DR. WILLIAM SMITH'S

DICTIONARY OF THE BIBLE;

COMPRISING ITS

ANTIQUITIES, BIOGRAPHY, GEOGRAPHY, AND NATURAL HISTORY.

REVISED AND EDITED BY

PROFESSOR H. B. HACKETT, D. D

WITH THE COOPERATION OF

EZRA ABBOT, LL. D.
ASSISTANT LIBRARIAN OF HARVARD COLLEGE

VOLUME IV.
REgem-MeLech to Zuzims.

BOSTON:
HOUGHTON, MIFFLIN AND COMPANY.
1883.
Entered, according to Act of Congress, in the year 1870, by
Hurd and Houghton,
in the Clerk's Office of the District Court for the Southern District of New York.

RIVERSIDE, CAMBRIDGE:
STEREOTYPED AND PRINTED BY
H. O. HOUGHTON AND COMPANY.
WRITERS IN THE ENGLISH EDITION.

** The new portions in the present edition are indicated by a star (*), the editorial additions being distinguished by the initials H. and A. Whatever is enclosed in brackets is also, with unimportant exceptions, editorial. This remark, however, does not apply to the cross-references in brackets, most of which belong to the original work, though a large number have been added to this edition.

ABBREVIATIONS.

Ald. The Aldine edition of the Septuagint, 1518.
Alex. The Codex Alexandrinus (5th cent.), edited by Barber, 1816–28.
A. V. The authorized (common) English version of the Bible.
Comp. The Septuagint as printed in the Complutensian Polyglott, 1514–17, published 1522.
FA. The Codex Friderico-Augustanus (4th cent.), published by Tischendorf in 1846.
Rom. The Roman edition of the Septuagint, 1587. The readings of the Septuagint for which no authority is specified are also from this source.
Sin. The Codex Sinaicus (4th cent.), published by Tischendorf in 1862. This and FA. are parts of the same manuscript.
REGEN-MELECH

REGEN-MELECH (עֶגֶּמֵ-מֶלֶךְ) [friend of the king]: "אֱרָבָשֶׁה אוֹ בַּּאֲשֵׁכָא: אֶלַּךְ אֲרָבָשֶׁה אוֹ בַּּאֲשֵׁכָאוָא: רֶגֶּמֶלֶךְ]. The names of Sherezer and Regem-melech occur in an obscure passage of Zechariah (vii. 2). They were sent on behalf of some of the Captivity to make inquiries at the Temple concerning fasting. In the A. V. the subject of the verse appears to be the captive Jews in Babylon, and Bethel, or "the house of God," is regarded as the accusative after the verb of motion. The LXX. take "the king" as the nominative to the verb "sent." Considering the first part of the name Regem-melech as an appellative and not as a proper name. Again, in the Vulgate, Sherezer, Regem-melech, and their men, are the persons who sent to the house of God. The Peshito-Syrice has a curious version of the passage: "And he sent to Bethel, to Sherezer and Rabmag; and the king sent and his men to pray for him before the Lord." Sherezer and Rabmag being associated in Jer. xxxix. 3, 13. On referring to Zech. vii. 5, the expression "the people of the land" seems to indicate that those who sent to the Temple were not the captive Jews in Babylon, but those who had returned to their own country; and this being the case it is probable that in ver. 2 "Bethel" is to be taken as the subject, and Bethel, i. e. the inhabitants of Bethel, sent." The Hexaplar-Syrice, following the Peshito, has "Rabmag." What reading the LXX. had before them it is difficult to conjecture. From its connection with Sherezer, the name Regem-melech (lit. "king's friend," comp. 1 Chr. xxvii. 33), was probably an Assyrian title of office. W. A. W.

REGION-ROUND-ABOUT THE (כַּוּּר דִּרְפָּרַּן). This term had perhaps originally a more precise and independent meaning than it appears to a reader of the Authorized Version to possess.

In the Old Test. it is used by the LXX. as the equivalent of the singular Hebrew word הַכָּר כָּרָא (כָּרָא, literally "the round"), a word the topographical application of which is not clear, but which seems in its earliest occurrences to denote the circle or oasis of cultivation in which stood Sodom and Gomorrah and the rest of the five "cities of the Circles" (Gen. xiii. 10, 11, 12, xix. 17; 25, 28, 29; Dent. xxxiv. 3). Elsewhere it has a wider meaning, though still attached to the Jordan (2 Sam. xviii. 23; 1 K. vii. 46; 2 Chr. iv. 17; Neh. iii. 22, xii. 23). It is in this less restricted sense that περικέφαλα occurs in the New Test. In Matt. iii. 5 and Luke iii. 3 it denotes the populous and flourishing region which contained the towns of Jericho and its dependencies, in the Jordan Valley, inclosed in the amphitheatre of the hills of Quenaouna (see Map, vol. ii. p. 664), a densely populated region, and important enough to be reckoned as a distinct section of Palestine—"Jerusalem, Judea, and all the region of Jordan." (Matt. iii. 5, also Luke vii. 17.) [UDEN, WILDERNESS OF, Amer. ed.] It is also applied to the district of Genezareth, a region which presents certain similarities to that of Jericho, being inclosed in the amphitheatre of the hills of Hattin and bounded in front by the water of the lake, as the other was by the Jordan, and also resembling it in being very thickly populated (Matt. xiv. 35; Mark vi. 55; Luke vi. 17, xvi. 17).

REHOB

REHOB (כַּוּּר בִּלְּבַּר, street, martplace): "Pâth, [Lat.] Alex. Panóba, in 1 Chr. xxviii.; Pâbô, Alex. Panóba, 1 Chr. xxiv.; Pâbôb, Alex. Panóba, 1 Chr. xxvi.: Robôbô, Robôbô in 1 Chr. xxvi.) The only son of Eliezer, the son of Moses, and the father of Joshua, or Jehoshua (1 Chr. xxiii. 17, xxiv. 21, xxvi. 25). His descendants were numerous.

REHABIAH (כַּוּּר אַבִּי), in 1 Chr. xxiii.; elsewhere אֲבִי [whom Jehovah calygizes]: "Pâbôr, [Vat. Alex. Panóba, in 1 Chr. xxiii.; Pâbôr, 1 Chr. xxiv.; Pâbôr, Alex. Panóba, 1 Chr. xxvi.: Robôbô, Robôbô in 1 Chr. xxvi.). The son of Eliezer, the son of Moses, and the father of Joshua.

REJOICE (כַּוּּר בַּנָּר, street, martplace): "Pâbô, [Pâbô, Robôbô, 1. The father of Hadadezer king of Zobah, whom David smote at the Euphrates (2 Sam. viii. 3, 12). Josephus (Ant. vii. 5, § 1) calls him 'Agdor, and the Old Latin Version Arcodon, and Blayney (on Zech. ix. 1) thinks this was his real name, and that he was called Rehob, or 'charioteer,' from the number of chariots in his possession. The name appears to be peculiarly Syrian, for we find a district of Syria called Rehob, or Beth-Rehob (2 Sam. x. 6, 8).

G.

a Thus Jerome—"regions in circuita per quos medietas Iscabanæ collat."
REHOB (רְהוֹב) [as above]. The name of more than one place in the extreme north of the Holy Land.

1. (Rom. Psalm: Vat.) Psalm: Alex. Psalm: Rehob. The northern limit of the exploration of the spies (Num. xiii. 24). It is specified as being near Shechem, but here it seems to be identified with Beth-rehob. On the mountain called Beth-rehob in the plain of Jericho, the modern Bashari, with an ancient fortress on the southern slope. The name means "broad" and is said to have been given to the place because it is broad as compared with the neighboring mountains. The name is also found in the Old Testament as the name of a place in Samaria.

2. (Psalm: Alex. Psalm: Rehob.) Beth-rehob, one of the towns allotted to Asher (Josh. xix. 30). From this place, mentioned in connection with Maon, which was also in the upper district of the Shephelah, the Israelites concluded a treaty with the Philistines. The place was a strategic point for the defense of the Israelites against the Philistines. The name means "broad" and is said to have been given to the place because it is broad as compared with the neighboring mountains.

REHOBOAM (רְהוֹבָאָם) (Eng. "enlarger of the people") — see Ex. xxxiv. 20, and compare the name Ephraim: Rehoboam, son of Solomon, by the Ammonite princess Naamah (1 K. xiv. 21, 31), and his successor (1 K. xi. 43). From the earliest period of Jewish history we perceive symptoms that the confederation of the tribes was but imperfectly centralized. The powerful Ephraim could never have possessed a position of inferiority. Throughout the Book of Judges (viii. 1, xii. 1) the Ephraimites show a spirit of resentful jealousy when any enterprise is undertaken without their concurrence and active participation. From them had sprang Joshua, and afterwards (by his place of birth) Solomon might be considered theirs, and though the tribe of Benjamin gave to Israel its first king, yet it was allied by hereditary ties to the house of Joseph, and by geographical position to the territory of Ephraim, so that up to David's accession the leadership was practically in the hands of the latter tribe. But Judah always threatened to be a formidable rival. During the earlier history, partly due to the physical position of the kingdom in this region, its props tend to maintain the identity of it with Hinnom, an ancient fortress in the mountains N.W. of the plain of Huleh, the upper district of the Jordan Valley. But this, though plausible, has no certain basis.

The name is also found in the Old Testament as the name of a place in Samaria.

REHOBOTH (רְהוֹבֹת) [as above]. The name of more than one place in the extreme north of the Holy Land.

1. (Rom. Psalm: Vat.) Psalm: Alex. Psalm: Rehob. The northern limit of the exploration of the spies (Num. xiii. 24). It is specified as being near Shechem, but here it seems to be identified with Beth-rehob. On the mountain called Beth-rehob in the plain of Jericho, the modern Bashari, with an ancient fortress on the southern slope. The name means "broad" and is said to have been given to the place because it is broad as compared with the neighboring mountains. The name is also found in the Old Testament as the name of a place in Samaria.

2. (Psalm: Alex. Psalm: Rehob.) Beth-rehob, one of the towns allotted to Asher (Josh. xix. 30). From this place, mentioned in connection with Maon, which was also in the upper district of the Shephelah, the Israelites concluded a treaty with the Philistines. The place was a strategic point for the defense of the Israelites against the Philistines. The name means "broad" and is said to have been given to the place because it is broad as compared with the neighboring mountains.

3. (Psalm: Alex. Psalm: Ephraim: Psalm: Rehob.) Asher contained another Rehob (Josh. xix. 30); but the situation of this, like the former, remains at present unknown. One of the two, it is difficult to say which, was allotted to the Gershonite Levites (Josh. xvi. 31; 1 Chr. vi. 55), and one of its Canaanite inhabitants retained possession (Judg. i. 34). The mention of Aplik in this latter passage may imply that the former belonged to it, and the latter to that of Josh. xix. 30. This explanation of the name is confirmed by the memories of the spies, and the place four Roman miles from Smythopolis. The place they refer to still survives as Rehob, 3 miles S. of Beisan, but their identification of a town in that position with one in the territory of Asher is obviously inaccurate. G.

REHOBOAM (רְהוֹבָאָם) (Eng. "enlarger of the people") — see Ex. xxxiv. 20, and compare the name Ephraim: Rehoboam, son of Solomon, by the Ammonite princess Naamah (1 K. xiv. 21, 31), and his successor (1 K. xi. 43). From the earliest period of Jewish history we perceive symptoms that the confederation of the tribes was but imperfectly centralized. The powerful Ephraim could never have possessed a position of inferiority. Throughout the Book of Judges (viii. 1, xii. 1) the Ephraimites show a spirit of resentful jealousy when any enterprise is undertaken without their concurrence and active participation. From them had sprang Joshua, and afterwards (by his place of birth) Solomon might be considered theirs, and though the tribe of Benjamin gave to Israel its first king, yet it was allied by hereditary ties to the house of Joseph, and by geographical position to the territory of Ephraim, so that up to David's accession the leadership was practically in the hands of the latter tribe. But Judah always threatened to be a formidable rival. During the earlier history, partly due to the physical position of the kingdom in this region, its props tend to maintain the identity of it with Hinnom, an ancient fortress in the mountains N.W. of the plain of Huleh, the upper district of the Jordan Valley. But this, though plausible, has no certain basis.

The name is also found in the Old Testament as the name of a place in Samaria.
burdens imposed by Solomon, and Rehoboam promised them an answer in three days, during which time he consulted first his father's counsellors, and then the young men "that were grown up with him, and which stood before him," whose answer shows how greatly during Solomon's later years the character of the Jewish court had degenerated. Rejecting the advice of the elders to conciliate the people at the beginning of his reign, and so make them "his servants forever," he returned as his reply, in the true spirit of an eastern despot, the frantic bravo of his contemporaries: «My little finger shall be thicker than my father's loins. . . . I will add to your yoke; my father hath chastised you with whips, but I will chastise you with scorpions» (i.e. scourges furnished with sharp points). Thereupon arose the formidable song of insurrection, heard once before when the tribes quarreled after David's return from the war with Absalom:—

What portion have we in David? What inheritance in Jesse's son? To your tents, O Israel! Now see to thy own house, O David!

Rehoboam sent Adoniram or Adoniram, who had been chief receiver of the tribute during the reign of his father and his grandfather (1 K. iv. 6; 2 Sam. xx. 24), to reduce the rebels to reason, but he was stern to death by them: whereupon the king and his attendants fled in hot haste to Jerusalem. So far all is plain, but there is a doubt as to the part which Jeroboam took in these transactions. According to 1 K. xii. 3 he was summoned by the Ephrimites from Egypt (to which country he had fled from the anger of Solomon) to be their spokesman at Rehoboam's coronation, and actually made the speech in which a remission of burdens was requested. But, in apparent contradiction to this, we read in ver. 20 of the same chapter that after the success of the insurrection and Rehoboam's flight, "when all Israel heard that Jeroboam was come again, they sent and called him unto the congregation and made him king." But there is reason to think that ver. 3 has been interpolated. It is not found in the LXX., which makes no mention of Jeroboam in this chapter till ver. 20, substituting in ver. 3 for «Jeroboam and all the congregation of Israel came and spoke unto Rehoboam," the words καὶ ἀληθεὺς ἄλος τῶν διδακτῶν ρήματα. So too Jeroboam's name is omitted by the LXX. in ver. 12. Moreover we find in the LXX. a long supplement to this 12th chapter, evidently ancient, and at least in parts authentic, containing fuller details of Jeroboam's biography than the Hebrew. [JEROBOAM.]

In this we read that after Solomon's death he returned to his native place, Saphir in Ephram, which he fortified, and lived there quietly, watered the finest vineyard till the long-awaited rebellion broke out, when the Ephramites heard (doubtless through his own agency) that he had returned, and invited him to Shechem to assume the crown. From the same supplementary narrative of the LXX. it would appear that more than a year must have elapsed between Solomon's death and Rehoboam's visit to Shechem, for, on receiving the news of the former event, Jeroboam requested from the king of Egypt leave to return to his native country. This the king tried to prevent by giving him his sister-in-law in marriage: but on the birth of his chik Abijah, Jeroboam renewed his request, which was then granted. It is probable that during this year the discontent of the N. tribes was making itself more and more manifest, and that this led to Rehoboam's visit and intended insurrection.

On Rehoboam's return to Jerusalem he assembled an army of 180,000 men from the two faithful tribes of Judah and Benjamin (the latter transferred from the side of Joseph to that of Judah in consequence of the position of David's capital within its borders), in the hope of reconquering Israel. The expedition, however, was forbidden by the prophet Shemaiah, who assured them that the separation of the kingdoms was in accordance with God's will (1 K. xii. 24): still during Rehoboam's life time peaceful relations between Israel and Judah were never restored (2 Chr. xii. 15; 1 K. xiv. 39). Rehoboam now occupied himself in strengthening the territories which remained to him, by building a number of fortresses with the number of cities given in 2 Chr. xi. 6-24, forming a circle of "fenced cities" round Jerusalem. The pure worship of God was maintained in Judah, and the Levites and many pious Israelites from the North, vied at the cultic-idolatry introduced by Jeroboam at Dan and Bethel, in imitation of the Egyptian worship of Meneve, came and settled in the southern kingdom and added to its power. But Rehoboam did not check the introduction of heathen abominations into his capital: the lascivious worship of Asheroth was allowed to exist by the side of the true religion (an inheritance of evil doubtless left by Solomon), "images" (of Baal and his fellow divinities) were set up, and the worst immoralities were tolerated (1 K. xiv. 22-24). These evils were punished and put down by the terrible calamity of an Egyptian invasion. Shortly before this time a change in the ruling house had occurred in Egypt. The XXIst dynasty, of Tanites, whose last king, Pisham or Ponsennes, had been a close ally of Solomon (1 K. iii. 1, vii. 8, ix. 16, x. 28, 29), was succeeded by the XIXth of Behistites, whose first sovereign, Sheshonk, S. of Shesheshet, S. of Solomon, by his brother, was connected with us, have seen, with Jeroboam. That he was invited by him to attack Judah is very probable: at all events in the 5th year of Rehoboam's reign the country was invaded by a host of Egyptians and other African nations, numbering 1,200 chariots, 60,000 cavalry, and a vast miscellaneous multitude of infantry. The line of fortresses which protected Jerusalem to the W. and S. was forced, Jerusalem itself was taken, and Rehoboam had to purchase an ignominious peace by delivering up all the treasures with which Solomon had adorned the temple and palace, including his golden shields, 200 of the larger, and 300 of the smaller size (1 K. x. 16, 17), which were carried before him when he visited the Temple in state. We are told that after the Egyptians had retired, his vain and foolish successor comforted himself by substituting shields of brass, which were solemnly borne before him in procession by the body-guard, as if nothing had been changed since his father's time (Ewald, Geschichte des V. l. iii. 548, 464). Shishak's success is commemorated by sculptures discovered by Champollion on the outside of the great Temple at Karnak, where among a long list of captured towns and provinces occurs the name Μελδία Ιβαυ (kingdom of Judah). It is said

\[\text{So in Latin, *scorpio*; according to Tertullian, *Oriens*. (v. 27.), is "virga nodosa et acutamina, quia acutum vulnera in corpus inflicitur." (Pacuvillius, s. v.)}\]
that the features of the captives in these sculptures
are unmistakably Jewish (Rawlinson, *Herodotus* , ii. 326, and *Henrya Letters*, p. 126; Bunsen, *Egypt*, iii. 242). After this great humiliation the moral condition of Judah seems to have improved (2 Chr. xii. 12), and the rest of Rechobam’s life to have been unmarked by any events of importance. He died b. c. 585, after a reign of 17 years, having ascended the throne b. c. 575 at the age of 41 (1 K. xiv. 21; 2 Chr. xii. 13). In the addition to the LXX, already mentioned (inserted after 1 K. xii. 24) we read that he was 16 years old at his accession, a misstatement probably founded on a wrong interpretation of 2 Chr. xii. 7, where he is called "young" (i.e. new to his work, inexperienced) and "tender-hearted" (ספקיה זרה, wanting in resolution and spirit).

He had 18 wives, 60 concubines, 28 sons, and 60 daughters. The wisest thing recorded of him in Scripture is that he refused to waste away his sons’ energies in the wretched existence of an Eastern zemana, in which we may infer, from his helplessness at the age of 41, that he had himself been educated, but dispensed them in command of the new fortresses which he had built about the country. Of his wives, Mahalath, Abihail, and Maachah were all of the royal house of Jesse; Maachah he loved best of all, and to her son Absalom he bequeathed his kingdom. The text of the LXX, followed in this article is Tischendorf’s edition of the Vatican MS., [not of the Vat. MS., but reprint of the Roman edition of 1837], Leipzig, 1850. G. E. L. C.

**REHO’BOTH (רֵיהוֹבָה) [streets, wide places]**: Sammar. רֵיהוֹבָה: εὐπαύσαβα: Veneto-Gk. at Μαιρίταιον: Lottinville). The third of the series of wells dug by Isaac (Gen. xxvi. 22). He celebrates his triumph and bestows its name on the well in a fragment of poetry of the same nature as those in which Jacob’s wives give names to his successive children. —He called the name of it Rechoboth (‘room,’ and said, —

"Because now Jehovah hath made-room for us And we shall increase in the land."

Jesse had left the valley of Gerar and its turbulent inhabitants before he dug the well which he thus consecrated to peace. From this same time he made a "went up" to Beer-sheba (ver. 23), an expression which is always used of motion towards the Land of promise. The position of Gerar has not been definitely ascertained, but it seems to have lain a few miles to the S. of Gaza and nearly due E. of Beer-sheba. In this direction, therefore, if anywhere, the wells Sitnah, Essek, and Rechoboth, should be searched for. A Holy Rechoboth, containing the ruins of a town of the same name, with a large well, is crossed by the road from Khem en-Nabid to Hebron, by which Palestine is entered on the south. It lies about 20 miles S. W. of Bir es-Nebi, and more than that distance S. of the most probable situation of Gerar. It therefore seems uncouth, without further proof, to identify it with Rechoboth, as Rawlins (in *Williams’ Holy City*, i. 455), Stewart (Tor and Khon, p. 292), and

Van de Velde’s (Memoir, p. 343) have done. At the same time, as is admitted by Dr. Robinson, the existence of so large a place here, without any apparent mention, is mysterious. All that can be said in favor of the identity of Nahalibeh with Rechoboth is said by Dr. Bonar (*Desert of Siwah*, p. 310), and not without considerable force.

The ancient Jewish tradition confined the events of this part of Isaac’s life to a much narrower circle. The wells of the patriarchs were shown near Ashkelon in the time of Origen, Antoninus Martyr, and Eusebius (Reland, *Pal.*, p. 589); the Samaritan Version identifies Gerar with Ashkelon, Josephus (Ant. I. 12, § 1) calls it "Gerar of Palestine," i.e. of Philistia.

G.

**REHO’BOTH, THE CITY (רֵיהוֹבָה הָנָּה), i. c. Rechoboth Ir [streets of the city]; Sammar. רֵיהוֹבָה הָנָּה: Sam. vers. רֵיהוֹבָה הָנָּה: ‘Pow’baθ πόλις: Alex. *Pow’baθ*: ἐποίησθα πόλις*. One of the four cities built by Asaiah, or by Nimrod in Ashur, according as this difficult passage is translated. The four were Nineveh, Rechoboth-ir; Calah; and Bosen, between Nineveh and Calah (Gen. xiv. 11). Nothing certain is known of its position. The name of Rechoboth is still attached to two places in the region of the ancient Mesopotamia. They lie, the one on the western, and the other on the eastern bank of the Euphrates, a few miles below the confluence of the Khobe. Both are said to contain extensive ancient remains. That on the eastern bank bears the affix of *wilk* or royal, and this Imru’el, or Kalah (Gen. xiv. 13) propose as the representative of Rechoboth. Its distance from Khobe-Sherghab and Ninivals (nearly 200 miles) is perhaps an obstacle to this identification. Sir H. Rawlinson (*Athensian*, April 15, 1854) suggests Selcumbh in the immediate neighborhood of Kalah, "where there are still extensive ruins of the Assyrian period," but no subsequent discoveries appear to have confirmed this suggestion. The Samaritan Version (see above) reads Sutem for Rechoboth; and it is remarkable that the name Sutean should be found in connection with Calah in an inscription on the breast of a statue of the god Nebu which Sir H. Rawlinson disinterred at Ninivals (*Athensian*, as above). This form of the name is commonly supposed to denote the Sittacene of the Greek geographers (Winer, *Rechelb; “ Rechoboth Ir”). But Sittacene was a district, and not a city as Rechoboth-ir necessarily was, and, further, being in southern Assyria, would seem to be too distant from the other cities of Nimrod.

St. Jerome, both in the Vulgate and in his *Questiones de Genesi* (probably from Jewish sources), considers Rechoboth-ir as referring to Nineveh, and as meaning the "streets of the city." The reading of the targums of Jonathan, Jerusalem, and Rabbi Joseph, on Gen. i 14, 18 and *Plutarch, Plutoltne*, are probably only transliterations of the Greek word πόλις, which, as found in the well-known ancient city Plataea, is the exact equivalent of Rechoboth. Kaplan, the Jewish geographer (Erata Kolomian), identifies

a Dr. Robinson could not find the well. Dr. Stewart found it "regularly built, 12 feet in circumference," and "completely filled up." Mr. Rawlins describes it as "an ancient well of living and good water. Those who shall be examinable so curiously contradictory.

b In his Travels Van de Velde inclines to place it, or at any rate one of Isaac’s wells, at Er E1, about six miles S. W. of Er-Rim (Sur. and Per. ii. 146).
REKEM

2701

Rekem-nuwh with Rehoboth-by-the-river, in which he is possibly correct, but considers it distinct from Rehoboth Ir, which he believes to have disappeared.

G. REHOBOTH BY THE RIVER (רֶהֶוֹבֹּת בִּהוּ הָרְבָּעֶן

1. [Psa. 46. 1. 2.] "Psa. 46. 3. 4.] Rehoboth, the name still remains attached to two spots on the Esprates: the one simply Rehoboth, on the right bank, eight miles below the junction of the Kibro, and about three miles west of the river (Chesney, Ezpr., 113. 119, ii. 610, and map iv.); the other four or five miles further down on the left bank.

The latter is said to be called Rehoboth-wilck, i.e. "right-hand" (Kalisch, Kaplan), and is on this ground identified by the Jewish commentators with the city of Saul; but whether this is accurate, and whether that city, or either of the two sites just named, is also identical with Rehoboth-ir, the city of Nemrod, is not yet known.

There is no reason to suppose that the limits of Edom ever extended to the Esprates, and therefore the occurrence of the name in the lists of kings of Edom would seem to be a trace of an Assyrian incursion of the same nature as that of Cherodомер and Annaphel. G.

* RE'HU, 1 Chron. i. 25 (A. V. ed. 1614).

[Rev.]

REHEM (רְפֶהֶמ [composizione]: Peqôa): [Vat. omit.: Alex. Iepqom: Rehuma]. 1. One of the "children of the province" who went up from Babylon with Zerubbabel (Exr. ii. 2). In Neh. vii. 7 he is called Nehum, and in 1 Esdr. v. 8 Korum.

2. [Vat. Psa. 26. Psa. 26.] * Rehuma, the chancellor," with Shmuel the scribe, and others, wrote to Artaxersex to prevail upon him to stop the rebuilding of the walls and temple of Jerusalem (Exr. iv. 9, 17, 22). He was perhaps a kind of lieutenant-governor of the province under the king of Persia, holding apparently the same office as Tamai, who is described in Exr. v. 6 as taking part in a similar transaction, and is there called "the governor on this side the river" (The Chaldean title, מֶשֶחְרְשָׂרִים, בֵּית-אַלְכְּמוֹן, lit. "lord of desire," is left untranslated in the LXX. Balaṭdu and the Vulgate Bealechom; and the rendering "chancellor" in the A. V., appears to have been derived from Kimchi and others, who explain it, in consequence of its connection with "scribe," by the Hebrew word which is usually rendered "recorder." This appears to have been the view taken by the author of 1 Esdr. ii. 25, 26 γράφον αὐτὸν προστίθοντα, and by Josephus (Ant. ii. 2. § 1). It seems to the Vulgate Brealechom. The order of some of these seems to be a gloss, for the Chaldee title is also represented by Bealechom.

3. [Psa. 46. 3.] (Vat. Bavon: F. B. Baoovod): * Rehuma.) A Levite of the family of Bani, who assisted in rebuilding the walls of Jerusalem (Neh. iii. 17).

4. (Pena: [Vat. Alex. F.A. (joined with part of the next word) Paoa.]) One of the chief of the people, who signed the covenant with Nehemiah (Neh. x. 25).

5. (2. Ov. 26, 5. 3.; also om. by Rom. Alex. F.A. 4. F.A. 3. Rehuma.) A priestly family or the head of a priestly house, who went up with Zerubbabel (Neh. xii. 3). W. A. W.

REI (רְפֶהֶא [friendly, sociable]): [Rom. Pega: Alex. Pega. B. Ret.] A person mentioned (in 1 K. i. 8 only) as having, in company with Zadok, Benaiah, Nathan, Shimei, and the men of David's guard, remained firm to David's cause when Adonijah rebelled. He is not mentioned again, nor do we obtain any clue to his identity. Various conjectures have been made. Jerome (Quast. Hebr. ad loc.) states that he is the same with "Hiram the Zairite," i.e. Ita the Jairite, a priest or prince about the person of David. Ewald (Besch. iii. 236 note) dwelling on the occurrence of Shimei in the same list with Rei, suggests that the two are David's only surviving brothers, Rei being identical with Hadai. This is ingenious, but there is nothing to support it; while the is the great objection to it that the names are in the original extremely dissimilar, Rei containing the Ain, a letter which is rarely exchanged for any other, but apparently never for Daleth (Georg. Theor., pp. 376, 577).

G.

REINS, i.e. kidneys, from the Latin renes. 1. The word is used to translate the Hebrew רְפֶהֶמ, except in the Pentateuch and in Is. xxxiv. 6, where "knees" is employed. In the ancient system of physiology the kidneys were believed to be the seat of desire and longing, which accounts for their often being coupled with the heart (I. viii. 3, xxvi. 2; Jer. xi. 20, xvii. 10, etc.).

2. It is once used (Is. xi. 5) as the equivalent of רְפָהְת, elsewhere translated "horns." G.

REKEM (רְפָהֵמ [variegated garden]: Poqom [Vat. Psa.]: Ravom: Alex. Pqom: Rovom). 1. One of the five kings or chieftains of Midian slain by the Israelites (Num. xxxi. 8; Josh. xii. 21) at the time that Balhan fell.

2. (Pena: Alex. Pqom.) One of the four sons of Hebron, and father of Shammua (1 Chr. ii. 43. 44). In the last verse of the LXX. have "Jor-kanum" for "Rekem." In this genealogy it is extremely difficult to separate the names of persons from those of places—Ziph, Maresiah, Tapputh, Hebron, are all names of places, as well as Maon and Beth-zur. In Josh. xviii. 27 Rekem appears as a town of Benjamin, and perhaps this genealogy may be intended to indicate that it was founded by a colony from Hebron.

REKEM (רְפָהֵמ [as above]: perhaps Kaq̄ar kal Naq̄.: Alex. Peren: Recem). One of the towns of the allotment of Benjamin (Josh. xviii. 27). It occurs between Mozah (homa-Motar) and Izreel. No one, not even Schwarz, has attempted to identify its territories named above, but it does not appear in the work of Col. Chesney.

* Reading א for א.
BRIMMON, Rimmon, Tochen e. G. 

BEMALIAH (במ"ליאיה) [between Jeroham and 4th. Ezra]. Pe'amalies in Kings and Isaiah, Pomeelia in Crit.: [Var. Pomelia (gen.) in Is. vii. 1]: Romeliet. The father of Pekah, captain of Pekahiah king of Israel, who slew his master and usurped his throne (2 K. xxv. 29, 37, xvi. 1. 3: 2 Chr. xxviii. 6: Is. vii. 1-9, viii. 6).

REMITH (רמ"ת) [height?]: Pe'amud: Alex. Raimod: Romanh. One of the towns of Issachar (Josh. xix. 21), occurring in the list next to Gammim, the modern Jenin. It is probably (though not certainly) a distinct place from the Ramoth of 1 Chr. vi. 75. A place bearing the name of Ramoth is found on the west of the track from Samaria to Jenin, about 6 miles N. of the former and 8 S. W. of the latter (Porter, Handb. p. 348: Van de Velde, Map). Its situation, on an isolated rocky hill in the middle of a green plain buried in the hills, is quite in accordance with its name, which is probably a mere variation of Ramah, "height." But it appears to be too far south to be within the territory of Issachar, which, as far as the scanty indications of the region can be made out, can hardly have extended below the southern border of the plain of Esdraelon.

For Schwarz's conjecture that Romanh is Ra-mathaid-zoimim, see that article (iii. 2672).

REMMON (רמ"ון), i.e. Rimmon (pomegranate): Pe'amud: Alex. Pe'amud: Remmon. A town in the allotment of Simeon, one of a group of four Josh. xix. 7). It is the same place which is elsewhere accurately given in the LXX as Rimmon: the inaccuracy both in this case and that of Remmon-Methoar: leaving no doubt as to whether the translators inadvertently followed the Vulgate, which again followed the LXX.

REMMON-METHOAR (רמ"מון-מדור), i.e. Rimmon ham-methoar (pomegranate): Pe'amud: Pe'amud: Remmon, Amotheh. A place which formed one of the landmarks of the eastern boundary of the territory of Zebulun (Josh. xix. 13 only). It occurs between Eth-Katshim and Nehus. Methoar does not really form a part of the name; but is the Pael of 

... to stretch, and should be translated accordingly (as in the margin of the L. V.) — "R. which reaches to Nehus." This is the judgment of Ges. mem. Thes. p. 1293 a, Reiger, 6. 491 A; First. Handb. ii. 512 a, and Hansen, as well as of the ancient Jewish commenator Rashi, who quotes as its authority the Targum of Jonathan, the text of which has however been subsequently altered, since in its present state it agrees with the L. V. in not translating the word. The latter course is taken by the LXX. and Vulgate as above, and by the Peshito, Ammon and Trenchell, and Luther. The A. V. has here further erroneously followed the Vulgate in giving the first part of the name as Remmon instead of Rimmon.

This Rimmon does not appear to have been known to Eusebius and Jerome, but it is mentioned by the early traveller Parchi, who says that it is called Runmarch, and stands an hour south of Sephoris (Zeno's Bengaum, ii. 433). If for south we read north, this is in close agreement with the statements of Dr. Robinson (Bibl. Res. iii. 110), and Mr. Van de Velde (Map: Hesnö; p. 344), who place Runmarch on the S. border of the Plain of Betthurat, 3 miles N. E. of Saffuriah. It is difficult, however, to see how this can have been on the eastern boundary of Zebulun.

Rimmon is not improbably identical with the Levitical city, which in Josh. xxvi. 35 appears in the form of Rimman, and again, in the parallel lists of Chronicles (1 Chr. vi. 77) as Rimmono (A. V. Rimmon).

REMPHAN (רמphon, [Lachm. Tisch. Treg.]): Pe'amud: Remphon, Acts vii. 49): and CHIUN (ךיוונ, [Choon]: Pe'a-mud: Poomay, Comple. Am. v. 26) have been supposed to be names of an idol worshipped by the Israelites in the wilderness, but seem to be the names of two idols. The second occurs in Ammon, in the Heb.: the first, in a quotation from that passage in St. Stephen's address, in the Acts: the LXX. of Ammon has, however, the same name as in the Acts, though not written in exactly the same manner. Much difficulty has been occasioned by this corresponding occurrence of two names so wholly different in sound. The most reasonable opinion seems to be that Chinn was a Hebrew or Semitic name, and Rempahan an Egyptian equivalent substituted by the LXX. The former, rendered Saturn in the Syr., was compared with the Arab, and Pers. سپان "the planet Saturn," and, according to Kircher, the latter was found in Coptic with the same signification; but perhaps he had no authority for this excepting the supposed meaning of the Hebrew Chinn. Egyptology has, however, shown that this is not the true explanation. Among the foreign divinities worshipped in Egypt, two, the god RENPU, perhaps pronounced REMPHU, and the goddess KEN, occur together. Being cognate, according to the passages in which Chinn and Remphan are mentioned, it will be desirable to speak, on the evidence of the monuments, of the foreign gods worshipped in Egypt, particularly Remphan and Ken, and of the idolatry of the Israelites while in that country.

Besides these divinities represented on the monuments of Egypt which have Egyptian forms or names, or both, others have foreign forms or names, or both. Of the latter, some appear to have been introduced at a very remote age. This is certainly the case with the principal divinity of Memphis, Pta'h, the Egyptian Hapheастes. The name Pta'h is from a Semitic root, for it signifies "open," and in Heb. we find the root מפם and its cognates, he or it opened, whereas there is no word related to it in Coptic. The figure of this divinity is that of a deformed pigmy, or perhaps unborn child, and is unlike the usual representations of divinities on

no trace in the Hebrew, but which is possibly the Tochon of 1 Chr. iv. 22 — in the LXX. of that passage Messes.
the monuments. In this case there can be no doubt that the introduction took place at an extremely early date, as the name of Ptah occurs in very old tombs in the necropolis of Memphis, and is found throughout the religious records. It is also to be noticed that this name is not traceable in the mythology of neighboring nations, unless indeed it corresponds to that of Ἰάρακου or Ἴαρακοί, whose images, according to Herodotus, were the figure-heads of Phoenician ships (ii. 37). The foreign divinities that seem to be of later introduction, and whose tombs are not found throughout the religious records, but only in single tablets, or are otherwise very rarely mentioned, and two out of their four names are immediately recognized to be non-Egyptian. They are RENPU, and the goddesses KEN, ANTA, and ASTARTA. The first and second of these have foreign forms; the third and fourth have Egyptian forms; there would therefore seem to be an especially foreign character about the former two.

RENPU, pronounced REMPU (?),a is represented as an Asiatic, with the full beard and apparently the general type of face given on the monuments to most nations east of Egypt, and to the REBU or Libyans. This type is evidently that of a she-bear. His hair is bound with a fillet, which is ornamented in front with the brand of an antelope.

KEN is represented perfectly naked, holding in both hands corn, and standing upon a lion. In the last particular the figure of a goddess at Mattheiye- yeh in Assyrta may be compared (Layard, Niniveh, ii. 212). From this occurrence of a similar representation, from her being naked and carrying corn, and from her being worshipped with KHEM, we may suppose that KEN corresponds to the Syrian goddess, at least when the Later and the character of Venus. She is also called KETESH, which is the name in hieroglyphics of the great Hittite town on the Orontes. This in the present case is probably a title, .prevent:. It can scarcely be the name of a town where she was worshipped, applied to her as personifying it.

ANTA appears to be Anatís, and her foreign character seems almost certain from her being jointly worshipped with RENPU and KEN.

ASTARTA is of course the Ashlorth of Canaan.

On a tablet in the British Museum the principal subject is a group representing KEN, having KHEM on one side and RENPU on the other; beneath is an adoration of ANTA. On the half of another tablet KEN and KHEM occur, and a dedication to RENPU and KETESH.

We have no clear to the exact time of the introduction of these divinities into Egypt, nor except in one case, to any particular places of their worship. Three names occur as early as the period of the XVIIth and XIXth dynasties, and it is therefore not improbable that they were introduced by the Shepherds. ASTARTA is mentioned in a tablet of Amenophis II., opposite Memphis, which leads to the conjecture that she was the foreign Venus there worshipped, in the quarter of the Phoenicians of Tyre, according to Herodotus (ii. 112). It is observable that the Shepherds worshipped SUTEKH, corresponding to SETH, and also called BAR, that under king APEPÉE, he was the sole god of the foreigners. SUTEKH was probably a foreign god, and was certainly identified with Baal. The idea that the Shepherds introduced the foreign gods is therefore partly confirmed. As to RENPU and KEN we can only offer a conjecture. They occur together, and KEN is a form of the Syrian goddess, and it is not surprising that the name be applied to the Egyptian god of productivity, KHEM. Their similarity to Baal and Ashlorth seems strong, and perhaps it is not unreasonable to suppose that they were the divinities of some tribe from the east, not of Phoenicians or Canaanites, settled in Egypt during the Shepherd-period. The naked goddess KEN would suggest such worship as that of the Babylonian Mylitta, but the thoroughly Semite appearance of RENPU is rather in favor of an Arab source. Although we have not discovered a Semitic origin of either name, the absence of the names in the mythologies of Canaan and the neighboring countries, as far as they are known to us, inclines us to look to Arabia, of which the early mythology is extremely obscure.

The name of Egypt, under Joseph's rule, appears to have fallen into a general, but doubtless not universal, practice of idolatry. This is only twice distinctly stated and once alluded to (Josh. xxiv. 14; Ez. xx. 7, 8, xxiii. 3), but the indications are perfectly clear. The mention of CHIHUN or REMPHAN as worshipped in the desert shows that this idolatry was, in part at least, that of foreigners, and probably some of those settled in Lower Egypt. The golden calf, at first sight, would appear to be an image of Aphis of Memphis, or Mucius of Heliopolis, or some other sacred bull of Egypt; but it must be remembered that we read in the Aposrypha of "the heifer Baal" (Tob. i. 5), so that it was possibly a Phoenician or Canaanite idol. The best parallel to this idolatry is that of the Phoenician colonies in Europe, as seen in the idols discovered in tombs at Camirus in Rhodes by M. Salzmann, and those found in tombs in the island of Sardinia (of both of which there are specimens in the British Museum), and those represented on the coins of Miletta and the island of Eubea.

We can now endeavor to explain the passages in which and Nemahm occurs. The Memphite text of Amos v. 21 reads thus: "But ye have the tent [or 'tabernacle'] of your king and Chinn your images, the star of your gods [or 'your god'], which ye made for yourselves." In the LXX. we find remarkable differences; it reads: ἄφιεται τήν σκήνην τοῦ Μαλέχ, καὶ τὸ ἑσπέραν τοῦ θεοῦ Ἡσαβαν, τῶν τύπων αὐτῶν ὧν ἐπιτύπωσε σεαυτὸν ηὐσωστέναι. The Vulg. agrees with the Masoretic text of Amos v. 21. There is no question of worshipping Chinn or Nemahm. "Et portatit tabernaculum Moloch vestro, et imagines idolorum vestrorum, sidis dei vestri, quae faecistis robis." The passage is cited in the Acts almost in the words of the LXX.: "Ye, ye took up the tabernacle of Moloch, and the star of your god Nemahm, images which ye made to worship them."
REMPHAN

"Remphan to Moloch, and to Astron to the stars of Remphan, and to Tophus, about the worship of Remphan." A slight change in the Hebrew would enable us to read Moloch (Malcolm or Molcom) instead of "your king." Beyond this it is extremely difficult to explain the differences. The substitution of Remphan for Chinn cannot be accounted for by verbal criticism. The Hebrew does not seem as distinct in meaning as the LXX., and if we may conjecturally emend it from the latter, the last clause would be, "your images which ye made for yourselves"; and if we further transverse Chinn to the place of "your god Remphan," in the LXX., the place of "was the tabernacle of Moloch would correspond to ἄρπα ὑπὸ τοῦ χριστοῦ τοῦ θεοῦ, but how can we account for such a transposition as would thus be supposed, which, be it remembered, is less likely in the Hebrew than in a translation of a difficult passage? If we compare the Masoretic text and the supposed original, we perceive that in the former ἀρπαίον ὑπὸ τοῦ χριστοῦ corresponds to ἄρπα ὑπὸ τοῦ χριστοῦ and it does not seem an unwarrantable conjecture that ἀρπαίον having been by mistake written in the place of ἀρπαίον by some exquisitely careless scribe was also transposed. It appears to be more reasonable to read "images which ye made," than "gods which ye made," as the former word occurs. Supposing these emendations to be probable, we may now examine the meaning of the passage.

The tent or tabernacle of Moloch is supposed by Gesenius to have been an actual tent, and he compares the σκήνη ἑκάτη of the Cartaginians (Isod. Sic. xx. 63; i.e. s. v. σκήνη). But there is some difficulty in the idea that the Israelites carried about so large an object for the purpose of idolatry, and it seems more likely that it was a small model of a larger tent or shrine. The reading Moloch appears preferable to "your king;" but the mention of the idol of the Ammonites as worshipped in the desert stands quite alone. It is perhaps worthy of note that there is reason for supposing that Moloch was a name of the planet Saturn, and that this planet was evidently supposed by the ancient translators to be intended by Chinn and Remphan. The correspondence of Remphan or Raiphon to Chinn is extremely remarkable, and can, we think, only be accounted for by the supposition that the LXX. translator or translators of the prophet had Egyptian knowledge, and being thus acquainted with the joint worship of Ken and Kenpu, substituted the latter for the former, as they may have been unwilling to repeat the name of a foreign Venus. The star of Remphan, if indeed the passage is to be read so as to connect these words, would be especially appropriate if Remphan were a planetary god; but the evidence for this, especially as partly founded upon an Arab. by Eutych. which the LXX. translator did not sufficiently strong to enable us to by any stress upon the agreement. In hieroglyphies the sign for a star is one of the two composing the word SEB, "to adore," and is undoubtedly there used in a symbolic as well as a phonetic sense, indicating that the ancient Egyptian religion was partly derived from a system of star-worship; and there are representations on the monuments of mythical creatures or men adoring stars (Ancient Egyptians, p. 30, a.). We have, however, no positive indication of any figure of a star being used as an idolatrous object of worship. From the manner in which it is mentioned we may conjecture that the star of Remphan was of the same character as the tabernacle of Moloch, an object connected with false worship rather than an image of a false god. According to the LXX. reading of the last clause it might be thought that these objects were actually images of Moloch and Remphan; but it must be remembered that we cannot suppose an image to have had the form of a tent, and that the version of the passage in the Acts, as well as the Masoretic text, it in the latter case we may change the order of the words, give a clear sense. As to the meaning of the last clause, it need only be remarked that it does not oblige us to infer that the Israelites made the images of the false gods, though they may have done so, as in the case of the golden calf: it may mean no more than that they adopted these gods.

It is to be observed that the whole passage does not indicate that distinct Egyptian idolatry was practised by the Israelites. It is very possible that the only false gods mentioned as worshipped by them in the desert should be probably Moloch, and Chinn, and Remphan, of which the latter two were foreign divinities worshipped in Egypt. From this we may reasonably infer, that while the Israelites sojourned in Egypt there was also a great stranger-population in the Lower Country, and therefore that it is probable that these sheepards still occupied the land.

R. S. P.

* Jablonski (Pantheon Egyptianum, Prolegomena. L.) makes Remphah the equivalent of regnum Coli, that is Lower, whose worship was maintained in Egypt at an early day. His attempt, however, to prove that this was an Egyptian divinity, in his learned treatise Remphah illustratus, is not borne out by the evidence of the monuments, the Asiatic type of countenance being strongly marked in the delineations of this god. He is represented brandishing a club. A good specimen is to be seen in the Museum of the Louvre at Paris (Salles des Monuments Religion, Armoire K), where is collected in one view a complete Egyptian Pantheon.

Movers (Die Religion der Phönizier) finds no traces of the worship of the gods of Tyre or Carthage. He makes Moloch the fire-god of the Ammonites, whose worship was extended through Assyria and Chaldea the personification of fire as the holy and purifying element.

Count Rongé considers Atesh or Ketesh and Anua or Anaxa to be different forms or characters of the same divinity, an Asiatic Venus, for though she wears the same head-dress and divinely as the Egyptian goddess Hathor, the Egyptians never represented their own goddesses by an entirely nude figure. Both forms of this divinity may be seen in the Louvre, as above. As Anua she appears as the goddess of war, wielding a battle-axe, and holding a shield and lance. Such was also the character of Anaxa, the war-goddess of the Persians and old Assyrians. According to Movers, Anaxa was a divinity of a universal character, whose worship, under various names, was world-wide.

J. P. T.

* REPETITIONS IN PRAYER. It is a characteristic of all superstitions devotion to repeat endlessly certain words, especially the names
REPHAIM, THE VALLEY OF 2705

4. [Sln. Παφαίαον.] Son of Bneoa, and descendant of Saul and Jonathan (1 Chr. ix. 43). In 1 Chr. vii. 37 he is called РАРИА.

5. The son of Hur, and ruler of a portion of Jerusalem (Neh. iii. 9). He assisted in rebuilding the city wall under Nehemiah.

REPH'AEL [2737]: h κοιλώς τῶν Ταρσίων [Var. Τέρεν.], and [1 Chr.] τῶν Γανγώνων; Κ. Ραφαίλ [Var. εὐων, Alex. εὐων.]; in Isaiah φαραγς στρεφέν, 2 Sam. v. 18, 22, xviii. 13; 1 Chr. xiv. 15, xiv. 9; Is. xviii. 5. Also in Josh. xv. 8, and xviii. 16, where it is translated in the A. V. "the valley of the giants." Την Παφαίαον και Ραφαίαον [Var. εὐων, Alex. εὐων.]

A spot which was the scene of some of David's most remarkable adventures. He twice encountered the Philistines there, and instilled a destruction on them and on their idols so signal that it gave the place a new name, and impressed itself on the popular mind of Israel with such distinctness that the Prophet Isaiah could employ it in connection with a later, as a term implying judgment of god—nothing less than the devastation and destruction of the whole earth (Is. xxviii. 21, 22.)

[PERHAIM, MOUNT.]

It was probably during the former of these two contests that the incident of the water of Bethlehem (2 Sam. xxii. 13, &c.) occurred. The word "valley" (21) in which David found himself is (though it is not clear) to have been the base of Adullam, the scene of the commencement of his freebooting life; but, wherever situated, we need not doubt that it was the same fastness as that mentioned in 2 Sam. v. 17, since, in both cases, the same word (2737, with the def. article), and not a usual one, is employed.

The story shows very clearly the predatory nature of these invasions of the Philistines. It was in "harvest time" (ver. 13). They had come to carry off the ripe crops, for which the valley was proverbial (Is. xvi. 5), just as at Pas-dammim (1 Chr. xiv. 13) we find them in the parcel of ground full of barley, at Lehi in the field of lentils (2 Sam. xxiii. 11), or at Keilah in the threshing-floors (1 Sam. xxiii. 1). Their animals were scattered among the ripe corn receiving their load of plunder. The "carrion," or the officer, in charge of the expedition, was on the watch in the village of Bethlehem.

This narrative seems to imply that the valley of Rephaim was near Bethlehem; but unfortunately neither this nor the notice in Josh. xv. 8 and xviii. 16, in connection with the boundary line between Judah and Benjamin, gives any clue to its situation, still less does its connection with the groves of mulberry trees or Raca (2 Sam. v. 23), itself unknown either to the historian (12, § 4) or later writers, as "the valley which extends (from Jerusalem) to the city of Bethlehem."

Since the latter part of the 16th cent. the name has been attached to the upland plain which stretches south of Jerusalem, and is crossed by the

worthy Syriac version of the rare word 2737 (2 Sam. xxiii. 13), rendered in our version "tropo."

c Note. The meaning is uncertain (see vol. i. 335, note).

d According to Tabor (Topographia, etc., ii. 94), Cotowcym is the first who records this identification.

A. V. Had it been 2737, "down" might have been added with safety.

This is the rendering in the ancient and trust-
road to Bethlehem — the el-Bak'ah of the modern Arabs (Tobler, Jerusalem, etc., p. 401). But this, though appropriate enough as regards its proximity to Bethlehem, does not answer at all to the meaning of the Hebrew word el-Bak', which appears always to designate an inclosed valley, never an open upland plain like that in question, the level of which is as high, or nearly as high, as that of Mount Zion itself. [VALLEY.] El-Bak'ah, (Omsbarr, Ombsbar, Papsas and Εμβασσαρι) calls it the valley of the Philistines (κοιλας Αλαμαήσαρω), and places it on the north of Jerusalem," in the tribe of Benjamin.

A position N. W. of the city is adopted by Dillmann (Handb. ii. 383 B), apparently on the ground of the terms of Josh. xiv. 8 and xvi. 16, which certainly do leave it doubtful whether the valley is on the north of the boundary or the boundary on the north of the valley; and Tobler, in his last investigations (Gute Wanderung, p. 292), conclusively adopts the Wady el-Jebel (H. M. Mohlendorf, in Van de Velde's map), one of the side valleys of the great Wady el-Belt Horm, as the valley of El-Bak'ah. This position is supported by the obvious objection of too great distance from both Bethlehem and the cave of Adullam (according to any position assignable to the latter) to meet the requirements of 2 Sam. xxii. 13.

The valley appears to derive its name from the ancient nation of the Rephaim. It may be a trace of an early settlement of theirs, possibly after they were driven from their original seats east of the Jordan by Chedor-lamon (Gen. xiv. 5), and before they again migrated northward to the more secure wooded districts in which we find them at the date of the partition of the country among the tribes (Josh. xvi. 12; A. V., "giant"). In this case it is a parallel to the "mount of the Amalekites" in the centre of Palestine, and to the towns bearing the name of the Zemaraim, the Avvim, the Ophubites, etc., which occur so frequently in Benjamin (vol. i. p. 277, note b).

**REPHIDIM (רַפִּדִים):** Pāpāsēr (Ῥαψίδια). Ex. vii. 1, 8; xix. 2. The name means "rest" or "stay," the place lies in the march of the Israelites from Egypt to Sinai. The "wilderness of Sin" was succeeded by Rephidim according to these passages, but in Num. xxxii. 12, 13, Dophkah and Alush are mentioned as occurring between the people's exit from that wilderness and the valley of Rephidim. That latter locality is nothing known of these two places which will enable us to fix the site of Rephidim. [ALUSH: DOPHKAH.] Lepsius' view is that Mount Sārāhā is the true Horeb, and that Rephidim is Wady Feiran, the well known valley, richer in water and vegetation than any other in the peninsula (Lepsius' Toun from Thebes to Sinai, 1845, pp. 21, 37). This would account for the expectation of finding water here, which, however, from some unexplained cause failed. In Ex. xvi. 6, "the rock in Horeb" is named as the source of the water miraculously supplied. On the other hand, the language used Ex. xix. 1, 2, seems precise, as regards the point that the journey from Rephidim to Sinai was a distinct stage. The time from the wilderness of Sin, reached on the fifteenth day of the second month of the Exodus (Ex. xvi. 1), to the wilderness of Sinai, reached on the first day of the third month (xix. 1), is from fourteen to sixteen days. This, if we follow Num. xxxii. 12-15, has to be distributed between the four march-stations, Dophkah, Alush, and Rephidim, and their corresponding stages of journey, which would allow two days' rest to every day's march, as there are four marches, and 4 × 2 + 4 = 12, leaving two days over from the fourteenth. The first grand object being the arrival at Sinai, the intervening distance may probably have been despatched with all possible speed, considering the weakness of the host by reason of women, etc. The name Horeb is by Robinson taken to mean an extended range or region, some part of which was near to Rephidim, which he places at Wady esh-Sheikh walking from N. E. to S. W., on the W. side of Gebel Feiran, opposite the northern face of the modern Mount Horeb, on the line of Joshua xiv. 1. The exact spot of Robinson's Rephidim is a defile in the esh-Sheikh visited and described by Buxtorf-Hardt (Syria, etc., p. 488) as at about five hours' distance from where it issues from the plain Er-Rotb, narrowing between abrupt cliffs of blackened granite to about 40 feet in width. Here is also the traditional "sett of Moses" (Robinson, i. 121). The opinion of Stanley (Israel, p. 49, vol. ii. 40, 42), on the contrary, with Bitter (xvi. 740, 741), places Rephidim in Wady Feiran, where the traces of building and cultivation still attest the importance of this valley to all occupants of the desert. It narrows in one spot to 100 yards, showing high mountains and thick woods, with gardens and date-groves. Here stood a Christian church, city and episcopal residence, under the name of Paran, before the foundation of the convent of Mount St. Catherine by Justianus. It is the finest valley in the whole peninsula (Buxtorf-Hardt, Archiv, p. 602; see also Robinson, i. 117, 118). Its fertility and richness accord, as Stanley thinks, for the Amalekites' struggle to retain possession against those whom they viewed as intrusive aggressors. This view seems to meet the largest amount of possible conditions for a site of Sinai. Lepsius, too (see above) dwells on the fact that it was of no use for Moses to occupy any other part of the wilderness, if he could not deplore the Amalekites of the only spot (Feiran) which was inhabited. Stanley (41) thinks the word describing the ground, rendered the "hill" in Ex. xii. 9, 10, and said adequately to express that on which the church of Paran stood, affords an argument in favor of the Feiran identity.

* Upon the other hand, however, it may be urged with much force, that since Wady Feiran is full twelve hours' march from Jebel Musa, Rephidim could not have been in that valley if the identity of Sinai with this mountain is maintained; have certainly recognized the true position of Rephidim (i.e. at Wady Feiran), and he did not pass by Wady Feiran with its brook, garden, and ruins — the most interesting spot in the peninsula — in order to see Sārāhā-ul-Charām (ibid. p. 22). And Stanley adjoins the objection of bringing the Israelites through the most striking scene in the desert, that of Feiran without any event of importance to mark it.

---

2706 REPHIDIM
for Rephidim was distant from Sinai but one day's march (Ex. xix. 2; Num. xxxii. 15), and the distance from Wady Feiran to Jebel Musir could not have been accomplished by so great a multitude on foot in a single march. Moreover, the want of water spoken of in Ex. xiii. 1, 2, seems to preclude the Wady Feiran as the location of Rephidim; for the Wady has an almost perennial supply of water, whereas the deficiency referred to in the narrative seems to have been natural to the sterile and rocky region into which the people had now come, and it was necessary to supply them from a supernatural source.

The location of Rephidim must be determined by that of Sinai; and the author of the above article, in his article on Sinai, seems to answer his own arguments for placing Rephidim in the Wady Feiran with Serabit as the Sinai, and to accept in the main Dr. Robinson's identification of Sinai and Horeb, which requires that Rephidim be transferred to Wady es-Sherik. The weight of topographical evidence and of learned authority now favors this view.

* REPROBATE (RSB: αδικοίοι), incapable of enduring trial, or when tested, found unworthy (with special reference, primarily, to the assay of metals, see Jer. vi. 30), hence, in general, corrupt, worthless.

The word is employed by St. Paul, apparently for the sake of the antithetic parallelism, 2 Cor. xiii. 5, 6, in the merely negative sense of "not approved;" "untested," with reference to himself as being left, supposedly, without that proof of his apostleship which might be furnished by disciplinary chastisements, inflicted upon offenders through his instrumentality. The same word, which is ordinarily in the A. V. translated "reprobate," is rendered 1 Cor. ix. 27, "a constancy," and Heb. vi. 8, "rejected." D. S. T.

RESEN (RSN: Δήσης; [Alex.] Δαρεχ: Resen) is mentioned only in Gen. x. 12, where it is said to have been one of the cities built by Aschar, after he went out of the land of Shinor, and to have lain "between Nineveh and Calah." Many writers, who have been inclined to identify it with the Rhesina or Rhescia of the Byzantine authors (Annum, Marc. xxxii. 5; Procop. Bell. Pers. ii. 19; Steph. Byza. sub roce "Pteis", and of Poleney (Geograph. v. 18), which was near the true source of the western Khabour, and which is most probably the modern Ras-el-Lain. (See Winet's Reisetwörterbuch, sub voce "Resen"). There are no grounds, however, for this identification, except the similarity of name (which similarity is perhaps fanciful, since the LXX. evidently read Ἀδρεσία for Δήσης), while it is a fatal objection to the theory that Resena or Resina was not in Assyria at all, but in Western Mesopotamia, 200 miles to the west of both the cities between which it is said to have lain. A far more probable conjecture was that of Rodari (Geograph. Succ. iv. 29), who found Resen in the Larica of Xenophon (Anab. ii. 4, § 7), which is most certainly the modern Nimevd. Resen, or Dosen — whichever may be the true form of the word — must assuredly have been in this neighborhood. As, however, the Nimrod ruins seem really to represent Cilicia, while those opposite Mosul are the remains of Nineveh, we must look for Resen in the tract lying between these two sites. Assyrian remains of some considerable extent are found in this situation, near the modern village of Selim-yek, and it is perhaps the most probable conjecture that these represent the Resen of Genesis. No doubt it may be said that a "great city," such as Resen is declared to have been (Gen. x. 12), could scarcely have intervened between two other large cities which are not twenty miles apart; and the ruins at Selim-yek, it must be admitted, are not very extensive. But perhaps we ought to understand the phrase "a great city," rather — i. e., great, as cities went in early times, or great, considering its proximity to two other larger towns.

If this explanation seem unsatisfactory, we might perhaps conjecture that originally Asshur (Kalhe-Shergbat) was called Calah, and Nimrod Resen; but that, when the west of empire was removed northwards from the former place to the latter, the name Calah was transferred to the new capital. In stances of such transfers of name are not unfrequent.

The later Jews appear to have identified Resen with the Kalhe-Shergbat ruins. At least the Fargums of Jonathan and of Jerusalem explain Resen by Tel-Assur (קְנַרין or קְנָרִים), "the mound of Asshur." G. R.

* RESH, which means "head," is the name of one of the Hebrew letters (א). It designates a division of Ps. exx. and commences each verse of that division. It occurs in some of the other alphabetic compositions. (Psalms, Hebrew; Writing.)

RESHEPH (RSHP: רָשֵׁף; Alex. Resep: Reseph) A son of Ephraim and brother of Rephael (1 Chron. vii. 25).

* RESURRECTION. The Scripture doctrine of the resurrection and of the future life are closely connected; or, rather, as we shall see in the sequel, are practically identical.

It will be proper, therefore, to begin with the notices and intimations of both, which are contained in the Old Testament.

I. RESURRECTION in the Old Testament.

1. The passage which presents itself first for consideration is Ex. iii. 6, the address of God to Moses at the burning bush, saying, "I am the God of thy father, the God of Abraham, the God of Isaac, and the God of Jacob." This text takes precise notice of all others, insomuch as it is expressly appealed to by our Lord (Matt. xxv. 31, 32; Mark xii. 28; Luke xx. 37) in proof of a resurrection, and in confirmation of the principles which he declared.

Now, our Lord argues that since God is not a God of the dead but of the living, it is implied that Abraham, Isaac, and Jacob were still living. That they were still living is undoubtedly a truth of fact, and expresses, therefore, the truth of the relation of the divine consciousness (so to speak) to Abraham, Isaac, and Jacob, as indicated in those words. Moreover, this argument from those words was in accordance with the received modes of Jewish thought. It silenced the Sadducees. It probably has a foundation and a force in the structure of the Hebrew language which we cannot easily or fully appreciate. To us it would seem inconclusive as a piece of mere reasoning, especially when we consider that the verb of existence (שָׁם) is not expressed in the Hebrew. But it is not a piece
of mere reasoning. The recognition in the Divine mind of the then present relation to Abraham, Isaac, and Jacob, as living, is declared on Christ's authority; and the evidence of it contained in the Hebrew text was sufficient for the minds to which that evidence was addressed. A deeper insight into the meaning of this text, and into the character of Jehovah as the ever-living God and loving Father, would probably not clear to our own minds more of the inherent force of this argument of our Blessed Lord in proof of the resurrection of the dead.

2. The story of the translation of Enoch, Gen, v. 22, 24, manifestly implies the recognition of a future, superannulable life, as familiar to Moses and the patriarchs; or, otherwise, how should we find here, as the Apostle to the Hebrews argues, any illustration of the second great article of faith in God, namely, "He is a rewarder of them that diligently seek Him"?

3. The rapture of Elijah, as related in 2 Kings ii., implies as certainly a recognition of the same truth.

4. The raising of the child by Elijah, 1 K. xvii. 21-24, implies the fact, and the then existing belief in the fact, of the continued existence of the soul after death, i. e, after its separation from the body. "O Lord, my God," says the prophet, "I pray Thee, let this child's soul (מְגוֹשָׁב, nephesh) come into him again."

5. The same truth is implied in the account of the raising of the child by Elisha, 2 K. iv. 32-36.

6. Also, in the case of the dead man resuscitated by the contact of Elisha's bones, 2 K. xii. 21.—And these three last are illustrations also of the resurrection of the body.

7. The popular belief among the Hebrews in the existence and activity of the souls or spirits of the departed is manifest from the strong tendency which existed among them to resort to the practice of necromancy. See the familiar story of the witch of Endor, 1 Sam. xxviii. See also the solemn prohibition of this practice, Deut. xviii. 9-11; where we have expressly יִמְסֹנֶה יִמְסֹנֶה, dawah el-ham-mathim, a seeker of a miraculous response from the dead, —a necromancer. See also Lev. xix. 31 and xx. 6; where the Israelites are forbidden to have recourse to the מְגֹשָׁב, cloth, "such as have familiar spirits," according to the received translation, but according to Gesenius, "soothsayers who evoke the souls of the dead, by the power of incantations and magical songs, in order to give answers as to future and doubtful things."

Such was the witch of Endor herself, 1 Sam. xxviii. 7. These necromancers are, under this name, very frequently referred to in the O. T.; see Isa. xiii. 3 and xxiv. 4; Deut. xviii. 11; 2 K. xxi. 6; 2 Chr. xxxiii. 6, &c. In Isa. viii. 19, this word is used in a very significant connection: "And when they shall say unto you, Seek unto them that have familiar spirits, the מְגֹשָׁב, and unto wizards that peep and that matter; should not a people seek unto their God? for the living to the dead (בֶּהָרוֹפֶה הָלָּמֶד) ? To the law and to the testimony."

Now, it is of no consequence to our present purpose whether these necromancers really had intercourse with departed spirits or not, —whether the witch of Endor really called up the spirit of Samuel or not; they may all have been mere impostors jugglers, mountebanks: —it is all the same to us; the practice of consulting them and confiding in them proves incontestably the popular belief in the existence of the spirits they were supposed to evoke.

8. The same belief is shown in the use of the word רַפְּחָן (בֶּהָלוֹפֶה), sometimes translated "giants," and sometimes "the dead," but more properly meaning Meses, or, perhaps, "the dead of long ago:" see Isa. xiv. 9; Ps. lxxviii. 10; Prov. ii. 18, ix. 18, xvi. 16; and Isa. xxvi. 14, 19. [Giants, vol. ii. p. 912.]

9. This belief is shown also, and yet more distinctly, in the popular conceptions attached to Sheol, (בֶּהָלוֹפֶה, or בֶּהָלוֹפֶה), i. e, Hades, the abode of the departed. Our word grave, used in a broad and somewhat metaphorical sense, as equivalent to the abode of the dead in general, may often be a proper translation of Sheol; but it is to be carefully observed that Sheol is never used for an individual grave or sepulchre: —a particular man's grave is never called his sheol. Abraham's burying-place at Mamre, or Jacob's at Shechem, was never confounded with Sheol. However Sheol may be associated and that naturally enough —with the place in which the body is deposited and decays, the Hebrews evidently regarded it as a place where the dead continued in a state of conscious existence. No matter though they regarded the place as one of darkness and gloom; and no matter though they regarded its inhabitants as shades; —still they believed that there was such a place, and that the souls of the departed still existed there: see Isa. xiv. 9, 10; 2 K. vi. 18; "Hail (Sheol) from beneath is moved for thee at thy coming; it stirreth up the dead for thee, even all the chief ones of the earth; it hath raised up from their thrones all the kings of the nations. All they speak and say unto thee, Art thou also become weak as we? Art thou become like unto us?" This may be said to be the language of poetic imagery and personification: but it is not merely expressive of popular ideas. Jacob goes down to Sheol to his sons, Gen. xxxvii., 35. Abraham cometh to his fathers in peace, Gen. xv. 15. And so in general, the familiar phrase, "being gathered to his fathers," means more than dying as they had died, or being placed in the family tomb; it means, joined to their company and society in Sheol: see Job iii. 19-21, and xiv. 13; Ps. xvi. 10, and xlix. 14, 15. For the further development of the idea, connected with the later conception of the bosom of Abraham," see Luke xvi. 22. [Hell: Abraham's Bosom.]

10. There are many indications, in the Old Testament, of the idea of a resurrection proper, of a reunion of soul and body, and a transition to a higher life than either that of earth or of Sheol. The vision of the valley of the dry bones in Ezek. xxxvii., though it may be intended merely to symbolize the restoration of the Jewish state, yet shows that the notion of a resurrection of the body, even after its decay and corruption, had distinctly occurred to men's minds in the time of the prophet, and was regarded neither as absurd, nor as beyond the limits of Almighty power. It is even employed for the purpose of illustrating another grand idea, another wonderful fact.

In Isa. xxxvi. 19, the prophet says: "Thy dead men (Heb. מְלַחְצֶק) shall live, together with my
Resurrection

lead body shall they arise. Awake and sing, ye that dwell in the dust: for thy dew is as the dew of herbs, and the earth shall cast out the dead (\textsuperscript{23}N\textsuperscript{77}) Ps. xvi. 8-11: "My flesh also shall rest in hope; for thou wilt not leave my soul in hell (\textsuperscript{23}N\textsuperscript{69}) neither will thou suffer thy Holy One to see corruption." Ps. xvii. 15: "I shall be satisfied when I awake in thy likeness." Ps. xxiii. 4: "Though I walk through the valley of the shadow of death I fear no evil." Ps. lxxxi. 24-26: "Thou shalt guide me with thy counsel, and afterward receive me into glory. Whom have I in heaven but thee? and there is none upon earth that I desire besides thee. My flesh and my heart faileth, but God is the strength of my heart, and my portion forever." Job xiv. 13-15: "Oh that thou wouldst hide me in the grave (Shedel), that thou wouldest keep me secret until thy wrath be past, that thou wouldst appoint me a set time and remember me! If a man die shall he live again? all the days of my appointed time will I wait, till my change come. Thou shalt call, and I will answer thee; thou shalt have a desire to the rock of thy hands." Job xix. 23-27: "Oh that my words were now written! Oh that they were printed in a book! that they were graven with an iron pen and lead in the rock forever! For I know that my Redeemer (\textsuperscript{23}N\textsuperscript{25}) God, — who, Gesenius says, is here God himself, liveth, and that he shall stand in the latter day upon the earth; and after my skin let them devise strangery this body, yet in my flesh shall I see God. It is true many attempts have been made, by varying translations and special interpretations, to assign to this passage some other reference than to the resurrection of the dead. But if this last is the natural sense of the words, — and of this every candid reader must judge for himself, — it is just as credible as any other, for it is only begging the question to allege that the idea of a resurrection had not occurred at that time. Dan. xii. 2, 3: "And many that sleep in the dust of the earth shall awake, some to everlasting life, and some to shame and everlasting contempt." Here it can hardly with any reason be doubted that a proper resurrection of the body is meant. 11. This idea and hope of a future resurrection was not more distinctly implied during the period between the close of the Canon of the Old Testament and the Christian era. See 2 Mac. vii. 9, 14, 36; Wisdom, ii. 1, 23, and iii. 1-9.

12. If we compare the definition of faith in the eleventh chapter of the Epistle to the Hebrews, and the statement of the palpable truth that he who cometh to God must believe that he is, and that he is a "remember me," with the illustrations given in the rest of the chapter, drawn from the Old Testament, we shall see that it must be implied in the case of all of them, as well as of Enoch, that they looked for a future resurrection and everlasting life. See particularly vv. 10, 13-16, 19, 29, 35.

13. Four remarkable resurrection predictions in Ez. xxiv. 23, 24; xxvii. 24, 25; Jer. xxx. 7; and Hos. iii. 1: — where, in connection with a restoration of the Jews, we are told of "my servant David who shall be their prince," "David their king, whom I will raise up," etc. Also, the prediction in Mal. iv. 5: "I will send you Elijah the prophet," etc., with which compare Luke ix. 7, 8, 19. It seems that He, — with most other Jews, probably, — expected this last prediction to be fulfilled by a literal resurrection. The question is, Shall we find in such prophecies a resurrection, metempsychosis, or metaphor? Probably the last; see Matt. xii. 14, Mark viii. 13; Luke i. 17: John i. 21. Thus John the Baptist was Elias, and he was not Elias; that is to say, he was not Elias literally, but, as the angel said, he came "in the spirit and power of Elias;" and in him the prophecy was properly fulfilled, — he was the "Elias which was to come."

14. There are in the Classical as well as in the Hebrew writers, indications of the recognition not only of the continued existence of the souls of the departed, but of the idea of a proper resurrection; — showing that the thought does not strike the unsophisticated human mind as manifestly absurd. See Hom. ii. xxii. 54, and xxiv. 758 (\textit{aenarrat cororur}). See also Job.33, who uses the same word.

15. It must be admitted, however, that with all the distinct indications that the writers and scribes of the Old Testament looked for a future life and a final resurrection, they very often indulge in expressions of gloomy despondency, or of doubt and uncertainty, so regard to it; so that it is strictly true, for Jews as well as for Gentiles, that life and immortality are brought to light through the Gospel. For some of those gloomy utterances see Isa. xxxviii. 18, 19; Job xiv. 10-13; xvii. 14-16; x. 18-22; vii. 6-9; Ps. xxx. 9; xxxix. 12, 13; xlix. 19, 20; xxviii. 4-12; cih. 11, 12, 23-28; cih. 10-17; civ. 29-31; cix. 3-5; cix. 4-6; Eccles. iii. 18-22; iv. 4-10. But, on the other hand, see Eccles. xii. 7, 13, 14: "Then shall the dust return to the earth as it was; and the spirit shall return unto God that gave it." "For God shall bring every work into judgment, with every secret thing, whether it be good, or whether it be evil."

So then the soul, or spirit, neither perishes with the body, nor is absorbed into the Deity. It continues in conscious existence, a subject of reward or punishment.

1. There are five cases of the raising of dead persons recorded in the New Testament.

(b.) The widow's son at Nain, Luke vii. 11-15.

(c.) Lazarus of Bethany, John xi. 1-44.

(d.) Dorcas, or Tabitha, Acts xi. 36-42.

(e.) Eutychus, Acts xx. 9-12.

2. Several other references are made, in a more or less general way, to the power and the fact of miraculously raising dead persons: Matt. x. 8 (text disputed); xii. 5; Luke vii. 22; John xii. 1, 9, 17; Heb. xi. 39, 40.

It is to be noted that all these cases recorded or alluded to in the New Testament, like the cases of miraculous resurrections in the Old Testament, were resurrections to a natural, mortal life; yet they imply, no less, continued existence after death; they prolong, or rather, they presuppose a final resurrection.

3. The doctrine of a final general resurrection was the prevailing doctrine of the Jews (the Pharisees) at the time of Christ and his Apostles. See Matt. xxii.; Mark xii.; Luke xx. 33-39; John xi. 23, 24; Acts xxii. 6-8; xxiv. 14, 15, 21; and xxvi. 4-8. If, then, Christ and his Apostles gladly and solemnly assert the same doctrine. •
are not at liberty to give their words a strained or metaphorical interpretation. We must suppose them to mean what they knew they would be understood to mean. This is especially clear in the case of St. Paul, who had himself been educated a Pharisee.

The Jews seem to have also believed in *returning spirits*: Acts xii. 13-15; Matt. xiv. 24; Mark vi. 49; Luke xxiv. 35-39; but neither Christ nor his Apostles seem anywhere to have admitted or sanctioned this opinion.

4. The resurrection of Christ is the grand pivot of the Christian doctrine of the resurrection of the dead. Special characters of Christ's resurrection are: (1.) His body rose, which had not seen corruption. (2.) His body rose to immortal life—"to die no more," Rom. vi. 9, 10. (3.) His body rose a spiritual body—the same, and yet not the same, which had been laid in the tomb. John xvi. 19, 20; Luke xxiv. 13-22; Mark xvi. 12; 1 Cor. xv.; Phil. iii. 21; 1 Pet. iii. 21, 22. (4.) It is more consonant with the Scripture statements to hold that His body was a spiritual body, than that it was merely rising a natural, corruptible, mortal body, it was either gradually or suddenly consumed before or at his ascension, (5.) He was the first thus raised to a spiritual, immortal life in the body. 1 Cor. xv. 20, 23; for it is to be observed that, while the rocks were rent and thus the graves were opened at his resurrection, yet the bodies of the saints which slept did not arise and come out of their graves until after his resurrection. They, too, seem to have risen, not with natural bodies like Lazarus and others, but with spiritual bodies; for they are said to have "appeared unto many," but they do not seem to have lived again a natural life among men and to have died a second time. Neither were their "appearances" the apparitions of *returning spirits*; their bodies rose and came out of their graves—not out of "the grave," out of "Hades," or "Sheol," but out of "their graves." And, like their risen Lord, they soon disappeared from the scenes of earth.

5. There are several uses and applications, in the New Testament, of the words ἀνάστасις and θάνατος, which seem to be substantially synonymous. They are used in the figurative form often of the common thought, and which are alike translated "resurrection." The same is true of the verbs from which they are derived: (1.) They seem to import immortal life, in general, in a future world, Matt. xxii. 31, and the parallel passages in Mark and Luke: 1 Cor. xv. 18, 19. (2.) They signify distinctly the resurrection of the body, John v. 25, 29; xl. 23; 1 Cor. xv. 39-54, and all the cases where Christ's resurrection is spoken of, as John xv. 20-29; Luke xxiv. 3-7; Matt. xxvii. 52; xxviii. 13, &c., &c.: also 1 Cor. 1v. 20-23; and see Luke xvi. 31. (3.) They refer to a spiritual and moral resurrection, Eph. i. 20, comp. ii. 6; Phil. iii. 11 (?); Col. iii. 1; Rom. vi. 4-14; &c.

But here is to be noted, that, according to the ideas of the New Testament, we will be particularly seen in St. Paul's argument in 1 Cor. xv., the second signification is always implied in and with the first, as a condition or a consequence; and that the third is merely metaphorical.

6. The heathen or philosophic doctrine of immortality is to be carefully distinguished from the Christian doctrine of the resurrection. The *abstract immortality* of the human soul, its immortality independent of any reunion with the body, was indeed a favorite and lofty speculation of the ancient heathen philosophers. But they could never demonstrate its necessary truth by reasoning, nor establish its practical reality by positive evidence. It remained, and, for all human philosophy could ever do, must have continued, merely a beautiful vision, a noble aspiration, or, at least, a probable presumption.

The popular view of the Greek mind was developed in the ideas of Hades, Elysium, and Tartarus; and to this view may correspond also the popular Hebrew conception of Sheol; from which the veil of darkness—ever for the minds of inspired poets and prophets—was not entirely removed, until the glorious light of the Gospel shined upon it. The nearest approximation of heathen theories to the Christian doctrine of the resurrection, a kind of instinctive groping towards it, is found in the wide-spread philosophical and popular notion of *metempsychosis*. The immortality which the heathen imagined and to which they aspired, even in Elysium, was, for the most part, an external and impermanent immortality, which by to which they would unhesitatingly have preferred this present life in the flesh, if it could have been made permanent and raised above accident and pain. But their notions of metempsychosis could have afforded them at this point but meagre consolation. Instead of Paradise it was only an indefinite Purgatory.

But how has the Gospel brought life and immortality to light? By establishing as an indubitable practical fact the resurrection of the body. Thus the natural repugnance to annihilation, the indefinite longings and aspirations of the human mind, its fond anticipations of a life to come, are fully confirmed and satisfied. Immortality is no longer a dream or a theory, but a practical, tangible fact, a fact both proved and illustrated, and therefore capable of being both confidently and distinctly realized.

In the view of the New Testament, the immortality of the soul and the resurrection of the body always involve or imply each other. If the soul is immortal, the body will be raised; if the body will be raised, the soul is immortal. The first is the necessary and moral result of the second; the second is a matter of course. The Christian doctrine of immortality and resurrection is a convertible enthymeme.

And is not this plain, common-sense view of the Scriptures, after all, nearer the most philosophic truth, than the counter analytical abstractions? All we need care about, it is sometimes thought and said, is the immortality of the soul. Let that be established, and we have before us all the future life that we can desire. Why should we wish for the resurrection of this material incumbrance? But, though it is sufficiently evident that the human soul is somewhat distinct from the body—an immortal, thinking substance; and though we can easily conceive that it is capable of conscious activity in the form of internal activities, and of spiritual inter-communion, in a state of separation from the body; yet, inasmuch as all we have ever experienced, and all we thus positively know of its action and development, has been in connection with and by means of a bodily organization,—by what sort of philosophy are we to conclude that of course and of a certainty it will have no need of its bodily organization, either for its continued existence or even for its full action, progress, and enjoyment?
RESURRECTION

In a future state? How do we know that the human soul is not, in its very nature, so constituted as to need no bodily organization for the complete play and exercise of its powers in every stage of its existence? So that it would, perhaps, be inconsistent with the wisdom of its Creator to preserve it in an imperfect and mutilated state, a mere wreck and relic of itself and its noble functions, to all eternity? And so that, if the soul is to be continued in immortal life, it certainly is to be ultimately reunited to the body? Indeed, it would be quite as philosophical to conclude that the soul could not exist at all, or, at least, could not act, could not even exercise its consciousness, without the body; as to conclude that, without the body, it could continue in the full exercise of its powers.

Both these conclusions are contradicted by the Scripture doctrine of a future life. On the one hand, the soul is not unconscious while separated from the body, but is capable of enjoying the blissful spiritual presence and communion of Christ; for to be absent from the body is to be present with the Lord, and to be thus absent, and present with Christ, is "far better" than to be here at all; and, on the other hand, all the scriptural evidence, the full fruition, the first expansion, the power and the complete glorification of the soul, are not attained until the resurrection of the body is evident from the whole tenor of evangelical and apostolic instruction, and especially from the fact that the resurrection of the body—the redemption of the body—is constantly set forth as the highest and ultimate goal of Christian hope. As Christians, therefore, we should not prefer the abstract immortality of heathen philosophy, which, sad and shadowy as it was, could never be proved, to the resurrection-immortality of the Scriptures, which is revealed to us on Divine authority, and established by incontrovertible evidence. Nor should we seek to complete the heathen idea by engrafting upon it what we arbitrarily choose of the Scripture doctrine. If any portion of this doctrine is to be received, the whole is to be received; there is the same evidence for the whole that there is for a part; for, if any part is denied, the authority on which the remainder rests is annulled. At all events, our business here is to state, not so much what the true doctrine is, as what the Biblical doctrine is.

In saying, therefore, that if the body be not raised, there is no Scripture hope of a future life for the soul, we do not exalt the flesh above the spirit, or the resurrection of the body above the immortality of the soul. We only designate the condition on which alone the Scriptures assure us of spiritual immortality, the evidence by which alone it is proved. "As in Adam all die, even so in Christ shall all be made alive." Christ brought life and immortality to light, not by authoritatively asserting the dogma of the immortality of the soul, but by his own resurrection from the dead.

That the resurrection on which St. Paul so earnestly insists (1 Cor. xv.) is conceived of by him as involving the whole question of a future life must be evident beyond dispute. See particularly vv. 12-19, 29-32.

8. The New Testament doctrine of immortality is, then, its doctrine of the resurrection. And its doctrine of the resurrection we are now prepared to show involves the following points:

(1) The resurrection of the body;
(2) The resurrection of this same body;
(3) The resurrection in a different body;
(4) That, a resurrection yet future; and
(5) A resurrection of all men at the last day.

(1.) The New Testament doctrine of the resurrection is the doctrine of the resurrection of the body. That in the fifteenth chapter of his epistle to the Corinthians, St. Paul teaches the Christian doctrine of the resurrection of the body, we have already seen. His doctrine is supposed by some to be too refined, as they say, to be consistent with a proper resurrection of the body; and so they would contrastingly distinguish St. Paul's view from other and glossier views, whether in the New Testament or elsewhere. But on the other hand the truth seems to be that St. Paul does not give us any special or peculiar Pauline view of the Christian doctrine of the resurrection, but only a fuller exposition and defense of it than the New Testament elsewhere contains. The Pauline doctrine we accept as the Christian doctrine. And that the resurrection of which he speaks not only implies the immortality of the soul, but is, or necessarily and primarily implies, a resurrection of the body, is abundantly evident. That the resurrection of Christ, on whose doctrine the New Testament is based, was a resurrection of the body, would seem beyond dispute. Otherwise, if Christ's resurrection is to signify only the immortality of his soul, what means his rising on the third day? Did his soul become immortal on the third day? Was his soul shut up in Joseph's sepulchre that it should come forth thence? Did his soul have the print of the nails in its hands and feet? Did his soul have flesh and bones, as he was seen to have? Besides, if there is to be any proper sense in the term resurrection, that which has fallen must be that which is raised. The resurrection, therefore, must be a resurrection of the body. "He shall change our vile body that it may be fashioned like unto his glorious body, according to the working whereby he is able even to subdue all things unto himself." The doctrine of the resurrection, as taught by St. Paul, exposed him to the mockery of the Epicureans and Stoics; it must therefore have been a resurrection of the body, for the immortality of the soul would have been no theme of mockery to any school of Greek philosophers. The immortality of the soul has, for want of sufficient evidence, it might not be believed, was never rejected as incredible; but St. Paul's appeal is, "why should it seem a thing incredible with you that God should raise the dead?"

(2.) Moreover it is the resurrection of this identical body, of which the apostle speaks. The resurrection of Christ, which is the type and first fruits of ours, we have already seen. So the resurrection of his own body, of that very body which had been placed in Joseph's sepulchre. Otherwise, if it were merely the assumption of a body, of some body as a fit covering and organ of the soul, why is it said of his body that it saw no corruption? And what signifies his exhibiting to Thomas his hands and his side as means of his identification? When his disciples went to the sepulchre they found not the body of the Lord Jesus. What had become of it? That was the question. They felt that question properly and sufficiently answered when they found that he had risen from the dead.

"It is sown in corruption," says the Apostle: "it is raised in incorruption." What is raised
If it be not what is sown? and what is sown if it be not the body? — "This corruptible," the Apostle plainly adds, "this corruptible must put on incorruption, and this mortal must put on immortality." So then, it is not the corruptible soul that shall put on an incorruptible body, nor the immortal soul that shall put on an immortal body; but it is this corruptible and mortal body which is to put on — i.e., to assume, what it has not yet and in its own nature, an incorruptible and immortal constitution and organization, and so be reunited to the incorruptible and immortal soul.

It was suggested by Locke, and is often repeated by others, that "the resurrection of the body," though confused in the creed, is nowhere spoken of in the Scriptures, but only "the resurrection of the dead." — a statement which furnishes a remarkable illustration of the fact that a proposition may be verbally true and yet practically false. And, indeed, it can hardly be said to be even verbally true; for, besides the resurrection of our Saviour's body, we read in the Scriptures that "many bodies of saints which slept arose and came forth out of their graves," and his resurrection was "the first-fruits of them that slept," and, in general, that "our vile body shall be changed and fashioned like to his glorious body.

If the resurrection imports merely the assumption of a body, of some body, and not of the body, of this identical body, then why are the dead represented as coming forth, coming forth from their graves, coming forth from the body, of the plant grown up out of the earth, from the seed that has been deposited in it? What have they more to do with their graves, or with the mass of corruption which has been buried in the earth? The souls of the faithful departed are now with Christ; and to what end should they be made to come forth again from their graves at their resurrection upon his final appearing, — if they are then merely to assume a body, some body, which shall have nothing to do with the body which was laid in the tomb? — "We shall all be changed," says the Apostle. He certainly does not mean that we shall be changelings. He does not say that our bodies shall be exchanged for others, but "we shall be changed," i.e., our bodies shall undergo a change, a transformation whereby from natural they shall become spiritual bodies, so that this very corruptible itself shall put on incorruption.

Thus, though it is this very mortal body, this identical body, that shall be raised from the dead, it yet remains true that "flesh and blood," as such and unchanged, "cannot inherit the kingdom of God, neither doth corruption inherit incorruption." It is sown a natural body, it is raised a spiritual body.

(3.) And this brings us to the third point, that the resurrection of this same body is at once a resurrection in a different body.

But some will say, what sort of body is a spiritual body? Is not the expression a contradiction in terms? The answer is, that a spiritual body is a body fitted by its constitution to be the eternal habitation of the pure and immortal spirit. How a body must be constituted in order to be fitted for such a purpose, we do not know and cannot tell. But that for anything we do know or can urge to the contrary, there may be such a body — proper material body — without any contradiction or absurdity, St. Paul labors to demonstrate by a multitude of illustrations showing the vast diversity that exists among the bodies with which we are actually acquainted (1 Cor. xv. 38-44). Among all this variety of bodies, therefore, which Almighty power is able to constitute, there certainly may be, and the Apostle asserts that there certainly is, a spiritual body.

Some, supposing that the term spiritual was intended to describe the internal or essential constitution, rather than to indicate the use and purpose, of this resurrection body, have supposed that it would consist of some most refined and spiritualized kind of matter: and have suggested that it might be of an aerial, ethereal, or gaseous nature. But all such speculations transgress the bounds of our knowledge, and of our necessity; and are apt to end in something gross and grumbling, or subtitled and meaningless. The term spiritual, as already said, is here used by the Apostle to indicate, not the resurrection body is constituted, but that it is so constituted as to be a fit abode for the spirit in an eternal and spiritual world.

In the contrasted expression, "natural body," the term natural (ψωμι) means, in the original, animal or animated, physical, material, — if the word is not misapplied, which may not be assumed, that this body is composed of soul or of soul-like substance, but that it is fitted to be the abode and organ of the animal or animating part of man, of the sensitive soul. And thus we can understand the pertinence of the Apostle's allusion to Genesis, which otherwise must seem — as it probably does to ordinary readers — quite irrelevant and meaningless. Having laid down the assertion, "there is a natural body, and there is a spiritual body," he adds: "And so it is written, The first man Adam was made a living soul, the last Adam was made a quickening spirit." Now the word which is translated natural is directly derived from that translated soul, and thus the connection and the argument become plain and obvious: as if the Apostle had said, "There is a soul-body, and there is a spirit-body; and so it is written, The first man Adam was made a living soul, the last Adam was made a quickening spirit."

For it is to be observed that the Scriptures often make a distinction between soul and spirit, as well as between soul and body. Man, according to this Scripture philosophy, is viewed, not as bipartite but as tripartite, not as consisting of soul and body, but of body, soul, and spirit. So viewed, the body is the material organization, the soul is the animal and sensitive part, the spirit is the rational and immortal, the divine and heavenly part. It is true we are now, for the most part, accustomed to use soul as synonymous with spirit, — and so the Scriptures more frequently do, but they recognize also the distinction just pointed out. In Scripture phrase, the spirit is the highest part of man, the organ of the Divinity within him, that part which alone apprehends divine things and is susceptible of divine influences. Hence the Apostle says, "The natural man receiveth not the things of the Spirit of God, for they are foolishness unto him, neither can he know them because they are spiritually discerned." — where the term natural, is, in the original, against ψωμι, ψυκη, i.e., animal, pertaining to the soul. There are but two other cases in which the word is used in the New Testament, and in both it is translated sensual: James iii. 15, "earthly, sensual, devilish;" and Jude 19, "sensual, having not the Spirit." Thus, therefore, as the natural, or sensual, or animal, or psychical body, or the
soul-body, is a body, not constituted of soul-substance, but fitted for the use and habitation of the sensitive soul; so we conclude that the spiritual body is a body, not constituted or composed of spiritual substance—whereas which is a contradiction—but a true and proper body, a material body, fitted for the use and eternal habitation of the immortal spirit.

The thought is sometimes suggested, in one form or another, that these bodies of ours are vile and worthless, and do not deserve to be raised; and, therefore, that the spiritual body will have nothing to do with them. But it must be remembered that Christianity does not teach us to despise, to abuse, or to hate the body, vile and corruptible as it is. That is a Manichean and heathen notion. It is true, our present body may be viewed both as an organ and as an incumbrance of the soul. So far as it is an organ it is to be restored; so far as it is an incumbrance it is to be changed. This mortal is to put on immortality.

That which is sown in corruption is to be raised in incorruption. Christ at his appearing shall change our vile body, that it may be fashioned like unto his glorious body.” That the spiritual body is to be a modification of the natural body, being assumed or clothed upon it as a new and glorious form; that the one is to have a real, proper, and organic connection with the other, growing out of it as it were; so that each person will have, at the resurrection, not only an appropriate body, but his own body, seems sufficiently evident from the Apostle’s whole argument (1 Cor. xv.), and particularly from his illustration of the various plants which grow up from the seed cast into the ground. Each plant has an organic connection with its seed, and God gives “to each its own body.” It is the seed itself which is transformed into the plant which rises from it.

(4.) The resurrection of the body, of this same body, of this same body transformed into a new and spiritual body, is an event yet future.

“As in Adam all die, even so in Christ shall all be made alive.” But, “adds the Apostle, in many things we are as the vessel in his lifeworks, afterwards they are Christ’s at his coming.” Many men had died before Christ, men with immortal souls, yet none had been raised from the dead to immortal life before Him: He is the first fruits, the first-born, the first-zeuged from the dead. Nor is it said that any shall be raised after Him until his coming. Then the last trumpet shall sound, and the dead shall be raised incorruptible, and we who are alive and remain shall be changed. If the Christian doctrine of the resurrection were only this, that at the moment of death each soul receives a spiritual body fitted to its eternal state, why was not Christ raised till the third day? And why does the Apostle represent the resurrection of which he treats as both future and simultaneous for them that are Christ’s at his coming? Nor can we suppose the Apostle here to teach a merely spiritual resurrection, a resurrection from sin to holiness; for it so, why does he say that it shall take place at the sound of the last trumpet? And what would become of the distinction made between the dead who are to be raised, and the living who are to be changed? (5.) This future—resurrection of the body is to be a resurrection of all men at the last day.

This has partly appeared already under the preceding heads. We have seen that this is true of all that are Christ’s; but whether, in 1 Cor. xv., the Apostle teaches the final resurrection of all mankind may be a question. He does indeed say, “In Christ all shall be made alive,” but whether this means absolutely all, or only all who are in Christ, may fairly be doubted. Perhaps the Apostle’s meaning here might be thus paraphrased: “For as, by virtue of their connection with Adam, who, by sin, incurred the sentence of death, all men who are in him by nature, being sinners and actually sinning, die; even so, by virtue of their connection with Christ, who, by his righteousness, is the restorer of life, shall all men who are vitally united to Him by faith, be made alive, being raised from the dead in his glorious image.” But whatever may be the meaning of those particular words, it is, no doubt, the doctrine of Scripture that all, absolutely all the dead will be raised. St. Paul himself elsewhere unequivocally declares his belief—and declares it, too, as the common belief not only of the Christians, but of the Jews (the Pharisees) of his time, that “there shall be a resurrection of the dead, both of the just and unjust” (Acts xxiv. 15).

But it by no means follows that all will rise in the same glorious bodies, or be admitted to the same immortal blessedness. On the contrary, it was expressly predicted of old that “some shall awake to everlasting life, and some to shame and everlasting contempt” (Daniel xxv. 29), and everlasting death opposed to the everlasting life, but to shame and everlasting contempt, which must imply continued conscious existence. And our Lord Himself, having made the declaration: “the hour is coming, and now is, when the dead shall hear the voice of the Son of God, and they that hear shall live;—which may refer, and probably does chiefly refer, to a moral and spiritual resurrection;—expressly and solemnly adds: “Marvel not at this: for the hour is coming (he does not add, and now is), in the which all that are in the graves shall hear his voice, and shall come forth: they that have done good, unto the resurrection of life; and they that have done evil, unto the resurrection of damnation” (John v. 25, 28, 29).

The future resurrection of the wicked away, for ought we know, be as ignominious, hideous, and hateful, as perfectly fitted to be instruments and inlets of unending and most exquisite pain and torment, as the bodies of the saints shall be glorious and happy. The Scripture doctrine contains nothing positive on this point. St. Paul having briefly stated that “in Christ all shall be made alive,” even if in this he meant to include the wicked, gives us no further account of their resurrection; but goes on immediately to speak of those who are Christ’s at his coming; and thenceforth confines his attention exclusively to them. This was natural for the Apostle, who nevertheless certainly believed in a resurrection of the unjust as well as of the just; as it is still for Christians, who believe the same. The special Christian doctrine of the resurrection is a doctrine of hope and joy; but as such it is a doctrine in which those who are not Christ’s— who have not the Spirit of Christ,—have no share.

This resurrection is to be one general resurrection at the last day.

That such was the received doctrine in the time of our Lord is only doubted. “In the xi. 21, 24: Jesus saith unto her, thy brother shall rise again; Martha saith unto him, I know that he shall rise again in the resurrection at the last day.” Our Lord himself seems to recognize this doctrine in
his frequent use of the phrase, "I will raise him up at the last day," John vi. 39, 40, 44, 54. The same doctrine is distinctly taught by St. Paul (1 Thess. iv. 14-18). As to the date of the coming of the Lord, of which he speaks, and that it will have a reference to the wicked as well as to the just, see the first ten verses of the next chapter. See also the second epistle: particularly 2 Thess. i. 7-10. And for the date, see again 2 Thess. ii. 1-5. It is evident that the day of the coming of the Lord was, in St. Paul's view, in the uncertain future. It one sense it was always so, and in another sense it was not. 2 Thess. ii. 2. That he did not presume that he himself should be alive and remain unto the coming of the Lord, is plain from his solemn protestation (1 Cor. xv. 31) of his standing in such hourly jeopardy that he lived in the immediate prospect of death every day; while, in the very same connection and chapter (1 Cor. xv. 52) he associates himself with those who shall be alive at the sounding of the last trump as he had also done at 1 Thess. iv. 15-17. But it is not to be forgotten that elsewhere he expressly associates himself with those who will have departed before the coming of the Lord:—2 Cor. iv. 14: "Knowing that He which raiseth up the Lord Jesus shall raise up us also by Jesus, and shall present us unto Himself in the presence of His glory in the kingdom, both of this world and in the following chapter. Now this second epistle to the Corinthians was written almost immediately after the first. Nor does he afterwards betray the slightest symptom of disappointment in the prospect of his approaching martyrdom (2 Tim. iv. 6-8). If the Apostle had felt that he had been grossly deluded and deceived in regard to "that day," and "his appearing," and been left, "be the word of the Lord," to lead others into the same delusion and error, would he have retained this triumphant confidence at the last, and expressed it without one word of explanation or retraction of his (alleged) former delusive hopes? There is one passage in the Apocalypse which seems inconsistent with the doctrine of one general resurrection at the last day (Rev. xiv. 2). Here we have a "first resurrection," either of all the saints or of the martyrs only; and, after a long interval, a general resurrection and judgment. How this representation is to be interpreted is a subject of doubt and dispute. It may be difficult to reconcile it with the other statements of Scripture on the same subject. But, at farthest, it would separate into only two great classes of acts, that which is elsewhere regarded in one point of view.

III. THE CHRISTIAN DOCTRINE OF THE RESURRECTION NOT IMPOSSIBLE OR INCREDIBLE.

Before proceeding to defend this doctrine against objections, it may be proper to state distinctly what the doctrine is, and what it is not. It is, (1) that there will be a general resurrection at the last day of the bodies of all mankind.

(2) That the body in which each man will be raised will be the same as that in which he had lived: but changed, transformed at the resurrection, so as, from a natural body, to become a spiritual body: it will be at once the same and different.

Such is the doctrine; but how far and in what respects the spiritual bodies will be the same as the natural bodies—besides that they will have an organic connection with them: how far they will be like them in size, in form, in organization, in limbs, in functions; whether, e.g., they will have the hair, beard, nails, etc.; how far they may be subject to the physical laws of material things with which we are conversant; whether they will have the same senses as the natural bodies, or more or less; whether they will have fixed forms, or the power of assuming various forms; what will be their essential constitution, or how they may exercise their functions in relation either to the spiritual or the material world—except that they will be real bodies ("flesh and bones"); though not corresponding in "flesh and blood"; the doctrine neither affirms nor denies. These are all matters of mere speculation. To the question, "How are the dead raised up? and with what bodies do they come?" the Scriptures vouchsafe no further answer than "spiritual bodies," "like Christ's glorious body." His body retained the print of the nails, and the rent in the side after his resurrection, but it appeared also in various forms; he ate and drank with his disciples after his resurrection, but so did the angels with Abraham; that body at length rose above the clouds, disappeared from the gaze of his disciples, and ascended to the right hand of God; it was seen afterwards by St. Stephen in heavenly glory, and by St. Paul in a manifestation of overwhelming splendor. But after that, the body was all in all in this world, and the last days; and speculative questions; and the positive doctrine of Scripture is left within the limits already stated.

And now it remains to show that there is nothing impossible or incredible involved in this doctrine.

(1.) It is objected that a material organization cannot possibly be made incorruptible and immortal, and fitted to a spiritual state and spiritual purposes. But how does the objector know this?

(2.) It is said to be impossible that the identical body should be raised, because that body will have gone entirely out of existence, and in order for a resurrection or a restoration to take place, the thing so restored or raised must necessarily be in existence.

The latter sense cannot be intended by an objector who recognizes the law of nature, that no particle of matter is ever lost. And according to the former sense, the objector would make the restoration, reconstruction, reorganization of any body, under any circumstances, and on any hypothesis, a sheer absurdity; for, in order that a body may be restored, reconstructed, reorganized, he expressly makes it necessary that it should already exist, actually constructed and organized. Is this self-evident? or, perhaps the position of the objector is this: if a house, e.g., has fallen to ruin, and you restore it as it was before, it is not the same house; but if you restore it when it is not dilapidated, or reconstruct it without taking it to pieces—however great the changes you may make—it will be the same house. But does restoring mean merely repairing? And do reconstructing and reorganizing mean merely changing the existing structure and organization? If so, these words, as well as the word "resurrection," are commonly used in an abusive sense, or rather with no sense at all.

(3.) But it is thought that, even though the
body might be restored if it were simply resolved into dust, yet, inasmuch as it is resolved into elementary principles, into oxygen and other gases, which become mixed and confounded with the mass of gases of the same kind, or combined variously with gases of different kinds, it is impossible that the same portions of these gases should be segregated and brought together into the same body again. This will require careful consideration. We take for granted that the "elementary principles" into which the body is said to be resolved are matter, true and proper matter. This they certainly are unless our metaphysical analysis is prosecuted beyond all our chemical tests. At all events, they are either matter or not matter. If they are not matter, then masses of matter have been annihilated. If they are true and proper matter, then, like all matter, they are, or consist of, material particles. And the definite, identical, material particles of a cubic inch of oxygen are no more annihilated or absolutely lost or confounded by being mixed with other threads, or with ten thousand cubic feet of oxygen gas, than are the definite identical particles of a cubic inch of dust by being mixed with any quantity of homogeneous dust. It is certainly assuming more than is self-evident to say that omniscience cannot identify them and trace them through their new combinations, and that omnipotence cannot segregate them and restore them to their former connections. It is not here contended that this could be done by any human power or merely natural process, but it is insisted that the thing involves no contradiction, and therefore is not absolutely impossible. The case just stated involves precisely the pinching point of the objection, if it pinches anywhere. For, as to saying that one simple substance loses its identity by entering into composition with another simple substance, that is plainly false even on natural principles. Let us try a few instances.

If a certain number of grains of pure copper be combined with their definite proportion of oxygen, and this oxyde of copper be dissolved in nitric acid, we shall have the nitrate of copper, which may exist in a perfectly liquid form. But by decomposing this nitrate of copper the pure copper may be reproduced — the very same copper and no other — the identical copper with which the process was begun. Now copper is as truly an "elementary principle" as oxygen gas.

But gases themselves may be recovered from their combinations as well as metals. Let a quantity of oxygen and hydrogen be combined in the proportion for forming water. Let the water be decomposed by means of a quantity of potassium, and the hydrogen will be liberated, the very same hydrogen as at first; and the potash being afterwards decomposed, the original, identical oxygen may also be recovered. If, in these processes, some portion of the original, simple substances should escape from us, it would only show the imperfection of our manipulations, but would not in the slightest degree affect the applicability and force of the argument for the present purposes. That is a mere business of degrees. No principle is involved in the recovery of the whole, which is not involved in the recovery of a part. If, then, with our limited, practical powers, we can recover a part, surely it cannot be said to transcend the powers of omnipotence to recover the whole.

So much for the cases of inorganic combinations. Now take cases which involve the organic influence of the principle of life.

Let a quantity of calcium and a quantity of phosphorus be respectively combined with a due proportion of oxygen: let the lime be combined with the phosphoric acid; and let this phosphoric acid be mixed with a soil (or, rather, with a dust) which did not before contain a particle of calcium or phosphorus. Let some grains of wheat be planted in that soil: and, by an analysis of the product, we may obtain, in its original simple form, a portion at least of the identical calcium and phosphorus with which we began, mingled, perhaps, in this case, with a small proportion of each of those substances derived from the seed.

One case more: A takes certain crystals of arsenic, and, having pulverized them and combined the metal with the proper proportion of oxygen, mingles the poison with B's food, which swallows it and dies. Some time after, by an analysis of the contents andcontents of B's stomach, the arsenic is recovered and recrystallized. It either is or is not the arsenic which A gave. If it can be proved to the satisfaction of a jury that it is not the same, then the evidence that A is guilty of the alleged act of poisoning B, is not at all increased by the detection of this arsenic in B's stomach, for it is not the arsenic which A is alleged to have administered, but some other.

If it be said that the arsenic as a mass is indeed the same, but that the individual crystals are not "identical" with those originally pulverized, the answer is, that thus the specific point now in question is yielded, namely, that the alleged impossibility of the resurrection of the "identical" body cannot arise in any degree from the fact that the simple elements, into which it has been resolved, enter into new combinations. The whole difficulty is carried back to the point to which we have already referred it, namely, the fact that these simple elements become mingled with other quantities of homogeneous elements. We admit, in the case supposed, a very high degree of improbability that the reproduced crystals of arsenic are, each of them, identical, as a matter of fact, with some one of the original crystals. But can any one prove that, as a matter of fact, they certainly are not identical; still more, can we prove that it is absolutely impossible and self-contradictory that they should be? As to the supposition of mechanical marks or defects, they could not indeed be reproduced by crystallization; but the identity being in other respects restored, they could easily be reproduced, or very nearly approximated, by mechanical means.

We plant ourselves at one of those original crystals. It consists of certain individual and identical, though homogeneous, particles, arranged according to a certain law in certain definite relative positions. It is dissolved; and its particles are mingled with other homogeneous particles. Now the question is, can it be rationally conceived that those original particles should be segregated from their present mixture, and restored, each and all, to their original relative positions, and the whole to its original form? We freely admit that such a result cannot be secured by any skill of man; but we fearlessly assert that the accomplishment of such a result cannot be proved to transcend the power and wisdom of Almighty God, who can do whatever his every portion of wisdom, skill, and power, to which he has created, and control its movements from begin-
RESURRECTION

It, finally, it be insisted that, after all, the crystal so reproduced, i.e., with all its original particles in all their original relations, is not "identical" with the original crystal: then the word "identical" must be used in a sort of hyper-metaphysical sense in which it is not applicable to material, visible things at all. For, according to such a view, supposing an ultimate particle of water to consist of a particle of oxygen united to a particle of hydrogen (and the contrary cannot be proved), it would follow that, if this particle of water be decomposed into the two gaseous particles, the reunion of these same gaseous particles would not reproduce the "identical," original particle of water, but a different one; and it would follow that an ounce of water being decomposed and the same elements reunited, or being converted into steam, and that steam condensed, or even being poured out of one vessel into another, or merely shaken in the same vessel, the water which would result and remain would not be "identical" with the original water, but somewhat different. Hence it would follow that, as all visible material things are in a constant flux, the idea of identity would be absolutely inapplicable to anything in the physical universe, except, perhaps, to the elementary and unchangeable constituent particles. Nay more, it would follow that all such words as reproduction, reorganization, restoration, and even reminiscence itself, not speak of resurrection; involve a logical absurdity, and not only so, but the very terms "identical with" are nonsensical: for, inasmuch as, in every proposition which conveys any meaning, the predicate must be conceived, in some respect, diverse from the subject, to assert that the one is "identical with" the other is a downright and palpable self-contradiction.

(4.) The general resurrection of the bodies of all mankind is sometimes said to be impossible, for want of material wherewith to reconstruct them. It has been gravely asserted that after a few generations more shall have passed away, there will not be matter enough in the whole globe of the earth to reconstruct all the bodies of the dead.

To this it is sufficient to say that, even if such a construction as the objector presumes were necessary — which it is not — there is more than weight and mass enough of matter in the atmospheres which press upon the surface of the British Isles, or of the States of New England, New York, and New Jersey (as will be found upon a rigid mathematical computation, allowing the pressure upon each square foot to be 2,900 lbs., and the average weight of the bodies to be 75 lbs. each), than would be necessary to reconstruct all the bodies of mankind which should have existed upon the earth more than 2,000,000 years from this time, — and that, supposing three generations in a century all the way from Adam onwards, and a continuous population of 1,400,000,000 of inhabitants.

(5.) It is objected that the same particles may have constituted a part of several successive human bodies at the moment of their dissolution: and therefore it is impossible that each of these bodies should be raised identical with that which was dissolved. This brings the idea of the resurrection of the identical body nearer to an apparent contradiction than any other form of objection that we know of.

There are at least two ways of answering this objection. (a.) However likely the alleged fact may be, unless its absolute certainty can be demonstrated, there is room left for the possibility of the contrary. How can we know but that God so watches over the dust of every human body, and so guards it in all its transmigrations that it shall never be found to constitute a part of any other human body when that body dies? Thus the objection is answered by demanding proof of the alleged fact on which it is based. (b.) As our bodies are constantly undergoing change while we live without being thereby destroyed or losing their identity, so the "identical" body being raised, it may undergo an instantaneous change to an indefinite extent. It may, therefore, be instantly destroyed when it very well may be required at the reconstruction of another body; and this last being reconstructed, any needed particles may be transferred to a third; and so on, to any extent. We have only to suppose, therefore, that the bodies of mankind shall be raised successively, in the order of their dissolution (at intervals however small, infinitely small if you please, so that there shall be a practical simultaneousness); and though a certain particle should have been common to every one, having passed through the whole series in six or eight thousand, or million, of years, yet it may be caused to circulate through the whole number again, as they may be successively raised, in less than the millionth part of the least assignable instant of time; for no limit can be set to the possible rapidity of the process. The objection is answered, admitting the allegation on which it is based.

It may be said that these are violent suppositions. We may admit it; but at the same time we have four things to say with that admission. (c.) Neither of those suppositions is, like the creation of matter from nothing, absolutely inconceivable to our minds. (b.) If the objection alleged merely a high degree of apparent improbability instead of an absolute impossibility, we should not urge such suppositions in reply to it. (c.) Those suppositions are made in answer to the objection taken on its own principles, and entirely irrespective of what may be the actual doctrine of Scripture on this question. (d.) However violent the suppositions suggested may be, they will answer their present purpose of refutation, and it will be seen in the sequel that we shall have no need of them.

(6.) The objector has all along proceeded upon the assumption, that the resurrection of this identical body necessarily involves, (1) that the body raised must be identical with the body as it existed and was constituted at the moment of death; and (2) that, in order to be thus identical, it must consist of the very same particles inclusively and exclusively, arranged in the very same positions, com-
pinations, and relationships. We have above undertaken to refute the objections, even on the admission of both these assumptions; but now we deny them both. And we assert that in order to a resurrection of the body — of this identical body, in a true, proper, scriptural, and "literal" sense — it is neither necessary, in the first place, that the body raised should be identical with the precise body which expired the last breath; nor, in the second place, that it should be identical with any body whatever, in so strict a sense as that demanded.

The first point can be settled at once. Here is a man in the age of thirty years, in perfect health and a soundness of body and mind. Before he dies, he may lose his arms or his legs; he may become blind and deaf, or a maimed; he may die in utter decrepitude. Now, if, at the last day, the body given him should be identical with his present body instead of being identical with that mutilated or decrepit frame with which he will have died, would there be no resurrection of the body, no resurrection of his own proper body? Would it be a "new creation" instead of a resurrection, simply because the raised body would not be identical with the body precisely as it existed and was constituted at the moment of death? Does a man's body never become his own until he dies — until his body becomes that which becomes, then, of all the horror so often expressed at the imagined reappearance of the lame, the blind, the halt, the withered, the crippled, the maimed, the savage? Why not insist also upon the resurrection of the fevers andague fits, the cancers and lepers, the gouty and rheumatics, and all the mortal diseases and ills the flesh was heir to at the moment of death? In short, why not maintain that, if the body is raised at all, it must be, when raised, in the very act of dying again! for the internal states are as essential to identity as the external features!

We turn now to the second point, namely, that, in order to a proper resurrection of the body, it is not necessary that the body raised should be identical with any former body whatever, in such a sense as to put into it, for life and the same elementary particles, neither more or less, arranged in precisely the same positions, combinations, and relationships.

Now it is a well known fact, that not only does a great change take place in our bodies between the periods of infancy and old age, but, while we live, they are constantly in a process of change, so that the body which we have at one moment is not perfectly "identical" with that which we had at any preceding moment; and some physiologists have estimated that every particle of our material frame is changed in the course of about seven years. From this fact it follows that no person ever wakes with that identical body with which he went to sleep, yet the waking man does not fail to recognize himself. But regarding to this strict notion of identity, as often as the body sleeps, it sleeps an eternal sleep, and the body with which a man wakes is always a "new creation," for the body which wakes is never "identical" with that which was lulled to slumber! Surely such absurdities will not be maintained. We will suppose, therefore, the body which rises to die from the body which lived before only to the same extent as the body which wakes differs from the body which fell asleep; would there then be a resurrection of the body in any proper sense? If so then our proposition is established and the opposite assumption is overthrown. And, besides, a principle is thus gained which reaches much farther than is barely necessary to overthrow that assumption; for, if a slight difference is consistent with such a practical and substantial identity as is required for a proper resurrection of the body, will any one tell us precisely the limit of this difference? except that there must be some organic or real historical connection, something continuously in common, between the body which is raised and that which lived before? And so much we shall certainly maintain.

Let us here assure ourselves a moment in constructing an hypothesis. A distinguished physiologist, Johannes Müller, has given a well-known theory of the "vital principle." "Life is a principle," he says, "or imponderable matter, which is in action, in the substance of the germ, enters into the composition of the matter of this germ, and imparts to organic combinations properties which cease at death." Now the principle of animal life in man is presumed to be distinct from the intelligent and immortal spirit. On these premises, let us suppose that, in the economy of human nature it is so ordered that, when the spirit leaves the body, the vital principle is neither lost and annihilated on the one hand, nor on the other able to keep up the functions of the animal organism, but lies for a time in abeyance with so much of the present, natural body as constituted the seminal principle or essential germ of that body, and is to serve as a germ for the future, spiritual body; and this portion may be truly body, material substance, and yet elude all possible chemical tests and sensible observation, all actual, physical dissolution, and all appropriation to any other human body. On the reunion of the spirit at the appointed hour with this dormant vital principle and its bodily germ, we may suppose an instantaneous development of the spiritual body in whatever glorious form shall seem good to infinite wisdom. Such a body, so produced, would involve a proper resurrection of the present body. The new body would be a continuation of the old, in the same manner as the first created man when Eve was taken from his rib; the spiritual essence is the same, the vital or animal principle is the same, the conscious spirit is the same. The organic connection between the two is as real as that between any man's present body and the seminal principle from which it was first developed in the womb; as that between the blade of wheat and the bare grain from which it grew.

We throw out the above not as a doctrine, nor as a theory of the resurrection, but as a mere casual hypothesis — one among many possible hypotheses. The part assigned in it to the "vital principle" may be omitted, if any so prefer. And if the hypothesis as a whole is found not to be consistent with a proper resurrection of the body, it is by all means to be rejected.

But (7.) It is thought quite improbable that the same bodies will rise with all their present parts, members, organs, and appendances, not to say their peculiar abnormal developments and defects.

We have already said, the Christian dogma of the resurrection contains nothing definite on these points. We have shown that such a resurrection, in all its details, is not absolutely impossible; but we have shown that such a resurrection is not necessary to the proper idea of the resurrection of the body. We have shown that the body raised would be the same as the present body, if it pos-
But (it is insisted) after the minutest chemical analysis, after the most patient and thorough testing of known agents and re-agents, after the most careful examination, and after ages of experience, we have never found any more signs of a tendency to a resurrection in the body of a dead man than in that of a dead dog. And what then? Therefore there is and can be no resurrection of the human body? Most lame and impotent conclusion! As though we already knew everything pertaining to the powers, properties, and possibilities even of material things; as though we were not prying deeper and deeper into the secrets of nature every day; as though there were not evidently dynamics and laws at work in the material world which elude all our chemical tests and physical re-agents; and as though we could see distinctly around and above the power of Almighty tool, which, with its higher, and perchance forever inscrutable laws, presides over and controls all the laws and functions of nature. All positive evidence for a resurrection of the body must be sought for in the teaching of Revelation; and that evidence, be it more or less, is not in the slightest degree affected by this chemical-physical argument: it is left just as it was and where it was, entire and intact.

IV. HISTORY OF THE DOCTRINE

It remains to give a brief outline of the history of the doctrine of the Resurrection, as it has been held in the Christian Church.

The Cilicians and Gnostics, from the first, held extreme views, the former tending to an unscriptural grossness, and the latter with a deep and abstruse importation, to an equally unscriptural refining away of the substantial fact. Justin Martyr, Irenæus and Tertullian, inclining to the Chilarens, taught a double resurrection. These and Clemens Romannus, Athanagoras, Theophilus, and Minutius Felix, all believed in a proper resurrection of the body. Origen spiritualized it. (See Teller, 'Sixtus hymnus, de Resur. Corvis, per 4 pravos Sweden.') Gregory of Nazianzus, Gregory of Nyssa, and Basil the Great, adopted in part the views of Origen. Jerome went to an extreme against them. Augustine ultimately opposed them, but more moderately. Chrysostom believed in the identity of the body raised and the present body, but followed St. Paul's exposition. Epiphanius and Theophilus of Alexandria agreed with Jerome, the latter of whom was an equal disciple of the Albigensians, who could not assent to "the prevailing notions." [Showing two things: (1) that certain views, namely, those of Jerome, were then the prevailing views, and (2) that to accept them was not considered (by Theophilus) essential.] Ruffinus confessed the resurrection horae eornis, and John of Jerusalem distinguished between flesh and body, and the latter of whom was equally satisfied. Jerome's became the prevailing doctrine of the Church of Rome, and has so continued substantially to the present day. The reformers generally adopted the same doctrine, adhering, however, more decidedly to the Augustinian and Pauline representations.

The Socinians, and, after them, the Unitarians, have been inclined to deny the proper resurrection of the body. The Swedenborgians also do the same, holding that each soul, immediately upon death, is clothed with its spiritual body. Many persons in all the Protestant communions have, in later years felt compelled by the presumed philosophical difficulties of the case, to give up the doctrine of
proper resurrection of the body, and have either remained silent, without any avowed or definite belief upon the subject, or have openly sided with the Socinians or the Socinianists.

The creeds and the symbols and confessions of the Reformed Churches, however, have remained unchanged. See, e.g. Article IV. of the Church of England, "On the Resurrection of Christ," which, speaking of Christ's ascension "with flesh, bones, and all things appertaining to the perfection of man's nature," covers nearly the whole ground of hesitation and difficulty. See also all the three creeds, especially the Athanasian. That of the Apostles still confesses the Resurrection cornis.

D. R. G.

* For the literature of this subject, one may consult the bibliographical appendix to W. R. Alger's Critical History of the Doctrine of a Future Life, Nos. 2923-3132, and on the Resurrection of Christ, Nos. 3133-3181.

RE'UBen [friend] = Paruyn in Gen. [Rom.]; Payyn [but Vat. Alex. Payyn] in Chr. Res. [Rabyn]. Son of Peleg, in the line of Abraham's ancestors (Gen. xi. 18, 19, 20, 21; l Chr. i. 25). He lived two hundred and ninety years according to the genealogy in Genesis. Bunsen (Bibelwerk) says Reuben in the Arabic name for Edessa, or an assertion which, borrowed from Knobel, is utterly destitute of foundation, as will be seen at once on comparing the Hebrew and Arabic words. A closer resemblance might be found between Reu and Rhagee, a large town of Media, especially if the Greek equivalents of the two names be taken.

In l Chr. i. 25 the A. V. ed. 1611, following the Bishops' Bible and the Genevan Version, reads Reu/, representing the Ar by H, as in some other cases.

A.

REUBEN [see below]: Pahd/); and Parv). Joseph, Parv/); Pesh. Syr. Ribbi; and so also in Arab. ver. of Joshua: Reben), Jacob's first-born child (Gen. xxix. 32), the son of Leah, apparently not born till an unusual interval had elapsed after the marriage (31: Joseph. Ant. i. 19, § 8). This is perhaps denoted by the name itself, whether we adopt the obvious signification of its present form—reu ben, i.e. before the son (Gen. xxix. 32); or (2) the explanation given in the text, which seems to imply that the original form was "reu beni:lijah, Jehovah hath seen my affliction," or (3) that of Josephus, who uniformly presents it as Reubel, and explains it (Ant. i. 19, § 8) as the "pity of God"—Shew tov Ovve, as if from Puf malu (First, Haneb. ii. 344). The notice of the patriarch Reuben in the book of Genesis and the early Jewish traditional literature are unusually frequent, and on the whole give a favorable view of his disposition. To him, and him alone, the preservation of Joseph's life appears to have been due. His anguish at the disappearance of his brother, and the frustration of his kindly affinities for delivering him (Gen. xxxvii. 22), his recollection of the minute details of the painful scene many years afterwards (xlii. 22), his offer to take the sole responsibility of the safety of the brother who had succeeded to Joseph's place in the family (xlii. 36), all testify to a warm and (for those times) a kindly nature. Of the reproductive crime which mars his history, and which turned the blessing of his dying father into a curse—his adulterous connection with Bilhah, —we know from the Scriptures only the fact (Gen. xxxv. 22). In the post-biblical traditions it is treated either as not having actually occurred (as in the Targum Pseudojonathan), or else as the result of a sudden temptation acting on a hot and vigorous nature (as in the Testaments of the Twelve Patriarchs)—a parallel, in some of its circumstances, to the intrigue of David with Bathsheba. Some severe temptation there must surely have been to impel Reuben to an act which, regarded in its social rather than in its moral aspect, would be peculiarly abhorrent to a patriarchal society, and which is specially repeated and repeatedly reproved in the Law of Moses. The Rabbinical version of the occurrence (as given in Targ. Pseudojon.) is very characteristic, and well illustrates the difference between the spirit of early and of late Jewish history. "Reuben went and disordered the couch of Bilhah, his father's concubine, which was placed right opposite the couch of Leah, and it was covered unto him there, if he had lain with her. And when Israel heard it he displeased him, and he said, 'Lo! an unworthy person shall proceed from me, as Ishmael did from Abraham and Esau from my father.' And the Holy Spirit answered him and said, 'All are righteous, and there is not one unworthy among them.'" Reuben's anxiety to save Joseph is represented as arising from a desire to conciliate Jacob, and his absence while Joseph was sold from his sitting done on the mountains in penitent fasting.

These traits, slight as they are, are those of an ardent, impetuous, unbalanced, but not ungenerous nature; not crafty and cruel, as were Simeon and Levi, but rather, to use the metaphor of the dying patriarch, boiling up like a vessel of water over the rapid wood-fire of the nomic text, and as quietly subsiding into apathy when the fuel was withdrawn.

At the time of the migration into Egypt Reuben's sons were four (Gen. xvi. 3; 1 Chr. v. 3). From them sprang the chief families of the tribe (Num. xxxvi. 5-11). One of these families—that of Pallu—became notorious as producing Eliah, whose sons or descendants, Dathan and Abiram, perished with their kinsman On in the divine retribution for their conspiracy against Moses (Num. 2719

REUBEN

a Redech (= Die Auffassung, Naun. 58) maintains that Reuben is the original form of the name, which was corrupted into Reuben, as Bethel into Be'thin, and Jezreel into S'rath. He treats it as signifying the "flock of Bel," a deity whose worship greatly flourished in the neighboring country of Moab, and who under the name of Nebi had a famous sanctuary in the very territory of Reuben. In this case it would be a parallel to the title, "people of Chow'mis," which a bestowed on Moab. The version of the ultimate syllables in Reuben would, on this theory, find a parallel in the word the Messiah and of Saul's family, who became Meleahkabeh and Lahbakat.

b Such appears to be a more accurate rendering of the word which in the A. V. is rendered "unstable" (I Sam. Pub. Num. p. 32).

c According to the ancient tradition preserved by Demeurin's (Enseb. Potr. Er. ix. 21), Reuben was 45 years old at the time of the migration.
The census at Mount Sinai (Num. xii. 39) shows that at the Exodus the numbers of the tribes were 46,500 men above twenty years of age, and fit for active warlike service.

In point of numerical strength, Reuben was then sixth on the list, with 45,650 men, being next below. On the borders of Canaan, after the plague which punished the idolatry of Baal-Peor, the numbers had fallen slightly, and were 45,750; God was 46,000; and the position of the two in the list is lower than before. Efrain and Simeon being the only two smaller tribes (Num. xxvii. 7, &c.). During the journey through the wilderness the position of Reuben was on the south side of the Tabernacle. The "camp" which went under his name was formed of his own tribe, that of Simeon a (Leah's second son), and God (son of Zilpah, Leah's slave). The standard of the camp was a deer, with the inscription, "Hear, oh Israel! the Lord thy God is one Lord!" and its place in the march was second (Ex. xvi. 14, Num. ii. 14-16).

The Reubenites, like their relatives and neighbors on the journey, the Gadites, had maintained through the march to Canaan the ancient calling of their forefathers. The patriarchs were "feeding their flocks" at Shechem when Joseph and Simeon being sold into Egypt. It was as men whose "trade had been about cattle from their youth" that they were presented to Pharaoh (Gen. xiii. 32, 34), and in the land of Goshen they settled with their flocks and herds and all that they had (xlvii. 1). Their cattle accompanied them in their flight from Egypt (Ex. xii. 38), not a hoof was left behind, and there are frequent allusions to them in the journey (Ex. xxxiv. 3, Num. xi. 22; Deut. vii. 13, &c.). But it would appear that the tribes who were destined to settle in the confined territory between the Mediterranean and the Jordan had, during the journey through the wilderness, fortunately relinquished that taste for the possession of cattle which they could not have maintained after their settlement at a distance from the wide pastures of the wilderness. Thus the cattle had come into the hands of Reuben, God, and the half of Manasseh (Num. xxxii. 1), and it followed naturally that when the nation arrived on the open downs east of the Jordan, the three tribes just named should prefer a request to their leader to be allowed to remain in a place so perfectly suited to their requirements. The part selected by Reuben had at that date the special name of "the Mishor," with reference possibly to its evenness (Stanley, S. & P. App. § 6). Under its modern name of the Belly it is still esteemed beyond all others by the Arab sheep-masters. It is well watered, covered with smooth short turf, and being itself gradually in those illimitable wastes which have always been and always will be the favorite resort of pastoral nomad tribes. The country east of Jordan does not appear to have been included in that land promised to Abraham. That which the spies examined was comprised, on the east and west, between the "coast of Jordan" and "the sea." But for the pusillanimity of the greater number of the tribes it would have been entered from the south (Num. xiii. 30), and in that case the east of Jordan might never have been peopled by Israel at all.

Accordingly, when the Reubenites and their fellows approach Moses with their request, his main objection is that by what they propose they will discourage the hearts of the children of Israel from going over Jordan into the land which Jehovah had given them (Num. xxxii. 7). It is only on their undertaking to fulfill their part in the conquest of the western country, the land of Canaan proper, and thus satisfying him that their proposal was grounded in no selfish desire to escape a full share of the difficulties of the conquest, that Moses will consent to their proposal.

The "blessing" of Reuben by the departing Lawgiver [Deut. xxxiii. 6] is a passage which has severely exercised translators and commentators. Strictly translated as they stand in the received Hebrew text, the words are as follows:—

"Let Reuben live and not die,
And let his men be a number" (i.e. few).

As to the first line there appears to be no doubt, but the second line has been interpreted in two exactly opposite ways. 1. By the LXX.:—

"And let his men be many in number."

This has the disadvantage that ἄρτι άρτι is never employed elsewhere for a large number, but always for a small one (e. g. 1 Chr. xvi. 19; Job xvi. 22, Is. x. 19; Ez. xii. 16).

2. That of our own Auth. Version:—

"And let not his men be few."

Here the negative of the first line is presumed to convey its force to the second, though not there expressed. This is countenanced by the ancient Syriac Version (Peshito) and the translations of Junius and Tremellius, and Schott and Winzer. It also has the important support of Gesenius (Thes. p. 908 a, and Pent. Som. p. 44).

3. A third and very ingenious interpretation is that adopted by the Veneto-Greek Version, and also by Michaelis (Eloet für Urgelben, Text), which assumes that the vowel-points of the word ἄρτι, ἄρτι are altered to ἄρτι, ἄρτι, his dead —

"And let his dead be few" —

as if in allusion to some recent mortality in the tribe, such as that in Simeon after the plague of Baal-Peor.

These interpretations, unless the last should prove to be the original reading, originate in the fact that the words in their naked sense convey a curse and not a blessing. Fortunately, though differing widely in detail, they agree in general

the Hebrew as it stands. Thus the Vulgate, Luther, De Wette, and Bunsen.

a Ῥευβαν and Simeon are named together by Jacob in Gen. xlviii. 5; and there is perhaps a trace of the retention of the coalescence of the names in Jud. viii. 1 (Yudg.) and ix. 2.

b It is said that this was originally an ox, but changed by Moses, lest it should recall the sin of the golden calf.

c A few versions have been bold enough to render

the Alex. LXX--the name of Simeon ("and let Simeon be many in number"); but this, though approved of by Michaelis (in the notes to the passage in his Eloet für Urgelben, Text), on the ground that there is no reason for omitting Simeon, is not supported by any Codex or any other Version.
meaning. The benediction of the great leader goes out over the tribe which was about to separate itself from its brethren, in a fervent aspiration for its welfare through all the risks of that remote and trying situation.

Both in this and the earlier blessing of Jacob, Reuben retains his place at the head of the family, and it must not be overlooked that the tribe, together with the two who associated themselves with it, actually received its inheritance before either Judah or Ephraim, to whom the birthright, which Reuben had forfeited was transferred (1 Chr. v. 1). From this time it seems as if a lacuna, not only the material one of distance, and of the intervening river and mountain-wall, but also of differences in feeling and habits, gradually grew up more substantially between the eastern and western tribes. The first act of the former after the completion of the conquest, and after they had taken part in the solemn ceremonial in the valley between Ebal and Gerizim, shows how wide a gap already existed between their ideas and those of the western tribes.

The piling of stones which they erected on the western bank of the Jordan to mark their boundary—to testify to after ages that though separated by the rushing river from their brethren and the country in which Jehovah had fixed the place where He would be worshiped, they had still a right return to it for his worship — was erected in accordance with the unalterable habits of Bedouin tribes both before and since. It was an act identical with that in which Lahan and Jacob engaged at potting, with that which is constantly performed yearly during the disclaimer of the 2\textsuperscript{1} tribes. But by the Israelites west of Jordan, who were fast relinquishing their nomad habits and feelings for those of more settled permanent life, this act was completely misunderstood, and was construed into an attempt to set up a rival altar to that of the sacred Tent. The incompatibility of the idea to the mind of the Western Israelites is shown by the fact that they are carrying on the disclaimer of the 2\textsuperscript{1} tribes, and notwithstanding that dissembler hav- ing proved satisfactory even to Phinehas, the author of Joshua xxii. retains the name ra\textsuperscript{1}v\textsuperscript{1}n\textsuperscript{1} for the piling, a word which involves the idea of sacrifice — i.e. of slaughter (see Genesis, Thes. p. 492) — instead of applying to it the term g\textsuperscript{1}l\textsuperscript{1}, as is done in the case (Deut. xxvi. 46) of the precisely similar heap of witness.\footnote{Another Rubenite erection, which for long kept up the memory of the presence of the tribe on the west of Jordan, was the stone of Bahan- ben-Reuben which formed a landmark on the boundary between Judah and Benjamin. (Josh. xvi. 6.) This was a single stone (Eben), not a pile and it appears to have stood somewhere on the road from Bethany to Jericho, not far from the ruined khan so well known to travellers.}

No judge, no prophet, no hero of the tribe of Reuben is handed down to us. In the dire ex-

*REUBENITES (ריעבְּנֵי) commonly -Pokh\textsuperscript{1}, but Josh. xxii. 1, i.e. inf. Pokh\textsuperscript{2}, Alex or Pokh\textsuperscript{2}: 1 Chr. xxvi. 32. Pokh\textsuperscript{1}: Var. -rei: Reuben, Rubenite), and once sing. -REU- BENTIE (1 Chr. xi. 42; I.XX. omit; Vulg. Rubenites). Descendants of Reuben (Num. xxvi. 7; Pount. iii. 12, 16, iv. 43, xviii. 3; Josh. i. 12, xii. 6, xvii. 1, 2 K. x. 33; 1 Chr. v. 6, 26, xi. 42, xli. 37, xxvii. 15). A.

*REU\textsuperscript{2}EL (ריעבְּנֵא) [friend of God] : Pa pokh\textsuperscript{1}: Rubiel, Reuel, etc. The name of several persons mentioned in the Bible.

1. One of the sons of Esau, by his wife Bashe (Josh. xxii. 31) by the Bedouin Reubenites, just as the pile of Jacob and Lahan was called Gai-el, the heap of witness.

\textsuperscript{a} The word used here, pelek, seems to refer to artificial streams or ditches for irrigation. [Kerz.]

\textsuperscript{b} This is Ewald's rendering (Dichter des A B. 193), adopted by Bunsen, of the passage rendered in the A. V. "bleating of the flocks"
math sister of Ishmael. His sons were four—Nahath, Zerah, Shammah, and Mizzah, “dukes,” of Edom (Gen. xxxvi. 4, 10, 13, 17; 1 Chr. i. 35, 38).

2. One of the names of Moses’ father-in-law (Ex. ii. 18); the same which, through adherence to the LXX., form, is given in another passage of the A. V. RAUDEL. Moses’ father-in-law was a Midianite, but the Midianites are in a well-known passage (Gen. xxxvii. 25) called also Ishmaelites, and if this may be taken strictly, it is not impossible that the name of Reuel may be a token of his connection with the Ishmaelite tribe of that name. There is, however, nothing to confirm this suggestion.

3. Father of Elisaph, the leader of the tribe of Gad, at the time of the census at Sinai (Num. ii. 14). In the parallel passage the name is given Deuel, which is retained in this instance also by the Vulgate (Dued).

4. A Benjamite whose name occurs in the genealogy of a certain Elah, one of the chiefs of the tribe at the date of the settlement of Jerusalem (1 Chr. ix. 8).

G. REUMAH (ř“r“µ; [raised, high]; ‘Pēyāh; Alex. Pēyāh; Rōwān). The connubial of Naboth, Abraham’s brother (Gen. xxii. 24).

REVELATION OF ST. JOHN (Ἀποκάλυψις Ἰωάννου; Apokalypsis Iōannis Apostoloi). The following subjects in connection with this book seem to have the chief claim for a place in this article:

A. CANONICAL AUTHORITY AND AUTHORSHIP.
B. TIME AND PLACE OF WRITING.
C. LANGUAGE.
D. CONTENTS AND STRUCTURE.
E. HISTORY OF INTERPRETATION.

A. CANONICAL AUTHORITY AND AUTHORSHIP. The question as to the canonical authority of the Revelation resolves itself into a question of authorship. If it can be proved that a book, claiming so distinctly as this does the authority of divine inspiration, was actually written by St. John, then no doubt will be entertained as to its title to a place in the Canon of Scripture.

Was, then, St. John the Apostle and Evangelist the author of the Revelation? This question was first mooted by Dionysius of Alexandria (Enzelm. H. E. vii. 25). The doubt which he modestly suggested has been confidently proclaimed in modern times by Luther (Versele auf die Offenbarung, 1522 and 1541), and widely diffused through his influence. Lucie (Einleitung, p. 892), the most learned and diligent of modern critics of the Revelation agrees with a majority of the culminating scholars of Germany in denying that St. John was the author.

But the general belief of the mass of Christians in all ages has been in favor of St. John’s authorship. The evidence adduced in support of that belief consists of (1) the assertions of the author, and (2) historical tradition.

1. The author’s description of himself in the 1st and 22d chapters is certainly equivalent to an assertion that he is the Apostle. (a.) He names himself simply John, without prefix or addition—a name which at that period, and in Asia, must have been taken by every Christian as the designation in the first instance of the great Apostle who dwelt at Ephesus. Doubtless there were other Johns among the Christians at that time, but only arrogance or an intention to deceive could account for the assumption of this simple style by any other writer. He is also described as (b) a servant of Christ, (c) one who had borne testimony as an eye-witness of the word of God and of the testimony of Christ—terms which were surely designed to identify him with the writer of the verses John xix. 30, I. 1, and I John i. 2. He is (d) in Patmos, for the word of God and the testimony of Jesus Christ: it may be easy to suppose that other Christians of the same name were banished thither, but the Apostle is the only John who is distinctly named in early history as an exile at Patmos. He is also (e) a fellow-sufferer with those whom he addresses, and (f) the authorized channel of the most direct and important communication that was ever made to the seven churches of Asia, of which churches John the Apostle was at that time the spiritual governor and teacher. Lastly (g) the writer was a fellow-servant of angels and a brother of prophets—titles which are far more suitable to one of the chief Apostles, and far more likely to have been assigned to him than to any other man of his time. These marks are so closely united together in the Apostle John, and in him alone of all historical persons. We must go out of the region of fact into the region of conjecture to find such another person. A candid reader of the Revelation, if previously acquainted with St. John’s other writings and life, must inevitably conclude that the writer intended to be identified with St. John. It is strange to see so able a critic as Lucie (Einleitung, p. 514) meeting this conclusion with the conjecture that some Asiatic disciple and namesake of the Apostle may have written the book in the course of some missionary labors or some time of sacred retirement at Patmos. Equally unavailing against this conclusion is the objection brought by Ewald, Trench, and others, from the fact that a promise of the future dispensation of the Apostles is implied in xvi. 20 and xxi. 14; as if it were inconsistent with the true modesty and humility of an Apostle to record—as Daniel of old did in much plainer terms (Dan. xii. 13)—a divine promise of salvation to himself personally. Rather those passages may be taken as instances of the writer quietly accepting as his just due such honorable mention as belongs to all the Apostolic company. Unless we are prepared to give up the veracity and divine origin of the whole book, and to treat the writer’s account of himself as a mere fiction of a poet trying to cover his own insignificance with an honored name, we must accept that description as a plain statement of fact, equally creditable with the rest of the book, and in harmony with the simple, honest, truthful character which is stamped on the face of the whole narrative.

Besides this direct assertion of St. John’s authorship, there is also an implication of it running through the book. Generally, the instinct of single-minded, patient, faithful students has led them to discern a connection between the Revelation and St. John, and to recognize not merely the same Spirit as the source of this and other books of Holy Scripture, but also the same peculiarly formed human instrument employed both in producing this book and the fourth Gospel, and in speaking the characteristic words and performing the characteristic actions recorded of St. John. This evi
dance is set forth at great length, and with much force and eloquence, by J. P. Lange, in his Essay on the Connection between the Individuality of the Apostle John and that of the Apocalypse, 1838 (Verhalsch. Schriften, ii. 173-231). After investigating the peculiar features of the Apostle's character and position, and (in reply to Liicke) the personal traits shown by the writer of the Revelation, he concludes that the book is a mysterious but genuine effusion of prophecy under the New Testament, imbued with the spirit of the Gospel, the product of a spiritual gift so peculiar, so great and noble that it can be ascribed to the Apostle John alone. The Revelation requires for its writer St. John, just as his peculiar genius requires for its utterance a revelation.

(2.) To come to the historical testimonies in favor of St. John's authorship: these are singularly distinct and numerous, and there is very little to weigh against them. (a.) Justin Martyr, c. 150 A. D., says: "A man among us whose name was John, one of the Apostles of Christ, in a revelation which was made to him, prophesied that the believers should have a thousand years in Jerusalem" (T. dek. § 81, p. 179, ed. Ben.). (b) The author of the Muratorian Fragment, c. 170 A. D., speaks of St. John as the writer of the Apocalypse, and describes him as a predecessor of St. Paul, i.e. as Credner and Liicke candidly interpret it, his predecessor in the office of Apostle. (c.) Melito of Sardis, c. 170 A. D., wrote a treatise on the Revelation of John. Eusebius (H. E. iv. 23) mentions this among the books of Melito which had come to his knowledge; and, as he carefully records objections against the Apostle's authorship, it may be fairly presumed, notwithstanding the doubts of Kleiner and Liicke (p. 514), that Eusebius found no doubt as to St. John's authorship in the book of this ancient bishop. (d.) Theophilus, bishop of Antioch, c. 180, in a controversy with Hermogenes, quotes passages out of the Revelation of John (Euseb. H. E. iv. 24). (e.) Irenæus, c. 195, apparently never having heard a suggestion of any other author than the Apostle, often quotes the Revelation as the work of John. In iv. 20, § 11, he describes John the writer of the Revelation as being present at the Last Supper, and asked Iuan who should betray him. The testimony of Irenæus as to the authorship of Revelation is perhaps more important than that of any other writer: it mounts up into the preceding generation, and is virtually that of a contemporary of the Apostle. For in v. 30, § 1, where he vindicates the true reading (666) of the number of the Beast, he cites in support of it not only the old correct copies of the book, but also the oral testimony of the very persons who themselves had seen St. John face to face. It is obvious that Irenæus's reference for information on such a point to those contemporaries of St. John implies his undoubting belief that they, in common with himself, viewed St. John as the writer of the book. Liicke (p. 574) suggests that this view was possibly groundless, because it was entertained before the learned fathers of Alexandria had set the example of historical criticism; but his suggestion scarcely weakens the force of the fact that such was the belief of Asia, and it appears a strange suggestion when we remember that the critical discomfiture of the Alexandrians, to whom he refers, led them to coincide with Irenæus in his view. (f.) Apollonius (c. 200) of Ephesus (?), in controversy with the Montanists of Phrygia, quoted passages out of the Revelation of John, and narrated a miracle wrought by John at Ephesus (Euseb. H. E. vi. 18). (g.) Clement of Alexandria (cir. 200) quotes the book as the Revelation of John ( Strom. vi. 13, p. 667), and as the work of an Apostle (Prae. ii. 12, p. 207). (h.) Tertullian (A. D. 207), in at least one place, quotes by name the Apostle John in the Apocalypse" (Ad. Marcion. ii. 14). (i.) Hippolytus (cir. 230) is said, in the inscription on his statue at Rome, to have composed an apology for the Apocalypse and Gospel of St. John the Apostle. He quotes it as the work of St. John (De Antichristi, § 36, col. 765, ed. Migne). (j.) Origen (cir. 233), in his Commentary on St. John, quoted by Eusebius (H. E. vi. 25), says of the Apostle, "he wrote also the Revelation." The testimonies of later writers, in the third and fourth centuries, in favor of St. John's authorship of the Revelation, are equally distinct and far more numerous. They may be seen quoted at length in Liicke, pp. 628-658, or in Dean Alford's "Prolegomena" (v. 7., vol. iv. pt. ii.). It may suffice here to say that they declare the views of the great early Fathers, of John, Eusebius Synes, Epiphanius, Basil, Hilary, Athanasius, Gregory (of Nyssa), Didymus, Ambrose, Augustine, and Jerome.

All the foregoing writers, testifying that the book came from an Apostle, believed that it was a part of Holy Scripture, but many whose extant works cannot be quoted for testimony to the authorship of the book refer to it as possessing canonical authority. Thus (a.) Papias, who is described by Irenæus as a hearer of St. John and friend of Polycarp, is cited, together with other writers, by Andrews of Cappadocia, in his Commentary on the Revelation, as a guarantee to later ages of the divine inspiration of the book (Routh, Relig. Sacr. i. 153; Cramer's "Critical, Oxford, 1840, p. 176). The value of this testimony has not been impaired by the controversy to which it has given rise, in which Liicke, Beek, Hengstenberg, and Rettig have taken different parts. (b.) In the Epistle from the Churches of Lyons and Vienne, A. D. 177, inserted in Eusebius, H. E. v. 1-3, several passages (c. p. 1, xiv. 4, xxii. 11) are quoted or referred to in the same way as the Apocryphal books, and the canonical authority is unquestioned. (c.) Cyprian (Ep. 19, 12, 14, 19, ed. Fell) repeatedly quotes it as a part of canonical Scripture. Chrysostom makes no distinct allusion to it in any extant writing; but we are informed by Suidas that he received it as canonical. Although omitted (perhaps as not adapted for public reading in church) from the list of canonical books in the Council of Laodicea, it was admitted into the list of the Third Council of Carthage, A. D. 347.

Such is the evidence in favor of St. John's authorship and of the canonical authority of this book. The following facts must be weighed on the other side.

Marcion, who regarded all the Apostles except St. Paul as corruptors of the truth, rejected the Apocalypse and all other books of the N. T. which were not written by St. Paul. The Alogi, an obscure sect, circa 180 A. D., in their zeal against Montanism, denied the existence of spiritual gifts in the church, and rejected the Revelation, saying it was the work, not of John, but of Cerinthus. Epiphanius, "De. Res. ii." The Roman presbytery Caius (circa 196 A. D.), who also wrote against Montanism, is quoted by Eusebius (H. E. iii. 28).
REVELATION

2724

as ascribing certain Revelations to Cerinthus: but it is
doubted (see Iouth, R. L. Soc. ii. 138) whether the
Revelation of St. John is the book to which
Cains refers. But the test mercy which is consid-
ered the most important of all in ancient times
against the Revelation is contained in a fragment
of Dionysius of Alexandria, circa 240 A. D.,
the most influential and perhaps the ablest bishop in
that age. The passage, taken from a book On the
Promises, written in reply to Nepos, a learned
Judaising Chalifant, is quoted by Eusebius (H. E.
vii. 20). The principal points in it are these:
Dionysius testifies that some writers before him
altogether repudiated the Revelation as a forgery of
Cerinthus; many brethren, however, prized it
very highly, and Dionysius would not venture to
reject it, but received it in faith as containing
things too deep and too sublime for his understand-
ing. [In his Epistle to Hermannum (Luseb. H. E.
vii. 10) he speaks it as he would quote Holy Scrip-
ture.] He accepts as true what is stated in the
book itself, that it was written by John, but he
argues that the way in which that name is men-
tioned, and the general character of the language,
are unlike what we should expect from John the
Evangelist and Apostle; that there were many John
who died in Asia; he would not maintain that John
Mark was the writer, since it is not known that he
was in Asia. He supposes it must be the work of
some John who lived in Asia; and he observes
there are said to be two towns in Ephesus, each of
which bears the name of John. He then points
out at length the superiority of the style of the
Gospel and the First Epistle of John to the style
of the Revelation, and if he says, in conclusion, that
whatever he may think of the language, he does
not deny that the writer of the Apocalypse actually
saw what he describes, and was endowed with the
divine gifts of knowledge and prophecy. To this
extent, and no farther, Dionysius is a witness
against St. John’s authorship. It is obvious that
he felt keenly the difficulty arising from the use
made of the contents of this book by certain un-
sound Christians under his jurisdiction; that he
was acquainted with the doubt as to its canonical
authority which some of his predecessors entertained
as an inference from the nature of its contents;
that he deliberately rejected their doubt and ac-
cepted the contents of the book as given by the
inspiration of God; that, although he did not un-
derstand how St. John could write in the style in
which the Revelation is written, he yet knew of no
authority for attributing it, as he desired to
attribute it, to some other of the numerous persons
who bore the name of John. A weightier difficulty
arises from the fact that the Revelation is one of
the books which are absent from the ancient Peshito
version, and the only way in which we are justified
in favor of its reception by the ancient Syrian Church is a
single quotation which is added from the Syriac
works (ii. 332 c) of Ephrem Syrus. Eusebius is
remarkably sparing in his quotations from the
Revelation of John,” and the uncertainty of his opinion
about it is best shown by his statement in
H. E. iii. 59, that “it is likely that the Revelation
was seen by the second John (the Ephesian pro-
phet), if any one is unwilling to believe that it
was seen by the Apostle.” Jerome states (Ep. orl
Dardelinum, etc.) that the Greek churches felt, with
respect to the Revelation, a similar doubt to that
of the Latins respecting the Epistle to the
Hebrews. Neither he nor his equally influential contemporary
Augustine shared such doubts. Cyril of Jerusalem,
Chrysostom, Theodore of Mopsuestia, and Theodoret
abstained from making use of the book, sharing, it is
possible, the doubts to which Jerome refers. But
they have not gone so far as to express a distinct
opinion against it.4 The silence of these writers is
the latest evidence of any importance that has been
adduced against the overwhelming weight of the
testimony in favor of the canonical authority and
authorship of this book.

II. TIME AND PLACE OF WRITING.—The date
of the Revelation is given by the great majority of
critical views as A. D. 95-97. The weighty testimony
of Ireneus is almost sufficient to prevent any other
conclusion. He says (Ad. Ier. v. 30, § 3): “It
(i.e. the Revelation) was seen no very long time
ago, but almost in our own generation, at the close
of Domitian’s reign.” Eusebius also records as a
tradition which he does not question, that in the
persecution under Domitian, John the Apostle and
Evangelist being yet alive, was banished to the
island Patmos for his testimony of the divine word.
Allusions in Clement of Alexandria and Origen
point to the same direction that John was living
in the first centuries of any other time or place.
Epiphanius (H. 12), obviously by mistake, says that John prophesied in the reign of
Claudius. Two or three obscure and later au-
thorities say that John was banished under Nero.

Unsupported by any historical evidence, some
commentators have put forth the conjecture that
the interpreters were to be taken as those of Nero. This is simply their inference from the style
and contents of the book. But it is difficult to see
why St. John’s old age rendered it, as they allege,
impossible for him to write his inspired message
with force and vigor, or why his residence in
Ephesus must have removed the Hebrewistic pecu-
liarities of his Greek. It is difficult to see in the
passages i. 7; ii. 9, iii. 9, vi. 12, xi. 1, anything
which would lead necessarily to the conclusion, that
Jerusalem was in a prosperous condition, and that
the predictions of its fall had not been fulfilled
when these verses were written. A more weighty
argument in favor of an early date might be urged
from a modern interpretation of xvi. 10, if that
interpretation could be tenably established. Galatia
is alleged to be the sixth king, the one that “is.” In
Nero these interpreters see the Beast that was
wounded (xii. 3), the Beast that was and is not,
the eighth king (xii. 11). For some time after
Nero’s death the Roman populace believed that he
was not dead, but had fled into the East, whence
he would return and reign his throne: and these
various views were to be given to the writer of the
Revelation and meant to express the absurd popular delusion. Even the able and learned
Rouss (Theol. Chret. i. 443), by way of supporting
this interpretation, advances his untenable claim
to the first discovery of the name of Nero Caesar
in the number of the beast, 666. The inconsistency
of this interpretation with prophecy (in the context of Revelation, and with the fact that
the book is of divine origin, is pointed out by
Hengstenberg at the end of his Commentary on
ch. xiii., and by Elliott, Horae Apoc. iv. 547.

[4] This cannot properly be said of Cyril of Jeru-
salem (H. E. d. 399), who clearly repudiates it as not
canonical (Cathec. iv. 33, al. 22). See Westcott, Canons
of the N. T. pp. 398, 491 f. A.
REVELATION
OF ST. JOHN

It has been inferred from i. 2, 9, 10, that the Revelation was written in Ephesus, immediately after the Apostle's return from Patmos. But the text is not sufficiently sufficient to support the conclusion. The style in which the messages to the Seven Churches are delivered rather suggests the notion that the book was written in Patmos.

C. LANGUAGE. — The doubts first suggested by Harenberg, whether the Revelation was written in Aramaic, has met with little or no reception. The silence of all ancient writers as to any Aramaic original is alone a sufficient answer to the suggestion. Lücke (Einl.-II. 414) has also collected internal evidence to show that the original is the Greek of a Jewish Christian.

Lücke has also (pp. 448-464) examined in minute detail, after the preceding labors of Donker-Curtius, Vogel, Winer, Kahl, Kolhoff, and Hitzig, the peculiarities of language which obviously distinguish the Revelation from every other book of the New Testament. And in subsequent sections (pp. 680-747) he urges with great force, the difference between the Revelation on one side and the fourth Gospel and First Epistle on the other, in respect of their style and composition and the mental character and attainments of the writer of each. Hengstenberg, in a dissertation appended to his work (1), on the Revelation, the Apocalypse is by one writer. That the anomalies and peculiarities of the Revelation have been greatly exaggerated by some critics, is sufficiently shown by Hitzig's plausible and ingenious, though unsuccessful, attempt to prove the identity of style and diction in the Revelation and the Gospel of St. Mark. It may be admitted that the Revelation has many surprising coincidences of the most significant events, and an innumerable multitude of the redeemed of all nations are seen worshipping God. Next (7) the seventh seal is opened, and half an hour's silence in heaven ensues.

d. Then (viii. 2-xx. 19) seven angels appear with trumpets, the prayers of saints are offered up, the earth is struck with fire from the altar, and the seven trumpets are sounded. (1) The earth and the sea are struck (the earth is opened), and an immense multitude of the redeemed of all nations are seen worshipping God. Next (7) the seventh seal is opened, and half an hour's silence in heaven ensues.

c. Then (viii. 2-xx. 19) seven angels appear with trumpets, the prayers of saints are offered up, the earth is struck with fire from the altar, and the seven trumpets are sounded. (1) The earth and the sea are struck (the earth is opened), and an immense multitude of the redeemed of all nations are seen worshipping God. Next (7) the seventh seal is opened, and half an hour's silence in heaven ensues.

d. Then (viii. 2-xx. 19) seven angels appear with trumpets, the prayers of saints are offered up, the earth is struck with fire from the altar, and the seven trumpets are sounded. (1) The earth and the sea are struck (the earth is opened), and an immense multitude of the redeemed of all nations are seen worshipping God. Next (7) the seventh seal is opened, and half an hour's silence in heaven ensues.

e. Then (viii. 2-xx. 19) seven angels appear with trumpets, the prayers of saints are offered up, the earth is struck with fire from the altar, and the seven trumpets are sounded. (1) The earth and the sea are struck (the earth is opened), and an immense multitude of the redeemed of all nations are seen worshipping God. Next (7) the seventh seal is opened, and half an hour's silence in heaven ensues.

The three preceding visions are distinct from one another. Each of the last two, like the longer one which follows, has the appearance of a distinct prophecy, reaching from the prophet's time to the end of the world. The second half of the Revelation (xxii. 12) comprises a series of visions which are connected by various links. It may be described generally as a prophecy of the assaults of the devil and his agents (= the dragon, the two-horned beast, the two-horned beast or false prophet
and the harlot upon the Church, and their final destruction. It appears to begin with a reference to events anterior, not only to those which are predicted in the preceding chapter, but also to the time in which it was written. It seems hard to interpret the birth of the child as a prediction, and not as a retrospective allusion.

d. A woman (xiii.) clothed with the sun is seen in heaven, and a great red dragon with seven crowned heads stands waiting to devour her offspring; her child is caught up unto God, and the mother flees into the wilderness for 1260 days. The separation of the woman and her seed on earth by the dragon, is described as the consequence of a war in heaven in which the dragon was overcome and cast out upon the earth.

St. John (xiii.) standing on the sea-shore sees a beast with seven heads, one wounded, with ten crowned horns, rising from the water, the representative of the dragon. All the world wonder at and worship him, and he attacks the saints and prevails. He is followed by another two-horned beast rising out of the earth, who compels men to wear the mark of the beast, whose number is 666.

St. John (xiv.) sees the Lamb with 144,000 standing on Mount Zion bearing the song of praise of the redeemed. Three angels fly forth calling men to worship God, proclaiming the fall of Babylon, denouncing the worshippers of the beast. A blessing is pronounced on the faithful dead, and the judgment of the world is described under the image of a harvest reaped by angels.

St. John (xv., xvi.) sees in heaven the saints who had overcome the beast, singing the song of Moses and the Lamb. They are sitting upon white thrones with seven stars of wisdom which they pour out upon the earth, sea, rivers, sun, the seat of the beast, Euphrates, and the air, after which there is a great earthquake and a hailstorm.

One (xvii., xviil.) of the last seven angels carries St. John into the wilderness and shows him a harlot, Babylon, sitting on a scarlet beast with seven heads and ten horns. She is explained to be that great city, sitting upon seven mountains, reigning over the kings of the earth. Afterwards St. John sees a vision of the destruction of Babylon, portrayed as the burning of a great city amidst the lamentations of worldly men and the rejoicing of saints.

 Afterwards (xix.) the worshippers in heaven are heard celebrating Babylon's fall and the approaching marriage-supper of the Lamb. The Word of God is seen going forth to war at the head of the heavenly armies: the beast and his false prophet are taken and cast into the burning lake, and their worshippers are slain. An angel (xxi., xxii.) binds the dragon, i. e. the devil, for 1000 years, whilst the martyred saints who had not worshipped the beast reign with Christ. Then the devil is loosed, gathers a host against the camp of the saints, but is overcome by fire from heaven, and is cast into the burning lake with the beast and false prophet. St. John then witnesses the process of the final judgment, and sees and describes the new heaven and the new earth, and the new Jerusalem, with its people and their way of life.

In the last sixteen verses (xxii., 6-21) the angel solemnly asseverates the truthfulness and importance of the foregoing sayings, pronounces a blessing on those who keep them exactly, gives warning of his speedy coming to judgment, and of the nearness of the time when these prophecies shall be fulfilled.

E. Interpretation. — A short account of the different directions in which attempts have been made to interpret the Revelation, is all that can be given in this place. The special blessing promised to the reader of this book (i. 3), the assistance to common Christian experience afforded by its precepts and by some of its visions, the striking imagery of others, the tempting field which it supplies for intellectual exercise, will always attract students to this book and secure for it the labors of many commentators. Ebrard reckons that not less than eighty systematic commentaries are worthy of note, and states that the less valuable writings on this inexhaustible subject are unnumbered, if not innumerable. Fanaticism, theological hatred, and vain curiosity, may have largely influenced their composition; but any one who will compare the necessarily inadequate, and sometimes erroneous, exposition of early times with a good modern commentary will see that the pious ingenuity of so many centuries has not been exerted quite in vain.

The interval between the Apostolic age and that of Constantine has been called the Chiliasm period of the Church. The prophecies of St. John were chiefly regarded as representations of general Christian truths, scarcely yet embodied in actual facts, for the most part to be exemplified or fulfilled in the reign of Antichrist, the coming of Christ, the millennium, and the day of judgment. The fresh hopes of the early Christians, and the severe persecution they endured, taught them to look for events directly corresponding with these hopes of their millennial restoration and comfort. They did not entertain the thought of building up a definite consecutive chronological scheme even of those symbols which some moderns regard as then already fulfilled: although from the beginning a connection between Rome and Antichrist was universally allowed, and parts of the Revelation were regarded as the filling-up of the great scheme sketched by Daniel and St. Paul.

The only extant systematic interpretations in this period are the interpolated Commentary on the Revelation by the martyr Victorinus, circa. 270 A. D. (Bibliotheca patrum mozarn., iii. 414, and Migne's Patrologia latina, v. 318; the two editions should be compared), and the disputed Treatise on Antichrist by Hippolytus (Migne's Patrologia Graeca, x. 721). But the prevalent views of that age are to be gathered also from a passage in Justin Martyr (Trypho, 80, 81), from the later books, especially the fifth, of Irenaeus, and from various scattered passages in Tertullian, Origen, and Methodius. The general anticipation of the last days of the world in Lactantius, vii. 14-23, has a direct reference to the Revelation.

Immediately after the triumph of Constantine, the Christians, emancipated from oppression and persecution, and dominant and prosperous in their turn, began to lose their vivid expectation of our Lord's speedy Advent, and their spiritual conception of his kingdom, and to look upon the temporal supremacy of Christ as a fulfillment of the promised reign of Christ on earth. The Roman empire became Christian was regarded no longer as the object of prophetic denunciation, but as the scene of a millennial development. This view, however, was soon met by the figurative interpretation of the millennium as the reign of Christ in
the hearts of all true believers. As the barbarous and heretical invaders of the fallen empire appeared, they were regarded by the suffering Chris-
tians as fulfilling the woes denounced in the Re-
velation. The beginning of a regular chronological
interpretation is seen in Berengaud (assigned by
some critics to the 9th century), who treated the
Revelation as a history of the Church from the
beginning of the world to its end. And the origi-
nal Commentary of the Abbot Joachim is remark-
able, as a further development of that method of
interpretation, but for the scarcely dis-
guised identification of Babylon with Papal Rome,
and of the second Beast or Antichrist with some
Universal Pontiff.

The chief commentaries belonging to this period
are that which is ascribed to Tichonius, circ. 390;
A. D., printed in the works of St. Augustine: Pri-
masius, of Adrianum in Africa, A. D. 550, in
Migne's Patrologia Latina, lxxvi. 1406; Andreas
of Crete, circ. 650 A. D., Arethas of Capadocia
and Eumenius of Thessaly in the 10th century,
whose commentaries were published together in
Cramer's Coticum, Oxon., 1840; the Explanatio
Apoc. in the works of Bede, A. D. 732; the Expo-
sio in the Annals of Am-
brose: the Commentary of Haymo, A. D. 833, first
published at Cologne in 1531; a short Treatise
on the Seals by Ansch, bishop of Havilburg, A. D.
1145, printed in D'Achéry's Spicilegium, l. 161; the
Expositio of Abbot Joachim of Calabria, A. D.
1290, printed at Venice in 1527.

In the dawn of the Reformation, the views to
which the repetition of Abbot Joachim gave cur-
rency, were taken up by the harbingers of the im-
pending change, as by Wickliffe and others; and
they became the foundation of that great historical
school of interpretation, which up to this time
seems the most popular of all. It is impossible to
construct an exact classification of modern inter-
preters of the Revelation. They are generally
placed in three great divisions,

a. The Historical or Continuous expositors, in
whose opinion the Revelation is a progressive his-
tory of the fortunes of the Church from the first
century to the end of time. The chief supporters
of this most interesting interpretation are Mede,
Sir I. Newton, Vitringa, Bengal, Woodhouse, Fa-
er, E. B. Elliott, Wordsworth, Hegelstagen,
Ehrard, and others. The recent work of this party
are Alcasar, Grodins, Hammond, Bousset, Calmet, Wet-
stein, Eichhorn, Hug, Herder, Exwald, Liecke, Ve
Wette, Dusderlick, Stuart, Lee, and Maurice.
This is the favorite interpretation with the critics
of Germany, one of whom goes so far as to state
that the writer of the Revelation promised the
fulfilment of his visions within the space of
three years and a half from the time in which he
wrote.

b. The Preradical expositors, who are of opinion
that the Revelation has been almost, or altogether,
fulfilled in the time which has passed since it was
written; that it refers principally to the triumph
of Christianity over Judaism and Paganism, sig-
nalized in the downfall of Jerusalem and of Rome.
The most eminent expositors of this view are
Alessar, Grodins, Hammond, Bousset, Calmet, Wet-
stein, Eichhorn, Hug, Herder, Exwald, Liecke, Ve
Wette, Dusderlick, Stuart, Lee, and Maurice.
This is the favorite interpretation with the critics
of Germany, one of whom goes so far as to state
that the writer of the Revelation promised the
fulfilment of his visions within the space of
three years and a half from the time in which he
wrote.

c. The Futurist expositors, whose views show a
strong reaction against some extravagances of the
two preceding schools. They believe that the whole
book, excepting perhaps the first three chapters,
were principally, if not exclusively, to events which
are yet to come. This view, which is ascribed to
be merely a revival of the primitive interpretation,
has been advocated in recent times by Dr. J. H.
Todd, Dr. S. R. Maitland, B. Newton, C. Mattiand,
I. Williams, De Bury, and others.

Each of these three schemes is open to objec-
tion. Against the Futurist it is argued, that it is
not consistent with the repeated declarations of a
speedy fulfillment at the beginning and end of the
book itself (see Rev. 1. 3, xxii. 7, 12, 20). Against
the Preterist it is urged, that prophecy's fulfilled ought to be rendered so per-
sonious to the general sense of the Church as to
supply an argument against infidelity; that the
destruction of Jerusalem, having occurred twenty-
five years previously, could not occupy a large
space in a prophecy: that the supposed predictions
of the downfall of Jerusalem and of Nero appear
from the very nature of the event, but are by
this scheme separated, and, moreover, placed in a
wrong order: that the measuring of the temple
and the altar, and the death of the two witnesses
(ch. xi.), cannot be explained consistently with
the context.

Against the Historical scheme it is urged, that
they advocate differ very widely among themselves:
that they assume without any authority that the
1290 days are so many years: that several of its
applications — e. g. of the symbol of the ten-horned
beast to the Popes, and the sixth seal to the con-
version of Constantine — are inconsistent with the
context; that attempts by some of this school to
predict future events by the help of Revelation have
ended in repeated failures.

In conclusion, it may be stated that two methods
have been proposed by which the student of the
Revelation may escape the incongruities and falla-
cies of the different interpretations, whilst he may
derive edification from whatever truth they contain.
It has been suggested that the book may be re-
garded as a prophetic poem, dealing in general and
imperfect descriptions, much of which may be
known as poetic imagery, mere embellishment.
But such a view would be difficult to reconcile with
the belief that the book is an inspired prophecy.
A better suggestion is made, or rather is revived,
by Dr. Arnold in his Sermons On the Interpretation
of Prophecy: that we should bear in mind that
predictions have a lower historical sense, as well as
a higher spiritual sense: that there may be one or
more than one typical, imperfect, historical fulfil-
ment of a prophecy, in each of which the higher
spiritual fulfillment is shadowed forth more or less
distinctly. Mr. Elliott, in his Hose Apocalypse,
iv. 622, argues against this principle; but perhaps
not successfully. The recognition of it would pave
the way for the acceptance in a modified sense of
many of the spiritual senses of the Historical book
and would not exclude the most valuable portions
of the other schemes.

Schriften übers. u. erklärt, II. Bd., Gott. 1862.

Critical editions of the Greek text, with a new English version and various readings, have been published by Dr. S. P. Tregelles (Lond. 1844) and William Kelly (Lond. 1860), followed by his Lectures on the Apoc. (Lond. 1861). The Second Epistle of Peter, the Epistles of John and Jude, and the Revelation: truns. from the Greek, with Notes, New York (Amer. Bible Union), 1864. The work was prepared by the late Rev. John Lille, D. D.

a REZEPHE Ṛṣaḥḥ (stronghold, Fürst;): [Paqûs, Patv.] Paqûs, and Paqûs: (Comp. Paqûs, Paqûs: Sin in Is. Paqûs: ] Reseph). One of the places which Sennacherib mentions, in his taunting name to Hezekiah, as having been destroyed by his predecessor (2 K. xix. 12; Is. xxvi. 21). It hecup it with Haran and other

well-known Mesopotamian spots. The name is still a common one, Yak'tin's Lexicon quoting nine towns so called. Interpreters, however, are at

terchangeably, namely, Paqûs in 2 Kings, Paqûs in Isaiah.
rience between the principal two of these. The one is a day's march west of the Ephraites, on the road from Recess to Hinnis (Gen. viii. 27; 1 Chron. vii. 38); the other, east of the Ephraites, near Beulah (Hitzig). The former is mentioned by Ptolemy (v. 15) under the name of Παρασία, and appears, in the present imperfect state of our Mesoopotamian knowledge, to be the more feasible of the two.

G.

REZIA (RêziÁ, [adj.]: *Parad.; [Vat. Parasia; Resia]). An Asirite, of the sons of Ulla (1 Chron. vii. 39).

REZIN (RÊZîn) [perh. stobole, from, or prince, &c.]: Passar, Parash, Pariz. [Pariz, Parad; Vat. in Is. Pares, Pares, Paresu; Sin. in Is. Paresu; Alex. Passar, exc. Is. vii. 8, Parséu; Resin]. 1. A king of Damascus, contemporary with Pekah in Israel, and with Jotham and Ahaz in Judaea. The policy of Rezin seems to have been to ally himself closely with the kingdom of Israel, and, thus strengthened, to carry on constant war against the kings of Judah. He attempted Jotham during the latter part of his reign (2 Kings xv. 37); but his chief war was with Ahaz, whose territories he invaded, in company with Pekah, soon after Ahaz had mounted the throne (about B.C. 741). The combined army laid siege to Jerusalem, where Ahaz was, but "could not prevail against it." (Is. vii. 1; 2 Kings xvi. 9). Rezin, however, "recovered Elath to Syria" (2 Kings xvi. 9); that is, he conquered and held possession of the celebrated town of that name at the head of the Gulf of Akaba, which commanded one of the most important lines of trade in the East. Soon after this he was attacked by Tiglath-Pileser II., king of Assyria, to whom Ahaz in his distress had made application; his armies were defeated by the Assyrian hosts; his city besieged and taken; his people carried away captive into Susiana (? Ktes); and he himself slain (2 Kings xvi. 9; compare Tiglath-Pileser's own inscriptions, where the defeat of Rezin and the destruction of Damascus are distinctly mentioned). This treatment was probably owing to his being regarded as a rebel; since Damascus had been taken and laid under tribute by the Assyrians some time previously (Kalkwinkel's Herodot, iv. 17).

G. B. 2. [Parasis]: In Neh. Rom. Passar, FA. Passar. One of the families of the Nehemiah (Ezra ii. 48; Neh. vii. 50). It furnishes another example of the occurrence of non-Israelite names amongst them, which is already noticed under MEHUMIN [lit. 1875, note a; and see Sisera]. In 1 Esdr. the name appears as Bason, in which the change from R to B seems to imply that 1 Esdras at one time existed in Syriac or some other Semitic language.

G.

REZON (Rêzôn) [prince]: [Roman, om.; Vat. Epoôr]; Alex. Pahrer; Razon). The son of Eliadah, a Syrian, who, when David defeated Hadadezer king of Zobah, put himself at the head of a band of freebooters and set up a petty kingdom at Damascus (1 Kings x. 23). Whether he was an officer of Hadadezer, who, foreseeing the destruction which David would inflict, prudently escaped with his men to the Ephraites, ourselves; and whether he gathered his band of the remnant of those who survived the slaughter, does not appear. The latter is more probable. The settlement of Rezon at Damascus would not have been till some time after the disastrous battle in which the power of Hadadezer was broken, for we are told that David at the same time defeated the army of Damascus, whose king David defeated, was Hadad, and that his descendants and successors took the same name for ten generations. If this be true, Rezon was a usurper, but the origin of the story is probably the confused account of the LXV. In the Vatican MS. of the LXX. the account of Rezon is inserted in ver. 14 in close connection with Hadad, and on this Josephus appears to have founded his story that Hadad, on leaving Egypt, endeavored without success to excite Idumea to revolt, and then went to Syria, where he joined himself with Rezon, called by Josephus Razzar, who at the head of a band of robbers was plundering the country (Ant. vii. 5, § 6). It was Hadad and not Rezon, according to the account in Josephus, who established himself king of that part of Syria, and made friends with the Assyrians. In 1 Kings x. 18, Benhadad, king of Damascus in the reign of Asa, is described as the grandson of Rezon, and from the resemblance between the names Rezon and Rezon, when written in Hebrew characters, it has been suggested that the latter is a corrupt reading for the former. For this suggestion, however, there does not appear to be sufficient ground, though it was adopted both by Sir John Marsham (Chron. Con. p. 274) and Sir Isaac Newton (Chronol. p. 221). Bunsen (Bibl. u. ccel. i. 212) makes Rezon contemporary with Rehoboam, and probably a grandson of Rezon. The name is Aramaic, and Ewald compares it with Rezin.

W. A. W.

RHEGIUM (Rhégoim). The mention of this Italian town (which was situated on the Bruttian coast, just at the southern entrance of the straits of Messina) occurs quite incidentally (Acts xxviii. 13) in the account of St. Paul's voyage from Syracuse to Puteoli, after the shipwreck at Malta. But, for two reasons, it is worthy of careful attention. By a curious coincidence the figures on its coins are the very "twi-brothers" which gave the name to St. Paul's ship. See (attached to the article CASTOR AND POLLUX) the coin of Bruttii, which doubtless represents the forms that were painted or sculptured on the vessel And, again, the notice of the intermediate position of Rhegium, the waiting there for a southerly wind to carry the ship through the straits, the run to Puteoli with such a wind within the twenty-four hours, are all points of geographical accuracy which help us to realize the narrative. As to the history of the place, it was originally a Greek colony: it was miserably destroyed by Dionysius of Syracuse: from Augustus it received advantages which combined with its geographical position in making it important throughout the duration of the Roman empire; it was prominently associated, in the Middle Ages, with the naval fortunes of the Sicilian emperors, the Sasines, and the Romans; and still the modern Reggio is a town of 10,000 inhabitants. Its distance across the straits from Messina is only about six miles, and it is well seen.
from the telegraph station above that Sicilian town.  

RHESA (Ῥήσα: Resa), son of Zorobabel in the genealogy of Christ (Luke iii. 27). Lord As. Hervey has ingeniously conjectured that Rhesa is no person, but merely the title Rosh, i.e., "Prince," originally attached to the name of Zerubbabel, and gradually introduced as an independent name into the genealogy. He thus removes an important obstacle to the reconciliation of the pedigrees in Matthew and Luke (Hervey's genealogies, etc. pp. 111, 114, 356—359). [Genealogy of Jesus Christ, i. 881; Zerubbabel.]  

G.  

RHO’DA (Ῥοδά: Rhodea), lit. Ros., the name of a maid who announced Peter's arrival at the door of Mary's house after his miraculous release from prison (Acts xii. 13). [Poster.]  

RHODES (Ῥόδας: Rhodos) | RHODES (Ῥόδας: Rhodos), 1 Mac. xv. 23. [Rhodes.]  

RHODE'OCUS (Ῥωδόκος: Rhodocus). A Jew who betrayed the plans of his countrymen to Anti-ochus Eupator. His treason was discovered, and he was placed in confinement (2 Macc. xii. 21).  

B. F. W.  

RHO'DUS (Ῥοδύς: Rhodius), 1 Mac. xv. 23.  

RI'BAIN [2 syl.] (Ῥεβ'ιν) [whom Jeevehh defends]: 'Ρβάι [Vat. Ρβάι] in Samm., 'Ρβάι [A. Ρβάια] in Chr.: Ribaï. The father of Ittai the Benjaminite of Gibeah, who was one of David's mighty men (2 Sam. xxix. 2; 1 Chr. xi. 31).  

* RIBBAND. [Lace]  

RI'BLAH. 1. (Ῥεβ'λαι), with the definite article [fertility]: Ρεβ'λα in both MSS.: Rellah. One of the landmarks on the eastern boundary of the land of Irael, as specified by Moses (Num. xxxiv. 11). Its position is noted in this passage with much precision. It was immediately between Shepham and the sea of Chinnereth, and on the "east side of the spring." Unfortunately Shepham has not yet been identified, and which of the great mountains of northern Palestine is intended by "the spring" is uncertain. It seems hardly possible, without entirely disregarding the specification of the boundary, that the Ribilah in question can be the same with the "Rilkah in the land of Hamath" which is mentioned at a much later period of the history. For, according to this passage, a great distance must necessarily have intervened between Ribilah and Hamath. This will be evident from a mere enumeration of the landmarks.  

1. The north boundary: The Mediterranean,  

When he went to Italy, about the close of the last Republican struggle, he found that the city had suffered much from Cassius, and gave liberal sums to restore it (Joseph. Ant. xiv. 14, § 3). Here, also, after the battle of Actium, he met Augustus and secured his favor ( Ibid. xv. 6, § 6).  

c Originally it appears to have stood Αντιοχεία; but the αυ has now attached itself to the preceding name =Λοςοναμ ια. Can this be the ABELE of 1 Macc. ix. 2?  

a * Regio is in full view from the harbor of Mesina. The Apostle passed there in winter, probably in February (as Luke's narrations of time indicate), and at that season he must have seen the mountains, both of Sicily and of the mainland, covered with snow. The name is from ὅραμα, to look or burst through, se if the sea had there torn off Sicily from the continent. See Pape's Wörterb. der Griech. Eigennamen, s. v.  

b Two incidents in the life of Herod the Great connected with Rhodes, are well worthy of mention here.
RIBLAL

Mount Hor, the entrance of Hamath, Zelad, Z:idh-

aan, Hazar-eun.

2. The eastern boundary commenced from Ha-

zar-eun, turning south: Shepham, Riblah, passing
east of the spring, to east side of Sea of Galilee.

Now it seems impossible that Riblah can be in
the land of Hamath, a seeing that four landmarks
between them. Add to this its apparent proximity
to the Sea of Galilee.

The early Jewish interpreters have felt the force
of this. Confused as is the catalogue of the bound-
ary in the Targum Pseudojonathan of Num. xxvi.,
it is plain that the author of that version considers
"the spring" as the spring of Jordan at Bouthis,
and Riblah, therefore, as a place near it. This
agrees with Parchi, the Jewish traveller in the 13th
and 14th centuries, who expressly discriminates be-
tween the two (see the extracts in Zunz's Geni-
min. ii. 418), and in our own day J. D. Michaelis
(Bibel für Engländeri: Syst. ad Lex., No. 2131), and Boudriana, the learned editor of Euse-
bius's Onomasticon.

No place bearing the name of Riblah has yet
been discovered in the neighborhood of Barjas.

2. Riblah in the land of Hamath (77827), once
77827. i.e. Riblahah: Διβλαθα in both MSS.
(Rom. in 2 K. xxiii. 33, Ραβλαθα, xxv. 6, 21, 22, Ρεβλαθα) Riblatho. A place on
the great road between Palestine and Babylon, at
which the kings of Babylon were accustomed to
remain while directing the operations of their
armies in Palestine and Phoenicia. Here Nebuchad-
nnezzar waited while the sieges of Jerusalem and
of Tyre were being conducted by his lieutenants:
hither were brought to him the wretched king of
Judæa and his sons, and after a time a selection
from all ranks and conditions of the conquered
city, who were put to death, doubtless by the horrible
death of impaling, which the Assyrians practiced,
and the long lines of the victims to which are still
to be seen on their monuments (Jer. xxxvi. 5, 6,
li. 9, 10, 26, 27: 2 K. xxv. 6, 20, 21). In like
manner Pharaoh-Necho, after his successful victory
over the Babylonians at Carchemish, returned to
Riblah and summoned Jehoiakim from Jerusalem
before him (2 K. xxiii. 33).

This Riblah had no doubt been discovered, still
retaining its ancient name, on the right (east)
bank of the el-Asy (Orontes), upon the great road
which connects Huleh and Homs, about 35 miles
N. E. of the former and 20 miles S. W. of the later
place. The advantages of its position for the en-
campment of vast hosts, such as those of Egypt and
Babylonia, are enumerated by Dr. Robinson, who
visited it in 1852 (Bibl. Res. iii. 345). He describes
it as "lying on the banks of a mountain stream in
the midst of a vast and fertile plain yielding the
most abundant supplies of forage. From this point
the roads were open by Aleppo and the Euphrates
to Nineveh, or by Palmyra to Babylon, . . . . by
the end of Lebanon and the coast to Palestine and
Egypt, or through the Bakda and the Jordan Valley
to the centre of the Holy Land." It ap-

ears to have been first alluded to by Buckingham
in 1816.

Riblah is probably mentioned by Ezekiel (v.
14), though in the present Hebrew text and A. V.
it appears as Diblah or Dibabath. The change from
R to D is in Hebrew a very easy one. Riblah
suits the sense of the passage very well, while on
the other hand Diblah is not known. (Dilblath.)

G.

* RICHES, Rev. xviii. 17, not plural but sin-
gular: "In one hour so great riches is come to
ought" (so also Wisd. v. 8). The original plural
was richesses (Fr. richesses), as in Wickliffe's
version, and was generally obsolete at the time
of the translation of the A. V. It stood at first also
in Jer. xviii. 36, but as Trench mentions (Author-
ized Version, p. 60) was tacitly corrected, by
changing "is" to "are." H.

RIDDLE (77787): άριθμος, προβλήματα: pro-
blems, enigmas). The Hebrew word is derived from
an Arabic root meaning "to lend off," "to twist," and is used for artifice (Dun. viii. 23), a
proverb (Prov. i. 6), a song (Ps. xliii. 4, lxviii. 22),
an oracle (Num. xii. 8), a parable (Ex. xvi. 2),
and in general any wise or intricate sentence (Ps.
xiv. 4; Heb. ii. 6, &c.), as well as a riddle in our
sense of the word (Judg. xiv. 12-19). In these
senses we may compare the phrases στροφή λόγων,
στροφαί παραβολάν (Wisd. viii. 8; Ecclus. xxix.
2), and περίπατικός λόγος (Enr. Ph. 457; cen-
sen. c. c.), and the Latin sicutus, which appears
to have been similarly used (Ann. Gall. Not. i. xii.
6). Augustine defines an enigma to be any "ob-
scura allegoria" (De Trin. x. 9), and points out,
as an instance, the passage about the daughter
of the horse-leech in Prov. xxx. 15, which has
been elaborately explained by Bellermann in a mono-
graph on the subject (Enigmatum Hebrew, Erf.
1798). Many passages, although not definitely
proposed as riddles, may be regarded as such,
c. e. Prov. xxxv. 10, a verse in the rendering of
which every version differs from all others. The
riddles which the queen of Sheba came to ask of
Solomon (1 K. x. 1, άλλες περίπατικοί στοιχον εν αι-
νίγματι) (2 Chr. i. 1) were rather "hard ques-
tions" referring to profound inquiries. Solomon
is said, however, to have been very fond of the
riddle proper, for numerous are the two riddles
of the historians (Memoriam of Ephesus, and Dios) to
authenticate a story that Solomon proposed numerous
riddles to Hiram, for the non-solution of which Hi-
ram was obliged to pay a large fine, until he sum-
mmoned to his assistance a Tyrian named Abde-
mon, who not only solved the riddles, but propounded
other which Solomon himself was unable to
answer, and consequently in his turn incurred the
penalty. The word αίνιγμα occurs only once in
the N. T. (1 Cor. xiii. 12, "darkly," εν αινίγματι,
comp. Num. xii. 8; Wettean, N. T. ii. 158); but,
in the wider meaning of the word, many in-
stances of it occur in our Lord's discourses. Thus
Erasmus applies the term to Matt. xii. 43-45.
The object of such implicated meanings is obvi-
as, and is well explained by St. Augustine:

a If Mr. Porter's identifications of Zelad and Hat-
turn are adopted, the difficulty is increased tenfold.

b The two great MSS. of the LXX. — Vatican (Maj
and Alex. — present the name as follows: —
2 K. xxv. 6, "Εραμεναδιαραβα." — 2 K. xxv. 31, "Εραμαναδιαραβα." — Jer. iii. 9, 10, 26, 27, "Εραμανθα" in both.

c For interesting notices of this Riblah, see Dr.
Thomson's "Diary of a Journey from Aleppo to Leb-
RIDDLE

...manifesta passimur, obscuria exercens..." (De

Doct. Christ. ii. 6).

We know that all ancient nations, and especially

Orientalists, A. ler, opposed Plutarch, of

the Persians call them Agor and Muanna (D'Herbelot, s. v. Agor). They

were also known to the ancient Egyptians (Dallouski, Pantheon Egypt. 48). They were especially

used in banquet scenes both by Greeks and Romans (Millor, Dic. ii. 592; Athen. x. 437; Polyb. vii. 107;

A. Gell. xviii. 2; Dict. of Ant. p. 22), and the kind of

wit which Adam may have been seen in the literary

dinner descriptions by Plato, Xenophon, Athenæus, Plutarch, and Macrobius. Some have groundlessly

supposed that the proverbs of Solomon, Lennæus, and Agor, were propounded at feasts, like the par-

ables spoken by our Lord on similar occasions (Luke

cvi. 7, etc.).

Riddles were generally proposed in verse, like the

celebrated riddle of Solomon, which, however, was

properly (as Voss points out, Instit. Ortal. iv. 11) not a riddle at all, because the Philistines did not

possess the only clue on which the solution could
-depend. For this reason Solomon had carefully con-
ceded the fact even from his parents (Judg. xiv. 14, etc.). Other ancient riddles in verse are that of

the Sphinx, and that which is said to have caused the death of Homer by his mortification at being unable to solve it (Plutarch. Vit. Hom.).

Franz Jünius distinguishes between the greater

enigmas, where the allegory or obscure intimation is continuous throughout the passage (as in Ex.

xxvii. 2, and in such poems as the Syrinx attributed to Hesiodus); and the lesser enigmas or maim-

vagias, where the difficulty is concentrated in the peculiar use of some one word. It may be useful

to refer to one or two instances of the latter, since they are very frequently to be found in the Bible,

and especially in the Prophets. Such is the play

on the word א識 (a portion, and "Shechem,"

the town of Ephraim) in Gen. xlvi. 22; on לְכֵ֔כִּים

(malzb, a fortified city, and לְכֵ֔כִּים, Miz-

rain, Egypt) in Mic. vii. 12; on סַ֖כְּדֵּי (Shekhd, an almond-tree), and לְכֵ֔כִּים (shakhd, to hasten); in Jer. i. 11; on לְכֵ֔כִּים (Dinah, meaning "Eloah" and "the land of death"), in Is.

xxvi. 11; on לְכֵ֔כִּים Shekneh (meaning "Baby-

lon,

and perhaps "arrogance"), in Jer. xxv. 29; li. 41.

It only remains to notice the single instance of a

riddle occurring in the N. T., namely, the number

of the beast. This belongs to a class of riddles

very common among Egyptian mysteries, the Gno-

stics, some of the Fathers, and the Jewish Catholicists.

The latter called it genetrici, that is, geneticps, of

which instances may be found in Carpov (App.

Crit. p. 542), Reim (Ant. Hebr. i. 25), and some

of the commentators on Rev. xiiii. 16-18. Thus

נְכֵ֔כִּים (nëkëdësh, "serpent," is made by the Jews

one of the names of the Messias, because its

numerical value is equivalent to נְכֵ֔כִּים, and

the names Shushan and Father are connected together

because the numerical value of the letters com-

posing them is 601. Thus the Marcossians regarded

the number 24 as sacred from its being the sum

of numerical values in the names of two quaternaries

of their Æons, and the Gnostics used the name

Abrasaxus as an anagram, because its letters ar

count numerically to 365. Such idle fancies are not

unfrequent in some of the Fathers. We have

already mentioned (see Cross) the mystical explana-

tion by Clem. Alexandrinus of the number 318 in

Gen. xiv. 14, and by Tertullian of the number 300

(represented by the letter T or a cross) in Judg.

vii. 6, and similar instances are supplied by the

Testimonia of the Pseudo-Cyprian. The most

exact analogies, however, to the enigma on the

name of the beast, are to be found in the so-called

Jewish verses. We quote one which is exactly

similar to it, the answer being found in the name

ανθρώπος = 888, that is, 10 + 4 + 200 + 200 + 200 = 888. It is

as follows, and is extremely curious:

 γυναικείωσας διέηκας ἐπιτοίχιον

νοούμενοι χειροποίημα τοῦ Παρθένου: τα ἐκ θεοῦ ἐκ τοῦ

ὁμοίου οὐκ ἔχων ὁμοίου

ένδοχν ἡμεῖς ταύτα

ανακάθιστά σαυτῶν

θεοῦ ἐπείκους.

With examples like this before us, it would be

useless to doubt that St. John (not greatly re-

moved in time from the Christian forgers of the

Jewish verses) intended some name as an answer

to the number 666. The true answer must be

settled by the Apocryphal commentators. Most

of the Fathers supposed, even as far back as Iren-

aeus, the name Δαρίου to be indicated. A list

of the other very numerous solutions, proposed in

different ages, may be found in Elliott's Hose

Apocolypses, from which we have quoted several

of these instances (Hor. Apoc. iii. 222-234).

V.

RIMMON [רימנ] [pomegranate]: Rëmuw: Rimmun. Rimmun, a Benjamite of Beeroth, was the

father of Rechab and Bamnah, the murderers of

Ishshoboth (2 Sam. iv. 2, 5, 9).

RIMMON [רימנ] [pomegranate]: Rëmuw: Rimmun. A deity, worshipped by the Syrians of

Damascus, where there was a temple or house of

Rimmun (2 K. v. 18). Traces of the name of this

god appear also in the proper names Hadad-

rimmon and Tabrimmon, but its signification is

doubtful. Seraphim, quoted by Selden (De dia

Apag, ii. 10), refers it to the Heb. rimmun, a

pomegranate, a fruit sacred to Venus, who is thus

the deity worshipped under this title (compare

Parnon, from pome).

Urinsins (Arborvium Bibl. cap. 32, 7) explains rimmun as the pomegranate.

of pomegranate. On the profound use of this figure

by the prophets and other writers see Benal, Du

Propriete d'At. Bond. i. 48; Steinauer, Ubrer, d

RIMMON

RIMMON, THE ROCK 2733

The monument of the fertilizing principle of nature, the personified natura noturna, a symbol of frequent occurrence in the old religions (Hädr, Sym- bolik, ii. 122). If this be the true origin of the name, it presents us with a relic of the ancient tree-worship of the East, which we know to have prevailed with the Semitic tribes. But the name may have its derivative, and proposes instead that Rimmmon is from the root רמי, רמא, “to be high,” and signifies “most high;” like the Phenician Elioum, and Hob. יְרָמִי יְרָמִי. Hebrews gives רמא, רמא, פְּרָטָוָּי. Clerics, Vitringa, Rosenmüller, and Gesenius were of the same opinion.

Movers (Hist. i. 196, &c.) regards Rimmmon as the abbreviated form of Hadad-Rimmmon (as Peor for Bad-Peræ), Hadad being the sun-god of the Syrians. Combining this with the pomegranate, which was his symbol, Hadad-Rimmmon would then be the sun-god of the late summer, who ripens the pomegranate and other fruits, and, after infusing into them his productive power, dies, and is mourned over by the “mourning of Hadad-Rimmmon in the valley of Megiddon” (Zech. xii. 11).

Between these different opinions there is no possibility of deciding. The name occurs but once, and there is no evidence on the point. But the conjecture of Schellen, which is approved by Gesenius, has the greater show of probability.

W. A. W.

RIMMON (רְמֵמְוָן) i.e. Rimmmoni (pomegranate); ה רְמֵמְוָן: Remmon. A city of Zebulun belonging to the Merarite Levites (1 Chr. vi. 77). There is great discrepancy between the lists in which it occurs and the personal names of Josh. xxii. The former contains two names in place of the four of the latter, and neither of them the same. But it is not impossible that Remmon (Josh. xiii. 35) may have been originally Rimmmon, as the D and R in Hebrew are notoriously easy to confound. At any rate there is no reason for supposing that Rimmmon is not identical with Remmon of Joshua, xiv. 13, in the Catalogue of Joshua.

The redundant letter was probably transferred, in copying, from the succeeding word — at an early date, since all the MSS. appear to exhibit it, as does also the Targum of Joseph. (Dr. Robinson inquires whether this Rimmmon may not be the present Rummaen, a little north of Nazareth. See Bibl. Res. ii. 940 (26 ed.). — H. G.)

RIMMON (רְמֵמְוָן) [pomegranate]; יְרָמִי, יְרָמִי: Remmon. Alex. Remmon. [In 1 Chr. Rom. Ῥεμ- μων, Vat. Ῥεμμων:] Remmon. A town in the southern portion of Judah (Josh. xv. 32), allotted to Simeon (Josh. xiv. 7; 1 Chr. iv. 32; in the former of these two passages it is inaccurately given in the A. V. as Remmon). In each of the above lists the name succeeds that of Arx, also one of the cities of Judah and Simeon. In the catalogue of the places reoccupied by the Jews after the return from Babylon (Neh. xii. 29) the two are joined (רְמֵמְוָן רְמֵמְוָן: LXX. omits: et in Remmon), and appear in the A. V. as En-Rimmmon. There is nothing to support this single departure of the Hebrew text from its practice in the other lists, except the fact that the Variae LXX. (if the addition of Mai be trusted) has joined the names in each of the lists of Joshua, from which it may be inferred that at the time of the LXX. translation the Hebrew text there also showed them joined. On the other hand there does not appear to be any sign of such a thing in the present Hebrew MSS.

No trace of Rimmmon has been yet discovered in the south of Palestine. True, it is mentioned in the Omnipotence of Eusebius and Jerome; but they locate it at 15 miles north of Jerusalem, obviously confounding it with the Rock Rimmmon. That it was in the south would be plain, even though the lists above cited were not extant, from Zech. xiv. 10, where it is stated to be “south of Jerusalem,” and where it and Geba (the northern frontier of the southern kingdom) are named as the limits of the change which is to take place in the aspect and formation of the country. In this case Jerome, both in the Vulgate and in his Commentary (in Zech. xiv. 9 B.), joins the two names, and understands them to denote a hill north of Jerusalem, apparently well known (don'tless the ancient Gibeon), marked by a pomegranate tree — a collis Rimmmon (hence eben Gamos, sibi aerbor magnum non est usque ad australiam plagam Jerusalem.)

RIMMON PAReZ (רְמֵמְוָן פֶּרֶץ) [pome- granate of the branch or root]; יְרָמִי פֶּרֶץ: Remmon prophétis (Remmon). The name of a march-station in the wilderness (Num. xxxii. 19, 20). Rimmmon is a common name of locality. The latter word is the same as that found in the plural form in Ral-Perezim, “Baal of the breaches.” Perhaps some local configuration, such as a “cliff,” might account for its being added. It stands between Lichmeh and Libnah. No place now known has been identified with it.

RIMMON, THE ROCK (רְמֵמְוָן הַר) [pomegranate of the rock]; ה רְמֵמְוָן הַר: Remmon. The name of a hill or rock in the wilderness of Judæa (Josh. xiv. 13), on the south-east side of the Dead Sea. It is one of the “mountains or hills of Judah.” (1 K. ii. 33) 

It is described as in the “wilderness” (midbar), that is, the wild unmutilated (though not unproductive) country which lies on the east of the central highlands of Benjaminita, on which Gibeah was situated — between them and the Jordan Valley. Here the name is still found attached to a village perched on the summit of a conical chalky hill, visible in all directions, and commanding the whole country (Rob. Bibl. Res. i. 440).

The hill is steep and naked, the white limestone everywhere protruding, and the houses clustering to its sides and forming as it were huge steps. On the south side it rises to a height of several hundred feet from the great ravine of the Wady Muhyd; while on the west side it is almost equally isolated by a cross valley of great depth (Porter, Handb. p. 217; Mr. Finn, in Van de Velde, Memoir, p. 345). In position it is (as the crow flies) 3 miles east of Bethel, and 7 N. E. of Gibeah (Tudal el-Pul). Thus in every particular of name, character, and situation it agrees with the require-
ments of the Rock Rimmon. It was known in the days of Eusebius and Jerome, who mention it (Origenes et Hierom) — though confounding it with Rimmon in Sincon — as 15 Roman miles northwards from Jerusalem.

RING (יווֹלָקַת, סֵפֶּר קָרָה). The ring was regarded as an indispensable article of a Hebrew's attire, as much as it is esteemed by most signet owners, and even owed its name to this circumstance. The term tabbatheh being derived from a root signifying "to impress a seal." It was therefore the symbol of authority, and as such was presented by Pharaoh Joseph (Gen. xii. 42), by Absalom to Heman (Esth. iii. 10), by Antiochus to Philip (1 Macc. vi. 15), and by the father to the prodigal son in the parable (Luke xvi. 22). It was treasured accordingly, and became a proverbial expression for a most valued object (Jer. xxii. 24; Hag. ii. 23; Eccles. xix. 11). Such rings were worn not only by men, but by women (Is. lii. 21; Mish. Shabb., p. v. § 31, and are enumerated among the articles presented by men and women for the service of the Tabernacle (Ex. xxxv. 22). The signet-ring was worn on the right hand (Jer. l.c.). We may conclude, from Ex. xxvii. 11, that the rings contained a stone engraved with a device, or with the owner's name. Numerous specimens of Egyptian rings have been discovered, most of them made of gold, very massive, and containing either a scarabaeus or an engraved stone (Wilkinson, ii. 337). The number of rings worn by the Egyptians was truly remarkable. The same prohibition was exhibited also by the Greeks and Romans, particularly by men (Dict. of Art., "Rings"). It appears also to have prevailed among the Jews of the Apostolic age: for in Jam. ii. 2, a rich man is described as χρῡσοστάματος, meaning not simply "with a gold ring," as in the A. V., but "golden-ringed" (like the χρῡσοδέχρη, "golden-handed" of Lucian, Timon, c. 20), evidently meaning equally well the possession of several gold rings. For the term golden rendered "ring" in Cant. v. 14, see ORNAMENTS.

* RINGLEADER (Acts xxiv. 5), applied to Paul by Tertullian in his speech before Felix, where it stands for πρωτοστάριον. It implies of itself, nothing opprobrious, being properly a military title, namely, of one who stands in front of the ranks as leader. It marks a good precedence here, especially from being associated with λοιμός, "phlegm, pest." (A. V. pestilent filiae). Ring-leader had a good or neutral sense as well as bad, in the older English writers.

RINNAH (רייננה) [a cry of joy, or warding]; Arāk: Alex. Pauly/Ritman; Ritman). One of the sons of Shimon in an obscure and fragmentary genealogy of the descendants of Judah (1 Chr. iv. 20). In the LXX. and Vulgate he is made "the son of tatan," Ben-hanan being thus translated.

RIPHATH (ריפא) [a locating in pieces, error, Sin.]: Pauly: Alex. Pauly in Chr.: Riphath, the second son of Gomer, and the brother of Ashkenaz and Togarmah (Gen. x. 3). The Hebrew text in 1 Chr. i. 6 gives the form Diphath, but this arises out of a clerical error similar to that which gives the forms Dolidam and Halad for Dodam and Halad (1 Chr. i. 7, 50; Gen. x. 16, vii. 39).

The name Riphath occurs only in the genealogical table, and hence there is little to guide us to the locality which it indicates. The name itself has been variously identified with that of the Riphean mountains (Knobel), the river Riblas in Bithynia (Bochart), the Ribul, a people living eastward of the Caspian Sea (Schöllstein), and the Ripheans (Riphathim?); the ancient name of the Parthagorasians (Joseph. Ant. i. 6, § 1). This last view is certainly favored by the contiguity of Ashkenaz and Togarmah. The weight of opinion is, however, in favor of the Riphean mountains, which Knobel (Volckert, p. 44) identifies etymologically and geographically with the Carpathian range in the N. E. of Russia. The attempt of that writer to identify Riphath with the Celts or Gauls, is evidently based on the assumption that so important a race ought to be mentioned in the table, and that there is no other name to apply to them; but we have no evidence that the Gauls were for any lengthened period settled in the neighborhood of the Carpathian range. The Riphean mountains themselves existed more in the imagination of the Greeks than in reality; and if the received etymology of that name (from ῥήφα, "blasts") be correct, the coincidence in sound with Riphath is merely accidental, and no connection can be held to exist between the names. The later geographers, Ptolemy (iii. 5, § 15, 19) and others, placed the Riphean range where no range really exists, namely, about the elevated ground that separates the basins of the Luan and Baltic seas.

W. L. B.

RIPSAAH (רפסא, [a ruin]: [Rom. Peacav; Vat. Πεακαβ: Alex. Pecka: Regius, The name, identical with the word which signifies "a worm," is the name of a marsh-station in the wilderness (Num. xxxiii. 21, 22). It lies, as there given, between Libnah and Kekelathah, and has been considered (Winer, s. r.) identical with Las in the Pentateuch, Rivers, 32 Roman miles from Alalah (Elah), and 203 miles south of Jerusalem, distinct, however, from the Πεακαβ of Josephus (Ant. xiv. 13, § 2). No site has been identified with Ripsaah.

H. H.

RITHMAH (ריתמה, [see below]: Pauly: Rabhan). The name of a marsh-station in the wilderness (Num. xxxiii. 18, 19). It stands there next to Hazoroth (Haxoroth), and probably lay in a N. E. direction from that spot, but no place now known has been identified with it. The name is probably connected with ריתמה, Arab. ریثمة, commonly rendered "jumper," but more correctly "broom." It carries the affirmative ת, common in names of locality, and found especially among many in the catalogue of Num. xxxiii. H. H.

The name of the town Tobata and the mountain Tibbon in the N. of Asias Minor.
RIVER

RIVER. In the sense in which we employ the word, namely, for a perennial stream of considerable size, a river is a much rarer object in the East than in the West. The majority of the inhabitants of Palestine at the present day have probably never seen a river; while with the ancient writers, and the Rhodians, the streams of the Holy Land are either entirely dried up in the summer months, and converted into hot lanes of glaring stones, or else reduced to very small streamlets deep sunk in a narrow bed, and concealed from view by a dense growth of shrubs.

The cause of this is twofold: on the one hand, the dry nature of the country—a central mass of highland descending on each side to a lower level, and on the other, the extreme heat of the climate during the summer. There is little doubt that in ancient times the country was more wooded than it now is, and that, in consequence, the evaporation was less, and the streams more frequent; yet this cannot have made any very material difference in the permanence of the water in the thousands of valleys which divide the hills of Palestine.

For the various aspects of the streams of the country which such conditions inevitably produced, the ancient Hebrews had very exact terms, which they employed habitually with much precision.

1. For the perennial river, נָהָר (nahar). Possibly used of the Jordan in Ps. lxvi. 6, lxix. 15; of the great Mesopotamian and Egyptian rivers generally in Gen. ii. 10; Ex. vii. 19; 2 K. xvii. 6; Ex. iii. 15, &c. But with the definite article, לְנָהָר, "the river," it signifies invariably the Euphrates (Gen. xxi. 21; Ex. xxiii. 31; Num. xxv. 6; 2 Sam. x. 16, &c., &c.). With a few exceptions (Josh. i. 4, xxiv. 2, 14, 15; Is. lx. 19; Ex. xxxi. 15), נָהָר is uniformly rendered "river" in our version, and accurately, since it is never applied to the fleeting torrential rivers of Palestine.

2. The term for these is נָכוּל (nacal), for which our translators have used promiscuously, and sometimes almost alternately, "valley," "brook," and "river." Thus the "brook" and the "valley" of אַלְגָּל (Num. xiii. 23 and xxxii. 9); the "valley," the "brook," and the "river" of Zered (Num. xxvii. 3; Deut. ii. 13; Am. iv. 14); the "brook" and the "river" of Zabbok (Gen. xxvi. 23; Deut. ii. 37); of Arnon (Num. xxxii. 14; Deut. ii. 24); of Kishon (Judg. iv. 7; 1 K. xviii. 49). Compare also Deut. iii. 16, &c.

Neither of these words expresses the thing intended; but the term "brook" is peculiarly unhappy, since the pastoral idea which it conveys is quite at variance with the general character of the valleys of Palestine. Many of these are deep abrupt chasms or rents in the solid rock of the hills, and have a savage, gloomy aspect, far removed from that of an English brook. For example, the Arnon forces its way through a ravine several hundred feet deep and about two miles wide across the top. The Wady Zabbok, probably the Zabbok, which Jacob was so anxious to intercept between his family and Esau, is equally unlike the quiet, meadowy brook with which we are familiar.

And those which are not so abrupt and savage are in their width, their irregularity, their foaming and when the torrent has subsided, utterly unlike "brooks." Unfortunately our language does not contain any single word which has both the meanings of the Hebrew nacal and its Arabic equivalent وادي, which can be used at once for a dry valley and for the stream which occasionally flows through it. Ainsworth, in his Anecdotes von Num. xxi. 23), says that "lourne" has both meanings: but "lourne" is now obsolete in English, though still in use in Scotland, where, owing to the mountains' nature of the country, "lourne" partake of the nature of the wadies of Palestine in the irregularity of their flow. Mr. Burton (Geog. Journ. xxiv. 209) adopts the Italian pianura.

Others have proposed the Indian term नल. The double application of the Hebrew nacal is evident in 1 K. xviii. 3, where Elijah is commanded to hide himself in (not by) the nacal Cherith and the brink of the nacal.

3. רוּפָר (rofar), a word of Egyptian origin (see Gesen. Thes. p. 558); applied to the Nile only, and, in the plural, to the canals by which the Nile water was distributed throughout Egypt, or to streams having a connection with that country. It is the word employed for the Nile in Genesis and Exodus, and is rendered by our translators "the river," except in the following passages, Jer. xiv. 7, 8; Am. viii. 4, ix. 5, where they substitute "a flood"—much to the detriment of the prophet's metaphor. [See Nile, vol. ii. p. 2140 b.]

4. יָבָל (yabal), from a root signifying tumult or fulness, occurs only six times, in four of which it is rendered "river," namely, Jer. xviii. 8; Dan. vii. 2, 3, 6.

5. פֶּלֶג (pelag), from an uncertain root, probably connected with the idea of the division of the land for irrigation, is translated "river" in Ps. i. 3, iv. 9; Is. xxx. 25; Job xx. 17. Elsewhere it is rendered "stream" (Ps. xlv. 4), and in Judg. v. 15, 16, "divisions," where the allusion is probably to the artificial streams with which the pastoral and agricultural country of Lebanon was irrigated (Ewald, Dichter, i. 129; Gesen. Thes. p. 1104 b.]

6. אֲפִיק (aphik), this appears to be used without any distinctly meaningful application, it is probably from a root signifying strength or force, and may signify any rush or body of water. It is translated "river" in a few passages: Cant. v. 12; Ez. vi. 3, xxxi. 12, xxxii. 6, xxxiv. 13, xxxv. 8, xxxvi. 4, 6; Joel i. 29, iii. 18. In Ps. xxxiv. 4 the allusion is to temporary streams in the dry regions of the south.

6 RIVER OF EGYPT. Two Hebrew terms are thus rendered in the A. V.

1. אַלְגָּל (algal): potamus Αὐγήνατος, Flavius Εὐφραῖν, (Gen. xv. 18), "the river of Egypt," that is, the Nile, and here—as the western border of the Promised Land, of which the eastern border was Euphrates—the Pelusian or easternmost branch.

a Jerom. In his Questions in Genesiue, xxvi. 19, draws the following curious distinction between a valley and a torrent: "Et hic pro valle termis scriptus est, quamquam anima in valle inventarit potass ex qua river." b "It should be "river" "(rōfār) in both instances, Rev. vii. 15, 19, and not "flood." (A. V.) c
It must be observed that the distinctive character of the name, "Nachal of Egypt," as has been well suggested to us, almost forbids our supposing an insignificant stream to be intended, although such a stream might be of importance from position forming the boundary.

If we infer that the Nachal of Egypt is the Nile, we have to consider the geographical consequences, and to compare the name with known names of the Nile. Of the branches of the Nile, the easternmost, or Pelusiac, would necessarily be the one intended. On looking at the map it seems incredible that the Philistine territory should ever have extended so far; the "Hiddekel is distant from Gaza, the most western of the Philistine towns, but Pelusium, at the mouth and most eastern part of the Pelusiac branch, is very remote. It must, however, be remembered, that the tract from Gaza to Pelusium is a desert that could never have been cultivated, or indeed inhabited by a settled population, and was probably only held in the period to which we refer by marauding Arab tribes, which may well have been tributary to the Philistines, for they must have been tributary to them or to the Egyptians, on account of their isolated position and the inhospitality of the country, though it was not altogether maintaining a half-independence. All doubt on this point seems to be set at rest by a passage, in a biographical inscription of Sethos I., king of the Nineteenth dynasty, n. c. 1340, on the north wall of the great temple of Leukarnos, which mentions the "foreigners of the SHASU from the fort of TARU to the land of KANAXA." (SHASU SHAA EM SHIHM EN TARU ER PA-KANAXAN, Brugsch, Geogr. Inschr. i. p. 261, No. 1255, pl. xlviii.). The identification of "the fort of TARU" with any place mentioned by the Greek and Latin geographers has not yet been satisfactorily accomplished. It appears, from the latter, representing the return of Sethos I. to Egypt from an eastern expedition, near the inscription just mentioned, to have been between a Leontopolis and a branch of the Nile, or perhaps channel, on the west side of which it was situated, commanding a bridge (Ibld. No. 1256, pl. xlviii.). The Leontopolis is either the capital of the Leontopolite Nome, or a town in the Heliopolite Nome mentioned by Josephus (Ant. xiii. 3, § 1). In the former case the Leontopolis may be the famous Leontopolis on the Canopic branch, or perhaps the Pelusiac; in the latter, perhaps the Canal of the Red Sea. We prefer the first Leontopolis, but no identification is necessary to prove that the SHASU at this time extended from Canopus to the east of the Delta (see on the whole subject Geogr. Inschr. i. pp. 260-266, ii. pp. 20, 21). Egypt, therefore, in its most flourishing period, evidently extended no farther than the east of the Delta, its eastern boundary being probably the Pelusiac branch, the territory of the SHASU, an Arab nation or tribe, lying between Egypt and Mount Canopus marks the western boundary of the Syrians; for although the position of Jeurus is uncertain, and consequently the identity of the Syrian "Gama, we cannot extend the Arabian territory further east" does not greatly exceed three days' journey. If we adopt Capt. Spratt's identification of Pelusium and Mount Canopus, we must of the Syrian branch be nearer together, and the latter far to the west of the usual supposed place (S8 town). But in this case Herodotus would intend the western extremity of Lake Serbonis, which seems the likely place.
Jehan. It might be supposed that at this time the SHASU had made an invasion into Egypt, but it must be remembered that in the latter period of the kings of Judah, and during the classical period, Ptolemy was the key of Egypt on this side. The Philistines, in the time of their greatest power, which appears to have been contemporary with the period of the Judges, may well be supposed to have reduced the Arabs of this central territory to the condition of tributaries, as doubtless was also done by the Pharaohs.

It must be remembered that the specification of a certain boundary does not necessarily prove that the actual lands of a state extended so far; the limit of its sway is sometimes rather to be understood. Solomon ruled as tributaries all the kingdoms between the Emperors and the land of the Philistines and the border of Egypt, when the Land of Promise appears to have been fully occupied (1 K. iv. 21, comp. 21). When, therefore, it is specified that the Philistine territory as far as the Nachal-Mizraim remained to be taken, it need scarcely be inferred that the territory to be inhabited by the Israelites was to extend so far, and that stream's being the true boundary of a tribe may be explained on the same principle. If, with the generality of critics, we think that the Nachal-Mizraim is the Wadi-l-Arceh, we must conclude that the name Shihor is also applied to the latter, although elsewhere designating the Nile, for we have seen that Nachal-Mizraim and Shihor are used interchangeably to designate a stream on the border of the Promised Land. This difficulty seems to overthrow the common opinion. It must, however, be remembered that in Joshua xiii. 3, Shihor has the article, as though actually or originally an appellative, the former seeming to be the more obvious inference from the context.

\[\text{Shihor of Egypt; Shihor}\]

The word Nahal may be cited on either side. Certainly in Hebrew it is rather used for a torrent or stream than for a river; but the name Nachal-Mizraim may come from a lost dialect, and the parallel Arabic word \textit{wādeer}, \(\text{وادي} \), though ordinarily used for valleys and their winter-torrents, as in the case of the Wādī-l-Arceh itself, has been employed by the Arabs in Spain for true rivers, the Quadalgquivir, etc. It may, however, be suggested, that in Nachal-Mizraim we have the ancient form of the Vac-\textit{isr} of the Arabs, and that Nachal was adopted from its similarity of sound to the original of \textit{Nīlā}. It may, indeed, be objected that \textit{Nīlā} is held to be of Arabic origin. The answer to this is, that we find Javan, we will not say the Ionians, called by the very name, HANEN, used in the Rosetta Stone for "Greek" (SHAEF \textit{EN HANEN}, \textit{ΤΟΙΣ ΤΕ ΕΛΗΘΝΙΚΟΙΣ ΠΑΜΜΑΣΙΝ}), in the lists of countries and nations, or tribes, compared by, or

ROBBERY

Robbery. a Whether in the larger sense of plunder, or the more limited sense of theft, systematically organized, robbery has been one of the principal employments of the round tribes of the East. From the time of Ishmael to the present day, the Bedouin has been a "wild man," and a robber by trade, and to carry out his objects suc-

---

(1 Sam. xi. 4, &c., and see Joseph. B. J. v. 2, § 1). The whole or part of this hill seems at the time of this occurrence to have been in some special manner dedicated to Jehovah, possibly the spot on which Ahab the priest had deposited the Ark when he took refuge in Gilgal during the Philis-
tine war (1 Sam. xiv. 18). The victims were sacrific-
ed at the beginning of barley-harvest—the sacred and festal time of the Passover—and in the full phase of the summer sun they hung till the fall of the periodical rain in October. During the whole of that time Rizpah remained at the foot of the crosses on which the bodies of her sons were exposed: the Moter dolores, if the expression may be allowed, of the ancient dispensation. She had no tent to shelter her from the scorching sun which beats on that open spot all day, or from the drench-
ing dews at night, but she spread on the rocky floor the thick mournful garment of black sack-
doth, which as a widow she wore, and crouching there she watched that neither vulture nor jackal should molest the bodies. We may surely be justi-
fied in applying to Rizpah the words with which another act of womanly kindness was commended, and may say, that wheresoever the Body shall go, there shall also this, that this woman hath done, be told for a memorial of her." G.

ROAD. This word occurs but once in the Authorized Version of the Bible, namely, in 1 Sam. xxvii. 10, where it is used in the sense of "raid" or "inroad." The Hebrew word (גֵּרָב) being elsewhere (e. g. ver. 8, xxvii, 32, 37, 38, &c.; see) rendered "invade" and "invasion." A road in the sense which we now attach to the term is expressed in the A. V. by "way" and "path." [WAY] G.

* ROBBERS. [Churches, Robbers of; Thieves.]

---

3. *Zebulon,* Job xviii. 9: * זבּוּלוֹן: sitis. Targum, with A. V., has "robbers;" but it is most commonly rendered as LXX. Job v. 5, *στίρες."

4. *חָרָם: הָעָרָם; latria: from הַחָרָם, "waste." n

5. *אָבִיאָב: אָבִיאָב: descipiens: A. V. "spoilier." n

(3. Rob: —

1. *אִובָא: אִובָא: demoral: 

3. *עָבָא: עָבָא: "return, ""repeat;" hence in Ps. sur-
round, circumvent (Ps. exii. 61); παρεμπελήσαλ: in compellere; usually affirm, reiterate assertions (Gen. p. 597)

ROBBERY

ROGELIM

ROE, ROEBUCK (רֶבֶךְ, ῥεβή (m.)); רֶבֶכָּה, רֶבֶכֶּה (f.): רֶבֶכָּה, רֶבֶכֶּה. There seems to be little or no doubt that the Hebrew word, which occurs frequently in the O. T., denotes some species of antelope, probably the *gazella dorcas*, a native of Egypt and North Africa, or the *G. Arabica* of Syria and Arabia, which appears to be a variety only of the *dorcas*. The gazelle was allowed as food (Deut. xiii. 20, 22, etc.); it is mentioned as very fleet of foot (2 Sam. ii. 18; 1 Chr. xii. 8); it was hunted (Is. xiii. 14; Prov. vi. 5); it was celebrated for its loveliness (Cant. ii. 9, 17, viii. 14). The gazelle is found in Egypt, Babylonia, and Syria. Stanley, (S. of P., p. 207) says that the significance of the word *Ablon*, the valley "of stages," is still justified by the gazelles which the peasants hunt on its mountain slopes. Thomson (The Land and the Book, p. 172) says that the mountains of Naphtali "abound in gazelles to this day."

The ariel gazelle (*G. Arabica*), which, if not a different species, is at least a well-marked variety of the *dorcas*, is common in Syria, and is hunted by the Arabs with a falcon and a greyhound; the repeated attacks of the bird upon the head of the animal so bewilders it that it falls an easy prey to the greyhound, which is trained to watch the flight of the falcon. Many of these antelopes are also taken in pitfalls into which they are driven by the shouts of the hunters. The large, full, soft eye of the gazelle has long been the theme of oriental praises.

W. H.

ROG'EELIM (רֹעֵלִים) [fuller's place, Ges.].

[Rom. *Παραβαλία*; Vul. *Paravelia*, and so Alex., though once *Paravelia*; *Rogerelius*]. The residence of Berziliah the Gileadite (2 Sam. xvii. 27, xix. 31) in the highlands east of the Jordan. It is non-
tional on this occasion only. Nothing is said to
guide us to its situation, and no name at all ressem-
bling it appears to have been hitherto discovered on
the spot.

If interpreted as Hebrew the name is derivable
from ḫel, the foot, and signifies the "fullers" or
"washers," who were in the habit (as they still
are in the East) of using their feet to tread the
cloth which they were cleansing. But this is ex-
tremely uncertain. The same word occurs in the
name EN-ROGEL. G.

ROHGAH (רֹגָה), Caleb, (23:7, 77), Kery
[anteces]: "Pougya: Alex. OURAGA: ROGAY."
An Asherite, of the sons of Shamer (1 Chr. vii. 94).

ROIMUS (Ρώιμος). EHIM 1 (1 Esdr. v. 8).
The name is not traceable in the Vulgate.

ROLL (江湖, κεφαλή). A book in ancient
times consisted of a single long strip of paper or
parchment, which was usually kept rolled up on a
stick, and was unrolled when a person wished to
read it. Hence arose the term megillah, from
γιβάλομα, "to roll," strictly answering to the Latin
rolamen, whence comes our volume; hence also the
expressions, "to spread" and "to roll together," instead
of "to open" and "to shut," a book. The
total expression for a book was "a roll of writing," or
"a roll of a book." (Jer. xxxvi. 2; Ps. xi. 7: Ez. ii. 9),
but occasionally "roll" stands by itself (Zech. v. 2; Ezr. vi. 21). The kephalē of the LXX. originally referred to the ornamental knob (the metatarsus of the Latin) at the top of the stick or
cylinder round which the roll was wound. The
use of the term megillah implies, of course, the ex-
istence of a soft and pliant material; what this ma-
terial was in the Old Testament period, we are not
informed; but as a knife was required for its de-
struction (Jer. xxxvi. 24), we infer that it was
parchment. The roll was usually written on one
side only (Midr. Erub. 10, § 3), and hence the par-
ticular notice of one that was "written within
and without." (Ez. ii. 10). The writing was
arranged in columns, resembling a door in shape,
and hence deriving their Hebrew name, just as
"columns," from its resemblance to a column or
pillar. It has been asserted that the term megillah
does not occur before the 7th cent. B.C., being
first used by Jeremiah (Hitzev, "Jer. xxxvi. 2); and
the conclusion has been drawn that the use of
such materials as parchment was not known until
that period (Ewald, "Tisch. i. 71, note 9; Gesen.
Ths. p. 289). This is to assume, perhaps too con-
fidently, a late date for the composition of Ps. xl.
and to ignore the collateral evidence arising out of
the expression "roll together" used by Is. xxxiv.
and of the probable reference to the Pentateuch in
Ps. x. 7, "the roll of the book," a copy of which was deposited by the side of the
Ark (Dent. xxxi. 26). We may here add that the
term in Is. viii. 1, rendered in the A. V. "roll,"
more correctly means tablet.

