generally in very high respect; one of the reasons being probably that they were paid (two Sechita at one time, according to Midr. R. Gen. 98), and thus made (what P. Albo especially inveighs against) the Torah "a spade to dig with." "No sign of blessing" it was said, moreover, "could rest upon the profit they made by their calling; since it was money earned on the Sabath." (Yes. 4 b). Persons unfit to be readers, as those

a "The youths who went to consult at Antioch have been victorious."

b "Perished has the army which the enemy thought to lead against the Temple."

c Introduction to the Haggadah for the Peschach (לｼﾞי ™א), "Such was the bread of misery which our fathers ate in the land of Mizraim. Whoever is needy, he come and eat with us; whoever is in want, he come and celebrate the Peschach. This year here, next year in the land of Israel; this year slaves, next year free men." The Kaddish, to which afterwards a certain signification as a prayer for the dead was given, and which begins as follows: "Let there be magnified and sanctified the Great Name in the world which He has created according to His will, and which He rules as His kingdom, during your life and your days, and the life of the whole house of Israel, speedily and in a near time, and say Amen: Be the Great Name praised for ever and evermore." c Meg. 25 a; Meg. 52 b, midr.
whose clothes were so torn and ragged that their limbs became visible through the rents (דִּלֶּשׁ), their appearance thus not corresponding to the reverence due to the Sacred Word itself, or blind men, were admitted to the office of a Meturgeman: and, apart from these, there being the slightest authority attached to their interpretations, they were liable to be stopped and silenced, publicly and ignominiously, whenever they seemed to overstep the bounds of discretion. At what time the regulation that they should not be under fifty years of age (in odd reference to the "men of fifty," Is. iii. 2, mentioned in Judas. 44, 2) came into use, we are not able to decide. The Mishna certainly speaks even of a minor (under thirteen years) as being allowed both to read and to act as a Meturgeman (comp. Mishna Meg. passim). Altogether they appear to have borne the character of empty-headed, fantastical fools. Thus Midr. Koh. has to Exod. vii. 5: "It is better to hear the rebuke of the wise:"—these are the preachers (Parashahim)—"than for a man to hear the song of fools:"—these are the Meturgemanim, who raise their voices in song-song: (דִּלֶּשׁ or with empty faces:)—"that the people may hear," And to ix. 17: "The words of wise men are heard in quiet:"—these are the preachers (Parashahim)—"more than that ringleader among fools:"—these are the Meturgemanim who stand above the congregation. And though both passages may refer more especially to those Meturgemanim (Emorars, speakers, expounders) who at a later period stood by the side of the Chochamim, or president of the Acardew, the preacher (כָּלַע) himself seated on a raised dais, and repeated with a loud voice, and enlarged upon what the latter had whispered into their ear in Hebrew (דִּלֶּשׁ וְלָשׁוֹן הָעַבְדֵּים), comp. Matt. x. 27, "What ye hear in the ear, that preach ye upon the housetops," yet there is an abundance of instances to show that the Meturgeman at the side of the reader was exposed to rebukes of nature, and is spoken of in a manner, not likely to be employed towards any but men low in the social scale. A fair notion of what was considered a proper Targum may be gathered from the remarks prefixed by the Fabric (pp. 49, 50). Whosoever translates [as Meturgeman] a verse in its closely exact form [without proper regard to its real meaning] is a leir, and whosoever adds to it is impious and a blasphemer, e. g., the literal rendering to Chaldee of the verse, "They saw the glory of the God of Israel (Ex. xxv. 10), is as wrong a translation as "They saw the angel of God," the proper rendering being "They saw the glory of the God of Israel." [Comp. Sam. Pent. p. 2812 b.] Other instances are found in the Mishna (Meg. iv. 8): "Whosoever renders the text (Lev. xviii. 21): And thou shalt not let any of thy seed pass through the fire to Moloch," by "Thou shalt not give thy seed to be carried over to heathenism (or to an Aramean woman):" [L. e., as the Gemara, Mid bart., Jer. Sanh. 9, and Sifri on Deut. xviii. 10, explain it, one who marries an Aramean woman: for although she may become a proselyte, she is yet sure to bear enemies to him and to God, since the mother will in the end carry his children over to idolatrous worship] as also be who enlarges upon (or figuratively explains) the sections relative to incest (Lev. xviii.)—he shall forthwith be silenced and publicly rebuked."

Again (comp. Jer. Jer. v. 1; Meg. iv. 10), "Those who translate 'O my people, children of Israel, as I am merciful in heaven, so shall ye be merciful on earth:'—'O Eve or iv., and her young ye who shall not live in one day' (Lev. xxii. 28): they do not well, for they represent the Laws of God (whose reasons no man dare try to fathom) as mere axioms of mercy:"—and, it is added, "the short-sighted and the frivolous will say, 'Lo! to a bird's nest He extends his mercy, but not to yonder miserable man...'"

The same comes which, in the course of time, led to the writing down—after many centuries of oral transmission—of the whole body of the Traditional Law, the very name of which (דִּלֶּשׁ וְלָשׁוֹן הָעַבְדֵּים, "oral law," in contradistinction to מִשְׁכָּב הָעָבְדֵּים, or "written law") seemed to imply that it should never become a fixed, immutable code, engendered also, and about the same period, as it would appear, written Targums: for certain portions of the Bible, at least.

The fear of the adulterations and mutilations which the Divine Word— amid the troubles within and without the commonwealth—must undergo at the hands of an artful or ignorant or embittered author, broke through the rule, that the Targum should only be oral, lest it might acquire undue authority (comp. Mishna Meg. iv. 5, 19; Tosita, ibid. 3; Jer. Meg. 4. 1; Bab. Meg. 24 a; Sota, 39 b). Thus, if a Targum of Job is mentioned (Sab. 115 a; Tr. Sotierin. 5. 15; Tosita Sab. c. 14; Jer. Sabh. 10, 1) as having been highly disapproved by Ga-

march the Elder (middle of first century, A. D.), who caused it to be hidden and buried out of sight: we find, on the other hand, at the end of the second century, the practice of reading the Targum generally commenced, and somewhat later Jehovah ben Levi enjoins it as a special duty upon his sons. The Mishna even contains regulations about the manner (Exad. iv. 5) in which the Targum is to be written, and if in the written, and if we may presume, authoritatively approved form, the Tar-
gums were of comparatively small weight, and of no canonical value whatsoever. The Sabbath was not to be broken for their sake as it was lawful to do for the Scripture in the original Hebrew (Sab. 115 n). The Targum does not define the hands (for the purpose of touching consecrated food) as do the Chaldee portions of Ezra and Nehemiah (Yad. iv. 5).