* "Flying roll" (Zech. v. 1, 2) means a book or
parchment rolled up, represented in the prophet's
vision as seen borne through the air. It was an
expressive symbol of Jehovah's judgments written
out as it were, and decreed, which at his bidding
would descend and sweep away the ungodly.

* ROLLER (rollable, from a verb roll to bind") = bandage, so called from its form as a
roll, Ezek. xxx. 21. The prophet declares that the
arm of Pharaoh should be broken and no art or
appliance of surgery could enable it to wield again
the sword of the oppressor.

ROMANT-J-T-ENZER (ךֵּלֵּסְ תַּדְרֶזְ) Pome-μέες: [Vat. Pome, Pomelx;Lat.: Alex. Pome-
μέες] in 1 Chr. xxiv. 4, but Pome-μέες (in 1 Chr. xxvi. 31, Romawithier). One of the
twelve sons of Heman, and chief of the 24th
division of the singers in the reign of David (1
Chr. xxiv. 41). [Hotham, Amer. ed.]

ROMAN, ROMANS (Ῥωμαίοι; Romans).
1 Macc. viii. 1, 29-31, xii. 16, xiv. 16; 2 Macc. viii. 10, 36, xi. 34; John xi. 18; Acts xxvi.
21, 37, 38, xxii. 25-29, xxiii. 27, xxv. 16, xxviii. 17. (Roman Empire, Rome.) A.

* ROMAN CITIZENSHIP. [Citizenship]

ROMAN EMPIRE. The history of the Ro-
man Empire, properly so called, extends over a pe-
riod of rather more than five hundred years, namely,
from the battle of Actium, n. c. 31, when Augustus
became sole ruler of the Roman world, to the abdi-
cation of Augustus, A. D. 14. The Empire, how-
ever, in the sense of the dominion of Rome over a
large number of conquered nations, was in full
force and had reached wide limits some time be-
fore the monarchy of Augustus was established.
The notices of Roman history which occur in the
Bible are confined to the last century and a half of
the commonwealth and the first century of the
imperial monarchy.

The first historic mention of Rome in the Bible
is in 1 Macc. i. 10. Though the date of the foun-
dation of Rome coincides nearly with the beginning
of the reign of Pekah in Israel, it was not till the
beginning of the 21st century B. C. that the Romans
had leisure to interfere in the affairs of the East.
When, however, the power of Carthage had been
effectually broken at Zama, B. C. 202, Roman arms
and influence spread over themselves the
African, opened Macedonia, Greece, and Asia Minor.
About the year 161 B. C. Judas Maccabaeus heard of
the Romans as the conquerors of Philip, Perseus, and
Antiochus (1 Macc. viii. 5, 6). "It was told him also
how they destroyed and brought under their
dominion all other kingdoms and isles that at that
time resisted them, but with their friends and
such as relied upon them they kept amity" (viii.
11, 12). In order to strengthen himself against
Demetrius king of Syria he sent ambassadors to
Rome (viii. 17), and concluded a defensive alliance
with the senate (viii. 22-32). This was renewed by
Jonathan (xii. 1) and by Simon (xv. 17.; Joseph.
Ant. xii. 10, § 6, xiii. 5, § 8, 7, § 3). Notices of
the Romans are to be met with in the Bible by the
word "Rom" to Rome by the Syrian king, and of further inter-
course between the Romans and the Jews, occur
in 2 Macc. iv. 11, viii. 10, 36, xi. 54. In the

* ךֵּלֵּסְ תַּדְרֶזְ (A. V. "leaves," Jer. xxxvii. 23). Hit-
zieg maintains that the word means "leaves," and
that the megillah in this case was a book like our
own consisting of numerous pages.
course of the narrative mention is made of the Roman senate (το βουλήτεριον, 1 Mac. xii. 3), of the consul Lucius (ου πάτος, 1 Mac. xv. 10, 16), and the Roman constitution is described in a somewhat distorted form (1 Mac. viii. 14–16). The history of the Maccabean and Idumæan dynasties forms no part of our present subject. [MACCABEES: HEROD.] Here a brief summary of the progress of Roman dominion in Judaea will suffice.

In the year 63 B.C., when Syria was made a Roman province by Pompey, the Jews were still governed by one of the Asmonean princes. Aristobulus had lately driven his brother Hyrcanus from the chief priesthood, and was now in his turn attacked by Aretas, king of Arabia Petraea, the ally of Hyrcanus. Pompey's lieutenant, M. Ennius Scarrus, interfered in the contest b. c. 64, and the next year Pompey himself marched an army into Judæa and took Jerusalem (Joseph, Ant. xiv. 2, 3, 4; B. J. i. 6, 7). From this time the Jews were practically under the government of Rome. Hyrcanus retained the high-priesthood and a titular sovereignty, subject to the watchful control of his minister Antipater, an active partisan of the Roman interests. Finally, Antipater's son, Herod, the Great, was made king by Antony's interest, in the first position of chief minister of Rome, b. c. 30 (Joseph. Ant. xiv. 11, xv. 6). The Jews, however, were all this time tributaries of Rome, and their princes in reality were more Roman procurators. Julius Caesar is said to have exempted from them a fourth part of their agricultural produce in addition to the title paid to Hyrcanus, valued at 100,000 (Flavius Josephus, Ant. x. 193). The Roman soldiers were quartered at Jerusalem in Herod's time: to support him in his authority (Ant. xv. 3, § 7). Tribute was paid to Rome, and an oath of allegiance to the emperor as well as to Herod appears to have been taken by the people. (Int. xvi. 2, § 2).

On the banishment of Archelaus, a. d. 6, Judæa became a mere appendage of the province of Syria, and was governed by a Roman procurator, who resided at Cæsarea. Galilee and the adjoining districts were still left under the government of Herod's sons and other petty princes, whose dominions and titles were changed from time to time by successive emperors: for details see HEROD.

Such were the relations of the Jewish people to the Roman government at the time when the N.T. history begins. An ingenious illustration of this state of things has been drawn from the condition of British India. The Governor General at Calcutta, the subordinate governors at Madras and Bombay, and the native princes, whose dominions have been at one time enlarged, at another incorporated with the British presidencies, find their respective counterparts in the governor of Syria at Antioch, the prætor of Judæa, and the members of Herod's family, whose dominions were alternately enlarged and suppressed by the Roman emperors (Conybeare and Howson, Life of St. Paul, i. 27). These and other characteristics of Roman rule come before us constantly in the N. T. Thus we hear of Cæsar the sole king (John xix. 15) — of Cæsar, the procurator of Judæa (Luke ii. 2) — of Pontius Pilate, Felix, and Festus, the "governors," i. e. procurators, of Judæa — of the "archers" Herod, Philip, and Lycanus (Luke iii. 1) — of "king Agrippa" (Acts xix. 13) — of Roman soldiers, legionaries, centurions, publicans — of the tribute-money (Matt. xxii. 19) — the taxing of "the whole world" (Luke ii. 1) — Italian and Augustan cohorts (Acts i. 1, xvii. 1) — the appeal to Cæsar (Acts xxv. 11). Three of the Roman emperors are mentioned in the N. T. — Augustus (Luke ii. 1), Tiberius (Luke iii. 1), and Claudius (Acts xi. 28, xviii. 2). Nero is alluded to under various titles, as Augustus (Sisara) and Cæsar (Acts xxv. 10, 11, 21, 25; Phil. iv. 22), as δ κύρος, "my lord" (Acts xxvi. 26), and apparently in other passages (1 Pet. ii. 17; Rom. xiii. 1). Several notices of the provincial administration of the Romans and the condition of provincial cities occur in the narrative of St. Paul's journeys (Acts xvii. 2, xvii. 35, 38, xviii. 12, xix. 38).

In illustration of the sacred narrative it may be well to give a general account, though necessarily a short and imperfect one, of the position of the emperor, the extent of the empire, and the administration of the provinces in the time of our Lord and his Apostles. Fuller information will be found under special articles.

I. When Augustus became sole ruler of the Roman world he was in theory simply the first citizen of the republic, entrusted with temporary powers to settle the disorders of the State. Tacitus says that he was neither king nor dictator, but "princeps," (Tac. Ann. ii. 19), a title implying no civil authority, but simply the position of chief minister of the state (princeps senatus). The old magistracies were retained, but the various powers and prerogatives of each were conferred upon Augustus, so that while others commonly bore the chief official titles, Augustus had the supreme control of every department of the state. Above all he was the Emperor (imperator). His word, used originally to designate any one entrusted with the imperial military authority over a Roman army, acquired a new significance when adopted as a permanent title by Julius Cæsar. By his use of it as a constant prefix to his name in the city and in the camp he openly asserted a paramount military authority over the state. Augustus, by resuming it, plainly indicated, in spite of much artful concealment, the real basis on which his power rested, namely, the support of the army (Merviile, Roman Empire, vol. iii.). In the N. T. the emperor is commonly designated by the family name "Cæsar," or the dignified and almost sacred title "Augustus" (for its meaning, comp. Ovid, Fast. i. 669). Tiberius is called by implication οὐραίως in Luke iii. 1, a title implied in the N. T. to Cæsars, Cyrenius, Pilate, and others. Notwithstanding the despotic character of the government, the Romans seem to have shrank from speaking of their ruler under his military title (see Merviile, Rom. Empire, iii. 452, and note) or any other avowedly despotic appellation. The use of the word δ κύρος, dominus, "my lord," in Acts xxv. 26, marks the progress of Roman servility between the time of Augustus and Nerva: Augustus and Tiberius refused this title. Caligula first bore it (see Aëtius's note in l. c.; Ovid, Fast. ii. 142). The term βασιλεύς, "king," in John xix. 15, 1 Pet. ii. 17, cannot be closely pressed.

The Empire was nominally elective (Tac. Ann. xiii. 4); but practically it passed by adoption (see Galile's speech in Tac. Hist. i. 15), and till Nero's time a sort of hereditary right seemed to be recognized. The dangers inherent in a military government were, on the whole, successfully averted till the death of Pertinax, A. D. 193 (Gibbon, ch. iii. p. 80): but outbreaks of military violence were not wanting in this earlier period (comp. Wench's note
A system was useful for rewarding ar. ally, for em-
ploying a busy ruler, for gradually accentuating a
stubborn people to the yoke of dependence. There
were differences too in the political condition of
cities within the provinces. Some were free cities,
i.e., were governed by their own magistrates, and
were exempted from occupation by a Roman garri-
son. Such were Tarsus, Antioch in Syria, Athens,
Ephesus, Thessalonica. See the notices of the
Ptolemarchs and "Demos" at Thessalonica,
Acts xxvi. 5-8, the "town-clerk," and the as-
sembly at Ephesus, Acts xix. 35, 39 (C. and H
Life of St. Paul i. 557, ii. 79). Occasionally
but rarely, free cities were exempted from taxa-
tion. Other cities were "Colonies," i.e., commu-
nities of Roman citizens transplanted, like garri-
sions of the imperial city, into a foreign land
such as Philippi (Acts xvi. 12). Such, too,
were Corinth, Thrace, the Pisidian Antioch.
The inhabitants were for the most part Romans (Act-
xvii. 31), and their magistrates delighted in the
Roman title of "pretor (απαρτάτης), and in the
attire of attendants (παράμυθοι), Acts xvi. 35. (C.
and H. i. 315.)

Augustus divided the provinces into two classes,
(i) "Senatorial provinces," the territory left to
his own hands, for obvious reasons, those provinces
where the presence of a large military force was
necessary, and committing the peaceful and unarm-
ned provinces to the Senate. The Imperial provinces
at first were—Gaul, Lusitania, Syria, Phoenicia,
Cilicia, Cyprus, and Egypt. The senatorial provinces
were Africa, Numidia, Asia, Achaia and
Bithynia, Cappadocia, Pontus, Galatia, Crete and
Cyrene, Britannia and Pontus, Sardinia, Brita
(Conc. C. i. 12). Cyprus and Gallia Narbonen-
sis were subsequently given up by Augustus, who
in turn received Dalmatia from the Senate. Many
other changes were made afterwards. The N. T.
writers invariably designate the governors of Sen-
torial provinces by the correct title of "archon-
archon, proconsuls (Acts xii. 7, xviii. 12, xix. 38).
[Cyrenas]. For the governor of an Imperial prov-
ince, properly styled "Legatus Caesaris" (μεσι-
τήστερος), the word ἐργαζόμενος (Governor) is used in
the N. T.

The provinces were heavily taxed for the benefit
of Rome and her citizens. "It was as if England
had been charged with the expenses of her em-
ployment by the processes of a tax levied on her
Indian empire " (Liddell, Hist. of Rome, i. 448). In
old times the Roman revenues were raised mainly from
three sources: (1.) The domain lands; (2.) A
direct tax (tributum) levied upon every citizen; (3.)
From customs, tolls, harbor duties, etc. The agra-
rarian law of Julius Caesar is said to have exting-
ished the first source of revenue (Cic. ad Att. u.
xvi.; Dureau de la Malle, ii. 430). Roman citi-
zens had ceased to pay direct taxes since the con-
quest of Macedonia, n. c. 167 (Cic. de off. ii. 22;
Plut. de Rull. Paul. 38), except in extraordinary
emergencies. The main part of the Roman revenue
was now drawn from the provinces by a direct tax
(κύρωμα, φόρος, Matt. xxiii. 17. Luke xx. 22),
amounting probably to from 5 to 7 per cent. on the
estimated produce of the soil (Dureau de la Malle,
ii. 418). The indirect taxes too (τίµας, κεκτήμων,
Matt. xxv. 25; Dureau de la Malle, ii. 440) appear
to have been very heavy (Ibid. ii. 433, 434). Au-
gustus coming to the empire found the regular
sources of revenue impaired, while his expenses
must have been very great. To say nothing of the
pay of the army, he is said to have supported no less than 200,000 citizens in idleness by the miser-
ably system of public gratuities. Hence the neces-
sity of a careful valuation of the property of the
whole empire, which appears to have been made more than once in his reign. [Census.] For the
historical difficulty about the taxing in Luke ii. 1,
see CYRINUS. Augustus appears to have raised both the direct and indirect taxes (Param de la
Malle, ii. 433, 448).

To a prince so said to have been better gov-
erned under the Empire than under the Common-
wealth, and those of the emperor better than those of the Senate (Tac. Ann. i. 76, iv. 6; Dion, liii.
14). Two important changes were introduced un-
der the Empire. The governors received a fixed pay, and the term of their command was prolonged (Joseph. Ant. xviii. 6, § 5). But the old mode of levying the taxes seems to have been continued. The companies who farmed the taxes, consisting generally of knights, paid a certain sum into the Roman treasury, and proceeded to write what they could from the provincials, often with the conniv-
ance and support of the provincial governor. The
work was done chiefly by underlings of the lowest
class (portiores). These are the publiones of the N. 1.

On the whole it seems doubtful whether the
wrongs of the provincials can have been materially alleviated under the imperial government. It is not likely that such rulers as Caligula and Nero would be scrupulous about the means used for re-
plishing their treasury. The stories related even of the reign of Augustus show how slight were the checks on the exactions of provincial governors. See the story of Licinius in Gaul (Diot. Gr. and Ron. Birg. sub voces), and that of the Eulalian chief (Dion, lv.). The sufferings of St. Paul, pro-
tected as he was to a certain extent by his Roman citizenship, show plainly how little a provincial had to hope from the justice of a Roman governor.

It is impossible here to discuss the difficult ques-
tion relating to Roman provincial government raised on John xlviii. 31. It may be sufficient here to state, that according to strict Roman law the Jews would lose the power of life and death when their country became a province, and there seems no sufficient reason to depart from the literal in-

The condition of the Roman Empire at the time when Christianity appeared has often been dwelt
upon, as affording obvious illustrations of St. Paul's expression that the "fullness of time had come" (Gal. iv. 4). The general peace within the limits of the Empire, the formation of military roads, the suppression of piracy, the increase of the legions, the valued of the corn fleets, the general increase of
traffic, the spread of the Latin language in the West as Greek had already spread in the East, the
external unity of the Empire, offered facilities hith-
eto unknown for the spread of a world-wide relig-
ion. The tendency, too, of a despotism like that of the Roman Empire to reduce all its subjects to a dead level, was a powerful instrument in breaking
down the pride of privileged races and national
religions, and familiarizing men with the truth that "God hath made of one blood all nations on the
ace of the earth" (Acts xvii. 24, 26). But still
more striking than this outward preparation for the
diffusion of the Gospel was the appearance of a deep
and wide-spread corruption which seemed to defy any human remedy. It would be easy to accumu-
late proofs of the moral and political degradation of the Romans under the Empire. It is needless
to do more than allude to the corruption, the cruelty, the sensuality, the monstrous and unnat-
ural wickedness of the period as revealed in the heathen historians and satirists. "Viewed as a
National or political history," says the great his-
torian of Rome, "the history of the Roman Empire is sad and discouraging in the last degree. We see that things had come to a point at which no earthly power could afford any help; we now have the development of dead powers instead of that of a vital energy" (Niebuhr, Lect. v. 191). Not-
withstanding the outward appearance of peace,
unity, and reviving prosperity, the general condi-
tion of the people must have been one of great
misery. To say nothing of the fact that probably one-half of the population consisted of slaves, the
great inequality of wealth at a time when a whole province could be owned by six landowners, the
absence of any middle class, the utter want of any
institutions for alleviating distress such as are found in all Christian countries, the inhuman tone of feeling and practice generally prevailing, forbid us to think of any possibility of the happiness of the human race in the famous Augustan age. We must remember that "there were no public hospitals, no institu-
tions for the relief of the infirm and poor, no
societies for the improvement of the condition of
mankind from motives of charity. Nothing was
done to promote the instruction of the lower classes, nothing to mitigate the miseries of domestic slavery, nothing to confer upon charity and public benefaction the dignity which we so often regarded as duties, that it requires a very extensive acquaintance with the literature of the times to
find any allusion to them" (Arnold's Later Roman
Commonwealth, ii. 398). If we add to this that
there was probably not a single religion, except the
Jewish, which was felt by the more enlightened
part of its professors to be real, we may form some notion of the world which Christianity had to
reform and purify. We venture to quote an elo-
quent description of its "slow, imperceptible, con-
tinuous aggression on the heathenism of the Roman
Empire."

"Christianity was gradually withdrawing some of all orders, even slaves, out of the vices, the
ignorance, the misery of that corrupt social sys-
tem. It was eroding insidiously the feelings of humanity, yet unknown or coldly commended by an impassioned philosophy, among men and women whose infant ears had been habituated to the shrill cries of dying
ghadators; it was giving dignity to minds prostrated by years, almost centuries, of degrading despotism; it was nurturing purity and modesty of manners in an unseemly state of depravation; it was enduing the marriage-bed with an opacity long almost entirely lost, and rekindling to a steady warmth the domestic affections; it was substituting a simple, calm, and rational faith for the worm-
out superstitions of heathenism; gently establishing in the soul of man the sense of immortality, till it became a natural, and inextinguishable part of his moral being" (Milman's Latin Christianity, l. 24).

The chief prophetic notices of the Roman Empire are found in the Book of Daniel, especially i ch.
xi. 30-40, and in hi. 40, vii. 7, 17-19, according to the
common interpretation of the "fourth king-
don." comp. 2 Esdr. xi. 1, but see DANIEL. As-
according to some interpreters the Romans are intended in Deut. xxviii. 49-57. For the mystical notices of Rome in the Revelation comp. Rome. J. J. H.

* On the general subject of the preceding article, see Merivale's History of the Roman Empire, especially vol. vi.

I.

ROMANS, THE EPISTLE TO THE

1. The date of this epistle is fixed with more absolute certainty and within narrower limits, than that of any other of St. Paul's epistles. The following considerations determine the time of writing.

First. Certain names in the salutations point to Corinth, as the place from which the letter was sent. (1) Phoebe, a deaconess of Cenchreae, one of the port towns of Corinth, is commended to the Romans (xxi. 1; 2). (2) Gaius, in whose house St. Paul was lodged at the time (xxvi. 25), is probably the person mentioned as one of the chief members of the Corinthian Church in 1 Cor. i. 14, though the name was very common. (3) Erastus, here designated "the treasurer of the city" (αἰεράσιος, xxvi. 25, E. V., "chamberlain") is elsewhere mentioned in connection with Corinth (2 Tim. iv. 20; see also Acts xix. 22).

Secondly. Having thus determined the place of writing, we turn to the time. We have seen that Phoebe was visiting upon the visit recorded in Acts xx. 3, during the winter and spring following the Apostle's long residence at Ephesus, as the occasion on which the epistle was written. For St. Paul, when he wrote the letter, was on the point of carrying the contributions of Macedonia and Achaia to Jerusalem (xx. 25-27), and a comparison with Acts xx. 22, xxiv. 17, and also 1 Cor. xviii. 1-2, xi. 2, R. H. 1st ed., shows that he was no so engaged at this period of his life. (See Paley's Home Paulus, ch. ii. § 1.) Moreover, in this epistle he declares his intention of visiting the Romans after he has been at Jerusalem (xx. 24-25), and that such was his design at this particular time appears from a casual notice in Acts xix. 21.

The epistle then was written from Corinth during St. Paul's third missionary journey, on the occasion of the second of the two visits recorded in the Acts. On this occasion he remained three months in Greece (Acts xx. 3). When he left, the sea was already navigable, for he was on the point of sailing for Jerusalem when he was obliged to change his plans on the other hand, it cannot have been late in the spring, because after passing through Macedonia and visiting several places on the coast of Asia Minor, he still hoped to reach Jerusalem by Pentecost (xx. 16). It was therefore in the winter or early spring of the year that the Epistle to the Romans was written. According to the most probable system of chronology, adopted by Asseman and Wieseler, this would be the year A. D. 58.

2. The Epistle to the Romans is thus placed in chronological connection with the epistles to the Galatians and Corinthians, which appear to have been written within the twelve months preceding. The First Epistle to the Corinthians was written before St. Paul left Ephesus, the Second from Macedonia when he was on his way to Corinth, and the Epistle to the Galatians most probably either in Macedonia or after his arrival at Corinth, i.e. after the epistles to the Corinthians, though the date of the Galatian Epistle is not absolutely certain. (Galatians, Epistle to the.) We shall have to notice the relations existing between these contemporaneous epistles hereafter. At present it will be sufficient to say that they present a remarkable resemblance to each other in style and matter — a much greater resemblance than can be traced to any other of St. Paul's epistles. They are at once the most intense and most varied in feeling and expression — if we may so say, the most Pauline of all St. Paul's epistles. When Paul excepts these four epistles above from his sweeping condemnation of the gushiness of all the letters bearing St. Paul's name (Paulus, der Apostel) this is a mere caricature of sober criticism: but underlying this erroneous exaggeration is the fact, that the epistles of this period — St. Paul's third missionary journey — have a character and an intensity peculiarly their own, corresponding to the circumstances of the Apostle's outward and inward life at the time when they were written. For the special characteristics of this group of epistles, see a paper on the Epistle to the Galatians in the Journal of Class, and Soc. Phil., iii. p. 289.

3. The occasion which prompted this epistle, and the circumstances attending its writing, were as follows. St. Paul had long purposed visiting Rome, and had obtained this purpose, wishing also to extend his journey to Spain (i. 9-13, xx. 22-29); for the time, however, he was prevented from carrying out his design, as he was bound for Jerusalem with the alms of the Gentile Christians, and meanwhile he addressed this letter to the Romans, to supply the lack of his personal teaching. Phoebe, a deaconess of the neighboring church of Cenchreae, to Rome, and still retained this purpose, wishing also to extend his journey to Spain (i. 9-13, xx. 22-29), and probably conveyed the letter. The body of the epistle was written at the Apostle's dictatorship by Tertius (xxi. 22): but perhaps we may infer from the abruptness of the final doxology, that it was added by the Apostle himself, more especially as we gather from other epistles that it was his practice to conclude with a few striking words in his own handwriting, to check for the authenth of the letter, and frequently also to impress some important truth more strongly on his readers.

4. The origin of the Roman Church is involved in obscurity. If it had been founded by St. Peter, according to a later tradition, the absence of any allusion to him both in this epistle and in the letters written by St. Paul from Rome would admit no difficulty. It is equally possible that no other Apostle was the founder. In this very epistle, and in close connection with the mention of his proposed visit to Rome, the Apostle declares that it was his rule not to build on another man's foundation (xx. 20), and we cannot suppose that he violated it in this instance. Again, he speaks of the Romans as especially falling to his share as the Apostle of the Gentiles (i. 15), with an evident reference to the partition of the field of labor between himself and St. Peter, mentioned in Gal. ii. 7-9. Moreover, when he declares his wish to impart some spiritual gift (χάρις παραχωρησαί) to them, "that they might be established" (i. 11), this implies that they had not yet been visited by an Apostle, and that St. Paul contemplated supplying the defect, a path that led Peter, in the analogous case of the churches founded by Philip in Samaria (Acts viii. 14-17). In the statement in the Clementines (Hom. i. § 6) that the first tidings of the Gospel reached Rome during the lifetime of our Lord, is evidently a fiction for the purposes of the romance. On the other hand, it is clear that the foundation of this
church dates very far back. St. Paul in this epistle salutes certain believers resident in Rome — Andronicons and Junia (or Juniamers? — adding that they were distinguished among the Apostles, and that they were converted to Christ before himself (xvi. 7), for such seems to be the meaning of the passage, rendered somewhat ambiguous by the position of the relative pronouns. It may be that some of those Romans, "both Jews and proselytes," present on the day of Pentecost (cf. ἐν ἐκκλησίᾳ Παναγίωτου Ιερουσαλήμ καὶ προσφήνου, Acts ii. 10), carried back the earliest tidings of the new doctrine, or the Gospel may have first reached the imperial city through those who were scattered abroad to escape the persecution which followed on the death of Stephen (Acts viii. 4, xii. 19). At all events, a close and constant communication was kept up between the Jewish residents in Rome and their fellow-countrymen in Palestine by the exigencies of commerce, in which they became more and more engrossed, as their national hopes declined, and by the custom of repairing regularly to their sacred festivals at Jerusalem. Again, the imperial edicts alternately banishing and recalling the Jews (compare Acts viii. 1, 2, 5; in the case of Claudius, Joseph. Ant. xix. 3, § 3, with Suet. Claud. e. 25) must have kept up a constant ebb and flow of migration between Rome and the East, and the case of Aquila and Priscilla (Acts xviii. 2; see Paley, Hor. Paul. c. ii. § 2) probably represents a numerous class through whose means the opinions and doctrines promulgated in Palestine might reach the metropolis. At first we may suppose that the Gospel was preached there in a confused and imperfect form, scarcely more than a phase of Jewish apocalyptic, as in the case of Apollos at Corinth (Acts xvi. 25), or the disciples at Ephesus (Acts xix. 1–3). As time advanced and better instructed teachers arrived, the clouds would gradually clear away, till at length the presence of the great Apostle himself at Rome dispersed the mists of Judaism which still hung about the Roman Church. Long after Christianity had taken up a position of direct antagonist to Judaism in Rome, heathen statesmen and writers still persisted in confounding the one with the other. (See Merivale, Hist. of Rome, vi. 275, &c.)

Now accession next arises as to the composition of the Roman Church, at the time when St. Paul wrote. Did the Apostle address a Jewish or a Gentile community, or, if the two elements were combined, was one or other predominant so as to give a character to the whole Church? Either extreme has been vigorously maintained, Baur for instance asserting that St. Paul was writing to Jewish Christians, Olson arguing that the Roman Church consisted almost solely of Gentiles. We are naturally led to seek the truth in some intermediate position. Jowett finds a solution of the difficulty in the supposition that the members of the Roman Church, though Gentiles, had passed through a phase of Jewish proselytism. This will explain some of the phenomena of the epistle, but not all. It is more probable that St. Paul addressed a mixed church of Jews and Gentiles, the latter perhaps being the more numerous. There are certain passages which imply the presence of a large number of Jewish converts to Christianity. The use of the second person in addressing the Jews (cc. ii. and ill.) is clearly not assumed merely for argumentative purposes, but applies to a portion at least of those into whose hands the letter would fall. The constant appeals to the authority of "the Law" may in many cases be accounted for by the Jewish education of the Gentile believers (so Jowett, vol. ii. p. 22), but sometimes they seem too direct and positive to admit of this explanation (iii. 19, vii. 1). In the 7th chapter St. Paul appears to be addressing Jews, as those who like himself had once been under the dispensation of the Law, but had been delivered from it in Christ (see especially verses 4 and 6). And when in xii. 13, he says "I am speaking to you — the gentiles," this very limiting expression, "the gentiles," implies that the letter was addressed to not a few to whom the term would not apply.

Again, if we analyze the list of names in the 16th chapter, and assume that this list approximately represents the proportion of Jew and Gentile in the Roman Church (an assumption at least not improbable), we arrive at the same result. It is true that Mary, or rather Mariam (xvi. 6) is the only strictly Jewish name. But this fact is not worth the stress apparently laid on it by Mr. Jowett (p. 27). For Aquila and Priscilla (ver. 3) were Jews (Acts xviii. 1, 25), and the Greek which met in their house was probably of the same nation. Andronicons and Junia (or Juniamis? ver. 7) are called St. Paul's kinsmen. The same term is applied to Herodion (ver. 11). These persons then must have been Jews, whether "kinsmen" is taken in the wider or the more restricted sense. The name Apelles (ver. 10), though a heathen name also, was most commonly borne by Jews, as appears from Horace, Sat. i. v. 100. If the Aristobulus of ver. 10 was one of the princes of the Herodian house, as seems probable, we have also in "the household of Aristobulus" several Jewish converts. Altogether it appears that a very large fraction of the Christian believers mentioned in these salutations were Jews, even supposing that the others, bearing Greek and Latin names, of whom we know nothing, were heathens.

Nor does the existence of a large Jewish element in the Roman Church present any difficulty. The captives carried to Rome by Pompeius formed the nucleus of the Jewish population in the metropolis (Rome). Since that time they had largely increased. During the reign of Augustus we hear of above 80,000 resident Jews among the Greeks — "τινὶς victorius leges decernit" (Seneca, in August. de Civ. Dei, vi. 14). And the bitter satire of Juvenal and insinuating complaints of Tacitus of the spread of the infection through Roman society, are well known.

On the other hand, situated in the metropolis of the great empire of heathendom, the Roman Church could not reasonably have been free from Jewish influence. If there were Jewish influences — the Roman Church had to be addressed to Jews and Gentiles — the epistle bears out this supposition. It is profusely as the Apostle of the Gentiles that St. Paul writes to the Romans (i. 5). He hopes to have some fruit among them, as he had among the other Gentiles (l. 14). Later on in the epistle he speaks of the Jews in the third person, as if addressing Gentiles, "I could wish that myself were accursed for my brethren."
my kinsmen after the flesh, who are Israelites, etc." (ix. 3, 4). And again, "my heart's desire and prayer to God for them is that they might be saved" (x. 1, the right reading is οὐρία αἰτίαν, not οὐρία τοῦ Ἴσαίας as in the Received Text). Compare also xi. 25, 25, and especially xi. 30. "For as ye in times past did not believe God, so did these also (i.e. the Jews) now not believe," etc. In all these passages St. Paul clearly addresses himself to Gentile readers.

These Gentile converts, however, were not for the most part native Romans. Strange as the paradox appears, nothing is more certain than that the Church of Rome was at this time a Greek and not a Latin Church. It is clearly established that the early Latin versions of the New Testament were made not for the use of Rome, but of the provinces, especially Africa (Westcott, Canon, p. 269). All the literature of the early Roman Church was written in the Greek tongue. The names of the bishops of Rome during the first two centuries are with but few exceptions Greek. (See Michaelis, Latin Christ, i. 37.) And in accordance with these facts we find that a very large proportion of the persons and places mentioned in the salutations of the epistle are Greek names; while of the exceptions, Priscilla, Aquila, and Junia (or Junias), were certainly Jews; and the same is true of Rufus, if, as is not improbable, he is the same mentioned Mark xv. 21. Julia was probably a dependent of the imperial household, and derived her name accordingly. The only Roman names remaining are Amphias (i.e. Amphilus) and Urania, of whom nothing is known, but their names are of late growth, and certainly do not point to an old Roman stock. It was therefore from the Greek population of Rome, pure or mixed, that the Gentile portion of the Church was almost entirely drawn. And this might be expected. The Greeks formed a very considerable fraction of the whole of Rome. They were the most busy and adventurous, and also the most intelligent of the middle and lower classes of society. The influence which they were acquiring by their numbers and versatility is a constant theme of re-proach in the Roman philosorger and satirist (Juv. ii. 60-80, vi. 181; Tac. de Orell, 22). They complained that the national character is undermined, that the noble city has become Greek. Spreading the language of international intercourse, and brought by their restless habits into contact with foreign religions, the Greeks had larger opportunities than others of acquainting themselves with the truths of the Gospel; while at the same time holding more loosely to traditional beliefs, and with minds naturally more inquiring, they would be more ready to welcome these truths when they came in their way. At all events, for whatever reason, the Gentile converts at Rome were Greeks, not Romans: and it was an unfortunate conjecture on the part of the transcriber of the Syriac Peshito, that this letter was written "in the Latin tongue,

(77) Therefore every line in the epistle bespeaks an original.

When we inquire into the probable rank and station of the Roman believers, an analysis of the names in the list of salutations again gives an approximate answer. These names belong for the most part to the middle and lower grades of society. Many of them are found in the conventionaries of the freedmen and slaves of the early Roman emperors. (See Journal of Class. and Soc. Phil. iv. p. 87.) It would be too much to assume that they were the same persons, but at all events the identity of names points to the same social rank. Among the less wealthy merchants and tradesmen, among the petty officers of the army, among the slaves and freedmen of the imperial palace — whether Jews or Greeks — the Gospel would first find a firm footing. To this last class allusion is made in Phil. iv. 22, "they that are of your household." From these it would gradually work upwards and downwards: but we may be sure that in respect of rank the Church of Rome was no exception to the general rule, that "not many wise, not many mighty, not many noble" were called (1 Cor. i. 26).

It seems probable from what has been said above, that the Roman Church at this time was composed of Jews and Gentiles in nearly equal portions. This fact finds expression in the account, whether true or false, which represents St. Peter and St. Paul as presiding at the same time over the Church at Rome (Biony, Cor. op. Euseb. H. E. ii. 25; Iren. iii. 3). Possibly also the discrepancies in the lists of the early bishops of Rome may find a solution here. (Minor Church, World, ii. 440) From these I conceive the opposing difficulties and to hold out a meeting point in the Gospel. This is exactly what St. Paul does in the Epistle to the Romans, and what from the circumstances of the case he was well enabled to do. He was addressing a large and varied community which had not been founded by himself, and with which he had no direct intercourse. Again, it does not appear that the letter was specially written to answer any doubts or settle any controversies then rife in the Roman Church. There were therefore no disturbing influences, such as arise out of personal relations, or peculiar circumstances, to derange a general and systematic exposition of the nature and working of the Gospel. At the same time the vast importance of the metropolitan Church, which could not have been overlooked even by an uninspired teacher, naturally pointed it out to the Apostle, as the best body to whom to address such an exposition. Thus the Epistle to the Romans is more of a treatise than of a letter. If we remove the personal allusions in the opening verses, and the salutations at the close, it reveals the same time the vast importance of the Roman Church, than to any other church of Christendom. In this respect it differs widely from the epistles to the Corinthians and Galatians, with which as being written about the same time it may most fairly be compared, and which are full of personal and direct allusions. In one instance alone we seem to trace a special reference to the Church of the metropolis. The injunction of
ROMANS, EPISTLE TO THE
obedience to temporal rulers (xiii. 1) would most
likely be addressed to a congregation brought face
to face with the imperial government, and the
more so, as Rome had recently been the scene of
frequent disturbances, on the part of either Jews or
Christians, arising out of a feverish and restless an-
deception of Messiah's coming (Suet. Claud. 23).
Other apparent exceptions admit of a different ex-
planation.
7. This explanation is in fact to be sought in its
relation to the contemporaneous epistles. The
letter to the Romans closes the group of epistles
written during the third missionary journey. This
group contains, as already mentioned, the letters
to the Corinthians and Galatians, written probably
within the few months preceding. At Corinth, the capital of Achaia, and the stronghold of heathendom, the Gospel would encounter its sev-
erest struggle with Gentile vices and prejudices.
In Galatia, which either from natural sympathy or
from close contact seems to have been more ex-
posed to Jewish influence than any other church
within St. Paul's sphere of labor, it had a sharp
contrast with Judaism. In the epistles to these
two churches we study the attitude of the Gospel
towards the Gentile and Jewish world respectively.
These letters are direct and special. They are
avoided by present emergencies, are directed against
actual evils, are full of personal applications.
The Epistle to the Romans is the summary of what
he had written before, the result of his dealing with
the two antagonistic forms of error, the gathering
together of the fragmentary teaching in the Cor-
inthian and Galatian letters. What is there im-
mediate, irregular, and of partial application, is
here arranged and completed, and thrown into a
general form. Thus on the one hand his treat-
ment of the Mosaic law points to the difficulties he
encountered in dealing with the Galatian Church,
while on the other his cautions against antinomian
excesses (Rom. vi. 15, &c.), and his precepts against
giving offense in the matter of meats and the
observance of days (Rom. xiv.), remind us of the
errors which he had to correct in his Corinthian
converst. (Compare I Cor. vi. 12 ff., and I Cor.
viii. 1 ff.) Those injunctions then which seem at
first sight special, appear not to be directed against
any of the known failures in the Roman Church,
but to be suggested by the possibility of those ir-
regularities occurring in Rome which he had al-
ready encountered elsewhere.
8. Viewing this epistle then rather in the light
of a treatise than of a letter, we are enabled to
explain certain phenomena in the text. In the
received text a doxology stands at the close of the
epistle (xiv. 25-27). The preponderance of evi-
dence is in favor of this position, but there is
respectable authority for placing it at the end of
ch. xiv. In some texts again it is found in both
places, while others omit it entirely. How can we
account for this? It has been thought by some to
discredit the genuineness of the doxology itself;
but there is no sufficient ground for this view.
The argument which is developed on the ground of
style, advanced by Reiche, are met and refuted by
Fritzsche (Rom. vol. i. p. xxxiv.). Barr goes still
further, and rejects the two last chapters; but
such an inference falls without the range of sober
criticism. The phenomena of the MSS. seem best
explained by supposing that the letter was circu-
larized at an early date (whether during the Apostle's
lifetime or not it is idle to inquire) in two forms,
both with and without the two last chapters. In
the shorter form it was divested as far as possible
of its epistolary character by abstracting the per-
sonal matter addressed especially to the Romans,
the doxology being retained at the close. A still
further attempt to strip this epistle of any special
references is found in MS. G, which omits εἰς Ἔραιπ
(i. 7), and τὰς εἰς Παλαι (i. 13), for it is to be
observed at the same time that this MS. omits the
doxology entirely, and leaves a space after ch. xiv.
This view is somewhat confirmed by the parallel
case of the opening of the Ephesian Epistle, in
which there is very high authority for omitting the
words εἰς Ἔραιπ, and which bears strong marks of
having been intended for a circular letter.
9. In describing the purport of this epistle we
may start from St. Paul's own words, which, stand-
ing at the beginning of the doctrinal portion, may
be taken as giving a summary of the contents:
"The Gospel is the power of God unto salvation
to every one that believeth, to the Jew first and
also to the Greek: for therein is the righteousness
of God revealed from faith to faith" (i. 16, 17).
Accordingly the epistle has been described as com-
prising "the religious philosophy of the world's
history." The world in its religious aspect is
divided into Jew and Gentile. The different posi-
tion of the two as regards their past and present
relations to God, and their future prospects, are ex-
plained. The atonement of Christ is the centre of
religious history. The doctrine of justification by
faith is the key which unlocks the hidden mysteries
of the divine dispensation.
The epistle, from its general character, lends it-
self more readily to an analysis than is often the
case with St. Paul's epistles. The body of the letter
consists of four portions, of which the first and
last relate to personal matters, the second is
argu-mentative and doctrinal, and the third practi-
cal and hortatory. The following is a table of its
contents:
I. Personal explanations. Purposed visit to
Rome (i. 13-15).
II. Doctrinal (i. 16-xi. 36).
The general proposition. The Gospel is the
salvation of Jew and Gentile alike. This
salvation comes by faith (i. 16, 17).
The rest of this section is taken up in estab-
lishing this thesis, and drawing deductions
from it, or correcting misapprehensions.
(a) All alike were under condemnation before
the Gospel:
The heathen (i. 18-32).
The Jew (ii. 1-29).
Objections to this statement answered (iii. 1-
8).
And the position itself established from
Scripture (iii. 9-29).
(b) A righteousness (justification) is revealed
under the gospel, which being of faith, not
of law, is also universal (iii. 21-26).
And boasting is thereby excluded (iii. 27-31).
Of this justification by faith Abraham is an
example (iv. 1-25).
Thus then we are justified in Christ, in whom
alone we glory (v. 1-11).
And this acceptance in Christ is as uni-

The moral consequences of our deliverance. The law was given to multiply sin (v. 20, 21). When we died to the Law we died to sin (ix. 1—14). The abolition of the Law, however, is not a signal for moral license (vi. 15—23). On the contrary, as the Law has passed away, so must sin, for sin and the Law are correlative; at the same time this is no dispensation of the Law, but rather a proof of human weakness (vii. 1—23). So henceforth in Christ we are free from sin, we have the Spirit and look forward in hope, triumphing over our present afflictions (viii. 1—39).

The rejection of the Jews is a matter of deep sorrow (ix. 1—5). Yet we must remember —

(i.) That the promise was not to the whole people, but only to a select seed (ix. 6—15).

And the absolute purpose of God in so ordaining is not to be canvassed by man (ix. 14—19).

(ii.) That the Jews did not seek justification aright, and so missed it. This justification was promised by faith, and is offered to all alike, the preaching to the Gentiles being implied therein. The character and results of the Gospel dispensation are foreshadowed in Scripture (x. 1—21).

(iii.) That the rejection of the Jews is not final. This rejection has been the means of gathering in the Gentiles, and through the Gentiles they themselves will ultimately be brought to Christ (xi. 36—36).

IV. Personal matters.

(a.) To holiness of life and to charity in general, the duty of obedience to rulers being inculcated by the way (xii. 1—xiii. 14).

(b.) And more particularly against giving offense to weaker brethren (xiv. 1—xv. 13).

While this epistle contains the fullest and most systematic exposition of the Apostle's teaching, it is at the same time a very striking expression of his character. Nowhere do his earnest and affectionate nature, and his tact and delicacy in handling unwelcome topics appear more strongly than when he is dealing with the rejection of his fellow-countrymen the Jews.

The reader may be referred especially to the introductions of Olshausen, Tholuck, and Jouett, for suggestive remarks relating to the scope and purpose of the Epistle to the Romans.

10. Internal evidence is so strongly in favor of the genuineness of the Epistle to the Romans that it has never been seriously questioned. Even the sweeping criticism of Baur did not go beyond condemning the two last chapters as spurious. But while the epistle bears in itself the strongest proofs of its Pauline authorship, the external testimony in favor is not insuperable.

The reference to Rom ii. 4 in 2 Pet. iii. 15 is indeed more than doubtful. In the Epistle of St. James again (ii. 14), there is an allusion to perverted versions of St. Paul's language and doctrine which has several points of contact with the Epistle to the Romans, but this may perhaps be explained by the oral rather than the written teaching of the Apostle, as the dates seem to require. It is not the practice of the Apostolic fathers to cite the N. T. writers by name, but marked passages from the Romans are found embedded in the epistles of Clement and Polycarp (Rom. i. 29—32 in Clem. Cor. c. xxxv., and Rom. xiv. 10, 12, in Polyc. Phil. c. v.). It seems also to have been directly cited by the elder quoted in Ireneus (iv. 27, 2; ideo Paulum dixisse; cf. Rom. xi. 21, 17), and is alluded to by the writer of the Epistle to Diognetus (c. ix., cf. Rom. iii. 21 foll., v. 20), and by Justin Martyr (Dial. c. 23, cf. Rom. iv. 10, 11, and in other passages). The title of Melito's treatise, On the Hearing of Faith, seems to be an allusion to this epistle (see however Gal. ii. 2, 3). It has a place moreover in the Muratorian Canon and in the Syriac and Oriental Latin versions. Nowhere have we the testimony of orthodox writers alone. The epistle was commonly quoted as an authority by the heretics of the sub-apostolic age, by the Ophites (Hippol. adv. Haer. p. 99, cf. Rom. i. 20—26), by Basilides (ib. p. 238, cf. Rom. viii. 10, 22, and v. 13, 14), by Valentinians (ib. p. 155, cf. Rom. viii. 11), by the Valentinians Heracleon and Ptolemaeus (Westcott, On the Canon, pp. 335, 340), and perhaps also by Tatian (Oral. c. iv., cf. Rom. i. 20), besides being included in Marcion's Canon. In the latter part of the second century the evidence in its favor is still fuller. It is obviously alluded to in the letter of the churches of Vienne and Lyons (Euseb. H. E. v. 1, cf. Rom. viii. 18), and by Athanasius (p. 15, cf. Rom. xii. 11; p. 57, cf. Rom. i. 24) and Theophilus of Antioch (Ad Autol. p. 79, cf. Rom. ii. 6 foll. p. 126, cf. Rom. xiii. 7, 8) and is quoted frequently and by name by Ireneus. Tertullian, and Clement of Alexandria (see Kirchhoffer, Quellen, p. 198, and esp. Westcott, On the Canon, passim).

11. The Commentaries on this epistle are very numerous, as might be expected from its importance. The last apostolic expositions and the early Christian expositions are now extant. The work of Origen is preserved entire only in a loose Latin translation of Rufinus (Orig. ed. de la Rue, iv. 458), but some fragments of the original are found in the Philothea, and more in Cramer's Catena. The commentary on St. Paul's epistles printed among the works of St. Ambrose (ed. Ben. iii. Appx. p. 21), and hence bearing the name Ambrosiaster, is probably to be attributed to Hilary the deacon. Besides these are the expositions of St. Paul's epistles by Chrysostom (ed. Montf. ix. p. 425, edited separately by Field), by Pelagius (printed among Jerome's works, ed. Valarsi, xi. Pt. 3, p. 153), by Prima- sinus (Jugom. Bibl. Vet. Patr. vi. Pt. 2, p. 30), and by Theodoret (ed. Schiifer, iii. p. 1). Augustine commenced a work, but broke off at i. 4: it bears the name Inseletto Expositio Epistulae ad Rom. (ed. Ben. iii. p. 925). Later he wrote Ex- positio quaedam Propositionum Epistulae ad Rom. also extant (ed. Ben. iii. p. 903). To these should be added the later Catena of Ecumenius (10th cent.) and the notes of Theophylact (11th cent.), both frequently containing valuable extracts from Photius. Portions of a commentary of Cyril of Alexandria were published by Mai (Nov. Patr. Patrology, pt. iv. p. 961).
ROMANS, EPISTLE TO THE

Bild. iii. p. 1). The Catenae edited by Cranmer (1844) comprises two collections of Variarum notes, the one extending from i. 1 to ix. 4, the other from vii. 7, to the end. Besides passages from extant commentaries, they contain important extracts from Apollinaris, Theodorus of Mopsuestia [cit. Fris- sche, 1847; Migne, Patol. Gr. Lxvi.], Severianus, Genadius, Photius, and others. There are also the Greek Scholion, edited by Matthäi, in his large Greek Theological Dictionary (1840), and the commentary of Euthymius Zigabenus (Tholuck, Eisd. § 6) exists in MS., but has never been printed. Of the later commentaries we can only mention a few of the most important. The dogmatic value of this epistle naturally attracted the early reformers. Melanchthon wrote several expositions of it (Walch, Bild. Theol. ix. 679). The commentary of Calvin on the Romans is considered the ablest part of his able work. Among Roman Catholic writers, the older works of Estius and Corn. a Lupide deserve to be mentioned. Of foreign an- notators of a more recent date, besides the general commentaries of Bengal, Ol-hausen, De Wette, and Meyer (3d ed. 1859 [4th ed. 1855]), which are highly valuable, there are two single out the special works of Bickel; 2d ed. 1830), Reiche (1834), Fritzsche (1836-43), and Tholuck (5th ed. 1856). An elaborate commentary has also been published lately by Van Hengel. Among English writers, besides the editions of the whole of the New Testament by Alford (4th ed. 1861) and Wordsworth (new ed. 1861), the most important annotations on the Epistle to the Romans are those of Stuart (6th ed. 1857), Jowett (2d ed. 1859), and Vaughan (3d ed. 1861). Further information on the subject of the literature of the Epistle to the Romans may be found in the introductions of Reiche and Tholuck. J. B. L.

* Recent Literature. — On the composition of the Roman Church and the aim of the epistle valuable annotations have been lately published by W. Mangold, Der Einberuf u. die Auswande d. ethos. Gemeinde, Mar. 1866, and W. Beyschlag, Des geschichte-chen Problem des Einberuf. in the Theol. Stud. u. Krit., 1867, pp. 627-665; comp. Hilgenfeld, Die Paulus-Briefe u. ihre neusten Bearbeitungen, in his Zeitschr. f. wiss. Theol. 1869, ix. 269-316, 357-367. Renan (Saint Paul, Paris, 1863) has written of the Roman epistle to the Romans to have been a circular letter, of which there were four copies with distinct endings (sent to the churches at Rome, Ephesus, Thessalo- nica, and some unknown church), the body of the letter remaining the same. The details of his theory and the arguments for it cannot be given here. See also Lightfoot, the author of the preceeding article, in the Journal of Philology, 1869, vol. ii. pp. 264-295. His own hypothesis is, that the epistle as originally written was without the benediction xvi. 24 (omitted by Lachm., Tisch., and Tregelles as wanting in the best MSS.) and the doxology (xvi. 25-27). At some later period of his life . . . it occurred to the Apostle to give to this letter a wider circulation. To this end he made two changes in it: he obliterated all mention of Rome in the opening paragraphs by slight alterations [substituting vev θνων τοις εν τω·, for τω Παγω in i. 7, and omitting τω Παγω in i. 15 — for the traces of this in MSS., etc., see Tisch.]; and he cut off the two last chapters containing personal matters, adding at the same time a doxology (xvi. 25-27) as a termina-

tion to the whole.' This it will be perceived is a modification of the view presented in § 3 of the article above.

Among the more recent Commentaries, we may notice Umbreit, Der Brief an die Römer, auf grunde des A. T. ausgelegt, Goth., 1856; Ewald, Die Römischen Episteln des Ap. Paulus übers. u. er- klärt, Göt. 1857; John Brown ("Prof. of Exeget. Theol. to the United Presbyterian Church "), Ana- lytical Exposition of the Ep. to the Romans, Edin. also N. Y., 1857; John Forbes, Analyt. Com. of the Ep. to the Romans, tracing the train of Thought by the aid of Paradosis, Edin. 1868; J. P. Lange, Der Brief Pauli an die Römer, 2d Aufl. 1858 (Theil vi. of his Briefb.ck), greatly enlarged and enriched by Dr. Schaff and the Rev. M. B.iddle, in the Amer. translation, N. Y. 1859 (vol. ed. Lange's Com.), and J. C. K. von Hofmann, Der Brief Pauli an die Römer, Nürnberg, 1868 (Theil iii. of his Die höl. Schrift d. N. T. unter- nachtdjung untersucht). Of the commentaries mentioned by Lightfoot, that of Fritzsche is par- ticularly distinguished for its philological thorough- ness.

Of American commentators, we may further name those of Dr. Charles Hodge (Old School Presbyterian), Philadelphia, 1835, new ed., and greatly enlarged, 1844; S. H. Turner (Episco- palian), N.Y. 1853; and the more popular Notes of Albert Barnes (New School Presb.), H. J. Kip- ley (Baptist), A. A. Livermore (Unitarian), and L. R. Paige (Universalist).

On the theology of this epistle and the doctrine of Paul in general, in addition to the works referred to under the art. PAUL, vol. iii. p. 2397, one may consult the recent volume of Weiss, Eschat. d. Bibl. Theol. d. N. T., Berlin, 1868, pp. 216-307. Rom. v. 12-19 is discussed by Prof. Timothy Dwight in the New Englander for July, 1838, with particu- lar reference to the Commentary of Dr. Hodge. For a fuller view of the very extensive literary relation to the epistle, see the American translation of Lange's Commentary as above referred to, p. 18 ff.; comp. p. 27 ff., 37, and for special monogra- phs, the body of the Commentary on the main important passages. The older literature is de- tailed in the well-known bibliographical works of Walsh, Winer, Danz, and Darling.

ROME (Roma), Edin. 1858, 2d ed. 1859. Of the many works on this subject, the fame of the ancient world is situated on the Tiber at a distance of about 15 miles from its mouth. The "seven hills" (Rev. xvi. 9) which formed the nucleus of the ancient city stand on the left bank. On the opposite side of the river rises the far higher ridge of the Janiculum. Here from very early times was a fortress with a suburb beneath it extending to the river. Modern Rome lies to the N. of the ancient city, covering with its principal portion the plain to the N. of the seven hills, once known as the Campus Martius, and on the opposite bank extending over the low ground beneath the Vatican to the N. of the ancient Janiculum. A full account of the history and topography of the city is given elsewhere (Bell. A. Gr. and Rom. Geogr. ii. 719). Here it will be considered only in its relation to Bible his- tory.

Rome is not mentioned in the Bible except in the books of Maccabees and in three books of the N. T., namely, the Acts, the Epistle to the Ro- mans, and the 2d Epistle to Timothy. For the
June. Sot. iii. 193, 290). The population of the city has been variously estimated: at half a million (by Dureau de la Malle, i. 403, and Merivale, Rome, Empire, iv. 525), at two millions and upwards (Horeck, Römische Geschichte, ii. 131; C. and H. Life of St. Paul, ii. 376; Dict. of Geogr. ii. 746), even at eight millions (Lipsius, De Magnibilitate Roma, quoted in Dict. of Geogr.). Probably Gibbon's estimate of one million two hundred thousand is nearest to the truth (Milman's note on Gibbon, ch. xxxi. vol. iii. p. 120). One half of the population consisted, in all probability, of slaves. The larger part of the remainder consisted of pauper citizens supported in idleness by the miserable system of public gratuities. There appears to have been no middle class and no free industrial population. Side by side with the wretched classes just mentioned was the comparatively small body of the wealthy nobility, of whose luxury and profligacy we hear so much in the heathen writers of the time. (See for calculations and proofs the works cited.)

It was the population which St. Paul would find at Rome at the time of his visit. We learn from the Acts of the Apostles that he was detained at Rome for "two whole years," "dwelling in his own hired house with a soldier that kept him" (Acts xxviii. 16, 30), to whom apparently, according to Roman custom (Senec. Ep. v.; xii. 6), quoted by Broder, ed Tor. Ann. iv. 22), he was bonded with a chain (Acts xxviii. 20; Eph. vi. 20; Phil. i. 13). Here he preached to all that came to him, no man forbidding him (Acts xxxv. 30, 31). It is generally believed that on his "appeal to Caesar" he was acquitted, and, after some time spent in freedom, was a second time imprisoned at Rome (for proofs, see C. and H. Life of St. Paul, ch. xxviii., and Alford, Gr. Test. iii. ch. 7). Five of his epistles, namely, those to the Colossians, Ephesians, Philemon, that to Philemon, and the 20 Epistle to Timothy, were, in all probability, written from Rome, the latter shortly before his death (2 Tim. iv. 6), the others during his first imprisonment. It is universally believed that he suffered martyrdom at Rome.

2. The localities in and about Rome especially connected with the history of St. Paul are: the Appian Way, by which he approached Rome (Acts xxviii. 15). (See Apph. Forum, and Dict. of Geogr. "Via Appia." (2) "The palace," or "Caesar's court" (tò παράπλατον, Phil. i. 13). This may mean either the great camp of the Praetorians which Tiberius established outside the walls on the N. E. of the city (Tac. Ann. iv. 2; Suet. Tib. 37), or, as seems more probable, a barracks attached to St. Paul's, built by Aureus Martinus near the forum (Liv. i. 33).
ROME

Described by Ital. (Cat. 55). It still exists beneath the church of S. Giovanni dei Falegnami. Here it is said that St. Peter and St. Paul were fellow-prisoners for nine months. This is not the place to discuss the question whether St. Peter was ever at Rome. It may be sufficient to state, that though there is no evidence of such a visit in the N.T., unless Babylon in 1 Pet. v. 13 is a mystical name for Rome, yet early testimony (Dionysius, op. Euseb. ii. 25), and the universal belief of the early Church seem sufficient to establish the fact of his having suffered martyrdom there. [PETER, vol. ii. p. 210]. The story, however, of the imprisonment in the Mamertine prison seems inconsistent with 2 Tim., especially iv. 11. (2) The chapel on the Ostian road which marks the spot where the two Apostles are said to have separated on their way to martyrdom. (3) The supposed scene of St. Paul’s martyrdom, namely, the church of St. Paolo alle tre fontane on the Ostian road. (See the notice of the Ostian road in Cauns, op. Eus. H. E. ii. 25.) To these may be added (4.) The supposed scene of St. Peter’s martyrdom, namely, the church of St. Pietro in Montorio, on the Janiculum. (5.) The chapel “Domine quo Vadis,” on the Appian road, the scene of the beautiful legend of our Lord’s appearance to St. Peter as he was escaping from martyrdom (Amalrose, P. 39). (6.) The places where the bodies of the two Apostles, after having been deposited first in the catacombs (κατακομβαια) (Eus. H. E. ii. 25), are supposed to have been finally buried – that of St. Paul by the Ostian road; that of St. Peter beneath the dome of the famous Basilica which bears his name (see Cauns, op. Eus. H. E. ii. 25). All these and many other traditions will be found in the Apologia of Barnabas, under the last year of Nero. Valueless as may be the historical testimony of each of these traditions singly, yet collectively they are of some importance as expressing the consciousness of the third and fourth centuries, that there had been an early contest, or at least contact, between the two Apostles, which in the end was completely reconciled; and it is this feeling which gives a real interest to the outward forms in which it is brought before us, more or less indeed in all the south of Europe, but especially in Rome itself” (Stanley’s Sermons and Essays, p. 101).

4. We must add, as sites unquestionably connected with the Roman Christians of the Apostolic age – (1.) The gardens of Nero in the Vatican, not far from the spot where St. Peter’s tomb stands. Here Christians wrapped in the skins of beasts were torn to pieces by dogs, or, clothed in inflammable robes, were burnt to serve as torches during the midnight games. Others were crucified (Tac. Ann. xv. 44.). (2.) The Catacombs. These subterranean galleries, commonly from 8 to 10 feet in height, and from 4 to 6 in width, and extending for miles, especially in the neighborhood of the old Appian and Momentan ways, were unquestionably used as places of refuge, of worship, and of burial by the early Christians. It is impossible here to enter upon the difficult question of their origin, and their possible connection with the deep sand-pits and subterranean works at Rome mentioned by classical writers. See the story of the murder of Asinius (Cic. pro Cluent. 15), and the account of the concordium offered to Nero before his death (Suet. Nero, 48). A more complete account of the catacombs than any yet given, may be expected in the forthcoming work of the Cavaliere G. B. De Rossi. Some very interesting notices of this work, and descriptions of the Roman catacombs are given in Burgon’s Letters from Rome, pp. 120–238. De Rossi finds his earliest dated inscription in A. D. 71. From that date to A. D. 300, there are not known to exist so many as thirty Christian inscriptions bearing dates. Of undated inscriptions, however, about 4,000 are referable to the period antecedent to the emperor Constantine” (Burgon, p. 118). [See De Rossi’s Inscriptions Christ. Urbis Rome, Vol. I. Rom. 1861, Ic.]

Nothing is known of the first founder of the Christian Church at Rome. Christianity may, perhaps, have been introduced into the city not long after the outpouring of the Holy Spirit on the day of Pentecost, by the “strangers of Rome,” who were then at Jerusalem (Acts ii. 10). It is clear that there were many Christians at Rome before St. Paul visited the city (Rom. i. 8, 13, 15, xv. 20). The number of twenty thousand of Rome are given in the salutations at the end of the Epistle to the Ephesians. For the difficult question whether the Roman Church consisted mainly of Jews or Gentiles, see C. and H., Life of St. Paul, ii. 157; Alford’s Proleg.; and especially Prof. Jowett’s Epistles of St. Paul to the Romans, Galatians, and Thessalonians, i. 7–26. The view there advocated that they were a Gentile Church but Jewish converts, seems most in harmony with such passages as ch. i. 5, 13, xx. 13, and with the general tone of the epistle.

Linus (who is mentioned, 2 Tim. iv. 21), and Clement (Phil. iv. 3), are supposed to have succeeded St. Peter as bishops of Rome.

Rome seems to be described under the name of Babylon in Rev. xiv. 16, xvii. 5, xliii. 2, 21, and again, as the city of the seven hills (Rev. xvii. 9, xiii. 2, xiii. 1). See too, for the interpretation of the mystical number 666 in Rev. xiii. 18. Alford’s note, I. c.

For a good account of Rome at the time of St. Paul’s visit, see Trench and Howson’s Life of St. Paul, ch. xxiv., of which five use has been made for the sketch of the city given in this article.

J. J. H.

ROOF. [Darepaeth, Amer. ed.; House.]

ROOM. This word is employed in the A. V. of the New Testament as the equivalent of less than eight distinct Greek terms. The only one of these, however, which need be noticed here is πρατοκάλαια (Matt. xxvi. 6; Mark xii. 39; Luke xiv. 7, 8, xx. 46), which signifies, not a “room” in the sense we commonly attach to it of a chamber, but the highest place on the highest conch room; the dinner or banquet given at the supper of Christ, as it is more accurately rendered in Luke xi. 43. [MEALS.] The word “seat” is, however, generally
ROSE

appropriated by our translators to καθής, which seems to mean some kind of official chair. In Luke xiv. 9, 10, they have rendered τάςως by both "place" and "room." The Upper Room of the Last Supper is noticed under its own head. [See HOUSE, vol. ii. p. 110.] 6.

ROSE (ךֳּשְׁנָתָל, chabotatsethl: adaptus, ἀκοφόρος: Αρ. κάνθαρος: Λ. lilaun) occurs twice only, namely, in Cant. ii. 1, "I am the Rose of Sharon;" and in Is. xxxiv. 1, "the desert shall rejoice and blossom as the rose." There is much difference of opinion as to what particular flower is here denoted. Tremellius and Dioscuri, with some of the Rabbins, believe the rose is intended, but there seems to be no foundation for such a translation. Celsius (Hierob. i. 488) has argued in favour of the Narcissus (Polyzephyrus narcissis). This rendering is supported by the Targum on Cant. ii. 1, where Chabotatsethl is explained by morses (ךֳּשְׁנָתָל). This word, says Boyle (Kitto's Cyc. art. "chabazzethl"), is "the same as the Persian ḵaynas, the Arabic دَجِرَس, which throughout the East indicates Narcissus tussilago, or the polyanthus narcissis." Gesenius (Thes. s. v.) has no doubt that the plant denoted is the "autumn crocus" (Colchicum autumnale). It is well worthy of remark that the Syriac translator of Is. xxxiv. 1 explains chabotatsethl by chabzahydd, which is evidently the same word, and δ ὁ αὐτοκράτωρ, and thus interchanged. This Syriac word, according to Michaelis (Suppl. p. 659), Gesenius, and Rosenmuller (Jeb. Bot. p. 142), denotes the Colchicum autumnale. The Hebrew word points etymologically to some bulbous plant; it appears to us more probable that the narcissus is intended than the crocus, the former plant being long celebrated for its fragrance, while the other has no solonous qualities to recommend it. Again, as the chabotatsethl is associated with the lily in Cant. l. c., it seems probable that Solomon is speaking of two plants which ble-sounded about the same time. The narcissus and the lily (Lilium candidum) would be in blossom together in the early spring, while the Colchicum is an autumn plant. Thomson (Land and Book, pp. 112, 513) suggests the possibility of the Hebrew name being identical with the Arabic Khallabey or خَلَابِي, "the mallow," which plant he saw growing abundantly on Sharon: but this view can hardly be maintained; the Hebrew term is probably a quadriliteral noun, with the harsh aspirate prefixed, and the prominent notion implied in it is behavior, a "bull," and has therefore no connection with the above-named Arabic word. Chateaubriand (Itinéraire, ii. 130) mentions the narcissus as growing in the plain of Sharon; and Strand (Thor. Palæst. No. 177) names it as a plant of Palestine, on the authority of Hinault and Hankevitch. "We find it at the East of the River of Pales." p. 216. Hiller (Hieroglypt. ii. 30) thinks the chabotatsethl denotes some species of asphodel (Asphode-
a

ROSH

b * "From the locality of Jericho," says Mr. Tribe, "and the situation by the waters, this rose is most probably the Osander, the Rawdatenour, or Rose of the Greeks, one of the most beautiful and

ROSH (ךֳּשְׁנָתָל [head]: pāṣ: Rose). In the genealogy of Gen. xxvi. 21, Rosh is reckoned among the sons of Benjamin, but the name does not occur elsewhere, and it is extremely probable that "Eli and Rosh" is a corruption of "Ahiram" (comp. Num. xxv. 38). See Barrington's Genealogies, i. 284.

ROSH (ךֳּשְׁנָתָל: pāṣ, Ez. xxviii. 2, 3, xxxix. 1: translated by the Vulg. capella, and by the A. V. "chief," as if כְּשַׁנָתָל, "head"). The whole sentence thus rendered by the A. V. "Masog the chief prince of Meschoch and Tubal," ought to run "Masog the prince of Rosh, Meschesh, and Tubal." The word translated "chief" being נְכַנְנָה, the term usually employed for the head of a navel tribe, as of Abraham (in Gen. xxii. 6), of the Arabs (Gen. xxvi. 20), and of the chiefs of the several Israelite tribes (Num. vii. 1, xxxv. 18), or in a general sense (1 K. xi. 34; Ez. xii. 7, xiv. 2). The meaning is that Masog is the head of the three great Scythian tribes, of which "Rosh" is the first. Gesenius considers it beyond doubt that by Rosh, or Pāṣ, is intended the tribe on the north of the Fannas, so called from their neighborhood to the River, or Volga, and that in the time of the Hebrews the first three tribes of the Russian or Iti-siana nation. Von Hammer identifies this name with Ros in the Koran (xxxv. 40; l. 12), "the peoples Aad, Thamud, and the Asshahir (or inhabitants) of Rass or Ros." He considers that Mohammed had actually the passage of Ezekiel in view, and that "Asahhir" corresponds to מַזַל, the "prince" of the A. V., and ἀπορροτα of the LXX. (See on Origenes Rassius, Petersburg, 1825, pp. 24—29). The first certain mention of the Russians under this name is in a Latm Chronicle under the year A. D. 829, quoted by Bayer (Origenes Russicus, Comment. Acad. Petropol. 1726, p. 499). From the junction of Tiros with Meschesh and Tubal in Gen. x. 2, Von Hammer conjectures the identity of Tiros and Rosh (p. 289). The Rus of the Russian nation probably occurs again under the altered form of Rasses, in Judith ii. 23 — this time attractive plants of Palestine, which abounds in all the warmer parts of the country by the side of pools and streams, and flourishes especially at Jericho, where I have not seen our rose" (Nat. Hist. of the Rose, p. 477).
in the ancient Latin, and possibly also in the Syriac versions, in connection with Thairas or Thars. But the passage is too corrupt to admit of any certain deduction from it. [Rueas.]

This Biblical notice of so great an empire is doubly interesting from its being a solitary instance. No other name of any modern nation occurs in the Scriptures, and the obliteration of it by the A. V. is one of the many remarkable variations of our version from the meaning of the sacred text of the Old Testament. For further information see the above-quoted treatises of Von Hammer and Bayer. A. P. S.

ROSIUS. Properly \"naphtha,\" as it is both in the LXX. and Vulg. (\(\Delta \nu \alpha \theta \alpha \rho \varsigma, \nu \alpha \theta \alpha \rho \varsigma\)), as well as in the Peshito-Syriac. In the Song of the Three Children (29), the servants of the king of Babylon are said to have been \"not to make the oven hot with rosin, pitch, tow, and small wood.\" Pliny (ii. 101) mentions naphtha as a product of Babylon, similar in appearance to liquid bitumen, and having a remarkable affinity to fire. To this natural product (known also as Persian naphtha, petroleum, rock oil, Kangan tar, Burmese naphtha, etc.) reference is made in the passage in question. Sir R. K. Porter thus describes the naphtha springs at Kirkook in Lower Kurdistan, mentioned by Strabo (xvii. 738): \"They are ten in number. For a considerable distance from them we felt the air sulphurous; but in drawing near it became worse, and we were all instantly struck with excreting headaches. The springs consist of several pits or wells, seven or eight feet in diameter and ten or twelve deep. The whole number are within the compass of five hundred yards. A flight of steps has been cut into each pit for the purpose of approaching the fluid, which rises and falls according to the dryness or moisture of the weather. The natives live out with bellies into bags made of skins, which are carried on the backs of asses to Kirkook, or to any other mart for their sale. . . . . The Kirkook naphtha is principally consumed by the markets in the southwest of Kurdistan, while the pits not far from Kuiri supply Bagdad and its environs. The Bagdad naphtha is black \"(Proc. ii. 440). It is described by Dioscorides (i. 101) as the drags of the Babylonian naphtha, pale yellow in color. As cited by Plutarch (A.D.C. p. 35) Alexander first saw it in the city of Ecbatana, where the inhabitants exhibited its marvelous properties by stirring it along the street which led to his headquarters and setting it on fire. He then tried an experiment on a page who attended him, putting him into a bath of naphtha and setting light to it (Strabo, xvii. 743), which nearly resulted in the boy's death. Plutarch suggests that it was naphtha in which Medes steeped the crown and rose which she gave to the daughter of Creon; and Strabo refers to the jeweller's of Ecbatana, and so it is said of the Greeks that it \"Mede's oil,\" but the Medes \naphtha.\" The Persian name is \(\beta \lambda \iota \zeta \varsigma\) (left). Posidonius (in Strabo) relates that in Babylonia there were springs of black and white naphtha. The former, says Strabo (xvii. 743), were of liquid bitumen, which they burn in lamps instead of oil. The latter were of liquid sulphur. W. A. W.

* ROWERS. [Ship (6).]* ROWS, Carl i. 10. [ORNAMENTS, PERSONAL, note s.]

RUBIES (\(\varphi \nu \iota \mu \rho \iota \varepsilon \varsigma, \varphi \nu \iota \mu \rho \iota \varepsilon \varsigma\); \(\pi \rho \iota \nu \mu \iota \varsigma \varsigma \nu \iota \nu \iota \iota \iota \iota\); \(\pi \rho \iota \nu \mu \iota \varsigma \varsigma \nu \iota \nu \iota \iota \iota \iota\). The A. V. renders \"pearl,\" and which seems to be identical with \(\delta \varsigma \varsigma \), \(\delta \varsigma \varsigma \), \(\delta \varsigma \varsigma \), \(\delta \varsigma \varsigma \), \(\delta \varsigma \varsigma \). See Gesenius, and Winer (Bibl. Realen. i. 71).
done." The rue is too well known to need description.a

RU'FUS (Ρούφος [red, reddish]; Rufus) is mentioned in Mark xxv. 21, along with Alexander, as a son of Simon the Cyrenian, whom the Jews compelled to bear the cross of Jesus on the way to Golgotha (Luke xxii. 28). As the Evangelist informs us that Simon was a native of Cyrene, and that he was not among the sons, it is evident that the latter were better known than the father in the circle of Christians where Mark lived. Again, in Rom. xvi. 13, the Apostle Paul salutes a Rufus whom he designates as "elect in the Lord" (ἐλεκτόρος ἐν Κυρίῳ), and whose mother he gratefully recognizes as having earned a mother's claim upon himself by acts of kindness shown to him. It is generally supposed that this Rufus was identical with the one to whom Mark refers: and in that case, as Mark wrote his gospel in all probability at Rome, it was natural that he should describe to his readers the father (who, since the mother was at Rome while the father apparently was not there, may have died, or have come later to that city) from his relationship to two well-known members of the same community. It is some proof at least of the early existence of this view that, in the Acta Andreae et Petri, both Rufus and Alexander appear as companions of Peter in Rome. Assuming, then, that the same person is meant in the two passages, we have before us an interesting group of believers—a father (for we can hardly doubt that Simon became a Christian, if he was not already such, at the time of the crucifixion), a mother, and two brothers, all in the same family. Yet we are to bear in mind that Rufus was not an uncommon name (Wetstein, Nos. Test., vol. i. p. 634): and possibly, therefore, Mark and Paul may have had in view different individuals.

RUH'AMAH (רעהמה) [commiserated]; ῥαχαμαί: misericordiam manifesta). The margin of our version renders it "having obtained mercy" (Hos. ii. 1). The name, if name it be, is like Lo-ruhamah, symbolical, and as that was given to a daughter of the prophet Hosea, it may denote that God's mercy was turned away from Israel, so the name Rahamah is addressed to the daughters of the people to denote that they were still the objects of his love and tender compassion.

RU'MAH (רעה [high, exalted]; Peued: Joseph. "A'balua: Ruam). Mentioned, once only (2 K. xiii. 36), as the native place of a certain Pethah, the father of Zebadah, a member of the harem of king Josiah, and mother of Elnathan or Jehovahim king of Judah.

It has been conjectured to be the same place as Arumah (Judg. ix. 41), which was apparently near Shechem. It is more probable that it is identical with Dumah, one of the towns in the mountains of Judah, near Hebron (Josh. xv. 52), not far distant from Lelah, the native town of another of Josiah's wives. The Hebrew ד and ר are so similar as often to be confounded together, and Dumah must have at any rate been written Ramah in the Hebrew text from which the LXX. translated, since they give it as Renna and Rumen.

Josephus mentions a Rummah in Galilee (B. J. vi. 7, § 21).

* * *

a * "We collected," says Tristram, "four species said in Palestine. Ruta graveolens is cultivated" (Nat. Hist. of the Bible, p. 478).
and immediately upon learning who the strange woman was, Boaz treated her with the utmost kindness and respect, and sent her home laden with corn which she had gleaned. Encouraged by this incident, Naomi instructed Ruth to claim at the hand of Boaz that she should perform the part of her husband’s near kinsman, by purchasing the inheritance of Elimelech, and taking her to be his wife. But there was a nearer kinsman than Boaz, and it was necessary that he should have the option of redeeming the inheritance for himself. He, however, declined, fearing to mar his inheritance. Until which time, Boaz took Ruth to be his wife, amidst the blessings and congratulations of their neighbors. As a singular example of virtue and piety in a rude age and among an idolatrous people; as one of the first-fruits of the Gentile harvest gathered into the Church; as the heroine of a story of exquisite beauty and simplicity; as illustrating in her history the workings of Divine Providence, and the truth of the saying, that “the eyes of the Lord are over the righteous;” and for the many interesting revelations of ancient domestic and social customs which are associated with her story, Ruth has always held a foremost place among the Scripture characters. St. Augustine has a curious speculation on the relative blessedness of Ruth, twice married, and Boaz’s second marriage becoming the kinswoman of Christ, and Anna remaining constant in her widowhood (De bono Vindic.). Jerome observes that we can measure the greatness of Ruth’s virtue by the greatness of her reward — “Ex ejus semine Christus oritur ” (Epist. xxii. ad Paulinum). As the great-grandmother of King David, Ruth must have flourished in the latter part of Eli’s judgments; or the beginning of that of Samuel. But there seem to be no particular notes of time in the book, by which her age can be more exactly defined. The story was put into its present shape, however, long after her lifetime: see Ruth i. 1, iv. 7, 17. (Bertheau on Ruth, in the Exeg. Handb.: Rosenmull, Proem. in Lib. Ruth; Parker’s De Wette; Ewald, Gesch. i. 205, iii. 709 ff.) A. C. H.

* RUTH, BOOK OF. The plan of the Dictionary requires that some account should be given of the book of which Ruth is the heroine. The topics which claim remark are — its place in the canon, its age, authorship, object, sources of the history, its archaology and the additional literature.

The position of this book in the English Bible accords with that of the Septuagint, it being very properly inserted between Judges and 1 Samuel as essentially a supplement to the former and an introduction to the latter, for though Eli and Samuel as the immediate precursors of the kings occupy a place in 1 Samuel, the book of Ruth forms a connecting link between the period of the judges and that of the monarchy. If Obed the son of Boaz was the father of Jesse (iv. 121) the events which the book of Ruth relates must have taken place in the last century of the age of the judges. The arrangement in our ordinary Hebrew Bibles at present places this history, without any regard to the chronology, among the hagiorophus or sacred writings (Psalms, Proverbs, Job, Solomon’s Song, Ruth, Lamentations, Ecclesiastes, Esther, Daniel, Ezra, Nehemiah, Chronicles), so classified with reference 1: their ethical or practical contents. [Canon.] Yet some critics maintain that the original Hebrew order was that of the Septuagint and the other a later transposition. (See against that view Cassel, De Bchch Ruth, p. 201 f.)

The date of the composition it is impossible to ascertain with much precision. It must have been written after the birth of David (iv. 17) and probably after his reign; for the genealogy at the close presupposes that he had acquired at the time a historical and theoretical importance which belonged to him only after he had finished his career as warrior, king, and prophet. It is no certain proof of a much later authorship than this that the custom of “plucking off the shoe” as a legal form had become obsolete when the book was written (iv. 7, 8), for many changes in the life of the Hebrews must have taken place rapidly after the establishment of the monarchy, and in addition to this, if Boaz was the immediate ancestor of Obed, and Obed was the father of Jesse (iv. 17) an interval of three generations at least lay between Boaz and the close of David’s reign. Some critics point out certain words and grammatical forms in the book which they allege to be proof of a later composition, and would even bring it down to the Chaldee period of Jewish history. Examples of this are רָעִים, מָצִיק (iii. 18, 21), יֶבֶל (ii. 9), יֶבֶל יְבֵל, יֶבֶל יְבֵל (ii. 3), יֵבֶל יֵבֶל instead of יֵבֶל יֵבֶל (i. 20), יֵבֶל instead of יֵבֶל, and others, but as these and some other expressions, partly peculiar and partly infrequent only, either do not occur at all in the later books, or occur at the same time in some of the earlier books, they surely cannot be alleged with any confidence as marks of a Chaldee style (see Keil’s Einl. in dos A. Text. p. 415 f., and Wright’s Book of Judges, p. xvi. 3 f.). The few uncommon or foreign words or phrases are found in fact in the passages of our book where the persons introduced appear as the speakers, and not in the language of the historian, and may be considered as relics of the conversational phraseology of the age of the judges, which happen to be not elsewhere preserved. Bleek decides in like manner that the language of the book settles nothing with regard to the time when the book was written. The earlier origin of the book of Ruth, as De Wette admits (Einl. in dos A. Text. § 194), is manifest from the entire absence of any repugnance to intermarriage between the Hebrews and foreigners. The extraction of Ruth is not regarded as offensive or repugnant so much as a single word of apology. It is impossible on this account that it should belong to the time of Ezra and Nehemiah, when so different a feeling prevailed in regard to such alliances (see Ezra ix. and x. and Neh. xiii. 22 ff.). The author is unknown. One of the Jewish traditions names Samuel as the writer: but, as has been suggested already, David was comparatively unknown till after the death of Samuel.

With regard to the sources of the history we can only say with Bleek (Einl. in dos A. Text. p. 555): that we cannot decide whether the writer found and used an extant written document or merely followed some tradition preserved in the family of David which came to his knowledge. Nothing in the significance of the personal Hebrew names casts any doubt on the truthfulness of the narrative. Out of all the names occurring there only two, Mahlon and Chilion, give the least semblance of truth to that allegation. The correspondence between the meaning of the terms (as usually defined)
and the early death of the persons who bear them, may be accidental, or the original names may have been changed after their death. On this point see Chilton and Names (Amer. ed.).

The object of the book has been variously stated. That the author merely intended to uphold the authority of the levirate law requiring a brother-in-law to marry the widow of a deceased brother (Gen. xxxviii. 8; Deut. xxv. 5 ff.) is entirely improbable; for the assumption of that relationship appears here only as an incident of the history, and in reality Boaz was not the brother of Mahlon, the husband of Ruth (v. 10), but only a remote kinsman of the family, and his action in the case was voluntary and not required by any Mosaic statute. It regard also the object as merely that of tracing the genealogy of David's family is certainly too limited a view. We must find the explanation of the purpose in the facts themselves which the history relates, and the narrator's manifest interest in precisely these facts as shown in the tone and coloring which he has given to the history. It is the pious, genuinely theocratic spirit exhibited by the author in the little book, which confers upon it its higher importance and characteristic unity. This aim and tendency appear most conspicuously in ii. 11, 12. Ruth has left her heathen native land; the God of her mother-in-law is her God (i. 16). She has gone to an unknown people, has taken refuge under the wings of the God of Israel, has looked to Him for help, and has found more than she could expect or conceive of in being permitted to become the mother of the royal house of David. (See Hievernink's Einl. in des A. Test. ii. 113.) The fact that Matthew (i. 5-6), who adds however the names of Thamar and Rahab, and Luke (iii. 31-35) insert the genealogy of David as given at the end of the book in the tables of the genealogy of Christ, not only shows that the book of Ruth formed a recognized part of the Hebrew Scriptures, but that God's arrangements in providing a Saviour for all the races of mankind held forth a significant foreshadowing of this universality in the character of the Saviour's lineage as derived from gentle ancestors as well as Jewish. David's descent from Ruth is known to us only from this book. The books of Samuel are silent on this point, and Chronicles though they mention Boaz says nothing of his, as one of his ancestors, say nothing of Ruth (1 Chr. iii. 11, 12).

The illustrations of oriental life furnished by modern travellers impart to this book a character of vividness and reality which deserves attention. Naomi and Ruth arrived at Beth-lehem from the land of Moab "in the beginning of barley harvest" (v. 2). It was about the first of April, therefore, for the cereal crops are generally ripe in the south of Palestine at that time. Beth-lehem, which signifies "house of bread" with reference to its fertility, is still famous for its fields of grain, which occur especially on the plains eastward as one approaches from the valley of the Jordan. Such fields now, as was truly ancient, are not enclosed by hedges, but the first by single stones set up here and there, or by a footpath only; and hence it is said that it was "the hop" or lot of Ruth to light upon the part of the field which belonged to Boaz (ii. 3). Notice the local precision of the narrator. To reach the grain-fields or threshing-floor from her home in Beth-lehem Ruth went down" from the city (iii. 3, 6); for Beth-lehem is on higher ground than the adjacent region, and especially on the south and east side is almost precipitously cut off from its environs. The gleanings after the reapers (ii. 3, 7, 16) was allowed to the poor among the Hebrews (a right guaranteed by an express Mosaic statute), and is still practiced in the East. Dr. Thomson being in the vicinity of Beth-lehem at the time of a barley-harvest states that he saw women and children gleanng after every company of reapers (Land and Book, ii. 509). The "parceled corn" which Boaz gave her at their rustic repast was not so much in the sense of the expression, but consisted of roasted heads of grain. The mode of preparing the food we learn from the methods still employed. Mr. Tristram describes one of them which he saw in Galilee near Lake Hulch. "A few sheaves of winnowed straw were tossed on the fire, and as soon as the straw was consumed the charred heads were dexterously swept from the embers on to a cloth spread on the ground. The women of the party then beat the ears and tossed them into the air until they were thoroughly winnowed, when the wheat was eaten without further preparation. The green ears had become half charred by the heat of the rays, and there was a pleasant smoky flavor of milky wheat and a fresh crust flavor as we chewed the parceled corn" (Land of Israel, p. 590). According to another method some of the best ears, with the stalks attached, are tied into small parcels, and the corn-heads are held over the fire until the chaff is mostly burned off; and after being thus roasted, they are rubbed out in the hand and the kernels eaten (Thomson, p. 510). The Hebrew terms for corn thus roasted are סינוס and סיסוס (Lev. xxiii. 14; Ruth ii. 14; 1 Sam. xvii. 11, xxv. 18; and 2 Sam. xviii. 18).

The chomets or vinegar in which the eaters dipped their meal (ix. 14) was sour wine mingled with oil, still a favorite beverage among the people of the East (see Keil's Bild. Archäologie, ii. 15). At the close of the day Ruth beat out the grain of the ears which she had gathered (iii. 17). It is a common sight now," says Thomson, "to see a poor woman or maiden sitting by the way-side and beating out with a stick or stone the grain-stocks which she has gleaned" (Land and Book, ii. 509). As late as 1855, Mr. Thomson states that he found the lazy inhabitants still engaged in treading out the barley harvest, which their neighbors had completed long before. Several women were beating out with a stick handful of the grain which they seemed to have gleaned" (Bibl. Res. ii. 358).

In another field the next day he saw 200 reapers and gleaners at work; a few were taking refreshments and offered us some of their parceled corn" (Bibl. Res. iii. 394). The winnowing took place by night in accordance with the agricultural habits of the land at present; for the heat being oppressive by day the farmers avoid its power as much as possible, and the wind also is apt to be stronger by night than during the day. The Hebrew term (גֵרָשׁ) describes the threshing-floor as simply a plot of ground in the open air, smoothed off and beaten hard, such as the traveller now sees everywhere as he passes through the country. It might seem strange that a rich proprietor, like Boaz, should be said to have slept at night in such a place; but that is the custom still, rendered necessary by the danger of pilage and the untrostworthiness of the hired laborers. Robinson, speaking of a night spent in the mountains of Hebron.
EYE

says: "Here are needed no guards around the tent; the owners of the crops came every night and slept upon their threshing-floors. We were here in the midst of scenes precisely like those of the book of Ruth (iii. 2–14); where Boaz winnowed barley and laid himself down at night to guard the heap of corn." (Bibl. Res. ii. 416). "It is not usual for the husband, wife, and all the family to encamp at the threshers or threshing-floors, until the harvest is over" (Thomson, ii. 511). The "vail" in which Ruth carried home the "six measures of barley" given her by Boaz, was a much as well as veil, "a square piece of cotton cloth," such as eastern women still wear: "and I have often seen it used," says Thomson, "for just such service as that to which Ruth applied hers" (ii. 509). Barley is rarely used for purposes of food in Syria except by the poor; and that Ruth and Naomi are represented as glad to avail themselves of such means of subsistence comports with the condition of poverty which the narrative ascribes to them. [BARLEY] The scene in the square at the gate (iv. 1–12) is thoroughly oriental. It is hardly necessary to say that the gate in eastern cities is now and has been from time immemorial the place of concourse where the people come together to hear the news, to discuss public affairs, to make love, dispense justice, or engage in anything else pertaining to the common welfare (Tec. xix. 1, xxxiii. 20; Deut. xvi. 18; xxi. 19).

RABBERTON (7375), gen. mas: 7376, femin: 7379, masc; rabbeth: [Heb. rabbith] occurs in Ex. ix. 32; Is. xxviii. 25: In the latter the margin reads "spelt." In Ez. iv. 9 the text has "Ethkes" and the margin "ree." There are many opinions as to the signification of rabbeth; some authorities maintaining that thecches are denoted, others oats, and others rye. Celsius has shown that in all probability "spelt" is intended (Hercob. ii. 98), and this opinion is supported by the LXX. and the Vulg. in Ez. iv. 32, and by the Syriac versions. Rye is for the most part grown in the northern part of the United States, and was not probably cultivated in Egypt or Palestine in early times, whereas spelt has been long cultivated in the East, where it is held in high estimation. Herodotus (ii. 36) says the Egyptians "make bread from spelt (τρεης dαηυελαίας), which some call zos." See also Pliny (H. N. xviii. 8), and Dioscorides (ii. 111), who speaks of two kinds. The cersaweth was cultivated in Egypt; it was not injured by the hailstorm of the seventh plague (Ex. l. c.), as it was not grown up. This cereal was also sown in Pal estine (Is. l. c.), on the margins or "headlands" of the fields (737775): it was used for mixing with wheat, barley, etc., for making bread (Ex. l. c.). The Arabic, Chirawmat, "spelt," is regarded by Gesenius as identical with the Hebrew word, and n being interchanged and z inserted. "Spelt" (Triticum spelti) is grown in some parts of the south of Germany; it differs but slightly from our common wheat (T. vulgare). There are three kinds of spelt, namely, T. spelta, T. dicoc- cum (rice wheat), and T. monococcum. [Rye, Amer. ed.] W. H.

S.

SAVOATH, THE LORD OF (Κηρος σα- 
BaaSath: Dominus Sabaoth). The name is found in the English Bible only twice (Rom. ix. 29; James v. 4). It is probably more familiar through its occurrence in the Septuagint of the Te Deum a... "Holy, Holy, Holy, Lord God of Sabaoth." It is too often considered to be a synonym of, or to have some connection with Sabbath, and to express the idea of rest. And this not only popularly, but in some of our most classical writers. Thus Spenser, Faery Queen, canto viii. 2—

"But thereforforth all shall rest eternally"

With Him that is the God of Sabaoth'sight.

And Bacon, Advancement of Learning, ii. 24—

"... sacred and inspired Divinity, the Sabaoth and port of all men's labors and peregrinations" And Johnson, in the 1st edition of whose Dictionary (1755) Sabaoth and Sabaoth are treated as the same word. And Walter Scott, Irioch.e, ch. 11 (1st ed.): — "a week, aye the space between two Sabaoths. But this connection & fictitious meaning The two words are not only entirely different, but have nothing in common.

Sabaoth is the Greek form of the Hebrew word, tsebeth, "armies," and occurs in the oft-repeated formula which is translated in the Authorized Version of the Old Test. by "Lord of hosts," or "Lord God of hosts." We are apt to take "hosta" (probably in connection with the modern expression the "heavenly host") as implying the angels— but this is surely inaccurate. Tsebeth is in constant use in the O. T. for the national army or force of fighting-men; and there can be no doubt that in the mouth and the mind of an ancient Hebrew, a warhoftsebath was the leader and commander of the armies of the nation. He went forth with them" (Ps. xlv. 9), and led them to certain victory over the worshippers of Bal, Chemosh, Mo- lech, Asharoth, and other false gods. In later times it lost this peculiar significance, and became little if anything more than an alternative title for God. The name is not found in the Pentaech,
SABBATH or the books of Joshua, Judges, or Ruth. It is frequent in the books of Samuel, rarer in Kings, is found twice only in the Chronicles, and not at all in Ezekiel; but in the Psalms, in Isaiah, Jeremiah, and the minor Prophets it is of constant occurrence, and in fact is used almost to the exclusion of every other title. [TSVAYOTH, 2nd ed.] G.

SABBATH (סבת, and therefore סבתא, and therefore סבתא) [A.V. ed. 1611, SABATE'US] Phænomen. 1. The sons of Sabat are enumerated among the sons of Solomon's servants who returned with Zerubabel (1 Esdr. v. 34). There is no corresponding name in the lists of Ezra and Nehemiah.

2. (Sabbath.) The month Sabat (1 Mac. xvi. 14).

SAB'ATUS (SABBATOS; [Ald. SABBATOS;] Zoph-dia.) ZARAD (1 Esdr. ix. 28; comp. Ezr. x. 27).

SABBAN (SABBaes; Baniui. BNXU I (1 Esdr. viii. 63; comp. Ezr. xii. 23). SABBATH (סבת, “a day of rest,” from Sabbath, “to cease to do,” “to rest”).) This is the obvious and undeniable etymology. The resemblance of the word to Sabbath, “seven,” misled Lacantius (Inst. iii. 14) and others; but it does not seem more than accidental. Bähr (Symbolik, ii. 533-34) does not reject the derivation from Sabbath, but traces that to Sabbath, somewhat needlessly and facetiously, as it appears to us. Plutarch's association of the word with the Biblical Sabbath, may of course be dismissed at once. We have also (Ex. xvi. 23) and (Lev. xxiii. 24) Sabbath, of more intense signification than Sabbath: also Sabbath, “a Sabbath of Sabbaths” (Ex. xxi. 15, and elsewhere). The name Sabbath is thus applied to divers great festivals, both principally and usually to the seventh day of the week, the strict observance of which is enforced not merely in the general Mosaic code, but in the Deodogate itself.

The first Scriptural notice of the weekly Sabbath, though it is not mentioned by name, is to be found in Gen. i. 3, where the close of the record of the six days' creation, and hence it is frequently argued that the institution is as old as mankind, and is consequent of universal command and obligation. Without, however, approach this question till we have examined the account of its enforcement upon the Israelites. It is in Ex. xvi. 23-29 that we find the first incontrovertible institution of the day, as such, and as it is to be kept by the children of Israel. Shortly afterwards it was reinaugurated in the Fourth Commandment, which gave it a rank above that of an ordinary law, making it one of the signs of the Covenant. As such it remained together with the Passover, the two forming the most solemn and distinctive features of Hebrew religious life. Its neglect or profanation ranked foremost among national crimes; the removed observance of it was sure to accompany national reformation.

Before, then, dealing with the question whether

a Vide Patrick in loc., and Selden, De Jure Nat. et Gent. iii. 9.

b Vide Grotius in loc., who refers to Aben-Ezra.

SABBATH its original institution comprised mankind at large, or merely stamped on Israel a very marked badge of nationality, it will be well to trace somewhat of its position and history among the chosen people.

Many of the Rabbis date its first institution from the incident "recorded in Ex. xxv. 25; and believe that the "statute and ordinance" there mentioned as being given by God to the children of Israel was that of the Sabbath, together with the commandment to honor father and mother, their previous law having consisted only of what are called the "seven precepts of Noah." This, however, seems to want foundation of any sort, and the statute and ordinance is always, we think, something else. The man enjoined by the words of ver. 26, "If thou wilt diligently hearken," etc. We are not on sure ground till we come to the unmistakable institution in ch. xvi. in connection with the gathering of manna. The words in this latter are not in themselves enough to indicate whether such institution was altogether a novelty, or whether it referred to a day the sanctity of which was already known to those to whom it was given. There is plausibility certainly in the opinion of Grothus, that the day was already known, and in some measure observed as holy, but that the rule of abstinence from work was first given then, and shortly afterwards more explicitly imposed in the Fourth Commandment. This, therefore, is the Sabbath itself to the whole of an Israelite's household, his son and his daughter, his slaves, male and female, his ox and his ass, and the stranger within his gates. It would seem that by this last was understood the stranger who while still uncircumcised yet worshiped the true God; for the mere heathen stranger was not considered to be under the law of the Sabbath. In the Fourth Commandment, too, the institution is grounded on the revealed truth of the six days' creation and the Divine rest on the seventh: but in the version of it which we find in Deuteronomy a further reason is added: "And remember that thou wast a stranger in the land of Egypt, and that the Lord thy God brought thee forth with a mighty hand and by a stretched out arm: therefore the Lord thy God commanded thee to keep the Sabbath day." (Deut. v. 15).

Penalties and provisions in other parts of the Law constitute the abstinence from labor prescribed in the commandment. It was forbidden to light a fire, a man was stoned for gathering sticks, on the Sabbath. At a later period we find the Prophet Isaiah uttering solemn warnings against profaning, and promising large blessings on the due observance of the day (Is. lvii. 13, 14). In Jeremiah's time there seems to have been a habitual violation of it, amounting to transacting on it such an extent of business as involved the carrying burdens about (Jer. xvii. 21-27). His denunciations of this sin have come to lead the Pharisees in their bondage to the letter to condemn the impotent man for carrying his bed on the Sabbath in obedience to Christ who had healed him (John v. 10). We must not suppose that our Lord prescribed a real violation of the Law; and it requires little trouble to distinguish between such a natural and almost necessary action as that which He commanded; and the carrying of burdens in connection with business which is denominated by Jeremiah. By Ezekiel (xx. 12-24), a passage to which we must shortly return, the profanation of the Sabbath is made foremost among the national sins of the Jews. From Nehemiah x. 31, we learn that the people enters
into a covenant to renew the observance of the Law, in which they pledged themselves neither to buy nor sell victuals on the Sabbath. The practice was then not infrequent, and Nehemiah tells us (xiii. 15-22) of the successful steps which he took for its stoppage.

Henceforward there is no evidence of the Sabbath being neglected by the Jews, except as (1 Macc. i. 11-15, 20-45) went into open apostasy. The faithful remnant were so scrupulous concerning it, as to forbear fighting in self-defense on that day (1 Macc. ii. 36), and it was only the terrible consequences that ensued which led Mattathias and his friends to decree the lawfulness of self-defense on the Sabbath (1 Macc. ii. 41).

When we come to the N. T. we find the most marked stress laid on the Sabbath. In whatever way the Jews might err respecting it, he laid altogether ceased to neglect it. On the contrary, wherever he went its observance became the most visible badge of his nationality. The passages of Latin literature, such as Ovid, Art. Amor., i. 415, Juvenal, Sat. xiv. 96-106, which indicate this, are too well known to require citation. Our Lord's processional entry on the Sabbath was one of the main features of his life, which his Pharisaic adversaries most eagerly watched and criticised. They had by that time invented many of those fantastic prohibitions whereby the letter of the commandment seemed to be honored at the expense of its whole spirit, dignity, and value: and our Lord, coming to vindicate and fulfill the Law in its real scope and intention, must needs come into collision with these.

Before proceeding to any of the more curious questions connected with the Sabbath, such as that of its alleged pre-Mosaic origin and observance, it will be well to consider and determine what were its true ideas and purpose in that Law of which beyond doubt it formed a leading feature, and among that people for whom, if for none else, we know that it was designed. And we shall do this with most advantage, as it seems to us, by pursing the inquiry in the following order: —

1. By considering, with a view to their elimination, the Pharisaic and Rabbinical prohibitions. These we have the highest authority for rejecting, as inconsistent with the true spirit and purpose of the Law.

2. By taking a survey of the general Sabbatical periods of Hebrew time. The weekly Sabbath stood in the relation of key-note to a scale of Sabbatical observance, mounting to the Sabbatical year and the year of Jubilee. It is but reasonable to suspect that these can in some degree interpret each other.

III. By examining the actual enactments of Scripture respecting the seventh day, and the mode in which such observance was maintained by the best interpreters.

1. Nearly every one is aware that the Pharisaic and Rabbinical schools invented many prohibitions respecting the Sabbath of which we find nothing in the original institution. Of these some may have been legitimate enforcements in detail of that institution, such as the Scribes and Pharisees "sitting in Moses' seat" (Matt. xxiii. 2, 3) had a right to impose. How a general law is to be carried out in particular cases, must often be determined for others by such as have authority to do so. To this class may belong the limitation of a Sabbath-day's journey, a limitation not absolutely at variance with the fundamental canon that the Sabbath was made for man, not man for the Sabbath, although it may have proceeded from mistaking a temporary enactment for a permanent one. Many, however, of these prohibitions were fantastic and arbitrary, in the number of them "heavy burdens and grievous to be borne," which the later exponents of the Law "laid on men's shoulders." We have seen that the important man's carrying his bed was considered a violation of the Sabbath — a notion probably derived from Jeremiah's warnings against the commercial traffic carried on at the gates of Jerusalem in his day. The harmless act of the disciples in the corn-field, and the beneficial healing of the man in the synagogue with the withered hand (Matt. xii. 1-13), were alike regarded as breaches of the Law. Our Lord's reply in the former case will come before us under our third head; in the latter He appeals to the practice of the objectors, who would any one of them raise his own sheep out of the pit into which the animal had fallen on the Sabbath-day. For this appeal, we are forced to infer that such practice would have been lawful at the time and place in which He spoke. It is remarkable, however, that we find it prohibited in other traditions, the law laid down being, that in this case a man might throw some needful nourishment to the animal, but must not pull him out till the next day. (See Heylin, Hist. of Sabbath, i. 8, quoting Buxtorf.) This rule possibly came into existence in consequence of our Lord's appeal, and with a view to warding off the necessary inference from it. Still more fantastic prohibitions were issued. It was unlawful to catch a fowl on the Sabbath, except the insect were actually hurting his assailant, or to mount into a tree, lest a branch or twig should be broken in the process. The Samaritans were especially rigid in matters like these: and Josi- theus, who founded a sect amongst them, went so far as to maintain the obligation of a man's remaining throughout the Sabbath in the posture wherein he chanced to be at its commencement — a rule which most people would find quite destructive of its character as a day of rest. When minds were occupied with such micromania, as this has been well called, there was obviously no limit to the number of prohibitions which they might derive, confusing, as they obviously did, absence from action of every sort with rest from business and labor.

That this perversion of the Sabbath had become very general in our Saviour's time is apparent both from the recorded objections to acts of his on that day, and from his marked conduct on occasions to which these objections were sure to be urged. There is no reason, however, for thinking that the Pharisees had arrived at a sentence against pleasure of every sort on the sacred day. The duty of hospitality was remembered. It was usual for the rich to give a feast on that day; and our Lord's attendance at such a feast, and making it the occasion of putting forth his rules for the demeanour of guests, and for the right exercise of hospitality, show that the gathering of friends and social enjoyment were
not deemed inconsistent with the true scope and spirit of the Sabbath. It was thought right that the means, though cold, should be of the best and choicest, nor might the Sabbath be chosen for a fast.

Such are the inferences to which we are brought by our Lord's words concerning, and works on, the sacred day. We have already protested against the notion which has been entertained that they were breaches of the Sabbath intended as harbinger's of its abolition. Granting for argument's sake that such abolition was in prospect, still our Lord, " making no doubt that they would have violated any part of it so long as it was Law. Nor can any thing be inferred on the other side from the Evangelist's language (John v. 18). The phrase "He had broken the Sabbath," obviously denotes not the character of our Saviour's act, but the Jewish estimate of it. He had broken the Pharisaic rules respecting the Sabbath. Similarly his own phrase, "the priests profane the Sabbath and are blameless," can only be understood to assert the lawfulness of certain acts done for certain reasons on that day, which, taken in themselves and without those reasons, would be profanations of it. There remains only his appeal to the eating of the shewbread by David and his companions, which was no doubt in his mind a breach of the Law. It does not follow, however, that the act in justification of which it is appealed to was such a breach. It is rather, we think, an argument of futuris, to the effect, that if even a positive law might give place on occasion, much more might an arbitrary rule like that of the Rabbis in the case in question.

Finally, the declaration that "the Son of Man is Lord also of the Sabbath," must not be viewed as though our Lord held Himself free from the Law respecting it. It is to be taken in connection with the preceding words, "the Sabbath was made for man," etc., from which it is an inference, as is shown by the adverb therefore; and the Son of Man is plainly speaking of Himself as the Man, the Representative and Exemplar of all mankind, and teaching us that the human race is lord of the Sabbath, the day being made for man, not for the day.

It, then, our Lord, coming to fulfill and rightly interpret the Law, did thus protest against the Pharisaical and Rabbinical rules respecting the Sabbath. We are supplied by this protest with a large negative view of that ordinance. The acts condemned by the Pharisees were not violations of it. Mere action, as such, was not a violation of it, and far less was a work of healing and beneficence. To this we shall have occasion by and by to return. Meanwhile we must try to gain a positive view of the institution, and proceed in furtherance of this to our second head.

2. The Sabbath, as we have said, was the keynote to a scale of Sabbatical observance—consisting of itself, the seventh month, the seventh year, and the year of Jubilee. As each seventh day was sacred, so was each seventh month, and each seventh year. Of the observances of the seventh month, little needs be said. That month opened with the Feast of Trumpets, and contained the Day of Atonement and Feast of Tabernacles—the last named being the most joyful of Hebrew festivals. It is not apparent, nor likely, that the whole of the month was to be characterized by cessation from labor; but it certainly has a place in the Sabbatical scale. Its great centre was the Feast of Tabernacles or Ingathering, the year and the year's labor having then done their work and yielded their issues. In this last respect its analogy to the weekly Sabbath is obvious. Only at this part of the Sabbatical cycle do we find any notice of humiliation. On the Day of Atonement the people were to afflict their souls (Lev. xxiii. 27-29).

The rules for the Sabbatical year are very precise. As labor was prohibited on the seventh day, so the land was to rest every seventh year. And as each seventh year was seven of such weeks of years, so it either was itself, or it ushered in, what was called the year of Jubilee.

In Exodus xxiii. 10, 11, we find, the Sabbatical year placed in close connection with the Sabbath-day, and the words in which the former is prescribed are analogous to those of the Fourth Commandment: "Six years thou shalt sow thy land and gather in the fruits thereof; but the seventh year thou shalt let it rest and lie still; that the poor of thy people may eat: and that they may feed the beasts of the field.

This is immediately followed by a renewed proclamation of the law of the Sabbath, "Six days thou shalt do thy work, and on the seventh day thou shalt rest: that thy soul may have rest, and be replenished, after the labor of six days. In like manner, it is impossible to avoid perceiving that in these passages the two institutions are put on the same ground, and are represented as quite homogeneous. Their aim, as here exhibited, is eminently a beneficent one. To give rights to classes that would otherwise have been without such, to the bondman and to the stranger, and to the beast of the field, is viewed here as their main end. "The stranger," too, is comprehended in the benefit. Many, we suspect, while reading the Fourth Commandment, merely regard him as subjected, together with his host and family, to a prohibition. But if we consider how continually the stranger is referred to in the enactments of the Law, and that with a view to his protection, the instances being one and twenty in number, we shall be led to regard his inclusion in the Fourth Commandment rather as a benefit conferred than a prohibition imposed on him.

The same beneficent aim is still more apparent in the fuller legislation respecting the Sabbatical year which we find in Lev. xxv: 2-7. "When ye come into the land which I give you, then shall the land keep a sabbath unto the Lord. Six years shall thou sow thy field, and six years thou shalt prune thy vineyard, and gather in the fruit thereof; but in the seventh year shall a sabbath of rest unto the land, a sabbath unto the Lord; thou shalt neither sow thy field nor prune thy vineyard. The land shall have a sabbath of rest unto the Lord. The seventh year shall be accounted a sabbath of rest for the land; the land shall rest, and give you rest.

We may therefore infer that the year, when the land were at rest, was observed by the people as a time of benevolence, the gleanings of the harvest being collected for the poor. In this year, too, it was incumbent on the Israelites to observe a special feast.
SABBATH

his God; his land was not his own but God's (Lev. xxv, 23), as was shown by the Sabbath of each seventh year, during which it was to have rest, and all individual right over it was to be suspended. It was also to be the year of release from debt (Deut. xxv). We do not reach much of the way in which, or the extent to which, the Hebrews observed the Sabbath, or to the reference to it which has been much neglected previous to the Captivity, but it was certainly not lost sight of afterwards, since Alexander the Great allowed the Jews from paying tribute on it, their religion debarring them from acquiring the means of doing so. [SABBATHICAL YEAR.]

The year of Jubilee must be regarded as completing this Sabbatical scale, whether we consider it as really the forty-ninth year, the seventh of a week of Sabbatical years, or the fiftieth, a question on which opinions are divided. [JUBILEE, YEAR OF.] The difficulty in the way of deciding for the latter, that the land could hardly bear enough spontaneously to suffice for two years, seems disposed of by reference to Isaiah xxxvii. 30. Adopting, therefore, that opinion as the most probable, we must consider each week of Sabbatical years to have ended in a double Sabbatical period, to which, moreover, increased emphasis was given by the peculiar enactments respecting the second half of such period, the year of Jubilee. These enactments have been already considered in the article just referred to, and throw further light on the beneficent character of the Sabbatical Law. 111. We must consider the actual enactments of Scripture respecting the seventh day. However homogeneous the different Sabbatical periods may be, the weekly Sabbath is, as we have said, the tonic or key-note. It alone is prescribed in the Decalogue, and it alone has in any shape survived the earthly commonwealth of Israel. We must still postpone the question of its observance by the patriarchs, and commence our inquiry with the institution of it in the wilderness, in connection with the gathering of manna (Ex. xvi. 23). The prohibition to gather the manna on the Sabbath is accompanied by one to look or to search on that day, and by a warning, “in order to the generality, all manner of work,” and, seeing that action of one kind or another is a necessary accomplishment of waking life, and cannot therefore in itself be intended, as the later Jews imagined, by the prohibition, we are left to seek elsewhere for the particular application of the general principle. That general principle in itself, however, obviously embraces an abstinence from worldly labor or occupation, and from the enforcing on such servants or dependents, or on the stranger. By him, as we have said, is most probably meant the partial proselyte, who would not have received much consideration from the Hebrews had they been left to themselves, as we must infer from the numerous laws enacted for his protection. Had man been then regarded by him as made for the Sabbath, not the Sabbath for man, that is, had the prohibitions of the commandment been viewed as the putting on of a yoke, not the conferring of a privilege, one of the dominant race would probably have felt no reluctance to placing such a stranger under the Yoke. But reference in the commandment helps to interpret its whole principle, and testifies to its having been a beneficial privilege for all who came within it. It gave rights to the slave, to the despised stranger, even to the ox and the ass.

This beneficent character of the Fourth Commandment is very apparent in the version of it which we find in Deuteronomy: “Keep the Sabbath-day to sanctify it, as the Lord thy God hath commanded thee. Six days thou shalt labor and do all thy work: but the seventh day is the Sabbath of the Lord thy God: in it thou shalt not do any work, thou, nor thy son, nor thy daughter, nor thy bondman, nor thy bondwoman, nor thine ox, nor thine ass, nor thy stranger that is within thy gates: that thy bondman and thy bondwoman may rest as well as thou. And remember thou what the Lord thy God brought thee out through a mighty hand and by a stretched-out arm: therefore the Lord thy God commanded thee to keep the Sabbath-day” (Deut. v. 12-15). But although this be so, and though it be plain that to come within the scope of the commandment was to possess a franchise, to share in a privilege, yet does the original pronunciation of it in Exodus place it on a ground which closely connected no doubt with these others, is yet higher and more comprehensive. The divine method of working and rest is there proposed to man as the model after which he is to work and to rest. Time then presents a perfect whole, is then well rounded and entire, when it is shaped into a week, modeled on the six days of creation and their following Sabbath. Six days’ work and the seventh day’s rest conform the life of man to the method of his Creator. In distributing his life thus, man may look up to God as his Archetype. We need not suppose that the Hebrew, even in that early stage of spiritual education, was limited by so gross a conception as that of God working and then resting, as if needing rest. The idea awakened by the record of creation and by the Fourth Commandment is that of work that has a consummation, perfect in itself and coming to a perfect end; and man’s work is to be like this, not aimless, indefinite, and incessant, but having an issue on which he can repose, and see and rejoice in its fruits. God’s rest consists in this, seeing that all which He has made is very good: and man’s works are in their measure and degree very good when a six days’ faithful labor has its issue in a seventh of rest after God’s pattern. It is most important to remember that the Fourth Commandment is not limited to a mere enactment respecting one day, but prescribes the due distribution of a week, and ensures the six days’ work as much as the seventh day’s rest.

This higher ground of observance was felt to invest the Sabbath with a theological character, and rendered it the great witness for faith in a personal and creating God. Hence its supremacy over all the Law, being sometimes taken as the representative of it all (Neh. ix. 14). The Talmud says that “the Sabbath is in importance equal to the whole Law;” that “he who désertes the Sabbath openly is like him who transgresses the whole Law;” while Maimonides winds up his discussion of the subject thus: “He who breaks the Sabbath openly is like the worshipper of the stars, and both are like heathens in every respect.”

In all this, however, we have but an assertion of the general principle of resting on the Sabbath, and must seek elsewhere for information as to the
details wherewith that principle was to be brought out. We have already seen that the work forbidden
is not to be confounded with action of every sort. To make this confusion was the error of the later Jews, and their prohibitions would go far to render the Sabbath incompatible with waking life. The terms in the commandment show plainly enough the sort of work which is contemplated. They are הָנָּה and הָנָּה, the former denoting servile work, and the latter business (see Gesenius and reo: 'Michaelis, Laws of Moses, iv. 192). The Pentateuch presents us with but three applications of the general principle. The lighting a fire in any house on the Sabbath was strictly forbidden (Ex. xxv. 3), and a man was stoned for gathering sticks on that day (Num. xv. 32-36). The former prohibition is thought by the Jews to be of perpetual force; but some at least of the Rabbis have held that it applies only to lighting a fire for culinary purposes, not to doing so in cold weather for the sake of warmth. The latter case, that of the man gathering sticks, was perhaps one of more labor and business than we are apt to imagine.

The third application of the general principle which we find in the Pentateuch was the prohibition to go out of the camp, the command to every one of them within his tent (Ex. xvi. 22) on the Sabbath-day. This is so obviously connected with the gathering the manna, that it seems most natural to regard it as a mere temporary enactment for the circumstances of the people in the wilderness. It was, however, afterwards considered by the Hebrews a permanent law, and applied, in the absence of the camp, to the city in which a man might reside. To this was appended the dictum that a space of two thousand ells on every side of a city belonged to it, and to go that distance beyond the walls was permitted as "a Sabbath-day's journey."

The reference of Isaiah to the Sabbath gives us no details. Those in Jeremiah and Nehemiah show that carrying goods for sale, and buying such, were equally prohibitions of the day.

There is no ground for supposing that to engage the enemy on the Sabbath was considered un-kinful before the Captivity. On the contrary, there is much force in the argument of Michaelis ('Laws of Moses, iv. 186) to show that it was not. His reasons are as follows:—

1. The prohibited "יִבְדֶּּה, service, does not even suggest the thought of war.

2. The enemies of the chosen people would have continually selected the Sabbath as a day of rest, had the latter been forbidden to defend themselves then.

3. We read of long-protracted sieges, that of Rabbah (2 Samuel xi, xii.), and that of Jerusalem in the reign of Zedekiah, which latter lasted a year and a half, during which the enemy would certainly have taken advantage of any such slowness from warfare on the part of the chosen people. At a subsequent period we know (1 Macc. ii. 34-38) that the scuffle existed and was acted on with most calamitous effects. Those effects led (1 Macc. ii. 41) to determining that action in self-defense was lawful on the Sabbath, initiatory attack not. The reservation was, it must be thought, nearly as great a misconception of the institution as the overruled scruple. Certainly warfare has nothing to do with the servile labor or the worldly business contemplated in the Fourth Commandment, and is, as regards religious observance, a law to itself. Yet the scruple, like many other scruples, proved a convenience, and under the Roman Empire the Jews procured exemption from military service by means of it. It was not, however, without its evils. In the siege of Jerusalem by Titus (Joseph. Ant. xiv. 4), as well as in the final one by Titus, the Romans took advantage of it, and, abstaining from attack, prosecuted on the Sabbath, without molestation from the enemy, such works as enabled them to renew the assault with increased resources.

So far therefore as we have yet gone, so far as the negative side of Sabbatical observance is concerned, it would seem that servile labor, whether that of slaves or of hired servants, and all worldly business on the part of masters, was suspended on the Sabbath, and the day was a common right to rest and be refreshed, possessed by all classes in the Hebrew community. It was thus, as we have argued, a beneficent institution. As a sign between God and his chosen people, it was also a monitor of faith, keeping up a constant witness, on the ground taken in Gen. ii. 3, and in the Fourth Commandment, for the one living and personal God the sure worshipper, and for the tempted, in opposition to all the cosmogonies of the heathen, that every thing was created by Him.

We must now quit the negative for the positive side of the institution.

In the first place, we learn from the Pentateuch that the morning and evening sacrifice were both doubled on the Sabbath-day, and that the fresh show-bread was then baked, and substituted on the Table for that of the previous week. And this at once leads to the observation that the negative rules, proscribing work, lighting of fires, etc., did not apply to the rites of religion. It became a dictum that there was no Sabbath in holy things. To this our Saviour appeals when He says that the priests in the Temple profane the Sabbath and are blasphemers.

Next, it is clear that individual offerings were not breaches of the Sabbath; and from this doubtless came the feasts of the rich on that day, which were sanctioned, as we have seen, by our Saviour's attendance on one such. It was, we may be pretty sure, a feast on a sacrifice, and therefore a religious act. All around the giver, the poor as well as others, were admitted to it. Yet further, in "cases of illness, and in any, even the remotest danger," the prohibitions of work were not held to apply. The general principle was that "the Sabbath is delivered into your hand, not you into the hand of the Sabbath." (comp. Mark ii. 27, 28.)

We have no ground for supposing that anything like the didactic institutions of the synagogue formed part of the original observance of the Sabbath. Such institutions do not come into being while the matter to which they relate is itself only in process of formation. Expounding the Law presumes the completed existence of the Law, and the removal of the living lawgiver. The assertion of the Talmud that "Moses ordained to the Israel-

--

1 In this light the Sabbath has found a champion in one who would not, we suppose, have paid it much respect in its theological character; we mean no less a person than M. Proudhon (De la Célébration de Dimanche).
SABBATH

that they should read the Law on the Sabbath—
gays, the feasts, and the new moons;” in itself im-
probable, is utterly unsupported by the Pentate-
uch. The rise of such custom in after times is
explainable enough. [SYNOGOGUE.] But from an
early period, if not, as is most probable, from the
very institution, occupation with holy themes was
regarded as an essential part of the observance of
the Sabbath. It would seem to have been an
habitual practice to repair to a prophet on that
day, in order, it must be presumed, to listen to his
teaching (2 K. iv. 23). Certain Psalms too, c. 9
the 124, were composed for the Sabbath, and
probably used in private as well as in the Taber-
acle. At a later period we come upon precepts
that on the Sabbath the mind should be uplifted
to high and holy themes — to God, his character,
his revelations of Himself, his mighty works.
Still the thoughts with which the day was in-
vested were ever thoughts, not of restriction, but
of freedom and of joy. Such indeed would seem,
from Neh. viii. 9-12, to have been essential to the
notion of a holy day. We have more than once
pointed out that pleasure, as such, was never con-
sidered by the Jews a breach of the Sabbath; and
their practice in this respect is often animadver-
ted on by the early Christian Fathers, who taunt them
with abstaining on that day only from what is
good and useful, but indulging in dancing and
luxury. Some of the heathen, indeed, such as
Tacitus, imagined that the Sabbath was kept by
them as a fast, a mistake which might have arisen
from their asliness from cookery on that day,
and perhaps, as Heylin conjectures, from their
postponement of their meals till the more solemn
services of religion had been performed. But
there can be no doubt that it was kept as a feast,
and the phrase hora Sabbatica, which we find in
Sidonius Apollinaris (i. 2), and which has been
thought a proverbial one, illustrates the mode in
which they celebrated it in the early centuries
of our era. The following is Augustine’s descrip-
tion of their practice: “Eoque habituam dies Sab-
bati est; hunc in prae senti tempore odio quodam
cognovimus, qui Apostolos in Judaeis, et hodiernus
in ecclesiis nostris, illius effectum habet Sabbatum.
Vacatio nostra a multis operibus, vacatio illa non
cessat.” [Synagogue.]

Such a state of things inafter times very strictly, however, was
observed.

We have hitherto viewed the Sabbath merely as
a Mosaic ordinance. It remains to ask whether,
first, there be indications of its having been pre-
viously known and observed; and, secondly, whether
it has an universal scope and authority over all
men.

The former of these questions is usually ap-
proached with a feeling of its being connected with
the latter, and perhaps therefore with a bias in
favor of the view which the questioner thinks will
support his opinion on the latter. It seems, how-
ever, to us, that we may dismiss any anxiety as to
the results we may arrive at concerning it. No
doubt, if we see strong reason for thinking that the
Sabbath had a pre-Mosaic existence, we see some-
thing in it that has more than a Mosaic character
and scope. But it might have had such without
an universal authority, unless we are pre-
pared to ascribe to that the prohibition of eating
blood or things strangled. And again, it might
have originated in the Law of Moses, and yet
possess an authority over all men and through all
time. Whichever way, therefore, the second of our questions is
to be determined, we may easily approach the
first without anxiety.

The first and chief argument of those who
maintain that the Sabbath was known before
Moses, is the reference to it in Gen. ii. 2, 3. This
is considered to represent it as coeval with man,
being instituted at the Creation, or at least, as
Lightfoot views the matter, immediately upon the
Fall. This latter opinion is so entirely without
rational ground of any kind that we may dismiss
it at once. But the whole argument is very pre-
carious. We have no materials for ascertaining or
even conjecturing, which was put forth first, the
record of the Creation, or the Fourth Command-
ment. If the latter, then the reference to the
Sabbath in the former is abundantly natural. Had,
indeed, the Hebrew tongue the variety of preterite
tenses of the Greek, the words in Genesis might
require careful consideration in that regard; but as
the case is, no light can be had from grammar;
and on the assumption of these being written after
the Fourth Commandment, their absence, or that
of any equivalent to them, would be really mar-
velous.

The next indication of a pre-Mosaic Sabbath is

SABBATH 2763
been found in Gen. iv. 3, where we read that "in process of time it came to pass that Cain brought of the fruit of the ground an offering unto the Lord." The words rendered in process of time mean literally "at the end of days," and it is contended that they designate a fixed period of days, probably the end of a week, the seventh or Sabbath-day. Again, the division of time into weeks seems recognized in Jacob's courtship of Rachel (Gen. xxix. 27, 28). Indeed the large recognition of that division from the earliest time is considered a proof that it must have had an origin above and independent of local and accidental circumstances, and been imposed on man at the beginning from above. Its arbitrary and fictitious character is appealed to in further confirmation of this. The sacredness of the seventh day among the Egyptians, as recorded by Herodotus, and the well-known words of Hesiod respecting it, have long been cited among those who adopt this view, though neither of them in reality gives it the slightest support. Lastly, the opening of the Fourth Commandment, the injunction to remember the Sabbath-day, is appealed to as proof that that day was already known.

It is easy to see that all this is but a precarious foundation on which to build. It is not clear that the words in Gen. iv. 3 denote a fixed division of time of any sort. Those in Gen. xxix. obviously do, but carry us no further than proving that the week was known and recognized by Jacob and Laban; though it must be admitted that, in the case of time so divided, sacred rites would probably be celebrated on a fixed and statedly recurring day. The argument from the prevalence of the weekly division of time would require more weight to be given to this particular practice than the facts exhibit, to make it a cogent one. That division was unknown to the ancient Greeks and Romans, being adopted by the latter people from the Egyptians, as must be inferred from the well-known passage of Dion Cassius (xxxvii. 18, 19), at a period in his own time comparatively recent; while of the Egyptians themselves it is thought improbable that they were acquainted with such division in early times. The sacredness of the seventh day mentioned by Hesiod, is obviously that of the seventh day, not of the week, but of the month. And even after the weekly division was established, no trace can be found of anything resembling the Hebrew Sabbath.

While the injunction in the Fourth Commandment to remember the Sabbath-day may refer only to its previous institution in connection with the gathering of manna, or may be but the natural precept to keep in mind the rule about to be delivered—a phrase natural and continually recurring in the intercourse of life, as, for example, between parent and child—on the other hand, the peripetia of the Israelites respecting the double supply of manna on the sixth day (Ex. xvi. 22) leads us to infer that the Sabbath for which such extra supply was designed was not then known to them. Moreover the language of Ezekiel (xxix.) seems to designate it as an ordinance distinctively Hebrew and Mosaic.

We cannot, then, from the uncertain notices which we possess, infer more than the weekly division of time was known to the Israelites and others before the Law of Moses. [Week.] There is probability, though not more, in the opinion of Justinus, that the seventh day was deemed sacred to religious observance; but that the Sabbatical observance of it, the cessation from labor, was superinduced on it in the wilderness.

But to come to our second question, it by no means follows, that even if the Sabbath were no older than Moses, its scope and obligation are limited to Israel, and that itself belongs only to the obsolete enactments of the Levitical Law That law contains two elements, the code of a particular nation, and commandments of human and universal character. For it must not be forgotten that the Hebrew was called out from the world, not to be a mere special people, but a far wider footing than the children of earth; that he was called out to be the true man, bearing witness for the destiny, exhibiting the aspect, and realizing the blessedness, of true manhood. Hence, we can always see, if we have a mind, the difference between such features of his Law as are but local and temporary, and such as are human and universal. To which class belongs the Sabbath, viewed simply in itself, as a question which will soon come before us, and one which does not appear hard to settle. Meanwhile, we must inquire into the case as exhibited by Scripture.

And here we are at once confronted with the fact that the command to keep the Sabbath forms part of the Ten Commandments, that the precept had a rank and authority above the other enactments of the Law, is plain to the most cursory readers of the Old Testament, and is indicated by its being written on the two Tables of the Covenant. And though even the Decalogue is affected by the New Testament, it is not so in the way of repeal or obliteration. It is raised, transformed, glorified there, but staid by Christians, though whether in the letter, or in some large spiritual sense and scope, is a question which still remains.

The phenomena respecting the Sabbath presented by the New Testament are, 1st, the frequent reference to it in the four gospels; and 2dly, the silence of the epistles, with the exception of one place (Col. ii. 16, 17), where its repeal would seem to be asserted, and perhaps one other (Heb. iv. 9).

1st. The references to it in the four gospels are, it needs not be said, numerous enough. We have already seen the high position which it took in the minds of the Rabbi, and the strange code of prohibitions which accompanied it. The consequence of this was, that no part of our Saviour's teaching and practice would seem to have been so eagerly and narrowly watched as that which related to the Sabbath. He seems even to have directed attention to this, thereby intimating surely that on the one hand the misapprehension, and on the other the true fulfillment of the Sabbath were matters of deepest concern. We have already seen the kind of prohibitions against which both his teaching and practice were directed; and his two pregnant declarations, "The Sabbath was made for man, not man for the Sabbath," and "My Father worketh hitherto, and I work," surely
SABBATH

exhibit to us the Law of the Sabbath as human and universal. The former sets it forth as a privilege and a blessing, and were we therefore to suppose it absent from the provisions of the covenant of grace, we must suppose that covenant to have stinted man of something that was made for him, something that conduces to his well-being. The latter wonderfully exhorts the Sabbath by referring it, even as do the record of creation and the Fourth Commandment, to God as its archetype; and in showing us that the repose of God does not exclude work—manifest as much as God opens his hand daily and filleth all things living with plenteousness—shows us that the rest of the Sabbath does not exclude action, which would be but a death, but only that week day action which requires to be wound up in a rest that shall be after the pattern of his, who, though He has rested from all the work that He hath made, yet 'worketh hitherto'.

2dly. The epistles, it must be admitted, with the exception of one place, and perhaps another to which we have already referred, are silent on the subject of the Sabbath. No rules for its observance are ever given by the Apostles—its violation is never denounced by them. Sabbath-breakers are never included in any list of offenders. Col. ii. 16, 17, seems a far stronger argument for the abolition of the Sabbath in the Christian dispensation than is furnished by Heb. iv. 9 for its continuance; and while the first day of the week is more than once referred to as one of religious observance, it is never identified with the Sabbath, nor are any prohibitions issued in connection with the former, while the omission of the Sabbath from the list of 'necessary things' to be observed by the Gentiles (Acts xv. 29) shows that they were regarded by the Apostles as free from obligation in this matter.

When we turn to the monuments which we possess of the early Church, we find ourselves on the whole carried in the same direction. The seventh day of the week continued, indeed, to be observed, being kept as a feast by the greater part of the Church, and as a fast from an early period by that of Rome, and one or two other churches of the West: but not as obligatory on Christians in general, for in several of the epistles of the Apostle, Paul, the majority of the times of festival, and even the strong words of St. Paul (Col. ii. 16, 17), do not impair the human and universal scope of the Fourth Commandment, exhibited so strongly in the very nature of the Law, and in the teaching respecting it of Him who came not to destroy the Law, but to fulfill it.

In the East, indeed, where the seventh day of the week was long kept as a festival, that would present itself to men's minds as the Sabbath, and the first day of the week would appear rather in its distinctively Christian character, and as of apostolical and ecclesiastical origin, than in connection with the old Law. But in the West the seventh day was kept for the most part as a fast, and that for a number of reasons: In commemoration of our Lord's lying in the sepulchre throughout that day. Its observance therefore would not obscure the aspect of the Lord's Day as that of hebdomadal rest and refreshment, and as consequently the prolongation of the Sabbath is the essential character of that benignant ordinance; and, with some variation, therefore, of verbal statement, a connection between the Fourth Commandment and the first day of the week (together, as should be remembered, with the other festivals of the Church), came to be perceived and proclaimed.

Attention has recently been called, in connection with our subject, to a circumstance which is important, the adoption by the Roman world of the Egyptian week, apparently with the founding of the Christian Church. Dion Cassius speaks of that adoption as recent, and we are therefore warranted in conjecturing the time of Hadrian as about that wherein it must have established itself. Here, then, would seem a signal signal Provisional preparation for providing the people of God with a literal Sabbath: for prolonging in the Christian kingdom that great institution
which, whether or not historically older than the Mosaic Law, is yet in its essential character adapted to all mankind, a witness for a personal Creator and Sustainer of the universe, and for his call to men to model their work, their time, and their leisure, on his pattern.

Were we prepared to embrace an exposition which has been given of a remarkable passage already referred to (Heb. iv. 8-10), we should find it singularly illustrative of the view just suggested. The argument of the passage is to this effect, that the rest on which Joshua entered, and into which he, and all Israel, could enter, cannot be the true and final rest, insomuch as the Psalmist long after words speaks of the entering into that rest as still future and contingent. In ver. 9 we have the words "there remaineth, therefore, a rest for the people of God." Now it is important that throughout the passage the word for rest is קדָדֶשֶׁר, and that in the words just quoted it is changed into קַדָּשָׁתָם, which certainly means the keeping of rest, the act of sabbatizing rather than the objective rest itself. It has accordingly been suggested that these words are not the author's conclusion—which is to be found in the form of theses in the declaration "we which have believed do enter into rest"—"but a parenthesis to the effect that to the people of God," the Christian community, "there remaineth, therefore, a sabbatizing, the great change that has passed upon them and the mighty elevation to which they have been brought as on other matters, so as regards the rest of God revealed to them, still leaving scope for and justifying the practice." This exposition is in keeping with the general scope of the Epistle to the Hebrews; and the passage thus viewed will seem to some minds analogous to xiii. 10. It is given by Owen, and is elaborated with great ingenuity by Dr. Wardlaw in his Discourses on the Sabbath. It will not be felt fatal to it that more than 300 years should have passed before the Church at large was in a situation to discover the heritage that had been preserved to her, or to enter on its enjoyment, when we consider how developed, in all matters of ritual and ordinance, must be the law of any living body, and much more of one which had to struggle from its birth with the impeding forces of a heathen empire, frequent persecution, and an unreformed society. In such case was the early Church, and therefore she might well have to wait for a Constantian before she could fully open her eyes to the fact that sabbatizing was still left to her; and her members might well be permitted not to see the truth in any steady or consistent way even then.

The objections, however, to this exposition are many and great, one being, that it has occurred to so few among the great commentators who have labored on the Epistle to the Hebrews. Chrysostom (in loc.) denies that there is any reference to hebraic sabbatizing, nor have we found any commentators, besides the two just named, who admit that there is such, with the single exception of Ehrard. Dean Alford notices the interpretation only to condemn it, while Dr. Hasey gives another, and that the usual explanation of the verse, suggesting a sufficient reason for the change of word from קַדָּשָׁתָם to קַדָּשָׁתָם. It would not have been right, however, to have passed over in this article without notice, as it relates to a passage of Scripture in which Sabbath and Sabbatical ideas are markedly brought forward.

It would be going beyond the scope of this article to trace the history of opinion on the Sabbath in the Christian Church. Dr. Hasey, in his Baptism Lectures, has sketched and distinguished every variety of doctrine which has been or still is maintained on the subject.

The sentiments and practice of the Jews subsequent to our Saviour's time have been already referred to; a circumstantial account—taken from Buxtorf, De Synag., of their superstitions, scruples, and prohibitions, will be found at the close of the first part of Heylin's History of the Sabbath. Calmet (art. "Sabbath") gives an interesting sketch of their family practices at the beginning and end of the day. And the estimate of the Sabbath, its uses, and its blessings, which is formed by the more spiritually minded Jews of the present day may be inferred from some striking remarks of Dr. Kalisch (Com. on Exodus, p. 273, who winds up with quoting a beautiful passage from the late Mrs. Rotatoria Montefiore's work, A Few Words to the Jews.

In conclusion, Dr. Proudhon's striking pamphlet, De la Célébration du Dimanche considérée sous les rapports de l'Hygiène publique, de la Morale, des relations de Famille et de Célé, Paris, 1855, may be studied with great advantage. His remarks (p. 67) on the advantages of the precise proportion established, six days of work to one of rest, and the inconvenience of any other that could be arranged, are well worth attention.

The word Sabbath seems sometimes to denote a week in the N. T. Hence, by the Hebrew usage of reckoning time by cardinal numbers, דַּשְׁתָּם, means on the first day of the week. The Rabbis have the same phraseology, keeping, however, the word Sabbath in the singular.

On the phrase of St. Luke, vi. 1, דַּשְׁתָּם, see Sabbatical Year.

This article should be read in connection with that on the Lord's Day.

SABBATH-DAY'S JOURNEY 2ab
SABBATH-DAY'S JOURNEY

SABBATICAL YEAR

The SABBATH-DAY'S JOURNEY, Acts i. 12. On occasion of a violation of the commandment by certain of the people who went to look for manna on the seventh day, Moses ordeled the very man to "go out of his place" and forbade any man to "go out of his place" on that day (Ex. xvi. 21). It seems natural to look on this as a mere enactment pro re notis, and having no bearing on any state of affairs subsequent to the journey through the wilderness and the daily gathering of manna. Whether the earlier Hebrews did or did not regard it thus, it is not easy to say. Nevertheless, the natural inference from 2 K. iv. 23 is against the suggestion of such a prohibition being known to the spokesman. Elisha almost certainly living— as may be seen from the whole narrative— much more than a Sabbath-day's journey from Shunem. Heylin infers from the incidents of David's flight from Saul, and Elijah's from Jezebel, that neither felt bound by such a limitation. Their situation, however, being one of extremity, cannot be safely argued from. In after times the precept in Ex. xvi. was undoubtedly viewed as a permanent law. But as some departure from a man's own place was unavoidable, it was thought necessary to determine the allowable amount, which was fixed at 2,000 paces, or about six furlongs, from the wall of the city.

Though such an enactment may have proceeded from an erroneous view of Ex. xvi. 29, it is by no means so superstitious and unworthy on the face of it as are most of the Rabbinical rules and prohibitions respecting the Sabbath-day. In the case of a general law, like that of the Sabbath, some authority must settle the application in details, and such an authority, the Scribes and Pharisees sitting in Moses' seat were entitled to exercise. It is plain that the limits of the Sabbath-day's journey must have been a great check on the profanation of the day in a country where business was entirely agricultural or pastoral, and must have secured "the ox and the ass" the rest to which by the Law they were entitled.

Our Saviour seems to refer to this law in warning the disciples to pray that their flight from Jerusalem in the time of its judgment should not be "on the Sabbath-day" (Matt. xxiv. 20). The Christians of Jerusalem would not, as in the case of Gentiles, feel free from the restrictions on journeying on that day; nor would their situation enable them to comply with the forms whereby such journeying when necessary was sanctified, nor would assistance from those around be procurable.

The permitted distance seems to have been grounded on the space to be kept between the Ark and the people (Josh. iii. 4) in the wilderness, which tradition said was that between the Ark and the tents. To repair to the Ark being, of course, a duty on the Sabbath, the walking to it was no violation of the law, as was the worship on the following day, i.e., the day of the Lord's ordination, then held to be the Sabbath; they were held to be an extension of the Sabbath-day's journey. We find the same distance given as the circumference outside the walls of the Levitical cities to be censured as their suburbs (Num. xxxv. 5). The terminus a quo was thus not a man's own house, but the wall of the city where he dwelt, and thus the amount of lawful Sabbath-day's journey must therefore have varied greatly: the very limits of a Jew in the small cities of his own land being restricted indeed when compared with those of a Jew in Alexandria, Antioch, or Rome.

When a man was obliged to go farther than a Sabbath-day's journey, on some good and allowable ground, it was incumbent on him on the evening before to furnish himself with food enough for two meals. He was to sit down and eat at the appointed distance, to lye what he had left, and after a thanksgiving to God for the appointed boundary. Next morning he was at liberty to make this point his terminus a quo.

The Jewish scruple to go more than 2,000 paces from his city on the Sabbath is referred to by Origen, apol. advers., iv. 2: by Jerome, ad Apionem, quarto lib.; and by Eusebius— with some apparent difference between them as to the measurement. Jerome gives Akiba, Simeon, and Hillel, as the authorities for the lawful distance.

F. G.

SABBATICAL YEAR. As each seventh day and each seventh month were holy, so was each seventh year, by the Mosaic code. We first encounter this law in Ex. xxiii. 10, 11, given in words corresponding to those of the Fourth Commandment, and followed (ver. 12) by the reinforcement of that commandment. It is impossible to read the passage and not feel that the Sabbath Day and the Sabbatical Year are parts of one general law.

The commandment is, to sow and reap for six years, and to let the land rest on the seventh, "that the poor of thy people may eat; and what they leave the beasts of the field shall eat." It is oldest, "as like manner shalt thou deal with thy vineyard and with thy olive-yard." We meet next with the enactment in Lev. xxv. 2-7, and finally in Deut. xv, in which last place the new feature presents itself of the seventh year being one of release to debtors.

When we combine these several notices, we find that every seventh year the land was to have rest to enjoy her Sabbath. Neither tilling nor cultivation of any sort was to be practiced. The spontaneous growth of the soil was not to be reaped by the owner, whose rights of property were in abeyance. All were to have their share in the gleanings: the poor, the stranger, and even the cattle.

This singular institution has the aspect, at first sight, of total impracticability. This, however, years off when we consider that in no year was the owner allowed to reap the whole harvest. (Lev. xix. 9, xxiii. 22). Unless, therefore, the remainder was gleaned very carefully, there may easily have been enough left to ensure such spontaneous deposit of seed as in the fertile soil of Syria would produce some amount of crop in the succeeding year, while the vines and olives would of course yield their fruit of themselves. Moreover, it is clear that the owners of land were to lay by corn in previous years for their own and their families' wants. This is the unavoidable inference from Lev. xxv. 20-22. And though the right of property was in abeyance during the Sabbatical year, it has been suggested that this only applied to the fields, and not to the gardens attached to houses.

The claiming of debts was unlawful during this year, as we learn from Deut. xv. The exceptions laid down are in the case of a foreigner, and that of there being no poor in the land. This latter however, it is straightway said, is what will never
SABBATH

SABBATICAL YEAR

sificate. In the threatenings contained in Lev xxv., judgments on the violation of the Sabbatical year are particularly contemplated (vv. 34, 35), and that it was greatly if not quite neglected appears from 2 Chr. xxvi. 20, 21: "Then that escaped from the sword carried he away to Babylon: where they were servants to him and his sons until the reign of the kingdom of Persia: to fulfill the word of the Lord by the mouth of Jeremiah, until the land had enjoyed her Sabbaths, for as long as she lay desolate she kept Sabbath, to fulfill three
score and ten years." Some of the Jewish commentators have inferred from this that their forefathers had neglected exactly seventy Sabbatical years. If such neglect was continuous, the law must have been disobeyed throughout a period of 490 years, i.e. through nearly the whole duration of the monarchy; and as there is nothing in the previous history leading to the inference that the people were more scrupulous then, we must look to the return from Captivity for indications of the Sabbatical year being actually observed. Then we know the former neglect was replaced by a punctilious attention to the Law; and as its leading feature, the Sabbath, began to be scrupulously reverence, so the new Israel was thrown into an observance of the Sab-

batical year. We read (1 Mach. vi. 49) that they came out of the city, because they had no victuals there to endure the siege, it being a year of rest to the land," Alexander the Great is said to have exempted the Jews from tribute during it, since it was unlawful for them to sow seed or reap harvest then; so too, did Julius Cæsar (Joseph. Ant. iv. 10, § 6). Festus (Hist. lib. ii. 2, § 1), having mentioned the observance of the Sabbath by the Jews, adds: "Dein blandiendi inertia septimumquo anni annum ignavice datum." And St. Paul, in reproaching the Galatians with their Jewish tendencies, taxes them with observing years as well as days and months and times (Gal. iv. 10), from which we must infer that the teachers who communicated to them these tendencies did more or less the like themselves. Another allusion in the N. T. to the Sabbatical year is perhaps to be found in the phrase, εν σαβατικα διετεροπαγετε (Luke vi. 1). Various explanations have been given of the term, but one of the most probable is that it denotes the first Sabbath of the second year in the cycle (Wierscher, quoted by Alford, vol. i.).

SABBEUS ([Vat.] Σαββαεος; [Rom. Ald.] Alex. Σαββαηηος; Soraotes), 1 Esdr. ix. 32. [SHEM-MAIΛΗ, 14.]

Text not visible.
SACKCLOTH

A coarse texture, of a dark color, made of goats' hair (Is. 1. 7; Rev. vi. 12), and resembling the ciliwm of the Romans. It was used (1) for making sacks, the same word describing both the material and the article (Gen. xlii. 25; Lev. xi. 32; Josh. iv. 4); and (2) for making the rough garments used by mourners, which were in extreme cases worn next the skin (1 K. xxi. 27; 2 K. vi. 30; Job xvi. 15; Is. xxxvii. 11), and this even by females (Joel i. 8; 2 Macc. iii. 10), but at other times were worn over the coat or cephoneth (Jon. iii. 6) in lieu of the outer garment. The robe probably resembled a sack in shape, and fitted close to the person, as we may infer from the application of the term chigpa to the process of putting it on (2 Sam. iii. 31; Ex. xvi. 8, &c.). It was confined by a girdle of similar material (Is. iii. 24). Sometimes it was worn throughout the night (1 K. xxi. 27).

W. L. B.

SACRIFICE. The peculiar features of each kind of sacrifice are referred to under their respective heads: the object of this article will be—

I. To examine the meaning and derivation of the various words used to denote sacrifice in Scripture.

II. To examine the historical development of sacrifice in the Old Testament. To sketch briefly the theory of sacrifice, as it is set forth both in the Old and New Testaments, with especial reference to the Atonement of Christ.

I. Of all the words used in reference to sacrifice, the most general appear to be—

(a. in) παρερχόμενοι, minchel6, from the obsolete root παρερχόμαι, "to give," used in Gen. xxiii. 13, 20, 21, of a gift from Jacob to Esau (LXX. δάπεδον); in 2 Sam. viii. 2, 6 (κεφάλην), in 1 K. iv. 21 (σφαίρα); in 2 K. xvii. 4 (μνεμάνος), of a tribute of a vassal king; in Gen. iv. 3, 5, of a sacrifice generally (δάπεδον and θυσία, indiscriminately); and in Lev. ii. 1, 4, 5, 6, joined with the word korban, of an unbloody sacrifice, or "meat-offering" (generally δάπεδον θυσία). Its derivation and usage point to the idea of sacrifice, which represents it as an eucharistic gift to God our King.

(b. in) παρερχόμενοi, derived from the root παρερχόμαι, "to approach," or (in Hiphil) to "make to approach," used with minchel in Lev. ii. 1, 3, 4, 5, 6, (LXX. δάπεδον θυσία), generally rendered δάπεδον (see Mark vii. 11, κορμαίν, δ ούκ δάπεδον) or προσφέρω. The idea of a gift hardly seems inherent in the root; which rather points to sacrifice, as a symbol of communion or covenant between God and man.

(c. in) σφαίρα, derived from the root σφάειν, to "slaughter animals," especially to "shew in sacrifice," refers emphatically to a bloody sacrifice, one in which the shedding of blood is the essential idea. Thus it is opposed to minchel, in Ps. xi. 6 (θυσίαν καὶ προσφέρων), and to δάπεδον (the whole burnt-offering) in Ex. x. 25, xviii. 12, &c. With it the expiatory idea of sacrifice is naturally connected.

Distinct from these general terms, and often appended to them, are the words denoting special kinds of sacrifice:

(d. in) δάπεδον, δάπεδον (generally δάπεδον θυσία), the "whole burnt-offering."

(e. in) σφαίρα, σφαίρα, σφαίρα (σφαίρα), used frequently with πως, and sometimes called παρερχόμενοι, the "peace." or "thank-offering."

(f. in) παρερχόμενοι, chattath (generally περὶ ἀμαρτιῶν), the "trespass-offering."

(g. in) παρερχόμενοι, ἀπόστολος (generally παραγγελία), the "tension-offering."

For the examination of the derivation and meaning of these, we each under its own head.

II. (A) ORIGIN OF SACRIFICE.

In tracing the history of sacrifice, from its first beginning to its perfect development in the Mosaic ritual, we are at once met by the long-disputed question, as to the origin of sacrifice; whether it arose from a natural instinct of man, sanctioned by God, or whether it was the subject of some distinct primordial revelation.

It is a question, the importance of which has probably been exaggerated. There can be no doubt that sacrifice was sanctioned by God's Law, with a special typical reference to the Atonement of Christ; its universal prevalence, independent of, and often opposed to, man's natural reasonings on his relation to God, shows it to have been primordial, and deeply rooted in the instincts of humanity. Whether it was first enjoined by an external command, or whether it was based on that sense of sin and lost communion with God, which is stamped by his hand on the heart of man — is a historical question, perhaps insoluble, probably one which cannot be treated at all except in connection with some general theory of the method of primordial revelation, but certainly one which does not affect the authority and the meaning of the rite itself.

The great difficulty in the theory which refers it to a distinct command of God, is the total silence of Holy Scripture — a silence the more remarkable, when contrasted with the distinct reference made in Gen. ii. to the origin of the Sabbath. Sacrifice when first mentioned, in the case of Cain and Abel, is referred to as a thing of course; it is said to have been brought by men: there is no hint of any command given by God. This consideration, the strength of which no ingenuity has been able to impair, although it does not actually disprove the formal revelation of sacrifice, yet

sin-offering was actually a male), still it does not settle the matter. The Lord even then speaks of sacrifice as existing, and as known to exist: He does not institute it. The supposition that the "sins of beasts" in Gen. iii. 21 were sins of animals sacrificed by God's command, is a pure assumption. The argument on Heb. xi. 4, that faith can rest only on a distinct Divine command as to the special occasion of its exercise is contradicted by the general definition of it given in v. 1.

* * *
the archal nature, in connected, as Gen. institution limitation, which the sacrifices of the O. T. are expressly connected, any exegetical argument on this side of the question. All allow that the eucharistic and deprecatory ideas of sacrifice are perfectly natural to man. The higher view of its expiatory character, dependent, as it is, entirely on its typical nature, appears but gradually in Scripture. It is veiled under other ideas in the case of the patriarchal sacrifices. It is first distinctly mentioned in the law (Lev. xxii. 11, 12); but even then the theory of the sin offering, and of the classes of sins to which it referred, is allowed to be obscure and difficult; it is only in the N. T. (especially in the Epistle to the Hebrews) that its nature is clearly unfolded. It is as likely that it pleased God gradually to supercede the higher idea to an institution, derived by man from the lower ideas (which must eventually find their justification in the higher), as that He originally commanded the institution when for the revelation of its full meaning was not yet come. The rainbow was just as truly the symbol of God's new promise in Gen. ix. 13-17, whether it had or had not existed, as a natural phenomenon before the Flood. What God sets his seal to, He makes a part of his revelation, because of its origin may be. It is to be noticed (see Warburton's Dist. Leg. ix. c. 2) that, except in Gen. xv. 9, the method of patriarchal sacrifice is left free, without any direction on the part of God, while in all the Mosaic ritual the limitation and regulation of sacrifice, as to time, place, and material, is a most prominent feature, on which much of its distinction from heathen sacrifice depended. The inference is at least probable, that when God sanctioned formally a natural rite, then, and not till then, did He define its method.

The question, therefore, of the origin of sacrifice is best left in the silence with which Scripture surrounds it.

(B.) Ante-Mosaic History of Sacrifice.

In examining the various sacrifices, recorded in Scripture before the establishment of the Law, we find that the words specially denoting expiatory sacrifice (אכָּבָה and לֹֽאֹכֶּר) are not applied to them. This fact does not at all show, that they were not actually expiatory, nor even that the offers had not that idea of expiation, which must have been vaguely felt in all sacrifices; but it justifies the inference, that this idea was not then the prominent one in the doctrine of sacrifice.

The sacrifice of Cain and Abel is called "minchah," although in the case of the latter it was a bloody sacrifice. (So in Heb. xi. 4 the word "θυσία" is explained by the τοὺς δόμους below.) In the case of both it would appear to have been eucharistic, and the distinction between the offers to have lain in their "faith" (Heb. xi. 4). Whether that faith of Abel referred to the promise of the Redeemer, and was connected with any idea of the typical meaning of sacrifice, or whether it was a simple and humble faith in the unseen God, as the giver and promise of all good, we are not authorized by Scripture to draw argument on this side of the question. The sacrifice of Noah after the Flood (Gen. viii. 20) is called burnt-offering ("idah"). This sacrifice is expressly connected with the institution of the

Covenant which follows in ix. 8-17. The same ratification of a covenant is seen in the burnt-offering of Abraham, especially enjoined and defined by God in Gen. xv. 9; and is probably to be traced in the "building of alters" by Abraham on entering Canaan at Bethel (Gen. xii. 7, 8) and Moriah (xiii. 18), by Isaac at Beer-sheba (xxvi. 25), and by Jacob at Shechem (xxviii. 20), and in Jacob's setting up and anointing of the pillar at Bethel (xxxvii. 15; xviii. xxv. 14). The sacrifice ("abib") of Jacob at Mizpah also marks a covenant with Laban, to which God is called to be a witness and a party. In all these, the burnt offering seems to have been what is called the "she ruin", the recognition of a bond between the sacrificer and God, and the dedication of himself, as represented by the victim, to the service of the Lord.

The sacrifice of Isaac (Gen. xxvii. 1-13) stands by itself, as the sole instance in which the idea of human sacrifice was even for a moment, and as a trial, countenanced by God. Yet in its principle it appears to have been of the same nature as before: the voluntary surrender of an only son on Abraham's part, and the willing dedication of himself on Isaac's, are in the foreground: the expiatory idea, if recognized at all, holds certainly a secondary position.

In the burnt-offerings of Job for his children (Job i. 2) and for his three friends (xli. 8), we for the first time find the expression of the desire of expiation for sin accompanied by repentance and prayer, and brought prominently forward. The same is the case in the words of Moses to Pharaoh, as to the necessity of sacrifice in the wilderness (Ex. x. 29), where sacrifice ("abib") is distinguished from burnt-offering. Here the main idea is at least deprecatory; the object is to appease the wrath, and avert the vengeance of God.

(C.) The Sacrifices of the Mosaic Period.

These are inaugurated by the offering of the Passover and the sacrifice of Ex. xxiv. The Passover indeed is unique in its character, and seems to have been the peculiarity of all the various divisions of sacrifice soon to be established. Its ceremonial, however, most nearly resembles that of the sin-offering in the emphatic use of the blood, which (after the first celebration) was poured at the bottom of the altar (see Lev. iv. 7), and in the case taken that none of the flesh should remain till the morning (see Ex. xlii. 10, xxv. 25). It was unlike in that the flesh was to be eaten by all (not burnt, or eaten by the priests alone), in token of their entering into covenant with God, and eating "at his table," as in the case of a peace-offering. Its peculiar position as a historical memorial, and its special reference to the future, naturally make it out as inescapable of being referred to any formal class of sacrifice; but it is clear that the idea of salvation from death by means of sacrifice is brought out in it with a distinctness before unknown.

The sacrifice of Ex. xxiv., offered as a solemn inauguration of the Covenant of Sinai, has a similarly comprehensive character. It is called a "burnt-offering" and "peace-offering" in v. 5; but the solemn use of the blood (comp. Heb. x. 18-22) distinctly marks the idea that expiatory sacrifice was needed for entering into covenant with God, the idea of which the sin- and trespass-offerings were afterwards the symbols.
SACRIFICE

The Law of Leviticus now unfolds distinctly the various forms of sacrifice: —

(a.) The burnt-offering. Self-dedication.

(b.) The meat-offering (unblemished) Excommunication.

The peace-offering (bloody) TIC.

(c.) The sin-offering. Expiation.

The trespass-offering.

To these may be added, —

(d.) The incense offered after sacrifice in the Holy Place, and (on the Day of Atonement) in the Holy of Holies, the symbol of the intercession of the priest (as a type of the Great High Priest), accompanying and making efficacious the prayer of the people.

In the consecration of Aaron and his sons (Lev. viii.) we find these offered, in what became ever afterwards the appointed order: first came the sin-offering, to prepare access to God; next the burnt-offering, to mark their dedication to his service; and thirdly the meat-offering of thanksgiving.

The same sacrifices, in the same order, with the addition of a peace-offering (even no doubt by all the people), were offered a week after for all the congregation, and accepted visibly by the descent of fire upon the burnt-offering. Henceforth the sacrificial system was fixed in all its parts, until He should come whom it typified.

It is to be observed that the Law of Leviticus takes the title of sacrifice for granted (see Lev. i. 2, ii. 1, &c., "If a man bring an offering, ye shall," etc.), and is directed chiefly to unite and limit its exercise. In every case but that of the peace-offering, the nature of the victim was carefully prescribed, so as to preserve the ideas symbolized, and so as to avoid the notion (so inherent in heathen systems, and finding its logical result in human sacrifice) that the more costly the offering, the more surely must it meet with acceptance.

At the same time, probably in order to impress this truth on their minds, and also to guard against corruption by heathenistic ceremonial, and against the notion that sacrifice in itself, without obedience, could avail (see 1 Sam. xxv. 22, 23), the place of offering was expressly limited, first to the Tabernacle, afterwards to the Temple. This ordinance also necessitated their periodical gathering as one nation before God, and so kept clearly before their minds their relation to Him as their national King, both limitations brought out the great truth, that God Himself provided the way by which man should approach Him, and that the method of reconciliation was initiated by Him, and not by them.

In consequence of the peculiarity of the Law, it has been argued (as by Outram, Warburton, etc.) that the whole system of sacrifice was only a condescension to the weakness of the people, borrowed, more or less, from the heathen nations, especially from Egypt, in order to guard against worse superstition and positive idolatry. The argument is mainly based (see Warh. Dict. Leg., iv., sect. vi. 2) on Ex. xx. 25, and similar references in the O. and N. T. to the nullity of all mere ceremonial. Taken as an explanation of the theory of sacrifice, it is weak and superficial; it labors under two fatal difficulties, the historical fact of the primeval existence of sacrifice, and its typical reference to the one Atonement of Christ, which was foreordained from the very beginning, and had been already typified, as, for example, in the sacrifice of Isaac.

But as giving a reason for the minuteness and elaboration of the Mosaic ceremonial, so remarkably contrasted with the freedom of patriarchal sacrifice, and as furnishing an explanation of certain special rites, it may probably have some value. It certainly contains this truth, that the craving for visible tokens of God's presence, and visible rites of worship, from which idolatry proceeds, was provided for and turned into a safe channel, by the whole actual and typical system, of which sacrifice was the type. The contrast with the gigantic system of idolatry, which prevailed in Egypt, and which had so deeply tainted the spirit of the Israelites, would doubtless render such provision then especially necessary. It was one part of the prophetic office to guard against its degradation into formalism, and to bring out its spiritual meaning with an ever-increasing clearness.

(1.5.) Post-Mosaic Sacrifices.

It will not be necessary to pursue, in detail, the history of Post-Mosaic Sacrifice, for its main principles were now fixed forever. The most remarkable instances of sacrifice on a large scale are by Solomon at the consecration of the Temple (1 K. viii. 53), by Jehoiada after the death of Athaliah (2 K. xxiii. 18), and by Hezekiah at his great Passover and restoration of the Temple-worship (2 Chr. xxx. 21-24). In each case, the lavish use of victims was chiefly in the peace-offerings, which were a sacred national feast to the people at the Table of their Great King.

The regular sacrifices in the Temple service were: —

(a.) BURNT-OFFERINGS.

1. The daily burnt-offerings (Ex. xxix. 38-42).

2. The double burnt-offerings on the Sabbath (Num. xxviii. 9, 10).

3. The burnt-offerings at the great festivals (Num. xxviii. 11-xxix. 39).

(b.) MEAT-OFFERINGS.

1. The daily meat-offerings accompanying the daily burnt-offerings (Veal, oil, and wine) (Ex. xxix. 40, 41).

2. The shew-bread (twelve loaves with frankincense), renewed every Sabbath (Lev. xxiv. 5-9).

3. The special meat-offerings at the Sabbath and the great festivals (Num. xxvii. xxix., xxx.).

4. The first-fruits at the Passover (Lev. xiiii. 10-14), at Pentecost (xxix. 17-20), both "wave-offerings;" the first-fruits of the dough and threshing-floor at the harvest-time (Num. xx. 20, 21; Deut. xxvi. 1-11), called "heave-offerings;"

(c.) SIN-OFFERINGS.

1. Sin-offering (a kid) each new moon (Num. xxviiii. 15).

3. The offering of the two goats (the goat sacrificed and the scape-goat) for the people, and of the bullock for the priest himself, on the Great Day of Atonement (Lev. xvi.).

(d.) INCENSE.

1. The morning and evening incense (Ex. xxvii. 7-8).

a For instances of infringement of this rule unenforced, see Judg. ii. 5, vi. 24, xiii. 19; 1 Sam. xi. 15, xvi. 5; 2 Sam. viii. 13; 1 K. iii. 2, 3. Most of these cases are special, some authorized by special command; but the law probably did not attain to its strictness till the foundation of the Temple.
Whether Nazaritic order any third peace-offering and the dite as perfectly single the example (St. John vi. 21), on occasions of marriage and of burial, etc., etc., besides the frequent offering of private sin-offerings. These must have kept up a constant succession of sacrifices every day; and brought the rite home to every man's thought, and to every occasion of human life.

(III.) In examining the doctrine of sacrifice, it is necessary to remember, that, in its development, the order of idea is not necessarily the same as the order of time. By the order of sacrifice in its perfect form (as in Lev. viii.), it is clear that the sin-offering occupies the most important place, the burnt-offering comes next, and the meat-offering or peace-offering last of all. The second could only be offered after the first had been accepted; the third was not needed under ordinary circumstances. Yet, in actual order of time, it has been seen, that the patriarchal sacrifices partook much more of the nature of the peace-offering and burnt-offering; and that, under the Law, by which was "the knowledge of sin" (Rom. iii. 20), the sin-offering was for the first time explicitly set forth. This is but natural, that the deepest ideas should be the last in order of development.

It is also obvious, that those who believe in the unity of the O. and N. T., and the typical nature of the Mosaic Covenant, must view the type in constant reference to the antitype, and be prepared therefore to find in the former vague and recondite meanings, which are fixed and manifested by the latter. The sacrifices must be considered, not merely as they stand in the Law, or even as they might have appeared to a pious Israelite; but as they were illustrated by the Prophets, and perfectly interpreted in the N. T. (e. g. in the Epistle to the Hebrews). It follows from this, that, as belonging to a system which was to embrace all mankind in its influence, they should be also compared and associated with the sacrifices and worship of God in other nations, and the ideas which in them were dimly and confusedly expressed.

It is needless to dwell on the universality of heathen sacrifices, and difficult to reduce to any single theory the various ideas involved therein. It is clear, that the sacrifice was often looked upon as a gift or tribute to the gods: an idea which, for example, runs through all Greek literature, as well as by Hebrew prophets, that by them the gods' favor could be purchased for the wicked, or their "envy" be averted from the prosperous. On the other hand, that they were regarded as thank-offerings, and the feasting on their flesh as a partaking of the "table of the gods." (comp. 1 Cor. x. 20 (21), is equally certain. Nor was the higher idea of sacrifice, as a representation of the self-devotion of the offerer, body and soul, to the god, wholly lost, although generally obscured by the grosser and more obvious conceptions of the rite. But, besides all these, there seems always to have been latent the idea of propitiation, that is, the belief in a communion with the gods, natural to man, broken off in some way, and by sacrifice to be restored. The emphatic "shedding of the blood," as the essential part of the sacrifice, while the flesh was often eaten by the priest or the sacrificer, is not capable of any full explanation by any of the ideas above referred to. Whether it represented the death of the sacrificer, or (as in cases of national offering of human victims, and of those self-devoted for their country) an atoning death for him; still, in either case it contained the idea that "without shedding of blood is no remission," and so had a vague and distorted glimpse of the great central truth of Revelation. Such an idea may be (as has been argued) "unnatural," in that it could not be explained by natural reasoning; but if certain, still, it would not have been unnatural, if frequency of existence, and accordance with a deep natural instinct, be allowed to preclude that epithet.

Now the essential difference between these heathen views of sacrifice and the Scriptural doctrine of the O. T. is not to be found in its denial of any of these ideas. The very names used in it for sacrifice (as is seen above) involve the conception of the rite as a gift, a form of worship, a thank-offering, a self-devotion, and an atonement. In fact, it brings out, clearly and distinctly, the ideas which in heathenism were uncertain, vague, and perverted.

But the essential points of distinction are two. First, that whereas the heathen conceived of their gods as outraged in jealousy or anger, to be sought after, and to be appeased by the unaided action of man, Scripture represents God himself as approaching man, as pointing out and sanctioning the way by which the broken covenant should be restored. This was impressed on the Israelites at every step by the minute directions of the Law, and the time, place, victim, and ceremonial, by its utterly discomfitting the "will worship," which in heathenism found full scope, and rooted in the invention of costly or monstrous sacrifices. And it is especially to be noted, that this particularity is increased as we approach nearer to the deep propitiatory idea; for that, whereas the patriarchal sacrifices generally seem to have been undefined by God, and even under the Law, the nature of the peace-offerings, used (to some extent) the burnt-offerings, was determined by the sacrificer only; the solemn sacrifice of Abraham in the inauguration of his covenant was prescribed to him, and the sin-offerings under the Law were most accurately and minutely determined. (See, for example, the whole ceremonial of Lev. xvi.) It is needless to remark, how this essential difference purifies the ideas above noticed from the corruptions, which made them odious or contemptible, and sets on its true basis the relation between God and fallen man.

The second mark of distinction is closely connected with this, inasmuch as it shows sacrifice to be

Sacrifice, quoted in notes 23, 25, to Thomson's "Bampton Lectures," 1859.
SACRIFICE

be a scheme proceeding from God, and, in his
revelation connected with the one central fact
of human history. It is to be found in the
typical character of all Jewish sacrifices, on which,
as the Epistle to the Hebrews argues, all their
efficacy depended. It must be remembered that,
like other ordinances of the Law, they had a two-
fold effect, depending on the special position of
an Israelite, as a member of the national Theocracy,
and on his general position, as a man in relation
with God.

On the one hand, for example, the
sin-offering was an atonement to the national
law for moral offenses of negligence, which in "pres-
sumptuous," i.e. deliberate and willful crime, was
rejected (see Num. xv. 27-31; and comp. Heb. x.
26. 27). On the other hand it had, as the pro-
phetic writings show us, a distinct spiritual sig-
nificance, as a means of expressing repentance
and receiving forgiveness, which could have belonged to
it only as a type of the Great Atonement.

How far that typical meaning was recognized at differ-
ent periods and by different persons, it is useless
to speculate; but it would be improper to doubt,
even if we had no testimony on the subject, that,
in the face of the high spiritual teaching of the
Law and the Prophets, a pious Israelite must have
felt the necessity of material sacrifice, and so
believed it to be availing only as an ordinance
of God, shadowing out some great spiritual truth,
or action of his. Nor is it unlikely that, with
more or less distinctness, he connected the evolu-
tion of this, as of other truths, with the coming
of the promised Messiah. But, however this be,
we know that, in God's purpose, the whole
system was typical, that all its spiritual efficacy
depended on the true sacrifice which it represented,
and could be received only on condition of Faith,
and that, therefore, it passed away when the Anti-
type was come.

The nature and meaning of the various kinds
of sacrifice is partly gathered from the form
of their institution and ceremonial, partly from the
teaching of the Prophets, and partly from the
N. T., especially the Epistle to the Hebrews.

All had relation, under different aspects, to a Cov-
enant between God and man.

The Sin-offering represented that Covenant
as broken by man, and as knit together again, by
God's appointment, through the "shedding of blood."
Its characteristic ceremony was the sprinkling
of the blood before the veil of the Sanctuary, the putting some of it on the horns of the
altar of incense, and the pouring out of all the
rest at the foot of the altar of burnt-offering.
The flesh was in no case touched by the offerer; either
it was consumed by fire without the camp, or it was
eaten by the priest alone in the holy place,
and everything that touched it was holy (Lev. xi.
7). This latter mark pointed the distinction from the
peace-offering, and showed that the sacrificer had
been rendered unworthy of communion with God.
That the utility of material sacrifices in itself, led,
signified that the death of the offerer was desired
for sin, but that the death of the victim was ac-
cepted for his death by the ordinance of God's
mercy. This is seen most clearly in the cer-
emonial of the Day of Atonement, when, after the
sacrifice of the one goat, the high-priest's hand
was laid on the head of the scapegoat which was
the other part of the sin-offering— with confession
of the sins of the people, that it might visibly bear
them away, and so bring out explicitly, what in
other sin-offerings was but implied.

Accordingly we find (see quotation from the Mishna in Outr.
De Succ. i. c. xvi. § 10) that, in all cases, it was
for a custom for his hand on the
head of the sin-offering, to confess generally or
specially his sins, and to say, "Let this be my ex-
piation." Beyond all doubt, the sin-offering dis-
inctly witnessed, that sin existed in man, that the
"wages of that sin was death," and that God had
provided an Atonement by the vicarious suffer-
ing of an appointed victim. The reference of the
Baptist to a " Lamb of God who taketh away the
sins of the world," was one understood and hailed
at once by a "true Israelite."

The ceremonial and meaning of the Burnt-
offering were very different. The idea of ex-
piation seems not to have been absent from it
(for the blood was sprinkled round about the altar
of sacrifice); and, before the Levitical ordinance
of the sin-offering to precede it, this idea may
have been even prominent. But in the system of
Levities it is evidently only secondary.

The main idea is the offering of the whole victim
to God, representing (as the laying of the hand on
its head shows) the devotion of the sacrificer, body
and soul, to Him. The death of the victim was
(so to speak) an incidental feature, to signify the
complete of the devotions; and it is to be no-
ticed, that in all solemn sacrifices, no burnt-offering
could be made until a previous sin-offering had
brought the sacrificer again into covenant with
God. The main idea of this sacrifice must have
been representative, not vicarious, and the best
comment upon it is the exhortation in Rom. xii.
The meat-offerings, the peace or thank-
offering, the first fruit, etc., were simply offerings
to God of his own best gifts, as a sign of thankful
homage, and as a means of maintaining his service
and his servants. Whether they were regular or
voluntary, individual or national, independent or
subsidiary to other offerings, this was still the lead-
ing idea. The meat-offering, of flour, oil, and
wine, seasoned with salt, and bellowed by frankincense,
was usually an appendage to the devotions
implied in the burnt-offering; and the peace-of-
ferings for the people held the same place in Aaron's
first sacrifice (Lev. i. 22), and in all others of
special solemnity. The characteristic ceremony in
the peace-offering was the eating of the flesh by
the sacrificer (after the fat had been burnt before
the Lord, and the breast and shoulder given to the
priests). It bestowed the enjoyment of com-
monation with God at "the table of the Lord;" in
the gifts which his mercy had bestowed, of which
a choice portion was offered to Him, to his servants,
and to his poor (see Deut. xiv. 28, 29). To this
"cover," and so to "do away;" LXX. ἔλεγον ἄνω τοῦ
head of the sacrifice, the later Jews distinguish the burnt-offering as a sym-
bolizing for thoughts and designs, the sin-offering for acts of
transgression. (See Jonath. Paraphr. on Lev. 
17, etc., quoted by Outram.)
SACRIFICE

view of sacrifice allusion is made by St. Paul in Phil. iv. 13; Heb. xiii. 15, 16. It follows naturally from the other two.

It is clear from this, that the idea of sacrifice is a complex idea, involving the propitiatory, the dedicatory, and the enarclistic elements. Any one of these, taken by itself, would lead to error and superstition. The enarclistic alone would lead to the idea of atonement by sacrifice for sin, as being effectual without any condition of repentance and faith; the self-dedicatory, taken alone, ignores the barrier of sin between man and God, and undermines the whole idea of atonement; the enarclistic alone leads to the notion that mere gifts can satisfy God's service, and is easily perverted into the heathenish attempt to "hike" God by vows and offerings. All three probably were more or less implied in each sacrifice, each element predominating in its turn: all must be kept in mind in considering the historical influence, the spiritual meaning, and the typical value of sacrifice.

Now the Israelites, while they seem always to have retained the ideas of propitiation and of enarclistic offering, even when they perverted these by half-heathenish superstition, constantly ignored the self-dedicatory which is the link between the two, and which the regular burnt-offering should have impressed upon them as their daily thought and duty. It is therefore to this point that the teaching of the Prophets is mainly directed; its key-note is contained in the words of Amos: "Behold, to obey is better than sacrifice, and to hearken than the fat of rams" (I Sam. xxv. 22). So Isaiah declares (as in i. 10-20) that "the Lord delights not in the blood of bullocks, or lambs, or goats;" that to those who "cease to do evil and learn to do well, . . . . though their sins be as scarlet, they shall be white as snow." Jeremiah reminds them (vii. 22, 23) that the Lord did not "command burnt-offerings or sacrifices" under Moses, but said, "Obey my voice, and I will be your God." Ezekiel is full of indignant protests (see xx. 39-44) against the pollution of God's name by offerings of those whose hearts were with their idols. Hosea sets forth God's requirements (vi. 6) in words which our Lord himself sanctioned and which are not sacrificial, and the knowledge of God more than burnt-offerings." Amos (v. 21-27) puts it even more strongly, that God "hates" their sacrifices, unless "judgment run down like water, and righteousness like a mighty stream." And Micah (vi. 6-8) answers the question which lies at the root of sacrifice, "Wherewith shall I come before the Lord?" by the words, "What doth the Lord require of thee, but to do justly, and love mercy, and walk humbly with thy God?" All these passages, and many others, are directed to one object—not to discourage sacrifice, but to purify and spiritualize the feelings of the offerers.

The same truth, here unconnected from without, is recognized from within by the Psalmist. Thou says he, in Ps. xi. 6-11, "Sacrifice and meat-offering, burnt-offering and sin-offering, Thou hast not required;" and contrasts with them the homage of the heart—"mine ears hast Thou borted, and the active service of life—"Lo! I come to do Thy will, 0 God." In Ps. i. 13, 14, sacrifice is associated with prayer and adoration (comp. Ps. xlvii. 2): "Thinkest thou that I will eat bullocks, and drink the blood of goats? Offer unto God thanksgiving, pay thy vows to the Most Highest, and call upon me in time of trouble." In Ps. ii. 16, 17, it is similarly contrasted with true repentance of the heart: "The sacrifice of God is a troubled spirit, a broken and a contrite heart." Yet here also the next verse shows that sacrifice was not superseded, but purified: "Then shall they be pleased with burnt-offerings and oblations; then shall they offer young bullocks upon thine altar." These passages are correlative to the others, expressing the feelings, which those others in God's name require. It is not to be argued from them, that this idea of self-dedication is the main one of sacrifice. The idea of propitiation lies below it, taken for granted by the Prophets as by the 7 hol people, but still enveloped in mystery until the Antitype should come to make all clear. For the evolution of this doctrine we must look to the N. T.; the preparation for it by the Prophets was (so to speak) negative, the pointing out the nullity of all other propitiations in themselves, and then leaving the warnings of the conscience and the cravings of the heart to fix men's hearts on the better Atonement to come.

Without entering directly on the great subject of the Atonement (which would be foreign to the scope of this article), it will be sufficient to refer to the connection, established in the N. T., between it and the sacrifices of the Mosaic system. To do this, we need do little more than analyze the Epistle to the Hebrews, which contains the key of the whole sacrificial doctrine.

In the first place, it follows the prophetic books by stating, in the most emphatic terms, the intrinsic nullity of all mere material sacrifices. The "gifts and sacrifices" of the first Targum could "never make the sacrificers perfect in conscience" (Rosenburg): they were but "carnal ordinances, imposed on them till the time of reformation" (v. 9, 10). The very fact of their constant repetition is said to prove this imperfection, which depends on the fundamental principle, "that it is impossible that the blood of bulls and goats should take away sin" (x. 4). But it does not lead us to infer, that they actually had no spiritual efficacy, if offered in repentance and faith. On the contrary, the object of the whole isle is to show that a sacrificial, propitiatory character, and to assert that in virtue of it alone they had a spiritual meaning. Our Lord is declared (see 1 Pet. i. 20) "to have been foreordained "as a sacrifice "before the foundation of the world:" or (as it is more strikingly expressed in Rev. xiii. 8) "from the foundation of the world." The material sacrifices represented this Great Atonement, as already made and accepted in God's foreknowledge; and to those who grasped the ideas of sin, pardon, and self-dedication, symbolized in them, they were means of entering into the blessings which the One True Sacrifice alone procured. Otherwise the whole sacrificial system could have been only a superstition and a snare. The sins provided for by the sin-offering were certainly in some cases moral. [See Sin-Offering.] The whole of the Mosaic description of sacrifices clearly implies some real spiritual benefit to be derived from them, besides the temporal privileges belonging to the national theocracy.

Just as St. Paul argues (Gal. iii. 15-29) that the Promise and Covenant to Abraham were of primary, the Law only of secondary, importance, so that men had under the Law more than they had by the Law; so it must be said of the Levitical
SACRIFICE

sacrifices. They could convey nothing in them- selves: yet, as types, they might, if accepted by a true, though necessarily imperfect, faith, be means of conveying in some degree the blessings of the Antitype.

This typical character of all sacrifice being thus set forth, the next point dwelt upon is the union in our Lord's person of the priest, the offerer, and the sacrifice. [Priest.] The imperfection of all sacrifices, which made them, in themselves, liable to superstition, and even inexplicable, lies in this, that, on the one hand, the victim seems arbitrarily chosen to be the substitute for, or the representative of, the sacrifice; and that, on the other, if there be a barrier of sin between man and God, he has no right of approach, or security that his sacrifice will be accepted; that there needs, therefore, to be a Mediator, i.e. (according to the definition of Heb. v. 1—4), a true Priest, who shall, as being One with man, offer the sacrifice, and accept it, as being One with God. It is shown that this imperfection, which necessarily existed in all types, without which indeed they would have been useless, not preparatory for the Antitype, was altogether done away in Him; that in the first place He, as the representative of the whole human race, offered an arbitrarily-chosen victim, but the willing sacrifice of his own blood; that, in the second, He was ordained by God, by a solemn oath, to be a high-priest forever, "after the order of Melchizedek," one "in all points tempted as we are, yet without sin," united to our human nature, susceptible to its infirmities and trials, yet, at the same time, the True Son of God, exalted far above all created things, and ever living to make intercession in heaven, now that his sacrifice is over: and that, in the last place, the barrier between man and God is by his mediation done away forever, and the Most Holy Place once for all opened to man. All the points, in the doctrine of sacrifice, which had before been unintelligible, were thus made clear.

This being the case, it next follows that all the various kinds of sacrifices were, each in its measure, representatives and types of the various aspects of the Atonement. It is clear that the Atonement, in this epistle, as in the N. T. generally, is viewed in Weloldem light.

On the one hand, it is set forth distinctly as a vicarious sacrifice, which was rendered necessary by the sin of man, and in which the Lord "bore the sins of many." It is its essential characteristic, that in it He stands absolutely alone, offering his sacrifice without any reference to the faith or the conversion of men—offering it indeed for those who are still sinners—and at enmity with God. Moreover it is called a "propitiation" (Λαονος or Λαοστροφιον, Rom. iii. 25: 1 John ii. 2) a "ransom" (Αναδοσθήσεις, Rom. iii. 24: 1 Cor. i. 30, &c.): which, if words mean anything, must imply that it makes a change in the relation between God and man, from separation to union, from wrath to love, and a change in man's state from bondage to freedom. In it, then, He stands out alone as the Mediator between God and man; and his sacrifice is offered once for all, never to be imitated or repeated.

Now this view of the Atonement is set forth in the Epistle to the Hebrews, as typified by the sin-offering; especially by that particular sin-offering with which the high priest entered the Most Holy Place on the Great Day of Atonement (ix. 7—12), and by that which hallowed the inauguration of the Mosaic covenant, and cleansed the vessels of its ministration (ix. 13—23). In the same way, Christ is called "our Passover, sacrificed for us" (1 Cor. v. 7); and is said, in even more startling language, to have been "made sin for us," though He "knew no sin" (2 Cor. v. 21). This typical relation is pursued even into details, and our Lord's suffering without the city is compared to the burning of the public or priestly sin-offerings without the camp (Heb. xiii. 10—13). The altar of sacrifice (δυναστία) is said to have its antitype in his Passion (xiii. 10). All the expiatory and propitiatory sacrifices of the Law are now for the first time brought into full light. And though the principle of vicarious sacrifice still remains, and must remain, a mystery, yet the fact of its existence in Him is illustrated by a thousand types. As the sin-offering, though not the earliest, is the most universal of all and forms the Atonement, which it symbolizes, is the one on which all others rest.

On the other hand, the sacrifice of Christ is set forth to us as the completion of that perfect obedience to the will of the Father, which is the natural duty of sinless man, in which He is the representative of all men, and in which He is, as it were, when reconciled to God, to "take up the Cross and follow Him." "In the days of his flesh He offered up prayers and supplications.... and was heard, in that He feared; though He were a Son, yet learned He obedience by the things which He suffered: and being made perfect" (by that suffering; see ii. 10), "He became the author of salvation to all them that obey Him" (v. 7, 8, 9).

In this view his death is not the principal object: we dwell rather on his lowly incarnation, and his life of humility, temptation, and suffering, to which that death was but a fitting close. In the passage above referred to the allusion is not to the Cross of Calvary, but to the agony in Gethsemane, which bore his human will to the will of his Father. The main idea of this view of the Atonement is representative, rather than vicarious. In the first view the "second Adam" quidd by his atoning blood the work of evil which the first Adam did; in the second He, by his perfect obedience, did that which the first Adam left undone, and, by his grace making us like Himself, calls upon us to follow Him in the same path. This latter view is typified by the burnt-offering: in respect of which the N. T. merely quotes and enforces the language already cited from the O. T., and especially (see Heb. x. 6—9) the words of Ps. xl. 6, &c., which contrast with material sacrifice the "doing the will of God." It is one, which cannot be dwelt upon at all without a previous implication of the other: as both were embraced in one set, so are they inseparably connected in idea. Thus it is put forth in Rom. xiii. 1, where the "mercy of God," i.e. the free salvation, through the sin-offering of Christ's blood, dwelt upon in all the preceding part of the epistle) are made the ground for calling on us to present our bodies, a living
SACRIFICE

sacrifice, holy and acceptable to God," inasmuch as we are all (see v. 5) one with Christ, and members of his body. In this sense it is that we are said to be "crucified with Christ" (Gal. ii. 20).

Rom. vi. 6); to have the sufferings of Christ "abound in us" (2 Cor. i. 5); even to "fill up that which is behind" (ταραττεωμενα) thereof (Col. i. 24); and to be "offered" (στηρισθαι) upon the sacrifice of the "faith" of others (Phil. ii. 17): comp. 2 Thud. iv. 6; I John iii. 16). As without the sin-offering of the Cross, this, our burnt-offering, would be impossible, so also without the burnt-offering the sin-offering will to us be unavailing.

With these views of our Lord's sacrifice on earth, as typified in the Levitical sacrifices on the outside altar, is also to be connected the offering of his intercession for us in heaven, which was represented by the incense. In the Epistle to the Hebrews, this part of his priestly office is dwelt upon, with particular reference to the offering of incense in the Most Holy Place by the high-priest on the Great Day of Atonement (Heb. ix. 24-28; comp. iv. 14-16, vi. 19, 20, vii. 25). It implies that the sin-offering has been made once for all, to rend asunder the veil (of sin) between man and God, and that the continual burnt-offering is now accepted by Him for the sake of the Great Interceding High-priest. That intercession is the strength of our prayers, and "with the smoke of its incense" they rise up to heaven (Rev. viii. 4).

[PRAYER:]

The typical sense of the meat-offering, or peace-offering, is less connected with the sacrifice of Christ himself, than with those sacrifices of praise, thanksgiving, charity, and devotion, which we, as Christians, offer to God, and "with which he is well pleased" (Heb. xiii. 15, 16) as with "an odor of sweet smell, a sacrifice acceptable to God" (Phil. iv. 18). They betoken that, through the peace won by the sin-offering, we have already been enabled to dedicate ourselves to God, and they are, as it were, the ornaments and accessories of that self-dedication.

Such is a brief sketch of the doctrine of Sacrifice. It is seen to have been deeply rooted in men's hearts; and to have been, from the beginning, accepted and sanctioned by God, and made by Him one channel of his Revelation. In virtue of that sanction it had a value, partly symbolical, partly actual, but in all respects derived from the one True Sacrifice, of which it was the type. It involved the expiatory, the self-dedication, and the eucharistic ideas, each gradually developed and explained, but all capable of full explanation only by the light reflected back from the Antitype. On the antinomian part of the subject valuable information may be found in Spencer, De Legibus Hebraeorum, and Warburton, Die. Leg. (b. ix. c. 2). On the general subject, see Migees Discourse on Atonement; the Appendix to Tholuck's Treatise on the Hebrews; Curtze, Der Alttestamentliche Opferdienst. Mitau, 1862; English translation by James Martin, Edinb. 1894, in Clark's Foreign Theol. Libr.; comp. Bibl. Sacra, ix. 27-51); and the catalogue of authorities in Winer's Realwörterb., "Offer." But it needs for its consideration little but the careful study of Scripture itself.

SADDUCEES

For other works on this subject see the references under LEVITICUS (Amer. ed.), vol. ii. p. 1553 b, and the list prefixed to the work of Kurtz, just referred to. See also an article by Dr. G. R. Noyes, The Scripture Doctrine of Sacrifice, in the Christian Examiner (Boston) for Sept. 1855, and the learned and elaborate discussion of the subject in Kalisch's Leviticus, part i. (Lond. 1857), pp. 1-116.

SADDUCES (Sadducæa). The name of SHALIM, one of the ancestors of Ezra, is so written in 2 Esdr. i. 1.

SADDAS (Saddas). [Araia: Alex. Aosta: [All: Sadas:] Archib.] Azad (1 Esdr. v. 13; comp. Ezr ii. 12). The form Sadas is retained from the Geneva version. [This form, it will be observed, is the reading of the Aldine edition. — A.]

SADDUCEUS (Saddæor: [Vat: Saddæor: [All: Saddæor:] Lebæus]. Dido, the chief at the place Caphshia," is called in 1 Esdr. viii. 15, "Saddus the captain, who was in the place of the treasury." In 1 Esdr. viii. 46 the name is written "Daddus" in the A. V., as in the Geneva version of both passages.

SADDLE. [Saddle; Furniture; Horse; Mule.]

SADDUCER (Sadducus: [Vat: Sadducus: Mii, Erato: Subaeus]. Zaddok the high-priest, ancestor of Ezra (1 Esdr. viii. 2).

SADDUCES (Saddæoci): Saddæor: Matt. iii. 7, xvi. 1, 6, 11, 12, xxi. 28, 34; Mark xii. 18; Luke xx. 27; Acts iv. 1, v. 17, xiii. 6, 7, 8). A religious party or school among the Jews at the time of Christ, who denied that the oral law was a revelation of God to the Israelites, and who deemed the written law alone to be obligatory on the nation, as of Divine authority. Although frequently mentioned in the New Testament in conjunction with the Pharisees, they do not throw such vivid light as their great antagonists on the real significance of Christianity. Except on one occasion, when they united with the Pharisees in insidiously asking for a sign from heaven (Matt. xvi. 1, 4, 6), Christ never assailed the Sadducees with the same bitter denunciations which he utters against the Pharisees: and they do not, like the Pharisees, seem to have taken active measures for causing him to be put to death. In this respect, and in many others, they appear less influential than the Pharisees in the world's history; but still they deserve attention, as representing Jewish ideas before the Pharisees became triumphant, and as illustrating one phase of Jewish thought at the time when the new religion of Christianity, destined to produce such a momentous revolution in the opinions of mankind, issued from Judaea.

 Authorities. — The sources of information respecting the Sadducees are much the same as for the Pharisees. [PHARISEES, vol. iii. p. 2472] There are, however, some exceptions negatively. Thus, the Sadducees are not spoken of at all in the fourth Gospel, where the Pharisees are frequently mentioned, John vii. 52, 55, xii. 47, 57, xviii. 3, 15-19, ix. 13; an omission which, as Geller suggests, is not unimportant in reference to the criticism of the Gospels (Urschatzung in Geschichte der Bibel, p. 107). Moreover, while St. Paul had been a Pharisee and was the son of a Pharisee, while Josephus was a Pharisee, and the Mishna was a Pharisaical digest of Pharisaical...
opinions and practices, not a single undoubted writing of an acknowledged Sadducee has come down to us, so that for an acquaintance with their opinions we are chiefly dependent on their antago-nists. This point should be always borne in mind in judging their opinions, and forming an estimate of their character, and its full bearing will be duly appreciated by those who reflect that even at the present day, with all the checks against misrep-resentation arising from publicity and the invention of printing, probably no religions or political party in England would be content to accept the state-ments of an opponent as giving a correct view of its opinions.

Origin of the name.—Like etymologies of words, the origin of the name of a sect is, in some cases, almost wholly inmaterial, while in other cases it is of extreme importance towards understand-ing opinions which it is proposed to investi-gate. The origin of the name Sadducees is of the latter description; and a reasonable certainty on this point would go far towards ensuring correct ideas respecting the position of the Sadducees in the Jewish state. The subject, however, is involved in great difficulties. The Hebrew word by which they are called in the Mishna is "Toschebc, " the plural of "Tosheh, " which undoubted-ly means "just, " or "righteous, " which is never used of any of the Sabbath, except as a proper name, and in the Anglican Ver-sion is always translated " Zadok. " (2 K. xx. 33; 2 Sam. viii. 17; 1 Chr. vi. 8, 12; Neh. iii. 4, 29, xi. 11). The most obvious translation of the word, therefore, is to call them Zadoks or Zadokites; and a question would then arise as to why they were so called. The ordinary Jewish state-ment is that they are named from a certain Zadok, a disciple of the Antigonus of Socho, who is men-tioned in the Mishna (Arba'ot i.) as having received the oral law from Simon the Just, the last of the men of the Great Synagogue. It is recorded of this Antigonus that he used to say: " Be not like servants who serve their master for the sake of re-ceiving a reward, but be like servants who serve their master without a view of receiving a reward, " and the current statement has been that Zadok, who gave his name to the Zadokites or Sadducees, misinterpreted this saying so far, as not only to maintain the great truth that virtue should be the rule of conduct without reference to the rewards of the individual agent, but likewise to proclaim the doctrine that there was no future state of rewards and punishments. (See Buxtorf, s. v. Zadok.)

Arab., or Arbe (אבר), means "arranged, " or " set in order." The author of this work was an-other Rabbi Nathan Ben Jehiel, president of the J ewish academy at Rome when he died in 106, A. D. (See Barfoce, Biblioth. iv. 291.) The reference to Rabbi Nathan, author of the treatise on the Arba'ot, is made in the Aruch under the word אבר. The treatise itself was published in a Latin translation by F. Taylor, at London, 1567. The original passage respec-ting Zadok's disciples is printed by Geiger in He-brew, and translated by him, "Urschrift," etc., p. 106.

Dr. Ginsburg, in his valuable article Sadducees, in the 51st edition of Kirwan's Cyclopaedia, of Heb. Lit. iii. 721, note, corrects Mr. Twistleton's statements respecting "the earliest mention" of Rabbi Nathan, and the time when he lived. He says: "This Rabbi Nathan or Nathanael, as he is called in the Talmud, because he was a native of Meshan in Babylonia (Rabbi Nethanel, 73 d), was one of the most distinguished Mish-

SADDUCEES One of the first editions of Lightfoot's "Novum Hebraicum," vol. ii. viii. and the Note of Maimonides in Surenhusius's "Mishna," vol. iv. 411.) If, however, the statement is traced up to its original source, it is found that there is no mention of it either in the Mishna, or in any other part of the Talmud (Geiger's "Urschrift," etc., p. 105), and that the first mention of something of the kind is in a small work by a certain Rabbi Nathan, which he wrote on the Treatise of the Mishna called the "Arab, or " Fathers." But the age in which this Rabbi Nathan lived is uncertain (Bartolocci, "Bibliotheca Judæa- rum," vol. iii. p. 770), and the earliest mention of him is in a well-known Rabbinical dictionary called the "Arach," which was completed about the year 1105, A. D. The following are the words of the above-mentioned Rabbi Nathan of the "Arab. Adverting to the passage in the Mishna, already quoted, respecting Antigonus's saying, he observes: "Antigonus of Socho had two disciples who taught the saying to their disciples, and these disciples again taught it to their disciples. At last these began to scrutinize it narrowly, and said, 'What did our Fathers mean in teaching this saying? Is it possible that a laborer is to perform his work all the day, and not receive his wages in the evening? Truly, if our Fathers had known that there is another world and future rewards, they would not have spoken thus.' They then began to separate them-selves from the Law: and so there arose two sects, the Zadokites and Baithusans, the former from Zadok, and the latter from Baithos. Now it is to be observed on this passage that it does not jus-tify the once current belief that Zadok himself mis-interpreted Antigonus's saying; and it suggests no reason why the followers of the supposed new doc-trines should have taken their name from Zadok rather than Antigonus. Bearing this in mind, in connection with several other points of the same nature, such as, for example, the total silence respec-ting any such story in the works of Josephus or in the Talmud; the absence of any other special information respecting even the existence of the supposed Zadokites; the impracticable and childish logical reasons assigned for the departure of Zadok's disciples from the Law; the circumstances that Rabbi Nathan held the tenets of the Pharisees, that the statements of a Pharisee respecting the Sadducees must always be received with a certain reserve, that Rabbi Nathan of the "Arab, for aught that has ever been proved to the contrary, may have lived as long as 1000 years after the first ap-
peformance of the Sadducees as a party in Jewish history, and that he quotes no authority of any kind for his account of their origin, it seems reasonable to reject this Rabbi Nathan's narration as unworthy of credit. Another ancient suggestion concerning the origin of the name "Sadducees" is in Epi-

photius (Agoraeus Hierese, xiv.), who states that the Sadducees called themselves by that name from "righteousness," the interpretation of the Hebrew word Zedek; and that there was likewise anciently a Zadok among the priests, but that they did not continue in the descent of that Zadok. But this statement is unsatisfactory in two respects: 1st. It does not explain why, if the suggested etymology was correct, the name of the Sadducees was not Taadikin or Zaddkites, which would have been the regular Hebrew adjective for the "Just," or "Righteous"; and 2dly. While it evidently implies that they once held the doctrines of an ancient priest, Zadok, who is even called their chief or master (κατάρανας), it does not directly assert that there was any connection between his name and theirs; nor yet does it say that the coincidence between the two names was accidental. Moreover, it does not give information as to when Zadok lived, nor what were those doctrines of his which the Sadducees once held, but subsequently departed from. But Epiphanius' statement is increased by its being coupled with an assertion that the Sadducees were a branch broken off from Essenes; or in other words Schismatic from Posideus (ἀποσιτητα ὑπὲρ αὐτὸν δο-

speries, iv., v.), for Posideus was a heretic who lived about the time of Christ (Origin, contra Celsus, ii. i. c. 17; Clemens, Recognit. ii. 8; Photinus, Bibiloth. x, xx.). And thus, if Epiphanius was correct, the opinions characteristic of the Sadducees were productions of the Christian era; a supposition contrary to the express declaration of the Pharisee Josephus, and to a notorious fact of history, the connection of Hyrcanus with the Sadducees more than 100 years before Christ. (See Josephus, Ant. xii. 3, § 6, and xviii. 1, § 2, where observe the phrase πολύ παράτητος αὐτῷ reserved against them.) Hence Epiphanius' explanation of the origin of the word Sadducees must be rejected with that of Rabbi Nathan of the Arith. In these circumstances, it is clear that to conjecture, the first point to be considered is whether the word is likely to have arisen from the meaning of "righteousness," or from the name of an individual. This must be decided in favor of the latter alternative, inasmuch as the word Zadok never occurs in the Bible, except as a proper name; and then we are led to inquire as to who the Zadok of the Sadducees is likely to have been. Now, according to the existing records of Jewish history, there was one Zadok of transcendent importance, and only one; namely, the priest who acted such a prominent part at the time of David, and who declared in favor of Solomon, when Ahia-

than took the part of Adonijah as successor to the throne (1 K. i. 32-45). This Zadok was tenth in descent, according to the genealogies, from the high-priest Aaron; and whatever may be the correct explanation of the statement in the 1st Book of Kings, ii. 35, that Solomon put him in the room of Ahiahath, although on previous occasions he had, when named with him, been always mentioned first (2 Sam. xv. 35, xix. 11; cf. viii. 17), his line of priests appears to have had decided preeminence in subsequent history. Thus, when in 2 Chr. xxxi. 10, Hezekiah is represented as putting a question to the priests and Levites generally, the an-

swer is attributed to Azariah, "the chief priest of the house of Zadok:" and in Ezekiel's prophetic vision of the future Temple, "the sons of Zadok:" and the priests the Levites of the seed of Zadok are spoken of with peculiar honor, as those who kept the charge of the sanctuary of Jehovah, when the children of Israel went astray (Ezek. xl. 43, xlii. 19, xlv. 15, xlvii. 11). Now, as the transition from the expression "sons of Zadok" and "priests of the seed of Zadok" to Zadokites is easy and obvious, and as in the Acts of the Apostles v. 17, it is said, "Then the high-priest rose, and all they that were with him, which is the sect of the Sadducees, and were filled with indignation;" it has been conjectured by Geiger that the Sadducees or Zadokites were originally identical with the sons of Zadok, and constituted what may be termed a kind of ascendant aristocracy (Urschrift, etc., p. 104). To these were afterwards attached all who for any reason reckoned themselves as belonging to the aristocracy; such, for example, as the families of the high-priest who had certain advantages under the dynasty of Herod. These were the first part of the Sadducees, and individuals of the official and governing class. Now, although this view of the Sadducees is only inferential, and mainly conjectural, it certainly explains the name better than any other, and elucidates at once in the Acts of the Apostles the otherwise obscure statement that the high-priest, and those who were with him, were the sect of the Sadducees. Accepting, therefore, this view till a more probable conjecture is suggested, some of the principal peculiarities or supposed peculiarities of the Sadducees will now be noticed in detail, although in such notice some points must be touched upon, which have been already partly discussed in speaking of the Pharisees. 1. The leading tenet of the Sadducees was the negation of the leading tenet of their opponents. As the Pharisees asserted, so the Sadducees denied, that the Israelites were in possession of an Oral Law transmitted to them by Moses. The manner in which the Pharisees may have gained acceptance for their own view is noticed elsewhere in this work (vol. iii. p. 2474); but, for an equitable estimate of the Sadducees, it is proper to bear in mind emphatically how destitute of historical evidence the doctrine was which they denied. That doctrine is at the present day rejected, probably by almost all, if not by all, Christians; and it is indeed so foreign to their ideas, that the greater number of Christians have never even heard of it, though it is older than Christianity, and has been the empha-

sis on the part and consolatation of the Jews under a series of the most cruel and wicked persecutions to which any nation has ever been exposed during an equal number of centuries. It is likewise now main-

tained, all over the world, by those who are called the orthodox Jews. It is therefore desirable, to know the kind of arguments by which at the present day, in an historical and critical age, the

---

a According to the Kleines, Sned., iv. 2, no one was "clean," in the Levitical sense, to act as a judge in capital trials, except priests, Levites, and Israelites.

#Some daughters might marry priests. This again
SADDUCEES

SADDUCEES

Doctrine is defended. For this an opportunity has been given during the last three years by a learned French Jew, Grand-Habib, of the Circumcision of Colmar (Klein, Le Judaisme, en la Vertu de la Tradition, Mullhouse, 1830), who still asserts as a fact, the existence of a Mosaic Oral Law. To do full justice to his views, the original work should be perused. But it is doing no injustice to his learning and ability, to point out that not one of his arguments has a positive historical value. Thus he relies mainly on the invincibility (as will be again noticed in this article) that a Divine revelation should not have explicitly proclaimed the doctrine of a future state of rewards and punishments, or that it should have promulgated laws, kept in such an incomplete form, and requiring so much explanation, and so many additions, as the laws in the Pentateuch. Now, arguments of this kind may be sound or unsound; based on reason, or illogical; and for many they may have a philosophico-theological value; but they have no pretense to be regarded as historical, inasmuch as the assumed premises, which involve a knowledge of the attributes of the Supreme Being, and the manner in which He would be likely to deal with man, are far beyond the limits of historical verification. An approach to the historical argument is the following (p. 10): "In the first place, nothing proves better the fact of the existence of the tradition than the belief itself in the tradition. An entire nation does not suddenly forget its religious code, its principles, its laws, the daily ceremonies of its worship, to such a point, that it could easily be persuaded that a new doctrine impressed by some impostors is the true and only explanation of its law, and has always determined and ruled its application. Holy Writ often represents the Israelites as a stiff-necked people, impatient of the religious yoke, and would not be attributing to them rather an excess of docility, a too great condescension, a blind obedience, to suppose that they suddenly consented to troublesome and rigorous innovations which some persons might have wished to impose on them some fine morning? Such a supposition destroys itself, and we are obliged to acknowledge that the tradition is not a new invention, but that its birth goes back to the origin of the religion; and that transmitted from father to son as the word of God, it has in the hands of the people, identified itself with the blood, and was always considered as an inviolable authority." But if this passage is carefully examined, it will be seen that it does not supply a single fact worthy of being regarded as a proof of a Mosaic Oral Law. Independent testimony of persons contemporary with Moses that he had transmitted such a law to the Israelites would be historical evidence; but the testimony of persons in the next generation as to the existence of such an Oral Law which their fathers told them came from Moses, would have been secondary historical evidence; but the belief of the Israelites on the point 1,200 years after Moses, cannot, in the absence of any intermediate testimony, be deemed evidence of an historical fact. Moreover, it is a mistake to assume, that they who deny a Mosaic Oral Law, imagine that this Oral Law was at some one time, as one system of teaching, introduced suddenly amongst the Israelites. The real mode of conceiving what occurred is far different. After the return from the Captivity, there existed probably amongst the Jews a large body of customs and decisions not contained in the Pentateuch; and these had practical authority over the people long before they were attributed to Moses. The only phenomenon of importance requiring explanation is not the existence of the customs sanctioned by the Oral Law, but the belief accepted by a certain portion of the Jews that Moses had divinely revealed those customs as laws to the Israelites. To explain this historically from written records is impossible, from the silence on the subject of the very scanty historical Jewish writings purporting to be written between the return from the Captivity in 538 before Christ and that uncertain period when the canon was closed, which at the earliest could not have been long before the death of Antichus Epiphanes, B. C. 164. For all this space of time, a period of about 374 years, a period as long as from the accession of Henry VIII. to the present year (1832) we have no Hebrew account, nor in fact any continuous timeline, of the Jews of the Maccabees, during which there is a total absence of contemporary Jewish history. In this dearth of historical materials, it is idle to attempt a positive narration of the circumstances under which the Oral Law became assigned to Moses as its author. It is amply sufficient if a satisfactory suggestion is made as to how it might have been attributed to Moses, and in this there is not much difficulty for any one who bears in mind how notoriously in ancient times laws of a much later date were attributed to Moyses, Lycurgus, Scolon, and Numa. The unreasonableness of supposing that the belief in the oral traditions being from Moses must have coincided in point of time with the acceptance of the oral tradition, may be illustrated by what occurred in England during the present century. During a period when the fitness of maintaining the clergy by tithes was contested, the theory was put forth that the origin of tithes was to be assigned to "an unrecorded revelation made to Adam." A new, let us suppose that England was a country as small as Judaea; that the English were as few in number as the Jews of Judaea must have been in the time of Nehemiah, that a temple in London was the centre of the English religion, and that the population of London hardly ever reached 50,000. [Jerusalem, p. 1320.] Let us further suppose that printing was not invented, that manuscripts were dear, and that few of the population could read. Under such circumstances it is not impossible that reason is unequal. Nor does there remain any other method of solving it, but by assigning the origin of the laws of Judæa to a near contemporary of Adam, or allowing an unrecorded revelation made to Adam, and by him and his descendants delivered down to posterity."
SADDUCEES

he assertion of an unrecorded revelation made to Adam, might have been gradually accepted by a large religious party in England as a divine author-
ity for their views. If this belief had continued in
the same party during a period of more than 2,000
years, if that party had become dominant in the
English Church, if for the first 250 years every
contemporary record of English history became lost
to mankind, and if all previous English writings
merely condemned the belief by their silence, so
that the precise date of the origin of the belief
could not be ascertained, we should have a parallel
to the way in which a belief in a Mosaic Oral Law
may possibly have arisen. Yet it would have been
very illogical for an English reasoner in the year
4000 A. D. to have argued from the burden and an-
noyance of paying tithes to the correctness of the
theory that the institution of tithes was owing to
this unrecorded revelation to Adam. It is not
meant by this illustration to suggest that reasons
as specious could be advanced for such a divine
origin of tithes as even for a Mosaic Oral Law.
The main object of the illustration is to show that
the existence of a practice, and the belief as to the
origin of a practice, are two wholly distinct points:
and that there is no necessary connection in time
between the introduction of a practice and the in-
roduction of the prevalent belief in its origin.

Under this head we may add that it must not be
assumed that the Sadducees, because they rejected
a Mosaic Oral Law, rejected likewise all traditions
and all decisions in explanation of passages in the
Pentateuch. Although they protested against the
assertion that such points had been divinely settled
by Moses and followed a strict and certain common
law, they could follow practically the same traditions as
the Pharisees. This will explain why in the Mishna
specific points of difference between the Pharisees
and Sadducees are mentioned, which are so im-
portant: such, e. g. as whether touching the Holy
Scriptures made the hands technically "unclean,"
in the Levitical sense, and whether the stream
which flowed when water was poured from a clean
vessel into an unclean one is itself technically
"clean" or "unclean" (Yebam, iv. 6, 7). If
the Pharisees and Sadducees had differed on all
matters not directly contained in the Pentateuch,
it would scarcely have been necessary to particu-
larize points of difference such as these, which
to Christians imbued with the genuine spirit of
Christ's teaching (Matt. xxv. 11; Luke xii. 37-40),
must appear so trifling, as almost to resemble the
products of a diseased imagination.

II. The second distinguishing doctrine of the
Sadducees, the denial of man's resurrection after
death, followed in their conceptions as a logical
conclusion from their denial that Moses had re-
vealed to the Israelites the Oral Law. For on a
point so momentous as a second life beyond the
grave, no religious party among the Jews would
have deemed themselves bound to accept any doc-
trine as an article of faith, unless it had been
proclaimed by Moses, their great legislator; and it
is certain that in the written Law of the Pent-
tateuch there is a total absence of any assertion by
Moses of the resurrection of the dead. The ab-
sence of this doctrine, so far as it involves a future
state of rewards and punishments, is emphatically
manifest from the numerous occasions for its in-
troduction in the Pentateuch, among the promises
and threats, the blessings and curses, with which a
portion of that great work abounds. In the Law
Moses is represented as promising to those who are
obedient to the commandments of Jehovah the most
alluring temporal rewards, such as success in busi-
ness, the acquisition of wealth, fruitful seasons,
victory over their enemies, long life, and freedom
from sickness (Deut. vii. 12-15, xxviii. 1-12; Ex.
xx. 12, xxiii. 25, 26); and he likewise menaces the
disobedient with the most dreadful evils which can
afflict humanity, with poverty, fell diseases, dis-
astrous and disgraceful defeats, subjugation, dis-
persion, oppression, and overpowering anguish of
heart (Deut. xxviii. 15-48); but in not a single
instance does he call to his aid the consolations
and terrors of rewards and punishments hereafter.
Moreover, even in a more restricted indefinite sense,
such as might be involved in the transmigration of
souls, or in the immortality of the soul as
believed by Plato, and by Cicero, it can be shewn
that there is a similar absence of any assertion by Moses
of a resurrection of the dead. This fact is pre-
sented to Christians in a striking manner by the
well-known words of the Pentateuch which are
quoted by Christ in argument with the Sadducees
on this subject (Ex. iii. 6, 16; Mark xii. 24, 27;
Matt. xxii. 31, 32; Luke xx. 37). It cannot be
doubted that Jehovah was the God of Abraham,
the God of Isaac, and the God of Jacob; did not
necessarily mean more than that Jehovah had been
the God of those patriarchs while they lived on
earth, without conveying a suggestion, one way or
another, as to whether they were or were not still
living elsewhere. It is true that in other parts of
the Old Testament there are individual passages
which express a belief in a resurrection, such as in
Is. xvi. 19; Dan. xii. 2; Job xix. 26, and in some
of the Psalms; and it may at first sight be a sub-
ject of surprise that the Sadducees were not con-
vinced by the authority of these passages. But
although the Sadducees regarded the books which
contained those passages as sacred, it is more than
doubtful whether any of the Jews regarded them
as sacred, in precisely the same sense as the sacred
Law. There is a danger here of confusing the ideas
which are now common amongst Christians, who
regard the whole ceremonial law as abrogated,
with the ideas of Jews after the time of Ezra,
while the Temple was still standing, or even with the ideas of orthodox modern Jews. To the Jews Moses was and is a colossal Form, preeminent in authority above all subsequent prophets. Not only did his stories of signs and wonders in Egypt and at the Red Sea transcend in magnitude and brilliancy those of any other holy men in the Old Testament, not only was he the centre in Mount Sinai of the whole legislation of the Israelites, but even the mode by which divine communications were made to him is peculiar to him alone. While others were addressed in visions or in dreams, the Supreme Being communicated with him alone mouth to mouth and face to face (Num. xii. 6, 7, 8; Ex. xxxiii. 11; Deut. v. 4, xxxiv. 10–12). Hence scarcely any Jew would have deemed himself bold to believe in man's resurrection, unless the doctrine had been proclaimed by Moses; and as the Sadducees disbelieved the transmission of any oral law by Moses, the striking absence of that doctrine from the written Law freed them from the necessity of accepting the doctrine as divine. It is not meant by this to deny that Jewish believers in the resurrection had their faith strengthened and confirmed by allusions to a resurrection in scattered passages of the other sacred writing; but then these passages were not so interpreted by means of the central light which streamed from the Oral Law. The Sadducees, however, not making use of that light, would have deemed all such passages incoherent, as being, indeed, the utterances of holy men, yet opposed to other texts which had equal claims to be pronounced sacred, but which could scarcely be supposed to have been written by men who believed in a resurrection (Is. xxxviii 18, Ps. cxv. 9, xxx. 9, lxxxviii. 10, 11, 12; Ex. ix. 4–10). The real truth seems to be that, as in Christianity the doctrine of the resurrection of man rests on belief in the resurrection of Jesus, with subsidiary arguments drawn from texts in the Old Testament, and from man's instincts, aspirations, and moral nature; so, admitting fully the same subsidiary arguments, the doctrine of the resurrection among Pharisees, and the successive generations of orthodox Jews, and the orthodox Jews now living, has rested, and rests, on a belief in the supposed Oral Law of Moses. On this point the statement of the learned Grand-Rabbi to whom allusion has been already made deserves particular attention:—What causes most surprise in perusing the Pentateuch is the silence which it seems to keep respecting the most fundamental and the most consoling truths. The doctrines of the immortality of the soul, and of retribution beyond the tomb, are able powerfully to fortify man against the violence of the passions and the seductive attractions of view, and to strengthen his steps in the regarded path of virtue: of themselves they smooth all the difficulties which are raised, all the obstructions which are made, against the government of a Divine Providence, and account for the good fortune of the wicked and the bad fortune of the just. But man searches in vain for these truths, which he desires so ardently; he in vain devours with avidity each page of Holy Writ; he does not find either them, or the simple doctrine of the resurrection of the dead, explicitly announced. Nevertheless truths so consoling and of such an elevated order cannot have been passed over in silence, and certainly God has not relied on the mere sagacity of the human mind in order to announce them only implicitly. He has trans-

mitted them verbally, with the means of finding them in the text. A supplementary tradition was necessary, indispensable; this tradition exists.

Moses received the Law from Sinai, transmitted it to Joshua, Joshua to the elders; the elders transmitted it to the prophets, and the prophets to the men of the great synagogue ("Klein, Le Judaisme ou la Verité sur le Talmud," p. 15). In connection with the disbelief of a resurrection by the Sadducees, it is proper to notice the statement (Acts xxiii. 8) that they likewise denied there was "angel or spirit." A perplexity arises as to the precise sense in which this denial is to be understood. Angels are so distinctly mentioned in the Pentateuch and other books of the Old Testament; that it is hard to understand how those who acknowledged the Old Testament to have divine authority could deny the existence of angels (see Gen. xvii. 1, xix. 1, xxii. 11, xxviii. 12; Ex. xxii. 20; Num. xxii. 24; Judg. xiv. 13; 2 Sam. xxiv. 16, and other passages). The difficulty is increased by the fact that no such denial of angels is recorded of the Sadducees either by Josephus, or in the Mishna, or, it is said, in any part of the Talmudic writings. The two principal explanations which have been suggested are, either that the Sadducees regarded the angels of the Old Testament as transitory insubstantial representations of Jehovah, or that they disbelieved in the angels of the Old Testament, but merely the angelical system which had become developed in the popular belief of the Jews after their return from the Babylonian Captivity (Hertzfd., Geschichte des Volkes Israel, iii. 364). Either of these explanations may possibly be correct; and the first, although there are numerous texts to which it did not apply, would have received some countenance from passages wherein the same divine appearance which at one time is called the "angel of Jehovah" is afterwards called simply "Jehovah" (see the instances pointed out by Gesenius, s. v. הַעַנְגָּל); Gen. xvi. 7, 13, xxii. 11, 12, xxxi. 11, 16; Ex. iii. 2, 4; Judg. vi. 14, xxii. 18, 22). Perhaps, however, another suggestion is admissible. It appears from Acts xxiii. 9, that some of the scribes on the side of the Pharisees suggested the possibility of an angel having spoken to St. Paul, on the very occasion when it is asserted that the Sadducees disbelieved in the existence of angels or spirits. The Sadducees may have disbelieved in the occurrence of any such phenomena in their own time, although they accepted all the statements respecting angels in the Old Testament; and thus the key to the assertion in the 8th verse that the Sadducees denied "angel or spirit" would be found exclusively in the 9th verse. This view of the Sadducees may be illustrated by the present state of opinion among Christians, the great majority of whom do not in any way deny the existence of angels as recorded in the Bible, and yet they certainly disbelieve that angels speak, at the present day, even to the most virtuous and pious of mankind.

III. The opinions of the Sadducees respecting the freedom of the will, and the way in which those opinions are treated by Josephus (Ant. xiii. 5, § 9), have been noticed already ("Pharisees," iii. 2478), and an explanation has been there suggested of the prominence given to a difference in this respect between the Sadducees and the Pharisees. It may be here added that possibly the great stress laid by the Sadducees on the freedom of the
SADDUCEES
SADDUCEES

will may have had some connection with their forming such a large portion of that class from which criminal judges were selected. Jewish philosophers in their study, although they knew that punishments inflicted on individuals whom a wiser moral training and a more happily balanced nature might have made useful members of society. Those Jews who were almost exclusively religious teachers would naturally insist on the inability of man to do anything good if God's Holy Spirit were taken away from him (Ps. ii. 11, 12), and would enlarge on the perils which surrounded man from the temptations of Satan and evil angels or spirits (1 Chr. xxi. 1; Tob. iii. 17). But it is likely that the tendencies of the judicial class would be more practical and direct, and more strictly in accordance with the ideas of the Levitical prophet Ezekiel (xxiii. 11-19) in a well-known passage in which he gives the responsibility of bad actions, and seems to attribute the power of performing good actions, exclusively to the individual agent. Hence the sentiment of the lines —

"Our acts our Angels are, or good or ill,
Our fatal shadows that walk by us still;"

would express that portion of truth on which the Sadducees, in inflicting punishments, would dwell with most emphasis; and as, in some sense, they disbelieved in angels, these lines have a peculiar claim to be regarded as a correct exponent of Sadducean thought. And yet perhaps, if writings were extant in which the Sadducees explained their own ideas, we might find that they reconciled these principles, as we may be certain that Ezekiel did, with other passages apparently of a different import in the Old Testament, and that the line of demar- cation between them and the Pharisees was not, in theory, so very sharply marked as the account of Josephus would lead us to suppose.

IV. Some of the early Christian writers, such as Hippolyt. Philoegnum. ix. 29, and the spurius addition to Tertull. De Pass. Heret. c. 1 (or 15) Eusebi. Hist. c. xiii. 20 and Jerome (in their respective Commentaries on Matt. xxvii. 31, 32, 33) attribute to the Sadducees the rejection of all the Sacred Scriptures except the Pentateuch. Such rejection, if true, would undoubtedly constitute a most important additional difference between the Sadducees and Pharisees. The statement of these Christian writers is, however, now generally admitted to have been founded on a misconception of the truth, and probably to have arisen from a confusion of the Sadducees with the Samaritans. See Lightfoot's Hom. Hebri- nico on Matt. iii. 7; Herzfeld's Geschichte des Volkes Israel. ii. 363. Josephus is wholly silent as to an antagonism on this point between the Sadducees and Pharisees; and it is absolutely inconceivable that on the three several occasions when he introduces an account of the opinions of the two sects, he should have been silent respecting such an antagonism if it had really existed (Ant. xiii. 5, § 9, xviii. 1, § 3; B. J. ii. 8, § 14). Again, the existence of such a momentous antagonism would be incompatible with the manner in which Josephus speaks of John Hyrcanus, who was high-priest and king of Judea thirty-one years, and who, notwithstanding, like a Pharisee, became a Sadducee towards the close of his life. This Hyrcanus, who died about 106 B. C., had been so inveterately hostile to the Samaritans, that when about three years before his death he took their city Samaria, he razed it to the ground; and he is represented to have dug canals in various parts of the soil in order to shirk the surface for water, and thereby to have diverted streams of water over it, in order to efface marks of such a city having ever existed. It the Sadducees had come so near to the Samaritans as to reject the divine authority of all the books of the Old Testament except the Pentateuch, it is very unlikely that Josephus, after mentioning the death of Hyrcanus, should have spoken of him as he does in the following manner: "He was esteemed by God worthy of three of the greatest privileges, the government of the nation, the dignity of the high-priesthood, and prophecy. For God was with him and enabled him to know future events." Indeed, it may be inferred from this passage that Josephus did not even deem it a matter of vital importance whether a high-priest was a Sadducee or a Pharisee — a latitude of tolera- tion which we may be certain he would not have indulged in, if the divine authority of all the books of the Old Testament except the Pentateuch, had been at stake. What probably had more influence than anything else in occasioning this misconception respecting the Sadducees, was the circumstance that in arguing with them on the doctrine of a future life, Christ quoted from the Pentateuch only, although there are stronger texts in favor of the doctrine in some other books of the Old Testament.

But probable reasons have been already assigned why Christ, in arguing on this subject with the Sadducees, referred only to the supposed opinions of Moses rather than to isolated passages extracted from the productions of any other sacred writer.

V. In conclusion, it may be proper to notice a fact, which, while it accounts for misconceptions of early Christian writers respecting the Sadducees, is on other grounds well worthy to arrest the attention. This fact is the rapid disappearance of the Sadducees from history after the first century, and the subsequent preponderance among the Jews of the opinions of the Pharisees. Two circumstances, indirectly, but powerfully, contributed to produce this result: 1st. The state of the Jews after the capture of Jerusalem by Titus: and 2dly. The growth of the Christian religion. As to the first point it is difficult to over-estimate the consterna- tion and dismay which the destruction of Jerusalem occasioned in the minds of sincerely religious Jews. Their holy city was in ruins; their holy and beautiful Temple, the centre of their worship and their love, had been ruthlessly burnt to the ground, and not one stone of it was left upon another: their magnificent hopes either of an ideal king who was to restore the empire of David, or of a Son of Man who was to appear to them in the clouds of heaven,

"Man is his own Star and the soul that can
Render an honest and a perfect man;
Comes all the light that it behoves, all wise;
Nothing to him falls early, or too late."

Fletcher's Lines "Upon an old ship's Fortune."
seemed to them for a while like empty dreams; and the whole visible world was, to their imagination, thick with desolation and despair. In this their hour of darkness and anguish, they naturally turned to the consolations and hopes of a future state, and the doctrine of the Sadducees that there was nothing beyond the present life would have appeared to them cold, heartless, and hateful. Again, while they were sunk in the lowest depths of depression, a new religion which they despised as a heresy and a superstition, of which one of their own nation was the object, and another the unriviled missionary to the heathen, was gradually making its way among the subjects of their detested conquerors, the Romans. One of the causes of its success was undoubtedly the vivid belief in the resurrection of Jesus, and a consequent resurrection of all mankind, which was accepted by its heathen converts with a passionate earnestness, of which those who at the present day are familiar with infamy with the doctrine of the resurrection of the dead can form only a faint idea. To attempt to check the progress of this new religion among the Jews by an appeal to the temporary rewards and punishments of the Post-Tenachic, would have been as idle as an endeavor to check an explosive power by ordinary mechanical restraints. Conscious, therefore, or unconsciously, many circumstances combined to induce the Jews, who were not Pharisees, but who resisted the new heresy, to rally round the standard of the Oral Law, and to assert that their holy legislators, Moses, had transmitted to his faithful people by word of mouth, although not in writing, the revelation of a future state of rewards and punishments. A great belief was thus built up on a great fiction; early teaching and custom supplied the place of evidence; faith in an imaginary fact produced results as striking as could have flowed from the fact itself; and the doctrine of a Mosaic Oral Law, enforcing corruptions and hopes deeply rooted in the human heart, has triumphed for nearly 1500 years in the ideas of the Jewish people. This doctrine, the pledge of eternal life to them, as the resurrection of Jesus to Christians, is still maintained by the majority of our Jewish contemporaries; and it will probably continue to be the creed of millions long after the present generation of mankind has passed away from the earth.