The gradual growth of the Code of the written Targum, such as now embraces almost the whole of the O. T., and contains, we may presume, but few snatches of the primitive Targums, is shrouded in deep obscurity. We shall not fail to indicate the opinions arrived at as to the date and author-
ship of the individual versions in their due places; but we must warn the reader beforehand, that no positive results have been attained as yet, save that nearly all the names and dates ketherto commonly (of chaps. xxv. and xxvi.), were originally left untranslated. Sandia in a similar manner uses the formulas מִשְׁכָּב הָעָבְדֵּים or מִשְׁכָּב הָעָבְדֵּים in repetitions.
VERSIONS, ANCIENT (TARGUM) 3399

attached to them must be rejected. And we fear that, as long as at least the Targum shares the fate of the LXX., the Samaritan Pentateuch, the Midrash, the Talmud, etc.: namely, that a really critical edition remains a thing occasionally dreamt of, but never attempted,—so long must we abandon the hope of getting any nearer a final solution of this and many other still more important questions. The utter corruption, moreover, of the Targum, litterly complained of already by Elias Levi (an author, be it observed, of very moderate attainments, but absurdly overrated by certain of his contemporaries, and by those who copied his usually shallow dicta without previous examination), debars us from more than half its use. And yet how fertile its study could be: what light it might be made capable of throwing upon the Bible itself, upon the history of the earliest development of Biblical studies, versions, and upon the Midrash—both the Halacha and Haggarah—the snatches of which, in their, as it were, liquid stases, lie embalmed in the Targums: all this we need not urge here at length.

Before, however, entering into a more detailed account, we must first dwell for a short time upon the Midrash itself, of which the Targum forms part.

The centre of all mental activity and religious action among the Jewish community, after the return from Babylon, was the Scriptural Canon collected by the Soferim, or men of the Great Synagoge. These formed the chief authority on the civil and religious law, and their authority was tested in the Pentateuch. Their office as expositors and commentaries of the Sacred Records was twofold. They had, firstly, to explain the exact meaning of such prohibitions and ordinances contained in the Mosaic Books as seemed not explicit enough for the multitude, and the precise application of which in former days had been forgotten during the Captivity. Thus, e. g., general terms, like the word forbidden on the Sabbath, were by them specially and particularized: not indeed according to their own arbitrary and individual views, but according to tradition traced back to Sinai itself. Secondly, laws neither specially contained nor even indicated in the Pentateuch were inaugurated by them according to the new wants of the times and the ever-changing necessities of the growing commonwealth (Gezroth, Teknomoth). Nor were the latter in all cases given on the sole authority of the Synod; but they were in most cases traditional, and certain special letters or signs in the Scriptures, seemingly superfluous or out of place where they stood, were, according to fixed hermeneutical rules, understood to indicate the inhibitions and prohibitions (tesdorim, "Fences"), newly issued and fixed. But Scripture, which had for this purpose to be studied most minutely and unerringly—the most careful and scrutinizing attention being paid even to its outward form and semblance—was also used, and made especially in its non-legal, prophetic parts, for homiletic purposes, as a wide field for lectures, sermons, and homiletic discourses, both in and out of the synagogue: at every solemnity in public and private life. This juridical and homiletical expounding and interpreting of Scripture—the genus of both of which are found still closely intertwined and bound up with each other in the Targum—is called deresh, and the avalanche of Jewish literature which began silently to gather from the time of the return from the exile and went on rolling unerringly—however dread the events which befall the nation—until about a thousand years after the destruction of the Second Temple, may be comprised under the general name Midrash—"expounding." The two chief branches indicated are, Holochab (מִלְכָּה), the rule by which to go, as binding, authoritative law; and Haggarah (מִלְכָּה, "to say")—meaning, legend, flights of fancy, shufing up from the Divine Word. The Holochab, treating more especially the Pentateuch as the legal part of the O. T., bears towards this book the relation of an amplified and annotated code: these amplifications and annotations, be it well understood, not being new laws, formerly unheard of, deduced in an arbitrary and fanciful manner from Scripture, but supposed to be simultaneous oral revelations hinted at in the Scripture, or in any case representing an unerring explanation of Divine interpretation, handed down through a more authority (Kaddisha, Shemota—"something received, heard"). The Haggarah, on the other hand, held special sway over the whole field of ethical, poetical, prophetical, and historical elements of the O. T., but was free even to interpret its legal and historical passages metaphorically and allegorically. The whole Bible, with all its times and colors, belonged to the Haggarah, and this whole Bible she transformed into an endless series of themes for her most wonderful and capricious variations. "Prophetess of the exiles," she took up the fallen verse, word, or letter, and, as the Holochab pointed out in it a special authority, she, by a most ingenious exegetical process of her own, showed to the wonder-struck multitude how the word events under which they then groaned were hinted at in it, and how in a manner it predicted even their future issue. The aim of the Haggarah being the purely momentary one of elevating, comforting, edifying its audience for the time being, it did not pretend to possess the slightest authority. As its method was capricious and arbitrary, it was its custom to point not at one, but at each one whose heart prompted him. It is sua, tale, gnome, parable, allegory, poetry, in short, of its own most strange kind, springing up from the sacred soil of Scripture, wild, luxuriant, and tangled, like a primeval tropical forest. If the Holochab used the Scriptural word as a last and most awful resort, against which there was no further appeal, the Haggarah used it as the golden nail on which to hang its gaudy tapestry: as introduction, refrain, text, or fundamental stanza for a gloss; and if the former was the iron bulwark around the nationality of Israel, which every one was ready at every moment to defend to his last breath, the latter was a maze of flowery walks within those fortresses. But gradually the Haggarah overpondered and became the Midrash kan 'igyot of the people, is not surprising. We shall notice

* א. ו. ג. (Amb. מִלְכָּה), first used in 2 Chr. 34. 23, xxiv. 27; "Commentary," in the sense of the 'arcs ' Commentaries," enlargement, embellishment, complement, etc. (A. V. story 2). The compilers of Chronicles seem to have used such promiscuous works treating of Biblical personages and events, provided they continued aught that served the tendency of the book
now each successive Targum became more and more ingegnate with its essence, and from a version became a succession of short homilies. This difference between the two branches of Midrash is strikingly pointed in the following Talmudical story:—R. Chia b. Abb. Abha, a Halachist, and R. Abbah, a Haggadist, once came together into a city and preached. The people flocked to the latter, while the former's discourses remained without a hearer. Thereupon the Haggadist comforted the Halachist with a parable. Two merchants come into a city and spread their wares—the one rare pearls and precious stones; the other a ribbon, a ring, glittering trinkets: around whom will the multitude throng?... Formerly, when life was not yet bitter labor, the people had leisure for the deep word of the Law; now it stands in need of comforts and blessings. The first collections of the Hakhotah—embracing the whole field of juridico-political, religious, and practical life, both of the individual and of the nation: the human and Divine law to its most minute and insignificant details—were instituted by Hilkil, Akila, and Simon B. Gamaliel; but the final redaction of the general code, Mišna, to which the latter Toseftah and Daynitha form supplements, is due to Jehudah Hammaasi in 220 a. d. Of an earlier date with respect to the contents, but committed to writing in later times, are the three books: Ṣifri, or Torah Kohanim (an amplification of Levitical, Ṣifri (of Numbers and Deuteronomy), and Mechiṭṭa (a portion of Exodus). The masters of the Mishnaic period, after the Soferim, are the Tannaim, who were followed by the Amora'im. The discussions and further amplifications of the Mishna by the latter, form the Gemara (Complement), a work extant in two reductions, namely, that of Palestine or Jerusalem (middle of 4th century), and of Babylon (6th century A. D.), which, together with the Mishna, are comprised under the name Talmud. Here, however, though the work is ostensibly devoted to Hakhotah, an almost equal share is allowed to Haggadah. The Haggadistic mode of treatment was threefold: either the simple understanding of words and things (Peshat) or the homiletic application, holding up the mirror of Scripture to the present life, or the mystic interpretation (Sod), the second of which chiefly found its way into the Targum. On its minute division into special and general, ethical, historical, esoteric, etc., Haggadah, we cannot enter here. Suffice it to add that the most extensive collections of it which have survived are Midrash Rashid (Commenced about 700, concluded about 1100 A. D.), comprising the Pentateuch and the five Megillot, and the Pešitka (about 200 A. D.), which contains the most complete cycle of Pericopes, but the very existence of which had until lately been forgotten, surprisingly enough, through the very extracts made from it (Jalkut, Pešitka Rabbi Ḥabi, Sūtara, etc.).

From this indispensable digression we return to the subject of Targum. The Targums now extant are the former discourses recovered and preserved by the five Targumim of the Pentateuch, known as that of Jethro, the five Megillot, and the Pesikta, known as that of Jonathan Ben-Uzzziel.

I. Targum on the Pentateuch, known as that of Onkelos.

II. Targum on the first and last propheta, known as that of Jonathan Ben-Uzzziel.

III. Targum on the Pentateuch, likewise known as that of Jonathan Ben-Uzzziel.

IV. Targum on portions of the Pentateuch, known as Targum Jerusalem.

V. Targum on the Haggeographa, ascribed to Joseph the Blind, namely—

1. Targum on Psalms, Job, Proverbs.

2. Targum on the five Megillot (Song of Songs, Ruth, Lamentations, Esther, Ecclesiastes).

3. Two (not three, as commonly stated) other Targums to Esther: a smaller and a larger, the latter known as Targum Shen, or Second Targum.

VI. Targum to Chronicles.

VII. Targum to Daniel, known from an unpublished Persian extract, and hitherto not received among the number.

VIII. Targum on the Apocryphal pieces of Esther.

We have hinted before that neither any of the names under which the Targums hitherto went, nor any of the dates handed down with them, have stood the test of recent scrutiny. Let it, however, not for a moment be supposed that a skeptic Welsh school has been at work, and with hypercritical and wanton malice has tried to annihilate the hallowed names of Onkelos, Jonathan, and Joseph the Blind. It will be seen from what follows that most of these names have or may have a true historical foundation and meaning; but uncrirical ages and ignorant scribes have perverted this meaning, and a succession of most extraordinary misreadings and strangest Ṣefi'ot and Ṣoneth—some even of a very modern date—have produced rare confusion, and a chain of assertions which dissolve before the first steady gaze. That, notwithstanding all this, the implicit belief in the old names and dates still reigns supreme will surprise no one who has been accustomed to see the most striking and undeniable results of investigation and criticism quietly ignored by contemporaries, and forgotten by generations which followed, so that the same work had to be done very many times over again before a certain fact was allowed to be such.

We shall follow the order indicated above:

I. The Targum of Onkelos.

It will be necessary, before we discuss this work itself, to speak of the person of its reputed author as far as it concerns us here. There are few more contested questions in the whole province of Biblical, nay general literature, than those raised on this head. Did Onkelos ever exist? Was there more than one Onkelos? Was Onkelos the real form of his name? Did he translate the Bible at all, or part of it? And is this Targum the translation he made? Do the dates of his life and this Targum tally, etc., etc. The ancient accounts of Onkelos are awfully of the most corrupted and confused kind; so much so that both ancient and modern investigators have failed to reconcile and amend them so as to gain general satisfaction, and opinions remain widely divergent. This being the case, we think it our duty to lay the whole—not very voluminous—evidence, collected both from the body of Talmudical and post-Talmudical (so called Rabbinical) and patristic exactly with Talmud (from frame, "to learn"); and Targum (from hara, "to teach"); all three terms meaning "the study," by way of eminence.
writings before the reader, in order that he may judge for himself how far the conclusions to which we shall point may be right.