* Literature. — It should be noted, perhaps, that the Jewish sects are treated of in the lately discovered Philoofluous or PiJiofjioiuc fiovriova, now generally ascribed to Hippolytus, lib. ix. cc. 18-30. The Sadducees are not named by Philo, but Grossmann, De Philo. Subh. Subh. Controversia, 4 partit. Lips. 1836-38, 4to, has collected from this author a large number of passages which he supposes refer to the sects. His conjectures, however, have not been generally adopted by scholars (see  

4 In Germany and elsewhere, some of the most learned Jews decline to believe in a Mosaic Oral Law; and Judaism seems ripe to enter on a new phase. Based on the Old Testament, but avoiding the mistakes of the Karaites, it might still have a great future; but whether it could last another 1800 years with the benefit of a future life, as a revealed doctrine, depending not on a supposed revelation by Moses, but solely on muttered texts, in the Hebrew Scriptures, is an interesting subject for speculation.  

5 The primary meaning of דָּאָרָא, according to Jevens and Dietrich, is "pure;" according to First, Winer, Bibl. Real-Ratabela, and Reuss in Herzzg. Real-Encyk., art. Schadducea. The more recent writers respecting the Sadducees are mentioned under the art. PHARISEES, vol. iii. p. 2479. Among these, Keim, Deroebourq, and Hanf may be specially referred to for a view of the latest researches and opinions. See also First's On the History of the Hebrews, 2 vols. Lips. 1862-63, and J. R. Hume, Die Pharisäer u. Sadduceen als polit. Parteien, in Hilgenfeld's Zeitschr. f. wiss. Theol., 1867, x. 131-179, 239-263. A.

SADDUCEES.

1. ZADOK the ancestor of Ezra (2 Esdr. i. 1; comp. Ezra vii. 2).

2. (Sadducee). A descendant of Zerubabel in the genealogy of Jesus Christ (Matt. i. 14).

SAINTS.

2. SAFFRON (Crocus sativus, or C. sativus, crocus) is mentioned only in Cant. iv. 14 with other olorous substances, such as saffron, cassia, cumin, cinnamon, &c. than is the slightest doubt that "saffron" is the correct rendering of the Hebrew word; the ArabicCauckua is similar to the Hebrew, and denotes the Crocea sativa, or "saffron crocus." Saffron has from the earliest times been in high esteem as a perfume: "It is used," says Lasseniiluer (Hab. cap. i. p. 138), "for the same purposes as the modern pot-pourri." Saffron was also used in seasoning dishes (Apicius, p. 270) it was entered into the composition of many spiritual extracts which retained the scent (see Beekmann's Hist. of the East, i. 175, where the whole subject is very fully discussed). The part of the plant which was used was the stigma, which was pulled out of the flower and then dried. Dr. Reck says, that "sometimes the stigmas are prepared by being submitted to pressure, and thus made into cake saffron, a form in which it is still imported from Persia into India." Hasselquist (Trav. p. 36) states that in certain places, as around Magnesia, large quantities of saffron are gathered and exported to different places in Asia and Europe. Kitts (Phys. Hist. of Flora, i. 321) says that the saffron (Crocus sativus), a very different plant from the crocus, is cultivated in Syria for the sake of the flowers which are used in dyeing, but the Korkum no doubt denotes the Crocea sativa. The word saffron is derived from the Arabic Saffran, "yellow." This plant gives its name to Saffron-Walden, in Essex, where it is largely cultivated. It belongs to the Natural Order Iridaceae.

* SAINTS (derived, through the French, from the Latin sanctus) occurs in the O. T. sixteen times as the translation of כָּרוֹת (Carm.), or its cognates, and nineteen times as the translation of כָּרוֹת, which Hebrew words are with a few exceptions represented in the LXX. by ἁγιος and ἁγιασμος respectively. In some instances when applied to men "pure," "fresh;" according to Meier (Hebr. Wurzel, p. 336) "separated." Hupfeld ascribes to כָּרוֹת (Comm. on Ps. iv. 4) a passive force, "fa- 

* Ayos (from ἁγιος, ἁγιασμος, cunctate, akin to ἑγεμων), Butlermann's Lexicon, i. 226; F. trans. p. 47) seems by derivation to signify "very pure;" then "pure;" then "holy." The derivation of Ayos, "hallowed," is less certain (see Beney, Grieoh. Wurzel, 1. 434 f.). ὁ τὸν ἄγιον, common in the classics, in Biblical Greek re- 

codes from use. As a personal epithet it is applied to 

Christians but once in the N. T., and then in describ- 
nung the official character of a bishop (Tit. i. 5). ὁ τὸν ἄγιον,
describes their inherent personal character (Ps. xxx. 4, xxxii. 23, xxxiv. 9, xxxvii. 28, etc.). But in the majority of cases it seems to be used in a theocratic rather than a moral sense: so that, while having often a secondary reference, more or less marked, to holiness as the prescribed and appropriate character of those who bear it, it is applied indiscriminately (especially in the later books) to the Israel of the old covenant (cf. Ps. l. 1, xxxix. 9; Dan. vii. 18, 21, 22, 25, 27; cf. vili. 24, xii. 7; Exod. xiv. 6; Num. xvi. 3; 1 Esdr. viii. 70). In the N. T., where it is found 64 times, it uniformly corresponds to the Greek ἁγιός, and in its application to Christians it is not used to designate them distinctively as respects either their notionality or their holiness, nor does it denote outward separation, nor does it refer — at least primarily — to their moral characteristics, whether they be viewed as pardoned sinners, or as the possessors of an imputed holiness, or of some degree of actual holiness, or of some predestined to perfect holiness, or as constituting a community the greater or more important. It is generally used in the N. T. as an appellation of all Christians as Christians. On becoming Christians they become also "saints" (cf. the use of the singular in Phil. iv. 21). Yet as in the O. T. the inherent sense of the word often gleams through the theocratic, so in the N. T., agreeably to the spiritual nature of the Christian dispensation, the theocratic sense is regarded as "fulfilled" in the spiritual, the consecration is viewed more as literal and personal, and the ἁγιος are also truly ἁγιονείς (cf. 1 Cor. i. 2; Eph. i. 1, 4; 1 Pet. ii. 9.) (Note the fluctuation in the meaning of ἁγιονείς in John xvii. 17, 19: and see Heb. ii. 11.) This sense, however, is one which does not so much lie in the word itself, as result from the nature of the "people of God," which "the saints" constitute: accordingly it comes to view with different degrees of distinctness in different passages. The value of the term for moral uses is greatly augmented by this very flexibility and possible comprehensiveness of signification.

The term is also applied in the O. T. several times (Deut. xxxiii. 2; Job. 1, xv. 13; Ps. lxxxix. 5, 7; Zech. xiv. 5) to the angels as preeminently "saintly" and in one obscure passage, Hos. xi. 13 (xlii. 1, xxi. 2, xxii. 5) to holy prophets (plur. neut. jef. Josh. xxix. 19; Prov. ix. 10, xxx. 3). In the N. T., also, it is thought by many expositors to be used of holy angels in 1 Thess. iii. 13 (so Jude, ver. 14); in Rev. xv. 3 the reading "saints" is unassailable by the MSS.

Although the term is used in some passages which refer chiefly, if not exclusively, to the commemoration of the Messiah's kingdom in the world to come (Eph. i. 18; Col. i. 12; cf. Acts xx. 32, xxvi. 18), yet it is nowhere used to designate the people of God in heaven, as distinguished from those on earth. Nor is it ever restricted to the eisentimentia plius in distinction from the mass of believers.

In the saints Christ will be glorified at his coming (2 Thess. i. 10), and they will be in some sense participants in the judgment (1 Cor. vi. 3, 13; cf. Matt. xix. 28; Luke xxii. 39). Nowhere in the Scriptures are they represented as objects of worship, nor is their agency invoked.

The resurrection of saints, mentioned Matt. xxvii. 52, 53, has raised many questions, very few of which can be answered confidently. That the saints spoken of were brought to life from the dead, and that they went into Jerusalem after Christ's resurrection and were seen by many, the language leaves no doubt. That their tombs were in the vicinity of Calvary and were opened contemporaneously with the earthquake, appears to be implied (cf. ver. 54). That they were not, or at least were not solely, departed disciples of Christ seems probable; for as yet "many" of them could hardly have been "transferred in a Christian document to deceased Jews who at the same time are spoken of as ascỌqtpxovov, but still more the congruities of the case, make it probable that the word has here a distinctive force and denotes Jewish worthies (cf. 1 Pet. iii. 5). The arrangement of the words favors the interpretation that "they came forth from their sepulchres after the Lord's resurrection," according to ἀναστάσεις has been regarded by some expositors as antiquatory, by others more naturally as signifying merely "raised to life," and so distinguishing the vivification from the quitting the tombs. The majority, however, have considered the reanimation and the resurrection as simultaneous: some holding that both took place at Christ's death, and that the risen saints first "came into the holy city after his resurrection:" while others, and by far the greater number, have preferred to make the assumption that both were postponed until after Christ had risen. Possibly we may find in ἑμαυτον support for the supposition that they had died recently (and so were recognized by those to whom they appeared). Certainly there is nothing either in the use of this word or of ἀναστάσεις nor in the connotation of the received in which the incident lies imbedded, to favor the theory that their appearance was by dream or vision, and confined to the mind of the "many" who saw them. These last we may, in accordance with Acts x. 41, much prefer to have been followers of Jesus or in sympathy with him. Whether the risen saints were clothed with immortal bodies and ascended with their Lord (as the commentators have been commonly pleased to assume), or rose to die again;
whether they were the only ones among the de-
pendent whose solitude was affected immediately
by the death of Christ, or were but specimens of
an effect experienced by all the righteous, or the
ante-Christian, dead "— we have no means of
knowing.

But however perplexing our ignorance may be
respecting details, the substantial facts stated above
must be accepted by all who accept the inspired
record. To discern that record as an interpolation,
as a few critics have done, is a procedure in direct
violation of all diplomatic evidence in the case, cor-
raborated as that evidence is by one or two internal
characteristics (particularly τῶν ἁγίων τῶν ἅμων, cf.
iv. 5). Nor is there any pretext for regarding it as
a mythical amplification of the fact that graves were
opened by the earthquake. Matthew, to be sure, is
the only evangelist who mentions the incident; but
Mark and Luke concur with him in stating
that the vault of the Temple was rent. Why, then,
should we not here as in other cases consider par-
ticulars not manifestly false, rather as confirmed by
the concurrence of the other testimonies in refer-
ence to a part of the story, than as discredited by
their silence respecting the remainder? And why
should the existence of apocryphal appendages
bring suspicion upon this any more than upon other
passages of the sacred narrative upon which such
excesses were formed? Nor can the hypo-
thesis of Strauss lay claim to plausibility. He
conceives that the story was fabricated to answer a
twofold Messianic expectation of the times which
had not been fulfilled by Jesus during his ministry,
namely, that the Messiah would effect a general
resurrection of the phous dead, and that, too, a re-
resurrection to immortal life. Yet the narrative is
made to meet the first requirement only by exag-
ergating improbably the numerical force of παλαι
and concerning a resurrection to immortal life it
gives, as has been already intimated, no hint. Ob-
viously the incident ought not to be contemplated
as an isolated fact, but as one of the accompan-
iments of the crowning event in the history of a
being whose entire earthly career was attended by
miracles. Viewed thus, its blended strangeness and
appropriateness, its "probability of improba-
Bility," affords a presumption of its truth.

For a list of the treatises which the passage has
called forth, the reader may see Hase's Leben Jesu,
1855, § 119 (5th ed.). An idea of the speculations
in which writers have indulged here may be gath-
tered from Calmet's dissertation, translated in the
J. H. T.

SALAMIS (Sala): Side. SALAH, the father of Eber (Lame iii. 35).

SALAH (Σαλά: SalnAb, [a missile, weapon; also
spray]): Σαλα: SalnAb). The son of Arphaxad and
father of Eber (Gen. x. 24, xi. 12,14; Luke ii. 85).
The name is significant of extension, the cognate
verb being applied to the spreading out of the
roots and branches of trees (Jer. xviii. 8; Ez. xvii.
6). It thus seems to imply the historical fact of
the gradual extension of a branch of the Semitic
race from its original seat in Northern Assyria
Towards the river Euphrates. A place with a
similar name in Northern Mesopotamia is noticed
by Syrian writers (Nepael, u. Genesis), but we
can hardly assume its identity with the Salish of
the Bible. Ewald (Gesch. i. 354) and Von Bohlen
(Introd. to Gen. ii. 205) regard the name as pure
fititious, the former explaining it as a son or off-
spring, the latter as the father of a race. That
the name is significant does not prove it fictitious,
and the conclusions drawn by these writers are
unwarried. [The proper form of this name is SHELAM, which see. - A.]

W. L. B.

SALAMIS (Σάλαμις [prob. fr. Δαι, Æa, sen, as
being near the shore]: Salamis), a city at the
cost end of the island of Cyprus, and the first
place visited by Paul and Barnabas, on the first mission-
ary journey, after leaving the mainland at Seleucia.
Two reasons why they took this course obviously
suggest themselves, namely, the fact that Cyprus
was the native place of Barnabas, and the geographical
proximity of this end of the island to Antioch.
But a further reason is indicated by a circumstance in the
narrative (Acts xii. 5). Here alone, among all the Greek
cities visited by St. Paul, we read expressly of "syn-
agogues" in the plural. Hence we conclude that
there were many Jews in Cyprus. And this is in
harmony with what we read elsewhere. To say
nothing of possible mercantile relations in very
early times (ΗΠΩΜ: Cynus, Jews residents in
the island are mentioned during the period
when the Seleucid realm reigned at Antioch (1 Macc.
xv. 23). In the reign of Augustus the Cyprian
coppersmiths were famed to Hero of the Great
(Joseph. Ant. xvi. 4, § 5), and this would proba-
ably attract many Hellenic families to which we
may add evidence to the same effect from Philo
(Legat. ad Caes.). At the very time of St. Paul's
journey. And again at a later period, in the
reigns of Trajan and Hadrian, we are informed of
dreadful tumults here, caused by a vast multitude
of Jews, in the course of which the "whole popu-
larish city of Salamis became a desert." (Milman's
Hist. of the Jews, iii. 111, 12). We may well
believe that from the Jew of Salamis came some of
those early Cypriote Christians, who are so
prominently mentioned in the account of the first
spreading of the Gospel beyond Palestine (Acts
xi. 19, 20), even before the first missionary expe-
dition. Minson (xxi. 16) might be one of them.
Nor should it be forgotten here that He at
Salamis with Paul, and his own kinsman Barnabas;
and again he was there with the same kinsman after

a There is no propriety in associating, as many
commentators do, this incident in Matt. with the state-
ment relative to "the spirits in prison" (1 Pet. iii. 19).
Although Peter's language is generally rendered in the
versions and commentaries, "who were sometime dis-
obedient," and so Christ's preaching represented as
having taken place after his death, yet such a trans-
formation is given in disregard of the fact that καιροθήρειν
agreeing as it does with a noun which has the article
yet itself wanting it, is properly a predicate, not an
attributive, participle. Says Donaldson (Greek Gram.
3d ed., p. 552): "The participle without the article
can never be rightly rendered by the relative sentence
with a definite antecedent, which is equivalent to the
participle with an article" (cf. The New Cynus, §
304 f.). Green in his N. T. Grammar (p. 54, ed. 1892),
renders the passage: "He went and preached to the
imprisoned spirits on their being once on a time dis-
obedient, whom, etc.

Eryan Apoll. N. T. p. 201 f.
the misunderstanding with St. Paul and the separation
(2x. 39).

Salamis was not far from the modern Famagusa. It was situated near a river called the Pediouus, on low ground, which is in fact a continuation of the plain running up into the interior of the country. There was a church called by Constantius at the place where Nicosia, the present capital of Cyprus, stands. We must notice in regard to Salamis that its harbor is spoken of by Greek writers as very good; and that one of the ancient tables lays down a road between this city and Paphos, the next place which Paul and Barnabas visited on their journey. Salamis again has rather an eminent claim to be an ancestor of Christian history. Constantine or his successor rebuilt it, and called it Constantinopolis ("Salamin, quae nunc Constantia dicitur," Hieronym. Philos.), and, while it had this name, Epiphanius was one of its bishops.

Of the travellers who have visited and described Salamis, we must particularly mention Pococke (Deor. of the Erst, ii. 214) and Ross (Jews, vol. i., p. 164). It was visited by Constantius, Schwabe, Lejeune, and Quatremere, pp. 118-125). These travellers notice, in the neighborhood of Salamis, a village named St. Sergius, which is doubtless a reminiscence of Sergius Paulus, and a large Byzantine church bearing the name of St. Barnabas, and associated with a legend concerning the discovery of his relics. The legend will be found in Celsius (I. 618, ed. Bonn.). [BARNABAS: SERGIUS PAPHOS. J. S. H.]

SALAS'ADAI [4 syll. ([Alex.] Salarasabai; [Vat. Ban.] Sapirasaai: [Sin. Sapirasaai, MS. 19]) Sapirasaai, a variation for Sarnaadai (Sapirasaai, Num. i. 6) in Jud. viii. I. [ZERUBBAHDAI]. B. F. W.

SALATHIEL (SALATHIEL) Σαλαθηίλ: Salathiel: "I have asked God." 8, son of Jeconias king of Judah, and father of Zorobabel, according to Matt. i. 12; but son of Neri, and father of Zorobabel, according to Luke iii. 27; while the genealogy in 1 Chr. iii. 17-19, leaves it doubtful whether he is the son of Assir or Jeconias. It was a name of Zerubbabel his neighbor in Babylon. Even upon the incontrovertible principle that no genealogy would assign to the true son and heir of a king any inferior and private parentage, whereas, on the contrary, the son of a private person would naturally be placed in the royal pedigree on his becoming the rightful heir to the throne; we may assert, with the utmost confidence, that St. Luke gives us the true state of the case, when he informs us that Salathiel was the son of Neri, and a descendant of Nathan the son of David. And from his insertion in the royal pedigree, both in 1 Chr. and St. Matthew's Gospel, after the childish Jeconias, we infer, with no less confidence, that, on the failure of Solomon's line, he was the next heir to the throne of David. The appearance of Salathiel in the two pedigrees, though one deduces the descent from Solomon and the other from Nathan, is thus perfectly simple, and, indeed, necessary; whereas the notion of Salathiel being called Neri's son, as Yarlikey and others have thought, because he married Neri's daughter, is palpably absurd on the supposition of his being the son of Jeconias. On this last principle, you might have not two but about a million different pedigrees between Jeconias and Christ, and yet you have no rational account, why there should actually be more than one. It may therefore be considered as certain, that Salathiel was the son of Neri, and the heir of Jeconias. The question whether he was the father of Zerubbabel will be considered under that article. Besides the passages already cited, Salathiel occurs in 1 Esdr. v. 5, 48, 56, vi. 2; 2 Esdr. v. 10.

As regards the orthography of the name, it has, as noted above, two forms in Hebrew. The contracted form [Salthiel] is peculiar to Haggai, who uses it three times out of five; while in the first and last verse of his prophecy he uses the full form, which is also found in Ezra. iii. 2; Neh. xii. 1. The LXX. everywhere have Σαλαθηίλ, while the A. V. has occasionally with an eye to correspondence with Matt. and Luke) Salathiel in 1 Chr. iii. 17, but everywhere else in the O. T. SHEALTIEL.—[Genealogy of Jesus Christ; Jeohacihin.] A. C. H.

SALCAH (SALCAH or SALGAH; [in the early records of Israel as the extreme limit of Bashan (Deut. iii. 10; Josh. xii. 11) and of the tribe of Gad (1 Chr. v. 11). On another occasion the name seems to denote a district rather than a town (Josh. xii. 5). By Eschius and Jerome it is merely mentioned, appearing without their having any real knowledge of it. It is doubtless identical with the town of Saalhadi, which stands at the southern extremity of the Jebel Hauran, twenty miles S. of Kurnub (the ancient Kenuth), which was the southern outpost of the Lej, the Argob of the Bible. Saalhadi is named in both the Christian and Mosquimnan historians of the middle ages (Will of Tyre, vii. 8, "Salth ; Abulfa, in Schulten's Index geogr.; "Sarabad"). It was visited by Burchardt (Syria, Nov. 22, 1810), Setzen and others, and more recently by Porter, who describes it at some

a Possibly with an allusion to 1 Sam. i. 29, 27, 28. See Broughton's Our Lord's Family.

b It is worth noting that Josephus speaks of Zorobabel as "the son of Salathiel, of the posterity of David, and of the tribe of Judah." (J. J. xi. 3, § 10). Had he believed him to be the son of Jeconias, of whom he had spoken (x. 11, § 2), he could hardly have failed to say so. Comp. x. 7, § 1.

c Dr. Johnsons Zorobabel can hardly have died leaving no child behind him: wherefore it was that ather son

If it was not that he naturally became father to Salathiel. Though St. Luke had never left Salathiel's family up to Nathan, whose brother to Solomon, to show that Salathiel was of another family, he might have made us believe that, without any further record (Broughton, ut supra).
length (Five Years, ii. 170-116). Its identification with Salem appears to be due to Gesenius (Buechard's Reisen, p. 507).

Immediately below *Salchah* commences the plain of the great Euphrates desert, which appears to stretch with hardly an undulation from here to *Bsisce* on the Persian Gulf. The town is of considerable size, two to three miles in circumference, surrounding a castle on a lofty isolated hill, which rises 300 or 400 feet above the rest of the place (Heb. 3:10, viii). One of the gateways of the castle bears an inscription witnessing the date of A. D. 216 (180). A still earlier date, namely, A. D. 196 (Septimius Severus), is found on a grave-stone (185). Other scanty particulars of its later history will be found in Porter. The hill on which the castle stands was probably at one time a crater, and its sides are still covered with volcanic cinder and blocks of lava.

* Mr. Porter describes the present condition of this city in his Great Cities of Boshon, p. 76 f. Though long deserted, "five hundred of its houses are still standing, and from 300 to 400 families might settle in it at any moment without laying a stone, or expending an hour's labor on repairs. The circumference of the town and castle together is about 800 feet. The open doors, the empty houses, the rank grass and weeds, the struggling brambles in the doorways and windows, formed a strange, impressive picture which can never leave my memory. Street after street we traversed, the tread of our horses awakening mournful echoes and startling the faces from their dens in the palaces of Salem. The castle rises to the height of 300 feet, the southern point of the mountain range of Baschon. The view from the top embraces the plain of Boshon stretching out on the west to Hermon; the plain of Mabah on the south, to the horizon; and the plain of Arabia on the east beyond the range of vision. ... From this one spot I saw upwards of 30 towns, all of them, so far as I could see with my telescope, habitable like Salem, but entirely deserted." See the prophet's remarkable prediction of this desolation, Jer. xliii. 15-29.

II.

*SALCHAH* (Sāl'chah; E'zrub: Selchah). The form in which the name, elsewhere more accurately given *Salchah*, appears in Dent. iii. 10 only. The *Targum Pseudo-jonathan* gives it סֶלְךַּחַ ח, i. e. Selchah, though which Selchah they have supposed was here intended it is difficult to imagine.

*SALEM* (Sālēm, i. e. Shalem = whole, perfect): Σαλησία: Selonia. 1. The place of which Melchizedek was king (Gen. xiv. 18; Heb. vii. 1, 2). No satisfactory identification of it is at present possible. The indications of the narrative are not sufficient to give any clue to its position. It is not even safe to infer, as some have done, that it lay between Damascus and Sdom; for though it is said that the king of Sdom— who had probably regained his own city after the retreat of the Assyrians — went out to meet (Gen. 14:17, 18) Abram, yet it is also distinctly stated that this was after Abram had returned (Gen. 14:24) from the daughter of the kings. Indeed, it is not certain

that there is any connection of time or place between Abram's encounter with the king of Sdom and the appearance of Melchizedek. Nor, supposing this last doubt to be dispelled, is any clue afforded by the mention of the Valley of Shaveh, since the situation even of that is more than uncertain.

Dr. Wolff — no mean authority on oriental questions — in a striking passage in his last work, implies that Salem was — what the author of the Epistle to the Hebrews understood it to be — a title, not the name of a place. "Melchizedek of old ... had a royal title: he was King of Righteousness," in Hebrew Michielzechek. And he was also "King of Peace," Melch-Salem. And when Abraham came to his tent he came forth with bread and wine, and was called "the Priest of the Highest," and Abraham gave him a portion of his spoil. And just so Wolff's friend in the desert of Mero in the kingdom of Khiva ... whose name is Ab-er-yahman, which means 'Slave of the merciful God' ... has also a royal title. He is called Shakeh-Ashadat, 'King of Righteousness' — the same as Melchizedek in Hebrew. And when he makes peace between kings he bears the title, Shah-noddik, 'King of Peace' — in Hebrew Melchiz. 

To revert, however, to the topographical question: two main opinions have been current from the earliest ages of interpretation. 1. That of the Jewish commentators, who — from Oekels (Tavo- son) and Josephus (B. J. vi. 10; Ant. i. 10, § 2, viii. 3, § 2) to Kalisch (Comm. on Gen. p. 360) — with one voice affirm that Salem is Jerusalem, on the ground that Jerusalem is so called in Ps. lxvii. 2. the Psalmist, after the manner of poets, or from some exigency of his poem, making use of the archaic name in preference to that in common use. This is quite feasible; but it is no argument for the identity of Jerusalem with the Salem of Melchizedek. See this well put by Rendel (Pol. p. 833). The Christians of the 4th century held the same belief with the Jews, as is evident from an expression of Jerome ("noster domus," Ep. ad Evang. i, 7). 2. Jerome himself, however, is not of the same opinion. He states (Ep. ad Eveng. § 7) without hesitation, though apparently (as just observed) alone in his belief, that the Salem of Melchizedek was not Jerusalem, but a town near Scythopolis, which in his day was still called Salem, and where the vast ruins of the palace of Melchizedek were still to be seen. Elsewhere (onon. "Salem") he locates it more precisely at eight Roman miles from Scythopolis, and gives its then name as Salamis. Further, he identifies this Salem with the Salim (Σαλίμ) of St. John the Baptist. That is Salem existed where St. Jerome thus places it there need be no doubt. Indeed, the name has been doubted. But the name of the place is perhaps possible; and according to the parallel distance below Betan by Mr. Van de Velde, at a spot otherwise suitable for Σαλίμ. But that this Salem, Salim, or Salaminas was the Salem of Melchizedek, is as uncertain as that Jeru- salem was so. The ruins were probably as much the ruins of Melchizedek's palace as the remains at Hiroh, the boundary three miles north of Jerusalem and those of "Abraham's house." Nor is the decision assisted by a consideration of Abram's oneway route. He probably brought back his party by
SALEM

the road along the Ghor as far as Jericho, and then turning to the right ascended to the upper level of the country in the direction of Maaneh; but whether he crossed the Jordan at the Jise Hewst Yukah above the Lake of Gennesaret, or at the Jise Mejanina below it, he would equally pass by both Sezytopolis and Jerusalem. At the same time it must be confessed that the distance of Salem (at least eighty miles from the probable position of Sodom) makes it difficult to suppose that the king of Sodom can have advanced so far to meet Abram, adds its weight to the statement that the meeting took place after Abram had returned, — not during his return, — and is thus so far in favor of Salem being Jerusalem.

3. Professor Ewald (Geschichte, i. 410, note) pronounces that Salem is a town on the further side of Jordan, on the road from Damascus to Sodom, quoting at the same time John iii. 23, but the writer has in vain endeavored to discover any authority for this, or any notice of the existence of the name in that direction either in former or recent times.

4. A tradition given by Eusebius, a writer known chiefly through fragments preserved in the De Praeparatione Evangelicae of Eusebius (ix. 17), differs in some important points from the Biblical account. According to this the meeting took place in the sanctuary of the city Argarizim, which is interpreted by Eusebius to mean "the Mountain of the Most High." Argarizim is of course here Gerizim, Mount Gerizim. The source of the tradition is, therefore, probably Samaritan, since the encounter of Abram and Melchizedek is one of the events to which the Samaritans lay claim for Mount Gerizim. But it may also proceed from the identification of Salem with Shechem, which lying at the foot of Gerizim would easily be confounded with the mountain itself. [See Salem.]

5. A Salem is mentioned in Judith iv. 4, among the places which were seized and fortified by the Jews on the approach of Holophernes. "The valley of Salem," as it appears in the L. V. (ἐν αἰλάβα Ζαλίμα), is possibly, as Echund has ingeniously suggested (Pol. "Salem," p. 577), a corruption of εἰς αἰλάβα εἰς Ζαλίμα — "into the plain to Salem. If Αἰλάβα is here, according to frequent usage, a corruption, "plain to" or "alien to" the ancient identity, must surely be that mentioned by Jerome, and accordingly noticed. But in this passage it may be with equal probability the broad plain of the Makkab which stretches from Edad and Gerizim on the one hand, to the hills on which Salim stands on the other, which is said to be still called the "plain of Salim" (Porter, Handbook, p. 340) and through which ran the central north road of the country. Or, as is perhaps still more likely, it refers to another Salim near Zeriu (Jezered), and to the plain which runs up between these two places, as far as Jesim, and by which lay directly in the ruler of the Assyrian army. There is nothing to show that the invaders reached as far into the interior of the country as the plain of the Makkab. And the other places enumerated in the verse seem, as far as they can be recognized, to be points which guarded the main approaches to the interior (one of the chief of which was by Jereced and Engannim), not towns in the interior itself, like Shechem, or the Salem near it.

2. (κατα θεόν·: in saec. Ps. lix. 2.) It seems to be agreed on all hands that Salem is here employed for Jerusalem, but whether as a mere allusion to suit some exigency of the poetry, and point the allusion to the peace (σαλημ) which the city enjoyed through the protection of God, or whether, after a well-known habit of poets, it is an antique name preferred to the more modern and familiar one, is a question not yet decided. The latter is the opinion of the Jewish commentators, but are grounded on their assumption that the Salem of Michalzizkoz was the city which afterwards became Jerusalem. This is to beg the question. See a remarkable passage in Geiger's Ueberschrift, etc., pp. 74-76.

The antithesis in verse 1 between "Judah" and "Israel" would seem to imply that some sacred place in the northern kingdom was being contrasted with Zion, the sanctuary of the south. And if there were in the Bible any sanction to the identification of Salem with Shechem (noticed above), the passage might be taken as referring to the continued relation of God to the kingdom of Israel. But there are no materials even for a conjecture on the point. Zion the sanctuary, however, being named in the one member of the verse, it is tolerably certain that Salem, if Jerusalem, must denote the secular part of the city—a distinction which has been already noticed [vol. ii. p. 1321] as frequently occurring and implied in the Psalms and Prophecies.

G.

* In the passage quoted above, "in Judah is God known, his name is great in Israel," we recognize not "an antithesis" but the synonymous parallellism of Hebrew poetry—each term being generic and designating the whole nation, as in Ps. cxxiv. 2—"Judah was his sanctuary, and Israel his dominion"—where the words will bear no other construction. In the next verse—"in Salem also is his tabernacle, and his dwelling-place in Zion"—we understand the names as also cognate, not "contrasted," each indicating the Holy City as the special seat of divine worship. We are not able to trace in the sacred writings referred to above, any clear distinction between the secular Jerusalem

this name for any part of the plain. The name, given in answer to repeated questions, for the eastern branch or leg of the Moluk was always Wady Souja.

The above is the reading of the Vulgate and of the "Galilian Parer." But in the Liber Pontificalis Justinianus Fredericum orientalium, in the Divinae Bibliothecae included in the Benedictine edition of Jerome's works, the reading is Salem.

The Aramaic are said to use the same abra abbreviation (Jerome, The. p. 1232 b). The preference of an archaic to a modern name will surprise no student of poetry. Few things are of more constant occurrence.

a Professor Stanley seems to have been the first to call attention to this (S. & F. p. 249). See Eusebii Fragmenta, auctore G. A. Kühlimer (Berlin, 1840); and of those excellent monographs which we owe to the German academic custom of demanding a treatise at each step in honors.

b Pityn uses nearly the same form — Argaric (H. N. v. 14).

c Ailana is commonly employed in Palestine topography for the great valley of the Jordan (see Eusebius und Jerome, Oeconomia, "Ailana"). But in the Book of Judith it is used with such less precision in the general sense of a valley or plain.

d The writer could not succeed (in 1801) in eliciting...
and the sacred Zion, but find the phrases used interchangeably, sometimes with a secular reference, and each sometimes in a spiritual relation.

4. SALIM (Σαλήμ; Alex. Ἀλῆς: Salim). A place named (John i. 23) to denote the situation of Jesus at the scene of St. John's last baptisms—Salim being the well-known town or spot, and έξων a place of fountains, or other water, near it. There is no statement in the narrative itself fixing the situation of Salim, and the only direct testimony we possess is that of Eusebius and Jerome, who both affirm unmistakably (Onom. "έξων") that it existed in their day near the Jordan, eight Roman miles south of Scythopolis. Jerome adds (under "Σαλημ") that its name was then Salmusins. Elsewhere (Ep. ad Evangelist., §§ 7, 8) he states that it was identical with the Salim of Melchizedek.

Various attempts have been more recently made to determine the locality of this interesting spot. Mr. Alfred, Greek Text, prop. proposes SALLUM and AXIN, in the arid country far in the south of Judaea, entirely out of the circle of associations of St. John or our Lord. Others identify it with the SALLUM of 1 Sam. ix. 4, but this latter place is itself unknown, and the name in Hebrew contains סל, to correspond with which the name in St. John should be Ἀλῆς or Σαλῆς.

1. Dr. Robinson suggests the modern village of Salim, three miles E. of Nablus (Bibl. Res. iii. 333), but this is no less out of the circle of St. John's ministrations, and is too near the Samaria-towns: and although there is some reason to believe that the village contains "two sources of living water" (ibid. 298), yet this is hardly sufficient for the abundance of deep water implied in the narrative. A writer in the Colonial Ch. Chron., No. exxvii. 464, who concurs in this opinion of Dr. Robinson, was told of a village an hour east (3) of Salim, "named Ha-ab, with a copious stream of water." The district east of Salim is a blank in the maps. Yeom lies about 1 hour S. E. of Salim, but this can hardly be the place intended; and in the description of Van de Velde, who visited it (i. 303), no stream or spring is mentioned.

2. Dr. Packer (City, etc., p. 654) is filled with an assessed conviction that Salim is to be found in Wady Seelim, and έξων in the copious springs of Ain Farash (ibid. p. 559), among the deep and intricate ravines some five miles N. E. of Jerusalem. This certainly has the name in its favor, and if the glowing description and pictorial wood-cut of Dr. Packer may be trusted—has water enough, and sufficient depth for the purpose.

3. The name of Salim has been lately discovered by Mr. Van de Velde (Syr. f. Pol. ii. 345, 346) in a position exactly in accordance with the notice of Eusebius, namely, six English miles south of Beisan, and two miles west of the Jordan. On the northern base of Tell Redijah is a site of ruins, and near it a Mussulman tomb, which is called by the Arabs Sheghal Salim (see also Mommsen, p. 145). Dr. Robinson (iii. 333) compiles that the name is attached only to a Mussulman sanctuary, and also that no ruins of any extent are to be found on the spot: but with regard to the first objection, even Dr. Robinson does not dispute that the name is there, and that the locality is in the closest agreement with the notice of Eusebius.

As to the second it is only necessary to point to Kefer-Saba, where a town (Antipatris), which so late as the time of the destruction of Jerusalem by the Venetians fell, and extensively fortified, has absolutely disappeared. The career of St. John has been examined in a former part of this work, and it has been shown with great probability that his progress was from south to north, and that the scene of his last baptisms was not far distant from the spot indicated by Eusebius, and now recovered by Mr. Van de Velde. [JORDAN, ii. p. 1457.] Salim fulfills also the conditions implied in the name of έξων (springs), and the direct statement of the text, that the place contained abundance of water. The brook of Wady Chusn runs close to it, a splendid fountain gushes out beside the Ήηγ, and rivulets wind about in all directions.

. . . Of few places in Palestine could it so truly be said, 'Here is much water'" (Syr. f. Pol. ii. 346). [Έξων, Amer. ed.]

A tradition is mentioned by Ruband (Palaestina, p. 978) that Salim was the native place of Simon Zebes. This in itself seems to imply that its position was, at the date of the tradition, believed to be nearer to Galilee than to Judæa.

G.

2. (On. in Vat. MS.; also in Rom., Alex., F.A.: Σαλμωνίας Σαλλόμως [Comp. Σαλλόμως: Selom]. The head of one of the courses of priests who returned with Zerubbabel (Neh. xii. 20). Called also SALLUM.

3. ΣΑΛΛΟΜΟΣ (Σαλλόμως; [Vat. Alex. Σαλλόμως: Salum]). 1. Saul (1 Esdr. ix. 25; comp. Est. x. 24).
priest of Bethlehem, where his family contained so many centuries, perhaps till she reign of Domitian (Enseh. Eccles. Hist. ii. 29), he may be called the founder of the house of David. Besides Bethlehem, the Netophathites, the house of Joab, the Zorites, and several other families, looked to Solomon as their head (1 Chr. ii. 54, 55).

Two circumstances connected with Solomon have caused some perplexity: one, the variation in the orthography of his name, the other, an apparent variation in his genealogy.

As regards the first, the variation in proper names (whether caused by the fluctuations of copyists, or whether they existed in practice, and were favored by the significance of the names), is so extremely common, that such slight differences as those in the three forms of this name are scarcely worth noticing. Compare e. g. the different forms of the name Shimeon, the son of Jesse, in 1 Sam. xvi. 9; 2 Sam. xiii. 3; 1 Chr. ii. 13; or of Simon Peter, in Luke v. 4, &c.; Acts xv. 14. See other examples in Hervey's General, of our Lord, cc. vi. and x. Moreover, in this case, the variation from Solomon to Solowos takes place in two successive verses, namely, Ruth iv. 20, 21, where the notion of two different persons being meant, though in some degree sanctioned by the authority of Dr. Kennicot (Dissert. i. 184, 543), is not worth refuting. As regarding the Salma of 1 Chr. ii. 51, 54, his connection with Bichileh identifies him with the son of Nahshon, and the change of the final ש into ב does not belong to the late date of the book of Chronicles. The name is so written also in 1 Chr. ii. 11. But the truth is that the sole reason for endeavoring to make two generations out of Salma and Solomon, is the wish to lengthen the line between Salma and David, in order to meet the false chronology of those times.

The variation in Salmon's genealogy, which has induced some to think that the Salma of 1 Chr. ii. 51, 54 is a different person from the Salma of 1 Chr. ii. 11, is more apparent than real. It arises from the circumstance that Bichilem Ephrathah, which was Solomon's inheritance, was part of the territory of Caleb, the grandson of Ephrathah; and this caused him to be reckoned among the sons of Caleb. But it is a complete misunderstanding of the language of such topographical genealogies to suppose that it is meant to be asserted that Salma was the literal son of Caleb. Mention is made of Salma only in Ruth iv. 20, 21; 1 Chr. ii. 11, 53, 54; Matt. i. 4, 5; Luke iii. 32. The questions of his age and identity are discussed in the General, of our Lord, cc. iv. and x.; Jackson, Chron. Antiq. i. 171; Haile, Antiqu. iii. 44; Bur torino, Gener. i. 189; Dr. Mill, Vindict. of our Lord's Geneal. p. 123, &c.

gests analogous to יַכַּהֲקָא, יֵכַּהֲקָא. Hiphil of

SALMON 2791

prac.-all., Fürst]: סַלֹּם; [Vat. Alex. Equm-]

Salmou, Judg. ix. 48). The name of a hill near Shechem, on which Abimelech and his followers cut down the boughs with which they set the tower of Shechem on fire. Its exact position is not known.

It is usually supposed that this hill is mentioned in a verse of perhaps the most difficult of all the Psalms (v's. 11v. 14); and this is probable, though the passage is peculiarly difficult, and the precise allusion intended by the poet seems hopelessly lost. Commentators differ from each other; and Forst, within 176 pages of his Htthuberter-

buch, differs from himself (see and ).

Indeed, of six distinguished modern commentators — De Wette, Hitzig, Ewald, Hengstenberg, De-

itzsch, and Hupfeld — no two give distinctly the same meaning; and Mr. Keble, in his admirable

Version of the Psalms, gives a translation which, though poetical, as was to be expected, differs from any one of these interpretations. This is not the place for an exhaustive examination of the passage. It may be mentioned, however, that the literal translation of the words יַכַּהֲקָא יֵכַּהֲקָא is "Thou makest it snow," or "It snows," with liberty to use the word either in the past or in the future tense. As notwithstanding ingenious attempts, this supplies no satisfactory meaning, recourse is had to a translation of doubtful validity, "Thou makest it white as snow," or "It is white as snow" — words to which various metaphorical meanings have been attributed. The allusion which, through the Lexicon of Gesenius, is most generally received, is that the words refer to the ground being snow-white with bones after a defeat of the Canaanite kings; and this may be accepted by those who will admit the scarcely permissible meaning, "white as snow," and who cannot rest satisfied without attaching some definite significance to the passage. At the same time it is to be remembered that the figure is a very hard one: and that it is not really justified by passages quoted in illustration of it from Latin classical writers, such as, "et nique ingentes ossibus aliert" (Virg. En. xii. 36); and "humani ossibus alter humus" (Ovid, Fast. i. 558), for in these cases the word "bones" is actually used in the text, and is not left to be supplied by the imagination. Granted, however, that the allusion is made to bones of the skin, there is a divergence of opinion as to whether Solomon was mentioned simply because it had been the battle-ground in some great defeat of the Canaanite kings, or whether it is only introduced as an image of snowy whiteness. And of these two explanations, the first would be the most probable, since the Canaanites cannot have been a very high mountain, as the highest mountains near Shechem are Elah and Gerizim, and of these Elah, the highest of the two, is only 1,028 feet higher than the city (see color: for these words have a significance of color in Kit. The exactly analogous word is יַכַּהֲקָא, "he makes it rain," which bears the same relation to יַכַּהֲהָא ("rain," which לֹּם bears to לֹּם, "snow," Owing, probably, to Hebrew religious con-

ceptions of natural phenomena, no instance occurs of יַכַּהֲקָא used as a neuter in the sense of "it rains;" though this would be grammatically admissible.
SALMON

Eral. vol. i. p. 640; and Robinson's Geomor. p. 
359 a). If the poet had desired to use the image of a snowy mountain, it would have been more natural to select Hermon, which is visible from the eastern brow of Gerizim, is about 10,000 feet high, and is covered with perpetual snow. Still it is not evident that this circumstance by itself would be conclusive; for there may have been particular associations in the mind of the poet, unknown to us, which led him to refer to Salmon.

In despair of understanding the allusion to Salmon, some suppose that Salmon, i.e. Tsalmun, is not a proper name in this passage, but merely signifies "darkness;" and this interpretation, supported by the Targum, though opposed to the Septuagint, has been adopted by Ewald, and in the first statement in his Lexicon is admitted by Furst. Since teshuva signifies "shuld," this is a bare etymological possibility. But no such word as teshuva occurs elsewhere in the Hebrew language: while there are several other words for darkness, in different degrees of meaning, such as the ordinary word choshek, qophel, apophel, and varaphel.

Unless the passage is given up as corrupt, it needs more in accordance with reason to admit that there was some allusion present to the poet's mind, the key to which is now lost; and this ought not to surprise any scholar who reflects how many allusions there are in Greek poets — in Pindar, for example, and in Aristophanes— which would be wholly unintelligible to us now, were it not for the notes of Greek scholars. To these notes there is nothing exactly analogous in Hebrew literature; and in the absence of such assistance, it is unavoidable that there should be several passages in the O. T. respecting the meaning of which we must be content to remain ignorant. E. T.

SALMON the father of Boaz (Ruth iv. 20, 21; Matt. i. 4, 5; Luke iii. 32). [Salma.]

SALMO'NE (Σαλμόνη: Salmone). The East point of the island of Crete. In the account of St. Paul's voyage to Rome this promontory is mentioned in such a way (Acts xxvii. 7) as to indicate a careful illustration both of the navigation of the ancients and of the minute accuracy of St. Luke's narrative. We gather from other circumstances of the voyage that the wind was blowing from the N. W. (ἐστρέφων, ver. 4; ἐβαρένθη, ver. 7). [See MYRA.] We are then told that the ship, on making Cnidus, could not, by reason of the wind, hold on her course, which was past the south point of Greece, W. by S. She did, however, just fetch Cape Salmoine, which bears S. W. by S. from Cnidus. Now we may take it for granted that she could have made good a course of less than seven points from the wind [Ship]; and, starting from this assumption, we are at once brought to the conclusion that the wind must have been between N. N. W. and N. W. W. Thus what Polybius would have called an "undesigned coincidence" is elicited by a cross-examination of the narrative. This ingenious argument is due to Mr. Smith of Jordanhill (Voy. and Shipwreck of St. Paul, pp. 73, 74, 2d ed.), and from him it is quoted by Conybeare and Howson (Life and Lkps. of St. Paul, ii. 393, 2d ed.). To these books we must refer for fuller details. We may just add that the ship had had the advantages of a weather shore, smooth water, and a favorable current, before reaching Cnidus, and that by running down to Cape Salmoine the sailors obtained similar advantages under the lee of Crete, as far as Fair Havens, near Lasca. J. H. E.

* The northeast point of Crete is the present Cape Sidero, and has generally been supposed (as above) to be Luke's Salmoine. Captain Spratt, in N. S., dissenting from this opinion (Travel and Researches in Crete, Lond. 1850). He admits that the ancient writers, generally at least, applied the name to that Cape, but thinks that Luke refers to the promontory —cutting out toward the east some miles to the south of Cape Sidero, and called Plaka. His reasons for this conclusion in the case of Luke are, first, that Cape Sidero is, in truth, not the landhead or point his ship would keep nearest to in coming from Cnidus; and, secondly, that this promontory south of Grandes Bay, called Plaka by the natives, is indeed now by some Levantine navigators called Cape Salmoine, to distinguish it from Cape Sidero. Purdy (New Sailing Directions, etc., p. 69, Lond. 1834) writes the name Salomone, but must refer, of course, to the island of Crete.

SAL'OMON (Σαλόμων: Solomon). The Greek form 1. of Salmone, the father of Hilkiah (Bar. i. 7). [Shalum.] 2. (Salomone) of Salu the father of Zimri (1 Marc. ii. 29). [SAL.]

SAL'OME (Σαλώμη: Salome). 1. The wife of Zebedee, as appears from comparing Matt. xxvii. 56 with Mark xv. 40. It is further the opinion of many modern critics that she was the sister of Mary, the mother of Jesus, to whom reference is made in John xix. 25. The words admit, however, of another and hitherto generally received explanation, according to which they refer to the "Mary the wife of Cleophas" immediately afterwards mentioned. In behalf of the former view, it may be urged that it sets rid of the difficulty arising out of two sisters having the same name — that it harmonizes John's narrative with those of Matthew and Mark — that this circuitous manner of distinguishing his mother is in character with St. John's manner of describing himself — that the absence of any connecting link between the second and third designations may be accounted for on the ground that the four are arranged in two distinct couples — and, lastly, that the Peshto, the Persian, and the Ethiopic versions mark the distinction between the second and third by interpolating a conjunction. On the other hand, it may be urged that the difficulty arising out of the name may be disposed of by assuming a double marriage on the part of the father — that there is no necessity to harmonize John with Matthew and Mark, for that the time and the place in which the groups are noticed differ materially — that the language addressed to John, "Behold thy mother!" favors the idea of the absence rather than of the presence of his natural mother — and that the varying traditions a current in the early Church as to Salome's parents, worthless as they are in themselves, yet bear a negative testimony against the idea of her being related to the mother of Jesus. Altogether we can hardly regard the point as settled, though the

lxxvi. 8: according to another, to wife of Joseph (Nicol. H. E. ii. 31).
SALT, weight of modern criticism is decidedly in favor of the former view (see Wieseler, Stud. u. Krit. 1810, p. 648). The only events recorded of Sabome are that she preferred a request on behalf of her two sons for seats of honor in the kingdom of Heven (Matt. xx. 29), that she attended at the cremation of Jesus (Mark xv. 40), and that she visited his sepulchre (Mark xvi. 1). She is mentioned by name only on the two latter occasions.

2. The daughter of Herodias by his first husband, Herod Philip (Joseph. Ant. xviii. 3, § 4). She is the "daughter of Herodias" noticed in Matt. xiv. 6 as the daughter of the Danite Antipas, and as procuring at her mother's instigation the death of John the Baptist. She married in the first place Philip the tetarch of Trachonitis, her paternal uncle, and secondly Aristobulus, the king of Chaldis.

W. L. B.

SALT (Greek: άλας; Lat. sal). Indispensable as salt is to ourselves, it was even more so to the Hebrews, being to them not only an appointing condiment in the food both of man (Job vi. 6) and beast (Is. xxx. 24, see margin), and a most valuable antidote to the effects of the heat of the climate on animal food, but also entering largely into their religious observances as an antiseptic, or as procuring at her mother's instigation the death of John the Baptist. She married in the first place Philip the tetarch of Trachonitis, her paternal uncle, and secondly Aristobulus, the king of Chaldis.

W. L. B.

SALT, CITY OF 2793

and become saltless (μαρμαρός, Matt. x. 9). The same fact is implied in the expressions of Phiny, sol necris (xi. 39), sol indecorum (xxvi. 44); and Maundrell (Early Travelers, p. 512, Edin.) notes that he found the surface of a salt rock in this condition. The associations connected with salt in oriental countries are important. As one of the most essential articles of diet, it symbolized hospitality; as an antiseptic, durability, fidelity, and purity. Hence the expression, "covenan of salt" (Lev. ii. 13; Num. xvii. 10; 2 Chr. xiii. 5), as binding an individual or a community to his friends; and also the expression, "salted with the salt of the palace" (Est. iv. 14), not necessarily meaning that they had "maintenance from the palace," as the A. V. has it, but that they were bound by sacred obligations of fidelity to the king. So in the present day, "to eat bread and salt together" is an expression for a league of mutual unity (Russell, Αββαί, i. 232); and on the other hand, the Persian term for traitor is nemekhurvan, "faithless to salt" (Gesen. Thes. p. 790). It was probably with a view to keep this idea prominently before the minds of the Jews that the use of salt was enjoined on the Israelites in their offerings to God; for in the first instance it was specifically ordered for the meat-offering (Lev. ii. 13), whereby in the second place, if澜在 was not liable to corruption. The extension of its use to burnt sacrifices was a later addition (Ez. xxxii. 24; Joseph. Ant. iii. 9, § 1), in the spirit of the general injunction at the close of Lev. ii. 13. Similarly the heathens accompanied their sacrifices with salted barley-meal, the Greeks with their ὀλυμπείαν (Hom. Il. i. 449), the Romans with their ulei solis (Polyb. iii. 4), or their sole fruges (Virg. Æn. ii. 133). It may of course be assumed that in all of these cases salt was added as a condiment; but the strictness with which the rule was adhered to—no sacrifice being offered without salt (Plin. xxxii. 41), and still more the probable, though perhaps doubtful, admixture of it in incense (Ex. xxx. 38, where the word rendered "temple" may be by some understood as "salt")—leads to the conclusion that there was a symbolical force attached to its use. Our Lord refers to the sacrificial use of salt in Mark ix. 49, 50, though some of the other associations may also be implied. The purifying property of salt, as opposed to corruption, led to its selection as the outward sign in Elias's miracle (2 K. ii. 20, 21), and is also developed in the N. T. (Matt. v. 13; Col. iv. 6). The custom of rubbing infants with salt (Ex. xvi. 4) originated in sanitary considerations, but received also a symbolical meaning. W. L. B.

SALT, CITY OF (Σάλτος, Σάλτον) : aί πόλεις Σαλάνιν: Alex. aί πόλεις Σαλάνιν: civitas salina. The fifth of the six cities of Judah which lay in the "wilderness" (Josh. xiv. 62). Its proximity to En-gedi, and the name itself seem to point to its being situated close to or at any rate in the neighborhood of the Salt Sea. Dr. Robinson (Bibl. Res. ii. 108) expresses his belief that it lay somewhere near the plain of the salt coast that later he would identify with the Valley of Salt. This, though possibly supported by the reading of the Vatican i.Ν.Χ., "the cities of Sodom," is at present a mere conjecture, since no trace of the name or the city has yet been discovered in that position. On the other hand, Mr. Van de Velde (Spr. ή Pol. B
SALT SEA

The Lake Seiel when finally of ravines or ravines of the Hebrew it is very similar. G.

SALT SEA. [See, the Salt.]

SALT, VALLEY OF (πάλα Σαλτ, but twice with the article, Παλατίον; Гефелем, Гефел, καλάς, and σαράγης, των άλων; Alex. Ἴσμαλα, Ἴσμαλα: Veldis Saltinorum). A certain valley, or perhaps more accurately a "ravine," the Hebrew word גֵּדָר appearing to bear that signification, in which occurred two memorable victories of the Israelite arms.

1. That of David over the Edomites (2 Sam. viii. 13; 1 Chr. xviii. 12). It appears to have immediately followed his Syrian campaign, and was itself one of the incidents of the great Edomite war of extermination. The battle in the Valley of Salt appears to have been conducted by Abishai (1 Chr. xviii. 12), but David and Joab were both present in person at the battle and in the pursuit which ensued. Joab was left behind for six months to consolidate the doom of the conquered country (1 K. xi. 15, 16; Ps. lx. title). The number of Edomites slain in the battle is uncertain: the narratives of Samuel and Chronicles both give it at 18,000, but this figure is lowered in the title of Ps. lx. to 12,000.

2. That of Amaziah (2 K. xiv. 7; 2 Chr. xxv. 11), which is recorded as having slain ten thousand Edomites in this valley, and then to have proceeded, with 10,000 prisoners, to the stronghold of the nation at bos-Sela, the Cliff, i.e. Petra. and, after taking it, to have massacred them by hurling them down the precipice which gave its ancient name to the city.

Neither of these notices affords any clue to the situation of the Valley of Salt, nor does the context mention of the name ("Genuela" and "Mela") in the Onomasticon. By Josephus it is not named on either occasion. Seetzen (Reisen, ii. 356) was probably the first to suggest that it was the broad open plain which lies at the lower end of the Dead Sea, and intervenes between the lake itself and the range of heights which crosses the valley at six or eight miles to the south. The same view is taken (more decisively) by Dr. Robinson (Bibl. Res. ii. 106). The plain is in fact the termination of the ḫówr or valley through which the Jordan flows from the Lake of Tiberias to the Dead Sea. Its N. W. corner is occupied by the Khossm Eshón, a mountain of rock salt, between which and the lake is an extensive salt marsh, while salt streams and brackish springs pervade, more or less the entire western half of the plain. Without presuming to controvert the suggestion which can hardly be affirmed with safety in the very imperfect condition of our knowledge of the inaccessible regions S. and S. E. of the Dead Sea, it may be well to call attention to some considerations which seem to stand in the way of the implicit reception which most writers have given it since the publication of Dr. R.'s Researches.

(a.) The word Ge (גייל), employed for the place in question, is not, to the writer's knowledge, elsewhere applied to a broad valley or sunk plain of the nature of the lower ḫówr. Such tracts are denoted in the Scripture by the words Enoch or Bik'ôţ, while Ge appears to be reserved for cliffs or ravines of a deeper and narrower character.

[VALLEY.]

(b.) A priori, one would expect the tract in question to be called in Scripture by the peculiar name uniformly applied to the more northern parts of the same valley—ha-Arâbôth—in the same manner that the Arabs now call it el-Ḥôhr— בעולם being their equivalent for the Hebrew Arâbôth. (c.) The name "Salt," though at first sight conclusive, becomes less so on reflection. It does not follow, because the Hebrew word שבך signifies salt, that the river was salt. A case exactly parallel exists at el-Mîhî, the representative of the ancient Mount Arâbôth. Some sixteen miles west of Petra, the name like שבך, milh signifies salt; but there is no reason to believe that there is any salt present there, and Dr. Robinson (Bibl. Res. ii. 201, note) himself justly addresses it as "an instance of the usual tendency of popular pronunciation to reduce foreign proper names to a significant form."

Josâb (el-Mîhî is the Arabic representative of the Hebrew Moláhah, so possibly was ge-ḇôkâh the Hebrew representative of some archaic Edomite name.

(d.) What little can be inferred from the narrative as to the situation of the Ge-Melah is in favor of its being nearer to Petra. Assuming Sabh to be Petra (the chain of evidence for which is tolerably connected), it seems difficult to believe that a single or two prisoners should have been dragged for upwards of fifty miles through the heart of a restless and most difficult country, merely for massacre.

G.

SALUM (סָלום, [referred]: סָלָם; Gen. [Comp. Mth]; סַלָם; Solo). The father of Zimri, the prince of the Simeonites, who was slain by Phinehas (Num. xxiv. 14). Called also Salôm.

SALUM (סָלָם; [Vat. corrupt]: סַלָם). 1. Shallum, the head of a family of gatekeepers (A. V. "porters") of the Temple (1 Esdr. v. 28; comp. Est. iv. 2). 2. [Sal.]. [Mth]. [Sal.]. [Solel.].

SALUM (Salom) is a corruption of Therinus (Εργ. Ηπιαρχης), and is adopted by Bunsen (Biblische, note to the passage). Ewald has shown (Gesch. iii. 201, 202) that the whole passage is very much disordered. אֶלְעַוֹר בָּלַעַר, probably had been rendered "and set up a monument," instead of "and gave a name" Gesen. (Thes. p. 1431 b); Michaelis (Suppl. Suppl. 280), and note to Bittel für Ungela; De Wette (Bibl.); LXX. Odel, καί ἐπήρευσαν τό θεῖον; Jerome (Quest. Hebr.), erexit foradum triumphalem. Kohli interprets it "reputation," and makes the reputation to have arisen from David's good act in burying the dead even of his enemies.
SALUTATION

SHALUM, the father of Hilkiah and ancestor of Ezra (1 Esdr. viii. 1; Comp. Ezr. vii. 2). Called also SADAMIAS and SADON.

SALUTATION. Salutations may be classed under the two heads of conversational and epistolary. The salutation at meeting consisted in early times of various expressions of blessing, such as "Blessed be the Lord" (Gen. xlii. 28); "Blessed be thou of the Lord" (Ruth iii. 10; 1 Sam. xxv. 17; "The Lord be with you," "The Lord bless thee") (Ruth ii. 4; "The blessing of the Lord be upon you; we bless you in the name of the Lord") (Is. xxix. 8). Hence the term "bless" received the secondary sense of "salute," and is occasionally so rendered in the A. V. (1 Sam. xii. 10, xxv. 14; 2 K. iv. 29, x. 15), though not so frequently as it might have been (e. g. Gen. xxvii. 25, xxviii. 7, 10; 1 K. viii. 60). The blessing was sometimes accompanied with inquiries as to the health either of the person addressed or his relations. The Hebrew term used in these instances (shâlôm) has no special reference to "peace," as stated in the marginal translation, but to general well-being, and strictly answers to our "welfare," as given in the text (Ezr. xvi. 27; Ex. xxxiv. 29; Deut. xxx. 15). It is used not only in the case of salutation (in which sense it is frequently rendered "to salute," e. g. Judg. xviii. 15; 1 Sam. x. 4; 2 K. x. 13); but also in other cases where it is designed to soothe or to encourage a person (Gen. xxvii. 23; Judg. vi. 23, xix. 20; 1 Chr. xii. 18; Dan. x. 19; compare 1 Sam. xx. 21, where it is opposed to "hurt"). 2 Sam. xviii. 28, "all is well," and 2 Sam. xi. 7, where it is applied to the progress of the war. The salutation at parting consisted originally of a simple blessing (Gen. xxiv. 60, xxvii. 11, xxviii. 10; Josh. xiii. 6), but in later times the term shaded was introduced here also in the form "Go in peace," or rather "Farewell" (1 Sam. i. 17, xx. 42; 2 Sam. xv. 9). This was current at the time of our Saviour's ministry (Mark v. 34; Luke vii. 36; Acts xvi. 36), and is adopted by Him in his parting address to his disciples (John xiv. 27). It had even passed into a salutation on meeting, in such forms as "Peace be to this house" (Luke x. 5), "Peace be unto you" (Luke xxiv. 36; John xx. 19). The more common salutation, however, is what is strictly called a "greeting," borrowed from the Law. Their word yâ'âleth being used both at meeting (Matt. xxvi. 40, xxviii. 9; Luke i. 28), and probably also at departure. In modern times the ordinary mode of address current in the East resembles the Hebrew: Es-zâlim atâkum, "Peace be on you" (Lamb's Mod. F. G. ii. 7), and the term salam has been introduced into our own language to describe the Oriental salutation.

The forms of greeting that we have noticed were freely exchanged among persons of different ranks on the occasion of a casual meeting, and this even when they were strangers. Thus Boaz exchanged greeting with his reapers (Ruth ii. 4), the traveller on the road saluted the worker in the field (Is. xlii. 8), and members of the same family interchanged greetings on rising in the morning (Prov. xxvii. 14). The only restriction appears to have been in regard to religion, the Jews of old, as the Mohammedan of the present day,

a ἵδε. The Greek expression is evidently borrowed from the Hebrew, the preposition εἰς not being in the state into which, but answering to the Hebrew ל, in which the person departs.
SAMAIAS

Samaniel [SHELOMIEL] in Jud. viii. 1 (comp. Num. i. 6). The form in A. V. is given by Aldus.

B. F. W.

SAMAIAS [3 syl.] (Σαμα'ίας; Sama'ia). 1. Samaias the Levite in the reign of Josiah (1 Esdr. i. 9; comp. 2 Chr. xxxv. 9). 2. Samaias the sons of Adonikam (1 Esdr. vii. 9; comp. Ezra. viii. 13). 3. [Sam'ia; [Vat. Samāia; Sin. Σαμα'ίας; Att. Sam'ia;] Alex. Sam'ia; om. in Vulg.] The 'great Samaias,' father of Amnias and Jonathan (2 Esd. v. 13).

SAMA'RIA (Σαμα'ρία), i. e. Shomeron [see below]; Chal. שָׁמָרִי; Σαμαρία, Σαμαρίαν, Σαμαρίαν; [Alex. very often Σαμαρία, and so Sin. or F.A. in Lxx., Jer., Osr., Sin.-pea in Jud. i. 9, iv. 4;] Joseph. Σαμαρία, but Ant. viii. 12, § 5, Σαμαριίαν; Samaritan). 1. A city of Palestine. The word Shomeron means, etymologically, 'pertaining to a watch,' or 'a watch-mountain,' and we should almost be inclined to think that the peculiarity of the situation of Samaria gave occasion to its name. In the territory originally belonging to the tribe of Joseph, about six miles to the northwest of Shechem, there is a wide basin-shaped valley, encircled with high hills, almost on the edge of the great plain which borders upon the Mediterranean. In the centre of this basin, which is on a lower level than the valley of Shechem, rises a less elevated oblong hill, with steep yet accessible slopes, and a long flat top. This hill was chosen by Omri, as the site of the capital of the kingdom of Israel. The first capital after the secession of the ten tribes had been Shechem itself, whither all Israel had come to make Rehoboam king. On the separation being fully accomplished, Jeroboam rebuilt that city (1 K. xii. 25), which had been razed to the ground by Abijelech (Judg. ix. 45). But he soon moved to Tirzah, a place, as Dr. Stanley observes, of great and proved beauty (Cant. vi. 4); which continued to be the royal residence until Zimri burnt the palace and perished in its ruins (1 K. xiv. 17, xv. 21, 33, xvi. 6-18). Omri, who prevailed in the contest for the kingdom that ensued, after 'reigning six years' there, 'bought the hill of Samaria (הַר הֵרָמָו; τὸ βουνό τὸ Σαμαριώτητα) of Shemer (שֶׁמֶר). Joseph. [Σαμαριώτης, the Shechemites, for two talents of silver, and built on the hill, and called the name of the city which he built, after the name of the owner of the hill, Samaria' (1 K. xvi. 23, 24; [OMER,omer, etc.]) This statement of course dispenses with the etymology above alluded to; but the central position of the hill, as Herod sagaciously observed long afterwards, made it admirably adapted for a place of observation, and a fortress to awe the neighboring country. And the singular beauty of the spot, upon which, to this hour, travellers dwell with admiration, may have struck Omri, as it afterwards struck the tasteless Idumean (B. J. i. 21, § 2; Ant. xv. 8, § 5).

From the date of Omri's purchase, n. c. 925, Samaria retained its dignity as the capital of the ten tribes. Abah built a temple to Baal there (1 K. xvi. 32, 33); and from this circumstance portion of the city, possibly fortified by a separate wall, was called 'the city of the house of Baal' (2 K. v. 20). Samaria must have been a place of great strength. It was twice besieged by the Syrians, in n. c. 901 (1 K. xx. x), and in n. c. 892 (2 K. vi. 21-27); but on both occasions the siege was ineffectual. On the latter, indeed, it was relieved miraculously, but not until the inhabitants had suffered almost incredible horrors from famine. In their contracted retreat the last possessor of Samaria was considered to be de facto king of Israel (2 K. xv. 13, 14); and was denounced against the nation were directed against it by name (Is. vii. 9, 9;). In B. c. 721, Samaria was taken, after a siege of three years, by Shalmaneser, king of Assyria (2 K. xxii. 9, 10); and the kingdom of the ten tribes was put an end to. [See below, No. 5.] Some years afterwards the district of which Samaria was the centre was re-peopled by Esarhaddon, but we do not hear especially of the city until the days of Alexander the Great. That conqueror took the city, which seems to have somewhat recovered itself (Euseb. Chron. a. m. a. 1044), killed a large portion of the inhabitants, and suffered the remainder to settle down there under the title of Assyrians (Joseph. Ant. xii. 10). These Assyrians occupied the city until the time of John Hyrcanus. It was then of a place of considerable importance, for Josephus describes it (Ant. xii. 10, § 2) as a very strong city (πόλις οὕσπις). John Hyrcanus took it after a year's siege, and did his best to demolish it entirely. He intersected the hill on which it lay with trenches: into these he conducted the natural brooks, and thus undermined its foundations. "It," says the Jewish historian, "he took away all evidence of the very existence of the city. This story at first sight seems rather exaggerated, and inconsistent with the hill's site of Samaria. It may have referred only to the suburbs lying at its foot. "But," says Prideaux (Comm. n. c. 109, note), "Benjamin of Tudeia, who was in the place, tells us in his Itinerary that there were upon the top of this hill many fountains of water, and from these water enough may have been derived to fill these trenches." It should also be remembered that the hill of Samaria was lower than the hills in its neighborhood. This may account for the existence of these springs. Josephus describes the extremities to which the inhabitants were reduced during this siege, much in the same way that the author of the Book of Kings does during that of Ben hadad (comp. Ant. xii. 10, § 2, with 2 K. vi. 25). John Hyrcanus' reasons for attacking Samaria were the injuries which its inhabitants had done to the people of Marisa, colonists and allies of the Jews. This confirms what was said above, of the cessation of the Samaritan neighborhood to the Jews by Alexander the Great. After this disaster (which occurred in n. c. 109), the Jews inhabited what remained of the city; a

a The prevailing LXX. form in the O. T. is Σαμα'ρια, with the following remarkable exceptions: 1 K. xvi. 24, Σαμαρίας; Σαμαρίας (Mal. Σαμαρία); Alex. Σαμαρίας; Σαμαρίας; Ezra. iv. 10, Σαμαρίας.

b No such passage, however, now exists in Benja-
min of Tudeia. See the editions of Asher and of 1 A. m.
least we find it in their possession in the time of Alexander Jannaeus (Ant. xiii. 15, § 4), and until Pompey gave it back to the descendants of its original inhabitants (τοὺς οἰκίστας). These οἰκίστας may possibly have been the Syro-Macedonians, but it is more probable that they were Samaritans proper, whose ancestors had been dispossessed by the colonists of Alexander the Great. By directions of Gabinius, Samaria and other demolished cities were rebuilt (Ant. xiv. 5, § 5). But its more effectual re-establishing was undertaken by Herod the Great, to whom it had been granted by Augustus, on the death of Antony and Cleopatra (Ant. xiii. 10, § 3; xv. 8, § 5; B. J. i. 29, § 3). He called it Sebaste, Σεβαστη — Auguste, after the name of his patron (Ant. xv. 7, § 7). Josephus gives an elaborate description of Herod's improvements. The wall surrounding it was 20 stadia in length. In the middle of it was a close, of a stadium and a half square, containing a magnificent temple, dedicated to the Cesar. It was colonized by 6,000 veterans and others, for whose support a most beautiful and rich district surrounding the city was appropriated. Herod's motives in these arrangements were probably, first, the occupation of a commanding position, and then the desire of distinguishing himself for taste by the embellishment of a spot already so adorned by nature (Ant. xv. 8, § 5; B. J. i. 20, § 21, § 2). How long Samaria maintained its splendor after Herod's improvements we are not informed. In the N. T. the city itself does not appear to be mentioned, but rather a portion of the district to which, even in older times, it had extended its name. Our Version, indeed, of Acts viii. 5 says that Philip the deacon "went down to the city of Samaria," but the Greek of the passage is simply εἰς πόλιν τῆς Σαμαρίας. And we may fairly argue, both from the absence of the definite article and from the probability that, had the city Samaria been intended, the term employed would have been Σεβαστη, that some one city of the district, the name of which is not specified, was in the mind of the writer. In verse 9 of the same chapter "the people of Samaria" represents τοὺς οἰκίστας τῆς Σαμαρίας; and the phrase in verse 25, "many villages of the Samaritans," shows that the operations of evangelizing were not confined to the city of Samaria itself, if they were ever carried on there. Comp. Matt. x. 5, "Into any city of the Samaritans enter ye not;" and John iv. 4, 5, where, after it has been said, "And He must needs go through Samaria," obviously the district, it is subjunctive, "Then cometh He to a city of Samaritans called Sychar." Henceforth its history is very unconnected. Septimius Severus planted a Roman colony there in the beginning of the third century

a * The sea is visible with the naked eye from the top of the hill. H.
536. The title of the Synod at Jerusalem, A. D. 536. The title of the see occurs in the earlier Greek Notitiae, and in the later Latin ones (Bezaeus, Pol. pp. 214-221). Selaste fell into the hands of the Mohammedans during the siege of Jerusalem. In the course of the Crusades a Latin bishopric was established there the title of which was recognized by the Roman Church until the fourteenth century. At this day the city of Omri and of Herod is represented by a small village retaining few vestiges of the past except its name, Schobisch, an Arabic corruption of Selaste. Some architectural remains it has, partly of Christian construction or adaptation. The church of St. John the Baptist is portable, partly, traces of Blumman magnificence.

"A long avenue of broken pillars (says Dr. Stanley), apparently the main street of Herod's city, here, as at Palmyra and Damascus, adorned by a colonnade on each side, still lines the topmost terrace of the hill." But the fragmentary aspect of the whole place presents a present fulfillment of the prophecy of Micah (i. 6), though it may have been fulfilled more than once previously by the invasions of Shishimzer or of John Hyrcanus. "I will make Samaria an heap of the field, and as plantings of a vineyard: and I will pour down the stones thereof into the valley, and I will discover the foundations thereof" (Mic. i. 6; comp. Hos. xii. 9).

St. Jerome, whose acquaintance with Palestine imparts a sort of probability to the tradition which prevailed so strongly in later days, asserts "that Selaste, which he invariably identifies with Samaria, was the place in which St. John the Baptist was imprisoned and suffered death. He also makes it the burial-place of the prophets Elisha and Obadiah (see various passages cited by Bezaeus, pp. 889, 981). Ephiphanes is at great pains, in his work "Heroum" (lib. i.), in which he treats of the heroes of the Samaritans with singular minuteness, to account for the origin of their name. He interprets it as Σαμαριτας, φαλακρι, or "keepers." The hill on which the city was built was, he says, designated Sunder or Sameron (Σαμερον, Σαμερωπορ), from a certain Samaritan the son of Sunder, whom he considers to have been of the stock of the ancient Perizzites or Gergashites, themselves descendants of Canaan and Ham. But he adds, the inhabitants may have been called Samaritans from their guarding the land, or (coming down much later in their history) from their guarding the law, as distinguished from the later writings of the Jewish Canon, which they refused to allow. [See SAMARITANS.]

For modern descriptions of the condition of Samaria and its neighborhood, see Dr. Robinson's Biblical Researches, ii. 127-133: Reland's Polemischwissenschaft, pp. 344, 979-982: Jammer's Palastina, pp. 144-148, notes: Van de Veld's Syria and Palastina, i. 363-388, and ii. 295, 296, Meis, and Memoire: Dr. Stanley's Sinai and Palastina, pp. 242-246: and a short article by Mr. G. Williams in the Dict. of Gr. Dr. Kitto, in his Physical History of Palestine, pp. exxxii., exxxiii., has an interesting reference to and extract from Sunnæa, illustrative of its topography and general aspect at the commencement of the seventeenth century.

2. The Samaritan named in the present text of 1 Macc. v. 66 (τὰ Ἐλλάδος: in the Exeg. [Sin. Alex. quaerat] Samarituum) is evidently an error. At any rate the well-known Samaritan of the Old and New Testament cannot be intended, for it is obvious that Judas, in passing from Hebron to the land of the Philistines (Azotus), could not make so immense a detour. The true correction is doubtless supplied by Josephus (Ant. xii. 8, § 6), who has Marissa (i.e. Marema), a place which lay in the road from Hebron to the Philistine Plain. One of the ancient Latin Versions exhibits the same reading, which is accepted by Ewald (Gesch. iv. 361) and a host of commentators (see Grimm, Kurze Exeg. Handb., on the passage). Drusius proposed Samara; but this is hardly so feasible as Maresha and has no external support.

3. SAMARIAN (Σαμαριτας; Alex. often Σαμαριτας, and so Sin. in 1 Macc. and N. T., followed by Tisch. in his 8th ed. of the N. T.; — "the country of Samaria," 1 Macc. x. 30, xx. 38, 34; Ἐλλάς; Alex. -πης, and so Sin. except 1 Macc. xii. 28; — (woman) of Samaria," John iv. 9, Σαμαριτας, but Tisch. in his 8th ed. of the N. T., Σαμαριτας; — Joseph. χώρα Σαμαριτας; Ptol. Σαμαρία, Σαμαρία: Samaria).

SAMARITANS: [Σαμαριτας; Alex. Σαμαριτας, and so Sin. and Tisch. (8th ed.), in the N. T.;] Joseph. Σαμαριτας: [Samaritana].

There are few questions in Biblical philology upon which, in recent times, scholars have come to such a general conclusion as the extent of the territory to which the former of these words is applicable, and the origin of the people to which the latter is applied in the N. T. But a probable solution of them may be gained by careful attention to the historical statements of Holy Scripture and of Josephus, and by a consideration of the geographical features of Palestine.

In the strictest sense of the term, a Samaritan would be an inhabitant of the city of Samaria. But it is not found at all in this sense, exclusively at any rate, in the O. T. In fact, it only occurs there once, and then in a wider signification, in 2 K. xvii. 29. There it is employed to designate those whom the king of Assyria had placed in (what are called) the cities of Samaria (whatever these may be) instead of the children of Israel.

Were the word Samaritan found elsewhere in the O. T., it would have designated those who belonged to the kingdom of the ten tribes, which in a large sense was called Samaria. And as the extent of that kingdom varied, which it did very much, gradually diminishing to the time of Shishimzer, so the extent of the word Samaritan would have varied.

SAMARIA at first included all the tribes over which Jeroboam made himself king, whether east or west of the river Jordan. Hence, even before the city of Samaria existed, we find the "old prophet who dwelt at Bethel" describing the predictions of "the man of God who came from Judah," in reference to the altar at Bethel, as directed not merely against that altar, but "against all the houses of the high-places which are in the cities of Samaria" (1 K. xiii. 32), i.e. of course, the cities of which Samaria was, or was to be, the head or capital. In other places in the historical books of the O. T. (with the exception of 2 K. xvi. 24, 26, 28, 29) Samaria seems to denote the city exclusively. But the prophets use the word, much as did the old prophet of Bethel, in a greatly extended sense. Thus the "call of Bethel" is called by Hoshea (viii. 5, 6) the "call of Samaria"; in Amos (iii. 9) the "mountains a
SAMARIA

Samaria” are spoken of; and the “captivity of Samaria and her daughters” is a phrase found in Ezekiel (xvi. 53). Hence the word Samaritan must have denoted every one subject to the king of the northern capital.

But, whatever extent the word might have acquired, Samaria became contracted as the limits of the kingdom of Israel became contracted. In all probability the territory of Simeon and that of Dan were very early absorbed in the kingdom of Judah. This would be one limitation. Next, in n. c. 771 and 740 respectively, “Pul, king of Assyria, and Tiglath-pileser, king of Assyria, carried away the Reubenites and the Gadites, and the half-tribes of Manasseh, and brought them unto Halah, and Habor, and Hara, and to the river Gozan” (1 Chr. v. 26). This would be a second limitation. But the latter of these kings went further: “He took Ijon, and Abel-beth-maacah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali, and carried them captive to Assyria, in the year xvi. 29.” This would be a third limitation. Nearly a century before, n. c. 860, “the Lord had begun to cut Israel short;” for “Hazard, king of Syria, smote them in all the coasts of Israel; from Jordan eastward, all the land of Gilead, the Gadites, and the Reubenites, and the Manassites, from Aroer, which is by the river Arnon, even Gilead and Bashan” (2 K. x. 32, 33). This, however, as we may conjecture from the diversity of expression, had been merely a passing invasion, and had involved no permanent subjection of the country or deportation of its inhabitants.

The invasions of Pul and of Tiglath-pileser were utter clearances of the population. The territory thus desolated by them was probably occupied by degrees by the pushing forward of the neighboring heathen, or by straggling families of the Israelites themselves. In reference to the northern port of Galilee we know that a heathen population prevailed. Hence the phrase “Galilee of the Nations,” or “Gentiles” (Is. ix. 1; 1 Macc. v. 15). And no doubt this was the case also beyond Jordan.

But we have yet to arrive at a fourth limitation of the kingdom of Samaria, and by consequence, of the word Samaritan. It is evident from an occurrence in Hezekiah’s reign, that just before the deposition and death of Hezekiah, the last king of Israel, the authority of the king of Judah, or, at least, his influence, was recognized by portions of Asher, Issachar, and Zabulon, and even of Ephraim and Manasseh (2 Chr. xxx. 1-26). Men came from all these tribes to the Passover at Jerusalem. This was about n. c. 720. In fact, to such miserable limits had the kingdom of Samaria been reduced, that when, two or three years afterwards, we are told that “Shalmaneser came up through- out the land,” and after a siege of three years “took Samaria, and carried Israel away into Assyria, and placed them in Halhah, and in Habor by the river Gozan, and in the cities of the Moesians” (2 K. xvii. 5, 6), and when again we are told that “Israel was carried away out of their own land into Assyria” (2 K. xvii. 23), we must suppose a very small field of operations. Samaria (the city), and a few adjacent cities or villages only, represented that dominion which had once extended from Bethel to Dan northwards, and from the Mediterranean to the borders of Syria and Ammon eastwards. This is further confirmed by what we read of Josiah’s progress, in b. c. 641, through “the cities of Manasseh, and Ephraim, and Simeon, even unto Naphtali” (2 Chr. xxxiv. 6). Such a progress would have been impracticable had the number of cities and villages occupied by the persons then called Samarians been at all large.

This, however, brings us more closely to the second point of our discussion, the origin of those who are in 2 K. xvii. 29, and in the N. T., called Samaritans. Shalmaneser, as we have seen (2 K. xvii. 5, 6, 26), carried Israel, i.e. the remnant of the ten tribes which still acknowledged Hosea’s authority, into Assyria. This remnant consisted, as has been shown, of Samaria (the city) and a few adjacent cities and villages. Now, 1. Did he carry away all their inhabitants or no? 2. Whether they were wholly or only partially desolated, who replaced the deported population? On the answer to these inquiries will depend our determination of the questions, were the Samaritans a mixed race, composed partly of Jews, partly of new settlers, or were they purely of foreign extraction?

In reference to the former of these inquiries, it may be observed that the language of Scripture admits of scarcely a doubt. “Israel was carried away” (2 K. xvii. 6, 23), and other nations were placed “in the cities of Samaria instead of the children of Israel” (2 K. xvii. 24). There is no mention whatever, as in the case of the somewhat parallel destruction of the kingdom of Judah, of “the poor of the land being left to be vine-dressers and husbandmen” (2 K. xxv. 12). We add, that, had any been left, it would have been impossible for the new inhabitants to have been so utterly unable to acquaint themselves with “the manner of the God of the land,” as to require to be taught by some priest of the Captivity sent from the king of Assyria. Besides, it was not an unusual thing with oriental conquerors actually to exhaust a land of its inhabitants. Comp. Herod. iii. 149, “The Persians dragged (σαριστάνουσαν) Samos, and delivered it up to Sylophon stript of all its men;” and, again, Herod. vi. 31, for the application of the same treatment to other islands, where the process called σαριστάνουσαν is described, and compared to a hunting out of the population (θημυρείς).

Such a capture is presently contrasted with the capture of other territories to which σαριστάνουσαν was not applied. Josephus’s phrase in reference to the cities of Samaria is that Shalmaneser “transplanted all the people” (Ant. ix. 14, § 1). A threat against Jerusalem, which was indeed only partially carried out, shows how complete and summary the desolation of the last relics of the sister kingdom must have been: “I will stretch over Jerusalem the line of Samaria, and the plummet of the house of Ahab; and I will wipe Jerusalem as a man wipeth a dish: he wipeth and turneth it upon the face thereof” (2 K. xxi. 13). This was uttered within forty years after n. c. 732, during the reign of Manasseh. It must have derived much strength from the recentness and proximity of the calamity.

We may then conclude that the cities of Samaria were not merely partially, but wholly evacuated of their inhabitants in n. c. 721, and that they remained in this desolate state until, in the words of 2 K. xvii. 24, “the king of Assyria brought men from Babylon, and from Cuthah, and from Hamath, and from Sepharvaim, and placed them in the cities of
SAMARIA

Samaria instead of the children of Israel: and they possessed Samaria, and dwelt in the cities thereof.  Thus the new Samaritans — for such we must now call them — were Assyrians by birth or subjugation, were utterly strangers in the cities of Samaria, and were exclusively the inhabitants of those cities. An incidental question, however, arises, Who was the king of Assyria that effected this colonization? At first sight, one would suppose Shalmaneser; for the narrative is scarcely broken, and the recoping seems to be a natural sequence of the depopulation. Such would appear to have been the view of Josephus, for he says of Shalmaneser: "When he had removed the people out of their land, he brought other nations out of Cuthah, a place so called (for there is still in Persia a river of that name), into Samaria and the country of the Israelites" (Ant. ix. 4, §§ 1, 3; x. 9, § 7); but he must have been led to this interpretation simply by the juxtaposition of the two transactions in the Hebrew text. The Samaritans themselves, in Ezr. iv. 2, 10, attributed their colonization not to Shalmaneser, but to "Esar-haddon, king of Assur," or to "the great and noble Asnapper," either the king himself or one of his generals. It was probably on his invasion of Judah, in the reign of Manasseh, about n. c. 677, that Esarhaddon discovered the impolicy of having a tract upon the very frontiers of his vast kingdom, made determined to garrison it with foreigners. The fact, too, that some of these foreigners came from Babylon would seem to direct us to Esarhaddon, rather than to his grandfather, Shalmaneser. It was only recently that Babylon had come into the hands of the Assyrian king. And there is another reason why this date should be preferred. It coincides with the termination of the sixth-five years of Isaiah's prophecy, delivered n. c. 742, within which "Ephraim should be broken that it should not be a people" (Is. vii. 8). This was not effectually accomplished until the very land itself was occupied by strangers. So long as this had not taken place, there might be hope of return: after it had taken place, no hope. Josephus (Ant. x. 9, § 7) expressly notices this difference in the cases of the ten and of the two tribes. The land of the former became the possession of foreigners, the land of the latter, not so.

These strangers, whom we will now assume to have been placed "in the cities of Samaria" by Esarhaddon, were of course idolaters, and worshiped a strange medley of deities. Each of the five nations, says Josephus, who is confirmed by the words of Scripture, had its own god. No place was found for the worship of Him who had once called the land his own, and whose it was still. God's displeasure was kindled, and they were infected by beasts of prey, which had probably increased to a great extent before their entrance upon it. "The Lord sent lions among them, which slew some of them." (This, of course, was a name, and not the meat-eating lions of the Apostle's epistle, 1 Pet. v. 8.) One of their [2800]

SAMARIA

of God — they were no more exclusively his servants, than was the Roman emperor who desired to place a statue of Christ in the Pantheon entitled to be called a Christian: and, 2dly, to show how entirely the Samaritans of later days differed from their ancestors in respect to idolatry. Josephus's account of the distress of the Samaritans, and of the remedy for it, is very similar, with the exception that with him they are afflicted with pestilence.

Such was the origin of the post-captivity or new Samaritans — men not of Jewish extraction, but from the foreign races. Esarhaddon, however, in some measure turned to the inner parts of Persia and Media, but were then called Samaritans, taking the name of the country to which they were removed," says Josephus (Ant. x. 9, § 7). And again he says (Ant. ix. 14, § 3) they are called in Hebrew 'Cuthahans, but in Greek Samaritans.' "Our Lord expressly terms them αναλογησις (Luke xvi. 18); and Josephins whole account of them shows that he believed them to have been μετοχοι αναλογησιας, though, as he tells us in two places (Ant. ix. 14, § 3, and xi. 8, § 6), they sometimes gave a different account of their origin. But of this by-and-by. A gap occurs in their history until Judah has returned from captivity. They then desire to be allowed to participate in the religious operations of the Jews, and to preside in the temple at Jerusalem, the place of their former worship, to which it had been long since returned by Babylon, and dedicated to the Lord. This the Jews opposed, as they did to any attempt to introduce Samaritans into the temple service, or to allow them to have any voice in its management. This is the story of the Samaritan controversy in the first century, and it is a subject of great interest, full of this by-and-by. A gap occurs in their history until Judah has returned from captivity. They then desire to be allowed to participate in the religious operations of the Jews, and to preside in the temple at Jerusalem, the place of their former worship, to which it had been long since returned by Babylon, and dedicated to the Lord. 2801

everything in their power to annoy the Jews. They would refuse hospitality to pilgrims on their road to Jerusalem, as in our Lord's case. They would even waylay them in their journey (Joseph. Ant. xx. 6, § 1); and many were compelled through fear to take the longer route by the east of Jordan. Certain Samaritans were said to have once penetrated into the Temple of Jerusalem, and to have defiled it by scattering dead men's bones on the sacred pavement (Ant. xviii. 2, § 2). We are told too of a strange piece of mockery which must have been especially resented. It was the custom of the Jews to communicate to their brethren still in Babylon the exact day and hour of the rising of the pascal moon, by beacon-fires commencing from Mount Olivet, and flashing forward from hill to hill until they were mirrored in the Emphrates. So the Greek poet represents Agamemon as conveying the news of Troy's capture to the anxious watchmen at Mycenae. Those who "sat by the waters of Babylon" looked for this signal with much interest. It enabled them to share in the devotions of those who were in their father-land, and it proved to them that they were not forgotten. The Samaritans thought scorn of these feelings, and would not unfortunately deceive and disappoint them, by kindling a rival flame and perpetrating the water-waves of old, to the people on Gerizim they considered to be much superior to that at Jerusalem. There they sacrificed a pass-over. Towards the mountain, even after the tem- ple on it had fallen, wherever they were, they directed their worship. To their copy of the Law they arrogated an antiquity and authority greater than attested to by the possession of the Jews. The Law (i.e. the five books of Moses) was their sole code; for they rejected every other book in the Jewish canon. And they professed to observe it better than did the Jews themselves, employing the expression not unfrequently, "The Jews indeed do so and so; but we, observing the letter of the Law, do otherwise." The Jews, on the other hand, were not more conciliatory in their treatment of the Samaritans. The copy of the Law possessed by that people they declared to be the legacy of an apostate (Mannassæ), and cast grave suspicions upon its genuineness. Certain other Jewish renegades had from time to time taken refuge with the Samaritans. Hence, by degrees, the Samaritans claimed to partake of Jewish blood, especially if doing so happened to suit their interest (Joseph. Ant. xi. 8, § 6; ix. 14, § 8). A remarkable instance of this is exhibited in a request which they made to Alexander the Great, about b. c. 332. They desired to be excused payment of tribute in the subalternical year, on the plea that as true Israelites, descendants of Ephraim and Manasseh, sons of Joseph, they refrained from cultivating their land in that year. Alexander, on cross-questioning them, discovered the hollowness of their pretensions. (They were greatly discontent- ed at their failure, and their dissatisfaction probably led to the conduct which induced Alex- ander to besiege and destroy the city of Samaria. Shechem was indeed their metropolis, but the de- struction of Samaria seems to have satisfied Alex- ander.) Another instance of claim to consanguinity on the part of these people. They were ever reminding them that they were after all mere Canaanites, mere strangers from Assyria. They accused them of worshipping the idol-gods buried long ago under the oak of Shechem (Gen. xxxiv. 4). They would have no dealings with them that they could possi- bly avoid. "Thus art a Samaritan and hast a devil," was the mode in which they expressed themselves when at a loss for a bitter reproach. Everything that a Samaritan had touched was as swine's flesh to them. The Samaritan was pub- licly cursed in their synagogues—could not be ad- dressed as a witness in the Jewish courts—could not be admitted to any sort of proselytism—and was thus, so to speak, as the Jew could affect Judaism, excluded from hope of eternal life. The tradi- tional hatred in which the Jew held him is expressed in Exod. i. 25, 26, "There be two man- ner of nations which my heart abhorreth, and the third is no nation: they that sit on the mountain of Samaria; and they that dwell among the Philis- tines: and that foolish people that dwell in Sidon." And so long was it before such a temper could be banished from the Jewish mind, that we find even the Apostles believing that an indestructible slight bond by a Samaritan village to Christ would be not unliely avenged by calling down fire from heaven. "Ye know not what spirit ye are of," said the large-hearted Son of Man, and we find Him on no one occasion uttering anything to the disgrange- ment of the Samaritans. His words, however, and the records of his ministrations confirm most thoroughly the view which has been taken above, that the Samaritans were not Jews. At the first sending forth of the Twelve (Matt. x. 5, 6) He charges them, "Go not into the way of the Gentiles, and into any city of the Samaritans enter ye not, but go rather to the lost sheep of the house of Israel." So again, in his final address to them on Mount Olivet, "Ye shall be witnesses to Me in Jerusalem and in all Judæa, and in Samaria, and unto the uttermost part of the earth" (Acts i. 8). So the nine unthankful lepers, Jews, were con- trasted by Him with the tenth leper, the thankful, stranger (Διδάσκαλος), who was a Samaritan. So, in his well-known parable, a merciful Samaritan is contrasted with the unmerciful priest and Levite. And the very worship of the two races is described by Him as different in character. "Ye worship ye

\( ^a ^{" This fact," says Dr. Truchen, "is mentioned by Matrak (de Seusey's Curzst. Arab., ii. 150), who affirms that it was this which put the Jews on making accurate calculations to determine the moment of the new moon's appearance (comp. Schottgen's Hc: Hdb. 244).}\)

\( ^b \) This prejudice had, of course, sometimes to give way to necessity, for the disciples had gone to Sychar to buy food, while our Lord was talking with the woman of Samaria by the well in its suburb (John iv. 8). And from Luke ix. 52, we learn that the disciples went before our Lord at his command into a certain village of the Samaritans "to make ready" for Him Unies; indeed, though, as we see on both occasions our Lord's influence over them was not yet complete, we are to attribute this partial abandonment of their ordinary scriptures to the change which his example had already wrought in them.
SAMARIA

Now what," this is said of the Samaritans: "We know what we worship, for salvation is of the Jews" (John iv. 22).

Such were the Samaritans of our Lord's Day: a people distinct from the Jews, though lying in the very midst of the Jews; a people preserving their identity, though seven centuries had rolled away since they had been brought from Assyria by Esra-ched, and though they had abandoned their polytheism for a sort of unitarian Mosaicism: a people, who—though their limits had been gradually contracted, and the rallying place of their religion on Mount Gerizim had been destroyed one hundred and sixty years before by John Hyrcanus (b.c. 130), and though Samaria (the city) had been again and again destroyed, and though their territory had been the battle-ground of Syria and Egypt—still preserved their nationality, still worshiped from Shechem and their other impoverished settlements towards their sacred hill; still retained their nationality, and could not condescend to the Jews:

"Ο精益求精 τοῦ άληθοῦς εGenres ταύτης κύστις, Δεσποτουσάντων τοῦ φίλου προσευχόντος."

Not indeed that we must suppose that the whole of the country called in our Lord's time Samaria was in the possession of the Cuthian Samaritans, or that it had ever been so. "Samaria," says Josephus (B. J. iii. 3, § 4), "lies between Judaea and Galatia. It commences from a village called Giunea (Jenio), on the great plain (that of Esdrae-elon), and extends to the topharchy of Acrabatta," in the lower part of the territory of Ephraim. These points, indicating the extreme northern and the extreme southern parallels of latitude between which Samaria was situated, enable us to fix its boundaries with tolerably certainty. It was bounded northwards by the range of hills which commences at Mount Carmel on the west, and, after making a bend to the southwest, runs almost due east to the valley of the Jordan, forming the southern border of the plain of Esdraelon. It touched towards the south, as nearly as possible, the northern limits of Benjamin. Thus it comprehended the ancient territory of Ephraim, and of those Manasites who were allotted the "path of the king" (Josh. xvi. 28, 29), and continues, "in no respect different from that of Judas. Both abound in mountains and plains, and are suited for agriculture, and productive, wooded, and full of fruits both wild and cultivated. They are not abundantly watered; but much rain falls there. The springs are of an exceedingly sweet taste; and, on account of the quantity of good grass, the cattle there produce more milk than elsewhere. But the best proof of their richness and fertility is that both are thickly populated." The accounts of modern travellers confirm this description by the Jewish historian of the "good land" which was allotted to that powerful portion of the house of Joseph which crossed the Jordan, on the first division of the territory. The Cuthian Samaritans, however, possessed only a few towns and villages of this large area, and these lay almost together in the centre of the district. Shechem or Sychar (as it was contemptuously designated) was their chief settlement, even before Alexander the Great destroyed Samaria, probably because it lay almost close to Mount Gerizim. Afterwards it became more prominently so, and there, on the destruction of the temple on Gerizim, by John Hyrcanus (Joseph. Ant. xiii. 9, 1), they built themselves a temple. The modern representative of Shechem is Nablus, a corruption of Neapolis, or the "New Town," built by Vespasian a little to the west of the older town which was then ruined. At Nablus the Samaritans have still a settlement, consisting of about 200 persons. Yet they observe the Law, and celebrate the Passover on a sacred spot on Mount Gerizim, with an exactness of minute ceremonial which the Jews themselves have lost.

"Quaque minor, servat Iępem Trojansum, et Vesta colit Alba minoram."

The Samaritans were very troublesome both to their Jewish neighbors and to their Roman masters, in the first century, A. D. Pilate classed them with a severity which led to his own downfall (Joseph. Ant. xvii. 4, § 1), and a slaughter of 10,000 of them took place under Vespasian (B. J. iii. 7, § 32). In spite of these reverses they increased greatly in numbers towards its termination, and appear to have grown into importance under Hadrian, who was probably an apostate Jew. Epiphanius (Adv. Heres., lib. i.), in the fourth century, considers them to be the chief and most dangerous adversaries of Christianity, and he enumerates the several sects into which they had by that time divided themselves. They were popular, and even by some of the Fathers, confounded with the Jews. Insomuch that a legal interpretation of the Gospel was described as a tendency to "Evagregarios or baseZaizbrazos." This confusion, however, did not extend to an identification of the people. It was simply an assertion that their extreme opinions were identical. And previously to an outrage which they committed on the Christians at Neapolis in the reign of Zeno, towards the end of the fifth century, the distinction between them and the Jews was sufficiently known, and even recognized in the Theodosian Code. This was so severely punished, that they sank into an obscurity, which, though they are just noticed by travellers of the twelfth and fourteenth centuries, was scarcely broken until the sixteenth century. In the latter half of that century a correspondence with them was commenced by Joseph Scaliger. This correspondence has been called "a correspondence of worthy letters to that eminent scholar." John Ludolf received a letter from them, in the latter half of the next century. These three letters are to be found in Eichhorn's Repertorium für Biblische und Morgenländische Literatur, vol. xiii. They are of great archaeological interest, and enter very minutely into the observances of the Samaritan ritual. Among other points worthy of notice in them is the inaccuracy displayed by the writers in valuing themselves on not being Jews, and yet claiming to be descendents of Joseph. See also De Saecy's Correspondence des Samaritains, etc., in Notices et Extraits des MSS. de la Bibliothe. du Roi, etc., vol. xii. And, for more modern accounts of the people themselves, Robinson's Biblical Researches, ii. 290-311, iii. 120-30; Wilson's Lewis of the Bible, ii. 46-73; Van de Velde's Syria et Palatine, ii. 296 seq.; Stanley's Sinaï et Palatine, p. 240; Rogers's Notices of the Modern Samaritans, p. 25; Grove's account of their Day of Atonement in Vocation Tourists for 1801; and Dr. Stanley's, of their Passover, in his Lectures on the Jewish Church, App. iii. [PASSOVER, vol. iii. p. 2357 l., Amer. ed.]

The view maintained in the above remarks, or
SAMARITAN

a the purely Assyrian origin of the New Samari-
tans, is that of Soicer, Rekald, Hammoud, Drusius in the Critici Sacri, Malbonius, Hengstenberg, Havernick, Robinson, and Dean Treneh. The reader is referred to the very clear but too brief discussion of the subject by the last-mentioned learned writer, in his Paroboko, pp. 310, 311, and to the authorities, especially De Saci, which are there quoted. There is no doubt in the world that it was the ancient view. We have seen what Josephus said, and Origen, Eusebius, Chrysostom, and Theodoret, say the same thing. Socrates, it must be admitted, calls the Samaritans άνδροχισμα Τουδαίων, but he stands almost alone among the ancients in making this assertion. Origen and Cyril indeed both mention their claim to descent from Joseph, as evidenced in the statement of the woman at the well, but mention it only to declare it unfounded. Others, as Winer, Dillingen, and Dr. Davidson, have held a different view, which may be expressed thus in Dillingen's own words: "In the northern part of the Promised Land (as opposed to Judaea proper) there grew up a mingled race which drew its origin from the remnant of the Israelites who were left behind in the country on the removal of the Ten Tribes, and also from the heathen idols of Phenician origin which they had brought from their native land" (Hendebound and Judaeana, p. 733, § 7). If the words of Scripture are to be taken alone, it does not appear how this view is to be maintained. At any rate, as Drusius observes, the only mixture was that of Jewish apostate fugitives, long after Esrahbon's colonization, not at the time of the colonization. But modern as this view is it has for some years been the popular one, and even Dr. Stanley seems, though quite incidentally, to have admitted it (S. p. 240). He does not, however, enter upon its defense. Mr. Grove is also in favor of it. See his notice already mentioned.

The authority due to the copy of the Law possessed by the Samaritans, and the determination whether the Samaritan reading of Deut. xxvii. 4, Gerushim, or that of the Hebrew, Ebal, is to be preferred, are discussed in the next article. [See S Amaritan Pentateuch: E Ralph: Gerushim: Shechem: Schechem: Sychar.] J. A. H.

* * * SAMARITAN. [SAMARIA, 3.]

SAMARITAN PENTATEUCH, a Recension of the commonly received Hebrew Text of the Mosaic Law, in use with the Samaritans, and written in the ancient Hebrew (huri), or so-called

Samarian character. This recension is found vaguely quoted by some of the early Fathers of the Church, under the name of "Pentateuch Samaritanus," or "Pentateuch Samariae," in contradistinction to the "Hebraic Text of the Hebrews," further, as "Samaritanae Volume," etc., Tholus Origin on Num. xiii, 1, 1, "και κατά αί ταύτα Ἰσραηλην τεμενος αὶ παρακλησειον ἐδημιουργησεν;" and on Num. xxvii. 15, 16, "και ἐν μονοι των Σαμαριτων εφορη, etc., Jerome, Procli Kings: "Samaritan Exegesis, Mosaic Books (99, like the "Hebrews, Syriana and Chaldeans") literal habits, figuris tantum et apicibus discrepantes." Also on Gal. iii. 10, "quam ob causam;" — (viz. EZECHIATUII p. × δε οικ Ηαμανεν εις παισι τοις γεγραμενοις, being quoted there from Deut. xxi. 26, where the Masoretic text has only νοιne νοινης Πολυνυο sie si i — cursed be he that confirmeth not the words of this Law to do them;" while the LXX. reads παινο ανθρωποι p. ταις τοις λεγοναι αν — quam ob causam Samaritanae Hebrewa vulgatae regens iavi εν την scriptum esse;" and he forthwith charges the Jews with having deliberately taken out the δαβ, because they did not wish to be bound individually to all the ordinances: forgetting at the same time that this same δαβ occurs in the very last chapter of the Masoretic text (Deut. xxviii. 15) — "li his commandments and his statutes." Eusebius of Cesaris observes that the LXX. and the Sam. Pent. agree against the Received Text in the number of years from the Deluge to Abraham. Cyril of Alexandria speaks of certain words (Gen. iv. 8), wanting in the Hebrew, but found in the Samaritan. The same remark is made by Procoquis of Gaza with respect to Deut. i. 6; Num. x. 10, x. 9, &c. Other passages are noticed by Diodorus, the Greek Scholiast, etc. The Talmud, on the other hand, mentions the Sam. Pent. distinctly and contemptuously as a clumsily forged record: "You have falsified your Pentateuch," said H. Eliezer b. Shimon to the Samaritan scribe, with reference to a passage in Deut. xi. 39, where the well-understood word Shechem was gratuitously inserted after the plains of Moreh, — "and you have not profited aught by it" (comp. Jer. xxxix. 21 b, et fol. Ribbi 41 b). On another occasion they are ridiculed on account of their ignorance of one of the simplest rules of Hebrew Grammar, displayed in their Pentateuch; namely, the use of the ל in loco ה (unknown, however, according to Jer. Meg. 6. 2, also to the people of Jerusalem). "Who has ceased you to blunder?" said R. Shimon b. Eliezer to them; referring to their abridgement of the Mosaic ordinance of marrying the deceased broth-
er's wife (Deut. xxv. 5 ff.), — through a misinterpre-
tation of the passage in question, which enjoins that the wife of the dead man shall not be "without" to a stranger, but that the brother should marry her: they, however, taking הילא (ផ. 1) to be an epithet of חיליא, "wife,"

* a distinguished from נו, נו (ם, ת). Comp. Num. 21 b, Ar. Meg. 5. 2; Toch. Synth. 4; Synth. 6, 8, Meg. 1. 1, 9, S. Ar. 1. 2, sq.

b The A. V., following the LXX., and perhaps Luther, has inverted the word αδονίς.

c Hebrews.

2508
translated “the outer wife,” i. e. the betrothed only (Jer. Johan. 3, 2, Ber. L., etc.).

Down to within the last two hundred and fifty years, however, no copy of this divergent Code of Laws had reached Europe, and it began to be pronounced a fiction, and the plain words of the Church Fathers — the better known authorities — who quoted it, were subjected to subtle interpretations. Suddenly, in 1616, Pietro della Valle, one of the first discoverers also of the Cuneiform inscriptions, acquired a complete Codex from the Samaritans in Damascus. In 1625 it was presented by Achille Harly de Sancy to the Library of the Oratory in Paris, and in 1628 there appeared a brief description of it by J. Morinus in his preface to the Roman text of the LXX. Three years later, shortly before it was published in the Paris Polyglot, — whence it was copied, with few emendations from other codices, by Walton, — Morinus, the first editor, wrote his "Exercitatio Ecclesiastica in utraque Samaritanorum Pentateuchaa, in which he pronounced the newly found Codex, with all its innumerable Variants from the Masoretic text, to be infinitely superior to the latter: in fact, the unconditional and speedy emendation of the Received Text thereby was urged most authoritatively. And now the impulse was given to one of the finest and most barren literary and theological controversies: of which more anon. Between 1620 and 1650 six additional copies, partly complete, partly incomplete, were acquired by Ussher: five of which he deposited in English Libraries, while one was sent to Be Dieu, and has disappeared mysteriously. Another Codex, now in the Ambrosian Library at Milan, was brought to Italy in 1621. Petrese procured two more, one of which was placed in the Royal Library of Paris, and the other in the Barberini at Rome. Thus the number of MSS. in Europe gradually grew to sixteen. During the present century another, but very fragmentary copy, was acquired by the Gotlin Library. A copy of the entire (?) Pentateuch, with Targum (Sam. Version), in parallel columns, 4to, on parchment, was brought from Nablus by Mr. Grove in 1861 for the Count of Paris, in whose library it is. Single portions of the Sam. Pent., in a more or less complete state, are now of no rare occurrence in Europe.

Respecting the external condition of these MSS., it may be observed that their sizes vary from 12mo to folio, and that no scroll, such as the Jews and the Samaritans use in their synagogues, is to be found among them. The letters, which are of a size corresponding to that of the book, exhibit none of those varieties of shape so frequent in the Masor. Text: such as majuscules, minuscules, suspended, inverted letters, etc. Their material is vellum or cotton-paper; the ink used is black in all cases save the scroll used by the Samaritans at Nablus, the letters of which are in gold. There are neither vowels, accents, nor diacritical points. The individual words are separated from each other by a dot. Greater or smaller divisions of the text are marked by two dots placed one above the other, and by an asterisk. A small line above a consonant indicates a peculiar meaning of the word, an unusual form, a passive, and the like: it is, in fact, a contrivance to bespeak attention." The whole Pentateuch is divided into nine hundred and sixty-four paragraphs, or "Ketzim, the terminations of which is indicated by these figures, , , or . At the end of each book the number of its divisions is stated thus:

[Masoret. Cod. 12 Sidras (Parshioth), 50 Chapters].

The Sam. Pentateuch is halved in Lev. vii. 15 (vii. 8, in Hebrew Text), where the words "Middle of the Torah" b are found. At the end of each MS. the year of the copying, the name of the scribe, and also that of the proprietor, are usually stated. Yet their dates are not always trustworthy when given, and very difficult to be conjectural when entirely omitted, since the Samaritan letters afford no internal evidence of the period in which they were written. To none of the MSS., however, which have as yet reached Europe, can be assigned a higher date than the 10th Christian century. The scroll used in Nablus bears — so the Samaritans pretend — the following inscription: = 1, Abisha, son of Pinedas, son of Eleazar, son of Aaron the Priest, — upon them be the Grace of Jehovah! To his honor have I written this Holy Law at the entrance of the Tabernacle of Testimony on the Mount Gerizim, Beth El in the thirteenth year of the taking possession of the Land of Canaan, and all its boundaries around it, by the Children of Israel. I praise Jehovah." (Letter of Meshaneh b. Ab Sehach, Cod. 19,791, Add. MSS. Brit. Mus. Comp. Epist. Sam. Sichemitarum ad Judam Lii- dophanum, Cize, 1688: Antiq. Eccl. Orient. p. 123; Huntington Epist. pp. 49, 56; Eichhorn's Reper- torium f. bibl. und med. Lit., tom. ix., etc.) But no European has ever succeeded in finding it in that Mr. Levysohn, a person lately attached to the Russian staff in Jerusalem, has found the inscription in question "going through the middle of the body of the Text of the Deutocline, and extending through three columns." Considering that the Samaritans themselves told Huntington, "that this inscription had been in their scroll once, but must have been erased by some wicked hand," this startling piece of information must be received with extreme caution: no less so than the other more or less vague state ments with respect to the labors and pretended discoveries of Mr. Levysohn. See note p. 2816.
this scroll, however great the pains bestowed upon the search (comp. Eichhorn, Emdelt, ii. 132); and even if it had been found, it would not have deserved the slightest credence.

We have briefly stated above that the Exegeta

orum, which placed the Samaritan Pentateuch far above the Received Text in point of genuineness,—partly on account of its superior "facility and harmony,"—excited and kept up for nearly two hundred years one of the most extraordinary controversies on record. Characteristically enough, however, this was set at rest once for all by the very first systematic investigation of the point at issue. It would now appear as if the unquestioning rupture with which every new literary discovery was formerly hailed, the innate animosity against the Masoretic (Jewish) Text, the general preference for the LXX., the defective state of Semitic studies,—as if, we say, all these put together were not sufficient to account for the phenomenon that men of any critical acumen could for one moment not only place the Sam. Pent. on a par with the Masoretic Text, but even raise it, unconditionally, far above it. There was indeed another cause at work, especially in the first period of the dispute: it was a controversial spirit which prompted Morinus and his followers, Campbell, and others with an unbounded enthusiasm of the Reformers who, however, had to be attached to their authority; the received form of the Bible, upon which and which alone they professed to take their stand;—it was now evident that nothing short of the Divine Spirit, under the influence and inspiration of which the Scriptures were interpreted and expanded by the Roman Church, could be relied upon. On the other hand, most of the "Antinoi

orum"—De Mays, Hottinger, St. Morinus, Buxtorf, Fuller, Lescene, Pfellet, etc., instead of patiently and critically examining the subject and refuting their adversaries by arguments which were within their reach, as they are within ours, directed their attacks against the persons of the Morinians, and thus their misguided zeal led the question of the superiority of the new document over the old where they found it. Of higher value were, it is true, the labors of Simon, Le Clerc, Walton, etc., at a later period, who proceeded eclectically, rejecting many readings, and adopting others which seemed preferable to those of the old text. Houbigant, however, with unexamined ignorance and obstinacy, returned to Morinus's first notion,—already generally abandoned,—of the unquestionable and thorough superiority. He, again, was followed more or less closely by Kennicott, Alb. St. Aquilino, Lobstein, Geddes, and others. The discussion was taken up once more on the other side, chiefly by Ravius, who succeeded in finally disposing of this point of the superiority (Excerpt, Phil. in Hechal, Part. Leg. Hist. 1755). It was, from his day forward allowed, almost on all hands, that the Masoretic Text was the genuine one, but that in doubtful cases, when the Samaritan had an "unequivocally clear" reading, this was to be adopted, since a certain amount of value, however limited, did attach to it. Michaelis, Eichborn, Bertholdt, Jahn, and the majority of modern critics, adhered to this opinion. Here the matter rested until 1815, when Gesenius (De Pent. Sam. Origin, edidio, et Auctoritate) abolished the remnant of the authority of the Sam. Pent. So masterly, lucid, and clear are his arguments and proofs, that there has been and will be no further question as to the absence of all value in this revision, and in its pretended emendations. In fact, a glance at the systematic arrangement of the variants, of which he first of all bethought himself, is quite sufficient to convince the reader at once that they are for the most part mere blunders, arising from an imperfect knowledge of the first elements of grammar and exegesis. That others owe their existence to a studied design of confounding certain passages to the Samaritan mode of thought, speech, and faith,—more especially to show that the Mount Gerizim, upon which their temple stood, was the spot chosen and indicated by God to Moses as the one upon which He desired to be worshipped. Finally, that others are due to a tendency towards removing, as well as linguistic shortcomings, would allow, all that seemed obscure or in any way doubtful, and towards filling up all apparent imperfections: either by repetitions or by means of newly-invented and badly-figuring words and phrases. It must, however, be premised that except two alterations (Ex. xiii. 7, where the Sam. reads "Six days shalt thou eat unleavened bread," instead of the received "Seven days," and the change of the word הילדה, "There shall not be," into הילדה, "live," Dent. xiii. 18), the Mosaic laws and ordinances themselves are nowhere tampered with.

We will now proceed to lay specimens of these once so highly prized variants before the reader, in order that he may judge for himself. We shall follow in this the commonly received arrangement of Gesenius, who divides all these readings into eight classes: to which, as we shall afterwards show, Frankel has suggested the addition of two or three others, while Kircheim (in his Hebrew work הילדה ייעגרא) enumerates thirteen, which we will name hereafter.

1. The first class, then, consists of readings by which emendations of a grammatical nature have been attempted.

(a.) The quiescent letters, or so-called matere accidentes, are supplied.

(b.) The more poetical forms of the pronouns, probably less known to the Sam., are altered into the more common ones.9

9 For הילדה, "He will elect" (the spot), the Sam. always puts הילדה, "He has elected" (namely, Gerizim). See below.

b must be a misprint.10

Thus הילדה is found in the Samar. for הילדה of the Masoretic Τ.; הילדה for הילדה; הילדה for הילדה; הילדה for הילדה.11

10 For הילדה, הילדה for הילדה, etc.: sometimes a מ is put even where the Heb. ר has, in accordance with the grammatical rules, only a short vowel or a sheva: הילדה is found for הילדה, הילדה for הילדה.

11 הילדה הילדה, become הילדה, הילדה, הילדה, הילדה.
(c.) The same propensity for completing apparently incomplete forms is noticeable in the flexion of the verbs. The apocopated or short future is altered into the regular future. a

(d.) On the other hand the paragogeal letters and at the end of nouns, are almost universally struck out by the Sam. corrector; and, in the ignorance of the existence of nouns of a common gender, he has given them genders according to his fancy. c

The infinit. also is, in the quaintest manner possible, reduced to the form of the finite verb. d

For obsolete or rare forms, the modern and more common ones have been substituted in a great number of places.

2. The second class of variants consists of glosses and interpretations received into the text; glosses, moreover, in which the Sam. not unfrequently coincides with the LXX., and which are in many cases evidently derived by both from some ancient Targum. b

3. The third class exhibits conjectural emendations—sometimes far from happy—of real or imaginary difficulties in the Masoretic Text. d

4. The fourth class exhibits readings in which apparent deficiencies have been corrected or supplied.

a becomes נֹלֶר; תִּרְאֶה is emended into תַּרְאֵה; נָלבּ (verb נָלָב) into נָלָב; the final נ of the 3d pers. fem. plur. fut. into נב

b is shortened into נָלָב into נָלָב.

c Masculine are made the words הָמַלְנִּים (Gen. xlix. 20), הָמַלְנִים (Deut. xvii. 2); מֵלָנִים (Gen. xxi. 9); feminine the words מֵלָנִים (Gen. xxi. 6), מֵלָנִים (Deut. xxviii. 25), מֵלָנִים (Ex. xxviii. 25, etc.); wherever the word מֵלָנִים occurs in the sense of "girl," a ה is added at the end (Gen. xxiv. 14, etc.).

d "the waters returned continually," is transformed into מֵלָנִים; "they returned, they went and they returned" (Gen. viii. 3). Where the infinit. is used as an adverb, e.g. מֵלָנִים (Gen. xxvi. 16), "far off," it is altered into מֵלָנִים, "she went far away," which renders the passage almost unintelligible.

e for מֵלָנִים (Gen. iii. 10, 11); ל (xi. 39); ל for לַר (xv. 10), לֹא, "female servants," for לֹא מֵלָנִים (xx. 17); לֹא מֵלָנִים for the adverbial לַר for רָתָמָה (xx. 1); לֹא מֵלָנִים (Gen. xxii. 25, making it depend from לֹא מֵלָנִים; "if" is altered into מֵלָנִים (Lev. ii. 2); לֹא מֵלָנִים, "if" is wrongly put for מֵלָנִים (3d p. s. m. of מִלְאָה = מִלְאָה) instead of מִלְאָה, the obsolete form, is replaced by the more recent מִלְאָה (Num. xxi. 15); the usual fem. termination מִלְאָה is elogiated into מִלְאָה; מִלְאָה is the emendation for מִלְאָה (Deut. xxii. 1); מִלְאָה for מִלְאָה (Deut. xxxii. 16), etc.

f מֵלָנִים, "man and woman," used by Gen. vii. 2 of animals, is changed into מֵלָנִים לֹא, "male and female;" מֵלָנִים מֵלָנִים (Gen. xxiv. 60), "his sisters," becomes מֵלָנִים, "his enemies;" for מֵלָנִים (ludomin.) is substituted מֵלָנִים; אַנְא, "he will see, choose," is amplified by a לֹא, "for himself;"

lַר is transformed into מֵלָנִים (Lev. xxi. 10); מֵלָנִים מֵלָנִים (Num. xxiv. 4). "And God met Bileam," becomes with the Sam. מֵלָנִים מֵלָנִים, "and an Angel of the Lord found Bileam;"

Gen. xx. 3), "for the woman," is amplified into מֵלָנִים מֵלָנִים מֵלָנִים (Num. xxx. 15), "for the sake of the woman;" מֵלָנִים מֵלָנִים (Gen. xxii. 20), has made room for מֵלָנִים מֵלָנִים, "and she took down: I will meet there" (A. V., Ex. xxix. 43), is made מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים (Num. xxx. 15), before the words מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים, "Have you spared the life of every female?" מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים (Deut. xxxii. 3). If I call the name of Jehovah, the Sam. has מֵלָנִים מֵלָנִים מֵלָנִים ("In the name," etc.

a The elliptic use of מֵלָנִים, frequent both in Hebrew and Arabic, being evidently unknown to the emendator, he alters the מֵלָנִים לֹא מֵלָנִים (Gen. xvii. 17), "shall a child be born unto him that is a hundred years old?" מֵלָנִים מֵלָנִים מֵלָנִים, "shall I bestow?" Gen. xxiv. 60; מֵלָנִים מֵלָנִים אֲלֹהים, "he came from going?" (A. V. "from the way") to the well of Lahlil, the Sam. alters מֵלָנִים מֵלָנִים (Gen. xxx. 34), לֹא מֵלָנִים מֵלָנִים, "Behold, may it be according to thy word," the מֵלָנִים (Arab. מֵלָנִים) is transformed into מֵלָנִים, "and if not—let it be like thy word." Gen. xxiv. 62, מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים, "And for that the dream was doubled," becomes מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים מֵלָנִים, "The dream rose a second time," which is both un-Hebrew, and diametrically opposed to the sense and construction of the passage. Better is the emendation Gen. xlix. 10, מֵלָנִים.
of passages and words of the Hebrew text which contain something objectionable in the eyes of the Samaritans, an account either of historical improbability or apparent want of dignity in the terms applied to the Creator. Thus in the Sam. Pent. no one in the antediluvian times begets his first son after he had lived 150 years: but one hundred years are, where necessary, subtracted before, and added after the birth of the first son. Thus Jared, according to the Hebrew Text, begat at 162 years, lived afterwards 890 years, and "all his years were 962 years:" according to the Sam. he begat when only 62 years old, lived afterwards 785 years, and all his years were 847. After the Deluge the opposite method is followed. A hundred or fifty years are added before and subtracted after the begetting: e.g. Arphaxad, who in the Common Text is 35 years old when he begets Shelah, and lived afterwards 403 years: in all 438 — is by the Sam. made 135 years old when he begets Shelah, and lives only 303 years afterwards = 438. (The LXX. has, according to its own peculiar psychological and chronological notions, altered the Text in the opposite manner. [See SELICHIQG]) An exceedingly important and often discussed emendation of this class is the passage in Ex. xili. 40, which in our text reads, "Now the sojournings of the children of Israel who dwelt in Egypt was four hundred and thirty years," The Samaritan (supported by LXX. (Cod. Ale.) has "the sojournings of the children of Israel [and their fathers who dwelt in the land of Canaan and in the land of Egypt] in forty years" was four hundred and thirty years: an interpolation of very late date indeed.

5. The fifth class is an extension of the one immediately preceding, and comprises larger phrases, additions, and repetitions from parallel passages. Whenever anything is mentioned as having been done or said previously by Moses, or where a command of God is related as being executed, the whole speech bearing upon it is repeated again at full length. These tedious and always superfluous repetitions are most frequent in Exodus, both in the record of the plagues and in the many interpolations from Deuteronomy.

6. To the sixth class belong those "emendations":

May his men be a multitude;" the Sam., with its characteristic aversion to, or rather ignorance of, the use of poetical diction, reads "May there be from him a multitude," thereby trying perhaps to encounter also the apparent difficulty of the word υπερβαλλομενος, standing for "a great number." Anything more absurd than the υπερβαλλομενος in this place could hardly be imagined.

A few verses further on, the uncommon use of προφανες in the phrase προφανες προφανες (Dent. xxxiii. 11), as "lest, "not," caused the no less unfortunate alteration προφανες προφανες, so that the latter part of the passage, "smite through the loins of them that rise against him, and of them that hate him, that they rise not again," becomes "will rise again?" — barren alike of meaning and of poetry. For the unusual and poetical ἐκκένωμεν (Dent. xxxiii. 25; A. V. "by strength"), ἐκκένωμεν is suggested; a word about the significance of which the commentators are at a greater loss than about that of the original.

Thus in Gen. i. 15, the words ἐκκένωμεν, "to give light upon the earth," are inserted from ver. 17; Gen. xi. 8, the word ὅρασις, and a tower," is added from ver. 4; Gen. xxiv. 22, ὅπως, "on her face (nose), is added from ver. 7. So that the former verse reads "And the man took (ὅρασις for ὅπως) a golden ring upon her face."
b SAMARITAN PENTATEUCH

Again, in Gen. ii. 2, "And God [7 had] finished (יִבָּשָׂל, ? pluperf.) on the seventh day," it is altered into יְבָשָׂל, "the sixth," lest God's rest on the Sabbath-day might seem incomplete (LXX.). In Gen. xxxix. 3, 8, "We cannot, until all the flocks be gathered together, and till they roll the stone from the mouth of the well," יְבָשָׂל, "flocks," is replaced by יִבָּשָׂל, "shepherds," since the flocks could not roll the stone from the well: the corrector not being apparently aware that in common parlance in Hebrew, as in other languages, "they" occasionally refers to certain not particularly specified persons. Well may Gesenius ask what this corrector would have made of Is. xxxvii. [not xxxvi. 36]: "And when they arose in the morning, behold they were all dead corpses." The surpassing reverence of the Samaritan is shown in passages like Ex. xxi. 10, "and they beheld God," which is transmuted into "and they held, chug to, God" — a reading certainly less in harmony with the following — "and they ate and drank."

7. The seventh class comprises what we might call Samaritanisms, i.e. certain Hebrew forms translated into the idiomatic Samaritan, and here the Sam. Codices vary considerably among themselves, — as far as the very imperfect collation of them has hitherto shown — some having retained the Hebrew in many places where the others have adopted the new equivalents. c

8. The eighth and last class contains alterations made in favor or on behalf of Samaritan theology, hermeneutics and domestic worship. Thus the word Eldhan, four times construed with the plural, in the Hebrew Pentateuch, is in the Samaritan Pent. joined to the singular verb (Gen. xx. 22; xxxi. 65, xxxvi. 7; Ex. xxii. 9): and further, both anthropomorphisms as well as anthropopathisms are carefully expunged — a practice very common in later times. d The last and perhaps the most momentous of all intentional alterations is the constant change of all the הָרֳעָה, "God will choose a spot," into הָרֲעָה, "He has chosen," namely, Gerizim, and the well known substitution of Gerizim for Ebal in Deut. xxvii. 14: "It shall be when ye be gone over Jordan, that ye shall set...a wise," reads בָּרָה; תַּרְעָה, "roll," into תַּרְעָה; יִתְרָה, "days," יִתְרָה.

c כְּרָנָא יָדִים מִפְּלָשִׁים, "man of war," an expression used of God (Ex. xxxv. 3), becomes הוָרִע, "hero of war," the former apparently of irreverent import to the Samaritan ear; for הָרֳעָה (Deut. xxix. 19. A. V. 20), lit. "And the wrath (nose) of the Lord shall smoke," תוֹרָה; הָרֲעָה, "the wrath of the Lord will be kindled," is substituted; יִתְרָה (Deut. xxxii. 18), "the rock (God) which begat thee," is changed into יִתְרָה, "the rock which glorifies thee;" Gen. xix. 12, יִתְרָה, "the men," used of "the angels," has been replaced by יִתְרָה, "the angels." Extreme reverence for the patriarchs changed יִתְרָה, "Cursed be their (Simeon and Levi's) anger," into יִלְשֹׁרָה, "brilliant is their anger" (Gen. xlix. 7). A flagrant falsification is the alteration, in an opposite sense, which they ventured in the passage יִתְרָה, "The beloved of God [Benjamin, the founder of the Judeo-Davidian empire, hateful to the Samaritans] shall dwell securely," transformed by them into the almost senseless יִתְרָה, "The hand, the hand of God will rest" [If Hiph. : הָרֲעָה, will cause to rest :] "securely" (Deut. xxxiii. 12). Reverence for the Law and the Sacred Records gives rise to more emendations: יִלְשֹׁרָה (Deut. xxvii. 12. A. V. 11), "by his secrets," becomes יִלְשֹׁרָה, "by his flesh;" יִלְשֹׁרָה, "cohit cum ea;" (Deut. xxviii. 30), יִלְשֹׁרָה, "cum cunctam cum ea;" יִלְשֹׁרָה, "to the dog shall ye throw it" (Exx. xxii. 20) (A. V. 21). יִלְשֹׁרָה, "ye shall indeed throw (away)."
up these stones which I commanded you this day on Mount Ebal (Sam. Gerizim), and there shall thou build an altar unto the Lord thy God, etc. This passage gains a certain interest from Whiston and Kennicott having charged the Jews with corrupting it from Gerizim into Ebal. This supposition, however, was met by Rutherford, Parry,lecob, Leake, Verschuer, and others; and we need only add that it is completely given up by modern Biblical scholars, although it cannot be denied that there is some prima facie ground for a doubt upon the subject. To this class also belong more or less:...
It may, perhaps, not be quite superfluous to observe, before we proceed any farther, that, since up to this moment no critical edition of the Sam. Pent., or even an examination of the Codices since Kennicott—who can only be said to have begun the work—has been thought of, the treatment of the whole subject remains a most precarious task and beset with unexampled difficulties at every step; and also that, under these circumstances, a more or less scientific arrangement of isolated or common Samaritan mistakes and falsifications appears to us to be a subject of very small consequence indeed.

It is, however, this same rudimentary state of investigation—after two centuries and a half of fierce discussion—which has left the other and much more important question of the Age and Origin of the Sam. Pent., as unsettled to-day as it was when it first came under the notice of European scholars. For our own part we cannot but think that as long as (1) the history of the Samaritans remains involved in the obscurities of which a former article will have given an account; (2) we are restricted to a small number of comparatively recent Codices; (3) neither these Codices themselves have, as has just been observed, been thoroughly collated and recollated, nor (4) more than a feeble beginning has been made with anything like a collation between the various readings of the Sam. Pent. and the LXX. (Wallon omitted the greatest number, "cum millibus sensus variat etiam sensum constituant"); so long must we have a variety of the most divergent opinions, all based on "probabilities," which are designated on the other side as "false reasonings" and "individual creeds," and which, moreover, not infrequently start from flagrantly false premises.

We shall, under these circumstances, confine ourselves to a simple enumeration of the leading opinions, and the chief reasons and arguments alleged for and against them:—

(1.) The Samaritan Pentateuch came into the hands of the Samaritans as an inheritance from the ten tribes whom they succeeded—so the popular notion runs. Of this opinion are J. Morinus, Walton, Cappellus, Kennicott, Michaelis, Eichhorn, Reuss, Jahn, Bertholdt, Steuwel, Masuch, Stuart, Davidson, and others. Their reasons for it may be thus briefly summed up:—

(a.) It seems improbable that the Samaritans should have accepted their code at the hands of the Jews after the exile, as supposed by some critics, since there existed an intense hatred between the two nationalities.

(b.) The Samaritan Canon has only the Pentateuch in common with the Hebrew Canon; had that book been received at a period when the Hagiography and the Prophets were in the Jews' hands, it would be surprising if they had not also received those.

(c.) The Sam. letters, awesomely the more ancient, are found in the Sam. Cod.; therefore it was written before the alteration of the character into the square Hebrew—which dates from the end of the Exile—took place.

We cannot omit briefly to draw attention here to a most keen-eyed suggestion of S. D. Luzzatto, contained in a letter to R. Kircheim (Carme Shemonon, p. 191, &c.), by the adoption of which many readings in the Heb. Codex, now almost unintelligible, appear perfectly clear. He assumes that the copyist who at some time or other after Ezra transcribed the Bible into the modern square Hebrew character, from the ancient copies written in so-called Samaritan, occasionally mistook Samaritan letters of similar form. And since our Sam. Pent. has those different readings in common with the Mas. Text, that other most point, whether it was copied from a Hebrew or Samaritan Codex, would thus appear to be solved. Its constant changes of 71 and 7, 7 and 71 and 7 — letters which are similar in Hebrew, but not in Samaritan—have been long used as a powerful argument for the Samaritans having received the Pent. at a very late period indeed.

Since the above opinion—that the Pent. came into the hands of the Samaritans from the Ten Tribes—is the most popular one, we will now advance some of the chief reasons brought against it, and the reader will see by the somewhat forcible nature of the arguments on either side, that the last word has not yet been spoken in the matter.

(a.) There existed no religious animosity whatsoever between Judah and Israel when they separated. The ten tribes could not therefore have instead of forty (comp. Jer. xxi. 1), accounted for by the 40 (numerical letter for forty) in the original being mistaken for 40 (twenty). Again, 2 Ch. xxvii. 2, forty is put instead of twenty (comp. 2 K. viii. 20); 2 K. xxiv. 4, 40, for 20; 1 K. iii. 12, 40 for 40; etc.; all these letters and 40 resembling each other very closely.
SAMARITAN PENTATEUCH

bequeathed such an animosity to those who succeeded them, and who, we may add, probably cared as little originally for the disputes between Judah and Israel, as colonists from far off countries, belonging to utterly different races, are likely to care for the quarrels of the aborigines who formerly inhabited the country. On the contrary, the contest between the slowly judaized Samaritans and the Jews only dates from the moment when the latter refused to recognize the claims of the former, of belonging to the people of God, and rejected their aid in building the Temple: why then, it is said, should they not first have received the one book which would bring them into still closer conformity with the returned exiles, at their hands? That the Jews should yet have refused to receive them as equals is no more surprising than that the Samaritans from that time forward took their stand upon this very Law—altered according to their circumstances—and proved from it that they and they alone were the Jews kar 'ilege. (b.) Their not possessing any other book of the Hebrew Canon is not to be accounted for by the circumstance that there was no other book in exist- ence at the time of the schism, because many psalms of David, writings of Solomon, etc., must have been circulating among the people. But the jealousy with which the Samaritans regarded Jeru- salem, and the intense hatred which they naturally conceived against the post-Mosaic writers of na- tional Jewish history, would sufficiently account for their rejecting the other books, in all of which, save Joshua, Judges, and Jos, either Jerusalem, as the centre of worship, or David and his Horse, are ex- torted. If, however, Loeve has really found with them, as he reports in the Allgen, Zeilung d. Judenhe, April 18th, 1839, our Book of Kings and Solomon's Song of Songs,—which they certainly would not have received subsequently,—all these arguments are perfectly gratious.

(c.) The present Hebrew character was not in- troduced by Ezra after the return from the Exile, but came into use at a much later period. The Samaritans might therefore have received the Pentateuch at the hands of the returned exiles, who, according to the Talmud, afterwards changed their writing, and in the Pentateuch only, so as to dis- tinguish it from the Samaritan. "It is possible," says Bomberg (Schedel, xx. b.), "the Pentateuch was given to Israel in Bori writing and the Holy (Hebrew) language; it was again given to them in the days of Ezra in the Ashurilh writing and Aramaic language. Israel then selected the Ashurilh writing and the Holy language, and left to the Hedotes (Tbavra) the Bori writing and the Aramaic language. Who is that it was introduced? The Catholick Samaritans. What is Bori writing? The Libonah (Samaritan)." It is well known also that the Maccabean coins bear Samaritan inscriptions: so that "Hedotes" would point to the common use of the Samaritan character for ordinary purposes, down to a very late period.

(3.) The second leading opinion on the age and origin of the Sam. Pent. is that it was introduced by Manasseh (comp. Josephus, Ant. xii. 8, §§ 2, 4) at the time of the foundation of the Samaritan Sanctuary on Mount Gerizim (Ant. van Dale, K. Simon, Prideaux, Fudla, Hasse, De Wette, Gescrius, Hengstenberg, Kell, etc.). In support of this opinion are alleged, the idolatry of the Samaritans before they received a Jewish priest through Esarhaddon (2 K. xvii. 24-33), and the immense number of readings common to the LXX. and this Code, against the Masonic Text.

(3.) Other, but very isolated notions, are those of Morin, Le Clerc, Pironet, etc., that the Israelit- ish priest sent by the king of Assyria to instruct the new inhabitants in the religion of the country brought the Pentateuch with him. Further, that the Samaritan Pentateuch was the production of an impostor, Dositheus (Talmaud), who lived during the time of the Apostles, and who falsified the sacred records in order to prove that he was the Messiah (Ussher). Against which there is only this to be observed, that there is not the slightest alteration of such a nature to be found. Finally, that it is a very late and faulty recension, with additions and corruptions of the Masonic Text (4th century after Christ), into which glosses from the LXX. had been received (Frankel). Many other suggestions have been made, but we cannot here dwell upon them: suffice it to have mentioned those to which a certain popularity and authority attaches.

Another question has been raised: Have all the variants which we find in our copies been in- troduced at once, or are they the work of many generations? From the number of vague opinions on that point, we have only room here to adduce that of Azariah de Rossi, who traces many of the glosses (Class 2) both in the Sam. and in the LXX. to an ancient Targum in the hands of the people at the time of Ezra, and refers to the Talmudical passage of Nebor, 37: "And he read in the Book of the Law of God—is this Mikra, the Pentateuch; יתפיח, explanatory, this is Targum." [Versio- nons (Targumim).] Considering that no Masore- tes fixed the letters and signs of the Samar. Codex, and that, as we have noticed, the principal object was to make it read as smoothly as possible, it is not easily seen why each succeeding century should not have added its own emendations. But here, too, investigation still wanders about in the maze of speculation.

The chief opinion with respect to the agreement of the numerous and as yet uninvestigated—even uncouthed—readings of the LXX. (of which likewise no critical edition exists as yet), and the Sam. Pent. are:

1. That the LXX. have translated from the Sam. (De Dieu, Schlen, Hottinger, Hassenen, Eichhorn, etc.).

2. That mutual interpolations have taken place (Grotius, Ussher, Rivard, etc.).

3. That both Versions were formed from Hebrew Codices, which differed among themselves as well as from the one which afterwards obtained public authority in Palestine; that however very many willful corruptions and interpolations have crept in in later times (Gesnius).

4. That the Samar. has, in the main, been al- tered from the LXX. (Frankel).

It must, on the other hand, be stated also, that the Sam. and LXX. quite as often disagree with each other, and follow each the Masor. Text. Also, that the quotations in the N. T. from the LXX., where they coincide with the Sam. against the Hebr. Text, are so small in number and of so unimportant a nature that they cannot be adduced as any argument whatsoever.

The following is a list of the MSS. of the Sam. Pent. now in European libraries [Koenenettoit]: —

No. 9. Paris (Peirese) Imp. Libr., Sam. No. 2. Ancient MS., wanting first 17 chapters of Gen.; and all Dent. from the 7th ch. Homiagant, however, quotes from Gen. x. 11 of this Codex, a rather puzzling circumstance.

No. 14. Rome (Card. Cebellutus), Vatican. Also supposed to be of the 7th century, but very doubtful.

No. 15. Milan (Ambrosian Libr.). Said to be very ancient; not collated.

No. 16. Leyden (Golius MS.), fol. 1. Said to be complete.

No. 17. Gotha (Ducal Libr.). A fragment only.

Printed editions are contained in the Paris and Walton Polyglots; and a separate reprint from the latter was made by Blayney, Oxford, 1790. A Facsimile of the 20th ch. of Exodus, from one of the Nubius MSS., has been edited, with portions of the corresponding Masmotic text, and a Russian Translation and Introduction, by Levysohn, Jerusalem, 1860.a

H. VERSIONS.

1. Samaritan. — The origin, author, and age of the Samaritan Version of the Five Books of Moses, has hitherto — so Eichhorn quite rightly observes — "always been a golden apple to the investigators, and will very probably remain so, until people leave off venturing decisive judgments upon historical subjects which no one has recorded in antiquity." And, indeed, modern investigators, keen as they have been, have done little towards the elucidation of the subject. According to the Samaritans themselves (De Saucy, Mem. 3; Paulus; Winer), their high-priest Nathaniel, who died about 20 B. c., is its author. Gesenius puts its date a few years after Christ. Jahnbohl thinks that it had long been in use in the second post-Christian century. Trankel places it in the post-Mohammedan time. Other investigators date it from the time of Elharudden's priest (Schwarz), or either shortly before or after the foundation of the temple on Mount Gerizim. It seems certain, however, that it was composed before the destruction of the second temple; and being intended, like the Targums, for the use of the people exclusively, it was written in the popular Samaritan idiom, a mixture of Hebrew, Aramaic, and Syriac.

In this version the original has been followed, with a very few exceptions, in a shabby and sometimes perfectly childish manner, the sense evidently being of minor consideration. As a very striking instance of this may be adduced the translation of Deut. iii. 9: "The Zidonians call Hermon הָר עֶשֶׁר (Shirion), and the Amorites call it הָר לַי ה (Shehirn)."

The translator deriving הָר לַי ה from הָר לַי ה "prince, master," renders it הָר לַי ה "masters," and finding the letters reversed in the appellation of the Amorites as הָר לַי ה, reverses also the sense in his version, and translates it by "slaves" הָר לַי ה. In other cases, where no Samaritan equivalent could be found for a Hebrew word, the translator, instead of paraphrasing it, simply transposes its letters, so as to make it look Samaritan. Occasionally he is misled by the orthography of the original: הָר לַי ה הָר לַי ה. "If so, where . . . ?" he renders הָר לַי ה הָר לַי ה "If so, I shall be wrath;" mistaking הָר לַי ה for הָר לַי ה, and thus "anger."

On the whole it may be considered a very valuable aid towards the study of the Samaritan Text, on account of its very close verbal adherence. A few cases, however, may be brought forward, where the Version has departed from the Text, either under the influence of popular religious notions, or for the sake of explanation. - We pray" — so they write to "counsel" — every day in the morning and in the evening; as it is said, the one lamb shalt thou prepare in the morning and the second in the evening: we bow to the ground and worship God." Accordingly, we find the translator rendering the passage, "And Isaac went to walk (םו) in the field," by — "And Isaac went to pray (םו) in the field." "And Abraham rose in the morning (םו)," is rendered מִשְׂרָה, in the prayer," etc. Anthropomorphisms are avoided. "The image (םו) of God" is rendered מֶל הָלָה, the glory. וַה הוֹס ה "The mouth of Jehovah," is transformed into וַה הוֹס ה, the word of Jehovah. For

a The original intention of the Russian Government to publish the whole Codex in the same manner seems to have been given up for the present. We can only hope that, if the work is ever taken up again, it will fall into more capable hands. Mr Levysohn's Introduction, brief as it is, shows him to be utterly wanting both in scholarship and critical acumen, and to be, moreover, entirely unequipped with the facts; his new discoveries have been disposed of some hundred and fifty years since.
But no safe conclusion as to the respective relation of the two versions can be drawn from this.

This Version has likewise, in passing through the hands of copyists and commentators, suffered many interpolations and corruptions. The first copy of it was brought to Europe by De la Valle, together with the Sam. Text, in 1616. John Neudrus first published it together with a faulty Latin translation in the Paris Polyglott, whence it was, with a few emendations, reprinted in Walton, with some notes by Castellius. Single portions of it appeared in Halle, ed. by Cellarius, 1769, and by Uhlemaun, Leipzig, 1857. Compare Gesenius, De Pent. Sam., Origine, etc., and Winer's monograph, De Versionis Pent. Sam. Isodol, etc., Leipzig, 1817.

2. To *Zaqapertekîv*. The hatred between the Samaritans and the Jews is supposed to have caused the former to prepare a Greek translation of their Pent. in opposition to the LXX. of the Jews. In this way at least the existence of certain fragments of a Greek Version of the Sam. Pent., preserved in some MSS. of the LXX., together with portions of Aquila, Symmachus, Theodotion, etc., is accounted for. These fragments are supposed to be alluded to by the Greek Fathers under the name *Zaqapertekîv*. It is doubtful, however, whether it ever existed (as Gesenius, Winer, Jahnbohl, suppose) in the shape of a complete translation, or only designated (as Castellius, Voss, Herbst, held) a certain number of scholia translated from the Sam. Version. Other critics again (Havenrick, Hengstenberg, etc.) see it in only a corrected edition of certain passages of the LXX.

3. In 1670 an Arabic Version of the Sam. Pent. was made by Abu Noid in Egypt on the basis of the Arabic translation of Saadiah b. Hasingon. Like the original Samaritan it avoids anthropomorphism and anthropopathism, replacing the latter by euphemisms, besides occasionally making some slight alterations, more especially in proper nouns. It is extant in several MS. copies in European libraries, and is now in course of being edited by Kuenen, Leyden, 1850-54, &c. It appears to have been drawn up from the Sam. Text, not from the Sam. Version: the Hebrew words occasionally remaining unaltered in the translation. Often also it renders the original differently from the...
SAMARITAN PENTATEUCH

Samar. Version.— Principally noticeable is its excessive dread of assigning to God anything like human attributes, physical or mental. For בִּרְכָּתָם, "God," we find (as in Sádiah sometimes) the Angel of God; for "the eyes of God" we have (Dent. xi. 12) "the Beholding of God." For "Bread of God," ־כְּלָלָה, "the necessary," etc. Again, it occasionally adds honorable epithets where the Scripture seems to have omitted them, etc. Its language is far from elegant or even correct; and its use must likewise be confined to the critical study of the Sam. Text.

4. To this Arabic version Ali Barachat, a Syrian, wrote in 1208 a somewhat paraphrastic commentary, which has by degrees come to be looked upon as a new Version—the Ṣajadìn, in contradistinction to the Arabic, and which is often confounded with it in the MSS. On both Recensions see Eichhorn, Gesenius, Juyundoll, etc.

III. Samaritan Literature.

It may perhaps not be superfluous to add here a concise account of the Samaritan literature in general, since to a certain degree it bears upon our subject.

1. Chronica Samaritana.— Of the Pentateuch and its Versions we have spoken. We have also mentioned that the Samaritans have no other book of our Received Canon. "There is no Prophet but Moses" is one of their chief dogmas, and hence are the invectives in which they indulge against men like Samuel, "a Magician and an Infielder," מְרֶשֶׁת (Chron. Sam.); Eli; Solomon, "Sihkah," (Gen. xlii. 10), "i.e. the man who shall spoil the Law and whom many nations will follow because of his own Recklessness" (De Soc. Mem. 4). Ezra "cursed for ever" (Litt. to Huntington, etc.). Joshua alone, partly on account of his being an Ephraimitic, partly because Shechem was selected by him in the scene of his solemn valedictory address, seems to have found favor in their eyes; but the Book of Joshua, which they perhaps possessed in its original form, gradually came to form only the groundwork of a fictitious, national Samaritan history, overgrown with the most fantastic and anachronistic legends. This is the so-called "Samaritan Josuah," or Chronicam Samaritanum.

It was sent to Scaliger by the Samaritans of Cairo in 1584. It was edited by Juyundoll (Leyden, 1818); and his acute investigations have shown that it was redacted into its present form about A. D. 1300, out of four special documents, three of which were Arabic and one Hebrew (i.e. Samaritan). The Leyden MS. in 2 pts., which Gesenius, De Sam. Thol. p. 8, n. 18, thinks unique, is dated A. D. 1304-1319 (A. D. 1306-1315);—the Cod. in the Brit. Museum.

SAMARITAN PENTATEUCH

lately acquired, dates A. H. 908 (A. D. 1502). The chronicle embraces the time from Joshua to about A. D. 450, and was originally written in, or subsequently translated into, Arabic. After eight chapters of introductory matter begins the early history of "Israel" under King Joshum, who, among other deeds of arms, wages war, with 300,000 mounted men—half Israel—against two kings of Persia. The last of his five "royal" successors is Shimshon (Samson), the handomest and most powerful of them all. These reigned for the space of 250 years, and were followed by five high-priests, the last of whom was Uzi (? = Uzzi, Ez. vii. 4). With the history of Eli, "the seducer," which then follows, and Samuel "a sorcerer," the account, by a sudden transition, runs off to Nebuchadnezzar (ch. 46), Alexander (ch. 48), and Hadrian (47), and closes suddenly at the time of Julian the Apostate.

We shall only adduce here a single specimen out of the 45th ch. of the book, which treats of the subject of the Pentateuch:—

Nebuchadnezzar was king of Persia (Mossul), and conquered the whole world, also the kings of Syria. In the thirteenth year of their subjuga
tion they rebelled, together with the kings of Jeru-
salem and Jerusalem, and subjected the Samaritans, to escape from the vengeance of their natural, and Persian colonists took their place. A curse, however, rested upon the land, and the new immigrants died from eating of its fruits (Joseph. Ant. ix. 14, § 3). The chief of Israel (i.e. Samaritans), being asked the reason of this by the king, explained it by the abolition of the worship of God, for which upon this permit them to return and to erect a temple, in which work he promised to aid them, and he gave them a letter to all their dispersed brethren. The whole Dispersion now assembled, and the Jews said, "We will now go up into the Holy City (Jerusalem) and live there in unity," but the sons of Horiu (Aaron) and of Joseph (i.e. the priests and the Samaritans) insisted upon going to the "Mount of Blessing," Gerizim. The dispute was referred to the king, and while the Samaritans proved their case from the books of Moses, the Jews grounded their preference for Jerusalem on the post-Mosaic books. The supe-
rior force of the Samaritan argument was fully recog-
nized by the king. But as each side—by the mouth of their spokesmen, Sandalhat and Zerulab respectively,—charged the other with basing its claims on a forged document, the sacred books of each party were subjected to the ordeal of fire. The Jewish Record was immediately consumed, while the Samaritan leapd three times from the flames into the king's lap: the third time, however, a portion of the scroll, upon which the king had spat, was found to have been consumed. Thirty-six Jews were immediately beheaded, and the Samaritans, to the number of 300,000 wept, and all Israel worshipped henceforth upon Mount Gerizim,—"and so we will ask our help from the grace of God, who has in his mercy granted all these things, and in Him we will confide."

2. From this work chiefly has been compiled another Chronicle, written in the 14th century (1356).

a Thus פַּיּה דִּבְרֵי שֵׁם ה' (Gen. xlix. 11) (Sam. Ver. "Bn
n, his city"), the Arab renders إبَن نُوح (Gen. xlii. 43), "his sons" (Sam. Ver. "אֵלֶּה שְׂנֵיהֶם"). The Arab transla-
tes אֱלֹהֵי שְׁפֹרִים (Ap. 28).
Samaritan Pentateuch

by Abu'l Fatah. This comprises the history of the Jews and Samaritans from Adam to A. D. 792 and 798 (A. D. 1335 and 1397) respectively (the forty-two years must have been added by a later historiographer). It is of equally low historical value; its only remarkable feature being its adoption of certain Talmudical legends, which it took at second hand from Josephin ben Torion. According to this chronicle, the deluge did not cover Gerizim, in the same manner as the Midrash (Iec. Reb.) exemplifies the whole of Palestine from it. A specimen, likewise on the subject of the Pentateuch, may not be out of place:—

In the year of the world 4150, and in the 10th year of Philadephia, this king wished to learn the difference between the Law of the Samaritans, and that of the Jews. He therefore bade both send him some of their elders. The Samaritans delegated Ahsor, Sunda, and Hadnaka, the Jews Eleazar only. The king assigned houses to them, and gave them each an adept of the Greek language, in order that he might assist them in their translation. The Samaritans rendered only their Pentateuch into the language of the land, while Eleazar produced a translation of the whole Canon. The king, perceiving variations in the respective Pentateuchs, asked the Samaritans the reason of it. Whereupon they replied that these differences chiefly turned upon two points. (1.) God had chosen the Mount of Gerizim: and if the Jews were right, why was there no mention of it in their Thora? (2.) The Samaritans read, Deut. xxxii. 35, *לִבְּנֵי יְהֹוָה, אֶל-דַּיְוָה הַגֶּזֶר, לַעֲבֵד בָּהֶן יִשְׂרָאֵל*—"to the day of vengeance and reward," the Jews לִבְּנֵי יְהֹוָה, אֶל-דַּיְוָה הַגֹ̄זֶר, לַעֲבֵד בָּהֶן יִשְׂרָאֵל—"Mine is vengeance and reward"—which left it uncertain whether that reward was to be given here or in the world to come. The king then asked what was their opinion about the Jewish prophets and their writings, and they replied, "Either they must have said and contained what stood in the Pentateuch, and then their saying it again was superfluous; or more; or less; or either of which was again distinctly prohibited in the Thora; or finally they must have changed the laws, and these were unchangeable." A Greek who stood near, observed that laws must be adapted to different times, and altered accordingly; whereupon the Samaritans proved that this was only the case with human, not with divine laws: moreover, the seventy Elders had left them the explicit command not to accept a word beside the Thora. The king now fully approved of their translation, and gave them rich presents. But to the Jews he strictly enjoined not even to approach Mount Gerizim. There can be no doubt that there is a certain historical fact, however contorted, at the bottom of this comp. the Talmudical and other accounts of the LXX., but we cannot now further pursue the subject. A lengthened extract from this chronicle—the original text with a German translation—is given by Schnurrer in Paulus' Neues Repertorium, 1790, 117-119.

3. Another "historical" work is the

كتاب الأسطير

on the history and genealogy of the patriarchs, from Adam to Moses, attributed to Moses himself; perhaps the source of which Ptolemy referred to.

It consists of sixteen yellow leaves (supposed, however, to contain the history of the world down to the end). An anonymous recent commentary on it, A. D. 1209, A. D. 1784, is in the Brit. Mus. (No. 1140, Add.).

This grammar begins in the following characteristic manner:—

Thus said the Sheikh, rich in good works and knowledge, the model, the abstemious, the well-guided Amin Said, to whom God be merciful and compassionate. *Praise be unto God for his help, and I ask for his guidance towards a clear exposition. I have resolved to lay down a few rules for the proper manner of reading the Holy Writ, on account of the difference which I found, with respect to it, among our co-religionists in whom may God make many, and inspire to obedience unto Him—and in such a manner that I shall bring proofs for my assertions, from which the wise could in no way differ. But God knows best!*

.Rule 1: With all their discrepancies about dogmas or religious views, yet all the confessors of the Hebrew religion agree in this, that the ב is added to it, according to the unanimous testimony of the MSS., etc.

*eddit., cum Proll. Latine vertit, et Commentary illam travit Dr. Ed. Vilmar." Goth. 1855, Svo. A. Compare the well-known dictam of Omar on the "Library, Paris" (Bohl; Imp. Vexandian Library (Gibson, ch. 51)).

*Under the title 

أشج العظام عن إسرائيل الموت
SAMARITAN PENTATEUCH

The treatise concludes, at the end of the 12th Union or Rule:

1. That also the perfect is used in the form of the imperative. Thus it is reported of a man of the last reputation, that he had used the form of the imperative in the passage (Ex. iii. 13),

"And they shall say to me, What is his name?" He who reported this to me is a man of very high standing, against whose truthfulness nothing can be brought forward. But God knows best.

"There are now a few more words to be treated, of which, however, we will treat riao once. And blessed be His name for evermore."

2. Their liturgical literature is more extensive, and not without a certain poetical value. It consists chiefly of hymns (Icetor, Durum) and prayers for Sabbath and Feast-days, and of occasional prayers at meals, circumcisions, burials, and the like. We subjoin a few specimens from M.S.s. in the British Museum, transcribed into Hebrew characters.

The following is part of a Litany for the dead:

אֵל יְהוָא אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲבֵדֵי אֲכַל אֲסֹמְס רַבָ' קֵרֵס

Lord Jehovah, Elohim, for Thy mercy, and for Thy name, and for Thy glory, and for the sake of our Lords Abraham, and Isaac, and Jacob, and our Lords Moses and Aaron, and Eleazar, and Ithamar, and Phineas, and Joshua, and Caleb, and the Holy Angels, and the seventy Elders, and the holy mountain of Gerizim, Beth El. If Thou acceptest (כֶּם הַר) this prayer (נְדֵנָכָה) do as thou wilt, and go forth from before Thy holy covenanted a gift sent to protect the spirit of Thy servant, N., the son of N., the sons of [---], daughter [---] from the sons of [---]. O Lord Jehovah, in Thy mercy have compassion on him (ךֵן הַר) have compassion on her, and rest his (הַנְּשָׁם) servant in the garden of Eden; and forgive him (ךֵן הַנְּשָׁם) or her, and all the congregation of Israel who flock to Mount Gerizim, Beth El. Amen. Through Moses [is] the trusty. Amen, Amen, Amen.

The next is part of a hymn (see Kirchheim's Carme Shevarev, commentaries on Genesis, Carm. Sup. 3., ed. 3.):

1. There is no God but one, The everlasting God, Who liveth forever; God above all powers, And who thus remaineth forever.

2. In Thy great power shall we trust.

SAMARITAN PENTATEUCH

Thy power was hidden, And Thy glory and mercy Revealed are both the things that are revealed, and those that are unrevealed before the reign of Thy Godhead, etc.

IV. We shall only briefly touch here, in conclusion, upon the strangely contradictory Biblical laws framed for the regulation of the intercourse between the two rival nationalities of Jews and Samaritans in religious and ritual matters; discrepancies due partly to the ever-shifting phases of their mutual relations, partly to the modifications brought about in the Samaritan creed, and partly to the now less nor great acquiescence of the Jews, who like it best when they are the state of the thing. Thus we find the older Talmudic authorities disputing whether the Cuthim (Samaritans) are to be considered as "Real Converts" תְּרוֹמֵי צְרִיךְ, or only converts through fear — "Lion Converts" תְּרוֹמֵי צְרִיךְ — in allusion to the incident related in 2 K. xvii. 25 (Deut. K. 38; Ketub. 75, &c.) One Rabbi holds בְּאֵל יֵדְרֵד — "A Samaritan is to be considered as a heathen;" while R. Simon b. Gamaliel — the same whose opinion on the Sam. Pent. we had occasion to quote before — pronounces that they are to be treated in every respect like the Jews (Gel. iv. 2; Ketub. 11, &c.). It would appear that notwithstanding their rejection of all but the Pentateuch, they had adopted many traditional religious practices from the Jews — principally such as were derived directly from the books of Moses. It was acknowledged that they kept these ordinances with even greater rigor than those from whom they adopted them. To this rule, as a rule, the rabbinical writers were therefore bound in them for their ritual slaughtering animals, even fowls (Chal. 4 a); their wells are pronounced to be conformed to all the conditions prescribed by the Mishna (Toesp. Mish. 6; comp. Mish. 8, 1). See, however, Abodah Zarah (Jer. v. 9). Their unleavened bread for the Passover is consumed (Tal. 10; Chal. 4); their cheese (Moss. Cath. 2); and even their whole food is allowed to the Jews (Ab. Zeb. Jer. v. 4). Compare John iv. 8, where the disciples are reported to have gone into the city of Samaria to buy food. Their testimony was valued in that most stringent matter of the letter of divorce (Moss. Cath. 5). They were admitted to the office of circumcising Jewish boys (Moss. Cath. 1) — against, we read, Eleazar, who asserts that they circumcise — in the name of Mount Gerizim (Abodah Zarah, 43). The criminal law makes no difference whatever between them and the Jews (Moss. Cath. 2; Moss. 8); and a Samaritan who strictly adheres to his own special creed is honored with the title of a Cuthi-Chalier (Gittin 10 b; Miqra, 33 b). By degrees, however, modifications began to be laid upon the use of their wine, vinegar, bread (Moss. Cath. 2; Toesp. 77, 5; &c.) This intermediate stage of uncertain and inconsistent treatment, which must have lasted for nearly two centuries, is best characterized by the small rabbinical treatise quoted above — "Massachusetts Cuthim (2d cent. A.D.)" —
SA'MI (Ταδάς; [Var. Τατάς; Abd. Σαμί])
Alex. Σαμί: Todt). SHORE (1 Esdr. v. 28; comp. Ezr. ii. 42).

SAMIS (Σαμίς; [Var. Σαμίς; Alex. Σαμί; Abd. Σαμί]) om. in Vulg.). SHIRE I (1 Esdr. ix. 24; comp. Ezr. x. 38).

SAMLAH (Σαμαλ [genitive]: Σαμαδή; Alex. Σαμάτας; [in 1 Chr.], Σαμαθή; Alex. Σαμί, Abd. Σαμί], gen. xxvi. 16; 1 Chr. i. 47, 48. One of the kings of Edom, successor to HADAD or HADAH. Sambah, whose name signifies “a razor,” was of Masrekah; that being probably the chief city during his reign. This mention of a separate city as belonging to each (almost without exception) of the “kings” of Edom, suggests that the Edomite kingdom consisted of a confederacy of tribes, and that the chief city of the reigning tribe was the metropolis of the whole.

E. S. P.

SAMUS (Σαμώς [height: Σαμών]); SHLEMA (1 Esdr. ix. 43; comp. Neh. viii. 4).

SAMOS (Σαμός [height: Σαμών]). A very illustrous Greek island off that part of Asia Minor where Ionía touches Caria. For its history, from the time when it was a powerful member of the Ionian confederacy to its recent struggles against Turkey during the course of its independence, and since, we must refer to the Dict. of Greek and Rom. Geography. Samos is a very lofty and commanding island; the word, in fact, denotes a height, especially by the ancients; hence, also, the name of SAMOTHRAcia, or “the Thracian Samos.” The Ionian Samos comes before our notice in the detailed account of St. Paul’s return from his third missionary journey (Acts xx. 15). He had been at Chios, and was about to proceed to Miletus, having passed by Ephesus without touching there. The topographical notices given incidentally by St. Luke are most exact. The night was spent at the anchorage of Erychilium, in the narrow strait between Samos and the extremity of the mainland-ridge of Myrciae. This spot is famous both for the great battle of the old Greeks against the Persians in B.C. 479, and also for a gallant action of the modern Greeks against the Turks in 1824. Here, however, it is more natural (especially as we know, from 1 Mace. xx. 23, that Jews resided here) to allude to the meeting of Herod the Great with Marcus Agrippa in Samos, whence resulted many privileges to the Jews (Joseph. Ant. vii. 2, §§ 3, 4). At this time and when St. Paul was there, it was politically a “free city” in the province of Asia. Various travellers (Tournefort, Lycocle, Dalberg, Ross) have described this island. We may refer particularly to a very recent work on the subject, Description de l’ile de Patmos et de l’ile de Samos (Paris, 1855), by V. Guérin, who spent two months in the island.

J. S. H.

SAMOTHRACIA (Σαμοθρακία [prob. height of Thrace]: Samothracia). The mention of this island in the account of St. Paul’s first voyage to Europe (Acts xvi. 11) is for two reasons worthy of careful notice. In the first place, being on a lofty and conspicuous island, it is an excellent landmark for sailors, and must have been full in view if the weather was clear, throughout that voyage from Troas to Neapolis. From the shore at Troas Samothrace is seen towering over Imbros (Hon. H. xii. 12, 13; Kinglake’s Ethopia, p. 94), and it is similarly a marked object in the view from the hills between Neapolis and Philippi (Clarke’s Travels, ch. xii.). These allusions tend to give vividness to one of the most important voyages that ever took place. Secondly, this voyage was made with a fair wind. Not only are we told that it occupied only parts of two days, whereas on a subsequent return-voyage (Acts xx. 6) the time spent at sea was fine, but the technical word here used (αναπλογισμός) implies that they ran before the wind. Now the position of Samothrace is exactly such as to correspond with these notices, and thus incidentally to confirm the accuracy of a most [narrative]. St. Paul and his companions anchored nor the night off Samothrace. The ancient city, and therefore probably the usual anchorage, was on the N, which would be sufficiently sheltered by Samothrace and the mainland. Fuller details are given in life and times of St. Paul, 24, ed. i. 335-339.

The chief classical associations of this island are mythological and connected with the mysterious divinities called Cabeiri. Persons took refuge here after his defeat by the Romans at Pydna. In St. Paul’s time Samothrace had, according to Pliny, the privileges of a small free state, though it was doubtless considered a dependency of the province of Macedonia.

J. S. H.

SAMP’AMES (Rom. Sin.) Σαμπάμνας, [Alex.] Σαμπάμνιας: Sampsamine, Sampsamine). A name which occurs in the list of those to whom the Romans are said to have sent letters in favor of the Jews (1 Macc. xxv. 23). The name is probably not that of a sovereign (as it appears to be taken in A. V.), but of a place, which Grimm identifies with Samsima on the coast of the Black Sea, between Sinope and Trebizond.

E. F. W.

SAMSON (Σαμωνέας, i.e. Shimshon: Σαμωνή: [Samson], “little sun” or “sunlike”; but according to Joseph. Ant. v. 8, § 4 “strong.” If the root שומש has the signification of “awe” which Gesenius ascribes to it, the name Samson would seem naturally to allude to the “awe” and “astonishment” with which the father and another
ooked upon the angel who announced Samson’s birth — see Judg. xii. 6, 18-20, and Joseph. F. c.), son of Manoah, a man of the town of Zorah, in the tribe of Dan, on the border of Judah (Josh. xv. 33, xix. 41). The miraculous circumstances of his birth are recorded in Judg. xiii.; and the three following chapters are devoted to the history of his life and exploits. Samson takes his place in Scripture, (1) as a judge — an office which he filled for twenty years (Judg. xv. 20, xvi. 31); (2) as a Nazirite (Judg. xiii. 5, xvi. 17); and (3) as one en-abled with supernatural power by the Spirit of the Lord (Judg. xiii. 29, xiv. 6, 19, xv. 14).

Samson was probably born in the Philistines, but the mode of his birth have been limited to the district bordering upon the country of the Philistines, and his action as a deliverer does not seem to have extended beyond desultory attacks upon the dominant Philistines, by which their hold upon Israel was weakened, and the way prepared for the future emancipation of the Israelites from their yoke. It is evident from Judg. xiii. 1, xv. 9-11, 20, and the whole history, that the Israelites, or at least Judah and Dan, which are the only tribes mentioned, were subject to the Philistines through the whole of Samson’s judgeship: so that, of course, Samson’s twenty years of office would be included in the forty years of the Philistine domination.

From the angel’s speech to Samson’s mother (Judg. xiii. 1-5), it appears that the Philistines were already subject to the Philistines at his birth; and as Samson cannot have begun to be judge before he was twenty years of age, it follows that his judgeship must have about coincided with the last twenty years of Philistine domination. But when we turn to the First Book of Samuel, and especially to vi. 1-14, we find that the Philistine domination ceased under the judgeship of Samuel. Hence it is obvious to conclude that the early part of Samuel’s judgeship coincided with the latter part of Samson’s; and that the capture of the ark by the Philistines in the time of Eli occurred during Samson’s lifetime. There are besides several points in the respective narratives of the times of Samson and Samuel which indicate great proximity. First, the events are set down as if they were contemporaneous, and in their relation to Israel. Secondly, there is the remarkable coincidence of both Samson and Samuel being Nazarites (Judg. xiii. 5, xvi. 17, compared with 1 Sam. i. 11). It looks as if the great exploits of the young Danite Nazarite had suggested to Hannah the consecration of her son in like manner or, at all events, as if for some reason the Nazarite vow was at that time prevalent. No other mention of Nazarites occurs in the Scripture history till Amos ii. 11, 12; and even then the allusion seems to be to Samuel and Samson. Thirdly, there is a similar notice of the house of Dagon in Judg. xvi. 23, and 1 Sam. v. 2. Fourthly, the lords of the Philistines are mentioned in a similar way in Judg. xvi. 28, 29, and in 1 Sam. vii. 7. All of which, taken together, indicates a close proximity between the times of Samson and Samuel. There does not seem, however, to be any means of fixing the time of Samson’s judgeship more precisely. The effect of his prowess must have been more of a preparatory kind, by arousing the covert spirit of his people, and shaking the insolent security of the Philistines, than in the way of decisive victory or deliverance. There is no allusion whatever to other parts of Israel during Samson’s judgeship, except the single fact of the men of the border tribe of Judah, 3,000 in number, fetching him from the rock Etam to deliver him up to the Philistines (Judg. xxi. 9-15). The Samson narrative is entirely local, and like the following story concerning Michah (Judg. xvii. xxviii.), seems to be taken from the annals of the tribe of Dan.

(2.) As a Nazarite, Samson exhibits the law in Num. vi. in full practice. [NAZARITE.] The eminence of such Nazarites as Samson and Samuel would tend to give that dignity to the profession which is alluded to in Lam. iv. 7, 8.

(3.) Samson is one of those who are distinctly spoken of in Scripture as endowed with supernatural power by the Spirit of the Lord. “The Spirit of the Lord came mightily upon him, and the cords that were upon his arms became as flax burnt with fire.” The Spirit of the Lord upon him he went down to Ashkelon, and slew thirty men of them. But, on the other hand, after his locks were cut, and his strength was gone from him, it is said “He wist not that the Lord was departed from him” (Judg. xiii. 25, xvi. 19, xv. 14, xvi. 29).

The phrase, “the Spirit of the Lord came upon him,” is common to him with Othniel and Gideon (Judg. iii. 10, vi. 34); but the connection of supernatural power with the integrity of the Nazarite vow, and the particular gift of great strength of body, as seen in tearing in pieces a lion, breaking his bonds and carrying the gates of the city upon his back, and throwing down the pillars which supported the house of Dagon, are quite peculiar to Samson. Indeed, his whole character and history, like the exact story, have been closely paralleled in Scripture. It is not easy, however, to see how forcibly the Israelites would be taught, by such an example, that their national strength lay in their complete separation from idolatry, and consecration to the true God; and that He could give them power to subdue their mightiest enemies, if only they were true to his service. (comp. 1 Sam. i. 10.)

It is an interesting question whether any of the legends which have attached themselves to the name of Hercules may have been derived from Phoenician traditions of the strength of Samson. The combination of great strength with submission to the power of women; the slaying of the Nemean lion; the coming by his death at the hands of his wife; and especially the story told by Herodotus of the captivity of Heracles in Egypt, with the loss of all his hair, is also curious, and seems to be a compound of the stories of Samson and Josiah. To this may be added the connection between Samson, considered as derived from Hercules, and the designations of Moses, the Egyptian Hercules, as “Son of the Sun,” worshipped also under the name Sam, which Sir G. Wilkinson compares with Samson. The Tyrian Hercules (whose temple at Tyre is described by Herodot. ii. 44), he also tells us, “was originally the Sun, and the name as Baal” (Rawlin. Herod. ii. 4).
are certainly remarkable coincidences. Phoenician traders might easily have carried stories concerning the Hebrew hero to the different countries where they traded, especially Greece and Italy; and such stories would have been moulded according to the taste or imagination of those who heard them. The following description of Heracles given by C. O. Müller (Dorien, b. ii. c. 12) might almost have been written for Samson: "The highest degree of human suffering and courage is attributed to Heracles: his character is as noble as could be conceived in those rude and early times: but he is by no means represented as free from the blemishes of human nature; on the contrary, he is frequently subject to will, ungovernable passions, when the noble indignation and anger of the suffering hero degenerate into frenzy. Every crime, however, is atoned for by some new suffering; but nothing breaks his invincible courage, mutt, purified from earthly corruption, he ascends Mount Olympus." And again: "Heracles was a jovial guest, and not backward in enjoying himself. ... It was Heracles, above all other heroes, whom mythology placed in ludicrous situations, and sometimes made the subject of the mockery of other heroes. The Doriens are represented as alternately amusing and annoying the hero. In works of art they are often represented as satyrs who rob the hero of his quiver, bow, and club. Heracles, angered at their insults, binds two of them to a pole, and marches off with his prize. ... It also seems that mirth and buffoonery were often combined with the festivals of Heracles: thus at Athens there was a society of sixty men, who on the festival of the Dionean Heracles attacked and amused themselves and others with sallies of wit." Whatever is thought, however, of such coincidences, it is certain that the history of Samson is an historical, and not an allegorical narrative. It has also a distinctly supernatural element which cannot be explained away. The history, as we now have it, must have been written several centuries after Samson's death (Judg. xv. 19, 20, xviii. 1, 30, xix. 1), though probably taken from the annals of the tribe of Dan. Josephus has given it pretty fully, but with alterations and embellishments of his own, after his manner. For example, he does not make Samson eat any of the honey which he took out of the hive, describes his descent as unclean, and unfit for a Nazarite, but makes him give it to his wife. The only mention of Samson in the N. T. is that in Heb. xi. 32, where he is coupled with Gideon, Barak, and Jephthah, and spoken of as one of those who "through faith waxed valiant in fight, and turned to flight the armies of the alien;" see, besides the places quoted in the course of this article, a full article in Winer, Realb. ; Ewald Geschichte, ii. 516, &c.; Bertheau, On Judges Bayle's Dict. A. C. H.

SAMUEL (נַכְלָמַי), i. e. Shemuel: סֻמָּאֵל (Samuel) Arbale, Samuel, or Asmoughol, see D'Herbelot, under this last name. Different derivations have been given. (1) נַכְלָמַי, "name of God:" so apparently Origen (Enst. II. E. vi. 25), Θηβόλαμβος. (2) נַכְלָמַי, "placed by God." (3) נַכְלָמַי, "asked of God" (1 Sam. i. 20). Josephus ingeniously makes it correspond to the well-known Greek name Thetetus. (4) נַכְלָמַי, "heard of God." This, which may have the same meaning as the previous derivation, is the most obvious. The last Judge, the first of the regular succession of Prophets, and the founder of the monarchy. So important a position did he hold in Jewish history as to have given his name to the sacred book, now divided into two, which covers the whole period of the first establishment of the kingdom, corresponding to the manner in which the name of Moses has been assigned to the sacred book, now divided into five, which covers the period of the foundation of the Jewish Church itself. In fact no character of equal magnitude had arisen since the death of the great Lawgiver.

He was the son of Elkanah, an Ephrathite or Ephrunit, and Hannah or Anna. His father is one of the few private citizens in whose household we find polygamy. It may possibly have arisen from the irregularity of the period.

The descent of Elkanah is involved in great obscurity. In 1 Sam. i. 1 he is described as an Ephrunit. In 1 Chr. vii. 22, 29 he is made a descendant of Korah the Levite. Heusenstemberg (on Ps. lviii. 1) and Ewald (ii. 432) explain this by supposing that the Levites were occasionally incorporated into the tribes amongst whom they dwelt. The question, however, is of no practical importance, because, even if Samuel was a Levite, he certainly was not a Priest by descent.

His birthplace is one of the vexed questions of sacred geography. [See RAMAH, and RAMATHAIM-ZOPHIM.] All that appears with certainty from the accounts is that it was in the hills of Ephraim, and (as may be inferred from its name) a double height, used for the purpose of beacon or outlookers (1 Sam. i. 1). Phoenicians in honor of Baal in their different settlements the Greek names of the lands and journeys of Heracles. Bochart thinks the custom described by Ovid (Fast. iv.) of tying a lighted torch between two posts in the circus, in memory of the damage once done to the harvest by a fox with burning hay and straw tied to it, was derived from the Phoenicians, and is clearly to be traced to the history of Samson (Herod., pars. i. lib. iii. cap. xii.). From all which arises a considerable probability that the Greek and Latin conception of Heracles in regard to his strength was derived from Phoenician stories and reminiscences of the great Hebrew hero Samson. Some learned men connect the name Heracles with Samson etymologically. (See Sir G. Wilkinson's note in Rawlinson's Herod., i. 43; Patrick, On Judg. xvi. 30; Cornel. a Lapide, &c.) But none of these etymologies are very convincing.
At the foot of the hill was a well (1 Sam. xix. 22). On the brow of its two summits was the city. It never lost its hold on Samuel, who in later life made it his fixed abode.

The combined family must have been large. Peninnah had several children, and Hannah had, besides Samuel, three sons and two daughters. But of these nothing is known, unless the names of the sons are those enumerated in 1 Chr. vi. 20, 27.

It is on the mother of Samuel that our chief attention is fixed in the account of his birth. She is described as a woman of a high religious mission. Almost a Nazarite by practice (1 Sam. i. 15); and a prophetess in her gifts (1 Sam. ii. 1). She sought from God the gift of the child for which she longed with a passionate devotion of silent prayer, of which there is no other example in the O. T., and when the son was granted, the name which he bore, and thus first introduced into the world, expressed her sense of the urgency of her entreaty—Samuel, "the Asked or Heard of God."

Living in the great age of vows, she had before his birth dedicated to the Lord the child of which God had thus promised her. As soon as he was weaned, she herself with her husband brought him to the Tabernacle at Shiloh, where she had received the first intimation of his birth, and there solemnly consecrated him. The form of consecration was similar to that with which the irregular priesthood of Jeroboam was set apart in later times (2 Chr. xii. 9) — a bullock of three years old (LXX.), a lamb, an ephah of flour, and a skin of wine (1 Sam. i. 24). First took place the usual sacrifices (LXX.) by Eli, Hannah herself—then, after the introduction of the child, the special sacrifice of the bullock. Then his mother made him over to Eli (i. 25, 28), and (according to the Hebrew text, but not the LXX.) the child himself performed an act of worship.

The hymn which followed on this consecration is the first of the kind in the sacred volume. It is possible that, like many of the Psalms, it may have been enlarged in later times to suit great occasions of victory and the like. But verse 5 specially applies to this event, and verses 7, 8 may well express the sense entertained by the prophetess of the coming relations of the child to the fortunes of her son and of her country (Hannah).

From this time the child is shut up in the Tabernacle. The priests furnished him with a sacred garment, an ephod, made, like their own, of white linen, though of inferior quality, and his mother every year, apparently at the only time of their meeting, gave him a little mantle reaching down to his feet, such as was worn only by high personages, or women, over the other dress, and such as he retained, as his badge, till the latest times of his life. [MANTLE, vol. ii. p. 1782 A.]

He seems to have slept within the Holiest Place (LXX., 1 Sam. iii. 3); and his special duty was to put out, as it would seem, the sacred candlestick, and to open the doors at sunrise.

In this way his childhood was passed. It was whilst thus sleeping in the Tabernacle that he received his first prophetic call. The stillness of the night—the sudden voice—the childlike misconception—the venerable Eli—the contrast between the terrible doom and the gentle creature who has to announce it—give to this portion of the narrative a universal interest. It is this side of Samuel's career that has been so well caught in the well-known picture by Sir Joshua Reynolds.

From this moment the prophetic character of Samuel was established. His words were treasured up, and Shiloh became the resort of those who came to hear him (Il. ii. 21).

In the overthrow of the sanctuary, which followed shortly on this vision, we hear not who became of Samuel. He next appears, probably twenty years afterwards, suddenly amongst the people, warning them against their idolatrous practices. He convened an assembly at Mizpeh—probably the place of that name in the tribe of Benjamin—and there with a symbolical rite, expressive partly of deep humiliation, partly of the blessings of a treaty, they poured water on the ground, they fasted, and they entreated Samuel to raise the piercing cry, for which he was known, in supplication to God for them. It was at the moment that he was offering up a sacrifice, and sustaining this loud cry (compare the situation of Pausanias before the battle of Plataea) (2 Macc. xi. 61), that the Philistines host suddenly burst upon them. A violent thunderstorm, and (according to Josephus, Ant. vi. 2, § 2) an earthquake, came to the timely assistance of Israel. The Philistines fled, and, exactly at the spot twenty years before they had obtained their great victory, they were totally routed. A stone was set up, which long remained as a memorial of Samuel's triumph, and gave to the place its name of Elcbenezer, "the Stone of Help," which has thence passed into Christian phraseology, and became a common name of Nonconformist chapels (1 Sam. vii. 12).

The old Canaanites, whom the Philistines had dispossessed in the outskirts of the Judahian hills, seem to have helped in the battle, and a large portion of territory was recovered (1 Sam. vi. 14). This was Samuel's first and, as far as we know, his only military achievement. But, as in the case of the earlier chiefs who bore that name, it was apparently this which raised him to the office of "Judge" (comp. 1 Sam. xi. 11, where he is thus reckoned with Jerubbaal, Bedia, and Jephthah; and Exod. xiv. 14). He is described as a "ruler," the three chief sanctuaries (by πατρί τοις ιερατοσ των) on the west of the Jordan—Bethel, Gilgal, and Mizpeh (1 Sam. vii. 16). His own residence was still his native city, Ramah or Ramathaim, which he further consecrated by an altar (vii. 17). Here he married, and two sons grew up to repeat under his eyes the same version of high office that he had himself witnessed in his childhood in the case of the two sons of Eli. One was Abish, the other Joel, sometimes called simply "the second" (vii. 14, vii. 25). In his old age, according to the quasi-hereditary principle, already adopted by previous judges, he shared his power with them, and they exercised their functions at the southern frontier in Beer-sheba (1 Sam. vii. 14—vii. 22).

2. Born to this point in Samuel's life there is but little to distinguish his career from that of his predecessors. Like many characters in later days, had he died in youth his fame would hardly have been greater than that of Gideon or Samson. He...
was a judge, a Nazarite, a warrior, and (to a certain point) a prophet. But his peculiar position in the sacred narrative turns on the events which follow. He is the inaugurator of the transition from what is commonly called the theocracy to the monarchy. The misdeemer of his own sons, in receiving bribes, and in extorting exorbitant interest on loans (1 Sam. viii. 3, 4), precipitated the catastrophe which had been long preparing. The people demanded a king. Josephus (Ant. vi. 3, § 3) describes the shock to Samuel's mind, "because of his inborn sense of justice, because of his hatred of kings, as so far inferior to the aristocratic form of government, which conferred a godlike character on those who lived under it." For the whole night he lay fasting and sleepless, in the perplexity of doubt and difficulty. In the vision of that night, as recorded by the sacred historian, is given the dark side of the new institution, on which Samuel dwells on the following day (1 Sam. viii. 9-18).

This presents his reluctance to receive the new order of things. The whole narrative of the reception and consecration of Saul gives his acquiescence in it. [SAUL.]

The final conflict of feeling and surrender of his office is given in the last assembly over which he presided, and in his subsequent relations with Saul. The assembly was held at Gilgal, immediately after the victory over the Ammonites. The monarchy was a second time solemnly inaugurated, and (according to the LXX.) "Saul" (in the Hebrew text "Saul") "and all the men of Israel rejoiced greatly." Then takes place his farewell address. This he delivered for the love of which he was still a man of God, but which he now, for the sake of Israel, relinquished. Whatever might be the lawless habits of the chiefs of those times—Hoplaim, Phinehas, or his own sons—he had kept abof from all. No ox or ass had he taken from their stails—no bribe to obtain his judgment (LXX., ξείληγμα) not even a sandal (σαδόμα, LXX., and Execl. xvi. 19). It is this appeal, and the response of the people, that has caused God to call him the Jewish Aristotle. He then sum up the new situation in which they have placed themselves; and, although "the wickedness of asking a king" is still strongly insisted on, and the unusual portion (στρογγυλή) of a thunderstorm in May or June, in answer to Samuel's prayer, is urged as a sign of Divine displeasure (xii. 16-19), the general tone of the denunciation is much softened from that which was pronounced on the first intimation of the change. The first king is repeatedly acknowledged as "the Messiah" or anointed of the Lord (xii. 3, 5), the future prosperity of the nation is declared to depend on their use or misuse of the new constitution, and Samuel retires with expressions of goodwill and hope: "I will teach you the good and the right way . . . only fear the Lord . . . ." (1 Sam. xii. 23, 24).

It is the most signal example afforded in the O. T. of a great character reconciling himself to a changed order of things, and of the Divine sanction resting on his acquiescence. For this reason it is that Athanasius is by Basil called the Samuel of the Church (Basil, Ep. 82).

3. His subsequent relations with Saul are of the same mixed kind. The two institutions which they respectively represented ran on side by side. Samuel was still judge. He judged Israel "all the days of his life" (vii. 15), and from time to time came among the king's people. But these interventions are chiefly in another capacity, which this is the place to unfold.

Samuel is called emphatically "the Prophet" (Acts iii. 24, xiii. 20). To a certain extent this was in consequence of the gift which he shared in common with others of his time. He was especially the "prophet of God" to Saul (1 Chr. ix. 22, xxvi. 28, xxix. 29). "I am the seer," was his answer to those who asked "Where is the seer?" "Where is the seer's house?" (1 Sam. ix. 11, 18, 19). "Seer," the ancient name, was not yet superseded by "Prophet" (1 Sam. ix.). By this name, Samuel Tidens and Samuel b Hophni, it is called in the Acts Samsonorum. Of the three modes by which Divine communications were then made, "by dreams, Urin and Thummun, and prophets," the first was that by which the Divine will was made known to Samuel (1 Sam. iii. 1, 2; Jos. Ant. v. 10, § 4). "The Lord uncovered his ear" to whisper into it in the stillness of the night the messages that were to be delivered. It is the first distinct intimation of the idea of "Revelation" to a human being (see Genesis, in rev. 17-18). He was consulted far and near on the small affairs of life; leaves of "bread," or the "fourth part of a shekel of silver," were paid for the answer (1 Sam. xii. 8).

From this faculty, combined with his office of ruler, an awful reverence grew up round him. No sacrificial feast was thought complete without his blessing (1 Sam. ix. 13). When he appeared suddenly elsewhere for the same purpose, the villagers "trembled" at his approach (1 Sam. xiv. 4, 5). A peculiar virtue was believed to reside in his intercessions. He was conspicuous in later times amongst those that "call upon the name of the Lord" (Ps. xcv. 6; 1 Sam. xii. 18), and was placed with Moses as standing for prayer, in a special sense, "before the Lord" (Jer. xv. 1). It was the last consecration he left in his parting address that he would "pray to the Lord" for the people (1 Sam. xii. 22). There was something peculiar in the long unanswerable or short intimation which seemed to draw down as by force the Divine answer (1 Sam. vii. 8, 9). All night long, in agitated moments, "he cried unto the Lord" (1 Sam. xv. 11).

But there are two other points which more especially placed him at the head of the prophetic order as it afterwards appeared. The first is brought at this station with Saul, the second in his relation with David.

(a.) He represents the independence of the moral law, of the Divine Will, as distinct from regal or sacramental enactments, which is so remarkable a characteristic of all the later prophets. As we have seen, he was, if a Levite, yet certainly not a Priest; and all the attempts to identify his opposition to Saul with a hierarchical interest are founded on a complete misconception of the facts of the case. From the time of the overthrow of Shiboh, the king was the liquefaction of the sacred oil in his presence and the recovery of the Tabernacle (D'Herbelot, Ashmoyal).
he never appears in the remotest connection with the priestly order. Amongst all the places included in his personal or administrative visits, neither Shiloah, nor Nob, nor Gibeah, the seats of the sacerdotal caste, are ever mentioned. When he counsels Saul, it is not as the priest, but as the prophet; when he sacrifices or blesses the sacrifice, it is not as the priest, but either as an individual Israelite of eminence, or as a ruler, like Saul himself. Saul’s sin in both cases where he came into collision with Samuel, was not of intruding into sacerdotal functions, but of disobedience to the counsels given him for the destruction of the Amalekites. When, on that occasion, the aged Prophet called the captive princes before him, and with his own hands locked him limb from limb, in retribution for the desolation he had brought into the homes of Israel, and thus offered up his mangled remains almost as a human sacrifice (“before the Lord in Gilgal”), we see the representative of the older part of the Jewish history. But it is the true prophetic utterance, such as breathes through the psalmists and prophets, when he counselled Saul, that of a peculiar kind, of the prophetic form, must have become fixed in the national memory. “To obey is better than sacrifice, and to hearken than the fat of rams.”

The parting was not one of rivals, but of dear though divided friends. The King throws himself on the Prophet with all his force; not without a vehement effort (Jos. Ant. vi. 7, § 5) the prophet tears himself away. The long mantle by which he was always known is rent in the struggle; and, like Elijah after him, Samuel saw in this the omen of the coming rent in the monarchy. They parted each to his house to meet no more. But a long shadow of grief fell over the prophet. a Samuel mourned for Saul. “It grieved Samuel for Saul.” How long will thou mourn for Saul?” (1 Sam. xiv. 15, xvi. 1).

b) He is the first of the regular succession of prophets. “All the prophets from Samuel and those that follow after” (Acts iii. 24). “Ex quo sanctus Samuel prophetæ coepit et deinceps duxit populos in Babyloniam captivus velleretur, quia in omni copiae prophetae, cum in animo Israel, et in omnibus diebus, nihil quidem de Samuel dictum est” (August. De gen. xvi. 1). Even Miriam, and Deborah, perhaps Ehud, had been prophets. But it was only from Samuel that the continuous succession was unbroken. This may have been merely from the coincidence of his appearance with the beginning of the new order of things, of which the prophetic office was the chief expression. Some predisposing causes there may have been in his own family and birthplace. His mother, as we have seen, though not expressly so called, was in fact a prophetess; the word Zophim, as the suffix of Rabmathaim, has been explained, not unreasonably, to mean “seer”; and Elkanah, his father, is by the Chaldee paraphrase on 1 Sam. i. 1, said to be a “disciple of the prophets.” But the connection of the continuity of the office with Samuel appears to be still more direct. It is in his lifetime, long after he had been “established as a prophet” (1 Sam. iii. 20), that we hear of the companies of disciples, called in the O. T. “the sons of the prophets,” by modern writers “the schools of the prophets.” All the peculiarities of their education are implied or expressed — the sacred dance, the sacred music, the solemn procession (1 Sam. x. 5, 10; 1 Chr. xxv. 1, 6). At the head of this congregation, or “church as it were within a church” (1 LXX. the ἐκκλησία, 1 Sam. x. 5, 10), Samuel is expressly described as “veteris appetitus over them” (1 Sam. xix. 20). Their chief residence at this time (though afterwards, as the institution spread, it struck root in other places) was at Samuel’s own abode, Ramah, where they lived in habitations (Naboths, 1 Sam. xix. 19, &c.) apparently of a rustic kind, like the huts which Elisha’s disciples afterwards occupied by the Jordan (Naboths = “habitations,” but more specifically used for “pavilions”).

In those schools, and learning to cultivate the prophetic gifts, were some whom we know for certain, others whom we may almost certainly conjecture, to have been so trained or influenced. One was Saul. Twice at least he is described as having been in the company of Samuel, and his conduct as having caught from them the prophetic fervor to such a degree as to have “propelled them among them” (1 Sam. x. 10, 11), and on one occasion to have thrown off his clothes, and to have passed the night in a state of prophetic trance (1 Sam. xix. 24); and even in his palace, the prophesying mingled with his madness on ordinary occasions (1 Sam. xvii. 9). Another was David. The first acquaintance of Samuel with David, was when he privately anointed him at the house of Jesse [see DAVID]. But the connection thus began with the shepherd boy must have been continued afterwards. David, at first, fled to “Naoth in Ramah,” as to his second home (1 Sam. xix. 19), and the gifts of music, of song, and of prophecy, here developed on so large a scale, were exactly such as we find in the notices of those who looked up to Samuel as their father. It is, further, hardly possible to escape the conclusion that David there first met his best friends and companions in after life, prophets like himself — Gad and Nathan.

It is needless to enlarge on the importance with which these incidents invest the appearance of Samuel. He there becomes the spiritual father of the Psalms’ king. He is also the Founder of the first regular institutions of religious instruction, and communities for the purposes of education. The schools of Greece were not yet in existence. From these Jewish institutions were developed, by a natural order, the universities of Christendom. And it may be further added, that with this view the whole life of Samuel is in accordance. He is the prophet — the only prophet till the time of Isaiah — of whom we know that he was so from his earliest years. It is this continuity of his own life and character, that makes him so fit an instrument for conducting his nation through so great a change.

The death of Samuel is described as taking place

---

a Agag is described by Josephus (Ant. vi. 7, § 2) as a chief of magnificent appearance; and hence rescued from destruction. This is perhaps an inference from the word פבג, which the Vulgate translates pinguisimus.
in the year of the close of David's wanderings. It is said with peculiar emphasis, as if to mark the hand of God in all these events, that Messiah, with a universality never specified before — were gathered together from all parts of this hitherto divided country, and "haunted him," and "buried him," not in any consecrated place, nor outside the walls of his city, but within his own house, thus in a manner consecrated by being turned into his tomb (1 Sam. xxv. 1). His relics were translated "fromJudaea," (the place is not specified) A. D. 406, to Constantinople, and received there with much pomp by the Emperor Arcadius. They were landed at the pier of Chalcodon, and thence conveyed to a church, near the palace of Heledomon (see Acta Synodorum, Aug. 20).

The situation of Ramathaim, as has been observed, is uncertain. But the place long pointed out as his tomb is the height, most conspicuous of all in the neighborhood of Jerusalem, immediately above the town of Gilbon, known to the Crusaders as "Montjoye," as the spot from whence they first saw Jerusalem, now called Néby Samwil, "the Prophet Samuel." "The tradition can be traced back as far as the 7th century, when it is spoken of as the monastery of St. Samuel (Robinson, Bibl. Itt. ii. 141); and it is here discerned the connection of Ramathaim with the nameless city where Samuel met Saul (as is set forth at length in the articles Rama; Ramathaim-Zophim; there is no reason why the tradition should be rejected. A cave is still shown underneath the floor of the mosque. "He built the tomb in his lifetime," is the account of the Moslem guardian of the mosque, "but was not buried here till after the expansion of the Greeks." It is the only spot in Palestine which claims any direct connection with the first great prophet who was born within its limits; and its commanding situation well agrees with the importance assigned to him in the sacred history.

His descendants were here till the time of David. Heman, his grandson, was one of the chief singers in the Levitical choir (1 Chr. vi. 33, xv. 17, xxv. 5). The appearance of Samuel at Endor (1 Sam. xxviii. 14; Exchs. xlii. 20) belongs to the history of Saul.

It has been supposed that Samuel wrote a Life of David (of course of his earlier years), which was still accessible to one of the authors of the Book of Chronicles (1 Chr. xxix. 29); but this appears doubtful. [See p. 2826 b.] Various other books of the O. T. have been ascribed to him by the Jewish tradition: the Judges, Luth, the two Books of Samuel, the latter, it is alleged, being written in the spirit of prophecy. He is regarded by the Samaritans as a magician and an infidel (Hogginger, Hist. Orient. p. 52). The latter supposition fixes his life in the time of Kai-i-Kobad, 2d king of Persia, with whom he is said to have conversed (I'Herbelot, Kai Kobado).

A. P. S.

* The prophet Samuel lived at a great transitional period of Jewish history. The Israelites had been intended for a great nation, living under the immediate Divine government, and closely knit together by religious ties. Through their infidelities to God, they had become little more than a collection of independent tribes, continually engaged in harassing wars with their neighbors, and often falling for long periods together under their power. It was therefore a natural desire that they should have a king to reunite them in one nationality, and enable them to make head against their foes. To this Samuel was earnestly opposed, not did he acquiesce in their wish until expressly directed to do so from on high. God saw that the people were too sinful for the great destiny offered them, and therefore it was fitting that in this matter of government they should be reduced to the level of other nations. It was by no means an "example of the Divine sanction resting on [Samuel's] acquiescence," but rather of a Divine command to him to let a still-necked people have their way.

In the Tabernacle Samuel probably slept in one of the chambers over, or at the side of, the Tabernacle [Temple]. The extreme improbability that he should have slept in the Holy of Holies is enunciated by the fact that he was evidently in a different apartment from Eli (1 Sam. iii. 4-10), and if the latter was not within the wall, much less the former. There is nothing in 1 Sam. iii. 3 to suggest such a supposition. The "Temple" is there particularized as the place "where the ark of God was," and the time is fixed as "before the hump of God," which was outside the wall—"went out in the Temple of the Lord." No hint is given of the place of Saul in the Tabernacle. At all events when the Ark was taken into the battle with the Philistines, it does not appear that the Tabernacle was otherwise disturbed, or that Samuel then gave up his residence there. It is not likely that Samuel himself ever actually engaged in military operations. In the successful battle with the Philistines (1 Sam. vii.) he assisted by his prayers, but could have taken no part in the battle itself, as he was engaged at the time in offering sacrifice (ver 10). The name "warrior" must therefore be omitted from the list of his titles.

The narrative in 1 Sam. ix. 7, 8, affords no ground for the supposition that either he or other inspired prophets received compensation for their utterances as a spoil pro quo after the fashion of heathen soothsayers or modern necromancers. Saul, a young man not of distinguished birth, and an entire stranger to Samuel, did not think it fitting, according to oriental etiquette, to approach the great judge of Israel and divinely appointed prophet without a present. This appears in the narrative much more as a tribute to the rank and station of Samuel than as a proposed payment for his counsel—a thing in no wise consonant to the whole idea of the prophetic office.

In 1 Sam. xiii. the narrative distinctly makes the sin of Saul his intruding into sacred functions. Saul says (ver 12), "Therefore, said I, the Philistines will come down now upon me to Gilgal, and I have not made supplication unto the Lord; I forced myself therefore, and offered a burnt offering;—a thing he was not thereby making no allusion to the not waiting for his coming, — "Thou hast done foolishly: thou hast not kept the commandment of the Lord thy God." It is impossible that Saul, and improbable that David had any training in the schools of the prophets under Samuel. The first passage added in the article above is evidence of such training (1 Sam. x. 10) reads that "a company of the prophets met Saul" as he went home after his anointing (when he spent one night with Samuel, whom he had not before known) and "the spirit of God came upon him, and he prophesied among them." The only other passage given (1 Sam.
SAMUEL, BOOKS OF

xix. 24) is quite late in the reign of Saul when he came to Naith in pursuit of David, and there spent a day and a night, while the spirit of prophec
ey was upon him. In both cases the astonish-
ment of the beholders is expressed by the exclama-
tion, "Is Saul also among the prophets?" — which of course contradicts the supposition that he had been trained among them. In regard to David, it is inexcusably said that he fled to "Naith in Ramah" as to his second home (1 Sam. xix. 19). What is said is that "he came to Samuel in Ram-
ah and told him all that Saul had done to him. And he and Samuel went and dwelt in Naithot," David's purpose was to seek refuge with Samuel, the aged judge whom Saul still feared and re-
spected. He went to his residence at Ramah. For reasons not mentioned, but probably from pru-
dential considerations, they left then together and "went and dwelt at Naithot."

Some other slight inadvertencies in the above
article the reader will readily correct for himself.

F. G.

SAMUEL, BOOKS OF (אמ(fieldName: Σαμουήλ) :
κλήθεν): Secund. Primus, Secundus). Two historical books of the Old Testament, which are not separated from each other in the Hebrew MSS., and which, from a critical point of view, must be regarded as one book.

The present division was first made in the Septuagint translation, and was adopted in the Vul-
gate from the Septuagint. But Origen, as quoted by Eusebius (Hist. Eccl. vi. 25), expressly states that they formed only one book among the He-
brews. Jerome (Pref. in Libros Samuel et Mel-
achim) implies the same statement; and in the Talmud (Bab. Meg. fol. 14, c. 2), whereas the authorship is attributed to Samuel, they are design-
nated by the name of his book, in the singular number (המשנה). After the in-
vention of printing they were published as one book in the first edition of the whole Bible printed at Soncino in 1488 A. D., and likewise in the Com-
pletanlin Polyglot printed at Alcalá, 1592-1517 A. D.; and it was not till the year 1518 that the division of the Septuagint was adopted in Hebrew, in the edition of the Bible printed by the Ben-
bergers at Venice. The book was called by the He-
brews "המשנה" and "משנה," the latter being more frequent. But the life and life of Samuel were the subjects treated of in the beginning of the work — just as a treatise on fes-
tivals in the Mishma bears the name of ביסות, an egg, because a question connected with the eating of
egg is the first subject discussed in it. (Phaen-
sees, vol. iii. p. 2475 a.) It has been suggested
indeed by Abnarius, as quoted by Carpzov (211),
that the book was called by Samuel's name be-
cause all things that occur in each book may, in a certain sense, be referred to Samuel, including the acts of Saul and David, inasmuch as each of them
was appointed by him, and was, as it were, the work of his hands. This, however, seems to be a
refinement of explanation for a fact which is to be accounted for in a less artificial manner. And, gen-
erally, it is to be observed that the logical titles of
books adopted in modern times must not be looked for in Eastern works, nor indeed in early
works of modern Europe. Thus David's Lamenta-
tion over Saul and Jonathan was called "The Bow," for some reason connected with the occur-
rence of that word in his poem (2 Sam. i. 19-25); and Snorru Storcksen's Chronicle of the Kings of
Norway obtained the name of "Heimskringla," the World's Circle, because Heimskringla was the first
prominent word of the MS. that caught the eye (Lagv's Heimskringla, i. 1).

"Authorship and Date of the Book." The most
interesting points in regard to every important his-
torical work are the name, intelligence, and charac-
ter of the historian, and his means of obtaining cor-
test information. If these points should not be
known, next in order of interest is the precise pe-
riod of time when the work was composed. On all
these points, however, in reference to the book of
Samuel, more questions can be asked than can be
answered, and the results of a dispassionate inquiry
are mainly negative.

1st, as to the authorship. In common with all
the historical books of the Old Testament, except
the beginning of Nehemiah, the book of Samuel
contains no mention in the text of the name of its
author. The earliest Greek historical work extant,
written by one who has frequently been called the
Father of History, commences with the words,
"This is a publication of the researches of Herod-
os of Halicarnassus," and the motives which
induced Herodotus to write this work are not yet
set forth. Thucydides, the writer of the Greek his-
torical work next in order of time, who likewise
specifies his reasons for writing it, commences by
stating, "Thucydides the Athenian wrote the his-
tory of the war between the Peloponneseans and
Athenians," and frequently uses the formula that
such or such a year ensued— the second, or third,
or fourth, as the case might be — of this war of
which Thucydides wrote the history" (ii. 70, 102; liii. 25, 88, 116). Again, when he speaks in one
passage of events in which it is necessary that he
should mention his own name, he refers to himself
as "Thucydides son of Olorus, who composed this
work" (iv. 104). Now, with the one exception of
this kind already mentioned, no similar informa-
tion is contained in any historical book of the Old
Testament, although there are passages not only in
Nehemiah, but likewise in Ezra, written in the first
person. Still, without any statement of the author-
ship embodied in the text, it is possible that his
hitorical books might come down to us with a title
containing the name of the author. This is the
case, for example, with Livy's Roman History, and
Cesar's Commentaries of the Civil War. In the latter case, indeed, although Cesar mentions a long
series of his own actions, without intimating that
he was the author of the work, and thus there is an
antecedent improbability that he wrote it, yet the
traditional title of the work outweighs this impro-
bablility, confirmed as the title is, by an unbroken
chain of testimony, commencing with contempo-
raries (Cesar, Brut. 75; Cesar, De Bell gall. viii. 1; Suetonius, Jul. Ces. 56; Quintilian, x. 1; Tacitus, Germ. 28). Here, again, there is nothing
precisely similar in Hebrew history. The five
books of the Pentateuch have in Hebrew no title
except the first Hebrew words of each part; and
the titles Genesis, Exodus, Levities, Numbers,
and Deuteronomy, which are derived from the Sep-
tuagint, convey no information as to their author.
In like manner, the book of Judges, the books of the
Kings and the Chronicles, are not referred to
any particular historian: and although six books
bear respectively the names of Joshua, Ruth, Sam-
uel, Ezra, Nehemiah, and Esther, there is nothing
in the works themselves to preclude the idea that
in each case the subject only of the work may be
indicated, and not its authorship; as is shown conclusively by the titles Ruth and Esther, which no one has yet construed into the assertion that those celebrated women wrote the works concerning themselves. It is clear that "Samuel" does not imply that the prophet was the author of the book of Samuel as a whole; for the death of Samuel is recorded in the beginning of the 23rd chapter; so that, under any circumstances, a different author would be required for the remaining chapters, constituting considerably more than one half of the entire work. Again, in reference to Samuel, the absence of the historian's name from both the text and the title is not supplied by any statement of any other writer, made within a reasonable period from the time when the book may be supposed to have been written. No mention of the author's name is made in the book of Kings, nor, as will be hereafter shown, in the Chronicles, nor in any other of the sacred writings. In like manner, it is not mentioned either in the Apocalypse or in Josephus. The silence of Josephus is particularly significant. He published his Antiquitates about 1100 years after the death of David, and in them he makes constant use of the book of Samuel for one portion of his history. Indeed, it is his exclusive authority for his account of Samuel and Saul, and his main authority, in conjunction with the Chronicles, for the history of David. Yet, he nowhere attempts to name the author of the book of Samuel, or of any part of it. There is a similar silence in the Mishna, where, however, the inference from such silence is far less cogent. And it is not until we come to the Babylonian Gemara, which is supposed to have been completed in its present form somewhere about 500 A.D., that any Jewish statement respecting the authorship can be pointed out, and then it is for the first time asserted (Ib. R. Hebr., ed. 14, c. 2), in a passage already referred to, that "Samuel wrote his book," i.e., as the words imply, the book which bears his name. But this statement cannot be proved to have been made earlier than 1550 years after the death of Samuel — a longer period than has elapsed since the time of the Emperor Constantine; and supposed as the statement is by reference to any authority of any kind, it would be unworthy of credit even if it were not opposed to the internal evidence of the book itself. At the revival of learning, an opinion was propounded by Alarabian, a learned Jew, † A. D. 1568, that the book of Samuel was written by the prophet Jeremiah [1] (Lat. by Aug. Pfleger, Leipzig, 1826), and this opinion was adopted by Hugo Grotius (Pref. ad Libr. præcon. Samue). with a general statement that there was no discrepancy in the language, and with only one special reference. Notwithstanding the eminence, however, of these writers, this opinion must be rejected as highly improbable. Under any circumstances it could not be regarded as more than a mere guess; and it is in reality a guess unaccompanied by peculiar similarity of language, or of style, between the history of Samuel and the writings of Jeremiah. In our own time the most prevalent idea in the Anglican Church seems to have been that the first twenty-four chapters of the book of Samuel were written by the prophet himself, and the rest of the chapters by the prophets Nahum and God. This is the view favored by Mr. Horne (Introduction to the Holy Scripture, ed. 1846, p. 45), in a work which has had very extensive circulation, and which amongst many readers has been the only work of the kind consulted in England. If, however, the authority adduced by him is examined, it is found to be ultimately the opinion of "of the Talmudists, which was adopted by the learned of the Christian Church, who unquestionably had better means of ascertaining this point than we have." Now the absence of any evidence for this opinion in the Talmud has been already indicated, and it is difficult to understand how the opinion could have been stamped with real value through its adoption by learned Jews called Talmudists, or by learned Christians called Fathers of the Christian Church, who lived subsequently to the publication of the Talmud. For there is not the slightest reason for supposing that in the year 500 A.D. either Jews or Christians had access to trustworthy documents on this subject which have not been transmitted to modern times, and without such documents it cannot be shown that they had any better means of ascertaining this point than we have had of late. These circumstances have probably contributed to the adoption of this opinion at the present day: first, the growth of stricter ideas as to the importance of knowing who was the author of any historical work which advances claims to be trustworthy; and 2dly, the mistranslation of an ambiguous passage in the First Book of Chronicles (xxix. 29), respecting the authorities for the life of David. The first point requires no comment. On the second point it is to be observed that the following appears to be the correct translation of the passage in question: "Now the history of David first and last, behold it is written in the history of Samuel the seer, and in the history of Nathan the prophet, and in the history of God the seer — in which the Hebrew text stands. This 'history,' has the same meaning given to it each of the four times that it is used. This agrees with the translation in the Septuagint, which is particularly worthy of attention in reference to the Chronicles, as the Chronicles are the very last work in the Hebrew Bible; and whether this arose from their having been the last admitted into the Canon, or the last composed, it is scarcely probable that any translation in the Septuagint, with one great exception, was made so soon after the composition of the original. The rendering of the Septuagint is by the word λόγος, in the sense, so well known in Herodotus, of "history" (i. 184, ii. 161, vi. 157), and in the like sense in the Apocalypse, wherein it is used to describe the history of Tobias, Βιβλίον λόγον Τοβί. The word "history" (Γεγενήθη) is likewise the word four times used in the translation of this passage of the Chronicles in Luther's Bible; and in the modern version of the German Jews made under the superintendence of which the writer of those Psalms depicts himself as having been placed (Hitzig, Die Psalmen, pp. 48-55). Whether the conclusion is correct or incorrect, this is a legitimate mode of reasoning, and there is a sound basis for a critical superstructure. See Psalms xxxix. xxxiv. xi.

[a] Professor Hitzig, in like manner, attributes some of the Psalms to Jeremiah. In support of this view, he points out, 1st, several special instances of striking similarity of language between those Psalms and the writings of Jeremiah, and, 2dly, agreement between historical facts in the life of Jeremiah and the situation in which the writer of those Psalms depicts himself as having been placed (Hitzig, Die Psalmen, pp. 48-55). Whether the conclusion is correct or incorrect, this is a legitimate mode of reasoning, and there is a sound basis for a critical superstructure. See Psalms xxxix. xxxiv. xi.
of the learned Dr. Zunz (Berlin, 1858). In the English Version, however, the word "dibori" is translated in the first instance as "acts" as applied to David, and then "book" as applied to Samuel, Nathan, and God; and thus, through the ambiguity of the word "book," the possibility is suggested that each of these three prophets wrote a book respecting his own life and times. This double rendering of the same word in one passage seems wholly insensible; as is also, though in a less degree, the translation of "dibori" as "book," for which there is a distinct Hebrew word — sepher. And it may be deemed morally certain that this passage of the Chronicles is no authority for the supposition that, when it was written, any work was in existence of which either God, Nathan, or Samuel was the author.

2. Although the authorship of the book of Samuel cannot be ascertained, there are some indications as to the date of the work. And yet, even on this point no precision is attainable, and we must be satisfied with a conjecture as to the range, not of years or decades, but of centuries, within which the present work was probably composed. Evidence on this head is either external or internal. The earliest undeniable external evidence of the existence of the book would seem to be the Greek translation of it in the Septuagint. The exact date, however, of the translation itself is uncertain, though it must have been made at some time between the translation of the Pentateuch in the reign of Ptolemy Philadelphia, who died b. c. 247, and the centenary before the birth of Christ. The last best extant testimony is that of a passage in the Second Book of Maccabees (ii. 13), in which it is said of Nehemiah, that he, founding a library, gathered together the acts of the kings, and the prophets, and of David, and the epistles of the kings concerning the holy gifts. Now, although this passage cannot be relied on for proving that Nehemiah himself did in fact ever found such a library, yet it is good evidence to prove that the Acts of the Kings, τὰ παρὰ τῶν βασιλεῶν, were in existence when the passage was written; and it cannot reasonably be doubted that this phrase was intended to include the book of Samuel, which is equivalent to the two first books of Kings in the Pentateuch. Hence it is established that the book of Samuel was written before the Second Book of Maccabees. And lastly, the passage in the Chronicles already quoted (1 Chr. xxix. 21) seems likewise to prove externally that the book of Samuel was written before the Chronicles. This is not absolutely certain, but it seems to be the most natural inference from the words that the history of David, and first and last, is contained in the history of Samuel, the history of Nathan, and the history of God. For as a work has come down to us, entitled Samuel, which contains an account of the life of David till within a short period before his death, it appears most reasonable to conclude (although this point is open to dispute) that the writer of the Chronicles referred to this work by the title History of Samuel. In this case, admitting the date assigned, on internal grounds, to the Chronicles by a modern Jewish writer of undoubted learning and critical powers, there would be external evidence for the existence of the book of Samuel earlier than 247 b. c., though not earlier than 312 b. c., the era of the Seleucids (Zunz, Die Gottdienstlichen Vorträge der Juden, p. 52).

Supposing that the Chronicles were written earlier, this evidence would go, in precise proportion, further back, but there would be still a total absence of earlier external evidence on the subject than is contained in the Chronicles. If, however, instead of looking solely to the external evidence, the internal evidence respecting the book of Samuel is examined, there are indications of its having been written some centuries earlier. On this head the following points are worthy of notice:

1. The book of Samuel seems to have been written at a time when the Pentateuch, whether it was or was not in existence in its present form, was at any rate not acted on as the rule of religious observances. According to the Mosaic Law as finally established, sacrifices to Jehovah were not lawful anywhere but before the door of the Tabernacle of the congregation, whether this was a permanent temple, as at Jerusalem, or otherwise (Deut. xii. 12, 14; Lev. xxvii. 3, 4; but see Ex. xx. 24, 25), or in the book of Samuel, the offering of sacrifices, or the erection of altars, which implies sacrifices, is mentioned at several places, such as Mizpeh, Ramah, Bethel, the threshing-place of Araunah the Jebusite, and elsewhere, not only without any disapproval, apology, or explanation, but in a way which produces the impression that such sacrifices were pleasing to Jehovah (1 Sam. vii. 9, 10, 17, ix. 13, x. 3, xiv. 35; 2 Sam. xxiv. 18-25). This circumstance points to the date of the book of Samuel as earlier than the reformation of Josiah, when Hilkiah the high-priest told Shaphan the scribe that he had found the Book of the Law in the house of Jehovah, when the Passover was kept, which was enacted in that year. When the Passover had been kept three times, and then abolished by the king's orders (2 K. xxii. 8, xxiii. 8, 13, 15, 19, 21, 22). The probability that a sacred historian, writing after that reformation, would have expressed disapproval of, or would have accounted for, any seeming departure from the laws of the Pentateuch by David, Saul, or Samuel, is not in itself conclusive, but joined to other considerations it is entitled to peculiar weight. The natural mode of dealing with such a religious scandal, when it shocks the ideas of a later generation, is followed by the author of the book of Kings, who ever, the following reasons for rejecting the statement: 1st. It occurs in a letter generally deemed spurious. 2dly. In the same letter a fabulous story is recorded not only of Jeremia (l. L-7), but likewise of Nehemiah himself. 3dly. An erroneous historical statement is made, which is otherwise mere conjecture. 4thly. Neither Nehemiah built the Temple of Jerusalem (i. 15). No witness in a court of justice, whose credit: and been shaken to a similar extent, would, unless corroborated by other evidence, be relied on as an authority for an important fact.
2528  SAMUEL, BOOKS OF

undeniably lived later than the reformation of Josiah, or than the beginning, at least, of the captivity of Judah (2 K. xvi. 21, 27). This writer mentions the toleration of worship on high-places with disapproval, not only in connection with bad kings, such as Manasseh and Ahaz, but likewise as a drawback in the excellence of other kings, such as Assy, Jehoshaphat, Jehosh. Amaziah, Azariah, and Jotham. In the case of Jotham, what was right in the sight of Jehovah (1 K. xv. 4, xxii. 43); 2 K. xii. 3, xiv. 4, xv. 35, xvi. 4. xlii. 3); and something of the same kind might have been expected in the writer of the book of Samuel, if he had lived at a time when the worship on high-places had been abolished.

2. It is in accordance with this early date of the book of Samuel that allusions in it even to the existence of Moses are so few. After the return from the Captivity, and more especially after the changes introduced by Ezra, Moses became that great central figure in the thought, the language, and doctrine of devout Jews which he could not fail to be when all the laws of the Pentateuch were observed, and they were all referred to him as the divine prophet who communicated them directly from Jehovah. This transcendent importance of Moses must already have commenced at the finding of the Book of the Law at the reformation of Josiah. Now it is remarkable that the book of Samuel is the historical work of the Old Testament in which the name of Moses occurs most rarely. In Josuah it occurs 56 times; in Chronicles, Ezra, and Nehemiah, 31 times; in the book of Kings ten times; in Judges three times; but in Samuel only twice (Zunz, Vorlesungen, 35). And it is worthy of note that in each case Moses is merely mentioned with Aaron as having brought the Israelites out of the land of Egypt, but nothing whatever is said of the Law of Moses (1 Sam. xii. 6, 8). It may be thought that no inference can be drawn from this omission of the name of Moses, because, inasmuch as the Law of Moses, as a whole, was evidently not acted on in the time of Samuel, David, and Solomon, there was no occasion for a writer, however late he lived, to introduce the name of Moses at all in connection with their life and actions. But it is very rare indeed for later writers to refrain in this way from importing the ideas of their own time into those of an earlier tradition. Thus, the very early in the book of Kings there is an allusion to what is "written in the Law of Moses" (1 K. xii. 3). Thus the author of the book of Chronicles makes, for the reign of David, a calculation of money in Doric, a Persian coin, not likely to have been in common use among the Jews until the Persian domination had been fully established. Thus, more than once, Josuah, in his Apologies of the Jews, attributes expressions to personsages in the Old Testament which are to be accounted for by what was familiar to his own mind, although they are not justified by his authorities. For example, evidently copying the history of a tradition from the book of Samuel, he represents the prophet Samuel as exhorting the people to hear in mind the "code of laws which Moses had given them" (cf. Msm. Rupertus, Apol. vi. § 33), though there is no mention of Moses, or of his legislation, in the corresponding passage of Samuel (1 Sam. xii. 20-25). Again, in giving an account of the punishments with which the Israelites were threatened for disobedience of the Law by Moses in the book of Deuteronomy, Josephus attributes to Moses the threat that their temple should be burned (Ant. vi. 8, § 46). But no passage can be pointed out in the whole Pentateuch in which such a threat occurs; and in fact, according to the received chronology (1 K. vi. ii), or according to any chronology, the first temple at Jerusalem was not built till some centuries after the death of Moses. Yet this allusion to the burning of an unbuilt temple ought not to be regarded as an intentional misrepresentation. It is rather an instance of the tendency in an historian who describes past events to give unconsciously indications of his living himself at a later epoch. Similar remarks apply to a passage of Josephus (Ant. vii. 4, § 4), in which, giving an account of David's project to build a temple at Jerusalem, he says that David wished to prepare a temple for God, "as Moses commanded," though no such command or injunction is found to be in the Pentateuch. To a religious Jew, when the laws of the Pentateuch were observed, Moses could not fail to be the divine author of the temple, and hence the command; and it would not necessarily be of equal importance to a Hebrew historian who lived before the reformation of Josiah.

3. It tallies with an early date for the composition of the book of Samuel that it is one of the best specimens of Hebrew prose in the golden age of Hebrew literature. In prose it holds the same place which Joel and the unadorned prophecies of Isaiah hold in poetry and poetical language. It is free from the peculiarities of the book of Judges, which is supposed to account for by supposing that they belonged to the popular dialect of Northern Palestine; and likewise from the slight peculiarities of the Pentateuch, which it is proposed to regard as archaisms (Gesenius, Hebrew Grammar, § 2, 8). It is a striking contrast to the language of the book of Chronicles, which unusually belongs to the silver age of Hebrew prose, and it does not contain as many alleged Chaldaisms as the few in the book of Kings. Indeed the number of Chaldaisms in the book of Samuel which the most rigid scrutiny has suggested do not amount to more than about six instances, some of them doubtless ones, in 80 pages, of the largest book of the Hebrew Bible. And, considering the general purity of the language, it is not only possible, but probable, that the trifling residuum of Chaldaisms may be owing to the inadvertence of Chaldee copyists, when Hebrew had ceased to be a living language. At the same time this argument from language must not be pushed so far as to imply that, standing alone, it would be conclusive; for some writers in the date of the time of the Captivity, are in pure Hebrew, such as the prophecies of Habakkuk, the Psalms cxxx, cxxvii, cxxix, pointed out by Gesenius, and by far the largest portion of the latter part of the prophecies attributed to "Isaiah" (lx-lxvi). And we have not sufficient knowledge of the condition of the Jews at the time of the Captivity, or for a few centuries after, to entitle any one to assert that there were no individuals among them who wrote the purest Hebrew. Still the balance of probability inclines to the contrary direction, and, as a subsidiary argument, parallel which has been suggested by Gesenius. Virgil seems to have been about 14 years of age when Lucan's great poem was published.
the purity of language of the book of Samuel is entitled to some weight.
Assuming, then, that the work was composed at a period not later than the reformation of Josiah,—say, B.C. 622,—the question arises as to the very earliest point of time at which it could have existed in an organized form. It is evident, however, that the earliest period was subsequent to the secession of the Ten Tribes. This results from the passage in 1 Sam. xvii. 6, wherein it is said of David, "Then Achish gave him Ziklag that day: wherefore Ziklag pertained unto the kings of Judah unto this day:" for neither Saul, David, nor Solomon is in a single instance called king of Judah simply. It is true that David is said, in one narrative respecting him, to have reigned in Hebron seven years and six months over Judah (2 Sam. v. 5) before he reigned in Jerusalem thirty-three years over all Israel and Judah; but he is, notwithstanding, never designated by the title King of Judah. Before the secession, the designation of the kings was that they were kings of Israel (1 Sam. xiii. 1, xv. 1, xv. 2: 2 Sam. v. 17, vii. 17: 1 K. ii. 11, iv. 1, vi. 1, xi. 42). It may safely, therefore, be assumed that the book of Samuel could not have existed in its present form at an earlier period than the reign of Rehoboam, who ascended the throne B.C. 975. If we go beyond this, and endeavor to assert the precise time between 975 B.C. and 622 B.C., when it was composed, all certain indications fail us. The expression "unto this day," used several times in the book (1 Sam. v. 5, vi. 18, xxx. 22: 2 Sam. iv. 9, vi. 8), in addition to the use of it in the passage already quoted, is too indefinite to prove anything, except that the writer who employed it lived subsequently to the events he described. It is inadequate to prove whether he lived three centuries, or only half a century, after those events. The same remark applies to the phrase, "Therefore it became a proverb," "Is Saul among the Prophets?" (1 Sam. x. 12), and to the verse, "Beforetime in Israel, when a man went to enquire of God, thus he spake, Come, and let us go to the seer: for he that is now called a Prophet was beforetime called a Seer." In both cases it is not certain that the writer lived more than eighty years after the incidents to which he alludes. In like manner, the various traditions respecting the manner in which Saul first became acquainted with David (1 Sam. xvi. 14—25, xvii. 55—58)—respecting the manner of Saul's death (1 Sam. xxxi. 2—5, 8—15; 2 Sam. i. 2—12)—do not necessarily show that a very long time (say even a century) elapsed between the actual events and the record of the traditions. In an age anterior to the existence of newspapers or the invention of printing, and when probably few could read, thirty or forty years, or even less, have been sufficient for the growth of different traditions respecting the same historical fact. Lastly, internal evidence of language lends no assistance for discrimination in the period of 355 years within which the book may have been written: for the undisputed Hebrew writings belonging to that period are comparatively few, and not one of them is a history, which would present the best points of comparison. They embrace scarcely more than the writings of Joel, Amos, Hosea, Micah, Nahum, and a certain portion of the writings under the title "Isaiah." The phrase "the whole of these writings together may be reckoned as occupying more than sixty pages of our Hebrew Bibles, and whatever

SAMUEL, BOOKS OF

may be their peculiarities of language or style, they do not afford materials for a safe inference as to which of their authors was likely to have been contemporaneous with the author of the book of Samuel. All that can be asserted as undeniable is, that the book, as a whole, can scarcely have been compiled later than the death of the last of the kings, and that it could not have existed in its present form earlier than the reign of Rehoboam.