The first mention of "Onkelos" — a name variously derived from Niccolus (Geiger), "Orphus, vauzod [sic] (Reaum), Homocllus, Auuclaus, etc. — more fully "Onkelos the Proselyte," is found in the Tosefta, a work drawn up shortly after the Mishna. Here we learn that "Onkelos the Proselyte" was so serious in his adherence to the newly-adopted (Jewish) faith, that he threw his share in his paternal inheritance into the Dead Sea (Tos. Demai, vi. 9). (2.) At the funeral of Gamaliel the elder (1st century A. D.) he burnt more than 70 mina worth of spices in his honor (Tos. Shabb. 8). (3.)

This same story is repeated, with variations (Tos. Semach 3). (4.) He is finally mentioned, by way of corroboration to different Halaclus, in connection with Gamaliel, in three more pieces, which complete our references from the Tosefta (Tos. Mikt. 6, 1; Kelim, iii. 2, 2; Chag. 3, 1).

The Babylonian Talmud, the source to which we turn our attention next, mentions the name Onkelos four times: (1.) As "Onkelos the Proselyte, the son of Kalonymos" ("Calianeus?" Clemen? i.), the son of Titus's sister, who, intending to become a convert, burned up the ghastly glories of Titus, Balaban, and Cesar [the latter name is derived from Caesar]. (2.) In Baba Bathra 99 a (Demai), "Onkelos the Proselyte" is quoted as an authority on the question of the form of the Cherubim. And (4.) The most important passage — because on it and alone, in the wide realm of ancient literature, has been founded the general belief that Onkelos is the author of the Targum now current under this name — is found in Meg. 3: 1. It reads as follows: "R. Jeremiah, and, according to others, R. Chia bar Abba, said: The Targum to the Pentateuch was made by the 'Proselyte Onkelos,' from the mouth of R. Eleazar and R. Jehoshua; the Targum to the Prophets was made by Jonathan ben Uziel from the mouth of Haggai, Zechariah, and Malachi. When we have not been taught that the Targum existed from the time of Ezra... Only that it was forgotten, and Onkelos restored it." No mention whatever is to be found of Onkelos either in the Jerusalem Talmud, reduced about a hundred years before the Babylonian, nor in the Church fathers — an item of negative evidence to which we shall presently draw further attention. In a Midrash, which has not been published about the middle of the 12th century, we find again "Onkelos the Proselyte" asking an old man, "Whether that was all the love God bore towards a proselyte, that He promised to give him bread and a garment? Wherupon the old man replied that this was all for which the Patriarch and Abraham [Gen. xxii. 20] asked."

"The R. Zohar, of late and very uncertain date, makes "Onkelos" a disciple of Hillel and Shamai. Finally, a MS., also of a very late and uncertain date, relates of "Onkelos, the nephew of Titus" that he asked the emperor's advice as to what merchandise he thought it profitable to trade in. The emperor told him that that should be bought which was cheap in the market, since it was sure to rise in price. Whereupon Onkelos went on his way. He repaired to Jerusalem, and studied the Law under R. Eleazar and R. Jehoshua, and his fame became wide. When he returned to the court, one of the courtiers observed the puller of his con- tentence, and said to Titus, "Onkelos appears to have studied the Law." Interrogated by Titus, he admitted the fact, adding that he had done it by his advice. No nation had ever been so excited, and none was now held cheaper than Israel: "Therefore," he said, "I concluded that in the end none would be of higher price."

This is all the information to be found in ancient authorities about Onkelos and the Targum which bears his name. Surprisingly enough, the latter is well known to the Babylonian Talmud (whether to the Jerusalem Talmud is questionable) and the Midrashim, and is often quoted, but never once as Targum Onkelos. The quotations from it are invariably introduced with a נֵּיִם מַעְרָכָה, "As we [Babylonians] translate," and the version itself is called (e. g. Koldusch. 49 a) יַעֲשֵׂה בָּם, "Our Targum," exactly as Ephraim Syrnis (Opp. i. 390) speaks of the Peshito as "Our translation."

Yet we find on the other hand another current version invariably quoted in the Talmud by the name of its known author, nämlich, לְבַּעַר קְנַיִם, "the [Greek] Version of Akivas:" a circumstance which, by showing that it was customary to quote the author of the name, exclusively as to the translation of Onkelos, to the Targum of Onkelos. Still more surprising, however, is, as far as the person of Onkelos is concerned (whatever be the discrepancies in the above accounts), the similarity between the incidents related of him and those related of Akivas. The latter (לְבַּעַר קְנַיִם, לְבַעַר כְּנַיִם) is said, both in Sirin (Lev. xxx. 7) and the Jerusalem Talmud (Demai, xxvii. 6), to have been born in Pontus, to have been a proselyte, to have thrown his paternal inheritance into an asphalt lake (T. Jer. Demai, 25 a), to have translated the Torah before R. Eleazar and R. Joshua, who praised him (לְבַּעַר קְנַיִם, in allusion perhaps to his name, לְבַּעַר כְּנַיִם) or, according to other accounts, before R. Akiba (Kohelet. Kidd. 1, 2, etc.; Ber. Me. 11, Rabli. Midr. 30 a). We learn further that he lived in the time of Hadrian (Chag. 2, 1), that he was the son of the Emperor's sister (Tanach. 28, 1), that he became a convert against the Emperor's will (ib. and Shen. Rabba, 146 c), and that he consulted Eleazar and Jehoshua about his conversion (Ber. R. 75 a; comp. Misir. Koh. 192 b). First he is said to have gone to the emperor, and to have asked him whether that was all the love God bore to a proselyte, that He promised him bread and a garment (Gen. xxviii. 20). "Yes," he said, "what exquisite birds and other delicacies I now have: even my slaves do not care for them any longer." Whereupon R. Eleazar became wroth, and said, "Is that for which Jacob the Patriarch gave bread to eat and a garment to wear," so small in the eyes of God?