It is to be added that no great weight, in opposition to this conclusion, is due to the fact that the death of David, although in one passage evidently implied (2 Sam. v. 3), is not directly recorded in the book of Samuel. From this fact Hahnmer (Einleitung in die Alte Testament, part ii., p. 150) deduces it a certain inference that the author lived not long after the death of David. But this is a very slight foundation for such an inference, since we know nothing of the author's name, or of the circumstances under which he wrote, or of his precise ideas respecting what is required of an historian. We cannot, therefore, assert, from the knowledge of the character of his mind, that his deducing it logically requisite to make a formal statement of David's death would have depended on his living a short time or a long time after that event. Besides, it is very possible that he did formally record it, and that the mention of it was subsequently omitted on account of the more minute details by which the account of David's death is preceded in the First Book of Kings. There would have been nothing wrong in such an omission, nor indeed, in any addition to the book of Samuel; for, as those who finally inserted it in the Canon did not transmit it to posterity with the name of any particular author, their honesty was involved, not in the mere circumstance of their omitting or adding anything, but solely in the fact of their adding nothing which they believed to be false, and of omitting nothing of importance which they believed to be true.

In this absolute ignorance of the author's name, and vague knowledge of the date of the work, there has been a controversy whether the book of Samuel is or is not a compilation from previous documents; and if this is decided in the affirmative, to what extent the work is a compilation it is not intended to enter fully here into this controversy, respecting which the reader is referred to Dr. Davidson's Introduction to the Critical Study and Knowledge of the Holy Scriptures, London, Longman, 1836, in which this subject is dispassionately and fairly treated. One observation, however, of some practical importance, is to be borne in mind. It does not admit of much reasonable doubt that in the book of Samuel there are two different accounts (already alluded to) respecting Saul's first acquaintance with David, and the circumstances of Saul's death—and that yet the editor or author of the book did not let his mind work upon these two different accounts so far as tc make him in profile his own opinion as to which of the conflicting accounts was correct, or even to point out to the reader that the two accounts were apparently contradictory. Hence, in a certain sense, and to a certain extent, the author must be regarded as a compiler, and not an original historian. And in reference to the two accounts of Saul's death, this is not the least true, even if the second account be deemed reconcilable with the first by the supposition that the Amalekite had fabricated the story of his having killed Saul (2 Sam.
Although possibly true, this is an unlikely supposition, because, as the Amalekite's object in a lie would have been to curry favor with David, it would have been natural for him to have forged some story which would have redounded more to his own credit than the clumsy and improbable statement that he, a mere casual spectator, had killed Saul at Saul's own request. But whether the Amalekite said what was true or what was false, an historian, as distinguished from a compiler, could scarcely have failed to convey his own opinion on the point, affecting, as on one alternative it did materially, the truth of the narrative which he had just before recorded respecting the circumstances under which Saul's death occurred. And if compilists are admitted in regard to the two events just mentioned, or to one of them, there is no antecedent improbability that the same may have been the case in other instances; such, for example, as the two explanations of the proverb, "Is Saul also among the Prophets?" (1 Sam. x. 9-12, xix. 22-24), or the two accounts of David's having forsaken to take Saul's life, at the very time when he was a fugitive from Saul, and his own life was in danger from Saul's enmity (1 Sam. xxiv. 3-15, xxvi. 1-23). The alternative view to which the compiler seems to have been led by the summaries or endings of narratives by different writers, such as 1 Sam. vii. 13-17, 1 Sam. xiv. 47-52, compared with chapter xxv., 2 Sam. viii. 15-18. In these cases, if each passage were absolutely isolated, and occurred in a work which contained no other instance of compilation, the inference to be drawn might be uncertain. But when even one instance of compilation has been clearly established in a work, all other seeming instances must be viewed in its light, and it would be unreasonable to contest each of them singly, on principles which imply that compilation is as unlikely as it would be in a work of modern history. It is to be added, that as the author and the precise date of the book of Samuel are unknown, its historical value is not impaired by its being deemed to a certain extent a compilation. Indeed, from one point of view, its value is in this way somewhat enhanced; as the probability is increased of its containing documents of an early date, some of which may have been written by persons contemporaneous, or nearly so, with the events described.

Sources of the Book of Samuel.—Assuming that the book is a compilation, it is a subject of rational inquiry to ascertain the materials from which it was composed. But our information on this head is scanty. The only work actually quoted in this book is the book of Judges; i.e. the book of the Upright. Notwithstanding the great learning which has been brought to bear on this title by numerous commentators [see R. p. 1215], the meaning of the title must be regarded as absolutely unknown, and the character of the book itself as uncertain. The best conjecture hitherto offered as an induction from facts is, that it was a book of Poems; but the facts are too few to establish this

a Any Hebrew scholar who will write out the original four lines commencing with "Saul, stand thou still upon Gibbon!" may satisfy himself that they belong to the original. The last line, "the people had avenged themselves upon their enemies," which in the A. V. is somewhat heavy, is almost unmistakably a line of poetry in the original. In a narrative expecting the Israelites in prose they would not have

been described as ""(551), without even an article. Moreover, there is no other instance in which the simple accusative of the person with whom vengeance is taken is used after "" (nubem). In simple prose "" (omin) intervenes. And, like the article, it may have been here omitted for conciseness.
condoned, as it were, by David in his noble Lamentation.

(b.) In the closing verse (2 Sam. xxii. 51), Je

hovah is spoken of as showing "mercy to his anointed, unto David and his seed for evermore." These words would be more naturally written of David than by David. They may, however, be a later addition; as it may be observed that at the present day, notwithstanding the safeguard of print,

the poetical writings of living authors are occasional

ally altered, and it must be added distinctly, in printed Bibles. Still, as far as they go, the words tend to raise a doubt whether the psalm was written by David, as it cannot be proved that they are an addition.

(c) In some passages of the psalm, the strongest

estimations are made of the poet's uprightness and purity. He says of himself, "According to the

cleanliness of my hands hath He recompensed me. For I have kept the ways of Jehovah, and have not wickedly departed from my God. For all his judgments were before me: and as for his statues, I did not depart from them. I was also

upright before Him, and have kept myself from mine iniquity " (xxi. 21-24). Now it is a subject of reasonable surprise that, at any period after the and when, and this life in the matter of Uriah, David should have used this language concerning himself. Admitting fully that, in consequence of his sincere and bitter contrition, "the prince of heart of innocence " may have been freely bestowed upon him, it is difficult to understand how this should have influenced him so far in his assertions respecting his own uprightness in past times, as to make him forget that he had once been betrayed by his passions into adultery and murder. These assertions, if made by David himself, would form a striking contrast to the tender humility and self

impartial in connection with the same subject by a great living genius of spots character. (See "Christian Year," 6th Sunday after Trinity — ad

furn.)

(A) A song, called "last words of David." (2 Sam.

xxiii. 27). According to the Inscription, it was composed by "David the son of Jesse, the man who was raised up on high, the anointed of the God of Jacob, and the sweet psalmist of Israel." It is suggested by Bleek, and is in itself very probab

le, that both the psalm and the inscription were taken from some collection of songs or psalms. There is not sufficient reason to deny that this song is correctly ascribed to David.

(5) One other song remains, which is perhaps the most perplexing in the book of Samuel. This is the Song of Hannah, a wife of Elkanah (1 Sam. ii. 1-10). One difficulty arises from an allusion in verse 10 to the existence of a king under Jehova

vah, many years before the kingly power was established among the Israelites. Another equally great difficulty arises from the internal character of the song. It purports to be written by one of two wives as a song of thanksgiving for having borne a child, after a long period of barrenness, which had caused her to be looked down upon by her other wife of her husband. But, dehiding a general allusion, in verse 5, to the barren having been seven, there is nothing in the song possibly applicable to the supposed circumstances, and by far the greater portion of it seems to be a song of triumph for deliverance from powerful enemies in battle (vv. 1, 4, 10). Indeed, Themen does not hesitate to conjecture that it was written by David after he had slain Goliath; and the Philistines had been defeated in a great battle. (Erevigesches Hauhl.

buch, p. 8). There is no historical warrant for this supposition; but the song is certainly more appropriate to the victory of David over Goliath, than to Hannah's having given birth to a child under the circumstances detailed in the first chapter of Samuel. It would, however, he equally appropriate to some other great battles of the Israelites. In pursuing a single step beyond the songs of the book of Samuel, we enter into the region of conjecture as to the materials which were at the command of the author; and in points which arise for consideration, we must be satisfied with a sus

pense of judgment, or a slight balance of probabilities. For example, it being plain that in some instances there are two accounts of the same trans

action, it is desirable to form an opinion whether these were founded on distinct written documents, or on distinct oral traditions. This point is open to dispute; but the theory of written documents seems preferable; as in the alternative of mere oral traditions it would have been supernaturally unnatural even for a compiler to record them with

out stating in his own person that there were different accounts and traditions. That the author, professedly, intended to present the truth, the simplicity and extraordinary vividness of some portions of the book of Samuel naturally suggest the idea that they were founded on con

temporary documents or a peculiarly trustworthy tradition. This applies specially to the account of the combat between David and Goliath, which has been the delight of successive generations, which charm equally in different ways the child and the young, the learned and the illiterate, and which tempts us to deem it certain that the account must have proceeded from an eye-witness. On the other hand, it is to be remembered that vividness of description often depends more on the discerner of the narrator than on mere bodily presence. "It is the mind that sees," so that 200 years after the meeting of the Long Parliament a powerful imaginative writer shall portray Cromwell more vividly than Ludlow, a contemporary who knew him and conversed with him. Moreover, Lily has described events of early Roman history which educated men regard in their details as imaginary; and De彪, Swift, and the authors of The Arabian Nights have described events which all men admit to be imaginary, with such seemingly authentic details, with such a charm of reality, movement, and spirit, that it is sometimes only by a strong effort of reason that we escape from the illusion that the narratives are true. In the absence, therefore, of any external evidence on this point, it is safer to suspend our judgment as to whether any portion of the book of Samuel is founded on an authority of a contemporary, or on a tradition entitled to any peculiar credit. Perhaps the two conjectures respecting the composition of the book of Samuel which are most entitled to consideration are 1st. That the list which it contains of officers or public functionaries under David is the result of contemporary registration; and 2ndly. The book of Samuel is an amalgamation of some one connected with the schools of the prophets, or penetrated by their spirit. On the first point, the reader is referred to such passages as 2 Sam. viii. 19-18, and xx. 23-29, in regard to which one fact may be mentioned. It has already been stated [Knox, vol. ii. p. 1510]
that under the kings there existed an officer called Recorder, Remembrancer, or Chronicler: in Hebrew, melākî. Now it can scarcely be a mere accidental coincidence that such an officer is mentioned for the first time in David's reign, and that it is precisely for David's reign that a list of public functionaries is for the first time transmitted to us. On the second point, it cannot but be observed what prominence is given to prophets in the history, as compared with priests and Levites. This prominence is so decided, that it undoubtedly contributed towards the formation of the unctitudinal opinion that the book of Samuel was the production of the prophets Samuel, Nathan, and God. This opinion is unsupported by external evidence, and is contrary to internal evidence; but it is by no means improbable that some writers among the sons of the prophets recorded the actions of those prophets. This would be peculiarly probable in reference to Nathan's relapse of David after the murder of Uriah. Nathan here presents the image of a prophet in its most noble and most attractive form. Boldness, tenderness, inventiveness, and tact, were combined in such admirable proportions, that the prophet's functions, if always discharged in a similar manner with equal discretion, would have been acknowledged by all to be purely beneficent. In his interposition there is a kind of ideal moral beauty. In the schools of the prophets he doubtless held the place which St. Ambrose afterwards held in the minds of priests for the exclusion of the Emperor Theodosius from the church at Milan after the massacre at Thessalonica. It may be added, that the following circumstances are in accordance with the supposition that the compiler of the book of Samuel was connected with the schools of the prophets. The designation of Jehovah as the "Lord of Hosts," or God of Hosts, does not occur in the Pentateuch, or in Joshua, or in Judges; but it occurs in the book of Samuel thirteen times. In the book of Kings it occurs only seven times; and in the book of Chronicles, as far as this is an original or independent work, it cannot be said to occur at all, for although it is found in three passages, all of these are evidently copied from the book of Samuel. (See 1 Chr. vi. 9 — in the original, precisely the same words as in 2 Sam. vi. 10; and see 1 Chr. vii. 7, 24, copied from 2 Sam. vii. 8, 26.) Now this phrase, though occurring so rarely elsewhere in prose, that it occurs nearly twice as often in the book of Samuel as in all the other historical writings of the Old Testament put together, is a very favorite phrase in some of the great prophetic writings. In Isaiah it occurs sixty-two times (six times only in the chapters xl-xli), and in Jeremiah sixty-five times at least. Again, the predominance of the idea of the prophetic office in Samuel is shown by the very subordinate place assigned in it to the Levites. The difference between the Chronicles and the book of

Israel in this respect is even more striking than their difference in the use of the expression "Lord of Hosts;" a though in a reverse proportion. In the whole book of Samuel the Levites are mentioned only twice (1 Sam. vi. 15; 2 Sam. xv. 24), while in Chronicles they are mentioned about thirty times in the first book alone, which contains the history of David's reign.

In conclusion, it may be observed that it is very instructive to direct the attention to the passages in Samuel and the Chronicles which treat of the same events, and, generally, to the manner in which the life of David is treated in the two histories. A comparison of the two works tends to throw light on the state of the Hebrew mind at the time when the book of Samuel was written, compared with the ideas prevalent among the Jews some hundred years later, at the time of the compilation of the Chronicles. Some passages correspond almost precisely word for word; others agree, with slight but significant alterations. In some cases there are striking omissions; in others there are no less remarkable additions. Without attempting to explain in detail what the differences might be, it may be added that the differences between the two histories will be more briefly pointed out; though at the same time it is to be borne in mind that, in drawing inferences from them, it would be useful to review likewise all the differences between the Chronicles and the book of Kings.

1. In 2 Sam. xxxii. 12, it is stated that the men of Jabez girdedtook the body of Saul and the bodies of his sons from the wall of Bethshan, and came to Jabez and burnt them there. The compiler of the Chronicles omits mention of the burning of their bodies, and, as it would seem, designates; for he says that the valiant men of Jabez girded buried the bones of Saul and his sons under the oak in Jabez; whereas if there had been no burning, the natural expression would have been to have spoken of burying their bodies, instead of their bones. Perhaps the chronicler objected so strongly to the burning of bodies that he purposely refrained from recording such a fact respecting the bodies of Saul and his sons, even under the peculiar circumstances connected with that incident.

2. In the Chronicles it is assigned as one of the causes of Saul's defeat that he had asked counsel of one that had a familiar spirit, and "had not inquired of Jehovah" (1 Chr. x. 13, 14); whereas in Samuel it is expressly stated (1 Sam. xxvii. 6) that Saul had inquired of Jehovah before he consulted the witch of Endor, but that Jehovah had not answered him either by dreams, or by Urim, or by prophets.

3. The Chronicles make no mention of the civil war between David and Ishbosheth the son of Saul, nor of Abner's changing sides, nor his assassination by Joab, nor of the assassination of Ishbosheth by Rechab and Baanah (2 Sam. ii. 8-32, iii. iv.).

It cannot be proved that they ever burned their dead in early times. The passage in Am. vi. 10 is ambiguous. It may merely refer to the burning of bodies, as a sanitary precaution in a plague; but it is not unlikely that burning is alluded to. See First, x. e

The burning for Ass (2 Chr. xvi. 14) is different from the burning of his body. Compare Jer xxxiv. 5; 2 Chr. xxxi. 14, 20; Joseph. Ant. xv. 8, 4 De Esth. Jud. i. 26, § 9.
4. David’s adultery with Bath-sheba, the exposure of Uriah to certain death by David’s orders, the solemn rebuke of Nathan, and the penitence of David, are all passed over in absolute silence in the Chronicles (2 Sam. xi. xii. 1-29).

5. In the account given in Samuel (2 Sam. vi. 2-11) of David’s removing the Ark from Kirjath-jearim, no special mention is made of the priests or Levites. David’s companions are said, generally, to have been “all the people that were with him,” and “all the house of Israel” are said to have played before Jehovah on the occasion with all manner of musical instruments. In the corresponding passage of the Chronicles (1 Chr. xiii. 1-14) David is represented as having publicly proposed to send an invitation to the priests and Levites in their cities and “suburbs,” and this is said to have been assented to by all the congregation. Again, in the preparations which are made for the reception of the Ark of the Covenant at Jerusalem, nothing is said of the Levites in Samuel; whereas in the Chronicles David is introduced as saying that none ought to carry the Ark of God but the Levites; the special numbers of the Levites and of the children of Aaron are there given; and names of Levites are specified as having been appointed singers and players on musical instruments in connection with the Ark (1 Chr. xvi. xvi. 1-6).

6. The incident of David’s dancing in public with all his might before Jehovah, when the Ark was brought into Jerusalem, the censorious remarks of his wife Michal on David’s conduct, David’s answer, and Michal’s punishment, are all set forth in Samuel (ii. 14-23). The whole subject is noticed in one verse only in Chronicles (1 Chr. xv. 29). On the other hand, no mention is made in Samuel of David’s having composed a psalm on this great event; whereas in Chronicles a psalm is set forth which David is represented as having delivered into the hand of Asaph and his brethren on that day (1 Chr. xvi. 7-9). Of this psalm the first fifteen verses are almost precisely the same as in Ps. cxv. 1-15. The next eleven verses are the same as in Ps. xcv. 1-11; and the next three concluding verses are in Ps. cxv. 1, 47.

48. The last verse but one of this psalm (1 Chr. xvi. 35) appears to have been written at the time of the Captivity.

7. It is stated in Samuel that David in his conquest of Moab put to death two thirds either of the inhabitants or of the Moabish army (2 Sam. vii. 2). This fact is omitted in Chronicles (1 Chr. viii. 2), though the words used therein in mentioning the conquest are so nearly identical with the beginning and the end of the passage in Samuel, that in the A. V. there is no difference in the translation of the two texts, “And he smote Moab, and the Moabites became David’s servants, and brought gifts.”

8. In 2 Sam. xxi. 19, it is stated that there was a battle in Gob with the Philistines, where Elhanan the son of Jaare-regem, a Bethlehemite (in the original בֵּית הַלֵּךְ-רְגֶּמֶן), slew Goliath the Gittite, the stuff of whose spear was like a weaver’s beam.” In the parallel passage in the Chronicles (1 Chr. xx. 6) it is stated that “Elhanan the son of Dariel slew Laemni the brother of Goliath the Gittite.” Thus Laemni, which in the former case is merely part of an adjective describing Elhanan’s place of nativity, seems in the Chronicles to be the substantive name of the man whom Elhanan slew, and is so translated in the LXX. [Elha-
nan, LXX, 696 C. LAMMT, ii. 1581.]

9. In Samuel (2 Sam. xxiv. 1) it is stated that the anger of Jehovah having been kindled against Israel, He moved David against them to give orders for taking a census of the population. In the Chronicles (1 Chr. xxi. 1) it is mentioned that David was provoked to take a census of the population by Satan. This last is the first and the only instance in which the name of Satan is introduced into any historical book of the Old Testament. In the Pentateuchos Jehovah himself is represented as hardening Pharaoh’s heart (Ex. vii. 13), as in this passage of Samuel He is said to have invited David to give orders for a census.

10. In the incidents connected with the three days’ penitence upon Israel on account of the census, some facts of a very remarkable character are narrated in the Chronicles, which are not mentioned in the earlier history. Thus in Chronicles it is stated of the Angel of Jehovah, that he stood between the earth and the heaven, having a drawn sword in his hand stretched over Jerusalem; that afterwards Jehovah commanded the angel, and that the angel put up again his sword into its sheath (1 Chr. xxi. 15-27). It is further stated (ver. 20) that Omri and his four sons hid themselves when they saw the angel; and that when David (ver. 26) had built an altar to Jehovah, and offered burnt-offerings to Him, Jehovah answered him from heaven by fire upon the altar of burnt-offering. Regarding all these circumstances there is absolute silence in the corresponding chapter of Samuel.

11. The Chronicles make no mention of the hideous fact mentioned in the book of Samuel (2 Sam. iii. 3-9) that David permitted the Gileadites to sacrifice seven sons of Saul to Jehovah, as an atonement for the injuries which the Gileadites had formerly received from Saul. This barbarous act of superstition, which is not said to have been termed by Jehovah (ver. 1), is one of the most painful incidents in the life of David, and can scarcely be explained otherwise than by the suspicion either that David seized this opportunity to rid himself of seven possible rival claimants to the throne, or that he was, for a while at least, infected by the base example of the Philisticians, who endeavored to avert the avenging hand of their gods by human sacrifices (PHRIXONIA). It was, perhaps, wholly foreign to the ideas of the Jews at the time when the book of Chronicles was compiled.

9 * Th. Parker (De Wette, Introd. to the O. T. ii. 283) speaks of “an amusing mistake” in 2 Sam. xxiv. 21, as compared with 1 Chr. xii. 25. But there is no foundation for this, unless it be his own singular “rendering, "a respectable man," where the Hebrew is simply זַּקְנָא גָּיַע, ‘a man of appearance’ (= mirabilis visus), in the A. V. ‘a godly man,’ because precisely as defined in 1 Chr. xii. 23, he was very tall, ‘a man of stature, five cubits high,’ etc. H. 10 The statue of the archangel Michael on the top of the mausoleum of Hebron at the close is in accordance with the same idea. In a procession to St. Peter’s, during a pestilence, Gregory the Great saw the archangel in a vision, as he is supposed to be represented in the statue. It is owing to this that the fortress subsequently had the name of Castle of St. Ange-

It only remains to add, that in the numerous instances wherein there is a close verbal agreement between passages in Samuel and in the Chronicles, the sound conclusion seems to be that the Chronicles were copied from Samuel, and not that both were copied from a common original. In a matter of this kind, we must proceed upon recognized principles of criticism. If a writer of the 4th or 5th century narrated events of Roman history almost precisely in the words of Livy, no critic would hesitate to say that all such narratives were copied from Livy. It would be regarded as a very improbable hypothesis that they were copied from documents to which 13: y and the later historian had equal access, especially when no proof whatever was adduced that any such original documents were in existence at the time of the later historian. The same principle applies to the relation in which the Chronicles stand to the book of Samuel. There is not a particle of proof that the original documents, or any one of them, on which the book of Samuel was founded, were in existence at the time when the Chronicles were compiled; and in the absence of such proof, it must be taken for granted that, where there is a close verbal correspondence between the two works, the compiler of the Chronicles copied passages, more or less closely, from the book of Samuel. At the same time it would be unreasonable to deny, and it would be impossible to disprove, that the compiler, in addition to the book of Samuel, made use of other historical documents which are no longer in existence.

The date of the composition of the book of Samuel and its authorship is discussed in all the ordinary Introductions to the Old Testament — such as those of Horne, Hixenbrink, Keil, De Wette, which have been frequently cited in this work. To these may be added the following works, which have appeared since the first volume of this Dictionary was printed: Bleek's Einleitung in das Alte Testament, Berlin, 1890, pp. 355-368; Stähelin's Specielle Einleitung in die Kuranischen Bücher des Alten Testaments, Elberfeld, 1862, pp. 83-165; Davidson's Introduction to the Old Testament, London and Edinburgh, 1863, pp. 491-596.

E. T. * The alleged "mistranslation" (see the article above) of 1 Ch. xxix. 29, is of a technical nature rather than a practical character. The same Hebrew word is indeed rendered by different terms in English, but only in order to express more clearly the different senses in which the Hebrew word must necessarily be understood. "The history of David" which is written somewhere, must of course take history in the sense of biography; while "the history of Samuel," in which it is written, must be the written record. The passage certainly asserts that the prophets mentioned did write an account of David and his reign which was still extant in the time of the writer of the book of Chronicles. The question whether that account was the same with our present books of Samuel turns upon the probability or improbability of still another history (beside Samuel and Chronicles) having been written of the same events when one from such authority was already in existence. Possibly the original work may have been more full, and the present books have been more or less abridged; but in this case they still remain substantially, contemporaneous history.

The arguments given above in favor of an early date of these books are entitled to more weight than is there allowed to them; especially the argument from the language does not require to be so much qualified. The instances of pure Hebrew cited as belonging to the time of the Captivity, with the single exception of Ps. xxxviii. (which is too brief to support the inference from its language) all belong to a much earlier date. At least, if the opinion of Gesenius and some other scholars be considered an offset to the solid arguments for their earlier date, the question must be considered an open one; and these books cannot therefore be legitimately referred to as evidence of compositions in pure Hebrew as late as the time of the Captivity.

On the other hand, the arguments in favor of a comparatively late date require important qualifications. The expression in 1 Sam. xxvii. 6, "wherefore Ziklag pertaineth unto the kings of Judah to this day," relied on to prove that the book could not have been composed before the accession of Hezekiah (n. c. 975), will not sustain the inference. Such a clause might be a marginal note, crept into the text; but this supposition is unnecessary. As Judah was the leading tribe, it is not unlikely that kings of Judah was sometimes used instead of kings of Israel to designate the monarchs, even before the secession. The contrary is asserted above: "Before the secession, the designation of the kings was that they were kings of Israel. But not one of the nine references given happens to contain the exact expression. They are as much kings of Israel as "kings of Judah," and this is quite another matter when the question is one of a precise title. There are indeed three passages (none of which are given above) in which the construction is the same as in the present instance, the exact title -"king of Israel" being used, with the word king in Hebrew in constructions with Israel (1 Sam. xxiv. 14, xxvi. 26, 2 Sam. xi. 29). But these instances of this title along with one of "kings of Judah" do not form a sufficient basis for an induction. There is, too, a special reason why "kings of Judah" should be here used. Ziklag was one of the cities originally assigned to Judah (Josh. xvi. 3), and subsequently allotted out of his territory to Simeon (xix. 5). When it came back to the Philistines as the private property of David, and the descendants of Judah did not belong to the kings of Israel as such, but only to those of the tribe of Judah, and particularly, it did not pass to the inheritance of Simeon. The first king was of the tribe of Benjamin; then for two years his son, of course a Benjaminite, reigned over "all Israel" (1 Sam. ii. 9) while David reigned only over Judah: during these two years he had continued to reign over Judah only, while the rei
ord is silent as to the sovereignty over the other tribes; and then at last David became king over all. Certainly it was natural in his reign to speak of Ziklag as pertaining unto the kings of Judah.

It is truly said that from certain expressions in the book it is not certain that the writer lived more than eighty years after the incidents to which he alludes. It should have been added that these expressions furnish no probable inference that the writer lived more than twenty years after the events.

The various traditions respecting the manner in which Saul first became acquainted with David (1 Sam. xvi. 14-23, xvii. 55-58), respecting the manner of Saul's death (1 Sam. xxxi. 2-6, 8-13, 2 Sam. i. 2-12), are easily shown to be quite harmonies. It is evident that the passage in 1 Sam. xvi. 18-23 is chronologically later than that in xvii. 55-58 (or rather, xvii. 55-58 viii.). For in the latter David is represented as an unknown stripling, while in the former (ver. 18) he is "a mighty valiant man, and a man of war, and prudent in matters," and accordingly in some chronological arrangements, as in that of Townsend, the passage is actually transposed, and there is seen to be no inconsistency whatever in the story. In the narrative itself, however, the former passage is a narrative by anticipation in order to complete the narration begun in ver. 14.

The other supposed inconsistency depends entirely upon the assumed truthfulness of an Anamalekite who, according to his own story, had just committed a great crime. His fabrication may have been "chancy and improbable," as lies are apt to be; or it may have been, under the circumstances, cleverly and wisely devised (cf. 2 Sam. iv. 10), and nothing seemed to him more to the purpose than to say that in Saul's extremity he had himself actually dispatched him. This he had to reconcile with facts as best he could.

The theory of "a compilation" has surely but slight support in the mention of Saul's having been filled with the spirit of prophecy at the only time when he was brought into close contact with the company of the prophets, and of his having twice fallen into the power of David. There is nothing surprising in the fact that both these events should have occurred twice in the life of Saul; and even were the accounts of them given in separate books, they are yet so clearly distinguished in time and in different circumstances, that we should still be compelled to regard them as separate events.

There is nothing then to forbid, but much to favor, the supposition that the earlier part of the books of Samuel was written by the prophet of that name, and the later parts by his successors in the prophetic office, Nathan and Gad; or at least that they wrote the original history, of which the present books, if an abridgment at all, must have been an authorized abridgment, since none other would have been likely to supplant the original.

In comparing the narrative of Samuel with that of Chronicles, eleven points of difference are mentioned, two or three of which are worthy of further attention. The first instance may well be classed with the coincidences in the names of Saul. It so beautifully illustrate the trustworthiness of the Scripture narratives. In Chronicles no mention is made of the burning of the bodies of Saul and his sons recorded by Samuel; yet the fact is recognized in saying that the men of Gibeon buried—not their bodies, but only—their bones. In the second instance both accounts agree in the fact, although there is a superficial verbal opposition in the manner of stating it. Both assert that Saul did not obtain counsel of the Lord, Samuel only mentioning that he vainly attempted to do so. The fact is thus expressed by Samuel: he inquired, but obtained no answer because of his wicked heart, which led him into the further sin of inquiring of the witch of En-dor; the same fact is more briefly expressed in Chronicles by saying that he sinned in not inquiring of the Lord (i.e. in acting without his counsel), but seeking counsel of the witch. Most of the other instances are merely the fuller relation of events by one or other of the writers, showing that the author of Chronicles had access to other sources of information in addition to our present books of Samuel, and that he did not think it necessary to transcribe everything he found in that book.

We dissent from the representation, under the 11th head, of the event narrated in 2 Sam. xxi. 3-9, as a human sacrifice to Jehovah. It was such in the same sense in which the destruction of the Canaanites, or any other guilty people, was a sacrifice. Saul had broken the ancient treaty with the Gibeonites, and for the gibeonites God delivered the land. To remove the famine David edited the Gibbonites any satisfaction they might demand, and they chose to have seven of Saul's descendants given up to them. These they hung "up into the Lord in Gilgal," not with the remealed idea of a sacrifice to Him: but as a public token that they were themselves appeased. If this punishment of Jonathan's sins on his descendants incidentally removed a danger from David's throne, it was an advantage not of his own devising, but brought about by the sin and cruelty of Saul ranking in the minds of the Gibbonites.

Recent Literature.—On the books of Samuel, we may also refer to Pusey's Lects. on the Jewish Scripture, ii. 291-300, iii. i-44 (Boston, 1840-52); Nigglischicht. Artikel, Samuels, Bäcker, in Herzog's Real-Encyk. xiii. 400-412 (Gottha, 1860); and Kutsen. Hist. crit. des livres de l'Ancien Test. t. i. 374-399, 567-589 (Paris, 1866);—Ewald, Gesch. des Volkes Israel, 3. Ausg., Bale. ii. iii. iii.; and Stanley, Hist. of the Jewish Church, vol. i. ii. The latest commentaries are by Keil, Die Bücher Samuel, Leipz. 1864 (Theil ii. Bl. ii. of the Bibl. Comm. by Keil and Delitzsch, Eng. trans. Edinburgh, 1866; Clark's For. Theol. Libr.), and Wordsworth, Holy Bible, with Notes and Interlution, vol. ii. pt. ii. (Long. 1866). A new edition of Thirnichs's commentary (Kurzef. cxxg. Heidel. iv.) was published in 1864. Other works illustrating these books are referred to under Chronicles and Kings.

A. SANABAS-SAR (Σαναβάςσαρος; Alex. Σαναβάσσαρος; Smyrnaeaizáx).

B. SANABAS-SARUS (Σανάβασςαρος; Alex. Σαναβάσαρος; Smyrnaeaizáx).

C. SANASIB (Σανασίβ; [Vat. Σανασίβις; Ald. Σανασιβίς; Alex. Άνασαπίς; Eusebius]. The sons of Jehoshabeed, the son of Jesus, are reckoned "among the sons of Samuel," as priests who returned with Zorobabel (1 Esdr. v. 24).

SANBALLAT (Σαναβάλλατ; [FA. Σαναβαλλατ, etc.; Sanballat]). Of uncertain etymology; according to Gessner after Vos.
SANBALLAT

Sandal, meaning in Sanskrit "giving strength to the army," but according to Furst a "chastened onco.," A Moabite of Horonaim, as appears by his designation "Sanballat the Horonite." (Neh. ii. 10, 19, xiii. 23). All that we know of him from Scripture is that he had apparently some civil or military command in Samaria, in the service of Artaxerxes. The military designation Ment in Scripture MiAH Tishatha. the high priest's position Tobiah in the narrative must be supposed to mean, that Sanballat, no, his marriage by marriage with the daughter of a grandson of Elathish, which, from the similar connection formed by Tobiah the Ammonite (Neh. viii. 4), appears to have been part of a settled policy concerted between Elathish and the Samaritan faction. The expulsion of the punished son of Joiada by Nehemiah must have still further widened the breach between him and Sanballat, and between the two parties in the Jewish state. Here, however, the Scriptural narrative ends—owing, probably, to Nehemiah's return to Persia—and with it likewise our knowledge of Sanballat.

But on turning to the pages of Josephus a whole new set of actions, in a totally different time, is brought before us in connection with Sanballat, while his name is entirely omitted in the account there given of the government of Nehemiah, which is placed in the reign of Xerxes. Josephus, after interposing the whole reign of Artaxerxes Longimanus between the death of Nehemiah and the transactions in which Sanballat took part, and utterly ignoring the very existence of Darius Nthus, Artaxerxes Menecon, Ochus, etc., jumps at once to the reign of "Darius the last king," and tells us (Ant. xi. 7, § 2) that Sanballat was his officer in Samaria, that he was a "Cuthian, i.e. a Samaritan, by birth, and that he gave his daughter Nicos in marriage to Manasseh, the brother of the high priest Jaddua, and consequently the fourth in descent from Elathish, who was high-priest in the time of Nehemiah. He then relates that on the threat of his brother Jaddua and the other Jews to expel him from the priesthood unless he divorced his wife, Manasseh stated the case to Sanballat, who thereupon promised to use his influence with King Darius, not only to give him Sanballat's government, but to sanction the building of a rival temple on Mount Gerizim, of which Manasseh should be the high-priest. Manasseh on this agreed to retain his wife and join Sanballat's faction, which was fur ther strengthened by the accession of all these priests and Levites (and they were many) who had taken strange wives. But just at this time happened the invasion of Alexander the Great, and

Sanballat, with 7,000 men, joined him, and re- nounced his allegiance to Darius (1st. xi. 8, § 4). Being favorably disposed by the conqueror, he took the opportunity of speaking to him in behalf of Manasseh. He represented to him how much it was for his interest to divide the strength of the Jewish nation, and how many there were who wished for a temple in Samaria; and so obtained Alexander's permission to build the temple on Mount Gerizim, and make Manasseh the hereditary high-priest. Shortly after this, Sanballat died; but the temple on Mount Gerizim remained, and the Shechemites, as they were called, continued also as a permanent schism, which was continually fed by all the baseless and disaffected Jews. Such is Josephus' account. If there is any truth in it, of course the Sanballat of whom he speaks is a different person from the Sanballat of Nehemiah, who flourished fully one hundred years earlier; but when we put together Josephus' silence concerning a Sanballat in Nehemiah's time, and the many coincidences in the lives of the Sanballat of Nehemiah and that of Josephus, together with the inconsistencies in Josephus' narrative (pointed out by Prideaux, Connect. i. 406, 288, 290), and its disagreement with what Josephus tells of the relations of Alexander with Samaria (Chron. A. E. hist. post. p. 346), and remember how apt Josephus is to follow any narrative, no matter how anachronistic and inconsistent with Scripture, we shall have no difficulty in concluding that his account of Sanballat is not historical. It is doubtless taken from some apochryphal romance, now lost, in which the writer endeavored to make the empire of the Greeks, and at a time when the unity of the Jews and Samaritans was at its height, chose the downfall of the Persian empire for the epoch, and Sanballat for the ideal instrument, of the consolidation of the Samaritan Church and the erection of the temple on Gerizim. To borrow events from some Scripture narrative and introduce some Scriptural personages, without any regard to chronology or other propriety, was the regular method of such apochryphal books. See 1 Esdras, apocryphal Esther, apocryphal additions to the book of Daniel, and the articles on them, and the story inserted by the LXX. after 2 K. xii. 24, &c., with the observations on it in the art. KINGS, vol. ii. p. 1550. To receive as historical Josephus' narrative of the building of the Samaritan temple by Sanballat, circumstantial as it is in account of Manasseh's relationship to Jaddua, and Sanballat's intercourse with both Darius Codomannus and Alexander the Great, and yet to transplant it, as Prideaux does, to the time of Darius Nthus (B. C. 499), seems scarcely compatible with sound criticism. For a further discussion of this subject, see the article Nehemiah, ii. Book or. III. 2061; Prideaux, Connect. i. 395-396; General of our Lord, p. 323; &c.; Mill's Vindic. of our Lord's General, p. 165; Hales' Antiqu. ii. 534. A. C. 11.

* SANCTUARY. [Tabernacle; Temple.]

SANDAL (SANDALON). The tunic was written in which we read (ch. 1. 25, 29) "There was no manner of richness which was not heart upon the mountain of Samaria, and they that dwell among the Philistines, and that foolish people that dwell in Shechem."
sandal appears to have been the article ordinarily used by the Hebrews for protecting the feet. It consisted simply of a sole attached to the foot by thongs. The Hebrew term naal, the word, implies such an article, its proper sense being that of confining or shutting in the foot with thongs: we have also express notice of the thong (םיֵּאָד; θάχης; A.V., "shoe-latchet") in several passages (Gen. xiv. 23; Is. v. 27; Mark i. 7). The Greek term επίβλημα properly applies to the sandal exclusively, as it means what is bound under the foot: but no stress can be laid on the use of the term by the Alexandrine writers, as it was applied to any covering of the foot, even to the military cēria of the Romans (Joseph. B. J. vi. 1, § 8). A similar observation applies to σαφαδανος, which is used in a general, and not in its strictly classical sense, and was adopted in a Hebraized form by the Talmudists. We have no description of the sandal in the Bible itself, but the deficiency can be supplied from collateral sources. Thus we learn from the Talmudists that the materials employed in the construction of the sole were either leather, felt, cloth, or wood (Mishn. Jebam. 12, §§ 1, 2), and that it was occa-

sionally shod with iron (Sabb. 6, § 2). In Egypt various fibrous substances, such as palm leaves and papyrus stalks, were used in addition to leather (Herod. ii. 37; Wilkinson, ii. 332, 333), while in Assyria, wood or leather was employed (Layard, Nineveh ii. 323, 324). In Egypt the sandals were usually turned up at the toe like our skates, though other forms, rounded and pointed, are also exhibited. In Assyria the heel and the side of the foot were encased, and sometimes the sandal consisted of little else than this. This does not appear to have been the case in Palestine, for a heel-strap was essential to a proper sandal (Jebam. 12, § 1). Great attention was paid by the ladies to their sandals; they were made of the skin of an animal named ḫaḥkah (Ex. xvi. 10), whether a hyena or a seal (A. V., "badger")?: 10 the skins of a fish (species of Halicore) are used for this pur-

pose in the peninsula of Sinai (Robinson, Bibl. Res. i. 110). The thongs were handsonly embroidered (Cant. vii. 1; Jud. x. 4, xvi. 9), as were those of the Greek ladies (Dict. of Ant. s.v., "sandals"). Sandals were worn by all classes of society in Palestine, even by the very poor (Am. viii. 6), and both the sandal and the thong or shoe-latchet were so cheap and common, that they passed into a proverb for the most insignificant thing (Gen.

svd A.

Assyrian Sandals. (From Layard, ii. 234.)

sandal appears to have been the article ordinarily used by the Hebrews for protecting the feet. It consisted simply of a sole attached to the foot by thongs. The Hebrew term naal, the word, implies such an article, its proper sense being that of confining or shutting in the foot with thongs: we have also express notice of the thong (םיֵּאָד; θάχης; A.V., "shoe-latchet") in several passages (Gen. xiv. 23; Is. v. 27; Mark i. 7). The Greek term επίβλημα properly applies to the sandal exclusively, as it means what is bound under the foot: but no stress can be laid on the use of the term by the Alexandrine writers, as it was applied to any covering of the foot, even to the military cēria of the Romans (Joseph. B. J. vi. 1, § 8). A similar observation applies to σαφαδανος, which is used in a general, and not in its strictly classical sense, and was adopted in a Hebraized form by the Talmudists. We have no description of the sandal in the Bible itself, but the deficiency can be supplied from collateral sources. Thus we learn from the Talmudists that the materials employed in the construction of the sole were either leather, felt, cloth, or wood (Mishn. Jebam. 12, §§ 1, 2), and that it was occa-

sionally shod with iron (Sabb. 6, § 2). In Egypt various fibrous substances, such as palm leaves and papyrus stalks, were used in addition to leather (Herod. ii. 37; Wilkinson, ii. 332, 333), while in Assyria, wood or leather was employed (Layard, Nineveh ii. 323, 324). Assyrian Sandals. (From Layard, ii. 234.)
to Sif. Ital. iii. 28. In modern times we may compare the similar practice of the Mohammedans of Palestine before entering a mosque (Robinson’s Researches, ii. 39), and particularly before entering the Ka’ba at Mecca (Burckhardt’s Avventi, p. 270), of the Yezidis of Mesopotamia before entering the tomb of their patron saint (Layard’s Nin. i. 282), and of the Samaritans as they tread the summit of Mount Gerizim (Robinson, ii. 278). The practice of the modern Egyptians, who take off their shoes before stepping on to the carpeted levitin, appears to be dictated by a feeling of reverence rather than cleanliness, that is being devoted to prayer (Lam. i. 35). It was also an indication of violent emotion, or of mourning, if a person appeared barefoot in public (2 Sam. xv. 20; Is. xx. 2: Ez. xxiv. 17, 23). This again was held in common with other nations, as witnessed at the funeral of Augustus (Suet. Aug. 100), and on the occasion of the solemn processions which derived their name of Nundinæ from this feature (Tertull. Apol. 40). To carry or to unloose a person’s sandal was a menial office betokening great inferiority on the part of the person performing it; it was hence selected by John the Baptist to express his relation to the Messiah (Matt. iii. 11; Mark i. 7; John i. 27; Acts xiii. 25). The expression in Ps. lx. 8, cviii. 9, “. . . over Edom will I cast my shoe,” evidently signifies the subjection of that country, but the exact point of the comparison is obscure; for it may refer either to the custom of handing a sandal to a slave, or to that of claiming possession of a property by planting the foot on it, or of acquiring it by the symbolic action of casting the shoe, or again, Edom may be regarded in the still more subordinate position of a shelf on which the sandals were rested while their owner bestowed his feet. The use of the shoe in the transfer of property is noticed in Ruth iv. 7, 8, and a similar significance was attached to the act in connection with the redemption of a Levirate marriage (Deut. xxv. 9). Shoe-making, or rather strap-making (i.e. making the straps for the sandals), was a recognized trade among the Jews (Mishn. Peaath. 4, § 6).

W. L. B.

SAN’HEDRIM (accurately Sanhedrin), סנהדרין, 

drawn from 

candroph, the attempts of the Rabbinics to find a Hebrew etymology are ascribed by Buxtorf, Lex. Chalda. s. v., called also in the Talmud the great Sanhedrin, the supreme council of the Jewish people in the time of Christ and earlier. In the Mishna it is also styled תַּלְמֵי הָסְדָר

Bath Din, “house of judgment.”

1. The origin of this assembly is traced in the Mishna (Sanhedr. 1. 6) to the seventy elders whom Moses was directed (Num. xi. 16, 17) to associate with him in the government of the Israelites. This body continued to exist, according to the Rabbinical accounts, down to the close of the Jewish commonwealth. Among Christian writers, Schickhard, Isaac Casaubon, Salmasius, Selden, and Grotius have held the same view. Since the time of Vorstius, who took the ground (De 29, 39-40) that the alleged identity between the assembly of seventy elders mentioned in Num. xi. 16, 17, and the Sanhedrin which existed in the latter period of the Jewish commonwealth, was simply a conjecture of the Rabbinics, and that there are no traces of such a tribunal in Deut. xvii. 8, 10, nor in the age of Joshua and the Judges, nor during the reign of the kings, it has been generally admitted that the tribunal established by Moses was probably temporary, and did not continue to exist after the Israelites had entered Palestine (Winer, Rechtw. art. “Sanhedrin”).

In the lack of definite historical information as to the establishment of the Sanhedrin, it can only be said in general that the Greek etymology of the name seems to point to a period subsequent to the Macedonian supremacy in Palestine. Livy expressly states (xiv. 32), “pronuntiatum quod ad statum Macedonicum pertinente, senatora, quos synode vocant, legatos esse, quàrum consilii respublica adhuc administratur, in hoc tempore, administratur. But it is the most probable that the procurator of Galilee, was summoned before the Sanhedrin (b. c. 47) on the ground that in putting men to death he had usurped the authority of the body (Joseph. Ant. xiv. 9, § 4) shows that it then possessed much power and was not of very recent origin. If the 

the Sanhedrin — as it probably does — is this the earliest historical trace of its existence. On these grounds the opinion of Vorstius, Witsius, Winer, Keil, and others, may be regarded as probable, that the Sanhedrin described in the Talmud arose after the return of the Jews from Babylon, and in the time of the Seleucids or of the Hasmonian prince.

In the silence of Philo, Josephus, and the Mishna, respecting the constitution of the Sanhedrin, we are obliged to depend upon the few incidental notices in the New Testament. From these we gather that it consisted of ἄρχονται, chief priests, or the heads of the twenty-four classes into which the priests were divided (including probably those who had been high-priests), πρεσβύτεροι, elders, men of age and experience, and ἄραμπται, scribes, lawyers, or those learned in the Jewish law (Matt. xxvi. 57, 59; Mark xv. 1; Luke xxii. 66; Acts v. 21).

2. The number of members is usually given as seventy-one, but this is a point on which there is not a perfect agreement among the learned. The most unanimous opinion of the Jews is given in the Mishna (Sanhedr. i. 6): “the Sanhedrin consisted of seventy-one judges. How is this proved? From Num. xu. 16, where it is said, ‘gather unto me seventy men of the elders of Israel.’ To these add Moses, and we have seventy-one. Nevertheless R. Judah says there were seventy.” The same difference made by the addition or exclusion of Moses, appears in the works of Christian writers, which accounts for the variations in the books between seventy and seventy-one. Baronius, however (Ad Ann. 31, § 10), and many other Roman Catholic writers, together with not a few Protestants, as Drusius, Grotius, Pierre, John, Breuschneider, etc., hold that the true number was seventy-two, on the ground that Eleazar and Meirah, on whom it is expressly said the Spirit rested (Num. xvii. 20), remained in the camp and should be added to the seventy (see Hartmann, Verbindung des A. T. p. 182; Selden, De Synedr. lib. ii cap. 4). Between these three numbers that given by the prevalent Jewish tradition is certainly to be preferred; but if, as we have seen, there is really no evidence for the identity of the seventy elders summoned by Moses, and the Sanhedrin existing after the Babylonian Captivity, the argument from Num. xu. 16 in respect to the number of members of which the latter body consisted, has no force, and we have left, as Keil main
SANHEDRIM

The president of this body was styled נציב, Nasi, and, according to Maimonides and Lightfoot, was chosen on account of his eminence in worth and wisdom. Often, if not generally, this preeminenace was accorded to the high-priest. That the high-priest presided at the condemnation of Jesus (Matt. xxvii. 17, 1) is plain from the narrative of the vice-president, called in the Talmud מנהיג, father of the house of judgment, sat at the right hand of the president. Some writers speak of a second vice-president, styled נציב נציב, but this is not sufficiently confirmed (see Selden, De Syned. p. 156 ff.).

The Babylonian Gemara states that there were two scribes, one of whom registered the votes as a quittance, the other of whom could give the votes as quittance. The Babylonian Gemara are referred to under the name of עונישתא. While in session the Sanhedrin sat in the form of a half-circle (Gen. Hieros. Const. vii. of Sanhed. i.), with all which agrees the statement of Maimonides (quoted by Voragine) that he who excites others to a tumult does not appear over them and head of the assembly. And be it whom the wise everywhere call נסי, and he is in the place of our master Moses. Likewise him who is the object among the seventy, they choose in good right, and they call father of the house of judgment. The rest of the seventy sit before these two, according to their dignity, in the form of a semicircle, so that the president and vice-president may have them all in sight.

3. The place in which the sessions of the Sanhedrin were ordinarily held was, according to the Talmud, a hall called עונישתא, Gazzith (Sanhedr. x.), supposed by Lightfoot (Works, i. 2005) to have been situated in the southeastern corner of one of the courts near the Temple building. In special exigencies, however, it seems to have met in the residence of the high-priest (Matt. xxvi. 3). Forty years before the destruction of Jerusalem, and consequently while the Saviour was teaching in Palestine, the sessions of the Sanhedrin were removed from the hall Gazzith to a somewhat greater distance from the Temple building, although still on Mt. Moriah (Abol. Zoro, i. Gen. Babyl. ad Sanhed. v.). After several other changes, its seat was finally established at Tiberias (Lightfoot, Works, ii. 365).

As a judicial body the Sanhedrin constituted a supreme court, to which belonged in the first instance the trial of a tribe fallen into idolatry, false prophets, and the high-priest (Mishna, Sanhedr. i.); also the other priests (Meiboth, v.). As an administrative council it determined other important matters. Jesus was arraigned before this body whom they do not call John, nor Peter, John, Stephen, and Paul as teachers of error and deceivers of the people. From Acts ix. 2 it appears that the Sanhedrin exercised a degree of authority beyond the limits of Palestine. According to the Jerusalem Gemara (quoted by Selden, lib. ii. c. 15, 11), the power of inflating witnesses was taken away from this tribunal forty years before the destruction of Jerusalem. With this agrees the answer of the Jews to Pilate (John xviii. 31), "It is not lawful for us to put any man to death." Beyond the arrest, trial, and condemnation of one convicted of violating the ecclesiastical law, the jurisdiction of the Sanhedrin at the time could not be extended: the condemnation and subsequent sentence of the accused in capital cases belonged to the Roman procurator. The stoning of Stephen (Acts vii. 56, &c.) is only an apparent exception, for it was either a tumultuous procedure, or, if done by order of the Sanhedrin, was an illegal assumption of power, as Josephus (Ant. xx. 9, § 1) expressly declares the execution of the Apostle James during the absence of the procurator to have been (Winer, Rhetor. art. "Synedrim").

The Talmud also mentions a lesser Sanhedrin of twenty-three members in every city in Palestine in which were not less than 120 householders; but respecting these judicial bodies Josephus is entirely silent.

The leading work on the subject is Selden, De Synedriis et Prophetis Judaicis veterum Erocin., Lond. 1650, Amt. 1679, 4to. It exhibits immense learning, but introduces much irrelevant matter, and is written in a heavy and unattractive style. The monographs of Voragine and Witsius, contained in Ugozino's Theor., vol. xxx., are able and judicious. The same volume of Ugozino contains also the Jerusalem and Babylonian Gemara, along with the Mishna on the Sanhedrin, with which may be compared Duo Todi Talmudici Sanhedrini et Maccob. ed. J. C. Eger, Amt. 1629, 4to, and Maimonides, De Sanhedrini et Pecius, ed. Hortum, Amt. 1825, 4to. Hartmann, Die Verfassung des Alten Testaments mit dem Neuen, Hanp. 1831, Svo, is worthy of consultation, and for a compressed exhibition of the subject, Winer, Histor., and Keil, Archolog, G. E. D.

SANSAANNAH (סנסאנה) [palm-branch, Gez., Forst]: Saphewa: Alex. Σασαναε: Sasanae). One of the towns in the south district of Judah, named in Josh. xvi. 31 only. The towns of this district are not distributed into small groups, like those of the highlands or the Shefelah; and as only very few of them have been yet identified, we have nothing to guide us to the position of Sasannah. The Hebrew name hardly have had any connection with Kiriath-Sansaannah (Kiriath-Sepher, or Debir), which was probably near Hebron, many miles to the north of the most northern position possible for Sasannah. It does not appear to be mentioned by any explorer, ancient or modern. Gesenius (Thes. p. 302) explains the name to mean "palm-branch," but this is contradicted by Forst (Hebr. ii. 88), who derives it from a root which signifies "writing." The two propositions are probably equally wide of the mark. The conjecture of Schwarz that it was at Simsim, on the valley of the same name, is less feasible than usual.

The termination of the name is singular (comp. Madumannah).

By comparing the list of Josh. xvi. 26-32 with those in xix. 2-7 and I Chr. iv. 28-33, it will be seen that Beth-marcoath and Hazar-susim, or -susan, occupy in the two last the place of Madumannah and Sasannah respectively in the first. In like manner Shilhim is exchanged for Shurhem and Shurarin. It is difficult to believe that such changes can have been introduced from the mistakes of抄ists solely, but equally difficult to assign any other satisfactory reason. Prof. Stanley has suggested that Beth-marcoath and Hazar-susim are
SAPPHO's sonnet about Sapphira's beauty: 

"Of David: when he slew Saphir (Saph), the brother of Goliath (Goliath), and thanksgiving for that he had conquered." 

SAPPHIA (Saphia) was a representative of the ancient 
Saphir, as mentioned in the Acts of the Apostles. 

SAPPHIRE (σαφήρις, σαφήρ) is a precious stone, apparently of a bright blue color, see Ex. xxiv. 10, where the God of Israel is represented as being seen in vision by Moses and the Elders with "a paved work of a sapphire stone, and as it were the body of heaven in its clearness." (comp. Ez. i. 26). The saphir was the second stone in the second row of the high priest's breastplate. It is also very precious (Job xviii. 18); it was one of the precious stones that adorned the king of Tyre (Ex. xxvii. 13). Notwithstanding the identity of name between our sapphire and the αδριφος and sapphirus of the Greeks and Romans, it is generally agreed that the sapphirus of the ancients was not our gem of that name, namely, the azure or indigo-lilac crystalline variety of Corundum, but our lapis-lazuli (altus-marinus); this point may be regarded as established, for Pliny (H. N. xxvii. 9) thus speaks of the sapphirus: "It is red and blue with spots of gold, of an azure color sometimes, but not often purple; the best kind comes from Media; it is never transparent, and is not well suited for engraving upon when intersected with hard crystalline particles." 

This description answers exactly to the character of the lapis-lazuli; the "crystalline particles" of Pliny are crystals of iron prites, which often occur with this mineral. It is, however, not so certain that the sapphir of the Hebrew Bible is identical with the lapis-lazuli; for the scriptural requirements demand transparency, great value, and good material for the engraver's art, all of which combined characters the lapis-lazuli does not possess in any great degree. Mr. King (Antiq. Gems, p. 44) says that intaglio and camei of Roman times are frequent in the material, but rarely any of much merit. Again, the saphir was certainly peahetas, "sane apud Inducens," as Braam (De Fot. xv. p. 808, ed. 1898), "sapphirus peahetas notus fuisse sapphirum este, adeo eum ut pellucidum illorum philosophi dicatur φανθρ, saphir." 

Beckmann (Hist. of Jew. i. 472) is of opinion that the saphir of the Hebrews is the same as the lapis-lazuli; Rosenmuller and Braam agree in favor of its being our sapphire or precious Cornum. We are inclined to adopt this latter opinion, but are unable to come to any satisfactory conclusion. 

SAPPHIRA: 

1. Saphir, the wife of Abraham (Heb. xi. 11; 1 Pet. iii. 6). 

2. The daughter of Eglon, in the apocryphal books of Judith. She is spoken of as Saphir, or Sophir, and the interval of three hours that elapsed between the two deaths, Saphir's ignorance of what had happened to her husband, and the predictive language of St. Peter towards her, are decisive evidences as to the supernatural character of the whole transaction. The history of Sapphira's death thus supplements that of Ananias, which might otherwise have been attributed to natural causes. W. L. B.
Of her birth and parentage we have no certain account in Scripture. Her name is first introduced in Gen. xii. 29, as follows: "Abram and Nahor took them wives: the name of Abram's wife was Sarai; and the name of Nahor's wife was Milcah, the daughter of Haran, the father of Milcah and the father of Iscah." In Gen. xx. 12, Abraham speaks of her as "his sister, the daughter of the same father, but not the daughter of the same mother." The common Jewish tradition, taken for granted by Josephus (Ant. i. 6, § 6) and by Strack from Quasten, is that Abraham's "brother" in Gen. xv. 15, 22 (ed. Ben. 1733), is that Sarai is the same as Iscah, the daughter of Haran, and the sister of Lot, who is called Abraham's "brother" in Gen. xiv. 14, 16. Judging from the fact that Rebekah, the grand-daughter of Nahor, was the wife of Isaac the son of Abraham, there is reason to conjecture that Abraham was the youngest brother, so that his wife might not improbably be younger than the wife of Nahor. It is certainly strange, if the tradition be true, that no direct mention of it is found in Gen. xii. 29. But it is not improbable in itself; it supplies the account of the descent of the mother of the chosen race, the omission of which in such a passage is most unlikely; and there is no other to set against it.

The change of her name from "Sarai" to "Sarah" was made at the same time that Abram's name was changed to Abraham, on the establishment of the covenant of circumcision between him and God. That the name "Sarah" signifies "princess" is universally acknowledged. But the meaning of "Sarai" is still a subject of controversy. The older interpreters (as, for example, St. Jerome in Quæst. Hebr., and those who follow him) suppose it to mean "my princess," and explain the change from Sarai to Sarah, as signifying that she was no longer the queen of one family, but the royal ancestress of "all families of the earth." They also suppose that the addition of the letter נ, taken from the sacred Tetragrammaton Jehovah, to the names of Abram and Sarai, mystically signifies their being received into covenant with the Lord. Among modern Hebraists there is great diversity of interpretation. One opinion, keeping to the same general division of the name as already referred to above, explains "Sarai" as "noble," "rich," etc., and explains what, even more than the other, laborers under the objection of giving little force to the change. Another opinion supposes Sarai to be a contracted form of שָׁרֵא (Sharâ), and to signify "Jehovah is ruler." But this gives no force whatever to the change, and besides introduces the same name Job into a proper name too early in the history.

A third (following Ewald) derives it from שָׁרֵא (Sharâ), a root which is found in Gen. xxxii. 28, Hos. xiii. 4, in the sense of "to fight," and explains it as "contentious" (streitsüchtig). This last seems to be etymologically the most probable, and differs from the others in giving great force and dignity to the change of name. (See Ges. Thes. vol. iii. p. 1389 a.)

Her history is, of course, that of Abraham. She came with him from Ur to Haran, from Haran to Canaan, and accompanied him in all the wanderings of his life. Her only independent action is the demand that Hagar and Ishmael should be cast out, far from all rivalry with her and Isaac; a demand, symbolically applied in Col. iv. 22-25, to the displacement of the Old Covenant by the New. The times in which she plays the most important part in the history, are the times when Abraham was sojourning, first in Egypt, then in Gerar, and where Sarah shared his deceit, towards Pharaoh and towards Abimelech.

On the first occasion, she was the subject of the most painful reflections of her life. Her personal beauty is brought upon it as its cause (Gen. xii. 11-15); on the second, just before the birth of Isaac, at a time when she was old (thirty seven years before her death), but when her vigor had been miraculously restored, the same cause is alluded to, as supposed by Abraham, but not actually stated (xx. 3-11).

In both cases, especially the last, the truthfulness of the history is seen in the unfavorable contrast in which the conduct both of Abraham and Sarah stands to that of Pharaoh and Abimelech. She died at Hebron at the age of 127 years, 28 years before her husband, and was buried by him in the cave of Machpelah. Her burial place, purchased of Ephron the Hittite, was the only possession of Abraham in the land of promise; it has remained, followed by the eyes of Jews, Christians, and Mohammedans alike, to the present day; and in it the "shrine of Sarah" is pointed out opposite to that of Abraham, with those of Isaac and Rebekah on the one side, and those of Jacob and Leah on the other (see Stanley's Lect. on Jewish Church, app. ii. pp. 484-509).

It is said, much like that of Abraham, no ideal type of excellence, but one thoroughly natural, inferior to that of her husband, and truly feminine, both in its excellences and its defects. She is the mother, even more than the wife. Her natural motherly affection is seen in her touching desire for children, even from her bondmaid, and in her undertaking jealousy of that bondmaid, when she became a mother; in her rejoicing over her son Isaac, and in the jealousy which resented the slightest insult to him, and forbade Ishmael to share his sonship. It makes her cruel to others as well as tender to her own, and is remarkably contrasted with the sacrifice of natural feeling on the part of Abraham to God's command in the last case (Gen. xvi. 12). To the same character belong her ironical laughter at the promise of a child, long desired, but now beyond all hope; her trembling denial of that laughter, and her change of it to the laughter of thankful joy, which she commemorated in the name of Isaac. It is a character deeply and truly affectionate, but impulsive, jealous, and imperious in its affection. It is referred to in the N. T. as a type of conjugal obedience in 1 Pet. iii. 6, and as one of the types of faith in Heb. xi. 11, A. B.

2. (םָרָא: Zabar; [Vat. M. Kapa'] Sarōn.) SARAH the daughter of Asher (Num. xxvi. 48).

SA'RAH (2 syll.) (םָרָא) [see below]: Zápa: Saróti. The original name of Sarah, the wife of Abraham. It is always used in the history from immediately after the sacrifice of Isaac, that the shock of it killed her, and that Abraham found her dead on his return from Mordab.
SARAIAS

Geo. xi. 29 to xvi. 15, when it was changed to Sarah at the same time that her husband's name from Abram became Abraham, and the birth of Isaac was more distinctly foretold. The meaning of the name appears to be, as Ewald has suggested, "contentious." [SARAH]

SARATAS [Saratas; om. in Vulg.].

1. Saraiath the high-priest (1 Esdr. v. 5).

2. (A)Saraiath; Alex. (Abb.) Saraiath: Asarues, Arcesus.) Saraiath the father of Ezra (1 Esdr. viii. 1; 2 Esdr. i. 1).

SARAMEL (Rom. Alex. Sarapela; [Sin. and] other MSS. 'Asarapela: Asaruel). The name of the place in which the assembly of the Jews was held at which the high-priesthood was conferred upon Simon Macceabaeus (1 Macc. xiv. 28). The fact that the name is found only in this passage has led to the conjecture that it is an imperfect version of a word in the original Hebrew or Syriac, from which the present Greek text of the Macceabees is a translation. Some (as Castellio) have treated it as a corruption of Jerusalem; but this is inadmissible, since it is inconceivable that so well-known a name should be corrupted. The other conjectures are enumerated by Grimm in the Ketzeyf, ezkurgisches Handb., on the passage. A few only need be named here, but none seem perfectly satisfactory. All appear to adopt the reading Asaruel. 1. Hobatuer Millo, "the court of Millo," Millo being not improbably the citadel of Jerusalem [vol. iii. p. 1937]. This is the conjecture of Grots, and has at least the merit of ingenuity. 2. Hobatuer Am El, "the court of the people of God," that is, the great court of the Temple. This is due to Ewald (Gesch. iv. 387), who compares with it the well-known Sarbeli Subrum Ely, given by Eusebius as the title of the Macceabean history. [See MACCEABEES, vol. ii. p. 1718.]

3. Hossor Am El, "the gate of the people of God," adopted by Winer (Bibl. etc.). 4. Hvaser Am El, "prince of the people of God," as if not the name of a place, but the title of Simon, as in "in my time having been inserted by papyri corrected." This is adopted by Grimm himself. It has in its favor the fact that without it Simon is here styled high-priest-only, and his second title, "captain and governor of the Jews and priests" (ver. 47), is then omitted in the solemn official record — the very place where it ought to be found. It also seems to be conterminous with the Pshito-Syriac version, which certainly omits the title of "high-priest," but inserts Rabba de Israel, "leader of Israel." None of these explanations, however, can be regarded as entirely satisfactory. G.

SARAPH (Saraph) [burning, fiery, poisonous]: Saraphe: [Vat. Zapa] Incoana. Mentioned in 1 Chr. iv. 22 among the descendants of Shehah the son of Judah. Burrington (Geneal. i. 170) makes Saraph a descendant of Jakim, whom he regards as the third son of Shehah. In the Targum of L. Joseph, Josheh and Saraph are identified with Mahlon and Chillon, "who married (Sapheo) in Meab." [SARAPHE]

SARCHEDONUS (Rom. Vat.) Zaphedon, [Alex.] Zaphedon, [Abb. Sarchanedon: Archonon, Achemonos, Sarchedonos], a collateral form of the name Zerach-baal; [SARACH-HAD-]

SARDIS

Box, occurring Tob. i. 31. The form in A. V. for Sacherbanaus appears to be an oversight. [z., comes from the Aldine edition. — A.] B. F. W.

SARDEUS (Zaphaia; Alex. Zaphaia, [so Tisch., but Zaphaia, Baber's ed.; Abb. Zaphaila]: Thebeias). Aziza (1 Esdr. ix. 28; comp. Esr. x. 27).

SARDINE, SARDIUS (Sard, sard; odon: verdur; sard: sardine). is, according to the LXX. and Josephus (Bell. Jud. v. 5, § 7), the correct rendering of the Hebrew term, which occurs in Ex. xxviii. 17, xxxix. 10, as the name of the stone which occupied the first place in the first row of the high-priest's breastplate; it should, however, be noticed that Josephus is not distinctly consistent with himself; for in the Antiq. iii. 7, § 5, he says that the sardonyx was the first stone in the breastplate; still as this latter named mineral is merely another variety of agate, to which also the sard or sardius belongs, there is no very great discrepancy in the statements of the Jewish historian. The sard is mentioned by Josephus (Antiq. xiii. 13) as one of the precious attentions of the king of Tyre. In Rev. iv. 3, St. John declares that he whom he saw sitting on the heavenly throne was to look upon like a Jasper and a sardine stone." The sixth foundation of the wall of the heavenly Jerusalem was a sardine (Rev. xxi. 20). There can scarcely be a doubt that either the sard or the sardonyx is the stone denoted by sard. The authority of Josephus in all that relates to the high-priest's breastplate is of the greatest value, for as Baum (De Est. Sac. Heb. p. 625) has remarked, Josephus was not only a Jew but a priest, who might have seen the breastplate with the whole sacerdotal vestments a hundred times, since in his time the Temple was standing; the Vulgate agrees with his nomenclature; in Jerome's time the breastplate was still to be inspected in the Temple of Concord; hence it will readily be acknowledged that this agreement of the two is of great weight.

The sard, which is a superior variety of agate, has long been a favorite stone for the engraver's art; "on this stone," says Mr. King (Antiquities of Alexandria, ii. 5), "all the finest works of the most celebrated artists are to be found; and this not without good cause, such is its toughness, facility of working, beauty of color, and the high polish of which it is susceptible, and which Pliny states that it retains longer than any other gem." Sards differ in color; there is a bright red variety which, in Pliny's time, was the most esteemed, and, perhaps, the Heb. sard, from a root which means "to be red," points to this kind; there is also a paler or honey-colored variety; but in all sards there is always a shade of yellow mingling with the red (see King's Ant. Gems, p. 6). The sardius, according to Pliny (H. N. xxxvii. 7), derived its name from Sardis in Lydia, where it was first found; Babylonian specimens, however, were the most esteemed. The Hebrews, in the time of Moses, could easily have obtained their sard stones from Arabia, in which country they were at the time the breastplate was made; other precious stones not acquirable during their wanderings, may have been brought with them from the land of their bondage when "they spoiled the Egyptians." J. W. II.

SARDIS [or SARDIS] (Saphaios). A city situated about two miles to the south of the river Hermus, just below the range of Tmolus (Boe

\[\text{\textcircled{\text{\textdegree}}}\]
SARDIS

Dough), on a spur of which its acropolis was built. It was the ancient residence of the kings of Lydia. After its conquest by Cyrus, the Persians always kept a garrison in the citadel, on account of its natural strength, which induced Alexander the Great, when it was surrendered to him in the sequel of the battle of the Granicus, similarly to occupy it. Sardis was in very early times, both from the extremely fertile character of the neighboring region, and from its convenient position, a commercial mart of importance. Chestnuts were first produced in the neighborhood, which procured them the name of βάλανον Σαρδιανοί. The art of dyeing wool is said by Pliny to have been invented there; and at any rate, Sardis was the entrepôt of the dyed wool manufactures, of which Phrygia with its vast flocks (πολύπροβατώστητι), Herod. v. 49) furnished the raw material. Hence we hear of the φοινίκιδες Σαρδιαναί, which Sappho speaks of the ποτάμια μάθησις Λίδων καλλεν θραυμα, which was perhaps something like the modern Turkish carpets. Some of the woolen manufactures, of a peculiarly fine texture, were called φιλοστίφιδες. The Hall through which the king of Persia passed from his state apartments to the gate where he mounted on his horse, was laid with these, and no boot but that of the monarch was allowed to tread on them. In the description given of the habits of a young Cyprian quinquagenarian of great wealth, he is represented as reposeing upon a bed of which the feet were silver, and upon which these φιλοστίφιδες Σαρδιαναί were laid as a mattress. Sardis, too, was the place where the metal διακρόμ was procured (Soph. Antig. 107); and it was thither that the Spartans sent in the sixth century B.C. to purchase gold for the purpose of gilding the face of the Apollo at Amyclae. This was probably furnished by the auriferous sand of the Pactolus, a brook which came from Tmolus, and ran through the ογοιαν of Sardis by the side of the great temple of Cybele. But though its gold-washings may have been celebrated in early times, the greatness of Sardis in its best days was much more due to its general commercial importance and its convenience as an entrepôt. This seems to follow from the statement, that not only silver and gold coins were there first minted, but there also the class of ἀχαιών (stationary traders as contradistinguished from the ἀγοραίοι, or travelling merchants) first arose. It was also, at any rate between the fall of the Lydian and that of the Persian dynasty, a slave-mart.

Sardis recovered the privilege of municipal government (and, as was alleged several centuries afterwards, the right of a sanctuary) upon its surrender to Alexander the Great, but its fortunes for the next three hundred years are very obscure. It changed hands more than once in the contests between the dynasties which arose after the death of Alexander. In the year 214 B.C. it was taken and sacked by the army of Antiochus the Great, who besieged his cousin Archelaus in it for two years before succeeding, as he at last did through treachery, in obtaining possession of the person of the latter. After the ruin of Antiochus's fortunes, it passed, with the rest of Asia on that side of Taurus, under the dominion of the kings of Pergamus, whose interests led them to divert the course of traffic between Asia and Europe away from Sardis. Its productive soil must always have continued a source of wealth; but its importance as a central mart appears to have diminished from the time of the invasion of Asia by Alexander. Of the few inscriptions which have been discovered, all, or nearly all, belong to the time of the Roman empire. Yet there still exist considerable remains of the earlier days. The massive temple of Cybele still bears witness in its fragmentary remains to the wealth and architectural skill of the people that raised it. Mr. Cockerell, who visited it in 1812, found two columns standing with their architrave, the stone of which stretched in a single block from the centre of one to that of the other. This stone, although it was not the largest of the architrave.

Ruins of Sardis.

SARDIS 2843
be calculates must have weighed 25 tons. The
diameters of the columns supporting it are 6 feet
4½ inches at about 55 feet below the capital. The
present soil (apparently formed by the crumbling
away of the hill which lacks the temple on its
east side) is more than 25 feet above the pave-
ment. Such proportions are not inferior to those
of the columns in the Hermob at Samos, which
divides, in the estimation of Herodotus, with the
Artemisium at Ephesus, the palm of preeminence
among all the works of Greek art. And as regards
the details, "the capitals appeared," to Mr. Cock-
erell, "to surpass any specimen of the Ionic he had
seen in perfection of design and execution."
On the north side of the acropolis, overlooking
the valley of the Hermus, is a theatre near 400 feet
in diameter, attached to a stadium of about 1,000.
This probably was erected after the restoration of
Sardis by Alexander. In the attack of Sardis by
Antiochus, described by Polybius (vii. 15-18), it
constituted one of the chief points on which, after
entering the city, the assaulting force was directed.
The temple belongs to the era of the Lydian
dynasty, and is nearly contemporaneous with the
temple of Zeus Pandhelenus at Eginia, and that
of Hera in Samos. To the same date may be as-
signed the "Valley of Sweats" (γρανάες ἡγαίων),
a pleasure ground, the fame of which Polykrates
endeavored to rival by the so-called Larrai at
Samos.

The modern name of the ruins at Sardis is Sert-
Kaleci. Travellers describe the appearance of the
locality on approaching it from the N. W. as that
of complete solitude. The Pactolus is a mere thread
of water, all but evanescent, in summer time. The
Winds-talei (Hermus), in the neighborhood of the
town, is between 50 and 50 yards wide, and nearly
3 feet deep, but its waters are turbid and disagree-
able, and are not only avoided as unfit for drink-
ing, but have the local reputation of generating
the fever which is the scourge of the neighboring
plains.

In the time of the emperor Titus, Sardis was
destroyed by an earthquake, together with eleven,
or as Eusebius says twelve, other ancient cities of
Asia. The whole face of the country is said to
have been changed by this convulsion. In the
case of Sardis the calamity was increased by a pes-
tential fire which followed: and so much com-
passion was in consequence excited for the city at
Rome, that its tribute was remitted for five years,
and it received a benefaction from the privy purse
of the emperor. This was in the year 17 A.D.
Nine years afterwards the Sardians are found
among the competitors for the honor of erecting,
as representatives of the Asiatic cities, a temple to
their benefactor. [Smyrna.] On this occasion
they pleaded, not only their ancient services to Rome
in the time of the Macedonian war, but their well-
watered country, their climate, and the richness of
the neighboring soil: there is no allusion, however,
to the important manufactures and commerce of the
early times. In the time of Pliny it was included in
the same civitas juridiciae with Phil-
adelphi, with the Cadmei, a Macedonian colony
in the neighborhood, with some settlements of the
old Macedonian population, and a few other towns of
less note. These Macedonians still continued to call
Sardis by its ancient name Hydê, which it bore in the
time of Amphipolis.
The only passage in which Sardis is mentioned in
the Bible, is Rev. iii. 1-6. There is nothing in
the text which appears to have any special reference
to the peculiar circumstances of the city, or to any-
thing else than the moral and spiritual condition
of the Christian community existing there. This
latter was probably, in its secular relations, pretty
nearly identical with that at Philadelphia.

SARDITES THE (σάρδης οἱ [mtr.]: οἱ Σάρ-
δες [Vat. -8ειπ.: Sardede]). The descendants of
Sardes the son of Zebedue (Num. xxvi. 29).

SARDONYX (σαρδόνιξ: saraghs) is men-
tioned in the N. T. once only, namely, in Rev.
xxi. 20, as the stone which garnished the fifth
foundation of the wall of the heavenly Jerusalem.
"By sardonyx," says Pliny (H. N. xxxvii. 6), who
describes several varieties, was formerly understood,
as its name implies, a sard with a white ground beneath
it, like the flesh under the finger-nail. The sar-
donyx consists of a "white opaque layer, super-
posed upon a red transparent stratum of the true
red sard" (Antique Gems, p. 9); it is, like the
sard, merely a variety of agate, and is frequently
employed by engravers for the purpose of a signet-
ring.

SAREA (Sarea). One of the five scribae
ready to write swiftly whom Erasus was com-
manded to take (2 Esdr. xiv. 24).

SAREPTA (Sârepta: Syriac, Sarapth). The Greek form of the name which in
the Hebrew text of the LXX. appears as Zâr-
ephath. The place is designated by the same for-
numla on its single occurrence in the N. T. (Luke
iv. 26) that it is when first mentioned in the LXX.
version of 1 K. xvii. 9, "Sarepta of Sidoniam."

SARGON (σαργόν [perh. Pers., prince
of the sun, Ges.]: Aṣur-pa: Sargon) was one of the
greatest of the Assyrian kings. His name is read
in the native inscriptions as Sargina, while a town
which he built and called after himself (now Khor-
sabad) was known as Sargina to the Arabian
geographers. He is mentioned by name only once
in Scripture (Is. xx. 1), and then not in an histori-
tical book, which formerly led historians and critics
to suspect that he was not really a king distinct
from those mentioned in Kings and Chronicles,
but rather one of those kings under another name.
Vitringa, Oehlerans, Eichhorn, and Hupfeld identified
him with Shalmaneser; Groits, Lowth, and Keil
with Semachshar; Perizonius, Kalinsky, and Mi-
chaelis with Esarhaddon. All these conjectures
are now shown to be wrong by the Assyrian in-
scriptions, which prove Sargon to have been dis-
tinct and different from the several monarchs named,
and fix his place in the list — where it had been
already assigned by Rosenmüller, Gesenius, Ewald,
and Winter — between Shalmaneser and Semach-
shar. He was certainly Semachshar's father and
there is no reason to doubt that he was his im-
mediate predecessor. He ascended the throne of
Assyria, as we gather from his annals, in the same
year that Merodach-Baladan ascended the throne of Babylon, which, according to Ptolemy’s Canon, was B. C. 721. He seems to have been an usurper, and not of royal birth, for in his inscriptions he carefully avoids all mention of his father. It has been conjectured that he took advantage of Shalmaneser’s absence at the protracted siege of Samaria (2 K. xvii. 51 to effect a revolution at the seat of government, by which that king was deposed, and he himself substituted in his room. [SHALMANESER.] It is remarkable that Sargon claims the conquest of Samaria, which the narrative in Kings appears to assign to his predecessor. He places the event in his first year, before any of his other expeditions. Perhaps, therefore, he is the “king of Assyria” intended in 2 K. xvii. 6 and xviii. 11, who is not said to be Shalmaneser, though we might naturally suppose so from no other name being mentioned. Or perhaps he claimed the conquest as his own, though Shalmaneser really accomplished it, because the capture of the city occurred after he had been acknowledged king in the Assyrian capital. At any rate, to him belongs the settlement of the Samaritans (27,280 families, according to his own statement) in Halah, and on the Habor (Khabour), the river of Gozan, and (at a later period probably) in the cities of the Medes.

Sargon was undoubtedly a great and successful warrior. In his annals, which cover a space of fifteen years (from B. C. 721 to B. C. 706), he gives an account of his warlike expeditions against Babylonia and Susiana on the south, Media on the east, Armenia and Cappadocia toward the north, Syria, Palestine, Arabia, and Egypt toward the west and the southwest. In Babylonia he deposed Merodach-Baladan, and established a viceroy; in Media he built a number of cities, which he peopled with captives from other quarters: in Armenia and the neighboring countries he gained many victories; while in the far west he reduced Philistia, penetrated deep into the Arabian peninsula, and forced Egypt to submit to his arms and consent to the payment of a tribute. In this last direction he seems to have waged three wars—one in his second year (B. C. 720), for the possession of Gaza—mother of his sixth year (B. C. 716), when Egypt itself was the object of attack: and a third in his ninth (B. C. 712), when the special subject of contention was Ashed, which Sargon took by one of his generals. This is the event which causes the mention of Sargon’s name in Scripture. Isaiah was instructed at the time of this expedition to “put off his shoe, and go naked and barefoot, for a sign that the king of Assyria should lead away the Egyptians prisoners, and the Ethiopians captives, young and old, naked and barefoot, to the shame of Egypt” (Is. xx. 2-4). We may gather from this, either that Ethiopians and Egyptians formed part of the garrison of Ashed and were captured with the city, or that the attack on the Philistine town was accompanied by an invasion of Egypt itself, which was disastrous to the Egyptians.

The year of the attack, being B. C. 712, would fall into the reign of the first Ethiopian king, Saba'e

L, who probably conquered Egypt in B. C. 714 (Rawlinson’s Herodotus, i. 386, note 7, 2d ed.), and it is in agreement with this [that] Sargon speaks of Egypt as being at this time subject to Merodach. Besides these expeditions of Sargon, his monuments mention that he took Tyre, and received tribute from the Greeks of Cyprus, against whom there is some reason to think that he conducted an attack in person.b

It is not as a warrior only that Sargon deserves special mention among the Assyrian kings. He was also the builder of useful works and of one of the most magnificent of the Assyrian palaces. He relates that he thoroughly repaired the walls of Nineveh, which he seems to have elevated from a provincial city of some importance to the first position in the empire; and adds further, that in its neighborhood he constructed the palace and town which he made his principal residence. This was the city now known as the French Nineveh, or “Khorsabad,” from which the valuable series of Assyrian monuments at present in the Louvre is derived almost entirely. Traces of Sargon’s buildings have been found also at Ninurta and Koyunjik; and his time is marked by a considerable advance in the useful and ornamental arts, which seem to have profited by the connection which he established between Assyria and Egypt. He probably reigned nineteen years, from B. C. 724 to B. C. 706, when he left the throne to his son, the celebrated Semencherib.

G. K.

[SHARID (םירדנ] [one left, a survivor]: "Ere- deqayiqah," Sethsib: Alex. Lopd, Sapd: Sardin. A chief landmark of the territory of Zebalim, apparently the pivot of the western and southern bounds of Assyria (Is. xix. 8). All celebrations of its position is that it lay to the west of Chisbi-Tabor. It was unknown to Eusebius and Jerome, and no trace of it seems to have been found by any traveler since their day (Onom. c. "Sardin").

The ancient Syriac version, in each case, reads Ashdol. This may be only from the intercalation, in his version of B and his successors, of the Ashed of the Philistines cannot be intended.

G.

SARON (םרונ: in some MSS. aaron-

B. c. 712 [the plain]: Saroun). The district in which Lydda stood (Acts iv. 35 only): the SHARON of the O. T. The absence of the article from Lydda, and its presence before Saron, is noticeable, and shows that the name denotes a district—as in "The Shefelah," and in our own "The Weald," "The Downs." G.

The plain extended along the sea-coast from Joppa to Cesarea, about 30 miles. Though connected by road to Lydda, in Acts iv. 35, Saron included that city. It has been conjectured that there was a village of this name, but no trace of it has been discovered. Luke’s meaning is that not only the inhabitants of Lydda but of the Plain generally, heard of the miracle and believed. H.

—

b The statue of Sargon, now in the Berlin Museum, was found at Tidu on Cyprus. It is not very likely that the king’s statue would have been set up unless he had made the expedition in person.

c This barbarous word is obtained by judkening to Saron the first word of the following verse, "77 กנה פה הניי."
SAROTTHIE [Sarothi] [Sarothi: [Var. -thei]: Alex. [A.M.] Sarothi: [ Correction]. "The sons of Sarothie" are among the sons of the servants of Solomon who returned with Zerubbabel, according to the list in 1 Esdr. v. 34. There is nothing corresponding to it in the Hebrew.

SA'RSECHIM [Σαρσεχίμ] [prince of the enunciata: Sarsechim]. One of the generals of Nebuchadnezzar's army at the taking of Jerusalem (Jer. xxxix. 3). He appears to have held the office of chief enunca, for Rahl-sar is probably a title and not a proper name. In Jer. xxxix. 13, Nebuchadnezzar is called Rahl-sar, 'chief enucnih,' and the question arises whether Nebuchadnassar and Sarsechim may not be names of the same person. In the LXX., verses 3 and 13 are mixed up together, and hence improperly corrupt that it is impossible to infer anything from their reading of ἀαούθεαρ [lun Announcement] for Sarsechim. In Genesis V. 26 it is conjectured that Sarsechim and Rahl-sar may be identical, and both titles of the same office.

SA'RUCH [Sarou]: Sarguc. SERGUS the son of Ren (Luke iii. 55).

SATAN. The word itself, the Hebrew סָדָן, is simply an "adversary," and is so used in 1 Sam. xxix. 4: 2 Sam. xxix. 22: 1 K. v. 4 (LXX. έκπουλος): in 1 K. xi. 25 (LXX. αντιμονοσος); in Num. xix. 22, and Ps. xix. 6 (LXX. διάβολος and cognate words); in 1 K. xiv. 14, 23 (LXX. σατανας). This original sense is still found in our Lord's application of the name to St. Peter in Matt. xvi. 23. It is used as a proper name or title only four times in the O. T., namely, (with the article) in Job i. 6, 12, ii. 1: Zech. iii. 1, and (without the article) in 1 Chr. xxi. 1. In each case the LXX. has διάβολος, and the Vulgate Satan. In the N. T. the word is σάτανας, followed by the Vulgate Satanas, except in 2 Cor. xii. 7, where σαταν is used. It is found in twenty-five places (exclusive of parallel passages), and the corresponding word διάβολος in about the same number. The title διάβολος του θεου του ανθρωπου is used three times; διαβόλος is used certainly six times, probably more frequently, and διαβόλος. It is in keeping with the Scriptural revelation on the subject that we are here concerned, and it is clear, from this simple enumeration of passages, that it is to be sought in the New, rather than in the Old Testament.

It divides itself naturally into the consideration of his existence, his nature, and his power and action.

(A.) His Existence. — It would be a waste of time to prove that, in various degrees of cleanness, the personal existence of a Spirit of Evil is revealed again and again in Scripture. Every quality, every action, which can indicate personality, is attributed to him in language which cannot be explained away. It is not difficult to see why it should be thus revealed. It is obvious that the fact of his existence is of spiritual importance, and it is also clear, from the nature of the case, that it could not be discovered, although it might be suspected, by human reason. It is in the power of that reason to test any supposed manifestations of supernatural power, and any asserted principles of Divine action, which, while it is the sphere of experience, e.g. earthly things, of John iii. 12: it may be by such examination satisfy itself of the truth and divinity of a Person or a book; but, having done this, it must then accept and understand, without being able to test or to explain, the disclosures of this Divine authority upon subjects beyond this world (the "heavenly things," of which it is said that none can see or disclose them, save the "Son of Man who is in heaven."

It is true, that human thought can assert an a priori probability or improbability in such statements made, based on the concept of a greater or less degree of accord in principle between the things seen and the things unseen, between the effects, which are visible, and the causes, which are revealed from the regions of mystery. But even this power of weighing probability is applicable rather to the fact and tendency, than to the method, of supernatural action. This is true even of natural action beyond the sphere of human observation. In the discussion of the Plurality of Worlds, for example, it may be asserted without doubt, that in all the orbs of the universe the Divine power, wisdom, and goodness must be exercised; but the human mind is of necessity confounded in discovering the method by which this is effected. Beyond this we can assert nothing to be certain, and can scarcely even say of any of the parts of this method of this government, whether it is antecedently probable or improbable.

Thus, on our present subject, man can ascertain by observation the existence of evil, that is, of facts and thoughts contrary to the standard which conscience asserts to be the true one, bringing with them suffering and misery as their inevitable results. If he attempts to trace them to their causes, he finds them to arise, for each individual, partly from the power of certain internal impulses which act upon the will, partly from the influence of external circumstances. These circumstances themselves subsist under the laws of nature and society, or by the deliberate action of other men. He can conclude with certainty, that both series of causes must exist by the permission of God, and must finally be overruled to his will. But whether there exists any superhuman but subordinate cause of the circumstances, and whether there be any similar influence acting in the origination of the impulses which move the will, this is a question which he cannot answer with certainty. Analogy from the observation of the only ultimate cause which he can discover in the visible world, namely, the free action of a personal will, may lead him, and generally has led him, to conjecture in the affirmative, but still the inquiry remains unanswered by authority.

The tendency of the mind in its inquiry is generally towards one or other of two extremes. The first is to consider evil as a negative imperfection, arising, in some unknown and inexplicable way, from the nature of matter, or from some disturbing influences which limit the action of goodness on earth: in fact, to ignore as much of evil as possible, and to decline to refer the remainder to any positive cause at all. The other is the old Persian or Manichean hypothesis, which traces the existence of
Satan to a rival Creator, not subordinate to the Cre-ator of Good, though perhaps inferior to Him in power, and destined to be overcome by Him at last. Between these two extremes the mind varied, through many gradations of thought and countless forms of superstition. Each hypothesis had its arguments of probability against the other. The first labored over the difficulty of being insufficient as an account of the anomalous facts, and indeterminate in its account of the disturbing causes; the second sinned against that belief in the Unity of God and the natural supremacy of goodness, which is supported by the deepest instincts of the heart. But both were laid in a sphere beyond human cognition; neither could be proved or disproved with certainty.

The Revelation of Scripture, speaking with authority, meets the truth, and removes the error inherent in both these hypotheses. It asserts in the strongest terms the perfect supremacy of God, so that under his permission alone, and for his inscrutable purposes, evil is allowed to exist (see for example, Prov. xvi. 4; Is. xlv. 7; Am. iii. 6; comp. Rom. ix. 22, 23). It regards this evil as an anomaly and corruption, to be taken away by a new manifestation of Divine Love in the Incarnation and Atonement. The conquest of it began virtually in God's ordinance after the Fall itself, was effected actually on the Cross, and shall be perfected in its results at the Judgment Day. Still Scripture recognizes the existence of evil in the world, not only as felt in outward circumstances ("the world"), and as inborn in the soul of man ("the flesh"), but also as proceeding from the influence of an Evil Spirit, exercising that mysterious power of free will, which God's rational creatures possess, to rebel against Him, and to draw others into the same rebellion ("the devil").

In accordance with the "economy" and progressiveness of God's revelation, the existence of Satan is but gradually revealed. In the first entrance of evil into the world, the temptation is referred only to the serpent. It is true that the whole narrative, and especially the spiritual nature of the temptation ("to be as gods"), which was united to the sensual motive, would force on any thoughtful reader the conclusion that something more than a mere animating agency was involved; but the time was not then come to reveal, what afterwards was revealed, that "he whom sinheth is of the devil" (1 John iii. 8), that "the old serpent" of Genesis was called the devil and Satan, who deceiveth the whole world (Rev. xii. 9, 10).

Throughout the whole period of the patriarchal and Jewish dispensation, this vague and indirect revelation of the Source of Evil alone was given. The Source of all good is set forth in all his supreme and unapproachable Majesty; evil is known negatively as the falling away from Him: and the "vanity" of idols, rather than any positive evil influence, is represented as the opposite to his reality and goodness. The Law gives the "knowledge of sin" in the soul, without referring to any external influence of evil to foster it; it denotes

See Wisd. ii. 24, ἐνεπέρα ἐν τᾶς αἰσθανόμενοι σαργασσω

a By this reason, if for no other, it seems impossible to accept the interpretation of "armagedon," given by Spencer, Hengstenberg, and others, in Lev. xvi. 8, as a reference to the Spirit of Evil. Such a reference would not, only stand alone, but would be entirely inconsistent with the whole tenor of the Mosaic revela-

gion. See DAY OF ATONEMENT.
In the interval between the Old and New Test., the Jewish mind had pondered on the scantly Scriptural evidence for Satan's influence. But the Apocryphal books (as, for example, Toldi and Judith), while dwelling on "demons" (σατανας), have no notice of Satan. The same may be observed of Josephus. The only instance to the contrary is the reference already made to Wisd. ii. 24.

It is to be noticed also that the Targums often introduce the name of Satan into the descriptions of sin and temptation found in the O. T.; as for example in Ex. xxxv. 19, in connection with the worship of the golden calf (comp. the tradition as to the body of Moses, Dent. xxxiv. 5, 6; Jude 9, Michael). But, while a mass of fable and superstition grew up on the general subject of evil spiritual influence, still the existence and nature of Satan remained in the background, felt, but not understood.

The N. T. first brings it plainly forward. From the beginning of the Gospel, when he appears as the personal tempter of our Lord, through all the Gospels, Epistles, and Apocalypse, it is asserted or implied, again and again, as a familiar and important truth. To refer this to mere "accommodation" of the language of the Lord and his Apostles to the ordinary Jewish belief, is to contradict facts, and evade the meaning of words. The subject is not one on which error could be tolerated as unimportant; but one important, practical, and even awful. The language used respecting it is either truth or falsehood; and unless we impute error or deceit to the writers of the N. T., we must receive the doctrine of the existence of Satan as a certain doctrine of Revelation. Without dwelling on other passages, the plain, solemn, and metaphysical words of John viii. 44, must be sufficient:—

Ye are of your father the devil. He was a murderer from the beginning, and abides (ἐστηκεν) not in the truth. When he speaketh a lie, he speaketh of his own, for he is a liar and the father of it.

On this subject, see DEMONS, &c., vol. i. p. 585.

(3.) His Nature. — Of the nature and original state of Satan, little is revealed in Scripture. Most of the common notions on the subject are drawn from mere tradition, popularized in England by Milton, but without even a vestige of Scriptural authority. He is spoken of as a "spirit" in Eph. ii. 2, as the prince or ruler of the "demons" (σατανας) in Matt. x. 12-26, and as having "angels" subject to him in Matt. xxv. 41; Rev. xii. 7, 9. The whole description of his power implies spiritual nature and spiritual influence. We conclude therefore that he was of angelic nature (ANGLES), a rational and spiritual creature, superhuman in power, wisdom, and energy: and not only so, but an archangel, one of the "princes" of heaven, as Gen. iii. 2. Of course, the conception of anything essentially and originally evil was created by God. We find by experience, that the will of a free and rational creature can, by his permission, oppose his will: that the very conception of freedom implies capacity of temptation; and that every sin, unless arrested by God's fresh gift of grace, strengthens the hold of evil on the spirit, till it may fall into the hopeless state of reprobation. We can only conjecture, therefore, that Satan is a fallen angel, who once had a time of probation, but whose condemnation is now irrevocably fixed. Error of the time, cause, and manner of his fall, Scripture tells us scarcely anything. It limits its disclosures, as always, to that which we need to know. The passage on which all the fabric of tradition and poetry has been raised is Rev. xii. 7, 9, which speaks of "Michael and his angels" as "fighting against the dragon and his angels" till the "great dragon, called the devil and Satan," was "cast out into the earth, and his angels went out with him." Whatever be the meaning of this passage, it is certain that it cannot refer to the original fall of Satan. The only other passage which refers to the fall of the angels is 2 Pet. ii. 4, "God spared not the angels, when they had sinned, but having cast them into hell, delivered them to chains of darkness (σειρας θαυματουργων παρεσκευασμένος), reserved unto judgment," with the parallel passage in Jude 6. — Angels, who kept not their first estate (τινα κατανεκρινεν), but left their own habitation, hath reserved in everlasting chains under darkness unto the judgment of the Great Day.

Here again the passage is mysterious; but it seems hardly possible to consider Satan as one of these: for they are in chains and reserved (σειρας θαυματουργων παρεσκευασμένος, reserved unto judgment," with the parallel passage in Jude 6. — Angels, who kept not their first estate (τινα κατανεκρινεν), but left their own habitation, hath reserved in everlasting chains under darkness unto the judgment of the Great Day.

Setting these passages aside, we have still to consider the declaration of our Lord in Luke x. 18. — "I beheld (ειλθον) Satan, as lightning, fall from heaven. This may refer to the fact of his original fall (although the use of the imperfect tense, and the force of the context, rather refer it figuratively to the triumph of the disciples over the evil spirits); but, in any case, it tells nothing of its cause or method. There is also the passage already quoted (John viii. 44) in which our Lord declares of him, that he was a murderer from the beginning; that he stands not (στηκεν) in the truth, because there is no truth in him;" &c. that he is a liar and the father of it. But here it seems likely the words ἄρ παράκλητον refer to the beginning of his action upon man: perhaps the allusion is to his temptation of Cain to be the first murderer, an allusion explicitly made in a similar passage in 1 John iii. 9-12. The word εἰστηκεν (wrongly rendered "whole") in A. V., and the rest of the verse refer to present time. The passage therefore throws little or no light on the cause and method of his fall.

Perhaps the only one, which has any value, is 1 Tim. iii. 6. — "lest being lifted up by pride he fall into the condemnation (κολορα) of the devil." It is concluded from this, that pride was the cause of the devil's condemnation. The inference is a specious one: it is strengthened by the only analogy within our reach, that of the fall of man, in which the spiritual temptation of pride, the desire "to be as gods," was the sublimest and most deadly temptation. Still it is but an inference; it cannot be regarded as a matter of certain Revelation.

But, while these points are passed by almost in silence (a silence which replaces the irrevocable exercise of imagination on the subject), Scripture describes to us distinctly the moral nature of the God: "especially because 2 Pet. iii. 5, relating to the Flood, seems closely connected with that passage.
Evil One. This is no matter of barren speculation to those who by yielding to evil may become the "children of Satan," instead of "children of God." The ideal of goodness is made up of the three great moral attributes of God, Love, Truth, and Purity or Holiness; combined with that spirit, which is the natural temper of a finite and dependent creature, the spirit of Faith. We find, accordingly, that the opposites to these qualities are dealt upon as the characteristics of the devil. In John viii. 44, compared with 1 John iii. 10-15, we have hatred and falsehood; in the constant mention of the "unchern" spirits, of which he is the chief, we find iniquity; from 1 Tim. iii. 6, and the narrative of the Temptation, we trace the spirit of pride. These are especially the "sins of the devil." In them we trace the essence of moral evil, and the features of the reprobate mind. Add to this a spirit of restless activity, a power of craft, and an intense desire to spread corruption, and with it eternal death, and we have the portrature of the Spirit of Evil as Scripture has drawn it plainiy before our eyes. (C.) His Power and Action.—Both these points, being intimately connected with our own life and salvation, are treated with a distinctness and fulness remarkably contrasted with the obscurity of the previous subject.

The power of Satan over the soul is represented as constant, direct, or by his influence, indirect, or by his instruments. His direct influence over the soul is simply that of a powerful and evil nature on those in whom lurks the germ of the same evil, differing from the influence exercised by a wicked man in degree rather than in kind; but it has the power of acting by suggestion of thoughts, without the medium of actions or words—a power which is only in very slight degree exercised by men upon each other. This influence is spoken of in Scripture in the strongest terms, as a real external influence, correlative to, but not to be confounded with, the existence of evil within. In the parable of the power (Matt. xiii. 19), it is represented as a negative influence, taking away the action of the Word of God for good; in that of the wheat and the tares (Matt. xiii. 24-30), as a positive influence of evil, introducing wickedness into the world. St. Paul does not hesitate to represent it as a power, permitted to dispute the world with the power of God; for he declares to Agrippa that his mission was "to turn men from darkness to light, and from the power (GREEKS) of Satan unto God," and represents the excommunion, which cuts men off from the grace of Christ in his Church, as a "deliverance of them unto Satan" (1 Cor. vi. 5; 1 Tim. i. 20). The same truth is conveyed, though in a bolder and more startling form, in the Epistles to the Churches of the Apocalypse, where the body of the unbelieving Jews is called a "synagogue of Satan" (Rev. ii. 9, iii. 9), where the secrets of false doctrine are called "the depths of Satan" (II. 24), and the "throne" and "habitation" of Satan are said to be set up in opposition to the Church of Christ. Another and even more remarkable expression of the same idea is found in the Epistle to the Hebrews, where the death of Christ is spoken of as intended to enable (EXEGESIS) "him that hath power (TO SPEREO) of death, that is, the devil;" for death is evidently regarded as the "wages of sin," and the power of death as inseparable from the power of corruption. Nor is his truth only expressed directly and formally:

it meets us again and again in passages simply practical, taken for granted, as already familiar (see Rom. xvi. 20; 2 Cor. ii. 11; 1 Thess. ii. 18 2 Thess. ii. 9; 1 Tim. v. 15). The Bible does not shrink from putting the fact of Satanic influence over the soul before us, in plain and terrible certainty.

Yet at the same time it is to be observed, that its language is very far from condemnating, even for a moment, the horrors of the Manichean theory. The influence of Satan is always spoken of as temporary and limited, subordinated to the Divine counsel, and broken by the Incarnate Son of God. It is brought out visibly, in the form of possession, in the earthly life of our Lord, only in order that it may give the opportunity of his triumph. As for Himself, so for his redeemed ones, it is true, that "God shall bruise Satan under their feet shortly" (Rom. xvi. 20; comp. Gen. iii. 15). Nor is this all, for the history of the book of Job shows plainly, what is elsewhere constantly implied, that Satanic influence is permitted, in order to be overruled to good, to teach humility, and therefore faith. The mystery of the existence of evil is left unexplained; but its present subordination and future extinction are familiar truths. So accordingly, on the other hand, his power is spoken of as capable of being resisted by the will of man, when aided by the grace of God. "Resist the devil, and he will flee from you." (1 Pet. v. 8.) This is another expression of the language of Scripture (Jam. iv. 7). It is indeed a power, to which "place" or "opportunity" is "given" only by the consent of man's will (Eph. iv. 27). It is probably to be traced most distinctly in the power of evil habit, a power real, but not irresistible, created by previous sin, and by every successive act of sin riveted more closely upon the soul. It is a power which cannot act directly and openly, but needs craft and dissimulation, in order to get advantage over man by entangling the will. The "wiles" (Eph. vi. 11), the "devices" (2 Cor. ii. 11), the "snare" (1 Tim. iii. 7, vi. 9; 2 Tim. ii. 26) of the devil, are expressions which indicate the indirect and unnatural character of the power of evil. It is therefore urged as a reason for "resistance" (1 Pet. v. 8), for the careful use of the "whole armor of God" (Eph. vi. 10-17); but it is never allowed to obscure the supremacy of God's grace, or to disturb the inner peace of the Christian. "He that is born of God, keepeth himself, and the wicked one toucheth him not." (1 John v. 18.)

Besides his own direct influence, the Scripture discloses to us the fact that Satan is the leader of a host of evil spirits or angels who share his evil work, and for whom the "everlasting fire is prepared" (Matt. xxv. 41). Of their origin and fall we know no more than of his, for they cannot be the same as the fallen and imprisoned angels of 2 Pet. ii. 4, and Jude 6; but one passage (Matt. xii. 24-28) identifies them distinctly with the δαίμονε (A. V. "devils") who had power to possess the souls of men. The Jews there speak of a Beelzebub (ΒΕΛΟΣΒΟΛ), "a prince of the demons," whom they identify with, or symbolize by the idol of Ekron, "the god of flies" (see BIELZEBUB), and by whose power they accuse our Lord of casting out demons. His answer is, "How

"a It is unfortunate that the A. V. should use the word "devil," not only for its proper equivalent δαίμονος, but also for δαίμονον.
SATAN

can Satan cast out Satan? " The inference is clear that Satan is Beelzebath, and therefore the demons are " the angels of the devil:" and this inference is strengthened by Acts x. 38, in which St. Peter describes the possessed as καταδυστησθενούντων ἑτοί τοῦ δαίμονος, and by Luke x. 18, in which the " devil" is called οἱ δαιμονίζοντες as lords of their masters, and by the fact, now familiar, that our Lord with the " fall of Satan from heaven," and their power included by Η in the " power of the enemy" (τοῦ ἐχθρού); comp. Matt. xiii. 39.

For their nature, see DEMONS. They are mostly spoken of in Scripture in reference to possession; but in Eph. vi. 12 they are described in various lights, as "spiritual powers," "powers of wickedness in heavenly places," and "the rulers of the darkness of this world," and "spiritual powers of wickedness in heavenly places" (or "things") (τὰ πνευματικὰ τῆς ποιησιάς ἐν τοῖς ἐπορευμαίοις); and in all as "wrestling" against the soul of man. The same reference is made less explicitly in Rom. vii. 38, and Col. ii. 19, and in Rev. xii. 7-9 they are spoken of as fighting with "the dragon," the old serpent, called the devil and Satan, against "Michael and his angels," and as cast out of heaven with their chief. Taking all these passages together, we find them sharing the enmity to God and man implied in the name and nature of Satan; but their power and action are but little dealt with in comparison with his. That there is against us a power of spiritual wickedness is a truth which we need to know, and a mystery which only Revelation can disclose; but whether it is exercised by few or by many is a matter of comparative indifference.

But the Exil one is not only the "prince of the demons," but also he is called the "prince of this world." (ὁ ἀρχῶν τοῦ κόσμου τοῦτούτου) in John xii. 31, xiv. 30; xvi. 11, and even the "god of this world." (ὁ θεὸς τοῦ αἰῶνος τοῦτούτου) in 2 Cor. iv. 4: the two expressions being united in the words τῶν κοσμοκρατόρων τοῦ σκότους τοῦ αἰῶνος τοῦτούτου, used in Eph. vi. 12. This power he claimed for himself, as a divinely appointed authority, in the temptation of our Lord (Luke iv. 6); and the temptation would have been unreal, had he been spoken of as possessing any indirect influence exercised through earthly instruments. There are some indications in Scripture of the exercise of this power through inanimate instruments, of an influence over the powers of nature, and what men call the "chances of life." Such a power is distinctly asserted in the case of Job, and probably implied in the case of the woman with a spirit of infirmity (in Luke xii. 16), and of St. Paul's "thorn in the flesh" (2 Cor. xii. 7). It is only consistent with the attribution of such action to the angels of God (as in Ex. ii. 23; 2 Sam. xxiv. 16; 2 K. xix. 35; Acts xii. 23); and, in our ignorance of the method of connection of the second causes of nature with the Supreme Will of God, we cannot even say whether it has in it any antecedent improbability; but it is little dealt with in Scripture, in comparison with the other exercise of this power through the hands of wicked men, who become "children of the devil," and accordingly "do the lusts of their father." (See John xii. 44; Acts xii. 19; 1 John iii. 8-10; and comp. John vi. 70.) In this sense the Scripture regards all sins as the "works of the devil," and traces to him, through his ministers, all spiritual evil and error (2 Cor. xii. 14, 15); and all the persecution and hindrances which oppose the Gospel (Rev. ii. 10; 1 Thess. ii. 18). Most of all this indirect action of Satan is depicted in those who deliberately mislead and tempt men, and who at last, independent of any interest of their own, come to take an unnatural pleasure in the sight of evil-doing in others (Rom. i. 32).

1 The method of his action is best discerned by an examination of the title by which he is designated in Scripture. He is called emphatically δαίμονος, "the devil." The derivation of the word in itself implies only the endeavor to break the bonds between others, and to set them at variance (see, e.g., Plat. Symp. p. 222 c: δαίμονες ἤμα καὶ Ἀγαθώσατα): but common usage adds to this general sense the special idea of "setting at variance by slander." In the N. T. the word δαίμονος is used three times as an epithet (1 Tim. iii. 11; 2 Tim. iii. 3; Tit. ii. 3); and in each case with something like the special meaning. In the application of the title to Satan, both the general and special senses should be kept in view. His general object is to break the bonds of communion between God and man, and the bonds of truth and love which bind men to each other, to set each soul "at variance" both with God, and with man, and to reduce it to that state of self-will and selfishness which is the seed-plot of sin. One special sense by which he seeks to do this, is slander of God to man, and of man to God.

The slander of God to man is seen best in the words of Gen. iii. 4, 5: "Ye shall not surely die: for God doth know, that in the day ye eat thereof your eyes shall be opened, and ye shall be as gods, knowing good and evil." These words contain the germ of the false notions, which keep men from God, or reduce their service to Him to a hard and compulsory slavery, and which the heathen so often adopted in all their hideousness, when they represented their gods as either careless of human well and woe, or "envious" of human excellence and happiness. They attribute selfishness and jealousy to the Giver of all good. This is enough (even without the imputation of falsehood which is added) to pervert man's natural love of freedom, till it rebels against that which is made to appear as a hard and arbitrary tyranny, and seeks to set up, as it thinks, a freer and nobler standard of its own. Such is the slander of God to man, by which Satan and his agents still strive against his oncoming grace.

The slander of man to God is illustrated by the book of Job (Job i. 9-11, ii. 4, 5). In reference to it, Satan is called the "adversary" (ἄδικος) of man in 1 Pet. v. 8, and represented in that character in Zech. vii. 9, 10; and more plainly still designated in Rev. xii. 9, as " the accuser of our brethren, who accused them before our God day and night." It is difficult for us to understand what the need of accusation or the power of slander, under the all-searching eye of God. The mention of it is clearly an "accommodation" of

refers to its transitory character, and is evidently used above to qualify the starting application of the word θεός, a "god of an age" being of course no true God at all. It is used with κόσμος in Eph. ii. 2.
God's judgment to the analogy of our human experience; but we understand by it a practical and awful truth, that every sin of life, and even the admixture of lower and evil motives which taints the best actions of man, will rise up against us at the judgment, to claim the soul as their own, and fix forever that separation from God, to which, through them, we have yielded ourselves. In that accusation Satan shall in some way bear a leading part, pleading against man with that worst of slander which is based on perverted or isolated facts; and shall be overcome, not by any counterclaim of human merit, but "by the blood of the Lamb," received in true and steadfast faith.

But these points, important as they are, are of less moment than the disclosure of the method of Satanic action upon the heart itself. It may be summed up in two words—Temptation and Possession.

The subject of temptation is illustrated, not only by abstract statements, but also by the record of the temptations of Adam and of our Lord. It is expressly laid down (as in James i. 2-4) that "temptation," properly so called, i. e., "trial" (πεσωνωσα), is essential to man, and is accordingly ordained for him and sent to him by God (as in Gen. xxii. 1). Man's nature is progressive; his capacity, which exists at first only in capacity (δυναμεις) must be brought out to exist in actual efficiency (πεσωνωσα) by free exercise. His appetites and passions tend to their objects, simply and unreservedly, without respect to the rightness or wrongness of their obtaining them; they need to be checked by the reason and conscience, and this need constitutes a trial, in which, if the conscience prevails, the will, the spirit of man will be tested; and if, as in the case of the temptation to Satan, the will be overthrown, the lower nature tends to predominate, and the man has fallen away. Besides this, the will itself delights in independence of action. Such independence of physical compulsion is its high privilege; but there is over it the Moral Power of God's Law, which, by the very fact of its truth and goodness, as acknowledged as they are by the reason and the conscience, should regulate the human will. The need of giving up the individual will, freely and by conviction, so as to be in harmony with the will of God, is a still severer trial, with the reward of still greater spiritual progress, if we sustain it, with the punishment of a milder and more dangerous fall if we succumb. In its struggle the spirit of man can only gain and sustain its authority by that constant grace of God, given through communion of the Holy Spirit, which is the breath of spiritual life.

It is this tentability of man, even in his original nature, which is represented in Scripture as giving scope to the evil action of Satan. He is called the "tempter" (as in Matt. iv. 3; 1 Thess. iii. 5). He has power (as the record of Gen. iii. shows clearly), first, to present to the appetites or passions their objects in vivid and captivating forms, so as to induce man to seek these objects against the Law of God "written in the heart;" and next, to set upon the false desire of the will for independence, the desire "to be as gods, knowing" (that is, practically, judging and determining) "good and evil." It is a power which can be resisted, because it is under the control and overruling power of God, as is emphatically laid down in 1 Cor. x. 13; Jam. iv. 7, &c.; but it can be so resisted only by yielding to the grace of God, and by a struggle (sometimes an "agonย"") in reliance on its strength.

It is exercised both negatively and positively. Its negative exercise is referred to in the parable of the sower, as taking away the word, the "engrafted word" (James i. 21) of grace, i. e., as interposing itself, by consent of man, between him and the channels of God's grace. Its positive exercise is set forth in the parable of the wheat and the tares, represented as sowing actual seeds of evil in the individual heart of the world generally; and it is to be noticed, that the consideration of the true nature of the tares (γιαρνα) leads to the conclusion, which is declared plainly in 2 Cor. xi. 14, namely, that evil is introduced into the heart mostly as the counterfeit of good.

This exercise of the Tempter's power is possible, even against a sinless nature. We see this in the Temptation of our Lord. The temptations presented to Him appeal, first, to the natural desire and need of food, next to the desire of power, to be used for good, which is inherent in the noblest minds; and lastly, to the desire of testing and realizing God's special protection, which is the inevitable tendency of human weakness under a real temptation. The objections are involved in no case positive sinfulness; the temptation was to seek them by presumptions or by merely means; the answer to them (given by the Lord as the Son of Man, and therefore as one like ourselves in all the weakness and finiteness of our nature) lay in simple faith, resting upon God, and on His Word, keeping to his way, and refusing to consider the motives of action which belong to Him alone. Such faith is a renunciation of all self-confidence, and a simple dependence on the will and on the grace of God.

But in the temptation of a fallen nature Satan has a greater power. Every sin committed makes a man the "servant of sin" for the future (John viii. 34; Rom. vi. 16); it therefore creates in the spirit of man a positive tendency to evil, which it sympathizes with, and aids, the temptation of the Evil One. This is a fact recognized by experience; the doctrine of Scripture, inscrutably mysteries, but unmistakably declared, is that, since the Fall, this evil tendency is born in man in capacity, prior to all actual sins, and capable of being brought out into active existence by such actual sins committed.

It is this which St. Paul calls "a law;" R. v. 6 (according to his universal use of the word) an external power "of sin" over man, bringing the inner man (the πνευμα) into captivity (Rom. vii. 14-24). Its power is broken by the Atonement and the gift of the Spirit, but yet not completely cast out; it still "insts against the spirit" so that men "cannot do the things which they would" (Gal. v. 17).

It is to this spiritual power of evil, the tendency to falsehood, cruelty, pride, and disbelief, independently of any benefits to be derived from them, that Satan is said to appeal in tempting us. If his temptations be yielded to without repentance, it becomes the reprobate (αδικωνων) mind, which delights in evil for its own sake (Rom. i. 28, 32), and therefore emphatically "children of the devil" (John viii. 44; Acts xiii. 10; 1 John iii. 8, 10), and "accursed" (Matt. xxv. 41), fit for "the fire pre- and between faith and the works by which it is perfected (ενεργονται) in Jam. ii. 22."
pared to the devil and his angels." If they be resisted, as by God's grace they may be resisted, then the evil power (the "flesh" or the "old man") is gradually "crucified" or "mortified," until the soul is prepared for that heaven, where no evil can enter.

This twofold power of temptation is frequently referred to in Scripture, as exercised, chiefly by the suggestion of evil thoughts, but occasionally by the delegated power of Satan over outward circumstances. To this latter power is to be traced (as has been said) the trial of Job by temporal loss and bodily suffering (Job i., ii.), the remarkable expression, used by our Lord, as to the woman with a "spirit of infirmity" (Luke xiii. 16), the "thorn in the flesh," which St. Paul calls the "messenger of Satan" to buffet him (2 Cor. xii. 7).

Its language is plain, incapable of being explained as metaphor, or poetical personification of an abstract principle. Its general statements are illustrated by examples of temptation. (See, besides those already mentioned, Luke xxii. 3; John xiii. 27 (Judas); Luke xiii. 31 (Peter); Acts v. 3 (Ananias and Sapphira); 1 Cor. vii. 3; 2 Cor. ii. 11; 1 Thess. iii. 5.) The subject itself is the most startling form of the mystery of evil; it is one on which, from our ignorance of the connection of the First Cause with Second Causes in Nature, and of the process of origination of human thought, experience can hardly be held to be competent either to confirm or to oppose the testimony of Scripture.

On the subject of Possession see DEMONiACS. It is sufficient here to remark, that although widely different in form, yet it is of the same intrinsic character as the other power of Satan, including both that external and internal influence to which reference has been made above. It is disclosed to us only in connection with the revelation of that redemption from sin, which destroys it,—a revelation begun in the first promise in Eden, and manifested, in itself at the Atoneinent, in its effects at the Great Day. Its end is seen in the Apocalypse, where Satan is first "bound for a thousand years," then set free for a time for the last conflict, and finally "cast into the lake of fire and brimstone ... for ever and ever" (xx. 2, 7-10).

* The literature of this subject is extensive. Some of the works relating to it are referred to under the articles ANGELES, DEMONS, and DEMONiACS. Among the more recent books it may be sufficient to name here G. Rostoff's Geschichte des Teuffels, 2 vols. Leipzig, 1856, 8vo. A.

SAUL (saphur, saphur, seerim; sahur, sahur, prophet; saur, saur; siriim; sahir; saur, prophet; saur, prophet) in the RSV, is rendered in the A.V. of the above-mentioned plural noun, which, having the meaning of "airy" or "transparent," frequently applied to "beasts" (comp. the Latin hicrus, from bircus, bircus; the Hebrew, however, of Is. xiii. 21, and xxxiv. 14, where the prophet predicts the desolation of Babylon, have, probably, no allusion to any species of goat whatever wild or tame. According to the old versions, and nearly all the commentators, our own translation is correct, and Sauls, that is, derms of woods and desert places, hill men and hill

---

**SAUL**

SAUL (isoni, i. e. Shaul) [asked for, begued]; [sa:lo:; isaiov; Saul], more accurately SHAL, in which form it is given on several occasions in the Authorized Version. The name of various persons in the Sacred History.

1. Saul of Rehoboth by the River was one of the early kings of Edom, and successor of Samul (Gen. xxxvi. 37, 38). In 1 Chr. i. 48 he is called SHAL. 2. The first king of Israel. The name here first appears in the history of Israel, though found before in the Edomite prince already mentioned; and in a son of Simon (Gen. xvi. 10; A. V. Shaul). It also occurs among the Kohathites in the genealogy of Samuel (1 Chr. vi. 24), and in Saul, like the king, of the tribe of Benjamin, better known as the Apostle Paul (see below, p. 2857) Josephus (B. J. ii. 18, § 4) mentions a Saul, father of one Simon who distinguished himself at Scythopolis in the early part of the Jewish war.

In the following genealogy may be observed:
1. The repetition in two generations of the names of Kish and Ner, of Nadab and an Abi-nadab, and of Mephibosheth. 2. The occurrence of the name of Saul in three successive generations: possibly in four, as there were two Mephibosheths. 3. The constant shifting of the names of God as incorporated in the proper names: (a.) Abiel = Je-diel. (b.) Machel-shua = Je-shua. (c.) Esh-baal = Mephi- bosheth. (d.) Mephibosheth — perhaps the same. 4. The long continuance of the family down to the times of Ezra. 5. Is it possible that Zimri (1 Chr. ix. 42) can be the usurper of 1 K. xvi. — if so, the last attempt of the house of Saul to regain its ascendency? The time would agree.

Abdon. 1. Abner.
Abiel, or Jehiel = Manasseh.
(1 Sam. ix. 1.)
(1 Chr. viii. 25.)

Abi-nadab. 1. Abiel. 2. Shimeah.
(1 Sam. ix. 40.)
(1 Chr. ix. 39.)

I. The repetition in two generations of the names
2853 of Kish and Ner, of Nadab and an Abi-nadab, and of Mephibosheth. 2. The occurrence of the name of Saul in three successive generations: possibly in four, as there were two Mephibosheths. 3. The constant shifting of the names of God as incorporated in the proper names: (a.) Abiel = Je-diel. (b.) Machel-shua = Je-shua. (c.) Esh-baal = Mephibosheth. (d.) Mephibosheth — perhaps the same. 4. The long continuance of the family down to the times of Ezra. 5. Is it possible that Zimri (1 Chr. ix. 42) can be the usurper of 1 K. xvi. — if so, the last attempt of the house of Saul to regain its ascendency? The time would agree.

Abdon. 1. Abner.
Abiel, or Jehiel = Manasseh.
(1 Sam. ix. 1.)
(1 Chr. viii. 25.)

Abi-nadab. 1. Abiel. 2. Shimeah.
(1 Sam. ix. 40.)
(1 Chr. ix. 39.)

There is a contradiction between the pedigree in 1 Sam. ix. 1, xiv. 51, which represents Saul and Abner as the grandsons of Abiel, and 1 Chr. viii. 23, ix. 39, which represents them as his great-grandsons. If we adopt the more elaborate pedigree in the Chronicles, we must suppose either that a link has been dropped between Abiel and Kish, in 1 Sam. ix. 1, or that the elder Kish, the son of Abiel (1 Chr. ix. 36), has been confused with the younger Kish, the son of Ner (1 Chr. ix. 30). The pedigree in 1 Chr. viii. is not free from confusion, as it omits, amongst the sons of Abiel, Ner, who in 1 Chr. ix. 36 is the fifth son, and who in both is made the father of Kish.

His character is in part illustrated by the fierce, wayward, fitful nature of the tribe [BENJAMIN], and in part accounted for by the struggle between the old and new systems in which he found himself involved. To this we must add a taint of madness, which broke out in violent frenzy at times, leaving him with long lucid intervals. His affections were strong, as appears in his love both for David and his son Jonathan, but they were unequal to the wild accesses of religious zeal or insanity which ultimately led to his ruin. He was, like the earlier Judges, of whom in one sense he may be counted as the successor, remarkable for his strength and activity (2 Sam. i. 23), and he was, like the Homeric heroes, of gigantic stature, taller by head and shoulders than the rest of the people, and of that kind of beauty denoted by the Hebrew word "good" (1 Sam. ix. 2), and which caused him to be compared to the gazelle, "the gazelle of Israel," a It was probably these external qualities which led to the epithet which is frequently attached to his name, "chosen" — "whom the Lord did choose" — "See ye (i. e. Look at) him whom the Lord hath chosen!" (1 Sam. ix. 17, x. 24; 2 Sam. xxv. 9.)

The birthplace of Saul is not expressly mentioned; but as Zelash was the place of King's sepulchre (2 Sam. xxii.), it was probably his native village. There is no warrant for saying that it was Gibeah, b though, from its subsequent connection with him, it is called often "Gibeah of Saul" [GIBEAH]. His father, Kish, was a powerful and wealthy chief, though the family to which he belonged was of little importance (1 Sam. ix. 1, 21).

a 2 Sam. i. 19, the word translated "beauty," but the same term (םָֽשָׁם) in 2 Sam. ii. 18 and elsewhere is translated "roe." The LXX. have confounded it with a very similar word, and render it Στριφλων, "set up a pillar."

b When Abiel, or Jehiel (1 Chr. viii. 29, ix. 35), is called the father of "Gibeah," it probably means founder of Gibeah.
SAUL
A portion of his property consisted of a drove of asses. In search of these asses, gone astray on the mountains, he sent his son Saul, accompanied by a servant,  who acted also as a guide and guardian of the young man (ix. 5-10). After a three days' journey (ix. 29), which it has hitherto proved impossible to track, through Ephraim and Benjamin [SHALISHA; SHALIM: ZUPH], they arrived at the foot of a hill surrounded by a town, when Saul proposed to return home, but was deterred by the advice of the servant, who suggested that before doing so they should consult a man of God, "a seer," as to the fate of the asses — securing his oracle by a present (boothalah) of a quarter of a silver shekel. They were instructed by the maidens at the well outside the city to catch the seer as he came out of the city to ascend to a sacred eminence, where a sacrificial feast was waiting for his beneficence (1 Sam. ix. 11-13). At the gate they met the seer for the first time — it was Samuel. A divine intimation had indicated to him the approach and the future destiny of the youthful Benjamin. Surprised at his language, but still obeying his call, they ascended to the high place, and in the inn or caravan at the top (τη κατάλυμα, LXX., ix. 27) found thirty of (LXX., and Joseph. Ant. vi. 4, § 11) seventy guests assembled, amongst whom they took the chief place. In anticipation of some distinguished stranger, Samuel had laid the cock reserve a bull's shoulder, from which Saul, as the chief guest, was bidden to tear off the first morsel (1 LXX., ix. 22-24). They then descended to the city, and a bed was prepared for Saul on the house-top. At daybreak Samuel roused him. They descended again to the skirts of the town, and there (the servant having left them) Samuel poured over Saul's head the consecrated oil, and with a kiss of salvation announced to him that he was to be the ruler and (LXX.) deliverer of the nation (ix. 25-31). From that moment, as he turned on Samuel the huge shoulder which towered above all the rest (x. 9, LXX.), a new life dawned upon him. He returned by a route which, like that of his search, is impossible to make out distinctly; and at every step homeward it was confirmed by the incidents which, according to Samuel's prediction, awaited him (x. 9, 10). At Rachel's sepulchre he met two men,  who announced to him the recovery of the asses — his lower cares were to cease. At the oak  of Tabor [PLAIN; TABOR, PLAINE or?] he met three men carrying gifts of kids and bread, and a skin of wine, as an offering to Bethel. Two of the boxes were offered to him as if to indicate his new dignity. At the hill of "ivory" (what ever may be meant thereby, possibly his own city, Gibeah), he met a band of prophets descending with musical instruments, and he caught the inspiration from them, as a sign of his new life.  

a The word is יִשָּׂרֶא, "servant," not יִשָּׂרֶא יִשָּׂרֶא; "slave."  
b At Zelbha, or (LXX.) "keeping for joy,"  
c Mistranslated in A. V. "plain."  
d In x. 5. Gibeah ha-Eventually; in x 10, hang-gibea, only. Joseph. (Ant. vi. 4, § 2) gives the name Ga- 
athsya, by which he elsewhere designates Gibeah, Saul's city.  
e See for this Ewah (lii. 28-90).  
fi יִשָּׂרֶא, "the strength," the host, x. 29; comp.  
2 Sam. xiv. 2. The word "bonds" is usually em- 
ployed in the A. V. for יִשָּׂרֶא, a very different term, with a strict meaning of its own. [Troop.]  
f The words which close 1 Sam. x. 27 are in the 
Hebrew text "he was as though he were deaf," in 
Joseph. Ant. vi. 5, § 1, and the LXX. (followed by 
Ewald), "it came to pass after a month that,"  
g Also 2 Sam. x. 15, LXX., for "Lord."  
h The expression, xiii. 1, "Saul was one year old" 
(the son of a year) in his reign, may be either 
(1), he reigned one year; or (2), the word so may have 
brought from Genesis to xiii. 8; and it may have been 
true that he was 21 when he began to reign."
1,000 was formed, which he soon afterwards gathered together round him; and Jonathan, apparently with his sanction, rose against the officer and slew him (xiii. 2-4). This roused the whole force of the Philistine nation against him. The spirit of Israel was completely broken. Many concealed themselves in the caverns; many crossed the Jordan: all were dispersed, except Saul and his son, with their immediate retainers.

In this crisis, Saul, a characteristic of his kingdom at Gilgal, found himself in the position long before described by Samuel: longing to exercise his royal right of sacrifice, yet deterred by his sense of obedience to the prophet. At last, on the 7th day, he could wait no longer, but just after the sacrifice was completed Samuel arrived, and pronounced the first curse, on his impetuous zeal (xv. 5-14).

Meanwhile the adventurous exploit of Jonathan at Michmash brought on the crisis which ultimately drove the Philistines back to their own territory [Jonathan]. It was signalized by two remarkable incidents in the life of Saul. One was the first appearance of his madness in the rash vow which all but cost the life of his son (1 Sam. xxiv. 44). The other was the erection of his first altar (iv. 16): it was a more spiritual offering than the sacrificial thanksgiving (xx. 21). Such was the Jewish tradition preserved by Josephus (Ant. vi. 7 § 2), who expressly says that Agag was spared for his stature and beauty, and such is the general impression left by the description of the celebration of the victory. Saul rides to the southern Carmel in a chariot (I.XX.), never mentioned elsewhere, and sets up a monument there (Heb. "a hand") 2 Sam. xix. 18, which in the Jewish traditions (Jerome, Qo. Heb. ad loc.) was a triumphal arch of olives, myrtles, and palms. And in allusion to his crowning triumph, Samuel applies to God the phrase, "The Victory (Vulg. triumphator) of Israel will neither lie nor repent" (xx. 21); and comp. 1 Chr. xix. 11. This second act of disobedience called down the second curse, and the first distinct intimation of the transference of the kingdom to a rival. The struggle between Samuel and Saul is their final parting is indicated by the rest of Samuel's role of state, as he tears himself away from Saul's grasp (for the gesture, see Joseph. Ant. vi. 7 § 5), and by the long mourning of Samuel for the separation. "How long wilt thou mourn for Saul?" (xxv. 1, xvi. 1).

The rest of Saul's life is one long tragedy. The frenzy, which had given indications of itself before, now at times took almost entire possession of him. It is described in mixed phrases as "an evil spirit of God" (much as we might speak of a religious madness), which, when it came upon him, almost choked or struggled him from its violence (xvi. 14, LXX.; Joseph. Ant. vi. 8 § 2).

In this crisis David was recommended to him by one of the young men of his guard (in the Jewish tradition groundlessly supposed to be Doeg, Jerome, Qo. Heb. ad loc.). From this time forward their lives are blended together. [DAVID] In Saul's better moments he never lost the strong affection for Jonathan, the "myndens," of David.

1. The word may be rendered either "garrison" or "officer"; it is meaning is uncertain.

2. The command of Samuel (v. 8) had apparently a perpetual obligation (xiii. 13). It had been given two years before and in the interval they had both been in battle he wore a earring on his head and a bracelet on his arm (2 Sam. i. 10). He sat at meals on a seat of his own facing his son (1 Sam. xxv. 25; LXX.). He was received on his return from battle by the songs of the Israelite women (1 Sam. xvii. 6), amongst whom he was on such occasions specially known as bringing back from the enemy scarlet robes, and golden ornaments for their apparel (2 Sam. i. 24).

b They were Benjaminites (1 Sam. xxiii. 7. Joseph. Ant. vii. 14), young, tall, and handsome (Pol. vi. 5 § 6).

c They were Benjaminites (1 Sam. xxiii. 7. Joseph. Ant. vii. 14), young, tall, and handsome (Pol. vi. 5 § 6).
SAUL

section which he had contracted for David. "He loved him greatly" (xxi. 21). Saul would let him go no more home to his father's house" (xxviii. 2). "Wherefore comest not the son of Jesse to meet?" (xx. 27). "Is this thy voice, my son David? . . . Return, my son David; blessed be thou, my son David" (xxv. 16, xxvi. 17, 23). Occasionally too his prophetic gift returned, blended with his madness. He 'prophesied' or 'raved' in the midst of his house — "he prophesied and lay down naked all day and all night" at Ramah (xix. 24). But his acts of fierce, wild zeal increased.

The massacre of the priests, with all their families (xxvii.) — the massacre, perhaps at the same time, of the Gibeonites (2 Sam. xxii. 1), and the violent extirpation of the necromancers (1 Sam. xxviii. 3, 5), are all of the same kind. At last the monarchy itself, which he had raised up, broke down under the weakness of its head. The Philistines reentered the country, and with their chariots and horses occupied the Plain of Esdraelon. Their camp was pitched on the southern slope of the range now called Little Hermon, by Shamem. On the opposite side, on Mount Gilboa, was the Israelite army, elated as usual to the heights which were their safety. It was near the spring of Gilbon's encampment, hence called the spring of Harod or "trembling" — and now the name assumed an evil omen, and the heart of the king as he pitched his camp there "trembled exceedingly" (1 Sam. xxviii. 5). In the loss of all the usual means of consulting the Divine will, he determined, with that wayward mixture of superstition and religion which marked his whole career, to apply b to one of the necromancers who had escaped his persecution. She was a woman living at Endor, on the other side of Little Hermon; she is called a woman of "Oh," i. e. of the skin or bladder, and this the LXX. has rendered by ἑγαγηστουμος or ventriloquist, and the Vulgate by Pythoons. According to the Hebrew tradition mentioned by Jerome, she was the mother of Abner, and hence her escape from the general massacre of the necromancers (see Leo Allatius, De Eugeniostia, cap. 6, in Critici Sacri, ii.). Volumes have been written on the question, whether in the scene that follows we are to understand an imposture or a real apparition of Samuel. Eschatists and most of the Fathers take the scene as representing, not an apparition of Samuel, but the visit of the devil: Origen, the latter view. Augustine wavers. (See Leo Allatius, ut supra, pp. 1062-1114.) The LXX. of 1 Sam. xxviii. 7 (by the above translation) and the A. V. (by its omission of "himself" in xxviii. 14, and insertion of "when" in xxviii. 12) lean to the former. Josephus (who pronounces a glowing eulogy on the woman, Ant. vi. 14, §§ 2, 9), and the LXX. of 1 Chr. x. 13, to the latter. At this distance of time it is impossible to determine the relative amount of fraud or of reality, though the obvious meaning of the narrative itself tends to the hypothesis of some kind of apparition. She recognizes the disguised king first by the appearance of Samuel, seemingly from his threatening aspect or tone as towards his enemy. Saul apparently saw nothing.

a This is placed by Josephus as the climax of his guilt, brought on by the intoxication of power (Ant. ri. 12, § 7).
b His companions were Abner and Amasa (Seder Nasi, Meyer, p. 492).
c When we last heard of Samuel he was mourning but listened to her description of a god-like figure of an aged man, wrapped round with the royal or sacred robe. On hearing the denunciation which the apparition conveyed, Saul fell the whole length of his gigantic stature (see xxviii. 20, margin) on the ground, and remained motionless till the woman and his servants forced him to eat. The next day the battle came on, and according to Josephus (Ant. vi. 14, § 7), perhaps according to the spirit of the sacred narrative, his courage and self-devotion returned. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (1 Sam. xxxi. 2). Saul himself with his armor-bearer was pursued by the archers and the charioteers of the enemy (1 Sam. xxxi. 5; 2 Sam. i. 6). He was wounded in the stomach (LXX., 1 Sam. xxxi. 3). His shield was cast away (2 Sam. i. 21). According to one account, he fell upon his own sword (1 Sam. xxxi. 4). According to another account (which may be reconciled with the former by supposing that it describes a later incident), an Amalekite came up at the moment of his death-wound (whether from himself or the enemy), and found him "fallen" but leaning on his spear (2 Sam. i. 6, 10). The dizziness of death was gathered over him (LXX., 2 Sam. i. 9), but he was still alive; and he was, at his own request, put out of his pain by the Amalekite, who took off his royal diadem and bracelet, and carried the news to David (2 Sam. i. 7-10). Not till then, according to Josephus (Ant. vi. 14, § 7), did the faithful armor-bearer fall on his sword and die with him (1 Sam. xxxi. 5). The body on being found by the Philistines was stripped, and decapitated. The armor was sent into the Philistine cities, as if in retribution for the spoliation of Goliathe, and finally deposited in the temple of Astarat, apparently in the neighboring Canaanitish city of Beth-schan; and over the walls of the same city was hung the naked, headless corpse, with those of his three sons (vv. 9, 10). The head was deposited (probably at Ashdod) in the temple of Bacon (1 Chr. x. 10). The corpse was removed from Beth-schan by the gratitude of the inhabitants of Jabelsh-gilead, who came over the Jordan by night, carried off the bodies, burnt them, and buried them under the temple of Jacob (1 Sam. xxxi. 13). Thence, after the lapse of several years, his ashes were conveyed, as a sign of the defeat of the devil: Origen, the latter view. Augustine wavers. (See Leo Allatius, ut supra, pp. 1062-1114.) The LXX. of 1 Sam. xxviii. 7 (by the above translation) and the A. V. (by its omission of "himself" in xxviii. 14, and insertion of "when" in xxviii. 12) lean to the former. Josephus (who pronounces a glowing eulogy on the woman, Ant. vi. 14, §§ 2, 9), and the LXX. of 1 Chr. x. 13, to the latter. At this distance of time it is impossible to determine the relative amount of fraud or of reality, though the obvious meaning of the narrative itself tends to the hypothesis of some kind of apparition. She recognizes the disguised king first by the appearance of Samuel, seemingly from his threatening aspect or tone as towards his enemy. Saul apparently saw nothing.
SAVIOUR

2857

given of the word "Saviour," and then of his work of salvation, as un Heblished and taught in the New Testament. [See also MESSIAH.]

I. The Word Saviour. — The term "Saviour," as applied to our Lord Jesus Christ, represents the Greek σαβιούρ (σαβιούρ), which in turn represents certain derivatives from the Hebrew root ḫāshā' (גְּשָׁהַ), particularly the participle of the Hiphil form ḫāshā'īn (גְּשָׁהִיָּנ); which is usually rendered "Saviour" in the A. V. (e. g. I. xlv. 15, xlii. 21). In considering the true import of "Saviour," it is essential for us to examine the original terms answering to it, including in our view the use of sāvar in the LXX., whence it was immediately derived by the writers of the New Testament, and further noticing the concrete terms "to save" and "salvation," which express respectively the action and the results of the Saviour's office.

(1.) The first point to be observed is that the term sāvar is of more frequent occurrence in the LXX., than the term "Saviour" in the A. V. or the Old Testament. It represents not only the word ḫāshā' as above mentioned, but also very frequently the nouns ḫāshā'īn (גְּשָׁהִיָּנ) and ḫāshā'īm (גְּשָׁהִים), which, though properly expressive of the abstract notion "salvation," are yet sometimes used in a concrete sense for "Saviour." We may cite as an example, I. xii. 11, "Behold, the salvation cometh, his reward is with him," where evidently "salvation" = "Saviour.

(2.) In passages where these terms are connected immediately with the person of the Godhead, as in Ps. lxxvi. 20, "the God our Saviour" (A. V. "God of our salvation"), not only in such cases as these, but in many others where the sense does not require it, the LXX. has sāvar where the A. V. has "salvation." and thus the word "Saviour" was more familiar to the ear of the reader of the Old Testament in our Lord's age than it is to us. (2.) The same observation holds good with regard to the verb sāvar, and the substantive sāvar, as used in the LXX. An examination of the passages in which they occur shows that they stand as equivalents for words conveying the notions of well-being, power, peace, and the like. We have further to notice sāvar in the sense of recovery of the bodily health of barren women (II. iii. 22) together with the etymological connection supposed to exist between the terms sāvar and sāva, to which St. Paul evidently alludes in Eph. v. 23: Phil. iii. 20, 21. (3.) If we turn to the Hebrew terms, we cannot fail to be struck with their comprehensiveness. Our verb "to save" implies, in its ordinary sense, the rescue of a person from death, actual or impending danger. This is undoubtedly included in the Hebrew root yāshā', and may be said to be its ordinary sense, as testified by the frequent accomplishment of the preposition min (מ; compare the ṣāvar and which the angel gives in explanation of the name Jesus, Matt. i. 21). But yāshā', beyond this, expresses assistance and protection of every kind: assistance in aggressive measures, protection against attack; and, in a secondary sense, the results of such assistance — victory, safety, prosperity, and happiness. We may cite as an instance of the yāshā'...
II. THE WORK OF THE SAVIOUR. — 1. The three first Evangelists, as we know, agree in showing that Jesus unfolded his message to the disciples by degrees. He wrought the miracles that were to be the credentials of the Messiah; He laid down the great principles of the Gospel morality, until He had established in the minds of the Twelve the conviction that the Christ of God was the Saviour of His people. Then the clouds of doom grew darker, and the notion of the Jesus became more intense. He turned a new page in his teaching. Drawing from his disciples the confession of their faith in Him as Christ, He then passed abruptly, so to speak, to the truth that remained to be learned in the last few months of his ministry, that his work included suffering as well as teaching (Matt. xxvii. 20, 21). He was instant in pressing this unpardonable doctrine home to his disciples, from this time to the end. Four occasions when He prophesied his bitter death are on record, and they are probably only examples out of many more (Matt. xvi. 21). We grant that in none of these places does the word «saviour» occur; and that the mode of speaking is somewhat obscure as addressed to minds unprepared, even then, to bear the full weight of a doctrine so repugnant to their hopes. But that He must (Matt. 26) go and meet death; that the powers of sin and of this world are let loose against Him for a time, so that He shall be betrayed to the Jews, betrayed by them to the torturers, and by them be stoned and scourged, crucified, and slain; and that all this shall be done to achieve a foreseen work, and accomplish all things written of Him by the prophets — these we do certainly find. They invest the Jesus of death with a peculiar significance: they set the mind inquiring what the meaning can be of this hard necessity that is laid on Him. For the answer we look to other places; but at least there is here no contradiction. If the Saviour of God is the Lord Jesus, then it does not yet say, «I bear the wrath of God against your sins in your stead: I become a curse for you.» Of the two sides of this mysterious doctrine, — that Jesus dies for us willingly, and that He dies to bear a doom laid on Him as of necessity, because some one must hear it, — it is the latter side that is made prominent. In all the passages it places Jesus to speak, not of his desire to die, but of the burden laid on Him, and the power given to others against Him.

2. Had the doctrine been explained no further, there would have been much to wait for. But the series of announcements in these passages leads up to one more definite and complete. It cannot be denied that the words of the institution of the Lord's Supper speak most distinctly of a sacrifice.

«Drink ye all of this, for this is my blood of the new covenant," or, to follow St. Luke, "the new..."
venant in my blood." We are carried back by these words to the first covenant, to the altar with twelve pillars, and the burnt offerings and peace offerings of oxen, and the blood of the victims sprinkled on the altar and on the people, and the words of Moses as he sprinkled it: "Behold the blood of the covenant which the Lord hath made with you concerning all these words." (Ex. xxvii.) 

No interpreter has ever failed to draw from these passages the true meaning: "When my sacrifice is accepted, my blood shall be the redemption of the new covenant." The word "sacrifice" is wanting, but sacrifice and nothing else is described. And the words are no mere figure used for illustration, and laid aside when they have served that turn, "Do this in remembrance of Me." They are the words in which the Church is to interpret the act of Jesus to the end of time. They are reproduced exactly by St. Paul (1 Cor. xi. 25). Then, as now, Christians met together, and by a solemn act declared that they counted the blood of Jesus as a sacrifice wherein a new covenant was sealed; and of the blood of that sacrifice they partook by faith, professing themselves thereby willing to enter the covenant and be sprinkled with the blood.

3. So far we have examined the three symbolical acts in this discourse. In the early chapters of all three the doctrine of our Lord's sacrifice is not found, because He will first answer the question about Himself. "Who is this?" before He shows them "What is his work?" But at length the announcement is made, enforced, repeated: until, when the last of the betrayer are ready for their wicked end, a command is given which secures that the death of Jesus shall be described forever as a sacrifice and nothing else, sealing a new covenant, and carrying good to many. Lest the doctrine of Atonement should seem to be an afterthought, as indeed De Wette has tried to represent it, St. John preserves the conversation with Nicodemus, which took place early in the ministry; and there, under the figure of the brazen serpent lifted up, the atoning virtue of the Lord's death is fully set forth. "As Moses lifted up the serpent in the wilderness, even so must the Son of Man be lifted up: that whosoever believeth in Him shall not perish, but have eternal life" (John iii. 14, 15). As in this intercessory act, the image of the deadly, hateful, and accursed (Gen. iii. 13, 14) reptile became by God's decree the means of health to all who looked on it earnestly, so does Jesus in the form of simbol man, of a deceiver of the people (Matt. xxvii. 63), of Antichrist (Matt. xii. 31: John xviii. 39, 40), of one accursed (Gal iii. 13), become the means of our salvation: so that whoever fastens the earnest gaze of faith on Him shall not perish, but have eternal life.

There is even a significance in the word "laid up;" the Lord used probably the word ἐπέθηκεν, which in older Hebrew meant to lift up in the widest sense, but began in the Aramaic to have the restricted meaning of "laying up," "laying aside." With Christ the lifting up was a solemn denying, a true triumph and a deliverance. But the context in which these verses occur is as important as the verses themselves. Nicodemus comes as an inquirer; he is told that a man must be born again, and then he is directed to the death of Jesus as the means of that regeneration. The earnest gaze of the wounded soul is to be the condition of its cure and that gaze is to be turned, not to Jesus on the mountain, or in the Temple, but on the Cross. This, then, is no passing allusion, but it is the substance of the Christian teaching addressed to an earnest seeker after truth.

Another passage claims a reverent attention—"If any man eat of this bread, he shall live for ever, and the bread that I will give is my flesh, which I will give for the life of the world." (John vi. 52). He is the bread; and He will give the bread!" If his presence on earth were the expected food, it was given already; but it would He speak of "drinking his blood" (ver. 53), which can only refer to the dead? It is on the cross that He will afford this food to his disciples. We grant that this whole passage has occasioned as much disputing among Christian commentators as it did among the Jews who heard it; and for the same reason, for the hardness of the saying. But there stands the saying: and no candid person can refuse to see a reference in it to the death of Him that spake these words.

In that discourse, which has well been called the Prayer of consecration offered by our High Priest, there is another passage which cannot be alleged as evidence to one who thinks that any word applied by Jesus to his disciples and Himself must bear in both cases precisely the same sense, but which is really pertinent to this inquiry: "Sanctified through the truth; thy word is truth." As He at last sent Me into the world, even so have I also sent them into the world. And for their sakes I sanctify Myself, that they also might be sanctified through the truth." (John xvii. 17-19). The word ἁγιάζω, "sanctify," "consecrate," is used in the LXX. for the offering of sacrifice (Lev. xvi. 2), and for the dedication of a man to the Divine service (Num. iii. 15). Here the present tense of "consecrate," used in a discourse in which our Lord says He is "no more in the world," is conclusive against the interpretation I dedicate my life to Thee;" for life is over. No self-delusion, except that by death, can now be spoken of as present. I dedicate Myself to Thee, in my death, that these may be a people consecrated to Thee;" such is the great thought in this sublime passage, which suits well with his other declaration, that the blood of his sacrifice sprinkles them for a new covenant with God. To the great majority of expositors from Chrysostom and Cyril, the doctrine of reconciliation through the death of Jesus is asserted in these verses.

The Rambam has already described Himself as the Good Shepherd who has taken his life for the sheep (John x. 11, 17, 18), taking care to distinguish his death from that of one who dies against his will in striving to compass some other aim—Therefore doth my Father love Me, because I lay down my life that I might take it again. No man taketh it from Me, but I lay it down of Myself. I have power to lay it down, and I have power to take it again."
Other passages that relate to his death will occur to the memory of any Bible reader. The corn of wheat that dies in the ground to bear much fruit (John xii. 24) is explained by his own words elsewhere, where He says that He came to "electorate, and to give his life a ransom for many" (Matt. xvii. 22). 

4. Thus, then, speaks Jesus of Himself. What say his witnesses of Him? "Behold the Lamb of God," says the Baptist, "which taketh away the sin of the world" (John i. 29). Commentators differ about the allusion implied in that name. But take any one of their opinions, and a sacrifice is implied. Is it the Paschal lamb that is referred to? Is it the lamb of the daily sacrifice? Either way the death of the victim is brought before us. But the allusion in all probability is to the well-known prophecy of Isaiah (liii.) to the Lamb brought to the slaughter, who bore our griefs and carried our sorrows? 

5. The Apostles after the Resurrection preach no new system, but a belief in and love of Christ, the crucified and risen Lord, through whom, if they repent, men shall obtain salvation. This was Peter's preaching on the day of Pentecost (Acts ii.); and he appealed boldly to the prophets on the ground of an expectation of a suffering Messiah (Acts iii. 18). Philip traced out for the Eunuch, in that picture of suffering holiness in the well-known chapter of Isaiah, the lineaments of Jesus of Nazareth (Acts viii. 29-30). The first sermon to a Gentile household proclaimed Christ slain and risen, and added "that through his name whosoever believeth in Him shall receive remission of sins" (Acts xi.). Paul at Antioch preaches "a Saviour Jesus" (Acts xiii. 25); "through this Man is preached unto you the forgiveness of sins, and by Him all that believe are justified from all things which ye could not be justified by the Law of Moses." (Acts xiii. 38, 39). At Thessalonica all that we learn of this Apostle's preaching is "that Christ must needs have suffered and risen again from the dead; and that this Jesus, whom I preach unto you, is Christ." (Acts xviii. 30). Before Azippa he declared that he had preached always "that Christ should suffer, and that He should be the first that should rise from the dead by Acts xxvi. 23; and it was this declaration that convinces his royal hearer that he was a crazed fanatic. The account of the first founding of the Church in the Acts of the Apostles is concise and fragmentary; and sometimes we have hardly any means of judging what place the sufferings of Jesus held in the teaching of the Apostles; but when we read that they "preached Jesus," or the like, it is only fair to infer from other passages that the Cross of Christ was never concealed, whether Jews, or Greeks, or barbarians were the listeners. And this very pertinacity shows how much weight they attached to the facts of the life of our Lord. They did not merely repeat in each new place the pure morality of Jesus as He uttered it in the Sermon on the Mount; of such lessons we have no record. They took in their hands, as the strongest weapon, the fact that a certain Jew crucified afar off in Jerusalem was the Son of God, who had died to save men from their sins; and they offered to all alike an interest, through faith, in the resurrection from the dead of this outcast of his own people. No wonder that Jews and Greeks, judging in their worldly way, thought this strain of preaching came of the devil's nest, and turned from what they thought unmeaning jargon.

6. We are able to complete from the epistles our account of the teaching of the Apostles on the doctrine of Atoneinent. "The Man Christ Jesus" is the Mediator between God and man, for in Him the human nature, in its sinless purity, is lifted up to the Divine, so that He, except from guilt, can plead for the guilty (1 Tim. ii. 5; 1 John ii. 1, 2; Heb. xii. 25). Thus He is the second Adam that shall redeem the sin of the first; the interests of men are bound up in Him, since He has power to take them all into Himself (Eph. v. 20, 30, Rom. v. 15; 1 Cor. xv. 22; Rom. v. 12, 17). This salvation was provided by the Father, to "reconcile us to Himself," (2 Cor. v. 18), to whom the name of "Saviour" thus belongs (Luke i. 47); and our redemption is a signal proof of the love of God to us (1 John iv. 10). Not less is it a proof of the love of Jesus, since He freely lays down his life for us — offers it as a precious gift, capable of purchasing all the lost (1 Tim. ii. 6; Tit. ii. 14; Eph. v. 2; Comp. Matt. xx. 28). But there is another side of the truth more painful to our natural reason. How came this exhibition of Divine love to be needed? Because wrath had already gone out against man. The clouds of God's anger gathered thick over the whole human race; they discharged themselves on Jesus only. God has made Him to be sin for us who knew no sin (2 Cor. v. 21); He is made a curse (a thing accursed) for us, that the curse that hangs over us may be removed (Gal. iii. 13); He bore our sins in his own body on the tree (1 Pet. ii. 22). There are those who would see on the page of the Bible only the sunshine of the Divine love; but the uncleasing thunders of Divine wrath against sin are heard there also; and He who alone was no child of wrath, meets the shock of the thunder-storm, becomes a curse for us, and a vessel of wrath; and the rays of love break out of that thunder-gloom, and shine on the bowed head of Him who hangs on the Cross, dead for our sins.

We have spoken, and advisedly, as if the New Testament were, as to this doctrine, one book in harmony with itself. That there are in the New Testament different types of the one true doctrine, may be admitted without peril to the doctrine. The principal types are four in number.

7. In the Epistle of James there is a remarkable absence of all explanations of the doctrine of the Atoneinent; but this admission does not amount to so much as may at first appear. True, the key-note of the epistle is that the Gospel is the Law made perfect, and that it is a practical moral system, in which man finds himself free to keep the Divine Law. But with him Christ is no mere Lawgiver appointed to impart the Jewish system. He knows that Elias is a man like himself, but of
the Person of Christ he speaks in a different spirit. He calls himself a servant of God and of the Lord Jesus Christ, who is "the Lord of Glory." He speaks of the Word of Truth, of which Jesus has been the utterer. He knows that faith in the Lord of Glory is inconsistent with time-serving and "respect of persons" (James i. 1, ii. 1, 18). "There is one Lawgiver," he says, "who is able to save and to destroy" (James iv. 12); and this rests upon Jesus whose Second Coming holds up as a motive to obedience (James v. 7-8). These and like expressions remove this epistle far out of the sphere of Ebionite teaching. The inspired writer sees the Saviour, in the Father's glory, preparing to return to judge the quick and the dead. He puts forth Christ as Prophet and King, for he makes Him Teacher and Judge of the world; but the office of the Priest he does not dwell on. Far be it from us to say that he knows it not. Something must have taken place before he could treat his hearers with confidence, as free creatures, able to resist temptations, and even to meet temptations with joy. He treats "your faith" as something founded already, not to be prepared by this epistle (James i. 2, 3, 5). His purpose is a purely practical one. There is no intention to unfold a Christology, such as that which makes the Epistle to the Romans so valuable. Assuming that Jesus has manifested Himself, and begotten anew the human race, he seeks to make them pray with undivided hearts, and be considerate to the poor, and strive with lusts, for which they are not yet altogether free, and lead their tongues, and show their fruits by their works. 

8. In the teaching of St. Peter the doctrine of the Person of our Lord is connected strictly with that of his work as Saviour and Messiah. The frequent mention of his sufferings shows the prominent place he would give them; and he puts forward as the ground of his own right to teach, that he was "a witness of the sufferings of Christ" (1 Pet. v. 1). The atoning virtue of those sufferings he dwells on with peculiar emphasis; and not less so on the purifying influence of the Atone-ment on the hearts of believers. He repeats again and again that Christ died for us (1 Pet. ii. 21, iii. 18, iv. 1); that He bore our sins in his own body on the tree (1 Pet. ii. 24). He bore them; and also the fruit of our salvation, would far transcend the limits of our paper. Man, according to this Apostle, is a transgressor of the Law. His conscience tells him that he cannot act up to that Law which, the same conscience admits, is Divine, and binding upon him. Through the old dispensations man remained in this condition. Even the Law of Moses could not justify him: it only by its strict behests held up a mirror to conscience that its fruitlessness might be seen. Christ came, sent by the mercy of our Father who had never forgotten us; given to, not deserved by us. He came to reconcile men and God by lying on the Cross for them, and bearing their punishment in their stead (2 Cor. vi. 14-21; Rom. v. 6-8). He is "a propitiation through faith in his blood" (Rom. iii. 25, 26). Compare

a See Neander, Pfarrsprech., b. vi. c. 3 (Robinson's mast. p. 498 [f]); Schmids, Theologie des N. T., part 1.; and Dorner, Christologie, p. 95
b If there were any doubt that "for us" (141 qv) means "in our stead" (see ver. 21), this 21st verse, which explains the former, would set it at rest. 

[It may be the inferential, but not direct force of 1112 (comp. Philippi i. 29). See Winer, N. T. gr., 7th ed., pp. 352, 353, (Thayer's tr., 1890, II.)]

c These two passages are decisive as to the fact of substitution: they might be fortified with many others.
Lev. xvi. 15. Ἰσραὴλ means "victim for expiation"); words which most people will find unintelligible, except in reference to the Old Testament and its sacrifices. He is the ransom, or price paid, for the redemption of man from all iniquity (Titus ii. 14). The wrath of God was against man, but it did not fall on man. God made his Son to be sin for us" (2 Cor. v. 21); though He knew no sin and Jesus suffered though men had sinned. By this act God and man were reconciled (Rom. v. 10; 2 Cor. v. 18-20; Eph. ii. 16; Col. i. 21). On the side of man, trust and love and hope take the place of fear and of an evil conscience: on the side of God, that terrible wrath of his, which is revealed from heaven against all ungodliness and unrighteousness of men, is turned away (Rom. i. 18, v. 9; 1 Thess. i. 10). The question whether we are reconciled to God only, or God is also reconciled to us, might be discussed on deep metaphysical grounds; but we purposely leave that on one side, content to show that at all events the invitation of God to punish man is averted by this "propitiation" and "reconciliation.

11. The arguments here held about the authorship of the Epistle to the Hebrews, by modern critics: put its numerous points of contact with the other epistles of St. Paul must be recognized. In both, the incompleteness of Judaism is dwelt on; redemption from sin and guilt is what religion has to do for men, and this the Law failed to secure. In both, reconciliation and forgiveness and a new moral power in the believers are the fruits of the work of Jesus. In the Epistle to the Romans, Paul shows that the Law failed to justify, and that faith in the blood of Jesus must be the ground of justification. In the Epistle to the Hebrews the same result follows from an argument rather different: all that the Jewish system aimed to do is accomplished by Christ in a far more perfect manner. The Gospel has a better Priest, more effectual sacrifices, a more profound peace. In the one epistle the Law seems set aside wholly for the system of faith; in the other the Law is exalted and glorified in its Gospel shape; but the aim is precisely the same — to show the weakness of the Law and the effectual fruit of the Gospel.

12. We are now in a position to see how far the teaching of the New Testament on the effects of the death of Jesus is continuous and consistent. Are the declarations of our Lord about Himself the same as those of James and Peter, John and Paul? and are those of the Apostles consistent with each other? The several points of this mysterious transaction may be thus roughly described:

(1.) God sent His Son into the world to reconcile lost and ruined man from sin and death, and the Son willingly took upon Him the form of a servant for this purpose; and thus the Father and the Son manifested their love for us.

(2.) God the Father laid upon his Son the weight of the sins of the whole world, so that He here in his own body the wrath which men must else have borne, because there was no other way of escape for them, and thus the Atonement was a manifestation of Divine justice.

(3.) The effect of the Atonement thus wrought is, that man is placed in a new position, freed from the dominion of sin, and able to follow holiness;

and thus the doctrine of the Atonement ought to work in all the learners a sense of love, of obedience, and of self-sacrifice.

In shorter words, the sacrifice of the death of Christ is a proof of Divine love, and of Divine justice, and is for us a document of obedience.

Of the four great writers of the New Testament, Peter, Paul, and John stand with every one of these points. Peter, the "witness of the sufferings of Christ," tells us that we are redeemed with the blood of Jesus, as of a lamb without blemish and without spot; says that Christ bare our sins in his own body on the tree. It we "have tasted that the Lord is gracious" (1 Pet. ii. 3), we must not rest satisfied with a contemplation of our redeemed state, but must live a life worthy of it. No one can well doubt, who reads the two epistles, that the love of God and Christ, and the justice of God, and the duties thereby laid on us, all have their value in them; but the love is less dwelt on than the justice, whilst the most prominent idea of all is the moral and practical working of the Cross of Christ upon the lives of men.

Again, all three points find place. That Jesus willingly laid down his life for us, and is an advocate with the Father: that He is also the propitiation, the suffering sacrifice, for our sins; and that the blood of Jesus Christ cleanseth us from all sin, for that whoever is born of God do not commit sin — all are put forward. The death of Christ is both justice and love, both a propitiation and an act of losing self-surrender; but the moral effect upon us is more prominent even than those.

In the epistles of Paul the three elements are all present. In such expressions as a ransom, a propitiation, who was "made sin for us," the wrath of God against sin, and the mode in which it was turned away, are presented to us. Yet not wrath alone. The love of Christ constraineth us, because we thus judge, that if one died for all, then were all dead: and that He died for all, that they which live should not henceforth live unto themselves, but unto Him which died for them, and rose again (2 Cor. v. 14, 15). Love in Him begat love in us, and in our reconciled state the holiness which we could not practice before becomes easy.

The reasons for not finding from St. James similar evidence, we have spoken of already.

Now in which of these points is there the semblance of contradiction between the Apostles and their Master? In none of them. In the Gospels, as in the Epistles, Jesus is held up as the sacrifice and victor, draining a cup from which his human nature shrunk, feeling in himself a sense of desolation such as we fail utterly to comprehend on a theory of human motives. Yet no one takes from Him his precious redeeming life; He lays it down of Himself, out of his great love for men. But men are to deny themselves and take up their crosses and tread in his steps: They are his friends only if they keep his commands and follow his footsteps.

We must consider it proved that these three points or moments are the doctrine of the whole New Testament. What is there about this teaching that has provoked in times past and present so much disputation? Not the hardness of the doctrine, for some of the theories put in its place are any easier, but its want of logical completeness. Sketched out for us in a few broad lines, it
SAVOUR

enupts the fancy to fill it in and lend it color; and we do not always remember that the hands that attempt this are trying to make a mystery into a theory, an infinite truth into a finite one, and to reduce the great things of God into the narrow limits of our little field of view. To whom was the ransom paid? What was Satan's share of the transaction? How can one suffer for another? How could the Redeemer be answerable when He was conscious that his work was one which could bring happiness to the whole human race? Yet this condition of indeliberateness is one which is imposed on us in the reception of every mystery: prayer, the incarnation, the immortality of the soul, are all subjects that pass far beyond our range of thought. And here we see the wisdom of God in connecting so closely our redemption with our reformation. If the object were to give us a complete theory of salvation, no doubt there would be in the Bible much to seek. The theory is gathered by fragments out of many an exhortation and warning; nowhere does it stand out entire, and without logical flaw. But if we assume that the New Testament is written for the guidance of sinful hearts, we find a wonderful aptness for that particular end. Jesus is proclaimed as the solace of our fears, as the founder of our moral life, as the restorer of our lost relation with our Father. If He had a cross, there is a cross for us; if He pleased not himself, let us deny ourselves; if He suffered for sin, let us hate sin. And the question ought not to be, What do all these mysteries mean? but, Are these thoughts really such as will serve to guide our life and to assuage our terrors in the hour of death? The answer is twofold— one from history and one from experience. The preaching of the Cross of the Lord even in this simple fashion converted the world. The same doctrine is now the ground of any definite hope that we find in ourselves, of forgiveness of sins and of everlasting life.

It would be out of place in a Dictionary of the Bible to examine the History of the Doctrine or to answer the modern objections urged against it. For these subjects the reader is referred to the author's essay on the "Death of Christ," in Aids to Faith, which also contains the substance of the present article. [See also the entry Jesus Christ, Mas- siah, Son of God, and Son of Man. in this Dictionary.]

W. T.

* SAVOUR as a verb occurs in the A. V. only in Matt. xvi. 23, and the parallel passage Mark viii. 33, in our Lord's rebuke of Peter: "Thou savour not the things that be of God, but those that be of men." The Greek, ἄρα ἄρα ἄρα ὃ ταῦτα τοῖς Θεοῖς, etc., may be well rendered, as it is by Mr. Green in his Tyndale New Test., "Thy mind is not on the things of God, but on those of men." Dr. Johnson defines the word savour here to "exhibit a taste for," and probably most English readers so understand it. But it may have been used by our translators in a more comprehensive sense, corresponding to the translation given above. Wycliffe renders Col. iii. 2 (Vulg., quae saevior teneat, seque), "senser ye the things that men above," and misses the same word in his translation of Rom. viii. 5, xiii. 15; Phil. iii. 19, etc., where the A. V. has "mind" or "think of." The term is derived, ultimately, through the French noun, savère, O. F. savore, verb a savore, from the Latin square, meaning primarily to taste or smell, then to discourse, pass as discernment or knowledge, etc.

The noun savore occurs very often in the A. V., and almost always in the sense (now becoming ob-solete) of "odor.

* SAW as a Egyptian saws, so far as has yet been discovered, were single-handed, though St. Jerome has been thought to allude to circular saws. As is the case in modern oriental saws, the teeth usually incline toward the handle, instead of away from it like ours. They have in most cases, branches, apparently attached to the handles, in kettlem shocks, but some of those in the British Museum have their blades let into them like our knives. A double-handed iron saw has been found at Ninevah; and double saws strained with a cord, such as modern carpenters use, were in use among the Romans. In saving wood the Egyptians placed the wood perpendicularly in a sort of frame, and cut it downwards. No evidence exists of the use of the saw applied to stone in Egypt, nor with any certainty to the hewn kind of saws it seems likely that this should be the case; but we read of saws stones used in the Temple. (1 K. vii. 3; 2 K. x. 18, 30; Wilkinson, Anc. Egypt. ii. 114, 115; Brit. Mus. Egypt. Room. No. 6616; Layard, Nin. and Babil. p. 195; Jerome, Comm. on Is. xxvii. 21.) The saws "under" or "in" with which David is said to have placed his captives were of iron. The expression in 2 Sam. xii. 24 does not necessarily imply torture, but the word "cut in" in 1 Chr. xx. 3 can hardly be understood otherwise. (See Isa. vi. 13; Jer., xxiv. 9, 12.)

ACEPH-, ACEPHAL-. [ANOMENIXU, DAY OF.]

SCARLET. [VHOUSE.

SCEPTRE (ןד). The Hebrew term sheb- bet, like its Greek equivalent axiopap, and our derivative sceptre, originally meant a rod or staff. It was thence specifically applied to the shepherd's crook (Lev. xxvi. 22, Mic. vii. 14), and to the wand or sceptre of a ruler. It has been inferred that the latter of these secondary senses is derived from the former (Winer, Redeb., "Sceptre"); but this appears doubtful from the circumstance that the sceptre of the Egyptian kings, whence the idea of a sceptre was probably borrowed by the early Jews, resembled not a shepherd's crook, but a staff (Tisch. Scr. ii. 33). The use of the staff as a symbol of authority was not confined to kings; it inscribed to any of their number, as indicated in Judg. x. 14, where a "man of the writer," as in the A. V., we should read "sceptre of the leader." Indeed, no instance of the sceptre being actually handled by a Jewish king occurs in the Bible: the allusions to it are all of a metaphorical character, and describe it simply as one of the insignia of royalty, as Gen. xlix. 10, Num. xxix. 20, 26, xiv. 6; Is. xiv. 5; Am. i. 5; Zech. x. 11; Hist. x. 43; Bar. vi. 14 [or Epist. of Jer. 14]. We are
consequently unable to describe the article from any Biblical notice we may infer from the term \textit{sceptre}, that it was probably made of wood: but we are not warranted in quoting Ez. xix. 11, in support of this, as done by Winer, for the term rendered \textit{rods} "may better be rendered \textit{shoots}," or \textit{sprouts} as \textit{offspring}. The sceptre of the Persian monarchs is described as "golden," i.e. probably of massive gold (Esth. iv. 11; Xen. \\textit{Cyrop.} viii. 7. § 13); the implication of it towards a subject by the monarch was a sign of favor, and kissing it an act of homage (Esth. iv. 11, v. 2). A carved ivory staff discovered at Nimrud is supposed to have been a sceptre (Layard, \textit{Ninev. and Bab.} p. 165). The sceptre of the Egyptian queens is represented in Wilkinson's \textit{Anc. Egyl.} i. 276. The term \textit{sceptre} is rendered in the A. V. "rod" in two passages where \textit{sceptre} should be substituted, namely, in Ps. ii. 9, where "sceptre of iron" is an expression for strong authority, and in Ps. xxv. 3.

W. L. B.

\textbf{SCEVA (Sceva; Scev.)}. A Jew residing at Ephesus at the time of St. Paul's second visit to that town (Acts xix. 14-16). He is described as a "high priest" (\textit{ἀρχιερεύς}), either as having exercised the office at Jerusalem, or as being chief of one of the twenty-four classes. His sons were attempted to exercise spirits by using the name of Jesus, and on one occasion severe injury was inflicted by the demoniac on two of them (as implied in the term \textit{ἀρρητορράρας}, the true reading in ver. 16 instead of \textit{αὐτων}).

W. L. B.

\* \textbf{SCHOOL. Acts xix. 9. [\textit{Tyranxus}].} \* \textbf{SCHOOLS OF THE PROPHETS. [\textit{Samuel. 3 (b); Prophet. II.}].}

\textbf{SCIENCE (Σ\textit{ης}; \textit{γνώσεις}: \textit{scien.}). In the A. V. this word occurs only in Dan. i. 4, and 1 Tim. vi. 20. Elsewhere the rendering for the Hebrew or Greek words and their cognates is "knowledge," while the Vulg. has unmanageably \textit{scien.}. Its use in Dan. i. 4 is probably to be explained by the number of synonymous words in the verse, forcing the translators to look out for derivations in similar senses in English. What it should have been chosen for the Vulg. 20, 21, is not obvious. Its effect is injurious, as leading the reader to suppose that St. Paul is speaking of something else than the "knowledge" of which both the Judaising and the mystic sects of the apostolic age continually boasted, against which he so earnestly warns men (1 Cor. vii. 17, the counterpart of the true knowledge which he prizes so highly (1 Cor. xii. 8, xiii. 2; Phil. i. 9; Col. iii. 17). A natural perversion of the meaning of the text has followed from this translation. Men have seen in it a warning, not against a spurious theosophy—of which Swedenborgianism is, perhaps, the nearest modern analogue—but against that which did not come within St. Paul's horizon, and which, if it had any sway before he would have welcomed the study of the works of God, the recognition of his Will working by laws in nature. It has been hurled successively at the heady astronomers and geologists, whenever men have been asked at what they have deemed the antagonism of physical "science" to religion. It would be interesting to ascertain whether this were at all the \textit{gnωστικά} of the translators of the A. V. — whether they were beginning to look with alarm at the union of skepticism and science, of which the common proverb, \textit{the more you know the less you know}, is an instance, we must content ourselves with noting a few facts in the Biblical history of the English word.

(1.) In Wickliffe's translation, it appears less frequently than might have been expected in a version based upon the Vulgate. For the "knowledge of salvation" of the A. V. in Luke i. 77, we have the "science of health." In Christ are laid "the treasures of wisdom and of science" (Col. i. 3). In 1 Tim. vi. 20, however, Wickliffe has "

(2.) Timah, rejecting "science" as a rendering elsewhere, introduces it here; and is followed by Cranmer's and the Geneva Bibles, and by the A. V.

(3.) The Rhenish translators, in this instance following less closely than the Vulg. than the Protestant versions, give "knowledge."

It would obviously be out of place to enter here into the wide question what were the \textit{gnωστικά της Ἰησοῦ Χριστοῦ τῆς γνώσης} of which St. Paul speaks. A discussion on the Gnosticism of the Apostolic age would require a volume. What is necessary for a Dictionary will be found under \textit{Timothy; Epistles to}. E. H. P.

\textbf{SCORPION (Σ\textit{κρόπιον; untr. : \textit{scorpios}: \textit{scorpius}). The well-known animal of that name, belonging to the class \textit{Arachnida} and order \textit{Pal-}

\textit{acarina}, which is twice mentioned in the O. T. and four times in the N. T. The wilderness of Sinai is especially alluded to as being inhabited by scorpions at the time of the Exodus (Dent. viii. 15), and in this day these animals are common in the same district, as well as in some parts of Palestine. Ehrenberg (\textit{Symb. Phys.}) enumerates five species as occurring near Mt. Sinai, some of which are found on the shores of the Dead Sea. It is to be in no fear of the rebellions Israelites, here compared to scorpions. The Apostles were indured with power to resist the stings of scorpions and scorpions (Luke x. 19). In the vision of St. John (Rev. ii. 10) the beasts that came out of the smoke of the bottomless pit are said to have had "tails like unto scorpions," while the pain resulting from this creature's sting is alluded to in verse 5. A scorpion for an egg (Luke xi. 12) was probably a proverbial expression. According to Erasmus the Greeks had a similar proverb (\textit{ἀργαρίας ἀργαρίας}). Scorpions are generally found in dry and in dark places, under stones and in ruins, chiefly in warm climates. They are carnivorous in their habits, and move along in a threatening attitude with the tail elevated. The sting, which is

\* The following quotation from Timah is decisive as to the sense in which he used the word. It shows that he contemplated no form of science (in the modern sense of the term), mathematical or physical, but the very opposite of this,—the attempt to bring all spiritual or divine truths under the formula of the logical understanding. He speaks of the disputes of the Roman theologians as the "central time of which Paul warned Timothy, calling them the oppositions of a false named science, for that their \textit{philosophia divinae} must make objections against any truth, be it never so plain, with \textit{pro et contra}" (\textit{Supper of the Lord} ii. 24, Parker Soc. Edition). Timah's use and application of the word 'science' must be remarked, for the choice of a different word by the Rhenish translators. Those of the A. V. may have used it with a different meaning.
SCOURGING. The punishment of scourging was prescribed by the Law in the case of a between-husband and wife, and perhaps in the case of both the guilty persons (Lev. xix. 20). Women were subject to scourging in Egypt, as they still are by the law of the Koran, for incontinence (Sale, Koran, chap. xiv, and chap. iv. note; Lane, Med. Egyp. i. 147). Wilkinson, Anc. Egyp. abridgm. ii 211). The instrument of punishment in ancient Egypt, as it is also in modern times generally in the East, was usually a stick, applied to the soles of the feet — marti-nado (Wilkinson, Lect. i. c.; chardin, vii. 114, Lane, Med. Egyp. i. 146). A more severe scourge is possibly implied in the term — scorpion:—whips armed with pointed tails of leath the "horrible discipline" of Horace, though it is more probably merely a matter of form. Under the Roman method the culprit was stripped, stretched with cords or thongs on a frame "victoriaca," and beaten with rods. After the Ptolemaic law (c. 300), Roman citizens were exempted from scourging, but slaves and foreigners were liable to be beaten, even to death (Gesen. Thes. p. 1062; Isid. Orig. v. 27, ap. Schol. Lect. Scotp; Hor. i. 11. iii. 139; prov. xxi. 22, and Grotius, ad l. x. xii. 24; vii. 11. xii. 11; Cic. Ter. iii. 28; see Rob. 3; Liv. x. 1; Sull. cit. 51) [Punishments. iii. c. 4.] W. H. P.

SCOBES (σκοβες; σκηναρης; sercien). The prominent position occupied by the Scribes in the Gospels would have to itself make a know ledge of their life and teaching essential to any clear conception of our Lord's work. It was by their influence that the later form of Judaism had been determined. Such as it was when the "new doctrine" was first proclaimed, it had become through them. Far more than priests or Levites they represented the religious life of the people. On the one hand we must know what they were in order to understand the innumerable points of contrast presented by our Lord's acts and words. On the other, we must not forget that there were also, inevitably, points of resemblance. Opposed as his teaching was, in its deepest principles, to theirs, He was yet, in the eyes of men, as one of their order, a Scribe among Scribes, a Rabbi among Rabhids (John i. 47, iii. 2; vi. 23, 40; Schoettgen, Hor. Heb. ii. Christus Redemptor Sacerdos). I. NAME. — (1). Three meanings are connected with the verb σηπήρω (σηπήρω) the root of Sopherin — (1) to write, (2) to set in order, (3) to count. The explanation of the word has been referred to each of these. The Sopherin were so called because they wrote out the Law, or because they classified and arranged its precepts, or because they counted with scrupulous minuteness every clause and letter it contained. The traditions of the Scribes, glowering in their own achievements, were in favor of the last of these etymologies (Schleicher, 35; Carpozy, App. Crit. ii. 135). The second fits in best with the military functions connected with the word in the earlier stages of its history (ibid.). The authority of most Hebrew scholars is with the first (Genetics, s. v.). The Greek equivalent answers to the derived rather than the original meaning of the word. The σκηναρης of a Greek

SCOURING. The "scorpions" of I K. xii. 11, 14, 2 (Ch. x. 11, 14, have no clear allusion whatever to the animal, but to some instrument of scourging — unless, indeed, the expression is a mere figure. Celsus (Hierob. ii. 45) thinks the "scorpi" was the spiny stem of what the Arabs call Hsek (حري) the Solana melongena, var. esculenta, egg plant, because, according to Abdul Faddi, this plant, from the resemblance of its spines to the sting of a scorpion, was sometimes called a "scorpion thorn;" but in all probability this instrument of punishment was in the form of a whip armed with iron points. *Vigia — si ni bobs vel adleion, scorpion rectissimo nomine vocatur, qui acerato vulnere in corpus infigitur." (Isidoro, Orig. Lat. 5, 27; and see Jahn, Bibl. Text. p. 257.) In the Greek of 1 Mace. vi. 51, some kind of wrist-gauge is mentioned under the name scopomai: but we want information both as to its form and the reason of its name. (See Dict. of Antiquities, art. Hoermann.)"

W. H.

SCOURING. The punishment of scourging was prescribed by the Law in the case of a between-husband and wife, and perhaps in the case of both the guilty persons (Lev. xix. 20). Women were subject to scourging in Egypt, as they still are by the law of the Koran, for incontinence (Sale, Koran, chap. xiv, and chap. iv. note; Lane, Med. Egyp. i. 147; Wilkinson, Anc. Egyp. abridgm. ii 211). The instrument of punishment in ancient Egypt, as it is also in modern times generally in the East, was usually a stick, applied to the soles of the feet — marti-nado (Wilkinson, Lect. i. c.; chardin, vii. 114, Lane, Med. Egyp. i. 146). a Modern naturalists restrict the genus Scorpis to those kinds which have six eyes, Bothus to those which have eight, and Androcous to those which have twelve.

b To scourge, ἑλπίζω; the scourge, ἐλπίδα; also: Agrellensus; also in A. V. "whip."
The Scribes of Jerusalem, in like manner, the custodians and interpreters of the γραμματεύς upon which the fidelity of the nation rested. Other words applied to the same class are found in the N.T. Νομικοί appears in Matt. xxii. 39, Luke vii. 30, x. 25, xiii. 3; ὁμολογο-

δέγγον in Luke v. 17; Acts v. 34. Attempts have been made, but not very successfully, to reduce the several terms to a classification. All that can be said is that γραμματεύς appears the most generic term; that in Luke vii. 43 it is contrasted with μνημονεύς; that ὁμολογοδέγγον, as in Acts v. 34, seems the highest of the three. Josephus (Jos. xii. 2, § 2) paraphrases the technical word by ἐγγραφαῖος νομαί.

(2.) The name of ἱερικὸς Σηπερ (παῖς γραμματεύς, x. x. x., Joh. xv. 13; Judg. i. 12), may possibly connect itself with some early use of the title. In the Song of Deborah (Judg. v. 14), the word appears to point to military functions of some kind.

The "pen of the writer" of the LXX. (I.XX. εἴδες ἄγγελους γραμματεύς) is probably the red or sceptre of the commander numbering or marshalling his troops. The title appears with more distinctness in the early history of the monarchy. Three men are mentioned as successfully filling the office of Scribe, viz., David and Solomon (2 Sam. viii. 17, xx. 25); 1 K. iv. 3; in this instance (two simultaneous). Their functions are not specified, but the high place assigned to them, side by side with the high-priest and the captain of the host, implies power and honor. We may think of them as the king's secretaries, writing his letters, drawing up his decrees, managing his finances (comp. the work of the Scribe under Deanh, 2 K. xii. 10). At a later period the word again connects itself with the act of numbering the military forces of the country (Jer. ii. 25, and probably Is. xxxiii. 18). Other associations, however, began to gather round it about the same period. The zeal of Hezekiah led him to foster the growth of a body of men whose work it was to transcribe old records, or to put in writing what had been handed down orally (2 Kings xxv. 26). To this period, accordingly, belongs the new significance of the title. It no longer designates only an officer of the king's court, but a class, students and interpreters of the Law bestowing on their wisdom (Jer. viii. 8).

(3.) The seventy years of the Captivity gave a fresh glory to the name. The exiles would be anxious above all things to preserve the sacred books, the laws, the hymns, the prophecies of the past. To know what was worth preserving, to transcribe the older Hebrew documents accurately, when the spoken language of the people was passing into Aramaic, to explain what was hard and obscure — this was what the necessities of the time demanded. The man who met them became em

braced the name of the Scribe, the priestly functions of King David, the background, as the priestly order itself did before the Scribes as a class. The words of Ez. vii. 10 describe the high ideal of the new office. The Scribe is to seek (טו) the law of the Lord and to do it, and to teach in Israel statutes and judgments. This, far more than his priesthood, was the true glory of Ezra. In the eyes even of the Persian king he was "a Scribe of the Law of the God of Heaven" (vii. 12). He was assisted in his work by others, chiefly Levites. Publicly they read and expounded the Law, perhaps also translated it from the already obsolete Hebrew into the Aramaic of the people (Neh. viii. 8-13).

(4.) Of the time that followed we have but scanty records. The Scribes' office apparently became more and more prominent. Traces are found in the later canonical books of their work and influence. Already they are recognized as "masters of assembly" or their title, as in the "sacred writings," was "a\"; having, that is, something of a corporate life (Ezch. xii. 11; Jos. Jol. xii. 42). As such they set their faces sternly to maintain the authority of the Law and the Prophets, to exclude from all equality with them the "many books" of which "there is no end" (Ezch. xii. 12). They appear as a distinct class, "the families of the Scribes," with a local habitation (1 Chr. ii. 55). They compile, as in the two books of Chronicles, excerpts and epitomes of larger histories (1 Chr. xix. 2); 2 Chr. ix. 22. The occurrence of the word בֵּית רֹוק ("the story -[or] margin, "the commentary," of the Prophet Psl. 90") afterwards so memorable, in 2 Chr. xii. 22, shows that the work of commenting and expounding had been already.

h. Development of Doctrine. — (1.) It is characteristic of the Scribes of this period that, with the exception of Ezra and Zechariah (Neh. xiii. 13), we have no record of their names. A later age honored them collectively as the men of the Great Synagogue, the true successors of the Prophets (1 Macc. 9. 1), but the men themselves by whose agency the Scriptures of the O.T., were written, are left of the "scribes," compiled in this form, limited to their present number, remain unknown to us. Never, perhaps, was so important a work done so silently. It has been well argued (Jos. Jol. xii. 42) that this was its set purpose. The one aim of those early Scribes was to promote reverence for the Law, to make it the groundwork of the people's life. They would write nothing of their own, lest less worthy words should be raised to a level with those of the oracles of God. If interpretation were needed, their teaching should be oral only. No precepts should be perpetuated as resting on their authority.

a Lightfoot's arrangement, though conjectural, is worth giving (Horae § 77). The "scribes" (the same, were those who occupied themselves with the Mishna. Next above them were the "lawyers," students of the Mishna, acting as assessors, though not voting in the Sanhedrin. The "doctors of the Law" were expounders of the Gemara, and "trumpeters" of the teachers. Comp. Carpov, App. Crit. i. 7; Lenard, Loc. Hist. de. 23; Leyer, in Herzog's Encyclop. Schriftgelehrte.*

b Ewald, however (Por. Bäch. i. 126 [182, 2: Aid.]), writes Raw as equivalent to יָאָכֵל, "a judge."
words of later Judaism, they devoted themselves to the Mekor (i.e., recitation, reading, as in Neh. viii. 8), the careful study of the text, and hid down rules for transcribing it with the most scrupulous precision (comp. the tract Sepherin in the Jerusalem Gemara).

(2.) A saying is ascribed to Simon the Just (b. 183, 1), the last of the succession of the men of the Great Synagogue, who laid down the principle on which they had acted, and enables us to trace the next stage of the growth of their system. "Our fathers have taught us," he said, "three things, to be cautious in judging, to train many scholars, and to set a fence about the Law." (Pirke Abot, i. 1; Just. i. 95). They wished to make the Law of Moses the rule of life for the whole nation and for individual men. But it lies in the nature of every such law, of every informal, half-systematic code, that it raises questions which it does not solve. Circumstances change, while the Law remains the same. The infinite variety of life presents cases which it has not contemplated. A Roman or Greek jurist would have dealt with these on the basis of principles of equity or policy. The Jewish teacher could recognize no provision beyond the precepts of the Law. To him they all stood on the same footing, for all were equally divine. All possible cases may be brought within their range, decided by their authority.

(3.) The result showed that, in this as in other matters, the legality of the letter was destructive of the very reverence in which it had originated. Step by step the Scribes were led to establish rules at which we may believe the earlier representatives of the order would have started back with horror. Decisions on fresh questions were accumulated into a complex system of casuistry. The new precepts, still transmitted orally, more precisely fitting in to the circumstances of men's lives than the old, came practically to take their place. The "Words of the Scribes" (אלהים בנים), now used as a technical phrase for these decisions, were honored above the Law (Lightfoot, Heren. i. § 77;Just. Judila., i. 934). It was a greater crime to offend against them than against the Law. They were as new while the precepts of the Law were as water. The first step was taken towards nullifying the commandments of God for the sake of their own traditions. The custom became at once subtle and prurienc, evading the plainest duties, tampering with the sacred (Matt. xiv. 1-36; xviii. 16-20). The right relation of moral and ceremonial laws was not only forgotten, but absolutely inverted. This was the result of the profound reverence for the letter which gave no heed to the "word adding in them" (John v. 38).

(4.) The history of the full development of these tendencies belongs to a history of the Talmud. Here it will be enough to notice in what way the teaching of the Scribes in our Lord's time was making to that result. Their first work was to report the decisions of previous Rabbis. Those were the Halakah (that which gives the central precepts of the schools)—precepts binding on the conscience. As they accumulated they had to be classified and compiled. A new code, a second Corpus Juris, the Mishna (Mesorot), grew out of them, to become in its turn the subject of fresh questions and commentaries. Here ultimately the spirit of the commentators took a whole range. The aneideses of the schools or courts of Rabban, the dilater diviti of Rabbis; the wildest fables of Jewish superstition (Tit. i. 14), were brought in, with all without any relation to the context, and the sic avore (completeness) filled up the measure of the Institutes of Rabbinitic Law. The Mishna and the Gemara together were known as the Talmud (institution), the necessary doctrine and condition, of every learned Jew (Just. Judila., iii. 202-222).

(5.) Side by side with this was a development in another direction. The sacred books were not studied as a code of laws only. To such into their meaning had from the first belonged to the total office of the scriber. He who so searched was known by name of the Scribes themselves, of everlasting life (John v. 39; Pirke Abot, ii. 8). But here also the book suggested thoughts which could not logically be deduced from it. Men came to it with new beliefs, new in form if not in essence, and, not finding any ground for them in a literal interpretation, were compelled to have recourse to an interpretation which was the reverse of literal. The fruit of this effort to find what was not there appears in the Midrashim (searchings, investigations) on the several books of the O. T. The process by which the meaning, moral or mystical, was elicited, was known as Hagadah (saying, opinion). There was obviously no assignable limit to such a process. It became a proverb that no one ought to spend a day in the Beth-ham-Midrash (the house of the interpreter) without lighting on something new. But there lay a stage higher even than the Hagadah. The mystical school of interpretation cultivated in the Kabbala (reception, the received doctrine). Every letter, every number, became pregnant with mysteries. With the strongest possible distortion of its original meaning, the Greek word which had been the representation of all which had been chosen for the wildest of all interpretations. The gematria (גמרא), showing to what depths the wrong path could lead men. The mind of the interpreter, obstinately shutting out the light of day, moved in its self chosen darkness amid a world of fantastic Ebodis (comp. Carpop. App., Crit. i. 7; Schottgen, Her., ii. de Mens, l. 4; Zunz, Gotthische Welthistorie, pp. 42-51; Just. Judila., iii. 63-81; Ginsburg, The Kabbalah: its Doctrines, Development, and Literature, Lond. 1865; also his arts Kabbalah and Midrash in Kitt. Cyclop. of bibl. Lit., 3d ed.).
III. History.-- (1.) The names of the earlier Scribes passed away, as has been said, unrecorded. Simon the Just (cir. b. c. 300-240) appeared as the last of the men of the Great Synagogue, the beginning of a new period. The memorable names of the times that followed—Antigonus of Socho, Zadok, Bechos—connect themselves with the rise of the first opposition to the traditional system which was growing up. [Scribes.]

The tenet of the Sadducees, however, never commanded the adhesion of more than a small minority. It tended, by maintaining the sufficiency of the letter of the Law, to destroy the very occupation of a Scribe, and the class, as such, belonged to the party of its opponents. The words "Scribes" and "Pharisees" were bound together by the closest possible alliance (Matt. xxiii. 35.; Luke v. 30). [Pharisees.]

Within that party there were shades and subdivisions, and to understand their relation to each other in our Lord's time, or their connection with his life and teaching, we must look back to what is known of the five pairs (פִּתְנִיתִי) of teachers who represented the scribal succession. Why two, and two only, are named in each case we can only explain by the tradition so far preserved that one was always the Nazi or President of the Sanhedrim as a council, the other the Ab-beth-din (Father of the House of Judging), presiding in the supreme court, or in the Sanhedrim when it sat as such, is not improbable (Jost, Judenth. i. 169).

(2.) The two names that stand first in order are 

Josiah ben-Boseer, a priest, and Josiah ben-Buchanan (cir. a. D. 140-150). The presence of such men was always a check on the Scribes. They indicated a tendency to a greater elaboration of all rules connected with ceremonial defilement. Their desire to separate themselves and their disciples from all occasions of defilement may have furnished the starting-point for the name of Pharisee. The brave struggle with the Syrian kings had turned chiefly on questions of this nature, and it was the wish of the two teachers to prepare the people for any future conflict by founding a trinity (the Chabberim, or associates) bound to the strictest observance of the Law. Every member of the order on his admission pledged himself to this in the presence of three Chabberim. They looked on each other as brothers. The rest of the nation they looked on as "the people of the earth." The spirit of Scribalism was now flowing under other names.

The precept associated with the name of Josiah ben-Boseer, "Let thy house be the assembly-place for the wise; dust thyself with the dust of their feet; drink eagerly of their words," pointed to a further growth (Pirk Abod. i. 1; Jost, i. 233). It was hardly checked by the taunt of the Sadducees that these Pharisees would purify the sun itself" (Jost, i. 137). (4.)

Josiah ben-Perschiah and Nithai of Arabela were contemporary with John Hyrcanus (cir. b. c. 135-108), and enjoyed his favor till towards the close of his reign, when caprice or interest led him to pass over to the camp of the Sadducees. The saying ascribed to Josiah, "Take to thyself a teacher (Rab), get to thyself an associate (Talib), judge every man on his better side" (Pirk Abod. i. 1), while its last clause attracts us by its

candor, shows how easily even a fair-minded man might come to recognize no bonds of fellowship outside the limits of his sect or order (Jost, i. 227-230).

(4.) The secession of Hyrcanus involved the Pharisees, and therefore the Scribes as a class, in difficulties, and a period of confusion followed. The meetings of the Sanhedrim were suspended or became predominately Sadducean. Under his successor, Alexander Janmai, the influence of Simon ben-Shetach over the queen-mother Salome re-established for a time the ascendancy of the Scribes. The Sanhedrim once again assembled, with none to oppose the dominant Pharisaic party. The day of meeting was observed afterwards as a festival only as solemn as those of Purim and the Dedication. The return of Alexander from his campaign against Gaza again turned the tables. Eight hundred Pharisees took refuge in a fortress, were besieged, taken, and put to death. Joshua ben-Perschiah, "the venerable head of the order, was driven into exile. Simon ben-Shetach, his successor, had to earn his livelihood by spinning flax. The Sadducees failed, however, to win the confidence of the people. Having no body of oral tradition, they fell back on old laws and began to compile a code. They were accused by their opponents of wishing to set up new laws on a level with those of Moses, and had to abandon the attempt.

On the death of Janmai the influence of his widow Alexandra was altogether on the side of the Scribes, and Simon ben-Shetach and Judah ben-Talbat entered on their work as joint teachers. Under them the juridical side of the Scribe's function became prominent. Their rules turn chiefly on the laws of evidence (Pirk Abot. i. 1). In two memorable instances they showed what sacrifices they were prepared to make in support of these laws. Judah had, on one occasion, condemned false witnesses to death. His zeal against the guilt led him to neglect the rule which only permitted them to judge of a case in which there would be the consequence of the original accusation. His colleague did not shrink from rebuking him, "Thou hast shed innocent blood." From that day Judah resolved never to give judgment without consulting Simon, and every day threw himself on the grave of the man he had condemned, imploring pardon. Simon, in his turn, showed a like sense of the supreme authority of the Law. His own son was brought before him as an offender, and he sentenced him to death. On the way to execution the witnesses confessed that they had spoken falsely; but the son, more anxious that they should suffer than that he himself should escape, turned round and entreated his father not to stop the completion of the sentence. The characteristic of such men was not to impose itself upon his followers. To its influence may probably be traced the indomitable courage in defense of the Temple, which won the admiration even of the Roman generals (Jost, i. 234-247).

(5.) The two that followed, Shemaiah and Ab-tilion (the names also appear under the form of Scri-er, Joseph. Ant. xiv. 9, § 4, and Polyb. Polyb. xiv. 10, § 1), were conspicuous for another reason. Now, for the first time, the teach-
The amount is uncertain. The story of Hillel (4790) represents it as half a stor, but it is doubtful whether the stator here is equal to twice the dinarum or to half (comp Geiger, De Hiilel et Shamrait, in Uegiui, Thes. xxi. i). It was, at any rate, half the day's wages of a skilled laborer.

b * We have not the means of fixing with any precision the date of Hillel's birth. The question is fully discussed by Ewald in his Gesch. d. Volker Israels, 3d Ausg. (1867), v. 12-25. Assuming that Hillel is the same person with the Polio of Josephus (so Josippon, v. 4, et al. cited by Ewald) he is deemed to consider him as flourishing from about 60 n. c. to 10 B. c. Dechanbou (Histoire de l'Or et de la Gagne, de la Polio, i 143 f., 493 a.) thinks that the Same as and Polio of Josephus represents, through a confusion on the part of this writer, sometimes Shemahia and Abtalhah, and sometimes Shammiti and Hillel. This is quoted in Kitzo's Cyclopedia of Bible Lit., 3d ed., says, without giving any authority, that he was born about 75 n. c. On Hillel, whose merits, really great, have been strangely exaggerated by some recent Jewish writers, c. Dr Geiger (not the Geiger so often referred to in this article), one may say, in addition to the works already referred to in the body of the article, or just mentioned, Ewald's Jahrb. d. Bibl. wissenschaf., x. 50-53 (substantially reproduced in his Geschichten, as above), and the interesting little pamphlet of Delitzsch, Jesus und Hillel, mit Rucksicht auf Reimann und Geiger verglichen, 2d Ault., Erlangen, 1857.

a The reverence of later Jews for Hillel is shown in some curious forms. To him it was given to understand the speech of animals as well as of men. He who heard not to the words of Hillel was worthy of death. (Geiger, ut supra.) Of him too it was said that the Divine Shechinah rested on him: if the heavens were perchance and all the trees of the earth pens, and all the sea, it would not be enough to proclaim it, and his wisdom was charged from the heavens (John v. 25). See Hengstenberg, De Academica Herderum, 2d Ault., Uegiui, Thes. xxi.) c We may perhaps find in this fact an explanation which gives a special force to words that have hitherto been interpreted somewhat vaguely. When our Lord...
thing but a slavish follower of those traditions. He was the first to lay down principles for an equitable construction of the Law with a diacritical precision which seems almost to imply a Greek culture (Jost, i. 257).

When the letter of a law, as e.g. that of the year of release, was no longer suited to the times, and was working, so far as it was kept at all, only for the suggested an interpretation which met the difficulty or practically set it aside. His teaching as to divorce was in like manner an adaptation to the temper of the age. It was lawful for a man to put away his wife for any cause of disfavor, even for so slight an offense as that of spoiling his dinner by her bad cooking \( \text{a} \) (Geiger, L. c.). The human character of the man comes out in some of his sayings, which remind us of the tone of Jesus the son of Sirach, and present some fruitful approximations to a higher teaching; "Trust not thyself to the day of thy death,""Judge not thy neighbor till thou art in his place,""Leave nothing dark and obscure, saying to thyself, I will explain it when I have time; for how can there be time to explain anything which tendeth to light" (comp. James iv. 13-15).""He who gains a good name gains it for himself, but he who gains a knowledge of the Law gains everlasting life" (comp. John vi. 53: "Parke Abott, 5-58"). In one memorable rule we find the nearest approach that had as yet been made to the great commandment of the Gospel: "Do nothing to the neighbor that thou wouldst not that he should do to thee." (iv. 8.) The contrast shows itself in the conduct of the followers not less than in the teachers. The disciples of Shammai were conspicuous for their sternness, appealed to popular passions, used the sword to decide their controversies. Out of that school grew the party of the Zealots, fierce, fanatical, exclusive, the Orangemen of Pharisaism (Jost, i. 257-258). Those of Hillel were, like their master (comp. e. g. the advice of Gamaliel, Acts xiii. 34-42), cautious, gentle, tolerant, unwilling to make enemies, content to let things take their course. One school resisted, the other was disposed to foster the study of Greek literature. One sought to impose upon the prose style from heathenism the full burden of the Law, the other that he should be treated with some sympathy and indulgence.

contrasted the strictness and austerity of the Pharisees with the lives of those who wore soft clothing, were generally approved, and lived delicately in kings' houses (Matt. xvi. 3: Luke vii. 24), those who heard him may at once have recognized the picture. In the multitude of uncertain guesses as to the Hebrews of the Gospels (Matt. xiii. 10) we may be permitted to hazard the conjecture that they may be identified with the party, perhaps rather with the clique, of Menahem and his followers (Geiger, at supra. On this, H. H. Rowen, "Micah and His Companions," Westminster, 1887). The fact that the stern, sharp words of a divine scourge which have been quoted above, meet as first after the first combination of Heraclius and Umayyads, gives it a strong confirmation (comp. Mark iii. 6; Luke vi. 11, vii. 19). It is fair to add that a great Rabbinic scholar maintains that this "spoil the dinner" was a well-known figurative phrase for conduct which smart shame or discredit on the husband (Jost, i. 258).

\( \text{a} \) It is fair to add that a great Rabbinic scholar maintains that this "spoil the dinner" was a well-known figurative phrase for conduct which smart shame or discredit on the husband (Jost, i. 258).

\( \text{b} \) The history connected with this saying is too charmingly characteristic to be pressed over. A prologue came to Shammai and begged for some instruction in the law; if it were only for as long as he, the learner, could stand on one foot. The Scribe was un-
Scribes

Proselytes. \(\text{[Proselytes.]}\) One subject of debate between the schools exhibits the contrast as going deeper than these questions, touching upon the great points of the union (Jos. \(13: 34, \text{&c.}\)). Was the state of man so full of misery that it would have been better for him never to have been? Or was this life, with all its suffering, still the gift of God, to be valued and used as a training for something higher than itself? The school of Shammay took, as might be expected, the former, that of Hillel the brighter and his school the latter (Jos. \(24: 44, \text{&c.}\)).

(9.) Outwardly the teaching of our Lord must have appeared to men different in many ways from both. While they repeated the traditions of the elders, He "spake as one having authority," "not as the Scribes" (Matt. vii. 29; comp. the constantly recurring "I say unto you"). While they confined their teaching to the class of scholars, He "had compassion on the multitudes" (Matt. ix. 36).

While they were to be found only in the council or in their schools, He journeyed through the cities and villages (Matt. iv. 23, xx. 35, &c., &c.). While they spoke of the kingdom of God vaguely, as a thing far off, He proclaimed that it already came nigh to men (Matt. iv. 17). But in most of the points at issue between the two parties, He maintained the position of the school of Shammay, in sympathy with that of Hillel.

In the questions that gathered round the law of the Sabbath (Matt. xii. 1-11, and John v. 1-16, &c.), and the lines of purity (Matt. xv. 1-11, and its parallels), this was obviously the case. Even in the controversy about divorce, while his chief work was to assert the Sabbath on which the dispensation on both sides were losing sight of, He recognized it must be remembered, the rule of Hillel as being a true interpretation of the Law (Matt. xix. 8).

When He summed up the great commandment in which the Law and the Prophets were fulfilled, He reproduced and emended the precept which had been given by that teacher to his disciples (Matt. xxi. 12, xxii. 34-40). So far, on the other hand, as the temper of the Hillel school was one of more adaptation to the feeling of the people, cleaving to tradition, wanting in the instruction of life, the teaching of Christ must have been felt as unspiringly condemning it.

(10.) It adds to the interest of this inquiry to remember that Hillel himself lived, according to the tradition of the Rabbis, to the grand age of 129, and may therefore have been present among the doctors of Luke ii. 46, and that Gamaliel, his grandson and successor, was at the head of this school during the whole of the ministry of Christ, as well as in the early portion of the history of the Acts. We are thus able to explain the fact, which so many passages in the Gospels lead us to infer, the existence all along of a party among the Scribes themselves, more or less disposed to recognize Jesus of Nazareth as a teacher (John iii. 1: Mark x. 17), not far from the kingdom of God (Mark xii. 34), advocates of a policy of toleration (John vii. 51), but, on the other hand, timid and time-serving, unable to confer even their self-benefit (John xii. 42), afraid to take the stand against the strong current of sentiment which brought together the Sudanese section of the priesthood and the ultra-Pharisaic followers of Shammay. When the last great crisis came, they apparently contended themselves with a policy of absence (Luke xxviii. 30, 31), possibly were not even summoned, and thus the Council which condemned our Lord was a proceed meeting of those interested parties, not a formally constituted Sanhedrin. All its proceedings, the hasty investigation, the immediate sentence, were vitiated by irregularity (Just. i. 407-408). Afterwards, when the fear of violence was once over, and popular feeling had turned, we find Gamaliel summoned courage to maintain openly the policy of a toleration expectation (Acts v. 34).

IV. Education and Life. -(1.) The special training for a Scribe's office began, probably, about the age of thirteen. According to the Pirke Abot (v. 24) the child began to read the Mikra at five and the Mishnah at ten. Three years later every Jew became a law of the Law (Bir-Mishach), and was bound to study and obey it. The great mass of men rested in the scanty teaching of their synagogues in knowing and repeating their Hādīth. The laws inserted on their phylacteries, or filters, was dictated by his parents, or who devoted himself, to the calling of a Scribe, something more was required. He made his way to Jerusalem, and applied for admission to the school of some famous Rabbi. If he were poor, it was the duty of the synagogue of his town or village to provide for the payment of his fees, and in part also for his maintenance. His period to learn was tested by an examination on entrance. If he passed it he became a "chosen one" (נער, comp. John xv. 19), and entered upon his work as a disciple (Spero, App. Crit. i. 7). The master and his scholars met, the former sitting on a high chair, the elder pupils (גיטין) on a lower bench, the younger (גיטין) on the ground, both literally "at his feet." The class-room might be the chamber of the Temple set apart for this purpose, or the private school of the Rabbi. In addition to the Rabbi, or head master, there were assistants, or interpreters of the master, whose function it was to proclaim aloud to the whole school what the Rabbi had spoken in a whisper (comp. Matt. x. 37). The education was chiefly chieftical, the pupil submitting the cases and asking questions, the teacher examining the pupil (Luke ii.). The questions might be ethical. What was the great commandment of all? What must a man do to inherit eternal life? or practical, What might a man do or leave unsaid on the Sabbath? or commercial, What did or did not render him unclean? In due time the pupil passed on to the laws of property, of contracts, and which pointed to a child of that house as the Lord's (David). There is something significant, too, in the silence of Rabbinic literature. In the Pirke Abot he is not even named. Comp. Otho, Hist. Doct. M. s. in Ugiuni xvi.

We are left to wonder what were the questions and answers of the school-room of Luke ii. 46, but those proposed to our Lord by his own disciples, or by the Scribes, as tests of his proficiency, may fairly be taken as types of what was commonly discussed. The
SCRIBE

of evidence. So far he was within the circle of the Hachalah, the simple exposition of the traditional "Words of the Scribes." He might remain content with this, or might pass on to the higher knowledge of the Beth-ham-Midrash, with its inexhaustible stores of mystical interpretation. In both he preeminently in the latter, parables entered largely into the method of instruction. The teacher uttered the similitude, and left it to his hearers to interpret for themselves. [PARK.] That the relation between the two was often one of genial and kindly feeling, we may infer from the saying of one famous Scribe, "I have learnt much from the Rabbis my teachers, I have known more from the Rabbis my colleagues, I have learnt most of all from my disciples." (Carpov. App. Crit. i. 7.)

(2.) After a sufficient period of training, probably at the age of thirty, the proselytizer was solemnly admitted to his office. The presiding Rabbi pronounced the formula, "I admit thee, and thus art admitted to the Chair of the Scribes," solemnly ordained him by the imposition of hands (the φυλακτορία, &c.), and gave to him, as the symbol of his work, tablets on which he was to note down the sayings of the wise, and the key of knowledge. (Gos. Luke xii. 52, with which he was to open or to shut the treasures of Divine wisdom. So admitted, he took his place as a Chabar, or member of the fraternity, was no longer a ραββίνους χιλιάρχης (Acts iv. 13), was separated entirely from the multitude, the brute herd that knew not the law, the "cursed" "people of the earth." (John vii. 15, 49.)

(3.) There still remained for the disciple after his admission the choice of a variety of functions, the chances of failure and success. He might give himself to any one of the branches of study, or combine two or more of them. He might rise to high places, become a doctor of the Law, an arbitrator in family litigations (Luke xii. 14), the head of a school, a member of the Sanhedrin. He might have to content himself with the humbler work of a transcriber, copying the Prophets for the use of synagogues, or Tephillin for that of the devout (Otho. Lec. Robb. s. v. "Phylactera"), or a notary writing out contracts of sale, covenants of eumanns, bills of repudiation. The position of the more fortunate was of course attractive enough. Theoretically, indeed, the office of the Scribe was not to be a source of wealth. It is doubtful how far the fees paid by the pupils were appropriated by the teacher (Huxter, Synt. Judaica, cap. 46). The great Hilkd worked as a day-laborer. St. Paul's work as a tent-maker, our Lord's work as a carpenter, were quite compatible with the popular conception of the most honored Rabbis. The indirect payments were, however, considerable enough. Scholars brought gifts. Rich and devout widows maintained a Rabbi as an act of piety, often to the injury of their own kindred. (Matt. xxiii. 14.) Each act of the notary's office, or the arbitration of the jurist, would be attended by an honorarium.

(4.) In regard to social position there was a like contradiction between theory and practice. The older Scribes had had no titles (Rambn. : Shemaiiah, as we have seen, warned his disciples against them. In our Lord's time the passion for distinction was insatiable. The ascending scale of Rab, Rabbi, Habbau (we are reminded of our Reverend, Very Reverend, Right Reverend), presented so many opportunities of adding the labels of ancient dignity (de tit. Robb. in Ugolini. xxii.). Other forms of worldliness were not far off. The salutations in the market-place (Matt. xxiii. 7), the reverential kiss offered by the scholars to their master, or by Rabbis to each other, the greeting of Alka, father (Matt. xxiii. 9, and Lightfoot, Hor. Heb. in loc.), the long στρογγ. as contrasted with the simple χαράκτ., was not the action of a lone man and his disciples, with the blood blue Zizith or fringe (the ψαρτισμός of Matt. xxiii. 5), the Tephillin of ostentations size, all these go to make up the picture of a Scribe's life. Drawing to themselves, as they did, nearly all the energy and thought of Judaism, the close hereditary caste of the priesthood was powerless to cope with them. Unless the priest, or, to use a Scribe's phrase, still remained in obscurity. The order, as such, became contemptible and base. For the Scribes there were the best places at feasts, the chief seats in synagogues (Matt. xxiii. 6; Luke xiv. 7).

(5.) The character of the order was marked under these influences by a deep, incurable hypocrisy, all the more perilous because, in most cases, it was unconscious. We must not infer from this that all were alike tainted, or that the work which they had done, and the worth of their office, were not recognized by Him who relaxed them for their evil. Some there were not far from the kingdom of God, taking their place side by side with prophets and wise men, among the instruments by which the wisdom of God was to be made known to the world. The order was still honorable. The Apostles themselves were to be Scribes in the kingdom of God (Matt. xxi. 52). The Lord himself did not refuse the salutations which hailed Him as a Rabbi. In "Zeas the lawyer" (ενομολός, Tit. iii. 13) and Apollos "mighty in the Scriptures," sent apparently for the special purpose of dealing with the μαθαβαρικός which prevailed at Crete (Tit. iii. 9), we may recognize the work which members of the order were capable of doing for the edifying of the Church of Christ (comp. Winer. Realbibl., and Herzog's Encyclop. Schriftdethtere.).

* Literature. — The preceding article is so full and satisfactory that it is not worthwhile to add many references. We may name, however, the others, comp. the elaborate treatises by Usuris, Antig. Heb., and Hetscher, De Academis Her-auron in Ugolini. Ties. xxii.

a The latter Rabbinic saying that "the disciples of the wise have a right to a goodly house, a fair wife, and a soft round bed; and probably the luxury of an earlier time. (Usuris Antig. Heb. cap. 5, at supra.)

b The feeling is curiously prominent in the Rabbinic scale of precedence. The Wise Man, i.e. the Rabbi is higher than the High Priest himself. (Gen. Hieros. Horawat, t. 84.)

SCRIPTURE (Σερπιτεν), the Hebrew word thus translated appears in

1 Saun. vii. 40, as a synonym for Σερητητος (το καθαντο πημενικον), the bag in which the shepherds of Palestine carried their food or other necessaries. In Symmachus and the Vulg. pars., and in the marginal reading of A. V. “scrip,”
appear in 2 K. ii. 42, for the Σερητητος, which in the text of the A. V. is translated handkerchief (comp. Gesenius, s. v.). The τριπα of the N. T. appears in our Lord’s command to his disciples as distinguishing from the Σερητητος (Matt. x. 10; Mark vi. 8) and the βαλαλετον (Luke x. 3, xxii. 35, 36); and its nature and use are sufficiently defined by the lexicons.

The script of the Galatian peasants was of Musca; used especially to carry their food on a journey (γε θηκη των ἄρτων, Suid.; δεμα τι ἄρτοφοις, Ammon.,) and sling over their shoulders.

In the Talmudic writers the word Σερητητος is used as denoting the same thing, and is named as part of the equipment both of shepherds in their common life and of peasants coming on a pilgrimage to Jerusalem (Lightfoot, Hor. Heb. on Matt. x. 10). The Σερητητος, on the other hand, was the loose girdle, in the folds of which money was often kept for the sake of safety (Graefe; the βαλαλετον (seuales, Vulg.), the smaller bag used exclusively for money (Luke xii. 33). The command given to the Twelve first, and afterwards to the Seventy, involved therefore an absolute dependence upon God for each day’s wants. They were to appear in every town or village, as men unlike all other travellers, freely doing without which others looked on as essential. The fresh rule given in Luke xxii. 35, 36, perhaps also the fact that Judas was the bearer of the bag (γαλασσακο- ων, John xii. 6), and that when the disciples were without bread they were ashamed of their forgetfulness (Mark viii. 14–16), show that the command was not intended to be permanent.

The English word has a meaning precisely equivalent to that of the Greek. Connected as it probably is, with σκρυπε, σκρυπ, the scrup was used for articles of food. It belonged especially to shepherds (As You Like it, act iii. sc. 2). It was made of leather (Milton, Comus, 620). A similar article is still used by the Syrian shepherds (Porter’s Damascus, i. 109). The latter sense of scrup as a written certificate, is, it need hardly be said, of different origin or meaning; the word, on its first use in English, was written “scrip” (Chaucer).

E. H. P.

SCRIP

SCRIPTION 181

SCRIPTURE (Σερπιτεν), the Hebrew word thus translated appears in

1 Saun. vii. 40, as a synonym for Σερητητος (το καθαντο πημενικον), the bag in which the shepherds of Palestine carried their food or other necessaries. In Symmachus and the Vulg. pars., and in the marginal reading of A. V. “scrip,”
appear in 2 K. ii. 42, for the Σερητητος, which in the text of the A. V. is translated handkerchief (comp. Gesenius, s. v.). The τριπα of the N. T. appears in our Lord’s command to his disciples as distinguishing from the Σερητητος (Matt. x. 10; Mark vi. 8) and the βαλαλετον (Luke x. 3, xxii. 35, 36); and its nature and use are sufficiently defined by the lexicons.

The script of the Galatian peasants was of Musca; used especially to carry their food on a journey (γε θηκη των ἄρτων, Suid.; δεμα τι ἄρτοφοις, Ammon.,) and sling over their shoulders.

In the Talmudic writers the word Σερητητος is used as denoting the same thing, and is named as part of the equipment both of shepherds in their common life and of peasants coming on a pilgrimage to Jerusalem (Lightfoot, Hor. Heb. on Matt. x. 10). The Σερητητος, on the other hand, was the loose girdle, in the folds of which money was often kept for the sake of safety (Graefe; the βαλαλετον (seuales, Vulg.), the smaller bag used exclusively for money (Luke xii. 33). The command given to the Twelve first, and afterwards to the Seventy, involved therefore an absolute dependence upon God for each day’s wants. They were to appear in every town or village, as men unlike all other travellers, freely doing without which others looked on as essential. The fresh rule given in Luke xxii. 35, 36, perhaps also the fact that Judas was the bearer of the bag (γαλασσακο- ων, John xii. 6), and that when the disciples were without bread they were ashamed of their forgetfulness (Mark viii. 14–16), show that the command was not intended to be permanent.

The English word has a meaning precisely equivalent to that of the Greek. Connected as it probably is, with σκρυπε, σκρυπ, the scrup was used for articles of food. It belonged especially to shepherds (As You Like it, act iii. sc. 2). It was made of leather (Milton, Comus, 620). A similar article is still used by the Syrian shepherds (Porter’s Damascus, i. 109). The latter sense of scrup as a written certificate, is, it need hardly be said, of different origin or meaning; the word, on its first use in English, was written “scrip” (Chaucer).

E. H. P.
meaning, however, we might still take θεόπνευστος as the predicate. "Every Scripture — so, every separate portion — is divinely inspired. It has been urged, however, that this assertion of a truth, which both St. Paul and Timothy held in common, would be less suitable to the context than the as-signing that truth as a ground for the further inference drawn from it; and so there is a preponderance of authority in favor of the rendering, "Every γραφή, being inspired, is also profitable, ... " (comp. Meyer, Ahlort, Wordsworth, Elliott, etc.). St. Paul, however, seems to have used the ground for making the meaning of γραφή depend-ent on the adjective θεόπνευστος ("every inspired writing"), as though we recognized a γραφή not inspired. The θέος ουχιματι of the N. T. is uniform in this respect: and the word γραφή is never used of any common or secular writing.

(2.) The meaning of the genitive in παντα προφητεία γραφής (2 Pet. i. 20) seems at first sight, anarchistic, though it be, distinctively collective. "Every prophecy of, L. c. contained in, the O. T. Scripture." A closer examination of the passage will perhaps lead to a different conclusion. The Apostle, after speaking of the vision on the holy mount, goes on, "We have as something yet firmer, the prophetic word;" (here, probably including the N. T. prophecy) "as workers in any other writing, the writings of the O. T." Men did well to give heed to that word. They needed one caution in dealing with it. They were to remember that no προφητεία γραφής, no such prophetic utterance starting from, resting on a γραφή, came from the ἡδα ἐπίλειξις, the individual power of interpretation of the speaker, but was, like the γραφή, inspired. It was the law of προφητεία of the later as well as the earlier, that men of God spake, "hearing along by the Holy Spirit." (3.) In the plural, as might be expected, the collective meaning is prominent. Sometimes we have simply αἱ γραφαί (Matt. xxi. 42, xxiii. 21; John v. 54; Acts xvi. 11; 1 Cor. xv. 5). The expression αἱ προφητείαι γραφαί (Luke xxii. 27). The opposite genitives, ἡ γραφή ἡ προφητεία (Rom. xvi. 26), are sometimes joined with it. In 2 Pet. iii. 16, we find an extension of the term to the epistles of St. Paul: but it remains uncertain whether αἱ προφητείαι γραφαί are the Scriptures of the O. T. exclusively, or include other writings, then extant, dealing with the same topics. There seems little doubt that such writings did exist. A comparison of Rom. xvi. 26 with Eph. iii. 5 might even suggest the conclusion, that in both there is the same assertion, that what had not been revealed before was now manifested by the Spirit to the apostles and prophets of the Church; and so that the "prophetic writings" to which St. Paul refers, are, like the spoken words of N. T. prophets, those that reveal things not made known before, the knowledge of the mystery of Christ.

It is noticeable, that in the [spurious] 24 Epistle of Clement of Rome (c. xi.) we have a long citation of this nature, not from the O. T., quoted as ἡ προφητικὰς λόγους (comp. 2 Pet. i. 19), and that

"O προφητικὸς λόγος is used by Phile of the holes of Moses (L. c. All. ib. iii. 11, vol. i. p. 95, ed. Mange). The, of course, could recognize no prophets but those of the O. T. Clement of Rome (Pseudo-Clement. A.) (ii. 11) uses it of a prophecy not included in the Canon.

So in the only other instance in which the genitive is found (Rom. xv. 4), ἡ παρακλησία τῶν γενομένων

in the 1st Epistle (c. xxii.) the same is quoted as ἡ γραφή. Looking to the special fulness of the prophetic gifts in the Church of Corinth (1 Cor. iv. xiv. 1), it is obviously probable that some of the spoken prophecies would be committed to writing; and it is a striking coincidence, that both the apostolic and post-apostolic references are connected, first with that church, and next with that of Rome, which was so largely influenced by it.

(4.) In one passage, τὰ ἑαυτὰ γράμματα (2 Tim. iii. 15) answers to "The Holy Scriptures" of the A. V. Taken by itself, the word might, as in John vii. 15, Acts xxvi. 21, have a wider range, including the entire circle of Rabbinic learning. As determined, however, by the use of other Hebraic writers, Philo (Leg. ad Caem, iv. ii. p. 574, ed. Mang.), Josephus (Ant. proem. 3, x. 10, § 4; ecc. praem. 1, 26), there can be no doubt that it is accurately translated with this special meaning.

E. H. P. * 

SCRYTIAN.

SCRYTIAN (σκύτης; Scyth.) occurs in Col. ii. 11, as a generalized term for rude, igno- 

rant, degraded. In the Gospel, says Paul, "there is a "scythian" (πρόλογος) in the midst of the "congregation," barbarian, Scythian, bond nor free; but Christ is all and in all." The same view of Scythian barbarians appears in 2 Mare, iv. 47, and 3 Mare, vii. 5. For the geographical and ethnological rotations of the term, see Dict. of Gen. ii. 336-345. The Scyths dwelt mostly on the north of the Black Sea and the Caspian, stretching thence indefinitely into inner Asia, and were regarded by the ancients as standing extremely low in point of intelligence and civilization. Josephus (c. Apoc. ii. 37) says, ἱππεὺς τοὺς χαράκτες αὐτῶν καὶ ἥμαρχα τῶν θηρίων διάφορατος: and Parmenides (cf. Athen. v. p. 222), ἄνδρ' ἄγαρ ἔλεγεν οἶνον, ὁ ὄβρος ἐπος Σκυθίων φανεῖν, ἀδέλ- 

φακός γεγεννημένος. For other similar testimonies see Westcott, lap., Testa. vol. ii. p. 292. At the same time, by the force of numbers, and by their wildness and savage ferocity, the Scyths were a dreaded foe, and often spread slaughter and desola-

tion through the lands which they invaded (see Rawlinson's Ancient Monarchies, ii. 508-517). It is generally allowed that they are the hordes meant under the name of Μακεδονία in Matt. xxviii. and 

xxxix., and are also the warriors whom Josephus describes as so terrible (iv. vi.). Perhaps it may be inferred from Col. iii. 11 that there were Scythi-

ans also among the early converts to Christianity. Many of this people lived in Greek and Roman lands, and could have heard the Gospel there, even if some of the first preachers had not penetrated into Scythia itself. According to one of the early Christian traditions it was the mission of the Apostle Andrew to go to the Scythians and preach to them the Gospel (Euseb. Hist. Eccles. iii. 1).