"Come he, the proselyte, and receives these things without any trouble!" — And Akivas, dissatisfied, left the irate Master and went to R. Joshua. He pacified him, and explained to him that "Bread meant the Divine Law, and 'Garment,' the Tikkh, or sacred garment to be worn during prayer. " — And

VARIATIONS, ANCIENT (TARGUM) 3414
not this old, he continued, but the Prophets may marry his daughter to a priest, and his offspring may become a high-priest, and offer burnt-offerings in the Sanctuary." More striking still is a Greek quotation from Onkelos, the Chaldee translator (Midr. Echa, 68 c), which in reality is found in and quoted (Midr. Shemag. 27 d) from Akiba, the Greek translator.

That Akiba is no other than Aquila (Aquiαса), the well-known Greek translator of the Old Testament, we need hardly add. He is a native of Pontus (Iren. adl. Har. 3, 24; Jer. De vir. ill. 54; Philos. De Hebr. § 90). He lived under Hadrian (Epiph. De Pont. et Mose. § 12). He is called the ἐρμηνευστής (Chron. Alex. ἐρμηνευστής) of the Emperor (ib. § 14), becomes a convert to Judaism (§ 15), whose name is called the Prophets (Iren. 1.; Jerome to Is. viii. 14, etc.), and receives instructions from Akiba (Ier. 1.). He translated the O. T., and his Version was considered of the highest import and authority among the Jews, especially those unacquainted with the Hebrew language (Euseb. Prop. Ev. l. c.; Augustin, Conf. I. xvi. 5, 17; Theod. Tr. Heb. § 90; Cass. iii. 180). Thirteen distinct quotations a from this Version are preserved in Talhum and Middrash, and they tally, for the most part, with the corresponding passages preserved in the Hexapla; and for those even which do not agree, there is no need to have recourse to corruptions. We know from Jerome (on Ezek. iii. 15) that Aquila prepared a further edition of his Version, called by the Jews מִשְׁלָח יִפְぬר, and there is no reason why we should not assume, ἐκείνης προέρχεται, that the different passages belong to the different editions.

If there can then be no reasonable doubt as to the identity of Aquila and Akidas, we may well now go a step further, and from the three-fold accounts adduced, so strikingly parallel in their anachronisms and contortions—solely argue the identity, as of Akilas and Aquila, so of Onkelos "the translator," with Akilas or Aquila. Whether in reality a Prophets of that name had been in existence at an earlier date—a circumstance which might explain part of the contradictory statements; and whether the difference of the forms is produced through the θ (ng, nk), with which we find the name sometimes spelt, or the Babylonian manner, occasionally to insert an η, like in Adrians, which we always find spelt Adrians in the Babylonian Talhum; or whether we are to read Gammaliel II. for Gamaliel the Elder, we cannot here examine; anything connected with the person of an Onkelos no longer concerns us, since he is not the author of the Targum; indeed, as we saw, only once ascribed to him in the passage of the Babylonian Talmud (Meg. 3 a), palpably corrupted from the Jerusalem Talmud (Meg. 1. 9). And not before the 9th century (Ipr. Jor. to Gen. xxv. 27) does this monstrous mistake seem to have struck root, and even from that time three centuries elapsed, during which the Version was quoted often enough, but without its authorship being ascribed to Onkelos.

From all this it follows that those who, in the face of this overwhelming mass of evidence, would fain retain Onkelos in the false position of translator of our Targum, must be ready to admit that there were two men living simultaneously of most astonishingly similar names; both propletes to Judaism, both translators of the Bible, both disciples of Eileithyia and Jehosophat; it being of both reported by the same authorities that they translated the Bible, and that they were disciples of the two last-mentioned Doctors; both supposed to be nephews of the reigning emperor, who disapproved of their conversion (for this account comp. Dion Cass. xxvii. 14, and Dei. Rab. 2, where Domitian is related to have had a near relative executed for his inclining towards Judaism); and very many more palpable improbabilities of the same description.

The question now remains, why was this Targum called that of Onkelos or Akilas? it is neither a translation of it, nor is it all done in the same spirit. All that we learn about the Greek Version shows us that its chief aim and purpose was, to counteract the LXX. The latter had, as it were, become a monster of a mass of corruptions;—especially with respect to the Messianic passages—as well on the Christian as on the Jewish side. It was requisite that a translation, scrupulously literal, should be given into the hands of those who were unable to read the original. Aquila, the disciple, according to one account, of Akilas—the same Akilas who expounded (storned) for halachic purposes the seemingly most insignificant particles in the Scripture (e. g. the γνός, sign of accusative; Gen. R. 11; Tos. Sheb. 1; Talm. Sheb. 26 b)—fulfilled his task, coming to his master's monster as a death to it, to republic the sacred and etymological verba sacra as was the principle of his translation:—Quid Hebraei non solum habent ἀληθή σελίδην ητομά, οὐκ έρτης στάλας καβακόπας καὶ στάνομεν καὶ στάνομεν τας επιτραπτής και λεξικάντων, διατάκαμ ταύτα τούτα καὶ την αλήθεια καὶ την λεγανομενη αποκαλισμον; (Jer. de Opst. Gen. Instr.) Targum Onkelos, on the other hand, is, if not quite a paraphrase, yet one of the very freest versions. Nor do the two translations, with rare exceptions, agree even as to the renderings of proper names, which each occasionally likes to transform into something else. But there is a reason. The Jews in possession of this most shabbily accurate Greek Bible-text, could now on the one hand successfully combat arguments, brought against them from interpolated LXX. passages, and on the other follow the expoundings of the School and the Hachhah, based upon the letter of the Law, as closely as if they had understood the original itself. That a version of this description often marred the sense, mattered less in times anything but favorable to the literal meaning of the Bible. It thus gradually became such a favorite with the people, that its renderings were household words. It was not that the LXX was made was considered a day of distress like the one on which the golden calf was cast and was actually entered among the fast days (8th Telsheth; Meg. Taanith),—this new version, which was to dispel the mischievous influences of the other,

Tgem. 59 e; Ex. xxiv. 43, Vaj. Rab. 293 b; Ps. lxiv. 15 (Masor. T. according to LXX.), Jer. Meg. 2, 3, fol. 73 b; Prov. xviii. 21.
VARIANTS, ANCIENT (TARGUM) 3403

I. Out of its author, one of the most delicate compliments in the manner of the time. The verse of the Scripture (Ps. xlv. 2), "Thou art more beautiful (yedignit) than the sons of men," was applied to him — in allusion to Gen. ix. 27, where it is said that Japheth (i.e. the Greek language) should be the last of the four sons of Noah. In the tents of Shem (i.e. the Greek), Meg. 1, 11, 71 b and c; 9 b, Ber. Kall. 40 b. — Osia γάρ Ἀ'καλάσ δουλεύει τῇ ἐβαζωγεί λειτ ἐνδεξανείς εἰπώ... φιλοτιμούσων πεπεστειλένων παρὰ Τουδασίου, ἡρμηνευόσαι τίνι γραφήν, etc. (Orig ad Afric. 2).