Herodotus states (i. 102-105) that the Scyths made an incursion through Palestine into Egypt,

it is the counsel, admonition, drawn from the Scriptures. Λόγος παρακλήσεως οὗτος is Acts xiii. 15 as the re-

ceived term for such an address, the Sermon of the Synagogue. 

Παρακλήσις itself was so closely allied with προφητεία (comp. Barnabas = τὸς προφητεύεις = τὸς παρακλησιμος), that the expression Παρακλήσις of the Apostles may be regarded as substantially identical.
SCYTHOPOLIS

under Pammethius, the contemporary of Josiah. In this way some would account for the Greek name of Beth-shan, Scythopolis. H. B. H.

SCYTHOPOLIS (Σκύθοπολίς πόλις; Peshito-Syrac, Belais: eicthia Scythranon), that is, "the city of the Scythians," occurs in the A. V. of Judg. iii. 13; 10 Macc. xii. 20 only. In the LXX. of Judges, i. 27, however, it is inserted (in both the great MSS.) as the synonym of Beth-shan, and this identification is confirmed by the narrative of 1 Macc. v. 52, a parallel account to that of 2 Macc. xii. 20, as well as by the repeated statements of Josephus (Ant. v. 1, § 22, vi. 14, § 8, xiii. 8, § 5). He uniformly gives the name in the contracted shape (Σκυθοπόλεις) in which it is also given by Eusebius (Onom. passim), Pliny (H. N. v. 18), Strabo (xvi.), etc., etc., and which is accurately followed in the A. V. Polybius (v. 70, § 4) employs the fuller form of the LXX. Beth-shan has now, like so many other places in the Holy Land, regained its ancient name, and is known as Beisan only. A mound close to it on the int. the LXX. of Tell Shihik, in which it is perhaps just possible that a trace of Scythopolis may linger.

But although there is no doubt whatever of the identity of the place, there is considerable difference of opinion as to the origin of the name. The LXX. (as is evident from the form in which they present it) and Pliny (H. N. v. 15) attribute it to the Scythians, who, in the words of the Byzantine historian, George Synecillus, "overran Palestine, and took possession of Beisan, which from them is called Scythopolis." This has been in modern times generally referred to the invasion recorded by Herodotus (i. 104-6), when the Scythians, after their occupation of Media, passed through Palestine on their road to Egypt (about a.C. 600 - a few years before the taking of Jerusalem by Nebuchadnezzar), a statement recognized as a real fact, though some of the details may be open to question (Dict. of Geog. ii. 940 b; Ravlinson's Herod. ii. 246). It is not at all improbable that either on their passage through, or on their return after being repulsed by Pammethius (Herod. i. 186), some Scythians may have settled in the country (Ewald, Gesch. iii. 369, note); and no place would be more likely to attract them than Beisan - fertile, most abundantly watered, and in an excellent military position. In the then state of the Holy Land they would hardly meet with much resistance.

Ireland, however (apparently intended thereto by his doubts of the truth of Herodotus' account), discredited this explanation, and suggested that Scythopolis was a corruption of Succothopolis - the chief town of the district of Succoth. In this he is supported by Gesenius (Notes to Barchoroth, p. 1058) and by Grimm (Exeg. Handbuch on 1 Macc. v. 52). Since, however, the objection of Ireland to the historical truth of Herodotus is now removed, the necessity for this suggestion (certainly most ingenious) seems to be lost. The distance of Succoth from Beisan, if we identify it with Sokhah, is 10 m. as, while if the arguments of Mr. Beke are valid it would be nearly double as far. And it is surely gratuitous to suppose that so large, independent, and important a town as Beth-shan was in the earlier history, and as the remains show it to have been in the Greek period, should have taken its name from a comparatively insignificant place at a long distance from it. Dr. Robinson (Bib. Hist. iii. 330) remarks with justice, that had the Greeks derived the name from Succoth they would have employed that name in its translated form as Scypolus, and the compound would have been Scythopolus. Ireland's derivation is also dismissed without hesitation by Ewald, on the ground that the two names Succoth and Skythes have nothing in common (trench. iii. 694, note). Dr. Robinson suggests that, after all, City of the Skythes may be right: the word Skythus being used as in the N. T. as equivalent to a barbarian or savage. In this sense he thinks it may have been applied to the wild men who then inhabited the Hebr, and at times may have had possession of Beth-shan.

The Samaritans were never expelled from Beth-shan, and the heathen appear to have always maintained a footing there. It is named in the Mishna as the seat of industry (Misn. Abod. Zair, i. 4), and as containing a double population of Jews and heathens. At the beginning of the Roman war (A.D. 64) the heathen rose against the Jews and massacred a large number, according to Josephus (B. J. ii. 18, § 3) no less than 14,000, in a wood or grove close to the town. Scythopolis was the largest city of the Decapolis, and the only one of the ten which is west of Jordan. By Eusebius and Jerome (Onom. "Helieon") it is characterized as πόλις ἑλειονος καὶ μεγαλος. It was surrounded by a district of its own of the most abundant fertility. It became the seat of a Christian bishop, and its name is found in the lists of signatures as Late as the Council of Constantinople, A.D. 556. The latest mention of it under the title of Scythopolis is probably that of William of Tyre (xxv. 4, 261). He mentions it now as if it was then actually so-called, carefully explaining that it was formerly Beth-shan.

G.

SCYTHOPOLITANS (Σκυθοπόλιται; Scythopolitai), inhabitants of Scythopolis (2 Macc. xii. 30).

SEA. The Sea, παραλία is used in Scripture to denote 1. (1) The "gathering of the waters" (γειτ-

nym) encompassing the land, or what we call in a more or less definite sense "the Ocean." (2) Some

from τύχος, not used, i. q. πυρσόν, or ἁπτόμαι, "roast." and "being interconnected. Connected with this is

dενδρον; δάφνης, "the deep" (Gen. i. 2; Jos. ii. 5). Gens. p. 371). It also means the west (Gens. pp. 303, 358). When used for the sea, it very often, but not always, takes the article.

Other words for the sea (in A. V. "deep") are: (1) παραλία, ἐκαταλαύνον, (only in plural), or ἡ θάλασσα, "the deep" (Psal. xxiv. 10).
portion of this, as the Mediterranean Sea. (3.) Inland lakes, whether of salt or fresh water. (4.) Any great collection of water, as the rivers Nile or Euphrates, especially in a state of overflow.

1. In the first sense it is used in Gen. i. 2, 10, and elsewhere, as Deut. xx. 3; 1 K. x. 22; Ps. xxiv. 3, 12; xxv. 11, 12; Prov. vii. 12, 13. 2. In the second, it is used, with the article the of the Mediterranean Sea, called the "hinder," the "western," and the " utmost" sea (Deut. vii. 24, xxxiv. 2; Joel ii. 20; "sea of the Philistines" (Ex. xxiii. 31)); the "great sea" (Num. xxxiv. 6; Josh. xv. 47; "the sea" (Gen. xlix. 13; Ps. lix. 11, 13). (c) "sea." Below the seacoast here. See *SEA, the GREAT.*

The inland lakes termed seas, as the Salt or Dead Sea. (See the special articles.)

4. The term *gord,* like the Arabic *bhor,* is also applied to great rivers, as the Nile (Is. xiv. 5; Am. viii. 8, A. V. = "flood;" Nah. iii. 8; Ezek. xxxii. 2), the Euphrates (Ezra. ii. 30). (See Stanley, S. f P. App. p. 553.)

The qualities or characteristics of the sea and seacoast mentioned in Scripture are, (1.) The sand, whose abundance on the coast both of Palestine and Egypt furnishes so many illustrations (Gen. xxvii. 17, xliii. 19; Judg. vii. 12; 1 Sam. xiii. 5; 1 K. iv. 20, 21; Is. xxi. 22; Matt. vii. 26; Strabo, lib. xlii. 758, 759; Ramler, Poll. proo. 45; Robinson, ii. 34, 35, 464; Shaw, *Tecr.* p. 240; Hasselquist, *Tecr.* p. 119; Stanley, S. f P. pp. 255, 260, 264). (2.) The shore. (3.) Creeks or inlets. (4.) Harbors. (5.) Waves or billows.

It may be remarked that almost all the figures of speech taken from the sea in Scripture refer either to its power or its danger, and among the woes threatened in punishment of disobedience, one may be remarked as significant of the dread of the sea entertained by a non-sea-faring people, the being brought back into Egypt "as in ships" (Deut. xxvii. 68). The national feeling on this subject may be contrasted with that of the Greeks in reference to the sea. [COMMERC.] It may be remarked, that, as is natural, no mention of the tide is found in Scripture.

The phrase "where two seas meet" (Acts xvii. 41) is explained by Conybeare and Howson as a place where the island Salamouetta, off the coast of Manti in St. Paul's Bay, so intercepts the passage from the sea without to the bay within as to give the appearance of two seas, just as Strabo represents the appearance of the entrance from the Bosporus into the Euxine; but it seems quite as likely that the "place of the double sea," is meant one where two currents, caused by the intervention of the island, met and produced an eddy, which made it desirable at once to ground the ship (Conybeare and Howson, ii. 423; Strabo, ii. 124).

H. W. P.

*SEA, the GREAT. [SEA, 2.]*

SEA, MOLLEN. The name given to the great brazen laver of the Mosaic ritual. [LAVEN.]

In the place of the laver of the Tabernacle, Solomon caused a laver to be cast for a similar purpose, which, on account of its size, was called a sea. It was made partly or wholly of the brass, or rather copper, which had been captured by David from "Tilhath and Chun, cities of Hadarezer king of Zobah" (1 K. vii. 23-26; 1 Chr. xviii. 8). Its dimensions were as follows: Height, 5 cubits; diameter, 10 cubits; circumference, 30 cubits; thickness, 1 handbreadth; and it is said to have been capable of containing 2,000, or, according to 2 Chr. iv. 4, 3,000 baths. Below the trim there was a double row of "knobs," *k* 10 (i. e. 5 + 5) in each cubit. These were probably a running border or double fillet of tiles, and fruits, said to be gourds, of an oval shape (2 Esdr., Hec. i. 357, and Jewish authorities quoted by him). The brim itself, or lip, was wrought "like the brim of a cup, with flowers of lilies," i. e. curved outwards like a lily or lotus flower. The laver stood on twelve oxen, three towards each quarter of the heavens, and all looking outwards. It was mutilated by Ahaz, by being removed from its basis of oxen and placed on a stone base, and was finally broken up by the Assyrians (2 K. xiv. 14, 17, xxv. 13).

Josephus says that the form of the sea was hemispherical, and that it held 3,000 baths; and elsewhere tells us that the lath was equal to 72 Attic *kentres,* or 1 *metropolis* = 8 gallons 5.12 pints (Joseph. *Ant.* viii. 2, § 9, and 3, § 5). The question arises, which occurred to the Jewish writers themselves, how the contents of the laver, as they are given in the sacred text, are to be reconciled with its dimensions. At the rate of 1 bath = 59 gallons, 5.12 pints, 2,000 baths would amount to about 17,200 gallons, and 3,000 (the more precisely stated reading of 2 Chr. iv. 4) would amount to 25,900 gallons. Now, supposing the vessel to be hemispherical, as Josephus says it was, the cubit to be = 29 inches (20.6290), and the palm or handbreadth = 5 inches (20.464), Wilkinson, *Anc. Egypt.* (p. 258), we find the following proportions: From the height (5 cubits = 102 inches) subtract the thickness (3 inches), the axis of the hemisphere

---

---
would be 99 inches, and its contents in gallons, at 2771 cubic inches to the gallon, would be about 7,500 gallons: or taking the cubit at 22 inches, the contents would reach 10,045 gallons—an amount still far below the required quantity. On the other hand, a hemispherical vessel, to contain 17,250 gallons, must have a depth of 11 feet nearly, or rather more than 6 cubits, at the highest estimate of 22 inches to the cubit, exclusive of the thickness of the vessel. To meet the difficulty, we may imagine—(1.) An erroneous reading of the numbers, which we may imagine the laver, like its prototype in the Tabernacle, to have had a "foot," which may have been a basin which received the water as it was drawn out by taps from the laver, so that the priests might be said to wash at "a foot" in it (Ex. xxx. 18, 19; 2 Chr. iv. 6). (3.) We may suppose the laver to have had another shape than the hemispheric of Josephus. The Jewish writers supposed that it had a square hollow base for 3 cubits of its height, and 2 cubits of the circular form above (Lightfoot, Desc. Templ., vol. i. p. 647). A far more probable suggestion is that of Thesius, in which Keil agrees, that it was of a bulging form below, but contracted at the mouth, to the dimensions named in 1 K. vii. 29 (4.). A fourth supposition is perhaps tenable, that when it is said the laver contained 2000 or 3000 baths, the meaning is that the supply of water required for its use amounted, at its utmost, to that quantity. The quantity itself of water is not surprising, when we remember the quantity mentioned as the supply of a private house for purification, namely, 6 amphorae of 2 or 5 firkins ( peruqai ) each, i. e. from 16 to 24 gallons each (John ii. 6).

Hypothetical restoration of the laver. From Kelh.

The laver is said to have been supplied in earlier days by the Gibeonites, and afterwards by a conduit from the pools of Bethelhem. Den-Katn made twelve cocks (epistomia) for drawing off the water, and invented a contrivance for keeping it pure during the night (Joun. iii. 10; Trumel, iii. 8; Mikabith, iii. 6; Lightfoot, i. c.). Mr. Layard mentions some circular vessels found at Nineveh, of 6 feet in diameter and 2 feet in depth, which seemed to answer, in point of use, to the Molten Sea, though far inferior in size; and on the last-references it is remarkable that cauldrons are represented supported by oxen (Layard, Nin. and Babel. p. 180; see Thesius on 1 K. vii.; and Keil, Arch. Böll. 1. 127, and pl. 8, fig. 1). H. W. P.

a ἡ Παλαισα: εὐρέω· A. V. "thereat" (Ex. xxx. 19).

b οὐκ ἰδεῖν· ταυτά· οὐκ ἰδεῖν. 

c In the Samaritan Pentateuch also in iv. 19.

d In Zecharrah and Joel, as an antithesis to "the hither sea." i. e., the Mediterranean; whence the obvious rendering of the A. V., "former sea."
faith with which they received the statements of their guides. Thus Manudelle (ch. ix.) says it is called the Dead Sea because it moveth not, but is ever still—the fact being that it is frequently agitated, and that when in motion its waves have great force. Hence also the fable that no birds could fly across it alive, a notion which the experience of almost every modern traveller to Palestine would contradict.

(9.) The Arabic name is Bahr Lot, the "Sea of Lot," The name of Lot is also specially connected with a small piece of land, sometimes island sometimes peninsula, at the north end of the lake.

The dotted lines crossing and recrossing the Lake show the places of the traverse sections given on the opposite page.

from the Gulf of Akaba to the range of Lebanon, and from the range of Lebanon to the extreme north of Syria. It is in fact a pool left by the ocean, in its retreat from what there is reason to believe was at a very remote period a channel connecting the Mediterranean with the Red Sea. As the most enduring result of the great geological operation which determined the present form of the country it may be called without exaggeration the key to the physical geography of the Holy Land. It is therefore in every way an object of extreme interest. The probable conditions of the formation of the lake will be alluded to in the course of this article; we shall now attempt to describe its dimensions, appearance, and natural features.

2. Viewed on the map, the Lake is of an oblong

Transverse Sections (from west to east) of the Dead Sea: plotted for the first time, from the Soundings given by Lynch on the Map in his Narrative of the U. S. Expedition, etc., London, 1849. The spots at which the Sections were taken are indicated on the Map (opposite) by the dotted lines. The depths are given in English feet.

N. B. — For the sake of clearness, the horizontal and vertical scales for these Sections have been enlarged from those adopted for the Map and Longitudinal Section on the opposite page.

The longitudes and latitudes are given with care by Van de Velde (36 m. p. 58), but they can none of them be implicitly trusted.

The ancient writers, as is but natural, estimated its dimensions very inaccurately. Dioscorus states the length as 500 stadia, or about 50 miles, and breadth 61, or 6 miles; Ptolemy extends the length to 590 stadia, and the breadth to 120. It is not necessary to accuse him, on this account, of wilful exaggeration. Nothing is more difficult to estimate accurately than the extent of a sheet of water, especially one which varies so much in appearance as the Dead Sea. As regards the length, it is not impossible that at the time of Ptolemy the water extended over the southern plain, which would make the entire length over 50 geographical miles.

No name can be any invisible one: the distance of the surface below that of the ocean alone renders it impossible; and there is no motive for supposing it, because the evaporation (see note to § 4) is amply sufficient to carry off the supply from without.

This figure was obtained by running levels from
the Mediterranean at Jaffa (Report of Secretary of Norgy, etc. Svo, p. 23), and although we cannot absolutely rely on the accuracy of that dimension, still there is reason to believe that it is not very far from the fact. The measurements of the depth of the lake taken by the same party are probably more trustworthy. The expedition consisted of sailors, who were here in their element, and to whom taking soundings was a matter of every day occurrence. In the upper portion of the lake, north of the peninsula, seven cross sections were obtained, six of which are exhibited on the preceding page. They show this portion to be a perfect basin, descending rapidly till it attains, at about one-third of its length from the north end, a depth of 1,308 feet. Immediately west of the upper extremity of the peninsula, however, this depth decreases suddenly to 536 feet, then to

114, and by the time the west point of the peninsula is reached, to 18 feet. Below this the southern portion is a mere lagoon of almost even bottom, varying in depth from 12 feet in the middle to 3 at the edges. It will be convenient to use the term "lagoon" in speaking of the southern portion.

The depression of the lake, both of its surface and its bottom, below that of the ocean is at present quite without parallel. The lake Assal, on the Somalii coast of Eastern Africa opposite Aden, furnishes the nearest approach to it. Its surface is said to be about 16 feet below that of the Indian Ocean.

4. The level of the lake is liable to variation according to the season of the year. Since it has no outlet, its level is a balance struck between the amount of water poured into it, and the amount given off by evaporation. If more water is supplied

SEA, THE SALT

An Terekh up the Wady Ras el-Qurneir and Wady es-Nac to Jerusalem, and thence by Keuleich to Jaffa. It seems to have been usually assumed as accurate, and as settling the question. The elements of error in leveling across such a country are very great, and even practiced surveyors would be liable to mistake, unless by the adoption of a series of checks which it is inconvenient that Lynch's party can adopt. The very fact that no datum on the beach is mentioned, and that they appear to have leveled from the then surface of the water, shows that the party was not directed by a practiced leveler, and casts suspicion over all the observations. Lynch's observations with the barometer (p. 12) gave 1,234.589 feet — 82 feet less depression than that mentioned above. The existence of the depression was for a long time unknown. Even Sayce (ibid.) believed that it lay higher than the ocean. Marmont (Voyage, iii. 611) calculates the Mount of Olives at 747 metres above the Mediterraneum, and then estimates the Dead Sea at 590 metres below the Mount. The fact was first ascertained by Moore and Beek in 1837, by boiling water; but they were unable to arrive at a figure. It may be well here to give a list of the various observations on the level of the lake, made by different travellers:

| Apr. 1857 | Von Schubert | Barom. | 1,574.7 |
| 1857     | De Beuron   | Barom. | 1,425.2 |
| 1858     | Russberger | Barom. | 1,312.2 |
| 1858     | Symonds    | Triegom. | 1,449.3 |
| 1855     | Von Willebrandt | Barom. | 1,506.7 |
| May, 1858 | Lynch      | Barom. | 1,467.2 |
| May, 1858 | Lynch      | Level  | 1,516.7 |
| Nov. 1859 | Rev. G. W. Bridges | Anerd. | 1,335.5 |
| Oct. 27, 1859 | Poole   | Anerd. | 1,335.5 |
| Apr. (1857) | Roth     | Barom. | 1,574.6 |

Eng. ft.

— See Petermann, in Geogr. Journ., xvi. 90; for both, Petermann's Mittl.-deut. 1858, p. 3; for Sayce, ibid. 1858, 1859. The observations are kindly communicated to the writer the results of his observations. Captain Symonds' operations are briefly described by Mr. Hamilton in his addresses to the Royal Geogr. Society in 1842 and 1843. He carried levels across from Jaffa to Jerusalem by two routes, and thence to the Dead Sea by one route; the ultimate difference between the two observations was less than 12 feet (Geogr. Journ., x. p. 1x.; xii. p. 1xxiv.). One of the sets, ending in 1,512.2 feet, is given in Van der Velde's Map, pp. 75-81. Widely as the results in the table differ, there is yet enough agreement among them, and with Lynch's level-observation, to warrant the statement in the text.

Those of Symonds, Lynch, and Poole, are remarkably free from the most serious difficulties of the case if considered; but it must be admitted that those of De Berton, Roth, and Bridges are equally close. The time of year must not be overlooked. Lynch's level was taken about the middle of May, when the lake is near its lowest state, and Beek's about the autumnal drought, and therefore is consistent with that of Poole, taken 5 months later, at the very end of the dry season.

a The map in Lynch's private Narrative (London, 1845), from which these sections have been for the first time, been plotted, is, to a much larger scale, contains more details, and is a more valuable document, than that in his Official Report, 4to (Baltimore, 1852), or his Report Svo (Senate Papers, 50th Congr., 24 Ses., No. 2.

b Three other attempts have been made to obtain soundings, but in neither case with any very practical result. 4 To Messrs. Moore and Beek, in March, 1857. They report a maximum depth of 1,314 feet, between An Terekh and W. Zorba, and a little north of the same (Palmer's Map, to which these observations were contributed by Moore himself): Geogr. Journ. vii. 456. Lynch's soundings at nearly the same spots gave 1,170 and 1,234 feet, respectively, at once reversing and greatly diminishing the depressions.

(2) Captain Symonds, R. E., is said to have been upon the land and to have obtained soundings, the deepest of which was 2,100 feet. But for this the writer can only refer the reader to the statements of the late General Delefour (Eskylas, "Jordan," p. 704), who does not name the source of his information. (3) Lieut. Molyneux, R. N., in Sept. 1847, took three soundings. The first of these seems to have been aimed against An Terekh, and gave 1,000 feet. The other two were further north, and gave 1,605 and 1,608 feet (Geogr. Journ. xviii. pp. 127, 128). The greatest of these appears to be about coincident with Lynch's 1,104 feet; but there is so much vagueness about the spots at which they were taken, that no use can be made of the results. Lynch and Beek agree in representing the west side as more gradual in slope than the east, which has a depth of more than 900 ft. close to the brink.

c Ireg and Mangles always term this part "the back-water," and reserve the name "Dead Sea" for the northern and deeper portion.

e This subject has been ably and carefully investigated by the late Professor Marchand, the eminent Greek scholar of Halle, in his paper on the Dead Sea in the Journal fur preuss. Chemie, Leipzig, 1849, pp. 371-374. The result of his calculations, founded on the observations of Shaw, A. von Humboldt, and Balard, is that while the average quantity of supply cannot exceed 20,000,000 cub. ft., the evaporation may be taken at 24,000,000 cub. ft. per diem.
plied than the evaporation can carry off, the lake will rise until the evaporating surface is so much increased as to restore the balance. On the other hand, should the evaporation drive off a larger quantity than the supply, the lake will descend until the surface becomes so small as again to restore the balance. This fluctuation is increased by the fact that the winter is at once the time when the clouds and streams supply most water, and when the evaporation is least; while in summer, on the other hand, the evaporation goes on most furiously, and the supply is at its minimum. The extreme differences in level resulting from these causes, have not yet been carefully observed. Dr. Robinson, in May, 1838, from the lines of drift-wood which he found beyond the then brink of the water in the southern part of the lake, judged that the level must be sometimes from 10 to 15 feet higher than it was (Wald. Res. t. 515, ii. 115) but this was only the commencement of the summer, and by the end of September the water probably would have fallen much lower. The writer, in the beginning of September, 1838, after a very hot summer, e-timed the line of drift-wood along the steep beach of the north end at from 10 to 12 feet above the then level of the water. Robinson (G. 504) mentions a line of stumps of 115, that the lake, 6 or 8 feet above the then (May 10) level of the water, but which bore marks of having been covered. Lynch (Verr. p. 289) says that the marks on the shore near the same place indicated that the lake had already (April 22) fallen 7 feet that season.

Possibly a more permanent rise has lately taken place, since Mr. Poole (p. 60) saw many dead trees standing in the lake for some distance from the shore opposite Khosheh Usbun. This too was at the end of October, when the water must have been at its lowest (for that year).

5. The change in level necessarily causes a change in the dimensions of the lake. This will chiefly affect the southern end. The shore of that part slopes up from the water with an extremely gradual incline. Over so a beach a very slight rise in the lake would send the water a considerable distance. This was found to be actually the case. The line of drift-wood mentioned by Dr. Robinson (ii. 115) was about 3 miles from the brink of the lagoon. Dr. Anderson, the geologist of the American expedition, conjectured that the water occasionally extended as much as 8 or 10 miles south of its then position (Official Report, 1845, p. 182). On the peninsula, the acuity of which is much greater than that of the southern shores of the lagoon, and in the early part of the summer (June 2), Irly and Mangels found the "high-water mark" a mile distant from the water's edge. At the northern end of the shore being steeper, the water line probably remains tolerably constant. The variation in breadth will not be so much. At the N. W. and E. corners there are some flats which must be often overflowed. Along the lower part of the western shore, where the beach widens, at Birkel El-Khulil, it is occasionally covered in portions, but they are probably not enough to make any great variation in the width of the lake. On the eastern side hardly anything is known, but the beach there appears to be only partial, and confined to the northern end.

6. The mountains which form the walls of the great fissure in whose depths the lake is contained, continue a nearly parallel course throughout its entire length. Viewed from the beach at the northern end of the lake—the only view within the reach of most travellers—there is little perceptible difference between the two ranges. Each is equally bare and stern to the eye. On the left the eastern mountains stretch their long, low, horizontal line, till they are lost in the dim distance. The western mountains, on the other hand, do not offer the same appearance of continuity, since the headland of Ras El-Fishkhah projects so far in front of the foot of the mountain that is visible from the northern end of the range when viewed from most points. The horizon is formed by the water-line of the lake itself; often lost in a thick mist which dwells on the surface, the result of the rapid evaporation always going on. In the centre of the horizon, when the haze permits it, may be discovered the mysterious peninsula.

7. Of the eastern side but little is known. One traveller in modern times (Seetzen) has succeeded in forcing his way along its whole length. The American party bounded at the W. Mojib and other points. A few others have rounded the southern end of the lake, and advanced for 10 or 12 miles along its eastern shores. But the larger portion of the e-shores—the flanks of the mountains which lie between the peninsulas to the north and south of the lake—have been approached by travellers from the west only on very rare occasions nearer than the western shore.

Both Dr. Robinson from Ain July (i. 502), and Lieut. Molyneux (p. 127) from the surface of the lake, record their impression that the eastern mountains are much more lofty than the western, and much more broken by cliffs and ravines than those on the west. In color they are brown, or red—a great contrast to the gray and white stones of the western mountains. Both sides of the lake, however, are alike in the absence of vegetation—almost entirely barren and scorched, except where here and there a spring, bursting up at the foot of the mountains, covers the beach with a bright green jungle of reeds and thick bushes, or gives life to a clump of stunted palms: or where, as at Ain July or the Wally Mojib, a perennial stream betrays its presence, and breaks the long monotony of the precipice by filling the rift with acacias, or nourishing a little oasis of verdure at its embouchure.

8. Seetzen's journey, just mentioned, was accomplished in 1837. He started in January from the ford of the Jordan through the upper country, by Mecca, Ateers, and the ravine of the Wally Mojib to the peninsula: returning immediately after by the lower level, as near the lake as it was possible to go. He was on foot with but a single guide. He represents the general structure of the mountains as limestone, capped in many places by basalt, and having at its foot a red ferruginous sandstone, which forms the immediate margin of the lake. The ordinary path lies high up on the face of the mountains, and the lower track, which Seetzen pursued, is extremely rough, and often all but impassable. The rocks lie in a succession of enormous terraces, apparently more vertical in form than those on the west. On the lower one of these, but still far above the water, lies the path, if path it can be called, where the traveller has to scramble through and over a chaos of enormous blocks of limestone, sandstone, and basalt, or basalt conglomerate, the
The Dead Sea. — View from Ain Jily, looking south. From a drawing made on the spot in 1842, by W. Tipping, Esq.

partially explored. Two travellers have passed over their entire length: De Saulie in January 1831, from north to south, Vaygugna de Spaer, etc., 1854; and Narrative of a Journey, etc., London, 1854; and Poole in November 1855, from south to north (Geog. Journal, xxvi. 55). Others have passed over considerable portions of it, and have recorded observations both with pen and pencil. Dr. Robinson on his first journey in 1838 visited Ain Jily, and proceeded from thence to the Jordan and Jericho, while Tipping in 1842, scaled the rock of Masada (probably the first travellers from the western world to do so), and from thence journeyed to Ain Jily along the shore. The views which illustrate this article have been, through the kindness of Mr. Tipping, selected from those which he took during this journey. Lieut. Van de Velde, in 1852, also visited Masada, and then went south as far as the south end of Aedel Usbun, after which he turned up to the right into the western mountains. Lieut. Lynch’s party, in 1848, landed and travelled over the greater part of the shore from Ain Fuqqah to Usbun. Mr. Hohnan Hunt, in 1854, with the Messrs. Beamont, resided at Usbun for several days, and afterwards went over the entire length from Usbun to the Jordan. Of this journey one of the ultimate fruits was Mr. Hunt’s picture of the Dead Sea at sunset, known as “The Scapegoat.” Miss Emily Beaufort and her sister, in December 1869, accomplished the ascent of Masada, and the journey from thence to Ain Jily; and the same thing, including Usbun.
was done in April, 1883, by a party consisting of Mr. G. O. Clowes, Jr., Mr. Straton, and others.

11. The western range preserves for the greater part of its length a course barely less regular than the eastern. That it does not appear so regular when viewed from the northwestern end of the lake is owing to the projection of a mass of the mountain eastward from the line so clearly to shut out from view the range to the south of it. It is Dr. Robinson's opinion ("Ibid. Res. i. 510, 511") that the projection consists of the Ruw el-Fishkhad and its "adjacent cliffs," only, and that from that headland the western range runs in a tolerably direct course as far as Usban, at the N. W. corner of the lake. The Ruw el-Fishkhad stands some six miles below the head of the lake, and forms the northern side of the gorge by which the Wady es-Sawur (the Khiron) descends into the lake. Dr. Robinson is such an accurate observer, that it is difficult to question his opinion, but it seems probable that the projection really commences further south, at the Ruw Meserel, north of Ain July. At any rate, no traveller appears to have been able to pass along the beach between Ain July and Ruw Fishkhad, and the great Arab road, which adheres to the shore from the south as far as Ain July, leaves it at that point, and mounts to the summit. It is much to be regretted that Lynch's party, who had encampments of several days' duration at Ain Fishkhad and Ain Teredel, and in Ain July, did not make such observations as would have decided the configuration of the shores.

12. The accompanying wood-cut represents the view looking southward from the spring of Ain July, a point about 700 feet above the water (Poole, p. 66). It is taken from a drawing by the accurate pen of Mr. Tipping, and gives a good idea of the course of that portion of the western heights, and of their ordinary character, except at a few such exceptional spots as the headlands just mentioned, or the isolated rock of Sebbeh, the ancient Masada. In their present aspect they can hardly be termed "vertical," or "perpendicular," or even "cliffs" 6 (the favorite term for them), though from a distant point on the surface of the lake they probably look vertical enough (Molyneux, p. 137). Their structure is originally in huge steps or offsets, but the horizontal portion of each offset is now concealed by the slopes of debiris, which have in the lapse of ages rolled down from the vertical cliff above. 6

13. The portion actually represented in this view is described by Dr. Anderson (p. 175) as varying from 1,200 to 1,500 feet in height, bold and steep, admitting nowhere of the ascent or descent of beasts of burden, and practicable only here and there to the most intrepid climber. . . .

The marked divisions of the great escarpment, reckoning from above, are: (1.) Horizontal layers of limestone from 200 to 300 feet in depth. (2.) A series of tent-shaped embankments of debiris, brought down through the small ravines intersecting the upper division, and lodged on the projecting terrace below. (3.) A sharply defined, well-marked formation, less perfectly stratified than No. 1, and constituting by its unbroken continuity a zone of naked rock, probably 150 feet in depth, running like a vast scar along the face of the cliff.

14. Further south the mountain sides assume a more abrupt and savage aspect, and in the Wady Zincarba, and still more at Sebbeh—the ancient Masada—reach a pitch of rugged and repulsive, though at the same time impressive desolation, which perhaps cannot be exceeded anywhere on the face of the earth. Beyond Usban the mountains continue their general line, but the district through which they are more flat, and the western portions are covered by an immense expanse of barren, unbroken sand, which forms the central line of the country—Hebron, Ben Avinon, etc. It is now cut up by deep and difficult ravines, separated by steep and inaccessible summits; but portions of the table-lands still remain in many places to testify to the original conformation. The material is a soft cerebrophyllous limestone, impregnated with sulphur, and containing a good deal of sulphate of lime. This country is entirely desert, with no sign of cultivation: here and there a shrub of Reisen, or some other desert plant, but only enough to make the monotonous desolation of the scene more frightful.

15. The region which lies on the top of the western heights was probably at one time a wide table-land rising gradually towards the high lands which form the central line of the country—Hebron, Ben Avinon, etc. It is now cut up by deep and difficult ravines, separated by steep and inaccessible summits; but portions of the table-lands still remain in many places to testify to the original conformation. The material is a soft cerebrophyllous limestone, impregnated with sulphur, and containing a good deal of sulphate of lime. This country is entirely desert, with no sign of cultivation: here and there a shrub of Reisen, or some other desert plant, but only enough to make the monotonous desolation of the scene more frightful.

16. Of the elevation of this region we hitherto possess but scanty observations. Between Ain July and . . .

6 Poole appears to have tried his utmost to keep the shores, and to have accomplished more than others, but with only small success. De Saunley was obliged to take to the heights at Ain Toreb, and keep to them till he reached Ain July.

6 Lynch's view of Ain July (Nart. p. 280), though rough, is probably not inaccurate in general effect. It agrees with Mr. Tipping's as to the structure of the heights. That in Dr Saunley by M. Bely, which purports to be from the same spot as the latter, is very different.

6 This was the fortress in which the last remnant of the Zealots, or fanatical party of the Jews, defended themselves against Silva, the Roman general, in A.D. 71, and at last put themselves to death to escape capture. The spot is described and the tragedy related in a very graphic and impressive manner by Dean Milman ("Hist. of the Jews", 31 ed., ii. 385 sqq.).
and Air Terādē the summit is a table-land 740 feet above the lake (Poole, p. 67). Furthermore, above Air Terādē, the summit of the pass is 1,395.75 feet above the lake (Lynch, C. N. I., p. 41), within a few feet the height of the plain between the Wandy en-Nor and Qumrun, which is given by Mr. Poole (p. 68) at 1,340 feet. This appears also to be about the height of the rock of Sē'bēb, and of the table-land, already mentioned, on the eastern mountains north of the Wandy en-Nor. It is very nearly coincident with that of the ocean. In ascending from the lake to Yeh Micr, Mr. Poole (p. 58) passed over what he thought might be the original level of the plain, 532 feet above the Dead Sea. That these are the remains of ancient sea margins, chronicling steps in the history of the lake (Allen, in Geogr. Journ. xxiii. 163), may reasonably be conjectured, but can only be determined by the observation of a competent geologist on the spot.

17. A beach of varying width skirts the foot of the mountains on the western side. Above Air Jidy it consists mainly of the detritus of the torrents—fun-shaped banks of débris of all sizes, at a steep slope, spreading from the outlet of the torrent like those which become so familiar to the traveller after one has once seen the plains of the Punjab. In one or two places—as at the mouth of the Khiron and at Air Terādē—the beach may be 1,000 to 1,400 yards wide, but usually it is much narrower, and often is reduced to almost nothing by the advance of the headlands. For its major part, as already remarked, it is impervious. Below Air Jidy, however, a marked change occurs in the character of the beach. Noting along with the shore, the character of the deposits of a new material, soft friable chalk, marl, and gypsum, with salt, begin to make their appearance. These are gradually developed towards the south, till at Sē'bēb and below it they form a terrace 80 feet or more in height at the back, though sloping off gradually to the lake. This new material is a greenish white in color, and is ploughed up by the cataracts from the heights behind it into very strange forms: here, hundreds of small mounds, covering the plain like an eruption; there, long rows of huge cones, looking like an encampment of enormous tents: or, again, rectangular blocks and pillars, exactly resembling the streets of a town, with rows of houses and other edifices, all as if cast above the Dead Sea. But these appear to be the remains of strata of b:te or post-tertiary date, deposited at a time when the water of the lake stood much higher, and covered a much larger area, than it does at present. The fact that they are strongly impregnated with the salts of the lake is itself presumptuous evidence of this. In many places they have completely disappeared, doubtless washed into the lake by the action of torrents from the hills behind, similar to, though more violent than those which have given rise to the strange flocks just described: but they still linger on this part of the shore, on the peninsula opposite, at the southern and western outskirts of the plain south of the lake, and probably in a few spots at the northern and northwestern end, to testify to the condition which once existed all around the edge of land and water of the lake. The height of the beach thus formed is considerably greater than that above Air Jidy. From the Bīkēt el-Khālib to the wady south of Sē'bēb, a distance of six miles, it is from one to two miles wide, and is passable for the whole distance. The Bīkēt el-Khālib just alluded to is a shallow depression on the shore, which is filled by the water of the lake when at its greatest height, and forms a natural salt-pan. After the lake retires the water evaporates from the hollow, and the salt remains for the use of the Arabs. They also collect it from similar though smaller spots further south, and on the peninsula (Dr. Balfour, June 2). One feature of the beach is too characteristic to escape mention—it is broad, and widening as the line of driftwood which crosses it, marks the highest, or the ordinary high level of the water. It consists of branches of brushwood, and of the limbs of trees, some of considerable size, brought down by the Jordan and other streams, and in course of time cast up on the beach. They stand up out of the sand and shingle in curiously fantastic shapes, all signs of life gone, as it were, with a breath, buried under a sand that once through blanched look so desolate to behold. Amongst them are said to be great numbers of palm trunks (Poole, p. 69); some doubtless carried over from the palm groves on the eastern shore already spoken of and others brought down by the Jordan in the distant days when the palm flourished along its banks. The driftwood is saturated with salt, and much of it is probably of a very great age. A remarkable feature of the western shore has been mentioned to the writer by the members of Mr. Clowes' party. This is a set of 3 parallel beaches one above the other, the highest about 50 feet above the water; which, though often interrupted by ravines, and by débris, etc., can be traced for miles, and the whole distance from Wandy Za'īrān to Air Jidy. These terraces are probably alluded to by Anderson when speaking of the "seven descents" necessary to reach the floor of Wandy Susul (p. 177).

18. At the southwest corner of the lake, below

a De Saucy mentions this as a small rocky table-land, 220 by 300 feet, with an elevation of 25 feet (q. t. 1, 1884). This was evidently not the actual summit, as he speaks of the shesh occupying a post a few hundred yards above the level of that position, and further west (Norr. i. 145).

b Lynch remarks that at Air el-Feshkhah there was a "total absence of round pebbles; the shore was covered with small angular fragments of flint" (Norr. p. 274). The same at Air Jidy (p. 290).

c De Saucy, Norr. 164; Anderson, p. 175. See also a striking description of the "resemblance of a great city" at the foot of Sē'bēb, in Beaudry's Diary, etc., ii. 62.

d A specimen brought by Mr. Clowes from the foot of Sē'bēb has been examined for the writer by Dr. Price, and proves to contain no less than 9.8 per cent. of salts soluble in water, namely, chlor., sodium, 4.559, and chlor. mag. 0.241. Bromine was distinctly found.

e They are identified by Dr. Anderson.

f The salt of the Dead Sea was anciently much in request for use in the Temple service. It was preferred to all other kinds for its reputed effect in hastening the combustion of the sacrifice, while it diminished the unpleasant smell of the burning flesh. Its deliquescent character (due to the chlorides of alkaline earths it contains) is also noticed in the Talmud (Menahoth, xxi. 1; Batain). It was called "Sodom salt," but also went by the name of the "salt that does not rest" (דברה סוג של סלד), because it was made on the Sabbath as on other days, like the "Sunday salt" of the English salt-works. It is still much esteemed in Jerusalem.
where the valleys Zawra'eh and Mahmu'urfrom
down through the inclosing heights, the beach is
unwashed by the salt mountain or ridge of
Khudarn Uhlan. This remarkable object is hidden
but imperceptibly known. It is said to be quite
independent of the western mountains, lying in
front of and separated from them by a considerable
tract filled up with conical hills and short ridges
of the salt, chalky, nearly desert bare desert.
It is a long, low, crumbling outlier of several miles
long. Its northern portion runs S. S. W.: but after
more than half its length it makes a sudden
and decided bend to the right, and then runs S.
W. It is from 300 to 400 feet in height, of
considerable width, consisting of a body of crys-
talline rock-salt, more or less solid, covered with
a coating of chalky limestone and gypsum. The
lower portion, the salt rock, rises abruptly from the
glossy plain at its eastern base, sloping back at an
gle of not more than 45°, often less. It has a
strangely dislocated, shattered look, and is all fur-
rowed and worn into huge angular buttresses and
ridges, from the face of which great fragments are
occasionally detached by the action of the rains,
and terrorize the "salt pillars" already described
of the general mass. At the foot the ground is
strewed with lumps and masses of salt, salt streams
drain continually from it into the lake, and the
whole of the beach is covered with salt—soft and
slippery, and of a pinkish hue in winter and spring,
though during the heat of summer dried up into a
shining, brilliant crust. An occasional patch of
the Kali plant (Salicornia, etc.) is the only vegeta-
tion to vary the monotony of this most monoto-
 nous spot.

Between the north end of K. Uhlan and the lake is a mound covered with stones and bearing the name of um-Zogheir. It is about 60 feet in diameter and 10 or 12 high, evidently artificial, and not improbably the remains of an ancient
structure. A view of it, engraved from a photo-
graph by Mr. James Graham, is given in Isaac's
Dead Sea (p. 21). This heap M. De Saulcy main-
tained to be a portion of the remains of Sodom.
Its name is more suggestive of Zoor, and there are
great obstacles to either identification. [SODOM:
ZODAH.]

B. It follows from the fact that the lake occupies
a portion of a longitudinal depression, that its
northern and southern ends are not inclosed by
highland, as its east and west sides are. The
floor of the Ghir or Jordan Valley has been already
described. [PALESTINE, ii. 228.] As it approaches
the northern shore of the lake it breaks down by
two offsets or terraces, tolerable regular in figure
and level. At the outside edge of the second of
these a range of driftwood marks the highest level
of the waters—and from this point the beach
slopes more rapidly into the clear light-green water
of the lake.

20. A small piece of land lies off the shore about
halfway between the entrance of the Jordan and
the western side of the lake. It is nearly circular
in form, and on each side is sloping gently, and therefore its
rise, is considered to be the same as the shaft that
is often covered with water. It is described as
shaping gently upwards from the lake; flat and
barren, except rare patches of weeds round a spring.
It is soft and sliny to the tread, or in the summer
covered with a white film of salt, formed by the
evaporation of the surface water. The upper sur-
face appears to be only a crust, covering a soft
and deep subslatin, and often not strong enough
to bear the weight of the traveller. In all these par-
ticulars it agrees with the plains at the south of the
lake, which is undoubtedly covered when the waters
rise. It further agrees with it in exhibiting at the
back remains of the late tertiary deposits already
mentioned, cut out, like these about Sedeq, into
fantastic shapes by the rush of the torrents from
behind.

A similar plain (the Ghir el-Belbes, or Ghir el-
Sebe'ah) appears to exist on the N. E. corner of
the lake between the embouchure of the Jordan and
the slopes of the mountains of Moab. Beyond,
however, the very brief notice of Seetzen (ii. 573),
establishing the fact that it is "salt and stony,"
nothing is known of it.

22. The southern end is, like the northern, a
wide plain, and like it retains among the Arabs the
name of Rehob (in Afternum, Apr. 2, 1854, expressly states
that his guide called it Rehob el-zagheir."

a This island was shown to Maundrell (March 30,
1695) as containing, or having near it, the "memorium
of Lot's wife." It forms a prominent feature in the
view of the Dead Sea from its northern shore," No. 429
of Fireth's stereoscopic views in the Holy Land.

b This was especially mentioned to the writer by
Mr. David Roberts, R.A., who was nearly lost in such
a hole on his way from the Jordan to Seir Saba.

\[\text{\textbf{Statement of the ancient traveller Thienmar (A.D. 126.)}}\]

b The phrase "crossed, and therefore its
rise, at a mile from thence was shown the "salt
pillar" of Lot's wife, seems to imply that there are
masses of rock-salt at this spot, of the same nature
as that at Jewsom, though doubtless less extensive.

[Thienmar, Pereg. xi. 41.]}
We have no measure of the elevation of the plain at the foot of the southern line of mounts, but there can be no doubt that the rise from the lake upwards is, as the torrents are approached, considerable, and it seems hardly possible to avoid the conclusion that the rising of the lake which forms the southern portion of the lake itself is due to the materials brought down by this great torrent, and by those hardly inferior to it, which, as already mentioned, discharge the waters of the extensive highlands both on the east and west.

24. Of the eastern boundary of the plain we possess hardly any information. We know that it is formed by the mountains of Moab, and we can just discern that, adjacent to the lake, they consist of sandstone, red yellow, with conglomerate containing porphyry and granite, fragments of which have rolled down and seem to occupy the position which on the western side is occupied by the tertiary hills. We know also that the saddles Gbome-mul and Tafilah, which drain a district of the mountains N. of Petra, enter at the S. E. corner of the plain—but beyond this all is uncertain.

25. Of the plain itself hardly more is known than of its boundaries. Its greatest width from W. to E. is estimated at from 5 to 6 miles, while its length, from the cave in the salt mountain to the range of heights on the south, appears to be about 8.

Thus the breadth of the Ghor seems to be less than moderately less than it is anywhere north of the lake, or across the lake itself. That part of it which more immediately adjoins the lake consists of two very distinct sections, divided by a line running nearly N. and S. Of these the western is a region of salt and barrenness, bounded by the salt mountains of Khirbat Usban, and fed by the liquified salt from its caverns and surface, or by the drainage from the salt springs beyond it—and overflown periodically by the brine of the lake itself. Near the lake it bears the name of es-Sokbit, i. e., the plain of salt mud (De Saulny, p. 262). Its width from W. to E.—from the foot of K. Fidam to the belt of reeds which separates it from the Ghor es-Sosib—isa 100 miles. Of its extent to the south nothing is known, but it is probable that in the upper district, the Sokbit proper, does not extend more, at most, than 3 miles from the lake. It is a naked, marshy plain, often so boggy as to be impassable for camels (Rob. ii. 115), destitute of every species of vegetation, scored at frequent intervals by the channels of salt streams from the Jebel Fidam, or the salt springs along the base of the hills to the south thereof. As the southern boundary is approached the plain appears to rise, and its surface is covered with a countless number of those conical mounds (Poole, p. 61), the remains of late aqueous deposits, which are so characteristic of the whole of this region. At a distance from the lake a partial vegetation is found (Rob. ii. 108), clumps of reeds surrounding and choking the springs, and spreading out as the water runs off.

26. To this curious and repulsive picture the eastern section of the plain is an entire contrast. A dense thicket of reeds, almost impenetrable, divides it from the Sokbit. This past, the aspect of the

a Rocab in the spelling adopted by De Saulny.

b See the section given by Petermann in Geogr. Ann. vol. vii. 89.

c Ibry, 11 hour: De Saulny, 1 hr. 18 min. + 400 metres; Poole, 1 hr. 5 min. Section, 3 hours (i. 428).
SEA. THE SALT

and completely changes. It is a thick copse of shrubs similar to that around Jericho (Rob. ii. 113), and, like that, cleared here and there in patches where the Gloriosa, or Arals of the Ghôr, cultivate their wheat and dura, and set up their wretched villages. The variety of trees appears to be remarkable. Irby and Mangles (p. 108 b) speak of "an infinity of plants that they knew not how to name or describe." De Sauley expresses himself in the same terms — "une riche faune botanique." The plants which these travellers name are dwarf mimose, tamarisk, dom, other. Aeschynomene procera, nubuk, hack, indigo. Seetzen (i. 427) names also the Tujja ophylas. Here, as at Jericho, the secret of this vegetation is an abundance of fresh water acting on a soil of extreme richness (Seetzen, ii. 355). Besides the watercourse, in which the belt of reeds flourishes (like those north of the Lake of Huleh in the marshes which bound the upper Jordan), the Wady Knablî (or el-Abbî), a considerable stream from the eastern mountains, runs through it, and Mr. Poole mentions having passed three swift brooks, either branches of the same, or independent streams. But this would hardly be sufficient to account for its fertility, unless this portion of the plain was too high to be overflowed by the lake; and although no mention is made of any such change of level, it is probably safe to assume it. Perhaps, also, something is due to the nature of the soil brought down by the Wady el-Abbî, of which it is virtually the delta. This district, so well wooded and watered, is called the Ghôr es-Sâfîch. Its width is less than that of the Selhîch. No traveller has traversed it from W. to E., for the only road through it is apparently that to Korak, which alone takes a N. E. direction immediately after passing the reeds. De Sauley made

The Dead Sea. — View from the heights behind Selhîch (Masada), showing the wide beach on the western side of the lake, and the tongue-shaped peninsula. From a drawing made on the spot by W. Tipping, Esq.

for the first time from W. to E. (Narr. i. 263), remarked that there was no intermission in the wood before him, between the Ghôr es-Sâfîch and the foot of the hills at the extreme south of the plain. It is possible that both are right, and that the wood extends over the whole east of the Ghôr, though it bears the name of es-Sâfîch only as far as the mouth of the el-Abbî.

27. The eastern mountains, which form the back-

a The Ghoreyns of Irby and Mangles; the Khazarnas of De Sauley.

b Probably the Wady el-Tsfîch.

c See De Sauley, Narr. i. 436.

d Larger than the Wady Mojib (Seetzen, i. 427).

e Seetzen (i. 355) states that the stream, which he calls el-Hoss, is conducted in artificial channels (Kana'ah) through the fields (also i. 427). Poole names them Ain Aškâh.

f Mr. Tristram found even at the foot of the salt mountain of Usdum that about 2 feet below the salt surface there was a splendid alluvial soil; and he has suggested to the writer that there is an analogy between this plain and certain districts in North Africa, which, though fertile and cultivated in Roman times, are now barren and covered with efflorescence of natron. The cases are to a certain degree parallel, inasmuch as the African plains (also called Schelœ) have their salt mountains (like the Khoshû Usdum, "isolated from the mountain range behind," and flanked by small mamelons bearing stunted heritage), the streams from which supply them with salt (The Great Sphinx, p. 74, &c.). They are also, like the Selhîch of Syria, overflowed every winter by the adjoining lake.
SEA. THE SALT

ground to this district of woodland, are no less naked and rugged than those on the opposite side of the valley. They consist, according to the reports of Seton (i. 354), Pole, and Lynch, of a red sandstone, with limestone above it — the sandstone in horizontal strata with vertical cleavage (Lynch, Narr. pp. 311, 313). To judge from the fragments at their feet, they must also contain very fine brecciae and conglomerates of granite, Jasper, greenstone, and ledge of varied color. I was and Mangles mention also porphyry, serpentine, and limestone, but Seton expressly declares that of basalts be there found none trace.

Of their height nothing is known, but all travelers concur in estimating them as higher than those on the west, and as preserving a more horizontal line to the south.

After passing from the Ghur es-Safakeh to the north, a salt plain is encountered resembling the Sibkah, and like it overflowed by the lake when high (Seton. i. 355). With this exception the mountains come down abruptly on the water during the whole length of the eastern side of the lagoon. In two places only is there a projecting beach, apparently due to the deltas caused by the wadys es-Nemeriah and Ukeimin. The Sibkah was arrived at the peninsula which projects from the eastern shore and forms the north enclosure of the lagoon. It is too remarkable an object, and too characteristic of the southern portion of the lake, to be passed over without description.

It has been visited and described by three explorers — Irvy and Mangles in June, 1818; Mr. Pole, Esq. in December, 1855, and the latter in an expedition in April, 1848. Among the Arabs it appears to bear the names Ghur es-Mezrakah and Ghur el-Lisina. The latter name — "the Tongue" — recalls the similar Hebrew word bisbna, بَسْبَنَة, which is employed three times in relation to the lake in the specification of the boundaries of Judah and Benjamin, contained in the book of Joshua. But in its three occurrences the word is applied to two different places — one at the north (Josh. xv. 5, xviii. 19), and one at the south (xiv. 2); and it is probable that it signifies in both cases a tongue of land — that is, a tongue of land.

29. Its entire length from north to south is about 10 geographical miles, and its breadth from 5 to 6 — though these dimensions are subject to some variation according to the time of year. It appears to be formed entirely of recent aqueous deposits, late, or post-tertiary, very similar, if not identical, with those which face it on the western shore, and with the "mounds" which skirt the plains at the south and N. W. of the lake. It consists of a friable carbonate of lime intermixed with sand or sandy marls, and with frequent masses of sulphate of lime (gypsum). The whole is impregnated strongly with sulphur, lumps of which are found, as far as the north end of the lake, and also with salt, existing in the form of numerous heaps or packs of rock-salt (And. p. 187). Nitre is reported by Irvy (p. 139), but neither Pole nor Anderson succeeded in meeting with it. The stratification is almost horizontal, with a slight dip to the east (Pole, p. 63). At the north it is worn into a sharp ridge or mane, with very steep sides and serrated top. Towards the south the top widens into a table-land, which Pole (ibid.) reports as about 239 ft. above the level of the lake at its southern end. It breaks down on the W., S., and N. E. sides by steep declivities to the shore, furrowed by the rains which are gradually washing it into the lake, into cones and other fantastic forms, like those already described on the western bank near Sibkah. It is an almost uninterrupted plain, flooded partly by the blazing sun, and contrasted with the deep blue of the lake (Le Bon, p. 104). A scanty growth of shrubs (Pole, p. 64) — so scanty as to be almost invisible (Irvy, p. 138) — is found over the table-land. On the east the highland descends to a depression of 1 or 2 miles wide, which, from the description of Dr. Anderson (p. 184) appears to run from the N. of S. N. to the NW. of S. E. It is crossed by a broad mane, which appears at the eastern end of the lake. It will doubtless be ultimately worn down quite to the level of the water, and then the peninsula will become an island (Anderson, pp. 184, 189). Into this valley lead the torrents from the ravines of the mountains on the east. The principal of these is the Wady es-Derat or W. Kerek, which leads up to the city of that name. It is here that the few inhabitants of the peninsula reside, in a wretched village called Mezarah. The soil is of the most unproductive fertility, and only requires water to burst into riotous productivity of vegetation (Seton, ii. 351, 352).

30. There seems no reason to doubt that this peninsula is the remnant of a bed of late aqueous strata, which were deposited at a period when the

a This appellation is justified by the view on the preceding page.

b From the expression being in the first two cases "tongue of the sea," and in the third simply "tongue," M. de Sauley conjectures that in the last case a tongue of land is intended: but there is nothing to warrant this. It is by no means certain whether the two Arabic names just mentioned apply to different parts of the peninsula, or are given indiscriminately to the whole. Ghur es-Mezrakah is the only name which Seton mentions, and he attaches it to the whole. It is also the only one mentioned by Dr. Anderson, but he restricts it to the depression on the east side of the peninsula, which runs south and north, and intervenes between the main body and the foot of the eastern mountains (And. p. 184). M. de Sauley is apparently the earliest traveler to mention the name Lisina. He (Jan. 15) ascribes it to the whole peninsula in its broader sense, as well as to those which face it on the western shore, and to the agricultural portion, particularly to its southern portion, — "Le Lisan actuel des Arabes, c'est-à-dire la pointe sud de la presqu'île," (Voyage, i. 290). And this is supported by the practice of

Van de Velde, who on his map marks the north portion of the peninsula as Ghur es-Mezrakah, and the south Ghur es-Lisina. M. de Sauley also specifies with much definite the position of the former of these two as at the opening of the Wady es-Derat (Jan. 10). The point is well worth the attention of future travelers, for if the name Lisina is actually restricted to the south side, a curious confirmation of the accuracy of the ancient survey recorded in Josh. xv. 2 would be furnished, as well as an extra mark of the true character of the name.

c This dimension, which Mr. Pole took with his anegro, is strangely at variance with the estimate of Lynch's party. Lynch himself, on approaching it at the north point (Narr. p. 297), states it at from 40 to 60 feet high, with a sharp angular central ridge some 20 feet above that. This last feature is mentioned also by Irvy (June 2). Anderson increases the dimension of the peak to 30 ft., and in the garden-palace of the Envoy this falls short of Pole. The peninsula probably slopes off considerably towards the north end, at which Lynch and Anderson made their estimate.
SEA. THE SALT

water of the lake stood very much higher than it
now does, but which, since it attained its present
level, and thus exposed them to the action of the
winter torrents, are gradually being disintegrated
and carried down into the depths of the lake. It
is in fact an intrusion upon the form of the lake, as
originally determined by the rocky walls of the
great fissure of the Ghor. Its presence here, so
long after the great bulk of the same formation has
been washed away, is an interesting and fortunate
circumstance, for it plainly shows evidence of a
stage in the existence of the lake, which in its
absence might have been inferred from analogy,
but could never have been affirmed as certain.
May have been deposited either by the general
action of the lake, or by the special action of a river,
posibly in the direction of holy Kerak, which
in that case formed this extensive deposit at its
mouth, just as the Jordan is now forming a similar
bank at its embouchure. If a change were to take
place which either lowered the water, or elevated
the bottom of the lake, the bank at the mouth
of the Jordan would be hid here, as the Liasin now
is, and would immediately begin to undergo the
process of disintegration which that is undergoing,
without reference to the difference between the
depth of the two portions of the lake — north and
south of the peninsula — has been already alluded to,
and may be seen at a glance on the section
given on page 287. The former is a bowl, which
at one place attains the depth of more than 1,300
feet, while the average depth along its axis may be
taken at near short of 1,000. On the other hand
the southern portion, to say nothing of the greater
part of its area nearly level, a very few feet only
below the surface, shoaling gradually at the edges
till the brink is reached. So shallow is this basin
that it is sometimes possible to ford right across
from the west to the east side (Setzen, i. 428, ii.
358; Rob. i. 521; Lynch, Narr., p. 594).
The channel connecting the two portions, on the
western side of the peninsula, is very gradual in
its slope from S. to N., increasing in depth from 3
fathoms at 15, and from 13 to 19, 32 and 56,
when it suddenly drops to 107 (642 feet), and
joins the upper portion.
A circular portion above the peninsula,
and a part of the channel, form a marsh-like
district separated from the basin of the lake proper.
This portion and the plain of the south as far as the rise or offset at which the
Arabah commences—a district in all of some
16 miles by 8—would appear to have been left by
the last great change in the form of the ground
at a level not far below its present one, and
consequently much higher than the bottom of the
lake itself. But surrounded as it is on three sides
by highlands, the waters of which have no other
outlet, it has become the delta into which those
waters discharge themselves. On its south side are
the immense torrents of the Idb, the Jamarat,
and the Felshe. On the east the somewhat less
important el-Mag, Nu'mairah, Umair, and el-
Dawlah. On the west the Zawairah, Mobayghdeh,
and Sebq. These streams are the drains of a dis-

tinct not less than 6,000 square miles in area, very
meager in form, and composed of materials more or
less indurated. They must therefore bring down
certain quantities of silt and chalce. There can be
little doubt that they have already filled up the
southern part of the estuary as far as the present
brink of the water, and the silting up of the
rest is merely a work of time. It is the same
process which is going on, on a larger and more rapid
scale, in the Sea of Azov, the upper portion of which
is fast filling up with the detritus of the river Don.
Indeed the two portions of the Dead Sea present
several points of analogy to the Sea of Azov and
the Black Sea.

It is difficult to speak with confidence on any of
the geological features of the lake, in the absence
of reports by competent observers. But the theory
that the basin was lowered by a recent change,
and overlapped (Robinson, Bibl. Res. ii. 189), seems
directly to contradict the previous inference from
the fact that such large torrents discharge themselves
into that spot. There is nothing in the appear-
ance of the ground to suggest any violent change
in recent (i. e. historical) times, or that anything
has taken place but the gradual accumulation of the
deposits of the torrents all over the delta.
33. The water of the lake is not less remarkable
than its other features. Its most obvious peculi-
arity is its great weight. Its specific gravity
has been found to be as much as 1.228; that is
to say, a gallon of it would weigh over 12 lbs.
instead of 10 lbs., the weight of distilled water.
Water so heavy must not only be extremely buoyant
but must possess great inertia. Its buoyancy is a
common theme of remark by the travelers who have been upon it or in it. Josephs
(2. J. iv. 3, § 4) relates some experiments
made by Vespasian by throwing bound criminals
into it; and Lynch, bathing on the eastern shore
near the mouth of the Wady Zarka, says (Narr.
p. 371), in words curiously parallel to those of
the old historian, "With great difficulty I kept my
feet dry, and when I laid upon my back, and
drawing up my knees, placed my hands upon them,
I rolled immediately over." In the bay on the
north side of the peninsula, "a horse could with
difficulty keep himself afloat. Two fresh hens'
eggs floated up one-third of their length," i. e.
with one-third exposed: "they would have sunk in
the water of the Mediterranean or Atlantic" (Narr.
p. 342). "A muscular man floated nearly
breast high without the least exertion" (ibid. p. 325).
One of the things remembered by the Maltese ser-

a When sounded by Lynch, its depth over the
greater part of the area was 12 feet.

b He fixes the ford at an hour north of the N.
and the Goz Uidham.

c Across this, too, there is a ford, described in some
detail by Irby and Mangles (June 2). The water must
have been unusually low, since they not only state
that chairs were drawn across to the action of the
width did not exceed a mile, a matter in which the
keen eye of a practical sailor is not likely to have
been deceived. Lynch could not trace of either
ford, and his map shows the channel as fully two
miles wide at its narrowest spot.

d Pronounced Muhurrúk; the Embarque of De
Saucy.

e On the salt lakes in Northern Persia (Uruuq, etc.) nothing is yet known. Wagner's account is very
certain. Those in Southern Russia have been fully
investigated by Goebel (Reisen, etc., Dorpat, 1837).
The heaviest water is that of the "Red Sea," near
the Dead Sea (Perekop) (water contents 57.22 per cent.;
sp. gr. 1.231). The others, including those of the Caspian
or Elton, contain from 21 to 25 per cent of solid mat-
ter in solution, and range in sp. gr. from 1.07 to
1.08.
The sea has been already mentioned. It is the result of the prodigious evaporation. Lynch continues to mention it. In (June 1) saw it in broad, transparent columns, like water-spears, only very much larger. Extraordinary effects of mirage due to the unequal refraction produced by the heat and moisture are occasionally seen by Lynch, No. 320.

The remarkable weight of this water is due to the very large quantity of mineral salts which it holds in solution. The details of the various analyses are given on p. 2581 in a tabular form, accompanied by that of sea-water for comparison. From that of the U. S. expedition it appears that each gallon of the water, weighing 12 lbs., contains nearly 3 lbs. (3.219) of matter in solution—an immense quantity when we recollect that sea-water, weighing 10 lbs. per gallon, contains less than \( \frac{1}{2} \) a lb. Of this 3 lbs. nearly 1 lb. is common salt (chloride of sodium); about 2 lbs. chloride of magnesium, and less than \( \frac{1}{3} \) a lb. of chloride of calcium (or nitrate of lime). The most unusual ingredient is bromide of magnesium, which exists in truly extraordinary quantity. Its presence is due to the therapeutic reputation enjoyed by the lake when its water was sent to Rome for wealthy invalids (taken, in Reland, Pol. p. 242), and lepers flocked to its shores (Ann. Mar. § x.). Bonnepin (lun. de Chimie, 1836, xlvii. 168) remarks that it ever brooks should become an article of commerce, the Dead Sea will be the natural source for it. It is the magnesium compounds which impart so nauseous and bitter a flavor to the water. The quantity of common salt in solution is very large. Lynch found (Norr. p. 377) that while distilled water would dissolve 5-17 lbs. of its weight of salt, and the water of the Atlantic 1-6th, the water of the Dead Sea was so nearly saturated as only to be able to take up 1-11th.

The sources of the components of the water may be named generally without difficulty. The line and magnesium proceed from the dolomite limestone of the surrounding mountains; from the gypseum which exists on the shore, nearly pure, in large quantities; and from the carbonate of lime and carbonate of magnesium found on the peninsula and especially on the island. The carbonate of sodium is supplied from Khasum Usalum, and the copious brine springs on both shores. Balls of nearly pure sulphur (probably the deposit of some sulphurous stream) are found in the neighborhood of the lake, on the peninsula (Anderson, p. 187), on the western beach and the northwestern heights (ibid. pp. 176, 180, 169), and on the plain of Jericho (Rev. G. W. Bridges). Nitre may exist, but the specimens mentioned by Iry and others are more probably pieces of rock salt, since no trace of nitric acid has been found in the water or soil (Marechal, p. 379). Manganese, iron, and alumina have been found on the peninsula (Anderson, pp. 185, 187), and the other constituents are the product of the numerous mineral springs which surround the lake and the washings of the aqueous great as in the ocean and 74 times as great as in the Krenosion water, where its strength is considered remarkable.

On the subject of the bitumen of the lake, the water has nothing to add to what is said under Palestine, in 1926, and 1927.

The brine has not yet been satisfactorily traced. The salt of Khasum Usalum has been analyzed for its discovery (see above), but is lost in vain. Marshall sa

---

* With the single exception of Molanderhausen, who when he first opened the specimen he analyzed, found it to smell strongly of sulphur.

* This is the same reason the water was taken from a considerable depth in the centre of the lake, and therefore probably more fairly represents the average composition than the others.

* A testing Marshall's analysis, it appears that the quantity of this salt in the Dead Sea is 123 times.

No. 1. The figures in the table are the recollections of Marchand (Journal, etc., p. 552) on the basis of the improved chemical science of his time. The original analysis is in Naukurm. der Akad., 1832, i. 383.

No. 2. See The Athenæum, June 15, 1839.

No. 6. Journal de Pharmacie et de Chimie, March 1852.

No. 7. Calculated by the writer from the proportionate table of salts given in Stewart’s Text and Icon, p. 331.

No. 9. Regnault’s Cours Éém. de Chimie, ii. 199.

The older analyses have not been reprinted, the methods employed having been imperfect and the results uncertain as compared with the more modern ones quoted. They are as follows: (1.) Marquier, Lavosier, and Lasegne (M. d. l’Acad. des Arts, Sciences, 1788); (2.) Marcet (Phil. Trans., 1807, p. 226, 227, 228); (3.) Krophahl (Moz. der Gualsha, 1811, p. 187); (4.) Abbe Leblanc (Ann. de Chimie, xi. (1811) 177); (5.) Hermabes and Schweiger’s Journal, xxxiv. 163.

Want of space compels the omission of the analysis of Bionsлагут of water collected in spring, 1850 (Ann. de Chimie, xlvii. (1855) 129-130), which correspond very closely with that of Gmelin (namely, sp. gr. 1.194, salts, 22.75 per cent), as well as that of Comines (quoted in the same paper) of water collected in June, 1855, showing sp. gr. 1.196 and salts 18.26 per cent. Another analysis by Professor W. Gregory, giving 19.25 per cent. of salts, is quoted by Kitch (Phys. Geogr. p. 574).

The writer has been favored with specimens of water collected 13th November, 1839, by the Rev. W. Middleton, and 7th April, 1888, by Mr. B. J. Wilson, both were taken from the north end. The former, which had been carefully sealed up until examination, exhibited sp. gr. 1.182, solid contents, 21.59 per cent; the latter, sp. gr. 1.184, solid contents, 22.188, the boiling point in both cases 229° 4 Fahr. — a singular agreement, when it is remembered that one species was obtained at the end, the other at the beginning of summer. For this investigation, and much more valuable assistance in this part of his article, the writer is indebted to his friend, Dr. David Simpson Price, F. C. S.

The inferiority in the quantity of the salts in Nos. 2, 6, and 8 is very remarkable, and must be due to the fact acknowledged in the two first that the water was obtained during the rainy season, or from near the entrance of the Jordan or other fresh water. Nos. 7 and 8 were collected within two months of each other. The preceding winter, 1854-55, was one of the wettest and coldest remembered in Syria, and yet the writer of any of the two analyses shows a largely preponderating quantity of salts. There is sufficient discrepancy in the whole of the results to render it desirable that a fresh set of analyses should be made, of water obtained from various defined spots and depths, at different times of the year, and investigated by the same analyst. The variable density of the water was observed as early as by Galen (see quotations in Reland, Pal. p. 292).

The best paper on this interesting subject are those of Gmelin, Marchaud, Herapath, and Rousin (see the references given above). The second of these contains an excellent review of former analyses, and most instructive observations on matters more or less connected with the subject.

The absence of iodine is remarkable. It was previously searched for by both Herapath and Marchand, but without effect. In September, 1834, the writer obtained a large quantity of water from the island at the north end of the lake, which he reduced by boiling on the spot. The concentrated salts were afterwards tested by Dr. B. S. Price by his nitrate of potash test (see Chem. Soc. Journal for 1854), with the express view of detecting iodine, but not a trace could be discovered.

* Dr. Anderson Off. Rep. p. 205 states that in water from “another part” of the lake he found as much as 4.8 per cent chlor. calcium.
ous deposits on the shores (see § 17), which are gradually restoring to the lake the salts they received from it ages back, when covered by its waters. The strength of these ingredients is heightened by the continual evaporation, which (as already stated) is sufficient to carry off the whole amount of the water supplied, leaving, of course, the salts in the lake; and which in the Dead Sea, as in every other lake which has affluents but no outlets, is gradually concentrating the mineral constituents of the water, as in the alembic of the chemist. When the water becomes saturated with salt, or even before, deposition will take place, and salt-heaps be formed on the bottom of the lake. If, then, at a future epoch a convulsion should take place which should upheave the bottom of the lake, a salt mountain would be formed similar to the Khasabah Ushut; and this is not improbably the manner in which that singular mountain was formed. It appears to have been the bed of an ancient salt lake, which, during the convulsion which depressed the bed of the present lake, or some other remote change, was forced up to its present position. Thus these heaps of salt, which have been seen lying on all the shores of the house of Dead Sea; and the present lake but one of a numerous series.

38. It has been long supposed that no life whatever existed in the lake. But recent facts show that some inferior organisms can and do find a home even in these salt and acid waters. The Cabinet d'Hist. Naturelle at Paris contains a fine specimen of a coral called Stylloghora platythere, which is stated to have been brought from the lake in 1837 by the Marq. de l'Escanquier, and has every appearance of having been a resident there, and not an ancient or foreign specimen. Ehrenberg discovered 11 species of Polyaster, 2 of Polythalamie, and 5 of Ptyolitharias, in mud and water brought home by Lepanus (Monasth. d' Hist. Pr. d'Edel, June, 1849). The sand was taken from the north end of the lake, 1 hour N. W. of the Jordan, and far from the shore. Some of the specimens of Polyaster exhibited ovaries, and it is worthy of remark that all the species were found in the water of the Jordan also. The copious phosphorescence mentioned by Lynch (Narr. p. 280) is also a token of the existence of life in the waters. In a warm salt stream which rose at the foot of the Jebel Ushut, at a few yards only from the lake, Mr. Poole (Nov. 4) caught small fish (Cypripodius hammonis) 1 inch long. He is of opinion, though he did not ascertain the fact, that they are denizens of the lake. The melampus shells found by Poole (p. 67) at the fresh springs

2892 SEA, THE SALT

amined a specimen of sfd from a "salt-plain called Esph." 14 hour W. of the lake, and found it to contain an appreciable quantity of bromine (Journal for prakt. Chemie, xiiii. 399, 370). In addition to the obvious sources named in the text, there are doubtless others less visible. The remarkable variation in the proportions of the constituents of the water in the specimens obtained by different travellers (see the analyses) leads to the inference that in the bed of the lake there are masses of mineral matter, or mineral springs, which may modify the constitution of the water in their immediate neighborhood.

9. This is already occurring, for Lynch's soundings lead several times brought up cubital crystals of salt, sometimes with mud, sometimes alone (Narr. pp. 281, 287; comp. M'Pheron, p. 127). The lake of Assul, on the E. coast of Africa, which has neither affluent nor outlet, is said to be concentrated to (or nearly to) the point of saturation (Edin. N. Phil. Journ. April, 1855, p. 250).

9. This interesting fact is mentioned by Humboldt (Views of Nat. p. 270); but the writer is indebted to the kind courtesy of M. Valenciennes, keeper of the Cabinet, for confirmation of it. Humboldt gives the coroll name of Parisis idemata, but the writer has the authority of Dr. P. Duncan for saying that its true designation is Styloghora pinit. Unfortunately nothing whatever is known of the place or manner of its discovery; and it is remarkable that after 23 years no additional specimen should have been acquired. It is quite possible for the coral in question to grow under the conditions presented by the Dead Sea, and it is true that it abounds also in the Red Sea; but it will not be safe to draw any deduction from these facts till other specimens of it have been brought from the lake.
SEA, THE SALT

eastern sides and the peninsula, are described as a poor stunted race; but this is easily accounted for by the heat and drying influence of the climate, and by their meagre way of life, without inferring any thing specially unwholesome in the ablations of the lake. They do not appear to be more stunted or meagre than the natives of Jericho, or, if more, not more than would be due to the fact that they inhabit a spot 500 to 600 feet further below the surface of the sea than the inhabitants of Jericho. Considering the hard work which the American party accomplished in the tremendous heat (the thermometer on one occasion 105°, after sunset, Narr. p. 314), and that the sounding and working the boats necessarily brought them a great deal into actual contact with the water of the lake, their general health is a proof that there is nothing pernicious in the proximity of the lake itself.

A strong smell of sulphur pervades some parts of the western shore, proceeding from springs or streams impregnated with sulphuretted hydrogen (De Saulcy, Narr. i. 192; Van de Velde, ii. 193; Beaufort, ii. 113). It accompanied the north wind which blew in the evenings (Lynch, pp. 292, 294). But this smell is much more marked, though less nauseous, than it is more generally, though, in fact. M. de Saulcy compares it to the bitches of Barèges. The Subhah has in summer a "strong musky smell," from the partial desiccation of the ditches which convey the drainage of the salt springs and salt rocks into the lagoon; but this smell can hardly be stronger or more unhealthy than it is in the marshes above the lake el-Huleh, or in many other places where marshy ground exists under a sun of equal power; such, for example, as the marshes at Usbat-anin, quoted by Mr. Porter (Handbook, p. 291 n).

42. Of the botany of the Dead Sea little or nothing can be said. Dr. Hooker, in his portion of the article PALESTINE, has spoken (iii. 2512, 2533) of the vegetation of the Ghor in general, and of that of *Alač Idol*, and the N. W. shore of the lake in particular. Beyond these, the only parts of the lake which he explored, nothing accurate is known. A few plants are named by Setzen as inhabiting the Ghor es-Sufeh and the peninsula. Such, these as they are, have been already mentioned. In addition, the following are enumerated in the tract "Travels in the Holy Land and through Syria, North Africa, Egypt, and Nubia" (4to of Lynch, and the *Proie de De Saulcy* (Atlas des Planches, etc.). At *Alač Idol*, *Rehbo* lutea, *Maius syriaca*, *Globa lobata*, *Selina reflexa*, *Selica syriaca*, *Euphorbiia syriaca*, and *Walloma synconia*. On the southeastern and eastern shore of the lake, at the Ghor es-Sufeh, and on the peninsula, they name *Zygophyllum aquilegifera*, *Zygophyllum coccineum*, *Ruta leonina*, *Zygophyllum spinia Christi*, *Mulinera*, *Alston canariensis*, *Sideritis persica*, *Iphya fontanesi*, *Persilium tingitannum*, *Selima villosa*, *Euphorbiia pallas*, *Erythrodistachum pumilum*, *Corco synthefylla*, and *Heliotropium alcibibium*. At *Alač Idol*, *Arab Chaceir*, *Arab Terzeh*, and other spots on the western shore, they name, in addition to those given by Dr. Hooker, Esbe *nativae*.

a M. Van de Velde's watch turned black with the sulphur in the air of the hills and ravines south of Masada. Mr. Beaufort, (at Becket el-Koof) says it was "very strong, immensely more nauseous than that of the springs of Talmor."

b Lynch's lists were drawn up by Dr. R. Egehedi Gruith; and De Saulcy's by the Abbé Mihon, who himself collected the chief of the specimens.

from its waters like the smoke of some infernal furnace, filling the whole neighborhood with a misa
which has destroyed all life within its reach.

43. The truth lies, as usual, somewhere between these two extremes. On the one hand the lake certainly is not a gloomy, deadly, smoking gulf. In this respect it does not at all fulfill the promise of its names. The sunsets here are more suggestive of the dead solitude of the mountain tarns of Wales or Scotland, the perpetual twilight and undisturbed lingering decay of the Great Dismal Swamp, or the reeking masses of the Patrician Sea of the Crimea. Death can never be associated with the wonderful brightness of the sun of Syria, with the cheerful reflection of the calm bosom of the lake at some periods of the day, or with the regular alternation of the breezes which ruffle its surface at others. At sunrise and sunset the scene must be astonishingly beautiful. Every one who has been in the West of Scotland knows what extraordinary pictures are sometimes seen mirrored in the sea-water holes when they are unruffled in the calm of early morn
or of sunset. The reflections from the bosom of the lake, at such times, to suppose for a moment, if it please the mind, as the lines of the mountains which encircle it, when lit up by the gorgeous rising and setting suns of Syria, surpass in brilliancy and richness those of the hills around Loch Fyne and Loch Goyle. One such aspect may be seen — and it is said by competent judges to be no exaggerated representation — in the 'Scenery' of Mr Holman Hunt, which is a view of the Moab mountains at sunset, painted from the foot of Jobel Ushab, looking across the lower part of the bay. But on the other hand, with all the brilliancy of its illumination, its frequent beauty of coloring, the fantastic grandeur of its melting mountains, and the tranquil charm afforded by the reflection of that unquenched sky on the no less unquenched mirror of the surface — with all these there is something in the prevalent sterility and the dry, burnt look of the shores, the overpowering heat, the occasional smell of sulphur, the dreary salt marsh at the southern end, and the fringe of dead driftwood round the margin, which must go far to excuse the title which so many ages have attached to the lake, and which we may be sure will never be effaced.

45. It does not appear probable that the condition or aspect of the lake in Biblical times was materially different from what it is at present. Other parts of Syria may have deteriorated in climate and appearance owing to the destruction of the wood which once covered them, but there are no traces either of the ancient existence of wood in the neighborhood of the lake, or of anything which would account for its destruction, supposing it to have existed. A few spots, such as Ain Jul, the mouth of the Wady Zareiba, and that of the Wady ed-Deir, were more cultivated, and consequently more populous than they are under the discouraging influences of Mohammedanism. But such attempts must always have been partial, confined to the immediate neighborhood of the fresh springs and to a certain degree of elevation, and even relatively irrigation was neglected. In fact the climate of the shores of the lake is too arid and trying to allow of any considerable amount of civilized occupation being conducted there. Nothing will grow without irrigation, and artificial irrigation is too laborious for such a situation. The plain of Jericho, we know, was cultivated like a garden, but the plain of Jericho is very nearly on a level with the spring of Ain Jul, some 50 feet above the Ghbor el-Zareiba the Ghbor es-Sheikh, or other cultivable portions of the beach of the Dead Sea. Of course, as far as the capabilities of the ground are concerned, provided there is plenty of water, the hotter the climate the better, and it is not too much to say that the State of Jericho, which is a sort of irrigation basin and maintains the plain of Jericho and, still more, the shores of the lake (such as the peninsula and the southern plain), might be the most productive spots in the world. But this is not possible, and the difficulty of communication with the external world would make it (as it must always have been) a serious bar to any great agricultural efforts in this district.

When Machernus and Callirrhoë were inhabited (if indeed the former was ever more than a fortress, and the latter a bathing establishment occasionally resorted to), and when the plain of Jericho was occupied by the crowded population necessary for the cultivation of its balsam-gardens, vineyards, sugar-plantations, and palm-groves, there may have been a little more life on the shores. But this can never have materially affected the lake. The track along the western shore and over Ain Jul was then, as now, used for secret narrating expeditions, not for poisonous or commercial traffic. What transport there may have been between Idumæa and Jericho came by some other channel. A doubtful passage in Josephus, and a reference by Edrisi (ed. Ham
dert, in Ritter, Joebuch, p. 700) to an occasional vent
of the people of ' Zara and Dara ' in the 12th century, are all the allusions known to exist to the navigation of the lake, until Englishmen and Americans launched their boats on it within the last twenty years for purposes of scientific investiga
tion. The temptation to the dwellers in the environs must always have been to ascend to the

The remarks in the text refer to the mountains which form the background to this remarkable painting. The title of the picture and the accidents of the fore
ground give the key to the sentiment which it conveys, which is certainly that of loneliness and death. But the mountains would form an appropriate background to a scene of a very different description.

Cited by Rohl (Pal. p. 252) as 'liber v. de bell. cap. 3.' But title — if it can be verified, which the writer has not yet succeeded in doing — only shows that the Romans on one occasion, sooner than let their fugitives escape them, got some boats over and put them on the lake. It does not indicate any continued navigation.

The description of Ctesias in 357, Moore and Feek in 1837, Symonds in 1841, Molyneux in 1847, Lynch in 1848.
fresher air of the heights, rather than descend to the sultry climate of the shores.

47. The connection between this singular lake and the Biblical history is very slight. In the topographical records of the Pentateuch and the Book of Joshua it forms one among the landmarks of the boundaries of the whole country, as well as of the inferior divisions. Biblical and Hebraic attention has been already drawn to the minute accuracy with which, according to the frequent custom of these remarkable records, one of the salient features of the lake is singled out for mention. As if landmark it is once named in what appears to be a quotation from a lost work of the prophet Jonah (2 K. xiv. 20), itself apparently a reminiscence of the old Mosaic statement (Num. xxxiv. 12). Besides this the name occurs once or twice in the imagery of the Prophets. In the New Testament there is not even an allusion to it. There is, however, one passage in which the "Salt Sea" is mentioned in a different manner to any of those already quoted, namely, as having been in the time of Abraham the Vale of Sodom (Gen. xiv. 3). The narrative in which this occurs is now generally acknowledged to be one of the most ancient of those venerable documents from which the early part of the book of Genesis was compiled. But a careful examination shows that it contains a number of explanatory statements which cannot, from the very nature of the case, have come from the pen of its original author. The sentences, "It is that which is Zoar" (2 and 8); "En-Mishpat which is Kadesh" (7); "the Valley of Shaveh which is the King's Valley" (17); and the one in question, "the Vale of Siddim which is the Salt Sea" (3), are evidently explanations added by a later hand at a time when the ancient names had become obsolete. These remarks (or, as they are termed, "memorials") stand on a perfectly different footing to the words of the original record which they are intended to elucidate, and whose antiquity they enhance. It bears every mark of being contemporary with the events it narrates. They merely enfold the opinion of a later person, and must stand or fall by their own merits.

48. Now the evidence of the spot is sufficient to show that no material change has taken place in the upper and deeper portion of the lake for a period very long anterior to the time of Abraham. In the lower portion—the lagoon and the plain below it—if any change has occurred, it appears to have been rather one of reclamation than of submersion—the gradual settling up of the district by the torrents which discharge their contents into it (see § 23). We have seen that, owing to the gentle slope of the plain, temporary fluctuations in the level of the lake would affect this portion very materially; and it is quite allowable to believe that a few wet winters followed by cold summers, would raise the level of the lake sufficiently to lay the whole of the district south of the lagoon under water, and convert it for the time into a part of the "Salt Sea." A rise of 20 feet beyond the ordinary high-water point would probably do this, and it would take some years to bring things back to their former condition. Such an exceptional state of things the writer of the words in Gen. xiv. may have had in mind and placed on record.

49. This is not repeated as a possible explanation; and it assumes the Vale of Siddim to have been the plain at the south end of the lake, for which there is no evidence. But it seems to the writer more natural to believe that the author of this note on a document which even in his time was probably of great antiquity, believed that the present lake covered a district which in historic times had been permanently habitable dry land. Such was the implicit belief of the whole modern world—with the exception perhaps of Ireland—till within less than a half a century. Even so lately as 1830 the formation of the Dead Sea was described by a divine of our Church, remarkable alike for learning and discernment, in the following terms:

"The Valley of the Jordan, in which the cities of Sodom, Gomorrah, Admah, and Zeloah, were situated, was rich and highly cultivated. It is most probable that the river then flowed in a deep and uninterrupted channel down a regular descent, and discharged itself into the eastern gulf of the Red Sea. The cities stood on a soil broken and undermined with veins of bitumen and asphalt. These impenetrable substances set on fire by lightning caused a terrible convulsion; the water courses—both the river and the canals by which the land was extensively irrigated—burst their banks: the cities, the walls of which were perhaps built from the combustible materials of the soil, were entirely swallowed up by the fiery inundation, and the whole valley, which had been compared to Paradise and the well-watered corn-fields of the Nile, became a dead and fetid lake" (Milman, Hist. of the Jews, 21 ed., i. 15).

In similar language does the usually cautious Dr. Robinson express himself, writing on the spot, before the researches of his countrymen had revealed the depth and nature of the chasm, and the consequent submersion of the plain. In the form of a letter written to Sir John Philip, Governor of the British possessions in the southern mountains and the deep clefts of the rent earth are here tokens of the wrath of God, and of his vengeance upon the guilty inhabitants of the plain" (Bibl. Res. i. 529).

Now if these explanations—so entirely groundless, when it is recollected that the identity of the Vale of Sodom with the Plain of Jordan, and the submersion of the cities, find no warrant whatever in Scripture—are promulgated by persons of learning and experience in the 19th century after Christ, surely it need occasion no surprise to find a similar view put forward at the time when the contradictions involved in the statement that the Salt Sea writer, another form is used—יָבִא —as in "Ed-Paron, which is by the Wilderness" (61, "Holah, which is on the left hand of Damascus") (15).

50. See his chapter De locis Apparitivis in Ptolemaio, lib. i. cap. xxxviii.—truly admirable, considering the scanty materials at his disposal. He seems to have been singularly displacive the idea that the cities of the plain were submerged.

51. Even Lycet. Lynch can pause between the cease of the beast to apostrophize the "unhallowed sea... the record of God's wrath," or to notice the "sevenths of fire light," cast abroad by the phosphorescence, etc. "(Noy. pp. 254, 255, 259).
had once been the Vale of Siddim could not have presented themselves to the ancient commentator who added that explanatory note to the original record of Gen. xiv. At the same time it must not be overlooked that the passage in question is the only one in the whole Bible—Old Testament, Apocrypha, or New Testament—to countenance the notion that the cities of the plain were submerged: a notion which the present writer has endeavored elsewhere to show does not date earlier than the Christian era.

50. The writer has there also attempted to prove that the belief which prompted the statements just quoted from modern writers, namely, that the Dead Sea (nowabouts)/Sea of the Plain of the Jordan,' was not, however, recognized by inexperienced observers, nor, if seen, is the deduction from them so obvious. The very few competent geologists who have visited the spot—both those who have published their observations (as Dr. Anderson, geologist to the American expedition), and those who have not, concur in stating that no certain indications exist in or about the lake, of volcanic action within the historical or human period, no volcanic craters, and no conkes of lava traceable to any vent. The igneous rocks described as lava are more probably basalt of great antiquity: the bitumen of the lake has nothing necessarily to do with volcanic action. The scoured, calcined look of the rocks in the immediate neighborhood, of which so many travellers have spoken as an evident token of the conflagration of the cities, is due to natural causes—to the gradual action of the atmosphere on the constituents of the stone.

The destruction of Sodom and Gomorrah may have been by volcanic action, but it may be safely asserted that no traces of it have yet been discovered, and that, whatever it was, it can have had no connection with that far vaster and far more ancient event which opened the great valley of the Jordan and the Dead Sea, and at some subsequent time cut it off from communication with the Red Sea by forcing up between them the tract of the Wady Archebath.

* * *.*

The theory advanced in the preceding article, but a superficial one, between the Dead Sea at the apex of the Gulf of Akabeh and the Bitter Lakes at the apex of the Gulf of Suez. Each was probably at one time a portion of the sea, and each has been cut off by some change in the elevation of the land, and became isolated for its waters at a distance from its parent branch of the ocean. The change in the latter case was probably more recent than in the former, and may even have occurred since the Exodus.

The parallel between the Euxine and the Dead Sea has been already spoken of. It by some geological change the strait of the Bosphorus should ever be closed, and the outlet thus stopped, the parallel would in some respects be very close—the Danube and the Dead Sea |Vaal|; the Danube is a river corresponding to the Zikak: the Sea of Azov with the Sivash would answer to the lagoon and the Sibnik—the river Don to the Wady el-Awab; the process of adjustment between supply and evaporation would at once commence, and from the day the strait was closed the saltiness of the water would begin to concentrate. If, further, the evaporation should be greater than the present supply, the water would sink and suck until the great Euxine takes a lake in a deep hollow far below the level of the Mediterranean; and the parallel would then be complete.

The likeness between the Jordan with its lakes and the river of Utah has been so often alluded to, that it need not be more than mentioned here. See Dr. Bickel in Enin. N. Pult. Journal, April, 1855; Burton's City of the Saints, p. 306.
that the cities of the plain "must have been to the north of the lake," the reader will find critically examined in the articles Sodom and Zeal (Amert ed.). We propose to review here the theory advanced in the preceding aricle, and in the articles Sodom and Sodom, the Vale of, respecting the submergence of the plain. The question of the submergence of the site of the cities is distinct from that of the submergence of a portion of the valley. It is only on the latter point that we claim any clear historical data; the former is a matter of inference merely.

The evidences which bear on the question of submergence are mainly of two classes, the historical and the geological. The latter we pass over, concurred with Mr. Grove in the conviction that the data as yet ascertained would not furnish the most scientific observer with the basis of a solid and adequate theory. It is sufficient that no points have thus far been established by geological exploration which conflict with the historical testimony as we understand it.

The earliest historical evidence is contained in the oldest record extracts: "All the e were joined together in the Vale of Sodom, which is the Salt Sea." (Gen. xiv. 3.) The writer here ascertained what was the Vale of Sodom at the time of the battle described, was at the time of his writing the Salt Sea. If we are to accept the unity of the authorship of the book, it was so when the original record was made. If we may regard the book as a compilation, and the last clause of this verse as the gloss of the compiler, it was so when the compilation was made. Both theories leave us the ancient, indubitable, Biblical testimony to the identity, in whole or in part, of the site of the Vale of Sodom and of that of the Salt Sea. This interpretation is sustained by Gesenius, who defines the Vale of Siddim (valley of the plains) as the plain "now occupied by the Dead Sea" (Loc. cit.).

Mr. Grove adopts the second of the theories just named, but he places on this passage the same interpretation that we do. He rejects the translation of the words who would construe the latter clause of the verse, "which is near, at, or by the Salt Sea," and insists on the other interpretation. He says: "The original of the passage will not bear even this slight accommodation, and it is evident that in the mind of the author of the words, no less than of the learned and eloquent divine and historian of our own time already alluded to, the Salt Sea covers the actual space formerly occupied by the Vale of Sodom" (Sodom, the Vale of). This is decisive; and thus understanding the Scriptural testimony, which pointedly contradicts his theory, how does he dispose of it? His explanation given above is concisely repeated in the article just quoted, as follows: "The words which more especially bear on the subject of this article (v. 3) do not form part of the verbal document. That venerable record has — with a care which shows how greatly it was valued at a very early date — been annotated throughout by a later, though still very ancient chronicler, who has added what in his day were believed to be the equivalents for names of places that had become obsolete. Bela is ex — "The clause is found in all the ancient MSS. and versions, and in the Targum of Onkelos. Its genuineness rests on the very same basis as the other portions of the narrative. We have the same evidence intended to be Zoar; En-Mishpat to be Kadesh; the Emek-Shaveh to be the Valley of the King; the Emek-Sinah to Sodom; and the Emek, or "Plain of Sodom," that is, in modern phraseology, the Dead Sea. As far as we remember how persistently the notion has been entertained for the last eighteen centuries that the Dead Sea covers a district which before its submergence was not only the Valley of Sodom but also the Plain of the Jordan, and what an elaborate account of the catastrophe of its submergence has been constructed even very recently by one of the most able scholars of our day, we can hardly be surprised that a chronicler in an age far less able to interpret natural phenomena, and at the same time long subsequent to the date of the actual event, should have shared in the belief." Sodom, the Vale of.

This reasoning from the modern to the ancient, from Dean Milman to Moses, or the ancient chronicler who wrote these words, is very unsatisfactory to those who believe in the integrity of the sacred canon. Any theory which may be held respecting the authorship of the book is of no consequence in this matter, if we have here an unblemished copy of the Divine revelation. Any theory which gives us this, leaves this testimony of equal value to us. If the authenticity of the record is conceded in its passage, it is alleged that the latter, yet very ancient chronicler, who compiled or annotated the original document, and gave it to us in its present shape, was in point of fact mistaken, we consider the surplus wholly unwarranted and unwarrantable, and believe the writer to have had far better data for his statement than any modern critic can possibly have for correcting him. The reason assigned for the supposed error, moreover, is irrelevant. The submergence of the Vale of Siddim, the conversion of its site to the waters of the Dead Sea, is simply a question of historic fact, the statement of which does not require a chronicler who is "able to interpret natural phenomena." If, in the above extracts and in the remark in the present article that these "annotations" must stand or fall by their own merits, the writer proceeds to impeach the inspired record, or fasten the suspicion of corruption upon it, it is an uncalled-for disputation of the Received Text.

The other glosses or annotations, as Mr. Grove claims them to be, does not hesitate to accept as valid historic testimony. He says of Zoar, that "its original name was Bela," of Bethel, that "its earliest name was Ephrath," and of Hazazon-Tamar, that it "afterwards became Engedi," on exactly the authority, and no other, which he rejects as inconclusive here. "Bela, which is Zoar;" "the Vale of Siddim, which is the Salt Sea;" "En-Mishpat, which is Kadesh;" "the valley of Shaveh, which is the king's dale;" "Ephrath, which is Bethel;" "Hazazon-Tamar, which is Engedi;" "annotations or glosses like these, if they are such, the first four occurring in the same narrative, are equally reliable or equally worthless.

No law of interpretation will permit us to accept one and reject another on the ground that the writer was not a naturalist. Such a claim, if it were conceded, would establish the fact that prior to the composition or completion of our book of Moses, of its Mosaic authorship as we have of any other part of the book" (Porter, Eltho's Bib. Cist. iii. 881).
SEA, THE SALT

Genesis, the belief was current that the chasm now filled by the waters of the Dead Sea had been, in part at least, a valley or plain; and then the question would remain: Whence could such a belief have originated? In attempting to withdraw from the view which he opposes the support of the ancient record, the writer is obliged to grant it the weight of a tradition older than the chronicle.

The sacred narrative names a single physical feature of the Vale of Siddim, namely, that it abounded with "slime-pits" (Gen. xiv. 10). These pits were wells of asphaltum, or bitumen, probably of various dimensions, "sufficient," either from their depth, or size, or both, "materially to affect the issue of the battle." These asphaltic wells have disappeared; but bitumen is still found around the southern section of the sea, and it rises to the surface of the water in large quantities, in that portion of it, when dislodged by an earthquake (Bibl. Res. ii. 290); and the supply was formerly more copious than now. We have modern testimony to this effect, and we have that of three eminent ancient historians in the century before Christ, and the following: Diodorus Siculus, Josephus, and Tacitus, who represent the asphaltum as rising to the surface of the water in black and bulky masses. The theory that the Vale of Siddim is covered by the southern part of the sea reconciles the ancient record and the late phenomenon. It sustains the statement that it was full of bituminous wells; it accounts for their disappearance, and it explains the occasional spectacle since, down to the present time, of large quantities of asphaltum on the surface of the water. Thus far we have a consistent, confirmed, uncontradicted testimony.

As we pass from the simple affirmation of the sacred writer, with the confirmation, in subsequent ages, of the only physical feature of the territory which he names, we leave behind us, of course, all direct testimony. The only remaining evidence, exclusively historical, is of that secondary and confirmatory kind which may be drawn from the investigations and impressions of later writers most competent to form an independent judgment on the subject, or who, as historians, have recorded the prevalent tradition, or the most intelligent opinion. The testimony of these writers the reader will find quoted in an article by the present writer on "The Site of Sodom," Bibl. Sacra (1868, xxv. 121-126).

Whether the name which kindled on Sodom and the guilty cities and consumed them, the indomitable bitumen entering largely into the composition of their walls, denoted also the adjacent Vale of Siddim, whose soil, abounding with asphalt-wells, would under a storm of fire be a magazine of quenchless fuel, and thus burned out a chaos, which in whole or in part, now forms the lagoon; or whether some volcanic convulsion, an agency of which that region has been the known theatre, upheaved the combustible strata, exposing them to the action of fire, and thus seemed the result, each supposition confirming the sacred narrative that as Abraham, from his high point of observation surveying the terrible destruction, "looked toward Sodom and Gomorrath, and toward all the land of the plain, and beheld, and, lo, the smoke of the country went up as the smoke of a furnace:" or whether, in connection with the destruction of the cities by fire, some earthquake-three, such as that stupendous cressace has more than once felt, sunk a portion of the soil out of sight, leaving the stagnant waters above as its memorial, cannot now be known. The agency which destroyed the cities was plainly igneous. The agency which converted the Vale of Siddim into a sheet of water is not stated. Any theory is admissible which consistently explains the two facts.

The submergence of the Vale of Siddim and the submergence of the cities of the plain, or of their site, are distinct questions, because the cities were not in this valley. On this point we concur with the judicious Herland:

"The inspired writer does not say that the five cities, Sodom and the rest, were situated in the Valley of Siddim; on the contrary, the text (Gen. xiv. 3) leads to an opposite conclusion; since the kings of these five cities, after having collected their armies, joined together towards the Valley of Siddim. Supposing the translation to be in the valley, the meaning is still the same. The probability is, then, that the Valley of Siddim was quite distinct from the country in which the five cities were situated" (Peshitta, i. 151).

We see not how any other opinion than this could have obtained currency among scholars. The vale and the territory of the cities, though distinct, were evidently contiguous and may have shared, and to some extent probably did share a common catastrophe. The former may have been consumed with the latter, or the latter may have been depressed with the former. Neither the exact location nor extent of the Vale of Siddim can be ascertained. If it covered the whole breadth of the southern part of the sea, the plain which borders on the south, ten miles long by six broad, was ample enough for the cities; but in all probability it was only one part of its width, leaving the rest for fruitful fields and walled towns, the sites of which are entombed by the sea. The vale was the battle-field between Chedorlammon and his allies, and the confederate kings of the cities; and as the invaders apparently menaced the cities from the present point of Antioch, and the kings went forth to meet them in this vale, it must have lain west or north of the cities.

If the rich vegetation of the well-watered plain of the Jordan, on whose tropical luxuriance Lot looked down from the highlands of Judaea, extended southward skirting fresh water along the site of a part of the present basin of the Salt Sea, and embosoming the Vale of Siddim with the cities which bordered it, the allusions in the Scripture narratives are all adjusted and explained. This theory encounters no historical difficulty, nor any inapplicable scientific difficulty, so far as is known. If there be a fatal objection to it, it lies buried in that vast, mysterious fissure, and awaits the resurrection of some future explorer. Should geology ever compel the substitution of a different theory, we will regard our quarter towards the paleontological and light which will enable us to reconcile it with the inspired record. In the meantime we rest on this hypothesis. [SIDDIM, THE VALE OF, Amer. ed.]

The importance attached to seals in

1. סל / סל (Arab. سل: סל): סלע / סלע , / סלע

יוסף: סדר (Gen. xxxviii. 25). סלע / סלע

דָּאָשָׁא: סדר from סלע, "close" or "seal
Among modern Orientals the size and place of the seal varies, according to the importance both of the owner of a letter and of the person to whom it is sent. In sealing, the seal itself, not the paper, is smeared with the sealing-substance. Thus illiterate persons sometimes use the object nearest a hand—their own finger, or a stick notched for the purpose—and, dabbing it with ink, smear the paper therewith. (Chardin, i. 544, ii. 547; Arieux, Trav. p. 161; Eawwad, Trav. in Egypt. ii. 61; Nicholson, i.e.; Robinson, i. 36.) Engraved signets were in use among the Hebrews in early times, as is evident in the description of the high priest's breastplate (Ex. xxviii. ii. 36, xxviii. 6), and the work of the engraver as a distinct occupation is mentioned in Ezek. xxiii. 27. (Cf. i. 471.)

*SEALED FOUNTAIN. [Fountain.*

SEBA (סב) [see below]: Zabdi, Zobepha [Var. in 1 Chr. Zabdi]: Saber, gent. n. pl. סבש: (Is. xiv. 14), Zabzala, [Ph. Zabzer, Alex. Zবশেন্ত]: Sebadai: A. V. incorrectly render SABBAY, a name there given with more probability to the סבש, Joel iii. 8 (Hex. text, iv. 8) and to Sheba, used for the people, Job i. 5; but it seems that better had the rendering, orthography been followed in both cases by such renderings as "people of Seba" or "people of Sheba," where the gent. nouns occur. Seba heads the list of the sons of Cush. If Seba be of Hebrew or cognate origin, it may be connected with the root סבש, "he or it drank, drunk to excess," which would not be inappropriate to a nation seated, as we shall see was that of Seba, in a well-watered country; but the comparison of two other similar names of Cushites, Sabtah (סבת) and Sabtechah (סבכת), does not favor this supposition, as they were probably seated in Arabia, like the Cushite Sheba (סבשת), which is not remote from Seba (סב), the two letters being not infrequently interchanged. Gesenius has suggested the Ethiopic סבשת: sabayeh, "a man," as the origin of both Seba and Sheba, but this seems unlikely. The ancient Egyptian names of nations or tribes, possibly countries, of Ethiopia, probably mainly, if not wholly, of Nubian race, SAHABA, SABARA (Bruneau, Geogr. Isdrer. ii. 9, tav. xii. K. l.), are more to the point; and it is needless to cite later geographical names of cities, though that of one of the upper confluents of the Nile, Astasokas, compared with Astasor, and Astapus, seems worthy of notice, perhaps indicating the passage of a nation. The proper names of the first and second kings of the Ethiopian XXVth dynasty of Egypt, SÆBEK (סבאר) and SHEBETEK, may also be compared. Gesenius was led, by an error of the Egyptologists, to connect Sevechus, a Greek transcription of SHEBETEK, with SAHK or SHAK.

the crocodile-headed divinity of Ombos (Loc. s. v. 7). The list of the sons of Cush seems to indicate the position of the Cushite nation or country Selah, Nimrod, who is mentioned at the close of the list, ruled at first in Babylonia, and apparently afterwards in Assyria: of the names enumerated between Selah and Nimrod, it is highly probable that some belong to Arabia. We thus may conjecture a curve of Cushite settlements, one extremity of which is to be placed in Babylonia, the other in Arabia, of which, of course, the former is the more interesting and of political importance. We are thus able to conjecture the position of Selah. No ancient Ethiopian kingdom of importance could have excluded the island of Meroë, and therefore this one of Solomon's time may be identified with that which must have arisen in the period of weakness and division of Egypt that followed the Empire, and have laid the basis of that power that made SHEBEB, or Saba, able to conquer Egypt, and found the Ethiopian dynasty which ruled that country as well as Ethiopia.

Josephus says that Saba (Σαβᾶ) was the ancient name of the Ethiopian island and city of Meroë (A. J. li. 10, § 2); but he writes Saba, in the notice of the Cushite settlements, Selah (βηθι, i. 6, § 2). In the text of Meroë, which the King of Ethiopia, Solomon, mentioned that of Selah: and the ancient city of the same name may have been the capital, or one of the capitals, of Saba, though we do not find any of its monuments to be even as early as the XXVth dynasty. There can be no connection between the two names. According to Josephs and others, Meroë was named after a sister of Candace; but this is extremely unlikely, and we prefer taking it from the ancient Egyptian MERU, an island, which occurs in a name of a part of Ethiopia that can only be this or a similar tract, MERU-PET, or the island of PET [Πήτε] the bow,' where the bow may have a geographical reference to a bend of the river, and the word island to the country inclosed by that bend and a tributary [Parv.],

As Meroe, from its fertility, must have been the most important of any African kingdom in the dominions of which it was included, it may be well here to mention the chief facts respecting it which are known. It may be remarked that it seems certain that, from a remote time, Ethiopia below Meroë could never have formed a separate national kingdom, and was probably always dependent on either Meroë or Egypt. The island of Meroë lay between the Atabaras, the Atbara, the most northern tributary of the Nile, and the Atapse, the Baher el-Azarak or "Blue River," the eastern of its two great confines: it is also described as bounded by the Atabaras, the Atapse, and the Atassas, the latter two mouting to form the Blue River (Strab. xiii. 821), but this is essentially the same thing. It was in the time of the kingdom rich and productive. The chief city was Meroë, where was an oracle of Jupiter Ammon. Modern research confirms these particulars. The country is capable of being rendered very wealthy, though its neighborhood to Abyssinia has checked its commerce in that direction, from the natural bounds that the Abyssinians have of their country being absorbed like Kundufin, Darfor, and Fayza, by their powerful neighbor Egypt. The remains of the city Meroë have not been identified with certainty, but between N. lat. 16° and 17°, temples, one of them dedicated to the ram-headed Xinn, confounded with Ammon by the Greeks, and pyramids, indicate that there must have been a great population, and at least one important city. When ancient writers speak of sovereigns of Meroë, they may either mean rulers of Meroë alone, or, in

\[ \text{reading of the text is rather supported by what follows the mention of the "drunkards."} \]

\[ \text{Nor is it clear why people of Saba should come from the wilderness. The passages we have examined thus seem to show (if we omit the last) that Saba was a nation of Africa, bordering on or included in Cush, and in Solomon's time independent and of political importance. We are thus able to conjecture the position of Selah. No ancient Ethiopian kingdom of importance could have excluded the island of Meroë, and therefore this one of Solomon's time may be identified with that which must have arisen in the period of weakness and division of Egypt that followed the Empire, and have laid the basis of that power that made SHEBEB, or Saba, able to conquer Egypt, and found the Ethiopian dynasty which ruled that country as well as Ethiopia.} \]

When ancient writers speak of sovereigns of Meroë, they may either mean rulers of Meroë alone, or, in
addition, of Ethiopia to the north nearly as far, or as far as Egypt.

SE'BAT. [Month.]

SEC'ACAH (ση'καχ; [Thicket, Dietr.]; Al'gu'da; Alex. Σακχαρα; Schachra, or Sackhah). One of the six cities of Judah which were situated in the Hidbor ("wilderness"), that is, the tract bordering on the Dead Sea (Jos. xv. 61). It occurs in the list between Mahlah and Korah-Nis-sam. It was not known to Eusebius and Jerome, nor has the name been yet encountered in that direction in more modern times. From Singil, among the highlands of Ephraim, near Sebott, Dr. Robinson saw a place called Sekbach (ibid. Res. ii. 267, note).

SE'CHENTAS (ςε'κέντας; [Vat. omits: Σεκεντας]). 1. Shechaniah (1 Esdr. viii. 29; comp. Ezr. viii. 3). 2. (1 Esdr. v. 59; Jechonias.) Shechaniah (1 Esdr. viii. 32; comp. Ezr. viii. 5).

SE'CHU (σε'χοι with the article [the watch-tower]: τον Σεχον [Vat. Σεχων]; Alex. εφ Σεχων; Zedek). A place mentioned once only (1 Sam. xix. 22), apparently as lying on the route between Saul's residence, Gibeah, and Ramah (Kamathaim Zophim), that of Samuel. It was notorious for "the great well" (or rather cistern, τον των τυχερης) which it contained. The name is derived from a root signifying elevation, thus perhaps implying that the place was situated on an eminence.

Assuming that Saul started from Gibeah (Tibb'el el-Ful), and that Nebi Samwil is Ramah, then Bet Nebidla (the well of Nebida), alleged by a modern traveller (Schwarz, p. 127) to contain a large pit, would be in a suitable position for the great well of Sechu. Schwarz would identify it with Askor, on the S.E. end of Mount Ebal, and the well with Jacob's Well in the plain below; and Van de Velde (S. ίι Π. ii. 53, 54) hesitatingly places it at Shick, in the mountains of Judah N.E. of Hebron; but this they are forced into by their respective theories as to the position of Ramah and Zophim.

The Vat. LXX. alters the passage, and has "the well of the threshing-floor that is in Sephela," substituting, in the first case, τυχερης for τυχερης, or δωμα for μεγαδωμα, and in the latter τυχερης for τυχερης. The Alex. MS., as usual, adheres more closely to the Hebrew.

*SECT. This word is used five times in the Bible, always in the singular, and always as a translation of ἀδικίας of the Septuagint, Acts v. 17; of the Pharisees, xv. 3, xxvi. 5; and of the Christians (by Jews or heathens), xxv. 5, xxvii. 22. Ἀδικία occurs once more in the singular, xxiv. 14 (A. V. "hereby"), and three times in the plural, 1 Cor. xi. 19, Gal. v. 20, 2 Pet. ii. 1 (A. V. "hereby"), but 1 Cor. xi. 19, "sects" in the mar- gin). The word seems in the N. T. to be used in the twofold sense which it had before in classical, and afterwards in ecclesiastical Greek (cf. Sophocles: Glossary of Letter and Ecclesiastical Greek; denoting now a "chosen" set of doctrines or mode of life (e.g. Acts xxiv. 17, ἅπαν διὰ τῶν ἐκκλησιῶν, Acts xxvi. 20, 2 Pet. ii. 1, perhaps also Acts xxvii. 22, Gal. v. 20), now a party adhering to the doctrines.

That ἀδικία denoted in the N. T. religious peculiarities or parties is evident from the six cases in which it is used in the singular. The pressure of meaning is that in all the three other cases the ἀδικία has the same characteristic. It is evident also that the word has (as it did not have in classical Greek) a bad sense. The reason for this is to be found in the N. T. conception of the Church as a unit, a body united to Christ the Head (1 Cor. xii. 27; Eph. ii. 22), so that diversities of opinion which produce a schism in the body are schisms in any part from the Head. (cf. 1 Cor. xii. 25; Col. ii. 19) cannot be tolerated, as could differences on merely philosophical or indifferent matters. Especially instructive is 1 Cor. vi. 18, 19. While Paul has spoken of ἐρήμωσιν, i. 11, and of ἐχθροκαίρες, iii. 5, as undoubtedly existing among the Corinthians, he is reluctant to give to the report that there are ἔγκρισια among them more than qualified credit (xi. 18, μίατα τα ἁκατιστα), and finds even this qualified belief not so much on the reports, as on the general principle (ver. 19) that there is a providential necessity that there should be even ἀδικία (τις ἂννα καὶ αἰφνιδία), that the δόματα may be made manifest (cf. I John. ii. 19). The δόματα are those who hold the Head, but are divided from one another (cf. v. 18; as formerly are divisions distinguished from ἔγκρισια as the cause from the effect) which imply or lead to a separation of false from true Christians. In strict accordance with this is the use of ἀδικία in Gal. v. 20, and especially in 2 Pet. ii. 1; as also Paul's injunction (Tit. iii. 19), to reject an ἀδικερωτὸς διατρόπον.

The term ἀδικία as far as parties in the Church are concerned, is in the N. T. confined to general or hypothetical statements, and is not applied to any particular heretical body, though the existence of heretical tendencies is recognized. But the prominent notion in the N. T. conception of ἀδικία is that of apostasy from Christ. More variations in belief among those who "hold the Head" are nowhere branded with the name of ἀδικία (cf. Rom. xiv. 1; Cor. viii.).

SE'CU'DUS (Σεκουδα) = Secundus was one of the party who went with the Apostle Paul from Corinth as far as Asia (δύοι τας ἁγιας, probably to Troas or Miletus (all of them so far, somewhat further), on his return to Jerusalem from his third missionary tour (see Acts xx. 4). He and Aristarchus are there said to have been These-olounes. He is otherwise unknown.

* SECURITY formerly differed from "safety," as the feeling of safety (which may be unbounded) differs from the reality. Thus, in Jude, xviii. 7, 10, 27, the people of Laish are said to have been "secure": i.e. in their own belief, which their speedy and utter overthrow showed to be a delusion. It is in the same sense that the A. V. renders θανάτοις ἀδικερωτοίς ποιημένοις by "we will secure you," in Matt. xviii. 14. (See French's English Wordbook, p. 147, Amer. ed. 1911.)

SE'DECIAS (Σεδεκιας; Sedecius), the Greek form of Zedekiah. 1. A man mentioned in Bar. i. 1, as the father of Masseiah, himself the grand father of Barch, and apparently identical with the false prophet in Jer. xxix. 21, 22.

2. The "son of Josiah, king of Judah." (Bar. i. 8) (Zedekiah.)

B. F. W.

* SEDITIONS, in the current sense of the word, appears out of place in Paul's catalogue of the sins of the flesh (Gal. v. 19-21). It stands for
SEIR, MOUNT

Mount Seir was originally inhabited by the Horites, or "targaletes," who were doubtless the excavators of those singular rock-dwellings found in such numbers in the ravines and cliffs around Petra. They were dispossessed, and apparently annihilated, by the posterity of Esau, who dwelt in their stead (Deut. ii. 12). The history of Seir thus early merges into that of Edom. Though the country was afterwards called Edom, yet the older name, Seir, did not pass away; it is frequently mentioned in the subsequent history of the Edomites (1 Chr. iv. 42; 2 Chr. xx. 10). Mount Seir is the subject of a terrible prophetic curse pronounced by Ezekiel (ch. xxxv.), which seems now to be literally fulfilled: "Thus saith the Lord God, Behold, O Mount Seir, I am against thee, and I will make thee desolate, and the cities thereof shall be desolate; and thy cities shall not return, and ye shall know that I am the Lord." 

SEIR. MOUNT

Mount Seir is correctly rendered "division" in Josh. vii. 16 and 1 Cor. iii. 2, as it should be in the above passage. The restricted political sense, if included at all in this instance, is only a part of the sense. Archdeacon Her see the mistake of the A. V. to Tyndale's following Erasmus' version; hence the generic meaning "division," as of its Latin significations (Mission of the Curator, p. 225 f. Amer. ed.).

SEIR. [PROPHET.]

SEGUEB (Sir, rough, boshly: סירפ; in 1 Chr. vii. 2, 21, 22; Seir: in 1 Chr. vii. 3, xxxvi. 30, and מִרְכֶּז, "Mount Seir" (Gen. xxvii. 4. 6). The original name of the mountain ridge extending along the east side of the Valley of Ahabah, from the Dead Sea to the Elatine Gulf. The name may either have been derived from Seir the Horite, who appears to have been the chief of the aboriginal inhabitants (Gen. xxxvi. 29), or what is perhaps more probable, from the rough aspect of the whole country. The view from Aaron's tomb on Hor, in the centre of Mount Seir, is enough to show the appropriateness of the appellation. The sharp and serrated ridges, the jagged rocks and cliffs of struggling bushes and stunted trees, give the whole scene a sternness and ruggedness almost unparalleled. In the Samaritan Pentateuch, instead of מִרְכֶּז, the name מִרְכֶּז is used; and in the Jerusalem Targum, in place of "Mount Seir" we find מִרְכֶּז מִרְכֶּז, Mount Golpa. The word Golpa signifies "mountain," and is thus descriptive of the region (Reisen, P. l., p. 832). The name Gebal, or Gebelin, was applied to this province by Josephus, and also by Eusebius and Jerome (Joseph. Anti. ii. 1. § 2; Onomast., "Gimmaica"). The northern section of Mount Seir, as far as Petra, is still called Jebel, the Arabic form of Gebal. The Mount Seir of the Bible extended much further south than the modern province, as is shown by the words of Deut. ii. 1-3. In fact its boundaries were there defined with tolerable exactness. It had the Arabah on its west (vv. 1, 8); it extended as far south as the head of the Gulf of Akabah (ver. 8); its eastern border ran along the base of the mountain

a And so it is transliterated in Targum, which, in the Alex. MS., is one of the oaths names inserted by the LXX. in Josh. xxv. 59. The neighboring names agree. In the Vat. 88 it is יִבְּרָה.

SELA-HAM-MAHLEKOTH 2903

a This is the reading of the Vat. Codex according to Mas. If accurate, it furnishes an instance of the \( \Sigma \) being represented by \( \gamma \), which is of the greatest rarity, and is not mentioned by Frankel (Vorstuden, etc., p. 1291). \( \gamma \) and \( \Sigma \) are the ordinary equivalents of \( \Sigma \) in the LXX.

b * The name for us is properly Seirath, and not Seirath (which is only the directive local form). It was properly a district rather than a town, and was among the mountains of Ephraim (the Heb. being a collective singular).
whether to remain in pursuit of his enemy or to go alter the Philistines; but such explanations, though appropriate to either interpretation, and consistent with the oriental habit of playing on words, are doubtless mere accommodations. The analogy of topographical nomenclature makes it almost certain that this cliff must have derived its name either from its smoothness (the radical meaning of סלָה) or from some peculiarity of shape or position, such as is indicated in the translations of the LXX. and Vulgate. No identification has yet been suggested.

G.

**SELAH** (סֵלָה). This word, which is only found in the poetical books of the Old Testament, occurs seventy one times in the Psalms, and three times in Habakkuk. In sixteen psalms it is found once, in fifteen twice, in seven times, and in one four times—always at the end of a verse, except in Ps. lv. 19 [20], lii. 3 [4], and Hab. iii. 3, 9, where it is in the middle, though at the end of a clause. All the passages in which it occurs, except eleven (iii. v., xrvii., xxxvi., xlvii., lxxxvi., lxxxvii., lxxxix., c.ii.), have also the musical direction, "to the Chief Musician" (comp. also Hab. iii. 19); and in these exceptions we find the words כָּנָּץ, כָּנָּץ (A. V. "Psalm"), Shiggaiim, or Maschil, which sufficiently indicate that they were intended for music. Besides these, in the titles of the Psalms in which Selah occurs, we meet with the musical terms Alamoim (xlvii.), Alasachtim (lii., lix., lxxvii.), Gittith (dxxvi., dxxvii.), Mahalath Leannoth (lxxvii.), Michtam (lxxv., lix., lx.), Negihah (lii., lxxvii.), Tanim (li., lix., lx.), Sons of Kudeth (lxxvii.), and on this association alone might be formed a strong presumption that, like these, Selah itself is a term which had a meaning in the musical nomenclature of the Hebrews. What that meaning may have been is now a matter of pure conjecture. Of the many theories which have been framed, it is easier to say what is not likely to be the true one than to pronounce certainly upon what is. The Versions are first deserving of attention.

In the greater number of instances the LXX and some other translators in the New Testament render a word by ἐκάλωμικά, ἐκάλωμικά, "for ever"; four times (Ps. xxxii. 3, 7; xxxix. 11 [12]; 4 [6], Ps. liii. 11, ἐκάλωμικά, once (Ps. lixiv. 8 [9]), ἐκάλωμικά, ἐκάλωμικά, ἐκάλωμικά, and (Ps. lxxiii. 8 [2]), ἐκάλωμικά, ἐκάλωμικά, ἐκάλωμικά, with the same meaning, "for ever and ever.

In Ps. cxliv. 13 (14) it has ἐκάλωμικά, ἐκάλωμικά, ἐκάλωμικά, for the world to come: in Ps. xxxix. 5 [6] ἐκάλωμικά, ἐκάλωμικά, ἐκάλωμικά, ἐκάλωμικά, "for the life everlasting;" and in Ps. cxlv. 5 [6] ἐκάλωμικά, ἐκάλωμικά, ἐκάλωμικά, "continually." This interpretation, which is the one adopted by the majority of Rabbinical writers, is purely traditional, and based upon no etymology whatever. It is followed by Aquila, who renders "Selah" ἀξίζει; by the Epistle quinta and Epistle sexta, which give respectively διακριτος and εἰς τὰς ἀξίματα; by Symmachus (eis τῶν ἀξίων) and Theodotion (εἰς τὰς ἀξίματα); in Habakkuk: by the reading of the Alex. MS. (εἰς τὰς ἀξίματα) in Hab. ii. 14: by the Pesdito-Syrac in Ps. iii. 8 [9], iv. 2 [8], xxiv. 10, and Hab. iii. 13; and by Jerome, who has semper. In Ps. lv. 19 [20] ὑπὸ τὸν κλίθην σελαθ, is rendered in the Pesdito "from before the world." That this rendering is manifestly inappropriate in some passages, as for instance Ps. xxi. 2 [3], xxxi. 4, lxxxi. 7 [8], and Hab. iii. 3, and superfluous in others, as Ps. lvi. 8 [9], lxxxi. 3, is evident at least long since by Aben Ezra. In the Psalms the uniform rendering of the LXX. is διακριτος. Symmachus and Theodotion give the same, except in Ps. ix. 16 [17], where Theodotion has ἀξίζει, and Ps. li. 5 [7], where Symmachus has εἰς ἀξίματα. In Hab. iii. 13, the Alex. MS. gives εἰς τὰς ἀξίματα. In Ps. xxxviii. (in LXX.) 7, lxxxi. 7 [8], διακριτος is added in the LXX., and in Hab. iii. 7 in the Alex. MS. In Ps. li. it is put at the end of ver. 2; and in Ps. iii. 8 [9], xxiv. 10, lxxxi. 10 [11], it is omitted altogether. In all passages except those already referred to, in which it follows the Targum, the Pesdito-Syrac has ὑπὸ τὸν κλίθην, an abbreviation for διακριτος. This abbreviation is added in Ps. xlviii. 13 [14], l. 15 [16], lxxxiii. 13 [14], lii. 2, lxxxi. 7 [8], at the end of the verse; and in Ps. iii. 5 in the middle of the verse after διακριτος: in Ps. xlix. it is put after διακριτος in ver. 14 [15], and in Ps. lxxviii. after διακριτος in ver. 8 [9], and after ἐκάλωμικά in ver. 32 [33]. The Vulgate omits it entirely, while in Hab. iii. 3 the Epictet sexta and others give μετατέθηκαν διακριτοτομος.

The rendering διακριτος of the LXX. and other translators is in every way as traditional as that of the Targum—'for ever," and has no foundation in any known etymology. With regard to the meaning of διακριτος itself there are many opinions. Both Origen (Comm. ad Ps., Opp. ed. Pelarse, ii. 510) and Athanasius (Synag. Script. Sacrae. vili.) are silent upon this point. Eusebius of Cesarea (Pref. in Ps.) says it marked those passages in which the Holy Spirit ceased for a time to work upon the choir. Gregory of Nyssa (Tract. 2 in Ps. cap. x.) interprets it as a sudden hill in the midst of the psalmody, in order to receive anew the Divine inspiration. Chrysostom (Opp. ed. Mountfass, v. 540) takes it to indicate the portion of the psalm which was given to another choir. Augustine (in Ps. lii.) regards it as an interval of silence in the psalmody. Jerome (Ep ad Marcellum) enumerates the various opinions which have been held upon the subject: that diaphragma denotes a change of metre, a cessation of the Spirit's influence, or the beginning of another sense. Others, he says, regard it as indicating a difference of rhythm, and the silence of some kind of music in the choir; but for himself he falls back upon the version of Aquila, and renders Selah by semper, with a reference to the custom of the Jews to put at the end of their writings Amen, Selah, or Shallom. In his commentary on Ps. iii. he is doubtless whether to regard it as simply a musical sign, or as indicating the perpetuity of the truth contained in the passage after which it is placed: so that, he

a Except in Ps. ix. 16 [17], lxvi. 3 [4], lxvii. 3, 9 4 10, where Ed. T. has ἀξίζει, Ps. xxi. 2 [3], where it has διακριτος, and in Hab. iii. 8, 18, where it reproduces the Hebrew שָׁלָה. In Ps. ix. 16 [17] ἐπιθέματα ἔχει, in Ps. lxvi. 3 [4] διακριτος and in Ps. lxvii. 3 [4] εἰς τὰς ἀξίματα.
SelaH says, "wheresoever Selah, that is diaspoma or s'ncoper, is put, there we may know that what follows, as well as what precedes, belongs not only to the present time, but to eternity." Theodore (Pref. in Ps.) explains diaspoma by μελοδυναμον  
αναλgetic (as Selah), a change of the melody. On the whole, the rendering διασπομα rather increases the difficulty, for it seems to be by no means inappropriate, since the word is never found in this connection, and no other possible rendering seems to be the true meaning of Selah, and its own signification is obscure.

Leaving the Versions and the Fathers, we come to the Rabbinical writers, the majority of whom follow the Targum and the dictum of R. Eliezer (Talm. Babl. Erubin, v. 54) in rendering Selah "for ever." But Aben Ezra ( выше 187, iii. 4) showed that in some passages this rendering was inappropriate, and expressed his own opinion that Selah was a word of emphasis, used to give weight and importance to what was said, and to indicate its truth: "But the right explanation is that the meaning of Selah is 'so it is' or 'thus,' and 'the matter is true and right.'" Kimchi (Lex. s. v.) doubted whether it had any special meaning at all in connection with the sense of the passage in which it was found, and explained it as a musical term. He derives it from הֶׁלֶּה, to raise, elevate, with ה paraogogic, and interprets it as signifying a raising or elevating the voice, as much as to say, in this place there was an elevation of the voice in song.

Among modern writers there is the same diversity of opinion. Gesenius (Theo. s. v.) derives Selah from הֶלֶּה, selah, to suspend, of which he thinks it is the imperative Kal, with ה paraogogic, הֶלֶּה, in pause הֶלֶּה. But this form is supported by no parallel instance. In accordance with his derivation, which is harsh, he interprets Selah to mean either "suspend the voice," that is, "he laments," a hint to the singers, or "raise, elevate the stringed instruments." In either case he regards it as denoting a pause in the song, which was effectuated by an interlude played by the choir of Levites. Ewald (Die Dichter des A. B. i. 179) arrives at substantially the same result by a different process. He derives Selah from הֶלֶּה, selah, to raise, whence the substantive הֶלֶּה, which with ה paraogogic becomes in pause הֶלֶּה (comp. הֶלֶּה, from הֶלֶּה, root הֶלֶּה, Gen. xiv. 10). So far as the form of the word is concerned, this derivation is more tenable than the former. Ewald regards the phrase "Haggai, Selah," in Ps. ix. 16 [17] as the full form, signifying "music, strike up!" - an indication that the voices of the choir were to cease while the instruments alone came in. Hengstenberg follows Gesenius, De Wette, and others, in the rendering pause! but refers it to the contents of the psalm, and understands it of the silence of the music in order to give room for quiet reflection. If this were the case, Selah at the end of a psalm would be superfluous. The same meaning of pause or end is arrived at by Furst (Handb. s. v.) who derives Selah from a root הֶלֶּה, selah, to cut off (a meaning which is perfectly arbitrary), whence the substantive הֶלֶּה, which with ה paraogogic becomes in pause הֶלֶּה; a form which is without parallel. While etymologists have recourse to such shifts as these, it can scarcely be expected that the true meaning of the word will be evolved by their investigations. Indeed the question is as far from solution as ever. Beyond the fact that Selah is a musical term, we know absolutely nothing about it, and are entirely in the dark as to its meaning. Samuel, [1801], i. 1-84] has devoted an elaborate discourse to its explanation. After observing that Selah everywhere appears to mark critical moments in the religious consciousness of the Israelites, and that the music was employed to give expression to the energy of the poet's sentiments on these occasions, he (p. 49) arrives at the conclusion that the word is used in those passages where, in the Temple Song, the choir of priests, who stood opposite to the stage occupied by the Levites, were to raise their trumpets (חִפָּה) and with the strong tones of this instrument mark the words just spoken, and bear them upwards to the hearing of Jehovah. Probably the Levite pamphlets supported this priestly intercessory music by vigorously striking their harps and psalteries; whence the Greek expression διακονεια. To this point, moreover, the fuller direction, 'Haggai, Selah,' (Ps. ix. 16); the first word of which denotes the whirr of the stringed instruments (Ps. xci. 3), the other the raising of the trumpets, both which were here to sound together. The less important Haggai fell away, when the expression was abbreviated, and Selah alone remained." F. Davidson (Introd. to the O. T. ii. 248) with good reason rejects this explanation as laborious and artificial, though it is adopted by Kell in Hengstenberg's Einleitung (iii. 120-123). He shows that in some passages (as Ps. xxiv. 4, 5, iii. 3, iv. 7, 8) the playing of the priests on the trumpets would be inaudible, and proposes the following as his own solution of the difficulty: "The word denotes fiction or avail, i. e. loud, clear. The music which commonly accompanied the singing was soft and feeb. In cases where it was heard in more strongly during the silence of the song, Selah was the sign. At the end of a verse or strophe, where it commonly stands, the music may have really been strongest and loudest." It may be remarked of this, as of all the other explanations which have been given, that it is mere conjecture, based on an etymology which, in any other language than Hebrew, would at once be rejected as unsound. A few other opinions may be noticed as belonging to the history of the subject. Michaelis, in despair at being unable to assign any meaning to the word, regarded it as an abbreviation, formed by taking the first or other letters of three other words (Silpua, lex. Hebr.), though he declines to conjecture what these may be, on the ground that they do not occur at once the guess of Meibomius, who extracts the meaning du capo from the three words which he suggests. For other conjectures of this kind, see Eichhorn's Bibliothek, v. 54. Mattheson was of opinion that the passages where Selah occurred were repeated either by the instruments or by another choir; hence he took it as equal to choras, or chorus. Herder regarded it as marking a change of key; while Paulus Burgensiun and Schindler assigned to it no meaning, but looked upon it as an
SELED (Lex. Hebr.) derived it from התֹּלט, shath, to spread, lay low; hence used as a sign to lower the voice, like πίπα. In Eichhorn's Bibliothek (v. 550) it is suggested that Selah may perhaps signify a scale in music, or indicate a rising or falling in the tone. Kister (Stud. und Krit. 1831) saw in it only a mark to indicate the strophical divisions of the Psalms, but its position in the middle of verses is against this theory. Augusti (Proseus, p. 125) thought it was an exclamation, like呼び呼び, and the same view was taken by the late Prof. Lee (Hebr. Gr. § 214, 2), who classes it among the interjections, and renders it praise! "For my own part," he says, "I believe it to be descended from the root מלך, 'he blessed,' etc., and used not unlike the word amen, or the doxology among ourselves." If any further information be sought on this hopeless subject, it may be found in the treatise contained in Ugolini, vol. xii., in Nolhins (Concil. Port. Ann. et Vid. No. 1877), in Saebelchitz (Hebr. Ps. p. 349) and in the essay of Sommer quoted above.

W. A. W.

**SELED** (מַלֵּד) [exclamation]: סֶלֶדָד: [Vat. oooν Αλςανδρος]. One of the sons of Naadah, a descendant of Jerahmeel (1 Chr. ii. 30).

**SELEMIA (Selemeia).** One of the five men "ready to write swiftly," whom Esdras was commanded to take (2 Esdr. xiv. 24).

**SELEMIAS (Σελημία):** om. in Vulg.

**SHELEMAH (the sons of Banai (1 Esdr. ix. 34): comp. Ezr. x. 39).

**SELEUCIA (Σαλαχεία; Seleucia) was practically the seaport of Antioch, as Oslea was of Rome. Neapolis of Philippi, Cerchee of Corinth, and the Piranes of Athens. The river Orontes, after flowing past Antioch, entered the sea not far from Seleucia. The distance between the two towns was about 16 miles. We are expressly told that St. Paul, in company with Barnabas, sailed from Seleucia at the beginning of his first missionary circuit (Acts. xii. 36): and it is almost certain that he landed there on his return from it (xvi. 26). The name of the place shows at once that its history was connected with that of Seleuciake who reigned at Antioch from the death of Alexander the Great to the close of the Roman Republic, and whose dynasty had so close a connection with Jewish annals. This strong fortress and convenient seaport was in fact constructed by the first Seleucus, and here he was buried. It retained its importance in Roman times, and in St. Paul's day it had the privileges of a free city (Elin. II. N. v. 18). The remains are numerous, the most considerable being an immense excavation extending from the higher part of the city to the sea: but to us the most interesting are the two piers of the old harbor, which still bear the names of Paul and Barnabas. The masonry continues so good, he be found of tearing out and repaving the harbor has recently been entertained. Accounts of Seleucia will be found in the narrative of the Empyreus Expedition by General Chesney, and in his papers in the Journal of the Royal Geo.

**SEMIS (Σεμισ).** For a description of Seleucia, see Thomson's Travels in Northern Syria, an article in the Biblical Society, and also in a paper by Dr. Yates in the Museum of Classical Antiquities. J. S. H.

**SELEUCUS (Σαλαχειος; Seleucus) IV. Philopator, "king of Asia" (2 Macc. iii. 3), that of the provinces included in the Syrian monarchy, according to the title claimed by the Seleucids, even when they had lost their footing in Asia Minor (comp. 1 Macc. vili. 6, xi. 13, xii. 39, xiii. 32), was the son and successor of Antiochus the Great. He took part in the disastrous battle of Magnesia (B.C. 189), and three years afterwards, on the death of his father, ascended the throne. He seems to have devoted himself to strengthening the Syrian power, which had been broken at Magnesia, seeking to keep on good terms with Rome and Egypt till he could find a favorable opportunity for war. He was, however, murdered, after a reign of twelve years (B.C. 175), by Hellenoros, one of his own couriers (Hellenoros), neither in [sould] anger nor in battle (Dan. xii. 28, and Jer. ox. lx. 18, Jer. ox. lx. 18), but by ambitious treachery, without having effected anything of importance. His son Demetrius I. Soter (Demetrius), whom he had sent, while still a boy, as a hostage to Rome, after a series of romantic adventures gained the crown in 162 B.C. (1 Macc. vii. 1; 2 Macc. xiv. 1). The general policy of Seleucus towards the Jews, like that of his father (2 Macc. iii. 2, 3, και Σαλαχειος), was conciliatory, as the possession of Palestine was of the highest importance in the prospect of an Egyptian war: and he undertook a large share of the expenses of the Temple service (2 Macc. iii. 3, 6). On one occasion, by the false representations of Simon, a Jewish officer (Simon, 3), he was induced to make an attempt to carry away the treasures deposited in the Temple, by means of the same Hellenoros who murdered him. The attempt signalized, but it does not appear that he afterwards showed any resentment against the Jews (2 Macc. iv. 5, 6); though his want of money to pay the enormous tribute due to the Romans [Antiochus III., vol. i. p. 115] may have compelled him to raise extraordinary revenues, for which cause he is described in Daniel as "a raiser of taxes" (Dan. xi. 2; LXX. xiv. 19).

B. F. W.

**SEM (Σεμ): Shem, the patriarch (Luke iii. 35).

**SEMACHIAH (Σαμαχίας; Σεμαχίας; Semachiah). One of the sons of Shemaiah, the son of Obed-edom (1 Chr. xxvi. 7).

**SEMEI (Σεμείo).** [Vat. Σεμεια] Semei.

1. Shimei of the sons of Hashum (1 Esdr. xii. 33; comp. Ezr. x. 33).
2. (Σεμειας: [Vat. Σεμειας; FA. Σεμειας]). Shimei, the ancestor of Mordceal (Ezr. xii. 2).

**SEMELIUS (Σαμελιος; Alex. also Σαμελιος; Σαμελιος) Subellius. SHIMSHAI the scribe (1 Esdr. ii. 16, 25, 30; comp. Ezr. iv.)

**SEMIS (Σεμιδ): [Vat. Σεμιδ; Ald. Σεμιδ]. Shemiel the Levite in the time of Ezra (1 Esdr. xii. 23; comp. Ezr. x. 23).

Sarm, v. 451 ff. He mentions the incidents of a ride of five hours from Seleucia to Antioch.
The rock of Seneh of 1 Sam. xiv. 4 is hardly appropriate.

This distance is perhaps too great to suit Josephus' expression; still the point is worth notice. G.

SENNACHERIB (סננ'ך) [cont. of next]: [Σανηκρ. ἡδερ.] [Alex.] Σανηκρι, [and so v. 1 in ch. 1]. Sennacherib.

This name appears twice in the A.V., namely, 1 Chr. xvi. 23, and Ez. xxvii. 5: but it should be found in two other passages, in each of which the Hebrew word is exactly similar to the above, namely, Dent. iii. 9, and Cant. iv. 8. In these it appears in the A.V. as Sheneh.

Even this slight change is unfortunately, since, as one of the few Aramite words preserved, it possesses an interest as having previously been protected from the addition of a single letter. It is the Aramean name for the mountain in the north of Palestine which the Hebrews called Hermon, and the Phoenicians Siron; or perhaps it was rather the name for a portion of the mountain than the whole. In 1 Chr. v. 23, and Cant. iv. 8, Hermon and it are mentioned as distinct. Ahloula (ed. Koller, p. 161, quoted by Gesenius) reports that the part of Anti-Lebanon north of Damascus— that usually denominated Jebel esh-Sharkly, "the East Mountain" — was in his day called Seneh. The use of the word in Ezekiel is singular. In describing Tyre we should naturally expect to find the Phoenician name (Siron) of the mountain employed, as the only satellite of Mount Hermon (Hermopolis) at that period, and so especially in that form which appears in the Dictionary, Elders; Sennacherib. H.

SENEH (סנה) [thorn]: Ἡληρ. [Vat. Ec-

The Magdal-Senna, or "great Senna" of Eusebius and Jerome, seven miles N. of Jericho (Onom. "Senna"), however, is not inappropriate in position. There is a variation in the numbers given by Ezra and Nehemiah; but even adopting the smaller figure, it is difficult to understand how the town should have been so much more numerous than those of the other places in the catalogue. Bertheau (Exeg. Holb.), suggests that Senna represents not a single place but a district; but there is nothing to corroborate this.

In the parallel passages of 1 Esdras (iv. 23) the name is given Axxas, and the number 50,500. G.

* SENATE occurs in the N. T. only in Acts v. 21, the translation of ο опыων. also peculiar to that place. As φωτις accompanies the term, it cannot be equivalent to Samedim, but must denote a branch of that body, and no doubt, as the affinity of meaning itself indicates, is interchangeable with προαδίατος, "eldership," one of the three classes (priests, elders, scribes) collectively designated as the Samedim (see Acts iv. 5). We find ὑπόσινων in 1 Mac. xii. 6: 2 Mac. i. 10, iv. 43, xi. 27: 3 Mac. i. 8, where it designates the highest Jewish Council of that earlier period, but whether the Council was then organized precisely like the Samedim in the time of the Saviour is not easily determined. (See Fritzsche, Holbuch, zu den Apokryphen, iii. 184 f.) The Latin Vulgate renders ὑπόσινων by seนuates and seniores. On the general topic, see in the Dictionary, Elders; Sennacherib. H.

SENEH (סנה) [thorn]: Ἡληρ. [Vat. Ec-

Sennacherib was the son and successor of Sargon. [Sargon.] His name in the original is read as Tinn-abiti-iri, which is understood to mean, "Sin (or the Moon) increases brothers:" an indication that he was not the first-born of his father. The LXX. have thus approached much more nearly to the native articulation than the Jews of Palestine, having kept the Kurish vowels, and almost entirely changed the labial character of the second from β to θ. Josephus has been even more entirely correct, having only added the Greek nominative ending.

We know little or nothing of Sennacherib during his father's lifetime. From his name, and from a circumstance related by Polybius, we may gather that he was not the eldest son, and not the heir to the throne till the year before his father's death.
Polybius (folowing Herodotus) related that the tributary kingdom of Babylon was held by a brother — who would doubtless be an elder brother — of Sennacherib's, not long before that prince came to the throne (Herod. Fr. 12). Sennacherib’s brother was successeed by a certain Nebu, who reigned only a month, being murdered by Merodach-Bal-\(d\)an, who then took the throne and held it six months. These events belong to the year n. C. 703, which seems to have been the last year of Sargon, Sennacherib mounted the throne n. C. 702. His first efforts were directed to crushing the revolt of Babylon, which he invaded with a large army. Merodach-Bal\(d\)an, returned on a battle, but was defeated and driven from the country. Sennacherib then made Bithya, an officer of his court, viceroy, and, quitting Babylon, ravaged the lands of the Aramaean tribes on the Tigris and Euphrates, whence he carried off 200,000 captives. In the ensuing year (n. C. 701) he made war upon the independent tribes in Mount Zagros, and penetrated thence to Media, where he reduced a portion of the nation which had been previously independent. In his third year (n. C. 700) he turned his arms towards the west, chastised Sidon, took tribute from Tyre, Aradus, and the other Phoenician cities, as well as from Edon and Ashdod, besieged and captured Ashdon, made war on Egypt, which was still independent on Ethiopia, took Libna and Lachish on the Egyptian frontier, and, having probably concluded a convention with his chief enemy, finally marched against Hezekiah, king of Judah. Heze-

khiah, apparently, had not only revolted and with-
held his tribute, but had intermeddled with the affairs of the Chaldaean cities, and given his support to the party opposed to the influence of Assyria. It was at this time that “Sennacherib came up against all the fenced cities of Judah, and took them” (2 K. xviii. 13). There can be no doubt that the record which he has left of his campaign against “Hishkiah” in his third year, is the war with Hezekiah so briefly touched in the four verses of this chapter (vv. 15-16). The Jewish monarch was compelled to make a most humble submission. Hezekiah “uttered the word against the gods of his fathers, and against the gods of the kings of Judah, and bowed himself unto the God of Shalmaneser.” Moreover, he had given up all that had been committed to his care, and surrendered to the enemy as much as he could carry away. Sennacherib then marched against the fenced cities of Judah, and took them” (2 K. xviii. 13). Consequently the first invasion of Sennacherib falls into Hezekiah’s twenty-seventh year instead of his fourteenth, as stated in 2 K. xviii. 13 and Is. xxxvi. 1. Various solutions have been proposed of this difficulty. According to some, there has been a di-location as well as an alteration of the text. Originally the words ran, “Now it came to pass in the fourteenth year of king Heze-
kiah, that the king of Assyria [Sargon] came up against the fenced cities of Judah.” Then followed ch. xx. (Is. xxxviii. 7) “In those days was Hezekiah sick unto death,” etc.; after which came the nar-

ative of Sennacherib’s two invasions. [See HEZE-
kiah.] Another suggestion is, that the year has been misplaced in 2 K. xix. 13 and Is. xxxvi. 1, probably copied from the narrative in ch. xx. (Is. xxxviii. 7) to the period of Sennacherib’s first inva-
sion, concluded (from ch. 6) that the whole had been accomplished in Hezekiah’s fourteenth year (Rawlinson’s Herodotus, vol. i. p. 479, note 2), and therefore boldly changed “twenty-seventh” into “four-

teenth.”

Sennacherib was one of the most magnanimous of the Assyrian kings. He seems to have been the first who fixed the seat of government permanently at Nineveh, which he carefully repaired and adorned with splendid buildings. His greatest work is the

a The impression on clay of the seal of Sabaoth, found in Sennacherib’s palace at Kuyunjik, has probably been appealed to as an act of hostility.

Babylon, of Sennacherib’s, and was probably the seat of government permanently at Nineveh, which he carefully repaired and adorned with splendid buildings. His greatest work is the
grand palace at Koyunjik, which covered a space of above eight acres, and was adorned throughout with sculpture of finished execution. He built also, or repaired, a second palace at Nineveh on the mound of Nebbi Yunus, confined the Tigris to its channel by an embankment of brick, restored the ancient aqueducts which had gone to decay, and gave to Nineveh that splendor which she thereafter retained till the ruin of the empire. He also erected monuments in distant countries. It is his memorial which still remains at the mouth of the Yarked-el-Kébir on the coast of Syria, side by side with an inscription of Narsees the Great, recording his conquests six centuries earlier.

Of the death of Semacherib nothing is known beyond the brief statement of Scripture, that "as he was worshipping in the house of Nisroch (1), his god, Adrammelech and Sharezer his sons smote him with the sword, and escaped into the land of Armenia" (2 K. xix. 37; Isa. xxxvii. 36). It is curious that Moses of Chorene and Alexander Polyhistor should both call the elder of these two sons by a different name (Artumazanes or Arzamaz donna); and it is still more curious that Ashdod, who generally drew from Berossus, should transpose a king Nergilus between Semacherib and Adrammelech, and name the elder brother by the form of Erashboni (Erischi, Chr. Cant. i. 9; comp. i. 5, and see also Mos. Chron. Anc. Hist. i. 22). Moses, on the contrary, confirms the escape of both brothers, and mentions the ports of Armenia where they settled, and which were afterwards peopled by their descendants. G. K.

SENAUH (סֹבֹא; bousting, Ges.): 'Arayá: Senana). Proper Hasennah, with the def. article. A Benjamite, the father of Judah, who was second over the city after the return from Bablyon (Neh. xi. 9). In 1 Chr. ix. 7, "Judah the son of Senanah" is "Hodaviah the son of Hasennah." [HASENEH]

SE'ORIM (סוֹרֵים; Sôrîm; [Vat. Sôwemî]; Alex. Sôwemî; Sorim). The chief of the fourth of the twenty-four courses of priests instituted by David (1 Chr. xxiv. 8).

SEP'HAR (סֵפָה; book): Seôparâ; Alex. Seôpôpa: Sephor). It is written, after the enumeration of the sons of Joktan, "and their dwelling was from Mesha as far as atl what now is Sephar, a mount of the east" (Gen. x. 30). The immigation of the Joktanites was probably from west to east, as we have shown in ARARIA, MESSHA, etc., and they occupied the southwestern portion of the peninsula. The undoubted identifications of Arabian places and tribes with their Joktanite origins are included within these limits and point to Sephar as the eastern boundary. There appears to be little doubt that the ancient sea-port town called Dhufiari or Zafiri, and Dhusjar or Zafir, without the inflexional termination, represents the Biblical site or district: thus the etymology is sufficiently near, and the situation exactly agrees with the requirements of the case. Accordingly, it has been generally accepted as the Sephar of Genesis. But the etymological fitness of this site opens a new question, inasmuch as there are no less than four places bearing the same name, besides several others bearing names that are merely variations of the same. The frequent recurrence of these variations is curious; but we need only here concern ourselves with the four first named places, and of these two only are important to the subject of this article. They are of twofold importance, as bearing on the site of Sephar, and as being closely connected with the ancient history of the former kingdom of Southern Arabia, the kingdom founded by the tribes sprung from the sons of Joktan. The following extracts will put in a clear light what the best Arabian writers themselves say on the subject. The first is from the most important of the Arabic lexicons:—

"Dhufiari (دوئیره) is a town of the Yemen; one says, 'He who enters Dhufiari learns the Hinnyeritic.' . . . Is Saghaiee says, 'In the Yemen are four places, every one of which is called Dhufiari; two cities and two fortresses. The two cities are Dhufiari-i-Halil, near Sana'a, two days' journey from it on the south; and the Tubkas used to abide there, and it is said that it is Sana'a itself.' In relation to it is called the onyx of Dhufiari. (Hosse-Siekewt says that the onyx of Dhufiari is so called in relation to Dhufiari-i-Akhal, a city in the Yemen.) Another is in the Yemen, near Mirbat, in the extremity of the Yemen, and is known by the name of Dhufiari-i-Sakhib [that is, of the sea-coast], and in relation to it is called the Khor-Dhufiari [either costus or abies-wood], that is, the wood with which one fumigates, because it is brought thither from India, and from it to [the rest of] the Yemen.' . . . And if Yakoob meant, for he said, 'Dhufiari . . . is a city in the extremity of the Yemen, near to Est-Shilh'; as to the two fortresses, one of them is a fortress on the south of Sana'a, two days' journey from it, in the country of the tribe of Bawen-Ma'urid, and it is called Dhufiari-i-Walipug [that is, of the Two Valleys]. It is also called Dhufiari-i-Zeqf; and another is on the north thereof, also two days' journey from it, in the country of Hinday, and is called Dhufiari-i-Idhifact (Fay-dh Arab, Ms., s. v.)".

Yakoob, in his Homonymous Dictionary (El-Muhtorak, s. v.) says: "Dhufiari is a celebrated city in the extremity of the country of the Yemen between 'Oman and Mirbat, on the shore of the sea of India: I have been informed of this by one who has seen it prosperous, abounding in good things. It is near Est-Shilh. Dhufiari-Zeqf is a fortress in the Yemen, in the territory of Alfa, and Dhufiari is a city near to Sana'a, and in relation to it is called the Dhufiari onyx; in it was the abode of the kings of Hinday, and of it was said 'He who enters Dhufiari learns the Hinnyeritic'; and it is said that Sana'a itself is Dhufiari.' Lastly, in the Geographical Dictionary called the Musawal, which is ascribed to Yakoob, we read, s. v.: "Dhufiari: two cities in the Yemen, one of

a It has been stated that in 1831 the French occupants of Syria destroyed this tablet, and replaced it by an inscription in their own honor; but such an act of barbarism seems scarcely possible in the nineteenth century.

b Abu-r-Rili has fallen into an absurd error in his
then near to Somā, in relation to which is called the Dhašfīr onyx: in it was the dwelling of the kings of Himyar; and it is said that Dhašfīr is the city of Somā itself. And Dhašfīr of this day is a city on the shore of the sea of India, between it and Miḥbat are five parasangs of the territo ries of Esb-Shike, and it is near to Usāhir, and Miḥbat is the other anchorage besides Dhašfīr: 1 Frankincense is only found on the mountain of Dhašfīr of Esb-Shike.

These extracts show that the city of Dhašfīr near Somā was very little known to the writers, and that little only by tradition: it was even supposed to be the same as, or another name for Somā, and its site had evidently fallen into oblivion at their day. But the support of this name was a celebrated city, still flourishing, and identified on the authority of an eye-witness M. Frensel has endeavored to prove that this city, and not the western one, was the Himyarite capital; and certainly his opinion appears to be borne out by most of the facts that have been brought to light. Nor does he question the ruins of Dhašfīr on the same near Yereem, which would be those of the western city (Descr. p. 206). While Dhašfīr is often mentioned as the capital in the history of the Himyarite kingdom (Cassius, Eusei, E. passim), it was also in the later times of the kingdom the seat of a Christian church (Philostorgius, Hist. Eccles. iii. 4).

But, leaving this curious point, it remains to give what is known respecting Dhašfīr the sea-port, or as it will be more convenient to call it, after the usual pronunciation, Zafīr. All the evidence is clearly in favor of this site being that of the Sephar of the Bible, and the identification has accordingly been generally accepted by critics. More accurately, it appears to preserve the name mentioned in Gen. x. 39, and to be in the district anciently so named. It is situated on the coast in the province of Hadramaūt, and near to the district which adjoins that province on the east, called Ḥī-Šikeh (or, as M. Frensel says it is pronounced in the modern Himyarite, Shikeh). Wellsted says of it, "Dhafsir is situated beneath a lofty mountain" (N. 453). In the Māriātī it is said, as we have seen, that frankincense (in the author’s time) was found only in the "mountain of Dhašfīr:" 2 and Niebuhr (Descr. p. 248) says that it exports the best frankincense. M. Frensel gives almost all that is known of the present state of this old site in his Lettres sur l’Histoire des Arabes avant l’Islamisme (Ve Lettre, Journ. Asiat. 5e série, tome v.). Zafīr, he tells us, pronounced by the modern inhabitants “Zafir,” is now the name of a series of villages situated some of them on the shore, and some close to the shore, of the Indian Ocean, between Miḥbat and Had-Saṣīr, extending a distance of two days’ journey, or 17 or 18 hours, from east to west.

Proceeding in this direction, those near the shore are named Tabāhk, Ed-Dahhār, Ed-Belād, Ed-Daḥfa, Sūdhāk, and Aṣkād. The first four are on the sea-shore, and the last two at a small distance from it. Ed-Belād, otherwise called Umrāh, is, in M. Frensel’s opinion, the ancient Zafīr. It is in ruins, but ruins that attest its former prosperity. The inhabitants were celebrated for their hospitality. There are now only three or four inhabited

---

1 Obtained by taking the prefixed preposition as part of the name — Dhašfīr; and at the same time rejecting the Final D.

2910 SEPHERAD SEPHERAD

houses in Ed-Belād. It is on a small peninsula lying between the ocean and a bay, and the port is on the land side of the town. In the present day during nearly the whole of the year, at least at low tide, the bay is a lake, and the peninsula an island, but the lake is of sweet water. In the rainy season, which is in the spring, it is a gulf, of sweet water at low tide and of salt water at high tide.

The classical writers mention Saphar metropol ites (Σαφαραὶ μητροπόλεως) or Sephar (in Anon. Perip. p. 274), in long. 88°. lat. 14° 30’, according to Ptol., the capital of the Sapharitans (Σαφαρίται), placed by Ptol. (v. 6, § 25) near the Horositae; but their accounts are obscure, and probably from hearsay. In later times, as we have already said, it was the seat of a Christian Church; one of those which were founded L. p. 343, by permission of the reigning Tagban, in Dhašfīr (written Tapharon, Tapharos, by Philostorgius, Hist. Eccles. iii. 4), in “Abin, and on the shores of the Persian Gulf. Ticophilus, who wrote an embassy by order of the emperor Constantine to effect this pur pose, visited the first bishop (Cassius, i. 114 ff.). In the reign of Abanish (A. D. 537-570), S. Gregen tius was bishop of these churches, having been sent by the Patriarch of Alexandria (cf. authorities cited by Cassius, i. 114-145).

SEPHARAD

one common variation of which name, Hesperia (Dict. of Geogr. l. 1074 5), does certainly bear consider- able resemblance to Sepharad; and so deeply has this taken root that at the present day the Spanish Jews, who form the chief of the two great sections into which the Jewish nation is divided, are called by the Jews themselves the Sepharvaim, German Jews being known as the Askhenzim.

It is difficult to suppose that either of these can be the true explanation of Sepharad. The prophecy of Olsäkiah has every appearance of referring to the destruction of Jerusalem by Nebuchadnezzar, and there is no reason to believe that any Jews had been at that early date transported to Spain.

3. Others have suggested the identity of Sepharad with Sipparah in Mesopotamia, but that is more probably SEPHARVAIM.

4. The name has perhaps been discovered in the cuneiform Persian inscriptions of Olsäkiah, Bisa-tum and Bekistan; and also in a list of Asiatic nations given by Niebuhr (Reisei. ii. pl. 31). In the latter it occurs between Ka Ta Pa TUK (Cappadocia) and Ta UNA (Ionian). De Saucy was the first to propose the identification of this with Sepharad, and subsequently it was urged by Lassen that Sipparah was identical with Sardis, the ancient capital of Lydia. This identification is approved of by Winer, and adopted by Dr. Pusey (Intro. to Ovd. p. 232, note also p. 245).

In support of this, First (Handb. ii. 95 a) points out that Antigonus (cir. B. C. 320) may very probably have taken some of his Jewish captives to Sardis; but it is more consistent with the apparent date of Olsäkiah's prophecy to believe that he is referring to the event mentioned by Joel (iii. 6), when "children of Judah and Jerusalem" were sold to the "sons of the Javanim" (Ionians), which—as the first captivity that had befallen the kingdom of Judah, and a transportation to a strange land, and that beyond the sea—could hardly fail to make an enduring impression upon the nation.

5. Kwald (Prosph. i. 494) considers that Sepharad has a connection with Zarephath in the preceding verse; and while depreciating the "penetration" of those who have discovered the name in a cuneiform inscription, suggests that the true reading is Sepharah, and that it is to be found in a place three hours from Abdos, i.e. doubtless the modern Shefr "Owne, a place of much ancient reputation and veneration among the Jews of Palestine (see Zunz, note to "Pareh," p. 428); but it is not obvious how a residence within the Holy Land can have been spoken of as a captivity, and there are considerable differences in the form of the two names.

6. Michaelis (Suppl. No. 1778) has devoted some space to this name: and, among other conjectures, ingeniously suggests that the "Spartans" of 1 Marc. xii. 5 are accurately "Sepharvates." This suggestion, however, does not appear to have stood the test of later investigation. [See Spartans.]

a When Pliny places Hespera or Sippara on the Ararag (Nahr Azun), instead of on the Euphrates, his reference is to the artificial channel which branched off from the Euphrates at Sippara, and led to the great lake (Chald. N twentieth) excavated by Nebuchadnezzar.

Abidenus called this branch "Aravanus."

"Nebiawas, Art. Azun (Fr. 10)."

SEPHARAISM (Σηφαραϊσμός [see below]: Σηφαραϊκοῦς, Ἑφαραϊκοῦς; Sepharvanism) is mentioned by Semachchi in his letter to Hezekiah as a city whose king had been unable to resist the Assyrians (2 K. xix. 13; Is. xxvii. 13; comp. 2 K. xviii. 34). It is coupled with Nine and Ava, or Ira, which were terms on the Euphrates above Babylon. Again, it is mentioned, in 2 K. xvi. 24, as one of the places from which colonists were transported to people the desolate Samaria. after the Ira-dites had been carried into captivity, where it was again joined with Ava, and also with Cushan and Babylon. These indications are enough to justify us in identifying the place with the famous town of Sippara, on the Euphrates above Babylon (Exod. v. 18), which was near the site of the modern Mosul. Sippara was mentioned by Berosus as the place where, according to him, Xithrus (or Noah) buried the records of the antediluvian world at the time of the Deluge, and from which his posterity recovered them afterwards. (Periga. Hist. cir. ii. 591, iv. 286). Abiudenus calls it "Ζηφαραί Aνα-μέλη, a place which Nebuchadnezzar dug in its vicinity for the purposes of irrigation. Pliny seems to intend the same place by his "σπηφαραίρεμον""where, according to him, was a great seat of the Chaldaic learning (H. N. vi. 30).

The plural form here used by Pliny may be compared with the dual form in use among the Jews; and the explanation of both is to be found in the fact that there were two Sipparas, one on either side of the river. Berosus called Sippara, "a city of the sun" (Hαιος Παλαμα; and in the inscriptions it bears the same title, being called Σπηφαραί Σωνως, or "Sippara of the sun"—the sun being the chief object of worship there. Hence the Sepharvites are said, in 2 K. xvii. 31, to have brought their children in the fire to Adramelech and Anamathel, the gods of Sepharvam"—these two distinct deities representing respectively the male and female powers of the sun, as Luann and Lanim represented the male and female powers of the moon among the Romans. G. R.

* SEPHARVITES (Σηφαραϊκοῖς: Σηφαραϊκοῖς; Sepharvanites; Berosus: Σηφάραϊκοῖς; hi qui erant de Sepharvainia), 2 K. xvi. 31. The people of SEPHARHAIM.

II.

SEPHELA (Ἑφαλία: Sephala). The Greek form of the ancient word hws-Sfeof (Hφαλία), the native name for the southern division of the low-lying flat district which intervenes between the central highlands of the Holy Land and the Mediterranean, the other and northern portion of which was known as SHALON. The name occurs throughout the topographical records of Joshua, the historical works, and the topographical passages in the Prophets; always with the article prefixed, and always denoting the same region b (Dent. i. 7; Josh. ii. 10, s. 16 b, xvii. 8, xv. 33; Judges i. 9, 1 K. x. 27: 1 Chr. xxvii. 28; 2 Chr. i. 15, ii. 27, xxvi. 19, xxvii. 18; Jer. xvii. 26, xxiii. 44, xxvi. 13; Obad. 19; Ezek. vii. 7). In each of these passages, however, the word is

b So absolute is this usage, that on the single occasion where it is used without the article (Josh. xii. 14) it evidently does not denote the region referred to above, but the plains surrounding the mountains of Edomai.
SEPTUAGINT and in the A. V. not as a proper name, analogous to the Compagnia, the Widow, the Curse, but as a mere appellative, and rendered "the vale," "the valley," "the plain," "the low plains," and "the low country." How destructive this is to the force of the narrative may be realized by imagining what confusion would be created in the translation of an English historical work into a foreign tongue, if such a name as "The Downs" were rendered by some general term applicable to any other district in the country of similar formation. Fortunately the book of Macenees has redeemed our Version from the charge of having entirely suppressed this interesting name. In 1 Macc. xii. 38 the name Sephela is found, though even here stripped of the article, which was attached to it in Hebrew, and still accompanies it in the Greek of the passage.

Whether the name is given in the Hebrew Scriptures in the shape in which the Israelites encountered it on entering the country, or modified so as to conform to the Hebrew root Shel, and to the Semitic terminations (just so in the native tongue, it brought it to a form intelligible to Hebrews—we shall probably never know. The root to which it is related is in common use both in Hebrew and Arabic. In the latter it has originated more than one proper name—*Mesopa,* now known as Kegypt: *Mesopel,* one of the quarters of the city of Mecca (Burkhardt, *Arabia,* l. c. 205, 206); and *Seville,* originally *Espaola,* probably so called from its wide plains (Arias Montano, in *Ford, Handbook of Spain*). The name *Sefela* is retained in the old versions, even those of the Samaritans, and Raddi Joseph on Chronicles (probably as late as the 11th century A. D.). It was actually in use down to the 5th century. *Eusebius,* and after him Jerome, *Quom.* *Sefela,* and *Conon,* on Obad., distinctly state that "the region round Bethes- reopolis on the north and west was so called." And a careful investigation might not improbably discover the name still lingering about its ancient home even at the present day.

No definite limits are mentioned to the Shel- ifah, nor is it probable that there were any. In the list of the *Cities of Israel* (xx. 35-47) it contains 45 "cities," as well as the "twenty-four villages dependent upon them." Of these, as far as our knowledge avails us, the most northern was Elaron, the most southern Gaza, and the most western Nezib (about 7 miles N. W. of Hebron). A large number of these towns, however, were situated not in the plain, nor even on the western slopes of the central mountains, but in the mountains themselves. *[Jarmuth: Kehlah: Nezib:]* This seems to show, either that on the ancient principle of dividing territory one district might intrude into the limits of another, or, which is more probable, that, as already suggested, the name *Sefela* did not originally mean a lowland, as it came to do in its accommodated Hebrew form.

The Shel- ifah was, and is, one of the most productive regions in the Holy Land. Sloping as it does gently to the sea, it receives every year a fresh dressing from the materials washed down from the mountains behind it by the furious rains of winter. This natural manure, aided by the great heat of its climate, is sufficient to enable it to reward the rude husbandry of its inhabitants year after year with crops of corn which are described by the travelers as prodigions.

Thus it was in ancient times the corn-field of Syria, and as such the constant subject of warfare between Philistines and Israelites, and the refuge of the latter when the harvests in the central country were ruined by drought. (Ezra, viii. 53.) But it was also, from its evenness, and from its situation on the road between Egypt and Assyria, exposed to constant visits from foreign armies, visits which at last led to the destruction of the Israelitic kingdom. In the earlier history of the country the Israelites do not appear to have ventured into the Shel- ifah, but to have waited the approach of their enemies from thence. Under the Macenees, however, their tactics were changed, and it became the field where some of the most hardly contested and successful of their battles were fought.

These conditions have hardly altered in modern times. Any invasion of Palestine must take place through the maritime plain, the natural and only road through the mountains. It did so in Napoleon's case, as has already been noticed under *Palestine* (iii. 2241 a.). The Shel- ifah is still one vast cornfield, but the contests which take place on it are now reduced to those between the oppressed peasants and the insolent and rapacious officials of the Turkish government, who are gradually putting a stop by their exactions to all the industry of this district, and driving active and willing hands to better governed regions. [See JUDAH, vol. iii. p. 1490; *P A L E S T I N E,* vol. iii. pp. 2289 f., 2196 f.; PLAINS, 2447.]

SEPTUAGINT. The Greek version of the Old Testament known by this name, is like the N. T., *finitum qui celat orignes.* The causes which produced it, the number and names of the translators, the times at which different portions were translated, are all uncertain. It will therefore be best to launch our skiff on known waters, and try to track the stream upwards to its source.

This Version appears at the present day in four principal editions.

1. Biblia Polyglotta Complutensis, A. D. 1514-1517. [The publication of the work was not authorized by the Pope, and it did not get into general circulation before 1522. — A.]

3. The Roman Edition, edited under Pope Sixtus V., A. D. 1587. [Some copies have the date 1586. These want the "Corrigenda in Notitio- mundi Pisleri," etc., and the *Privilegium of Sixtus V., dated May 9, 1587. The copies of this later issue have the date 1586 changed to 1587 with a pen. Before the work was published it was carefully revised, and many MS. corrections were made in all the copies. — A.]

1. The texts of (1) and (2) were probably formed by collection of several MSS.

2. The Roman edition (3) is printed from the venerable *Codex Vaticanus,* but not without many errors. The text has been followed in most of the modern editions.

A transcript of the Codex Vaticanus, prepared by Cardinal Mai, was lately published at Rome, by the same time to extend Sharon so far south as to include the Philistian cities.
SEPTUAGINT

Vercellonius. [Published in 1857, in 5 vols. fol., including the N. T.] It is to be regretted that this edition is not so accurate as to preclude the necessity of consulting the MS. The text of the Codex, and the parts added by a later hand, to complete the Codex (among them nearly all Genes.), are printed in the same Greek type, with distinguishing notes. [See addition below.]

* Some further account of the first three editions here mentioned seems desirable. The Complutensian text has been supposed by many critics (e.g. Walton) to have been arbitrarily formed by the editors, partly from the Septuagint and partly from the other Greek versions and even the Greek commentators, in order to make it more conformable to the Hebrew or the Vulgate. The fact, however, is now well established, that it represents a certain class of manuscripts, agreeing particularly with those numbered in the Complutenian (Brit. Museum Library) (in part), 93, 105, 119, and 248. Of these we know that Nos. 108 and 248 were borrowed from the Vatican Library for the use of the editors. (See Vercellone's Preface to Cardinal Mai's Vit. et Not. Test. e Cod. Vat., Rom. 1857, vol. i. p. x.)

The Complutensian text was reprinted in the Antwerp Polyglott (1569-72), that of Variable or rather C. B. Vossianus (S. auditory in Christenland, Hamburg, 1583 or 1587; ex off. Complutenian [ibid.], 1899, 1616), Worder's (Hamb. 1546), and the Paris Polyglott (1628-45). It does not contain the first (Vulg. third) book of Esther.

In the dedication of the Aldine edition the text is said to have been formed from the collection of many very ancient manuscripts, "multi veteris testimoniis exemplarios collatis," but such expressions must be taken with large allowance. Its text in the Pentateuch accords with the MS. numbered by Holmes 23, of the 11th or 12th century, belonging to the Library of St. Mark in Venice, with which the other Venice MSS. numbered by Holmes 63, 129, 121, 122 agree, being all apparently transcribed from the same original. Copies of this edition, the first of the whole Bible in Greek, are now exceedingly rare. There is one, however, in the Library of Harvard College, deposited by the late George Livermore of Cambridge. The variations of the Aldine text from that of the Roman edition are given, though very imperfectly, in Walton's Polyglott, from which they have been copied by Bos in his edition of the Septuagint. As we have had frequent occasion to observe in this Dictionary, the forms of the proper names in the common English version of the Apocrypha generally agree with this edition, where it differs from the Roman text. The versions of the entire Bible in Greek derived mainly from the Aldine, may be mentioned the printed Argentorat, or Poggio, Bibliotheca, 1526 (many copies exist of 1529); Basle, per J. Heresinum, 1543; ibid. per N. Brynggeranum, 1550; and Francof., op. A. Wicelii Verexi, 1597. The variations of the last from the Aldine text are considerable.

The Roman edition of the Septuagint has been generally supposed to represent the text of the famous Vatican MS No. 1209, and its readings are continually quoted in the English edition of this Dictionary as those of that MS. But this is a grave error. It is safe to say that in the forms of proper names alone it differs from the Vatican MS. in more than 1,000 places. The Vatican MS. was indeed used as the basis of the Roman edition, and was understood by the editors to be of the highest value; but many other ancient MSS. were collated for it, particularly one belonging to Cardinal Borsseron, an uncial of the 6th or 7th century, numbered 27 in the edition of Holmes and Parsons, another in the possession of Cardinal Carafa, and several from the Medicean Library at Florence. The language of the Preface to the Roman edition (written by P. Morinus) might indeed lead the reader to suppose the text of the Vatican MS. to have been more closely followed than it really was, though he admits that the editors have changed the old orthography, and have corrected evident mistakes of the copist. The Preface to Cardinal Carafa's Latin translation published the next year (1588) as a complement to the edition gives a more correct account of the matter. (See on this subject Vercellone's Preface to Cardinal Mai's edition, vol. i. p. vi. note, and comp. Tischendorf's Compend. ed., ed. 3, vol. ii., part 1, p. 2xxxiv.) It should further be observed that the Vatican MS. wants the larger part of the book of Genesis (it commences with the word χαλκος, Gen. xlvi. 28), Ps. cv. 27-xxxix. 6, and the books of Micah, Nahum, and Zephaniah, as represented in the Septuagint. The poetical and prophetic books of the O. T. (with the exception of Job), and the apocryphal books of Baruch, Wisdom, and Ecclesiasticus, were not collated in the edition of Holmes and Parsons. The edition of Cardinal Mai mentioned above is unsatisfactory (comp. Tischendorf, at supr. p. lxxxix. 8.), though we may generally place confidence in its readings where its text differs from that of the Roman edition. It will be wholly superseded by the magnificent edition now publishing at Rome under the direction of Vercellone, Ossa, and Sergio, to be completed in six vols., of which two at least containing the N. T. have already (Feb. 1870) appeared. Comp. the art. New Testament, vol. iii. p. 2124. A.

Other Editions.

The Septuagint in Walton's Polyglott (1567) is the Roman text, with the various readings of the Codex Alexandrinus.

* The readings of other MSS. and of the Complutensian and Aldine editions are also given. Walton reprints (vol. vi.) the valuable critical notes to the Roman edition, and to the Latin translation by Flaminius Nobilius which accompanied it. The text of the Roman edition is not very faithfully reproduced; see the Prolegomena to Bos's edition of the Septuagint (1769).

The Cambridge edition (1665), (Roman text,) is only valuable for the Preface by Pearson.

An edition of the Cod. Alex. was published by Grohe (Oxford, 1707-1729), but its critical value is far below that of Rabier's. It is printed in common Roman type, and the editor has exercised his judgment on the text, putting some words of the Codex in the margin, and replacing them by what he thought better readings, distinguished by a smaller type. This edition was reproduced by Friederich (Zurich, 1730-32), 4 vols. 4to, with the various readings of the Vatican text [the Roman edition].

The edition of Bos (Francof., 1709) follows the Roman text, with its Scholia and the various read-
ings given in Walton's Polyglott, especially those of the Cod. Alex.

The valuable Critical Edition of Holmels, continued by Parsons, is similar in plan to the Hebrew and Koine text, with a large body of various readings from numerous MSS. and editions, Oxford, 1798-1827 [in 5 vols., fol.].

* For a full list of the MSS. used, see the end of vol. v.; they are described in the introductions to the different books. The uncials are numbered 1 to XIII; IX. also being numbered by mistake 205; Nos. XIV. and XV. are really only parts of the same MS. To these are to be added Nos. 23, 27, 43, 258, and 262, making 17 uncials in all. The whole number of cursive, after making allowance for these which are designated by two different numbers, appears to be 285; but several of these are either mere transcripts of others on the list, or copied from the same archetype. Very few important manuscripts were discovered by himself with very useful Prolegomena.

* Besides the readings of the Cod. Alex., he has given those of the Codex Friderici-Augustinus, and of the Ephraim MS. (See note b below). The 24 and subsequent editions contain the Septuagint version of the book of Daniel in addition to that of Theodotion. The first edition (1590) having been stereotyped, the important materials gathered by Tischendorf since its publication have not been used (except to a small extent in his 4th edition) in the apparatus of various readings which accompanies the text. For a translation of the hadgamaeum to Tischendorf's first edition, by Mr. Charles Short, see the Bibl. Sacra for Oct. 1892 and Jan. 1893.

Some convenient editions have been published by Mr. Bagster, one in 8vo, and others of smaller size forming part of his Polyglott series of Bibles. His text is the Roman.

The latest edition, by Mr. Field (1859) differs from all previous ones. He takes as his basis the Codex Alexandrinus, but corrects all the manifest errors of transcription, by the help of other MSS.; and brings the dislocated portions of the Septuagint into agreement with the order of the Hebrew Bible.  

Manuscripts.

The various readings given by Holmes and Parsons, enable us to judge, in some measure, of the character of the several MSS. and of the degree of their accordance with the Hebrew text.

The following are distinguished thus by Holmes: the uncial by Roman inscriptions [see the exceptions above], the cursive by Arabic figures.

Among them may be especially noted, with their probable dates and estimates of value as given by Holmes in his Preface to the Pentateuch:

**Uncial.**

2. Vaticans. Vat. Library, Rome 4

* There are some singular variations in 1 Kings (see the article on Kings, vol. ii. p. 150).  

b An uncial MS., brought by Tischendorf from St. Catherine's Monastery, and named Codex Sinaicus, is supposed by him to be a ancient as Cod. Vaticanus (11.), and is not less important. A manuscript was published by Tischendorf at St. Petersburg in 1822 in 4 vols. 8vo, the last containing the N. T. (For a description of the edition, see art. NEW TESTAMENT, iii. 212). On the Old Testament, it contains 1 Chr. ix. 27-31; 22; 2 Chr. xiv. 10, 13; 28; Jer. xxxiv. 23; Ps. cxlvi.; Ps. cv.; Psa. cxlix.; Isai.; Jer. i. 18; xxv.; the Minor Prophets from Joel to Malachi inclusive (wanting Hosea, Amos, Micah); and all the remaining poetical books (Psalms, Proverbs, Ecclesiastes, Cont. Wisdom of Solomon, Ecclesiasticus, Job). The Codex Friderici-Augustinus, discovered by Tischendorf in 1844, and published in fasciculi at Leipzig in 1848, consists of 48 leaves of the same manuscript, containing 1 Chr. xl. 22-xxvii. 17; Est. ix. 28 to the end; Neh. x.; Esther; Tobit i. 1-12; 2; Jer. xxv. 9 to the end; Isai. xxvii. 1. A few more fragments, most of which had been used by the monks of St. Catherine for binding MSS., contain small portions of Gen. xxiii., xxiv., and Num. v., vi., xii., and were published by Tischendorf in his Mon. Sacra ined. Nova Col. vol. ii. p. 321 (1857), and Apparate Cod., Sac. Vet. Al. pp. 3-6 (1857). The books of Tobit and Judith in the Sinaitic MS. present a recession of the text differing very widely from that in the Codex Vaticanus.

Respecting the uncial MSS. mentioned in the text above, it should be stated that the fragments of the Codex Cottianus (1.), containing part of Genesis, have been published by Tischendorf in his Mon. Sacra ined. Nova Col. vol. ii. p. 157 (1855). The new edition of the Codex Vaticanus (11.) by Yerridone and others has already been referred to The Codex Arabicus (11.), containing portions of the Pent. and Joshua, is in course of publication by Ceriani in vol. iii. of his Monumenta sacra in paleae et Codicis praevari Editioni, Ambrosiana, Milan, 1854 in 4to. Tischendorf assigns it to the 5th century instead of the 7th, and he (with Muntzmann) regards the Codex Cottianus (X.) as probably belonging to the 8th century. The latter MS. has the Hexaplar text.

The fragments of the O. T. contained in the Ephraim manuscript, a palimpsest of the 5th century belonging to the Imperial Library at Paris,—namely, parts of Job, Proverbs, Ecclesiastes, the Wisdom of Solomon, and Ecclesiasticus,—were published by Tischendorf in 1845. On his edition of the N. T. portion of the same MS. (designated by the letter f), see the art. NEW TESTAMENT, vol. iii. p. 212.

Among the uncial MSS. collated for the edition of Holmes and Parsons, we may mention further the Codex Sacravonius (numbered by Holmes iv. and V.), of which 129 leaves are preserved at Leyden, 22 at Paris, and 1 at St. Petersburg. It has been published in part by Tischendorf in his Mon. Sacra ined. Nova Col. vol. iii. (1850),—the 22 Paris leaves are reserved for vol. viii., and is referred by him to the 4th century or the beginning of the 5th. This MS. is of great importance for the Hexaplar text of Origen. It contains parts of the Pentateuch, Joshua, and Judges. The Codex Margalefinus (XII. Holme) of the 7th century, now in the Vatican Library, is also an important Hexaplar MS., containing the Prophets. The part containing Daniel has been published by Tischendorf in part in vol. iv. of his Mon. Sacra ined. (1859). Another uncial codex of the 5th or 6th century which has the Hexaplar text is Holmes's No. 28, belonging to the Library of St. Mark in Venice, containing Proverbs and all the following books of the O. T., with part of the book of Job. Next to the Vatican, this seems to have been the most important MS. used for the Roman edition of the Sept. (1567). See above, p. 1916. No. 29 in
The texts of these MSS. differ considerably from each other, and consequently differ in various degrees from the Hebrew original.

The following are the results of a comparison of the readings in the first eight chapters of Exodus:

4. Several of the MSS. agree well with the Hebrew; others differ very much.

2. The chief variance from the Hebrew is in the addition, or omission, of words and clauses.

3. Taking the Roman text as the basis, there are found 80 places (a) where some of the MSS. differ from the Roman text, either by addition or omission, in agreement with the Hebrew; 25 places (β) where differences of the same kind are not in agreement with the Hebrew. There is therefore a large balance against the Roman text, in point of accordance with the Hebrew.

4. These MSS. which have the largest number of differences of class (a) have the smallest number of class (β). There is evidently some strong reason for this close accordance with the Hebrew in these MSS.

5. The divergence between the extreme points of the series of MSS. may be estimated from the following statement:

Between these and the Roman text lie many shades of variety. The Alexandrine text falls about halfway between the two extremes:

The base-line R. T. represents the Roman text.

The above can only be taken as an approximation, the range of comparison being limited. A
The other εἰκόνες, or versions, are those of Aquila, Theodotion, and Symmachus.

Origen, Comm. in Jomra. (tom. ii. p. 131, ed. Huet.). "The same errors in names may be observed frequently in the Law and the Prophets, as we have seen in the Egyptian tongue by Theodotion, and by comparing our copies with their copies, as represented in the still uncorrupted versions of Aquila, Theodotion, and Symmachus."

It appears, from these and other passages, that Origen, finding great discordance in the several copies of the LXX., hid this version side by side with the other three translations, and, taking their accordance with each other as the test of their agreement with the Hebrew, marked the copy of the LXX. with an olba, where he found superfluous words, and supplied the deficiencies of the LXX. by words taken from the other versions, with an asterisk; *, prefixed.

The additions to the LXX. were chiefly made from Theodotion (Hieronymus, Proleg. in Genesis tom. 1).

"Quod ut alioquin, Origenis me studium pro vocavit, qui Editioni antiquae translationem Theodotionis misicit, asterisco * et olba = id est, stellâ et verum, quos ommne distinguere: dum aut illescere exit, qua minus ante fuerant, aut superfracique jugulat et confidunt (see also Pref. in Job, p. 736)."

From Enesidem, as quoted below, we learn that this work of Origen was called τετραπαλα, the fourfold Bible. The specimen which follows is given by Montfaucon.

Gen. i. 1.

It should here be mentioned that some take the Tetrapla as denoting, not a separate work, but only that portion of the Hexapla which contains the four columns filled by the four principal Greek versions. Valeinus (Notes on Eschaton, p. 106) thinks that the Tetrapla was formed by taking those four columns out of the Hexapla, and making them into a separate book.

But the testimony of Origen himself (i. 381, ii. 131), above cited, is clear that he formed one corrected text of the Septuagint, by comparison of the three other Greek versions (8, 7, 6), using them as his criterion. If he had known Hebrew at this time, would he have confined himself to the Greek versions? Would he have appealed to the Hebrew, as represented by Aquila, etc.? It seems very evident that he must have learnt Hebrew at a later time, and therefore that the Hexapla, which rests on a comparison with the Hebrew, must have followed the Tetrapla, which was formed by the help of Greek versions only.

The words of Eschines also (H. E. vi. 16) appear to distinguish very clearly between the Hexapla and Tetrapla as separate works, and to imply that the Tetrapla preceded the Hexapla.

The order of precedence is not a mere literary question: the view above stated, which is supported by Montfaucon, Ussher, etc., strengthens the force of Origen's example as a diligent student of Scripture, showing his increasing desire integra acce
dere fontes.

The labors of Origen, pursued through a long course of years, first in procuring by personal travel the materials for his great work, and then in comparing and arranging them, made him worthy of the name Adiaphor.

But what was the result of all this toil? Where is now his great work, the Hexapla, prepared with so much care, and written by so many skillful hands? Too large for transcription, too early by novelty for printing (which alone could have saved it), it was destined to a short existence. It was brought from Tyre and laid up in the Library at Cæsarea, and there probably perished by the flames, a. d. 654.

From another passage of Jerome (in Epist. ad Titum, tom. iv. P. p. 437) we learn that in the Hexapla the Hebrew text was placed in one column in Hebrew letters, in the next column in Greek letters:

"Unde et nos curae fuit omnes veteris legum libros, quos vidit doctor Abrahamus (Origenes) in Hexapla digesserat, de Cœcetiam Bibliothecam des
tionem, quas etiam nos de ejus Bibliothecâ laore
mus, miro labore operem, et cuncta editionibus comparavit."

It is probably the ancestor of those Codices which now approach most nearly to the Hebrew, and are entitled Hexapla; but in the course of transcription the distinguishing marks have disappeared or become confused; and we have thus a text composed partly of the old Septuagint text, partly of insertions from the three other chief Greek versions, especially that of Theodotion.

The facts above related agree well with the phenomena of the MSS. before stated. As we have Codices derived from the Hexaplar text, e. g. 72, 50, 58; and at the other extreme the Codex Vatic
canum (11), probably representing nearly the ancient uncorrected text, xerap; so between these we find texts of intermediate character in the Codex Alexandrinus (11), and others, which may per
haps be derived from the text of the Tetrapla.

To these main sources of our existing MSS. must be added the recensions of the Septuagint mentioned by Jerome and others, namely, those of Lucian of Antioch and Hexychius of Egypt, not long after the time of Origen. We have seen above that each of these had a wide range; that of Lucian (supposed to be corrected by the Hebrew) in the churches from Constantinople to Antioch; that of Hexychius in Alexandria and Egypt; while the churches lying between these two regions used the Hexaplar text copied by Eschines and Pamphilus (Hieron.
tom. i. col. 1922).

The great variety of text in the existing MSS. is thus accounted for by the variety of sources from which they have descended.

1. History of the versions.

We have now to pursue our course upwards, by such guidance as we can find. The ancient text, called xerap, which was current before the time of Origen, whence came it?

We find it quoted by the early Christian Fathers, in Greek by Clemens Romannus, Justin Martyr.
IRENAEUS; in Latin versions by Tertullian and Cyprian; we find it questioned as inaccurate by the Jews (Just. Martyr, Apost.), and provoking them to obtain a better version (hence the versions of Aquila, etc.); we find it quoted by Josephus and Philo: and thus we are brought to the time of the Apostles and Evangelists, whose writings are full of citations and references, and imbued with the phraseology of the Septuagint.

But when we attempt to trace it to its origin, our path is beset with difficulties. Before we enter on the doubtful ground we may pause awhile to notice the wide extension which the Version had obtained at the Christian era, and the important services it rendered, first, in preparing the way of Christ, secondly, in promoting the spread of the Gospel.

1. This version was highly esteemed by the Hel lenistic Jews before the coming of Christ. An annual festival was held at Alexandria in remembrance of the completion of the work (Philos. De Veto Mosia, lib. ii. §.). The manner in which it is quoted by the writers of the New Testament proves that it had long been in general use. Wherever, by the conquests of Alexander, or by colonization, the Greek language prevailed: wherever Jews were settled, and the attention of the neighboring Gentiles was attracted by the wondrous history and law, there was found the Septuagint text, which was received, by Divine Providence, the means of spreading widely the knowledge of the one true God, and his promises of a Saviour to come, throughout the nations; it was indeed "sola genitior et Christi tan." To the wide dispersion of this version we may ascribe that general persuasion prevailing over the whole East (per even habuam societas tota) of the near approach of the Redeemer, and led the Magi to recognize the star which proclaimed the birth of the King of the Jews.

2. Not less wide was the influence of the Septuagint in the spread of the Gospel. Many of those Jews who were assembled at Jerusalem on the day of Pentecost, from Asia Minor, from Africa, from Alexandria, and the Prophets came to them in the words of the Septuagint: St. Stephen probably quoted from it in his address to the Jews: the Ethiopian eunuch was reading the Septuagint version of Isaiah in his chariot ("... de prosbarno eii arxagyn xeythel..." they who were scattered abroad went forth into many lands speaking of Christ in Greek, and pointing to the things written of Him in the Greek version of Moses and the Prophets; from Antioch and Alexandria in the East to Rome and Massilia in the West the voice of the Gospel sounded forth in Greek; Clemens of Rome, Ignatius at Antioch, Justin Martyr in Palestine, Irenaeus at Lyons, and many more, taught and wrote in the words of the Greek Scriptures; and a still wider range was given to them by the Latin version (or versions) made from the LXX. for the use of the Latin Churches in Italy and Africa; and in later times by the numerous other versions into the tongues of Egypt, Ethiopia, Armenia, Arabia, and Georgia. For a long period the Septuagint was the Old Testament of the far larger part of the Christian Church.

IRENAEUS; in Latin versions by Tertullian and Cyprian; we find it questioned as inaccurate by the Jews (Just. Martyr, Apost.), and provoking them to obtain a better version (hence the versions of Aquila, etc.); we find it quoted by Josephus and Philo: and thus we are brought to the time of the Apostles and Evangelists, whose writings are full of citations and references, and imbued with the phraseology of the Septuagint.

Let us now try to ascend towards the source.

Can we find any clear, united, consistent testimony to the origin of the Septuagint? (1) Where and when was it made? and (2) by whom? and (4) the title? The testimonies of ancient writers, or (to speak more properly) their traditions, have been weighed and examined by many learned men, and the result is well described by Pearson (Pref. ad LXX., 1665):

"Neque vero de ejus antiquitate dignitatem quiquam impraesentans dicens, de quibus viri docti multa, hoc preseritam sequens, scripsere: qui enim maximam inerit se dispositionem, ut lude uterque et explorat viderat transcendit." 1

1. The only point in which all agree is that Alexandria was the birthplace of the Version: the Septuagint begins where the Nile ends his course.

2. On one other point there is a near agreement, namely, as to time, that the Version was made, or at least commenced, in the time of the earlier Ptolemies, in the first half of the third century B. C.

3. By whom was it made? The following are some of the traditions current among the Fathers:

— Irenaeus (lib. iii. c. 24) relates that Ptolemy Lagi, wishing to adorn his Alexandrian Library with the treasures of all nations, requested from the Jews of Jerusalem a Greek copy of their Scriptures: that they sent seventy elders well skilled in the Scriptures and in later languages; that the king separated them from one another, and bade them all translate the several books. When they came together before Ptolemy and showed their versions, God was glorified, for they all agreed, beginning from the beginning, in every phrase and word, so that all men may know that the Scriptures are translated by the inspiration of God.

Justin Martyr (Cohort. ad Graecos, p. 34) gives the same account, and adds that he was taken to see the cells in which the interpreters worked.

Epiphanius says that the translators were divided into two parties, in 36 cells, each pair being provided with two scribes; and that 36 versions, agreeing in every point, were produced, by the gift of the Holy Spirit (De Poul., cap. iii. vii.).

Among the Latin Fathers Augustine adheres to the inspiration of the translators: "Non autem secundum LXX. interpretes, qui etiam ipsi divino Spiritu interpretati, ob hoc alter videntur nonnulla dissidue, ut ad spiritualia sensum sanctum narratis admittere deo eorundem litteratori locis desit..." (De Doctr. Christ. iv. 15).

But Jerome boldly throws aside the whole story of the cells and the inspiration: "Et nescio quis primus necor Septuaginta cellulas Alexandriam nondum vacuo extraxerit, quibus divisae eodem scrip- turae, cum Aristaeus ejusdem Ptolemai operatur, et nudo post tempus Josephus, nihil talis retulit: sed in maiis congregat, conus lisse scilicet, non prophetasse. Allud est enim vatem, nihil esse interpretem. Hui spiritus ventura predict; hic eruditio et verborum copia ea esse intellectus translatit." (Pref. ad Pent.)

The decision between these conflicting reports as to the inspiration may be best made by careful study of the Version itself.

It will be observed that Jerome, while rejecting the stories of others, refers to the relation of Aris- taeus, or Aristees, and to Josephus, the former being followed by the latter.
This (so-called) letter of Aristees to his brother Philocrates is still extant; it may be found at the beginning of the folio volume of Holy (De Bibliorum Textibus Originiibus, etc., Oxon. Mid CCP), and separately in a small volume published at Oxford (1692). It gives a splendid account of the origin of the Septuagint: of the embassies and presents which were sent by Alexander the Great to the library at Jerusalem; of the Septuagint being produced, by the advice of Demetrius Phileres, his librarian, 50 talents of gold and 70 talents of silver, etc.; the Jewish slaves whom he set free, paying their ransom himself; the letter of the king; the answer of the high-priest; the choosing of six interpreters from each of the twelve tribes, and their names; the copy of the Law, in letters of gold; their arrival at Alexandria on the anniversary of the king's victory over Antigonus; the feast prepared for the seventy-two, which continued for seven days; the questions proposed to each of the interpreters in turn, with the answers of each; their lodging by the sea-shore; and the accomplishment of their work in seventy-two days, by care and consultation.

Οἱ δὲ επετεύχθησαν έκκλησια σύμφωνα ποιώντες πρὸς ταύτας τοὺς αντίλευκα, τὸ δὲ ἐκ τῆς συμφωνίας γνωσμῶν προετοίμασεν αναγράφουσι ως τῶν επίτυχου παρὰ τοῦ διατηρησίου . . .

The king rejoiced greatly, and commanded the books to be carefully kept; gave to each three robes, two talents of gold, etc.; to Eleazer the high-priest he sent ten silver-footed tables, a cup of thirty talents, etc., and begged him to let any of the interpreters who wished come and see him again, for he loved to have such men and to spend his wealth upon them.

This is the story which probably gave to this version the title of the Septuagint. It differs from the later accounts above cited, being more embellished, but less marvelous. It speaks much of royal pomp and munificence, but says nothing of inspiration. The translators met together and conferred, and produced the best version they could.

A simpler account, and probably more genuine, is that given by Aristotelus (24 century B. C.) in a fragment preserved by Clemens Alexandrinus (Stromata, Lib. v. p. 535) and by Eusebius (Porph. Contra. Theol. p. 12).

It is manifest that Plato has followed our Law, and studied diligently all its particulars. For before Demetrius Phileres a translation had been made, by others, of the history of the Hebrews going forth out of Egypt, and of all that happened to them, and of the conquest of the land, and of the exposition of the whole Law. Hence it is manifest that the abovementioned philosopher borrowed many things; for he was very learned, as was Pythagoras, who also transferred many of our doctrines into his system. But the entire translation of our whole Law (γυ καὶ τοῦ συμβολής τῶν διὰ τοῦ τόμον πάντων) was made in the time of the king named Philadelphus, a man of greater zeal, under the direction of Demetrius Phileres.1

This probably expresses the belief which prevailed in the 2nd century B. C., namely, that some portions of the Jewish history had been published in Greek before Demetrius, but that in his time and under his direction the whole Law was translated: and this agrees with the story of Aristees.

The Prologue of the Wisdom of Jesus the Son of Sirach (ascribed to the time of Ptolemy Physcon, about 135 B. C.) makes mention of "the Law itself, the Prophets, and the rest of the books"—"having been translated from the Hebrew into another tongue."

The letter of Aristees was received as genuine and trustworthy by many centuries; by Josephus and Jerome, and by learned men in modern times. The first who expressed doubts were Lard. de Vives (Note on Augustin, De Civit. Dei, xviii. 42) and Julius Scaliger, who boldly declared his belief that it was a forgery: "a Judaeo quodiam Aristene non multis confectum esse: and the general belief of scholars now is that it was the work of some Alexandrian Jew, whether with the object of establishing the dignity of his Law, or the credit of the Greek version, or for the meaner purpose of gain.

The age in which the letter of Aristees makes its appearance was fertile in such fictitious writings (see Bentley on Philostr. p. 83, ed. Dyce).

The passage in question is called this: "When the Attalids and the Ptolemies were in consultation about their libraries, the knavery of forging books and titles began. For there were those that, to enhance the price of their books, put the names of great authors before them, and so sold them to those princes."2

It is worth while to look through the letter of Aristees, that the reader may see for himself how exactly the characters of the writing correspond to those of the fictitious writings of the Sapients, so boldly exposed by Bentley.

Here are the same kind of errors and anachronisms in history, the same embellishments, eminent characters and great events, splendid gifts of gold and silver and purple, of which the writers of fiction were so lavish. These are well exposed by Holy; and we of later times, with our inherited wisdom, wonder how such a story could have obtained credit with scholars of former days.

"What classic cheats, those Silvanus oracles now extant, and Aristees' story of the Septuagint, passed without contest, even among many learned men." (Bentley on Philostr. Intro. p. 83).

But the Pseudo-Aristees had a basis of fact for his fiction; on three points of his story there is no material difference of opinion, and they are confirmed by the study of the Version itself:

1. The Version was made at Alexandria.
2. It was begun in the time of the earlier Ptolemies, about 280 B. C.
3. The Law (i.e. the Pentateuch) alone was translated at first.

It is also very possible that there is some truth in the statement of a copy being placed in the royal library. (The emperor Akbar caused the New Testament to be translated into Persian.)

But by whom was the Version made? As Holy justly remarks, it is of little moment whether it was made at the command of the king or spontaneously by the Jews; but it is a question of great importance whether the Hebrew copy of the Law, and the interpreters (as Pseudo-Aristees and his followers relate), were summoned from Jerusalem, and sent by the high-priest to Alexandria.3

On this question no testimony can be so conclusive as the evidence of the Version itself, which bears upon its face the marks of imperfect knowledge of Hebrew, and exhibits the forms and phrases of the Macedonian Greek prevalent in Alexandria, with a plentiful sprinkling of Egyptian words. The
forms ἁδῶν, παρενεβάλλοντος, bewray the fellow-citizens of Lycephon, the Alexandrian poet, who closes his funeral line with καὶ ἅγια σκίττοντες ἂν. Holy (ii. 6. 14) gives several examples of Egyptian renderings of names, and coins, and measures; among them the hippodrome of Alexandria, for the Hebrew Qoheth (Gen. xlviii. 7), and the papyrus of the Nile for the rush of Job (viii. 11). The reader of the LXX. will readily agree with his conclusion, "Sive vestis vasa, sive sponte a Judæis, a Judæis Alexandrini"s nisse fæcta.

The question as to the moving cause which gave birth to the Version is one which cannot be so decisively answered either by internal evidence or by historical testimony. The balance of probability must be struck between the tradition, so widely and permanently prevalent, of the king's intervention, and the simpler account suggested by the facts of history, and the phenomena of the Version itself.

It is well known that, after the Jews returned from the Captivity of Babylon, having lost in great measure the familiar knowledge of the ancient Hebrew, the readings from the Books of Moses in the synagogues of Palestine were explained to them in the Chaldee tongue, in Targums or Paraphrases; and the same was done with the Books of the Prophets when, at a later time, they also were read in the synagogues.

The Jews of Alexandria had probably still less knowledge of Hebrew; their familiar language was Alexandrian Greek. They had settled in Alexandria in large numbers soon after the time of Alexander, and under the earlier Ptolemies. They would naturally follow the same practice as their brethren in Palestine; the Law first and afterwards the Prophets would be explained in Greek, and from this practice would arise in time an entire Greek Version.

All the phenomena of the Version seem to confirm this view; the Pentateuch is the best part of the Version; the other books are more defective, betraying probably the increasing degeneracy of the Hebrew MSS. and the decay of Hebrew learning with the lapse of time.

1. *Whence the title?* It seems unnecessary to suppose, with Eichhorn, that the title Sepueagint arose from the approval given to the Version by an Alexandrian Synod in 70 or 72; that title appears sufficiently accounted for above by the prevalence of the letter of Aristus, describing the mission of 72 interpreters from Jerusalem. [For a different view of the origin of this name, founded on a curious Latin scholion, see art. Versions, Ancient (Greek).] — A.]

II. CHARACTER OF THE SEPTUAGINT.

We come now to consider the character of the Version, and the help which it affords in the criticism and interpretation of the Scriptures.

The Character of the Version. — Is it faithful in substance? Is it minutely accurate in detail? Does it bear witness for or against the tradition of its having been made by special inspiration?

These are some of the chief questions: there are others which relate to particulars, and it will be well to discuss these latter first, as they throw some light on the more general questions.

S. Was the Version made from Hebrew MSS. with the vowel-points now used? A few examples will indicate the answer.

---

**SEPTUAGINT**

1. **Proper Names**

<table>
<thead>
<tr>

2. **Other Words**

<table>
<thead>
<tr>
<th>Hebrew</th>
<th>Septuagint</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gen. i. 9. בְּכָל</td>
<td>παρενεβάλλοντος (ἡσυχασμένος)</td>
</tr>
<tr>
<td>xv. 11. בִּסְתָּה</td>
<td>καὶ ἄνθρωπον αὐτόν</td>
</tr>
</tbody>
</table>

Ex. xvi. 17. בַּעָלָה | τὸν ἐντολήν τωνแกρ, unlearned head. (ἡμετέρω τινί)

Num. xvi. 6. בִּסְתָּה | ἐνέπεκται, in the morning. (ἡμετέρω τινί)

Dent. xv. 18. בַּעָלָה | δύο εἴδων (ἡμετέρω τινί)

Is. ix. 7. בַּעָלָה | θάνατον (ἡμετέρω τινί)

Examples of these two kinds are innumerable. Plainly the Greek translators had not Hebrew MSS. pointed as at present.

In many cases (e. g. Ex. ii. 25; Nahum iii. 8) the LXX. have probably preserved the true pronunciation and sense where the Masorete pointing has gone wrong.

2. Were the Hebrew words divided from one another, and were the final letters, י, י, י, in use when the Septuagint was made? Take a few out of many examples:

**Hebrew.**

<table>
<thead>
<tr>
<th>LXX.</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Deut. xxv. 5. לְכִּי,</td>
</tr>
<tr>
<td>(2) 2 K. ii. 14. לְכִּי</td>
</tr>
<tr>
<td>(3) 2 K. xiii. 20. לְכִּי</td>
</tr>
<tr>
<td>(4) 1 Chr. xvii. 10. לְכִּי</td>
</tr>
<tr>
<td>(5) Hos vi. 6. לְכִּי</td>
</tr>
</tbody>
</table>

The LXX. read לְכִּי as the light (that) goeth forth.

(6) Zech. xi. 7. לְכִּי | εἰς τὸν ἀμφί οὖν τῷ ἀμφί Δαυίδ).

They join the two first words.

Here we find three cases (2, 4, 6) where the LXX. read as one word what makes two in the present Hebrew text: one case (3) where one Hebrew word is made into two by the LXX.; two cases (1, 5) where the LXX. transfer a letter from the end of one word to the beginning of the next.
By inspection of the Hebrew in these cases it will be easily seen that the Hebrew MSS. must have been written without intervals between the words, and that the present final forms were not then in use.

In three of the above examples (4, 5, 6), the Septuagint has probably preserved the true division and reading.

In the study of these minute particulars, which enable us to examine closely the work of the translators, great help is afforded by Codex Critical Sacra, and by the Vorstücker of Frankel, who has most diligently annotated the text of the LXX. His projected work on the whole of the Version has not been completed, but he has published a part of it in his treatise Über den Einfluss der Palästinaischen Exegese auf die Akadimische Hermeneutik, in which he reviews minutely the Septuagint Version of the Pentateuch.

We now proceed to the larger questions.

A. Is the Septuagint faithful in substance? Here we cannot answer by citation of a few examples: the question is referred to the general texture, and any opinion we express must be verified by continuous reading.

1. And first it has been clearly shown by Holy, Frankel, and others, that the several books were translated by different persons, without any comprehensive revision to harmonize the several parts. Names and words are rendered differently in different books; e.g. διάκονος, the passover, in the Pentateuch is rendered πάσχα, in 2 Chr. xxxv. 6, φασάν.

2. The Septuagint, Ex. xxviii. 30 (LXX. 26), δήλωσις, Dent. xxi. 8, δῆλος, Ex. lii. 65, φασίγουσις, Neh. vii. 65, φασίγωσις.

3. The Philistines in the Pentateuch and Joshua are φασιστέως, in the other books, διάλοφος. The books of Judges, Ruth, Samuel, and Kings, are distinguished by the use of εὕγοι εὐής, instead of φασάν.

4. These are a few out of many like variations.

5. Thus the character of the Version varies much in the several books; those of the Pentateuch are the best, as Jerome says (Commentar. in Genesis chap. iii), and this agrees well with the external evidence that the Law was translated first, when Hebrew MSS. were more correct and Hebrew better known. Perhaps the simplicity of the style in these early books facilitated the fidelity of the Version.

6. The poetical parts are, generally speaking, inferior to the historical, the original abounding with rarer words and expressions. In these parts the reader of the LXX. must be continually on the watch lest an imperfect rendering of a difficult word mar the whole sentence. The Psalms and Proverbs are perhaps the best.

7. In the Major Prophets (probably translated nearly 100 years after the Pentateuch) some of the most important prophecies are sadly obscured; e.g. Is. lx. 1, τοῦτο πρῶτον πιείς ταύτην τοις, χάρα Zaphôan, κ. τ. λ., and in ix. 8, τεσσαράκοντα εκ τοῦ κοίτασεν τῶν κοίτασιν (Zaûning). Jer. xxiii. 6, καὶ τοῦτο τὸ ὅμως αὐτὸν τὸ κοίτασιν αὐτῶν Κόριος ἦπερδεκέν τῶν παροιμιῶν.

8. Ezekiel and the Minor Prophets (speaking generally) seem to be better rendered.

The LXX. version of Daniel was not used, that of Theodotion being substituted for it.

5. Supposing the numerous glosses and duplicate renderings, which have evidently crept from the margin into the text, to be removed (e. g. Is. xvi. 10; Hab. iii. 2; Joel 1. 8),—for these are blunders, not of the Version itself, but of the copies,—by forming a rough estimate of what the Septuagint was in its earliest state, we may perhaps say of it, in the words of the well-known scholar, that it was, in many parts, the wrong side of the Hebrew text, exhibiting the general outlines of the pattern, but confused in the more delicate lines, and with many ends of threads visible; or, to use a more dignified illustration, the Septuagint is the image of the original seen through a glass not adjusted to the proper focus; the larger features are shown, but the sharpness of definition is lost.

8. We have anticipated the answer to the second point;—Is the Version minutely accurate in details?—but we will give a few examples:

1. The same word in the same chapter is often rendered by distinguishing words, —Ex. xii. 14, "I will pass over," LXX. ἐκπέμπει, but 23, προπέμπη, "will pass over," LXX. παραστέται.

2. Distinguishing words by the same word, —Ex. xii. 23, "pass through," and προπέμπη, "pass over," both by παραστεται: Num. xiv. 4, 5, "offering," and προπέμπη, "sacrifice," both by "θυσία.

3. The divine names are frequently interchanged: Κόριος is put for Σαλί, Gen. and Θεός for θεός,Jer. xxxiv. and the two are often wrongly combined or wrongly separated.

4. Proper names are sometimes translated, sometimes not. In Gen. xxiii. by translating the name Ἰσχαγωλ (τοῦ διατάγαντος), the Version is made to speak first of the cave being in the field (ver. 9), and then of the field being in the cave (ver. 17); δὲ ἀγγέλος Ἰσχαγωλ, δὲ θύει τῷ διαταγμένῳ, the last word not warranted by the Hebrew. Zech. vi. 14 is a curious example of four names of persons being translated, e. g. τοῦ Ἰσχαγωλοῦ, "to Tobiah," LXX. τοῖς θερμοίς αὐτῶν; Παλαις in Deut. xxxiv. 1 θρασύς, but in Deut. iii. 27, τοῦ λελαχιστοῦ.

5. The translators are often misled by the similarity of Hebrew words: e. g. Num. iii. 26, "the cords of it," LXX. τὰ κατάλοιπα, and iv. 26, τὰ περασαί; in other places, οἱ κάλας, and Is. iv. 2, τὰ χονιστάματα, both rightly. Ex. iv. 31, "they heard," LXX. ἐχόμενοι (ἐχόμενοι); Num. xvi. 15, "I have not taken one ass" (ἔχων), LXX. οὐκ ἐγένετο ῥουματίνῳ (ἡμικράνοι), Εράς: Dent. xxxii. 10, ἐφίληται, "lie bound him," LXX. αὐτάρκειον αὐτοῖς; 1 Sam. xii. 2, "I am grayheaded," LXX. καθησουμαι (κεπασματαί): Gen. iii. 17, ἄσπης ἢ καρδίας, "for thy sake," LXX. ἐν τοῖς ἄγγυσι σου (τοῖς ἄγγυσι).
In very many cases the error may be thus traced to the similarity of some of the Hebrew letters, \( \text{ס} \) and \( \text{ש} \), \( \text{ר} \) and \( \text{ר} \), and \( \text{ל} \), etc.; in some it is difficult to see any connection between the original and the Version: e. g. Deut. xxxii. 9, לְשֹׁנַיְם וּלְשֹׁנְיָמִים, "the sons of Israel," LXX. διδωκας Θεων, Aquila and Symmachus, πρὸς Ἰσραήλ.

Is. xxi. 11, 12. LXX.

Watchman, what of the night? φυλάττοντες ἑκάστια, Aquila and Symmachus, καὶ ἔρχομαι. The morning cometh, and also the night: ἐγὼ ἐγὼ ἐγέρσεται. Return, return.

6. Besides the above deviations, and many like them, which are probably due to accidental causes, the change of a letter, or doubtful writing in the Hebrew, there are some passages which seem to exhibit a studied variation in the LXX. from the Hebrew: e. g. Gen. ii. 2, on the seventh ("י" לֶה יָם יָם יָם יָם") day God ended his work, LXX. συνετέλεσεν διὸ Θεως ἐν 7 ἡμέρας 7 ηττὴ τὰ ἔργα του Θεοῦ. The noun τόπος in Ex. xii. 36, καὶ ἐν 7 ηττῃ Ναρακα, appears to be of this kind, inserted to solve a difficulty.

Frequently the strong expressions of the Hebrew are softened down; where human parts are ascribed to God, for hand the LXX. substitute σπόρος; for mouth, word, etc. Ex. iv. 16. "Then shalt thou be him instead of God!" (יִהְיֶה בָּנֹי יְהֹוָה). LXX. σὺ δὲ αὐτῷ ἐστή τὰ πάντα τῶν Θεών; see Ex. iv. 15. These and many more so vary of design, rather than of accident or error.

The Version is, therefore, not minutely accurate in details; and it may be laid down as a principle, never to build any argument on words or passages of the Septuagint, without comparing them with the Hebrew. The Greek may be right; but very often its variations are wrong.

Γ. We shall now be prepared to weigh the tradition of the Fathers, that the Version was made by inspiration: καὶ ἐποίησεν τὸν θεὸν, ἤραν γε τὸν αὐτὸν ἔργον ἐπιφέρειν, ἐπιφέρειν. Augustine. Even Jerome himself seems to think that the LXX. may have sometimes added words to the original, ὁ Σπíritus Sanctus auteritaecept, livet in Horeis voluminibus non legatum (Prefat. in Pandol. tom. i. col. 1419).

Let us try to form some conception of what is meant by the inspiration of translators. It cannot mean what Jerome here seems to allow, that the translators were divinely moved to add to the original, for this would be the inspiration of Prophets; as he himself says in another passage (Prolog. in Genesis, tom. i.) "and it was enim recte, aliquid eas interpretem." Every such addition would be, in fact, a new revelation.

Nor can it be, as some have thought, that the deviations of the Septuagint from the original were divinely directed, whether in order to adapt the Scriptures to the mind of the heathen, or for other purposes. This would be, pros tanto, a new revelation, and it is difficult to conceive of such a revelation: for, be it observed, the discrepancy between the Hebrew and Greek Scriptures would tend to make the Jews of Palestine from those of Alexandria, and of other places where the Greek Scriptures were read; there would be two different copies of the same books dispersed throughout the world, each claiming Divine authority; the appeal to Moses and the Prophets would lose much of its force; the standard of Divine truth would be rendered doubtful; the trumpet would give an uncertain sound.

No! If there be such a thing as an inspiration of translators, it must be an effect of the Holy Spirit on their minds, enabling them to do their work of translation more perfectly than by their own abilities and acquisitions; to overcome the difficulties arising from defective knowledge, from imperfect MSS., from similarity of letters, from human inconstancy and weakness; and so to produce a copy of the Scriptures, setting forth the Word of God, and the history of his people, in its original truth and purity. This is the kind of inspiration claimed for the translators by Philo (Lit. Mosis, lib. ii.): "We took upon the persons who made this Version, not merely as translators, but as persons chosen and set apart by Divine appointment, to whom it was given to comprehend and express the sense and meaning of Moses in the fullest and clearest manner."

The reader will be able to judge, from the foregoing examples, whether the Septuagint Version satisfies this test. If it does, it will be found not only substantially faithful, but minutely accurate in details; and if it will enable us to correct the Hebrew in every place where an error has crept in; it will give evidence of that faculty of intuition in its highest form, which enables our great critics to divine from the faulty text the true reading; it will be, in short, a republication of the original text, purified from the errors of human hands and eyes, stamped with fresh authority from Heaven.

This is a question to be decided by facts, by the phenomena of the Version itself. We will simply declare our own conviction that, instead of such a Divine republication of the original, we find a marked distinction between the original and the Septuagint; a distinction which is well expressed in the words of Jerome (Prolog. in Genesis): "Hæ Spiritus ventura praedicet: hic eruditio et verborum cognitio et spiritus interpres transit." And it will be reasonable to agree with the ancient narrative of the Version, known by the name of Aristec, which represents the interpreters as meeting in one house, forming one council, conforme to the ancient tradition, and agreeing on the sense (see Hody, lib. ii. c. vi.).

There are some, perhaps, who will deem this estimate of the LXX. too low; who think that the use of this version in the N. T. stamps it with an authority above that of a mere translation. But as the Apostles and Evangelists do not invariably cite the O. T. according to this version, we are left to judge by the light of facts and evidence. Students of Holy Scripture, as well as students of the natural world, should bear in mind the maxim of Bacon: "Sola specie est in vera indictione."
1. For the Old Testament. We have seen above that the Septuagint gives evidence of the character and condition of the Hebrew MSS. from which it was made, with respect to vowel-points and the mode of writing.

This evidence often renders very material help in the correction and establishment of the Hebrew text. Being made from MSS. far older than the Masoretic recension, the Septuagint often indicates readings more ancient and more correct than those of our present Hebrew MSS. and editions; and often speaks decisively between the conflicting readings of the present MSS.

E. g. Ps. xxi. 17 (in LXX. xxi. 16), the printed Hebrew text is Ἰαχνών, but several MSS. have a verb in 3d pers. plural, Ἰαχνωσαν: the LXX. steps in to decide the doubt, ἤφαντα τὴν χειρὰν μου καὶ τοῦτον σου ἔινειν διαφημάζαν.

In passages like these, which touch on the cardinal truths of the Gospel, it is of great importance to have the testimony of an unsuspected witness, in the LXX., long before the controversy between Christians and Jews.

In Hosea vi. 5, the context clearly requires that the first person should be maintained throughout the verse; the LXX. corrects the present Hebrew text, without a change except in the position of one letter, τοί κείμαι μοι: ἐὰς εὐελησίστα, rendering unnecessary the addition of words in Italian, in our English Version.

More examples might be given, but we must content ourselves with one signal instance, of a clause omitted in the Hebrew (probably by what is called ἡποτελεστων), and preserved in the LXX.

In Genesis iv. 8, a passage in which the Hebrew, and in our English Version, is evidently incomplete:

"And Cain talked (ἡποτελεστων) with Abel his brother: and it came to pass when they were in the field, etc.

Here the Hebrew word ἐποτελεστων is the word constantly used as the introduction to words spoken, "Cain spake unto Abell": . . . . , but, as the text stands, there are no words spoken: and the following words " . . . . οἱων ἔνδεξαν αὐτοῖς," come in abruptly. The LXX. fills up the ἐποτελεσθατα of Hebrewom συνελεύσατο (Pearson), καὶ εἶναιΚαβ πρὸς Ἀβιλ τοῦ ἀδελφοῦ αὐτοῦ, δίδασκων εἰς το πελαίν (ἦ ποτελεστων ἀπὸ τος πορείας). The Sam. Penta-teuch, and the Syriac Version agree with the LXX., and the passage is thus cited by Clements Romanus. (Ep. i. c. iv.).

The "Hebrew transcriber's eye" was probably misled by the word ἐποτελεσθατα, terminating both the clauses. [For a different view, see p. 2890 α, 2d par. (1). — A.]

In all the foregoing cases, we do not attribute any paramount authority to the LXX. on account of its superior antiquity to the extant Hebrew MSS.; but we take it as an evidence of more ancient Hebrew text, as an eye-witness of the texts, 2800 or 180 years n. c. The decision as to any particular reading must be made by weighing this evidence, together with that of other ancient Versions, with the arguments from the context, the rules of grammar, the genius of the language, and the comparison of parallel passages.

And thus the Hebrew will sometimes correct the Greek, and sometimes the Greek the Hebrew; both hidden er. through the infancy of human eyes and hands, but each checking the other's errors.

2. The close connection between the Old and New Testament makes the study of the Septuagint extremely valuable, and almost indispensable to the theological student. Pearson quotes from Jerome and others, as to the citation of the words of prophecy from the Septuagint. The former, as Pearson observes, speaks too universally, when he says that the Apostles, "prophetica omnino eius commuoverunt quemadmodum Sermo interpretatur continet." But it was manifestly the chief store-house from which they drew their proofs and precepts. Mr. Grinsell says that the number of direct quotations from the Old Testament in the Gospels, Acts, and Epistles, may be estimated at 500, of which not more than 50 materially differ from the LXX. But the indirect verbal allusions would swell the number to a far greater amount." (Ps. Ad loc. LXX., p. 37). The comparison of the citations with the Septuagint is much facilitated by Mr. Grinsell's "Edition Hellenisticae Novi Testamenti, and by Mr. Gough's "New Testament Quotations," in which the Hebrew and Greek passages of the Old Test. are placed side by side with the citations in the LXX. (On this subject see Holy); pp. 248, 251: Kennicott, Dissert. Gen. § 84; Cappelli, Critica Sacra, vol. ii. [See also Turpie's "The Old Text, in the New (Lond. 1868), which gives various readings of the Hebrew and Greek; Kautzsch, Dr. F. Text. Locis a Paulo Apost. adjegitatis, Lips. 1860; and the works referred to at the end of the art. OLD TESTAMENT, vol. iii. pp. 2239 b, 2240 a. — A.]

3. Further, the language of the LXX. is the mould in which the thoughts and expressions of the Apostles and Evangelists are cast. In this version Divine Truth has taken the Greek language and its shrine, and adorned it to the things of God. Here the peculiar idioms of the Hebrew are grafted upon the stock of the Greek tongue; words and phrases take a new sense. The terms of the Mosaic ritual in the Greek Version are employed by the Apostles to express the great truths of the Gospel, e. g. ἡ ἐποτελεσθατα, θυσια υποθεσια. Hence the LXX. is a treasury of illustration for the Greek Testament. Many examples are given by Pearson (Pref. ad LXX.), e. g. σάρξ, πνεῦμα, δικαίωμα, φύσιμα τῆς σαρκος. "Frustra appal veteres Graecos quid sit πιστεύω τῆς θεος, vel εἰς τὸν θεὸν, quid sit εἰς τοὺς ἁρμαν, vel ἐπὶ τὸν θεὸν πιστεθητε, que totes in Novo Federle incunctant, et ex lectione Senorium facile intelligantur." Vanlekenen also (on Luke i. 54) speaks strongly on this subject: "Graecum Novi Testamenti con. textum rite intellecturo nihil est utilius, quam dill. verset veras Alexandrinum antiqui Federis interpretationem, eu quam minus poterit auxili, quam ex veteribus scriptoribus Gracis simul sunt. Centena reperientur in N. T. suscendam obvia in branch of Scriptural study, and has lately founded a lecture on the LXX. in the University of Oxford.
1. A question of much interest still waits for a solution. In many of the passages which show a difference of rendering from the Hebrew (some of which are above noted), the Septuagint and the Samaritan Pentateuch agree together: e. g. Gen. ii. 2; Ex. xii. 40.

2. For the critical scholar it would be a worthy object of pursuit to ascertain, as nearly as possible, the original text of the Septuagint as it stood in the time of the Apostles and Philo. If this could be done, with any tolerable degree of correctness, it would possess a strong interest, as being the first translation of any writing into another tongue, and the first repository of Divine truth to the great colony of Hellenistic Jews at Alexandria.

The critic would probably take as his basis the Roman edition, from the Codex Vaticanus, as representing most nearly the ancient (sacra) text. The collection of fragments of Origen's 

6. Another work, of more practical and general interest, still remains to be done, namely, to provide a Greek version, accurate and faithful to the Hebrew original, for the use of the Greek Church, and of students reading the Scriptures in that language for purposes of devotion or mental improvement. Mr. Field's edition is not yet the best edition of this kind: originally, it was desired to supply the Greek Church with such a faithful copy of the Scriptures: but as the editor has followed the text of the Alexandrian MS., only correcting, by the help of other MSS., the evident errors of transcription (e. g. in Gen. xv. 15, correcting τραφεις in the Alex. MS. to ταφείς, the reading of the Complut. text), and as we have seen above that the Alexandrian text is far from being the nearest to the Hebrew, it is evident that a more faithful and complete copy of the Old Testament in Greek might yet be provided.

We may here remark, in conclusion, that such an edition might prepare the way for the correction of the blemishes which remain in our Authorized English Version. For the results of the criticism of the last 250 years, it might exhibit several passages in their original purity; and the corrections thus made, being approved by the judgment of the best scholars, would probably, after a time, find their way into the margin, at least, of our English Bibles.

One example only can be here given, in a passage which has caused so small perplexity and loss of commentary. Is. ix. 3 is thus rendered in the LXX.: τὸ πλείστον τῶν λαῶν, δὲ κατάγεσις ἐν εἰρήνης σου καὶ εἰρήναις ξυστοῖς σου, ὥσις εἰρηναῖος ἐν ἀμύθε, καὶ ὦ τρόποι οἱ διαφορικοὶ σκέλα. It is easy to see how the family rendering of the first part of this has arisen from the similarity of Hebrew letters, and, and, and, and, and, and, and, and, and, from an ancient error in the Hebrew text. The following translation restores the whole passage to its original clearness and force: — ἐγείρθησεν τὴν ἀγαλλίασιν (τις τις), ἀγαλαλίαρη τὴν εἰρήνην εἰρήναις ξυστοῖς σου ὥσις εἰρηναῖοι ἐν ἀμύθε, ὦ τρόποι ἀγαλλίασις οἱ διαφορικοὶ σκέλα.

Then hast multiplied the gladness, Then hast increased the joy: They rejoice before thee as with the joy of harrest, As men are glad when they divide the spoil.

Here ἀγαλλίασις and ἀγαλλίασιν, in the first and fourth lines, correspond to ἄγα κακία and ἄγα κακία, εἰρήνην and εἰρηναῖον, in the second and third, to ἄγα κακία and ἄγα κακία.

The fourfold inreriored parallelism is complete, and the connection with the context of the prophecy perfect. It is scarcely necessary to remark that in such an edition the apocryphal additions to the book of Esther, and those to the book of Daniel, which are not recognized by the Hebrew Canon, would be either omitted, or perhaps more properly, since they appear to have been incorporated with the
SEPTUAGINT

Septuagint at an early date would be placed separately, as in Mr. Field's edition and our English Version. [See APOCRYPHA: CANON; DANIEL, APOC ADDITIONS; ESTHER; SAMARITAN PENT.]

amus; Sturz, de Hiebeto Macedoniac, Malby, Ed. Two Sermons before University of Durham, 1843.

W. S.

* We have as yet no critical edition of the Septuagint, none in which the existing materials for settling the text have been applied for that purpose. The available materials are indeed inadequate. It is to be hoped, however, that through the labors of Bianchinii, Haker, Tischendorf, Ver
cellone and Cozza, Ceriani, and others, we shall soon have the text of all the known varied MSS. of this version published in a trustworthy form. When this is accomplished, Tischendorf promises, if his life is spared, to undertake a new edition, "aulam quali litterae sacrae possent et per instrumenta critica perfei libri." (Pref. to his 4th ed., 1859, p. vii.). But before a thoroughly satisfactory edition can be prepared a great amount of labor must still be spent on the existing manuscripts, the ancient versions made from the Greek (the Old Latin, Egyptian in different dialects, Ethiopic, Aramonic, and Hexaplar Syriac), and on the quo-
tations from the Sept. in the writings of the fathers. The edition of Holmes and Parsons leaves very much to be desired in all these respects. A formidable programme of the work required, and a small but thankworthy contribution towards it, are given by P. A. de Lagarde in his Genesis Grac-

e, e Fide Ed. Sixtinica ab Hbbrina Scripturn Dico-
panta e Libris Manus scripta ac se quo condatis et. Edil. Compl. ad LXX. Novumcriticam eodem (Lips. 1858); comp. the review by Kaunmann in the Theol. Stud. in Krit. 1889, pp. 747-758. Useful preliminary labor has also been performed by O. F. Fritzsche, especially in regard to the classification of the MSS., in his editions of several books, notably, EXOHI Duplica Libri Textum ad optimus Codex edidit. Turici, 1848; Posid karar ov O, bibl. 1864; Liber indicium secundum LXX. Inter-

pretum. Triplexa Texta Conformatissima recens.

ent, etc. Bid. 1867, first published as two University programmes with the title, Spernica nova Ez cr.

LXX. Interpretum. He was also paid particular attention to the text in the Kurey, creg. Hemds, zu d. Apocryphon d. A. T., edited by him and C. L. W. Grimm (1851-50); and the valuable articles Alexandrinsche Ueberzet. zug. und Tul-
gyke in Herzog's Real-Encyk. are from his pen.

On the 1788. of the Sept. in B. H., 1854 f. and note by him also an Anecdote, De historiis Lando-

Uonicis Judaeis et in locum Pentateu-

chendi, Reg. B. 1835. Respecting the Hexaplu text there are a number of important articles by Deuderlein, Mattheii, Eichhorn, Bruns, and Dr. Rossi in Eichhorn's Repertoirum; see also Ver-
sions, ANCIENT (SYRIAC), I, II, and the editions of Jeremial (by Spohn) and Ezekiel mentioned before. The more important MSS. containing this text have already been referred to (p. 2914 f. below).

For the quotations of the Christian Fathers, see F. A. Strach, Bibliotheca critic a b. d. 70 Dolt-

Among the monographs relating to the Sep-

huagint version of particular books, we may also men-

zcel veternum LXX. ex Tetrapol Origenis et singulius Christiana Codices... op. A. Vincicis de

under this head is: "Hac dissertatione videmus demonstraveri eae essentiae Penatenche Alces, andruine judaica, ut ab explanationem quidem textum Macrothetum non parum conferat, ad narrationem Graecorum verborum necessitatis." The other two parts of the treatise relate to the char-

acter of the Greek dialect represented in this version, and to the unconsciously transferred Hebraisms which are mixed with it. The author's view as to the basis of the Greek dialect in detail, with its later coloring is substantially that of Sturs, Hntmann, Wiz

ner, and others. II.
SEPULCHRE.

The Septuagint version of the books of Samuel and Kings is particularly discussed by Theinian (Kurtzef. exeg. Handb. nova. A. F. vols. iv., ix.). He regards it as a very important help in the correction of the Hebrew text.

A. SEPULCHRE. [Biblical]

SEERAH [םער] (abundance): Šepe in Gen., Sare in 1 Chr.; Alex. Ser in Gen., Serai in 1 Chr.; Sorae. The daughter of Asier (Gen. xlvii. 17; 1 Chr. vii. 30); called in Num. xxxvi. 46, Sareah.

SEARAH [םרא] (warrior of Jehovah): Šeared; [Vat. Asia]: Alex. Serah; Sorai, Sorai. 1. Serai, the king's scribe or secretary in the reign of David (2 Sam. viii. 17). In the Vat. mom. MS. [Roman cod.] of the LXX. Sareah appears to be the result of a confusion between Serai or Sereah, whose sons were secretaries to Solomon (1 K. iv. 3).

2. [Šeéra, [šeēra]: Alex. [šēra]: Šēra, Šērō; Serā: Serō; Serōs: Serōs; Serōs: Serōs; Serōs: Serōs; Serōs: Serōs]. The high-priest in the reign of Jehoshaphat. He was taken captive to Babylon by Nebuchadnezzar, the captain of the guard, and slain with others at Riblah (2 K. xxv. 18; 1 Chr. vi. 14; Jer. xlii. 21).

3. [Šeēra: Vat. in Jer., Šēra: Sareh, Serai]: The son of Fanhumath the Netophathite, according to 2 K. xvi. 23, who came with Ishshah, Johanan, and Jazaniah to Gedaliah, and was persuaded by him to submit quietly to the Chaldeans and not to revolt, Jer. xlii. 18.

4. [Šēra: Alex. in ver. 14, Šēra]: Seraih. The son of Kenaz, brother of Otniel, and father of Joab, the father or founder of the valley of Charashim (1 Chr. iv. 13, 14).

5. [Šēra: Vat. Šērō; Alex. Šērō; Serō; Serōs: Serōs; Serōs: Serōs; Serōs: Serōs; Serōs: Serōs; Serōs: Serōs]. Ancestor of Jehun, a chief of one of the Simeonite families (1 Chr. iv. 13).

6. [Šēra: Vat. Asia]: One of the children of the province who returned with Zerubbal (Ezr. ii. 2). In Neh. vii. 7 he is called Azar- ijah, and in 1 Esdr. v. 8, Zacharias.

7. [Šēra: One of the ancestors of Ezra the scribe (Ezr. vii. 1), but whether or not the same as Seraih the high-priest seems uncertain. Called also Šeēra, Šērō, and in 1 Esdr. vi. 1, Zacharias.

8. [vēda: Apula: Alex. [V.] was Šēra: [Seraih]: A priest, or priestly family, who signed the covenant with Nehemiah (Neh. x. 2).

9. [Šēra: [Seraih]: A priest, the son of Hilkiah (Neh. xvi. 11), who was ruler of the house of God after the return from Babylon. In 1 Chr. ix. 11 he is called Azar- ijah.

10. [Šēra]: The head of a priestly house which went up from Babylon with Zerubbabel. His representative in the days of Josiah the high-priest was Mehriah (Neh. xil. 1, 12).

11. [Šēra: [V.] in ver. 59, Šēra:]: The son of Nehor, and brother of Baruch (Jer. ii. 60, 61). He went with Zerubbabel in the 4th year of his reign, or, as the Targum has it, "in the mission of Zedekiah," and is described as Šepāra, ser mēnākah (lit. "prince of rest"); "A. V., "a quiet prince;" marg. "or, prince of Menuchah, or chief chimney-liner," which is interpreted by Kimchi as that of the office of chamberlain, "for he was a friend of the king, and was with the king at the time of his rest, to talk and to delight himself with him." The LXX. and Targum read Šepāra, mēnākah, "an offering," and so Rashi, who says, "under his hand were those who saw the king's face, who brought him a present." The Pesilto-Syriac renders "chief of the camp," apparently reading Šepāra, mēnākah, unless the translator understood mēnākah of the inking-place of an army, in which sense it occurs in Num. x. 33. Gesenius adopts the latter view, and makes Seraih hold an office similar to that of "quartermaster-general" in the Babylonian army. It is perfectly clear, however, that he was in attendance upon Zedekiah, and enjoyed an officer of the Jewish court. The support of Mauer, adopted by Hitzig, has more to commend it, that he was an officer who took charge of the royal caravan on its march, and fixed the place where it should halt. Hiller (2 Sam. viii. 15) says Seraih was prince of Menuchah, a place on the borders of Judah and Des, also called Manahath. The rendering of the Vulgate is unavoidable, princeps populi.

Seraih was unmanipulated by the prophet Jeremia to take with him on his journey the roll in which he had written the doom of Babylon, and sink it in the midst of the Emphates, as a token that Babylon should sink, never to rise again (Jer. lii. 60, 64).

W. A. W.

SEARAPHIM [םֶּרֶפֵּה] [see below]: Šēraphe'ā, Šēraphe'ā, Schoaphe'. An order of celestial beings, whom Isaiah beheld in vision standing above Jehovah (not as in Ar. N., "above it," i.e. the throne) as he sat upon his throne (Is. vi. 2). They are described as having each of them three pairs of wings, of which they covered their faces (a token of humility; comp. Ex. iii. 6: 1 K. xix. 13: Pindar, "Kor., Rom. 10"; with the second they covered their feet (a token of respect; see Louth on Is. vi. who quotes Chardin in illustration); while with the third they flew. They seem to have borne a general resemblance to the human figure, for they are represented as having a face, a voice, feet, and hands (ver. 6). Their occupation was twofold — to celebrate the praises of Jehovah's holiness and power (ver. 3), and to act as the medium of communication between heaven and earth (ver. 6). From their antiphonal chant ("one cried unto another") we may conceive them to have been ranged in opposite rows on each side of
the throne. As the Seraphim are nowhere mentioned in the Bible, our concepts of their appearance must be restricted to the above particulars, aided by such uncertain light as etymology and analogy will supply. We may observe that the idea of a winged human figure was not peculiar to the Hebrews: among the sculptures found at Mournbeh in Persia, we meet with a representation of a man with two pairs of wings, springing from the shoulders, and extending, the one pair upwards, the other downwards, so as to admit of covering the head and the feet (Yam. Nn. and Persep. p. 322). The wings in this instance imply disimulation for speed and ease of conveyance, in man's imagination, among the most prominent tokens of Divinity. The meaning of the word "seraph" is extremely doubtful: the only word which resembles it in the current Hebrew is serapha, "to burn," whence the idea of brilliancy has been extracted. Such a sense would harmonize with other descriptions of celestial beings (e.g. Ez. i. 12; Matt. xxviii. 3); but it is objected that the Hebrew term never bears this secondary sense. Gesenius (Thes. p. 1341) connects it with an Arabic term signifying high or exalted; and this may be regarded as the generally received etymology: but the absence of any cognate Hebrew term is certainly worthy of remark. The similarity between the names Seraphim and Sarapis, led Hitzig (in Is. vi. 2) to identify the two, and to give to the former the figure of a winged serpent. But Sarapis was unknown in the Egyptian Pantheon until the time of Ptolemy Soter (Wilkinson's Anc. Ejs. iv. 399 ff.); and, even if it had been otherwise, we can hardly conceive that the Hebrews would have borrowed their imagery from such a source. Knobel's conjecture that Seraphim is merely a false reading for shadetham, "ministers," is ingenious, but the latter word is not Hebrew. The relation subsisting between the Cherubim and Seraphim presents another difficulty: the "living creatures" described in Rev. iv. 8 resemble the Seraphim in their occupation and the number of the wings; and the Cherubim in their general appearance and number, as described in Ez. i. xii. 10, is the only instance in the Bible between the two may not, therefore, be great, but we cannot believe them to be identical so long as the distinction of name holds good. W. L. B.

**SERED (บรร) [lent]: Zeplan in Gen. Sarpaš in Num.: Seredy. The firstborn of Zadokon, and ancestor of the family of the Sardites (Gen. xlii. 14; Num. xxvi. 26).**

* SERGENTS occurs only in Acts xvi. 35, 38, answering to παρασιτάρες properly "rod-bearers" (in Latin, fictores). They were the official attendants of the higher Roman magistrates, and executed their orders, especially for the arrest and punishment of "strangers." (C. C. L. C. i. 34). They were not entirely civil rather than military, and "sergents," in its older English sense, was less inappropriate than it is at present. In the colonies the fictores carried staves, not fasces, as at Rome. It was to them that the rulers at Philippi gave the command to beat Paul and Silas (ἐκτάλωσα παρασιτάρες). Luke speaks of the presence of "rod-bearers" only in his account of what took place at Philippi; and it is almost the only place in his narrative where he could readily introduce them. Philippi being a Roman colony, unlike other Greek cities, was governed after the Roman mode; its chief officers, though properly called according to their number chamaeres or quattuorceri, assumed the more honorary title of praetors (πρατηρυγ) five times here in Acts), and in token of the Roman sovereignty, had rod-bearers or fictores as at Rome (Col. xiv., Amer. ed.). The fictors exercised their highest functions during the time of the republic, but still existed under the emperors. (See Paul's Recl. Echigl. iv. 1982 ff.) Paul was at Philippi in the time of Claudius, about A. D. 52.

**SERGIUS PAULUS (Σέργιος Παύλος; serginus Paulus) was the name of the proconsul of Cyprus when the Apostle Paul visited that island with Barnabas on his first missionary tour (Acts xiii. 7 ff.). He is described as an intelligent man: (πρωτοστόμος), trutl-seeking, eager for information from all sources within his reach. It was this trait of his character which led him in the first instance to admit to his society Hymas the Magian, and afterwards to seek out the missionary strangers and learn from them the nature of the Christian doctrine. The strongest minds at that period were drawn with a singular fascination to the occult studies of the East: and the ascendency which Luke represents the "sorcerer" as having gained over Sergius illustrates a characteristic feature of the times. For other examples of a similar character, see Howson's Life and Epistles of Paul, vol. i. p. 177 f. But Sergius was not effectively or long deceived by the arts of the impostor; for on becoming acquainted with the Apostle he examined at once the claims of the Gospel, and yielded his mind to the evidence of its truth. It is unfortunate that this officer is styled a "deputy," in the Common Version, and not "proconsul," according to the import of the Greek term (ἀρχηγός). Though Cyprus was originally an imperial province ( Dion Cassius, liv. 12), and as such governed by proprietors or legates (κυρίτερος, πρεσβύτερος), it was afterwards transferred to the Roman senate, and henceforth governed by proconsuls (καὶ οίκοι ἀρχηγοί καὶ οἰκεῖα τά ἐπίτηδε περιστέρας πολιτείας, Dion Cassius, lvi. 4). For the value of this attribution of Luke's we must see Lardner's "Criticality of the Gospel History," vol. i. p. 32 ff. Coins too are still extant, on which this very title, ascribed in the Acts to Sergius Paulus, occurs as the title of the Roman governors of Cyprus. (See Akerman's Numismatic Illustrations, p. 41; and Howson's Life and Epistles of Paul, vol. i. pp. 175, 187.)

**SERNON (Σέρων: in Syr. and one Gr. MS. "Σηρόν") a general of Antiochus Epiphan, in chief command of the Syrian army (1 Macc. xii. 15, 6 ἄργας τ. Σ. 21, who was defeated at Beth-horon near Maconchus; 2 Macc. x. 32). In the same day when Joshua pursued the five kings "in going down of Beth-horon" (1 Macc. iii. 24; Josh. x. 11). According to Josephus, he was the governor of Cade-Syria and fell in the battle (Josh. Ant. xiii. 7, § 14), nor is there any reason to suppose that his statements are mere deductions from the language of Macchi. H. B. H.

**SERPENT.** The following Hebrew words denote serpents of some kind or other, "Arach, pethen, ephes" or ἐφέσται, skephiphim, nichash, and qoph. There is great uncertainty with respect to the identification of some of these terms, the first four of which are noticed under the arti-
The serpent, prior to the Fall, moved along in an erect attitude, as Milton (Par. Lost, i. 4861) says. —

"Not with indented wave
Proned on the ground, as since, but on his rear,
Circular base of rising folds that toward
Fold above fold, a surging mass."
The serpents were not employed as emblems of the evil principle, of the spirit of disobedience and contumacy. A few exceptions only can be discovered. The Phœnicians adorned that animal as a beneficent genius; and the Chinese consider it as a symbol of superior wisdom and power, and ascribed to the kings of heaven (then-huang) bodies of serpents.

Ceph Agathoemon, denoting Immortality (see Herodotus, 1. 1). Some other nations fluctuated in their conceptions regarding the serpent. The Egyptians represented the eternal spirit Kheph, the author of all good, under the mythic form of that reptile; they understood the art of taming it, and embalmed it after death; but they applied the same symbol for the god of revenge and punishment (Tithrambo), and for Typhon, the author of all moral and physical evil; and in the Egyptian symbolical alphabet the serpent represents subility and cunning, lust and sensual pleasure. In Greek mythology it is certainly, on the one hand, the attribute of Ceres, of Mercury, and of Echidna, in their most benigne qualities; but it forms, on the other hand, a part of the terrible Furies or Eumenides; it appears in the form of a Python as a fearful monster, which the arrows of a god only were able to destroy; and it is the most hideous and most formidable part of the impious giants who despise and blaspheme the power of Heaven. The Indians, like them, and as the enemies of the gods, who either tear them in pieces or tread their venomous head under their all-conquering foot. So contradictory is all animal worship. Its principle is, in some instances, gratitude, and in others, fear; but if a noxious animal is very dangerous the fear may manifest itself in two ways, either by the resolute desire of extirpating the beast, or by the wish of inverting the conflict with its superior power; thus the same fear may, on the one hand, cause fierce enmity, and on the other submission and worship. (See on the subject of serpent worship, Josua, de Orig. Heb. i. 5; Bryant's Mythology, i. 420-490; it is well illustrated in the apocryphal story of Bel and the Dragon.)

Horned Oerastes. From Egyptian Monuments.

The evil spirit in the form of a serpent appears in the Virgilian, or bond of evil, who, according to the doctrine of Zoroaster, first taught men to sin under the guise of this reptile (Zambucata, ed. Klein. i. 25, iii. 84; see J. Reinb. Rius de ser pote sed autems non naturali sed debito, Jan. 1712, and L. Grimsn. de textu ete Eco et Ciria diado>,o,'a rapamcoy corpore fisci, Restoch. 1712). But compare the opinion of Dr. Kalisch, who (Comment. on Gen. iii. 14, 15) says "the serpent is the reptile, not an evil demon that had assumed its shape . . . . If the serpent represented Satan, it would be extremely surprising that the former only was cursed; and that the latter is not even mentioned . . . . it would be entirely at variance with the Divine justice forever to curse the animal whose shape it had pleased the evil one to assume." According to the Talmudists, the name of the evil spirit that beguiled Eve was Sammael (סָמָאֵל); R. Moses ben Majencor scribit in More ib. 2, cap. 30, Zamaelmon inequae, tassertes serpentis antique sed xulixus Evan. Dicit etiam nomen hoc absoluta uspuri de Satana, et Sammael mon nihil aliud esse quam ipsum Satanum (Buxtorf, Lex. Tela. 1495).

Much has been written on the question of the "fiery serpent" (דָּשָּׁת הָרָעָם) of Num. xxvi. 6, 8, with which it is usual erroneously to identify the "fiery flying serpent" of Is. xxxv. 6, and xiv. 29. In the transaction recorded (Num. L. c. Deut. viii. 15) as having occurred at the time of the Exod., when the rebellious Israelites were visited with a plague of serpents, there is not a word about their having been "flying" creatures; there is therefore no occasion to refer the venomous snakes in question to the kind of which Nibghir (Descript. de l'Arab. p. 195) speaks, and which the Arabs at Basra denominate Hei setaros, or Hei hébros, "flying serpents," which obtained that name from their habit of "springing" from branch to branch of the date-trees they inhabit. Besides these are tree-serpents (Demophidse), a harmless family of the Colubrine snakes, and therefore quite out of the question. The Heb. term rendered "fiery" by the A. V. is by the Alexandrine edition of the LXX. represented by θεραπόνετες.
"deadly;" Oukeles, the Arabic version of Sandias, and the Vulg. translate the word "burning," in allusion to the sensation produced by the bite; other authorities understand a reference to the bright color of the serpents. It is impossible to point out the species of poisonous snake which destroyed the people in the Arabian desert. Niebuhr says that the only truly formidable kind is that called Dostan, a small slender creature spotted black and white, whose bite is instant death, and whose poison causes the dead body to swell in an extraordinary manner (see Forski, Descrip. Animal. p. 15). What the modern name of this serpent is we have been unable to ascertain; it is obvious, however, that either the Cerastes, or the Naja hea, or any other venomous species frequenting Arabia, may denote the "serpent of the burning bite," which destroyed the children of Israel. The "fiery flying serpent" of Isaiah (l. c.) can have no existence in nature, though it is curious to notice that Herodotus (l. 75, iii. 108) speaks of serpents with wings whose bones he imagined he had himself seen near Buto in Arabia. Monstrous forms of snakes with birds' wings occur on the Egyptian sculptures; it is probable that some kind of flying lizard (Draco, Dracocella, or Dracocephus) may have been the "flying serpent" of which Herodotus speaks; and perhaps, as this animal, though harmless, is yet calculated to inspire horror by its appearance, it may denote the flying-serpent of the prophet, and have been regarded by the ancient Hebrews as an animal as terrible as a venomous snake.

2. Viper (Viper).—Viper (Vipera berus) occurs in Job xx. 16, 18, xxx. 6, and ix. 5, in all of which passages the A. V. has "viper." There is no Scriptural allusion by means of which it is possible to determine the species of serpent indicated by the Heb. term, which is derived from a root which signified "to hiss." Shaw

Common Viper. (Vipera berus.)

(Terr. p. 251) speaks of some poisonous snake which the Arabs call Lethe (El-Glok); it is the most malignant of the tribe, and rarely above a foot long." Jackson also (Gen. 14., p. 110) mentions this serpent; from his description it would seem to be the Algerine adder (Echidus orientalis car. Macrotitanus). The snake (γένιον) that last

ened on St. Paul's hand when he was at Melita (Acts xxvii. 3) was probably the common viper of this country (Pelasia berus), which is widely distributed throughout Europe and the islands of the Mediterranean, or else the Viper amnis, a not uncommon species on the coasts of the same sea. W. H.

SERPENT, BRAZEN. The familiar history of the brazen serpent need not be repeated here. The nature of the fiery serpents by which the Israelites were attacked has been discussed under SERPENT. The scene of the history, determined by a comparison of Num. xxi. 5 and xiiii. 42, must have been either Zalmonah or Potten. The names of both places probably connect themselves with it, Zalmonah as meaning "the place of the image," Potten as probably identical with the Ποτάμι mentioned by Greek writers as famous for its copper-mines, and therefore possibly supplying the materials (Bochart, Hieros., II. 3, 13). [POTEN; ZALMONAH.] The chief interest of the narrative lies in the thoughts which have at different times gathered round it. We meet with these in three distinct stages. We have to ask by what associations each was connected with the others.

1. The truth of the history will, in this place, be taken for granted. Those who prefer it may choose among the hypotheses by which men have sought to explain the value of the brazen-serpent, but we here propose to retell the historical and to eliminate the supernatural element. They may look on the cures as having been effected by the force of imagination, which the visible symbol served to heighten, or by the rapid rushing of the serpent-bitten from all parts of the camp to the standard thus erected, curing them, as men are said to be cured by dancing of the bite of the tarantula (Römer, Heb. Gesch., ii. 320; Paulus, Comm. IV., i. 198, in Winer, Reduct. They may see in the serpent the emblematic signpost, as it were, of the camp hospital to which the sufferers were brought for special treatment, the form in this instance, as in that of the rod of Asenath, being a symbol of the art of healing (Hoffmann, in Scherer's Schriften, i. 576). Asenath (οητρό), Leaving these conjectures on one side, it remains for us to inquire into the fit ness of the symbol thus employed as the instrument of healing. To most of the Israelites it must have seemed as strange then as it did afterwards to the later Rabhids, that any such symbol should be employed. The Second Commandment appeared to forbid the likeness of any living thing. The golden calf had been destroyed as an abomination. Now the colossal serpent (the narrative implies that it was visible from all parts of the encampment) made, we may conjecture, by the hands of Bezaleel or Aholib, was exposed to their gaze, and they were told to look to it as gifted with a supernatural power. What reason was there for the difference? In part, of course, the answer may be, that the Second Commandment forbade, not all symbolic forms as such, but those that men made for themselves to worship; but the question still remains, why was this form chosen? It is hardly enough to say, with Jewish commentators, that any outward means

Justin Martyr with Tryphone (p. 322) declares that he had often asked his teachers to solve the difficulty, and had never found one who explained it satisfactorily. C. J. Justin himself, of course, explains it as a type of Christ.
might have been chosen, like the lump of figs in Hezekiah's sickness, the salt which healed the bitter waters, and that the brazen serpent made the miracle yet more miraculous, inasmuch as the glance of burned brass, the gaze upon the serpent form, were, of all things, most likely to be fatal to those who had been bitten (Gen. Bok. Jons; Aben Ezra and others in Buxtorf, Hist. Ant. Serp. c. 5). The fact is doubtful, the reason inadequate. It is hardly enough again to say, with most Christian interpreters, that it was intended to be a type of Christ. Some meaning it must have had for those to whom it was actually presented, and we have no grounds for assuming, even in Moses himself, still less in the multitude of Israelites slowly rising out of sensuality, unbelief, rebellion, a knowledge of the far-off mystery of redemption. If the words of our Lord in John iii. 14, 15 point to the fulfillment of the type, there must yet have been another meaning, for the symbol. Taking its part in the education of the Israelites, it must have had its starting-point in the associations previously connected with it. Two views, very different from each other, have been held as to the nature of those associations. On the one side it has been maintained that, either from its simply physical effects or from the mysterious history of the temptation in Gen. iii. 6, the serpent was the representative of evil. To present the serpent-form as deprived of its power to hurt, exalted as the trophy of a conqueror, was to assert that evil, physical and spiritual, had been overcome, and thus help to strengthen the weak faith of the Israelites in a victory over both. The serpent, on the other side, passed the same idea as the dragon in the popular representations of the Archangel Michael and St. George (Ewald, Geschichte, ii. 228). To some writers, as to Ewald, this has commenced itself as the simplest and most obvious view. It has been adopted by some orthodox divines who have been unable to convince themselves that the same form could ever really have been at once a type of Satan and of Christ (Jackson, Hist. of the Son of God, c. 31; Patrick, Conn., in loc.; Espinaeus, Burnmann, Vitringa, in Delitzsch, Obserravi, Sect. ii. 15). Others, again, have started from a different ground. They raise the question whether Gen. iii. was then written, or if written, known to the great body of the Israelites. They look to Egypt as the starting-point for all the thoughts which the serpent could suggest, and they find there that it was worshiped as an opethakmon, the symbol of health and life. This, for them, explains the mystery. It was as the known emblem of a power to heal that it served as the sign and sacrament on which the faith of the people might fasten and sustain itself. Contrasted as these views appear, they have, it is believed, a point of contact. The idea primarily connected with the serpent in the history of the Fall, as throughout the prophetic language of Scripture, is that of wisdom (Gen. iii. 1; Matt. x. 16; 2 Cor. xi. 3). Wisdom, apart from obedience to a divine order, allaying itself to man's lower nature, passes into cunning. Man's nature is enveloped and degraded by it. But wisdom, which has the same power of understanding, yielding to the divine law, is the source of all healing and restoring influences, and the serpent-form thus becomes a symbol of deliverance and health. The Israelites were taught that it would be so to them in proportion as they ceased to be sensual and rebellious. There were facts in the life of Moses himself which must have conspired to this end, connected with this twofold symbolism. When he was to be taught that the Divine Wisdom could work with any instruments, his rod became a serpent (Ex. iv. 1-5). (Comp. Cyril, Alex. Schol. Ev. Gospels in Ex. ii.) When he and Aaron were called to their great conflict with the perverted wisdom of Egypt, the many serpents of the magicians were overcome by the one serpent of the future high-priest. The conqueror and the conquered were alike in outward form (Ex. vii. 10-12).

II. The next stage in the history of the brazen serpent shows how easily even a legitimate symbol, retained beyond its time, after it had done its work, might become the occasion of idolatry. It appeared under the reign of Hezekiah as having been, for some undefined period, an object of worship. The zeal of that king leads him to destroy it. It receives from him, or had borne before, the name Nehushtan. (Comp. Nehumitfan.) We are left to conjecture when the worship began, or what was its locality. It is hardly likely that it should have been tolerated by the reformation zeal of kings like Asa and Jehoshaphat. As a religious manifestation, we may believe, have received a fresh character and become more conspicuous in the period which preceded its destruction. All that we know of the reign of Ahaz makes it probable that it was under his auspices that it received a new development, that it thus became the object of a marked aversion to the iconoclastic party who were prominent among the counselors of Hezekiah. Intercourse with countries in which Ophityah prevailed—Syria, Assyria, possibly Egypt also—acting on the feeling which led him to bring together the idolatries of all neighboring nations, might easily bring this perversion of the reverence felt for the time honored relic.

Here we might expect the history of the material object would cease, but the passion for relics has prevailed even against the history of the Bible. The Church of St. Ambrose, at Milan, has located, for centuries, of possessing the brazen serpent which Moses set up in the wilderness. The earlier history of the relic, so called, is matter for conjecture. Our knowledge of it begins in the year A. D. 971, when an envoy was sent by the Millennium to the court of the Emperor John Zimisces, at Constantinople. He was taken through the imperial cabinet of treasures and invited to make his choice, and he chose this, which the Greeks assured him, was made of the same metal as the

---

a Another view, verging almost on the ludicrous, has been maintained by some Jewish writers. The serpent was set up in adornment, as a man who has escaped his son from danger can set up against the wall as a warning (Otho, Lyrai, Rabbin s. v. Serpent).

b Comp. Serpent, and, in addition to the authorities there referred to, Wilkinson's Anc. Egyptiains, ii. 94, iii. 886, v. 94, 235; Kurtz, History of the Old Con-
original serpent (Σέρπεντ, Hist. Regn. Ind., b. vii.). On his return, it was placed in the Church of St. Ambrose, and popularly identified with that which it professed to represent. It is, at least, a possible hypothesis that the Western Church has in this way been led to venerate what was originally the object of the worship of some Oriental sect.

III. When the material symbol had perished, its history began to suggest deeper thoughts to the minds of men. The writer of the Book of Wisdom, in the elaborate contrast which he draws between true and false religions in their use of outward signs, sees in it a σεβασμὸν σαφείρας, εἰς ἄλλωσιν ἐνάλωσιν νόσον: "he that turned himself was not saved by the thing that he saw (δ.γ. τὸν θησαυρόν), but by him that art the Saviour of all" (Wis. xvi. 6-7). The Tar-
gum of Jonathan paraphrases Num. xxxi. 8, "he shall be hanged if he direct his heart unto the Name of the Word of the Lord," Tlilo, with his characteristic taste for an ethical, mystical interpre-
tation represents the history as a parable of man's victory over his lower passions. The motif, that has been amply and strength, has altered the meaning of the symbol, and that which had before been the emblem of the will, yielding to and poisoned by the serpent pleasure, now represents σωφροτητικα, the ἀγαθότατος δοκι-
μασι εἰς φαίμαν (De Agri cult.). The facts just stated may help us to enter into the bearing of the words of John iii. 14, 15. If the paraphrase of Jonathan represents, as it does, the current in-
terpretation of the schools of Jerusalem, the devout Rabbi to whom the words were spoken could not have been ignorant of it. The new teacher car-
ed the lesson a step further. He led him to identify the "Name of the Word of the Lord" with that of the Son of Man. He prepared him to see in the lifting-up of the Crucifixion that should answer, in its power to heal and save, to the serpent in the wilderness.

IV. A full discussion of the typical meaning here unfolded belongs to Exegesis rather than to a Dictionary. It will be enough to note here that which connects itself with facts or theories already mentioned. On the one side the typical interpre-
tation is extended to all the details. The pole on which the symbol was based was not only a type of the cross, but was itself crucial in form (Just. Mart. Dow. c. Egy. p. 322). The serpent was nailed to it as Christ was nailed. As the symbol of sin it represented his being made sin for us. The very metal, like the fine brass of Rev. i. 15, was an emblem of the might and glory of the Son of Man (comp. Lam. iii. 16). On the other it has been maintained (Patrick and Jack-
son, at serpent) that the serpent was from the begin-
ing, and remains still, exclusively the symbol of evil, that the lifting-up of the Son of Man answered to that of the serpent because on the cross the vic-
tory over the serpent was accomplished. The point of comparison lay not between the serpent and Christ, but between the look of the Redeemer to the outward sign, the look of a justifying faith to the cross of Christ. It will not surprise us to find that, in the spiritual, as in the historical inter-
pretation, both theories have an element of truth. The serpent here also is primarily the emblem of the evil knowledge and of evil. To man, as he has obtained that knowledge by doing evil, it has been as a venemous serpent, poisoning and corrupting. In the nature of the Son of Man it is once more in harmony with the Divine will, and leaves the humanity pure and untainted. The Crucifixion is the witness that the evil has been overruled by the good. Those who are bitten by the serpent find their deliverance in looking to Him who knew evil only by submitting it, and who is therefore mighty to save. Well would it have been for the Church of Christ if it had been con-
tent to rest in this truth. Its history shows how eas-
y it was for the old perversion to reproduce itself. The highest of all symbols might share the fate of the lower. It was possible even for the cross of Christ to pass into a Nehushtan. (Comp. Stier, Words of the Lord Jesus, on John iii., and Kurtz, Hist. of the Old Covenant, iii. 344-355. Eng. trad.)

E. H. F.
their poison fangs in and uninjured. These men to possess a charm, though not a supernatural one—namely, that of confidence and courage... They will play their tricks with any hooded snakes (Naja tripudians), whether just taken or long in confinement, but with no other kind of poisonous snake.' See also Tenement, Cephas, i. 168, 5th ed. Some have supposed that the practice of taking out or breaking off the poison fangs is alluded to in Ps. VII. 6, "Break their teeth, O God, in their mouth."

while young Joseph was a slave to the sons of Bilhah (Gen. xxxix. 2, where instead of "he led was with," we should read, "he was the servandboy to," the sons of Bilhah). The confidential designation meشدיב is applied to the priests and Levites, in their relation to Jehovah (Ex. viii. 17; Is. lii. 6; Ex. xxiii., 11), and the cognate verb to Joseph after he found favor with Potiphar (Gen. xxxix. 4), and to the nephews of Abinadah (2 Chr. xxvii. 8). In 1 Kings xxi. 14, 15, we should substitute "servants" (מְדִיבַר) for "young men." 

* SERVITOR, only in 2 K. iv. 43, used of Elijah's personal attendant or servant. The Hebrew term פָּרָשָׁה between Shem and Terah, as given by the LXX., by which the interval between the Flood and Abraham is lengthened from 292 (as in the Heb. B.) to 1172 (or Alex. 1072) years. [Chronology, vol. i. p. 440.] Bochart (Philo. eiv. iv.) conjectures that the town of Servy, a day's journey from Charrar in Mesopotamia, was named from this patriarch. Suidas and others ascribe to him the classification of dead benefactors of mankind. Epiphanius (Ad. Hier. i. 6, 8), who says that his name signifies "provocation," states that, though in his time idolatry took its rise, yet it was confined to pictures; and that the devastation of dead benefactors of mankind. Hence arose the polytheism and idolatry (see Frang. Histor. Græc. iv. 345, and the note). It is in accordance with his being called of the race of Japhet that Epiphanius sends Philae and Men to Thrace (Epist. ad Dosit. Paul. § lii.) There, of course, little or no historical value in any of these statements.

A. C. H.

SERVANT (םַדְרִיב). The Hebrew terms פָּרָשָׁה and meشدיב, which alone answer to our "servant," in as far as this implies the notions of liberty and voluntariness, are of comparatively rare occurrence. On the other hand, 'ebel, which is common and is equally rendered "servant" in the A. V., properly means a slave. Slavery was in point of fact the normal condition of the underling in the Hebrew commonwealth [slave], while the terms above given refer to the exceptional cases of young or confidential attendants. Joseph, for instance, is described as at once the פָּרָשָׁה and meشدיב of Moses (Ex. xxxii. 11); Elijah's servant sometimes as the former (2 K. iv. 12, v. 20), sometimes as the latter (2 K. iv. 43, v. 15). Amnon's servant was a meشدיב (2 Sam. xiii. 17, 18), while young Joseph was a פָּרָשָׁה to the sons of Bilhah (Gen. xxxix. 2, where instead of "he led was with," we should read, "he was the servandboy to," the sons of Bilhah). The confidential designation meشدיב is applied to the priests and Levites, in their relation to Jehovah (Ex. viii. 17; Is. lii. 6; Ex. xiii. 11), and the cognate verb to Joseph after he found favor with Potiphar (Gen. xxxix. 4), and to the nephews of Abinadah (2 Chr. xxvii. 8). In 1 Kings xxi. 14, 15, we should substitute "servants" (מְדִיבַר) for "young men." 

W. L. B.

a But perhaps secret and confidential may have been used of pictures.

b In many passages the correct reading would add considerable force to the meaning, e. g. in Gen. ix. 25, "Curset be Canaan, a slave of slaves shall he be into his brethren;" in Gen. vi. 15, "Remember that thou wast a slave in the land of Egypt;" in Job in 19, "The slave is free from his master;" and particularly in passages where the speaker uses the term of himself, as in Gen. xviii. 3, "Pass not away, I pray thee, from thy slave."
brow term, which is אָשֶׁר הָיָה, the A. V. commonly renders "servant" or "minister."

II.

SE'ES (סֵאֵס; [Vat. Σεσής]; Alex. Σεσής: and Cyril.] SHAMSHAI (1 Esdr. ix. 34; comp. Ex. x. 40).

SESTHEL (Σεσήλη; Besedel). BEZALEL, the son of Palauch-Meab (1 Esdr. ix. 31; Ex. x. 30).

SETH (זֶה, i. e. Seth. [see below]: שֶּת; Gen. iv. 25, v. 3; 1 Chr. i. 1). The third son of Adam, and father of Enos. The signification of his name (given in Gen. iv. 25) is "appointed" or "put" in the place of the murdered Abel; and Pelitzch speaks of him as the second Abel; but Ewald (Gesch. i. 553) thinks that another signification, which he prefers, is indicated in the text, namely, "seeding," or "germ." The phrase, "children of Seth" (Num. xxiv. 17) has been misunder-stood as equivalent to all mankind, or as denoting the tribe of some unknown Moabish chieftain; but later critics, among whom are Rosen-müller and Gesenius (Thes. i. 348), bearing in mind the parallel passage (Jer. xviii. 45), render the phrase, "children of noise, tumultuous ones," i. e. hostile armies. [SETH.]

In the 4th century there existed in Egypt a sect calling themselves Sethians, who are classed by Nænder (Ch. Hist. ii. 115, ed. Bohn) among those Gnostic sects which, in opposing Judaism, approximated to pantheism. (See also Tillemont, Mémoires, ii. 518.) Irenæus (i. 30; comp. Massuet, Dissert. i. 3, § 14) and Theodoret (Hist. Prot. xiv. 304), without distinguishing between them and the Ophites, or worshippers of the serpent, say that in their system Seth was regarded as a divine effluence or virtue. Epiphanius, who devotes a chapter to them (Adr. Hier. i. 3, § 39), says that they identified Seth with our Lord. W. T. B.

SETHUR (סְתַּחוּר; Siddo: Shur). The Asherite spy, son of Michael (Num. xiii. 13).

SEVEN. The frequent recurrence of certain numbers in the sacred literature of the Hebrews is obvious to the most superficial reader; and it is almost equally obvious that these numbers are associated with certain ideas, so as in some instances to lose their numerical force, and to pass over into the province of symbolic signs. This is more or less true of the numbers three, four, seven, twelve, and forty; but seven so far surpasses the rest, both in the frequency with which it recurs, and in the impressiveness of the objects with which it is associated, that it may fairly be termed the representative symbolic number. It has hence attracted considerable attention, and may be said to be the keystone on which the symbolism of numbers depends.

The origin of this symbolism is a question that meets us at the threshold of any discussion as to the number seven. Our limits will not permit us to follow out this hypothesis to its legitimate extent, but we may briefly state that the views of Biblical critics may be ranged under two heads, according as the symbolism is attributed to theoretical speculations as to the internal properties of the number itself, or to external associations of a physical or historical character. According to the former of these views, the symbolism of the number seven would be traced back to the symbolism of its component elements three and four, the first of which = Divinity, and the second = Humanity, whence seven = Divinity + Humanity, or, in other words, the union between God and Man, as effected by the manifestations of the Divinity in creation and revelation. So again the symbolism of twelve is explained as the symbolism of 3 x 4, i. e. of a second combination of the two chief elements, though in different proportions, the representative number of Humanity, as a multiplier, assuming a more prominent position (Böhler’s Symbolik, i. 187, 201, 224). This theory is seductive from its incongruity, and its appeal to the imagination, but there appears to be little foundation for it. For (1) we do not find any indication, in early times at all events, that the number seven was resolved into three and four, rather than into any other arithmetical elements, such as two and five. Bengel notes such a division as running through theheptads of the Apocalypse (Gesammt, in Rec. xvi. 1), and the remark undoubtedly holds good in certain instances, e. g. the trumpets, the three latter being distinguished from the four former by the triple "woe" (Rev. xiv. 10), but in other instances, e. g. in reference to the promises (Gesammt, in Rec. xii. 7), the distinction is not so well established, and even if it were, an explanation might be found in the adaptation of such a division to the subject in hand. The attempt to discover such a distinction in the Mosaic writings—as, for instance, where an act is to be done on the third day out of seven (Num. xix. 12)—appears to be a failure. (2.) It would be difficult to show that any associations of a sacred nature were assigned to three and four previously to the sanctity of seven. This latter number is so far the sacred number καὶ ἕξας that we should be less surprised if, by a process the reverse of the one assumed, sanctity had been subsequently attached to three and four as the supposed elements of seven. But (3) all such speculations on mere numbers are alien to the spirit of Hebrew thought: they belong to a different stage of society, in which speculation is rife, and is systematized by the existence of schools of philosophy. We turn to the second class of opinions which attribute the symbolism of the number seven to external associations, and it is almost certain that this class of views, which were the most popular in former times, would be subdivided into two, according as the symbolism is supposed to have originated in the observation of purely physical phenomena, or, on the other hand, in the peculiar religious enactments of Monism. The influence of the number seven was not restricted to the Hebrews: it prevailed among the Persians (Esth. i. 10, 14), among the ancient Indians (Von Böhten’s Alt. Indien, ii. 224 ff.), among the Greeks and Romans to a certain extent, and probably among all nations where the week of seven days was established, as in China, Egypt, Arabia, etc. (Ibler’s Chronol. i. 88, 178, ii. 473). The wide range of the word seven is in this respect an interesting and significant fact: with the exception of a six," it is the only numeral which the different languages have in common with the Indo-European; for the Hebrew שֵׁכֶר a is essentially the same as ἱερός, σεπτόν, seven, and the Sanskrit, Persian, and Gothic names for this number (Vott’s Etna. Forsch. i. 129). In the countries above enumerated, the institution of seven as a cyclical number is attributed to the observation of the changes of the moon, or to the supposed number of
SEVEN

the planets. The Hebrews are held by some writers to have borrowed their notions of the sucty of seven from their heathen neighbors, either wholly or partially (Von Bohlen's Introd. to Gen. i. 21 ff.; Hengstenberg's Babalon, p. 335. Clark's ed.); but the peculiariy of the Hebrew view consists in the special dignity of the seventh, and not simply in that of seven. Whatever influence, therefore, may be assigned to astronomical observation or to prescriptive usage, in regard to the original institution of the week, we cannot trace back the peculiar associations of the Hebrews farther than to the point when the seventh day was consecrated to the purposes of religious rest.

Assuming this, therefore, as our starting-point, the first idea associated with seven would be that of religious periodicity. The Sabbath, being the seventh day, suggested the adoption of seven as the coefficient, so to say, for the appointment of all sacred periods: and we thus find the 7th month ushered in by the Feast of Trumpets, and signalized by the celebration of the Feast of Tabernacles and the great Day of Atonement: 7 weeks as the interval which elapsed between the consecration of the altar, the 7th year as the Sabbatical year: and the year succeeding 7 X 7 years as the Jubilee year. From the idea of periodicity, it passed by an easy transition to the duration or repetition of religious proceedings; and thus 7 days were appointed as the length of the Feasts of Passover and Tabernacles; 7 days for the ceremonies of the conservation of priests: 7 days for the interval to elapse between the occasion and the removal of various kinds of legal uncleanness, as after childbirth, after contact with a corpse, etc.; 7 times appointed for aspersion either of the blood of the victim (e. g. Lev. iv. 6, xvi. 14), or of the water of purification (Lev. xiv. 51; comp. 2 K. v. 10, 14); 7 things to be offered in sacrifice (eaten, sheep, goats, pigeons, wheat, oil, wine); 7 victims to be offered on any special occasion, as in Baham's sacrifice (Num. xxii. 1), and especially at the ratification of a treaty, the notion of seven being embodied in the very term "signifying to swear, literally meaning to do seven times" (Gen. xxi. 28; comp. Herod. iii. 8, for a similar custom among the Arabs). The same idea is found also in as many times. We read of the Tabernacle — in the 7 arms of the golden candlestick, and the 7 chieft utensils (altar of burnt-offerings, laver, shewbread table, altar of incense, candlestick, ark, mercy-seat).

The number seven, having thus been impressed with the seal of sanctity as the symbol of all connected with the Divinity, was adopted generally as a cyclical number, with the subordinate notions of perfection or completeness. It hence appears in cases where the notion of satisfaction is required, as in reference to punishment for wrongs (Gen. iv. 15: Lev. xxvi. 18, 25: Ps. lxxix. 12; Prov. vi. 31), or to forgiveness of them (Matt. xviii. 21). It is again mentioned in a variety of passages too numerous for quotation (e. g. Job v. 19; Jer. xvi. 5; Matt. xii. 42) in a sense analogous to that of a "round number," but with the additional idea of sufficiency and completeness. To the same head we may refer the numerous instances in which persons or things are mentioned by sevens in the historical portions of the Bible — e. g. the 7 limes and the 7 ears of corn in Pharaoh's dream, the 7 daughters of the priest of Midian, the 7 sons of Jesse, the 7 deacons, the 7 sons of Scen, the twelve 7 generations in the pedigree of Jesus (Matt. i. 17); and again the still more numerous instances in which periods of seven days or seven years, occasionally combined with the repetition of an act seven times; as, in the taking of Jericho, the town was surrounded for 7 days, and on the 7th day it fell at the blast of 7 trumpets borne round the town 7 times by 7 priests: or again at the Flood, an interval of 7 days elapsed between the notice to enter the ark and the coming of the Flood, the loads entered by sevens, 7 days elapsed between the two missions of the dove, etc. So again in private life, 7 years appear to have been the usual period of a hiring (Gen. xxv. 18), 7 days for a marriage-festival (Gen. xxix. 27; Judg. xiv. 12), and the same, or in some cases 70 days, for mourning for the dead (Gen. i. 3, 10; 1 Sam. xxxi. 13).

The foregoing applications of the number seven become of great practical importance in connection with the interpretation of some of the prophetic and other passages in the Bible, portions of the New Testament, and other apocalyptic writings. For in this latter book the ever-recurring number seven both serves as the mould which has decided the external form of the work, and also to a certain degree penetrates into the essence of it. We have but to run over the chief subjects of that book — the 7 churches, the 7 seals, the 7 trumpets, the 7 woes, the 7 angels, the 7 spirits before the throne, the 7 horns and 7 eyes of the Lamb, etc. — in order to see the necessity of deciding whether the number is to be accepted in a literal or a metaphorical sense — in other words, whether it represents a number or a quality. The decision of this question affects not only the number seven, but also the number which stands in a relation of antagonism to seven, namely, the half of seven, which appears under the form of forty-two months, = 33 years (Rev. viii. 5), twelve hundred and sixty days, = 34 years (xl. 3, xli. 6), and again a time, times, and half a time = 34 years (xili. 14). We find this number frequently recurring in the Old Testament, as in the forty-two stations of the wilderness (Num. xxxii.), the three and a half years of the Exile (Ezra iv. 6), the seven years of famine (Gen. xiv. 17), the three and a half times, and the dividing of time," during which the persecution of Antichus Epiphanes was to last (1 Dan. vii. 25), the same period being again described as "the midst of the week," = e. the half of seven years (Dan. ix. 27), "a time, times, and a half" (Dan. xii. 7), and again probably in the number of days specified in Dan. viii. 14, xii. 11, 12. If the number seven express the notion of completeness, then the number half-seven = incompleteness and the secondary ideas of suffering and disaster: if the one represent Divine agency, the other we may expect to represent human agency. More numerical calculations would thus, in regard to unfilled prophecy, be either wholly superseded, or at all events take a subordinate position to the general idea conveyed.

W. L. B.  

* SEVENTY DISCIPLES. A body of disciples whom Christ appointed for the immediate purpose of going "two and two before his face into every city and place, whither He himself would come" (Luke x. 1). They are only mentioned by St. Luke, and nothing further is said of them by him than is contained in the first half of the tenth chapter of his Gospel. Neither the whole body nor
any members of it are ever mentioned, as such, in the Acts of the Apostles, nor in any of the Epistles.

The time of their appointment appears to have been near the close of our Lord's ministry, just as he was taking the final departure from Galilee (Luke x. 51-x. 1). Different chronological arrangements of the life of our Lord would, of course, lead to a difference of opinion here also; but the most probable supposition seems to be that Jesus himself, on finally leaving Galilee, made a rapid and somewhat private journey to Jerusalem to attend the Feast of Tabernacles (John viii. 2-10), sending forth the seventy just to get out, probably, of the others, where they were to prepare the way for his own going to teach during the greater part of the interval before his last Pasover.

However this may be, after the fulfillment of this their immediate mission the seventy returned again rejoicing in their possession of miraculous powers (Luke x. 17). From our Lord's answer, "Beloved, I give unto you power to tread on serpents and scorpions, and over all the power of the enemy: and nothing shall by any means hurt you" (ver. 19), it is manifest that their office did cease with the fulfillment of their immediate and temporary mission, but was to continue, as indeed was already probable from the use of the technical expression "apostolados" in ver. 1. Yet we hear nothing further of them in the books of the N. T.

In the writings of Christian antiquity there is frequent mention of them, sometimes as seventy, sometimes as seventy-two in number (Rever. Com. i. 40), and comparison is very naturally made to the seventy elders of Israel (Num. xi. 16) appointed to assist Moses (e. g. Euseb. De Orig. ii. 35) i. e. but there is very little to throw light upon their history or their names. The earliest notice of this kind is by Clement of Alexandria, who incidentally mentions that Barnabas was one of them (Strom. ii. 20), and is also quoted by Euseb. (H. E. i. c. 12) as saying the same thing of Sosthenes, and also of a certain Cephas whom Paul "withstood to his face," whom he, curiously enough, supposed to have been not the Apostle, but one of the seventy of the same name. Eusebius gives a variety of reports without himself apparently attaching any weight to them. In addition to those already mentioned, he says (H. E. i. c. 12): "And that Matthias, who was numbered with the Apostles in place of Judas, and he who had been honored to be a candidate with him, is also still to have been deemed worthy of the same calling with the seventy. They also say that Thaddeus was one of them." In the following chapter he speaks of Thaddeus positively as one of their number. Half a century later Epiphanius (Herod. li.) speaks of their number as seventy-two, and of Mark and Luke as among them. Also (Herod. xx.), he says that our Lord * sent forth also seventy-two others to preach, of whose number were the seven appointed over the widows, Stephen, Philip, Prochorus, Nicanaor, Timon, Parmenas, and Nicolaus: before these also Matthias, who was numbered among the Apostles in the place of Judas; but after these seven and Matthias before them, Mark, Luke, Justus, Barnabas and Apelles, Rufus, Niger, and the remainder of the seventy-two."

It does not appear what authority Epiphanius had for these statements. He seems to be quite alone in this supposition as to the seven deacons. The names of the seven indicate that they were Hellenists, and as such were not likely to have been of the seventy. In regard to the other Epiphanius must be considered to have simply gathered up the current traditions of his time: these are not quite the same with those mentioned earlier by Eusebius, but even those he does not appear to have considered as of much authority.

F. G.

**SHAALABIM** (שִׁלְעַלְבִּים), but in many MSS. *סִלְעַלְבִּים* [city of scorpions or jackals]; [Hom. Σαλάλης; Vat.] Σαλάλεως, Alex. Σαλαλέως: *Scabia*. A town in the allotment of Dan, named between *Ish-shemesh* and *Aijalon* (Josh. xix. 42). There is some uncertainty about the form of the name. The MSS. preponderate in favor of *Shaalabim*, in which form it is found in two other passages. But there is also some ground for suspecting that it was Shaalbron. [See Shaalabim and Shaalbonite.]

**SHAALABIM** (שִׁלְעַלְבִּים) [place of scorpions or jackals]: *Shaalabim*, Alex. *ai alatekseis*; in 1 K. [Hom. Σαλάλης, Vat.] Σαλάλεως, Alex. *Σαλαλης*, *Σαλαλην*, *Σαλαληεις*. The commoner form of form in MSS. of 1 K. In the last passage is found as Shaalabim. It occurs in an ancient fragment of history inserted in Judg. i. enumerating the towns of which the original inhabitants of Canaan succeeded in keeping possession after the general conquest. Mount *Heres*, *Aijalon*, and Shaalbin were held against the Danites by the Amorites (ver. 55) till the help of the great tribe of Ephraim being called in, they were at last compelled to succumb. It is mentioned with *Aijalon* again in Josh. xix. 42 (Shalaabhin) and with Beth-shemesh both there and in 1 K. iv. 9, in the last passage as making up one of Solomon's com- missariat districts. By Eusebius and Jerome it is mentioned in the *Onomasticon* ("Selab") as a large village in the district of Sabaec (i.e. Samaria) and as then called Solabia. But this is not

> a A city called Ἁλαβίς or Σαλαλις, formerly lay by the east end of the island of Cyprus, between which and the mainland of Cappadocia was a constant intercourse and close connection. Perhaps this was Shalabim.

> b This passage in the Vatican Codex (Mat.'s ed.) contains a curious specimen of a double reading, each of the two being a translation of the Hebrew proper names: קְנֵי אֶפֶם יִשְׂרָאֵל שַׁלְעַלְבִּים קְנֵי אֶפֶם וְאֶפֶם שַׁלְעַלְבִּים. In אֶפֶם שַׁלְעַלְבִּים קְנֵי אֶפֶם שַׁלְעַלְבִּים קְנֵי אֶפֶם. [See Rom. xxv.] הָאֵשׁ שַׁלְעַלְבִּים in the Mss., and in Σαλαλις. [Codex Alex. Σαλαλεως and Σαλαλεως: *Shalaabia*.] Has ιστορικάδες and Μυστικά.
SHAALBONITE, THE

very intelligible, for except in the statement of Josephs (1 Sam. vi. 1, § 22), that the allotment of the Danites extended as far north as Dor (Tirathbur), there is nothing to lead to the belief that any of their towns were at all near Samaria, while the persistent enumeration of Shaalbam with Aijalon and Beth-shemesh, the sites of both of which are known with tolerable certainty as within a radius of 10 miles west of Jerusalem, is strongly against it. It is also at variance with another notice of Jerome, in his commentary on Ez. xlviii. 22, where he mentions the 9 towers of Aijalon and Seba and Emmaus-Neapolis, in connection with Joppa, as three landmarks of the tribe of Dan. No trace appears to have been yet discovered of any name resembling Shaalbon in the neighborhood of Jerusalem or Aijalon, or indeed anywhere else, unless it be a place called 'Estelin, mentioned in the lists of Eli Smith and Robinson (Bibl. Res. 1st ed. iii. App. 120 b) as lying next to Serah, the ancient Zion, a position which is very suitable.

The Sela'bdin, discovered by M. Renan's expedition about 4 miles N. W. of 'Inban-Jebel, in the Bedul Bedawin (see the Carte des routes par la brigue toponymique, etc., 1863), may be an ancient Shaalbam, possibly so named by the northern colonists of Danites after the town of their original dwelling-place. But it is obvious from the foregoing description that it cannot be identical with it.

SHAAL/BONITE, THE (אֲשַׁלְבָן) [see below]: [in 2 Sam. Rom.] סֵאֶלְבָנִיתָים [Vat. Alex. - ver.] or סֵאֶלְבָנִיתָא [1 Chr. Rom. Alex. - v.]; סֵאֶלְבָנִיתָא, Vat. Alex. Rom. Fr. 1. 5.1. Thus Ghialie the Shaalbonite (2 Sam. xiv. 22, 1 Chr. xi. 33). He was the native of a place named Shaalbon, which is unmentioned elsewhere, unless it is identical with SHAALAM or SHAALBAMIN of the tribe of Dan. In this case it becomes difficult to decide which of the three is the original form of the name.

SHAA'APH (אְשַׁאָפ) [division]: אְשַׁאא; Alex. אְשַׁאא; Comp. סֵאֶאָפ; Sept. 1. The son of Jahad (1 Chr. ii. 47).

2. The son of Caleb the brother of Jerahmeel by his concubine Maachah. He is called the father that was the founder, of the town Mudaimmah (1 Chr. ii. 49).

SHAARATIM (אֱשַׁרְאַת) [two gates]: [in 1 Sam.] תֹּא אֱשַׁרְאַת in both MSS.; [in Chr. Vat. Alex.] סַרְאַת [Rom. joined with preceding word, Baroqarivaip; Comp. סַרְאַת; Steun. סַרְאַת]; a city in the territory allotted to Judah (Josh. xv. 36); in A. V. incorrectly SHARAIT. It is one of the first group of the towns of the Shephelah, or lowland district, which contains also Zorah, Jarimath, Soco, besides others not yet recognized. It is mentioned again in the account of the route which followed the fall of Gath, where the wounded fell down on the road to Shinarim and as far as Gath and Ekron (1 Sam. xvii. 52). These

The word SHARAIM means "two gates"; but for the mention of the town in Joshua, the consistency of its position with 1 Sam. xvii. 52, it would be perhaps more natural in that passage to take it as meaning the gates of Oath and Ekron, as the two notices are consistent with each other. Goliath probably fell in the valley east of Gath, on opposite sides of which stand the representatives of Socoh and Jarimath; Gath was at or near Tell es-Sheikh, a few miles west of Socoh at the mouth of the same Wady; whilst Ekron (if it be Ekron) lies farther north. Sharaim, therefore, may be looked for somewhere west of Sheveiel, on the lower slopes of the hills, where they subside into the great plain.

We find the name mentioned once more in a list of the towns of Simson (1 Chr. iv. 18), occupying the same place with Sharachen and Sansannah, in the corresponding lists of Joshua. Lying as the allotment of Simson did in the lowest part of Judah, many miles south of the region indicated above, it is impossible that the same Sharaim can be intended, and indeed it is quite doubtful whether it be not a mere corruption of one of the other two names.

Taken as Hebrew, the word is a dual, and means "two gateways," as the LXX. have rendered it in 1 Sam. xvii. 52. It is remarkable that the group in which Sharaim is included in Josh. xv. should contain more names in dual form than all the rest of the list put together: namely, besides itself, Adullam, and Geberothaim, and probably also Emma and Adullam. For the possible mention of Sharaim in 1 Mac. vi. 66, see 2 SAMARIA, p. 2793. G.

SHAAASHGAY (אֲשַׁשָּג) [Pers. servant of the beautiful, Gers.]: not found in the LXX., who substitute Fla, Hegai, as in vv. 8, 15: Sesaygina; the eunuch in the palace of Xerxes who had the custody of the women in the second house, i.e. of those who had been in to the king (Esth. xiv. 11). HEGAI.

SHAB'BETHAI (שַבְּבְהֶתְו) [2 syll.]: שַבְּבְהֶתְו [in Ezr.] שַבְּבְהֶתְיו-אַאָס; Alex. רכֹּס; Vat. FA. 1. Shab'bethai (1 Sam. i. 19) and Shab' and Shab'adi in Now. Rom. Vat. Alex. FA. om.; Comp. Shabadha'is, All. Shabadha'is; Shab'dhi in Ezr., Sept., and Now. 1. A Levite in the time of Ezra, who assisted him in investigating the marriages with foreigners which had taken place among the people (Ezr. x. 15). It is apparently the same who with Jeshua and others instructed the people in the knowledge of the Law (Neh. viii. 7). He is called SHMODAM (1 Esdr. xi. 14) and SAMA'TEA (Ezr. vii. 48).

2. (in LXX. i.e. Rom. Vat. FA. Alex.; but Comp. Shabadha'is, All. Shabadha'is, FA. Shabadha'is; Suboddaih.) Shabadthai and Jozabad, of the chief of the Levites, were over the outward business of the house of God after the return from Babylon (Neh. xi. 16). Possibly 1 and 2 are identical, although Burrington (Geneal. i. 167) regards Shabadthai, who is mentioned in Neh. viii. 7, as a priest.

* SHAFLAH. [SHACHIA.]

SHACHIA (שֶׁחַי) [name of Jach, First]; Zabah; [Vat. Zabah; Alex. Zabha; Sept.]. Properly "Shachia," son of Shabanah by his wife Hodeel (1 Chr. viii. 10). This form of the name is retained from the Geneva Version. The translators have followed the Vulgate in reading LXX. have done. In that case, however, it ought to have the article, which it has not.

b Here there is a slight difference in the vowels, due to the pause — שֶׁחַי — which is reflected in both LXX. and Vulgate (see above, at head of article).
for 2. Seven of Kennicott's MSS. read נבנ, and fifteen נבנ [ex announcement, Fürst].

SHADDAI [2 xil.] (נבה, in pause, נבב). An ancient name of God, rendered "Almighty" everywhere in the A. V. In all passages of Genesis, except one (xxix. 26), in Ex. vii. 3, and in Ex. x. 5, it is found in connection with נבב, א, "God," El Shaddai being there rendered "God Almighty," or "the Almighty God." It occurs six times in Genesis, once in Exodus (vi. 3), twice in Numbers (xxvi. 14, 16), twice in Ruth (i. 20, 21), thirty-one times in Job, twice in the Psalms (lxi. 14 [15], xcl. 1), once in Isaiah (xlix. 4), twice in Ezekiel (i. 24, 5), and once in Joel (i. 15). In Genesis and Exodus it is found in what are called the Elohistic portions of those books, in Numbers in the Jehovistic portion, and throughout Job the name Shaddai stands in parallelism with Elohim, and never with Jehovah. By the name or in the character of El Shaddai, God was known to the patriarchs — to Abraham (Gen. xxi. 1), to Isaac (Gen. xxviii. 3), and to Jacob (Gen. xlii. 14, xlvi. 3, xxix. 25), before the name Jehovah, in its full significance, was revealed (Ex. vi. 3). By this title He was known to the Midianite Baham (Num. xiv. 4, 16), as God the Giver of Visions, the "High God" (Ps. xciv. 1); and the identity of Jehovah and Shaddai, who dealt bitterly with him, was recognized by Xasni in her sorrow (Ruth i. 20, 21). Shaddai, the Almighty, is the God who chastens men (Job xi. 4, vii. 14, xxvii. 2); the just God (Job vi. 3, xxvii. 10); who hears prayer (Job viii. 5, xxvi. 21, xxvii. 10); the God of power who cannot be resisted (Job xx. 25), who punishes the wicked (Job xxi. 20, xxvii. 13), and rewards and protects those that trust in Him (Job xxiv. 23, 25, xxviii. 5); the God of providence (Job xxi. 17, 23, xxvii. 11) and of fore-knowledge (Job xxxiv. 1), who gives to men understanding (Job xxxvi. 8) and life (Job xxiii. 4): "excellent in power, and in judgment, and in plenty of justice," whom none can perfectly know (Job xi. 7, xxviii. 29). The prevalent idea attaching to the name in all these passages is that of strength and power, and our translators have probably given to "Shaddai" its true meaning when they rendered it "Almighty." In the Targum throughout, the Hebrew word is retained, as in the Peshito Syriac of Genesis and Exodus and of Ruth i. 29. The LXX. gives Ἰπόνα, Ἰγκραν, Θεός, θρόνος, πατρικάρχης, τύμπανα πατρικάρχης, δ η πώπτα ποιήσας (Job vii. 3), επομέναιός (Ps. lxiv. 14 [15]), δ θεόν τοῦ οὐρανοῦ (Ps. xvi. 1), σαβδά (Ex. x. 5), and ταυτότητα (Job i. 15). In Job xxviii. 5, we find the strange rendering οἶνος. In Gen. and Ex. "El Shaddai" is translated θεός μου, or ονομα τουτου, as the case may be. The Vulgate has omnipotens in all cases, except Dominius (Job v. 17, vi. 4, 14; Is. xiii. 6). Deus (Job xxii. 3, xli. 2). Deus celatus (Ps. xvi. 1), sublimus Deus (Ps. i. 24), ortostis (Ps. lxiv. 14 [15]), etcens (Joel i. 15), and Cyrus (Job xxvi. 23). The Veneto-Greek has καιροειδος. The Peshito-Syriac, in many passages, renders "Shaddai" simply "God," in others מַעַן, chayim, sin, strong, powerful (Job v. 17, vi. 4, 14), and once אֵלֶּנָּה, "The Most High" (Job vi. 14). The Samaritan Version of Gen. xvii. 1 has for "El Shaddai," "a powerful, sufficient," though in the other passages of Genesis and Exodus it simply retains the Hebrew word; while in Num. xxiv. 4, 16, the translator must have read נבב, נבב, a field," for he renders "the vision of Shaddai," the "vision of the field," i. e. the vision seen in the open plain. Aben Ezra and Kimchi render it "powerful.

The derivations assigned to Shaddai are various. We may mention, only to reject, the Rabbinical etymology which connects it with נבב, הבא, "sufficient," given by Kennicott (on Gen. xvii. 1), "I am He in whose Godhead there is sufficiency for the whole creation;" and in the Talmud (Chapigia, fol. 12, col. 1), "I am He who said to the world, Enough!" According to this, נבב = נבב, ה. He who is sufficient," the all-sufficient One," and so "He who is sufficient in himself," and therefore self-existent. This is the origin of the be'arav of the LXX., Theodoret, and Hesychius, and of the Arabic ٌبٌرٌهٌ, okhafi, of Shaddai, which has the same meaning. Gesenius (Germ. § 86, and Jevins, xiii. 6) regards נבב, shaddai, as the plural of majesty, from a singular noun, נבב, shed, root נבב, נבב, of which the primary notion seems to be, "to be strong" (Fürst, Houdëls). It is evident that this derivation was present to the mind of the prophet from the play of words in Is. xliii. 6. Ewald (Lorh. § 155 c. 5e Ayuj.) takes it from a root נבב = נבב, and compares it with נבב, דארו, from נבב, דארב, the older termination נבב being retained. He also refers to the proper names נבב, Nishai (Jesse), and נבב, Roroe (Neh. iii. 18). Roediger (See. Thea. x. v.) disputes Ewald's explanation, and proposes, as one less open to objection, that Shaddai originally signified "my powerful one," and afterwards became the name of God Almighty, like the analogous form Ashur. In favor of this is the fact that it is never found with the definite article, but such would be equally "the case if Shadai were regarded as a proper name. On the whole there seems no reasonable objection to the view taken by Gesenius, which Lee also adopts (Germ. 130, 6).

Shaddai is found as an element in the proper names Annamishaddai, Zurishaddai, and possibly also in Shederu there may be a trace of it.

SHADRACH [םְמֶה] (circuit of the sun, sun-god, or regal one? [Fürst]: [LXX. ] ש砜) [in Dan. iii. (Theodot.) Alex. שפוח]: סדרך: of uncertain etymology). The Chaldee name of Hammah (HANANIAH; SHEMHABBAZAN), the chief of the "three children," whose song, as given in the apocryphal Daniel, forms part of the service of the Church of England, under the name of "Benedictus, omnia opera." A long prayer in the furnace is also ascribed to him in the LXX. and Vulgate, but this is thought to be by a different hand from that which added the song. The bi-
of Shadrach, or Hananah, is briefly this. He was taken captive with Daniel, Mishah, and Azariah, at the first invasion of Judah by Nebuchadnezzar, in the fourth, or, as Daniel (i. 1) reckons, in the third year of Jehoiakim. At the time when the Jewish king himself was bound in fetters to be carried off to Babylon. Being, with his three companions, apparently of royal birth (Dan. i. 3), of superior understanding, and of goodly person, he was selected, with them, for the king's immediate service, and was for this end instructed in the language and in all the learning and wisdom of the Chaldeans, as taught in the college of the magicians. Like Daniel, he avoided the pollution of the meat and wine which formed their daily provision at the king's cost, and obtained permission to live on pulse and water. When the time of his probation was over, he and his three companions, being found superior to all the other magicians, were advanced to stand before the king. When the decree for the slaughter of all the magicians went forth from Nebuchadnezzar, we find Shadrach uniting with his companions in prayer to God to deliver the dream to Daniel, and when in answer to that prayer, Daniel had successfully interpreted the dream, and been made ruler of the province of Babylon, and head of the college of magicians, Shadrach was promoted to a high civil office. But the penalty of oriental greatness, especially when combined with honesty and uprightness, soon had to be paid by him, on the accusation of certain envious Chaldeans. For refusing to worship the golden image he was cast with Meshach and Abednego into the burning furnace. But his faith stood firm; and his victory was complete when he came out of the furnace, with his two companions, unhurt, heard the king's testimony to the glory of God, and was "promoted in the province of Babylon." We hear no more of Shadrach, Meshach, and Abednego in the Old Testament, after this; neither are they spoken of in the New Testament, except in the pointed allusion to them in the Epistle to the Hebrews, as having "through faith quenched the violence of fire" (Heb. xi. 36, 37). But there are repeated allusions to them in the later apocryphal books, and the martyrs of the Macabean period seem to have been much encouraged by their example. See 1 Macc. iv. 59, 60; 3 Macc. vi. 6; 4 Macc. xiii. 9, xvi. 3, 21, xviii. 12. Ewald (Geschichte, iv. 557) observes, indeed, that next to the Pentateuch no book is so often referred to in these times, in proportion, as the book of Daniel. The apocalyptic additions to Daniel contain, as usual, many supplementary particulars about the furnace, the angel, and Nebuchadnezzar, besides the introduction of the prayer of Shadrach, and the hymn. Theodore Parker observes with truth, in opposition to Beilby, that these additions of the Alexandrine prove that the Hebrew was the original text, because they are obviously inserted to introduce a better connection into the narrative (Joseph. Ant. x. 10; Pridaux, Connex. i. 59, 60; Parker's De Wette. Intro. li. 483-510; Griswold, on 1 Macc. li. 60; Hilgers, who takes a thoroughly skeptical view), on Dan. iii.; Ewald, iv. 106, 107, 557-559; Keil, Einleit. Derincit. A. C. H. 11.

\[a\] Keil explains the discrepancy by supposing that Nebuchadnezzar may have set off from Babylon towards the end of the third year, but not have reached Judaea till the fourth (Einleit. p. 357).

"Reading the final syllable as הָלִּים, 'to the sea.'"
through Tegarsir, Taboa, and the Holy Golden, or by Kerem, Yemina, and Bals-Foulk. The former passes two miles to the north, the latter two miles to the south of Salim, but neither approach it in the direct way which the narrative of Gen. xxxiii. 18 seems to denote that Jacob's route did.

3. With the exceptions already named, the unanimous voice of translators and scholars is in favor of treating shelaen as a mere appellative. Among the ancients, Josephus (by his silence, Ant. i. 21, § 1), the Targums of Onkelos and Pesedjphonw, the Samaritan Vokal, the Arabic Version Among the moderns, the Veneto-Greek Version, Kalisch,4 Junius, and Tremellius, Meyer (Adnot. on Solar Genn), Alonso, Rebhaim (Pol. and Dissert. Misc.), Schuman, Rosenmüller, J. D. Michaelis (Bibel für Ungelernt), and the great Hebrew scholars of our own day, Gesenius (Thes. p. 1422), Zunz (21 Bicker, and Handsch.), De Wette, Luzzatto, Knobel, and Kalisch—all these take shelaen to mean “safe and sound,” and the city before which Jacob pitched to be the city of Shechem.

The Salim plate appears to have been visited by any traveller. It could be done without difficulty from Nablus, and the investigation might be of importance. The springs which are reported to be there should not be overlooked, for their bearing on its possible identity with the Salim of St. John the Baptist.

G.

SHALIM, THE LAND OF (ןָּשַׁלְיָא), i. e. Shalim [land of fowls]; [Vat.] τῇ γῇ Ἥσαμα [Rom. 15:27]; א' Alex. τ. γ. נפליא; [Comp. т. γ. ναπλέα; terra Salim]. A district through which Saul passed on his journey in quest of his father's ass (1 Sam. ix. 4 only). It appears to have been to the "land of Shalim" and the "land of Yemini" (probably, but by no means certainly, that of Benjamin).

In the complete uncertainty which attends the route—its starting-point and termination, no less than its whole course—it is very difficult to hazard any conjecture on the position of Shalim. The spelling of the name in the original shows that it had no connection with Shalem, or with the modern Salim east of Nablus (though between these two there is probably nothing in common except the name). It is more possibly identified with the "land of Shalim," the situation of which appears, from some circumstances attending its mention, to be almost necessarily fixed in the neighborhood of Tivipheh, i. e. nearly six miles north of Michmas, and about nine from Gilgal of Sam. But this can only be taken as a conjecture. [RAMAH].

G.

SHALISHA, THE LAND OF (ןָּשַׁלְיָא), i. e. Shalishah [tribute land, Firs]. τῇ γῇ Σαλίσα; Αξων τ. γ. Σαλίσας; [Comp. Σαλασίδ] terra Salis. One of the districts traversed by

a The traditional explanation of the word among the Jews, as stated by Rashi, is that Jacob arrived before Shechem, sound from his lameness (incurred at Peniel), and with his wealth and his faith alike unimpaired.

Tristram visited this village, which he represents as "modern and insignificant," but, as he says, "took only a hasty glance at it." He thinks that Jacob may have crossed the Jabok at one point hence his route would have brought him to the vicinity of Salim (Land of Israel, p. 140). This possibility, however, is not sufficient to outweigh the opposing considerations stated in the text above. II.

Saul when in search of the asses of Kish (1 Sam. ix. 4, only). It apparently lay between "Mount Ephraim" and the "land of Shalim," a specification which with all its evident preciseness is irreconcilable, because the extent of Mount Ephraim is so uncertain: and Shalim, though probably near Tzippor, is not yet definitely fixed there.

The difficulty is increased by locating Shalishah at Sare or Khirbet Sare, a village a few miles west of Jerusalem, south of Abu Gosh (Toldt, 3te Handl, p. 178), which some have proposed. If the bed of Shalisha contained, as it not impossible did, the place called Baal-Shalishah (2 K. iv. 42), which, according to the testimony of Eusebius and Jerome (Onom., "Beth Salisha"), by fifteen Roman (or twelve English) miles north of LydeII then the whole disposition of Saul's route would be changed.

The words Ἐβασθα Σαλίσιγγαθ in Jer. xlviii. 31 (A. V. "a heifer of three years old") are by some translators rendered as if denoting a place named Shalisha. But even if this be correct, it is obvious that the "praise of the prophet was on the coast of the Dead Sea; and therefore by no means appropriate for that of Saul.

G.

SHALLEG'ECHETH, THE GATE (םָּלָּגְּ חַ יֹת), [see below]: ה' בֵּית הֲדֹרֹפָּ וּנְהָדַ י הֲדֹרֹפָּ וּנְהָדַ י הֲדֹרֹפָּ וּנְהָדַ י הֲדֹרֹפָּ וּנְהָדַ י הֲדֹרֹפָּ וּנְהָדַ י הֲדֹרֹפָּ וּנְhod reph. One of the gates of the "house of Jehovah," whether by that expression he intended the sacred tent of David or the Temple of Solomon.

It is mentioned only in 1 Chr. xxxvi. 16, in what purports to be a list of the staff of the sacred establishment as settled by David (xxiii. 6, 25, xxiv. 31, xxv. 1, xxvi. 31, 32). It was the gate "to the casement of the ascent," that is, to the long embankment which led up from the central valley of the town to the sacred inns. As the casement is actually in existence, though very much concealed under the mass of houses which fill the valley, the gate Shallecheth can hardly fail to be identical with the Beh Sileh, or Siadlah, which enters the west wall of the Haram area opposite the south end of the platform of the Dome of the Rock, about 650 feet from the southwestern corner of the Haram wall. For the bearing of this point on the topography of the Temple, see that article.

The signification of shallecheth is "falling or casting down." The LXX., however, appear to have read he'lech, the word which they usually render by παράκεφαλον. This would point to the "chambers" of the Temple.

G.

SHALUM (םָּלָם‎) [retribution]; Σελα- θάνα; Selim). I. The fifteenth king of Israel, son of Jabesh, conspired against Zecharias, son of Jerobam II, killed him, and brought the dynasty of Jeho to a close, n. c. 770, according to the prophecy in 2 K. c. Many MSS. have Σαλίσαμα or Σαλίσαμα (see Holmes and Parsons), the reading followed by Tischendorf in his text (1856). The reading of the Alex. is remarkable for its suppression of the presence of the ד in the Hebrew word, usually rendered in Greek by γ. d. Many MSS. have Σαλίσαμα or Σαλίσαμα (see Holmes and Parsons), the reading followed by Tischendorf in his text (1856). The reading of the Alex. is remarkable for its suppression of the presence of the ד in the Hebrew word, usually rendered in Greek by γ. d. Many MSS. have Σαλίσαμα or Σαλίσαμα (see Holmes and Parsons), the reading followed by Tischendorf in his text (1856). The reading of the Alex. is remarkably for its suppression of the presence of the ד in the Hebrew word, usually rendered in Greek by γ.
ages of Jehoiakim, Jehoahaz or Shallum, and Zedekiah, it is evident that of the two last Zedekiah must have been the younger, and therefore that Shallum was the third, not the fourth, son of Josiah, as stated in 1 Chr. iii. 15.

5. (Σαλμαί) Son of Shaul the son of Simon (1 Chr. iv. 25).

6. (Σαλμαί in Chr. Σαλομ) [Vat. Σαλομ] or (Vulg. Σαλομ] — A high-priest, son of Zobul and ancestor of Ezra (1 Chr. vii. 13; Ezr. vii. 2). Called also Salum (1 Esdr. viii. 13, and 1 Samh 2 Esdr. 1:1).

7. (Σαλμιών) [Vat. Σαλμιών] — A son of Naphtali (1 Chr. vii. 13). He and his brethren are called "sons of Billoah," but in the Vat. MS. of the LXX., Shallum and the rest are the sons of Naphtali, and Balam (not Billoah) is the son of Shallum. Called also Shillem.

8. (Σαλμαί) Alex. (Σαλλαμα) in 1 Chr. ix. 17; (Σαλλαμ) in Vat. (Σαλλαμ) in Ezr. ii. 42; (Σαλλαμ) in Neh. vii. 45.) — The chief of a family of porters or gatekeepers of the east gate of the Temple, for the camp of the sons of Levi. His descendants were among those who returned with Zerubbabel. In 1 Esdr. v. 28 he is called SALUM, and in Neh. xii. 25 MESHULLAM.

9. (Σαλμιών) [Vat. Σαλμιών] — Alex. Σαλλαμα. One of the porters of the Temple who had married a foreign wife (Ezr. x. 24).

10. (Σαλμαί) Father of Jehizkiah, one of the heads of the children of Ephraim (2 Chr. xxviii. 12).

11. (Σαλμιών) [Vat. Σαλμιών] — Alex. Σαλλαμα. One of the porters of the Temple who had married a foreign wife (Ezr. x. 24).

12. (Σαλμαί) [Vat. Σαλμαί] — Son of Bani, who put away his foreign wife at the command of Ezra (Ezr. x. 42).

13. (Σαλμαί) [Vat. Σαλμαί] — The son of Halohesh and ruler of a district of Jerusalem. With his daughters he assisted Nehemiah in rebuilding the wall of the city (Neh. iii. 12).

14. (Σαλμιών) [FA. Σαλμιών] — The uncle of Jeremias (Jer. xxiii. 7): perhaps the same as Shallum the husband of Huldah the prophetess. (JEREMIJA, vol. ii. p. 1254 a.)

15. (Σαλμιών) [FA. Σαλμιών] — Father or ancestor of Methania, "keeper of the threshold" of the Temple in the time of Jeremiah (Jer. xxxiv. 4): perhaps the same as 9.

SHALUM (Σαλμαί) [perh. restitution] — [Horn. Σαλομ] [Vat. Alex. FA. omit] — SHALUM. The son of Gehoshah, and ruler of a district of the Migdah. He assisted Nehemiah in repairing the spring gate, and "the wall of the pool of Haresheth" (A. V. "Sikkah") belonging to the king's garden, "even up to the stairs that go down from the city of David." (Neh. iii. 13).

SHALMAI [2 syn. (Σαλμιών) Keri; (Σαλμιών) Qeri]
SHALMAN

in Ezr. 3:13 in Neh. [my thanks]: Ἱλαμᾶς
Σαλμᾶς [Vat. Σαλμᾶς; Alex. Σαλμᾶς; Greek: Σαλμᾶς; Latin: Salam] is rephrased, as in the margin of Ezr. ii. 46; among the inhabitants of Samaria, in the time of the exile and later. The chronicler of Eusebius (p. 53) says, "Salaman" is an intermediate word between the names "Salman" and "Salmaneser." The former name is the Assyrian word for "savage;" the latter, Ἀσσάμι, "Astarte." The Chaldean transcriber seems to have caught only the first letters of the word "Ariel," while the Syrian only saw the last two. The Targum possibly regards "Shalman" as an appellative, "peaceable," following in this the traditional interpretation of the verse recorded by Isaiah, whose text is as follows: "As spoilers that come upon a people dwelling in peace, suddenly by means of an ambush, who have not been warned against them, to flee before them, and destroy all."  

SHALMANESER (Σαλμανησερ) [pers. name] (see Ges. xiii. 1): Ἱλαμανανησις [Vat. 2 K. xvii. 2; Alex. Ἱλαμανανησις; Greek: Σαλμανησας; Latin: Salmaneser] is Joseph. "Salmaneser" was the Assyrian king who reigned immediately before Sargon, and probably immediately after Tiglath-pileser. Very little is known of him, since Sargon, his successor, was of a different family, and most likely a rebel against his authority (Sargon), seems to have destroyed his monuments. He can scarcely have ascended the throne earlier than B.C. 739, and may possibly not have done so till a few years later. [TIGLATH PILESER.] It must have been soon after his accession that he led the forces of Assyria into Palestine, where Hosea, the last king of Israel, had revolted against his authority (2 K. xvii. 3). No sooner was he come than Hosea submitted, acknowledged himself a servant of the Great King, and consented to pay him a fixed tribute annually. Shalmaneser, upon this returned home; but soon afterwards he "found conspiracy in Hoshea," who had concluded an alliance with the King of Egypt, and withheld his tribute in consequence. In B.C. 725 Shalmaneser invaded Palestine for the second time, and, as Hoshea refused to submit, laid siege to Samaria. The siege lasted three years (B.C. 721), when the Assyrian army prevailed; Samaria fell; Hoshea was taken captive and shut up in prison, and the bulk of the Samaritans were transported from their own country to Upper Mesopotamia (2 K. xvii. 4-6, xviii. 9-11). It is uncertain whether Shalmaneser conducted the siege to its close, or whether he did not lose his crown to Sargon before the city was taken. Sargon claims the capture of his own exploit in his first year: and Scripture, it will be found, avoids saying that Shalmaneser took the place. Perhaps Shalmaneser died before Samaaria, or, perhaps, hearing of Sargon's revolt, he left his troops, or a part of them, to continue the siege, and returned to Assyria, where he was defeated and deposed (or murdered) by his enemy.  

According to Josephus, who proceeds to the Phenician history of Menander of Ephesus, Shalmaneser engaged in an important war with Phoenicia in defense of Cyprus (Ant. ix. 14, § 2). It is possible that he may have done so, though we have no other evidence of the fact; but it is perhaps more probable that Josephus, or Menander, made some confusion between him and Sargon, who certainly warred with Phoenicia, and set up a memorial in Cyprus (Ps. 88:22).  

G. R.  

SHAMAI 

hearing, obedient: Σαλαμαίου; Alex. Σαλαμαίος; Samaria. One of David's guards, son of Alex in Act. xvi. 44, and brother of Jehiel. Probably a Hethite (see 1 Chr. v. 8).  

SHAMARIAH (Σαμαρία) [from Jehovah protects] Σαμωρία [Vat. Alex. Σαμωρία; Samaria]. Son of Helcanna by Abihail the daughter of Jibri (2 Chr. xii. 19).  

* SHAMBLES. 1 Cor. x. 25 (μακαρίων) from the Latin macer in = μεθαρτάω as explained by Vitæcodo, flesh-market. Meat which had been offered in sacrifice to idols was often brought to such places for sale. Some of the first Christians doubted whether they could lawfully eat such meat. Paul decides that the scruple was unnecessary; but if any one entertained it he was bound by it, and even if one from it should forego his own liberty out of regard to the weak consciences of others. Shambles is from the Anglo-Saxon sound, scyndo, which means a bench or stool.  

SHAMED (Σαμαίω) [perh. watch, keeper] Σαμαίω [Vat. Σαμαίω; Comps. Σαμαίων] Samaria. Properly Shallum, one of the sons of Ezel of the Benjaminite, who built Ono and Loed, with the towns thereof (1 Chr. viii. 12). The A. V. has followed the Vulg., as in the case of Shelaia, and retains the reading of the Geneva Version. Thirteen of Kennicott's MSS. have Σαμαίω.  

* SHAMEFACELESSNESS is a current mistranslation or corruption in 1 Tim. ii. 9, for "Shamefastness," in the sense of being fast or established in modesty and decorum. The old English version (Wickliffe, Tyndale, Cranmer, Geneva) as well as the original ed. of 1611, have "shamefastness." The word is formed from shamefaced, like steadfastness from steadfast, restlessness from restless, etc. (See Trocht On the Authorized Version, p. 66.) The Greek word is αἰφνία, which the A. V. renders "reverence" in Heb. xii. 28.  

II. * SHAMEFASTNESS. [SHAMEFACELESSNESS].  

SHAMER (Σαμαίρ) [keeper, or less of wine?]. Σαμαίρ [Vat. Alex. Σαμαίρ; Somer] syria, came up against Samaria, and besieged it; and at the end of three years they took it."
SHAMGAR 2043

1. A Merarite Levite, ancestor of Ethan (1 Chr. vi. 46).
2. (Sheqerh; Alex. Σαμγαρ.) SHAMMER the son of Heber an Asherite (1 Chr. vii. 31). His four sons were mentioned by the LXX. W. A. W.

SHAMGAR (Σαμγαρ) [possibly, cap-lifter]: Σαμγαρ; [Vat. in Judg. iii. 31, Σαμαγαρ] SHAMGAR: of uncertain etymology; compare Samgar-noho. Son of Amath, judge of Israel after Ehud, and before Barak, though possibly contemporary with the latter, since he seems to be spoken of in Judg. v. 6 as a contemporary of Jael, if the reading is correct. It is not improbable from his patronymic that Shammur may have been of the tribe of Naphtali, since Beth-anath is in that tribe (Judg. i. 35). Ewald conjectures that he was of Dan—a view which Bertholet (On Judg. iii. 31) does not consider. And since the tribe of Naphtali bore a chief part in the war against Jabin and Sisera (Judg. iv. 6, 10, v. 18), we seem to have a point of contact between Shammur and Barak. Anyhow, in the days of Shammur, Israel was in a most depressed condition; the tributary Canaanites (Judg. i. 35), in league apparently with their independent kinsmen the Philistines, rose against their Israelite masters, and the country became so unsafe, that the highways were deserted, and Hebrew travellers were obliged to creep unobserved by cross-roads and by-ways. The open villages were deserted, the wells were inaccessible, and the people hid themselves in the mountains. Their arms were apparently taken from them by the same policy as was adopted later by the same people (Judg. iii. 31, v. 8; comp. with 1 Sam. xiii. 19-22), and the whole nation was cowed. At this juncture Shammur was raised up to be a deliverer. With no arms in his hand but an ox-goad (Judg. iii. 31; comp. 1 Sam. xiii. 21), he made a deadly assault upon the Philistines, and slew 600 of them; an act of valor by which he procured a temporary respite for his people, and struck terror into the hearts of the Canaanites and their Philistine allies. But it was reserved for Deborah and Barak to complete the deliverance; and whether Shammur lived to witness or participate in it we have no certain information. From the position of "the Philistines in 1 Sam. xii. 9, between "Maach" and "Hazor," the inference seems to be that of Shammur. Ewald observes with truth that the way in which Shammur is mentioned in Deborah's song indicates that his career was very recent. The resemblance to Samson, pointed out by him, does not seem to lead to anything. A. C. H.

* It may have been as leader and not by his own single hand that Shammur slew the 600 Philistines. The subjugated peoples of Canaan armed (comp. Judg. v. 8), he may have put himself at the head of a band of peasants armed with ox-goads, the only weapons left to them, and with such warriors may have achieved the victory. In common speech we ascribe to the leader what is done under his leadership. [Shechem.] One of Homer's heroes put to flight Phoibis and the Euboeans with his Jaukamag (Il. vi. 130). Mr. Porter describes (Kitto's Daily Bible Illustr. ii. 340) that he once saw a goad of the Druse ploughman, on the mountains of Bashan—of which the shaft was ten feet long and made of an oak sapling; the goad appeared to

be an old spear-head, very sharp and firmly fastened. The Druse remarked that it was for the Arabs as well as for the oxen." Thomson describes this formidable weapon in his Land and Book, i. 500. [See also OX-goAD.] W. A. W.

SHAMMOTH (Σαμωθ, [perh. desolation, woe]): Σαμωθ; [Vat. Σαμωθ] SHAMMOTH, the fifth captain for the fifth month in David's arrangement (1 Chr. xxvii. 8). His designation in 1 T. Togarmath, i. e. the Yirziah, is probably for "Gur, kuzarkei, the Zarbite, or descendant of Zerah the son of Judah. From a comparison of the lists in 1 Chr. xi., xxvii., it would seem that Shammoth is the same as SHAMMOTH the Harorite. W. A. W.

SHAMIR (Σαμιρ) [thorn-shedge]: [Hom. Σαμιρ; Vat.] Σαμιρ; Alex. in Josh. Σαμιρ, in Judg. Σαμιρις; Samir). The name of two places in the Holy Land.

1. A town in the mountain district of Judah (Josh. xxv. 48, only). It is the first in this division of the catalogue, and occurs in company with Jair, in the group containing Socin and Eshebmon. It therefore probably lay some eight or ten miles south of Hebron, in the neighborhood of the three places just named, all of which have been identified with tolerable certainty. But it has not itself been yet discovered.

2. A place in Mount Ephraim, the residence and burial-place of Tola the Judge (Judg. x. 1, 2). It is singular that this judge, a man of Issachar, should have taken up his official residence out of his own tribe. We may account for it by supposing that the plain of Esdrelon, which formed the greater part of the territory of Issachar, was barren, as it is to-day, of the Canaanites or other farmers, of whose innumerous nothing whatever is told us—though their existence is certain—driving Tola to the more secure mountains of Ephraim. Or, as Manasseh had certain cities out of Issachar allotted to him, so Issachar on the other hand may have possessed some towns in the mountains of Ephraim. Both these suppositions, however, are but conjecture, and have no corroborative in any statement of the records.

Shamir is not mentioned by the ancient topographers. Schwartz (p. 151) proposes to identify it with Simir, a place of great natural strength (which has some claims to be Bethulia), situated in the mountains, half-way between Samaria and Jenin, about eight miles from each. Van de Velde (M. A. p. 319) proposes Kibbitz Shimron, a ruined site in the mountains overlooking the Jordan valley, ten miles E. S. E. of Nablus. There is no connection between the names Shimir and Simira, as proposed in the Alex. LXX. (see above), beyond the accidental one which arises from the inaccurate form of the latter in that Version, and in our own, it being correctly Shimron. G.

SHAMIR (Σαμιρ) [thorn, pricked, Fork]: Keri, *Σαμιρ, Samir). A Kohathite, son of Micaah, or Micah, the firstborn of Uzziel (1 Chr. xxiv. 22).

SHAMMA (Σαμα, [desolation]): Σαμα; [Vat. Σαμα] SHAMMA: as in v. 7. Dr. Donel (Jalmar, pp. 271, 272) conjectures Σαμα, "and previous r"
SHAMMAH

SHAPHAN

"SHAMMAH" [按规定：SHAMMAI: One of the sons of Zophar, an Asirite (1 Chr. 37:7).]

1. The son of Rend the son of Esun, and one of the chieftains of his tribe (Gen. xxxvi. 15, 17; 1 Chr. 3:7).
2. (SHAMMAI: Alex. SHAMMAI in 1 Chr. 3:7; SAMMAI). The third son of Jesse, and brother of David (1 Sam. xii. 9, xvii. 13). Called also SHIMEA, SHIMEAH, and SHIMMAH. He was present when Samuel anointed David, and with his two elder brothers joined the Hebrew army in the valley of Elah to fight with the Philistines.
3. (SHAMMAI: Alex. SHAMMAI: Sammat). One of the three greatest of David's mighty men. He was with him during his outlaw life in the cave of Adullam, and signalized himself by defending a piece of ground full of leultes against the Philistines on one of their war-making incursions. This achievement gave him a place among the first three heroes, who on another occasion eat out their way through the Philistine garrison, and brought David water from the well of Bethlehem (2 Sam. xxiii. 11-17). The text of Chronicles at this part is clearly very fragmentary, and what is there attributed to Eleazar the son of Dodo properly belongs to Shammah. There is still, however, a discrepancy in the two narratives. The scene of Shammah's exploit is said in Samuel to be a field of lentiles [חָסִיל], and in 1 Chr. a field of barley [חַזִּיתם]. Kenicott proposes in both cases (1807) that the words being in Hebrew so similar that one is produced from the other by a very slight change and transposition of the letters (Desc. p. 141). It is more likely, too, that the Philistines should attack and the Isrealies defend a field of barley than a field of lentiles. In the Peshito-Syriac, instead of being called "the Harorite," he is said to be "from the king's mountain." (גָּשִׁית לָבוֹן), and the same is repeated at ver. 25. The Vat. MS. of the LXX. makes him the son of Asa (κατ Ασα Ἀρωμαχαίος, where Ἀρωμαχαίος was perhaps the original reading). Josephus (Ant. vii. 12, § 4) cites him as the son of Asa (ᾲςεὺς μετὰ τοῦ Κρισαονάυος βοσκῶν).
4. (SHAMMAI: Alex. SHAMMAI: Sammat). The Harorite, one of David's mighties (2 Sam. xxiii. 25). He is called "SHAMMOTH the Harorite" in 1 Chr. xii. 27, and in 1 Chr. xxvii. 8 "SHAMMOTH the Libnite." Kenicott maintained the true reading in both to be "Shammoth the Harorite." (Desc. p. 181).
5. (SHAMMAI: Alex. SHAMMAI: [and so Vat.; Compare Alex. SHAMMAI: Sammat]). In the list of David's mighty men in 2 Sam. xxiii. 32, 33, we find "Jonathan, Shammah the Harorite;" while in the corresponding verse of 1 Chr. xii. 31, it is "Jonathan, the son of Slate the Harorite." Combining the two, Kenicott proposes to read "Jonathan, the son of Slate, the Harorite." David's nephew, who slew the giant in Gath (2 Sam. xxii. 21). In stead of "the Harorite," the Peshito-Syriac has "of the mount of Olives" (_prov., prov., prov., prov., prov., prov., prov., prov., prov., prov., prov.), and in 2 Sam. xxiii. 33, and in 1 Chr. xiv. 34, "of Mount Carmel" (prov., prov., prov., prov., prov., prov., prov., prov., prov.), but the right of both these interpretations is obscure. W. A. W.
SHAPHAT 2045

Shaphan brings out some points with regard to the office of scribe which he held. He appears on an equality with the governor of the city and the royal record with whom he was sent by the king to Hilkiah to take an account of the money which had been collected by the Levites for the repair of the Temple and to pay the workmen (2 K. xxii. 4; 2 Chr. xxxiv. 9; comp. 2 K. xii. 10). Ewald calls him Minister of Finance (Gesch. iii. 657). It was on this occasion that Hilkiah communicated his discovery of a copy of the Law, which he had probably found while making preparations for the repair of the Temple. [Hilkiah, v. 13. 14. f.]

Shaphan was engaged to deliver it to the king. Whatever may have been the portion of the Pentateuch thus discovered, the manner of its discovery, and the conduct of the king upon hearing it read by Shaphan, prove that for many years it must have been lost and its contents forgotten. The part read was apparently from Deuteronomy, and when Shaphan ended, the king put him with the high-priest Hilkiah, and other men of high rank, to consult Hilkiah the prophetess. Her answer moved Josiah deeply, and the work which began with the restoration of the decayed fabric of the Temple, quickly took the form of a thorough reformation of religion and revival of the Levitical services, while all traces of idolatry were for a time swept away. Shaphan was then probably an old man, for his son Ahikam must have been in a position of importance, and his grandson Gedaliah was already born, as we may infer from the fact that thirty-five years afterwards he is made governor of the country by the Chaldeans, an office which would hardly be given to a very young man. Be this as it may, Shaphan disappears from the scene, and probably died before the fifth year of Jehoiakim, eighteen years later, when we find Elahiah was scribe (Jer. xxxvi. 12). There is just one point in the narrative of the burning of the roll of Jeremiah's prophecies by the order of the king, which seems to identify Shaphan the father of Ahikam with Shaphan the scribe. It is well known that Ahikam was Jeremiah's great friend and protector at court, and it was therefore consistent with this friendship of his brother for the prophet that Gemariah the son of Shaphan should warn Jeremiah and Baruch to hide themselves, and should intercede with the king for the preservation of the roll (Jer. xxxvi. 12, 19, 25). W. A. W.

SHAPHAT (ς-loading): [Saphar; Șaphar]. 1. The son of Hori, selected from the tribe of Simeon to spy out the land of Canaan (Num. xiii. 5).

2. [1 K. xiv. 16. 8aaphar; 2 K. iii. 11. șaphar; see Erorr in Mat.] The father of the prophet Elisha (1 K. xiv. 16, 19; 2 K. iii. 11, vi. 31).

3. (șapher: Alex. Szaphar.) One of the six sons of Shemaiyah in the royal line of Judah (1 Chr. iii. 22).

4. ă garamastu: [Comp. Șapanta].) One of the chieftains of the Gadites in Bashan (1 Chr. v. 12).

5. șapar: [Vat. Șapar].) The son of AII, who was over David's oxen in the valleys (1 Chr. xxvii. 29).

SHAPHER, MOUNT (ς-loading) [see below]: [Sapari: Alex. Șapară; Șaparăr; nom Șopher]. Num. xxiii. 23, 24. The name of a desert station where the Israelites encamped, of which no other mention occurs. The name probably means "mount of pleasantness," but no site has been suggested for it.

H. H.

SHARAII [2 syl.] (ς-loading [beginning, or reference]): [Szparai: Alex. Apəai]: A. G. Apa'iai. One of the sons of Bani who put away his foreign wife at the command of Ezra (Ezra x. 40). He is called Ezral in 1 Esdr. ix. 34.

SHARATM (ς-loading), i. e. Sharaum [two gattas]: [Rom. Szarapis; Vat.] Zamaeis: Alex. Ἀλκάτα: Ἴλα: Ἁλφίαν. An imperfect version (Josh. xx. 36 only) of the name which is elsewhere more accurately given SHABAHAM. The discrepancy does not exist in the original, and doubtless arose in the A. V. from adherence to the Vulgate.

G.

SHARAII (ς-loading), with the def. article [the place]: ă Szapor; ă ἡμοίον: ἡ πανίων: Scaron, camposvrra, campos. A district of the Holy Land occasionally referred to in the Bible (1 Chr. v. 16; xxvii. 29; 1 K. xxxii. 9; xxxvi. 2; Jer. xiv. 10; Cant. ii. 1; Acts iv. 35, A. V. SARON). The name has on each occurrence, with one exception only, the definite article — hay-Sharon — as is the case also with other districts — the Arabah, the Shefelah, the Cesar; and on that single occasion (1 Chr. v. 16), it is obvious that a different spot must be intended to that referred to in the other passages. This will be noticed further on. It would therefore appear that "the Sharon" was some well-defined region familiar to the Israelites, though its omission in the formal topographical documents of the nation shows that it was not a recognized division of the country, as the Shefelah for example. [SEPIELA.] From the passages above it must be inferred that the Hebrew def. article is worthy of remark that a more decided trace of the def. article appears in Acts ix. 35, where some MSS. have αὐτοπαρα. ă The place of Joshua xii. 18, which some scholars are disposed to be Sharon with a preposition prefixed appears to the writer more properly correctly given on the A. V. LAMARON.]
ized we gather that it was a place of pasture for cattle, where the royal herbs of David groved (1 Chr xxvii. 29); the beauty of which was as generally recognized as that of Carmel itself (Is. xxxv. 2); and the dedication of which would be indeed a calamity (xxxiii. 9), and its reestablishment a symbol of the highest prosperity (lv. 10). The rose of Sharon (possibly the tall, graceful, and striking squill) was a simile for all that a lover would express (Cant. ii. 1). [Rose,\[w] Anmer. ed.] Add to these slight traits the indications contained in the renderings of the LXX. τα πεδινα, the plain, and 

Δαμωνις, "the garden," and 

Δαμωνις, "the wood," and we have exhausted all that we can gather from the Bible of the characteristics of Sharon.

The only guide to its locality furnished by Scripture is its mention with Lydda in Acts ix. 35. There is, however, no doubt of the identification of Sharon. It is that broad rich tract of land which lies between the mountains of the central part of the Holy Land and the Mediterranean—the northern continuation of the Shephelah. Josephus but rarely alludes to it, and then only obliquely, and it is impossible to pronounce with certainty, from his words alone, that he does refer to it. He employs the same term as the LXX., "woodland." 

Δαμωνις το \[w]\(\chi\)εων καλε\[w]\(\iota\)θε\[w]\(\iota\)ν, says he (Ant. xiv. 13, § 2; and comp. B. J. i. 13, § 2), but beyond its connection with Carmel there is no clue to be gained from either passage. The same may be said of Strabo (xxvi. 28), who applies the same name, and at the same time mentions Carmel.

Sharon is derived by Gesenius (Thea. p. 642) from 

τεχναί, to be straight or even—the root also of 

Μηλοβ, the name of a district east of Jordan. The application to it, however, by the LXX., by Josephus, and by Strabo, of the name δαμωνις or 

Δαμωνις, "woodland," is singular. It does not seem certain that that term implies the existence of wood on the plain of Sharon. Rendel has pointed out (Pet. p. 190) that the Saronicus Simus, or Bay of Sharon, in Greece, was so called (Pliny, H. N. iv. 5) because of its woods. σαρωνις, meaning an oak, is then. It is impossible that δαμωνις was used as an equivalent of the name Sharon, and was not intended to denote the presence of oaks or woods on the spot. Why it not be a token that the original meaning of Sharon, or Sharon, is not that which its received Hebrew root would imply, and that it has perished except in this one instance? The Alexandrine Jews who translated the LXX. are not likely to have known much either of the Saronic guild, or of its connection with a rare Greek word. Eusebius and Jerome (Onomast.; \"Saron\", under the name of Sarum, specifies it as the region stretching from Caesarea to Joppa. And this is corroborated by Jerome in his comments on the three passages in Isaiah, in one of which (on lv. 10) he appears to extend it as far south as Jaffa. There are occasional allusions to wood in the description of the events which occurred in this district in later times. Thus, in the Chronicles of the Crusades, the "Forest of Sharon" was the scene of one of the most romantic of adventures of Richard Michael, Hist. viii. 5. the "forest of Assur" (i.e. Arvah) is mentioned by Vincent (iv. 16). To the S. E. of Kefarpass there is still a "series of (natural) dwarfs pines and entangled mazes." (Thomson, Land and Book, ch. 33). The orchards and palm groves round Rosh, Lydda, and Ronel, and the dense thickets of aln in the neighborhood of the last— as well as the almond plantations in the Valley of the Ajibeh, a few miles from Jaffa, - an industry happily increasing every day—show how easily wood might be maintained by care and cultivation (see Stanley, S. of P. p. 260 note).

A general sketch of the district is given under the head of Palestine (p. 220 f.). Jerome (Comment. on xxvi. 2) characterizes it in words which admirably portray its aspects even at the present: "Omnis ignitum cauder (the white sandhills of the coast), culus Bei (the wide crops of the finest corn), et circumciusiones scientia (the well trimmed plantations) et loca ultimaria et campes- tria (the long, gentle swells of rich red and black earth) quae suppellexur Sharon."
from Jerusalem. But neither the spot nor the structure of the so-called "Absalom's tomb" agree either with this description, or with the terms of 2 Sam. xviii. 18. The "Valley of the King" was an Edom, that is, a broad, open valley, having few or no features in common with the deep, rugged ravine of the Kedron. [VALLEY.] The pillar of Absalom— which went by the name of "Absalom's hand" — was set up, erected (‴), according to Josephus in marble— while the lower existing part of the monument (which above has any pretension to great antiquity) is a monolith not erected, but excavated out of the ordinary limestone of the hill, and almost exactly similar to the so-called "tomb of Zechariah," the second from it on the south. And even this cannot claim any very great age since its base capitals and the ornaments of the frieze speak with flattering voice of Roman art. Shaveh occurs also in conjunction with another ancient word in the name

SHAWEH KIRIATHAIM (‴) [plain of the double city]: שַּׁוֶּהְ קִרְיָתָיִם (SHAVEH KIRIAITHAIM) mentioned in the same early document (Gen. xiv. 3) as the residence of the Egyptians for two or three times of Chedorlaomer's inv. Kiriathaim is named in the later history, and, though it has not been identified, is known to have been a town on the coast of the Jordan; and Shaveh Kiriathaim, which was also in the same region, was (if Shaveh mean "valley") probably the valley in or by which the town lay.

G.

SHAW [Sârî] [knight of Jehovah]: שָׁוָה (SHAW) [Sam. iv. 8]. The royal secretary in the reign of David (1 Chr. xviii. 16). He is apparently the same with SHERIAH (2 Sam. viii. 17), who is called SHAVEH by Josephus (Ant. vii. 5, § 4). Jerusalem is ident. with JERUSALEM the capital of the LXX. [Sârî in the Canaan. ed., but SHERIAH in the Vat. MS. (MAI). — A.] SHAMSH is the reading of two MSS. and of the Targum in 1 Chr. xviii. 16. In 2 Sam. xx. 25 he is called STEVAH, and in 1 K. iv. 3, SHISHA.

SHAWM. In the Prayer-book version of Ps. viii. 6, "with trumpets also and with shawms" is the rendering of what stands in the A. V. "with trumpets and sound of cornets." The Hebrew word translated "cornet" will be found treated under that head. The "shawm" was a musical instrument resembling the clarionet. The word occurs in the forms shloha, shlohae, and is connected with the Germ. schalmeie, a reed-pipe. "With shawms and trumpets and with clarions sweet." SPENCER. P. q. l. 12, § 12.

Even from the shrillest shawm unto the canonate.

BRATTON. Fellows, iv. 36th.

From Jerusalem. But neither the spot nor the structure of the so-called "Absalom's tomb" agree either with this description, or with the terms of 2 Sam. xviii. 18. The "Valley of the King" was an Edom, that is, a broad, open valley, having few or no features in common with the deep, rugged ravine of the Kedron. [VALLEY.] The pillar of Absalom— which went by the name of "Absalom's hand" — was set up, erected (‴), according to Josephus in marble— while the lower existing part of the monument (which above has any pretension to great antiquity) is a monolith not erected, but excavated out of the ordinary limestone of the hill, and almost exactly similar to the so-called "tomb of Zechariah," the second from it on the south. And even this cannot claim any very great age since its base capitals and the ornaments of the frieze speak with flattering voice of Roman art. Shaveh occurs also in conjunction with another ancient word in the name

SHAWEH KIRIATHAIM (‴) [plain of the double city]: שַּׁוֶּהְ קִרְיָתָיִם (SHAVEH KIRIAITHAIM) mentioned in the same early document (Gen. xiv. 3) as the residence of the Egyptians for two or three times of Chedorlaomer's inv. Kiriathaim is named in the later history, and, though it has not been identified, is known to have been a town on the coast of the Jordan; and Shaveh Kiriathaim, which was also in the same region, was (if Shaveh mean "valley") probably the valley in or by which the town lay.

G.

SHAW [Sârî] [knight of Jehovah]: שָׁוָה (SHAW) [Sam. iv. 8]. The royal secretary in the reign of David (1 Chr. xviii. 16). He is apparently the same with SHERIAH (2 Sam. viii. 17), who is called SHAVEH by Josephus (Ant. vii. 5, § 4). Jerusalem is ident. with JERUSALEM the capital of the LXX. [Sârî in the Canaan. ed., but SHERIAH in the Vat. MS. (MAI). — A.] SHAMSH is the reading of two MSS. and of the Targum in 1 Chr. xviii. 16. In 2 Sam. xx. 25 he is called STEVAH, and in 1 K. iv. 3, SHISHA.

SHAWM. In the Prayer-book version of Ps. viii. 6, "with trumpets also and with shawms" is the rendering of what stands in the A. V. "with trumpets and sound of cornets." The Hebrew word translated "cornet" will be found treated under that head. The "shawm" was a musical instrument resembling the clarionet. The word occurs in the forms shloha, shlohae, and is connected with the Germ. schalmeie, a reed-pipe. "With shawms and trumpets and with clarions sweet." SPENCER. P. q. l. 12, § 12.

Even from the shrillest shawm unto the canonate.

BRATTON. Fellows, iv. 36th.
Mr. Chapple says (Pop. Max. i. 35, note b), "The modern clarinet is an improvement upon the shawm, which was played with a reed like the kantele, or hautboy, but being a brass instrument, with about the compass of an octave, had probably more the tone of a bassoon." In the same note he quotes one of the "proverbs" written about the time of Henry VII on the walls of the Manor House at Leighfield, near Beverley, Yorkshire:—

"A shawke maketh a sweete sound, for he tauthe the house:
It mounteth not to hye, but keight rule and space.
Yet if it be blowne with to vehement a wynde,
It maketh it myrgerowe out of his kinde."

From a passage quoted by Nares (Glossary) it appears that the shawm had a mournful sound:—

"He—
That never wants a Gilead full of balm
For his elect, shall turn thy woful shanah
Into the merry pipe."—

G. Tooke, Hist. p. 18.

W. A. W.

* SHEAF. [*PASSEVER, vol. iii. p. 2546.]*

SHEAF. [The Yiddish name is: Sandor. One of the sons of Saul who had married a foreign wife (Ex. x. 29). In 1 Esdr. ix. 30 he is called Jassuel.

SHEALTHIEL. [SHEALCHEIL, but three times in Haggai. [whom I asked of God]: Sultiel. Father of Zerubbabel, the leader of the Return from Captivity (Ex. iii. 2, 8, v. 2; Neh. xii. 1: Hag. i. 12, 14, ii. 23). The name occurs also in the original of 1 Chr. iii. 17, though there rendered in the A. V. SALTIEL. That is its equivalent in the books of the Apocrypha and the N. T.; and under that head the curious questions connected with his person are examined.

SHEARIAH. [whom Jehovah estimated]: Soria. [Vat. Sin.] Alex. Spa in 1 Chr. ix. 44: Sorien. One of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44).

SHEARING-HOUSE. THE SHEARING-HOUSE. [whom Jehovah favoured]: Barcaras. The place on the road between Jezebel and Samaria, at which Jehu, on his way to the latter, encountered forty-two members of the royal family of Judah, whom he slaughtered at the well or pit attached to the place (2 K. x. 12, 14). The translators of our version have given in the margin the literal meaning of the name—"house of binding of the shepherds," and in the text an interpretation perhaps derived from Jos. Kimchi. Binding, however, is but a subordinate part of the operation of shearing, and the word akoni is not anywhere used in the Bible in connection therewith. The interpretation of the Targum and Arabic version, adopted by Rashii, namely, "house of the meeting of shepherds," is accepted by Simonis (Towm. p. 198) and Gesenius (Thes. p. 151). Other renderings are given by Aquila and Symmachus. None of them, however, seem satisfactory, and it is probable that the original meaning has escaped. By the LXX., Eusebius, and Jerome, it is treated as a proper name, as they also treat the "garden-house" of ix. 27. Eusebius (Theol.) mentions it as a village of Samaria "in the great plain [of Esdraelon] 15 miles from Lædon." It is remarkable, that at a distance of precisely 15 Roman miles from Lyfmon the name of Beth-lem appears (Thes. van de Velde's name does also Rob., Edb. Res. ii. 316); but this place, though coincident in point of distance, is not on the plain, nor can it either belong to Samaria, or he be on the road from Jezereth thither. Being behind (south of) Mount Gilboa. The slaughter at the well recalls the massacre of the pilgrims by Ishmael ben-Nethanshal at Mizpah, and the recent tragedy at Canaan.

G.

SHEAR-JASHUB. [whom Jehovah shall return]: a k̄at̄aλ̄wahôlî: qui redederit est Jacobis. The son of Ishah the prophet, who accompanied him when he went to meet Ahaz in the casemate of the fuller's field (Is. vii. 3). The name, like that of the prophet's other sons, Maher-shalal-hash-baz, had a mystical significance, and appears to have been given with mixed feelings of sorrow and hope—sorrow for the captivity of the people, and hope that in the end a remnant should return to the land of their fathers (comp. Is. x. 29—32).

SHEBA. [seven, or cattle]: Zabri. [Alex. 2 Sam. xx. 1, 7, Abseer. Joseph. Zabatos. Sheba]. The son of Bichri, a Benjamite from the mountains of Ephraim (2 Sam. xx. 1—22), the last chief of the Absalom insurrection. He is described as a "man of Belial," which seems [comp. Shimee] to have been the usual term of invective cast to and fro between the two parties. But he must have been a person of some consequence, from the immense effect produced by his appearance. It was in fact all but an anticipation of the revolt of Jeroboam. It was not, as in the case of Absalom, a mere conflict between two factions in the court of Judah, but a struggle, arising out of that conflict, on the part of the tribe of Benjamin to recover its lost ascendancy: a struggle of which some indications had been already manifested in the excessive bitterness of the Benjamite Shechem. The occasion seized by Sheba was the calamity, as if from his own will, between the northern and southern tribes on David (2 Sam. xx. 1—22). Through the ancient custom, he summoned all the tribes to their tents; and then, and afterwards, Judah alone remained faithful to the house of David (2 Sam. xx. 1, 2). The king might well say, "Sheba the son of Bichri shall do us more harm than did Absalom." (1 Sam. 45). What he feared was Sheba's occupation of the fortified cities. This fear was justified by the result. Sheba, having seized the whole of Palestine, and by raising the population, Judah following him in full pursuit, and so deeply impressed with the gravity of the occasion, that the murder even of the great Amasa was but a passing incident in the campaign. He stayed but for the moment of the deed, and "pursued after Sheba the son of Bichri." The mass of the army halted for an instant by the bloody course, and then they also went off after Judah to pursue after Sheba the son of Eben-Ithri. It seems to have been his intention to establish himself in the fortress of Abel-Beth-macah, in the northmost extremity of Palestine, possibly allied to the cause of Absalom through his mother Maacah, and famous for the prudence of its inhabitants (d)
SHEBA

Sam. xx 13). That prerogative was put to the test on the present occasion. Joshu's terms were — the head of the insurgent chief. A woman of the place undertook the mission to her city, and proposed the execution to her fellow-citizens. The head of Sheba was thrown over the wall, and the insurrection ended.

2. (2Sa 14:1; 1Ki 10:2; 2Ch 9:2; 1Sa 25:19; 1Sa 27:3). A Gadite, one of the chiefs of his tribe which dwelt in Hadran (1 Chr. v. 13).

A. P. S.

SHEBA (םֶבַשְיָא) [see below]. The name of three fathers of tribes in the early genealogies of Genesis, often referred to in the sacred books. They are:

1. Zabdi: [Yat. in 1 Chr. 2:25; 1 Chr. i. 22]; the tenth in order of his sons.

2. (2Sa 14:1; 1Ki 18:30; 2Ch 9:2). A son of Joktan, son of Cush (Gen. x. 7; 1 Chr. i. 9).

3. (2Sa 14:1; 1Ki 18:30; 2Ch 9:2). A son of Jokshan, son of Keturah (Gen. xxv. 3; 1 Chr. i. 22).

We shall consider, first, the history of the Joktanite Sheba; and, secondly, the Cushite Sheba and the Keturitame Sheba together.

1. It has been shown, in Arabia and other articles, that the Joktanites were among the early colonists of southern Arabia, and that the kingdom which they there founded was, for many centuries, called the kingdom of Sheba, after one of the sons of Joktan. They appear to have been preceded by an aboriginal race, which the Arabian historians describe as a people of gigantic stature, who cultivated the land and delighted the valleys of the desert, living with the Jews in the "deserted quarter," or, like the tribe of Thamood, dwelling in caves. This people correspond, in their traditions, to the aboriginal races of whom remains are found wherever a civilized nation has supplanted and dispossessed the ruder race. But besides these extinct tribes, there are the evidences of Cushite settlers, who appear to have passed along the south coast from west to east, and who probably preceded the Joktanites, and mixed with them when they arrived in the country.

Sheba seems to have been the name of the great south Arabian kingdom and the peoples which composed it, until that of Hiymer took its place in later times. On this point much obscurity remains; but the Sasanians are mentioned by Dios. Sic., who refers to the historical books of the kings of Egypt in the Alexandrian Library, and by Haratoshene, as well as Arzimbourus, or Agatharchides (iii. 38, 46), who is Strabo's chief authority; and the Homerite or Himyarites are first mentioned by Strabo, in the expedition of Elius Gallus (b. c. 24). Nowhere earlier, in sacred or profane records, are the latter people mentioned, except by the Arabian historians themselves, who place Hijmer very high in their list, and ascribe importance to his family from that early date. We have endeavored, in other articles, to show reasons for supposing that in this very name of Hijmer we have the Red Man, and the origin of Lytherus, Erythrean Sea, Phcenicians, etc. [See ARABIA: RED SEA.]

The apparent difficulties of the case are reconciled by supposing, as M. Causin de Perceval (Erez. i. 54, 55) has done, that the kingdom and its people received the name of Sheba (Arsbo. Sela), but that its chief and sometimes reigning family or tribe was that of Hijmer: and that an old name was thus preserved until the foundation of the modern kingdom of Hijmer or the Tabbaxa, which M. Causin is inclined to place (but there is much uncertainty about this date) about a century before our era, when the two great rival families of Hijmer and Kahlam, together with smaller tribes, were united under the former. In support of the view that the name of Sheba applied to the kingdom and its people as a generic or national name, we find in the Kûранs "the name of Sela comprises the tribes of the Yemen in common:" (s. r. Sela); and this was written: long after the later kingdom of Hijmer had flourished and fallen. And further, as Hijmer meant the "Red Man," so probably did Sela. In Arabic, the verb sah, ܣܥ, said of the sun, or of a journey, or of a fever, means "it altered" a man, i.e., by turning him red: the noun sah, as well as sah, and wahasa, signifies "wine" ('Fiy el-Aws r.)

The Arabian wine was red; for we read: "A king of wine, because there is in it blackness and redness" (Sihab MS.). It appears, then, that in Sela we very possibly have the oldest name of the Red Man, whence came qära', Hijmer, and Erythraus.

We have assumed the identity of the Arabia Sheba, with Sheba (םֶבַשְיָא). The pl. form מַבָּשְיָא corresponds with the Greek Σαβαία and the Latin Sabaei. Gesenius compares the Heb. with Ethiopic שֶבָא "man." The Hebrew shēb is, in by far the greater number of instances, sin in Arabic (see Gesenius); and the historical, ethnological, and geographical circumstances of the case, all require the identification.

In the Bible, the Joktanite Sheba, mentioned genealogically in Gen. x. 28, reappears, as a kingdom, in the account of the visit of the queen of Sheba to king Solomon, when she heard of his fame concerning the name of the Lord, and came to prove him with hard questions (1 K. x. 1); and she came to Jerusalem with a very great train, with camels that bare spices, and very much gold, and precious stones" (ver. 2). And, again, "she gave the king an hundred and twenty talents of gold, and of spices very great store, and precious stones: there came no more such abundance of spices as these which the queen of Sheba gave to king Solomon" (ver. 16). She was attracted by the fame of Solomon's wisdom, which she had heard in her own land; but the dedication of the Temple had recently been solemnized, and, no doubt, the people of Arabia were desirous to see this famous house. That the queen was of Sheba in Arabia, and not of Sela the Cushite kingdom of Ethiopia, is unquestionable: Josephus and some of the Rabbinical writers a perversely, as usual, refer her to the latter; and the Ethipion (or Abyssinian) Church has a convenient tradition to the same effect (comp. Joseph, Ant. viii. 6, § 5; Liodolf, Hist. Ethiiop. ii. 3; Harris's Abyssinia, ii. 105). The Arabs call her Bilkees (or Yelkamah or Balkamah: Ibn Khaldoun), a queen of the later Himyarites, who, if M. Causin's

a Aben-Ezra (on Dan. xi. 6), however, remarks that the queen of Sheba came from the Yemen, for she spoke an Ishmaelite (or rather a Sheimitic) language.
chronological adjustments of the early history of the Yemen be correct, reigned in the first century of our era (Essai, i. 75, &c.); and an ancient Parliament at Ma-rrib (Maria) still bears its name, while M. Fresnel read the name of "Almucet" or "Bal-\(\text{\textasciitilde}u\)\(\text{\textasciitilde}\)mucet" in many of the Hasmite inscriptions. The Arab story of this queen is, in the present state of our knowledge, altogether unhistorical and unworthy of credit; but the attempt to make her Solomon's queen of Sheba probably arose (as M. Chastel conjectures) from the latter being mentioned in the Koran without any name, and the commentators adopting Bilbec as the most ancient queen of Sheba in the lists of the Yemen. The Koran, as usual, contains a very poor version of the Biblical narrative, diluted with nonsense and encumbered with fables (ch. xxvii. ver. 24, &c.).

The other passages in the Bible which seem to refer to the Joktanite Sheba are in Is. ix. 6, where we read, "all they from Sheba shall come: they shall bring gold and incense," in conjunction with Midian, Ednah, Kedar, and Nahslah. Here reference is made to the commerce that took the read from Sheba along the western continent of Arabia (unless, as is possible, the Cushite or Kebunite Sheba be meant); and again in Jer. vi. 29, it is written, "To what purpose cometh there unto Aino, and unto the city of the plain, from a far country?" (but compare Ez. xxvii. 22, 23, and see below). On the other hand, in Ps. lxxii. 10, the Joktanite Sheba is undoubtedly meant: for the kingdoms of Sheba and Sela are named together, and in ver. 15 the gold of Sheba is mentioned.

The kingdom of Sheba embraced the greater part of the Yemen, or Arabia Felix. Its chief cities, and probably successive capitals, were Sabh, Sana' (Uzal), and Zafar (Stephan). Sabh was probably the name of the city, and generally of the country and nation: but the statements of the Arabian writers are conflicting on this point, and they are not made clearer by the accounts of the classical geographers. Ma-rib was another name of the city, or of the fortress or royal palace in it: "Saba is a city known by the name of Ma-rrib, three nights' journey from Sana" (Ez-Zejjij, in the Tadjjel' Aziz Mem.). Again, "Saba was the city of Ma-rrib (Mashbovakh, s. v.), or the country in the Yemen, of which the city was Ma-rrib" (Mervide, in loc.). Near Sabh was the famous Dyke of El-Arin, said by tradition to have been built by Lukanus the Adate, to store water for the inhabitants of the place, and to avert the descent of the mountain torrents. The catastrophe of the rupture of this dyke is an important point in Arab history, and marks the dispersion in the 21st century of the Joktanite tribes. This, like all we know of Saba, points irresistibly to the great importance of the city as the ancient centre of Joktanite power. Although Uzal (which is said to be the existing Sana) has been supposed to be of earlier foundation, and Zafar (Stephan) was a royal residence, we cannot doubt that Saba was the most important of these chief towns of the Yemen. Its value in the eyes of the old dynasties is shown by their struggles to obtain and hold it; and it is narrated that it passed several times into the hands alternately of the so-called Hasmite peoples and the people we know as the Bani-Hajir (Hajirs, Athervi, Artémidos, Strabo, and Pliny, speak of Merovide; Bödorius, Agatharchides, Steph. Byzant., of Soba, ica, (Steph. Byzant.); ica (Agath.). Ital. (vi. 7, §§ 30, 42; and Phm. vi. 23, § 34) mention. Gb). But the former all say that Maribba was the city called the Saba; and we may conclude that both names applied to the same place, one place, on the one hand, the other its palace or fortress (though probably these writers were not aware of this fact): unless indeed the form Sobata (with the variants Saba, Soba, Solatale, etc.) of Pliny (H. X. vi. 28, § 32), have reference to Shabiam, capital of Hadramawt, and the name of also another celebrated city in the Arabian meres (Merovide, s. v.) gives curious accounts. The classes are generally agreed in ascribing to the Sabait the chief riches, the best territory, and the greatest numbers of the four principal peoples of the Arabs which they name: the Sabait, Annamite (= Hadramawt), Ka-taluni (= Kathleen = Joktan), and Minael (for which see Uliitali). See Bescher (Philos. xxvii.), and Mueller's Voy. Min. p. 186 ff.

The history of the Sabaens has been examined by M. Cauvin de Perceval (Essai sur l'Hist. des Arabes), but much remains to be adjusted before its details can be received as trustworthy, the earliest safe chronological point being about the cent. B.C. An examination of the existing remains of Sabait and Hasmite cities and buildings will, it cannot be doubted, add much to our knowledge of the country and the acquaintance with the language, from inscriptions, aided, as M. Fresnel believes, by an existing dialect, will probably give us some safe grounds for placing the building, or era, of the dyke. In the art. ARABIA (vol. i. p. 142 b), it is stated that there are dutes on the ruins of the dyke, and the conclusion which De Sacy and Cauvin have drawn from these dates and other indications respecting the date of the rupture of the dyke, which forms then an important point in Arabian history; but it must be placed in the 21st century of our era, and the older era of the building is altogether unfixed, or indeed any date before the expedition of Elies Gallas. The ancient buildings are of massive masonry, and evidently of Cushite workmanship, or origin. Later temples, and palace-temples, of which the Arabs give us descriptions, were probably of less massive character; but Sabaean art is an almost unknown and interesting subject of inquiry. The religion celebrated in these temples was cosmic: but this subject is too obscure and too little known to admit of discussion in this place. It may be necessary to observe that whatever connection there was in religion between the Sabaens and the Sabaitians, there was none in name or in race. Respecting the latter, the reader may consult Chav lion's Sabaité, a work that may be recommended with more confidence than the same author's Relation des Agricultures. [See MERIT.] Some curious papers have also appeared in the Journal of the German Oriental Society of Leipzig, by Dr. Oslander. [ARABIA, i. 142, note c. Amer. ed.]

II. Sheba: son of Ramah son of Cush, settled somewhere on the shores of the Persian Gulf. In the Merovide (s. v.) the writer has found an identification which appears to be satisfactory — that on the island of Awal (one of the Bahreyin Islands) are the ruins of an ancient city called Sala: Viewed in connection with RAMAH, and the other facts bearing on the traceless traces of his settlements, it is found on or near the shores of the gulf. It was this Sheba that carried on the great Indian traffic with Palestine, in co
SEHBAH (ןַבָּה) [Gen. xxi. 33], i.e. Shibeah [Gen. vii. on oath]; Sheshah (Shibehah).

SEBANIAH (賽班尼亞) [whom Jehovah built up]; in Neh. ix. 33; Ezra. [Gen. xxxv. 19, 31; Neh. x. 33; Ezra. [Gen. xxiv. 3; Neh. x. 33; Ezra. [Gen. xxiv. 3; Neh. x. 33; Ezra. [Gen. xxiv. 3, 14].

A Levite in the time of Ezra, one of those who stood upon the steps of the Levites and sang the psalm of thanksgiving and confession which is one of the last efforts of Hebrew psalmody (Neh. iv. 4, 5). He sealed the covenant with Nehemiah (Neh. x. 14). In the 11th of Neh. x. 4 he is made the son of Shebariah.

SEBASTIUS: (Sebastian) [Souter]. Another Levite who sealed the covenant with Nehemiah (Neh. x. 12).

SEBULIM (賽佛利) with the def article [breaches, rains: א"ל; Sabariim].

A place named in Josh. vii. 5 only, as one of the points in the flight from Ai. The root of the word has the force of "dividing" or "breaking," and it is therefore suggested that the name was attached to a spot where there were fissures or rents in the soil, gradually deepening till they ended in a sheer descent or precipice to the ravine by which the Israelites had come from Gilgal — "the going down" (מַמַּמָּה); see verse 5 and the margin of the A. V.).

The ground around the site of Ai, on any hypothesis of its locality, was very much of this character. No trace of the name has, however, been yet remarked.

SHEBER

Sichem, He

SHEBA (םשה) [becheg, rain]: 2:6

Alex. 2:6 (Scher): Saber. Son of Caleb ben-Hebron by his concubine Mahlah (1 Chr. vii. 48).

SHEBAH (םשב) [becheg, rain]: 2:6

[2-k. Rom. 2:6, 2:6 var.]: A person of high position in Hezekiah's court, holding at one time the office of prefect of the palace (Is. xxi. 15), but subsequently the subordinate office of secretary (Is. xxxvi. 3; 2 K. xvii. 37, xiv. 2). This change appears to have been effected by Isaiah's interposition; for Sheba had incurred the prophet's extreme displeasure, partly on account of his pride (Is. xxii. 13), Sheba : 2:6 (Shalem); and the etymology (as implied in the title of 'father' bestowed on his successor, ver. 21), and partly (as from his successor being termed a 'servant of Jehovah,' ver. 20), on account of his belonging to the political party which was opposed to the theocracy, and in favor of the Egyptian alliance. From the omission of the usual notice of his father's name, it has been conjectured that he was a mere bond. W. l. B.

SHEBED (םשבד) [shepherd of God]: 9

1. (2:6:9 [1 Chr. xvi. 24, Vat. 192A]: Sabed, Sabedel). A descendant of Gershom (1 Chr. xxii. 16, xxiv. 21), who was ruler of the treasures of the house of God; called also Shirabad (1 Chr. xxiv. 20). The Targum of 1 Chr. xxiv. 24 has a strange piece of exegesis: 'And Shebed, that is, Jonathan the son of Gershom the son of Moses, returned to the fear of Jehovah, and when David saw that he was skillful in money matters he appointed him chief over the treasurers.' He is the last descendant of Moses of whom there is any trace.

2. (2:6:9 [1 Chr. xxx. 4]): One of the fourteen sons of Humam the minstrel (1 Chr. xxiv. 4); called also Shurabad (1 Chr. xxiv. 20), which was the reading of the LXX. and Vulgate. He was chief of the thirteenth band of twelve in the Temple choir.

SHECANTAH (םשקנה) [family with Jehovah]: 2:6

1. The tenth in order of the priests who were appointed by lot in the reign of David (1 Chr. xiv. 11).

2. (2:6:9 [Scophon]: Shechenah). A priest in the reign of Hezekiah, one of those in the cities of the priests to distribute to their brethren their daily portion for their service (2 Chr. xxxv. 19).

SHECRANAH (םשקנה) [see above]: 2:6

1. A descendant of Zerubbabel of the line royal of Judah (1 Chr. iii. 21, 22).

2. (2:6:9 [Vat. omits.]: Shekunin). Some descendants of Shecheniah appear to have returned with Ezra (Ezr. viii. 3). He is called Shechinnah in 1 Esdr. viii. 20.

3. (2:6:9 [Vat. omits.]): The sons of Shechaniah were another family who returned with Ezra, three hundred strong, with the son of Jaziel at their head (Ezr. viii. 5). In this verse some name appears to have been omitted. The LXX.

SHECHEM (םשק) [shoul shoulders, ridge, like doron in Latin]: 2:6

1. A tax gatherer in a region of the Transjordan (1 Chr. xxi. 25, and 2:6:9 [Sichima, Sichem]), as in Josh. xxxiv. 20, the form used by Josephus and Eusebius, with other variations (as 2:6:9 [Sichem, Sichin, (both sing. and pl.)]). There may be some doubt respecting the origin of the name. It has been made a question whether the place was so called from Shechem the son of Hamor, head of their tribe in the time of Jacob (Gen. xxxiii. 18 ff.), or whether he received his name from the city. The import of the name is, in any case, the same as that assumed, since the position of the place on the "saddle" or "shoulder" of the heights which divide the waters there that flow to the Mediterranean on the west and the Jordan on the east, would naturally originate such a name; and the name, having been thus introduced, would be likely to appear again and again in the family of the hereditary rulers of the city or region. The name, too, if first given to the city in the time of Hamor, would have been taken, according to historical analogy, from the father rather than the son. Some interpret Gen. xxxiii. 18, 19 as showing that Shechem in that passage may have been called also Shehan. But this proposal has no support except from that passage; and the meaning even then more naturally is, that Jacob came "safely to Shechem" as an adjective, safe; comp. Gen. xvii. 21; or (as recognized in the Eng. Bible) that Shechem belonged to Shechem as a dependent tributary village. [Shealem.] The name is also given in the Arab. Version in the form of Sichem, and Shecan, to which, as well as Syrian, the reader is referred.

The etymology of the Hebrew word Shechem indicates, at the outset, that the place was situated on some mountain or hill-side; and that presumption agrees with Josh. xx. 7, which places it in Mount Ephraim (see, also, 1 K. xii. 25), and with Judges xx. 7, which represents it as under the jurisdiction of Gerizim, which belonged to the Ephraim range. The other Biblical intimations in regard to its situation are only indirect. They are worth noticing, though no great stress is to be laid on them. Thus, for example, Shechem must have been not far from Sihloh, since Sihloh is said (Judg. xxi. 19) to be a little to the east of "the highway" which led from Beth-el to Shechem. Again, if Shalem was of the Mediterranean. The latter appears in the illustration to this article.
In Gen. xxxii. 18 be a proper name, as our version assumes, and identical with the present Salim, on the left of the plain of the McElmon, then Shechem, which is said to be east of Shiloh, must have been among the hills on the opposite side. Further, Shechem, as we learn from Josephus's history (Gen. xxxvii. 12, etc.), must have been near Dothan; and, assuming Dothan to be the place of that name a few miles northeast of Nabulus, Shechem must have been among the same mountains, not far distant. So too, as the Sychar in John iv. 5 was probably the ancient Shechem, that town must have been near Mount Gerizim, to which the Samaritan woman pointed or glanced as she stood by the well at its foot.

But the historical and traditional data which exist outside of the Bible are abundant and decisive. Josephus (Ant. iv. 8, § 44) describes Shechem as between Gerizim and Ebal: ἡς Σαμαριταί πόλεως μεταξύ δυον ἀρχών, Γαρμύοιον μέν τοῦ ἐκ δεξιῶν κειμένου, ποὺ δ' ἐκ λαυῆς Γαβάδου προσαγωγοῦμεν. The present Nabulus is a corruption merely of Neapolis; and Neapolis succeeded the more ancient Shechem. All the early writers who touch on the topography of Palestine, testify to this identity of the two. Josephus usually retains the old name, but has Neapolis in B. J. iv. 8, § 1. Epiphanius says (Hist, Eccl. iii. 1053): εἰς Σαμαριταί ποιας, τούτι ἐστιν, ἐν τῇ νοτὶ Νεάπολες. Jerome says in the Epist. Flavia: "Transit Shechem, quae nunc Neapolis appellatur." The city received its new name (Neapolis = Nabulus) from Vespasian, and on coins still extant (Ezekiel, Doctr. Nau. iii. 433) is called Flavia Neapolis. It had been hit waste, in all probability, during the Jewish war: and the overthrow had been so complete that, contrary to what is generally true in such instances of the substitution of a foreign name for the native one, the original appellation of Shechem never regained its currency among the people of the country. Its situation accounts for another name which it bore among the natives, while it was known zidly as Neapolis to foreigners. It is nearly midway between Judaea and Galilee; and, it being customary to make four stages of the journey between those provinces, the second day's halt occurs most conveniently at this place. Being θύα a "thoroughfares" (= Νεάπολις). On this important route, it was called also Μασαρθα or Μασαρθα, as Josephus states (B. J. iv. 8, § 1). He says there that Vespasian marched from Aunmnia, διὰ τῆς Σαμαριταίας καὶ παρὰ τῆς Νεά-πολις καλομένης, Μασαρθά δὲ ἐπὶ τῶν ἐπι-

The Valley and Town of Neapolis, the ancient Shechem, from the south-western flank of Mount Ebal, looking westward. The mountain on the left is Gerizim. The Mediterranean is discernible in the distance.

From a sketch by W. Tipping, Esq.

a This happy conjecture, in explanation of a name which baffled even the inquiring Geographer, is due to Oldhausen: Ritter, as above.

186
The rendering "plains of Moreh" in the Author’s Version is incorrect. The Samaritan Pentateuch reads, "meridies", and the expression, "place of Shechem," (מַקְלָעָה, מַקְרִי), that it was not inhabited as a city in the

from the town to repair to Jesus at the well, whereas Nablus is more than a mile distant, and not visible from that point. The present inhabitants have a belief or tradition that Shechem occupied a portion of the valley on the east beyond the limits of the modern town; and certain travellers speak of ruins there, which they regard as evidence of the same fact. The statement of Esseblius that Sychar east of Neapolis, may be explained by the circumstance, that the part of Neapolis in that quarter had fallen into such a state of ruin when he lived, as to be mistaken for the site of a separate town (see Rehder’s Palestine, p. 1004). The portion on the edge of the plain, which was more exposed than that in the recess of the valley, and, in the natural course of things, would be destroyed first, or be left to desertion and decay. Josephus says that more than ten thousand Samaritans (inhabitants of Shechem are meant) were destroyed by the Romans on one occasion (B. J. iii. 7, § 32). The population, therefore, must have been much greater than Nablusus with its present dimensions would admit.

The situation of the town is one of surpassing beauty. “The land of Syria,” said Mohammed, “is beloved by Allah beyond all lands, and the part of Syria which He loveth most is the district of Jerusalem, and the place which He loveth most in the district of Jerusalem is the mountain of Nablus” (Fiarnac, des Orante, ii. 139). Its appearance has called forth the admiration of all travellers who have any sensibility to the charms of nature. It lies in a sheltered valley, protected by Gerizim on the south, and Ebal on the north. The feet of these mountains, where they rise from the town, are not more than five hundred yards apart. The bottom of the valley is about 1800 feet above the level of the sea, and the top of Gerizim 800 feet higher still. Those who have been at Heidelberg will assent to O. von Richer’s remark, that the scenery, as viewed from the foot of the hills, is not unlike that of the beautiful German town. The site of the present city, which we believe to have been also that of the Hebrew city, occurs exactly on the water summit; and streams issuing from the numerous springs there, flow down the opposite sides of the valley, spreading verdure and fertility in every direction. Travelers vie with each other in the language which they employ to describe the scene that bursts here so suddenly upon them on arriving in spring or early summer at this paradise of the Holy Land. The somewhat sterile aspect of the adjacent mountains becomes itself a foil, as it were, to set off the effect of the verdant fields and orchards which fill up the valley. “There is nothing finer in all Palestine,” says Dr. Clarke, “than a view of Nablus from the heights around it. As the traveller descends towards it from the hills, it appears luxuriantly embosomed in the most delightful and fragrant bowers, half concealed by rich gardens and by stately trees collected into groves, all around the bold and beautiful valley in which it stands.” “The whole valley,” says Dr. Robinson, “is filled with gardens of vegetables, and orchards of all kinds of fruits, watered by fountains, which burst forth in various parts and flow westwards in refreshing streams. It came upon us suddenly like a scene

on the basis of that error the Samaritans at Nablus show a structure of that sort under an acclivity of Gerizim, which they say was the spot where Jacob buried the Mesopotamian idols.
The narrative shows incontestably that at the time of the division of the land, his son Joshua was in charge. Joshua divided the land among the tribes. Joshua, in his capacity as king (S. of P. p. 295; Jewish Church, p. 348), was strikingly appropriate to the diversified foibles of the region. In revenge for his expedition, after a reign of three years, Abimelech destroyed the city, and, as an emblem of the fate to which he would consign it, sowed the ground with salt (Judg. ix. 41-45). It was soon restored, however, for we are told in 1 K. xii. that all Israel assembled at Shechem, and Ehoshaphat, Solomon's successor, went thither to be inaugurated as king. Its central position made it convenient for such assemblies; its history was fraught with recollections which would give the sanctions of religion as well as of patriotism to the vows of sovereign and people. The new king's obstinacy made him insensible to such influences. Here, at this same place, the ten tribes renounced the house of David, and transferred their allegiance to Jeroboam (1 K. xii. 36), under whom Shechem became for a time the capital of his kingdom. We come next to the epoch of the exile. The people of Shechem doubtless shared the fate of the other inhabitants, and were, most of them at least, carried into captivity (2 K. xvii. 5, 6, xviii. 9). But Shalummares, the conqueror, sent colonies from Babylon to occupy the place of the exiles (2 K. xvii. 24). It would seem that there was another influx of strangers, at a later period, under Esarhaddon (Ezr. iv. 2). The "certain men from Shechem," mentioned in Jer. xii. 5, who were slain on their way to Jerusalem, were possibly Cuthites, i.e. Babylonian immigrants who had been the predecessors or worshipers of the Shechemites (see Hitzig, <i>De Prophet. Jer.</i>, p. 341). These Babylonian settlers in the land, intermixed no doubt to some extent with the old inhabitants, were the Samaritans, who erected at length a rival temple on Gerizim (L. c. 300), and between whom and the Jews a bitter hostility existed for so many ages Joshua, xii. 6, 12, xiii. 3, 4). The son of Sirach (I. 26) says, that "a felicitous people," i.e. the Samaritans, "dwelled at Shechem" (τα Σικενα). From its vicinity to their place of worship, it became the principal city of the Samaritans, a rank which it maintained at least till the destruction of

* In the elevated position and fine view from the ramparts the Levites might have been seen, Joshua addressed the Shechemites (Jud. ix. 7 f.). From that position as "he lifted up his voice" he could easily be heard by the dwellers in the city. The same thing occurred in a recent attempt there to nist quite a revolt.

H.
their temple, about n. c. 129, a person of nearly two hundred years (Joseph. Ant. xiii. 9, § 1: B. J. i. 2, 6). It is unnecessary to pursue this sketch further. From the time of the origin of the Samaritans, the history of Shechem blends itself with that of this people and of their sacred mount, Gerizim; and the reader will find the proper information on this part of the subject under the heads (see Herzog Real-Encyc. xiii. 562). [SAMARIA; SAMARITAN PENT.]

As intimated already, Shechem reappears in the New Testament. It is the Sychar of John iv. 5, near which the Saviour conversed with the Samaritan woman at Jacob's Well. a Shechem is a name of uncertain origin. The Saviour, with his disciples, remained two days at Sychar on his journey from Judaea to Galilee. He preached the Word there, and many of the people believed on Him (John iv. 39, 40). In Acts vii. 16, Stephen reminds his hearers that certain of the patriarchs (meaning Joseph, as we see in Josh. xxiv. 52, and following, perhaps, some tradition as to Jacob's other town) were buried at Shechem. Jerome, who lived so long hardly more than a day's journey from Shechem, says that the tombs of the twelve patriarchs were to be seen there in his day. The anonymous c city in Acts viii. 5, where Philip preached with such effect, may have been Shechem, though many would refer that narrative to Samaria, the capital of the province.

It is interesting to remember that Justin Martyr, who follows so soon after the age of the apostles, was born at Shechem.

It only remains to add a few words relating more especially to Nablus, the heir, under a different name, of the site and honors of the ancient Shechem. It would be inexcusable not to avail ourselves here of the recent observations of Dr. Herzog. In the Zeit. der d. M. Geschichtf. for 1860 (pp. 622-639). He has inserted in that journal a careful plan of Nablus and the environs, with various accompanying remarks. The population consists of about five thousand, among whom are five hundred Greek Christians, one hundred and fifty Samaritans, and a few Jews. The connivance between the Samaritans and Jews is as invariable as it was in the days of Christ. The Mohammedans, of course, make up the bulk of the population. The main street follows the line of the valley from east to west, and contains a well-stocked bazaar. Most of the other streets cross this: here are the smaller shops and the workstalls of the artisans. Most of the streets are narrow and dark, as the houses hang over them on arches, very much as in the closest parts of Cairo. The houses are of stone, and of the most ordinary style, with the exception of those of the wealthy sheikhs of Samaria who live here. There are no public buildings of any note. The Kewisch or synagogue of the Samaritans is a small edifice, in the interior of which there is nothing remarkable, unless it be an above screen, by a curtain, in which their sacred writings are kept. The structure may be three or four centuries old.

The ancient map of the Samaritans in a sketch-plan of it is given in Mr. Grove's paper "On the Modern Samaritans" in Vocation Tourists for 1851.

Nablus has five mosques, two of which, according to a tradition in which Mohammedans, Christians, and Samaritans agree, were originally churches.

One of them, it is said, was dedicated to John the Baptist; its eastern portal, still well preserved, shows the European taste of its founders. The domes of the houses and the minarets, as they show themselves above the sea of luxuriant vegetation which surrounds them, present a striking view to the traveller approaching from the east or the west.

Dr. Rosen says that the inhabitants boast of the existence of not less than eighty springs of water within and around the city. He gives the names of twenty-seven of the principal of them. One of the most remarkable among them is 'Ain el-Kirvan, which rises in the town under a vaulted dome, to which a long flight of steps leads down, from which the abundant water is conveyed by canals to two of the mosques and many of the private houses, and after that serves to water the gardens on the north side of the city.

The various streams derived from this and other fountains, after being distributed thus among the gardens, fall at length into a single channel and turn a mill, kept going summer and winter. Of the fountains out of the city, three only belong to the eastern water shed. One of them, 'Ain Baddo, close to the hamlet of that name, rises in a partly subterranean channel supported by three pillars, hardly a stone's throw from Jacob's Well, and is so large that Dr. Rosen observed small fish in it. Another, 'Ain Askor, issues from an arched passage which leads into the base of Eleal, and flows thence into a tank inclosed within the walls, the workmanship of which, as well as the archway, indicates an ancient origin.

The third, 'Ain Defnan, which comes from the same mountains, reminds us, by its name (A'defn), of the time when Shechem was called Neapolis. Some of the gardens are watered from the fountains, while others have a soil so moist as not to need such irrigation. The olive, as in the days when Jotham delivered his famous parable, is still the principal tree. Figs, almonds, walnuts, mulberries, grapes, oranges, apricots, pomegranates, are abundant. The valley of the Nile itself hardly surpasses Nablus in the production of vegetables of every sort.

Being, as it is, the gateway of the trade between

a Some suppose Shechem and Sychar to be different places. See the arguments for that view under Sychar. Dr. Robinson reaffirms his belief that they are identical (Later Res. iii. 131: see also ii. 269-272). And Mr. Tristram says: "Jacob's well is only half an hour from the modern city." (Miles, Syria, i. 102). While it is evident that the ancient town lay more to the east, among the rough rocks and stone that "strew the unclosed and scattered olive yards for a mile and a half" (Land of Israel, 21 ed. p. 145).
The manufacture, thrown camel's hair, is now a considerable business, having as one of its branches the weaving of rich fabrics. In this respect the Samaritans have been long famed, and their inscriptions, found in the wall of the town, of which a few remain, are of great importance. The inscriptions consist of brief extracts from the Samaritan Pentateuch, probably valuable as palaeographic documents. Similar slabs are to be found built into the walls of several of the sanctuaries in the neighborhood of Nablus; as at the tombs of Hezzez, Rimelus, and Atahmar at Acco. The preceding account some notice should be appended of the two spots in the neighborhood of Nablus which bear the names of the Well of Jacob and the Tomb of Joseph. Of these the former is the more remarkable. It lies about a mile and a half east of the city, close to the lower road, and just beyond the wretched hamlet of Balad. At times the well has been covered over, and it is known as Bir el-Yakab, or 'Ain Yakab; the Christians sometimes call it Bir es-Samaritk — the well of the Samaritan woman. "A low spur projects from the base of Gerizim in a northeasterly direction, between the plain and the opening of the valley. On the point of this spur is a little mound of shapeless ruins, with several fragments of granite columns. Beside these is the well. Formerly there was a square hole, opening into a carefully-built vaulted chamber, about 10 feet square, in the floor of which was the true mouth of the well. Now a portion of the vault has fallen in and completely covered up the mouth, so that nothing can be seen above but a shallow basin filled with stones and rubbish. The well is deep — 75 feet — when last measured — and there was probably a considerable accumulation of rubbish at the bottom. Sometimes it contains a few feet of water, but at others it is quite dry. It is entirely excavated in the solid rock, perfectly round, 9 feet in diameter, with the sides hewn smooth and regular" (Porter, *Hastwood*, p. 54). "It has every claim to be considered the original well, sunk deep into the rocky ground by our father Jacob." This last was the tradition of the place for the last days of the Jewish people (John iv. 6, 12). And its position adds probability to the conclusion, indicating, as has been well said, that it was there by one who could not trust to the springs near in the adjacent vale — the springs of *Abi Bakier and <em>Abi</em> Bra'ib. At a later period it was believed to belong to the Canaanites. Of all the special localities of our Lord's life, this is almost the only one absolutely undisputed. "The tradition, in which by a singular coincidence Jews and Samaritans, Christians and Mohammedans, all agree, goes back," says Dr. Robinson (*Bib. Res.* ii. 284), "at least to the time of Eusebius, in the early part of the 4th century. That writer indeed speaks only of the sepulchre; but the Bordeaux Pilgrim in A. D. 334, mentions also the well; and neither of these writers has any allusion to a church. But Jerome in *Epitaphium Pacae*, which is referred to A. D. 404, makes her visit the church erected at the side of Mount Gerizim around the well of Jacob, where our Lord met the Samaritan woman. The church would seem therefore to have been built during the 4th century; though not by Helena, as is reported in modern times. It was visited and is mentioned, as around the well, by Antoninus Martyr near the close of the 6th century; by Archilus a century later, who describes it as built in the form of a cross; and again by St. Willibrord in the 8th century. Yet Soewall about A. D. 1100, and Ptolemy in 1180, who speak of the holy well, make no mention of the church; whence we may conclude that the latter had been destroyed before the period of the crusades. Brobardus speaks of ruins around the well, blocks of marble and columns, which he held to be the ruins of a town, the ancient Thebe; they were probably those of

**a** *A more perfect copy of this tablet ("unmured" upside down) in the southern wall of the mound has been lately taken (1899) by the explorers of the Palestine Exploration Fund. Dr. Rosen's copy left three of its ten lines incomplete, with some of the characters in other parts very indistinct. Mr. Deutsch of the British Museum, to whom the photograph was submitted, has, however, made a report of the characters of the stone. These are, first, an abbreviated form of the Ten Commandments as found in the Samaritan Seconution (8 lines); secondly, a sentence taken from the interpolated passage following those commandments out of the city, near Qedar (line 2); and finally, line 10, the formula, "Arise, O Lord! Return, O Lord!" which is of frequent occurrence in Samaritan worship. It is probably the oldest Samaritan epigraph in existence.*

*(See Macalister, June 30, 1519.)*

**b** The well is fast filling up with the stones thrown in by travellers and others. At Maundrell's visit (1657) it was 155 feet deep, and the same measurement is given by Dr. Robinson as having been taken in May, 1858. But, five years later, when Dr. Wilson recovered Mr. A. Bona's Bible from it, the depth had decreased to "exactly 75" (*Wilson's Lands*, p. 57). A visit to the well, on March 21, found it 15 feet of water standing in the well. It appears now to be always dry. *The water varies from time to time, but appears to be rarely if ever entirely gone. Near the end of December, says Mr. Tristram, "there was no water in the well, but there was sand and something dry, showing that I had recently contained water, which indeed was found there afterwards in the month of March."* (Land & Island, 24 ed., p. 147.) — H.
the church, to which he makes no allusion. Other
travellers, both of that age and later, speak of
the church only as destroyed, and the well as already
deserted. Before the days of Enseslus, there seems
to be no historical testimony to show the identity
of this well with that which our Saviour visited;
and the proof must therefore rest, so far as it can
be made out at all, in circumstantial evidence. I
am not aware of anything, in the nature of the
case, that goes to contradict the common tradition;
but, on the other hand, I see much in the circum-
stances, tending to confirm the supposition that
this is actually the spot where our Lord held
his conversation with the Samaritan woman.
Jesus was journeying from Jerusalem to Galilee,
and rested at the well, while "his disciples were
gone away into the city to buy meat." The well
thereby lay apparently before the city, and at
some distance from it. In passing along the east-
ern plain, Jesus had halted at the well, and sent his
disciples to the city situated in the narrow valley,
intending on their return to proceed along the
plain on his way to Galilee, without himself visit-
ing the city. All this corresponded exactly to the
position and character of the ground. "Well, the
secret of this was Jacob's well, of high antiquity, a known
and venerated spot; which, after having already lived
for so many ages in tradition, would not be
likely to be forgotten in the two and a half cen-
turies intervening between St. John and En-
seslus." 3
It is understood that the well, and the site ground
thereon, have been lately purchased by the Insedi-
to church, not, it is to be hoped, with the intention
of erecting a church over it, and thus forever
destroying the reality and the sentiment of the
place. 4
The second of the spots alluded to is the Tomb
of Joseph. It lies about a quarter of a mile north
of the well, exactly in the centre of the opening of
the valley between Gerizim and Ebal. It is a small
square inclosure of high whitewashed walls, sur-
rounding a tomb of the ordinary kind, but with
the peculiarity that it is placed diagonally to the
walls, instead of parallel, as usual. A rough pillar
used as an altar, and black with the traces of fire,
is at the head, and another at the foot of the tomb.
In the left-hand corner as you enter is a vine,
whence branches run over the wall," swelling
exactly the metaphor of Jacob's blessing (Gen. xix.
22). In the walls are two slabs with Hebrew in-
scriptions, 5 and the interior is almost covered with
the names of Pilgrims in Hebrew, Arabic, and Sa-
maritan. Beyond this there is nothing to remark
in the structure itself. It purports to cover the
tomb of Joseph, buried there in "the pared of

a Among the proofs of this identity one should not
overlook the striking incidental connection between
John's narrative and the locality (iv. 20). Gerizim
is not named by the Evangelist; but as we read the
words "our fathers worshipped in this mountain," how
really do we think of the woman's glance of the
eye or outstretched hand in that direction, which
made the expression definite on the spot though in-
definite to us. Gerizim stood at that moment within
full sight only a short distance from the scene of
the conversation.
H. (a. s. 7). No church or chapel has yet been erected there
(1870), as was feared might be done at the time of
writing the above article.
ll. One of these is given by Dr. Wilson (Lands, etc.,
d. 61).

SHECHEM

SHECHEM

SHECHEM

The local tradition of the Tomb, like that of that
well, is as old as the beginning of the 4th centu-
y. Both Enseslus (Osnosius, Ξυχμ α) and the Bor-
dene Pilgrim mention its existence. So do Ben
Jamin of Tudela (1264-79), and Maundrell (1692),
and so -- to pass over immediate travellers --
does Maundrell (1697). All that is wanting in
these accounts is to fix the tomb which they men-
tion to the present spot. But this is difficult
-- Maundrell describes it as on his right hand, in
leaving Nablus for Jerusalem: "just without the
city" -- a small mosque, "built over the sepulchre
of Joseph" (March 25). Some time after passing it
he arrives at the well. This description is quite
inapplicable to the tomb just described, but perfectly
suits the Wely at the northeast foot of Gerizim,
which also bears (among the Moslems) the name of
Joseph. And when the expressions of the two
oldest authorities a cited above are examined, it will
be seen that they are quite as suitable, if not more
so, to this latter spot as to the tomb on the open
plain. On the other hand, the Jewish travellers, 6
from imparci (cir. 1320) downwards, specify the
tomb as in the immediate neighborhood of the vil-
lage el-Bibene. 7
In this conflict of testimony, and in the absence
of any information on the date and nature of the
Moslem 8 tomb, it is impossible to come to a de-
finite conclusion. There is some force, and that in
favor of the received site, in the remarks of a learned
and intelligent Jewish traveller (Loewe, in Abh.
Zeitung des Jewishkernes, Leipzig, 1839, No. 50)
on the peculiar form and nature of the ground sur-
rounding the tomb near the well: the more so be-
cause they are suggested by the natural features of
the spot, as reflected in the curiously minute,
the almost technical language, of the ancient rec-
ord, and not based on any more traditional or arti-
ficial considerations. 8 "The thought," says he,
forced itself upon me, how impossible it is to un-
derstand the details of the Bible without examining
them on the spot. This place is called in the
Scripture, neither ευκεικ ( valley) 9 nor χειλην ( plain),
but by the individual name of Chlothel "nou-She'el; 10
and in the whole of Palestine there is not such another plot to be
found, -- a dead level, without the least hollow or swelling in a circuit of
two hours. In addition to this it is the loveliest and
most fertile spot I have ever seen."

SHE'CHEM. The names of three persons in the annals of Israel.

1. (Σέκιμ) [shoulder, ridge]: Ξυη主题活动: [in Josh.

Eusebius: in ισραηλιτικος Νεως πτωσος, οινω καπο

(a. p. 1504), and Jehuda ha-Dosah (1587), in Carmoly's
Itinerariis de la Terre Sainte.

It appears from a note in Prof. Stanley's Sinai
& Pal. p. 241, that a later Joseph is also commemorat-
ed in this sanctuary.
SHECHEMITES, THE

**Sire., pl. -t] Sichem.)** The son of Hamor the chief of the Hivite settlement of Shechem at the time of Jacob's arrival (Gen. xxxviii. 19, xxix. 2-20; Josh. xiv. 32; Judg. ix. 28).

1. **(Seech.)** A man of Manasseh, of the clan of Gilead, and head of the family of the Shechemites (Num. xxvi. 31). His family are again mentioned as the Bene-Shechem [sons of S.] (Josh. xiv. 32).

2. **(Seech.)** In the lists of 1 Chr. another Shechem is named amongst the Gildeitates as a son of Simeon, the younger brother of the foregoing (vii. 19). It must have been the recollection of one of these two Gildeitates which led Cyril of Alexandria into his strange fancy (quoted by Reland, _Ptol. p. 1097_, from his Comm. on _Hosea_) of placing the city of Shechem on the eastern side of the Jordan.

SHECHEMITHES, THE (יִשְׁכָּחֵיתָא) [part., see above] 6 Seechit: [Vat. M. -ss, L. -ss, -ss] (Schechen). The family of Shechem, son of Gilgal; one of the minor clans of the Eastern Manassseh (Num. xxvi. 31; comp. Josh. xvi. 22).

SHECHINAH (in Chaldee and neo-Hebrew, שֶׁכֶּהְיָא, majestas Dei, praecuratio Dei, Spiritus Sanctus, Buxtorf, from שֶׁכֶץ and שֶׁכֶץ, to rest, settle, dwell; whence שֶׁכֶם a tent, the Tabernacle; comp. סָמְךָא.) This term is not found in the Bible. It was used by the later Jews, and borrowed by Christians from them, to express the visible majesty of the Divine Presence, especially when resting, or dwelling, between the cherubim on the mercy-seat in the Tabernacle, and in the Temple of Solomon: but not in Zerubbabel's temple, for it was one of the five particulars which the Jews reckon to have been wanting in the second temple a (Castell, _Lexic. s. v._ Parisiis, _Consect. i._ 138). The use of the term is first found in the Targums, where it forms a frequent periphrasis for God, considered as dwelling amongst the children of Israel, and is thus used, especially by Onkelos, to avoid ascribing corporeity to God himself, as Castell tells us, and may be compared to the analogous periphrasis so frequent in the Targums (Jonathan, _Shechinah, the Word of the Lord_). Many Christian writers have thought that this threefold expression for the Deity—the Lord, the word of the Lord, and the Shechinah—indicates the knowledge of a Trinity of Persons in the Godhead, and accordingly, following some Rabbinical writers, identify the Shechinah with the Holy Spirit. Others, however, deny this (Calmet's _Dict. of the Bible_; Joh. Sambert, _Dea Lex._ xix. in _Critic. Soc._; _Glass. Philoby._ Soc. Ill. v. i, vii. etc.).

Without stopping to discuss this question, it will most certainly to give an accurate knowledge of the use of the term Shechinah by the Jews themselves, if we produce a few of the most striking passages in the Targums where it occurs. In Ex. xxv. 8, where the Hebrew has _"let them make a sanctuary that I may dwell among them, _" Onkelos has, "I will make my Shechinah to dwell among them." In xix. 45, 16, for the Hebrew _"I will dwell among the children of Israel,"_ Onkelos has, _"I will make my Shechinah to dwell,"_ etc. In Ps. lxviii. 2, for _"this Mount Zion wherein thou hast dwelt,"_ the Targum has _"wherein thy Shechinah hath dwelt."_ In the description of the dedication of Solomon's Temple (1 K. viii. 12, 13, the Targum of Jonathan runs thus: _"This House is pleased to make his Shechinah dwell in Jerusalem._ I have built the house of the sanctuary for the house of thy Shechinah for ever, where it should be noticed that in ver. 13 the Hebrew _"will dwell among the children of Israel,"_ Jonathan has _"I will make my Shechinah dwell,"_ etc. In Is. vi. 5 he has the combination, _"the glory of the Shechinah of the King of ages, the Lord of Hosts,"_ and in the next verse he paraphrases _"from off the altar,"_ by _"from before his Shechinah on the throne of glory in the holy heavens that are above the altar._ Compare also Num. v. 3, xxxv. 31; Ps. lxviii. 17, 18, cxxxv. 21; Is. xxiii. 5,lix. 17; Joel iii. 17, 21, and numerous other passages. On the other hand, it should be noticed that the Targums never render _"the cloud"_ or _"the glory"_ by Shechinah, but by _מְדֵחֶה and מְדִיחָא_, and that even in such passages as Ex. xxv. 16, 17; Num. xv. 17, 18, 22, x. 12, neither the mention of the cloud, nor the constant use of the verb _נִני_, in the Hebrew provoke any reference to the Shechinah. Hence, as regards the use of the word _Shechinh_ in the Targums, it may be defined as a periphrasis for God whenever He is said to dwell on Zion, amongst Israel, or between the cherubim, and so on, in order, as before said, to avoid the slightest approach to materialism. Far most frequently this term is introduced when the verb _נִני_ occurs in the Heb. text; but occasionally, as in some of the above-cited instances, where it does not, but where the Paraphrast wished to interpose an abstract noun corresponding to _Presence_ to mark the holier antithetickity of the Hebrew writer.

Our view of the Targumistic notion of the Shechinah would not be complete if we did not add, that though, as we have seen, the Jews reckoned the Shechinah amongst the marks of the Divine favor which were wanting to the second temple, they manifestly expected the return of the Shechinah in the days of the Messiah. Thus Hag. i. 8, _"Build the house, and I will take pleasure in it, and I will be glorified, saith the Lord,"_ is paraphrased by Jonathan, _"I will cause my Shechinah to dwell in it in glory._" Zech. ii. 10, _"Lo I come, and I will dwell in the midst of thee, saith the Lord,"_ is paraphrased _"I will be revealed, and will cause my Shechinah to dwell in the midst of thee."_ And in viii. 3, _"I am returned unto Zion, and will dwell in the midst of Jerusalem,"_ is paraphrased _"I will make my Shechinah dwell in the midst of Jerusalem,"_ and lastly, in Ez. xliii. 7, 9, in the vision of the return of the Glory of God to the Temple, Jonathan

---

a Dr. Bernard, in his notes on Josuephus, tries to prove that these five things were all in the second temple, because Josephus says the Urn and Ophni were. See Watton's _Traditions_, etc., p. 16.

b _See._ t. g., Ps. lxix. 17, and Kalsch on Ex. xxiv. 19.

c In Ps. lxviii. 17 (16, A. V.), the Targum has _"the Word of the Lord has desired to place his Shechinah upon Zion._"

d Always (as far as I have observed) rendered by the Chaldee _שֶׁכֶהְיָא_.

---
SHECHINAH

paraphrases thus, "Son of man, this is the place of the house of the throne of my glory, and this is the place of the entrance of the house of my Shechinah, where I will make my Shechinah dwell in the midst of the children of Israel for ever. . . . Now let them cast away their idols . . . and I will make my Shechinah dwell in the midst of them for ever." Compare Is. iv. 5, where the return of the pillar of cloud by day and fire by night is foretold as to take place in the days of the Messianic reign. As regards the visible manifestation of the Divine Presence dwelling amongst the Israelites, to which the term Shechinah has attached itself, the idea which the different accounts in Scripture convey is that of a most brilliant and glorious light, enveloped in a cloud, and usually concealed by the cloud, so that the cloud itself was for the most part alone visible; but on particular occasions the glory appeared. Thus at the Exodus, "the Lord went before them by day in a pillar of cloud and by night in a pillar of fire to give them light." And again we read, that this pillar was a cloud and darkness" to the Egyptians, "but it gave light by night" to the Israelites. But in the morning watch "the Lord looked upon the host of the Egyptians through the pillar of fire and of the cloud, and troubled the host of the Egyptians (i.e. 'white cloud' (by Patrick) explains it, the fiery appearance of the Deity shone forth from the cloud," and by its amazing brightness confounded them. So too in the Parke Eliot it is said, "The Blessed God appeared in his glory upon the sea, and it fled back:" with which Patrick compares Ps. lxxvii. 16, "The waters saw thee, O God, the waters saw thee; they were afraid, yea, they were very afraid." Where the Targum has, "They saw thy Shechinah in the midst of the waters." In Ex. xix. 9, "the Lord said to Moses, Lo, I come unto thee in a thick cloud," and accordingly in ver. 16 we read that a thick cloud rested upon the mount, and in ver. 18, that "Mount Sinai was altogether on a smoke, because the Lord descended upon it in fire." And this is further explained, Ex. xix. 16, where we read that the Lord stood upon Mount Sinai, and the cloud covered it (i.e. as Aben Ezra explains it, the glory) six days. But upon the seventh day, when the Lord called unto Moses out of the midst of the cloud, there was a breaking forth of the glory through the cloud, for "the sight of the glory of the Lord was like devouring fire on the top of the mountain in the eyes of the children of Israel," ver. 17. So again when God as it were took possession of the Tabernacle at its first completion (Ex. xl. 34, 35), "the cloud covered the tent of the congregation (externally), and the glory of the Lord filled the Tabernacle (within), and Moses was not able to enter into the tent of the congregation (rather, of meeting); just as at the dedication of Solomon's Temple (1 K. viii. 10, 11), "the cloud filled the house of the Lord, so that the priests could not stand to minister because of the cloud, for the glory of the Lord had filled the house of the Lord." In the Tabernacle, however, as in the Temple, this was only a temporary state of things; for throughout the books of Leviticus and Numbers we find Moses constantly entering into the Tabernacle. And when he did so, the cloud which rested over it externally, dark by day, and luminous at night (Num. ix. 15, 19), came down and stood at the door of the Tabernacle, and the Lord talked with Moses inside, "face to face," and Moses would return thither (Num. xxiii. 7-11). It was on such occasions that Moses heard the voice of one speaking unto him from off the mercy-seat that was upon the ark of testimony, from between the two cherubims " (Num. vii. 89), in accordance with Ex. xxv. 22; Lev. xvi. 2. But it does not appear that the glory was habitually seen either by Moses or the people. Occasionally, however, it flashed forth in the cloud which concealed it; as Ex. xvi. 7, 10; Lev. xvi. 6, 33, when "the glory of the Lord appeared unto all the people," according to a previous promise; or as Num. xiv. 10, xvi. 19, xx. 6, suddenly, to strike terror in the people in their rebellion. The last occasion on which the glory of the Lord appeared was that mentioned in Num. xx. 6, when they were in Kadesh in the 40th year of the Exodus, and murmured for want of water, and the last express mention of the cloud as visibly present over the Tabernacle is in Deut. xxxii. 15, just before the death of Moses. The cloud had not been mentioned before since the second year of the Exodus (Num. x. 11, 34, xii. 5, 10); but as the description in Num. ix. 15-23; Ex. x. 29, relates to the whole time of their wanderings in the wilderness, we may conclude that at all events the cloud visibly accompanied them through all the migrations mentioned in Num. xxxiii., till they reached the plains of Moab, and till Moses died. From this time we have no mention whatever in the history either of the cloud, or of the glory, or of the voice from between the cherubim, till the dedication of Solomon's Temple. But since it is certain that the Ark was still the special symbol of God's presence and power (Josh. iii. 17, iv. 1, 1 Sam. iv.; Ps. lxxxvii. 11; compared with Num. v. 15; Ps. cxix. 8, lxxxv. 1, xcv. 1), and since such passages as 1 Sam. iv. 21, 22; 2 Sam. vi. 2; Ps. xcvii. 4; 2 K. xix. 15, seem to imply the continued manifestation of God's Presence in the cloud between the cherubim, and that Lev. xvi. 2 seemed to promise so much, and that more general expressions, such as Ex. x. 18, 13, 14, lxxvi. 2; Is. xvii. 18, 4c, thus acquire much more point, we may perhaps conclude that the cloud did continue, though with shorter or longer interruptions, to dwell between 'the cherubims of glory shadowing the mercy-seat,' until the destruction of the Temple by Nebuchadnezzar. [OLIVES, MOUNT OF, ii. 2249-50.] The illusions in the N. T. to the Shechinah are not unfrequent. Thus in the account of the Nativity, the words, "Lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them" (Luke ii. 9), followed by the appearance of the multitude of the heavenly host," recall the appearance of the Divine glory on Sinai, when "He shined forth from Paran, and came with ten thousands of saints" (Deut. xxxiii. 2); comp. Ps. lxxxvii. 17; Acts vii. 53; Heb. ii. 2; Ex. xlvii. 2). The "God of glory" (Acts vii. 55), "the cherubims of glory" (Heb. ix. 5), the "glory" (Rom. ix. 4), and other like passages, are distinct references to the manifestations of the glory in the O. T. When we read in John i. 14, "that the Word was made flesh, and dwelt among us (iox8aXp8evoiv & aOcoiv), and we beheld his glory," or in 2 Cor. xiii. 9, "that the power of Christ may rest upon,"

a The Arabic expression, corresponding to the Shechinah of the Targums, is a word signifying light.

b In Hebrew וָּקָּנֵב , in Chaldee וָּקָּנֵב .
SHEDEUR

Sheep 2961

from one to three years old," but young lambs of the first year were more generally used in the offerings (see Ex. xxii. 38; Lev. ix. 3, xii. 6; Num. xxviii. 9, &c.). No lamb under eight days old was allowed to be killed (Ex. xxii. 27). A very young lamb was called הָתיָה tâlch (see 1 Sam. vii. 9; 18. xxv. 25). Sheep and lambs formed an important article of food (1 Sam. xxiv. 18; 1 K. i. 19, iv. 23; Ps. xiv. 11, &c.). The wool was used as clothing (Lev. xii. 47; Dent. xiii. 11; Prov. xxxi. 13; Job xxxi. 20, &c.). [Wool.] Trumpets may have been made of the horns of rams (Josh. vi. 4) though the rendering of the A. V. in this passage is generally thought to be incorrect. "Rams' skins dyed red" were used as a covering for the Tabernacle (Ex. xxv. 5). Sheep and lambs were sometimes paid as tribute (2 K. iii. 4). It is very striking to notice the immense numbers of sheep that were reared in Palestine in Biblical times: see for instance 1 Chr. v. 21 ; 2 Chr. xvii. xxvii. ; 2 K. iii. 4 ; Job xii. 12. Special mention is made of the sheep of Bozrah (Mic. ii. 12; Is. xxxv. 6) in the land of Edom, a district well suited for pasturing sheep. "Bashan and Gilgal" are also mentioned as pastures (Mic. viii. 14). "Large parts of Carmel, Bashan, and Gilgal," says Thomson (Land and Book, p. 295), "are at their proper season alive with countless flocks of sheep." (see also p. 311). "The flocks of Kedar" and "the rams of Nebaioth," two sons of Ishmael (Gen. xlv. 13) that settled in Arabia, are referred to in Is. ix. 7. Sheep-shearing is alluded to Gen. xxi. xxviii. 13; Dent. xvii. 19: 1 Sam. xxiv. 4; Is. lii. 7, &c. Sheep-dogs were employed in Biblical times, as is evident from Job xxv. 1, "the dogs of my flock." From the manner in which they are spoken of by the patriarch it is clear, as Thomson (Land and Book, p. 292) well observes, that the oriental shepherd-dogs were very different animals from the sheep-dogs of our own land. The exact breed are described as being "a mean, sinister, ill-conditioned generation, which are kept at a distance, kicked about, and half-starved, with nothing noble or attractive about them." They were, however, without doubt, useful to the shepherds, more especially at night, in keeping off the wild beasts that prowled about the hills and valleys (comp. Thee, ld. v. 105). Shepherds in Palestine and the East generally go before their flocks, which they induce to follow by calling to them (comp. John x. 4; Ps. lxxvii. 29, xxxi. 1), though they also drove them (Gen. xxxiii. 13). [SHEPHERDS.] It was usual amongst the ancient Jews to give names to sheep and goats, as in England we do to our dairy cattle (see John x. 3). This practice prevailed amongst the ancient Greeks (see Thee, IId. v. 103): —

The following quotation from Hartley's Researches in Greece and the Levant, p. 321, is so strikingly illustrative of the allusions in John x. 1-16, that we cannot do better than quote it: — "Having had my attention directed last night to the words in John x. 3, I asked my man if it was usual in Greece to give names to the sheep. He informed me that it (author of the Targum) was the first (Wolf, Dib. 10; 1 Targ.)

This expression of St. Paul's has a singular re-embracement in the Biblical saying, that of eighty pupils of Hillel the elder, thirty were worthy that the Shechinah should rest upon them; and of these Johanan (author of the Targum) was the first (Wolf, Dib. 10; 1 Targ.)

a "(εἰκοσακοσακές εἰς ἑκάτερον; or in Rev. xxi. 26, "Behold the tabernacle of God is with men, and He will dwell with them") (ξηράνθον τοῦ Θεοῦ ... καὶ ξηράνθον μετ᾿ αὐτοῖς), we have not only references to the Shechinah, but are distinctly taught to connect it with the incamation and future coming of Messiah, as Isaiah 28. These are most frequently called (Ex. x. xi.) cherubim: but sometimes, as in Is. vi. seraphim (comp. Rev. iv. 7, 8). In Ex. xiv. 19, "the angel of God" is spoken of in connection with the cloud, and in Dent. xxxii. 2, the descent upon Sinai is described as being with ten thousands of saints (comp. Ps. lxxxvii. 17; Zechar. xi. 4). The predominant association, however, is with the cherubim, of which the golden cherubim on the mercy-seat were the representation. And this gives force to the interpretation that has been put upon Gen. iii. 24, 24 as being the earliest notice of the Shechinah, under the symbol of a pointed flame, dwelling between the cherubim, and constituting that local Presence of the Lord from which Cain went forth, and before which the worship of Adam and succeeding patriarchs was conducted (see Hale's Chorbal, i. 94; Smith's_exact Account, i. 173, 176, 177). Parkhurst went so far as to imagine a tabernacle, containing the cherubim and the glory all the time from Adam to Moses (Heb. i.e. p. 625). It is, however, pretty certain that the various appearances to Abraham, and that to Moses, in the bush, were manifestations of the Divine Majesty similar to those later ones to which the term Shechinah is applied (see especially Acts vii. 2). For further information the reader is referred, besides the works quoted above, to the articles Cloud, Ark, Cherub, to Winer, Relig. art. Cherubim; to Bishop Patrick's Commentary; to Buxtorf, Hist. Arc. Past. e. xi.; and to Lowman, On the Shechinah.

A. C. H.
was, and that the sheep obeyed the shepherd when he called them by their names. This morning I had an opportunity of verifying the truth of this remark. Passing by a flock of sheep, I asked the shepherd the same question which I had put to the servant, and he gave me the same answer. I then made him call one of his sheep. He did so, and it instantly left its pasturage and its companions and ran up to the hands of the shepherd with signs of pleasure and with a prompt obedience which I had never before observed in any other animal. It is also true in this country that a stranger will not follow, but will flee from him. The shepherd told me that many of his sheep were still wild, that they had not yet learned their names, but that by teaching them they would all learn them. See also Thomson (p. 203): "The shepherd calls sharply from time to time to remind the sheep of his presence: they know his voice and follow on; but if a stranger call they stop short, lift up their heads in alarm, and if it is repeated they turn and flee, because they know not the voice of a stranger."  

Broad-tailed Sheep.

The common sheep of Syria and Palestine are the broad-tail (Ovis aries), and a variety of the common sheep of this country (Ovis aries) called the Bikorekan according to Russell (Monyp., ii. 147). The broad-tailed kind has long been reared in Syria. Aristotle, who lived more than 2,000 years ago, expressly mentions Syrian sheep with tails of a cubit wide. This or another variety of the species is also noticed by Herodotus (iii. 118) as occurring in Arabia. The fat tail of the sheep is probably alluded to in Lev. iii. 9, vii. 3, etc., as the fat and the whole rump that was to be taken off hard by the boneless, and was to be consumed on the altar. The cooks in Syria use this mass of fat instead of Arab butter, which is often rank (see Thomson, Land and Book, p. 97).  

\[ \text{a} \] Dr. Thomson’s remarks in Illustration of these traits of pastoral life in the East are very interesting (Land and Book, i. 393, 394).  

\[ \text{b} \] None of the instances cited by Jerome and others are exact parallels with that in question. The quotations adduced, with the exception of those which speak of painted insignia, before Spartan women \textit{not} refer to cases in which \textit{living} animals thera-

The whole passage in Gen. xxx. which bears on the subject of Jacob’s stratagem with Laban’s sheep is involved in considerable perplexity, and Jacob’s conduct in this matter has been severely and unconsciously condemned by some writers. We touch upon the question briefly in its zoological bearing. It is altogether impossible to account for the complete success which attended Jacob’s device of setting peeled rods before the ewes and she-goats as they came to drink in the watering troughs, on natural grounds. The Greek fathers for the most part ascribe the result to the direct operation of the Deity, whereas Jerome and the Latin fathers regard it as a mere natural operation of the imagination, adding as illustrations in point various devices that have been resorted to by the ancients in the cases of mares, asses, etc. (see Oppian, Cynegetic, i. 327, 357; Pinyx, H. V. viii. 10, and the passages from Quintilian, Hippocrates, and Galen, as cited by Jerome, Grotius, and Bochart). Even granting the general truth of these instances, and acknowledging the curious effect which peculiar sights by the power of the imagination do occasionally produce in the furs of many animals, yet we must agree with the Greek fathers and ascribe the production of Jacob’s spotted sheep and goats to divine agency. The whole question has been carefully considered by Nitschmann (De Coronis Jacobi, in Theol. 357), from whom we quote the following passage: "Etenim itaque, cum Vosso allaque pliis viris, illam pecorum imaginationem tamen tante saepe causam adjecisse, ac plus in hae negotio divina tribuendum esse virtutis, que suo concursu sic delineam causae secundum vim inabsult ut quod ea sola sequendum naturam praestare non valeret ab divina beneficione super naturam praestare:" and then Nitschmann cites the passage in Gen. xxxi. 5-13, where Jacob expressly states that his success was due to Divine interference: for it is hard to believe that Jacob is here uttering nothing but a tissue of falsehoods, which appears to be the opinion of Kalisch (Hist. con Crit. Comment, Gen. xxxi. and xxi.), who represents the patriarch as “unblushingly executing frauds suggested by his fertile invention, and then abusing the authority of God in covering or justifying them.” We are aware that a still graver difficulty in the minds of some persons remains, if the above explanation be adopted; but we have no other alternative, for, as Patrick has observed, “let any shepherd now try this device, and he will not find it do what it did then by a Divine operation.”  

The greater difficulty alluded to is the supposing that God would have directly interfered to help Jacob to act treacherously towards his uncle. But are we quite sure that there was any fraud, fairly called such, in the matter? Had Jacob not been thus aided, he might have remained the dupe of Laban’s craftily conduct all his days. He had served his money-loving uncle faithfully for fourteen years; Laban confesses his cattle had increased considerably under Jacob’s management; but all the return he got was unfair treatment and a constant desire
on the part of Laban to strike a hard bargain with him (Gen. xxxi. 7). God vouchsafed to deliver Jacob out of the hands of his hard master, and to punish Laban for his cruelty, which he did by pointing out to Jacob how he could secure to himself large flocks and abundant cattle. God was only helping Jacob to obtain that which justly belonged to him, but which Laban's capacity refused to grant. "Were it lawful," says Stackhouse, "for any private person to make reprisals, the injurious treatment Jacob had received from Laban, both in imposing a wife upon him and prolonging his servitude without wages, was enough to give him both the provocation and the privilege to do so. God Almighty, however, was pleased to take the determination of the whole matter into his own hands." This seems to us the best way of understanding this disputed subject.  

The following Hebrew words occur as the names of sheep: [םַע, יֵע, וּבְ, or וַה], a collective noun to denote "a flock of sheep and goats," to which is opposed the noun of unity, וַת, "a sheep" or "a goat," joined to a masc. where "rams" or "he-goats" are signified, and with a fem. when "ewes" or "she-goats" are meant, though even in this case sometimes to a masc. (as in Gen. xxxi. 10): וַת, "a ram;" וַת, "a ewe;" [ות, or etc.], "a lamb," or rather "a sheep of a year old or above," opposed to [ות, "a sucking or very young lamb;" [ות is another term applied to a lamb as it skips (ות) in the pastures.

As the sheep is an emblem of meekness, patience, and submission, it is expressly mentioned as typifying these qualities in the person of our blessed Lord (Is. liii. 7; Acts viii. 32, &c.). The relation that exists between Christ, "the chief Shepherd," and his members, is beautifully compared to that which in the East is so strikingly exhibited by the shepherds to their flocks (see Thomson, Land and Book, p. 263). W. 11

* SHEEPFOLD. [Sheepfold.]  

* SHEEPFOLD. The original words for this expression in the Old Testament are [ות, [ות, [ות, [ות, (dual, with reference to the troughs which divided them), and יֵב, and in the N. T., [ות יֵב and פִּי (the latter erroneously) (John x. 16). Sheepfolds as usually constructed in the East, according to Thomson (Land and Book, i. 299), are "low, flat buildings, erected on the shelved side of the valleys, and, when the nights are cold, the flocks are shut up in them, but in ordinary weather they are merely kept within the yard." During the day of course they are led forth to pasture by the shepherds. The folds are defended by a wide stone wall, crowned by sharp thorns which the wolf will rarely attempt to scale. The leopard and panther, however, when pressed with hunger, will overleap the thorny hedge, and make havoc of the flock. Many little villages in Syria, especially in the Beka'a between Lebanon and Anti-Lebanon, consist of shepherds or have sprung from them, and have the syllable [ות (sheep-fold) prefixed to their names. In Greece the writer has seen folds built merely of a parapet of bushes or branches, placed at the entrance of caves, natural, or made for the purpose in the side of hills or rocky ledges. A porter kept the door of the larger sheepfolds. [Porter, Amer. J.]  

A mistranslation in John x. 16, or at least ambiguity ("fold") being susceptible of a twofold sense, mars the exquisite beauty of the passage. Instead of "there shall be one fold and one shepherd," it should read: "and there shall be one flock, one shepherd." The A. V. confuses [ות and פִּי and we necessarily lose in any rendering the alliterative succession of פִּי and פִּי. The Saviour no doubt refers more immediately in the figure to the union of Jews and Gentiles in the faith and blessings of the gospel. "Sheepfold" occurs in the A. V. three times interchangeably with "sheepfold." H.

We have considered this perplexing question in accordance with the generally received opinion that the whole account is the work of one and the same author: at the same time, we must allow that there is wrong probability that these portions of the narrat
SHEEP-MARKET (2 K. iii. 4). [Sheep-]Sheep-Master]

Sheep Gate. The (en Aa 7 7 7) of the gates of Jerusalem as rebuilt by Nehemiah (Neh. iii. 1, 22; xii. 39). It stood between the tower of Mesh and the chamber of the corner (iii. 32, 1) or gate of the guard-house (xii. 39, A. V. "prison-gate"). The latter seems to have been at the angle formed by the junction of the wall of the city of Nehemiah and that of the city of David, leaving the Sheep Gate on the north of it. (See the diagram in p. 1322, vol. ii.) According to the view taken in the article JERUSALEM, the city of David occupied a space on the mount Moriah about a hundred yards wide with the rest of the south wall of the platform of the Dome of the Rock and the south wall of the Haram esh-Sherif. The position of the Sheep Gate may therefore have been on or near that of the Bab el-Kattanin. Bertheau (Exeq. Handbuch, on Nehemiah, p. 144) is right in placing it on the east side of the city and on the north of the corner; but is wrong in placing it at the present St. Stephen's Gate, since no wall existed nearly so far to the east as that, till after the death of Christ. [JERUSALEM.]

The pool which was near the Sheep Gate (John v. 2; A. V. inaccurately "market") was probably the present Hammam esh-Shefita. G.

Sheep-Market, The (John v. 2). The word "market" is an interpolation of our translators, possibly after Luther, who has Schafi.-house. The words of the original are ειπα εποβατηγε, to which probably should be supplied not market but gate, παρη, as in the LXX. version of the passages in Nehemiah quoted in the foregoing article. The Vulgate connects the πομοβατηγε with the κωλομόβηθα, and reads Profectio pietatis; while the Syriac omits all mention of the sheep, and names only "a place of baptism." G.

Sheets, only in Judg. xiv. 12, 13, and there "shirts" in the margin. The Hebrew is מל, elsewhere only in Prov. xxxi. 24 and Is. iii. 24, where the A. V. renders "fine linen." The LXX. has in the different places σωλάδες or βοσάδα, and the Vulg. similes. It was something worn by men and women, as the above passages show, and must have been an article of dress. It may have been a thin covering of linen worn next to the body as a shirt (First, Keil), or a loose nightcap thrown around one on taking off his other garments (Schleusner). In the latter case it corresponded nearly to the Greek σωλάδα (comp. Mark's σωλάδα εί υμας, xiv. 51). It formed part of the raiment which Samson was to give to the Philistines if they should discover his riddle within the appointed time (Judg. xiv. 12 ff.). It was evidently at that period an article of value or luxury among the Philistines, as it was still later among the Hebrews (Is. iii. 29; Prov. xxxi. 24).

* Against this theory respecting the site of "the city of David," see under JERUSALEM, § 4v., near the end (Amer. ed.). S. W. W. The character nearly resembles that of Samaritan MSS., although it is not quite identical with it. The Hebrew and Samaritan alphabets appear to be derivative representatives of some older form, as may be inferred from several of the letters. Thus the ב is first called in question the commonly assumed at

finity between שדוק and מלח (Lex. s. v.). H.

Shekel. In a former article [Money] a full account has been given of the coins called shekels, which are found with inscriptions in the Samaritan character, as if that the present article will only contain notices of a few particulars relating to the Jewish coinage which did not fall within the plan of the former.

It may, in the first place, be desirable to mention, that although some shekels are found with Hebrew letters instead of Samaritan, these are undoubtedly all forgeries. It is the more needful to make this statement, as in some books of high reputation, e.g. Walton's Polyglott, these shekels are engraved as if they were genuine. It is hardly necessary to suggest the reasons which may have led to this series of forgeries. But the difference between the two is not confined to the letters only; the Hebrew shekels are much larger and thinner than the Samaritan, so that a person might distinguish them merely by the touch, even under a common magnifying glass.

Our attention is, in the next place, directed to the early notices of these shekels in Rabbinical writers. It might be supposed that in the Mishna, where one of the treatises bears the title of "Shekelim," or Shekels, we should find some information on the subject. But this treatise, being devoted to the consideration of the laws relating to the payment of the half-shekel for the Temple, is of course useless for our purpose.

Some references are given to the works of Rashbi and Mainmonides (contemporary writers of the 12th century) for information relative to shekels and the forms of Hebrew letters in ancient times; but the most important Rabbinical quotation given by Rayer is that from Ramban, i.e. Rabbie-Heschel (or Rabbie-Heschel), who lived about the commencement of the 13th century. He describes a shekel which he had seen, and of which the Cuthaena read the inscription with case. The explanation which they gave of the inscription was, on one side: Shekel ho-Shekelim, "the shekel of shekels," and on the other "Jerusalem the Holy." The former was doubtless a misinterpretation of the usual inscription the shekel of Israel," but the latter corresponds with the inscription on our shekel (Rayer, De Numis, p. 11). In the 16th century R. Azarias de Roski states that R. Moses Basula had arranged a Cuthaen, i.e. Samaritan alphabet from coins, and R. Moses Millakar (of whom little is known) is quoted by Rayer as having read in some Samaritan coins, in such a year of the consideration of Israel," and the same R. Azarias de Roski (or de Adunin, as he is called by Bartocceci, Bibl. Robb. vol. iv. p. 296, and several other letters are evidently identical in their origin. And the ש (Shin) of the Hebrew alphabet is the same as that of the Samaritan; for if we make the two middle strokes of the Samaritan letter converge, it takes the Hebrew form.
In his "The Light of the Eyes," (not *Fons Oculorum*, as Bayer translates it, which would require "After" not "From"), discusses the Translucial or Samaritan letters, and describes a *shekel of Israel* which he had seen. But the most important passage of all is that in which this writer quotes the description of a shekel seen by Lambron at St. Jean d’Acre, A. D. 1210. He gives inscriptions as above, "the Shekel of Shekus," and "Jerusalem the Holy." but he also determines the weight, which he makes about half an ounce.

We find, therefore, that in early times shekels were known to the Jewish Rabbis with Samaritan inscriptions, corresponding with those now found (except in one point, which is probably an error), and corresponding with them in weight. These are important considerations in tracing the history of this coinage, and we pass on now to the earliest mention of these shekels by Christian writers. We believe that W. Postell is the first Christian writer who saw and described a shekel. He was a Parisian traveller who visited Jerusalem early in the 16th century. In a curious work published by him in 1585, entitled *Apologiae Heb- dometrica Lingvarum* the following passage occurs.

After stating that the Samaritan alphabet was the original form of the Hebrew, he proceeds thus:

> I draw this inference from silver coins of great antiquity, which I found among the Jews. They set such store by them that I could not get one of them (not otherwise worth a quinarius) for two gold pieces. The Jews say they are of the time of Solomon, and they added that, hating the Samaritans as they do, worse than dogs, and never speaking to them, nothing endears these coins so much to them as the consideration that these characters were once in their common usage, nature, as it were, yeaing after the things of old. They say that at Jerusalem, now called Cisus or Chassan-britich, in the monastery and in the deepest part of the ruins, these coins are dug up daily."

Postell gives a very bad wood-cut of one of these shekels, but the inscription is correct. He was unable to explain the letters over the vase, which soon became the subject of a discussion among the learned men of Europe, which lasted for nearly two centuries. Their attempts to explain them are enumerated by Bayer in his Treatise "De Numis Hebrew-Samaritanae," which may be considered as the first work which placed the explanation of these coins on a satisfactory basis. But it would obviously be useless here to record so many unsuccessful guesses as Bayer enumerates. The work of Bayer, although some of the authors nearly solved the problem, called forth an antagonist in Professor Tychsen of Rostock, a learned Orientalist of that period. Several publications passed between them which it is unnecessary to enumerate, as Tychsen gave a summary of his objections, in a small pamphlet, entitled O. G. Tychsen, *De Novis Hebrewicis Distribute, qua simul ad Neposco illis. F. P. Bayeri Objections respondent* (Rostochii, 1791).

His first position is—That either (1) all the coins, whether with Hebrew or Samaritan inscriptions, are false, or (2) if any are genuine, they belong to Barcoceba. This last modifies slightly in a subsequent part of the treatise the conclusion of 52, 53, where he states it to be his conclusion (1) that the Jews had no coined money before the time of our Saviour; (2) that during the rebellion of Barcoceba (or Barcozite), Samaritan money was coined either by the Samaritans to please the Jews, or by the Jews to please the Samaritans, and that the Samaritan letters were used in order to make the coins desirable as amulets! and (3) that the coins attributed to Simon Macabaeus belong to this period. Tychsen has quoted some curious passages, but his arguments are wholly untenable.

In the first place, no numismatist can doubt the genuineness of the shekels attributed to Simon Macabaeus, or believe that they belong to the same epoch as those coins of Barcoceba. But Tychsen never saw a shekel, he was not a competent judge. There is another consideration, which, if further demonstration were needed, would supply a very strong argument. These coins were first made known to Europe through Postell, who does not appear to have been aware of the description given of them in Rabbinical writers. The correspondence of the newly-found coins with the earlier description is almost demonstrative. But they bear such undoubted marks of genuineness, that no judge of ancient coins could doubt them for a moment. On the contrary, to a practical eye, those with Hebrew inscriptions bear undoubted marks of spuriousness."

Among the symbols found on this series of coins is one which is considered to represent that which was called *Labbado* by the Jews. This term was applied to a section called *Rosh Hishonah, or Commencement of the Year*, ch. vii. 1, and the Mishna itself in Sanchoth, where, or Bodi, ch. ii. 1, both of which passages are quoted by Bayer, *De Numa*, p. 123, to the branches of the three trees mentioned in Lev. xxiii. 40, which are thought to be the Palm, the Myrtle, and the Willow. These, which were to be carried by the Israelites at the Feast of Tabernacles, were usually accompanied by the fruit of the Citron, which is also found in this representation. Sometimes two of these *Labado* are found together. At least such is the explanation given by some authorities of the symbols called in the article Money by "Mishna Steni, or The Second Tithe.""

O. T. See Ginsburg, *Commentary on the Song of Songs*, p. 3. The word for polling is different, but the expressions may be analogous. But, on the other hand, these coins are often perforated, which gives condensation to the notion that they were used as amulets. The passage is from the division of the Jerusalem Talmud entitled *Mesechta Moher Shelanu*, or "The Second Tithe."

That the author here made will not be disputed by any practical numismatist. It is made on the authority of the late Mr. T. Burgo, of the British Museum, whose knowledge and skill in these questions was known throughout Europe.
the name of Shekels. The subject is involved in much difficulty and obscurity, and we speak therefore with some hesitation and diffidence, especially as experienced numismatists differ in their explanations. This explanation is, however, adopted by Hoyer (De Num. pp. 128, 219, &c.), and by Cavedoni (Hist. Num., pp. 31, 32) of the German translation, who adds references to 1 Macc. iv. 52; John x. 22, as he considers that the Lulab was in use at the Feast of the Dedication on the 25th day of the 9th month as well as at that of Tabernacles. He also refers to 2 Macc. i. 18, x. 6, 7, where the celebration of the Feast of Tabernacles is described, and the branches carried by the worshippers are specified.

The symbol on the reverse of the shekels, representing a twig with three leaves, appears to bear resemblance to the buds of the pomegranate than to any other plant.

The following list is given by Cavedoni (p. 11 of the German translation) as an enumeration of all the coins which can be attributed with any certainty to Simon Maccabaeus:

I. Shekels of three years, with the inscription Shekel on the obverse with a vase, over which appears (1) the letter Seth with a Bow; (2) the letter Shin with a Vase; (3) the letter Shin with a Vined.

R. On the reverse is the twig with three leaves, and the inscription Jerusalem Kedeshoth or Hekkedoth. . .

II. The same as the above, only half the weight, which is indicated by the word צור,-chatzah, "a half." These occur only in the first and second years.

The above are silver.

III. בכסף הוא נאותם, Shemath Arb'a Châtij. The fourth year—a half. A Citron between two Lulabs.

R. ישובו שנה חסידות, Legendath Tzion, "Of the Liberation of Zion." A palm-tree between two baskets of fruit.

IV. ר' ימים שבשנה, Shemath Arba, Roba. The fourth year—a fourth. Two Lulabs.

R. ישובו שנה סבון, as before. Citron-fruit.

V. ישובו שנה רביעית, Shemath Arba', The fourth year. Lulab between two citrons.

R. ישובו שנה רביעית, Legendath Tzion, as before.

The vase as on the shekel and half-shekel. These are of copper.

Two of the other coins which belong to this series have been sufficiently illustrated in the article Money.

In the course of 1862 a work of considerable importance was published by Breschau by Dr. M. A. Levy, entitled Geschichte der Judischen Münzen. a It appears likely to be useful in the elucidation of the questions relating to the Jewish coinage which have been touched upon in the present volume.

a The spelling varies with the year. The shekel of the first year has only הער תרכז, while those of the second and third years have the fuller form, הער תרכז, הער תרכז. The second of the inscription is important as showing that both modes of spelling were in use at the same time.

b From the time of its publication, it was not available for the article Money; but I am indebted to the author of that article for calling my attention to this book. I was, however, unable to procure it until the article Sheetah was in type.

c The passage from the Jerusalem Talmud, quoted in a former note, is considered by Dr. Levy (p. 127), to be a different explanation given. The word translated by Tychsen "to pollute," is translated by him "to pay" or "to redeem the tithe," which seems better.

There are one or two points on which it is desirable to state the views of the author, especially as he quotes coins which have only become known lately. Some coins have been described in the Recueil Numismatique, (1850, p. 125), to which the name of Eleazar coins has been given. A coin was published some time ago by De Sankey which is supposed by that author to be a counterfeit coin. It is scarcely legible, but it appears to contain the name Eleazar on one side, and that of Simon on the other. During the troubles which preceded the final destruction of Jerusalem, Eleazar and Simon, who was a priest, and Simon Ben Giora, were at the head of large factions. It is suggested by Dr. Levy that money may have been struck which bore the names of both these leaders; but it seems scarcely probable, as they do not appear to have acted in concert. But a copper coin has been published in the Recueil Numismatique which undoubtedly bears the inscription "Eleazar the priest." Its type are—

I. A vase with one handle and the inscription יבשאר המָלֶךְ, "Eleazar the priest," in Samaritan letters.

R. A bunch of grapes with the inscription פָּרָן יבשאר המָלֶךְ וּיבשָׁר, "year one of the redemption of Israel."

Some silver coins also, first published by Reichardt, bear the same inscription on the obverse, under a palm-tree, but the letters run from left to right. The reverse bears the same type and inscription as the copper coins.

These coins are attributed, as well as some that bear the name of Simon or Simeon, to the period of this first rebellion, by Dr. Levy. It is, however, quite clear that some of the coins bearing similar inscriptions belong to the period of Bar-cochba's rebellion (or Barcocha's as the name is often spelled) under Hadrian, because they are stamped upon denomin of Trajan, his predecessor. The work of Dr. Levy will be found very useful as collecting together notices of all these coins, and throwing out very useful suggestions as to their attribution; but we must still look to further researches and fresh collections of these coins for full satisfaction on many points. The attribution of the shekels and half-shekels to Simon Maccabaeus may, however, be considered as well established, and several of the other coins described in the article Money offer no grounds for hesitation or doubt. But still this series is very much isolated from other classes of coins, and the nature of the work hardly corresponds in some cases with the periods to which we are constrained from the existing evidence to attribute the coins. We must therefore still look for further light from future inquiries. Drawings of shekels are given in the article Money.

H. J. R.

*SHE/LACH. [SHELAH, THE POOL OF.] SheLah (סְּלָה, [petition]): סנָלִים. [סנָל

The Pool of,] SHELAH (םֶלֶחֶה, [petition]): סנָלִים, [סנָל

Atx. Alex. in Num., Val. I Chr. ii. 3; Comp.
in Chr., *Nahal*: Seba). 1. The youngest son of Judah by the daughter of Shime the Canaanite, and ancestor of the family of the Shelanites (Gen. xxxviii. 5, 11, 14, 26, xxvi. 12; Num. xxvi. 20; 1 Chr. ii. 3, iv. 21). Some of his descendants are enumerated in a remarkable passage, 1 Chr. iv. 21–23.

2. (םילטנ: *Sele:*) The proper form of the name of Sallah the son of Arphaxad (1 Chr. i. 18, 24).

**Selanites, the** (םילטנ: *Selites*) The descendants of Shelah (1 Num. xxvi. 20).

**Shelemiah (םילטנ: *Seleemia*)**

1. One of the sons of Ithi who had married a foreign wife in the time of Ezra (Ezr. x. 39). Called Selemias in 1 Esdr. ix. 34.

2. (Gen. *Seleemia*; Alex. *Seleemia*; F.A. *Seleemia*: *Seleuaia*). The father of Hanannah (Neh. iii. 30), who assisted in restoring the wall of Jerusalem. If this Hanannah be the same as is mentioned in Neh. iii. 8, Shelania was one of the priests who made the sacred perfumes and incense.

3. (Gen. *Seleemia*; Alex. *Bleemia*; F.A. *Seleemia*: *Seleuma*). A priest in the time of Nehemiah, who was made one of the treasurers over the treasuries of the Levitical titles (Neh. xiii. 13).

4. (Selebias). The father of Jehemuel, or Jemu, in the time of Zedekiah (Jer. xxxvi. 9).

5. The father of Irijah, the captain of the ward who arrested Jeremiah (Jer. xxxvi. 15). In Jer. xxxvi. 11, his name appears in the lengthened form, like the following.

6. ( זאתיא: *Seleemia*; [Var. *Seleamia*]). The same as Meshelemiah and Shalum 8 (1 Chr. xxvi. 14).

7. (ויאויא: *Seleemia, Alex. *meia*, F.A. *meia*: *Selemib*) Another of the sons of Ithi who married a foreign wife in the time of Ezra (Ezr. x. 41).

8. (Seleamias; Alex. *Seleamias*: Seleum [or -em]). Ancestor of Jehudi in the time of Jehoiakin (Jer. xxxvi. 14).

9. (On. in LXX.: Son of Abded; one of those who received the orders of Jehoiakin to take Hurch and Jeremiah (Jer. xxxvi. 26).

**Shelep (םילטנ: *Seleph*) [drawing out, plucking]:** [In Gen., Rom. *Seleph*, in Chr., omits, with Var. *Seleph* [in both]; *Seleph*, Gen. x. 26; 1 Chr. i. 20. The second in order of the sons of Joktan. The tribe which sprung from him has been satisfactorily identified, both in modern and classical times; as well as the district of the Yemen named after him. It has been shown in other articles [Arabia; Joktan, etc.] that the evidence of Joktan’s colonization of Southern Arabia is indisputably proved, and that it has received the assent of critics. Shelep is found where we should expect to meet with him, in the district (Median) at the ancient divisions of the Yemen are called by —

the Arabs) of Sulph (סולף, Marvadth, s. v.), which appears to be the same as Nebuhr’s Selifie (Devar. p. 215), written in his map Selia. He gives the Arabic *Seleph*, with the vowels probably Sulafeereh. Nebuhr says of it, “grande chenille de pays-gouvern. par sepa *Seleche*.” It is situated in N. lat. 14° 30’, and about 60 miles nearly south of San’a.

Besides this geographical trace of Shelep, we have the tribe of Shelef or Shubh, of which the first notice appeared in the *Zeitschrift d. Deutschen, Morgenlandischen Gesellschaft*, xi. 153, by Dr. Oslender, and to which we are indebted for the following information. Yakoet in the *Munjaj*, s. v., says, “Es-Sefi or Es-Sulaf are two ancient tribes of the districts of Yemen; Hisham Ibn-Mohammed says they are the children of Yuktan (Joktan); and Yuktan was the son of Eber the son of Sah of the son of Arphaxad the son of Shem the son of Noah. . . . And a district in El-Yemen is named after the Sulaf.” El-Kalkasenker (in the British Museum library) says, “El-Sulaf, called also Benia-Sulifan, a tribe of the descendants of Kahtan (Joktan). . . . The name of their father has remained with them, and they are called Es-Sulaf: they are children of Es-Sulaf son of Yuktan who is Kahtan . . . Es-Sulaf originally signifies one of the little ones of the partidge, and Es-Sulif is its plural; the tribe was named after that on account of their flocks.” Yakoet also says (s. v. Muniltuk) that El-Muntakib was an idol belonging to Es-Sulaf. Finally, according to the *Kinson* (and the *Lubbial-Lubab*, cited in the Muniltak, s. v.), Sulaf was a branch-tribe of Dhul-Kalan: [a Himyerite family or tribe (Caussin, *Exo* i. 114), not to be confounded with the latter king or Tubil-" of that name].

This identification is conclusively satisfactory, especially when we recollect that Hazaravath (Hadramutt), Shela (Sela), and other Joktanie names are in the immediate neighborhood. It is strengthened, if further evidence were required, by the classical mention of the *Sulamith*, Salaphen, also written *Alamith*, Alpeni (Psal. vi. 7). Bochart puts forward this people, with rare brevity. The more recent researches in Arabic MSS. have, as we have shown, confirmed in this instance his theory; for we do not lay much stress on the point that Potomay’s Salaphen are placed by him in N. lat. 22°.

F. E. P.

**Shelish (סילש):** [trib., Ges.: *Selelys*; [Var. *Seleas*]: Selela). One of the sons of Helen, the brother of Shamer (1 Chr. vii. 23).

**Shelomith (סילומית; [see above]): SHE'LANITES, THE — SHELOMITH** [fore of pence]: *Sulamath*: The daughter of Zerah (Num. xxxiv. 27).

2. (Sulamath; [Var. *Shelamath*; Comp. *Sulamith*]: Sulamith). The daughter of Zerah (1 Chr. iii. 19).

3. (Sulamith: Alex. *Sulamith*): Chief of the Ishirates, one of the four families of the sons of Kohath (1 Chr. xxiii. 18). He is called Shelo- mori in 1 Chr. xxiv. 22.

4. (Sulamith; Keri *Sulamith* in 1 Chr. xxvi. 25: *Sulamith* in 1 Chr. xxvi. 26; *Sulam* in 1 Chr. xxvi. 28; *Sulamith*: *Selemeth*): A descendant of Eileær the son of Moses, who with his
brothers had charge of the treasures dedicated for the Temple in the reign of David.

5. SHELOMOTH 1 [Vat. Aleph: Ἰεραρχὴς, Σαλωμῆ: Σαλωμὴν; Alex. Aleph: Ἰεραρχὴς, Σαλωμῆ: Σαλωμῆν] A Gershonite, son of Shimei (1 Chr. xxii. 9). "Shimei" is probably a mistaken form, as Shelomith and his brothers are afterwards described as chief of the fathers of Ladan, who was the brother of Shimei and the sons of Shimei are then enumerated.

6. SHELOMOTH (Shelemoth, Shelemoth) [Vat. Aleph: Ἰεραρχὴς, Σαλωμῆ: Σαλωμῆ] According to the present text, the sons of Shelomith, with the son of Josiahph at their head, returned from Babylon with Ezra (Ezra vii. 10). There appears, however, to be an omission, which may be supplied from the LXX. and the true reading is probably, "Of the sons of Han, Shelomith the son of Josiahph." See also 1 Esdr. viii. 36, where he is called "Assa-

SHEM (šem, shem) [Verse of peace]; [Vat. Aleph: Σαμᾶ, Σαμᾶ: Σαμᾶ] The same as SHELOMOTH 3 (1 Chr. xxiv. 22).

SHEMULMIEL (šemulmi'el) [friend of God]; [Vat. Aleph: Σαμουλμιήλ: Σαμουλμιήλ] The son of Zorushaddai, and prince of the tribe of Simeon at the time of the Exodus. He had 50,300 men under him (Num. i. 6, ii. 12, vii. 36, x. 19). In Judith (vii. 1) he is called SAMUEL.

SHEM (šem, shem) [name, sign]; [Vat. Aleph: Σαμᾶ: Σαμᾶ] The eldest son of Noah, born (Gen. v. 32) when his father had attained the age of 500 years. He was 98 years old, married, and childless, at the time of the flood. After it, he, with his father, brothers, sister-in-law, and wife, received the blessing of God (ix. 1), and entered into the covenant. Two years afterwards he became the father of Arphaxad (xi. 10) and other children were born to him subsequently. With the help of his brother Japheth, he covered the nakedness of their father, which Canaan and Ham did not care to hide. In the prophecy of Noah which is connected with this incident (xx. 22-27), the first blessing falls on Shem. He died at the age of 600 years.

It is possible that the years accredited to the patriarchs in the present copies of the Hebrew Bible are correct, it appears that Methuselah, who in his first 243 years was contemporary with Adam, had still nearly 100 years of his long life to run after Shem was born. And when Shem died, Abraham was 148 years old, and Isaac had been 9 years married. There are, therefore, but two links — Methuselah and Shem — between Adam and Isaac. So that the early records of the Creation and the Fall of Man, which came down to Isaac, would challenge (apart from their inspiration) the same confidence which is readily yielded to a tale that relates the history of one's own generation, or to the original chief actor in the events related.

There is no chronological improbability in that ancient Jewish tradition which brings Shem and Abraham into personal conference. [MELCHIZEDEK.] A mistake in translating x. 21, which is admitted into the Septuagint, and is followed by the A. V. and Luther, has suggested the supposition that Shem was younger than Japheth (see A. Pfeiffer Opera, p. 301). There can be, however, no doubt see Rosenmuller, loc. cit., with whom Gesenius, Thesaurus, p. 1433, seems to agree) that the trans-

SHEMAH 2 (shemah) [thear inhib, rumor]; in Josh.] 32. 3. [Vat. Aleph: Σαμα: Σαμᾶ] One of the towns of Judah. It lay in the region of the south, and is named between AMAM and MOADAD (Josh. xxvi. 27). In the list of the towns of Simeon selected from those in the south of Judah, Sheba takes the place of Shem, probably by an error of transcription or a change of pronunciation. The genealogical lists of 1 Chr. (ii. 43, 44) inform us that Shema originally proceeded from Hebron, and in its turn colonized Moab.

G.

SHEMAH (šemah) [rumor]; [Vat. Aleph: Σαμα: Σαμᾶ] 1. A Reubenite, ancestor of Bela (1 Chr. v. 8). 2. (Sama). Son of Elpaaz, and one of the heads of the fathers of the inhabitants of Ajalon who drove out the inhabitants of Gath (1 Chr. vii. 13).

SHEM (šem, shem) [name, sign]; [Vat. Aleph: Σαμᾶ: Σαμᾶ] 1. A Reubenite, ancestor of Bela (1 Chr. v. 8). 2. (Sama). Son of Elpaaz, and one of the heads of the fathers of the inhabitants of Ajalon who drove out the inhabitants of Gath (1 Chr. vii. 13). Probably the same as SHIMIH.

3. (Sama: Σαμᾶς) One of those who stood at Ezra's right hand when he read the Law to the people (Neh. viii. 4). Called SAMES, 1 Esdr. iv. 49.

SHEMJAH 3 (shema') [rem., see above]; [Vat. F. A. Σαμα: Σαμᾶ] 1. A Benjamite of Gibeah, and father of Ahiezer and Joshah, two warriors of their tribe who joined David at Ziklag (1 Chr. xii. 3). His name is written
Shemaiyah

with the article, and is properly 'Hashemaiyah.' The margin of A. V. gives "Hasanaiah.

Shemaiyah [3 xlv.] [טנפ] (Jeroboam (Jeho"

chronicles. [Vat. in 1 Chr. xii., Shemaiyah =

Semeiahs]. 1. A prophet in the reign of Rehoboam. When the king had assembled 180,000 men of Ben-

jamin and Judah to reconquer the northern king-

dom after its revolt, Shemaiyah was commissioned to charge them to return to their homes, and not to

war against their brethren (1 K. xii. 22; 2 Chr. xi. 2). His second and last appearance upon the

stage was upon the occasion of the invasion of Judah and siege of Jerusalem by Shishak, king of Egypt. His

message was then one of comfort, to assure the

princes of Judah that the punishment of their

Hololly should not come by the hand of Shishak

(2 Chr. xii. 5, 7). This event is in the order of

narrative subsequent to the first, but from some

circumstances it would seem to have occurred be-

fore the disruption of the two kingdoms. Compare xii.

1, where the people of Rehoboam are called "Israel;" and xii. 5, 6, where the princes are called indiffer-

ently "of Judah" and "of Israel." He wrote a

chronicle containing the events of Rehoboam's reign

(2 Chr. xii. 19). In 2 Chr. xii. 2 his name is

given in the lengthened form טנפ.

2. (Shemaiyah: [in Neh., F.A. Shemaiyah =

Shemaiyah, Semeiahs]. The son of Shechaniah, among the de-

scendants of Zerubbabel (1 Chr. iii. 22). He was

keeper of the east gate of the city, and restored

Nehemiah in restoring the wall (Neh. iii. 29). Lord

A. Hervey (Genedal, p. 107) proposes to omit the

words at the beginning of 1 Chr. iii. 22 as spurious,

and to consider Shemaiyah identical with Shemel-

5, the brother of Zerubbabel.

3. (Shemaiyah: [Vat. Semeiahs =

Semeiahs]. An-

cestor of Zerai, a prince of the tribe of Simeon (1

Ch. iv. 37). Perhaps the same as Shemaiyah.

4. (Shemaiyah: [Vat. Semeiahs =

Semeiahs]. Son

of Joel a Reubenite; perhaps the same as Shema (1

Ch. vi. 4). See Joel 5.

5. (Shemaiyah: Semeiahs]. Son of Hashball, a Me-

rarite Levite who lived in Jerusalem after the Captivity (1

Ch. ix. 14; Neh. xi. 15), and had oversight of the outward business of the house of God.

6. (Shemaiyah: [Vat. Semeiahs: Alex. Shemaiyah =

Semeiahs]. Father of Obadiah, or Ada, a Levite who

returned to Jerusalem after the Captivity (1

Ch. ix. 16). He is elsewhere called Shammua (Neh.

xi. 17).

7. (Shemaiyah: [Vat. Semeiahs: F.A. Shemaiyah =

Semeiahs]. Alex. Osmea, Semeiahs (Semeiahs). Son

of Eliashaph, and chief of his house in the reign of David (1

Ch. xiv. 8, 11). He took part in the

ceremonial with which the king brought the

Ark from the house of Obad-elon.

8. (Shemaiyah: Alex. Semeiahs =

Semeiahs]. A

Levite, son of Nathaniah, and also a scribe in the

time of David. He registered the divisions of the

priests by lot into twenty-four orders (1

Ch. xxiv. 6).

9. (Shemaiyah: Rom. Vat. ver. 7, Semeiahs]. Alex.

Semeiahs. (Semeiahs) The eldest son of Obad-elon the Gittite. He and his brethren and

his sons were gate-keepers of the Temple (1

Ch. xxvi. 4, 6, 7).