What, under circumstances, is more natural than to suppose that the new 1st edition Version — at least as excellent in its way as the Greek — was started under the name which had become expressive of the type and ideal of a Bible translation; that, in fact, it should be called a Targum done in the manner of Aquila — Aquila-Targum. Which the title of recommendation was, in consideration of the merits of the work upon which it was based, gladly introduced and retained — or for ought we know, was not bestowed upon it until it was generally found to be of such surpassing merit, we need not stop to argue.

Being thus deprived of the dates which a close examination into the accounts of a translator's life might have furnished us, we must needs try to fix the time of our Targum as approximately as we can by the circumstances under which it took its rise, and by the quotations from it which we meet in early works. Without unnecessarily going into detail, we shall briefly record, what we said in the introduction, that the Targum was begun to be committed to writing about the end of the 2d century, A.D.

So far, however, from its superseding the oral Targum at once, it was on the contrary strictly forbidden to read it in public (Jer. Meg. 4, 1). Nor was there any uniformity in the version. Down to the middle of the 2d century we find the masters most materially differing from each other with respect to the Targum of certain passages, (Sib. 54 a) and translations quoted not to be found in any of our Targums. The necessity must thus have pressed itself upon the attention of the spiritual leaders of the people to put a stop to the fluctuating state of a version, which, in the course of time must needs have become naturally surrounded with a halo of authority little short of that of the original itself. We shall thus not be far wrong in placing the work of collecting the different fragments with their variants, and reducing them into one — finally authorized Version — about the end of the 3d, or the beginning of the 4th, and in assigning Babylon to it as the birthplace. It was at Babylon that about this time the light of learning, extinguished in the idol-stained fields of Palestine, shone with threefold vigor. The Academy at Nahardea, founded according to legend during the Babylonian exile itself, had gathered strength. In the same degree as the numerous Palestinian schools began to decline, and when in 250 A.D., that most ancient school was destroyed, there were three others simultaneously flourishing in its stead — Tiberias, whither the college of Palestinian Jabneh had been transferred in the time of Camael III. (200); Sora, founded by Chidas of Kafir (293); and Pumbedita, founded by R. Jehudah b. Jose (337).

And in Babylon for well-nigh a thousand years — the crown of the Law — remained, and to Babylon, the seat of the "Head of the Yehud," (Dispersion), all Israel, scattered to the ends of the earth, looked for its spiritual guidance. That one of the first deeds of these Schools must have been the fixing of the Targum, as soon as the fixing of it became indispensable, we may well presume; and as we see the text fluctuating down to the middle of the 2d century, we can conceive that the redaction took place as soon afterwards as may reasonably be supposed. Further corroborative arguments are found for Babylon as the place of its final redaction, although Palestine was the country where it grew and developed itself.

Many grammatical and homiletical signs — the substance itself, i.e. the words, being Palestinian — point, as far as the scanty materials in our hands permit us, to draw conclusions as to the true state of language in Babylon, to that country. The Targum further exhibits a greater linguistic similarity with the Babylonian, than with the Palestinian Genara. Again, terms are found in it which the Talmud distinctly mentions as peculiar to Babylon, not to mention Persian words, which on Babylonian soil easily found their way into our work. One of the most striking hints is the unvarying translation of the Targum of the word רָוִי, "River," by Ephruses, the River of Babylon. Need we further point to the terms above mentioned, under which the Targum is exclusively quoted in the Talmud and the Midrashim of Babylon, namely, "Our Targum," "As we translate," or its later designation (Aruch, Rashi, Tosafis, etc.) as the "Targum of Babil?" Were a further proof needed, it might be found in the fact that the two Babylonian schools, which held different readings in various places of the Scripture, as individual traditions of their own, consequently held different readings in the Targum ever since the time of its redaction.

The opinions developed here are shared more or less by some of the most competent scholars of our day: for instance, Zanz (now quoatulates the dictum hid down in his Godkodnehed, Later, that the translation of Onkelos dates from about the middle of the first century, A.D.; comp. Geiger, Zeitchr. 1843, p. 179, note 2), Gritz, Levy, Herzfeld, Geiger, Frankel, etc. The history of the investigation of the Targums, more especially that of Onkelos, presents the usual aspect of vague speculations and widely contradictory notions, held by different investigators at different times. It is worth mentioning that of old authorities, Rashi puts the date of the Targum as far back as the time of Isaiah — notwithstanding that the people, as we are distinctly told, did not understand even a few Aramaic words in the time of Jeremiah. Following Assar de Rosi and Effah Levita (who, for reasons now completely disposed of, assumed the Targum to have first been written in Babylon during the captivity), Bellenari, Sixtus Senensis, Abbre, Bartosc, Rich. Simon, Hottinger, Walton, Thos. Smith, Pearson, Allix, Sharbon, Prideaux, Schickard, take the same view with individual modifications. Peifler, B. Mayer, Steph. Morinius, on the other hand, put its date at an extremely late period, and assign it to Palestine. Another scholar held that the Targum was not written until after the time of the Talmud — so Wolf, Havermann, partly Rich. Simon, Hornbeck, Joz. Morius, etc.: and