10. (Shemaiyah: Alex. Semeiahs =

Semeiahs]. A

descendant of Judah, the singer who lived in the

reign of Hezekiah (2

Ch. xxix. 14). He as-

sisted in the purification of the Temple and the

reformation of the service, and with Uziel repre-

sented his family on that occasion.

11. (Shemaiyah: Alex. Semeiahs =

Semeiahs]. One

of the sons of Adonijah who returned in the second
caravan with Ezra (Ezra viii. 13). Called Shemaiyah

in 1 Esdr. viii. 39.

12. (Shemaiyah: [Vat. Semeiahs =

Semeiahs]. One

of the "heads" whom Ezra sent for to his camp by the river of Ahava, for the purpose of ob-

taining Levites and ministers for the Temple from

the people of the Tenem (Ezra viii. 16). Called Mas-

man in 1 Esdr. viii. 43.

13. (Shemaiyah: Semeiahs]. A priest of the family of

Harim, who put away her foreign wife at Ezra's

tidling (Ezr. x. 21). He is called Semeiahs in 1

Esdr. ix. 21.

14. (Shemaiyah: [Vat. Semeiahs: F.A. Shemaiyah =

Semeiahs]. A leman of Israel, son of another Har-

rim, who also had married a foreigner (Ezr. x. 31).

Called Semeiahs in 1 Esdr. ix. 32.

15. (Shemaiyah: [Vat. F.A. Semeiahs =

Semeiahs]. Son

of Tehalah the son of Mede-abed, a prophet in the time of Nehemiah, who was bribed by Sanballat and

his confederates to frighten the Jews from the

task of rebuilding the wall, and to put Nehemiah to

death in fear (Neh. xii. 10). In his assumed terror he

appears to have shut up his house and to have prop-

osed that all should retire into the Temple and

close the doors.

16. (Shemaiyah, Semeiahs. Alex. [rather F.A.] Shemaiyah

in Neh. xii. 5, 18; Vat. Alex. F.A. omit, and so Rom. ver. 6; in Neh. xii. 35, Shemaiyah =

Semeiahs. (Semeiahs). The head of a priestly

house who signed the covenant with Nehemiah (Neh. x. 5). His family went up with Zerubbabel,

and were represented in the time of Joiakim by Je-

nhomath (Neh. xii. 5, 18). Probably the same

who is mentioned again in Neh. xii. 35.

17. (Shemaiyah: [Vat. Alex. Shemaiyah =

Semeiahs]. One of the princes of Judah who went in procession with Ezra, in the right hand of the two thanksgiving companies who celebrated the solemn dedication of the wall of Jeru-

salem (Neh. xii. 34).

18. (Shemaiyah: [Semeiahs]. One of the choir who

took part in the procession with which the dedica-

tion of the new wall of Jerusalem by Ezra was ac-

companied (Neh. xii. 36). He appears to have been a Gershonite Levite, and descendant of Asaph, for

reasons which are given under Mattathiah 2.

19. (Rom. in Vat. MS. [also Rom. Alex. F.A.].

Alex. [rather F.A.] Shemaiyah]. A priest who blew

a trumpet on the same occasion (Neh. xii. 42).

20. (Shemaiyah: [F.A. Shemaiyah =

Semeiahs]. Shemaiyah the Nehemiahite, a false prophet in the

time of Jeremiah. He prophesied to the people of

the Captivity in the name of Jehovah, and attempted to conterfete the influence of Jeremiah's advice that

they should settle quietly in the land of their exile,

build houses, plant vineyards, and wait patiently for the period of their return at the end of seventy

years. His animosity to Jeremiah exhibited itself in the more active form of a letter to the high-priest

Zephaniah, urging him to exercise the functions of his

office, and lay the prophet in prison and in the

stocks. The letter was read by Zephaniah to Jer-

emiah, who instantly pronounced the message of

doom against Shemaiyah for his presumption, that

he should have none of his family to dwell among

the people, and that himself should not live to see

their return from captivity (Jer. xxxix. 21-22). He
SHEMARIAH

name is written in ver. 24 in the lengthened form שֶׁמֶרִיאָה.

21. (םנָּת נָא; [Vat. סָמאַיָא; Alex. סָמאַיוֹי:—Xסָפָי.] : A Levite in the third year of Jehoshaphat, who was sent with other Levites, accompanied by two priests and some of the princes of Judah, to teach the people the book of the Law (2 Chr. xvii. 8).

22. (סָּמֵי: [Vat. סָּמֵי: : Semaios.] One of the Levites in the reign of Hezekiah, who were placed in the cities of the priests to distribute the tithes among their brethren (2 Chr. xxxvi. 15).

23. (םָנָּת נָא: [Vat. סָּמֵי: : Semaios.] A Levite in the reign of Josiah, who was sent at the time of Joshua, to the land of Geshur, to which place Johannine passed over (2 Chr. xxxix. 9). He is called the brother of Conaniah, and in 2 Chr. xxxii. 12 we find Conaniah and Shimei his brother mentioned in the reign of Hezekiah as chief Levites; but if Conaniah and Shimei are the names of persons and not of families, they cannot be identical, nor can Shemiashe be the same as Shemai, who lived at least eighty-five years before him.

24. (פָּמָּה: [F. אָס וּס. נָא: Semaios.] The father of Urijah of Kirjath-jearim (Jer. xxvi. 20).

W. A. W.

SHEMARIAH (שֶׁמֶרִיאָה) [whom Jehovah has helped]: [Vat. סָמאַיָא; Alex. סָמאַיָא; Semaios.] 1. One of the Benjamite warriors, "helpers of the battle," who came to David at Ziklag (1 Chr. xii. 5).

2. (םנָּת נָא: [Vat. סָמאַיָא: Semaios.] One of the family of Harim, a layman of Israel, who put away his foreign wife in the time of Ezra (Ezr. x. 32).

3. ([Vat. FA. סָמאַיָא: Alex. סָأمر: Semaios.] One of the family of Bani, under the same circumstances as the preceding (Ezr. x. 31).

SHEMETER (שֵׁמֵרֶת) [light, flight, Gez.]: [Vat. סָּמֵרֶת: Semeter.] King of Zel'icon, and ally of the king of Sodom when he was attacked by the northeastern invaders under Chedorlaomer (Gen. xiv. 2). The Sam. Text and Version give it Shemebel.

SHEMER (שֵׁמֶר) [kept, thence keen of view]: [Vat. בָּשָׁמַר: Samer.] The owner of the hill on which the city of Samaria was built (1 K. xvi. 24), and after whom it was called Shomerou by its founder Omri, who bought the site for two silver talents. We should rather have expected that the name of the city would have been Shimron, from Shemer; for Shomerou would have been the name given after an owner Shomer. This latter form, which occurs 1 Chr. vii. 22, appears to be that adopted by the Vulgate and Syriac, who read Sumer and Shemar respectively; but the Vat. MS. of the LXX. retains the present form "Shemer," and changes the name of the city to Σεμερον or Σεμυρον [so Iou., but Vat. Samerov]. W. A. W.

SHEMIDA (שֶׁמֶדָה) [name of knowledge]: [Vat. סָמאַדָה; Alex. סָמאַדָא; Semida.] A son of Gilead, and ancestor of the family of the Shemidaites (Num. xxxii. 32; Josh. xvii. 2). Called Shemidiah in the [later editions of the] A. V. of 1 Chr. vii. 19.

SHEMIDAH (שֶׁמֶדָה) [see above]: [Vat. סָמאַדָה: Semida.] The same as Shemida the son of Gilead (1 Chr. viii. 19). [The name is here spelled Shemida in A. V. ed. 1911. — A.]

SHEMIRAMOTH

SHEMIRAMOTH, THE (םֵרַאָמָת הָעִם [see above]): [Vat. סָמאַרָמָא; Alex. Semiramath, 1 Chr. xviii. 18; [Vat. FA. Semiramath, 1 Chr. xviii. 18; [Vat. Semiramath, Semiramath, F.A. Semiramath, 1 Chr. xvi. 20]; [Vat. Semiramath, Semiramath, 1 Chr. xvi. 5; Semiramath], 1. A Levite of the second degree, appointed to play with a psaltery on Alamon, in the choir formed by David. He was in the division which Asaph led with cymbals (1 Chr. xv. 18, 20; xvi. 5).

2. (Semiramath): [Vat. Semiramath.] A Lo
3. Varieties of the great Semitic language-family are to be found in use in the following localities within the area named. In those ordinarily known as Syria, Mesopotamia, Babylonia, and Assyria, there prevailed Aramaic dialects of different kinds, e. g. Biblical Chaldee—that of the Targums and of the Syriac versions of Scripture—to which may be added other varieties of the same stock—as that of the Palmyrene inscriptions—and of different Sabian fragments. Along the Mediterranean seaboard, and among the tribes settled in Caanan, must be placed the home of the languages of the canonical books of the old Testament, among which were interspersed some relics of that of the Phoenicians. In the south, amid the seclusion of Arabia, was preserved the dialect destined at a subsequent period so widely to surpass its sisters in the extent of territory over which it is spoken. A variety, allied to this last, is found to have been domicilized for a long time in Abyssinia.

In addition to the singular tenacity and exclusiveness of the Semitic character, as tending to preserve unaltered the main features of their language, we may allow a good deal for the tolerably uniform climate of their geographical locations. But (as compared with variations from the parent stock in the Japhetic family) in the case of the Semitic, the adherence to the original type is very remarkable. Turn where we will, from whatever causes springing, the same tenacity is discernible—whether we look to the simple pastoral tribes of the wilderness—the fierce and rapacious inhabitants of mountain regions—the craftsmen of cities, the tillers of the soil, or the traffickers in distant marts and havens.

The following table is taken from Professor M. Müller's late volume On the Science of Language (p. 381)—a volume equally remarkable for research, fidelity, and graphic description.

**Genealogical Table of the Semitic Family of Languages.**

Few inquiries would be more interesting, were sufficiently trustworthy means at hand, than that into the original Semitic dialect, and as to whether or not the Aramaic was—not only in the likeness, but in the language of the tribes external to Arabia (in the earliest period of their history) closely resembled, or was in fact a better variety of Aramaic. This notion is corroborated by the traces still discernible in the Scriptures of Aramaisms, where the language (as in poetical fragments) would seem to have been preserved in a form most nearly resembling its

why we should abandon the Hebrew sound because the French find the pronunciation difficult.

a "La dénomination de sémithiques ne peut avoir d'inconvénient, du moment qu'on la prend comme une simple appellation conventionnelle et que l'on n'est pas éclairé sur ce qu'elle renferme de profondément inférieur." (Renan, Hist. Gen. des Langues Sémithiques.)

b English scholars have lately adopted, from the French, the term "Sémithique;" but there is no reason
4. The history of the Semitic people tells us of various movements undertaken by them, but supplies no remarkable instances of their assimilation. Though carrying with them their language, institutions, and habits, they are not found to have struck root, but remained strangers and exotics in several instances, passing away without traces of their occupancy. So late as the times of Augustine, a dialect, derived from the old Phoenician settlers, was spoken in some of the more remote districts of Roman Africa. But no traces remained of the power, or arts of the former lords of sea and land, from whom these fragments were inherited. Equally striking is the absence of results, from the occupation of a vast aggregate of countries by the victorious armies of Ishma. The centuries since elapsed prove in the clearest manner, that the vocation of the Arab branch of the Semitic family was not to leave the nations whom their first ascent had proselyte. They brought nothing with them but their own stern, subjective, unseizable religion. They borrowed many intellectual treasures from the conquered nations, yet were these never fully engraven upon the alien Semitic nature, but remained, under the most favorable circumstances, only external adjuncts and ornaments. And the same incertitude isolation still characterizes tribes of the race, when on new soil.

5. The peculiar elements of the Semitic character will be found to have exercised considerable influence on their literature. Indeed, accordance is shown more close, than in the case of the Semitic race (where not checked by external causes) between the generic type of thought, and its outward expression. Like other languages, this one is mainly readable into monosyllabic primitives. These, as far as they may be traced by research and analysis, carry us back to the early times, when the broad line of separation, to which we have been so long accustomed, was not yet drawn between the Japhetic and the Semitic languages. Instances of this will be brought forward in the sequel, but subsequent researches have sufficiently confirmed the antecedence of Holleis' prediction of the ultimate recognition of the affinities between Sanskrit (= the Indo-Germanic family) and Arabic (= the Semitic) in the main groundwork of language, in monosyllables, in the names of numbers, and the appellations of such things, as would be first discriminated on the immediate dawn of civilization.

These monosyllabic primitives may still be traced in the principal parts of speech — the verb and the noun. Secondary notions, and those of relation, are grouped round the primary ones of meaning in a single word, susceptible of various internal changes according to the particular requirement. Hence, in the Semitic family, the prominence of formation, and that mainly internal (or contained within the root form). By such insinuability are expressed the differences between nom and verb, adjective and substantive. This mechanism, within certain limits, invests the Semitic languages with considerable freshness and sharpness: but, as will be seen in the sequel, this language-family does not (for higher purposes) possess distinct powers of expression equal to those possessed by the Japhetic family. Another leading peculiarity of this branch of languages is the absence (save in the case of proper names of compound words — to which the sister family is indebted for so much life and variety. In the Semitic family — acquisition, not logical sequence — independent roots, not compound appropriate derivations from the same root, are used to express remote and various kinds of things. This investment modifies in a particular notion. Logical sequence is replaced by simple material sequence.

Both language-families are full of life; but the life of the Japhetic is organic — of the Semitic, an aggregate of units. The one looks around to be taught, and passes to gather up its lessons into form and shape: the other contains a lore within itself, and pours out its thoughts and fancies as they arise.

6. The Hebrew language is a branch of the so-called Semitic family, extending over a large portion of Southwestern Asia. The development and culture of this latter will be found to have been considerably influenced by the situation or fortunes of its different districts. In the north (or Aram, under which designation are comprehended Syria, Mesopotamia, Babylonia), and under a climate partially cold and ungenial — in the close proximity of tribes of a different origin, and ungenially masters by conquest — the Semitic dialect became in places harsher, and its general character less pure and distinct. Towards the south, opposite causes contributed to maintain the language in its purity. In Arabia, preserved by many causes from foreign invasion, the language maintained more euphony and delicacy, and exhibited greater variety of words and construction. A reference to the map will serve to explain this — lying as did Judaea between Aram and Arabia, and chiefly inhabited by the Hebrew race, with the exception of Canaanite and Phoenician tribes. Of the language of these last few distinctive remains have hitherto been brought to light. But its

\[\text{SHEMITIC LANGUAGES AND WRITING}\]

\[\text{original one:}^a \text{and also from the relationships which may be detected between the Aramaic and the earliest monument of Arabic speech — the Hinnaritic fragments.}^b\]

\[\text{Through carrying with them their language, institutions, and habits, they are not found to have struck root, but remained strangers and exotics in several instances, passing away without traces of their occupancy. So late as the times of Augustine, a dialect, derived from the old Phoenician settlers, was spoken in some of the more remote districts of Roman Africa. But no traces remained of the power, or arts of the former lords of sea and land, from whom these fragments were inherited. Equally striking is the absence of results, from the occupation of a vast aggregate of countries by the victorious armies of Ishma. The centuries since elapsed prove in the clearest manner, that the vocation of the Arab branch of the Semitic family was not to leave the nations whom their first ascent had proselyte. They brought nothing with them but their own stern, subjective, unseizable religion. They borrowed many intellectual treasures from the conquered nations, yet were these never fully engraven upon the alien Semitic nature, but remained, under the most favorable circumstances, only external adjuncts and ornaments. And the same incertitude isolation still characterizes tribes of the race, when on new soil.}^c\]

\[\text{These monosyllabic primitives may still be traced in the principal parts of speech — the verb and the noun. Secondary notions, and those of relation, are grouped round the primary ones of meaning in a single word, susceptible of various internal changes according to the particular requirement. Hence, in the Semitic family, the prominence of formation, and that mainly internal (or contained within the root form). By such insinuability are expressed the differences between nom and verb, adjective and substantive. This mechanism, within certain limits, invests the Semitic languages with considerable freshness and sharpness: but, as will be seen in the sequel, this language-family does not (for higher purposes) possess distinct powers of expression equal to those possessed by the Japhetic family. Another leading peculiarity of this branch of languages is the absence (save in the case of proper names of compound words — to which the sister family is indebted for so much life and variety. In the Semitic family — acquisition, not logical sequence — independent roots, not compound appropriate derivations from the same root, are used to express remote and various kinds of things. This investment modifies in a particular notion. Logical sequence is replaced by simple material sequence. Both language-families are full of life; but the life of the Japhetic is organic — of the Semitic, an aggregate of units. The one looks around to be taught, and passes to gather up its lessons into form and shape: the other contains a lore within itself, and pours out its thoughts and fancies as they arise.}^d\]

\[\text{§§ 6-13. — Hebrew Language. — Period of Growth.}\]

\[\text{The Hebrew language is a branch of the so-called Semitic family, extending over a large portion of Southwestern Asia. The development and culture of this latter will be found to have been considerably influenced by the situation or fortunes of its different districts. In the north (or Aram, under which designation are comprehended Syria, Mesopotamia, Babylonia), and under a climate partially cold and ungenial — in the close proximity of tribes of a different origin, and ungenially masters by conquest — the Semitic dialect became in places harsher, and its general character less pure and distinct. Towards the south, opposite causes contributed to maintain the language in its purity. In Arabia, preserved by many causes from foreign invasion, the language maintained more euphony and delicacy, and exhibited greater variety of words and construction. A reference to the map will serve to explain this — lying as did Judaea between Aram and Arabia, and chiefly inhabited by the Hebrew race, with the exception of Canaanite and Phoenician tribes. \[e \text{"The name of their country, הָדָּ֖עָ֣ם, = the land of immigration, — points to the fact that the}\]
general resemblance to that of the Terachite settlers is beyond all doubt, both in the case of the Hamite tribes, and of the Phæistine tribes, another branch of the same stock.

Originally, the language of the Hebrews presented more affinities with the Aramaic, in accordance with their own family accounts, which bring the Patriarchs from Ur of the Chaldees, through the plains of Shem, to the borders of Ararat, a branch of the mountainous ranges of northern Mesopotamia. In consequence of vicissitude, as was to be anticipated, many features of resemblance to the Arabic may be traced; but subsequently, the Hebrew language will be found to have followed an independent course of growth and development.

7. Two questions, in direct connection with the early movements of the ancestors of the subsequent Hebrew nation, have been discussed with great earnestness by many writers— the first bearing on the causes which set the Terachite family in motion towards the south and west; the second, on the origin and language of the tribes in possession of Canaan at the arrival of Abraham.

Of the first, it is clear there were five sons of Shem—Elam, Asshur, Arphaxad, Lud, and Aram. The last of these (or rather the peoples descended from him) will be considered subsequently. The fourth has been supposed to be either the progenitor (or the collective appellation) of the tribes which originally occupied Canaan and the so-called Semitic regions to the south. Of the remaining three, the tribes descended from Elam and called by his name were probably subjugated at an early period, for in Gen. xiv. mention is made of the headship of an anti-Terachite league being vested in the king of Elam, Chedorlaomer, whose name points to a Cushite origin. Whether Semitic occupation was succeeded at once (in the case of Elam*) by Aryan, or whether a Cushite (Hamite) domination intervened, cannot now be decided. But in the case of the second, Asshur, there can be little doubt, on the showing of Scripture (Gen. x. 11), that his descendents were disturbed in their home by the advance of the clearly traceable Cushite stream of population, flowing upwards on a return course through Arabia, where plain marks are to be found of its presence. When we bear in mind the strongly marked differences existing between the Semitic and Cushite (= Hamite) races in habits and thought, and the manifestation of God's wrath left on record, we can well understand the uneasiness and a desire of removal among the Semitic population of the plains by the river. Scripture only tells us that, led in a way which they knew not, chosen Semite wanderers of the lineage of Arphaxad set forth on the journey fraught with such enduring consequences to the history of the world, as recorded in Scripture, in its second stage of progress. There is at least nothing unreasonable in the thought, that the movement of Terah from Ur of the Chaldees (if modern scholarship is right in the locality selected) was caused by Divine suggestion, acting on a mind all at ease in the neighborhood of Cushite thought and habits. It may be that the active cause of the movement recorded in Gen. xi. 31 was a renewed manifestation of the One True God, the influences of which were to be stamped on all that was of Israel, and not least palpably on its language in its purity and proper development. The leading particulars of that memorable journey are preserved to us in Scripture, which is also distinct upon the fact, that the new comers and the earlier settlers in Canaan found no difficulty in conversing. Indeed, neither at the first entrance of Terachites, nor at the return of their descendants after their long sojourn in Egypt, does there appear to have been any difficulty in this respect. In the case of any of the numerous tribes of either Semitic or Hamitic origin of which mention is made in Scripture. But, as was to be expected, very great difference of opinion is to be found, and very much learned discussion has taken place, as to whether the Terachites adopted the language of the earlier settlers, or established their own in its place. The latter alternative is hardly probable, although for a long time, and among the earlier writers on Biblical subjects, it was maintained with great earnestness— Walton, for example, holding the advanced knowledge and civilization of the Terachite immigration in all important particulars. It may be doubted, with a writer of the present day, whether this is a sound line of reasoning; and whether — this contrast between the inferiority of the chosen people in all secular advantages, and their preeminence in religious privileges, — is not — an argument which cannot be too strongly insisted on by a Christian advocate. The whole history of the Jewish people anterior to the advent of Christ would seem to indicate that any great early amount of civilization, being built necessarily on closer intercourse with the surrounding peoples, would have tended to retard rather than promote the object for which the people was chosen. The probability is, that a great original similarity existing between the dialects of the actual possessors of the country in their various localities, and that of the immigrants, the latter were less likely to impart than to borrow from those who were advanced neighbors.

On what grounds is the unbroken similarity of the dialect of the Terachites to that of the occupants at the time of their immigration, to be explained? Of the origin of its earliest occupants, known to us in the sacred records by the mysterious and boding names of Nephiel, Zammunamum, and the like, and of whose probable Eilitic six traces have been brought to light by recent travelers, history records nothing certain. Some assert that no reliable traces of Semitic language are to be found north of Mount Taurus, and claim for the early inhabitants of Asia Minor a Japhetic origin. Others affix the descent of these early tribes from Lud, the fourth son of Shem, and their migration from "Lydia to Arabia Petraea and the southern borders of Palestine." But these must

Philistines did not reach the line of coast from the interior at all events? (Quart. Rev. xxix. 122).

The word Elam is simply the pronunciation, according to the organs of Western Asia, of Elam—= Armenia, Armenia, in r. 41, on the authority of Burnouf and M. Müller; J. G. Müller, R. E. xiv. 53; R. Wilkinson, Journal of Asiat. Society, xvi. 222.

have disappeared at an early period, no mention being made of them in Gen. x., and their remains being only alluded to in references to the tribes which, under a well-known designation, we find in occupation of Palestine on the return from Egypt.

8. Another view is that put forward by our countryman Rawlinson, and shared by other scholars.  

"Either from ancient monuments, or from tradition, or from the dialects now spoken by their descendants, we are authorized to infer that at some very remote period, before the rise of the Semitic or Arvan nations, a great-Semitic" (= Hamitic) "population must have overspread Europe, Asia, and Africa, speaking languages all more or less dissimilar in their vocabulary, but possessing in common certain organic characteristics of grammar and construction."  

And this statement would appear, in its leading features, to be historically sound. As was to be anticipated, both from its importance and from its extreme obscurity, few subjects connected with Biblical antiquities have been more warmly discussed than the origin of the Canaanite occupants of Palestine. Looking to the authoritative records (Gen. x. 18, 19; xx. 20) there would seem to be no reason for doubt as to the Hamitic origin of these tribes. Nor can the singular accordance discernible between the language of these Canaanites (= Hamitic) occupants, and the Semitic family be justly placed in bar of this view of the origin of the former. "If we examine the invincible ethnography of the book of Genesis we shall find that, while Ham is the brother of Shem, and therefore a relationship between his descendants and the Semitic nations fully recognized, the Hamites are described as those who previously occupied the different countries into which the Arabian race afterwards forced their way. Thus Scripture (Gen. x. 6; xx. 20) attributes to the race of Ham not only the original population of Canaan, with its wealthy and civilized communities on the coast, but also the mighty empires of Babylon and Nineveh, the rich kingdoms of Sheba and Havalah in Arabia Felix, and the wonderful realm of Egypt. There is every reason to believe — indeed in some cases the proof amounts to demonstration — that all these Hamitic nations spoke languages which differed only dialectically from those of the Syro-Arabic family."  

9. Connected with this subject of the relationship discernible among the early Neo-Hittite is that of the origin and extension of the art of writing among the Semites, the branch with which we are at present concerned. Our limits preclude a discussion upon the many theories by which the student is still bewildered: the question would seem to be, in the case of the Terachite branch of the Semitic stock, did they acquire the art of writing from the Phoenicians, or Egyptians, or Assyrians — or was it evolved from given elements among themselves?  

But while the truth with respect to the origin of Semitic writing is as yet involved in obscurity, there can be no doubt that an indelible influence was exercised by Egypt upon the Terachite branch in this particular. The language of Egypt cannot be considered as a bar to this theory, for, in the opinion of most who have studied the subject, the Egyptian language may claim an Asiatic, and indeed a Semitic origin. Nor can the changes wrought by justly attributed to the Hyksos, instead of the Egyptians. These people, when scattered after their long sojourn, doubtless carried with them many traces and results of the superior culture of Egypt; but there is no evidence to show that they can be considered in any way as instructors of the Terachites. The claim, so long accepted in, of the Phoenicians in this respect, has been set aside on distinct grounds. What was the precise amount of cultivation, in respect of the art of writing, possessed by the Terachites at the immigration or at their removal to Egypt, we cannot now tell; — probably but limited, when estimated by their social position. But the Exodus found them possessed of that priceless treasure, the germ of the alphabet of the civilized world, built on a pure Semitic basis, but modified by Egyptian culture. "There can be no doubt that the phonetic signs are subsequent to the objective and determinative hieroglyphics, and showing as they do a much higher power of abstraction, they must be considered as infinitely more valuable contributions to the art of writing. But the Egyptians have conferred a still greater boon on the world, if their hieroglyphics were to any extent the origin of the Semitic, which has formed the basis of almost every known system of letters. The long continuance of a pictorial and figurative system of writing among the Egyptians, and their low, and after all, imperfect syllabarium, must be referred to the same source as their pictorial and figurative representation of their idea of the Deity: just as, on the contrary, the early adoption by the people of Israel of an alphabet properly so called, must be regarded as one among many proofs which they gave of their powers of abstraction, and consequently of their fitness for a more spiritual worship."  

10. Between the dialects of Aram and Arabia, that of the Terachites occupied a middle place — superior to the first, as being the language in which are preserved references to the great prophets and poets — wise, learned, and eloquent — and different from the second (which does not appear in history until a comparatively recent period) in its antique simplicity and modesty.  

The dialect which we are now considering has never been properly designated as that of the Hebrews, rather than of the Terachites, apparently for the following reason. The appellation Hebrew is of old standing, but has no reference to the history of the people, as connected with its glories or eminence, while that of Israel is bound up with its historical grandeur. The people is addressed as Israel by their..."
priests and prophets, on solemn occasions, while by
foreigners they are designated as Hebrews (Gen. XL
15), and ruled by some of their own early writers,
where no point is raised in connection with their
religion (Gen. xliii. 32; Ex. xxi. 2; 1 Sam. XIII.
3, 7, xiv. 21). It was long assumed that their
designation (ברע = ol 페루) had reference
to Eber, the ancestor of Abraham. More probably
it should be regarded as designating all the Semitic
tribes. But in either case, the
language of Canaan” has been used instead (Is. xix. 18),
but in this passage the country of Canaan is con-
trasted with that of Egypt. The expression “the
Jews’ language” (Is. xxxvi. 11, 13) applies merely
to the dialect of the kingdom of Judah, in all
probability, more widely used after the fall of
Samaria.
11. Many causes, all obvious and intelligible,
combined to make difficult, if not impossible, any
formal or detached account of the Hebrew lan-
guage anterior to its assuming a written shape.
But various reasons occur to render difficult, even
within this latter period, such a reliable history of
the Hebrew language as befits the exceeding in-
terest of the subject. In the first place, very little
has come down to us, of what appears to have been
an extensive and diversified literature. Where the
facts requisite for a judgment are so limited, any
attempt of the kind is likely to mislead, as being
built on speculations, erecting into characteristics
of an entire period what may be simply the peculi-
arities of the author, or incidental to his subject or
style. Again, attempts at a philological history of
the Hebrew language will be much impeded by the
fact — that the chronological order of the ex-
tant Scriptures is not in all instances clear — and
that the history of the Hebrew nation from its
settlement to the seventh century B.C. is without
changes or progress of the marked and promi-
nent nature required for a satisfactory critical
judgment. Unlike languages of the /Japhetic
stock, such as the Greek or German, the Hebrew
language, like all her Semitic sisters, is firm and
hard as from a mould — not susceptible of change.
In addition to these characteristics of their lan-
guage, the people by whom it was spoken were
of a retired and exclusive cast, and, for a long time,
except from foreign sway. The dialects also of the
few conterminous tribes with whom they had
intercourse were allied closely with their own.
The extent remains of Hebrew literature are
indefinite of any important changes in language,
during the period from Moses to the Captivity. A
certain and intelligible amount of progress, but no
considerable or remarkable difference (according to
one school), is really observable in the language of
the Pentateuch, the books of Joshua, Judges, Ruth,
Samuel, the Kings, the Psalms, or the prophecies
of Isaiah, Hosea, Amos, Joel, Micah, Nahum.

a M. Müller, Science of Language, pp. 57-58; a most
attractive passage. Förster, Voice of Israel, 71.

b Viele auch, was uns jetzt zum ersten Male in den
Denkmäler der mazedonischen Weltweit begegnet, mag

Habakkuk, and Jeremiah — widely separated from
each other by time as are many of these writings.
Grammars and lexicons are confidently referred to
for supplying abundant evidence of unchanged mat-
terials and fashioning; and foreign words, when
occurring, are easily to be recognized under their
Semitic dress, or their introduction as easily to
be explained.

At the first sight, and to modern judgment, much of this appears strange, and possibly unten-
able. But an explanation of the difficulty is in the modern residence of the Hebrew people,
without removal or modulation — a feature of his-
try not unexpected or surprising in the case of a
people preserved by Providence simply as the guar-
dians of a sacred deposit of truth, not yet ripe for
publication. An additional illustration of the im-
mutity from change, to be drawn from the his-
tory of the other branches of the Semitic stock.
The Aramaic dialect, as used by various writers for
even hundred years, although inferior to the He-
brew in many respects, is almost without change,
and not essentially different from the language of
Daniel and Ezra. And the Arabic language, sub-
sequently to its second birth, in connection with
Mohammedanism, will be found to present the
same phenomena.

12. Moreover, is it altogether a wild conjecture
to assume as not impossible, the formation of a
sacred language among the chosen people, at so
marked a period of their history as that of Moses?
Every argument leads to a belief, that the popu-
lar dialect of the Hebrews from a very early period
was deeply tinged with Aramaic, and that it con-
tained so. But there is surely nothing unlikely
or inconsistent in the notion that he who was
learned in all the wisdom of the Egyptians
should have been taught to introduce a sacred
language, akin, but superior to the every-day dia-
et of his people — the property of the rulers, and
which subsequent writers should be guided to copy,
such a language would be the sacred and learned
one — that of the few, and no clearer proof of
the limited hold exercised by this classical Hebrew
on the ordinary language of the people can be re-
quired than its rapid withdrawal, after the Captiv-
ity, before a language composed of dialects
hitherto disregarded, but still living in popular
use. It has been well said that "literary dialects,
or what are commonly called classical languages,
are for the most part the carry-overs from the
ancient greatness of an inevitable de-
cline." If later in history we meet with a new
body of stationary language forming or formal, we
may be sure that its tributaries were those rivu-
lts which for a time were almost lost to our
sight.”

13. A few remarks may not be out of place here
with reference to some leading linguistic peculiar-
ities in the Pentateuch (without, however, de-
stroying its close similarity to other
O. T. writings) given by Scholz, divided under
lexical, grammatical, and syntactical heads. With
the style of the Pentateuch (as might be expected)
that of Joshua very closely corresponds. The feel-

196.
PHILOLOGICAL STUDIES.

ing of hostility to the neighboring peoples of mixed descent, so prevalent at the time of the restoration, makes strongly against the asserted late origin of the book of Ruth, in which it cannot be traced. But (with which we are at present concerned) the style points to an earlier date, the asserted Aramaic being probably relics of the popular dialect. The same linguistic peculiarities are observable (among other merits of style) in the books of "Samuel."* 

The books of Job and Ecclesiastes contain many asserted Aramaicisms, which have been pleaded in support of a late origin of these two poems. In the case of the first, it is argued (on the other side) that these peculiarities are not to be considered so much poetical ornaments as ordinary expressions and usages of the early Hebrew language, affected necessarily to a certain extent by intercourse with neighboring tribes. And the asserted want of study and polish in the diction of this book leads to the same conclusion. As respects the book of Ecclesiastes the case is more obscure, as in many instances the peculiarities of style seem rather referable to the secondary Hebrew of a late period of Hebrew history, than to an Aramaic origin. But our acquaintance with Hebrew literature is too limited to allow the formation of a positive opinion on the subject, in opposition to that of ecclesiastical antiquity. In addition to roughness of diction, growing probably out of the same cause—close intercourse with the people—so-called Aramaicisms are to be found in the remains of "Jonah and Hosan," and expressions closely allied in those of "Amos." This is not the case in the writings of "Nahum, Zephaniah, and Habakkuk," and in the still later ones of the minor prophets: the treasures of post times, which filled their hearts, served as models of style.

As with respect to the book of Ecclesiastes (at the hands of modern critics), so, in the case of Ezekiel, Jewish critics have sought to assign its peculiarities of style and expression to a secondary Hebrew origin. But the references above given may serve to aid the consideration of a most interesting question, as to the extent to which Aramaic elements entered into the ordinary dialect of the Hebrew people, from early times to the Captivity. The peculiarities of language in Daniel belong to another field of inquiry; and under impartial consideration more difficulties may be found to disappear, as in the case of those with regard to the asserted Greek words. The language and subject-matter of Daniel (especially the latter), in the opinion of scholars, led Ezra and Nehemiah to place this book elsewhere than among the prophetic writings. To their minds, the apocalyptic character of the book might seem to assign it rather to the Hellenism than the roll of prophecy, properly so called. Inquiries, with respect to the clos-

At 14. Although the language usually called Aramaic is a dialect of the great Semitic family, deriving its name from the district over which it was spoken, Aram = the high or hill country (as Canaan = the low country). But the name is applied, both by

Biblical and other writers, in a wider and a more restricted sense. The designation—Aram—was imperfectly known to the Greeks and Romans, by whom the country was called Syria, an abbreviation of Assyria, according to Herodotus (vii. 65). In general practice Aram was divided into Eastern and Western. The dialects of these two districts were severally called Chaldeic and Syrian—designations not happily chosen, but, as in the case of Semitic, of too long currency to be changed without great inconvenience. No traces remain of the numerous dialects which must have existed in so large an aggregate of many very populous districts. Nothing can be more erroneous than the application of the word "Chaldeic" to the East Arabian dialect. It seems probable that the Chaldeans were a people of Japhetic extraction, who probably took the name of the Semitic tribe whom they dislodged before their connection with Babylon, so long, so varied, and so full of interest. But it would be an error to attribute to these conquerors any great or early amount of cultivation. The origin of the peculiar and advanced civilization to be traced in the basin of Mesopotamia must be assigned to another cause—the influences of Cushite immigration. The colossal scientific and industrial character of Assyrian civilization is not reasonably deducible from Japhetic influences, that race, in those early times, having evinced no remarkable characteristics beyond that of the practical science. Accordingly, it seems not unreasonable to place on the two rivers a population of Cushite (Hamite) accomplishments, if not origin, subsequent to the Semitic occupation, which established its own language as the ordinary one of these districts; and thirdly a body of warriors and influential men of Japhetic origin, the true Chaldeans, whose name has been applied to a Semitic district and dialect.¹

The eastern boundary of the Semitic languages is obscure; but this much may be safely assumed, that this family had its earliest settlement on the upper basin of the Tigris, from which extensions were doubtless made to the south. And (as has been observed) it is very probable that, by another stream, flowing northward (at a subsequent, and equally ante-historic period), of Cushite population, with its distinctive accomplishments. These settlements would seem to comprise the whole extent of country extending from the ranges bounding the watershed of the Tigris to the N. and E., to the plains in the S. and W., towards the lower course of the great river.² — Assyria (to a great extent), Mesopotamia and Babylon, with its southern district, belonged here. There are few more interesting linguistic questions than the nature of the vernacular language of this last-named region, at the period of the Jewish deportation by Nebuchadnezzar. It was, unintelligible; and incontestably, Semitic; but by the side of it an Aramean, chiefly official, is said to be discernible. [CHALDEA: CHALDEANS.] The passages ordinarily relied on (Dan. i, ii, iv) are not very conclusive in support of this latter theory, which derives more aid from the fact, that many proper names of ordinary occurrence (Belshazzar, Merodach Baladan, Nabonassar, Nabopolassar, Nebuzaradanezra) are certainly not Semitic. As Arie, perhaps, are they Aramean— but in any case they may be naturalized relics of the Assyrian supremacy.

The same question has been raised as to the Semitic or Aramean origin of the vernacular language of Assyria — i.e. the country to the E. of the Euphrates. As in the case of Babylonia, the language appears to have been, ordinarily, that of a blended Semitic and Cushite population, and a similar difficulty to be connected with the ordinary proper names—Nebuchad, Pul, Sahanasas, Saranapulus, Semacheria, Tartiuk, and Pashiti-Plesers. (Is. xxvii. 19, and Jer. v. 16, have been referred to as establishing the difference of the vernacular language of Assyria from that of Semitic origin. Our knowledge of the so-called Cushite stock in the basins of the two rivers is but limited; but in any case a strong Semitic if not Cushite element is so clearly discernible in many local and proper names, as to make an Aramean or other vernacular language unlikely, although incorporation may be found to have taken place, from some other language, probably that of a conquering race.

Until recently, the literature of these wide districts was a blank. Yet there must have been a Babylonian literature, as the wisdom of the Chaldeans had acquired a reputation, which would hardly have been sustained without a literature. If we are ever to recover a knowledge of that ancient Babylonian literature, it must be from the cuneiform inscriptions lately discovered, home from Babylon and Nineveh. They are clearly written in a Semitic language "(M. Miller, S. of L. p. 583). As has been before remarked [BABYLONIA, § 16], the civilization of Assyria was derived from Babylonia in its leading features—Assyrian art, however, being progressive, and marked by local features, such as the substitution of alabaster for bricks as a material for sculpture. With regard to the dialects used for the class of inscriptions with which we are concerned, namely, the Assyrian, as distinguished from the Zend (or Persian) and Tartar (?), the cuneiform memorials, the opinion of scholars is almost unanimous—Lassen, Burnouf (as far as he pronounces an opinion), Layard, Spiegel, all agree with the great authority above cited, Lassen, gladly, unreservedly, from them.

From what source, then, does it seem most probable that future scholars will find this peculiar form of writing deducible? One of the latest writers on the subject, Oppert, divides the family, instead of three, into two large classes—the Aramean or Old Persian, and another large class containing various subdivisions of which the Assyrian forms one. The character itself he asserts to be neither Aramean nor Semitic in its origin, but ancient Central Asiatic, and applied with difficulty, as extraneous and exotic, to the languages of totally different races. But it is quite as likely that the true origin may be found in an exactly different direction—the S. W.—for this peculiar system of characters, which besides occupying the great river basins of which we have spoken, may be traced westward as far as Byzantium and Cyprus, and eastward, although less plainly, to Petra. Scholars, including Oppert, incline to the judgment, that (as Hebrew, Greek, and Arabic writers all show) from a Cushite stock (Gen. x. 8-12) there grew up Babylon and Nineveh, and other great homes of civilization, extending

a Other derivations are given and refuted by Quatre-mire, Mélanges d'Histoire, p. 122.  
b Reum, p. 211. Quatre-mire, Mélanges d'Histoire pp. 58-100, and especially 103-104.
ing from the level plains of Chaldaea afar to the
N. and E. of Assyria. In these districts, far
anterior to the deportation of the Jews, but long
previous to that period, flourished the schools of learning
that gave birth to results, material and intellectual,
stamped with affinity to those of Egypt. It may
well be, that in the progress of discovery, from
Shemitic-Cushite records — akin to the Hinnaritic
and Ethiopic — scholars may carry back these re-
sources to Shemitic-Cushite imitations of kindred
writing from southern lands. Already the notion
has obtained currency that the so-called primitive
Shemitic alphabet, of Assyrian or Babylonian ori-
gin, is transitional, built on the older formal and
syllable one, preserved in cuneiform remains. To
this fact we shall in the sequel recur — passing now
to the condition of the Aramaic language at the
time of the Captivity. Little weight can be attribu-
ted to the argument that the ancient literature
of the district being called "Chaldaea," an Aran
origin is implied. The word "Chaldaean" naturally
drove out "Babylonian," after the establish-
ment of Chaldaean ascendency, in the latter country;
but as in the case of Greece and Rome, intellectual
ascendency held its ground after the loss of ma-
terial power and rule.a
15. Without entering into the discussions res-
specting the orthographic peculiarities of the expres-
sions, it will be sufficient to follow the ordinary division of
the Aramaic into the Chaldaic or Eastern, and the
Western or Syriac dialects.
The term "Chaldaic" is now (like "Shemitic")
firmly established, but "Babylonian" would appear
more suitable. We know that it was a spoken lan-
guage at the time of the Captivity.
A valuable outline of the different dialects and styles
observable in the Aramaic branch of the Shemitic
family has been given by both Delitzsch and Fürst,
which (with some additions) is here reproduced for
the reader.5
(I.) The earliest extant fragments are the well-
known ones to be found at Dan. ii. 4-vii. 28; Ezr.
iv. 8-xl. 13, vi. 12-26. Affinities are to be traced,
without difficulty, between those fragments, which
differ again in some very marked particulars from
the earliest Targums.3
To those who in the course of travel have ob-
served the case, almost the unconsciousness, with
which persons, living on the confines of cognate
dialects, pass from the use of one to another, or
who are aware how close is the connection and how
very slight the difference between continuous dia-
tectial varieties of one common stock, there can be
nothing strange in this juxtaposition of Hebrew
and Aramaic portions. The prophet Daniel, we
may be sure, cherished with true Israelite affection
the holy language of his early home, while his high
official position must have involved a thorough
acquaintance not only with the ordinary Babylon-
hish-Aramaic, but with the Chaldaic (properly so
called). Accordingly, we may understand how the
prophet might pass without remark from the use
of one dialect to the other. Again, in the case of
 Ezra, although writing after a later period, when
the holy language had again been adopted as a
standard of style and means of expression by Jew-
ish writers, there is nothing difficult to be under-
stood in his incorporating with his own com-
position accounts, written by an eye-witness of
Aramaic, of events which took place before his own
arrival.
(2.) The Syro-Chaldaic originals of several of
the Apocryphal books are lost; many Hebraisms
were engrafted on the Aramaic as spoken by the
Jews, but the dialect of the earlier Targums con-
tains a perceptibly smaller amount of such admix-
ture than later compilations.
(3.) The language of the Genizas is extremely
composite — that of the Jerusalem Geniza being
less pure than that of Babylon. Still lower in the
scale, according to the same authority, are those of
the fast-expiring Samaritan dialect, and that of
Galilee.
(4.) The curious book Zohar — an adaptation of
Aramaic expressions to Judaizing Gnosticism —
among its foreign additions contains very many
Hebraisms, rather suggestive (according to Delitzsch)
of a Spanish origin.4
(5.) The Masora, brief and symbolical, is chiefly
remarkable for what may be called vernacular pec-
uliarities.
(6.) The Christian or ecclesiastical Aramaic is
that ordinarily known as Syriac — the language of
early Christianity, as Hebrew and Arabic, respec-
tively, of the Jewish religion and Mohammedanism.
The above classification may be useful as a guide to
the two great divisions of the Aramaic dialect with which a Biblical student is directly concerned.
For that ordinarily called the Samaritan contains
very little calculated to afford illustration among its scanty remains; and future discoveries in that
branch of pegan Aramaic known as the dialect of
the Nabataeans, Mandibles, or Zalians of Mesopo-
tumian (not the Seluans of Southern Arabia), can only exercise a remote or secondary influence on
the study of Aramaic as connected with the Scrip-
tures.
The following sketch of the three leading varie-
ties of the West-Aramaic dialect, is built on the
account given by Fürst.5
(a) What is known of the condition of Galilee
corresponds the disparaging statements given by the
Talmudists of the sub-dialect (for it is no more)
of this district. Close and constant com-
munication with the tribes to the north, and a
large admixture of heathens among the inhabitants,
would necessarily contribute to this. The
dialect of Galilee appears to have been marked by confu-
sions and historical records; but the instances are
more apolite (given in Buhl, A. Wissensch., 1863)
and in the simultaneous use of He-
brew, Rabbinic, and Arabic, among Jewish writers
after the so called revival of literature under Moham-
medan influence.
1. This book is now clearly proved to have been
the production of Moses de Leon, a Spanish Jew of the
13th century. See Cinsburg The Kabalaz (Lond
1851), p. 90 ff.
A
J. Lebgh. §§ 15-19.
of letters — ד and צ with ש (as in various European dialects) — and sphenosis of the guttural .club a habit of connecting words otherwise separate (also not uncommon in rude dialects) carelessness about vowel-sounds, and the substitution of ש for כ.

(b.) The Samaritan dialect appears to have been a compound of the vulgar Hebrew with Aramaic, as various forms have been anticipated from the different of which the population was composed, remains of the "Ephraimithe" occupiers, and Aramaic immigrants.

A confusion of the mute letters and also of the gutturals, with a predilection for the letter צ, has been noticed.

(c.) The dialect called that of Jerusalem or Judæan, between which and the purer one of the Babylonian Jews so many indubitable distinctions have been drawn, seems to have been variable, from frequent changes among the inhabitants, and also to have contained a large amount of words different from those in use in Babylonia, besides being somewhat incorrect in its orthography.

Each dialect, it will be seen, was directly influenced by the circumstances — physical or social — of its locality. For instance, in the remote and unlettered Galilee, peculiarities and words could not fail to be engrafted from the neighboring tribes.

The latter habit which existed between the Samaritans and the Jews essentially precluded the admission of any leavening influences from the latter source. A dialect originally impure — the Samaritan became in course of time largely interspersed with Aramaic words. That of Judæa, alone being spoken by Jews to whom nationality was most precious, was preserved in tolerable purity from corruptions and degeneracy, until overpowered by Greek and Roman barbarism.

The small amount of real difference between the two branches of Aramaic has been often urged as an argument for making any division superfluous. But it has been well observed by Fürst, that each is animated by a very different spirit. The chiefof relics of a hebraica, or Eastern Aramaic — the Targums — are filled with the traditions of the varied languages of Jewish history; they combine much of the better Pharisaism — nourished as it was on lively conceptions of hallowed, national lore, with warm, earnest longings for the kingdom of the Messiah. Western Aramaic, or Syriac literature, on the other hand, is essentially Christian, with a new terminology especially framed for its necessities. Accordingly, the tendency and linguistic character of the first is essentially Hebrew, that of the second Hellenic. One is full of Hebrewisms, the other of Hellenisms.

16. Perhaps few fines of demarcation are traced with greater difficulty, than those by which one age of a language is separated from another. This is remarkably the case in respect of the cessation of the Hebrew, and the ascendency of the Aramitish, or, as it may be put, in respect of the date at which the period of growth terminates, and that of exposition and scholasticism begins, in the literature of the chosen people.

Much unnecessary discussion has been raised with respect to the introduction of interpretation. Not only in any missionary station among the heathen, but in Europe at the Reformation, we can find substantially the germ of Targums. During the 16th century, in the eastern districts of the present kingdom of Prussia, the desire to bring the Gospel home to the heathen classes, hitherto but little touched by literature, opened a new field of activity among the non-German inhabitants of those provinces, at that time a very numerous body. Assistants were appointed, under the name of Töken (interpreters, who rendered the sermon, sentence by sentence, into the vernacular old Prussian dialect, just as in Palestine, on the return, an eager desire to bring their own Scriptures within the reach of the people led to measures which as that described in Nehemiah viii. 3, a passage of difficult interpretation. It is possible, that the apparent vagueness of this passage may represent the two methods, which would be naturally adopted for such different purposes as rendering Biblical Hebrew intelligible to the common people, who only spoke a dialect of Aramaic — and supplying a concordance after such deliberate reading.

Of the several Targums which are preserved, the dates, style, character, and value are exceedingly different. An account of them is given under Versions, Ancient (Targum).

17. In the scholastic period, of which we now treat, the schools of the prophets were succeeded by "houses of inquiry." For with Vitringa, in preference to rabbinical writers, we prefer considering the first named institutions as pastoral and devotional semiuniversities, if not monastic retreats — rather than schools of law and dialectics, as some would explain them. It was not until the scholastic period that all Jewish studies were so employed. Two ways only of extending the blessings hence derivable seem to have presented themselves to the national mind, by commentary ויב, and inquiry וינס. In the first of these, Targumic literature, but limited openings occurred for critical studies: in the second still fewer. The vast storehouse of Hebrew thought reaching through so many centuries — known by the name of the Talmud — and the collections of a similar nature called the Midrashim, extending in the case of the first, dimly but tauntingly, from the period of the Captivity to the times of Rabbi Asher — the closer of the Talmud (A. 16. 426), contain comparatively few accessions to linguistic know ledge. The terms by which serious or philosophical inquiry is described, with the names of its subordinate branches — Halakah (rule) — Hagada (what is said or preached) — Tosefta (addition) — Buth (statements not in the Mishna) — Machinit

a Lebach, § 14.

v. Vitringa, De Spoken, p. 1, caps. v., viii., p. 11, caps. v., viii. — no scholar should be without this storehouse of learning; Cassell, in Herzog, iv., 529-523; Brandt, Juduna Orientala s. p. 127; Oehler, in Herzog, xi., 215, 225; Zimm, Gottliche und historische Vortrage der Juden, cap. 10. This last volume is most valuable as a leading summary, in a little known and bewildering field.
which were applied by their own teachers to the Moshiach, and are incapable of any other fair application save to Him in whom they all centre, are not infrequently turned into meanings irreconcilable alike with the truth, and the judgment of their own most valued writers.”

A comparative estimate is not yet attainable, as to what in Targumic literature is the pure expression and development of the Jewish mind, and what is of foreign growth. But, as has been said, the Targums and kindred writings are of considerable dogmatic and exegetical value; and a similar good work has been effected by means of the cognate dialect, Western Aramaic or Syriac. From the 3d to the 9th century, Syriac was to a great part of Asia — what in their spheres Hellenic Greek and medieval Latin have respectively been — the one ecclesiastical language of the district named. Between the literally recorded records of Holy Scripture, as delivered to the Tannaites in the infancy of the world, and the understandings and hearts of Aram people, who were intended to share in those treasures fully and to their latest posterity, some connecting medium was necessary. This was supplied by the dialect in question — neither so specific nor so sharply subjective as the pure Hebrew, but for those very reasons (while in itself essentially Semitic) open to impressions and thoughts as well as words from without, and therefore well calculated to act as the pioneer and introducer of Biblical thoughts and Biblical truths among minds, to whom these treasures would otherwise long have remained obscure and unintelligible.

§§ 20-24. ARABIC LANGUAGE — PERIOD OF REVIVAL.

20. The early population of Arabia, its antiquities and peculiarities, have been described under ARABIA. We find Arabia occupied by a confederacy of tribes, the leading one of undoubted Ishmaelite descent — the others of the seed of lineages of Abraham, and blended by alliance, language, and neighbourhood, in the 14th and 15th centuries. Somewhat later it may be said to have died out — its last writer of mark, Barhebræus (or Abulpharragius) composing in Arabic as well as Syrian.

19. The Chaldaic paraphrases of Scripture are exceedingly valuable for the light which they throw on Jewish manners and customs, and the meaning of passages otherwise obscure, as likewise for many happy renderings of the original text. But they are valuable also on higher reasons — the Christian interpretation put by their authors on controverted passages. Their testimony is of the greatest value, as showing that Messianic interpretations of many important passages must have been current among the Jews of the period. Walton, alluding to Jewish attempts to evade their own orthodox traditions, says that “many such passages,” i.e. of the later and easier kind, “might be produced which find no sanction among the Jews. Those very passages,

b Walton, Proii. xii. 15, 19. See also Deitrich, Wachsmuth, Konst. Judantum, p. 173 fl. (in respect of Christians’ names) and the Paronomasia and Sympalagial denominative poetic, and also p. 191, note (in respect of moderate tone of Talmud); Oehler, in Herzog, ix. 434-441; and Westcott, Introduction, p. 110-115.
have been before its expulsion by the Koreishite, but of a dialect less Arabic than Hebrew, and possessing close affinity with the Ghen, or Ethiopians.

21. The affinity of the Ghez (Cush? the sacred language of Ethiopia) with the Semitic has been long remarked. Walton supposes its introduction to have been consequent on that of Christianity. But the tradition is probably correct, according to which Ethiopia was colonized from S. W. Arabia, and according to which this language should be considered a relic of the Hamitic. In the G. T. Cushi, in addition to Ethiopia in Africa, comprises S Arabia (Gen. x. 7, 8; 2 Chr xiv. 9, xxi. 16; Hab. iii. 7), and by many the stream of Hamitic civilization is supposed to have flowed in a northerly course from that point into Egypt. In its lexical peculiarities, the Ghez is said to resemble the Arabic, in its grammatical the Arabic. The alphabet is very curious, differing from Semitic alphabets in the number, order, and name and form of the letters, by the direction of the writing, and especially by the form of vowel notation. This is extremely singular. Each consonant contains a short r — the vowels are expressed by additions to the consonants. The alphabet is, by this means, converted into a "censorium" of 222 signs. Various points of re-embrace have been traced between this alphabet and the Samaritan; but recent discoveries establish its kindred (almost its identity) with that of the Hymaritic inscriptions. The language and character of which we have spoken briefly, have now been succeeded for general purposes by the Amharic — probably in the first instance a kindred dialect with the Ghez, but now altered by subsequent extraneous additions.

22. Internal evidence demonstrates that the Arabic language, at the time when it first appears on the field of history, was being gradually developed in its remote and barren peninsular home. Not to dwell on its broken (or internal) plurals, and its system of cases, there are peculiarities in the earliest extant remains, which evince progress made in the cultivation of the language, at a date long anterior to the period of which we speak.

A well-known legend speaks of the present Arabic language as being a fusion of different dialects, effected by the tribe of Koreish settled round Mecca, and the reputed wanderers of the Caaba. In any case, the paramount purity of the Koreishite dialect is asserted by Arabic writers on grammar, in whose judgment the quality of the spoken dialects appears to have declined, in proportion to their distance from Mecca. It is also asserted, that the stores of the Koreishite dialect were increased by a sort of philosophic eclecticism — all striking elegancies of construction or expression, observable in the dialects of the many different tribes visiting Mecca, being incorporated upon the one in question. But the recognition of the Koran, as the ultimate standard in linguistic as in religious matters, established in Arabic judgment the superior purity of the Koreishite dialect. That the Arabs possessed a literature anterior to the birth of Mohammed, and expressed in a language marked with many grammatic peculiarities, is beyond doubt. There is no satisfactory proof of the assertion, that all early Arabic authors, as in the glorious disciples of Islam, «of old, the Arab gloried in nothing but his sword, his hospitality, and his fluent speech." The last gift, if we may judge from what has been preserved to us of the history of these early times, seems to have been held in especial honor. A zealous purism, strange as it sounds amid the rude and barren civilization of the desert ages, as in later times, to have kept almostMasoretic watch over the exactitude of the transmission of these early epics.

Even in our own times, scholars have seemed unwilling altogether to abandon the legend — how at the Ear of Oosh ("the mart of proud rivalry,"!') seeds and traffic — wants and profit — were alike neglected, while lords contended amid their listening countrymen, anxious for such a verdict as should entitle their lays to a place among the Meidakat, the arahyana of the Caaba, or national temple at Mecca. But the appearance of Mohammed put an end for a season to commerce and barbic contests; nor was it until the work of conquest was done, that the faithful resumed the pursuits of peace. And enough remains to show that poetry was not alone cultivated among the ante-Mohammedan Arabians. "Seeds of moral truth appear to have been embodied in sentences and aphorisms, a form of instruction peculiar congenial to the temper of Orientals, and powerfully cultivated by the inhabitants of the Arabian peninsula." Poetry and romance, as might be expected from the degree of Arab civilization, would seem to have been the chief objects of attention.

Against these views it has been urged, that although of such compositions as the Meidakat, and others less generally known, the substance may be considered as undoubtedly very ancient, and illustrative accordingly of manners and customs — yet the same authority, according to competent judges, cannot reasonably be assigned to their present form. Granting (what is borne out from analogy and from references in the Hebrew Scriptures) the existence of philosophical compositions among the Arabs at an early period, still no traces of these remain. The earliest reliable relics of Arabic literature are only fragments, to be found in what has come down to us of pre-Islamic compositions. And, as has been said already, various arguments have been put forward against the probability of the present form of these remains being their original one. Their obscurities, it is contended, are less those of age than of individual style, whilst their uniformity of language is at variance with the demonstrably late cultivation and ascendency of the Koreishite dialect. Another, and not a feeble argument in this utterance of allusion to the early religion of the Arabs. Most just is Rennan's remark that, skeptical or voluptuaries as were most of their poets, still such a silence would be inexplicable, but on the supposition of a systematical removal of all traces of former paganism. No great critical value, accordingly,
can fairly be assigned to any Arabic remains anterior to the publication of the Koran.  
It is not within the scope of this sketch to touch upon the theological teaching of the Koran, its objects, sources, merits, or deficiencies. But its style is very peculiar. Assuming that it represents the best forms of the Korishite dialect about the middle of the 7th century, we may say of the Koran, that its linguistic approach is religious supremacy. The Koran may be characterized as marking the transition from versification to prose, from poetry to eloquence. Mohammed himself has adverted to his want of poetical skill—a trait which required explanation in the judgment of his contemporaries—but of the effect of his forcible language and powers of address (we can hardly call it oratory) there can be no doubt. The Koran itself contains distinct traces of the change (to which allusion has been made) then in progress in Arabic literature. The balance of proof inclines to the conclusion, that the Suras of the Koran, which are placed last in order, are earliest in point of composition—outpourings bearing some faint resemblance to those of Hebrew prophecy.  
27. But it would lead to discussions foreign to the present subject, were we to attempt to follow the thoughts respecting the future, suggested by the almost universal prevalence of the Arabic idiom over so wide a portion of the globe. A comparison of some leading features of the Arabic language, with its two sisters, is reserved for the next division of this sketch. With regard to its value in illustration two different judgments obtain. According to one, all the lexical riches and grammatical varieties of the Semitic family are to be found combined in the Arabic. What elsewhere is imperfect or exceptional is here said to be fully developed—forms elsewhere rare or anomalous are here found in regular use. Great faults of style cannot be denied, but its superiority in lexical riches and grammatical precision and variety is incalculable. Without this means of illustration, the position of the Hebrew student may be likened to that of the geologist, who should have nothing whereon to found a judgment, beyond the scattered and imperfect remains of some few primordial creatures. But the Arabic, it is maintained, for purposes of illustration, is to the Hebrew precisely what the lawyer is to the inquirer, would be the discovery of an immeasurable multitude of kindred creatures in all their fullness and completeness—even more, for the Arabic (it is urged)—as a means of comparison and illustration—a living, breathing reality.  
24. Another school maintains very different opinions with respect to the value of Arabic in illustration. The comparatively recent date (in their present form at least) and limited amount of Arabic remains are pleaded against its claims, as a standard of reference in respect of the Hebrew. Its verbal copiousness, elaborate manner, subtile of thought, wide and diversified fields of literature, cannot be called in question. But it is urged (and valorably) that its riches are not all pure metal, and that no great attention to etymology has been evinced by native writers on the language. Nor should the follies and perversions of such men (in the case of Rabbincal writers) blind us to the superior purity of the spirit by which the Hebrew language is animated, and the reflected influence of elevation of tone and character, from the subjects on which it was so long exclusively employed.  
"My doctrine shall drop as the rain, my speech shall distil as the dew, as the small rain upon the tender herb, and as the showers upon the grass."  
So more fitting description of the spirit and power of the holy language can be found than these words of the Lawgiver's last address to his people. The Arabic language, on the other hand, is first, that of wandering robbers and herdsmen, destitute of religion, or filled with second-hand superstitions, in its more cultivated state, that of a self-satisfied, luxurious, licentious people, the vehicle of a borrowed philosophy, and a dogmatism of the most wearisome and oppressive kind.  
Undoubtedly schools such as that of Albert Schultens (d. 1730) have unduly exalted the value of Arabic in illustration: but in what may be designated as the field of lower criticism its importance cannot be disputed. The total extent of the canonical writings of the Old Testament is so limited as in this respect to make the assistance of the Arabic at once welcome, trustworthy, and copious. Nor can the proposed substitute be accepted without demur—the later Hebrew, which has found an advocate so learned and able as Delitzsch.  
That its claims and usefulness have been undeservedly overlooked few will dispute or deny; but it would seem to be recent, uncertain, and heterogeneous, to a degree which lays it open to many objections taken by the admirers of the Arabic, as a trustworthy means of illustration.

§§ 25–33. Structure of the Semitic Languages.  
27. The question, as to whether any large amount of primitives in the Semitic languages is fairly derivable from imitation of sounds, has been answered very differently by high authorities. Gesenius thought instances of onomatopoeia very rare in extant remains, although probably more numerous at an early period. Hoffmann's judgment is the same, in respect of Western Aramaic. On the other hand, Kenan qualifies his admission of the identity of numerous Semitic and Japhetic primitives to a suggestion, that the latter, for the most part, may be assigned to bilateral words, originating in the imitation of the simplest and most obvious sounds. Scholz also has an interesting passage in which he maintains the same proposition with considerable force, and attempts to follow, in some particular cases, the analogy between the simple original sign and its distant derivatives. But on a careful examination, it is not unlikely that, although many are lost, or overlaid, or no longer as appreciable by our organs as by the keeners ones of earlier races, yet the truth is as the case has been put by a great living comparative philologist—"The 400 or 500 roots which remain as the constituent elements in different families of languages are not interjections, nor are they imitations. They are phonetic types, produced by a power inherent in human nature."
26. The deeply curious inquiry, as to the extent of affinity still discernible between Semitic and Japhetic roots, belongs to another article. [Footnote A] None in the Scripture bearing upon the subject, can be fairly pleaded against such an affinity being possible. A literal belief of Biblical records does not at all call upon us to suppose an entire abrogation by Divine interdiction, of all existing elements of what must have been the common language of the early Noahic.* That such reveals are not to be denied — although the means used for establishing instances, by Delitzsch and the analytical school, cannot be admitted without great reserve. But in treating the Semitic languages in connection with Scripture, it is most prudent to turn away from this tempting field of inquiry to the consideration of the simple elements — the primitives, the true base of every language, in that there, is not, that the mechanism of grammar, are to be regarded as exponents of internal spirit and character. It is not denied, that these apparently inorganic bodies may very frequently be found resolvable into constituent parts, and that kindred instances may be easily found in conterminous Japhetic dialects.

27. Humboldt has named two very remarkable points of difference between the Japhetic and Semitic language families — the latter of which he also, for the Japhetic, assigns a second reason about to be named, assigns to the number of which those which have deviated from the regular course of development. The first peculiarity is the triliteral root (as the language is at present known) — the second the expression of significations by consonants, and *relations* by vowels — both forming part of the flexions within words, so remarkable in the Semitic family. Widely different from the Japhetic primitive, a fully formed and independent word — the Semitic one (even in its present triliteral state) appears to have consisted of three separate articulations, aided by an indefinite sound like the Shva of the Hebrews, and to have varied in the shades of its meaning according to the vowels assigned to it. In the opinion of the same scholar, the prevalent triliteral root was substituted for an earlier binital, as being found impracticable and obscure in use.

Traces of this survive in the radest, or Aramæic, branch, where what is pronounced as one syllable, in the Hebrew forms two, and in the more elaborate Arabic three — e. g. katal, katala. It is needless to say, that much has been written on the question of this peculiarity being original or secondary.

A writer among ourselves has thus stated the case: "An uniform root-formation by three letters or two syllables developed itself out of the original monosyllable state by the addition of a third letter. This tendency to enlargement presents itself in the Indo-Germanic also; but there is this difference, that in the latter monosyllabic roots remain besides those that have been enlarged, while in the other they have disappeared." In this judgment most will agree. Many now triliteral root-words (especially those expressive of the primary relations of life) were at first binital only. Thus מ is not really from מ, nor מ from מ. In many cases a third (assumed) root-letter has been obviously added by repetition, or by the use of a weak or movable letter, or by prefixing the letter נו. Additional instances may be found in connection with the binitals מ, מ, and מ, and many others. Illustrations may also be drawn from another quarter nearer home — in the Japhetic languages of Europe. Fear is variously expressed by ג ופ or פ ג ופ, פג, פג, פג (Scand.), fear, forêt, frayt (Scand.), and bow (Old Celtic). In all these cognate words, the common rudimentary idea is expressed by the same two sounds, the third corresponding with the various non-essential additions, by which apparent triliteral uniformity is secured in Semitic dialects. Again, in the Semitic family many primitives may be found, having the same two letters in common in the first and second places, with a different one in the third, yet all expressive of different modifications of the same idea, as מ and its family: מ = מ. etc.; מ = מ. etc.; מ = מ. etc.

28. We now approach a question of great interest. Was the art of writing invented by Moses and his contemporaries, or from what source did the Hebrew nation acquire it? It can hardly be doubted, that the art of writing was known to the Israelites in the time of Moses. An art, such as that of writing, is neither acquired nor invented at once. No trustworthy evidence can be alleged of such an exception to the ordinary course. The writing on the two tables of the law (Ex. xxiv. 4) — the list of stations attributed to the hand of Moses himself (Num. xxxiii. 2) — the prohibition of printing on the holy (Lev. xix. 28) — the writing of the "curses in a book" by the priest, in the trial of joiyness (Num. x. 22) — the description of the hand (literally) of the writing required by Joshua (Josh. viii. 6) — all point to the probability of the art of writing being an accomplishment already possessed by the Hebrews at that period. So complex a system as alphabetic writing could hardly have been invented in the haste and excitement of the desert pilgrimage.

Great difference of opinion has prevailed as to which of the Semitic peoples may justly claim the invention of letters. As has been said, the attempt to the Phenician, so long unchallenged, is now practically set aside. The so-called Phenician alphabet bears no distinctive traces of a Phenician origin. None of the selected objects, whose initial letters were to rule the sounds of several phonic characters, are in keeping with the halats and

occupations of the Phoenicians. On the contrary, while no references to the sea and commerce are to be found, the majority of the objects selected are such as would suggest themselves to an inland and nomadic people, e. g. Aleph = an ox, Gimmel = a ram, Teh = a snake, Lamed = an ox-ear.

A more probable theory would seem that which represents letters as having passed from the Egyptians to the Phoenicians and Hebrews. Either people may have acquired this accomplishment from the same source, at the same time and independently — or one may have preceded the other, and subsequently imparted the acquisition. Either case is quite possible, on the assumption that the Egyptian alphabet consisted of only such characters as were equivalent to those used by the Hebrews and Phoenicians — that is, that the multiplicity of signs, which is found to exist in the Egyptian alphabet, was only introduced at a later period. But the contrary would seem to be the case — namely, that the Egyptian alphabet existed at a very early period in its present form. And it is hardly likely that two tribes would separately have made the same selection from a larger amount of signs than they required. But as the Hebrew and Phoenician alphabets do correspond, and (as has been said) the character is less Phoenician then Hebrew — the latter people would seem to have been the first possessors of this accomplishment, and to have imparted it subsequently to the Phoenicians.

The theory (now almost passed into a general belief) of an early uniform language overspreading the range of countries comprehended in Gen. x. serves to illustrate this question. There can be no doubt as to the fact of the Hamite occupants of Egypt having migrated thither from Asia; nor (on this hypothesis) can there be any difficulty in admitting, in a certain degree, the correspondence of their written character with the Hebrew. That change should subsequently have been introduced in the Egyptian character, is perfectly intelligible, when their advances in civilization are considered — so different from the nomadic, unlettered condition of the Hebrew people. On such a primary, generic agreement as this between the advanced language of Egypt, and that of the Hebrews — inferior from necessary causes at the time, the mighty intellect of Moses, divinely guided for such a task (as has been before suggested), would find little difficulty in grafting improvements. The theory that the Hyksos built a syllabic alphabet on the Egyptian, is full of difficulties.  

According to the elaborate analysis of Lepsius, the original alphabet of the language family, of which the Shemitic formed a part, stood as follows: —

\[\text{Wd. Ger.} \quad \text{Lub.} \quad \text{Gett.} \quad \text{Dent.} \]

\[\begin{align*}
\text{Aleph} &= A & \text{Bet} &= \text{Gimel} & \text{Daled} &= \text{Mem} \\
\text{Het} &= \text{Ef} & \text{Yod} &= \text{He} & \text{Kaph} &= \text{Tau} & \text{Pe} &= \text{Vav} & \text{Te} &= \text{Yod}\n\end{align*}\]

As the processes of enunciation became more delicate, the liquids Lamed, Mem, Nun, were apparently interposed as the third row, with the original S, Samech, from which were derived Zain, Tzaddi, and Shin = Caph (soft k), from its limited functions, is apparently of later growth; and the separate existence of Phœnician, in many languages, is demonstrably of comparatively recent date, as distinguished from the kindred sound Lamed. In this manner (according to Lepsius), and by such Shemitic equivalents, may be traced the progress of the parent alphabet. In the one letter yet to be mentioned, Yod — from Kaph and Lamed, the same scholiar finds remains of the ancient vowel strokes, which carry us back to the early syllabaria, whose existence he maintains, with great force and learning.

Apparently, in the case of all Indo-Germanic and Shemitic alphabets, a parent alphabet may be traced, in which each letter possessed a combined vowel and consonant sound — each in fact forming a distinct, well understood syllable. It is curious to mark the different processes, by which (in the instances given by Lepsius) these early syllabaria have been affected by the course of enunciation in different families. What has been said above (§ 21), may serve to show how far the system is still in force in the Ethiopic. In the Indo-Germanic languages of Europe, when a strong tendency existed to draw a line of demarcation between vowels and consonants, the primary syllables, /, yet, gho = i, u, i, were soon stripped of their weak guttural (or consonant) element, to be treated simply as the vowel sounds named, in combination with the more obvious consonant sounds. A very similar course was followed by the Shemitic family, the vowel element being in most letters disregarded; but the guttural one in the breath syllables was apparently too congenial, and too firmly fixed to allow of these being converted (as in the case of the Indo-Germanic family) into simple vowels. Aleph, the weakest, for that reason forms the exception. As apparently containing (like the Ovambari) traces of its people's syllabarium, as well for its majesty, it is kept by Babylonian learning. Lepsius with others attributes a very high antiquity to the square Hebrew character. But this is difficult to be maintained.  

21. Passing from the growth of the alphabet, to the history of the formation of their written characters among the three leading branches of the Shemitic family, that of the Hebrews has been thus sketched and shown. In its oldest, though not its original state, it exists in Phenician inscriptions, both stones and coins. It consists of 22 letters, written from right to left, and is characterized generally by stiff straight down strokes, without regularity and beauty, and by closed heads round or pointed. We have also a twofold memorial of it, namely, the inscriptions on Jewish coins, struck under the Maccabean princes, where it is evident that its characters resemble the Phenician, and the Samaritan character, in which the Pentateuch of the Samaritans is written. This latter differs from the first named, merely by a few freer and finer strokes. The development of the written character in the Aramaic branch of the Shemitic family illustrates the passage from the stiff early character, spoken of above, to the more fully formed angular one of later times in the case of the Hebrew family, and in that of the Arabic, to the Cufic and Neshki.

\[\text{Des Buckstabenschrift, Königsberg, 1838, §§ 16, 17, 18} \]

\[\text{Comp. also Lexer, in Hertog, ix. 9.} \]

\[\text{Lepsius, Zwei Abhandlungen, pp 9, 29} \]

\[\text{Davidson, Biblical Criticism, i. 23} \]
Aramaic writing may be divided into two principal families — (1) ancient Aramaic, and (2) Syriac, more properly so called. Of the first, the most early specimen extant is the well-known Carpentras stone, preserved at that place in France, since the end of the 17th century. Its date is very doubtful, but anterior to those of the inscriptions from Palmyra, which extend from A. D. 49, to the 3rd century. The first very closely resembles the Phoenician character — the tops of the letters being but slightly opened; in the second, these are more fully opened, and many horizontal strokes of union added, showing its cursive character. From these remains may be fairly deduced the transitional nature of the written character of the period preceding the invention (or according to others the revival) of the square character.

Hupfeld, Fürst, and all leading writers on the subject, concur in designating this last as a gradual development from the sources mentioned above. A reference to these authors will show how confused were even Jewish notions at an early period as to its origin, from the different explanations of the word סֵפִּיר (Assyriana), substantiated by the Rabbinic for סֵפִּיאר ("square"), by which this character was distinguished from their own — סֵפִּיאר — "round writing," as it was called. But assuming with Hupfeld and Fürst, the presence of two active principles — a wish to write quickly, and to write pictorially — the growth of the square Hebrew character from the old Phoenician is easily discernible through the Carpentras and Palmyrene reliefs. Thus we find in it the points of the letters blunted off, the horizontal union strokes enlarged, figures that had been divided rounded and closed, the position and length of many cross lines altered, and final letters introduced accordingly to typography. On the other hand, the calligraphic principle is seen in the extraordinary uniformity and symmetry of the letters, their separation from one another, and in the peculiar taste which adorns them with a stiff and angular form.  

Few important changes are to be found from the period of Ezra, until the close of the 5th century of our era. During this period, the written character of the text (as well as the text itself) was settled as at present, and the great extent, the reading and divisions of the text. During this period, the groundwork of very much contained in the subsequent Masora was laid, but as yet only in an unwritten, traditional shape. The old character gave way to the square, or Assyrian character — not at once and by the authority of Ezra, but (as has been proved with much clearness) by gradual transition. The square character is, demonstrably, not an exact copy of any existing Aramaic style, but grew by degrees out of the earlier one, although greatly modified by Aramaic influence. No exact date can be assigned to the actual change, which probably was very gradual; but that the new character had become generally adopted by the first century of our era, may be inferred from the Greek (Matt. xiv. 18). It is, moreover, alluded to in the Mishna as the Assyrian character, and by Origen as settled by long usage, and was obviously well-known to Jerome and the Palestinian Jews. The letter writers, abjured powerfully by the ceremonies (not to say superstitions) tone engendered among the Jews by the fall of Jerusalem, secured the exclusive use of its square character for sacred purposes. All that external care and scrupulous veneration could accomplish for the exact transmission of the received text, in the concave recessed character was secured. It is true that much of a secondary, much of an erroneous kind was included among the objects of this devout veneration; but in the absence of sound principles of criticism, not only in those early, but many subsequent generations, this is the less to be deplored. The character called Rabbi incon is best described as an attempt at Hebrew cursive writing.

The history of the characters ordinarily used in the Syriac (or Western) branch of the Aramaic family, is blended with that of those used in Judea. Like the square characters, they were derived from the old Phoenician, but passed through some intermediate stages. The first variety is that known by the name of Estrangelo — a heavy, cumbrous character, said to be derived from the Greek alphabet. This, however, is more probably from two Aramaic words significant of the writing of the Gospel. It is to be found in use in the very oldest documents. Concurrently with this, are trace of the existence of a swifter and more cursive character, very much resembling it. The character called the "double" (a large, hollow variety), is almost identical. There are also other varieties, slightly differing — the Nestorian, for example — but more probably from two Arabic words for the Peshito = simple (or linear according to some). Its origin is somewhat uncertain, but probably may be assigned to the 7th century of our era. It is a modification of the Estrangelo, slaved for writing, and in some measure altered by use. This variety of written characters in the Aramaic family is probably attributable to the fact, that literature was more extensively cultivated among them than among kindred tribes. Although not spared to us, an extensive literature probably existed among them anterior to the Christian era; and subsequently for a long period they were the sole importers of knowledge and learning to Western Asia.

The history of the Arabic language has another peculiar feature, beyond its extensive purism, which has been alluded to, at first sight, so singular among the dwellers in the desert. Until a comparatively short time before the days of Mohammed, the art of writing appears to have been practically unknown. For the Hindavites guarded with jealous care their own peculiar character — the "nusmul," or elevated; and in itself emulated for general use. Possibly different tribes might have possessed approaches to written characters; but about the beginning of the 7th century, the heavy, cumbrous Cufic character (so called from Cufa, the city where it was most early used) appears to have been generally adopted. It was said to have been invented by Miramar Ibn-Murrat, a native of Baby Loamian Ibr. But the shapes and arrangement of the letters indicate their derivation from the Estrangelo; and the name assigned to their introducer — containing the title ordinarily borne by

d Another etymology of this word is given by Nepius, from diana (from diana) "India."

SYRIAN Ecclesiastics—is also indicative of their real origin. But it is now only to be found in the documents of the early ages of Islamism.

The well-known division of "the people of the book"—Christians, who were educated, and "the common people" who could not read—the tribes might be described as "the summary way in which an authoritative text of the Koran was established (in the Caliphate of Othman), alike indicate a very rude state of society. It is generally asserted that Mohammed was unable to write: and this would at first sight appear to be borne out by his description of himself as an illiterate prophet. Modern writers, however, generally are averse to a literal interpretation of these and kindred statements. In any case, about the 11th century (the fourth of the Hijra), a smaller and more flowing character, the Naskhi, was introduced by Ibn Mokhall, which, with considerable alterations and improvements, is that ordinarily in present use. 

30. As in the Hebrew and Aramaic branches, so in the Arab branch of the Semitic family, various experiments were made to improve the introductions of diacritical signs and vowel points, which took place toward the close of the 7th century of our era—not however without considerable opposition at the outset, from Semitic dislikes of innovation, and addition to the roll of instruction already complete in itself. But the system obtained general recognition after some modifications in deference to popular opinion, though not carried out with the fullness of the Masoretes.

Ewald, with great probity, assumes the existence and adoption of certain attempts at vowel marks at a very early period, and is inclined to divide their history into three stages.

At first a simple mark or stroke, like the diacritical line in the Samaritan MSS., was adopted to mark unusual significations, as ܢ /, a "persistence," as distinguished from ܢ /, "to speak," or a "word." A further and more advanced stage, like the diacritical points of the Aramaic, was the employment (in order to express generally the difference of sounds) of a point above the line to express sounds of a high kind, like ܐ / and ܐ —— one below for feebler and lower ones like ܐ / and ܐ and a third in the centre of the letters for those of a higher kind, as distinguished from the other two.

Originally, the number of vowel sounds among the Semitic races (as distinguished from vocal points) was only three, and apparently used in combination with the consonants. Origen and Jerome were alike ignorant of vowel points, in the ordinary acceptance. Many readings in the LXX. indicate the word of some such system—want to which some directions in the Talmud are said to refer. But until a later period, a regular system of punctuation remained unknown; and the number of vowel sounds limited. The case is thus put by Walton. "The modern points were not either from Adam, or added by Moses, or the Prophets that were before the Captivity, nor after the Captivity, with the Maccabees, or any other before the completion of the Talmud, but after five hundred years after Christ, invented by some learned Jews for the help of those who were ignorant of the Hebrew tongue." We neither affirm that the vowels and accents were invented by the Masoretes, but that the Hebrew tongue did always consist of vowels and consonants. Aleph, Mem, and Yod were the vowels before the points were invented, as they are in the Syriac, Arabic, and other Eastern tongues. 

31. The reference of the Jews for their sacred writings would have been outraged by any attempts to introduce an authoritative system of interpretation at variance with existing ones. To reduce the reading of the Scriptures to authoritative and intelligible uniformity was the object of the Masoretes, by means of a system of vowels and accents.

What would have suggested itself to scholars, not of Semitic origin, was at utter variance with Hebrew notions, which looked upon the established written characters as sacred. No other plan was possible than the addition of different external marks. And, in fact, this plan was adopted by the three great divisions of the Semitic family; probably being copied to a certain extent by the Hebrew and Arabic branches from the Syriac, among whom there existed schools of some repute during the first centuries of our era. Of the names of the inventors, or the exact time of their introduction, nothing can be stated with certainty. Their use probably began about the sixth century, and appears to have been completed about the tenth. The system has been carried out with far greater minuteness in the Hebrew, than in the two other branches of the Semitic race. The scholars grammarians did not proceed beyond three signs for ܐ /, ܢ /, ܝ /; the Syriac added ܐ / and ܐ /, which they represented by figures borrowed from the Greek alphabet. not very much altered. In both these cases all the vowels are, strictly speaking, to be considered as short; while the Hebrew has five long as well as five short, and a half-vowel, and other auxiliary signs. Connected with this is the system of accents, which is not involved in the same obscurity of origin. But it bears rather on the relation of words and the members of sentences, than on the construction of individual words.

The chief agents in this laborious and peculiar undertaking were the compilers of the Masra, as it is called —"tradition," as distinguished from a word given by Ezra, or by any other before Talmud has its province of interpreting legal distinctions and regulations, under the sanction of the sacred text, and

---

*A much earlier existence is claimed for this character by Forster, One Prom. Lang.; i. 167.

the Kabbala its peculiar function of dealing with theological and esoteric tradition, so the object of the Masora (דקדוקים, “tradition”) and its compilers the Masoretes (דקדוקיםchinim, “masters of tradition”) was to deal critically, grammatically, and lexically with a vast amount of tradition bearing on the text of Scripture, and to reduce this to a consistent form. Little is known with accuracy of the authors, or the growth of this remarkable collection. Tradition assigns the commencement (as usual) to Ezra and the great sages, but other authorities, Jewish and Christian, to the learned members of the school of Tiberias, about the beginning of the sixth century. These learned collections, comprising some very early fragments, were probably in progress until the eleventh century, and are divided into a greater and less Masora, the second a compendium of the former. “The masters of the Masora,” in the well-known quotation of Elias Levi, were immeasurable, and followed each other in successive generations for many years; nor is the beginning of them known to us, nor the end thereof.” Walton, who was by no means blind to its deficiencies, has left on record a very just judgment on the real merits of the Masora.

It is in truth a very striking and meritorious instance of the devotion of the Jewish mind to the text of Scripture — of the earnestness of its authors to add the only proof in their power of their zeal for its preservation and elucidation.

32. A comparison of the Semitic languages, as known to us, presents them as very unevenly developed. In their present form the Arabic is undoubtedly the richest: but it would have been rivaled by the Hebrew had a career been conducted equally long and favorable to this latter. The cramping and perverting conditions of it, labors depressed the Kabbalistic dialect (child of the old age of the Hebrew) into bewildering confusion in many instances, but there are many valuable signs of life about it. Ancient Hebrew, as has been truly said, possesses in the end almost all the mechanisms which constitute the riches of the Arabic. In the preface to his great work (Lehre und Wahrheit, p. vii.) Gesenius has pointed out various instances, which will repay the labor of comparison. It is true that to the Aramaic has been extended a longer duration than to the Hebrew; but for various causes its inferiority is remarkable, as regards its poverty — lexical and grammatical — its want of harmony and flexibility, and the consequent necessary frequency of participles and particles in aid.

A brief comparison of some leading grammatical and syntactical peculiarities, in the three main dialects of the Semitic family, will not be out of place at the end of this sketch. To scholars it will necessarily appear meager: but, brief as it is, it may not be without interest to the general reader.

The root-forms with the consonants and vowels have been already considered.

Conjugations or their Equivalent Verb-forms. —

The following is the tabulated form given by Ewald for the ordinary Hebrew verb:

<table>
<thead>
<tr>
<th>(Forin extremely augmented)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. (Simple form) Kol.</td>
</tr>
<tr>
<td>2. (Causative form) Piel. w.</td>
</tr>
<tr>
<td>3. (Reflective form) Niphal.</td>
</tr>
<tr>
<td>5. (Reflective and intensive form) Niphal.</td>
</tr>
</tbody>
</table>

In the Aramaic the first, third, and fourth of these appear, with another (= Hithpael), all with passives, marked by a syllable prefixed. In the Arabic the verb-forms, at the lowest computatation, are nine, but are ordinarily reckoned at thirteen, and sometimes fifteen. Of these, the ninth and eleventh forms are comparatively rare, and serve to express colors and defects. As may be seen from the table given, the third and fourth forms in Hebrew alone have passives.

Equivalents to Conjunctive Moods, etc. — One of the most remarkable features of the Arabic language is what is ordinarily described as the „future „arum conceptum.“ As in almost all Semitic grammars imperfect is now substituted for future, this may be explained by stating that in Arabic there are four forms of the imperfect, strongly marked, by which the absence of moods is almost compensated. The genus of this mechanism are to be found in the common imperfect, the jussive, and the conjunctive of the Hebrew, but not in the Aramaic. Again, a curious conditional and conjunctive usage (at first sight almost amounting to an inversion) applied to the perfect and imperfect tenses by the addition of a portion, or the whole, of the substantive verb is to be found in both Hebrew and Arabic, although very differently developed.

Nouns. — The dual number, very uncommon in the Syrian, is less so in Hebrew, chiefly limited, however, to really dual nouns, while in the Arabic its usage may be described as general. What is called the „status emphaticus,“ e. g. the rendering a word definite by appending the article, is found constantly recurring in the Aramaic (at some loss to clearness in the singular). This usage brings to mind the addition of the definite article as a post-positive in Swedish — stora, ship; störst, the ship. In the Arabic it is lost in the inclusions of cases, while in the Hebrew it may be considered as unimportant. As regards nouns of abstraction, also, the Aramaic is fuller than the Hebrew; but in this last particular, as in the whole family of nouns, the Arabic is rich to excess. It is in this last only that we find not only a regular system of cases, and of comparison, but especially the numerous plural formations called broken or internal, which form so singular a part of the language. As regards their meaning, the broken plurals are totally different from the regular (or, as they are techni-
Shemitic language-family finds difficulty in departing. The more recent Syriac has added various auxiliary forms, and repeated pronouns, to the characteristic words by which the meaning is chiefly conveyed. But the general effect is cumbersome and confused, and brings to mind some features of the ordinary Welsh version of the Epistles. In Arabic, again, certain prefixes are found to be added in the sake of graphic definiteness to the portions of the verb, and prepositions more frequently employed. But the character of the language remains unaltered — the additions stand out as something distinct from the original elements of the sentence.

In what consists the most marked point of difference between the Indo-European family of languages and the Semitic family as known to us? The first has lived two lives, as it were: in its case a period of synthesis and complexity has been succeeded by another of analysis and decomposition. The second family has been developed (if the word may be used) in one way only. No other instance of a language-family can probably be found cast in a mould equally unalterable. Compared with the living branches of the Indo-European family, those of the Semitic may be almost designated as inorganic: they have not vegetated, have not grown; they have simply existed.  

T. J. O.

Shenir

Early called, sound) plurals — the latter denoting several individuals of a genus, the former a number of individuals viewed collectively, the idea of individuality being wholly suppressed. Broken plurals accordingly are singulars with a collective meaning, and are closely akin to abstract nouns.  

35. To the scholar, as before remarked, this re-capitulation of some leading peculiarities may appear unnecessary, but it is offered in the case of a language as novel to him as the Semitic, it is feared, these instances must unavoidably appear like fragments or specimens, possibly new and peculiar, but conveying no very definite instruction. But in any case some of the chief grammatical features of the family have been enumerated — all, moreover, illustrative of the internal, self-contained type so peculiarly Semitic. In this respect, as with its formal, so with its syntactical peculiarities. Of one fertile parent of new words in the Japhetic language-family, — the power of creating compound words, — the Semitic is destitute. Different meanings are, it is true, expressed by different primitives, but these stand necessarily divided by impassable barriers from each other; and we look in vain for the shades and gradations of meaning in a word in the Semitic language which give such copiousness and charm to the sister-family. It is so with regard to the whole range of prative and negative words. The prefixes of the other family, in conjunction with nouns, give far more life and clearness than do the collective verbalis of the Semitic. Even the pregnant and curiously jointed verbal-forms, spreading out from the sharply defined root, with prenominal adjuncts of obvious meaning, and the aid of a delicate vowel system, have an artificial appearance. The Japhetic, whose spiritual fullness would probably never have reached him, but that its substance was long preserved in these very forms, will gratefully acknowledge the wisdom of that Almighty being who framed for the preservation of the knowledge of Himself — the One True God — so fitting a code as the language of the Old Testament. Of other families, the Japhetic was not ripe for such a trust. Of those allied with the Semitic, the Aramaic was too coarse and indefinite, however widely and early spread, or useful at a later period as a means of extension and explanation, and (as has been before observed) the Arabic in its origin was essentially of the earth, earthly. The Japhetic cannot but recognize the wisdom, cannot but thank the goodness of God, in thus giving and preserving his lessons concerning Himself in a form so fitting and so removed from treachery. He will do all this, but he will see at the same time in his own languages, so flexible, so varied, so logical, drawing man out of himself to bind him to his neighbor, means far more likely to spread the treasures of the holy language than even its general adoption. It is Humboldt who has said, in reference to the wonderful mechanism discernible in the consonant and vocal systems of the Semitic languages — that, admitting all this, there is more energy and weight, more truth to nature, when the elements of language can be recognized independently and in order, than when fused in such a combination, however remarkable.

And from this rigid, self-contained character the

SHEOL

Author: Version without any apparent authority.
The correct form is found in 1 Chr. v. 29 and Ez. xxvii. 5; [Soden, G.]

* SHEOL. [Dead; The; Hell; Pit.]
* SHEOL. BANDS OF. [SNARES OF DEATH, Amer. ed.]

SHEPHAN (שֶפֶן): Σεφέναδήα: [Comp. Abd. Σεφέναδήα: Sephean]. A place mentioned only in the specification by Moses of the eastern boundary of the promised land (Num. xxxiv. 10, 11), the first landmark from Hazer-enan, at which the northern boundary terminated, and lying between it and Riblah. The ancient interpreters (Targ. Pseudojon.; Siddah) render the name by Apameia; but it seems uncertain whether by this they intend the Greek city of that name on the Orontes, 50 miles below Antioch, or whether they use it as a synonym of Ramas or Dum, as Schwartz affirms (Deuter. Geogr. p. 27). No trace of the name appears, however, in that direction. Mr. Porter would fix Hazer-enan at Kuregela, 70 miles E. N. E. of Damascus, which would remove Shephaan into a totally different region, in which there is equally little trace of it. The writer ventures to disagree with this and similar attempts to enlarge the bounds of the Holy Land to an extent for which, in his opinion, there is no warrant in Scripture.

G.

SHEPHATIAH (שֶפֶתָיָה): [Jehovah judges, or is judge]: Σαφατία: Saphatia. A Benjamite, father of MESSIAH 6 (1 Chr. ii. 8). The name is properly SHEPHATIAH [as in A. V. ed. 1611].

SHEPHATIAH (שֶפֶתָי): [as above]: Σαφατία: Saphatia, Σαφατίας: Saphatias, Saphatias. 1. The fifth son of David by his wife Abital (2 Sam. iii. 4; 1 Chr. iii. 3).

2. Σαφατίας: [In Ezr. ii. 4, Vat. Λαφατία: vili. 8, Σαφατία: Σαφατίος, Saphatios, Saphatios]. The family of Shephatiah, 572 in number, returned with Zerubbabel (Ezr. ii. 4; Neh. vii. 9). A second detachment of eighty, with Zebadiah at their head, came up with Ezra (Ezr. viii. 8). The name is written SFIATI (1 Esdr. v. 9), and SAPHATIAS (1 Esdr. vii. 34).

3. (In Ezr. ii. 57, Vat. Σαφατίας: Saphatios). The family of another Shephatiah were among the children of Solomon's servants, who came up with Zerubbabel (Ezr. ii. 57; Neh. vii. 59).

4. A descendant of Perez, or Perez, the son of Judah, and ancestor of Athahia (Neh. xii. 4).

5. Σαφατίας: Saphatios. The son of Mat- tan; one of the princes of Judah who counselled Zedekiah to put Jeremiah in the dungeon (Jer. xxxvii. 1).

6. Σαφατίας: Saphatias; [Vat. Λαφατίας: F. A. Σαφατίας: Saphatias]. The Harun- ta, or Hariphite, one of the Benjaminite warriors who joined David in his retreat at Ziklag (1 Chr. iii. 8).

7. Σαφατίας: Saphatias, Son of Manash, and chief of the Simeonites in the reign of David (1 Chr. xxvii. 10).

a The Στ at the end of the I.A.V. version of the name is partly due to the ό of particle of motion which was affixed to it in the original of ver. 10, and partly derived from the commencement of Riblah, which fol-

SHEPHERD 2089

8. Σαφατίας: [Vat. Σαφατίας: Alex. Σαφατίας]. Son of Jehoshaphat (2 Chr. xxxii. 2).

SHEPHERD (שֶפֶרְדָּה): [Shepharim, Am. vii. 14, Am. i. 1]). In a nomadic state of society every man, from the sheikh down to the slave, is more or less a shepherd. As many regions in the East are adapted solely to pastoral pursuits, the institution of the nomad life, with its appliances of tents and camp equipment, was regarded as one of the most memorable inventions (Gen. iv. 20). The progenitors of the Jews in the patriarchal age were nomads, and their history is rich in scenes of pastoral life. The occupation of tending the flocks was undertaken, not only by the sons of wealthy chiefs (Gen. xxx. 29 ff.; xxxvii. 12 ff.), but even by their daughters (Gen. xxix. 6 ff.; Ex. xi. 19). The Egyptian captivity did much to implant a love of settled abode, and consequently we find the tribes which still retained a taste for shepherd life selecting their own quarters apart from their brethren in the Transjordanian district (Num. xxxii. 1 ff.). Henceforward in Palestine Proper the shepherd held a subordinate position; the increase of agriculture involved the decrease of pasturage; and though large flocks were still maintained in certain parts, particularly on the borders of Judah, as about Carmel (1 Sam. xxv. 2), Bethlehern (1 Sam. xvi. 11; Luke ii. 8), Tekoa (Am. i. 1), and more to the south, at Gedor (1 Chr. iv. 34), the nomad life was practically extinct, and the shepherd became one out of many classes of the laboring population. The completeness of the transition from the pastoral to the agricultural state is strongly exhibited in those passages which relate to the presence of the shepherd's tent as a token of desolation (e. g. Ez. xxxiv. 4; Zeph. ii. 6). The humble position of the shepherd at the same period is implied in the notices of David's wondrous election (2 Sam. vii. 8; Ps. lxxviii. 70), and again in the self-deprecating confession of Amos (vii. 14). The frequent and beautiful allusions to the shepherd's office in the poetical portions of the Bible (e. g. Ps. xiii. : Is. xi. 9, xlix. 10; Jer. xxxii. 3; 4; Ez. xxxiv. 11, 12, 23) rather bespeak a period when the shepherd had become an ideal character, such as the Roman poets painted the pastors of Arcadia.

The office of the eastern shepherd, as described in the Bible, was attended with much hardship, and even danger. He was exposed to the extremes of heat and cold (Gen. xxxi. 40); his food frequently consisted of the precarious supplies afforded by nature, such as the fruit of the "sycamore," or Egyptian fig (Am. vii. 14), the "hacks" of the carob-tree (Luke xv. 16), and perchance the fennel and wild honey which supported the Baptist (Matt. iii. 4); he had to encounter the attacks of wild beasts, occasionally of the larger species, such as lions, wolves, panthers, and bears (1 Sam. xvii. 34; Is. xxxiv. 4; Jer. v. 6; Am. iii. 12); nor was he free from the risk of robbers or predatory hordes (Gen. xxxvii. 39). To meet these various woes the shepherd's equipment consisted of the following articles: a mantle, made probably of sheep's skin with the fleece on, which he turned inside out in cold weather, as in plied in the comparison in Jer.

The恶性 of the Egyptians towards shepherds (Gen. xvi. 34) may have been mainly due to their contempt for the sheep itself, which appears to have been valued neither for food (Thutarch, De Is. 72), nor generally for sacrifice (Hered. ii. 42), the only district where they were kept being that of Naxion (Strab. xv. p. 803). It may have been increased by the memory of the Shepherd in vision (Hered. i. 128). Abundant confirmation of the fact of this hatred is supplied by the low position which all shepherds held in the castes of Egypt, and by the caricatures of them in Egyptian paintings (Wilkinson, ii. 169).

The routine of the shepherd’s duties appears to have been as follows: in the morning he led forth his flock from the fold (John x. 4), which he did by going before them and calling to them, as is still usual in the East: arrived at the pasture, he watched the flock with the assistance of dogs (Job xxii. 1), and, should any sheep stray, he had to search for it until he found it (Ez. xiv. 12; Luke xv. 4); he supplied them with water, either at a running stream or at troughs attached to wells (Gen. xxvii. 7, xx. 38; Ex. ii. 16; Ps. xxxii. 22): at evening he brought them back to the fold, and reckoned them to see that none were missing, by passing them “under the rod” as they entered the door of the inclosure (Lev. xxvii. 32; Ez. xx. 37), checking each sheep as it passed, by a motion of the hand (Jer. xxxiii. 14): and, finally, he watched the entrance of the fold throughout the night, acting as porter (John x. 3). We need not assume that the same person was on duty both by night and by day; Jacob, indeed, asserts this of himself (Gen. xxxi. 40), but it would be more probable that the shepherds took it by turns, or that they kept watch for a portion only of the night, as may possibly be implied in the expression in Luke ii. 8, rendered in the A. V. “keeping watch,” rather “keeping the watches” (φυλασσόντες φυλάκιας). The shepherd’s office thus required great watchfulness, particularly by night (Luke ii. 8; cf. Nah. ii. 18). It also required tenderness towards the young and the female (Is. xi. 1), particularly in driving them to and from the pasture (Gen. xxxiii. 14). In large establishments there were various grades of shepherds, the highest being styled “rulers” (Gen. xlvii. 6), or “chief shepherds” (1 Pet. v. 4): in a royal household the title of ob- biri, “mighty,” was bestowed on the person who held the post (1 Sam. vii. 1). Great responsibility was attached to the office, for the offender had to make good all losses (Gen. xxxii. 30): at the same time he had a personal interest in the flock, inasmuch as he was not paid in money, but received a certain amount of the produce (Gen. xxx. 52; 1 Cor. ix. 7). The life of the shepherd was a monotonous one: he may perhaps have wiled away an hour or two, pretending to use some instrument (1 Sam. xvi. 18; Josh. xii. 31), but his modern representative still occasionally does (Wortley’s Syriac, i. 234). He also had his periodic entertainments at the shearing-time, which was celebrated by a general gathering of the neighborhood for festivities (Gen. xxxi. 19, xxxviii. 12; 2 Sam. xiii. 23), but, generally speaking, the life must have been but dull. Nor did it conduceth to gentleness of manners; rival shepherds contended for the possession, or the use of water with great acrimony (Gen. xxix. 25, xxi. 20 ff.; Ex. ii. 17): nor is perhaps this a matter of verse, as those who come late to a well frequently have to wait a long time until their turn comes (Brockharte’s Syriac, p. 63).

Shepherds were applied in a metaphorical sense to princes (Is. xlv. 28; Jer. ii. 8, iii. 15, xxii. 22; Ez. xxiv. 2, &c.), prophets (Zech. xi. 5, 8, 16), teachers (Ecc. xii. 11), and to Jehovah himself (Gen. xlix. 24; Ps. xxxii. 1, lxxx. 1): to the same effect are the references to “feeding” in Gen. xlvii. 15; Ps. xxxvi. 9; Hos. iv. 16.

Shepherd (SHE'PHERD), Tower of (Gen. xxiv. 21). [DAVID, vol. i. p. 565 a.]

She'phariah (SHE'PHARIAH). [swathed; Shep- phia: Shepho:] The same as Shephiah (Gen. xxxvi. 29).

She'phunshan (SHE'PHUNSCHAN [serpent]; Ye- phousach; Alex. Σέφοςαχ: Sephaphon). One of the sons of Bala the firstborn of Benjamin (1 Chr. viii. 5). His name is also written SHEPHUPHAN (A. V. "Shephunshan," Num. xxvi. 39), SHEPHEM (1 Chr. vii. 12, 15), and MUPPHIM (Gen. xxxvi. 21). Lord A. Hervey conjectures that Shephunshan may have been a son of Benjamin, whose family was reckoned with those of Iri the son of Bala. [MUPPHIM.]

She'raiah (SHE'RAIAH), i.e. Shehrah [kins- man]: Zaqan; Alex. Σαρα; Saro). Daughter of Ephraim (1 Chr. vii. 24), and foundress of the two Beth-horons, and of a town which was called after her UZZEN-SHERAH.

She'rid (SHERID), Pottery; Pottery.

She'Rebia (SHEREBIAH [head of Jehovah, Ges.]: Zaqapha; Ezr. viii. 24; Zaqaphtah, Neh. vii. 7, ix. 4; Zaqaphia, Neh. x. 12, xii. 8, 24; Alex. Zaqapthia, Neh. vii. 17; Zaqaphia, Neh. ix. 4; Sarephias, Ezr. Sarephim, Neh. vii. 8, x. 12, xii. 24; Seraphia, Neh. ix. 4; Seraphim, Neh. xii. 9). A Levite in the time of Ezra, of the family of Malchij (the son of Merari (Ezr. viii. 18, 24). He was one of the first of the ministers of the Temple to join Ezra at the river of Ahava, and with Hashabiah and ten of their brethren had the charge of the
resels and gifts which the king and his court, and the people of Israel had contributed for the service of the Temple. When Ezra read the Law to the people, Sherubiah was among the Levites who assisted him (Neh. vii. 7). He took part in the psalm of confession and thanksgiving which was sung at the solemn fast after the Feast of Tabernacles (Neh. ix. 3, 5), and signed the covenant with Nehemiah (Neh. x. 23). He is again mentioned as among the chief of the Levites who belonged to the choir (Neh. xii. 24). In 1 Esdr. viii. 54 he is called Serekiah.

**SHERES** (שֶׁרֶשֶׁד) in passage [2090]: **Σερεσ** (Alex. Σαρεσ; Syr.); Son of Maschir the son of Manasseh by his wife Mechah (1 Chr. vii. 16).

**SHEREZER** (שֶׁרֶזֶר; [Sherezzer]; Zerard; Sarer). Properly "Scherzer;" one of the messengers sent in the fourth year of Darius by the people who had returned from the Captivity to inquire concerning fasting in the fifth month (Zech. vii. 2). [See RYKEMELENCH.]

* SHERIFFS (שֶׁרֶשֶׁד; סֶרֶשֶׁד) only in Dan. iii. 2, 3, enumerated among the high officers of state at Babylon. Their exact province is unknown. The etymology (see Firci, s. v.) is too obscure to decide their position or duties. According to the English designation they may have been an order of judges, as "sheriff" sometimes that meaning. They are more commonly supposed to have been lawyers or jurists who acted as the king's advisers, or the state councillors, and as such held a high position under the government. Gesenius (Hebr. u. Chald. Lex. s. v.) compares them with the Mufti, the head doctors of the law in the Turkish empire. De Wette translates the title Richtegerechten, and H. A. Perrett-Gentil as jndis-consules.

**SHE'SHACH** (שֶׁשַּח) [see below]; [Comp. Srakha, Serak; SSchach]: a term which occurs only in Jeremiah (xxvi. 26, 31. 41), who evidently uses it as a synonym either for Babylon or for Babylonia. According to some commentators, it represents "Babel" on a principle well known to the later Jew, that the satisfication of a letter according to their position in the alphabet, counting backwards from the last letter, for those which hold the same numerical position, counting in the ordinary way. Thus 7 represents נ, כ represents כ, כ represents כ, and so on. It is the fact that in this way סככ would represent bdb. It may well be doubted, however, if this can be practice as old as Jeremiah. At any rate, this explanation does not seem to be so satisfactory as to make any other superfluous. Now Sir H. Rawlinson has observed that the name of the moon-god, which was identified, or nearly so, with that of the city of Abraham, Ur (or Harr), "might have been read in one of the ancient dialects of Babylonia as Shkali;" and that consequently a possible explanation has obtained of the Sheshach of Scripture" (Rawlinson's Herodotus, vol. i. p. 686). Sheshach may stand for Ur, Ur itself, the old capital, being taken (as the Hebrew, the capital, was constantly used to represent the country.

**SHISHAI** [2 syl.] (שִׁשַּי; whitish, Ges.]; פִּסַּר; [Vat.-sure]; Num. and Judg.; פִּסַּר; Josh.; Alex. פִּסַּר; Zouarn; Peefit; Stri.; Num.: Seshah). One of the three sons of Anak who dwelt in Hebron (Num. xiii. 22) and were driven thence and slain by Caleb at the head of the children of Judah (Josh. xv. 14; Judg. i. 10).

**SHESHEZ** (שֶׁשֶּשֶּז; [p. cty.]; Zeresh). A descendant of Jerahmeel the son of Hezron, and representative of one of the chief families of Judah. In consequence of the failure of male issue, he gave his daughter in marriage to Jarcha, his Egyptian slave, and through this union the line was perpetuated (1 Chr. ii. 31, 34, 35).

**SHEBAHIAZAR** (שֶׁבֶחְיָאצָר; [Pers., for worships]; Ges.); סֶבֶּחְיָאצָר; [Vat.]; סְבֶּחְיָאצָר; Zerubab Zurc; סְבֶּחְיָאצָר; [Alex.]; סְבֶּחְיָאצָר; [Sesan].) of uncertain meaning and etymology. The Chaldee or Persian name given to Zerubbabel, in Ezr. i. 8, 11, v. 14, 16; 1 Esdr. ii. 12, 15, after the analogy of Shadrach, Meshach, Abednego, Belshazzar, and Esther. In like manner also Joseph received the name of Zaphnath-Paaneah, and we learn from Manoeth, as quoted by Josephus (c. Apion. i. 28), that Moses' Egyptian name was Osarsiph. The change of name in the case of Jehoshaph and Zekeiah.

**SHETHAR** (שֶׁתֶהָר; [pers.]; [Zeresh]. The king or Persian name given to Zerubbabel (Num. vii. 2) and governor (תָּרָכָל), the former term marking him as the head of the tribe in the Jewish sense (Num. vii. 2, 10, 11, Ecc.), and the latter as the Persian governor appointed by Cyrus, both of which Zerubbabel was: and yet more distinctly, by the insertion (Ezr. v. 16) that "Sheshbazzar laid the foundation of the House of God which is in Jerusalem," compared with the promise to Zerubbabel (Zech. iv. 9), "The hands of Zerubbabel have laid the foundation of this house, his hands shall also finish it." It is also apparent, from the mere comparison of Ezr. i. 11 with ii. 1, 2, and the whole history of the returned exiles. The Jewish tradition that Sheshbazzar is Daniel, is utterly without weight. [*ZERUBABEL.]* A. C. H.

**SHETH** (שֶׁתֶז) [see below]; [Zeth; Seth].

1. The patriarch Seth (1 Chr. i. 1).

2. In the A. V. of Num. xxiv. 17, מִשֶּתֶז is rendered as a proper name, but there is reason to regard it as an appellative, and to translate, instead of "the sons of Sheth," "the sons of tumult," the wild warriors of Moab, for in the parallel passage, Jer. xlviii. 45, מְשַׁת, a tumult, occupies the place of בְּשֵׁת. מְשַׁת, is thus equivalent to מְשַׁת, as in Lami. iv. 47. Ewshh proposes, very unnecessarily, to read מְשַׁת, מְשַׁת, and to translate "the sons of laughtersness." (Hochmuthsche). Rashi takes the word as a proper name, and refers it to Seth the son of Adam, and this seems to have been the view taken by Onkelos, who renders, he shall rule all the sons of men. The Jerusalem Targum gives, "all the sons of the East;" the Targum of Jonathan begins: "the zeal of the Uzziel retains the Hebrew word Sheth, and explains it of the armies of Gog who were to set themselves in battle array against Israel.

W. A. W.

**SHETHAR** [Pers. s. stor]; Zeru-.
SHEHAR-BOZNAI

One of the seven princes of Persia and Media, who had access to the king's presence, and were the first of the kings in the kingdom, in the third year of Xerxes (Esth. i. 14). Compare Ezr. vii. 14 and the ἄρτοι τῶν Περσῶν επισκοπῶν of Ctesias (14), and the statement of Herodotus with regard to the seven noble Persians who slew Smerdis, that it was granted to them as a privilege to have access to the king's presence at all times, without being sent for, except when he was with the women; and that the king might only take a wife from one of these seven families, ii. 84, and Gesen. s.v. [CHAISNAH; ESTHER.]

A. C. II.

SHEHAR-BOZNAI (שֵׁחֶרֶבזְנָי) [SABUR-BOSNAVI; ZECHAR-BOSNAVI (Vat. -avenous; -aven); Alex. -avenous; Arab. -aven; -aven] Shemarbenai; 'star of splendor'; A Persian officer of rank, having a command in the province 'on this side the river' under Tatarai the satrap (תַּנְא), in the reign of Darius Hystaspis (Est. v. 7, 6, vi. 6, 19). He joined with Tatarai and Gobryas in trying to obstruct the progress of the Temple in the time of Zerubbabel, and in writing a letter to Darius, of which a copy is preserved in Ezr. v., in which they reported that 'the house of the great God' in Judaea was being hindered with great stones, and that the work was going on fast, on the alleged authority of a decree from Cyrus. They requested that search might be made in the rolls of the province whether such a decree was ever given, and asked for the king's pleasure in the matter. The decree was found at Ecbatana, and a letter was sent to Tatarai and Shemarbenai from Darius, ordering them no more to obstruct, but, on the contrary, to aid the elders of the Jews in rebuilding the Temple, by supplying them both with money and with beasts, corn, salt, wine, and oil, for the sacrifices. Shemarbenai after the receipt of this decree offered no further obstruction to the Jews. The account of the Jewish prosperity in Ezr. vi. 14-23, would indicate that the Persian governors acted fully up to the spirit of their instructions from the king.

As regards the name Shemarbenai, it seems to be certainly Persian. The first element of it appears as the name Shethar, one of the seven Persian princes in Esth. i. 14. It is perhaps also contained in the name Pharoi-thure (Herod. vii. 63); and the whole name is not unlike Niti-baranes, a Persian in the time of Artaxerxes Mabonnus (1 Esd. 27). If the names of the Persian officers mentioned in the Book of Ezra could be identified in any inscriptions or other records of the reigns of Darius, Xerxes, and Artaxerxes, it would be of immense value in clearing up the difficulties of that book.

A. C. H.

SHE'VA (שֵׁבָה) Keri: שֶׁבָּה; 2 Sam. [SE-RAMAH]: Soreah; [Vat. -Susan]; Alex. -Susan; Nisru). 1. The scribe or royal secretary of David (2 Sam. xx. 25). He is called elsewhere Seraimah (2 Sam. viii. 17), Shushia (1 K. iv. 3), and Shav-ath (1 Ch. xviii. 16).

2. (Sone: Alex. -Sewa; Sue.) Son of Caleb, son of Hezron by his concubine Mahachah, and founder or chief of Machben and Gilse (1 Chr. ii. 49).

SHAW BREAD. (Ex. xxv. 30, xxvi. 33, xcvii. 36, &c.) literally "bread of the face" or "face." Onk. אֲרֹן הָעַרְבִּים אֲדֹנֵי בֵּית אֵשׁ, "bread set in order." 1 Chr. ix. 29, xxii. 29, 2 Chr. xxix. 18, Neh. x. 34. סֵפֶר מָנוֹר. In Num. v. 7, we find מָנוֹר הָעוֹלָם, "the perpetual bread." In 1 Sam. xxi. 4-6, it is called שֵׁבָּה, "holy bread." Syr. שֶׁבָּה; "bread of the Table of the Lord." The LXX. give us ἄρτοι εἰς χώραν, Ex. xxv. 30: ἄρτοι τῆς προφορᾶς, Matt. xi. 14. Luke vi. 4: τοὺς προφόρους τῶν ἄρτων, Heb. iv. 2. The Vulg. uses postpositions. Wicliffe, "loaves of proposition." Luther, "Kornbrot; from which our subsequent English versions have adopted the title SHEW-BREAD.)

Within the Ark it was directed that there should be a table of shittim-wood, i.e. acacia, two cubits in length, a cubit in breadth, and a cubit and a half in height, overlaid with pure gold, and having "a golden crown to the border thereof round about," i.e. a border, or list, in order, as we may suppose, to hinder that which was placed on it from by any accident falling off. The further description of this table will be found in Ex. xxv. 29-30, and a representation of it as it existed in

Table of Shew Bread (from relief on an Arch of Titus).

a Taking, i.e. the four fingers, when closed together, as the measure of a handbreadth, as we are
more than this, and bear something of the force which it has in Malachi 1:11.

It was thought by Philo and Clement of Alexandria that the table was a symbol of the world, its four sides or legs typifying the four seasons. In the utter absence of any argument in their support, we may feel warranted in neglecting such fanciful conjectures, without calling in the aid of Ehr's arguments against them.

In 2 Chr. iv. 19, we have mention of "the tables wherein the shew bread was set," and at ver. 8 we read of Solomon making ten tables. This is probably explained by the statement of Josephus (Ant. viii. 3, § 7), that the king made a number of tables, and one great golden one on which they placed the loaves of God. [See Temple.]

The table of the second temple was carried away by Antiochus Epiphanes (1 Macc. i. 22), and a new one made at the restoring of the sanctuary under Judas Maccabaeus (1 Macc. iv. 49). Afterwards Ptolemy Philadæphus presented a magnificent table (Joseph. Ant. xii. 2, §§ 8, 9).

The table stood in the sanctuary together with the seven-branched candlestick and the altar of incense. Every Sabbath twelve newly-baked loaves were put on it in two rows, six in each, and sprinkled with incense (the LXX. added sbiè), where they remained till the following Sabbath. Then they were replaced by twelve new ones, the incense was burned, and they were eaten by the priests in the Holy Place, out of which they might not be removed. Besides these, the Shew-Bread Table was adored with dishes, spoons, bowls, etc., which were of pure gold (Ex. xxv. 29). These, however, were manifestly subsidiary to the loaves, the preparation, presentation, and subsequent treatment of which manifestly constituted the ordinance or shewbread, whose probable purport and significance must now be considered.

The number of the loaves (twelve) is considered by Philo and Josephus to represent the twelve months. If there was such a reference, it must surely have been quite subordinate to that which is obvious at once. The twelve loaves plainly answer to the twelve tribes (compare Rev. xii. 2). But, taking this for granted, we have still to ascertain the meaning of the rite, and there is none which is left in Scripture so wholly unexplained. Though it is mentioned, as we have seen, in other parts of the Pentateuch besides the Pentateuch as a rule omits remarks on the meaning of the rite, and substitutes the phrase, "he is to be eaten by the priests," for fuller explanation, the narrative of David and his companions being permitted to eat the shew bread, does but illustrate the sanctity which was ascribed to it; and besides our Saviour's appeal to that narrative, the ordinance is only once referred to in the N. T. (Heb. iv. 2), and there it is merely named among the other appurtenances of the first sanctuary.

But, although unexplained, it is referred to as one of the leading and most solemn appointments of the sanctuary. For example, the appeal of Abijah to the devoted tribes (2 Chr. xiii. 10, 11) runs thus — "but as for us, the Lord is our God, and we have not forsaken Him: and the priests, which minister unto the Lord, are the sons of Aaron, and the Levites wait upon their business; and they burn unto the Lord every morning and evening burnt-sacrifices and sweet incense; the shew bread also set they in order upon the pure table," etc., etc.

In this absence of explanation of that which is set regarded as so solemn, we have but to seek whether the names bestowed on and the rites connected with the shew bread will lead us to some apprehension of its meaning.

The first name we find given it is obviously the dominant one, הָנָּלֵב, "bread of the face," or "face." This is explained by some of the Rabbis, even by synonyms, as referring to the four sides of each loaf. It is difficult to believe that the title was given on a ground which in no way distinguished them from other loaves. Besides, it is applied in Num. iv. 7, simply to the table, הָנָּלֵב, not as in the English version, the "table of shewbread," but the "table of the face, or faces."

We have used the words face or faces, for הָנָּלֵב, it needs scarcely be said, exists only in the plural, and is therefore applied equally to the face of one person and of many. In connection with this meaning, it continually bears the secondary one of presence. It would be superfluous to cite any of the countless passages in which it does so. But whose face or presence is denoted? That of God, as a coming in person and as a resident in the sanctuary. According to some, was performed in acknowledgment of God's being the giver of all our bread and sustenance and the loaves lay always on the table as a memorial and monitor of this. But against this, besides other reasons, there is the powerful objection that the shew bread was unseen by the people; it lay in the sanctuary, and was eaten there by the priests alone. So that the first condition of symbolic instruction was wanting to the rite, had this been its meaning.

The הָנָּלֵב, therefore, or Presence, is that not of the people but of God. The הָנָּלֵב אתּוֹנָר and the הָנָּלֵב תּוּדַי"מ properg's of the LXX. seem to indicate as much. To say nothing of 1 Sam. xxi. 6, where the words וְהָנָּלֵב תּוּדַי"מ do not seem decisive of the whole question. But in what sense? Spencer and others consider bread offered to God as was the Mosaic, a symbolical need for God somewhat answering to a heathen Lectisternium. But it is not easy to find this meaning in the recorded appointments. The incense is no doubt to be burnt on the appointed altar, but the bread, on the Sabbath following that of its presentation, is to be eaten in the Holy Place by the priests. There remains, then, the view which has been brought out with such singular force and beauty by Kitt——a view bread and clear in itself, and not disturbed by those fanciful theories of numbers which tend to obfuscate confidence in some parts of his admirable Symbolic.

He remarks, and justly, that the phrase הָנָּלֵב is applied solely to the table and the bread, not to the other furniture of the sanctuary, the altar of incense, or the golden candlestick. There is something therefore peculiar to the former which is denoted by the title. Taking הָנָּלֵב as equivalent to the Presence (of God) substrate), he views the application of it to the table and the bread as analogous to its application to the angel, הָנָּלֵב הָנָּלֵב (Is. xxi. 9, compared with Ex. xxxiii. 14, 15; Dent. iv. 37). Of the Angel of God's Presence it is said that God's "Name is in Him" (Ex. xxii. 20). The Presence and the Name may therefore be taken as equivalent. Both,
SHIBBOLETH

In reference to their context, indicate the manifestation of God to his creatures. "The Name of God," he remarks, "is Himself; but that, in so far as He reveals Himself, the face is that wherein the being of a man proclaims itself, and makes known its individual personality. Hence, as Name stands for He or Himself, so Face for Person; to see the Face, for, to see the Person. The Bread of the Face is therefore that bread through which God is seen, that is, with the participation of which the seeing of God is bound up, or through the participation of which man attains the sight of God. Whence it follows that we have not to think of bread merely as such, as the means of nourishing the bodily life, but as spiritual food, as a means of appropriating and retaining that life which consists in seeing the face of God. Bread is therefore here a symbol, and stands, as it so generally does in all languages, both for life and life's nourishment; but by being entitled the Bread of the Face it becomes a symbol of a life higher than the physical; it is, since it lies on the table placed in the symbolic heaven, heavenly bread: they who eat of it, and satisfy themselves with it, see the face of God." (Bihler, Sygobelk, loc. cit. c. § 2.) It is to be remembered that the same bread was "taken from the children of Israel by an everlasting covenant" (Lev. xxiv. 8), and may therefore be well expected to bear the most solemn meaning. Bihler proceeds to show very beautifully the connection in Scripture between seeing God and being nourished by God, and points, as the opening-stone of his argument, to Christ being at once the perfect Image of God and the Bread of Life. The references to a table prepared for the righteous man, such as Ps. xxiii. 5, Luke xxi. 30, should also be considered.

F. G.

SHIBBOLETH (σιβόλθη: Schiffelth).

Judg. xii. 6. The Hebrew word which the Gileadites under Jephthah made use of at the passages of the Jordan, after a victory over the Ephrimites, to test the pronunciation of the sound sh by those who wished to cross over the river. The Ephrimites, it would appear, in their dialect substituted for sh the simple sound s; and the Gileadites, regarding every one who failed to pronounce sh as though it were an Ephrimite and therefore an enemy, put him to death accordingly.

The word "Shibboleth," which has now a second life in the English language in a new significance, has two meanings in Hebrew: 1st, an ear of corn; 2ndly, a stream or flood: and it was, perhaps, in the latter sense that this particular word suggested itself to the Gileadites, the Jordan being a rapid river. The word, in the latter sense, is used twice in the 68th Psalm, in verses 2 and 15, where the translation of the L. V. is "the floods overflow me," and "let not the water-flood overflow me." If in English the word retained its original meaning, the latter passage might be translated "Let not a shibboleth of waters drown me." There is no mystery in this particular word. Any word beginning with the sound sh would have answered equally well as a test.

G.

SHIELD

Before the introduction of vowel-points (which took place not earlier than the 6th century A. D.), there was nothing in Hebrew to distinguish the letters shin and sin, so it could not be known by the eye in reading when s was to be sounded after s, just as now in English there is nothing to show whether it should be sounded as in the words after, after, or in German, according to the most common pronunciation, after s in the words Spruche, Spiel, Sturm, Stiefel, and a large class of similar words. It is to be noted that the sound sh is unknown to the Greek language, as the English th is unknown to so many modern languages. Hence, to distinguish the grave name Messiah similarly with s, which in Hebrew commences with sh, and one result has been that, through the Septuagint and the Vulgate, some of these names, such as Samuel, Samson, Simeon, and Solomon, having become naturalized in the Greek form in the English language, have been retained in this form in the English version of the O. T. Hence, likewise, it is a singularity of the Septuagint version that, in the passage in Judges xii. 6, the translator could not introduce the word "Shibboleth," and has substituted one of its translations, σταχύς, "an ear of corn," which tells the original story by analogy. It is not impossible that this word may have been ingeniously preferred to any Greek word signifying "stream" or "flood," from its first letters being rather harsh-sounding, independently of its containing a cultural.

E. T.

SHIC'RON 〔σικρόν, i. e. Sibmah [c oauthor or Fragrance]: Sichron). One of the places on the east of Jordan which were taken possession of and rebuilt by the tribe of Reuben (Num. xxxiii. 38). It is probably the same with Shicron (i. e. Sicham) named in the list at the beginning of the chapter, and is certainly identical with Sibmah, so celebrated at a later date for its vines. Indeed, the two names are precisely the same in Hebrew, though our translators have chosen to introduce a difference. Sicham and not Shicron, is the accurate representative of the Hebrew original.

G.

SHIC'MAH (σικμάθ, i. e. Sibmah or Sebama: Sichman). One of the landmarks at the western end of the north boundary of Judah (Josh. xx. 11, only). It lay between Ekron (Ακρί) and Jabneh (Υβάνη), the port at which the boundary ran to the sea. No trace of the name has been discovered between these two places, which are barely four miles apart. The Alex. LXX. (with an unusual independence of the Hebrew text) has evidently taken Shicron as a repetition of Ekron, but the two names are too essentially different to allow of this, which is not supported by any other version. 6 The Targum gives it Shicron, and with this agrees Eusebius (Onom. Δακρυοί), though no knowledge of the locality of the place is to be gained from his notice.

G.

SHIELD (σκέπτρον; [sept.]: Schedel).

with st, such as Studium an Etude, Streame an Etrennes etc., etc.

h More probably the indi id σ was accented dentally in the Alex. Ms. on account of the E10 pre- ceding the reading of Comp. and A. is κατα Γα ῥων. A.
The three first of the Hebrew terms quoted have already been noticed under the head of AOMS, where it is stated that the ṭūnāh was a large oblong shield or target, covering the whole body; that the nāyēn was a small, round or oval shield; and that the term sheklet is of domestic import, applying to some ornamental piece of armor. To these we may add sechēraḥ, a poetical term occurring only in Ps. xxvi. 4. The ordinary shield consisted of a framework of wood covered with leather; it thus consisted of being burnt (Ez. xxxix. 9). The nāyēn was frequently eased with metal, either brass or copper; its appearance in this case resembled gold, when the sun shone on it (1 Macc. vi. 30), and to this rather than to the practice of smearing blood on the shield, we may refer the redness noticed by Nahum (ii. 5). The surface of the shield was kept bright by the application of oil, as implied in Is. xxvi. 5; hence Saul's shield is described as "not anointed with oil," i.e. dusty and gs (2 Sam. i. 21). Oil would be as useful for the metal as for the leather shield. In order to preserve it from the effects of weather, the shield was kept covered, except in actual conflict (Is. xiii. 6; comp. Ez. B. G. ii. 21; cf. Nat. Deor. ii. 14). The shield was worn on the left arm, to which it was attached by a strap. It was used not only in the field, but also in besieging towns, when it served for the protection of the head, the combined shields of the besiegers forming a kind of testudo (Ez. xxvi. 8). Shields of state were covered with beaten gold. Solomon made such for use in religious processions (1 K. x. 16, 17); when these were carried off they were replaced by shields of brass, which, as being less valuable, were kept in the guard-room (1 K. xiv. 27), while the former had been suspended in the palace for ornament. A large golden shield was sent as a present to the Romans, when the treaty with them was renewed by Simon Maccabaeus (1 Macc. xxiv. 18, 19); it was intended as a token of alliance (σιδηρον της συμμαχίας, Joseph. Ant. xiv. 8, § 3), but whether any symbolic significance was attached to the shield in particular as being the weapon of protection, is uncertain. Other instances of a similar present occur (Suet. Calig. 16), as well as of complimentary presents of a different kind on the part of allies (Cic. Terr. 2 Act. iv. 23, § 67). Shields were suspended about public buildings for ornamental purposes (1 K. x. 17; 1 Macc. iv. 57, v. 2); this was particularly the case with the shields (assuming sheklet to have this meaning) which David took from Hadadezer (2 Sam. vii. 7; Cant. iv. 4), and which were afterwards turned to practical account (2 K. xi. 10; 2 Chr. xxix. 9); the Gammaddim similarly suspended them about their towers (Ez. xxviii. 11; see Gamma- daddim). In the metaphorical language of the Bible the shield generally represents the protection of God (e.g. Ps. iii. 3, xxviii. 7); but in Ps. xlix. 16 it is applied to earthly rulers, and in Eph. vi. 10, to faith.

W. L. B.

SHIGGAIION [3 syl.] (τῆς ἱερᾶς Παλαιας) Ps. vii. 1. A particular kind of psalm, the specific character of which is now not known. The psalm number the word is nowhere in Hebrew, except in the inscription of the 7th Psalm, and there seems to be nothing peculiar in that psalm to distinguish it from numerous others, in which the author gives utterance to his feelings against his enemies, and implores the assistance of Jehovah against them; so that the contents of the psalm justify no conclusive inference as to the meaning of the word. In the inscription to the Ode of the Prophet Habakkuk (iii. 1), the word occurs in the plural number: but the phrase in which it stands εν χίλιοι κατὰ μιαν ἑξακοσίαν, as it would seem, by modern Hebrew scholars to mean "after the manner of the Shiggaion," and to be merely a direction as to the kind of musical measures by which the ode was to be accompanied. This being so, the ode is no red help in ascertaining the meaning of Shiggaion: for the ode itself is not so called, though it is directed to be sung according to the measures of the shiggaion. And, indeed, if it were called a shiggaion, the difficulty would not be diminished: for, independently of the inscription, no one would have ever thought that the ode and the psalm belonged to the same species of sacred poem: and even since their possible similarity has been suggested, no one has definitely pointed out in what that similarity consists, so as to justify a distinct classification. In Ps. xlviii. 3 (the nearest parallel), it is natural for the psalmist to form a conjecture as to the meaning of shiggaion from its etymology; but unfortunately there are no less than three rival etymologies, each with plausible claims to attention. Gesenius and First, s. v., concur in deriving it from τῆς ἱερᾶς (the Piel of τῆς ἱερᾶς), in the sense of magnifying or exalting with praise; and they justify this derivation by kindred Syriac words. Shiggaion would thus mean a hymn or psalm; but its specific meaning, if it has any, as applicable to the 7th Psalm, would continue unknown. Fried, Die Pontischen Bilder des Alten Bundes, i. 24: Bödeger, s. v. in his continuation of Gesenius' Thesaurus; and Deitsch, Commentar über den Psalter, i. 51, derive it from τῆς ἱερᾶς, in the sense of reeling, as from wine, and consider the word to be somewhat equivalent to a dirhythmos; while De Wette, Die Psalmen, p. 124, Lee, s. v., and Hitzig, Die Zeit des kleinen Propheten, p. 29, interpret the word as a psalm of lamentation, or of a psalm in distress, as derived from Arabic, ḫufīfād, on the other hand, Die Psalmen, i. 109, 199, conjectures that shiggaion is identical with higgim, Ps. ix. 16, in the sense of poem or song, from τὰς ἱερᾶς, to melange or compose; but even so, no information would be conveyed as to the specific nature of the poem.

As to the inscription of Habakkuk's ode, "α' shiggaion," the translation of the LXX. is ἑκατοκτών, which conveys no definite meaning. The Vulgate translates "pro ignorantibus," as if the word had been shiggaion, transgressions through ignorance (Lev. iii. 2; 27; Num. xv. 27; Ezek. xiv. 4), or shiggaion (Ps. xiv. 15), which seems to be nearly the same meaning. Perhaps the Vulgate was influenced by the Targum of Jonathan, where shiggaion seems to be translated סודנים. In the A. V. of Hab. iii. 1, the rendering is "upon shiggaion," as it shiggaion was some musical instrument. But under any circumstances of a

a in the passage quoted, the shields carried by the elders of Antiochus are said to have been actually of gold. This, however, must have been a mistake, as even silver shields were very rare (2 Macc. vii. 57).
Shihon must not be translated "upon," in the sense of playing upon an instrument. Of this use there is not a single undoubted example in prose, although playing on musical instruments is frequently referred to: and in poetry, although there is one passage, Ps. xlii. 3, where the word might be so translated, it might equally well be rendered there "to the accompaniment of" the musical instruments therein specified—and this translation is preferable. It seems likewise a mistake that "ud" is translated "upon" when preceding the supposed musical instruments, Gittith, Mahalath, Neginnah, Nechibloth, Shushan, Sheshanimm (Ps. viii. 1, xxxi. 1, xxxiv. 1, liii. 1, lxviii. 1, li. 1, v. 1, li. 1, xlv. 1, lxx. 1). Indeed, all these words are regarded by Ewald (Post. Eichch. i. 177) as meaning musical keys, and by First (s. v.) as meaning musical bands. Whatever may be the proposal of the proposed substitutes, it is very singular, if those six words signify musical instruments, that not one of them should be mentioned elsewhere in the whole Bible.

E. T.

Shihon (שִׁחֹן) i. e. Shion: Ἰσχων;

Alex. Syr. [StoBr]: Sbn. A town of Issachar, named only in Josh. xix. 19. It occurs between Halhath and Anah in the Egyptian provinces of Egypt (ancient) and Zerone (ancient), but the exact position is not clear. It is probable that the mention of Schwarcz (p. 166) as "Sbina between Doderich and Jaffo" is correct. The identification is uncertain, however, very uncertain, since Sibhin appears to contain the loc. If, while the Hebrew name does not.

The redundant k in the L. V. is an error of the recent editions. In that of 1911 the name is Shon.

G.

Shihor of Egypt (שִׁחוֹר אֶפִּיִּי): סיבון אֵפִיַּי Shihor Egypti, 1 Chr. xiii. 5) is spoken of as one limit of the kingdom of Israel in David's time, the entering in of Hanath being the other. It must correspond to "Shibor," "the Sibor which [is] before Egypt," (Josh. xiii. 2, 3), A. V. "Siber," sometimes, at least, a name of the Nile, occurring in other passages, one of which (where it has the article) is parallel to this. The use of the article indicates that the word is or has been an appellative, rather the former if we judge only from the complete phrase. It must also be remembered that Shihor Mizrain is used interchangeably with Nahal Mizrain, and that the name Shihon-Libnah in the north of Palestine, unless derived from the Egyptians or the Phoenician colonists of Egypt, as we are disposed to think possible, from the connection of that country with the ancient manufactories of glass, shows that the word Shihor is not restricted to a great river. It would appear therefore that Shihor of Egypt and "the Shihor which [is] before Egypt," might do, by the Hebrew of the Davidic Psalter, "Shihor alone would still be the Nile. On the other hand, both Shihor, and even Nahal, alone, are names of the Nile, while Nahal Mizrain is used interchangeably with the river (הנהל, not הנחל) of Mizrain.

We therefore are disposed to hold that all the names designate the Nile. The fitness of the name Shihor to the Nile must be remembered. [Nile: River of Egypt: Shihor.] R. S. P.

It is difficult to adjust all the Biblical references to Shihor, to the river Nile. In Isaiah xxiii. 3, the exports of Egypt, especially in grain, are spoken of as contributing to swell the commerce of Tyre: "By great waters the seed of Shihor, the harvest of Tyre, is her revenue." This must refer to the Nile as the cause of the fertility of Egypt. Again, in Jeremiah ii. 18, where the Lord is expostulating with Israel for seeking help from Egypt and Assyria, the Nile is evidently referred to as the "water of Egypt," the Egyptian drink, and as answering to the Ephraimites: "What hast thou to do in the way of Egypt, to drink the waters of Shihor, or what hast thou to do in the way of Assyria, to drink the waters of the river?"

But the meaning is less clear where Shihor is spoken of as the boundary between Egypt and Canaan. Just before his death Joshua described the land on the south that remained to be possessed, as "all the borders of the Philistines, and all Geshur, from Shihor which is before Egypt" (Josh. xiii. 3); and David, when taking the ark up to Jerusalem, is said to have "gathered all Israel together, from Shihor of Egypt even unto the entering of Hamath" (I Chr. xiii. 5). Joshua may have had in view the breadth of dominion promised to Abraham; but certainly in his day the Egyptians themselves did not limit their territory eastward at the Nile; and there is no evidence that the kingdom of David in its highest prosperity, ever extended literally to the bank of the Nile. Hence, if the description in these passages is taken with geographical accuracy, the Shihor before Egypt must denote the Wiedt or Wadi, and if taken with the latitude of prophetic or poetic description it may also denote the Nile, and so be brought into harmony with the passages cited above. Only in this way can the name be relieved of its apparent ambiguity. J. P. T.

Shihor-Libnah (שִׁחוֹר לִיבְנָת): [see below] כֵּלָה [Vat. Syr. כְלָה] כְּלָה. Libnah, named only in Josh. xix. 26 as one of the landmarks of the boundary of Asher. Nothing is known of it. By the ancient translators and commentators (as Peschito-Syrace, and Eusebius and Jerome in the Onomasticca) the names are taken as belonging to two distinct places. But modern commentators, beginning perhaps with Medjed, have inclined to consider Shihor as identical with the name of the Nile, and Shihor-Libnah to be a river. Led by the meaning of Libnah as "white," they interpret the Shihor-Libnah as the glass river, which they then naturally identify with the Tell A. of Pliny (H. N. v. 19), the present Nikor Numan, which drains part of the plain of Akka, and enters the Mediterranean a short distance below that city: it is a plausible theory, but one so ingenious and so consistent, and supported by the great name of Michaelis (Suppl. No. 2462), but it is surely very far-fetched. There is nothing to indicate that Shihor-Libnah is a stream at all, except the agreement of the first portion of the name with a rare word used or the Nile—a river which can have nothing in common with an insignificant streamlet like the Numan. And even if it be a river, the position of the —
SHILHI

The Targum Jonathan, Pesekto, and Arabic Versions of 1 K i. 93, read Shiloah for the Sicon of the Septuagint.

The spring and pool of Shiloah are treated of under that head.

SHILOH

of the stream would therefore not be fresh with the contrast enforced in the prophet's metaphor.

The form of the name employed by Isaiah is, midway between the hbr-Shebokh of Nehemiah (A. V. Siloam) and the Siloam of the N. T. A similar change is noticed under Shilohi.

The son and pool of Siloam are treated of under that head.

In the A. V. of the Bible, Shiloah is once used as the name of a person, in a very difficult passage, in the 10th verse of the 49th chapter of Genesis.

Supposing that the translation is correct, the meaning of the word is Peaceable, or Pacific, and the allusion is either to Solomon, whose name has a similar signification, or to the expected Messiah, who in Ex. iv. 6 is expressly called the Prince of Peace.

This was once the translation of Gesenius, though he afterwards saw reason to abandon it (see his Lexicon, s. v.), and it is at present the translation of Bengel in his Chrestological des Alien Testaments, p. 69, and of the Grand Rabbin Wagne, in his Translation of Genesis, a work which is approved and recommended by the Grand Rabbin of France (Le Pontetique, ou les Cinq Livres de Moisè, Paris, 1830). Both these writers regard the passage as a Messianic prophecy, and it is so accepted by the writer of the article Messia in this work (vol. iii. p. 196).

But, on the other hand, if the original Hebrew text is correct as it stands, there are three objections to this translation, which, taken collectively, seem fatal to it. 1st. The word Shiloah occurs nowhere else in Hebrew as the name or appellation of a person.

2. The only other Hebrew word, apparently of the same form, is Gilb (Josh. xxv. 51: 2 Sam. xxv. 12): and this is the name of a city, and not of a person. 3. By translating the word as it is translated everywhere else in the Bible, namely, as the name of the city in Ephraim where the Ark of the Covenant remained during such a long period, a sufficiently good meaning is given to the passage without any violence to the Hebrew language, and, indeed, with a precise grammatical parallel elsewhere (compare הִשְׁלֹה הִשְׁלֹה, 1 Sam. iv. 12). The simple translation is, "The sceptre shall not depart from Judah, nor the ruler's staff from between his feet, till he shall go to Shiloah." And, in this case, the allusion would be to the primacy of Judah in war (Judg. i. 1, 2, xx. 18; Num. iii. 3, x. 14), which was to continue until the Promised Land was conquered, and the Ark of the Covenant was solemnly deposited at Shiloh. Some Jewish writers had previously maintained that Shiloah, the city of Ephraim, was referred to in this passage; and Servetus had propounded the same opinion in a fanciful dissertation, in which he attributed a double meaning to the words (De Trinitate, lib. ii. p. 61, ed. of 1553 a. d.). But the above translation and explanation, as proposed and defended on critical grounds of reasonable validity, was first suggested in modern days by Teller (Vol. Critica et Exegetica in Gen. xiii., Dunt, xxxiii. Ez. xv., July, v. Hake et Hehnstall, 1796), and it has since, with modifications, found favor with numerous learned men belonging to various schools of theology, such as Eichhorn, Hitzig, Tisch, Bleek, Tovvil, Delitzsch, Kögerlé, Kalisch, Luzzatto, and Davidson.

The objections to this interpretation are set forth
at length by Hengstenberg (E. C.), and the reasons in its favor, with an account of the various interpretations which have been suggested by others, are well given by Davidson (Introduction to the Old Testament, 1. 199-210). Supposing always that he existing text is correct, the reasons in favor of Leller's interpretation seem much to preponderate. It may be observed that the main obstacle to interpreting the word Shiloh in its simple and obvious meaning seems to arise from an imaginative view of the prophecy respecting the Twelve Tribes, which finds in it more than is justified by a sober examination of it. Thus Hengstenberg says: "The temporal limit which is here placed to the commencement of Judah would be in glaring contradiction to verses 8 and 9, in which Judah, without any temporal limitation, is raised to be the Lion of God." But the allusion to a Lion is simply the following: "Judah is a Lion's whelp: from the prey, my son, thou art gone up: he stooped down, he concheled as a Lion, and as an old Lion; who shall rouse him up?" Now, bearing in mind the general coloring of oriental imagery, there is nothing in this passage which makes a reference to the city Shiloh improbable. Again, Hengstenberg says that the visions of Jacob never go into what is special, but always have regard to the future as a whole and on a great scale ("im grozen und grossen"). If this is so, it is nevertheless compatible with the following geographical statement respecting Zebulun: "Zebulun shall dwell at the haven of the sea, and he shall be for an haven of ships, and his border shall be unto Zidon." It is likewise compatible with prophecies respecting some of the other tribes, which, to any one who examined Jacob's blessing minutely with lofty expectations would be disappointing. Thus of Benjamin, within whose territory the glorious Temple of Solomon was afterwards built, it is merely said, "Benjamin shall ravin as a wolf: in the morning he shall devour the prey, and at night he shall divide the spoil." Of God it is said, "A troop shall overcome him, but he shall overcome at the last." Of Asher, "Out of Asher his bread shall be fat, and he shall yield royal dainties." And of Naphtali, "Naphtali is a hind let loose: he giveth goodly words" (Gen. xlix. 19, 20, 21, 27). Indeed the difference (except in the blessing of Joseph, in whose territory Shiloh was situated) between the reality of the prophecies and the demands of an imaginative mind, explains, perhaps, the strange statement of St. Isidore of Pelusium, quoted by Teller, that, when Jacob was about to announce to his sons the future mystery of the Incarnation, he was restrained by the finger of God; silence was enjoined him; and he was seized with loss of memory. See the letter of St. Isidore, Lib. 1. Epist. 369, in Bibliotheca Maximi Patrum, vil. 570.

2. The next best translation of Shiloh is perhaps that of a "Rest." The passage would then run thus: "The sceptre shall not depart from Judah . . . till rest come, and the nations obey him"-and the reference would be to the Messiah, who was to spring from the tribe of Judah. This translation deserves respectful consideration, as having been ultimately adopted by Gesenius. It was preferred by Vater, and is defended by Knobel in the Evangelisches Handbuch, Gen. xlix. 10. There is one objection less to it than to the use of Shiloh as a person; and it is not without some probability. Still it remains subject to the objection that Shiloh occurs nowhere else in the Bible except as the name of a city, and that by translating the word here as the name of a city a reasonably good meaning may be given to the passage.

3. A third explanation of Shiloh, on the assumption that it is not the name of a person, is a translation by various learned Jews, apparently countenanced by the Targum of Jonathan, that Shiloh merely means "his son," i.e., the son of Judah (in the sense of the Messiah), from a supposed word Shil, "a son." There is, however, no such word in known Hebrew, and as a plea for its possible existence reference is made to an Arabic word, shifil, with the same signification. This meaning of "his son" owes, perhaps, its principal interest to its having been substantially adopted by two such thelogians as Luther and Calvin. (See the Commentaries of each on Gen. xlix. 10.) Shil is then connected with the word Shiloh in Dent. xxviii. 57, but this would not now be deemed permissible.

The translation, then, of Shiloh as the name of a city is to be regarded as the soundest, if the present Hebrew text is correct. It is proper, however, to bear in mind the possibility of there being some error in that text. When Jerome translated the word "qui nissus est," we may be certain that he did not read it as Shiloh, but as some form of שיתל, "to send," as if the word שיתל might have been used in Greek. We may likewise be certain that the translator in the Septuagint did not read the word as it stands in our Bibles. He read it as שיתל = שיתל, precisely corresponding to שיתל, and translated it well by the phrase τα άνεργελματά, σύναπος, so that the meaning would be, "The sceptre shall not depart from Judah . . . till things reserved for him come." This is not the least probable, that Ezekiel translated the word in the same way when he wrote the words הַשִּׁלֹה הַיֹּצֵר הַיַּטִּיב (Ex. xxi. 32, in the A. V., verse 27); and it seems likely, though not certain, that the author of the Paraphrase of Jacob's last words in the Targum of Onkelos followed the reading of Ezekiel and the Septuagint, substituting the word והניב for the הניב of Ezekiel. It is not meant by these remarks that שיתל is more likely to have been correct than Shiloh, though one main argument against שיתל, that שיתל occurs nowhere else in the Pentateuch as an equivalent to שיתל, is inconclusive, as it occurs in the song of Deborah, which, on any hypothesis, must be regarded as a poem of great antiquity. But the fact that there were different readings, in former times, of this very difficult passage, necessarily tends to suggest the possibility that the correct reading may have been lost.

a This writer, however, was so fanciful, that no reliance can be placed on his judgment on any point where it was possible for him to go wrong. Thus his paraphrase of the prophecy respecting Benjamin, that the thorns shall still wither in the hand of Benjamin; and in his possession a sanctuary shall be built. Morning and evening the priests shall offer oblations and in the evening they shall divide the residue of their portion."
SHILOH

Whatever interpretation of the present reading may be adopted, the one which must be considered as the least unsuited to the context is that which supposes the prophecy relates to the birth of Christ as occurring in the reign of Herod just before Judaea became a Roman province. There is no such interpretation in the Bible, and however ancient this mode of regarding the passage may be, it must submit to the ordeal of a dispassionate scrutiny. In the first place, it is impossible reasonably to regard the independent rule of King Herod the Great as an instance of the sceptre being still borne by Judah. In order to appreciate the precise position of Herod, it may be easy to quote the unsuspicious testimony of Jerome, who, in his Commentaries on Matthew, lib. iii. c. 22, writes as follows:—"Cæsar Augustus Herodion filium Antipatrissalutigem et proselytum regem Judæis constitutem, qui tributis præcesset et Romanos præcesset imperio."

Secondly, it must be remembered that about 588 years before Christ, Jerusalem had been taken, its Temple destroyed, and its inhabitants led away into Captivity by Nebuchadnezzar, king of the Chaldees, and during the next fifty years the Jews were subjects of the Chaldean Empire. Afterwards, during a period of somewhat about 200 years, from the taking of Babylon by Cyrus to the defeat of Darins by Alexander the Great at Arbel, Judaea was a province of the Persian empire. Subsequently, during a period of 166 years, from the death of Alexander to the rising of the Maccabees, the Jews were ruled by the successors of Alexander. Hence for a period of more than 400 years from the destruction of the Temple by Nebuchadnezzar the Jews were deprived of their independence; and, as a plain, undeniable matter of fact, the sceptre had already departed from Judah. Without pursuing this subject further through the rule of the Maccabees (a family of the tribe of Levi, and not of the tribe of Judah) down to the capture of Jerusalem and the conquest of Palestine by Pompey (a.c. 63), it is sufficient to observe that a supposed fulfillment of a prophecy which ignores the dependent state of Judaea during 400 years after the destruction of the first Temple, cannot be regarded as based upon sound principles of interpretation.

E. T.

SHILOH, as the name of a place, stands in Hebrew as שילה (Josh. xviii. 1-10, שילה (Sam. i. 24, ii. 21; Judg. xxi. 19), שילה (1 K. ii. 37), שילה (Judg. xxi. 21; Jer. vii. 12), and perhaps also שילה, whence the gentile שילה, שילה (1 K. ix. 29, xii. 15); in the LXX. generally as Ἱσιλα, Ἱσιλᾶ in Judg. xxi. 21. Ἱσιλᾶ in Jer. xii. 5 Ἱσιλῆ, Ἀχαζ. Ἱσιλᾶ: in Joseph. Ant. viii. 7, § 7; 11, § 1, etc. Ἰςιλᾶ: v. 1, § 19; 2, § 9, Ἰςιλας: v. 12, § 12 ὅπως ὁ Ἰςιλῶν ἐστιν, and in the Vulg. as סילה, and more rarely סילה. The name was derived probably from שילה, שילה, שילה, "to rest," and represented the idea that the nation attained at this place to a state of rest, or that the Lord himself would here rest among his people. [TAANATH-

SHILOH may be another name of the same place, or of a different place near it, through which it was customary to pass on the way to Shiloh (as the obscure etymology may indicate). [TAANATH-

SHILOH] (See also Kurtz's Gesch. des A. Bundh. i. 968.)

The principal conditions for identifying with confidence the site of a place mentioned in the Bible, are: (1) that the modern name should bear a proper resemblance to the ancient one; (2) that its situation accord with the geographical notices of the Scriptures: and (3) that the statements of early writers and travellers point to a coincident conclusion. Shiloh affords a striking instance of the combination of these testimonies. The description in Judg. xvi. 19 is singularly explicit. Shiloh it is said there, is "on the north side of Bethel, on the east side of the highway that goeth up from Bethel to Shechem, and on the south of Lebanon." In agreement with this the traveller at the present day (the writer quotes here his own note-book), going north from Jerusalem, lodges the first night at Betlin, the ancient Bethel; the next day, at the distance of a few hours, turns aside to the right, in order to visit Shiloh, the Arabie for Shiloh; and then passing through the narrow Wady, which brings him to the main road, leaves el-Lebanin, the Lebanon of Scripture, on the left, as he pursues the "highway" to Nablus, the ancient Shechem. [SHCHEM.] It was by searching for some site, under guidance of the clue thus given in Scripture that Dr. Robinson rediscovered two of them (Shiloh and Lebanon) In 1835. Its present name is sufficiently like the more familiar Hebrew name, while it is identical with Shiloh (see above), on which it is evidently founded. Again, Jerome (ad Zeph. i. 14), and Eusebius (Onomast. art. שילה) certainly have Shiloh in view when they speak of the situation of Shiloh with reference to Neapolis or Nablus. It discovers a strange oversight of the data which control the question, that some of the older travellers placed Shiloh at Nacy Samwil, about two hours north-west of Jerusalem.

Shiloh was one of the earliest and most sacred of the Hebrew sanctuaries. The ark of the covenant, which had been kept at Gilgal during the progress of the Conquest (Josh. xviii. 1 f.), was removed thence to the subjugation of the country, and kept at Shiloh from the last days of Joshua to the time of Samuel (Josh. xvi. 10; Judg. xviii. 1, 31; 1 Sam. iv. 5). It was here the Hebrew conqueror divided among the tribes the portion of the west Jordan-region, which had not been already allotted (Josh. xvi. 10, Judg. xvi. 51). In the distribution, or an earlier one, Shiloh fell within the limits of Ephraim (Josh. xvi. 5). After the victory of the other tribes over Benjamin, the national camp, which appears to have been temporarily at Bethel, was transferred again to Shiloh (Judg. xxi. 12). [HOUSE OF GOD, Amer. ed.] The notice in that connection that Shiloh was in Canaan marks its situation on the west of the Jordan as opposed to Jakesh-Gilead on the east side (Bertheau, Keil, Cæsar). The seizure here of the "daughters of Shiloh" by the Benjamites is recorded as an event which preserved one of the tribes from extinction (Judg. xxi. 19-23). The annual "feast of the Lord" was observed at Shiloh, and on one of these occasions, the men lay in wait in the vineyards when the women danced forth "to dance in dances," the men took them captive and carried them home as wives. Here Eli judged Israel, and at last died of grief on hearing that the ark of the Lord was taken by the enemy (1 Sam. iv. 12-18). The story of Hannah and her vow, which belongs to our recollections of Shiloh, transmits to us a characteristic incident in
SHILOH

The life of the Hebrews (1 Sam. i. 1, etc.). Samuel, the child of her prayers and hopes, was born, brought up in the sanctuary, and called to the prophetic office (1 Sam. ii. 26, iii. 1). The nogudly conduct of the sons of Eli occasioned the loss of the ark of the covenant, which had been carried into battle against the Philistines, and Shiloh from that time sank into insignificance. It stands forth in the Jewish history as a striking example of the Divine indignation. "Go ye now," says the prophet, "unto my place which was in Shiloh, where I set my name at the first, and see what I did to it, for the wickedness of my people Israel." (Jer. ii. 13.) The rape of the ark was a single Jewish relic remaining there at the present day. A few broken Corinthian columns of the Roman age are the only antiquities now to be found on the site of Shiloh.

Some have inferred from Judg. xviii. 31 (comp. Ps. Ixxxviii. 60 L.) that a permanent structure or temple had been built for the Tabernacle at Shiloh, and that it continued there (as it were sine nomine) for a long time after the Tabernacle was removed to other places. But the language in 2 Sam. vii. 6 is too explicit to admit of that conclusion. God says there to David through the mouth of Nathan the prophet, "I have not dwelt in any house since the time that I brought up the children of Israel out of Egypt, even to this day, but have walked in a tent and a tabernacle." So in 1 K. iii. 2 it is said expressly that no "house" had been built for the worship of God till the erection of Solomon's Temple at Jerusalem. It must be in a spiritual sense, therefore, that the Tabernacle is called a "house" or "temple" in those passages which refer to Shiloh. God is said to dwell where He is pleased to manifest his presence or is worshipped; and the place thus honored becomes his abode or temple, whether it be a tent or a structure of wood or stone, or even the sanctuary of the heart alone. Ahijah the prophet had his abode at Shiloh in the time of Jeroboam I., and was visited there by the messengers of Josiah's wife to ascertain the issue of the sickness of their child (1 K. xii. 29, xii. 35, xiv. 1, etc.). The people there after the time of the exile (Jer. xil. 5) appear to have been Cushites, Zobahites, etc. The site of their temple may have been reserved as an amphitheatre, whence the spectators could look, and have the entire scene under their eyes. The position, too, in times of sudden danger, admitted of an easy defense, as it was a hill itself, and the neighboring hills could be turned into bulwarks. To its other advantages we should add that of its central position for the Hebrews on the west of the Jordan. "It was equidistant," says Tristram, "from north and south, and easily accessible to the trans-Jordanic tribes." An air of oppressive stillness hangs now over all the scene, and adds force to the reflection that truly the "oracles" so long consulted there are dumb; they had fulfilled their purpose, and given place to "a more sure word of prophecy."

A visit to Shiloh requires a detour of several miles from the ordinary track, and it has been less from much earlier times. Near a ruined mosque flourishes an immense oak, or teredinth-tree, the branches of which the winds of centuries have swayed. Just beyond the precipices of the hill stands a dilapidated edifice, which combines some of the architectural properties of a fortress and a church. Three columns with Corinthian capitals lie prostrate on the floor. An amphora between two chaplets, perhaps a work of Roman sculpture, adorns a stone over the doorway. The natives call this ruin the "Mosque of Sallim." At the distance of about fifteen minutes from the main site is a fountain, which is approached through a narrow dale. Its water is abundant, and according to a practice very common in the East, flows first into a pool or well, and thence into a larger reservoir, from which flocks and herds are watered. This fountain, which would be so natural a resort for a festal party, may have been the place where the "daughters of Shiloh" were dancing, when they were surprised and borne off by their captors. In this vicinity are rock-hewn squabbling, in which the bodies of some of the unfortunate house of Eli may have been laid to rest. There was a Jewish tradition (Asher's Benj. of Talm. ii. 435) that Eli and his sons were buried here.

It is certainly true, as some travellers remark, that the scenery of Shiloh is not especially attractive; it presents no feature of grandeur or beauty adapted to impress the mind and awaken thoughts in harmony with the memories of the place. At the same time, it deserves to be mentioned that, for the objects to which Shiloh was devoted, it was not unwisely chosen. It was secluded, and therefore favorable to acts of worship and religious study, in which the youth of scholars and devotees, like Samuel, was to be spent. Yearly festivals were celebrated there, and brought together assemblages which would need the supplies of water and pastureage so easily obtained in such a place. Terraces are still visible on the sides of the rocky hills, which show that every foot and inch of the soil once teemed with verdure and fertility. The ceremonies of such occasions consisted largely of processions and dances, and the place afforded ample scope for much fervor and devotion, and served as an amphitheatre, whence the spectators could look, and have the entire scene under their eyes. The position, too, in times of sudden danger, admitted of an easy defense, as it was a hill itself, and the neighboring hills could be turned into bulwarks. To its other advantages we should add that of its central position for the Hebrews on the west of the Jordan. "It was equidistant," says Tristram, "from north and south, and easily accessible to the trans-Jordanic tribes." An air of oppressive stillness hangs now over all the scene, and adds force to the reflection that truly the "oracles" so long consulted there are dumb; they had fulfilled their purpose, and given place to "a more sure word of prophecy."

A visit to Shiloh requires a detour of several miles from the ordinary track, and it has been less

H. B. H.

SHILONI ( valida 2i", i. e. "the Shiloniote;" [Vat.] τον Δαρέων: [Rom. Σαλονί: Alex. Σαλονί: Ἐλ.] Δαρέων: Σαλονί: Siloon; Siloon;) This word occurs in the L. V. only in Neh. xi. 5, where it should be rendered — as it is in other cases — "the Shiloniote," that is, the descendant of Shelah, the youngest son of Judah. The passage is giving an account (like 1 Chr. ix. 3-6) of the families of Judah who lived in Jerusalem at the date to which it refers, and (like that) it divides them into the great tribes of Pharez and Zaraah.

The change of Shelah to Silon is the same which seems to have occurred in the name of Siloa — Shelah in Nehemiah, and Shiloh in Isaiah.

SHILONITE, THE ( valida 2i") [see above]: in Chron., valida 2i", and valida 2i": [Vat.] o Σαλονί: [Rom.] Alex. Σαλονί: Siloon, Siloon; that is, the native or resident of Shiloh, a title ascribed only to Aliashai, the prophet who foretold to Jeroboam the disruption of the northern and southern kingdoms (1 K. xi. 29, xii. 15, xx. 29; 2 Chr. ix. 20, x. 15). Its connection with Shiloh is fixed by 1 K. xiv. 2, 4, which shows that that sacred spot was still the residence of the prophet. The word is therefore entirely distinct from that examined in the following article and under SHILONI.

SHILONITES, THE ( valida 2i") [see below]: [Vat.] τον Δαρέων: [Rom. Alex. Σαλονί: Siloon; Siloon;] are mentioned among the descendants of Judah, and in Jerusalem's restored state difficult to fix (1 Chr. ix. 5). They are doubtless the members of the house of Shiloh, who in the Pentateuch are more accurately designated SHIELANITES. This is supported by the reading of the Targum Joseph on the passage — "the tribe of Shiloh," and is allowed by Gesenius. The word occurs again in Neh. xi., a document which exhibits a certain correspondence with 1 Chr. ix. It is identical in the original except a slight contraction, but in the L. V. it is given as SHILONI.

SHISHAIAH ( valida 2i") [trinal, Ges.]: Σαλονί: [Vat.] Alex. Σαλονί: Siloon; Son of Zophah of the tribe of Asher (1 Chr. vii. 37).

SHIMEEA ( valida 2i") [trinal]: Σαλονί: [Vat.] Σαλονί: Siloon; 1. Son of David by Bathsheba (1 Chr. iii. 5). Called also SHIMMUA, and SHIMMUAH.

2. [Vat. Σαλονί: Alex. Σαλονί: Siloon;] A Mennonite (1 Chr. viii. 15). [15].

3. [Σαλονί:] SHIMEEA. A Gershonite Levite, ancestor of Asaph the minstrel (1 Chr. vii. 29). [24].

4. (Alex. Σαλονί:) The brother of David (1 Chr. xx. 7), elsewhere called SHIMMAH, SHIMMAH, and SHIMEEA.

SHIMEAM ( valida 2i") [trinal, masse]: Σαλονί: [Vat.] Alex. Σαλονί: Siloon; A descendant of Jehiel the father or founder of Gibson (1 Chr. viii. 32).

SHIMEAM ( valida 2i") [trinal, masse]: Σαλονί: [Vat.] Σαλονί: Siloon; A descendant of Jehiel, the founder or prince of Gibson (1 Chr. ix. 38). Called SHIMMUA in 1 Chr. viii. 32.

SHIMEATH ( valida 2i") [fem. = SHIMEEH]: Σαλονί: [Vat.] Σαλονί: Siloon; A descendant of Jehiel, the founder or prince of Gibson (1 Chr. ix. 38). Called SHIMMUA in 1 Chr. viii. 32.

*SHIMEATHITES ( valida 2i") [fem. = SHIMEEH]: Σαλονί: [Vat. Alex. Σαλονί: Siloon; Siloon;] one of the three families of scribes residing at Jeshua (1 Chr. ri. 50), probably descendants of a certain Shimea. See TREATIES.

A.

SHIMEE ( valida 2i") [reformed]: Σαλονί: [Zech. Σαλονί: Zel.; Vat. also Σαλονί, Siloon;] 1. Son of Gershon the son of Levi (Num. iii. 18; 1 Chr. vi. 17, 20; xxiii. 7, 9, 10; Zech. xii. 11), called SHIMME in Ex. vi. 17. In 1 Chr. vi. 21, according to the present text, he is called the son of Libni, and both are reckoned as sons of Merari, but there is reason to suppose that there is something omitted in this verse. [See LEMH 2; MAHA I.] W. A. W.

2. (Vat.] Alex. Σαλονί:) Shimee the son of Gera, a Benjamite of the house of Saul, who lived at Baalhama. His testimony agrees with the other notices of the place, as it marks a spot on the way to and from the Jordan Valley to Jerusalem, and just within the border of Benjamin. [BARKER.] He may have received the infor- mative epithet after his separation from Michal (2 Sam. iii. 16).

When David and his suite were seen descending the long defile, on his flight from Absalom (2 Sam. xvi. 5-13), the whole feeling of the clan of Benjamin burst forth without restraint in the person of Shimee. His house apparently was separated from the road by a deep valley, yet not so far as that anything that he said or said could not be distinctly heard. He ran along the ridge, cursing, throwing stones at the king and his companions, and when he came to a patch of water on the dry hill side, taking it up, and throwing it over them. Absalom was so irritated, that, but for David's remonstrance, he would have darted across the ravine (2 Sam. xvi. 9) and torn or cut off his head. The whole conversation is remarkable, as showing what may almost be called the slang terms of abuse prevalent in the two rival courts. The cant name for David in Shimee's mouth is "a man of blood," twice emphatically repeated: "Come out, come out, thou man of blood!" — "A man of blood and art thou" (2 Sam. xvi. 7, 8). It seems to have been derived from the slaughter of the sons of Saul (2
SHIMEI

Sam. xxi.), or generally perhaps from David's predatory, warlike life (comp. 1 Chr. xxi. 8). The Zent name for a Benjamite is, Abishai's mouth was "a dead dog" (2 Sam. xvi. 9; compare Abner's expression, "Am I a dog's head," 2 Sam. iii. 8). "Man of Beial" also appears to have been a favorite term on both sides (2 Sam. xvi. 7, xx. 1). The travel party passed on: Shimei following them with his stones and curses as long as they were in sight.

The next meeting was very different. The king was now returning from his successful campaign. Just as he was crossing the Jordan, in the ferry-boat or on the bridge (2 Sam. xiii. 18; LXX. δια-βάπτωνοι), Jos. Ant. viii. 2. § 4, εῇ τῷ ἐργαφόν), the first person to welcome him on the western, or perhaps even on the eastern side, was Shimei, who may have seen him approaching from the heights above. He threw himself at David's feet in acute penitence. "He was the first," he said, "of all the house of Joseph," thus indicating the close political alliance between Benjamin and Ephraim.

Another altercation ensued between David and Abishai, which ended in David's guaranteeing Shimei's life with an oath (2 Sam. xix. 18-25), in consideration of the general jubilee and amnesty of the return.

But the king's suspicions were not set rest by this submission; and on his death-bed he recalls the whole scene to the recollection of his son Solomon.

Shimei's head was now white with age (1 K. i. 9), and he was living in the favor of the court at Jerusalem (1bid. § 8). Solomon gave him notice that from henceforth he must consider himself confined to the walls of Jerusalem on pain of death. The Kidron, which divided him from the road to his old residence at Bahurim, was not to be crossed. He was to build a house in Jerusalem (1 K. i. 36, 37). For three years the engagement was kept. At the end of that time, for the purpose of capturing two slaves who had escaped to Gath, he went out on his ass, and made his journey successfully (1bid. ii. 40). On his return, the king took him at his word, and he was slain by Benaiah (1bid. ii. 41-46). In the sacred historian, and still more in Josephus (Ant. viii. 1, § 5), great stress is laid on Shimei's having broken his oath to remain at home; so that his death is regarded as a judgment, not only for his previous treason, but for his recent sacrilege.

A. P. S.

3. [Vat. Alex. Σεμείον.] One of the adherents of Solomon at the time of Adonijah's usurpation (1 K. i. 8). Unless he is the same as Shimei the son of Elah (1 K. iv. 18), Solomon's commissariat officer, or with Shimeah, or Shammah, David's brother, as Ewah (Greech. iii. 260) suggests, it is impossible to identify him. From the mention which is made of "the mighty men" in the same verse (2), it might be tempted to conclude that Shimei is the same with Shammah the Hurrite (2 Sam. xxiii. 11); for the difference in the Hebrew names of Shimei and Shammah is not greater than that between those of Shimeah and Shammah, which are both applied to David's brother.

4. [Vat. A: Alex. Σεμείον.] Solomon's commissariat officer in Benjamin (1 K. iv. 18); son of Elah.

5. [Vat. omits: Rom. Σεμείον; Alex. Σεμείον.] Son of Pedaiash, and brother of Zerubbabel (1 Chr. iii. 19).

6. [Vat Σεμείον. A Simianite, son of Zadchur (1 Chr. iv. 26, 27). He had sixteen sons and their daughters. Perhaps the same as Σημείλας 3.

7. [Vat. Alex. Σεμείον.] Son of Gog, a Reubenite (1 Chr. v. 4). Perhaps the same as Σημεία 1.

8. [Vat. Σεμείον; Alex. Σεμεία.] A Gershonite Levite, son of Japhath (1 Chr. vi. 42).

9. [Σεμείον; [Vat. Σεμείον. Alex. Σεμεία;] Sam. viii. A Levite, son of Jethun, and chief of the tenth division of the singers (1 Chr. xxv. 17). His name is omitted from the list of the sons of Jethun in ver. 3, but is evidently wanted there.

10. [Σεμείον; [Vat. Σεμείον.; Semcoius.] The Rakamthite who was over David's vineyards (1 Chr. xxvii. 27). In the Vat. MS. of the LXX. he is described as δ βαχαν.

11. [Α. Σεμείον; Semcoius.] A Levite of the sons of Heman, who took part in the purification of the Temple under Hezekiah (2 Chr. xxi. 14).

12. [Alex. Σεμείον; Semcoius.] The brother of Coniah the Levite in the reign of Hezekiah, who had charge of the offerings, the tithes, and the dedicated things (2 Chr. xxxii. 12, 13). Perhaps the same as the preceding.

13. [Alex. F. A. Σεμείον.] A Levite in the time of Ezra who had married a foreign wife (Ezr. x. 23). Called also Semcoius.

14. [Σεμείον; [Vat.] F. A. Σεμείον.] One of the family of Hashum, who put away his foreign wife at Ezra's command (Ezr. x. 33). Called Semcoius in 1 Esdr. ix. 33.

15. A son of Bani, who had also married a foreign wife and put her away (Ezr. x. 38). Called Samius in 1 Esdr. ix. 34.

16. [Σεμείον; [Vat. F. A.] Σεμείον.] Son of Kish a Benjamite, and ancestor of Mordecai (Esth. vi. 5).

W. A. W.

SHIMEON (Σημειών [a hearing, or prominent one]; Σεμειών: Simmon). A layman of Israel, of the family of Harim, who had married a foreign wife and divorced her in the time of Ezra (Ezr. x. 31). The name is the same as Simmon.

SHIM'HI (Σιμηία: [Vat. Σιμεία]; Alex. Σιμηία). A Benjamite, apparently the same as SHIMEIA the son of Elpad (1 Chr. vii. 21). The name is the same as Shimeim.

SHIM'I (Σιμιόν; [Vat. Σεμείον; Alex. Σεμείον] Son of Shimeim I, Es. vii. 17).

SHIMITES, THE (Σιμιόται [renowned, Gen.]. Σιμιότατοι: An. Alex. Σιμιότατοι. Σεμιτάτα, se. familialis). The descendants of Shimeim the son of Gershom (Num. iii. 21). They are again mentioned in Zech. xii. 13, where the LXX. have Σιμιόνων.

SHIMMA (Σιμμάων; Alex. Σιμμιαών: Shamma). The third son of Jesse, and brother of David (1 Chr. ii. 13). He is called also Shammah, Shimeim, and Shimeim. Josephus calls him Σιμμαiances (Ant vi. 8, § 1), and Σαμιάς (Ant. vii 12, § 2).

SHIMMON (Σιμμών [desert]; Σιμμών: [Vat. Σιμμών; Alex. Σιμμών; Simon]. The four sons of Shimon are enumerated in an obscure genealogy of the tribe of Judah (1 Chr. iv. 20). There is no trace of the name elsewhere in the Hebrew, but in the Alex. MS. of the LXX. there is mention made of "Shemlon the father of Joman" in 1 Chr. iv. 19, which was possibly the same as Shimon.

SHIMRATH (Σιμράθ [watch, ward]
SHIMRI ("šimrī") ["righitāb": Ṣemrī; [Vat. Ṣemrā; Alex. Ṣemrānas = Ṣemrā. 1.] A Simeonite, son of Shemai (1 Chr. vii. 37).

2. (Ḳumrī; [Vat. _SHAṣer/Semrā]. Alex. Ṣemrā) Shemai. The father of Jedid, one of David's guards (1 Chr. xi. 45).

3. (Ḳumrā; [Vat. Ṣamrā]/ṇ; Alex. Ṣamʿrā/Samʿrā. A Kohathite Levite in the reign of Hezekiah, one of the sons of Elizaphan (2 Chr. xxix. 13). He assisted in the purification of the Temple.

SHIMRITH (Shaʾimrith) [sem. vighēnāb]: Ṣemrānī; [Vat. Ṣemrānāt; Alex. Ṣemrānāt = Ṣemrānāt]. A Mezadith, mother of Jehohabab, one of the assassins of King Jotham (2 Chr. xxxiv. 26). In 2 K. xii. 21, she is called Shimrith. The Peshito-Syrac system Netureth, which appears to be a kind of attempt to translate the name.

SHIMRON (Shaʾimron) [watch-height]: Ṣemrān; [Vat. Ṣemrānāt; Alex. Ṣemrānāt = Ṣemrān]. Shimron the son of Issachar (1 Chr. vii. 1). The name is correctly given as Shimmon in the A. V. of 1611.

SHIMRON (Shaʾimron) [watch-height]: Ṣemrān; [Vat. Ṣemrānāt; Alex. Ṣemrānāt = Ṣemrān]. A city of Zebulun (Josh. xix. 15). It is previously named in the list of the places whose kings were called by Jabin, king of Hazor, to his assistance against Joshua (xi. 1). Its full appellation was perhaps Shimmon-Merom. Schwarz (p. 172) proposes to identify it with the Simomites of Josaphus (Vita, § 24), now Simiynî, a village a few miles W. of Nazareth, which is mentioned in the well-known list of the Talmon (Josh. xvi. 11) as the ancient Shimron. This has in its favor its proximity to Bethlehem (comp. xix. 15). The Vat. LXX., like the Talmud, omits the e in the name.

SHIMRONITNES (Shaʾimronithin) [patr. see above]: [Vat. Ṣemrānā; Rom. Ṣemrānā; Alex. Ṣamʿrānāt = Ṣemrānāt]. The family of Shimron, son of Issachar (Num. xxvi. 24).

SHIMRON-MERON (Shaʾimron-mören) [watch-height of M., Ges.]: the Kerith on the S. of Ẓimnā [Ḳumrā; Ṣamʿrā]. Alex. Ṣamʿrānāt = Ṣamʿrānāt]. The king of Shimron-Meron is mentioned as one of the thirty-one kings vanquished by Joshua (Josh. xii. 20). It is probably (though not certainly) the complete name of the place elsewhere called Shimron. Both are mentioned in proximity to Achshaph (xi. 1, xii. 20). It will be observed that the LXX. treat the two words as belonging to two distinct places, and it is certainly worth notice that Madon

This addition, especially in the Alex., MS. — usually so close to the Hebrew — is remarkable. There nothing in the original text to suggest it.

SHINAR 3003

In Hebrew so easily substituted for Meron, and in fact so read by the LXX., Peshitta, and Arabic — occurs next to Shimron in Josh. xi. 1.

There are two claimants to identity with Shimron-Meron. The old Jewish traveller hap-hazard fixes it at two hours east of Engannim (Jonah), south of the mountains of Gilboa, on a road which passed on his way to Mount Meron (Asher's Be'gin, ii. 434). No modern traveller appears to have explored that district, and it is consequently a blank on the maps. The other is the village of Simiynî, west of Nazareth, which the Talmud asserts to be the same with Shimron.

SHIMSHA (2 syr. ) (Shaʾimṣah) [Syr. Zimṣah, etc.]: [Vat. Ṣemṣa; Alex. Ṣemṣa = Ṣemṣa]. The scribe or secretary of Ishma, who was a kind of scribe of the conquered province of Judah, and of the colony at Samaria, supported by the Persian court (Ezra iv. 8, 9, 17, 23). He was apparently an Aramaean, for the letter which he wrote to Artaxerxes was in Syriac (Ezr. iv. 7), and the form of his name is in favor of this supposition. In 1 Esdr. ii. he is called Semelius, and by Josephus (Ant. vi. 2, § 3). The Samaritans were jealous of the return of the Jews, and for a long time plotted against them without effect. They appear ultimately, however, to have prejudiced the royal officers, and to have prevailed upon them to address to the king a letter which set forth the turbulent character of the Jews and the dangerous character of their undertaking, the effect of which was that the rebuilding of the Temple ceased for a time.

SHINAB (Shaʾināb) [father's tooth]: Ṣemnādāw. The king of Adna in the time of Abraham: one of the five kings attacked by the invading army of Chedorlaomer (Gen. xiv. 17). Josephus (Ant. i. 9) calls him Senabardas.

SHINAR (Shaʾinār) [see below]: Ṣemnādāw. [Alex. Ṣemnādāw; see also below]: Senmor. [Rom. Ṣemnādāw; Alex. Senmor. The king of Senmor seems to have been the ancient name of the great alluvial tract through which the Tigris and Euphrates pass before reaching the sea — the tract known in later times as Chaldaea or Babylonia. It was a plain country, where brick had to be used for stone, and slime (mud?) for mortar (Gen. xii. 3). Among its cities were Babel (Babylon), Erech or Erech (Orchao), Calneh or Calno (probably Nippur), and Accad, the site of which is unknown. These notices are quite enough to fix the situation. It may, however, be remarked further, that the LXX. render the word by "Babylonia" (Basbolwia) in one place (Is. xi. 11), and by "the land of Babylonia" (γυμ βαβυλονίαν) in another (Zech. v. 11). The word also occurs (Jesp. vii. 21) in the phrase rendered in the A. V. Babylonish garment. — A.]

The native inscriptions contain no trace of the term, which seems to be purely Jewish, and unknown to any other people. At least it is extremely doubtful whether there is really any connection between Shinar and Singara or Sinjar. Singara was the name of a town in Central Mesopotamia, well known to the Romans (Dio Cass. liv. ii. 22; Amm. Marc. viii. 5, &c.), and still existing (Layard, Nin. and Bâb, p. 249). It is from this place that the mountains which run across Mesopotamia from Mosul to Kukheh receive their title of "the Sinjar range" (Σημινάδας βουρακόντας, Ptole. v. 18). As this name first appears in central Mesopotamia, to
SHIP

which the term Shirar is never applied, about the
time of the Antonines, it is very unlikely that it
grew up from the old Shirar, which could practic-
ally be a geographic title seen after the death
of Moses. a

It may be suspected that Shirar was the name
by which the Hebrews originally knew the lower
Mesopotamian country where they so long dwelt,
and which Abraham brought with him from "Ur
of the Chaldees." (Mishn. B. B. 2. 5.) Possibly it means
"the country of the Two Rivers," being derived from
"Širān," "two," and "or," which was used in
Babylonia, as well as "nor" or "nādir." (77), for
"a river." (Compare the "Ar-rimalchar" of Pliny,
H. N. vi. 26, and Greek "Ar-rimaces" of Abydenus,
Fr. 9, with the "Narrimacha" of Ammianus, xxiv. 6,
called "Nagadya," by Iskoure, p. 5, which is trans-
lated as "the River Rimas," and compare again the
"Narragam" of Pliny, H. N. vi. 29, with the "Aramenus" of Abydenus, l. s. c.
G. K.

SHIP. No one writer in the whole range of
Greek and Roman literature has supplied us (it
may be doubted whether all put together have sup-
plied us) with so much information concerning the
merchant-ships of the ancients as St. Luke in the
narrative of St. Paul's voyage to Rome (Acts
xxvii., xxviii.). In illustrating the Biblical side of
this question, it will be best to arrange in order the
various particulars which we learn from this nar-
rative, and to use them as a basis for elucidating
whatever else occurs, in reference to the subject, in
the Gospels and other parts of the N. T., in the
T. T. and the Apocalypse. As regards the earlier
Scriptures, the Septuagintal thread will be fol-
lowed. This will be the easiest way to secure the
mutual illustration of the Old and New Testaments
in regard to this subject. The merchant-ships of
various dates in the Levant did not differ in any
essential principle; and the Greek of Alexandria
contains the nautical phraseology which supplies
our best linguistic information. Two preliminary
remarks may be made at the outset.

As regards St. Paul's voyage, it is important to
remember that he accomplished it in three ships:
first a large "galleone" or freight ship (Magnum
Transitum) which took him from Cesarea to Myra, and
which was probably a coasting vessel of no great
size (xxvii. 1-6); secondly, the large Alexandrian
corn-ship, in which he was wrecked on the coast of
Malta (xxvii. 6-xxviii. 1) (Melita); and thirdly, another
large Alexandrian corn-ship, in which he sailed from Malta by Syracuse and Rhodes to
Puteol (xxviii. 11-16).

Again, the word employed by St. Luke, of each
of these ships, is, with one single exception, when
he uses πάροισ (xxvii. 41), the generic term παλαιος
(xxvii. 2, 9, 10, 15, 22, 30, 37, 38, 39, 44, xxviii.
11). The same general usage prevails throughout.
Elsewhere in the Acts xx. 13, 44, xxii. 5, 6) we have
παλαιος. So in St. James (iii. 4), and in the
Revelation (vi. 2. 8. 14. 15). In the Gospels we have
παλαίον (passim) or παλαιαν (Mark iv.
36; John xxi. 8). In the |XX. we find παλαιος
used twenty-eight times, and παλαις nine times.
Both words generally correspond to the Hebrew

SHIP

or "טִפִּיָה." In Josh. i. 5, παλαίον is used to
represent the Hebrew "טִפִּיָה," which,
from its etymology, appears to mean a vessel cov-
ered with a deck or with hatches, in opposition to
an open bate. The senses in which παλαίον
(2 Macc. xii. 3, 6) and παλαίον (Acts xxvii. 16, 32)
are employed we shall notice as we proceed. The
use of στυγία is limited to a single passage in the
Apocalypse (2 Macc. iv. 20).

(1.) Size of Ancient Ships. — The narrative
which we take as our chief guide affords a good
standard for estimating this. The ship in which
St. Paul was wrecked had 275 persons on board
(Acts xxvii. 22), besides a cargo (φορτίον) of wheat,
(16, 10, 28); and all these passengers seem to have
been taken on to put aside in another ship (xxviii. 11)
which had its own crew and its own cargo; nor is
there a trace of any difficulty in the matter, though
the emergency was unexpected. Now in English
transport-ships, prepared for carrying troops, it is
a common estimate to allow a ton and a half per
man, so that we see that it would be a mistake to sup-
pose that these Alexandrian corn-ships were very
much smaller than modern trading vessels.
What is here stated is quite in harmony with other
instances. The ship in which Josephus was wrecked
(15, ch. 3), in the same part of the Levant, had
600 souls on board. The Alexandrian corn-ship
described by Lycpus (i. 11. 6. 2) as driven into the
Piraeus by stress of weather, and as ex-
citing general attention from its great size, would
appear (from a consideration of the measurements,
which are explicitly given) to have measured 1,000
or 1,200 tons. As to the ship of Ptolemy Phila-
delphus, described by Athenaeus (v. 204), this must
have been much larger; but it would be no more
fair to take that as a standard than to take the
"Great Eastern" as a type of a modern steamer.
On the whole, if we say that an ancient merchant-
ship might range from 500 to 1,000 tons, we are
clearly within the mark.

(2.) Steering Apparatus. — Some comment-
ators have fallen into strange perplexities from
observing that in Acts xxvii. 40 (τὰς εὐκρήνεις τῶν πυλα-
νῶν "the fastenings of the rudders") St. Luke
uses πυλανων, which is probably a mistake, for
that the ship had one rudder fastened at the bow
and another fastened at the stern. We may say
of him, as a modern writer says in reference to a
similar comment on a passage of Cicero, "It is
hardly possible that he can have seen a ship." The
sacred writer's use of πυλανων is just like
Pliny's use of "gubernacula" (II. N. xi. 87, 88), or
Lucretius's of "gubernia" (iv. 440). Ancient ships
were in truth not steered at all by rudders fastened
or hinged to the stern, but by means of two pad-
dle-rudders, one on each quarter, acting in a row-
lock or through a port-hole, as the vessel might be
small or large. This fact is made familiar to us in
classical works of art, as on coins, and the sculptures
of Trajan's Column. The same thing is true, not
only of the Mediterranean, but of the early ships
of the Northmen, as may be seen in the Bayeux
tapestry. Traces of the "two rudders" are found
in the time of Louis IX. The hinged rudder first
where, in a detailed allegorical comparison of the
Church to a ship, he says "her two rudders are the
two Testaments by which she steers her course."
appears on the coin of our King Edward III. There is nothing out of harmony with this early system of the ship in Joshua, ch. iv, where γεννάω occurs in the singular; for the governor or steersman (δεσπότης) would only use one paddle-rudder at a time. In a case like that described in Acts xxvii. 40, where four anchors were let go at the stern, it would of course be necessary to lash or trice up both paddles, lest they should interfere with the ground tackle. When it became necessary to anchor again, and the anchor-ropes were cut, the lashings of the paddles would of course be unaffected.

(3.) Build and Ornament of the Ship. — It is probable, from what has been said about the mode of steering (and indeed it is nearly evident from ancient works of art), that there was no very marked difference between the bow (πυγμα, "foreship," ver. 36; "fore part," ver. 41) and the stern (πυγμα, "hinder part,") ver. 41; see Mark iv. 38.

The "hold" (κατατός, "the sides of the ship," Jonah i. 5) would present no special peculiarities. One characteristic ornament (the χρυσάκια, or υπόστροφες), rising in a lofty curve at the stern or the bow, is familiar to us in works of art, but no allusion to it occurs in Scripture. Of two other customary orna-
ments, however, probably hinted, and the second is distinctly mentioned in the account of St. Paul's voyage. That personification of ships, which seems to be instinctive, led the ancients to paint an eye on each side of the bow. Such is the custom still in the Mediterranean, and indeed our own sailors speak of "the eyes" of a ship. This givesvisibility to the word ἀστυφαλάγμα, which is used (Acts xxvii. 13) where it is said that the vessel could not "bear up into" (literally "look at") the wind. This was the vessel in which St. Paul was wrecked. An ornament of that which took him on from Malta to Ponzcoli is more explicitly referred to. The "sign" of that ship (παραδοχήσ, Acts xxviii. 11) was CASTOR AND POLLUX; and the symbols of these heroes (probably in the form represented in the coin engraved under that article) were doubtless painted or sculptured on each side of the bow, as was the case with the goddess Isis on Lucian's ship (ὁ πυγμα των ἐκατόμησ της νεως θεων ἑκάσας την ἐνοικράτηρα, Nupt. e. 5).

(4.) Undergirders. — The imperfection of the build, and still more (see below, 6) the peculiarity of the rig, in ancient ships, resulted in a greater tendency than in our times to the starting of the planks, and consequently to leaking and foundering. We see this taking place alike in the voyages of Jonah, St. Paul, and Josephus; and the loss of the fleet of Λενας in Virgil ("axis laterum compaginis occurs,"

Acts. ii. 122) may be adduced in illustration. Hence it was customary to take on board peculiar equipment with the ship (ὑποστροφέω, Acts xxvii. 17), as precautions against such dangers. These were simply cables or chains, which in case of necessity could be passed round the frame of the ship, at right angles to its length, and made tight. The process is in the English navy called jiggging, and many instances could be given where it has been found necessary in modem experience. Underliny's "great ship, in Athenaeus (l. c.), carried twelve of these undergirders (ὑποστροφήματα). Various allusions to the practice are to be found in the ordinary classical writers. See, for instance, Thucyd. i. 29; Plat. Rep. x. 3, 616; Hor. Od. i. 14, 6. But it is most to our purpose to refer to the inscriptions, containing a complete inventory of the Athenian navy, now in the British Museum, Sev. Sched. Alter. Inst. (Berlin, 1849). The editor, however, is quite mistaken in supposing (pp. 133-138) that these undergirders were passed round the lody of the ship from stern to stern.

(5.) Anchors. — It is probable that the ground tackle of Greek and Roman sailors was quite as good as our own. (On the taking of soundings, see below, 12.) Ancient anchors were simply in form (as may be seen on coins) to those which we now use, except that they were without flukes. Two allusions to anchoring are found in the N. T., one in a very impressive metaphor concerning Christian hope (Heb. vi. 19). A saying of Socrates, quoted here by Kyriake (ὑπερ τενός καὶ ἐνάντιον ἐπόσε ἀκρίτος ἵνα αὕτως ἐξηκοστήσω, "you were to carry our thoughts to the other passage, which is part of the literal narrative of St. Paul's voyage at its most critical point. The ship in which he was sailing had four anchors on board, and these were all employed in the night, when the danger of falling on breakers was imminent. The sailors on this occasion anchored by the stern (ἐκ προσεκτωτέρας ἴκνας τεσσαρωσ, Acts xxviii. 20). In this there is nothing improbable, if there has been time for the preparation. Our own ships of war anchored by the stern at Copenhagen and Algiers. It is clear, too, that this was the right course for the sailors with whom St. Paul was concerned, for their plan was to run the ship aground at daybreak. The only motives for surprise are that they should have been able so to anchor without preparation in a gale of wind, and that the anchors should have held on such a night. The answer to the first question thus suggested is that ancient ships, like their modem successors, the small craft among the Greek islands, were in the habit of anchoring by the stern, and therefore prepared for doing so. We have a proof of this in one of the paintings of Herennianus, which illustrates another point already mentioned, namely, the necessity of tripping up the moveable rudders in case of anchoring by the stern (see ver. 40). The other question, which we have supposed to arise, relates rather to the holding-ground than to the mode of anchoring; and it is very interesting here to quote what an English sailing book says of St. Paul's Bay in Malta: "While the cables hold, there is no danger, as the anchors will never start" (Parry's Sailing Directions, p. 180).

(6.) Masts, Sails, Ropes, and Yardbs. — These were collectively called σκεύος or σκεύη, or ycar (τα δε σκέπαστα σκευή καλείται, Jul. Poll.). We find this word twice used for parts of the rigging in the narrative of the Acts (xxvi. 17, 18). The rig of the ship was no smaller than that employed in modern times. Its great feature was one large mast, with one large square sail fastened to a yard of great length. Such was the rig also of the ships of the Northmen at a later period. Hence the strain upon the hull, and the danger of starting the planks, were greater than under the present system, which distributes the mechanical pressure more evenly over the whole ship. Not that there were never more masts than one, or more sails than one on the same mast, in an ancient merchantman. But these were exceptions, so to speak, of the same general unit of rig. In the account of St. Paul's shipwright very expansi
SHIP

mention is made of the ἄρτεμιν (xxvii. 40), which is undoubtedly the "foresail" (not "main sail," as in the A. V.). Such a sail would be almost necessary in putting a large ship about. On that occasion it was used in the process of running the vessel aground. Nor is it out of place here to quote a Cruciform here in the "Toras" (Dec. 5, 1855): "The 'Lord Eagle' (merchant-ship) is on shore, but taken there in a most sailorlike manner. Directly her captain found he could not save her, he cut away his mainmast and mizen, and setting a topsail on her foremost, ran her ashore stem on."

Such a mast may be seen, raking over the bow, in representations of ships in Roman coinages. The mast (ἰσχία) is mentioned (Is. xxviii. 1; Ez. vii. 1); and from another prophet (Ez. xxxvi. 5) we learn that cedar-wood from Lebanon was sometimes used for this part of ships. There is a third passage (Prov. xxxii. 14, ἐπὶ τὴν θάλασσαν) where the top of a ship's mast is probably intended, though there is some slight doubt on the subject, and the LXX. take the phrase differently. Both ropes (στροφεῖα, Acts xxvii. 32) and sails (ἰστρία) are mentioned in the above-quoted passage of Isaiah; and from Ezekiel (xxvi. 7) we learn that the latter were often made of Egyptian linen (if such is the meaning of τηροτέμων). There the word χαλάζω (which we find also in Acts xxvii. 17, 30) is used for lowering the sail from the yard. It is interesting here to notice that the word ἑποστάλαμα, the technical term for furling a sail, is twice used by St. Paul, and that in an address delivered in a seaport in the course of a voyage (Acts xx. 20, 27). It is one of the very few cases in which the Apostle employs a nautical metaphor.

This seems the best place for noticing two other points of detail. Though we must not suppose that merchant-ships were habitually propelled by rowing, yet sweats must sometimes have been employed. In Ez. xxvii. 21, ἵππος (ἱππός ἀναξ) is distinctly mentioned; and it seems that oak-wood from Bashan was used in making them (ἐκ τῆς Βασσαρίας ἑποστάλαμα τῆς κατά πολλὰς ώρας, ibid. 6). Again, in Is. xxxiii. 21, ὀρέα literally means "a ship of war," i. e. an oared vessel. Rowing, too, is probably implied in Jon. i. 13, where the LXX. have simply παράβεβληστο. The other feature of the ancient, and of the modern ship, is the flag of σημαίνατο at the top of the mast (Is. l. c., and xxxi. 17). Here perhaps, as in some other respects, the early Egyptian paintings supply our best illustration.

(7.) Rate of Sailing. — St. Paul's voyages furnish excellent data for approximately estimating this; and they are quite in harmony with what we learn from other sources. We must notice here, however (what commentators sometimes curiously forget), that winds are variable. Thus the voyage between Troas and Philippi, accomplished on one occasion (Acts xvi. 11, 12) in two days, occupied on another occasion (Acts xx. 6) five days. Such a variation might be illustrated by what took place almost any week between Dublin and Holyhead before the application of steam to seafaring. With a fair wind an ancient ship would sail fully seven knots an hour. Two very good instances of this are supplied by Paul's experience in the voyages from Cesarea to Sidon (Acts xxvi. 2, 3), and from Rhegium to Puteoli (Acts xxviii. 13). The result given by comparing in these cases the measurements of time and distance corresponds with what we gather from Greek and Latin authors generally: e. g., from Pliny's story of the fresh fig produced by Cato in the Roman Senate before the third Punic war: "This fruit was gathered fresh at Carthage three days ago: that is the distance of the enemy from your walls" (Plin. H. N. xvi. 20).

(8.) Sailing before the wind, and near the wind. — The rig which has been described is, like the rig of Chinese junks, peculiarly favorable to a quick run before the wind. We have in the A. T. (Acts xvi. 11, xxviii. 16) the technical term πολυκόρσος for voyages made under such advantageous conditions. 4 It would, however, be a great mistake to suppose that ancient ships could not work to windward. Pliny distinctly says: "Idem ventis in contrarium navigat prolatis pedibus" (H. N. ii. 48). The superior rig and build, however, of modern ships enable them to sail nearer to the wind than was the case in classical times. At one very prominent point of St. Paul's voyage to Rome (Acts xxvii. 7) we are told that the ship could not hold on her course (which was W. by S., from Cnidus by the north side of Crete) against a violent wind (ὑπὸ προκατωστὸν ὕσσος τοῦ ἀνέμου) blowing from the N. W., and that consequently she ran down to the east end of Crete [Salcombe], and worked up under the shelter of the south side of the island (vv. 7, 8). [Fair Havens.] Here the technical terms of our sailors have been employed, whose custom is to divide the whole circle of the compass-card into thirty-two equal parts, called points. A modern ship, if the weather is not very boisterous, will sail within six points of the wind. To an ancient vessel, of which the hull was more clumsy, and the yards could not be braced so tight, it would be safe to assign seven points as the limit. This will enable us, so far as we know the direction of the wind (and we can really ascertain it in each case very exactly), to lay down the tracks of the ships in which St. Paul sailed, beating against the wind, on the voyages from Philippi to Troas (ἀχιφαίροντα παρασύροντα, Acts xxviii. 6), from Sidon to Myra (Διὰ τῆς ἀνέμου εἰς τὴν ἀρρενίνα, xxvii. 3-5), from Myra to Cnidus (ἐν κατακόμβαι ἤμεραι βαρόνθε κατακόμβαις, xxvii. 6, 7), from Salamine to Fair Havens (ἀφεὶς παραλεγέσθαι, xxviii. 7, 8), and from Syracuse to Rhegium (περιωθεῖται, xxviii. 12, 13).

(9.) Lying-to. — This topic arises naturally out of

4 With this compare τὸν ἐπὶ σημαίναν ἐν ἄνεμῳ an interesting passage of Philo concerning the Alex-

andrian ships (de Fasec. p. 988, ed. Frankl 1691).
of what has preceded, and it is so important in reference to the main questions connected with the shipwreck at Malta, that it is here made the subject of a separate section. A ship that could make progress on her proper course, in moderate weather, when sailing within seven points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is, not to make progress at all hazards, but to ride out a gale in safety; and that was certainly St. Paul’s ship when she was underway and the boat taken on board (Acts xxvii. 14–17) under the lee of Claudia. It is here that St. Luke uses the vivid term ἀστροφαλάξεις, mentioned above. Had the gale been less violent, the ship could easily have held on her course. To anchor was out of the question; and to have drifted before the wind would have been to run into the fatal Syrtis on the African coast. [Quickandslow.]

Hence the vessel was “bidde” (“close-hauled,” as the sailors say) “on the starboard tack,” i.e. with her right side towards the storm. The wind was E. N. E. [Eurycles-mon], the ship’s bow would point N. by W., the direction of drift (six points being added for “lee-way”) would be W. by N., and the rate of drift about a mile and a half an hour. It is from these materials that we have easily come to the conclusion that the shipwreck must have taken place on the coast of Malta. [Adria.]

(19.) Ship’s Boat. — This is perhaps the best place for noticing separately the σκάφος, which appears prominently in the narrative of the voyage (Acts xxvii. 16, 32). Every large merchant-ship must have had one or more boats. It is evident that the Alexandrian corn-ship in which St. Paul was sailing from Fair Havens, and in which the sailors, apprehending no danger, hoped to reach Phænice, had her boat towing behind. When the gale came, one of their first desires must have been to take the boat on board, and this was done under the lee of Claudia, when the ship was underway, and brought round to the wind for the purpose of lying-to; but it was done with difficulty, and it would seem that the passengers gave assistance in the task (οἱ δὲ ἰχθυαίοι περικατείχασιν γεινάσα τῇ σκάφῳ, Acts xxvii. 15). The sea by this time must have been furiously rough, and the boat must have been filled with water. It is with this very boat that one of the most lively passages of the whole narrative is connected. When the ship was at anchor in the night before she was run aground, the sailors lowered the boat from the davits with the selfish desire of escaping, on which St. Paul spoke to the soldiers, and they cut the ropes (τὰ ψαύματα) and the boat fell off (Acts xxvii. 39–32).

(11.) Officers and Crew. — In Acts xxvii. 11 we have both καβεθήρης and καβερνάριον. The latter is the owner (in part or in whole) of the ship or the cargo, receiving also (possibly) the fares of the passengers. The former has the charge of the steering. The same word occurs also in Rev. xvii. 17: Prov. xxxvi. 34: Ez. xxvii. 8, and is equivalent νέαρμος in Ez. xxvii. 21; Jon. i. 6. In James v. 4 ὁ ἐνωμίων, “the governor,” is simply the steward mentioned for the moment in the narrative as “shipmen” (Acts xxvii. 29, 30) and “sailors” (Rev. xvii. 17) is simply the usual term ναύται. In the latter passage διαμαλοί occurs for the crew, but the text is doubtful. In Ez. xxvii. 8, 9, 24, 27, 29, 34, we have καβερνάριον for “those who handle the

or,” and in the same chapter (ver. 23) ἐπιβάται, which may mean either passengers or mariners. The only other passages which need be noticed here are 1 K. ix. 27, and 2 Chr. vii. 18, in the account of Solomon’s ships. The former has τῶν παῖδων αυτοῦ ἀδρεὺς κατοικοῖς ἐλαυνεῖ εἰδεῖς θάλασσαν; the latter, παῖδες εἰδότες θάλασ.

(12.) Storms and Shipwrecks. — The first century of the Christian era was a time of immense traffic in the Mediterranean; and there must have been many vessels lost there every year by shipwreck, and (perhaps) as many by founding. This last danger would be much increased by the form of rig described above. Besides this, we must remember that the ancients had no compass, and very imperfect charts and instruments, if any at all; and though it would be a great mistake to suppose that they never ventured out of sight of land, yet, dependent as they were on the heavenly bodies, the danger was much greater than now in mild weather, when the sky was overcast, and “neither sun nor stars in many days appeared” (Acts xxvi. 29). Hence also the winter season was considered dangerous, and, if possible, avoided (ὑποκειμένος τοῦ παντὸς, ἱδί το καὶ τῆς νυκτίδος ἕκατης ηὐρίσκεται, “and as one it is difficult to find at night”). Certain too was the stormy sea, and much dreaded, especially the African Syrtis (Ibid. 17). The danger indicated by breakers (ibid. 23), and the fear of falling on rocks (τρυχαὶ τότως), are matters of course. St. Paul’s experience seems to have been full of illustrations of all these perils. We learn from 2 Cor. xi. 25 that, before the voyage described in detail by St. Luke, he had been “nine times wrecked,” and further, that he had once been “a night and a day in the deep,” probably floating on a spar, as was the case with Josephus. These circumstances give peculiar force to his using the metaphor of a shipwreck (ἐκατάγγελος, I Tim. i. 19) in speaking of those who had apostatized from the faith. In connection with this general subject we may notice the caution with which, on the voyage from Tarsus to Patara (Acts xx. 13–16, xxii. 1), the sailors anchored for the night during the period of dark moon, in the intricate passages between the islands and the main (Μιθυλένη: Σάμος: Τριογύλλιον), the evident acquaintance which, on the voyage to Rome, the sailors of the Adramyttian ship had with the current on the coasts of Syria and Asia Minor (Acts xxii. 2–5) [ΔραίομαιΤῆς], and the provision for taking soundings in case of danger, as clearly indicated in the narrative of the shipwreck at Malta, the measurements being apparently the same as those which are customary with us (βαθματαῖες ἐφώνομαι ἑκατον διαδοχάστες, καὶ παλίν ἄλλαςας, ἐφώνομαι διαδοχάστες, Acts xxvii. 28).

(13.) The Sea of Galilee. — There is a melancholy interest in that passage of Dr. Robinson’s Researches (iii. 235), in which he says, that on his approach to the Sea of Tiberias, he saw a single white sail. This was the sail of the one rickety boat which, as we learn from other travellers (see especially Thomson, Land and Book, pp. 393–404), remains on a scene represented to us in the gospels and in Josephus as full of life from the

a * The “mariners” (Acts viii. 1 f. (ς ρυθοῦντοι) are simply those who follow the sea, whether others or crew.

b If
multitude of its fishing-boats. In the narratives of the disciples to be "fishers of men" (Matt. iv. 18-22; Mark i. 16-20; Luke v. 1-11), there is no special information concerning the characteristics of these boats. In the account of the storm and the miracle on the lake (Matt. vii. 23-27; Mark iv. 39-41; Luke vii. 22-25), it is for every reason instructive to compare the three narratives; and we should observe that Luke is more technical in his language than Matthew, and Mark than Luke. Thus instead of σεσεμος κηφας γεγενετο εν τη θαλασσαι (Matt. viii. 24), we have αι κηφαι των απομειναι των Αβουμ (Luke vii. 27), and again της κλητος των δασων (Ver. 24); and instead of αυτο τω πλαιον καπιτανησαι we have συναπερναοντο. (In Mark iv. 37) they have τα κινησε επιβαλλειν εις το πλαιον, μενυται αυτον ην γεμιζεσθαι. This Evangelist also mentions the προεκοιλακον, or boatman's cushion,1 on which our blessed Saviour was sleeping εν τη νυκτι, and he uses the technical term ἐκατασκευασεν for the building of the boat. (Πιλων, Αμερ, ed.) See more on this subject in Smith, Dispersion on the Targums (Lond. 1853). We may turn now to St. John. In the account he gives of what followed the miracle of walking on the sea (vi. 16-26), παλαισων and παλαιον seem to be used indifferently, and we have mention of other παλαια. There were, however, different kinds of vessels used on the lake. The reading, however, is doubtful. Finally, in the solemn scene after the resurrection (John xxi. 1-8), we have the terms αεταλοσ and τα δεξια μερη τω πλαιον, which should be noticed as technical. Here again παλαιον and παλαιον appear to be synonymous. If we compare all these passages with Josephus, we easily come to the conclusion that, with the large population round the Lake of Tibceans, there must have been a vast number both of fishing-boats and pleasure-boats, and that boat building must have been an active trade on its shores (see Stanley, Sin. and Pol. p. 397). The term used by Jospehus is sometimes παλαιον, sometimes σκαφος. There are two passages in the Jewish historian to which we should carefully refer, one in which he describes his voyage taking of the Tiberians by an expedition of boats from Tarsichus (176, 32, 33, R. J. ii. 21, §§ 8-10). Here he says that he collected all the boats on the lake, amounting to 230 in number, with four men in each. He states also incidentally that each boat had a "pilot" and an "anchor." The other passage describes the operations of Vespasian at a later period in the same neighbourhood (B. J. iii. 10, §§ 5, 6, 9). These operations amounted to a regular Roman sea-fight, and large rafts (γραχια) are mentioned besides the boats of σκαφος.

(14.) Merchant-Ships in the Old Testament. — The earliest passages where sailing is alluded to in the O. T. are the following in order, Gen. xiii. 13, in the prophecy of Jacob concerning Zebulun (κατοικησεις παρ τοις δουμαν πλαιον): Num. xxv. 24, in Balaam's prophecy (where, however, ships are not mentioned in the LXX.); Deut. xxviii. 68, in one of the warnings of Moses (αποστρεφετε σε Καθαρμος εις Απογον εν πλαιον); Judges v. 17, in Deborah's Song (Δαιν εις τι παραιτε πλαιον). Next after these it is natural to mention the illustrations and descriptions connected with this subject in Job (iv. 28), and especially concerning the lake. Here we see παλαια διαπροσερονται, (iv. 28), or παλαια ποταμων (in πλαιον). Prov. xxiii. 34 has already been quoted. To this add xxx. 10 (τριμυον πευτο ποταμοστραται). xxxi. 14 (ναοι εμπορευματει μικραθέν). Solomon's own ships, which may have suggested some of these illustrations (I K. iv. 20; II Chr. viii. 18, ix. 21), have previously been mentioned. We must notice the disastrous expedition of Jehoshaphat's ships from the same port of Ezion-geber (I K. xxii. 48, 49; 2 Chr. xxx. 36, 37). The passages which remain are in the prophets. Some have been already alluded to from Isaiah and Ezekiel. In the former prophet the general term "ships of Tarshish" is variously given in the LXX., πλαιον θαλασσης (ii. 10), πλαιον Καρθαγην (xxiii. 1, 14), πλαιον Θαρσης (k. b.). For another allusion to seafaring, see xiii. 3, 4. The celebrated 27th chapter of Ezekiel ought to be carefully studied in all its detail; and in Joel iii. 9-16, the following technical phrases (besides what has been already alluded to) should be noticed: παλαιον (3), συντριβαινει (4), έφοβον ουσιαστι των σκευων, των κοινωτητι (5), καταιει η θαλασσα (11, 12). In Dan. xi. 40 (συζωοθετεσαι βασιλειον των βθην εν θαρση και εν ποσει και εν ποσει πολαιοι) we touch the subject of ships of war.

(15.) Ships of War in the Apocrypha. — Military operations both by land and water (εν τη θαλασσαι και εν τη γησι), I Macc. viii. 23, 32, are prominent subjects in the books of Maccabees. Thus in the contract between Judas Maccabaeus and the Romans it is agreed (ibid. 26, 28) that no additional ships are to be afforded to the enemies of either, whether σκοτειν, δηλα, δραγμον, or παλαιον. In a later passage (xiv. 3) we have more explicitly, in the letter of King Antiochus, πλαιον πολεμωδεια, see (v. 14), while in 2 Macc. iv. 20 (as observed above) the word γραχια, "galleys," occurs in the account of the proceedings of the infamous Jason. Here we must not forget the monument erected by Simon Maccabaeus on his father's grave, on which, with other ornaments and military symbols, were πλαιον ενεργειματα, εις το θεοροτηται αυτω πλαιων την θαλασσαν (I Macc. xii. 29). Finally must be mentioned the ναυμακηρια at Joppa, when the resident Jews, with wives and children, 200 in number, were induced to go into boats and were drowned (2 Macc. xii. 3, 4), with the venge-

---

1 * Some recent travellers speak of two or three, or more, boats on this lake. The number, at present, however, can only be given once, as we are not seen or heard of by the same traveler.

2 The word in Politi is επισημον, but Hesychius εις προεκοιλακον as the equivalent. See Kuhl's note on Nov. Politi. Omn. 1. p. 75. (Ed. Amstel. 1760).

3 See in Mark iv. 39, "little ships," the true reading appears to be παλαια, not παλαιον.

4 So in Dan. xi. 39 where the same phrase "ships of Hitham" occurs there is no strictly corresponding phrase in the LXX. The translators appear to have read ננה and ננה for ננה and ננה in these passages respectively.

5 The LXX. here read מנה, מנה, "small," for מנה, מנה. This is perhaps a mistake of the copyist, who transcribed the Hebrew text for Θαλασσαι.
SHIP

SHISHAK 3009

nec taken by Judas (τοις μεν λίμναις νύκταρ ενέπρεμα και σακάτι κατέστρεφε, ver. 6). It seems sufficient simply to enumerate the other passages in the Apocrypha where some allusion to seam-faring is made. They are the following: Wisd. v. 10, xiv. 1: Eclus. xxiii. 3, iii. 24; 1 Esdr. iv. 23.

(16.) Nautical Terms.—The great repertory of such terms, as used by those who spoke the Greek language, is the Onomasticon of Julius Pollux; and it may be useful to conclude this article by mentioning some out of which we have been alluding, and also in the N. T. or LXX. First, to quote some which have been mentioned above. We find the following both in Pollux and the Scriptures: σχοινεία, σκηνή, κλαδιά, χειρώναι, φόντον, ευκαλά, σφίγγα, ουδέν ὑποστηλέονεται, οὐ γὰρ τὸν ἥλιον οὕδαι, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ (compared with Acts xxvii. 14, 18, 19); τραχεῖα ἀγαλματί (compared with Acts xxvii. 29, 40). The following are some which have not been mentioned in this article: ἀνάγκασθαι καὶ κατάγκασθαι (c. g. Acts xxvii. 11, 12), σαντίζεις (Ez. xxvi. 10), ὑρίων (Wisd. v. 10), ἀναβάειν (Jon. i. 3; Mark vi. 51), γαλανί (Matt. viii. 26), ἀμβλυβάργα (Matt. iv. 15, Mark 16.10), ἀναφορίσταις (Acts xxiv. 11), ἀντιπλανοεῖν (Ez. xxvi. 13), τρυφάς (Ἀνώμος τυφρομένων, Ez. xxvii. 14). ἄγκυρας καταφθάνειν ἀντίθετα (ver. 30), ἐβρατήθη τῆς ἐνεοῦ (Ερωθέν, 10, ἐβρ. 21), προσεκλαίην ἐποκελλαία (ibid. 41). Κολυμβάον (ver. 42). Αὐθανασία τῆς ναυτικῆς ἐπιφθαρμοῦ (A. G. 21), παραπλανάον (σωματία, ἀνύληκτα, παραγόμενα, ἀνύληκτα, παραγόμενα, ἀνύληκτα, παραγόμενα, διαπέτασσα). (17.) Authority.—The preceding list of St. Luke's nautical verbs is from Mr. Smith's work on the Voyage and Shipwreck of St. Paul (London, 1st ed. 1848, 2d ed. 1856). No other book need be mentioned here, since it has for some time been recognized, both in England and on the Continent, as the standard work on ancient ships, and it contains a complete list of previous books on the subject. Reference, however, may be made to the monumental works of Admiral Peirce, incorporated in the notes to the 27th chapter of Cyprian and Howard's The Life and Epistles of St. Paul (London, 2d ed. 1856). J. S. H.*

* Many of the identical seafaring phrases pointed out above are still in use among the modern Greeks. The Ομοροηλόγιον Ναυτικοῦ (issued from the Amiardi office at Athens, 1838) prescribes the nautical terms to be used on board the national vessels. The object, of course, is not to invent or arbitrarily impose such terms, but taking them from actual life to guard them against extension by foreign words. We subjoin some examples with the English and French definitions as given in the Catalogue, together with references to the Scripture phrases where the same words occur in the same sense: άναγκάζεται, σφιγγα, ουδέν ὑποστηλέονεται, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φάνα, συντραβόνει, ωστάθως ων τῶν σάκων τῆς ναυτικῆς ἐπιφθαρμοῦ, οὐ γὰρ τὸν ἥλιον οὐδείν, σάκαρα, φά

SHIRPI (ἡς Πι) [sanhudah]: Saba'i; [Vat. 325].

"The text in 1 K. xiv. 25 has Συραφαί, but the Keri proposes Συραφά.
The reign of Shishak offers the first determined synchronism of Egyptian and Hebrew history. Its chronology must therefore be examined. We first give a table with the Egyptian and Hebrew data for the chronology of the dynasty, continued as far as the time of Zerah, who was probably a successor of Shishak, in order to avoid repetition in treating of the latter. [Zerah.]

Respecting the Egyptian columns of this table, it is only necessary to observe that, as a date of the 23rd year of Usarken II. occurs on the monuments, it is reasonable to suppose that the sum of the third, fourth, and fifth reigns should be 29 years instead of 25, K0 being easily changed to KE (Lepsius, Königbuch, p. 85). We follow Lepsius' arrangement, our Tekerut I, for instance, being the same as his.

The synchronism of Shishak and Solomon, that of Shishak and Rehoobom, may be nearly fixed, as shown in article CHRONOLOGY, where a slight correction should be made in one of the data. We there mentioned, on the authority of Champollion, that an inscription bore the date of the 22nd year of Shishak (vol. i. p. 448 b). Lepsius, however, states that it is of the 21st year, correcting Champollion, who had been followed by Bunsen and others (XXII. fig. Königsdyn. p. 272 and note 1).

It must, therefore, be supposed that the invasion of Judah took place in the 29th, and not in the 21st year of Shishak. The first year of Shishak would thus appear to correspond to the 29th of Solomon, and the 28th to the 5th of Rehoobom.

The synchronism of Zerah and Assa is more difficult to determine. It seems from the narrative in Chronicles, that the battle between Assa and Zerah took place early in the reign of the king of Judah. It is mentioned before an event of the 15th year of his reign, and afterwards we read that "there was no more war unto the five and thirtieth year of the reign of Assa" (2 Chr. xv. 10). This is immediately followed by the account of Baasha's coming up against Judah "in the six and thirtieth year of the reign of Assa" (xvi. 1). The latter two dates may perhaps be reckoned from the division of the kingdom, unless we can read the 15th and 16th, for Baasha began to reign in the 3d year of Assa, and died, after a reign of 21 years, and was succeeded by Elah, in the 20th year of Assa. It seems, therefore, most probable that the war with Zerah took place early in Assa's reign, before his 15th year, and thus also early in the reign of Usarken II. The probable identification of Zerah is considered under that name [Zerah].

The chronological place of these synchronisms may be explained on the Egyptian as well as the Biblical side. The Egyptian data enable us to calculate the accession of Shishak approximately, reckoning downwards from the XXIth dynasty, and upwards from the XXVth. The first 60 years of the Sothic Cycle, commencing n. c. 1522, appear to have extended from the latter part of the reign of Rameses II. to a year after the 12th of Rameses III. The intervening reigns are Menes 19, Sethi II. 4., Seth-nehkht III., which added to Rameses II. x and Rameses III. 12, probably represent little less than 60 years. The second 60 years of the same Cycle extended from the reign of one of the sons of Rameses III. Rameses VI., separated from his father by two reigns, certainly short, one of at least 5 years, to the reign of Rameses XI. The intervening reigns between Rameses VI. and XI., giving two dates, which make a sum of 18 years. We can thus very nearly fix the dates of the events stated in the text, in the following table:

<table>

a The 25th and 26th are out of the question, unless the cessation of war referred to relate to that with Zerah, for it is said that Assa and Basasha warred against each other "all their days" (1 K. xv. 16. 32).

b We refer the date n. c. 1522 to M. Blois's t c. cir. 1300, for reasons we cannot here explain.
The commencement of the XXth dynasty would, on this evidence, fall about n. c. 1280. The duration of the dynasty, according to Manetho, was 178 (Ems.) or 135 (Afr.) years. The highest dates found give us a sum of 199 years, and the Sothic data, and the circumstance that there were five if not six kings after Rameses XI, show that the length cannot have been less than 120 years. Manetho's numbers would bring us to n. c. 1102 or 1145, for the end of this dynasty. The monuments do not throw any clear light upon the chronology of the successor dynasties. The XXth, the only indications upon which we can found a conjecture are those of Manetho's lists, according to which it ruled for 130 years. This number, supposing that the dynasty overtopped neither the XXth nor the XXIIth, would bring the commencement of the XXIIId and accession of Sheshenq to n. c. 1203 or 1163.

Reckoning upwards, the highest certain date is that of the accession of Psammetichus I, n. c. 664. He was preceded, probably with a short interval, by Tirihak, whose accession was n. c. cir. 605. The beginning of Tirihak's dynasty, the XXVth, was probably 719. For the XXIVth and XXIIId dynasties we have only the authority of Manetho's lists, in which they are allowed a sum of 96 (Afr. 6 + 90) or 88 (Ems. 44 + 44) years. This carries us up to n. c. 814 or 857, supposing that the dynasties, as here stated, were wholly consecutive. To the XXIIId dynasty the lists allow 126 (Afr.) or 49 (Ems.) years. The latter sum may be discredited at once as merely that of the three reigns mentioned. The monuments show that, for the former monarchs, the year is reckoned in the cyclic order, first the individual kings, and the length of the reign of one of them, Sheshenq III., determined by the Apis-tablets, oblige us to raise its sum to at least 166 years. This may be thus shown: 1. Sesochres 21. (1. Sheshonq I. 21.) 2. Osorhiu 15. (2. Usur- ken I.) 3, 4, 5. Three others, 25 (25?). (3. Tefer- ken I.) 4. Usurken II. 29. 5. Sheshonq II.) 6. Takalidhis 13. (6. Teferken H. 14.) 7, 8, 9. Three others, 42. (7. Sheshenq III. date 28 reign 51. 8. Pesher 2. 9. Sheshonq IV. 57.) (21 + 15 + 29 + 13 + 51 + 1 + 36 = 166.) It seems impossible to trace the mistake that has occasioned the difference. The most reasonable conjectures seem to be either that the first letter of the sum of the reign of Sheshonq III. fell out in some copy of Manetho, and 51 thus was changed to 1, or that his reign fell out altogether, and that there was another king not mentioned on the monuments. The sum would thus be 166 + 2, or 168, which, added to our last number, place the accession of Sheshonq I. b. c. 980 or 983, or else seven years later than each of these dates.

The results thus obtained from approximative data are sufficiently near the biblical date to make it certain that Sheshenq I is the Shishak of Solomon and Rhesomos, and to confirm the Biblical chronology.

The Biblical date of Sheshonq's conquest of Judah has been computed in a previous article to be b. c. cir. 969 [Chronology, i. 418 b.], and this having taken place in his 20th year, his accession would have been b. c. cir. 988. The progress of Assyrian discovery has, however, induced some writers to propose to shorten the chronology by taking 30 years as the length of Manetho's reign, in which case all earlier dates would have to be lowered 20 years. It would be premature to express a positive opinion on this matter, but it must be remarked that, save only the taking of Samaria by Sargon, although this is a most important exception, the Assyrian chronology appears rather to favor the reduction, and that the Egyptian chronology, as it stands now, does not seem readily compatible with the received dates, but requires some small reduction. The proposed reduction would place the accession of Sheshonq I. b. c. 988, and this date is certainly more in accordance with those derived from the Egyptian data than the higher date, but these data are too approximative for us to lay any stress upon minute results from them. Dr. Hincks has drawn attention to what appears to be the record, already noticed by Brugsch, in an inscription of Lepsius' Teferken III., of an eclipse of the moon on the 24th Mesori (4th April) n. c. 945, in the 15th year of his father. The latter king must be Usurken I., if these data be correct, and the date of Sheshenq I.'s accession would be n. c. 980 or 981. But it does not seem certain that the king of the record must be Teber- ken I. Nor, indeed, are we convinced that the eclipse was lunar. (See Journ. Soc. Lit. Jewish, 1863; Lepsius, Denkmäler, iii. bd. 256, n.)