א ליטא, "a girl," is rendered by נָהיל; "for thus they call in Babylon a young girl," דַּשָּׂ נָהַיָּה (Chag. 13 a)
their reasons are both the occurrence of "Talmudical Fables" in the Targum and the silence of the Fathers. The former is an argument to which no reply is needed, since we do not see what it can be meant to prove, unless the "Halakhot" had been before their eyes, who, according to

"Henricus Seyenus Capricinus" (Ann. Eccl. tom. i. 281), must have written all this gigantic literature, ranging over a thousand years, out of his own head, in which case, indeed, every dictum on record, dating before or after the compilation of the Talmud, and in the least resembling a passage or story contained therein, must have been plundered from its sole native author. The latter argument, namely, the silence of the Fathers, more especially of Origen, Jerome, and Epiphanius, has been answered by Walton; and what we have said will further corroborate his arguments to the effect, that they did not mention it, not because it did not exist in their days, but because they either knew nothing of it, or did not understand it. In the person of an Okehlo, a Chaldee translator, the belief has been general, and will remain so, as long as the ordinary handbooks—with rare exceptions—do not care to notice the uncontroverted results of contemporary investigation. How scholars within the last century have endeavored to reconcile the contradictory accounts about Okehlos, more particularly how they have striven to smooth over the difficulty of their tallying with those of Mikus—as far as either had come under their notice—for this and other minor points we must refer the reader to Eichhorn, John, Bahrholdt, Hünernick, etc.

We now turn to the Targum itself. Its language is Chaldee, closely approaching in purity of idiom to that of Ezra and Daniel. It follows a sober and clear, though not a scholastic, and keeps as closely and minutely to the text as is at all consistent with its purpose, namely, to be brief, and above all, a version for the people. Its explanations of difficult and obscure passages bear ample witness to the competence of those who gave it its final shape, and infused into it a rare unity. Even where foreign matter is introduced, or, as Berekwitz in his Hebrew work Oche Or keenly observes, where it most artistically blends with the Chaldee; two considerations: two, or even a combination, into one: it steadily keeps in view the real sense of the passage in hand. It is always concise and clear and dignified, worthy of the grandeur of its subject. It avoids the legendary character with which all the later Targumim entwine the Biblical word, as far as ever circumstances would allow. Only in the political passages it was compelled to yield—though reluctantly—to the popular craving for Haggadah; but even here it chooses and selects with rare taste and tact.

Generally and broadly it may be stated that alterations are never attempted, save for the sake of clearness; tropic terms are dissolved by judicious circumlocutions, for the correctness of which the authors and editors—the possession of the living tradition of a language still written, if not spoken in their day—certainly seem better judges than some modern critics, who, through their own incomplete acquaintance with the idiom, injudiciously blame Okehlos. Highly characteristic is the aver-}

"Henricus Seyenus Capricinus" (Ann. Eccl. tom. i. 281), must have written all this gigantic literature, ranging over a thousand years, out of his own head, in which case, indeed, every dictum on record, dating before or after the compilation of the Talmud, and in the least resembling a passage or story contained therein, must have been plundered from its sole native author. versions, ancient (targum) 3105

withstanding the apparent pedantry of his method, and the undeniable identity which necessarily must exist between some of his classes, a glance over their whole body, aided by one or two examples in each case, will enable us to gain as clear an insight into the manner and "spirit" of the Targum as possible without the study of the work itself.

(A.) Discrepancies where the language of the text has been changed in the Targum, but the meaning of the former has been retained.

1. Alterations owing to the idiom: e. g. the singular word [Gen. ii. 26], "man and woman," as applied to the animals (Gen. vii. 2), becomes, as unsuitable in the Aramaic, "male and female."d

2. Alterations out of reverence towards God, more especially for the purpose of doing away with all ideas of a plurality of the Godhead: e. g. the terms Adonai, Elohim, are replaced by Jehovah: "And Jehovah smelled a sweet smell" (Gen. vii. 8), Onkelos has, "And Jehovah received the sacrifice with grace;" for "And Jehovah went down to see the city" (Gen. xi. 5), and Jehovah "rendred Himself," a term of frequent use in the Targum for verbs of motion, such as "to go down," "to go through," etc., applied to God. "I shall pass over thee" (Gen. xiv. 13), the Targum renders, "I shall protect you."d Yet only anthropomorphisms which clearly stand figuratively and might give offense, are expunged, not as Maluminae, followed by nearly all commentators, holds, all anthropomorphisms, for words like "hand, finger, to speak, see," etc. (see above), are retained. But where the words remember, think of, etc., are used by God, they always, when a sweet smell in the text stand in the Targum in the present; since a past or future would imply a temporary forgetting on the part of the Omnipotent.4 A kind distinction is here also established by Luzzatto between נִשָּׁוֹת and נִשַּׁוֹת, the former used of a real, external seeing, the latter of a seeing into the heart.

4. Expressions used of and to God by men are brought more into harmony with the idea of his dignity. Thus Abraham's question, "The Judge of the whole earth, should he not (Sdq) do justice?" (Gen. xxv. 25) is altered into the affirmative: "The Judge . . . verily He will do justice." Lalan, who speaks of his gods as in the text, is made to speak of his religion only in the Targum.

5. Alterations in honor of Israel and their ancestors. Rachel was "stole" the teraphim (xxxi. 19) is softened into Rachel "took"; "Jacob said" from Lalan (ch. 22), into "went." e The sons of Jacob answered Shechem with craftiness (xxxiv. 13), into "with wisdom."

6. Short glosses introduced for the better understanding of the text: "for it is my mouth that speaks to you" (xli. 12), Joseph said to his brethren: Targum, "to your tongue." 2 e. i.e. without an interpreter. "The people who had made the call" (Ex. xxiii. 35); Targum, "war-shipped," e since not they, but Aaron made it.