History.--In order to render the following observations clear, it will be necessary to say a few words on the history of Egypt before the accession of Sheshenq I. On the descent of the Pharaohs, or Rameses family (the XXth dynasty), two royal houses appear to have arisen. At Thebes, the high-priests of Amen, after a virtual usurpation, at last took the royal title, and in Lower Egypt a Taffite dynasty (Manetho's XXIst) seems to have gained royal power. But it is possible that there was but one line between the XXth and XXIIId dynasties, and that the high-priest kings belonged to the XXIst. The origin of the royal line of which Sheshenq I. was the head is extremely obscure. Mr. Birch's discovery that several of the names of the family are Semitic has led to the supposition that it was of Assyrian or Babylonian origin. Shishak, סִיסָח, may be compared with Sisak, סִיסָח, a name of Babylon ( rashly thought to be for Babel by Athaen). Usurken has been compared with Sargon, and Teferken, with Tiglath in Tigris.
Pilsser. If there were any doubt as to these identifications, some of which, as the second and third cited, are certainly conjectural, the name Nimirud, Nimesre, which occurs as that of princes of this line, would afford conclusive evidence, and it is needless here to compare other names, though those occurring in the genealogies of the dynasty given by Lepsius, well merit the attention of Semitic students (exii., Arg. Königsgehr. und Königsbuch). It is worthy of notice that the name Nimirud, and the designation of Zerah (perhaps a king of this line, otherwise to be derived in its root as "the Cushite," seem to indicate that the line sprang from a Cushite origin. They may possibly have been connected with the MASHUWASHA, a Semitic nation, apparently of Libyans, for Tekerut H. as Prince is called "great chief of the MASHUWASHA," and also "great chief of the MUTH," or mercenaries; but they can scarcely have been of this people. Whether eastern or western Cushites, there does not seem to be any evidence in favor of their having been Nigritians, and as there is no trace of any connection between them and the XXVth dynasty of Ethiopians, they must rather be supposed to be of the eastern branch. Their names, when not Egyptian, are traceable to Semitic roots, which is not the case, as far as we know, with the uncumbersome Ethiopian, whose civilization is the same as that of Egypt. We find these foreign Semitic names in the family of the high-priest king Her-har, three of whose sons are called respectively, MASAHARATA, MASARAHARATA, and MATEN-SEF, although the names of most of his other sons and those of his line appear to be Egyptian. This is not a parallel case for the preponderance of Semitic names in the line of the XXIId dynasty, but it warns us against too positive a conclusion. M. de Rouge, instead of seeing in those names of the XXIII dynasty a Semitic or Asiatic origin, is disposed to trace the line to that of the high-priest kings. Myntho calls the XXIIId dynasty of Judastice, and an ancestor of the priest-king dynasty bears the name Menese-esta, "healer of Bastaic." Both lines used Semitic names, and both held the high-priesthood of Amen (comp. Étude sur une Sibyl Egyptienne, 203, 294). This evidence does not seem to us conclusive, for policy may have induced the line of the XXIIId dynasty to effect intermarriages with the family of the priest-kings, and to assume their functions. The case of the Semitic names at an earlier time may indicate nothing more than Semitic alliances, but those alliances might not improbably end in usurpation. Lepsius gives a genealogy of Sheshenk I. from the tablet of Har-psen from the Serapeum, which, if correct, decides the question (exii., Königsgehr., pp. 267-269).

In this, Sheshenk I. is the son of a chief Nunarat, whose name is not recorded in his mother, who is called "royal mother," not as Lepsius gives it, "royal daughter." (Étude, etc., p. 293, note 2), are all imitated persons, and, all but the princess, bear foreign, apparently Semitic, names. But, as M. de Rouge observes, this genealogy cannot be conclusively made out of the tablet, though we think it more probable than he does (Étude, p. 293, and note 2).

Sheshenk I., on his accession, must have found the state weakened by internal strife, and deprived of much of its foreign influence. In the time of the later kings of the Rameses family, two, if not three, sovereigns had a real or titular authority; but before the accession of Sheshenk it is probable that their lines had been united. Certainly towards the close of the XXIId dynasty a Pharaoh was powerful enough to lead an expedition into Palestine and capture Gezer (1 K. ix. 16). Sheshenk took the title of his standard, "He who attains royalty by uniting the two regions of Egypt." (De Rouge's, Étude, etc., p. 204; Lepsius, Königsbuch, xlv. 567 A., a.) He himself probably married the heiress of the Rameses family, while his son and successor Car罐 appears to have taken to wife the daughter, and perhaps heiress, of the Tanite XXIId dynasty. Probably it was not until late in his reign that he was able to carry on the foreign war, and the earlier kings who carried on Gezer. It is observable that we trace a change of dynasty in the policy that induced Sheshenk at the beginning of his reign to receive the fugitive Jerobeam (1 K. xi. 40). Although it was probably a constant practice for the kings of Egypt to show hospitality to fugitives of importance, Jerobeam would scarcely have been included in their class. Probably, it is expressly related that he fled to Shishak because he was well received as an enemy of Solomon.

We do not venture to lay any stress upon the LXX. additional portion of 1 K. xii., as the narrative there given seems irreconcilable with that of the previous chapter, which agrees with the Masoretic text. In the latter chapter Hadad (LXX. Ader) the Edomite flees from the daughter of his people by Joab and David to Egypt, and marries the elder sister of Telphens (LXX. Thekkenia). Pharaoh's queen, returning to blame him after the death of David and Joab. In the additional portion of the former chapter, Jerobeam — already said to have fled to Shishak (LXX. Susacim) — is married after Solomon's death to Ano, elder sister of Thekkenia, the queen. Between Hadad's return and Solomon's death, probably more than thirty years elapsed. Besides, how are we to account for the two elder sisters? Moreover, Shishak's queen, his only or principal wife, is called KABA-MA, which is more remote from Talphens or Thekkenia. [TAHENES.] The king of Egypt does not seem to have conduced hostilities during the powerful reign of Solomon. It was not until the division of the tribes, that, probably at the instigation of Jerobeam, he attacked Rehobeam. The following particulars of the war are related in the Bible: "In the fifth year of king Rehobeam, Shishak king of Egypt came up against Jerusalem, because they had transgressed against the Lord, with twelve hundred chariots, and threescore thousand horsemen: and the people [were] without number that came with him out of Egypt; the Lubim, the Sukkian, and the Cushian. And he took the fenced cities which [pertained] to Judah, and came to Jerusalem." (2 Chron. xii. 2-4). Shishak did not pillage Jerusalem, but exacted all the treasures of his city from Rehobeam, and apparently made him tributary (5, 9-12, es. 8). The narrative in Kings mentions only the invasion and the exactation (1 K. xiv. 25, 26). The strong cities of Rehobeam are thus enumerated in an earlier passage: "And Rehobeam dwelt in Jerusalem, and built cities for defense in Judah. He had chariots of horse-drawn, and chariots ofPersian, and Tekoa, and Beth-zur, and Shoco, and Adullam, and Gath, and Mareshal, and Ziph, and Adaraim, and Lachish, and Azekah, and Zorah, and Aijalon, and Hebron, which [are] in Judah and in Benjamin fenced cities" (2 Chron. xi. 5-10).
SHISHAK

Shishak has left a record of this expedition, sculptured on the wall of the great Temple of El-Karaak. It is a list of the countries, cities, and tribes, conquered or ruled by him, or tributary to him. In this list Champollion recognized a name which he translated, as we shall see, incorrectly, "the kingdom of Judah," and was thus led to trace the names of certain cities of Palestine. The document has since been more carefully studied by Dr. Brugsch, and with less success by Dr. Blau. On account of its great importance as a geographical record, we give a full transcription of it.

There are two modes of transcribing Hebrew or cognate names written in hieroglyphics. They can either be rendered by the English letters to which the hieroglyphics correspond, or by the Hebrew letters for which they are known from other instances to be used. The former mode is perhaps more scientific; the latter is more useful for the present investigation. It is certain that the Egyptians employed one sign in preference for :image, and another for :image, but we cannot prove that these signs had any difference when used for native words, though in other cases it seems clear that there was such a difference. We give the list transcribed by both methods, the first as a check upon the second, for which we are indebted to M. de Rouge's comparative alphabet, by far the most satisfactory yet published, though in some parts it may be questioned (Hermes Archéologique, N. S. xi. 351-354). These transcriptions occupy the first two columns of the table, the third contains Dr. Brugsch's identification, and the fourth, our own.

THE GEOGRAPHICAL LIST OF SHESHENK I.

</table>
The following identifications are so evident that it is not necessary to discuss them, and they may be made the basis of our whole investigation: Nos. 112, 116, 117, 118, 119, 120, 122, 123, 124, 125, 129, 131, 132, 133. These are letters or names that are clear and unambiguous.

There are several similar geographical lists, dating for the most part during the period of the Empire, but they differ from this in presenting few, if any, repetitions, and only one of them contains names certainly the same as some in the present. They are lists of countries, cities, and tribes, forming the Egyptian Empire, and so far records of conquest that any cities previously taken by the Pharaoh to whose reign they belong are mentioned. The list which contains some of the names in Sheshenkh's is of Thothmes III., sixth sovereign of the XVIIIth dynasty, and comprises many names of cities of Palestine mainly in the outskirts of the Egyptian territory. It is important, in reference to this list, to state that Thothmes III., in his 23rd year, had fought a battle with confederate nations near Megido, whose territories the list enumerates. The narrative of the expedition fully establishes the identity of this and other towns in the list of Shishak. It is given in the document known as the Statistical Tablet of El-Karnak (Birch, "Anu-
sals of Thothmes III.,” Archæologia, 1853; De Rougé, Rev. Arch. N. S. xi. 347 ff.; Brugsch, Geogr. Inschr. ii. p. 32 ff.). The only general result of the comparison of the two lists is that in the later one the Egyptian article is in two cases prefixed to foreign names, No. 56, NEKIH, of the list of Thothmes III., being the same as Nos. 84, 90, 92, PeNARBU of the list of Shishak; and No. 105, AÀÀMEKU, of the former, being the same as No. 65, PeÁÁAMAK, of the latter. We may now commence a detailed examination of the list of Shishak. No. 13 may correspond to Rahibuth in Issachar. No. 14 is certainly Hamach, a Levitical city in the same tribe, noticed in the inscription of Thothmes commemorating the campaign above mentioned, in some connection with the route to Meggido: it is there written TA-
ANAKA. No. 15 is probably Shumen, a town of Issachar; the form of the hieroglyphic name seems to indicate a dual (comp. Nos. 18, 19, 22); and it is remarkable that Shumen has been thought to be originally a dual, בּּכּ for בּּכּ (Ges. Thes. s. v.). No. 16 is supposed by Dr. Brugsch to be Beth-shan; but the final letter of the Egyptian name is wanting in the Hebrew. It was a city of Manasseh, but in the tribe of Issachar No. 17 is evidently Rehob, a Levitical city in Asher; and No. 18 Haphrah, a town in Issachar. No. 19 seems to be Achoraim, one of Rehoboam's strong cities, in the tribe of Judah: Adullam is out of the question, as it commences with ד, and is not a dual. No. 21 we cannot explain. No. 22 is Mahanaim, a Levitical city in Gad. No. 23 is Gibea, a Levitical city in Benjamin. No. 24 is Beth-horon, which, though counted to Ephraim, was on the boundary of Benjamin. It was as-
signed to the Levites. The place consisted of two towns or villages, both of which we may suppose are here intended. No. 25 is evidently the Le-
vitical city Kedemoth in Reuben, and No. 26, Aijalon, also Levitical, in Dan. No. 27 is the
famous Megiddo, which in the Statistical Table of Thothmes III. is written MAKEFA, and in the same king's list MAKEFOR, but in the introductory title MAKETEA. It was a city in the western-division of Manasseh. No. 29 may perhaps be Elekhi, in trans-Jordanite Manasseh, though the sign usually employed for εξ is wanting. No. 21 is the famous name which Champollion read "the kingdom of Judah." To this Dr. Brugsch objects, (1) that the name is out of place as following some names of towns in the kingdom of Judah as well as in that of Israel, and preceding others of both kingdoms; (2) that the supposed equivalent of kingdom (MARK, μακαρις) does not correspond to מְכֹרֵא, and (3) that the supposed construction is inconceivable. He proposes to read מְכֹרֵא מַהֲרָא as the name of a town, which he does not find in ancient Palestine. The position does not seem to us of much consequence, as the list is evidently irregular in its order, and the form might not be Hebrew, and neither Arabic nor Syriac requires the final letter. The kingdom of Judah cannot be discovered in the name without disregard of grammar; but if we are to read "Judah the king," to which Judah does the name point? There was no Jewish king of that name before Judas-Aristobulus. It seems useless to look for a city, although there was a place called Elekhi in the tribe of Dan. The only suggestion we can propose is, that the second word is "kingdom," and was placed after the first in the manner of an Egyptian determinative. No. 31 may be compared with Aenam in Issachar (אֶנֶּמ), occurring, however, only in 1 Chr. vi. 75 (Heb. 58), but it is not certain that the Egyptian H ever represents א. No. 32 has been identified by Dr. Brugsch with Elekhi, but evidence as to its position shows that he is in error. In the Statistical Table of El-Karnak it is placed in a mountain-district apparently southward of Megiddo in Pharaoh's march from the north to the south of that city. There can be little doubt that M. de Rouge is correct in supposing that the Hebrew original signified an ascent (comp. ישנ, Beilacher, p. 350). This name also occurs in the list of Thothmes (II, p. 390); there differing only in having another character for the second letter. No. 33 has been identified by Dr. Brugsch with Heleum or Heleem, a Levitical city in the western division of Manasseh. For No. 34 we can make no suggestion, and No. 35 is too much effaced for any conjecture to be hazarded. No. 36 Dr. Brugsch identifies with Almah, a Levitical city in Beth-jurah, also called Almah, the first being probably either the later or a correct form. [ALEMOTH: ALMAH.] No. 37 we think may be the Circle of Jordan, in the A. V. Plain of Jordan. No. 38 is Shemais, one of Beth-Jeboam's strong cities, and 35, Beth-Tappan, in the mountains near of Judah. No. 10 has been supposed by Dr. Brugsch to be a name of the town of Ashkelon, and of the towns of that name he chooses Abel-shittim, the Abila of Josephus, in the Bible generally called Shittim. No. 45, though greatly effaced, is sufficiently preserved for us to conclude that it does not correspond to any known name in ancient Palestine beginning with Beth: the second part of the name commences with בנט, as though it were "the house of the wolf or Zeeb," which would agree with the southeastern part of Palestine, or indicate, which is far less likely, a place named after the Midianitic prince Zeeb, or some chief of that name. No. 54 is uncertain in its third letter, which is indistinct, and we offer no conjecture. No. 55 is necessitated with an Egyptian name, followed by one that is indistinct. No. 55 is doubtful as to reading; probably it is Pe-KETET. It can be as the Egyptian article, as in the name of the Hagarites, the second sign in Egyptian signifies "little," and the remaining part corresponds to the Hebrew חָאָר, Kattath, "small," the name of a town in Zechuah (Josh. xix. 15), apparently the same as Kitron (Judg. i. 30). The word KET in sound is ancient Egyptian with the sense "little" (comp. Copt. KOTTA, De Rouge, Étude, p. 66).

It seems, however, rare, and may be Shemith. No. 56 is held by Dr. Brugsch to be Edom, and there is no objection to this identification but that we have no other names positively Edomite in the list. No. 57 Dr. Brugsch compares with Zalmonah, a station of the Israelites in the desert. If it be admissible to read the first letter as a Hebrew נ, this name does not seem remote from Telen and Tekoha, which are probably the names of one place in the tribe of Judah. Nos. 58, 59, and 64 are not sufficiently preserved for us to venture upon any conjecture. No. 65 has been well supposed by Dr. Brugsch to be the Hebrew הֵרֶב, "a valley," with the Egyptian article prefixed, but what valley it signifies we hopeless to conjecture: it may be a town named after a valley, like the Beth each mentioned in the account of the border of Asher (Josh. xiv. 27). No. 66 has been reasonably identified by Dr. Brugsch with Azem, which was in the southernmost part of Judah, and is supposed to have been afterwards allotted to Shimeon, in whose list an Azem occurs. No. 65 reads ATEM KET-HEV, the second part being the sign for "little" (comp. No. 55). This suggests that the use of the sign for "great" as the first character of the present name is not without significance, and that there was a great and little Azem or Ezen, perhaps distinguished in the Hebrew text by different orthography. No. 67 we cannot explain. No. 68 is unquestionably the Hagarites, the Egyptian article being prefixed. The same name occurs Nos. 71, 77, 87, 94, 96, and 101. In the Bible we find the Hagarites to the east of Palestine, and in the classical writers they are placed along the north of Arabia. The Hagarim or Hagar are mentioned as conquered by Semachri (Rawlinson's Hist. i. 476; Oppert, Syro-paläst. p. 42). No. 69, FEYTHIEAA, seems, from the termination, to be a gentile name, and in form resembles Leteshhim, a Keturahite tribe. But this resemblance seems to be more than superficial, for Leteshhim, "the hammered or sharpened," comes from פָּטָש, "he hammered, forced," and פָּטָש (unmnsed) signifies "he bent or hammered." From the occurrence of this name near that of the Hagarites, this identification seems deserving of attention. No. 70 may perhaps be Arer, but the correspondence of Hebrew and Egyptian scarcely allows this position. No. 72 commences with a sign that is frequently an initial in the rest of the list. If here syllabic, it must read MEB; if alphabetic, and its
SHISHAK

The use of an alphabetical list is possible at this period, M. In the terms used for Egyptian towns we find MER, written with the same sign, as the designation of the second town in a name, therefore not a capital, but a town of importance. That this sign is here similarly employed seems certain from its being once followed by a geographical determinative (No. 122). We therefore read this name SABAMA, or, according to Lepsius, BARAMA. The final syllable seems to indicate a dual. We may compare the name Sahma, which occurs in Ptolemy's list of the towns of Arabia Deserta, and his list of those of the interior.a No. 73, repeated at 75, has been compared by Dr. Brugsch with the Shephelah, or maritime plain of the Philistines. The word seems nearer to Shihodeth, "a stream," but it is unlikely that two places should have been so called, and the names among which it occurs favor the other explanation. No. 74 seems cognate to No. 87, though it is too different for us to venture upon supposing it to be another form of the same name. No. 76 has been compared by Dr. Brugsch with Berechah, "a goal," but it seems more probable the name of a tribe. No. 78 reads XABAYTI, and is unquestionably Nebayoth. There was a people or tribe of Nabaioth in Isael's time (Is. ix. 7), and this second occurrence of the name in the form of that of Ismael's son is to be considered in reference to the supposed Chaldean origin of the Nabateans. In Lepsius's copy the name is N. TAYT, the second character being unknown, and no doubt, as well as the third, incorrectly copied. The occurrence of the name immediately after that of the Hagirites is sufficient evidence in favor of Dr. Brugsch's reading, which in most cases of difficulty in this list is to be preferred to Lepsius's.b No. 79, AATETMAA, may perhaps be compared with Tema the son of Ishmael, if we may read AATTETMAA. No. 89 we cannot explain. Nos. 81 and 82 are too much effaced for any conjecture. No. 83 we compare with the Kenites: here it is a tribe. No. 84 is also found in the list of Idumaeans; here it has the Egyptian article, PENAKKH, there it is written NEKKH (Rev. Arch. 19, 365). It evidently corresponds to the Hebrew דוד, the south, sometimes specially applied to the southern district of Palestine. No. 85 reads AT-MI-KYT. The second part of the name is little" (comp. No. 55). We have already shown that it is probably a little "town, corresponding to the great" town No. 66. But the final part of No. 85 remains unexplained. No. 86 we cannot explain. No. 87 differs from the other occurrences of the name of the Hagirites in being followed by the sign for MER; we therefore suppose it to be a city of this nation. No. 88 may be compared with Shen (1 Sam. vii. 12), which, however, may not be the name of a town or village, or the two Ashnads (Josh. xix. 33, 43). Nos. 89, 91, and 93, we cannot explain. No. 95 presents a name, repeated with slight variation in No. 99, which is evidently the name of a tribe, but we cannot recognize it. No. 97 equally baffles us. No. 98 is a town TEMAM, possibly the town of Cushan in the north of Arabia or that in Judah. No. 100 is a town TRAAIA, which we may compare with Edhara in Arabia Deserta. No. 102 may mean a resting-place, from the root פל. No. 103, repeated at 105, is apparently the name of a tribe. It may be Adheb, the name of a son of Ishmael, but the form is not close enough for us to offer this as more than a conjecture. Nos. 104 and 106 we cannot explain. No. 107 is either HAKEIRA or HAkreMA. It may be compared with the Hareem, or Arekeme, the old name of Petra according to Josephus (J. J. iv. 7), but the form is probably dual. No. 108 has been compared with Arad by Dr. Brugsch; it is a country or place, and the variation in No. 110 appears to be the name of the people. No. 109 may be Beth-leaakon in Simeon, evidently the same as Leakeon originally in Judah, or else Rahelah in Judah. No. 111 we cannot explain. No. 112 is most like the Jerahmeeds in the south of Judah. No. 116 is partly effaced. No. 117 is the same name as No. 110. No. 118 is probably the name of an unknown tribe. No. 119 may be Manahah, if the geographical direction is changed, as 120 is partly effaced. No. 121 we cannot explain. No. 122 appears to be a town of BAABA or BABA. No. 123 seems to read BAR-RA-TA (בַּרְנָתָא), but we know no place of that name. No. 124 reads BAT-AAT, but there can be little doubt that it is really BAT-ANAT. In this case it might be either Beth-anath in Naphatil or Beth-anath in Judah. No. 125 we cannot explain. No. 126 appears to commence with Abem, but the rest does not correspond to any distinctive word known to follow this name. No. 127 has been identified by Dr. Brugsch with Galin, a Levitical city in Edom. The remaining names are more or less effaced. It will be perceived that the list contains three classes of names mainly grouped together—(1) Levitical and Canaanite cities of Israel; (2) cities of Judah; and (3) Arab tribes to the south of Palestine. The occurrence together of Levitical cities was observed by Dr. Brugsch. It is evident that Jerobeam I had been once firmly established, and that the Levites especially held to Rehobom. Therefore it may have been the policy of Abishalom to employ Shishak to capture their cities. Other cities in his territory were perhaps still garrisoned by Rehobom's forces, or held by the Canaanites, who may have somewhat recovered their independence at this period. The small number of cities identified in the actual territory of Rehobom is explained by the erasure of fourteen names of the part of the list where they occur. The identification of some names of Arab tribes is of great in interest and historical value, though it is to be feared that further progress can scarcely be made in their part of the list.

The Pharaohs of the Empire passed through northern Palestine to push their conquests to the littorals and Mesopotamia. Shishak was really made to attack the Assyrians, attempted the subjugation of Palestine and the tracts of Arabia which border Egypt, knowing that the Arabs would in
terpose an effectual resistance to any invader of Egypt. He seems to have succeeded in consolidating his power in Arabia, and we accordingly find Zerah in alliance with the people of Gedar, if we may infer this from their sharing his overthrow.

R. S. P.

* Rumsen in his *Biblelearn*; i. p. cxxix., gives an elaborate table of synchronisms between the early Biblical history and the history of Egypt, of Assyria, and of Babylon. He professes to have found several points of contact between Israelitish and Egyptian history before the reigns of Solomon and Shishak; such as the exodus, the era of Joseph, etc. Though his argument is marked by the arbitrary conjecture and the dogmatic assertion so frequent in his writings, it is deserving of careful study. The reign of Solomon he fixes at 39 years, from 907 to 869 B. C., that of Sheshonk from 979 to 956 B. C.

The geographical identifications of the lists of Shishak's victories, will be considered more at length in comparison with the lists of Thothmes III. under THEBES. J. K. T.

SHITRAI [2 sl.] (ץ"ר"י): Keri, ץ"מ"י; ץ'רפי: [Vat. *Acarpanae*] *Streit*. A Shoraitite who was over David's herds that fed in Sharon (1 Chr. xxvii. 29).

SHITTAH-TREE, SHITTIM (ש"תי), שיתא: ש"תא *ארץ*; הלמ ***ศา**ות, שיתא) is without doubt correctly referred to some species of *Acacia*, of which three or four kinds occur in the

of it; the ark of the covenant and the staves for carrying it, the table of shew bread with its staves, the altar of burnt-offerings and the altar of incense with their respective staves were constructed out of this wood (see Ex. xxxv., xxxvi., xxxvii., xxxviii.). In Is. xli. 19 the accentua-
tion is pronounced with the "o" or o-v, the thyr-yle, and the oil-tree," as one which God would plant in the wilderness. The Egyptian name of the *acacia* is saot, saat, or *sauth*; see Jablonski, *Ipsissi*, p. 261; Rossius, *Etymol. Egypt.* p. 273; and Prosper Alpinus (*Plant. Egypt.* p. 6), who speaks of this tree: "The acacia, which the Egyptians call *sout*, grows in localities in Egypt remote from the sea and desert, for all the acacias of this tree are pro-
duced on the mountains of Saisi, overhanging the Red Sea. That this tree is, without doubt, the true acacia of the ancients, or the Egyptian thorn, is clear from several indications, especially from the fact that no other spinous tree occurs in Egypt which so well answers to the required characters. These trees grow to the size of a mulberry-tree, and are stunted and barren. The *symois* (Ulmus *Nilotica*), under the name of *saat*," says Prof. Stanley (*Syg. of Pal.* p. 20), "everywhere represents the 'sanch' or 'senna' of the Burning Bush." The Heb. term (ש"תן) is, by Jablonski, Celsius, and many other authors, derived from the Egyptian word, the 2 being dropped; and from an Arabic MS. cited by Celsius, it appears that the Arabic term also comes from the Egyptian, the true Arabic name for the acacia being *kuvuth* (*Hieroph.* i. p. 508).

The shittah-tree of Scripture is by some writers thought to refer more especially to the *Acacia* *Senegal*, though perhaps the *Acacia Nilotica* and *A. Arabica* may be included under the term. The *A. Senegal* is very common in some parts of the peninsula of Sinai (M. Bové, *Voyage du Caire au Mont Sinai*, Ann. des Sciences Nat. 1834, i., sec.
ser. p. 166; Stanley, *Syg. of Pal.* pp. 20, 69, 298). These trees are more common in *A. Arabica* than in *A. Senegal*, and in Palestine, though there is a valley on the west side of the Dead Sea, the *Wady Senegal*, which derives its name from a few acacia-trees there. The *Acacia Senegal*, like the *A. Arabica*, yields the well-known substance called gum arabic which is obtained by incisions in the bark, but it is impossible to say whether the ancient Jews were acquainted with its use. From the tangled thickets into which the stem of this tree expands, Stanley well remarks that hence is to be traced the use of the plural form of the Hebrew noun, *shittim*, the sing. number occurring but once only in the Bible. Besides the *Acacia Senegal*, there is another species, the *A. tortilis*, common on Mount Sinai. Although none of the above named trees are sufficiently large to yield plants 10 cubits long by 1 cubit wide, which we are told was the size of the boards that formed the tabernacle (Ex. xxxvi. 21), yet there is an acacia that grows near Cairo, namely the *A. Serian*, which would supply boards of the required size. There is, however, no evidence to show that this tree ever grew in the peninsula of Sinai. And though it would be unfair to draw any conclusion from such negative evidence, still it is probable that "the

he adds, "an imperishable wood, while that which is usuallly supposed to be the Shittim (Acacia *Nilotica*) wants beauty and soon decays."

Bible lands. The wood of this tree — perhaps the *A. Senegal* is more definitely signified — was exten-
sively employed in the construction of the Taber-
nacle, the boards and pillars of which were made

Acacia Senegal.

a Livingstone (*Trav. in S. Africa*, abridged ed., p. 77) thinks the *Acaci* *giraffa* (camel-thorn) supplied the wood for the Tabernacle, etc. "It is,
SHOBACH (c. 270 B.C.) is the first time a name occurs in the Hebrew text. But the passage in the English, as it is given, is not in the Hebrew. The Hebrew text reads: "Shobach was the chief, and he was set over the host of the Chaldees." (1 Chron. 5:25. Compare Isa. 43:7 with the parallel passage in Jer. 49:13.) The name is again mentioned in the same connection in 2 Chron. 20:8, where it is rendered "Shobach." 

The name "Shobach" is not found in any other ancient inscription. It is possible that it may be a corruption of the name "Sheba," which is also found in the Hebrew text. But the name is not generally known in the ancient world. It is possible that the name may have been introduced into the Hebrew text by a scribe who was not familiar with the Hebrew language. The name is not found in any other ancient inscription. It is possible that it may be a corruption of the name "Sheba," which is also found in the Hebrew text. But the name is not generally known in the ancient world. It is possible that the name may have been introduced into the Hebrew text by a scribe who was not familiar with the Hebrew language.

SHOBAI

Syria and the Ammonites before the gates of Rabbah. He was not, by David in person, who crossed the Jordan and attacked him at Helam. The battle resulted in the total defeat of the Syrians. Shoab was wounded, and died on the field (2 Sam. x. 15-18). In 1 Chr. xix. 16, 18, he is called Shophach, and by Josephus (Ant. vii. 6, § 3) Zosakaos.

SHOBAI [2 syl. (フラシ) [taking copula]: Zosakaos; [Vat. Aβανα, Zosaha] Alex. Σασάθ [FA. Σασάθ] in Neh.: Sobait]. The children of Shoab were a family of the doorkeepers of the Temple, who returned with Zerubbabel (Ezra ii. 42; Neh. vii. 45). Called Sami in 1 Esdr. v. 29.

SHOBAI (フラシ) [flying, or a shoot]: Zosakaos. 1. The second son of Seir the Horite (Gen. xxxvi. 20; 1 Chr. i. 38), and one of the "dukes" or phylarchs of the Horites (Gen. xxxvi. 29). E. S. P. 2. [Vat. in ver. 50, Σωβατα]. Son of Caleb, the son of Hur, and founder of Kirjath-jearim (1 Chr. ii. 59, 60; Deut. xxxiv. 7).

SHOBAI (フラシ) [v. who copulate]: Osoba. [Vat.] Alex. Osoba; Sobait]. One of the heads of the people who settled the covenant with Nehemiah (Neh. x. 24).

SHOBEK (フラシ [perf. fersoch]: Zosakaos; [Vat. Σασαπαθ: FA. Σασαπαθ] Sobait]. One of the heads of the people who settled the covenant with Nehemiah (Neh. x. 24).

SHOBI (フラシ [nurse]: Zosakaos; [Vat.] Alex. Osoba; Sobait]. Son of Nahash of Rabbah of the children of Ammon (2 Sam. xvi. 27). He was one of the first to meet David at Maanaim on his flight from Absalom, and to offer him the hospitality of a powerful and wealthy chief, for he was the son of David's old friend Nahash, and the bond between them was strong enough to survive on the one hand the insults of Haman, and on the other the conquest and destruction of Rabbah, Josephus calls him Siphax (Ant. vii. 9, § 8), "chief (οδωρητης) of the Ammonite country."

SHOCC (フラシ [bunches]: [Vat.] των ζωοκόμων: Compl. Ζωοκόμων: Sococha). 2 Chr. iii. 7. A variation of the name Soccon, unnecessarily increased in the L. V. by the substitution of Sh for the S of the original.

SHOCC (フラシ [as above]: των Ζωοκόμων: Sococha). 2 Chr. xxviii. 18. One of the four [six] varieties of the name Soccon. In this case also the discrepancies in the L. V. are needlessly multiplied by Sh being substituted for S and ch for c of the original.

SHOCHOH (フラシ [bunches]: Ζωοκόμων: Alex. Ζωοκόμων: Compl. Ζωοκόμων: Sococha). 1 Sam. xvii. 1. This, like Shocho, Sococh, and Shococh, is an incorrect variation of the name Soccon.

SHO'HAM (フラシ [prp]: Ισραήλ: Alex. Ισράήλ: Compl. Ισραήλ: Soran). A Merarite Levite, son of Janniah (1 Chr. xxiv. 27).

SHOE. [Sandal]

SHOMER (フラシ [keeper]: [Rom. Σαβαης: Alex.] Zosakaos; Somier). 1. A man of the tribe of Asher (1 Chr. vii. 32), who is also called Shamer (ver. 34).

2. [Σαβαης: Alex. Σαμουαης]. The father of Jehozabad, who slew king Joash (2 K. xii. 21); in the parallel passage in 2 Chr. xxvi. 24, the name is converted into the feminine form Shimrith, who is further described as a Moabitess. This variation may have originated in the dubious gender of the preceding name Shimnath, which is also made feminine by the Chronicler.

W. L. B.

SHOHACH [フラシ [extension, First]: Σαφάθ: [Vat. Σαφαθ, Σαφαθ: FA.] in ver. 16, Σαφαθας, Σαφαθος: Sococha]. Alex. Σαφαθας, Σαφαθος; Sococha]. Shophach, the general of Hadadezer (1 Chr. xix. 16, 18).

SHOHANIM [フラシ; Samar. Σαμαριτας [perf. νεκταρ, baren]: των Σαφαθων: Sococha]. One of the fortified towns on the east of Jordan which was reestablished and rebuilt by the tribe of gad (Num. xxxii. 35). It is probably an affix to the second Arith, to distinguish it from the former one, not an independent place. No name resembling it has yet been met with in that locality.

G.

SHOSHANIM. "Te chief musician upon Shoshanim" is a musical direction to the leader of the Temple choir which occurs in Ps. xiv. 6, and most probably indicates the melody "after" or "in the manner of" (フラシ, αV. "upon") which the psalms were to be sung. As "Shoshanim" literally signifies "lilies," it has been suggested that this word denoted the lily-shaped instruments of music (Simonits, L. s. v.), perhaps cyphems, and this view appears to be adopted by De Wette (Die Psalmen, p. 34). Hengstenberg gives it an etymological interpretation, as indicating "the subject or subjects treated, as lilies figuratively for beidet in xiv.; the delightful consolations and deliverances experienced in xiv., etc." (Übers. v. David, ii. 28) which Dr. Davidson, very truly characterizes as "a most improbable fancy." The LXX. and Vulgate have in both psalms ἀνεύ τῶν ἀλλωσκομένων and προ ὕπ τοις ψαλμοθανηθεις respectively, reading apparently Σαμαριτας μοι crystally for Σαμαριτας ἀνεύ ὕπ τοις ψαλμοθανηθεις. Ben Zeb (Ort. Σαμαριτας, s. v.) regards it as an instrument of psalmody, and Juems and Tremellius, after Kimchi, render it "hebraehor," an instrument with six strings, referring it to the root shish, "six," and this is approved by Eichhorn in his edition of Simonits.

SHOSHANIM-EDUTH. In the title of Ps. lv. is found the direction "to the chief musician upon Shoshanim eduth" (フラシ), which appears, according to the most probable conjecture, to denote the melody or air "after" or "in the manner of" which the psalm was to be sung. As the words now stand they signify "lilies, a testimony," and the two are separate and distinct in meaning. In themselves they have no meaning in the present text, and must therefore he regarded as probably a fragment of the beginning of an older psalm with which the choir were familiar. Ewald gives what he considers the original meaning — "lilies," that is, pure, innocent. "Is the Law:" but the words will not bear this interpretation, nor is it possible in their present position to assign to them any intelligible
SHOULD'ER-PIECE.

For the conjectures of those who regard the words as the names of musical instruments, see the articles SHOULDER-PIECE, SHU'MAN-MUTE.

W. A. W.

* SHOULDER-PIECE. [Etymology; High-Priest.]

SHOVEL. [Agriculture, vol. i. p. 44 a.]

SH'RUD. Ezek. xxxi. 3, has its older sense of "cover," "shelter." II.

SH'U'A (ר"א [rich, noble]; ס"א; [Comp. ס"ע]; סעכ). A Canaanite of Adullam, father of Judah's wife (1 Chr. ii. 3), who was hence called Bath-Shua. In the LXX. of Gen. xxxviii. 2, Shua is wrongly made to be the name of the danger. [Bath-S'hu'a.]

SH'U'AH (ש"ח [pål]: ס"א; ס"א; [Comp. ס"ע]; סאכ). 1. Son of Abraham by keturah (Gen. xxv. 3; 1 Chr. i. 32).

2. (א"אש; א"אש: סעכ). Properly "Shuchah." The name Shuaah occurs among the descendants of Judah as that of the brother of Chelah (1 Chr. iv. 11). For "Celah the brother of Shushah," the LXX. read "Caleb the father of Achish."

In ten of Kennicott's and Dr. Ross's MSS., Shuaah is made the son of Chelah.

3. (א"אש; א"אש; סעכ). The father of Judah's wife, the Canaanites (Gen. xxxviii. 2, 12); also called Shua in the A. V. The LXX. make Shusah the name of the woman in both instances.

SH'U'AL (ש"א; [jacket]; ס"א; [Comp. ס"ע]; סאכ). Alexander. Son of Zophah, an Asherite (1 Chr. vii. 26).

SHU'AL, THE LAND OF (ש"א; [jacket]; ס"א; [Comp. ס"ע]; סאכ). A district named only in 1 Sam. xiv. 17, to denote the direction taken by one of the three parties of marauders who issued from the Philistine camp at Michmash. Its connection with Ophrah (probably Tzibiah) and the direction of the two other routes named in the passage make it probably to be on the land of Shuah lay north of Michmash. If therefore it be identified with the "land of Shalim" (1 Sam. ix. 4) —as is not impossible—we obtain the first and only clue yet obtained to Saul's journey in quest of the asses. The name Shuah has not yet been identified in the neighborhood of Tzibiah or elsewhere. It may have originated in the Hebrew signification of the word "jacket"; in which case it would be appropriate enough to the wild, desolate region east of Tzibiah; a region consisting a valley or ravine at no great distance from Tzibiah which bore and perhaps still bears the name of "Hyanna." [Zeb'on, Valley of.] Others (as Theiner, in Erex, Hebr.ii) derive the name from a different word, and interpret it as "lower land." G.

SHU'BAEL (ש"ב [governor of God]; ס"ב; [Comp. ס"ב]; סב; [Gen.]). 1. SHURIEL, the son of Gershom (1 Chr. xxxvii. 20).

2. (ס"ב; ס"ב). SHURIEL, the son of Henan the minisht (1 Chr. xxv. 20).

SHU'HAM (ש"מ [perh. pillegger; Ges.]; ס"מ; [Comp. ס"מ]; סמ; [Gen.]). Sauli: [Vat. Σαουλι; Alex. Σουλιμίνιο; Σαυρα]; Son of Dan, and ancestor of the Shu'hamites (Num. xxvi. 42). In Gen. xlvii. 23 he is called Hushim.

SHU'HAMITES, THE (ש"ם [pair], see above); δ Σαουλί: [Vat. Σαουλι; Alex. Σαουλιμίνιο; Σαουρα]: Shuhamite, Shuhamites. The descendants of Shuham, or Hushim, the son of Dan (Num. xxvii. 52). In the census taken in the plains of Modo they numbered 4,460.

SHU'HITE (ש"ת; [Job ii. 11, δ Σαουλί: Σαουρά]: Σαουλί: [Comp. Σαουρά]; Σαουρά]. This name, which is frequently [occurs 6 times] in the book of Job, but only as the epithet of one person, Bilkad, the local indications of the book of Job point to a region on the western side of Chabeel, bordering on Arabia; and exactly in this locality, above Hith and on both sides of the Espharas, are found, in the Assyrian inscriptions, the Tsibhi, a powerful people. It is probable that these were the Shuhamites, and that, having been conquered by the Babylonian kings, they were counted by Ezekiel among the tribes of the Chabeelans. Having lost their independence, they ceased to be noticed; but it was no doubt from them that the country on the Euphrates immediately above Babylonia came to be designated as Shuham, a term applied to it in the Pentateuch, i.

The Shuhamites appear to have had descendants of Abraham by Keturah. [Shu'ah, i.]

G. H.

SHU-LAMITE, THE (ש"לעמא: ד, e. c. the Shuhammite [see below]; [Vat.] ד ש'ומא: [Rom. Σουματίς]: Σουματίς; [Gen.].] The descendant of Shuham and Shuhamite; one of the persons in the poem of Solomon's Song, who, although named only in one passage (v. 1), is, according to some interpreters, the most prominent of all the characters. The name —after the analogy of Shammamite—denotes a woman belonging to a place called Shuham. The only place bearing that name, of which we have any knowledge, is Shuham itself, which, as far back as the 4th century, was so called (Eusebius, quoted under Strabo notes). So, indeed, there is good ground for believing that the two were identical. Since, then, Shuhammite and Shuhamite are equivalent, there is nothing surely extravagant in supposing that the Shuhamite who was the object of Solomon's passion was Abishag, the most lovely girl of her day, and at the time of David's death one of the most prominent persons at the court of Jerusalem. This would be equally appropriate, whether Solomon was himself the author of the Song, or it were written by another person whose object was to personate him accurately. For the light which it throws on the circumstances of Solomon's accession, see Solomon. [Wedder, Amer. ed.]

G.

SHU'MATHI'TES, THE (ש"מעאתא: ד, e. c. the Shumathite [patr.]; [Vat.] ש"מעאתא: Σουμαθε): One of the four families who sprung from Kirjath-jearim (1 Chr. ii. 53). They probably colonized a village named Shumath somewhere in that neighborhood, but no trace of such a name has been discovered.

G.

(Num. xxvi. 42).
SHUNEM

[Var.] n Σωπυτης [Rom.-he]; Alex. [Σωπυτης], Σωπυτης: [Sonamite], & c. the native of Shunem, as is plain from 2 K. iv. 8. It is applied to two persons: Abishag, the nurse of King David (1 K. i. 3, 15, ii. 17, 21, 22), and the nameless hostess of Abishag (2 K. iv. 12, 23, 36).

The modern representative of Shunem being Saulom, some have suggested (as Gesenius, Thes. p. 1379 b.), or positively affirmed (as First, Hebrew, ii. 422), that Shunammite is identical with Shulamite (Cant. vi. 13). Of all this that can be said is, that, though probably, it is not absolutely certain.

SHUNEM (Σωπυτης) [two reading-places]: Σωπυτης, Σωπυτης. One of the cities allotted to the tribe of Issachar (Josh. xix. 18). It occurs in the list between Chesaloth and Haphunaim. It is mentioned on two occasions. First, as the place of the Philistines' first encampment before the battle of Gilboa (1 Sam. xxviii. 4). Here it occurs in connection with Mount Gilboa and Endor, and also probably, with Jezreel (xxix. 1). [Gilboa, Amer. ed.] Secondly, as the scene of Elisha's intercourse with the Shunammite woman and her son (2 K. iv. 8). Here it is connected with adjacent cornfields, and more remotely, with Mount Carmel. It was besides the native place of Abishag, the attendant on King David (1 K. i. 3), and possibly the heroine of the poem or drama of "Solomon's Song."

By Eusebius and Jerome (Onom.) it is mentioned twice: under Ἁβισαγ and "Sanna," as 5 miles south of Mount Tabor, and then known as Sabra, and under "Sana," as a village in Arrabhettine, in the territory of Selaste called Sanae. The latter of these two identifications probably refers to Senar, a well-known fortress some 7 miles from Sebastiyeh and 4 from Arrabheth — a spot completely out of the association of these words, which connect themselves with Shunem. The other has more in its favor, since — except for the distance from Mount Tabor, which is nearer 8 Roman miles than 5 — it agrees with the position of the present Salim, a village on the S. W. flank of Jebel Dakhy (the so-called "Little Hermion"), 3 miles N. of Jezreel, 5 from Gilboa (J. Fadlov), full in view of the sacred spot on Mount Carmel, and situated in the midst of the finest cornfields in the world.

It is named, as Salim, by the Jewish traveller, hap-Parchi (Asher's Benjamin, ii. 431). It had then its spring, without which the Philistines would certainly not have chosen it for their encampment. Now, according to the notice of Dr. Robinson (ii. 324), the spring of the village is but a pond. The change of the Σ in the ancient name to Σ in the modern one, is the reverse of that which has taken place in Zerin (Jezreel) and Belin (Bethel).

G.

SHUNITES. THE (Σωπυτης) [patr. from the above]: Ἀβισαγ [Rom.-he]: Shunam. Descendants of Shun the son of Gad (Num. xxi. 15).

SHUR

[Shupem (Σοσφαμιτης) [perhaps serpents, (Gen.)]: Σοσφαμιτης; Alex. [Σοσφαμιτης], Σοσφαμιτης: Shephuphan, Shephuhm. The descendants of Shupham, or Shephuphan, the Benjamite (Num. xxvi. 39).

SHUR (Σοσφάμιτης) [A. Levy][9]: Shephuphan, Γελιματόφθαν [Alex. in Gen. xxvii. 18 Συμβα, 1 Chr. xxviii. 7, Σεπομαφαν] (Sour), a place just without the eastern border of Egypt. Its name, if Hebrew or Arabic, signifies "a wall," and there can be little doubt that it is of Shunem origin from the position of the place. The LXX. seems to have thus interpreted it, if we may judge from the obscure rendering of 1 Sam. xxvii. 8, where it must be remarked the extraordinary form Γελιματάφθαν is found. This word is evidently a transcription of the words Σοσφάμιτης . . . . . . . . . . . . . . , the former, save the initial particle, not being translated.

Shur is first mentioned in the narrative of Hagar's flight from Sarah. Abraham was then in southwestern Palestine, and when Hagar fled she went "out into the wilderness of Egypt" (Gen. xi. 7). Probably she was endeavoring to return to Egypt, the country of her birth — she may not have been a pure Egyptian — and had reached a well in the inaud caravans out of Egypt. Abraham afterwards "dwelled between Kadesh and Shur, and sojourned in Gerar." (xx. 1). From this it would seem either that Shur lay in the territory of the Philistines of Gerar, or that this pastoral tribe wandered in a region extending from Kadesh to Shur. [Gerar.] In either case we can ascertain the position of Shur. The first clear indication of this occurs in the account of Ishmael's posterity. "And they dwelt from Havilah unto Shur, that is before Egypt, as thou goest toward Assyria" (xxv. 18). With this should be compared of the two great Codices: Vat. (Mai), Σωπυτης, Σωπυτης: Alex. Σωπυτης, Σωπυτης, Σωπυτης: Rom. (34). Shunam, Dam. p. 657.)

* 2. (Rom. Vat. omit; Alex. Σωπυτης: Shephuhm.) A Levite who, with Hoshai, had charge of the gate Shallecheth (1 Chron. xvi. 16).

A.
the mention of the extent of the Amaulekite terri-
ory, given in this passage, "And Saul smote the
Amaulekites from Havilah [until] thou comest to
Shur, that [is] over against Egypt" (1 Sam. xv.
7). It is also important to notice that the Gezu-
rites, Ezrites, and Amaulekites, whom David smote,
are described as "from an ancient period the in-
habitants of the land, as thou comest to Shur, even
unto the land of Egypt" (xxvii. 8). The Wilder-
ness of Shur was entered by the Israelites after
they had crossed the Red Sea (Ex. xv. 22, 23). It
was also called the Wilderness of Ethan (Num.
xxxiii. 8). The first passage presents one difficulty,
upon which the LXX. and Vulg. throw no light,
in the mention of Assyria. If, however, we com-
pare it with later places, we find נוֹרָם נֵבֵי here, remarkably like נוֹרָם נֵבֵי in 1 Sam.
xxvii. 8, and דָּשֶׁנ הָעַל in xv. 7, as though the
same phrase had been originally found in the first
as a gloss, but it may have been there transposed,
and have originally followed the mention of Hav-
ilah. In the notices of the Amaulekite and Shams-
lite region, in which the latter succeeded the former,
there can be no question that a strip of northern
Arabia is intended, stretching from the latitudes of
Suz and probably to the Persian Gulf. The
name of the wilderness may perhaps indicate a
somewhat southern position. Shur may thus have
been a fortified town east of the ancient head of
the Red Sea, but in the hands of the Arabs, or at
one time, the Philistines, not of the Egyptians.
From its being spoken of as a limit, it was prob-
ably the last Arabian town before entering Egypt.
The hieroglyphic inscriptions have not been found
to throw any light upon this question. The
SHARAs or SIALAs mentioned in them is an im-
portant country, perhaps Syria.
K. R. P.

SHUSHAN (שׁוּשָּׁן; Σούσσα. Σουσάρ: Susa) is said to have received its name from the
abundance of the lily (Shushan or Shihanshut) in
its neighborhood (Athen. xii. 513). It was one of
the most important towns in the whole East, and
requires to be described at some length.
— Susa was the original capital of the
country called in Scripture Elam, and by
the classical writers, sometimes Cedia (Kordia),
sometimes Susis or Susiana. [ELAM.] Its foundation
is thought to date from a time anterior to Chedor-
lomer, as the remains found on the site have often
a character of very high antiquity. The first dis-

tinct mention of the town that has been as yet
found is in the inscriptions of Ashur-nessu pal, the
son and successor of Eannakhalu, who states
that he took the place, and exhibits a ground-plan of it
upon his sculptures (Layard, Nin. and Bab., pp.
452, 453). The date of this monument is about
n. c. 660. We next find Susa in the possession of
the Babylonians, to whom Elam had probably
passed at the division of the Assyrian empire made
by Cyaxares and Nabopolassar. In the last year
of Belshazzar (n. c. 558), Daniel, while still a
Babylonian subject, is there on the king's business,
and at Shushan in the palace (Dan. xii. 2). The
conquest of Babylon by Cyrus transferred Susa to the
Persian dominion; and it was not long before
the Achaemenian princes determined to make it
the capital of their whole empire, and the chief place
of their own residence. According to some writers
(Xen. Cyrop. viii. 6, § 32; Strab. xv. 3, § 2), the
change was made by Cyrus; according to others
(Usen. Exc. Pers. § 9; Herod. iii. 30, 65, 70), it
had not at any rate taken place before the death of
Cambyses; but, according to the evidence of the
place itself and of the other Achaemenian monu-
ments, it would seem most probable that the trans-
fer was really the work of Darius Hystaspis, who is
found to have been as Pliny said, R. A. v. 27
the founder of the great palace there — the building
so graphically described in the book of Esther (6.
5, 6). The reasons which induced the change are
tolerably apparent. After the conquest of Bab-
ylon and Egypt, the western provinces of the em-
pire were become by far the most important, and
the court could no longer be conveniently fixed
east of Zagros, either at Ecbatana (Hormuzan) or
at Pasargadae (Marapaib), which were cut off from
the Mesopotamian plain by the difficulty of the
passes for fully one half of the year. It was
necessary to find a capital west of the mountains,
and here Babylon and Susa presented themselves, each
with its advantages. Darius probably pre-
ferred Susa, first, on account of its vicinity to Per-
sia (Strab. xiv. 3, § 2); secondly, because it was
closer to Babylon, being nearer the mountain
chain: and thirdly, because of the excellence of the
water there (Geograp. Jouru. ix. 70). Susa
accordingly became the metropolis of Persia, and is
recognized as such by Eschylus (Pers. 16, 124,
&c.), Herodotus (v. 25, 49, &c.) Ctesias (Pers.
Exc. passim), Strabo (xiv. 3, § 2), and almost all
the best writers. The court must have resided
there during the greater part of the year, only
quitting it regularly for Ecbatana or Persepolis
in the height of summer, and perhaps sometimes
leaving it for Babylon in the depth of winter [see
Rawlinson's Herodotes, iii. 296]. Susa retained
its predominance to the period of the Macedonian
conquest, when Alexander found there above twelve
millions sterling, and all the regalia of the Great
King (Arrian. Exp. Alex. iii. 16). After this it
decayed. The preference of Alexander for Bab-
ylon caused the neglect of Susa by his successors,
none of whom ever made it their capital city. We
hear of it once only in their wars, when it falls into
the power of the Persian Antigonides (n. c. 315), who
obtains treasure there to the amount of three millions
and a half of our money (Diod. Sic. xiv. 48, § 7).
Nearly a century later (n. c. 221) Susa was at-
tacked by Mobi in his rebellion against Antiochus
the Great; he took the town, but failed in his at
tempt upon the citadel (Polvy. v. 48, § 14). We
hear of it again at the time of the Arabian con-
quest of Persia, when it was bravely defended by
Hormazud (Zusiris, Chaldæa and Susiana, p. 344).

2. Position, etc. — A good deal of uncertainty
exists concerning the position of Susa. While
most historians and comparative geographers have
inclined to identify it with the modern Sus or Shush,
which is in lat. 32° 10', long. 48° 26' E. from
Greenwich, between the Shapur and the river of
Dihahl, there have not been wanting some to main-
tain the rival claims of Shuster, which is situated
on the left bank of the Kuran, more than half a

a Not only were the passes difficult, but they were
in the possession of semi-independent tribes, who lev-
ied a toll on all passengers, even the Persian kings
themselves (Strab. xiv. 3, § 4).
degree further to the eastward. A third candidate for the honor has even been started, and it has been maintained with much learning and ingenuity that Sōsan, on the right bank of the same stream, 30 or 60 miles above Shoter, is, if not the Susa of the Greeks and Romans, at any rate the Sinshah of Scripture (Geogr. Journ. ix. 85). But a careful examination of these several spots has finally caused a general acquiescence in the belief that Susa alone is entitled to the honor of representing at once the Scriptural Shushan and the Susa of the classical writers (see Lothar, Chabber and Shwing, p. 368; Smith, Dictionary of Geography, sib. voc.; Rawlinson, Herod. iii. 251). The difficulties caused by the seemingly confused accounts of the ancient writers, of whom some place Susa on the Choaspes (Herod. v. 49, 52; Strab. xvi. 3, § 4; Q. Curt. v. 2), some on the Eulaius (Arr. Exp. viii. i. 7; Ptol. vi. 3; Plin. N. H. vi. 27), have been removed by a careful survey of the ground, from which it appears that the Choaspes (Kerkhab) originally bifurcated at Poi Pal, 20 miles above Susa, the right arm keeping its present course, while the left flowed a little to the east of Susa, and, absorbing the Shapur about 12 miles below the ruins, flowed on somewhat east of south, and joined the Karun (Pashigris) at Ahwaz. The left branch of the Choaspes was sometimes called by that name, but more properly bore the appellation of Eulaius (Uli or Daniel). Susa thus lay between the two streams of the Eulaius and the Shapur, the latter of which, being probably joined to the Eulaius by canals, was reckoned a part of it; and hence Pliny said that the Eulaius surrounded the citadel of Susa (l. c.). At the distance of a few miles east and west of the city were two other streams—the Lophrakes or river of Dizful, and the right arm of the Choaspes (the modern Kerkhab). Thus the country about Susa was most abundantly watered; and hence the luxuriance and fertility remarked alike by ancient and modern authors (Athen. xii. 513; Geogr. Journ. ix. 71). The Kerkhab water was moreover regarded as of peculiar excellence; it was the only water drunk by the Great King, and was always carried with him on his journeys and foreign expeditions (Herod. i. 188; Plut. de Exil. ii. 601, D; Athen. Deipm. ii. 171, &c.). Even at the present day it is celebrated for

lightness and purity, and the natives prize it above that of almost all other streams (Geogr. Journ. ix. 70, 89).

3. General Description of the Ruins. — The ruins of Susa cover a space about 6,000 feet long from east to west, by 4,500 feet broad from north to south. The circumference of the whole, exclusive of outlying and comparatively insignificant mounds, is about three miles. According to Mr. Loftus, the principal existing remains consist of four spacious artificial platforms, distinctly separate from each other. Of these the western mound is the smallest in superficial extent, but considerably the most lofty and important. . . . Its highest point is 119 feet above the level of the Shaur (Shapur). In form it is an irregular, obtuse-angled triangle, with its corners rounded off, and its base facing nearly due east. It is apparently constructed of earth, gravel, and sun-dried brick, sections being exposed in numerous ravines produced by the rains of winter. The sides are so perpendicular as to be inaccessible to a horseman except at three places. The measurement round the summit is about 2,850 feet. In the centre is a deep, circular depression, probably a large court, surrounded by elevated piles of buildings, the fall of which has given the present configuration to the surface. Here and there are exposed in the ravines

![Diagram of the Ruins of Susa](image-url)
traces of 1rick walls, which show that the present elevation of the mound has been attained by much subsequent superposition." (Child's and Sisson, p. 343). Mr. Loftus regards this mound as indisputably the remains of the famous citadel (Ἀκρόπολις or Ἀκρόπολεως) of Susa, so frequently mentioned by the ancient writers (Herod. iii. 63; Polyb. v. 48, § 14; Strab. xvi. 3, § 2; Arr. Epip. iii. 16, &c.). "Separated from the citadel on the west by a channel or ravine of bottom which is as high with the external desert, is the great central platform, covering upwards of sixty acres (No. 3 on the Plan). The highest point is on the south side, where it presents generally a perpendicular escarpment to the plain, and rises to an elevation of about 70 feet: on the east and north it does not exceed 40 or 50 feet. The east face measures 3,000 feet in length. Enormous ravines penetrate to the very heart of the mound." (Loftus, p. 344). The third platform (No. 4 on the Plan) lies towards the north, and is "a considerable square mass," about a thousand feet each way. It abuts on the central platform at its northwestern extremity, but is separated from it by "a slight hollow," which "was perhaps an ancient roadway. (Loftus, ibid.). These three mounds form together a lozenge-shaped mass, 4,500 feet long and nearly 3,000 feet broad, pointing in its longer direction a little west of north. East of them is the fourth platform, which is very extensive but of much lower elevation than the rest (No. 4 on the Plan). Its plan is very irregular: in its dimensions it about equals all the rest of the ruins put together. Beyond this eastern platform a number of low mounds are traceable, extending nearly to the Dasht-i-rud river; but there are no remains of walls in any direction, and no marks of any buildings west of the Shapur. All the ruins are contained within a circumference of about seven miles (Geog. Journ. ix. 71). G. R.

ARCHITECTURE — The explorations undertaken by General, now Sir Fenwick Williams of Karis, in the mounds at Susa, in the year 1851, resulted in the discovery of the bases of three columns, marked 5, 6, and 7 on the accompanying plan (wood-cut No. 2). These were found to be 27 feet 6 inches apart from centre to centre, and the bases were very similar to the bases of the great hall known popularly as the Chel Minar at Persepolis. It was assumed that another row would be found at a like distance inwards. Holes were accordingly dug, and afterwards trenches driven, without any successful result, as it happened to be on the spot where the walls originally stood, and where no columns, consequently, could have existed. The clay trustworthy restoration of the Persepolidian hall has been published at that time, the mistake would have been avoided, but as none then existed the opportunity was nearly lost for our becoming acquainted with one of the most interesting ruins connected with Bible history which now exist out of Syria. Fortunately in the following year Mr. Loftus resumed the excavations with more success, and ascertained the position of all the 72 columns of which the original building was composed. Only one base had been entirely removed, and as that was in the midst of the central palace, its absence threw no doubt on any part of the arrangement. On the bases of four of the columns thus uncovered (shaded darker on the plan, and numbered 1, 2, 3, 4) were found trilingual inscriptions in the languages adopted by the Achaemenian kings at Behistun and elsewhere, but all were so much injured by the fall of the superincumbent mass that not one was complete, and unfortunately the Persian text, which could have been read with most certainty, was the least perfect of any. Notwithstanding this, Mr. Edwin Norris, with his usual ingenuity, by a careful comparison of the whole, made out the meaning of the first part certainly, of the latter half with very tolerable precision. As this inscription contains nearly all we know of the history of this building, we quote it entire from Journ. As. Sec., vol. xv. 162: "Says Artaxerxes (Ahemen), the Great King, the King of Kings, the King of the Country, the King of the Earth, the son of King Daris — Daris was the son of King Artaxerxes — Artaxerxes was the son of Xerxes — Xerxes was the son of King Daris — Daris was the son of Hystaspes the Achaemenian — Daris my ancestor anciently built this temple, and afterwards it was repaired by Artaxerxes...

No. 2. Plan of the Great Palace at Susa. my grandfather. By the aid of Omnuzd I placed the edifices of Tanais and Mithra in this temple. May Omnuzd, Tanais, and Mithra protect me, with the other gods, and all that I have done ..."

The bases uncovered by Mr. Loftus were arranged as on the wood-cut No. 2, reduced from that given at page 366 of his Children and Sisoweth, and most fortunately it is found on examination that the building was on exact counterpart of the celebrated Chel Minar at Persepolis. They are in fact more like one another than almost any other two buildings of antiquity, and consequently what is wanting in the one may safely be supplied from the other, if it exists there.

Their age is nearly the same, that at Susa having been commenced by Daris Hystaspis, that at Persepolis — if one may trust the inscription on its staircase (J. A. S. x. 380) — was built entirely by Xerxes. Their dimensions are practically identical, the width of that at Susa, according to Mr. Loftus, being 345 feet, the depth N. and S. 344.' The corresponding dimensions at Persepolis, according to Flandin and Toste's survey, are 357.6 by 354.6, or from 10 to 12 feet in excess; but the difference
SHUSHAN

may arise as much from imperfect surveying as from any real discrepancy.

The number of columns and their arrangement are identical in the two buildings, and the details of the architecture are practically the same so far as they can be made out. But as no pillar is standing at Susa, and no capital was found entire or nearly so, it is not easy to feel quite sure that the different restoration (wood-cut No. 3) is in all respects correct. It is reduced from one made by Mr. Churchil, who accompanied Mr. Loftus in his explorations. If it is so, it appears that the great difference between the two buildings was that double bull capitals were used in the interior of the central square hall at Susa, while their capitals was appropriated to the porticoes at Persepolis. In other respects the height of the capital, which measures 28 feet, is very nearly the same, but it is fuller, and looks somewhat too heavy for the shaft that supports it. This defect was to a great extent corrected at Persepolis, and may have arisen from these at Susa being the first translation of the Ninevite model into stone architecture.

The pillars at Persepolis vary from 60 to 67 feet in height, and we may therefore assume that these at Susa were nearly the same. No trace of the walls which enclosed these pillars was detected at Susa, from which Mr. Loftus assumes, somewhat too hastily, that none existed. As, however, he could not make out the traces of the walls of any of the numerous buildings which he admits once existed in these mounds, we ought not to be surprised at his not finding them in this instance.

Fortunately at Persepolis sufficient remains still exist to enable us to supply this hiatus, though there also sun-burnt brick was too much used for the walls, and if it were not that the jambs of the doors and window were generally of stone, we should be as much at a loss there as at Susa. The annexed wood-cut (No. 4), representing the plan of the hall at Persepolis, is restored from data so complete as scarcely to admit of doubt with regard to any part, and will suffice to explain the arrangement of both.

Both buildings consisted of a central hall, as nearly as may be 200 feet square, and consequently, so far as we know, the largest interior of the ancient world, with the single exception of the great hall at Karnei, which covers 58,569 square feet, while this only extends to 40,000. Both the Persian halls are supported by 36 columns, upwards of 60 feet in height, and spaced equidistant from one another at about 27 feet 6 inches from centre to centre.

On the exterior of this, separated from it by walls 18 feet in thickness, were three great porches, each measuring 200 feet in width by 65 in depth, and supported by 12 columns whose axes were coincident with those of the interior. These were beyond doubt the great audience halls of the palace, and served the same purposes as the House of the Forest of Lebanon in Solomon's palace, though its dimensions were somewhat different, 150 feet by 75. These porches were also identical, as far as use and arrangement go, with the throne-rooms in the palaces of Delhi or Agra, or those which are used at this day in the palace at Isfahan.

The western porch would be appropriate to morning ceremonies, the eastern to those of the afternoon. There was no porch, as we might expect in that climate, to the south, but the principal one, both at Susa and Persepolis, was that which faced the north with a slight inclination towards the east. It was the throne-room, pur excellence, of the palace, and an inspection of the plan will show how easily, by the arrangement of the stairs, a whole army of courtiers or of tribute-bearers and treasures could file before the king without any inconvenience. The lustral relievi in the stairs at Persepolis in fact represent permanently the procession that on great festivals took place upon their steps; and a similar arrangement of stairs was no doubt to be found at Susa when the palace was entire.

It is by no means so clear to what use the central hall was appropriated. The inscriptions quoted above would lead us to suppose that it was a temple, properly so called, but the sacred and the secular functions of the Persian kings were so intimately blended together that it is impossible for us to draw a line anywhere, or say how far "temple cella" or "palace hall" would be a correct designation for this part of the building. It probably was used for public and great ceremonial purposes, such as the coronation or enthronization of the king—such ceremonies as returning thanks or making offerings to the gods for victories—for any purpose in fact requiring more than usual state or solemnity; but there seems no reason to suppose it ever was used for purely festal or convivial purposes, for which it is singularly ill suited.

From what we know of the buildings at Persepolis, we may assert, almost with certainty, that the "King's Gate," where Mordecai sat (Esth. ii. 21), and where so many of the transactions of the book of Esther took place, was a square hall (wood-cut No. 5), measuring probably a little more than 100 feet each way, and with its roof supported by four pillars in the centre, and that this stood at a distance of about 130 or 200 feet from the front of the northern portico, where its remains will probably now be found when looked for. We may also be tolerably certain that the inner court, where Esther appeared to implore the king's favor (Esth. v. 1), was the space between the northern portico and this square building, the outer court being the space between the "King's Gate" and the northern terrace wall. We may also predicate with tolerable certainty that the "Royal House" (i. 9) and the "House of the Women" (ii. 9, 11) were situated behind this great hall to the southward, for between it and the citadel, and having a direct
communication with it either by means of a bridge over the ravine, or a covered way under ground, most probably the former.

There seems also no reasonable doubt but that it was in front of one of the lateral porticoes of this building that King Ahaseurus (Xerxes) "made a feast unto all the people that were present in Shushan the palace, both unto great and small, seven days in the court of the garden of the king's palace; where were white, green, and blue hangings, fastened with cords of fine linen and purple to silver rings and pillars of marble: the beds were of gold and silver upon a pavement of red and blue and white and black marble" (Esth. i. 3, 6). From this it is evident that the feast took place, not in the interior of any hall, but out of doors, in tents erected in one of the courts of the palace, such as we may easily fancy existed in front of either the eastern or western porticoes of the great central building.

The whole of this great group of buildings was raised on an artificial mound, nearly square in plan, measuring about 1,000 feet each way, and rising to a height apparently of 50 or 60 feet above the plain. As the principal building must, like those at Persepolis, have had a taken or raised platform [TEMPLE] above its roof, its height could not have been less than 100 or 120 feet, and its elevation above the plain must consequently have been 170 or 200 feet.

It would be difficult to conceive anything much grander in an architectural point of view than such a building, rising to such a height out of a group of subordinate palace-buildings, interspersed with trees and shrubs, and the whole based on such a terrace, rising from the flat but fertile plains that are watered by the Zolens at its base. J. F.

SHUSHAN-EDUTH. "To the chief musician upon Shushan-eduth" (Shushan-Eduth) is plainly a musical direction, whatever else may be obscure about it (Ps. lx.). In Ps. lxxx. we have the fuller phrase "Shashmimu-eduth," of which Roediger regards Shashimnu-eduth as an abbreviation (Gesen. Thes. p. 1385). As it now stands it denotes "the lily of testimony," and possibly contains the first words of some Psalm to the melody of which that to which it was prefixed was sung; and the preposition יְּדֵיה (tiv "unto") would then signify "after, in the manner of," indicating to the conductor of the Temple-choir the air which he was to follow. If, however, Roediger is correct in his conjecture that Shashimnu-eduth is merely an abbreviation for Shashimnu-eduth, the translation of the words above given would be incorrect. The LXX. and Vulgate appear to have read פִּיתְחֵי תִּזְרֵעַ, for they render τοῖς ἀλλαχίαστοις and pro his qui inaudirebantur respectively. In the LXX., פִּיתְחֵי, "éduth, becomes פִּיתָחא, 'id, 'eri. There does not appear to be much support for the view taken by some (as by Joel Brill) that Shashimnu-eduth is a musical instrument, so called from its resemblance to a lily in shape.
SHUTHALHITES, THE

(Simonis), or from having lyre-shaped ornaments upon it, or from its six (دلله) strings. First, in consistency with his theory with respect to the titles of the Psalms, regards Shushan-edeth as the name of one of the twenty-four divisions of singers appointed by David, so called after a band-master, Shushan, and having its headquarters at Eduth, which he conjectures may be the same as Alithin in Josh. xx. 36 (Hendler, s. v.). As a conjecture this is certainly ingenious, but it has the disadvantage of introducing as many difficulties as it removes. Simonis (Lees. s. v.) connects "celith with 9), the Aramaic "دلله," a lute, or kind of guitar played with a plectrum, and considers it as the melody produced by this instrument; so that in his view Shushan-edeth indicates that the lyre-shaped cymbals were to be accompanied with playing on the lute. Gesenius proposes to render "celith a 'revelation,' and hence a psalm or song revealed; but there seems no reason why we should depart from the usual meaning as above given, and we may therefore regard the words in question as a fragment of an old psalm or melody, the same in character as Ajedeth Shashar and others, which contained a direction to the leader of the choir.

W. A. W.

SHUTHALHITES, THE (תֵתַלֵה יִתְיַתְיָה) [attr., see below]: α δ Σουθαλάτα [Vat. Σουταλάτα] Alex. Γονταλάτα] Nathothites. The descendants of Shutelah the son of Ephraim (Num. xxv. 35).

SHUTHELAH (תִיתָלָה) [name of breaking, Genev.]: [in Xunum]. Σουταλατα, [Vat. Σουταλα] Alex. [Γονταλατα] ᾿Θουαλατα] [in Chr. Σουθαλατα, Σουθαλατη] Nathoth. Head of an Ephraimite family, called after him Shutelahites (Num. xxxv. 35), and linel ancestor of Josiah the son of Nun (1 Chr. vii. 20-27). Shutelah appears from the former passage to be a son of Ephraim, and the father of Eran, from whom sprung a family of Ermites (ver. 26). He appears also to have had two brothers, Becher, father of the Tahans, and Tahal, father of the Tahalhites. But in 1 Chr. vii. we have a further notice of Shutelah, where he appears first of all, as in Xunum, as the son of Ephraim: but in ver. 21 he is placed six generations later. Instead, too, of Becher and Tahal, as Shutelah's brothers, we find Bered and Tahath, and the latter twice over; and instead of Eran, we find Eladah: and there is this strange anomaly, that Ephraim appears to be alive, and to mourn for the destruction of his descendants in the eighth generation, and to have other children born after their death. And then again in ver. 25, the genealogy is resumed with two personages, Rephael and Kesheph, whose parentage is not distinctly stated, and is conducted through Tethin, and another Tahal, and Ladan, to Joshua the son of Nun, who thus appears to be placed in the twelfth generation from Joseph, or, as some reckon, in the eighteenth. Obviously, therefore, the text in 1 Chr. vii. is corrupt. The following observations will perhaps assist us to restore it.

1. The names that are repeated over and over again, either in identical or in slightly varied forms, represent probably only one person. Hence, Eran, ver. 20; Elead, ver. 21; and Ladan, ver. 26, are the names of one and the same person. And a comparison of the last name with Num. xxxvi. 36, where we have "of Eran," will further show that Eran is also the same person, whether Eran or Ladan be the true form of the name. So again, the two Tethinas in ver. 20, and Tahalas in ver. 25, are the same person as Tahin in Num. xxxvi. 35; and Shutelahs in vs. 20 and 21, and Tehal in ver. 25, are the same as the Shutelah of Num. xxxvi. 35, 36; and the Bered of ver. 20, and Zahab of ver. 21, are the same as the Becher of Num. xxxvi. 35. The names written in Hebrew are subjoined to make this clearer.

α With the article, "τετιλ" is the origin of the Ital. melo, Fr. luth, and English lut.

β The Samaritan text, followed by the LXX. and

the Syrian, and two or three Heb. MSS., read Eran and one Heb. MS. reads Elea for Ladan at 1 Chr. vii. 20 (Burrington, General Tables).
SHUDETALAH

who built the upper and lower Beth-horon (on the border of Benjamin and Ephraim), and Uzzan-Sherah, a town evidently so called from her (Sherah's) ear-ring. The writer then returns to his genealogy, beginning, according to the LXX., with Laadan. But the fragment of Shudethelah's name in ver. 25, clearly shows that the genealogy of Joshua which is here given, is taken up from that name in ver. 20. The clause probably began, "the sons of Shudethel, Laadan (or, of Erna) his son," etc. But the question remains whether the transaction which was so fatal to the Ephraimites occurred really in Ephraim's lifetime, and that of his sons and grandson, or whether it belongs to the times after the entrance into Canaan; or, in other words, whether we are to understand, by Ephraim, Shudethel, etc., the individuals who bore those names, or the tribe and the families which sprung from them. Ewald and Bunsen, understanding the names personally, of course refer the transaction to the time of the sojourn of the Israelites in Goshen, while Lepsius merely points out the confusion and inconsistencies in the narrative, though he apparently suspects that the event occurred in Palestine after the Exodus. In the Gene., of our Lord Jesus Christ, p. 363, the writer of this article had suggested that it was the men of Gath who had come down into Goshen to steal the cattle of the Israelites, in order to obviate the objection from the word "come down." [See too EPHRAIM]. But subsequent consideration has suggested another possible way of understanding the passage, which is also advocated by Bertheau, in the Kurzg. exeget. H. thld. z. A. T. According to this view, the slaughter of the Ephraimites took place after the settlement in Canaan, and the event related in 1 Chr. viii. 13, in which Beriah also took part, had a close connection with it. The names therefore of the patriarch, and fathers of families, must be understood of the families which sprung from them [Nehemiah, iii. 26504. and Bertheau well compares Judg. xxi. 6. By Ephraim (1 Chr. vii. 22, 23), we must in this case understand the then head of the tribe, who was probably Joshua, and this would go far to justify the conjuncture in Genesis p. 334, that Sherah (= Ἑραία) was the daughter of Joshua, arrived at by comparison of Josh. xix. 49, 50; 1 Chr. vii. 50, and by observing that the latter passage is Joshua's genealogy. Beriah would seem, from 1 Chr. viii. 13, to have obtained an inheritance in Benjamin, and also in Asher, where we find him and "his sister Sherah" (.Foundation) in 1 Chr. vii. 50. It is, however, impossible to speak with certainty where we have such scanty information. Bertheau's suggestion that Beriah was adopted into the family of the Ephraimites, is inconsistent with the precision of the statement (1 Chr. vii. 23), and therefore inadmissible. Still, putting together the insuperable difficulties in understanding the passage of the literal Ephraim, and his literal sons and daughter, with the fact that the settlements of the Ephraimites in the mountainous district, where Beth-horon, Gezer, Timnath-Serah, etc., lay, were exactly suited for a desert upon the plains of the Philistine country where the men of Gath fed their cattle, and with the further facts that the Ephraimites encountered a successful opposition from the Canaanites in Gezer (Josh. xvi. 10; Judg. i. 29), and that they apparently called in later the Benjaminites to help them in driving away the men of Gath (1 Chr. viii. 13), it seems best to understand the narrative as of the times after the entrance into Canaan.

SIBMAH

or, "The children of Sin" were a family of Neophites returned with Zerubabel (Neh. vii. 47). The name is written סיבמיה in Ezr. ii. 44, and סיב in 1 Par. v. 29.

SIBMAH (םיבמיה [Son]]: [Vat. סבמיה] Alex. סבמייה: Sibhmiia (or, Bibmiah). The Ephraimite (or, according to the text, the Ephraimites) pronunciation of the word Sibmeth (Judg. xii. 6). The LXX. do not represent Sibmeh at all. [See SIBIMEL].

SIBBOLETH (םיבבלת) [Sibboleth]. The Ephraimite (or, according to the text, the Ephraimite) pronunciation of the word Shibboleth (Judg. xii. 6). The LXX. do not represent Sibboleth at all. [See SIBIMEL].

SIBMAH (םיבמיה [Sibmeh; Sibmeh]. A town on the coast of the Jordan, one of those which were taken and occupied by the tribe of Reuben (Josh. xiii. 19). In the original catalogue of those places it appears as Sibemah and Sibemeh (the latter merely an inaccurate variation of the A. V.). Like most of the Transjordanic places, Sibmom disappears from view during the main part of the Jewish history. We, however, gain a partial glimpse of it in the lament over Moab pronounced by Isaiah and by Jeremiah (Is. xvi. 8, 9; Jer. xlviii. 7).
SIBRAIM twofold but occasionally overlooked.

Sibmah seems to have been known to Eusebius (Onomasticon, "Sabahana"), and Jerome (Comment in Isaiah, lib. v.) states that it was barely 600 paces distant from Heshbon. He also speaks of it as one of the very strong cities (Ubca ex-"ibiotissine) of that region. No trace of the name has been discovered more recently, and nothing resembling it is found in the excellent lists of Dr. Eli Smith (Robinson, Biblical Res. ed. 1, App. 160, 170).

SIBRAIM [a twofold hope]: Ἕλπις Ἐλίαμ(Λαίας: [Alex. Ἕλπις Ἐλφία; Νέας: "Cous. Σαμπαρια""] Sapharin). One of the landmarks on the northern boundary of the Holy Land as stated by Ezekiel (xii. 10). It occurs between Jericho and Hazon, and is often referred to in the same passage as lying between the boundary of Danneus and that of Hanath. It has not been identified—and in the great obscurity of the specification of this boundary it is impossible to say where it should be sought.

SICHEM (Σιχέμ, i. e. Shechem [shoulder, ridge]: Σικής; Sichen). 1. The same well-known name—identified in the Hebrew—with that which in all other places in the O. T. is accurately rendered by our translators SHECHEM. Here (Gen. xii. 6) its present form arises from a too close adherence to the Vulgate, or rather perhaps from its non-correspondence with the Hebrew having been overlooked in the revision of 1611. The unusual expression "the place of Sichem" may perhaps indicate that at that early age the city did not exist. The "oaks of Moreh" were there, but the town of Shechem as yet was not, its "place" only was visited by the great patriarch.

SICHEM (Σιχέμ, i. e. Shechem [shoulder, ridge]: Σικής; Sichen). 2. The Greek original here is in the form which is occasionally found in the O. T. as the equivalent of SHECHEM. If there could be any doubt that the son of Sirach was alluding in this passage to the Samaritans, who lived as they still live at Shechem, it would be dispelled by the characteristic pun which he has perpetrated on the word Moreh, the ancient name of Shechem; "that foolish people (Λαός μαφωπός) that dwell in Shechem."

SICKLE [Agriculture, vol. i. p. 43.]

SICYON (Σικυών). A city mentioned with several others [see Phaselis] in 1 Mace. xv. 23. The name is derived from a Punic root (sęk, skē, or sok), which always implies a periodical market;

and the original settlement was probably one to which the inhabitants of the narrow strip of highly fertile soil between the mountains and the southern shore of the Corinthian Gulf brought their produce for exportation. The oldest name of the town on the coast (the Sicyon of the times before Alexander) was Kipe, hence the Greek name Sicyon. This was perhaps the common native name, and Sicyon that given to it by the Phoenician traders, which would not unnaturally extrude the other as the place acquired commercial importance. It is this Sicyon, on the shore, which was the seat of the government of the Orthogordoi, to which the Cleisthenes celebrated by Herodotus (v. 67) belonged. But the Sicyon referred to in the book of Maccabees is a more recent city, built on the site which served as an acropolis to the old one, and distant from the shore from twelve to twenty stades. Demetrius Phoicocrates, in the year 303 b. c., surprised the garrison which Polonius had five years before placed there, and made himself master of the lower town, although the acropolis was surrendered to him, and he then persuaded the population, whom he restored to independence, to destroy the whole of the buildings adjacent to the harbor, and remove thither: the site being one much more easily defensible, especially against any enemy who might attack from the sea. Dio-B lrior describes the new town as including a large space so surrounded on every side, by precipices as to be unapproachable by the machines which at that time were employed in sieges, and as possessing the great advantage of a plentiful supply of water within its circuit. Modern travelers completely confirm his account. Mr. Clark, who, in 1857, descended upon Sicyon from "a ridge of hills running east and west, and commanding a splendid prospect of both the [Corinthian and Saronic] gulfs and the isthmus between," after two hours and a half of riding from the highest point, came to a ruined bridge, probably ancient, at the bottom of a ravine, and then ascended the right bank by a steep path. Along the crest of this hill he traced fragments of the western wall of Sicyon. The mountain which he had descended did not fall towards the sea, but continued on in a continuous slope, but presented a succession of abrupt descents and level terraces, severed at intervals by deep rents and gorges, down which the mountain-torrents make their way to the sea, spreading alluvium over the plain, about two miles in breadth, which lies between the lowest cliffs and a wave. Between two such gorges, on a smooth expanse of table-land overlooking the plain," stood the city of Demetrias. "On every side are abrupt cliffs, and even at the southern extremity there is a lucky transverse rent separating this from the next plateau. The ancient walls may be seen at intervals along the edge of the cliff on all sides." It is easy to conceive how these advantages of position must at once have fixed the attention of the great engineer of antiquity—the besieger.

Demetrias established the forms of republican government in his new city; but republican government had by that time become an impossibility in Hellas. In the next half-century a number of

5 The commercial connection of the Sicyon of the Orthogordoi with Phoenicia is shown by the quantity of Tarshish wine in the treasury of the Orthogordoi Myron of Olympia. The Phoenician (Carthaginian treasury was next to it (Pausanias, vi. 19, § 1).
tyrants succeeded one another, maintaining them- 
selves by the aid of mercenaries, and by terroriz- 
ing with the rival sovereigns, who each endeavored to 
secure the hegemony of the Greek race. This 
state of things received a temporary check by the 
efforts of Aratus, himself a native of Sicyon, of 
which his father Cleidas for a time became dynast. 
In the second half of the 4th century, the city, in 
 alliance with the Achaeans and Messenians, 
united it with the Aegean league. This was in the 
year 251 B.C., and it appears that at this time the 
Dorian population was so preponderant as to make 
the addition of the town to a confederation of 
Achaean a matter of remark. For the half century 
before the foundation of the new city, Sicyon had 
favored the anti-Lacedemonian party, and now, 
taking active part with the Messenians and Argives in support of Megalopolis, which Epani- 
monndus had founded as a counter-check to Sparta. 
The Sicyonian territory is described as one of 
singular fertility, which was probably increased by 
artificial irrigation. In the changeable times which 
preceded the final absorption of European Helles 
by the Romans it was subject to plunder by whoever 
had the command of the sea; and in the year 
208 B.C. the Roman general Sulpicius, who had a 
squadron at Naupactus, landed between Sicyon and 
Corinth (probably at the mouth of the little river 
Neuma, which was the boundary of the two states), 
and was proceeding to harass the neighborhood, when 
Philip, king of Macedon, who was then at 
Corinth, attacked him and drove him back to 
ships. But very soon after this, Roman influence 
began to prevail in the cities of the Aegean league, 
which were instigated by dread of Nabis the 
dynast of Lacedaemon to seek Roman protection. One 
congress of the league was held at Sicyon under 
the presidency of the Romans in 182 B.C., and 
another at the same place six years later. 
From this time Sicyon always appears to have adhered to 
the Roman side, and on the destruction of Corinth 
by Mummius (B.C. 146) was rewarded by 
the victors not only with a large portion of the 
Corinthian domain, but with the management of the 
Isinian games. This distinction was again lost 
when Julius Caesar gave Corinth to Corinth, to 
which city it was returned by Lucullus. It was 
a Roman colony; but in the mean while Sicyon 
enjoyed for a century all the advantages of an entre- 
pot which had before accured to Corinth from her 
position between the two seas. Even in the days of 
the Antonines the pleasure-gounds (Σεβειον) of 
the Sicyonian tyrant Clean continued appropriated 
to the Roman governors of Achaea; and at the 
time to which reference is made in the Maccabees, 
it was probably the most important position of 
the Romans exercised influence in Greece.

SIDDIM, THE VALE OF (σιμ) [see below]: "S naked, "A naked," and

* The following are the equivalents of the name

given in the ancient versions: Sam. Vers., "η Σιμ, "η Σιμις; Dukelos, "η Σιμις; Arab, "η Σιμις; Pakhto, "η Σιμις; Aquila, K, ρως περιτείων; Symm. and Theod., K, "η Σιμις (Ξαιλος ;) Josephus, "η Σιμις (Ξαιλος; Jerome (Quint., in Gen.) "η Σιμις.

5 Perhaps more accurately with Sibid, "to borrow." See Kalisch (Gen. p. 356) who, however, disapproves of such a derivation, and adheres to that of Genesis.
SIDDIM, THE VALE OF

tion has been entertained for the last eighteen centu-
ries, that the Dead Sea covers a district which be- 
fore its submersion was not only the Valley of 
Siddim, but also the Plain of the Jordan, and that 
an elaborate account of the catastrophe of its sub-
mission has been constructed even very recently 
by one of the most able scholars of our day, we 
can hardly be surprised that a chronicler in an age 
far less able to interpret natural phenomena, and at 
the same time long subsequent to the date of the 
actual event, should have shared in the belief. Re-
cent investigation, however, of the geological evi-
dence furnished by the aspect of the spot itself, has 
not hitherto lent any support to this view. On 
the contrary, it seems to contradict it. The northern 
and deeper portion of the lake unquestionably be-
longs to a geological era of very much older date 
than the time of Abraham; and as to even the 
southern and shallower portion, if it has undergone 
any material change in historic times, such change 
would seem to be one rather of gradual elevation 
than of submersion.

If we could venture, as some have done, to in-
terpret the latter clause of verse 3, "which is near," 
or "which is at, or by, the Salt Sea," then we 
might agree with Dr. Robinson and others in iden-
tifying the Valley of Siddim with the inclosed plain 
which is seen in the survey of the sea by the bine 
its distance, and the range of heights which termi-
nate the "Ghor" and commence the Wady Arabeh. 
This is a dis-

trict in many respects suitable. In the ditches 
and drains of the Soddbeh are the impassable 
channels of Gesenius. In the thickly wooded *Ghor or G-stabih 
are ample conditions for the fertility of Prof. 
Stubs. The general aspect and formation of the plain 
may here be compared to the scene of an *exod. But 
the original of the passage will not bear even this slight 
accommodation, and it is evident that in the mind 
of the author of the words, no less than of the 
learned and eloquent divine and historian of our 
own time already alluded to, the Salt Sea covers 
the actual space formerly occupied by the Vale of 
Siddim. It should be remembered that if the 
cities of the plain were, as there is much reason to 
believe they were, at the north end of the Dead Sea, it 
is hardly probable that the five kings would have 
gone so far from home as to the other end of the 
lake, a distance of more than forty miles, espe-
cially as on their road they must have passed 
Hazzon-Tamar, the modern Ain Jidy, where the 
Abir; was situated, and is a proper and natural 
spot for the inhabi ts of the plain of Jericho to attack a hostile force descending from 
the passes of Ain Jidy.

The discussion of this site is so interwoven 
with the question of the basin of the Salt Sea, and 
the submersion of a portion of the valley, that they 
cannot be separated. We dissent from the writer's 
positions as presented in the article. SALT SEA, 
and repeat ed in this. But instead of repeating our 
arguments in reply, we refer the reader to the former 
article (Am. ed.), for our reasons so far as they 
relate to the submersion of the plain and the site of 
the Vale of Siddim. And for an examination of 
his theory respecting the site of the cities of the 
plain, as north of the Sea, which Mr. Grove also 
introduces here, we refer the reader to the articles 
Sohom and Zoan (Amn. ed.). See also Bib. 
Wars., ii. 143-144.

Relative to the inroad of Chedorlaomer and his 
allies, we remark that the northern invaders, after 
making the distant circuit of the valley on the east 
and south, came up on the west and smote En-gedi 
and secured that pass. The cities and their kings 
were in the deep valley below, whether north or 
south, or opposite, is wholly immaterial, so far as 
we can discover, in relation either to the previous 
route of conquest or to the subsequent course of 
the victors. Between the cities, wherever situated, 
and En-gedi, lay the Vale of Siddim, in which the 
battle was fought. Neither the narrative of the in-
vasion, nor that of the conflagration of the cities 
and the plain, as viewed by the patriarch Abraham 
from a hill near Hebron, appears to us to throw decisive 
light on any disputed theory of settling their site.

If the eminence about three miles east of Hebron, 
the highest in that part of the country, now known 
as Baal Nittum, and where, according to Muslim 
tradition, is the tomb of Lot, was the spot where 
Abraham stood before the Lord, as claimed by Je-
rone, it would clearly favor the received theory. 
Dr. Robinson, on the other side, would explain the 
sea as visible from it "through gaps in the western 
mountains, by which the eye could penetrate into 
its deep bosom" (Bibl. Rei., ii. 188).

With reference to the view expressed in the arti-
cle above, respecting the bed of the sea, that "if 
it has undergone any material change in historic 
times, such change would seem to be one rather of 
grade elevation than of submersion," we com-
 municate to the reader the pertinent suggestion of Mr. 
Waring ton, that the elevation of the salt mountain 
within the historic period would account both for 
the present saltness of the waters, and the rise of 
their level more than fifty feet, through the salt 
which they hold in solution. The occurrence of 
river shells, not marine, such as are now found 
in the Jordan, along the aqueous beaches of the sea, 
he regards as proof that "the sea was at one time 
fresh water, not salt," and he says, "if the salt 
were removed, the water would be found to occupy 
only nine-tenths of its present bulk" (Journal of 
Sacred Literature, April 1896, p. 47). This would 
leave the southern portion of the present bed dry, 
with ample room for the paths of the patriarch and his 
exiles, north and south. In a letter to the writer of this 
(March 7, 1898), Mr. Tristram says, "My belief is that the Jebel Uba-
num has been recently elevated. This I judge 
from the layers of stratified marl corresponding with 
the adjacent deposits on its top. Mr. War-
ington suggests that the index of salt has so mu-

a Josephus states it emphatically. His words (Ant. 
1. 100, vi.) are: 'They encamped in the valley called 
the Wells of Asphalt; for at that time there were inls 
in that spot; but now that the city of the Sodornics has 
disappeared, that valley has become a lake which is 

called Asphaltum.' See also Strabo, xvi. 704.

b The grounds of this conclusion are stated under 
SEA, THE SALT.

c This is the plain which Dr. Robinson and others 
would identify with the Valley of Salt, gr melakh. It 
is hardly possible that it can be both an emek and a 

211.232.121.103 - 2023-04-18 06:32:20 UTC
cressed the volume of water, by the introduction of solid matter, that it must have raised its level at least 15 feet ["some 56 feet"]). This would allow a limit of overflow over the southern lagoon, and would admit generally of an easy passage by the margin of the lake on the west side. I must say the explanation is satisfactory to my own mind."

[SUL. THE SALT. Amer. ed.]

SYDÉ (Σίδη). A city on the coast of Phoenicia, in lat. 36° 46', long. 31° 27', ten or twelve miles to the east of the river Euryemon. It is mentioned in I Mac. xv. 23, among the list of places to which the Roman senate sent letters in favor of the Jews [see PHAESA]. It was a colony of Cunean. In the time of Strabo a temple of Athena stood there, and the name of that goddess associated with Apollo appears in an inscription of undoubtedly late times found on the spot by Admiral Beaufort. Sidé was closely connected with Arados in Phoenicia by commerce, even if there was not a considerable Phoenician element in the population; for not only are the towns placed in juxtaposition in the passage of the Massaliotes quoted above, but Arados, a Phoenician colony, stood to the Aegean league (Livy, xxxv. 48), when boasting of his master's navy, told his hearers that the left division was made up of men of Sidé and of Arados, as the right was of those of Tyre and of Sidón, quos gentes unalque unique nemo a veste nec veste nec turata viris diversae represent. It is possible that the name has the same root as that of Sidon, and that it, as well as the Sidé on the southern coast of the Euxine, Strabo, xii. 3) was originally a Phoenician settlement, and that the Cunean colony was something subsequent. In the times in which Sidé appears in history it had become a place of considerable importance. It was the station of Antiochus's navy on the eve of the battle with the Rhodian fleet described by Livy (xxvii. 23, 24). The remains, too, which still exist are an evidence of its former wealth. They stand on a low peninsula running from N. E. to S. W., and the maritime character of the former inhabitants appears from the circumstance that the walls towards the sea were but slightly built, while the one which faces the land is of excellent workmanship, and remains in a condition of considerable perfection, even to this time. A theatre (belonging apparently to the Roman times) is one of the largest and best preserved in Asia Minor, and is calculated to have been capable of containing more than 15,000 spectators. This is so prominent an object that, to persons approaching the shore, it appears like an acropolis of the city, and in fact, during the Middle Ages, was actually occupied as a fort. The suburbs of Sidé extend to some distance, but the greatest length within the walls does not exceed 1300 yards. Three gates led into the town from the sea, and one, on the northeastern side, into the country. From this last a paved street with high embankments conducts to an agora, 180 feet in diameter, and formerly surrounded with a double circle of columns, of which only the bases remain. In the centre is a large ruined pedestal, as if for a colossal statue, and on the southern side the ruins of a temple, probably the one spoke of by Strabo. Opposite to this a street ran to the principal water-gate, and on the fourth side of the agora the avenue from the land-gate was continued to the front of the theatre.

Of this last the lower half is, after the manner of Roman architects wherever the site permitted, excavated from the native rock, the upper half built up of excellent masonry. The seats for the spectators, most of which remain, are of white marble beautifully wrought.

The two principal harbours, which at first seem to have been united in one, were at the extremity of the peninsula: they were closed, and together contained a surface of nearly 500 yards by 200. Besides these, the principal water-gate on the N. W. side was connected with two small piers of 150 feet long, so that it is plain that vessels need not lie here to discharge their cargoes. And the account which Livy gives of the sea-fight with Antiochus above referred to, shows that shelter could also be found on the other (or S. E.) side of the peninsula whenever a strong west wind was blowing.

The country by which Sidé is backed is a broad, swampy plain, stretching out for some miles beyond the head of small-bills which fringe the sea shore. Low hills succeed, and behind these, far inland, are the mountains which, at Mount 4 linear 40 miles to the west, and again about the same distance to the east, come down to the coast. These mountains were the habitation of the Pisdians, against whom Antiochus, in the spring of the year 192 B. C., made an expedition; and as Sidé was in the interested of Antiochus, until, at the conclusion of the war, it passed into the hands of the Romans, it is reason able to presume that hostility was the normal relation between its inhabitants and the highlanders, to whom they were probably objects of the same jealousy that the Spanish settlements on the African seashore inspire in the Kabyles round about them.

This would not prevent a large amount of traffic, to the mutual interest of both parties, but would hinder the people of Sidé from extending their way into the interior, and also render the construction of effective fortifications on the land side a necessity. (Strabo, xii., xiv., Livy, xxxv., xxxvi.; Beaufort, Ksidoön; Ciceron, Ep. ad Fam. iii. 5.)

SIRDON. The Greek form of the Phoenician name Sidon, or more accurately Tell Sidon. As such it occurs naturally in the N. T. and Apocrypha of the A. V. (Zidôn [Siro in i Mac. xxxv. xi.; ziDON, 1 Esdr. i. 1; Judg. ii. 28; l Mac. v. 15; Matt. xi. 21, 22, xv. 21; Mark iii. 8, vii. 24, 31; Luke iv. 28, vi. 17, x. 13, 14; Acts xii. 20, xxi. 3); it is thus a parallel to Tellon.

But we also find it in the O. T., where it imperfectly represents the Hebrew word elsewhere presented as Zidon (Gen. x. 15, 19; ב לון Zidôn Sidôn). [Zidon.]

SIDONIANS (ב לון; in Judg. ב לון [inhabitants of Zidon]; ב לון in Dent. fam. [inhabitants of Sidon]; ב לון: in Judg. ב לון: Sidônii, Sidoniius). The Greek form of the word Zidonians, usually so exhibited in the A. V. of the O. T. It occurs Dent. iii. 9; Josh. xiii. 4, 6; Judg. iii. 3; 1 K. v. 6. [G

* SIEVE. [AGRICULTURE.]

* SIGNET. [ORNAMENTS: RING; SEAL.]

SIDEON (ב לון, and ב לון [one who...]

This form is found frequently, though not exclusively, in the books subsequent to the Pentateuch. In
and the name of the country. K.I.M. means "the black:" but there is no name of the Nile like signification. In the ancient painted sculptures, however, the figure of the Nile-god is colored differently from what it represents the river itself, even the time of the inscription, and during the rest of the year, in the former case red, in the latter blue.

There are but three occurrences of Shihor in the Bible, and but one of Shihor of Egypt, or Shihor-Mizraim. It is spoken of as one of the limits of territory which was still unoccupied when Joshua was old. This [is] the land that yet remaineth: all the regions of the Philistines, and all Geshur, from the Shihor (עֵינָי נְעֹר), which [is] before Egypt, even unto the borders of Ekron northward, is counted to the Canaanite (Josh. xiii. 2, 3). The enumeration of the Philistines follows. Here, therefore, a district lying between Egypt and the most northern Philistine city seems to be intended. With this passage must be compared that in which Shihor-Mizraim occurs. David is related to have gathered all Israel together, from Shihor of Egypt even unto the entering of Hamath (1 Chr. xiii. 5). There is no other evidence that the Israelites are here supposed to have crossed the Euphrates; it may be strange that the actual territory dwelt in by them in David’s time should thus appear to be spoken of as extending as far as the extreme boundary of the Nile, but it must be recollected that more than one tribe at a later time had spread beyond even its first boundaries, and also that the limits may be those of David’s dominion rather than of the land actually fully inhabited by the Israelites. The stream may therefore be that of the Wádîl’-Aræah.

That the stream intended by Shihor unqualified was a navigable river is evident from a passage in Isaiah, where it is said of Tyre, “And by great waters, the sowing of Shihor, the harvest of the river (יוֹר, ‘ד), [is] her revenue" (xxii. 3).

Here Shihor is either the same as, or compared with, Iowr, generally thought to be the Nile [Nile], but in this work suggested to be the extension of the Red Sea. [RED SEA]. In Jerem. the identity of Shihor with the Nile seems distinctly stated where it is said of Israel, “And how what hast thou to do in the way of Egypt, to drink the waters of Shihor? or what hast thou to do in the way of Assyria, to drink the waters of the river?" (Is. i. 23). In considering these passages it is important to distinguish between “the Shihor which [is] before Egypt,” and Shihor of Egypt, on the one hand, and Shihor alone, on the other. In articles NILE and RIVER OF EGYPT it is maintained too strongly that Shihor, however qualified, is always the Nile. The later opinion of the writer is expressed here under SHIHOR OF EGYPT. The latter is, he thinks, unquestionably the Nile, the former two probably, but not certainly, the same.

R. S. P.

SILAS (Σίλας): An eminent member of the early Christian Church, described under that name in the Acts, but as Silvanus in St. Paul’s Epistles. He first appears as one of the leaders (ἐρημιταüsseldorf of the Church at Jerusalem (Acts xv. 22), holding the office of an inspired teacher (μέσοις). The method by which they arrived at these forms is not very apparent.
SILK

(γυνή, xv. 32). His name, derived from the Latin silva, "wood," betokens him a Hellenistic Jew, and he appears to have been a Roman citizen (Acts xvi. 37). He was appointed as a delegate to accompany Paul and Barnabas on their return to Antioch with the decree of the Council of Jerusalem (Acts xx. 22, 32). Having completed this mission, he returned to Jerusalem (Acts xv. 33; the following verse, διαβοι της Σαλας σπευδων αποθετω, is decidedly an interpolation introduced to harmonize the passage with xv. 40). He must, however, have immediately revisited Antioch, for we find him selected by St. Paul as the companion of his second journey (Acts xvi. 5). At Berea he was left behind with Timothy while St. Paul proceeded to Athens (Acts xvii. 14), and we hear nothing more of his movements until he rejoined the Apostle at Corinth (Acts xviii. 5). Whether he had followed Paul to Athens in obedience to the injunction to do so (Acts xvii. 15), and had been sent thence with Timothy to Thessalonica (1 Thess. iii. 2), or whether his movements were wholly independent of Timothy's, is uncertain (Conyob. and Hows. St. Paul, i. 458, note 3). His presence at Corinth is several times noticed (2 Cor. i. 19; 1 Thess. i. 1; 2 Thess. i. 1). He probably returned to Jerusalem with St. Paul, and from that time the connection between them appears to have terminated. Whether he was the Silvanus who conveyed St. Peter's First Epistle to Asia Minor (1 Pet. v. 12) is doubtful: the probabilities are in favor of the identity; the question is chiefly interesting as bearing upon the Pauline character of St. Peter's epistles (De Wette, Ekl. d. § 4). A tradition of very slight authority represents Silas to have become bishop of Corinth. We have finally, to notice, for the purpose of rejecting the theories which identify Silas with Tertius (Rom. xvi. 22) through a Hebrew explanation of the name (סילא), and again with Luke, or at all events with the author of the Acts (Allard's Prolegomen. in Acts, i. § 1).

W. L. B.

SILK (σηριχω). The only unaltered notice of silk in the Bible occurs in Rev. xvii. 12, where it is mentioned among the treasures of the typical Babylon. It is, however, in the highest degree probable that the texture was known to the Hebrews from the time that their commercial relations were extended by Solomon. For, though we have no historical evidence of the importation of the raw material to the shores of the Mediterranean earlier than that of Aristotle (H. A. v. 19) in the 4th century B.C., yet that notice, referring as it does to the island of Cos, would justify the assumption that it had been known at a far earlier period in Western Asia. The commercial routes of that continent are of the highest antiquity; and an indirect testimony to the existence of a trade with China in the age of Isaiah is probably afforded us in his reference to the Sinim. (SISIM.) The well-known classical name of the substance (σηριχω, σηριου) does not occur in the Hebrew language, but this may be accounted for, partly on the ground that the Hebrews were acquainted only with the texture and not with the raw material, and partly on the supposition that the name σηριου reached the Greeks by another channel, namely, through Aramea. The Hebrew terms which have been supposed to refer to silk are makhī and denasheskē. The former occurs only in Ex. xvi. 10, 13 (A. V. "silk") and is probably connected with the root makhalti, "to draw out," as though it were made of the finest denaves silk in the manner described by Pliny (vi. 29, xi. 26); the equivalent term in the LXX. (σηριου), though connected in point of etymology with haric as its material, is nevertheless explained by Hesychius and Suidas as referring to silk, which may well have been described as resembling hair. The latter term denaseske occurs in Am. iii. 12 (A. V. "Damascen"). and has been supposed to refer to silk from the resemblance of the word to our "damask," and of this again to "Damascensis," as the place where the manufacture of silken textures was carried on. It appears, however, that "damask" is a corruption of daunelsk, a term applied by the Arabs to the raw material alone, and not to the manufactured article (Pusey's Hebr. Proph. p. 185). We must, therefore, consider the reference to silk as extremely doubtful.

SILVA (ΣΙΛΒΑ [neig, basker]: Rom. Σίλβα: Vat.) Γαλάα: Alex. Γαλαάα: [Comp. Σαλαά] Σίλβα. "The house of Milo, which goeth down to Silba," was the scene of the murder of king Josha (2 K. xii. 20). What or where Silba was is entirely matter of conjecture. Milo seems most probably to have been the cittadel of the town, and situated on Mount Zion. [See iii. 1937 a.] Silba must have been in the valley below, overlooked by that part of the cittadel which was used as a residence. The situation of the present so-called Pool of Silvan would be appropriate, and the agreement between the two names is tempting; but the likeness exists in the Greek spelling. English only gives the clue that the original is too slight to admit of any inference. Gesenius, with less than his usual caution, affirms Silba to be a town in the neighborhood of Jerusalem. Others (as Themenius, in Kuray, Exeg., Homil. on the passage) refer it to a place on or connected with the causeway or flight of steps (τειχεία) which led from the central valley of the city up to the court of the Temple. To indulge in such confident statements on either side is an entire mistake. Neither in the parallel passage of Chronicles, in the lists of Nehemiah iii. and xii., the Jewish Commentator, the LXX., or Josephus, some curious variations from that of the Kings, but passing over the place of the ter great Mass. of the LXX. — agreeing in the 1st as the commencement of the name — is remarkable, and prompts the suggestion that the Hebrew name may originally have been נב, a ratine (as der-banein). The καραγαοντος of the Alex. is doubtless a corruption of καραφαοντος.
SILOAH, THE POOL OF

[Siłoah, Is. vii. 6: ]

Shelah, Neh. iii. 15 [see above]: the change in the Masoretic punctuation indicating merely perhaps a change in the pronunciation or in the spelling of the word, sometime during the three centuries between Isaiah and Nehemiah. Rubbishy writers, and following them, Jewish travellers, both ancient and modern, from Benjamin of Tudela to Schwarz, retain the earlier Sheloth in preference to the later Shelach. The Rabbis give it with the article, as in the Bible (םְלֹאָ הַחְשָׁבָא), Dach's Codex Talmudicus, p. 367). The LXX. gives Σιλόαι [G. Sin. Σιλόαν] in Isaiah: but in Nehemiah כָּלְמָלְבָּדָהּ הוֹרָקָר, the pool of the shepherds, or θ' ἑλθεῖ ποῦν; perhaps because, in their day, it was used for washing the flocks of the inhabitants. The Vulgate has uniformly, both in Old and New Testaments, Silo: in the old calling it piscinar, and in the New writers the Latin Fathers, led by the Vulgate, have always Silo: the old pilgrims, who knew nothing but the Vulgate, Silo or Sym. The Greek Fathers, adhering to the LXX., have Siloan. The word does not occur in the Apocalypse. Josephus gives both Siloain and Siloain, generally the former.

G.

SILOAH

Siloan is one of the few undeplicated localities (though Ruck and some others misplace it) in the topography of Jerusalem: still retaining its Old name, with the English modification, Siloam, while every other pool has lost its Bible-designation. This is the more remarkable as it is a mere suburban tank of no great size, and for many an age not particularly good or plentiful in its waters, though Josephus tells us that in his day they were "sweet and abundant" (B. J. v. 4 § 1). Among the earliest names of it, there is an unbroken chain of exterior testimony, during eighteen centuries, connecting the present Birked Siloan with the Shiloah of Isaiah and the Siloam of St. John. There are difficulties in identifying the Bir Edub (the well of Sahel-ed-din, Ibn Edub, the great digger of wells, Jalil-Addin, p. 239), but none in fixing Siloan. Josephus mentions it frequently in his Jewish War, and his references indicate that it was a somewhat noted place, a sort of city landmark. From him we learn that it was without the city (ἕως τοῦ ἄρτου, B. J. v. 9 § 4); that it was at this pool that the "old wall took a bend and shot out eastward" (ἀποκαταστάσεις εἰς άκρασίαν, b. 6, § 1); that there was a valley under it (παλαιόν Σιλοαίς φάραγγα, ibid. vi. 12 § 2); and that it was the "proved valley" of the temple (ἐξοπλίζω, b. 4, § 1); that close beside it, apparently eastward, was another pool, called Solomon's pool, to which the "old wall" came after leaving Siloam, and past which it went on to Ophelos, where, bending northward, it was united to the eastern arcade of the Temple. In the Autobiographical Account (A. D. 534) it is set down in the same locality, but it is said to be "juxta muram," as Josephus implies; whereas now it is a considerable distance—upwards of 1200 feet—from the nearest angle of the present wall, and nearly 1,900 feet from the southern wall of the Haram. Jerome, towards the beginning of the 5th century, describes it as "ad radices montis Moriah" (in Matt. x.), and tells (though without inscribing the féble) that the stones sprinkled with the blood (rubra saxa) of the prophet Zechariah were still pointed out (in Matt. xxviii. 2). It speaks of it as being in the Valley of the Son of Himmon, as Josephus does of its being at the mouth of the Tyropeon (in Jer. ii.); and it is noticeable that he (like the Rabbis) never mentions the Tyropeon, while he, times without number, speaks of the Valley of the Son of Himmon. He speaks of Himmon, Tophet, with their groves and gardens, as watered by Siloam (in Jer. xxvii. 26, and xxxii. 55). "Tophet, quae est in valle fili Eummon, illum locus significat qui Siloc fontibus irrigatur, et est annus atque memorabilis, odoriferum hororum praebet deliciis" (in Jer. viii.). He speaks of Siloam as dependent on the rains, and as the only fountain used in his day: "Uno fonte Siloe et hoc non perpetuo utitur civilitas; et
aqve in presentem diem steriltas pluviorum, non solum frugum sed et hibiendi iniquam facit " ( in Jer. xiv.). Now, though Jerome ought to have known well the water-supplies of Jerusalem, seeing he lived the greater part of his life within six miles of it, yet other authorities, and the modern water-provision of the city, show us that it never could have been widely dependent on its poës. Its innumerable bottle-necked private cisterns kept up a supply at all times, and hence it often happened that it was the besieged, not the besieger, that suffered most; though Josephus records a memorable instance to the contrary, when relating a speech he made to the Jews, standing, unseen, beyond their darts, on a part of the southern wall which the Romans had carried—he speaks of Siloam as overflowing since the Romans had got access to it, whereas before, when the Jews held it, it was dry (B. J. v. 9, § 4). And we may here notice, in passing, that Jerusalem is, except perhaps in the very heat of the year, a well-watered city. Dr. Barclay says that "within a circuit, swept by a radius of seven or eight miles there are no less than thirty or forty natural springs" (City of the Great King, p. 295); and a letter from Consul Finn to the writer adds, "This I believe to be under the truth; but they are almost all found to the S. and S. W. of those directions there does not appear to be a village without springs."

In the 7th century, Antoninus Martyr mentions Siloam as both fountain and pool. Bernard the monk speaks of it in the 9th, and the annalists of the Crusades mention its site in the fork of two valleys, as we find it. Benjamin of Tudela (A. D. 1173) speaks of "the great spring of Silicbech which runs into the brook Keidron" (Ashor's ed. vol. i. p. 71); and he mentions "a large building upon it" (77), which he says was erected in the days of his fathers. Is it of this building that the present ruined pillars are the relics? Canmot (A. D. 1148) speaks of the Valley of Siloh, "on est le fontain le plus sale"; Marie de l'ennfant, "and the fountain of Siloam as close at hand (Voyage d'audelairer en Jerusalem, etc., Paris edition, p. 68). Felix Fabri (A. D. 1384) describes Siloam at some length, and seems to have attempted to enter the subterraneous passage; but failed, and retreated in dismay after filling his flasks with its eye-healing water. Arnold von Harf (A. D. 1369) also identifies the spot (Die Pilgrifahrt, p. 188, Col. ed.). After this, the references to Siloam are insufficient; nor do they, with one or two exceptions, vary in their location of it. We hardly needed these testimonies to enable us to fix the site, though some topographers have rested on these entirely. Scripture, if it does not actually set it down in the mouth of the Tyropean or Josephus does, brings us very near it, both in Nehemiah and St. John. The reader who compares Neh. iii. 15 with Neh. xii. 37, will find that the pool of Siloah, the Fountain Gate, the stairs of the city of David, the wall above the house of David, the Water Gate, and the king's garden, were all near each other. The Evangelist's narrative regarding the blind man, whose eyes the Lord miraculously opened, when carefully examined, leads us to the conclusion that Siloam was somewhere in the neighborhood of the Temple. The Rabbinical traditions, or histories, as they doubtless are in many cases, frequently refer to Siloam in connection with the Temple service. It was to Siloam that the Levite was sent with the golden pitcher on the "last and great day of the feast" of Tabernacles: it was from Siloam that he brought the water which was then poured over the sacrifice, in memory of the water from the rock of Hephidran; and it was to this Siloam water that the Lord pointed when He stood in the Temple on that day and cried, "If any man thirst, let him come unto me and drink." The Lord sent the blind man to wash, not in, as our version has it, but at (εἰς) the pool of Siloam; b for it was the clay from his eyes that was to be washed off; and the Evangelist is careful to throw in a remark, not for the purpose of telling us that Siloam meant an "aqueduct," as some think, but to give higher significance to the miracle. (a Wash at Siloam," was the command; the Evangelist adds, "which is ἀπ' ἀσκεσίος ἐτέλεσε." On the inner meaning here—the parallelism between "the Sent One" (Luke iv. 18: John x. 36) and "the Sent water," the missioned One and the missioned pool, we say nothing farther than what St. Basil said well, in his exposition of the 8th of Isaiah, τίς ἀπ' ἀσκεσίος καὶ ἐφαρμ. κύριος ἐτέλεσε, τίς ἐτέλεσε σου ἐν ζωγραφείς? That "Sent" is the natural interpretation is evident, not simply from the word itself, but from other passages where θεῖος is used in connection with water, as Job v. 10: "he senteth water upon the fields;" and Ez. xxxii. 4: "she sent out her little rivers unto all the trees of the field." The Talmudists coincide with the Evangelist, and say that Siloach was so called because it sent forth its waters to water the gardens (Levi's Lengua Sacra). We may add Homer's line: —

Ἐφημέρις ὁ κρίως τις γράφει (H. ii. 25). 

A little way below the Jewish burying-ground, but on the opposite side of the valley, where the Kidron turns slightly westward, and widens itself considerably, is the fountain that marks the beginning, or Um ed-Draij, near the beginning of that saddle-shaped projection of the Temple-hill supposed to be the Orphel of the Bible, and the Ophles of Josephus. (EX-ROGEL.) At the back part of this fountain a subterraneous passage begins, through which the water flows, and through which a man may make his way, as did Robinson and Baruchy, sometimes walking erect, sometimes stooping, sometimes kneeling, and sometimes crawling, to Siloah. This rocky conduit, which twists considerably, but keeps, in general, a south-westery direction, is, according to Robinson, 1,750 feet long, while the direct distance between Siloah and Um ed-Draij is only a little above 1,200 feet. In former days this passage was evidently deeper, as its bed is sand of some depth, which has been accumulating for ages. This conduit has had tributaries, which have formerly sent their waters down from the city pools or Temple-wells to swell Siloam. Baruchy writes, "In exploring the subterraneous channel

a Strabo's statement is that Jerusalem itself was rocky but well watered (ɜerxvog), but all the region around was barren and waterless (ἀμφωρία καὶ ἀμφονογ), b xvi. ch. 2, sect. 35. b See Walfi Curr. etc. Or εἰς gets its force from ἐνθάλκη, ζωγραφις coming between the verb and its preposition, parenthetically, "Go to the pool and wash thine eyes there."
conveying the water from the Virgin's Fount to Siloam, I discovered a similar channel entering from the north, a few yards from its commencement; and on tracing it up near the Mugrabin Gate, where it became so choked with rubbish that it could be traversed no further, I there found it turn to the west, in the direction of the south end of the cleft or saddle of Zion; and if this channel was not constructed for the purpose of conveying to Siloam the surplus waters of Hezekiah's aqueduct, I am unable to suggest any purpose to which it could have been applied" (City of the Great King, p. 309). In another place he tells us something more: "Having loitered in the pool [Virgin's Fount] till the coming down of the waters, I soon found several widely separated places where it gained admittance, besides the opening under the steps, where alone it had formerly been supposed to enter. I there observed a large opening entering the rock-hewn channel, just below the pool, which, though once a copious tributary, is now dry. Being too much choked with tesseres and rubbish to be penetrated far, I carefully noted its position and bearing, and, on searching for it above, soon identified it on the exterior, where it assumed an upward direction towards the Temple, and, entering through a breach, traversed it for nearly a thousand feet. sometimes erect, sometimes bending, sometimes

marching my way snake-fashion, till at last I reached a point near the wall where I heard the donkeys tripping along over my head. I was satisfied, on subsequently locating our course above ground with the theodolite, that this canal derived its former

* * * Lieutenant Warren's researches have shown that Dr. Barclay was singularly mistaken in the statements here quoted. The subterranean passage connected with the aqueduct and pool, which the latter supposed he had "identified on the exterior," was ascertained by the latter to be about 40 feet below the surface of the rock. The passage which Barclay mistook for this, and entering from the exterior, traversed it for nearly

supply of water, not from Moriah, but from Zion" * * (City, p. 523).

This conduit enters Siloam at the northwest angle; or rather enters a small rock-cut chamber which forms the vestibule of Siloam, about five or a thousand feet," is, according to Warren, "the main drain of the town, which is built of masonry, and generally only a few feet below the surface of the made ground." The subterranean passage, moreover, was not as Barclay supposed, a tributary to the fountain, but a conduit to a shaft, of which, as explored by Warren, some account is given at the end of this article (Amer. ed.).

8 W
Siloam, as "alia piscina grandis foras." It is now known as the Birket el-Hanna, and may perhaps have some five times the size of Birket es-Silwan. Barclay speaks of it merely as a "depressed yard;" but one would like to see it cleared out.

Siloam is in Scripture always called a pool. It is not an ΣΗΩΜ, that is, a marsh-pool (Is. xxxv. 7) nor a ?"'ΩΓ, a natural hollow or pit (Is. xxx. 14) nor a ?"'"ΩΓ, a natural gathering of water (Gen. i. 10; Is. xxi. 11) nor a ΣΗΩΜ, a well (Gen. xvi. 14) nor a ?"'ΩΓ, a pit (Lev. xi. 36) nor an ΩΓ, a spring (Gen. xvi. 7) but a ?"'ΩΓ, a regularly built pool or tank (2 K. xx. 20; Ncb. lii. 15; Eed. ii. 6). This last word is still retained in the Arabic, as any traveller or reader of travels knows. While Nehemiah calls it a pool, Isaiah merely speaks of it as "the waters of Shihikiah," while the New Testament gives καλωςβηθανεια, and Josephus πηγη. The Rabbinic and Jewish travellers call it a fountain; in which they are sometimes followed by the European travellers of all ages, though more generally they give us piscina, natatoria, and stagnum.

It is the best of all the Jerusalem pools; hardly the sixth part of the Birket el-Manihah; hardly the tenth of the three pools of Solomon at el-Barud. Yet it is a sacred spot, even to the Moslem; much more to the Jew; for not only from it was the water taken at the Feast of Tabernacles, but the water for the ashes of the red heifer (Duck's Tolen, Budg. p. 380). Jewish tradition makes Gilon and Siloam one (Lightfoot, Cent. Chor. in Matt. p. 51; Schwarz, p. 265), as if Gilon were "the bursting forth" (?"ΩΓ, to break out), and Siloam the receptacle of the waters "sent." If this were the case, it might be into Siloam, through one of the many subterranean aqueducts with which Jerusalem abounds, and one of which probably went down the Tyropoön, that Hezekiah turned the waters on the other side of the city, when he "stopped the upper watercourse of Gilon, and brought it straight down to the west side of the city of David" (2 Chr. xxxiii. 30).

The rush of water down these conduits is referred to by Jerome ("per terrarum concava et autra saxa durissimi cum magno sonitu venit," in Is. vii. 6), as heard in his day, showing that the water was more abundant then than now. The intermittent character of Siloam is also noticed by him; but in a locality perverted by so many aqueducts, and supplied by so many large wells and secret springs (not to speak of the drainage of the great city-baths), this irregular flow is easily accounted for, both by the direct and the siphonic action of the water. How this natural intermittency of Siloam could be made identical with the miracula untroubling of Bethesda (John v. 4) one does not see. The lack of water in the pool now is no proof that there was not the great abundance of which Josephus speaks (R. J. v. 4, § i); and as to the "sweetness" he speaks of, like the "aquas dulces" of Virgil (Georg. iv. 61), the Old Testament speaks of it in connection with Silet, as "alia piscina grandis foras."
fresh or pleasant in opposition to bitter (מַּרְדֵּ֣֚֔יד, מַרְדֵּ֣֚֔יד).

The expression in Isaiah, "waters of Shiloh that go softly," seems to point to the slender rivulet, flowing gently, though once very profusely, out of Siloam into the lower breadth of level, where the king's gardens, or " royal paradise," stood, and with which is still the greenest spot about the Holy City, reclaimed from sterility into a fair oasis of olive-crobes, fig-trees, pomegranates, etc., by the tiny rill which flows out of Siloam. A winter-torrent, like the Kidron, or a swelling river like the Euphrates, carries havoc with it, by sweeping off soil, trees, and terraces; but this Silouam's rill flows softly, fertilizing and beautifying the region through which it passes. As the Enphruses is used by the prophet as the symbol of the wasting sweep of the Assyrian king, so Siloam is taken as the type of the calm prosperity of Israel under Messianic rule, when "the desert rejoices and blossoms as the rose." The word softly or secretly (מַּרְדֵּ֣֚֔יד) does not seem to refer to the secret transmission of the waters through the tributary rivulets, but, like Ovid's "molles aquae," "blambe aquae," and Catullus' "molle flumen," to the quiet gentleness with which the rivulet steals on its mission of benediction, through the gardens of the king. Thus "Siloam's brook" of Milton, and "cool Siloam's shady rill," are not mere poetical fancies. The "fountain" and the "pool," and the "rill" of Siloam, are all alike to this day, each doing its old work beneath the high rock of Moriah, and almost beneath the shadow of the Temple wall.

East of the Kidron, right opposite the rough gray slope extending between Derej and Siloain, above the kitchen-gardens watered by Siloam which

supply Jerusalem with vegetables, is the village which takes its name from the pool, -- Kefr-Siloain. At Derej the Kidron is narrow, and the village is very near the fountain. Hence it is to it rather than to the pool that the villagers generally betake themselves for water. For as the Kidron widens considerably in its progress southward, the Kefr is at some little distance from the Kefr. This village is unmentioned in ancient times; perhaps it did not exist. It is a wretched place for filth and irregularity; its square hovels all huddled together like the lairs of wild beasts, or rather like the tombs and caves in which savages or demons may be supposed to dwell. It lies near the foot of the third or southern height of Olivet; and in all likelihood marks the spot of the idol-shrines which Solomon built to Chenosh, and Ashtoreth and Milcom. This was "the mount of corruption" (2 K. xxiii. 13), the hill that is before (east; before in Hebrew geography means east) Jerusalem (1 K. xi. 7); and these "abominations of the Libanes, Zidonians, and Ammonites" were built on "the right hand of the mount," that is, the southern part of it. This is the "opprobrious hill" of Milton (Par. L. b. i. 403); the "monos of the Vulgate and of early travelers, the Morath of the Sept. (see Keil On Kings); and the Berg des Erzgernisses of German maps. In Raumou's singular volume of lithographs (Col. 1858) of Jerusalem and its Holy Places, in imitation of the antique, there is a sketch of an old monolithic tomb in the village of Siloain, which few travellers have noticed, but of which De Saulcy has given us both a cut and a description (vol. ii. p. 215); setting it down as a relic of Jezusite workmanship. One would like to know more about

The Village of Siloaim (Siloain), and the lower part of the Valley of the Kidron, showing the "King's Gardens," which are watered by the Pool. The background is the highlands of Judah. The view is from a photograph by James Graham, Esq., taken from beneath the S. wall of the Haram.

Siloam
this village and about the pedigree of its inhab-

2. 8. * The rock-cut passage between the Fountain of the Virgin and Siloam was traversed and care-
fully surveyed by Liet. Warren. He found two passages leading into it from the northwest, the largest being about 30 feet from the entrance to the pool. It was filled with hard mud, the deposit of centuries, which with much difficulty was dug out and I carried through the passage and pool, and up the steps to the outside. At the end of 17 feet he reached a shaft leading upwards for more than 40 feet, with smooth sides, cut out of the solid rock, and averaging 6 feet in length and 4 in width. By constructing a scaffolding with three ladders he mounted to the top. In the northern overhanging it he found an iron ring, through which a rope might have passed, and from this he inferred that the shaft was the ancient draw-well of Ophel. Connected with it, near the top, he dis-
covered and explored extended passages and chambers cut in the rock, and found glass lamps of curious construction and water-vessels of red pot-
tery, all the remains of that which had been used as a refuge. The other passage, 40 feet from the entrance, extended but 9 feet. Liet. W. also excavated 4 feet under the lowest step of the Vir-
gin’s Fount, to ascertain the source of supply, and reached a hard substance, “either masonry or rock,” but in that depth of water could proceed no further. “The other point of entrance of the water is a deep hole in the middle of the pool, at which nothing can be done.” Warren is inclined to the belief, contrary to Borchy, that there is a con-
nection between the H.生产工艺δος Χείραστις and the Virgin’s Fount; but the point is not yet ascer-
tained.

S. W.

SILOAM TOWER IN. (Ο τάφρος εν τῷ Σιλωάμ.) Of this we know nothing definitely beyond these words of the Lord. Of the tower or its fall no historian gives us any account; and whether it was a tower in connection with the pool, or whether it is in Siloam “refers to the valley near, we cannot say. There were fortifications hard by, for of Jotham we read, “on the wall of Ophel he built much” (2 Chr. xxvii. 3); and of Manasseh that he “compassed about Ophel” (ibid. xxvii. 14); and, in connection with Ophel, there is mention made of “a tower built both of stone and braided” (Neh. iii. 20); and there is no likelihood in connecting this projecting tower with the tower in Siloam, while one may be almost excited for the conjecture that its projection was the cause of its ultimate fall.

H. R.

* The later publication of the Ordinance Survey of Jerusalem (Lond. 1855) enables us to satisfy in part this curiosity. Entering Siloam on the north, there is on the left a high cliff, which bears evident signs of having been worked as a quarry; on the right hand side is the curious monolith with the heavy Egyptian cornice; the exterior of the cliff is quite flat, but the interior is sloping like a tent; in front is a small cistern. The present village of Siloam oc-
cupies the site of an old quarry; the houses are often made simply by the wailing up of the excavation, and sometimes they cling on the scarped face of the rock; much quarrying was of considerable extent, and similar remains in character to that near the Damascene gate, though not nearly so large; several pillars were left to sustain the roof. The stone from this quarry is ‘malaki’ of a very soft kind; higher up, by the monolith, a ‘milash,’ and the upper bed of ‘malaki’ are found.

SIVLA’NUS. [Silas].

SILVER (Σπάργας, εκσπαργα). In very early times, according to the Bible, silver was used for orna-
ments (Gen. xxiv. 53), for cups (Gen. xiv. 2), for the sockets of the pillars of the Tabernacle (Ex. xxvii. 19, 20), and their capitals (Ex. xxxviii. 17); for dishes, or chargers, and bowls (Num. vii. 13, trumpets (Num. x. 2), candlesticks (1 Chr. xxviii. 15), tables (1 Chr. xxviii. 16), basins (1 Chr. xxviii. 17), chains (xxv. 19), the settings of ornaments (Prov. xxxix. 11), studs (Cant. i. 11), and crowns (Zech. vi. 11). Images for idolatrous worship were made of silver or overlaid with it (Ex. xx. 24; Hos. xii. 2; Hab. ii. 19; Bar. vi. 39) [or Epist. of Jer. 39], and the manufacture of silver shrines for Diana was a trade in Ephesus (Acts xix. 21) [Demetrius]. But its chief use was as a medium of exchange, and throughout the O. T. we find excepta “silver,” used for money, like the Fr. argent. To this general usage there is but one exception. (See Metals, lii. 1019.) Vessels and ornaments of gold and silver were common in Egypt in the times of Osirtenas I. and Thothmes III., the contemporaries of Joseph and Moses (Wilkinson, Ap. ii. ii. 225).

In the E. W. and S. W. regions we find indications of a constant application of silver to purposes of ornament and luxury. It was used for basins (1 K. i. 137, iv. 53), goblets (1 K. xiiii. 741), baskets (1 K. iv. 125), coffers (1 K. xviii. 413), sword-hilts (1 K. ii. 210; 1 K. viii. 404), door-handles (1 K. iv. 442), and chapes for the greaves (1 K. iii. 35). Door-posts (1 K. iv. 9) and lamp-stands (1 K. vii. 90) overlaid with silver ornaments; bracelets (1 K. iv. 128), tables (1 K. iv. 555), bowls (1 K. iv. 10, xiv. 605), scabbards (1 K. xiii. 31), sword-belts (1 K. xviii. 503), belts for the shield (1 K. xix. 48), chariot-poles (1 K. viii. 729) and the waves of wheels (1 K. viii. 729) were adorned with silver; women braided their hair with silver thread (1 K. xiiii. 92), and cords appear to have been made of it (1 K. x. 24); while we constantly find that swords (1 K. iv. 15, xix. 807) and sword-lances (1 K. xiv. 257), thrones, or chairs of state (1 K. viii. 65), and bedstools (1 K. xiii. 280) were studded with silver. Tiara-st of the silver feet was probably so culled from the silver ornaments on her sandals (1 K. i. 538). The practice of overlaying silver with gold, referred to in Homer (Od. vi. 222, xiii. 159), is nowhere mentioned in the Bible, though better materials were covered with silver (Prov. xxvi. 23).

Silver was brought to Solomon from Arabia (2 Chr. ix. 14) and from Tarshish (2 Chr. xii. 11), which supplied the markets of Tyre (Ex. xixii. 12). From Tarshish it came in the form of plates (Jer.

A large portion of the quarraying at Siloam has been in the 'millas' beds, and throughout the village the deep vertical cuts made by the quarrymen may be seen exactly corresponding to those found in all the quarries; steps cut in the rock lead to different parts of the village; first made for the convenience of the workmen, they have now been made to serve as streets. There are few buildings in this village, which belongs in character as has generally been supposed. The state of the houses and streets was worse than anything seen about Jerusalem, and they were swarming with vermin; still the village is highly interesting, and deserves more notice from travelers than has generally been be-
estowed upon it.” (p. 64 ff.)

For some very recent discoveries which seem to connect Siloam 'with Zontriba see in the latter name (Amer. ed.).}
SILVERLINGS

SIMEON

v. 9), like those on which the sacred books of the Sinhalese are written to this day (Temnent's *Ceyl. ii. 102*). The silver bowl given as a prize by Achilles was the work of Sidonian artists (II. xxiii. 743; comp. *Od.* iv. 618). In Homer (II. ii. 857), Alyce is called the birthplace of silver, and was probably celebrated for its mines. But Spain appears to have been the chief source whence silver was obtained by the ancients. [Mises, iii. 1899.] In the Bible the silver bowls have afforded some supply of this metal. 'When Volney was among the Druses, it was mentioned to him that an ore affording silver and lead had been discovered on the declivity of a hill in Lebanon' (Kitto, *Phys. Hist. of Palestine*, p. 73).

For an account of the knowledge of obtaining and refining silver possessed by the ancient Hebrews, see the articles Lead and Mines. The whole operation of mining is vividly depicted in Job xxviii. 1-11: and the process of purifying metals is frequently alluded to (Is. xvi. 9; Prov xxvi. 4), while it is described with some minuteness in Ez. xxii. 20-22. Silver mixed with alloy is referred to in Jer. vi. 30, and a finer kind, either purer in itself, or more thoroughly purified, is mentioned in Prov. viii. 19.

W. A. W.

SILVERLINGS (σιλβρινας: σιλβρινος: argentus, sileus understood), a word used once only in the A. V. (Is. vii. 23), as a translation of the Hebrew word sepher, elsewhere rendered "silver" or "money." [PIECE OF SILVER.]

R. S. P.

SIMALCUTÉ (Rom. Επιμελητή: [Sin. ομπιλες: Abs. Σιμαλκος: Comp. Συμαλ- κος: Epi_b€leth, Maximus: MaXioS, Joseph]; an ancient chief who had charge of Antiochus, the young son of Alexander Balas, before he was put forward by Tryphon as a chimera to the Syrian throne (1 Mac. xi. 39). [ANTIOCHUS VI., vol i. p. 117.] According to Diodorus (Fabrius, xxii. 1) the name of the chief was Diocles, though in another place (Frag. xxi. Miller) he calls him Dianclus. The name evidently contains the element *M€l€* "king," but the original form is uncertain (comp. Gratius and Grimm on I Macc. l. c.).

B. F. W.

SIMEON (Σιμών < [a hearing, latenting]; Σιμών, [in 1 Chr. iv. 24, Rom. Σεμων (mis- print?): Vat. Alex. here as elsewhere Συμων] = Simon). The second of Jacob's sons by Leah. His birth is recorded in Gen. xxix. 33, and in the explanation there given of the name, it is derived from the root *šōmā*; to hear a — Jehovah hath heard (ibidem) that I was hated. . . . and she called his name Simonon. b This metaphor is not carried on (as in the case of some of the names) in Jacob's Blessing; and in that of Moses all mention of Simonon is omitted.

The first group of Jacob's children consists, besides Simeon, of the three other sons of Leah — Reuben, Levi, Judah. With each of these Simeon is mentioned in some connection. As Reuben and Simeon are mine," says Jacob, "so shall Jo-

a First (Handeb. ii. 472) inclines to the interpretation "famous" (transcriber). Redehol (Attitt. Num. 90 u. 91) on the other hand, adopting the Arabic

b The name is given in this its more correct form in the A. V. in connection with a later Israelite in Ex. x. 31.

c It is by no means certain that Jacob's words apply to the transaction at Shechem. They appear rather to refer to some other act of the brothers which has escaped direct record.
plied in the Blessing of Jacob (Gen. xix. 5-7), has been already adverted to. The passage relating to them is thus rendered:—

Shimeon and Levi are brethren, a
Instruments of violence are their machinations (or their ıv swords).
Is their secret counsel come not my soul?
Unto their assembly join not mine honor!
For in their wrath they slew a man,
And in their self-will they houghed an ox.
Cursed be their wrath, for it is fierce,
And their anger, for it is cruel!
I will divide them in Jacob,
And scatter them in Israel.

The terms of this denunciation seem to imply a closer bond of union between Shimeon and Levi, and more violent and continued exploits performed under that bond, than now remain on record. The expressions of the closing lines also seem to necessitate a more advanced condition of the nation of Israel than it could have attained at the time of the death of the father of the individual patriarchs. Taking it however to be what it purports, an actual prediction by the individual Jacob (and, in the present state of our knowledge, however doubtful this may be, no other conclusion can be safely arrived at), it has been often pointed out how differently this surmise was accomplished in the cases of the two tribes. Both were "divided" and "scattered." But how differently! The dispensation of the Levites arose from their holding the post of honor in the nation, and being spread, for the purposes of education and worship, broadcast over the face of the country. In the case of Simon the dispersion seems to have arisen from some corrupting element in the tribe itself, which first reduced its numbers, and at last drove it from its allotted seat in the country—not, as Dan, because it could not, but because it would not stay—and thus in the end caused it to dwindle and disappear entirely.

The non-appearance of Simon's name in the Blessing of Moses (Deut. xxxiii. 6-9) may be explained in two ways. On the assumption that the Blessing was actually pronounced in its present form by Moses, the omission may be due to his displeasure at the misbehavior of the tribe at Shittim. On the assumption that the Blessing, or this portion of it, is a composition of later date, then it may be due to the fact of the tribe having by that time vanished from the Holy Land. The latter of these is the explanation commonly adopted.

During the journey through the wilderness Simon was a member of the camp which marched on the south side of the Sacred Tent. His associates were Reuben and Gad—not his whole brothers, but the sons of Ziphah, Leah's maid. The head of the tribe at the time of the Exodus, was Shelumiel, son of Zurishaddon (Num. i. 6), ancestor of its one heroine, the intrepid Judith. [SALASADAL] Among the spies Simon was represented by Shiphath son of Hori, i.e. Horite, a name which perhaps, like the "Canaanites" of the earlier list, reveals a trace of the lax tendencies which made the Simeonites an easy prey to the licentious rites of Peer, and ultimately destroyed the permanence of the tribe. But the division of the land his representative was Shemuel, son of Ammiudah.

The connection between Judah and Simon already mentioned seems to have begun with the Conquest. Judah and the two Joseph-brothers were first served with the lion's share of the land; and then, the Canaanites having been sufficiently subdued to allow the Sacred Tent to be established without risk in the heart of the country, the work of dividing the remainder amongst the seven inferior tribes was proceeded with (Josh. xvii. 1-6). Benjamin had the first turn, then Simon (xix. 1). By this time Judah had discovered that the tract allotted to him was too large (xix. 9), and also too much exposed on the west and south for even his generous disposition, and the Simonites being unable to hold a distinct sector of the territory of his kinsman, on its southern frontier, which contained eighteen or nineteen cities, with their villages, spread round the venerable well of Beer-sheba (Josh. xix. 1-8; 1 Chr. iv. 28-33). Of these places, with the help of Judah, the Simeonites possessed themselves (Judg. i. 3, 17; and here they were found, doubled by Josh., residing in the reign of David (1 Chr. iv. 31). During his wandering Life David must have been much amongst the Simeonites. In fact, three of their cities are named in the list of those to which he sent presents of the spoil of the Amalekites, and one (Ziklag) was his own private property. It is therefore remarkable that the numbers of Simon and Judah who attended his installation at Hebron should have been so much below those of the other tribes (1 Chr. xii. 23-37). Possibly it is due to the fact that the event was taking place in the heart of their own territory, at Hebron. This, however, will not account for the curious fact that the warriors of Simeon (7,100) were more numerous than those of Judah (6,900). After David's removal to Jerusalem, the head of the tribe was Shephatiah son of Masach (1 Chr. xxvii. 16).

What part Simon took at the time of the divi-

\*a The word is שים, meaning "brothers" in the fullest, strictest sense. In the Targ. Pe'ula, it is rendered אדוניא תבנית, "brothers of the womb."
\*b A distinction of the personal (Jerome, Talm., etc.) with the Greek syntax. The "habitations" of the A V is derived from Kinschi, but is not countenanced by later scholars.
\*c A V, "dug down a wall;" following Onkelos, who reads רעב = רבע, "a town, a wall."
\*d The Alexantrine MS. of the LXX adds Simon's name in this passage— "Let Reuben live and not die, and let Simon be few in number." In so doing it differs not only from the Vatican MS, but also from the Hebrew text, to which this MS. usually adheres more closely than the Vatican does. The insertion is adopted in the Complutensian and Alexantrine MS. of the LXX, but does not appear in any of the other versions.
\*e It is a curious coincidance, though of course nothing more, that the seerly records of Simon should disclose two names so illustrous in Israel's history as Saul and Samuel.
\*f This is a different account to that supplied in Judg. i. The two are entirely distinct documents. That of Judges, from its fragmentary and abrupt character, has the appearance of being the more an epitome of the two.\n\*g "The ports of Ithlim which border on Arabs and Egypt" (Joseph. Ant. v. 1, § 22).
\*h It had been first taken from Simeon by the Philistines (1 Sam. xxvii. 6), if indeed he ever got possession of it.
\*i Possibly because the Simeonites were warriors and nothing else, instead of husbandmen, etc., like the men of Judah.
ion of the kingdom we are not told. The tribe was probably not in a sufficiently strong or compact condition to have shown any northern tendencies, even had it entertained them. The only thing which can be interpreted into a trace of its having taken any part with the northern kingdom are the two casual notices of 2 Chr. xv. 9 and xxxiv. 6, which appear to imply the presence of Simeonites there in the reigns of Asa and Josiah. But this may have been merely a manifestation of that vagrant spirit which was a cause or a consequence of the prediction ascribed to Jacob. And on the other hand the definite statement of 1 Chr. iv. 41–43 (the date of which by Hezekiah's reign seems to show conclusively its southern origin) proves that at that time there were still some of them remaining in the original seat of the tribe, and actuated by all the warlike lawless spirit of their progenitor. This fragment of ancient chronicle relates two expeditions in search of more eligible territory. The first, under thirteen chieftains, leading doubtless a large body of followers, was made against the Hamites and the Meunites, a powerful tribe of Bedouins, "at the entrance of Gaza." The expedition was successful, The So'ron was smaller, but more adventurous. Under the guidance of four chieftains a band of 500 undertook an expedition against the remnant of Amalek, who had taken refuge from the attacks of Saul or David, or some later pursuers, in the distant fastnesses of Mount Seir. The expedition was successful. They smote the Amalekites and took possession of their quarters; and they were still living there after the return of the Jews from Captivity, or whenever the First Book of Chronicles was edited in its present form. The audacity and intrepidity which seem to have characterized the founder of the tribe of Simeon are seen in their fullest force in the list of his descendants of whom there is any express mention in the Sacred Record. Whether the book which bears his name be a history or a historic romance, Judith will always remain one of the most prominent figures among the deliverers of her nation. Bethulia almost seems to have been a Simoonite colony. Ozias, the chief man of the city, was a Simeonite (Jud. vi. 15), and so was Maceias the husband of Judith (viii. 2). She herself had the purest blood of the tribe in her veins. Her genealogy is traced up to Zurishaddai (in the Greek form of the present text Salsada, viii. 1), the head of the Simeonites at the time of their greatest power. She nerves herself for her tremendous exploit by a prayer to "the Lord God of her father Simon" and by recalling in the most characteristic manner and in all their details the incidents of the massacre of Shechem (ix. 2).

Simeon is named by Ezekiel (xlviii. 25) and the author of the Book of the Revelation (vii. 7) in their catalogues of the restoration of Israel. The former removes the tribe from Judah and places it by the side of Benjamin. 2. Son of Judah (Simeon.) A priest of the family of Joarib — or in its full form JEHUJIAH — one of the ancestors of the Maccabees (1 Mace. ii. 1). 3. Son of Juda and father of Levi in the genealogy of our Lord (Luke iii. 30). The Vat. MS. gives the name SIMEON. [This is an error. — A.]

4. Simon Peter (Acts xv. 4.) The use of the Hebrew form of the name in this place is very characteristic of the Howard, whose mouth it occurs. It is found once again (2 Pet. i. 1), though here there is not the same unanimity in the MSS. Lachmann, with it, here adopts "Simon."

G. 8. [Simon.] A devout Jew inspired by the Holy Ghost, who met the parents of our Lord in the Temple, took Him in his arms, and gave thanks for what he saw and knew of Jesus (Luke ii. 25–35). In the apocryphal Gospel of Nicodemus, Simon is called a high-priest, and the narrative of our Lord's descent into Hell is put into the mouths of Charinus and Luthins, who are described as two sons of Simon, who rose from the grave after Christ's resurrection (Matt. xxvii. 53) and related their story to Annas, Caiaphas, Nicodemus, Joseph, and Gamaliel.

Rabban Simeon, whose grandmother was of the family of David, succeeded his father Hillel as president of the Sanhedrin about A. D. 13 (Ptol., Lexicon Rabb. p. 637). and his son Gamaliel was the Pharisee at whose feet St. Paul was brought up (Acts xxii. 3). A Jewish writer specially notes that no record of this Simon is preserved in the Mishna (Lightfoot, Horae Heb. Luke ii. 25). It has been conjectured that he (Prideaux, Connection, anno 37, Michaelis) or his grandson (Schuhain, Horae Heb. Luke ii. 25) of the same name, may be the Simeon of St. Luke. In favor of the identity it is alleged that the name, residence, time of life, and general character are the same in both cases; that the remarkable silence of the Mishna, and the counsel given by Gamaliel (Acts v. 38), connotes a suspicion of an inclination on the part of the family of the Rabban towards Christianity. On the other hand, it is argued that these facts fall far short of historical proof; and that Simon was a very common name among the Jews, that St. Luke would never have introduced so celebrated a character as the President of the Sanhedrin merely as "a man in Jerusalem," and that his son Gamaliel, after all, was educated as a Pharisee. The question is discussed in Witsius, Miscellanea Sacra, i. 21, §§ 14–16. See also Wolf, Cleo Philologise, Luke ii. 25, and Bibl. Hebr. ii. 682.

5. A V. "residential." See MEUMON.

# SIM'£ON NIGER. 

Acts xiii. 1. [NIGER.]

SIM'EON NIGER. Acts xiii. 1.
Simon. [Σωζάπιον: Simon.] A name of frequent occurrence in Jewish history in the post-Rabbinic period. It is doubtful whether it was borrowed from the Greeks, with whom it was not uncommon, or whether it was a contraction of the Hebrew Shimion. That the two names were regarded as identical appears from 1 Macc. ii. 65. Perhaps the Hebrew name was thus slightly altered in order to render it identical with the Greek, 1. Son of Mattathias. [Maccabees, § 4, vol. ii. p. 171.]

2. Son of Onias the high-priest (τάγος ο Ποιιος), whose eulogy closes the "praise of famous men" in the book of Ecclesiasticus (ch. i.), [Ecclesiasticus, vol. i. p. 651.] Fritzsch, whose edition of Ecclesiasticus (Exeg. Handb.) has appeared (1869) since the article referred to was written, maintains the common view that the reference is to Simon II., but without bringing forward any new arguments to support it, though he strangely underestimates the importance of Simon I. (the Just). Without haying undue stress upon the traditions which attached to this name (Hertzfeld, Gesch. i., iv. 195), it is evident that Simon the Just was popularly regarded as closing a period in Jewish history, as the last teacher of the great Synagogue." You believe him to have been Simon the one who laid the title "the Just" was given. Hertzfeld (i. 377, 378) has endeavored to prove that it belongs to Simon II., and not to Simon I., and in this he is followed by Jost (Gesch. d. Judenth., i. 95). The later Hebrew authorities, by whose help the question should be settled, are extremely unsatisfactory and confused (Jost, 110, &c.): and it appears better to adhere to the explanation of Josephus, who identifies Simon I. with Simon the Just (Ant. xii. 2, § 4, &c.), than to follow the Talmudic traditions, which are notoriously untrustworthy in chronology. The legends are connected with the title, and Hertzfeld and Jost both agree in supposing that the reference in Ecclesiastics is to Simon known as "the Just," though they believe this to be Simon II. (compare, for the Jewish anecdotes, Raphael's Hist. of Jews, i. 115-124; Pridie, Connexion, ii. 1.)

3. "A governor of the Temple" in the time of Seleucus Philopator, whose information as to the treasures of the Temple led to the sacrilegious attempt of Heliodorus (2 Macc. iii. 4, &c.). After this attempt failed, through the interference of the high-priest Onias, Simon accused Onias of conspiring (iv. 1, 2) and a bloody feud arose between their two parties (iv. 3). Onias appealed to the king, but nothing is known as to the result or the later history of Simon. Considerable doubt exists as to the exact nature of the office which he held (προστάτης του ἱεροῦ, 2 Macc. iii. 4). Various interpretations are given by Grimm (Exeg. Handb., ad loc.). The chief difficulties in the fact that Simon is said to have been the "ruler of the treasury of God" (δ ἡγίασμος ὀνόμα του θεοῦ [κυρίου], 1 Chr. ix. 11; 2 Chr. xxxi. 13; Jer. xx. 1) seems to have been always a priest, and the "captain of the Temple" (στρατηγὸς του ἱερου, Luke xxii. 4, with Lightfoot's note; Acts iv. 1, v. 24, 26) and the keeper of the treasures (2 Chr. xiii. 2; 2 Macc. xxii. 12) must have been at least Levites. Hertzfeld (Gesch. i., iv. 218) conjectures that Benjamin is an error for Menelaus, the head of a priestly house (Neh. xii. 5, 17). In support of this view it may be observed that Menelaus, the usurping high-priest, is said to have been a brother of Simon (2 Macc. iv. 23), and no intention is anywhere given that he was not of priestly descent. At the same time the corruption (if it exist) dates from an earlier period than the present Greek text, for "tribe" (φαναί) could not be used for "family" (οικος). The various reading γνωσμοι (regulation of the market) for παρανομαι (disorder, 2 Macc. iii. 4), which seems to be certainly correct, points to some office in connection with the supply of the sacrifices: and probably Simon was appointed to carry out the design of Menelaus, who (as is stated in the context) had undertaken to destroy the cost of them (2 Macc. iii. 3). In this case there would be less difficulty in a Benjamite acting as the agent of a foreign king, even in a matter which concerned the Temple-service. B. F. W.

4. Simon the Brother of Jesus. — The only unambiguously noticed of this Simon occurs in Matt. xxii. 55, Mark vi. 5, where, in common with James, Jesus, and Judas, he is mentioned as one of the brethren of Jesus. He has been identified by some writers with Simon the Canaanite, and still more generally with Symeon who became bishop of Jerusalem after the death of James, A. D. 62 (Euseb. H. E. iii. 11, iv. 22), and who suffered martyrdom in the reign of Trajan at the extreme eastern frontier of Asia. Here Symeon was laid, whose last testament (Euseb. H. E. iii. 32), in the year 107, or according to Burton (Lectures, ii. 17, note) in 104. The former of these opinions rests on no evidence whatever, nor is the latter without its difficulties. For in whatever sense the term "brother," is accepted — a vexed question which has been already amply discussed under BROTHER and JAMES, it is clear that neither Eusebius or the author of the so-called Apostolical Constitutions understood Symeon to be the brother of James, nor consequently the "brother of the Lord. Eusebius invariably describes James as "the brother" of Jesus (H. E. i. 12. ii. 1. 11, &c.), but Symeon as the son of Clopas, and the cousin of James (iii. 11, iv. 22), and the same distinction is made by the other author (Const. Apost. vi. 45).

5. Simon the Canaanite, one of the Twelve Apostles (Matt. x. 4; Mark iii. 18), otherwise described as Simon Zelotes (Luke vi. 15; Acts i. 13). The latter term (ζηλότης), which is peculiar to Luke, is the Greek equivalent for the Chaldee term a preserved by Matthew and Mark (καυρομενης, as in lect. rec. of papyrus, as in the Vulg.), and in the best modern editions. Each of these equally points out Simon as belonging to the faction of the Zealots, who were conspicuous for their fierce advocacy of the Mosaic ritual. The supposed references to Canaan (A. V.) or to Canna (Luther's version) are equally erroneous. (Canaanite.) The term καυρομενης appears to have survived the distinctive surname of Canaan ( Const. Apost. vi. 14, viii. 27). He has been frequently identified with Simon the brother of Jesus; but Eusebius (H. E. iii. 11) clearly distinguishes between the Apostles and the relations of Jesus. Still less likely is it that he was identical with Symeon, the second bishop of Jerusalem, as stated by Sophronius (App. ad Hieron. Cod.). Simon the Canaanite is reported, on the doubtful authority of the Pseudo-Dorotheus and of Nicophorus Callistus, to have preached in Egypt, Cyrene, and Mauritania (Burton's Lectures, i. 333, note), and,
on the equally doubtful authority of an annotation preserved in an original copy of the Apostolic Constitutions (viii. 27), to have been crucified in Judea in the reign of Domitian.

6. SIMON OF CYRENE. — A Hellenistic Jew, born at Cyrene on the north coast of Africa, who was present at Jerusalem at the time of the crucifixion of Jesus, either as an attendant at the feast (Acts ii. 10), or as one of the numerous settlers at Jerusalem from that place (Acts vi. 9). Meeting the procession that conducted Jesus to Golgotha, as he was returning from the country, i.e. was pressed into the service (ὑπάγων, a military term) to bear the cross (Matt. xxvii. 52; Mark xv. 21; Luke xxiii. 26), when Jesus himself was unable to bear it any longer (comp. John xix. 17). Mark describes him as the father of Alexander and Rufus, perhaps because this was the Rufus known to the Roman Christians (Rom. xvi. 13), for whom he especially wrote. The Basilidian Gnostics believed that Simon suffered in lieu of Jesus (Burnet's Lectures, ii. 64).

7. SIMON THE LEPER. — A resident at Bethany, Simon, he applied to himself the title "the leper," not from his having leprosy at the time when he is mentioned, but at some previous period. It is not improbable that he had been miraculously cured by Jesus. In his house Mary anointed Jesus preparatory to his death and burial (Matt. xxvi. 6, 7; Mark iv. 3, 6; John xii. 1, 3).\(^a\) Leucius was also present as one of the guests, while Martha served (John xii. 2): the presence of the brother and two sisters, together with the active part the latter took in the proceedings, leads to the inference that Simon was related to them: but there is no evidence of this, and we can attach no credit to the statement that he was their father, as reported on apocryphal authority by Nicethorus (H. E. i. 27), and still less to the idea that he was the husband of Mary. Simon the Leper must not be confounded with Simon the Pharisee mentioned in Luke vii. 40.

8. SIMON MAGUS. — A Samaritan living in the Apostolic age, distinguished as a sorcerer or "magician," from his practice of magical arts (μαγείας, Acts vili. 9). His history is a remarkable one: he was born at Gittón, a village of Samaria (Justin Apol. i. 70), identified with the modern Kurnejet Gheleh near Nablous (Dodd's Biblical Atlas, ii. 308, note). He was probably educated at Alexandria (as stated in Clement. Rom. ii. 22), and there became acquainted with the eclectic tenets of the Gnostic school. Either then or subsequently he was a pupil of Didymus, who preceded him as a teacher of Gnosticism in Samaria, and whom he supplanted with the aid of Cleobius (Constitut. Apostol. vi. 8). He is first introduced to us in the Bible as practicing magical arts in a city of Samaria, perhaps Sychar (Acts viii. 5; comp. John iv. 5), and with such success, that he was pronounced to be "the power of God is called great" (Acts viii. 10). The preaching and miracles of Philip having excited his observation, he became one of his disciples, and received baptism at his hands. Subsequently he witnessed the effect produced by the imposition of hands, as practiced by the Apostles Peter and John, and, being desirous of acquiring a similar power for himself, he offered a sum of money for it. His object evidently was to apply the power to the prosecution of magical arts. The motive and the means were equally to be repudiated; and his proposition met with a severe denunciation from Peter, followed by a petition on the part of Simon, the tenor of which lespecque terror but not penitence (Acts viii. 9-24). The history of his peculiar guilt has been perpetuated in the Church, and is applied to all similar spiritual offices. Simon's history, subsequently to his meeting with Peter, is involved in difficulties. Early church historians depict him as the pernicious foe of the Apostle Peter, whose movements he followed for the purpose of seeking encounters, in which he was signally defeated. In his journeys he was accompanied by a female named Helene, who had previously been a prostitute at Tyre, but who was now elevated to the position of his φάτουρα or divine intelligence (Justin Martyr, Apol. i. 25; Euseb. H. E. ii. 13). His first encounter with Peter took place at Caesarea Stratonis (according to the Constitutions Apostolic, vii. 8), whence he followed the Apostle to Rome. Eusebius makes no mention of this first encounter, but represents Simon's journey to Rome as following immediately after the interval recorded in Scripture (H. E. ii. 14); but his chronological statements are evidently confused; for in the very same chapter he states that the meeting between the two at Rome took place in the reign of Claudius, some ten years after the events in Samaria. Justin Martyr, who is the author of the account, represents Simon as having visited Rome in the reign of Claudius, and omits all notice of an encounter with Peter. His success there was so great that he was deified, and a statue was erected in his honor, with the inscription "Simon Descantus" (Apol. i. 26, 50)\(^b\).

\(^a\) On the chronological difficulty relating to the time of the feast in Simon's house see vol. ii. p. 1372, note a (Amer. ed.).

\(^b\) Some doubt has been thrown on Justin's statement from the fact that Josephus (Ant. xx. 7, § 2) mentions a reputed magician of the same name and about the same date, who was born in Cyprus. It has been suggested that Justin borrowed his information from this source, and mistook Citium, a town of Cyprus, for Gittón. If the writers had respectively used the gentile forms Kermic and Terreric, the similarity would have favored such an idea. But neither does Josephus mention Citium, nor yet does Justin use the gentile form. It is far more probable that Josephus would be wrong than Justin, in any point relating to the Maccabees.

\(^c\) The A. V. omits the word ἑλπιζεῖν, and renders the words "the great power of God." But this is to be the whole point of the designation. The Samaritans described the angels as ἐνέργειαι, b-βηγια, i.e. uncreating influences proceeding from God (Gieseler, Eccl. Hist. i. 48, note 9). They intended to distinguish Simon from such an order of beings by adding the words "which is called great," meaning thereby the source of all power, in other words, the Supreme Deity. Simon was recognized as the incarnation of this power, and not as a creature himself. It is the word ἑνεργεῖα, a "some great one" (Acts vii. 9); or to use his own words (as reported by Jerome, on Matt. xxiv. 5). "Ego sum sanus Dei, ego sum speiosus, ego Parchiesius, ego Ephraemius, ego omnis Dei."\(^d\)

\(^d\) See the Didascaliae, as embodied in Helenus's permutation, as recognizing the dualistic element of Gnosticism, derived from the Manichean system. The Gnostics appear to have recognized the ἐνέργειαι and the ἐνέργος, as the two forms in which power which proceeds from God who is uncreated. Simon and Helenia were the incarnation in which these principles resided.

\(^e\) Justin's authority has been impugned in regard to this statement, on the ground that a tablet was discovered in 1574 on the Tabernacle Walrus, which answers
SIMON CHOSAMEUS

The above statements can be reconciled only by assuming that Simon made two expeditions to Rome, the first in the reign of Claudius, the second, in which he encountered Peter, in the reign of Nero. The reason for this is given by Justin (I. xii. 68) the business of the latter was the matter of the impost of the Jews, and it is even possible that this was the subject of the former. Simon was last heard of in the year 108, and the first statement is probably not to be accepted. The same is true of the second, but it is possible that he may have been mistaken in the matter of his death. In any case, the statement is to be taken with reservation.

SIMONIS (Simonis) [watchful]: Φυλακαρις (Semur). Properly "Shimri," son of Hoshe, a Merarite Levite in the reign of David (I Chr. xxvi. 10). Though not the first-born, his father made him the head of the family. The LXX. read Σεμωνος, shimdur, "guards."  

SIN (Σιν [sine]: Simon, Simon: [in ver. 15, Alex. Tatian] Pelasgian), a city of Egypt, mentioned only by Ezekiel (xlvi. 18, 16). The name is Hebrew, or, at least, Semitic. Gesenius supposes it to signify "clay," from the unused root יק (q-v), "probably he or he was muddy, clayey." It is identified in the Vulg. with Pelasgum, Πελασχ, "the clayey or muddy country, town, from πηλαχς; and seems to be preserved in the Arabic Et-Tenech,  

Σίνα, Περεμονι, Περεμονι (the second being a variation held by Quatremère to be incorrect), and Βαπεμονι, of the Copts, of the Arabs, which was in the time of the former a boundary-city, the limits of a governor's authority being stated to have extended from Alexandria to Philæ, and Peremon (Acts of St. Sarapammon MS. Copt. Vit. 67, fol. 90, ap. Quatremère, MémoiresSEG, etHist. sur l'Égypte, i. 259). Champollion ingeniously derives his name from the article Φ, ΦΠ, "to be," and ΩΜ, "mud" (L'Égypte, ii. 82-87; comp. Brugsch, Geogr. Inscr. i. p. 207). Brugsch compares the ancient Egyptian HA-REM, which he reads Pe-rema, on our system, PE-REM, "the abode of the terr.," or "of the fish terr." (Geogr. Inscr. i. l. c. pl. iv. 1679). Pelasgum, he would make the city SAMHAT (or, as he reads it Sām-hād), remarking that "the name of the city Sanhad" is the only one which has the determinative of a city, and, comparing the evidence of the Roman nome-coins, on which the place is apparently treated as a name; but this is not certain, for there may have been a Pelasgic nome, and the etymology proposed at Rome for the eye of a Roman emperor; and that the mistake should be repeated by other early writers who have knowledge of Latin is unquestioned (Irenæus, Adv. Haer. i. 20; Tertullian, Apol. 18),—these assumptions form a series of improbabilities, amounting almost to an impossibility. [See Norton's Evidence of the Term, of the Gospel, 2d ed., vol. ii. pp. iii-xxxii. (Addit. Notes)].

A this later date is to a certain extent confirmed by the account of Simon's death preserved by Hippolytus (Adv. Her. vi. 20); for the event is stated to have occurred while Peter and Paul (the term ωσότως evidently implying the presence of the latter) were together at Rome.
of the name SAMHAT is unknown (Id. p. 128; Pl. xxviii. 17).

The site of Pelusium is as yet undetermined. It has been thought to be marked by mounds near Baryt et-Teneh, now called El-Farawit and not et-Teneh. This is disputed by Captain Spratt, who supposes that the mound of Aboo-Khreya indicates where it stood. This is further inland, and apparently on the west of the old Pelusiac branch, as was Pelusium. It is situate between Faizma and Tel-Djemench. Whatever may have been its exact position, Pelusium must have owed its strength not to its present elevation, but to its being placed in the midst of a plain of marshes and mud, never easy to traverse. The ancient sites in such alluvial tracts of Egypt are in general only sufficiently raised above the level of the plain to preserve them from being injured by the inundation.

The antiquity of the town of Sin may perhaps be inferred from the mention of "the wilderness of Sin" in the journeys of the Israelites (Ex. xxvi. 1; Num. xxxiii. 11). It is remarkable, however, that the Israélites did not immediately enter this tract on leaving the cultivated part of Egypt, so that it is held to have been within the Sinaitic peninsula, and therefore it may take its name from some other place or country than the Egyptian Sin.

Pelusium is mentioned by Ezekiel, in one of the prophecies relating to the invasion of Egypt by Nebuchadnezzar, as one of the cities which should then suffer calamities, with, probably, reference to their later history. The others spoken of are Noph (Memphis), Zoon (Tanis), No (Thebes), Aven (Helcopolis), Pi-beseth (Bubastis), and Tebhaphnehes (Daphne). All these, excepting the two ancient capitals, Thebes and Memphis, lay on or near the eastern boundary; and, in the approach to Memphis, an invader could scarcely advance, after capturing Pelusium and Daphne, without taking Tanis, Bubastis, and Helcopolis. In the most ancient times Tanis, as afterwards Pelusium, seems to have been the key of Egypt on the east. Bubastis was an important position from its holy mounds, and Helcopolis as securing the approach to Memphis. The prophet speaks of Sin as "the stronghold of Egypt" (ver. 15). This place it held from that time until the period of the Romans. Herodotus relates that Sennacherib advanced against Pelusium, and that near Pelusium Cambyses defeated Psammeutus. In like manner the decisive battle in which Cambyses defeated the first native king, Nesbanebos, NERKIT-NEB, was fought near this city. It is perhaps worthy of note that Ezekiel twice mentions Pelusium in the prophecy which contains the remarkable and signally-fulfilled sentence:

"There shall be no more a prince of the kind of Egypt" (ver. 13). As he saw the long train of calamities that were to fall upon the country, Pelusium may well have stood out as the chief place of her successive ramifications. Two Persian conquests, and two submissions to strangers, first to Alexander, and then to Augustus, may explain the special misery foretold of this city: "Sin shall suffer great anguish" (ver 16).

We find in the Bible a geographical name, which has the form of a gent. noun derived from Sin, and is usually held to apply to two different nations, neither connected with the city Sin. In the list of the descendants of Noah, the Sinite, "SIN," occurs among the sons of Canaan (Gen. x. 17; 1 Chr. i. 15). This people, from its place between the Arkite and the Arvadite has been supposed to have settled in Syria north of Palestine, where similar names occur in classical geography and have been alleged in confirmation. This theory would not, however, necessarily imply that the whole tribe was there settled, and the supposed names of the name are by no means conclusive. On the other hand, it must be observed that some of the eastern towns of Lower Egypt have Hebrew as well as Egyptian names, as Helcopolis and Tanis: that those very near the border seem to have borne only Hebrew names, as Migdol; so that we have an indication of a Semitic influence in this part of Egypt, diminishing in degree according to the distance from the border. It is difficult to account for this influence by the single circumstance of the Shepherd invasion of Egypt, especially as it is shown yet more strikingly by the remarkably strong characteristics which have distinguished the inhabitants of northeastern Egypt from their fellow-countrymen both of the land of Herodotus, and of the Tartis of our own. And we must not pass by the statement of the former of these writers, that the Palestine Syrians dwelt westward of the Aravians to the eastern boundary of Egypt (iiii. 5, and above p. 2736, note a). Therefore, it does not seem a violent hypothesis that the Sinites were connected with Pelusium, though their main body may perhaps have settled much further to the north. The distance is not greater than that between the Hittites of southern Palestine and those of the valley of the Orontes, although the separation of the less powerful Hittites into those dwelling beneath Mount Hermon and the inhabitants of the small confederacy of which Gibea was apparently the head, is perhaps nearer to our supposed case. If the Wilderness of Sin owed its name to Pelusium, this is an evidence of the very early importance of the town and its connection with Arabia, which would perhaps be strange in the case of a purely Egyptian town. The conjecture we have put forth suggests a recurrence to the old explanation of the famous mention of "the land of Sinim," סינים, in Isaiah (xlv. 12), supposed by some to refer to China. This would appear from the context to be a very remote region. It is mentioned after the north and the west, and would seem to be in a southern or eastern direction. Sin is certainly not remote, nor is the supposed place of the Sinites to the north of Palestine: but the expression may be proverbial. The people of Pelusium, if of Canaanite origin, were certainly remote compared to most of the other Canaanites, and were separated by alien peoples, and it is also noticeable that they were to the northeast of Palestine. As the sea bordering Palestine came to designate the west, as in this passage, so the land of Sinim may have passed into a proverbial expression for a distant and separated country. See, however, SINIT, SXMN.

R. S. P.

SIN, WILDERNESS OF (סינא, מדבר סין) [Vat. סינא: desertum Sin]. The very insufficient map. In M. Lhuant's map we cannot discover Aboo-Khreya (Persean de l'Istane de Sina, Atlas, Carte Topographique).
The **Trespass-offering** (נֵשָׁבָּה: נֵשָׁבָּה) is closely connected with the sin-offering in Leviticus, but at the same time clearly distinguished from it, being in some cases offered with it as a distinct part of the same sacrifice: as, for example, in the cleansing of the leper (Lev. xiv.). The victim was in each case to be a ram. At the time of offering, in all cases of damage done to any holy thing, or to any man, restitution was made with the addition of a fifth part to the principal; the blood was sprinkled round about upon the altar, as in the burnt-offering: the fat burnt, and flesh disposed of as in the sin-offering. The distinction of ceremonial clearly indicates a difference in the idea of the two sacrificial offerings.

The nature of that difference is still a subject of great controversy. Looking first to the derivation of the two words, we find that נֵשָׁבָּה is derived from נֵשָׁבָּה, which is, properly, to "miss" a mark, or to "err" from a way, and secondarily to "sin," or to incur a "penalty,"; that נֵשָׁבָּה is derived from the root נֵשָׁבָּה, which is properly to "fall," having for its "primary idea negligence, especially in guilt" (Ges.). It is clear that, so far as derivation goes, there appears to be more reference to general and actual sin in the former, to special cases of negligence in the latter.

Turning next to the description, in the book of Leviticus, of the circumstances under which it is offered, we find one important passage (Lev. v. 1-13) in which the sacrifice is called first a "trespass-offering" (ver. 6), and then a "sin-offering" (vv. 7, 9, 11, 12). But the nature of the victims in ver. 6 agrees with the ceremonial of the latter, not of the former; the application of the latter name is more emphatic and reiterated; and there is at ver. 14 a formal introduction of the law of the trespass-offering, exactly as of the law of the sin-offering in iv. 1. It is therefore safe to conclude that the word נֵשָׁבָּה is not here used in its technical sense, and that the passage is to be referred to the sin-offering only.

We find, then, that the sin-offerings were—

**1. Regular.**

*For the whole people,* at the New Moon, Passover, Pentecost, Feast of Trumpets, and Feast of Tabernacles (Num. xxviii. 15-xxix. 38), besides the solemn offering of the two goats on the Great Day of Atonement (Lev. xvi.).

**2. For the Priests and Levites at their consecration (Ex. xxix. 10-14, 36); besides the yearly sin-offering (a bullock) for the high-priest on the Great Day of Atonement (Lev. xvi.).*

**B. Special.**

*1. For any sin of "ignorance" against the law.*

The term "ignorance" against the law probably means (as in the Vulg. and A. V.) "sin." The fact that it is never used in application to any other sacrifice in Genesis or Exodus, alone makes the translation "sin-offering" here very improbable.

To these may be added the sacrifice of the red heifer (conducted with the ceremonial of a sin-offering), from the ashes of which was made the "water of separation," used in certain cases of ceremonial pollution. See Num. xix.
SIN-OFFERING

commandment of the Lord, on the part of priest, people, rabbis, or private man (Lev. iv. 16, 18).

2. For refusal to bear witness under adjuration (Lev. v. 1).

3. For ceremomial defilement not willfully contracted (Lev. v. 2, 3), under which may be classed the offerings at the purification of women (xii. 6-8), at the cleansing of lepers (xix. 24, 31), or the uncleanness of men or women (xv. 15, 30), on the defilement of a Nazarite (Num. vi. 11-13) or the expiration of his vow (ver. 16).

4. For the breach of a yovel oath, the keeping of which would involve sin (Lev. v. 4).

The trespass-offerings, on the other hand, were always special, as —

1. For sacrifice "in ignorance," with compensation for the harm done, and the gift of a fifth part of the value besides to the priest (Lev. v. 10, 16).

2. For ignorant trespassing against some definite prohibition of the Law (v. 17-19).

3. For fraud, suppression of the truth, or perjury against man, with compensation, and with the addition of a fifth part of the value of the property in question to the person wronged (vi. 1-6).

4. For rope of a betrothed slave (Lev. xiv. 20, 21).

5. At the purification of the leper (Lev. xiv. 12), and the polluted Nazarite (Num. vi. 12), offered with the sin-offering.

From this enumeration it will be clear that the two classes of sacrifices, although distinct, touch closely upon each other, as especially in B (4) of the trespass-offering, and (2) of the trespass-offering. It is also evident that the sin-offering was the only regular and general recognition of sin in the abstract, and accordingly was far more solemn and symbolical in its ceremonial: the trespass-offering was confined to special cases, most of which related to the doing of some material damage, either to the holy things or to man, except in (5), where the trespass-offering is united with the sin-offering.

Josephus (Ant. iii. 9, § 3) declares that the sin-offering is presented by those "who fall into sin in ignorance" (κατά ἀγνώρια), and the trespass-offering by "one who has sinned and is conscious of his sin, but has no one to convict him thereof." From this it may be inferred (as by Winer and others) that the former was used in cases of known sin against some definite law, the latter in the case of secret sin, unknown, or, if known, not liable to judicial cognizance. Other opinions have been entertained, widely different from, and even opposed to one another. Many of them are given in Winer's Recht. des Schuldbörfers. The opinions which suppose one offering due to sins of omission, and the other for sins of commission, have no foundation in the language of the Law. Others, with more plausibility, refer the sin-offering to sins of pure ignorance, the trespass-offering to those of a more sinful and deliberate character; but this does not agree with Lev. v. 17-19, and is contradicted by the solemn contrast between sins of ignorance, which might be atoned for, and "sins of presumption," against which death without atoning was denounced in Num. xv. 30. A third opinion supposes the sin-offering to refer to sins for which no material and earthly atonement could be made, the trespass-offering to those for which material compensation was possible.

This theory has something to support it in the fact that in some cases (see Lev. v. 15, 18, vi. 1-6) compensation was prescribed as necessary to the sacrifice. Others seek more reconcile distinctions, supposing (e. g.) that the sin-offering had for its object the cleansing of the sanctuary or the commonwealth, and the trespass-offering the cleansing of the individual; or that the former referred to the effect of sin upon the soul itself, the latter to the effect of sin as the breach of an external law. Without attempting to decide so difficult and controverted a question, we may draw the following conclusions: —

First, that the sin-offering was far more solemn and comprehensive of the two sacrifices. Secondly, that the sin-offering looked more to the guilt of the sin done, irrespective of its consequences, while the trespass-offering looked to the evil consequences of sin, either against the service of God, or against man, and to the duty of atonement, as far as atonement was possible. Hence the two might with propriety be offered together.

Thirdly, that in the sin-offering especially we find symbolized the acknowledgment of sinfulness as inherent in man, and of the need of expiation by sacrifice to renew the broken covenant between man and God.

There is one other question of some interest, as to the nature of the sins for which either sacrifice could be offered. It is seen at once that in the Law of Leviticus, most of them, which are not purely ceremonial, are called sins of "ignorance" (see Heb. ix. 7); and in Num. xv. 30, it is expressly said that while such sins can be atoned for by offerings, "the soul that doeth such unpardonably" (Heb. with a high hand) "shall be cut off from among his people." . . . "His iniquity shall be upon him" (comp. Heb. xix. 20). But there are sufficient indications that the sins here called "of ignorance" are more strictly those of "negligence" or "fidelity," a repented of by the unpunished offender, as opposed to those of deliberate and irrepentent sin. The Hebrew word הָאֶבֶדָה and the various derivations as so used in Ps. cxxii. 67 (παιμαμεισαρα, I.X.X.); I Sam. xxvi. 21 (ἀγνώρια); Ps. xix. 13 (παραστάτημα); Job xix. 4 (παλαιός). The words ἀγνώρια and ἀγνώρεια have a corresponding extent of meaning in the N. T.: as when, in Acts iii. 17, the Jews, in their crucification of our Lord, are said to have acted κατά ἀγνώρια; and in Eph. iv. 18; 1 Pet. i. 14, the views of heathens, done against the knowledge of conscience, are still referred to ἀγνώρεια. The use of the word (like that of ἀγνώρεια in classical Greek) is found in all languages, and depends on the idea that goodness is man's true wisdom, and that sin is the failing to recognize this truth. If from the word we turn to the sins actually referred to in Lev. iv., we find some which certainly are not sins of pure ignorance; they are indeed few out of the whole range of sinfulness, but they are real sins. The later Jews (see Outram, De Sacrific.ii.) limited the application of the sin-offering to negative sins, sins in ignorance, and sins in action not in thought, evidently conceiving it to apply to actual sins, but to sins of a secondary order.

In considering this subject, it must be remembered that the sacrifices of the Law had a temporal, —

"a From the root גֶּפֶן or גָּפֶן, signifying a "wander out of the way," cognate in sense to the root of the word ἀγνώρια.
SINA, MOUNT (A. B. 3051

as well as a spiritual significance and effect. They restored an offender to his place in the commonwealth of Israel; they were therefore an atonement to the king of Israel for the infringement of his law. It is clear that this must have limited the extent of their legal application; for there are crimes for which the interest and very existence of a society demand that there should be no pardon. But so far as the sacrifices had a spiritual and typical meaning, so far as they were sought by a repentant spirit as a sign and means of reconcilement, with God and man, it may be doubted that they had a wider scope and a real spiritual effect so long as their typical character remained. [See Sacrifice.]

For the more solemn sin-offerings, see DAY OF ATONEMENT; LEPROSY, etc.

SINA, MOUNT (τὸ Ἱορατόν Σινᾶ; [Vat. Sin. Alex. in Jud., Σιναί:  nod $Sin]$). The Greek form of the well-known name which in the O. T. universally, and as often as not in the Apoc. and N. T., is given in the A. V. Sinai. Sinai occurs Jud. v. 14; 9, Acts viii, 30, 38.

SINAI [2 xlv.] (Sinai) [ʃdʒæould, full of clefts, Furtado; Σινά; [Vat. 3 Σιναί: $Sin$]. Nearly in the centre of the peninsula which stretches between the horns of the Red Sea lies a wedge of granite, granite, and porphyry rocks, rising to between 9,000 and 10,000 feet above the sea. Its shape resembles a scalene triangle, with a crescent cut from its northern or longer side, on which border Rüppell's map gives a broad, skirted tract of old red sandstone, reaching nearly from gulf to gulf, and traversed by a few ridges, chiefly of a tertiary formation, running nearly N. and S. E. (on the S. W. side of this triangle, a wide alluvial plain—narrowing, however, towards the N.—lines the coast of the Gulf of Suez, whilst that on the eastern or Aklalah coast is so narrow as almost to disappear. Between these alluvial edges and the granite mass a strip of the same sandstone is interpolated, the two strips converging at Ras Mohamed, the southern promontory of the whole. This nucleus of phallic rocks is said to bear no trace of volcanic action since the original upheaval of its masses (Stanley, pp. 21, 22). Lacroix (Travels, p. 105) thought he detected some, but does not affirm it. Its general configuration runs into neither ranges nor peaks, but is that of a plateau cut across with intersecting wadies, which spring the cliffs and mountain peaks, beginning with a very gradual and terminating in a very steep ascent. It has been arranged (Stanley, 3, $\Pi$, p. 11) in three chief masses as follows:—

1. The N. W. cluster above Wadi Felita; its greatest relief found in the five-peaked ridge of Serbel, at a height of 6,042 feet above the sea. (For an account of the singular natural basin into which the waters of this portion of the mountain mass are received, and its probable connection with Scriptural topography, see Raphidim.)

2. The eastern and central one; its highest point the Jebel Katheria, at a height of 8,063 (Rüppell) to 8,168 (Russegger) feet, and including the Jebel Mous, the height of which is variously set by Schubert, Rüppell, and Russegger) at 6,790, 7,063, and 7,097 feet.

3. The S. E. one, closely connected, however, with 2; its highest point, Umm Sharwater, being that also of the whole.

The three best-named peaks all lie very nearly in a line of about 9 miles drawn from the most northerly of them, Musa, a little to the W. of S.; and a perpendicular to this line, traced on the map westwards for about 20 miles, nearly traverses the whole length of the range of Serbel. These lines show the area of greatest relief for the peninsula, nearly equidistant from each of its embracing gulfs, and also from its northern base, the range of el-Tih, and its southern apex, the Ras Mohamed.

Before considering the claims of the individual mountains to Scriptural notice, there occurs a question regarding the relation of the names Horeb and Sinai.

The latter name first occurs as that of the limit on the further side from Egypt of the wilderness of Sin (Ex. xvi. 1), and again (xix. 1) 2 as the "value" or "name" of the mountain. Mount Sinai is actually spoken of, as in ver. 11 soon after we find it. But the name "Horeb" is, in the case of the rebuke of the people by God for their sin in making the golden calf, reintroduced into the Sinaitic narrative (xxviii. 6), having been previously most recently used in the story of the murmuring at Rephidim (xvii. 6), and will stand before them there upon the rock in Horeb," and earlier as the name of the scene of the appearance of God in the "burning bush" (iii. 1). Now, since Rephidim seems to be a desert stage apart from the place where Israel "camped before the mount" (Sina, xix. 2), it is not easy to account for a Horeb at Rephidim, apparently as the specific spot of a particular transaction (so that the reference of a "general" name Horeb, contracted with Sinai as a special one, is cut off), and a Horeb in the Sinaitic region, apparently a synonym of the mountain which, since the scene of the narrative is fixed at it, had been called Sinai. Lupinio removes the difficulty by making Serbel Sinai, but against this it will be seen that there are even stronger objections. But a proper name given from a natural feature may recur with that feature. Such is "Horeb," properly signifying "ground left dry by water draining off." Now both at Rephidim and at Kadesh Meribah, where was the "fountain of judgment" (Gen. xiv. 7), it is expressly mentioned that there was no water; and the inference is that some ordinary supply, expected to be found there, had failed, possibly owing to drought. The rock in Horeb" was (Ex. xvii. 6) what Moses

a In this passage the present Greek text of both MSS. reads εἰκόνος, not ὅποιος, τὸν Σιναί. But the note in the margin of the A. V. of 11 is, notwithstanding, wrong,— "Greek, into the way of the wilderness of Sinai." That word belongs to the Vulg. decret. Sina montis occuparentur.

b See Robinson's "Mémoire on the Maps" (vol. iii Appendix I, pp. 3, 32-33), a most important comment on the different sources of authority for different portions of the region, and the weight due to each, and containing a just caution regarding the indications of surface aspect given by Labore.}

SINAI

3051

e Dr. Stanley (p. 77) notices another "very high mountain S. W. of Un-Stiin," apparently calculated by Rüppell to be the highest in the peninsula, possibly that called by Burchardus Thuanar, or ibid. "Ragal." But this seems only to effect an extension of the area of the relief in the direction indicated.

d Dr. Stanley has spoken of two of the three passages in Exodus in which Horeb occurs (ii. 1, xvii. 6) as "doubtful," and of the third (xxviii. 6) as "anag. in author," the latter does not say on what ground (S. F. 9, p. 26, note).
smote. It probably stood on the exact spot where the water was expected to be, but was not. Now Lepsius ([Tour, April 22, transl. by Cottrell, p. 74]) found in Wady Feiran, which he identifies with Rephidim, singular alluvial beds of earth which may have once formed the bottom of a lake since dried. If this was the scene of the miracle [see REPHIDIM], the propriety of the name Horeb, as applied to it, becomes clear. Further, in all the places of Deut. where Horeb is found [see HOREB], it seems to be used in reference to the people in the place where they stood to receive, rather than whence God appeared to give the Law, which is apparently in the same book of Deut. indicated by Sinai (xxxiii. 2); and in the one remaining passage of Exod., where Horeb occurs in the narrative of the same events, it is used also in reference to the people (xxxiii. 6), and probably refers to what they had previously done in the matter of the golden calf (xxxi. 2, 3). If this be accepted, there remains in the Pentateuch only Ex. iii. 1, where Moses led the flocks of Jethro to "the mountain of God, to Horeb," but this form of speech, which seems to identify two local names, is sometimes not a strict apposition, but denotes an extension, especially where the places are so close together that the writer tacitly recognizes them as one. Thus Horeb, as Sinai, is of a prominence perhaps be fixed in, valley, or led of a wady near the mountain; and yet Mount Horeb, on the "vast green plain" of which was doubtless excellent pasture, may mean the mountain viewed in reference thereto, or its site, abutting thereon. The mention of Horeb in later books (e. g. I K. viii. 9, xix. 8) seems to show that it had then become the designation of the mountain and valley. Further, the spot where the people themselves took part in the greatest event of their history would naturally become the popular name in later designations of that event. "Thou stoodest before the Lord thy God in Horeb" was a literal fact, and become the great basis of all traditions of it. By this they recognized that they had been brought into covenant with God. On the mountain, in Deut. ix. 19, we read, "They came down upon Mount Sinai." But beyond the question of the relation which these names mutually bear, there remains that of their site. Sinai is clearly a summit distinctly marked. Where are we to look for it? There are three principal views in answer to this question:—

I. That of Lepsius, above mentioned, favored also by Borchardt ([Tour, p. 680]), that Sinai is Sinai, some 30 miles distant westward from the Jebel Mısır, but close to the Wady Feiran and el Hossor, which he identifies, as do most authorities, with Rephidim (Lepsius, p. 74), just a mile from the old convent of Farra. On this view Israel

would have reached Sinai the same day that they fought with Amalek: "the decampment occurred during the battle" (ibid., p. 86)—an unlikely thing, since the contest was evidently fierce and close, and lasted till sunset. Serbal is the most magnificent mountain of the peninsula, rising with a crown of five peaks from the maritime plain on one side, and from the Wady Feiran on the other, and showing its full height at once to the eye; and Ritter (Geogr. xiv. 734-736) has suggested that it might have been before the actual Exodus, known as "the mount of God" to the Amalekites and Arabs, and even to the Egyptians. The earliest traditions are in its favor. "It is undoubtedly identified with Sinai by Ensehis, Jerome, and Cosmas, that is, by all known writers to the time of Justinian," as confirmed by the position "of the episcopal city of Parun at its foot" (Stanley, S. & P. p. 40).

But there are main objections to this: (1.) It is clear, from Ex. xiv. 2 (comp. xvii. 1), that the interval between Rephidim and Sinai was that of a regular stage of the march. The expressions in the Hebrew are those constantly used for decamping and encamping in the books of Ex., Num., and Deut.: and thus a Sinai within a mile of Rephidim is unsuitable. (2.) There is no plain or wady of sufficient size, nor even earth to form a ground to so large a host, or perhaps the tenth part of them. Dr. Stewart (The Tent and the Khan, p. 146) contends for Serbal as the real Sinai, seeking to obviate objection (1), by making Rephidim "no higher up than Heshbon" [REPHEIM], and (2), by regarding Wady Albot and Wady Room as spacious enough for the host to camp in (ibid., p. 145); a very doubtful assertion.

II. The second is that of Ritter, that, allowing Serbal the reverence of an early sanctuary, the Jebel Mısır is Sinai, and that the Wady es-Serbal, which its S. E. or highest summit overhangs, is the spot where the people camped before the mount; but the second objection to Serbal applies almost in equal force to this—the want of space below; the wady is "rough, uneven, and narrow" (Stanley, S. & P. p. 76); and there seems no possibility of the people's "moving (Ex. xx. 18) and standing afar off," and yet preserving any connection with the scene. Further, this site offers no such feature as a "brook that descended out of the mount" (Deut. ix. 21).

III. The third is that of Robinson, that the modern Horeb of the monks—namely, the N. W. and lower face of the Jebel Mısır, crowned with a range of magnificent cliffs, the highest point called Rûn Sassafich, or Sisadhfe, as spelled by Robinson—overlooking the plain erb-Rahab, is the scene of the giving of the Law, and that peak the mountain into which Moses ascended. In this view, also, Struves appears to coincide (Sinai is "Gebir") with, but without much force, since he himself climbed it, that the peak Sassafich

a Robinson, on the other hand (L. 78, 79), suggests that Sassafich el-Khandim or el-Chadem, lying north of Serbal, was a place of pilgrimage to the ancient Egyptians, and a supposed object of Moses' "three days' journey into the wilderness." But that pilgrimage was an element in the religion of ancient Egypt seems at least doubtful.

b So Dr. Stewart (The Tent and the Khan, p. 147) in his plan. The place was a playground of children long before the passage of the children of Israel is extremely probable. He renders the name by "Lord Israel."
s nearly inaccessable. It is more to the purpose to observe that the whole Jebel Musa is, comparatively with adjacent mountains, insignificant; its prospect limited in the east, south, and west, by higher mountains" (Rupprecht, quoted by Robinson, i. 109, note; comp. Seetzen, Relg., vol. ii. p. 301); that it is cone-shaped and almost circular. But the high ground of Serbal being rejected for the above reasons, and no voice having ever been raised in favor of the Un Shouma, the highest point in the peninsula, lying S. W. of the Musa, some such secondary and overshadowed peak must be assumed.

The conjunction of mountain with plain is the greatest peculiarity of this site, and it is in the mountain, as compared with Serbal, but we gain in the plain, of which Serbal has nothing.

Yet the view from the plain appears by no means wanting in features of majesty and awe (S. & P. pp. 42, 43). Dr. Stanley remarked (S. & P. p. 43) some alluvial mounds at the foot of the cliff which exactly answered to the bounds set to restrain the people. In this long retiring sweep of er-Sebeb, the people could "remove and stand afar off;" for it extends into the lateral valleys, and so joins the Wady es-Shegh (ibid. p. 74). Here too Moses, if he came down through one of the oblique gullies which flank the Kis Suwefích on the N. and S., might not see the camp, although he might catch its noise, till he emerged from the Wady ed-Deir, or the Wady Lejc, on the plain itself. In the latter, also, is found a brook in close connection with the mountain.

Still there is the name of the Jebel Musa belonging to the opposite or S. E. peak or precipice, overhanging es-Sebehey. Lepsius treats this as a monkish legend unknown before the convent; but there is the name Wady Shoumâlah (valley of Holubi or Jebel or Jethro), the Wady Lejc and Jebel Freïca (perhaps from the forms in Arabic legend of the names of his two daughters Liiyand Suwefïy; forming a group of Mosaic tradition. Is it not possible that the Jebel Musa, or loftiest southeastern peak of that block of which the modern Horeb is the lower and opposite end, may have been the spot which most directly leaving the people encamped in er-Sebebah below, from which its distance is not above three miles? That the spot is out of sight from that plain is hardly a difficulty, for "the mountain burning with fire to the midst of heaven" was what the people saw (Deut. iv. 11); and this would give a reasonable distance for the spot, somewhere midway, whereon the elders enjoyed a partial vision of God (Ex. xxiv. 9, 10).

 Tradition, no doubt in this case purely monkish, has fixed on a spot for Elijah's visit — the cave, to which he repaired; but one at Serbal would equally suit (S. & P. p. 49). That on the Jebel Musa is called the chapel of St. Elias. It has been thought possible that St. Paul may have vis-

SINAI

It may be added that, supposing Wady Tayibah to have been the actual spot, "by the sea," as stated in Num xxxiii. 19, three routes open there before the Israelites: the most southerly one (taken by Shawe and Pococke) down the plain el-Kûn to Tûr; the most northerly (Robinson's) by the Serbal el-Khouda (either of which would have led Serbal out of their line of march); and the middle one by Wady Ferâa, by which they would pass the foot of Serbal, which therefore in this case alone could possibly be Sinai (Stanley, S. & P. pp. 36, 37). Just east of the Jebel Musa, across the narrow ravine named Shoumâlah, lies ed-Deir, or the convent mountain, called also, from a local legend (Stanley, p. 46; Robinson, i. 98), "the Mount of the Burning Bush." Tradition has also fixed on a hollow rock in the plain of the Wady es-Shegh, on which the modern Horeb looks, as "the (nodule of) the head of the cow," i.e. in which the golden calf was shaped by Aaron. In the ravine called Lejc, parallel to Shoumâlah on the western side of the Jebel Musa, lies what is called the rock of Moses (see Rephidim); and a hole in the ground near, in the plain, is called, by manifest error, the "pit of Korah," whose catastrophe took place far away (Robinson, i. 113; Lepsius, p. 19).

The middle route aforesaid from W. Tayibah reaches the W. Fe'érânah through what is called the W. Makattâb, or "written valley," from the inscriptions on the rocks which line it, generally considered to have been the work of Christian hands, but whether those of a Christian people localized there at an unknown period, as Lepsius (p. 90) thinks, or of passing pilgrims, as is the more general opinion, is likely to continue doubtful.

It is remarkable that the names of the chief peaks seem all borrowed from their peculiarities of vegetation: thus Un Shouma (Jiyûd) means "mother of ferns;" Lâs Suwefîch (properly Sayfûnah, sâfûnah) is "willow-head," a group of two or three of which trees grow in the recesses of the adjacent wady; so Serbal is perhaps from jir-râsûây; and, from analogy, the name "Sinai," now unknown amongst the Arabs (unless Sena, given to the point of the Jebel Freïca, opposite to the modern Horeb (Stanley, p. 42), contain a trace of it), may be supposed derived from the ṣawâ' and  sûnâ', the tree of the Burning Bush. The

* It should be added that Rupprecht (Lepsius, p. 12) took Jebel Katharma for Horeb, but that there are fewer features in its favor, as compared with the history, than almost any other site (Robinson, i. 110).

* Though Dr. Stanley (S. & P. p. 36, note) states that he was "persuaded by Mr. Hogg, who tells me that it meets some of the special requirements."

* See the work of Professor Beers of Leipsic on this curious question. Mr. Forster's attempt (Voice of Israel from the Rocks of Sinai) to regard them as matters connected with the sacred symbols, by no means involves this ana

SINAI

vegetation of the peninsula is most copious at el-Wady, near Taf, on the coast of the Gulf of Suez, in the Wady Feiran [see Raphia], the two zones of its waste, and "in the nucleus of springs in the Gebel Mosa" (Stanley, p. 19). For a fuller account of its flora, see Wilderness of the Wandering. As regards its fauna, Section (iii. 20) mentions the following animals as found at el-Debely, near Sinai: the wild goat, the wader, ibex, fox, hare, gazelle, panther (rare), field-mouse (el-Dely, like a jerboa), and a rodent called el-Doby, which is eaten. H. II. +

The names Horeb and Sinai are used interchangeably. At the first Horeb had precedence, being "the mountain of God" to Moses prior to the giving of the Law (Ex. iii. 1, 12, iv. 27, xvii 5, xviii 5). Sinai is first mentioned after the battle of Rephidim (Ex. xix. 1, 2); and this name is thenceforth prominent until the breaking up of the encampment in that wilderness, as recorded in Num. x. 12. But in the recapitulation of this journey by Moses, Horeb is spoken of as the point of departure (Deut. i. 2, 6, 19). Horeb is named as the mountain from which "the Lord spake out of the midst of the fire," and upon which He wrote the ten commandments (Deut. iv. 16, 19). H. III.

In the Bible the references of the tribe to the desert in the golden calf (Deut. iv. 8). The covenant was made at Horeb (Deut. xxi. 1). In the books of Kings and Chronicles (1 K. vii. 9, xix. 8: 2 Chr vi. 10), Horeb is named as the scene of the Law: while in the Psalms both names are used for the same place; Sinai in Ps. lvi. 17, and Horeb Ps. cxv. 19. Mountains thus closely identified with those of Law and events of the past have been forgotten for apt; and the best solution of the Biblical usage in respect of these names appears to be that which makes Horeb the central mass or ridge, of which Sinai was a prominent peak. See Ritter, xiv. 745; Hengstenberg, Preussen, ii. 325; Robinson, i. 591; Kurtz, iii. 79; Kalsche, Comm. on Exodus. Benson, Bibliothek, gives the name Sinai to the group of which Sycamore and Jebel Sinai are peaks, and places Sinai opposite to Sjyfrf, on the northern side of the plain.

The Rev. F. W. Holland, Fellow of the Royal Geographical Society, in a paper read before the Society in 1868, gave an interesting account of his minute and careful exploration of the Sinai region. A compendium of his results will shed light upon several points hitherto somewhat in doubt or dispute.

Fertility of the Desert. — The lower portion of Wady Gharmool is one of the most fertile in the whole peninsula. It is nearly 300 yards broad in many places, and thickets of tamarisks, palms, and beds of bauleads and reeds abound, and wild dates and many kinds of smaller kinds, frequent the pools, formed here and there by a clear stream of running water, which never fails. "Manna and gum Arabic appear to be found in very small quantities. The latter exudes from the branches of the mimosa, or shittim-tree, after the young shoots have been lopped off in spring to feed the goats. Water is not nearly so scarce in the granitic district as most travellers have supposed. There is also a far larger amount of vegetation than usually described. (This was in October and November.) The3 basins on the summits of the mountains generally afford good pastureage, and even the mountain sides, which look so barren from the wadies below, are often covered with numerous plants on which the goats delight to feed. Many of the smaller wadies, too, are astonishingly fertile, and in former days, when fairly cultivated by the monks, must have yielded abundance of fruit, vegetables, and even corn, for I found traces in several spots of terraced plots cultivated for growing corn. I can readily believe that at one time 8,000 or 7,000 monks and hermits lived, as we are told, in these mountains, and were enabled in great measure, perhaps altogether, to support themselves by the cultivation of the soil. In W. Bâk alone, in addition to a fine grove of olives near the ruins of an old monastery, there is for three miles a constant succession of gardens, each garden having in it two good wells which never fail, and producing olives, pears, apples, vines, figs, palms, melk, currants, apricots, mulberry, pomegranate, and poplar trees; while above and below these gardens runs a stream of water which affords here and there a pool large and deep enough to swim in." All this confirms the view that the sustentation of the Israelites in the wilderness was not exclusively miraculous, but the resources of nature were supplemented by special intervention, from time to time.

The Amalekites. — Mr. Holland discovered in the neighborhood of Jebel Hadrâbî, "the Iron Mountain," remarkable ruins of buildings and tombs. These were constructed of undressed stones, of considerable size, and not without mortar. The buildings were apparently designed for storehouses, having no windows; the tombs contained human bones. From the extent of these structures, and their massive workmanship, Mr. Holland concludes that they must have been built by a large and powerful people; and he is disposed to refer them to the Amalekites.

The True Sinai. — Mr. Holland's careful exploration of each point, Mr. Holland rejects Seirâl and Olijeb as the Biblical Sinai, since "in the neighborhood of the former there is no plain, in the latter range there is one distinct mountain." He suggests as a possible competitor to Jebel Meg, "Jebel Em Aborâ," "the Mother of Heights." The road to the two is the same up to the last five or six miles; both rise almost precipitously from the plains beneath them; but J. Um Aborâ has the advantage of much the larger plain — Sennêl, which contains about thirty square miles of good camping ground.

Route of the Israelites. — Mr. Holland is of opinion that Ain Hâberôh, commonly identified as Hazeroth, could not have been one of the stations of the Israelites, since it lies in a cul-de-sac, and can be approached only by a steep narrow pass. "After crossing the Red Sea somewhere in the neighborhood of Suez, the Israelites took the lower road down the plain along the coast as far as Ain Senna, which may possibly mark the locality of Marah. They then turned inland to Kûn, which I would place at Ain Hâberôh. Their next encampment was by the sea, possibly near the month of W. Hâberwâl, where was abundance of water." The wilderness of Sinn is the plain of es-Segh. Dolfkah was in the neighborhood of W. Kerb, near Esch-lechî. Ashû, at W. el-Ash, a broad wady uniting with W. Bâk, not
far from W. es-Sheikh. Rephahm, Mr. Holland fixes at a point in W. es-Sheikh about 10 miles from Jebel Musa, at the gorge of the "Mekon Avel Hasan," which gives the name to the region. This would have given the Amalekites strategic advantages for surprising the Israelites on their march.

It was mainly at the instance of Mr. Holland, and under the stimulus of his energetic example, that a scientific corps was sent out in 1890, to explore the peninsula of Arabia Petrea. The report of this expedition must give light upon many disputed points, but it cannot be obtained in time for use in this article.

J. P. T.

SINIM (טני: נִמּוּד; [Niphon; term onadylos]), a people noticed in Is. xxx. 12, as living at the extremity of the known world, either in the south or east. The majority of the early interpreters adopted the former view, but the LXX, in giving ניפון favors the latter, and the weight of modern authority is thrown into the same scale; the name being identified by Gesenius, Hitzig, Knobel, and others, with the classical Νίμων, the inhabitant of the southern part of China. No locality in the south equally commends itself to the judgment: Sin, the classical Πελούσ, which Bechtel (Probles, iv. 27) suggests, is too near, and Syene (Michaelis, Spicil. ii. 32) would have been given in its well-known Hebrew form. There is no à priori improbability in the name of the Sinim being known to the inhabitants of Western Asia in the age of Isaiah; for though it is not mentioned by the Greek geographers until the age of Ptolemy, it is certain that an inland commercial route connected the extreme East with the West at a very early period, and that a traffic was maintained on the frontier of China between the Sinim and the Scythians, in the manner still followed by the Chinese and the Russians at Kheen. If any name for these Chinese traders travelled westward, it would probably be that of the Sinim, whose town Thine (another form of the Sinim) was one of the great emporiums in the western part of China, and is represented by the modern Thien or Tin, in the province of Schensi. The Sinim attained an independent position in Western China in the early 8th century B.C., and in the 3rd century B.C. established their sway under the dynasty of Ts'in over the whole of the empire. The Biblical name of China, Ts'in, as well as "China" itself, was derived from this dynasty (Gesen, Thes. s. v.).

W. L. B.

SINITE (סִיְנִית; [Aeneasius; in Chr. Rom. Vat. omit; Zimias]. A tribe of Cannanites (Gen. x. 17; 1 Chr. i. 15), whose position is to be sought for in the northern part of the Lebanon district. Various localities in that district bear a certain amount of resemblance to the name, particularly Sinna, a mountain fortress mentioned by Strabo (xxvi. p. 755); Sisam or Siri, the ruins of which existed in the time of Jerome (Quast, in Gen. I. c.); Syn, a village mentioned in the 15th century as near the river Area (Gesen. Thes. p. 948); and Dunsheh, a district near Tripoli (Robinson's Researches, ii. 494). The Targums of Onkelos and Jonathan give Orthia, a town on the coast to the northeast of Tripolis. W. L. B.

STON, MOUNT. i. STON (סונ; [lofty mount]: Samar. סונ; י: י: י: י: [lofty] סונ; One of the various names of Mount Hermon which are fortunately all, not improbably more ancient than "Hermon" itself. It occurs in Deut. iv. 8 only, and is interpreted by the lexicographers to mean — lofty." Fars-conjectures that these various appellations were the names of separate peaks or portions of the mountain. Some have supposed that Zion in Ps. cxxxii. 3 is a variation of this Ston; but there is no warrant for this beyond the fact that so doing overcomes a difficulty of interpretation in that passage.

2. (דבכ) סונ: in Heb. סונ: names Stone). The Greek form of the Hebrew name Ζήνων (Zion), the famous Mount of the Temple (1 Macc. iv. 37, 69, v. 48, 62, vii. 33, x. 11, xiv. 27; Heb. xii. 22; Rev. xiv. 1). In the looks of Maccabees the expression is always Mount Sinon. In the other Apocryphal Books the name Sinon is alone employed. Further, in the Maccabees the name unmistakably denotes the mount on which the Temple was built: on which the mosaic of the Akon, with its attendant mosaics of Omor and the Maccabians, now stands. The first of the passages just quoted is enough to decide this. If it can be established that Sinon in the Old Testament means the same locality with Sinon in the books of Maccabees, one of the greatest puzzles of Jerusalem topography will be solved. This will be examined under Zion.

G. * There can be scarcely a doubt that in the passages above quoted from Maccabees, Sinon is synonymous with Jerusalem — as in Isa. ii. 3: "for out of Zion shall go forth the law, and the word of the Lord from Jerusalem," and in Ps. lxxvi. 12: "Praise the Lord, O Jerusalem, praise thy tool, O Zion" — where the words are parallel, and each clause has the same meaning. Accepting Sinon in the books of Maccabees, as the same locality with Zion in the Old Testament used in this general sense, we have no great puzzle of Jerusalem topography to be solved. The examination proposed in the last line was for some reason not instituted.

S. W.

SIPPMOTH (סִפְפוֹת; [fruitful places, Firsts]: [Homer. Σαφήνεια; Vat. Σαφή: Alex. Σαφρα: Σαπμοθ]. One of the places in the south of Judah, mentioned during his census and otherwise as "Siphmoth." This appears to be Siphmot, one of the greatest puzzles of Jerusalem topography to be solved. The examination proposed in the last line was for some reason not instituted.

G. * In 1 Chr. xxvii. 27, Zabdi, one of David's captains, is called the Siphamote, not improbably because he belonged to Siphmote. The commutation of שׁ and ט is easily made, and a few MSS. actually read Siphamoth instead of Sipmohoth in 1 Sam. xxx. 28. Thusius suggests on this last passage (Buscher Samuels), that Siphmote may be the same as Shepham (Num. xxxiv. 10, 11) in the east part of Judah, though it agrees with 1 Chr. xxvii. 27, for Zabdi's office would require him to be at no great distance from David's court. 11.

SIPPAI (סיפָא; [threshold, board]: Σαφοῦσιν. One of the sons

a * This supposition, instead of overcoming a difficulty, only adds another and greater. See Hammond, vol. ii. p. 197, note a (Amer. ed.). S. W.
of the Ephraim, or "the giant," slain by Sibbechai the Hushathite at Gezer (1 Chr. xx. 4). In 2 Sam. xxi. 18 he is called Saph.

SIRACH (Seipax, סיראכ) = Sirech; in Rabbinic writers, נסיבך, the father of Jesus (Joshua), the writer of the Hebrew original of the Book of Ecclesiasticus; Ecclesiasticus; Jesus, the Son of Sirach.

B. F. W.

SIRAH [departure, apostasy], THE WELL OF (בְּנֵין סיראֶה יִדֹּק: τό φράεα τοῦ Σιραίρα, in both MSS.: εἰςτέκνον Σἱρόν). The spot from which Simeon was recalled by Jesus to his death at Hebron (2 Chr. xxii. 35 only). It was apparently on the northern road from Hebron — that by which Abner advanced to the ford of the Kidron (ver. 16) to Mahanaim. There is a spring and reservoir on the western side of the ancient northern road, about one mile out of Hebron, which is called Ain Sire, and gives its name to the little valley in which it lies (see Dr. Rosen's paper on Hebron, in the Trans. of the Amer. Acad., M. G. xxii. 1870, and the excellent map accompanying it). This may be the well of the text.

Sirah is mentioned as far back as the 12th century by Rabbi Pethachia, but the correspondence of the name with that of Sirah seems to have escaped notice. G.

SIRION (סירון) = e. Siryon, in Deut., but in Ps. xix. פִּוליֶה, Shirony [see below]: Samar. סיאֶז; Sam. Vers. פִּוליֶה; [Comp. Zechariah; Saron]. One of the various names of Mount Hermon, that by which it was known to the Zobideans (Ient. iii. 9). The word is almost identical with that פִּוליֶה which in Hebrew denotes a "breakwater," or "cirrus," and Gesenius therefore expresses his belief that it was applied in this sense to the mountain, just as the name Thorax (which has the same meaning) was given to a mountain in Magnesia. This is not supported by the Samaritan Version, the rendering in which — Rabben — seems to be equivalent to Jebel ebeh, Sheikjik, the ordinary, though not the only modern name of the mountain. [HERMON, vol. ii. p 1048.]

The use of the name in Ps. xxi. 6 (slightly altered in the original — Siron instead of Sirion) is remarkable, though, bearing in mind the occurrence of Shemir in Solomon's Song, it can hardly be used as an argument for the antiquity of the psalm.

G.

SIS'AMAI [3 syl.] [distincted, first]: Σιςαμαί: Σιςαμαί (Sisamow). A descendant of Sisuiu.s in the line of Jeroham (1 Chr. ii. 40).

SISERA (סִיזֶרָא) [perh. battle-army, Gen.] = סיסרא; סיסרא; [Joseph. Σισάρα, Σισαρά. Sisera]. Captain (Σίσερος) of the army of Jabin king of Canaan who reigned in Hazor. He himself resided in Harosheth of the Gentiles. The particulars of the rout of Megido and of Sisera's death and death are drawn out under the heads of Barak on the plains of Hermon, of Kenite, Kishna, Magog, Maltite, Tent. They have been recently elaborated, and combined into a living whole, with great attention to detail, yet without any sacrifice of force, by Professor Stanley, in his Lectures on the Hist. of the Jewish Church, Lect. xiv. To that accurate and masterly picture we refer our readers.

The army was mustered at the Kishon on the plain at the foot of the slopes of Lejło. Partly owing to the furious attack of Barak, partly to the impassable condition of the plain, and partly to the unwieldy nature of the host itself, which, amongst other impediments, contained 900 chariots — a horrible confusion and rout took place. Sisera deserted his troops and fled off on foot. He took

and invites further examination. This is a Tell or mound on the north side of the Kishon, in the S. E. corner of the plain of Aka. Just behind the hills which separate it from the larger plain of Jezreel. The Tell advances close to the foot of Carmel, and allows only 200m. for the passage of the river between them. Its northern part is variously given. Hattin or Hattin (Thenius), Harhitjia (Schultz), Hureiyeh (Robinson), Horit (Van de Velden), and — Hattiqeh. The latter is the form given in the official List made for the writer in 1851 by Comte Rogers, and is probably accurate. Dr. Thomson — apparently the only traveler who has examined the spot — speaks of the Tell as "covered with the remains of old walls and buildings," in which he sees the relics of the ancient castle of Sisera. (Harosheth, Auer. ed. c)

The number of Jabin's standing army is given by Josephus (Ant. v. 5. § 1) as 200,000 footmen, 10,000 horsemen, and 3,000 chariots. These numbers are large, but they are nothing to those of the Jewish legends. Sisera "had 400000 men, every one of whom had 100000 men under him. He was thirty years old, and had conquered the whole world; and there was not a place the walls of which did not fall down at his voice. When he shouted the very beasts of the field were riveted to their places. 500 horses went in his chariot (J. Joklad ad loc.). "Thirty-one kings (comp. Josh. xii. 24) went with Sisera and were killed with him. They thirsted after the waters of the land of Israel, and they asked and prayed Sisera to take them with him without further reward" (comp. Judg. v. 19. (Ber. Reb. ch. 23). The writer is indebted to the kindness of Mr. Deuch for these extracts
a northeast direction, possibly through Nazareth and Safed, or, if that direct road was closed to him, stole along by more circuitous routes till he found himself before the tents of Heber the Kenite, near Kedesh, on the high ground overlooking the upper basin of the Jordan Valley. Here he met his death from the hands of Jael, Heber's wife, who, although "at peace" with him, was under a much more stringent relation with the house of Israel (Judg. iv. 22, v. 24, 26, 28, 30). [KENITES, vol. ii. p. 1530.] His name long survived as a word of fear and of exultation in the months of prophets and psalmists (1 Sam. xii. 9; Ps. lxxiii. 9). It is remarkable that from the enemy of the Jews should have sprung one of their most eminent characters. The great Rabbi Akiba, whose father was a Syrian proselyte of justice, was descended from Sisera of Harosheth (Bartocci, iv. 272). The part which he took in the Jewish war of independence, when he was standard-bearer to Hor co'ba (Okio, Hist. decr. Misc. 154 note), shows that the warlike force still remained in the blood of Sisera.

2. (Σαράχα, Sarach: Alex. Σαραγάριον, Saragari: [in Ezra, Zed. omits; in Neh., Zad. 1A Σαραγάριον:)] After a long interval the name reappears in the lists of the Nethinim who returned from the Captivity with Zerubbabel (Ezra ii. 53; Neh. vii. 55). The number of foreign, non-Israelite names which occur in these invariable lists has been already noticed under MEKHINS (iii. 1875). Sisera is another example, and doubtless tells of Canaanite captives devoted to the lowest offices of the Temple, even though the Sisera from whom the family derived its name were not actually the same person as the defeated general of Jabin. It is curious that it should occur in close companionship with the name Harsha (ver. 32) which irresistibly recalls Harosheth.

In the parallel list of 1 Esdr. v. 32 Sisera is given as ASSEREE.

G.

SISINNES (Σιενής: Sieunes). A governor of Syria and Phoenicia under Darius, and a contemporary of Zerubbabel (1 Esdr. vi. 3). He attempted to stop the rebuilding of the Temple, but was ordered by Darius, after consulting the archives of Cyrus' reign, to adopt the opposite course, and to forward the plans of Zerubbabel (vid. vi. 7: vii. 1). In Ezra he is called TANNAH.

* SISTER'S SON. "'Αφιάς, so translated Col. iv. 19 (A. V.), should be rendered "cousin" in accordance with its use both in the LXX. and in classic Greek. See Num. xxxvi. 11, and LXX. (Heb. בְּנֵי הָעַנָּן). It has been suggested (Ellicott, Col. iv. 10, Tracta) that the term "sister's son" in the A. V. may be an archaism, as having been formerly used by the German Geschichtskritik, in the sense of "cousin." Similarly the word nephew wherever it occurs in the A. V. (Judg. xii. 14; Job xii. 18; Is. xiv. 22; 1 Tim. v. 14), is used in the now obsolete sense of "grandchild, descendant." D. S. T.

SIT'NAH (םיתנה) [occupation, strifes]: ἤτίπια; Joseph. Σιτήνης: isiniju'tic]. The second of the two wells dug by Isaac in the valley of Gerar, and the possession of which the herdsman of the valley disputed with him (Gen. xxxvi. 21). Like the first one, Es'ek, it received its name from the two opposing parties which took place over it, Sichem being, as is stated in the margin, "hatred," or more accurately "accusation," but the play of expression has not been in this instance preserved in the Hebrew. The LXX. however, have attempted it ἐξιπόντα . . . ἤτίπια. The root of the name is the same as that of Satan, and this has been taken advantage of by Aquila and Symmachus, who render it respectively πετροσεσχύρα and ἔσχυρας. Of the situation of Es'ek and Sittah nothing whatever is known. [GERALD.] G.

SIVAN. [Month.]

* SKIN. [Badger Skins; Bottle; Leather.]

* SKIRTS. Ps. lxxii. 2. See Ointment, vol. iii. p. 2214 b.

SLAVE. The institution of slavery was recognized, though not established, by the Mosaic law with a view to mitigate its hardships and to secure to every man his own rights. Reconsidered as the notion of slavery is to our minds, it is difficult to see how it can be dispensed with in certain phases of society without, at all events, entailing severer evils than those which it produces. Exclusiveness of race is an instinct that gains strength in proportion as social order is weak, and the rights of citizenship are regarded with peculiar jealousy in communities which are exposed to contact with aliens. In the case of war, carried on for conquest or revenge, there were but two modes of dealing with the captives, namely, putting them to death or reducing them to slavery. The same may be said in regard to such acts and outrages as disqualified a person for the society of his fellow-citizens. Again, as citizenship involved the condition of freedom and independence, it was almost necessary to offer the alternative of disfranchisement to all who through poverty or any other continuance were unable to support themselves in independence. In all these cases slavery was the mildest of the alternatives that offered, and may hence be regarded as a blessing rather than a curse. It should further be noticed that a laboring class, in our sense of the term, was almost unknown to the nations of antiquity: hired service was regarded as incompatible with freedom; and hence the slave in many cases occupied the same social position as the servant or laborer of modern times, though differing from him in respect to political status. The Hebrew designation of the slave shows that service was the salient feature of his condition; for the term χειμολ,. usually applied to him, is derived term conveys an idea of degradation and contempt which the Hebrew and Greek equivalents do not convey as applied to the ancient system of servitude.

*Si'ree (softermed from Sare') was originally a national appellation, Servore or Servorex. On the etymology of the word see Schmidtmer's Wörterb. f. Kyriolog. etc., p. 417, and Gibbon's Decline and Fall of the Roman Empire, ch. iv. 22.
SLAVE

from a verb signifying "to work," and the very same term is used in reference to offices of high trust held by free men. In short service and slavery would have been to the ear of the Hebrew equivalent terms, though he fully recognized grades of servitude, according as the servant was a Hebrew or a non-Hebrew, and, if the latter, according as he was bought with money (Gen. xvii. 12; Ex. xii. 44) or born in the house (Gen. xiv. 14, xv. 3, xvii. 25). We shall proceed to describe the condition of these classes, as regards their original reduction to slavery, the methods by which it might be terminated, and their treatment while in that state.

I. Hebrew Slaves.

1. The circumstances under which a Hebrew might be reduced to servitude were: (1) poverty; (2) the commission of theft; and (3) the exercise of paternal authority. In the first case, a man who had mortgaged his property, and was unable to support his family, might sell himself to another Hebrew, with a view both to obtain maintenance, and perchance a surplus sufficient to redeem his property (Lev. xxv. 23, 39). It has been debated whether under this law a creditor could seize his debtor and sell him as a slave. The word לְָּוָּּוָּ (lōvō) does not clearly indicate an inference, for the poor man is said in Lev. xxv. 39 to sell himself (not as in the A. V., "be sold"; see Genesis, Thes. p. 787), in other words, to enter into voluntary servitude, and this under the pressure not of debt, but of poverty. The instances of seizing the children of debtors in 2 K. iv. 1 and Neh. v. 5 were not warranted by law, but might be regarded as the outrages of lawless times, while the case depicted in the parable of the unmerciful servant is probably borrowed from Roman usages (Matt. xviii. 25). The words in Is. l. 1, "Which of my creditors is it to whom I have sold you?" have a prōiōf jūcio bearing upon the question, but in reality apply to one already in the condition of servitude. (2.) The commission of theft rendered a person liable to servitude, whenever restitution could not be made on the scale prescribed by the Law (Ex. xxii. 1, 3). The thief was bound to work out the value of his restitution money in the service of him on whom the theft had been committed (or, according to Josephus, Ant. xvi. 1, § 1, there was no power of selling the person of a thief to a foreigner); when this had been effected he would be free, as implied in the expression sold for his theft, i.e., for the amount of his theft. This law contrasts favorably with that of the Romans, under which a thief became the actual property of his master. (3.) The exercise of paternal authority was limited to the sale of a daughter of tender age to be a maid-servant, with the inferior view of her becoming a concubine of the purchaser (Ex. xi. 7). Such a case can perhaps fairly be regarded as implying servitude in the ordinary sense of the term.

2. The servitude of a Hebrew might be terminated in three ways: (1) by the satisfaction or the remission of all claims against him; (2) by the recurrence of the year of Jubilee (Lev. xxv. 40), which might arise at any period of his servitude and (3), failing either of these, the expiration of six years from the time that his servitude commenced (Ex. xxii. 2; Deut. xv. 12). There can be no doubt that this last recommendation applied equally to the cases of poverty and theft, though Rabbinical writers have endeavored to restrict it to the former. The period of seven years has reference to the Sabbatical principle in general, but not to the Sabbatical year, for no regulation is laid down in reference to the remission of servants in that year (Ex. xxv. 1 ff.; Deut. xiv. 1 ff.). We have a single instance, indeed, of the Sabbatical year being celebrated by a general remission of Hebrew slaves, but this was in consequence of the neglect of the law relating to such cases (Jer. xxxiv. 14). (4.) To the above modes of obtaining liberty the Rabbinists added, as a fourth, the death of the master without leaving a son, there being no power of claiming the slave on the part of any heir except a son (Maimon. Aboth. 2, § 12).

If a servant did not desire to avail himself of the opportunity of leaving his service, he was to signify his intention in a formal manner before the judges (or more exactly at the place of judgment), and, if the case was then decided in favor of the servant, he was to present his master and to bore his ear through with an awl (Ex. xxv. 6), driving the awl into or "unto the door," as stated in Deut. xv. 17, and thus fixing the servant to it. Whether the door was that of the master's house or the door of the sanctuary, as Ewald (Abad. p. 266) infers from the expression of הַבָּהּ, to which attention is drawn above, is not stated; but the significance of the act is enhanced by the former view: thus a connection is established between the servant and the house in which he was to serve. The boring of the ear was probably a token of subjection, the ear being the organ through which commands were received (Ex. x. 6). A similar custom prevailed among the Mesopotamians (Gen. I. 104), the Lydians (Xen. Amos. iii. 1, § 41), and other ancient nations. A servant who had submitted to this operation remained, according to the words of the Law, a servant "for ever" (Ex. xxii. 6). These words are, however, interpreted by Josephus (Ant. iv. 8, § 28) and by the Rabbinists as meaning until the year of Jubilee, partly from the universality of the freedom that was then proclaimed, and partly perhaps because it was necessary for the servant then to resume the cultivation of his recovered inheritance. The latter point no doubt presents a difficulty, but the interpretation of the words "for ever" in any other than their obvious sense presents still greater difficulties.

3. The condition of a Hebrew servant was by no means intolerable. His master was admonished to treat him, not as a bond-servant, but as an hired servant and as a sojourner, and, again, "not to rule over him with rigor" (Lev. xxv. 39, 40, 43). The Rabbinists specified a variety of duties as coming under these general precepts: for instance, compensation for personal injury, exemption from menial duties, such as unbinding the master's sandals.

[\textsuperscript{a} Micaiah (Comment. iii. 9, § 123) decides in the affirmative.]

[\textsuperscript{b} This is implied in the statement of the cases which follow in reference to the servitude: indeed without such an assumption the words "for his theft" (Ex. xxii. 3) would be meaningless. The Rabbinists gave their sanction to such a view (Maimon. Aboth. 2, §§ 8, 11).]
or carrying him in a litter, the use of gentle language on the part of the master, and the maintenance of the servant's wife and children, though the master was not allowed to exact work from them (Mieczior, Slavery bei d. Hebr. p. 31). At the termination of his servitude the master was enjoined not to 'let him go away empty,' but to recompense him liberally out of his flock, his floor, and his wine-press (Deut. xv. 13, 14). Such a custom would stimulate the servant to faithful service, insomuch as the amount of the gift was left to the master's discretion; and it would also provide him with means wherewith to start in the world afresh.

In the event of a Hebrew becoming the servant of a stranger, meaning a non-Hebrew, the servitude could be terminated only in two ways, namely, by the arrival of the year of Jubilee, or by the repayment to the master of the purchase-money paid for the servant, after deducting a sum for the value of his services proportioned to the length of his servitude (Lev. xxv. 47-55). The servant might be redeemed either by himself or by one of his relations, and the object of this regulation appears to have been to impose upon relations the obligation of effecting the redemption, and thus putting an end to a state which must have been peculiarly galling to the Hebrew.

A Hebrew woman might enter into voluntary servitude on the score of poverty, and in this case she was entitled to her freedom after six years' service, together with the usual gratuity at leaving, just as in the case of a man (Deut. xv. 12, 13). According to Rabbinical tradition a woman could not be condemned to servitude for theft; neither could she bind herself to perpetual servitude by having her ear bored (Mieczior, p. 43).