7. Explanation of tropical and allegorical expressions: "Be fruitful (lit. creep, from לֹא תָּנָה) and multiply" (Gen. i. 28), is altered into "bear children;" or "thy brother Aaron shall be thy prophet" (Ex. vii. 1), into "thy interpreter" (Metargum); "I made thee a god (Elohim) to Pharaoh" (Ex. vii. 1), into "a master;" z to a head and to a tail" (Dent. xxviii. 13), into "to a strong man and not to a weak;" w and finally, "Whoever says of his father and his mother, "Thou hast made him not" (Deut. xv. 9), into "Whoever is not merciful b towards his father and his mother."t

8. Tending to ennoble the language: the "washing" of Aaron and his sons is altered into "sanctifying;" the "cresses" of the animals of Abraham (Gen. xi. 11) become "pieces;" 27 "anointing;" 28 becomes "elevating, raising;" 9 the "wife of the bosom, 10 wife of the covenant." 10

9. The last of the classes where the terms are altered, but the sense is retained, is that in which a change of language takes place in order to introduce the explanations of the oral law and the traditions: e. g. Lev. xviii. 11, "On the morrow after the Sabbath" (G. c. the feast of the unwounded trend) the priest shall wave it (the sheaf)," Onkelos for Sabbath, Feast-day; t For meatloaves = (Deut. vi. 8), Tefillin (phylacteries). 11

(B.) Change of both the terms and the meaning.

10. To avoid phrases apparently derogatory to the dignity of the Divine Being: "Am I in God's stead?" becomes in Onkelos, "Dost thou ask (children) from me?" or from thee thou shouldst ask them?" (Gen. xxx. 2).

11. In order to avoid anthropomorphisms of an objectionable kind. "With the breath of thy nose" a (33 breath of thy nostrils," A. V., Ex. xx. 8), becomes 4 With the word of thy mouth." 2 And
I shall spread my hand over thee (Ex. xxxiii. 22), is transformed into 1 shall with my hand protect thee, b — and thou shalt see my back ports, but my face 6 shall not be seen (Ex. xxxiii. 23): And thou shalt see what is behind me, but that which is before me shall not be seen (Deut. xxxiii. 12).

12. For the sake of religious euphemisms: e. 2. — And ye shall be like God. 6 (Gen. iii. 5), is altered into 1 like princes. b — A laughter he gives me — 1 God being entirely omitted.

13. In honor of the nation and its ancestors: e. g. — Jacob was an upright man, a dweller in tents (Gen. xxv, 27), becomes 1 an upright man, frequenting the house of learning. 6 — One of the people, namely, he might have him with thy wife (Gen. xxvii. 10) — Thy brother came and took my blessing with deceit (v (Gen. xxviii. 35), becomes 1 with wisdom. 6

14. In order to avoid similar objectionable on aesthetic grounds. — And he will bathe his foot in oil ( 6 — And he will have many delicacies of a king (Deut. xxxiii. 24).

15. In order to explain the language. — And man became a living being ( 1 (Gen. ii. 7) — And it became in man a speaking spirit. 6 — How good are thy tents, 6 O Jacob. — How good are thy lairs, 6 O Jacob (Num. xxiv. 5).

16. In favor of the oral Law and the Rabbinical explanations. — And go into the land of Moriah. 6 (Gen. xxii. 2), becomes 1 into the land of worship, (the future place of the Temple). — Isaac went to walk in the field (Gen. xxvii, 63), is rendered 1 to pasture. 6 — Thou shalt not boil a kid or in the milk of its mother (Ex. xxiv. 26) — as meat and milk, 6 according to the Hakahalah.

(14) Alterations of words (circumlocutions, additions, etc.) without change of meaning.

17. On account of the difference of filiation: e. g. — Her father's brother. 6 ( 1 (Gen. xxix. 12), is rendered 1 the son of her father's sister. 6 — What God does (future) he has told Pharaoh (Gen. xlii. 28) — What God will do, 6 (Gen. xlii. 6) etc.

18. Additions for the sake of avoiding expressions apparently derogatory to the dignity of the Divine Being, by implying polytheism and the like: 1 Who is like unto Thee among the gods? 6 is rendered, 1 There is none like unto Thee, 6 Thou art God (Ex. xv. 11). — And they sacrifice to demons who are no gods. 6 — of no use 6 (Deut. xxxiii. 17).

19. In order to avoid erroneous notions implied in certain verbs and epithets used of the Divine Being: e. g. — And the Spirit of God moved (Gen. i. 2) — A wind from before the Lord. 6 — And Noah built God an altar 6 (Gen. vii. 20) — an altar before God, 6 — And God was with the boy (Gen. xxvi. 20) — And the word of God was in the sid of the boy. 6 — The mountain upon which was revealed the glory of God. 6 — The staff of God (Ex. iv. 20) — The staff with which thou hast done the miracles before God. 6 — And I shall see what will be their end 6 (It is open revealed) before me, 6 etc. The Divine Being is in fact very rarely spoken of without that spiritual medium mentioned before; it being considered, as it were, a want of proper reverence to speak of or of Him directly. The terms before (Keb), 1 Word (Agayos, Sabbath), 6 Glory (Shabbos), 6 Majesty (Shabbos), are always used instead of the Divine name: e. g. — The voice of the Lord was heard (Gen. iii. 8). The voice of the Word 6 — And he will dwell in the tents of Shem (Ex. xxvii) — And the Shechinah [Divine Presence] will dwell. — And the Lord came up from Abraham 6 (Gen. xxvii. 22) — And the glory of God went up from Abraham. 6 — And God came to Abimelech 6 (Gen. xx. 3) — And the word from (before) God came to Abimelech.

20. For the sake of improving seemingly irreverential phrases in Scripture. — Who is God that I should listen unto his voice? (Ex. v. 2) — The name of God has not been revealed to me, that I should receive his word. 6

21. In honor of the nation and its ancestors. — And Israel said to Joseph, Now I shall gladly die 6 (Gen. xxxvi. 30), which might appear frivolous in the mouth of the patriarch, becomes 1 I shall be comforted now. 6 — And he led his flock towards the desert (Ex. iii. 1) — towards a good spot of pasture in the desert.

22. In honor of the Law and the explanation of its obscurities. — To days and years (Gen. i. 14) — that days and years should be counted by them; 6 a tree of knowledge of good and evil 6 — A tree, and those who eat its fruits will distinguish between good and evil. 6 — I shall not further curse for the sake of man (viii. 21) — afternoon (Minha), and Jacob the evening-prayer (Maarib).
