THE INTERNATIONAL STANDARD
BIBLE ENCYCLOPAEDIA
PREFACE

In presenting to the public in completed form the volumes which comprise The International Standard Bible Encyclopaedia it is fitting that an explanation should be given of the reasons for the appearance of so comprehensive a work, of its distinctive character and aims, and that some mention should be made of the principles by which the Publishers and Editors have been guided in its preparation.

Most readers are aware that the last twenty years have been marked on both sides of the Atlantic—but in Britain chiefly—by a remarkable productivity in dictionaries and encyclopaedias of the Bible. Prior to that time the need of a new departure in Bible dictionaries had become acutely felt. The age was one of transition, of vast and rapid progress in knowledge, and the old aids to the study of the sacred Book no longer satisfied. The movement then already in process has gone forward steadily since, with the result that something like a revolution has taken place in our knowledge of Biblical antiquity and still more in the prevailing methods of approaching and dealing with Biblical subjects. While thus new needs have been created, the task of those entrusted with the preparation of new dictionaries and encyclopaedias of the Bible has been rendered increasingly difficult. It is a byword that things in theology are just now very much in flux. The old landmarks are disappearing or at least are being considerably shifted. The Bible is passing through the ordeal of a remorseless and revolutionary criticism, and the singular fact is that conclusions which decades ago would have been condemned as subversive of all faith in its authority are now naturalized in large sections of the Church as the last and surest results of scholarship, to question which is well-nigh to put one's self beyond the pale of consideration—almost as if one denied the Copernican theory of the universe.

The impulse to meet these new conditions has given rise, as above stated, to the preparation of numerous Biblical dictionaries and encyclopaedias, the chief of which have already taken their places as standard works in this department of scholarship. It is in no spirit of rivalry to these existing works that the present Encyclopaedia is produced. Able and scholarly as these earlier undertakings are, it is believed that there is room for yet another work of the kind, conceived on distinct lines, embodying the best scholarship and newest knowledge, yet somewhat less technical in character than the existing larger works, adapted more directly to the needs of the average pastor and Bible student, and therefore serving a purpose which the others do not so adequately fulfil. There are other considerations which have had weight in determining upon a production of this new work.

As its title indicates, this Encyclopaedia aims at being "International." On the one hand, it may be claimed that, because it has been produced on American soil, and in considerable part under American care, it has been able to draw from a wider area, and to incorporate the fruits of a fuller and more representative American scholarship, than is possible in any British work; while on the other hand its connection through its chief editor with the Old World enables it to reap not less the
benefits of some of the best learning of Britain and its Colonies, as well as of the Continent of Europe. How far this has been accomplished will appear farther on.

The choice of the word Encyclopaedia as the principal one in the title of this work has also been made with a definite purpose. While very complete in its definition of words and terms as a dictionary, the larger function of the work planned by its projectors was to group and arrange data and information after the manner of an encyclopaedia. It will be observed, therefore, that the latter term more accurately describes the completed work.

An important question in connection with a new reference work of this kind is the attitude to be assumed by its writers toward matters fundamental to the newer learning, in so far as the latter deals with the structure, critical treatment, inspiration, and authority of the Bible. Scholarship alone cannot be the deciding factor here, for the scholarship of different minds leads to widely different conclusions, determined often by the ultimate presuppositions on which the treatment of a subject is based. The spirit so widely prevalent in our day which rejects the idea of the supernatural in nature and history, and the criticism which proceeds on that basis, must reach entirely different results from those attained by that attitude of mind and heart which reverently accepts a true revelation of God in the history of Israel and in Christ. It is the former spirit which eviscerates Christianity of most of the vital truths which the Church, resting on Scripture, has always regarded as of its essence. With such a spirit, and with the treatment of Biblical subjects resulting from it, the present Encyclopaedia disclaims all sympathy. In fact, its general attitude may be described as that of a reasonable conservatism. In harmony with most, though not all, recent works of the kind, this Encyclopaedia is positive and constructive in New Testament criticism and doctrine; on the other hand, while acknowledging the rights of a reverent Old Testament criticism, and welcoming any aids which such criticism may bring to the better understanding of the sacred Word, it differs from most of these ultra-modern works either in declining to accept the views of, or in adopting a more cautious attitude toward, the advanced Wellhausen school. Notwithstanding, the aim throughout has been to secure fairness of statement of all subjects on which marked differences of opinion prevail, and in such cases—e.g., Baptism, the Eucharist, questions of church government, theories of criticism, etc.—it has been provided that the divergent views be presented in separate articles, each article being prepared by a leading exponent of the view set forth therein.

In harmony with the practical and authoritative character of the Encyclopaedia the greatest pains have been taken to secure comprehensiveness and completeness in its presentation of all Biblical matters, and in its fulness of typical Scriptural references on all subjects dealt with. In scope the work embraces the Old and New Testaments and the Apocrypha, together with all related subjects of Language, Text, Literature (apocalyptic, apocryphal, sub-apostolic, etc.), Archaeology, historical and religious environment—whatever, in short, may throw light on the meaning and message of the sacred Book. The aim has been that nothing great or small conducing to this end shall be omitted. History of peoples and religions, Ethnology, Geography, Topography, Biography, Arts and Crafts, Manners and Customs, Family Life, Natural History, Agriculture, War, Shipping, Ritual, Laws, Sects, Music, and all else pertaining to the outer and inner life of the people of the Bible, and therefore throwing light upon the meaning of the original writers, are amply and minutely treated. Proper names are explained and their occurrences in the Bible and Apocrypha noted. Large space has been devoted to the meanings and uses of the more ordinary, as well as of rarer and obsolete, English words with special reference to their Hebrew and Greek originals and to the variations of usage in the Authorized Version and the Revised Versions. Careful attention has been given to the figurative uses of words in connection with all subjects where such uses occur. This feature alone of the Encyclopaedia will render it of special value to ministers, teachers, and the rank and file of students of the Bible.
Such being the general character and design of the Encyclopaedia, its preparation was entrusted to a staff of Editors and assistants whose scholarly attainments and known sympathy with the objects to be attained furnished a guarantee that these plans would be effectively carried out in the completed work. As General and Consulting Editor the Publishers secured the services of the Reverend Professor James Orr, D.D., of the United Free Church College, Glasgow, Scotland, and with him were conjoined as Associate Editors the Reverend President Edgar Y. Mullins, D.D., of the Southern Baptist Theological Seminary, Louisville, Kentucky, and the Reverend Bishop John L. Nuelsen, D.D., of the Methodist Episcopal Church, now of Zurich, Switzerland. The duties of Managing Editor were committed to the Reverend Morris O. Evans, D.D., of Cincinnati, Ohio; on him and his corps of skilled assistants has fallen the onerous task of seeing the work carried safely through the press. To the General and Managing Editors fell the preparation of the necessary lists of subjects and their grouping and classification; then, in conjunction with the Associate Editors, the assignment of these to suitable contributors. In this connection special care was exercised to give the work a genuinely international and representative character, not only by selecting contributors distinguished in their several departments from both sides of the Atlantic, and from the British Colonies and the Continent, but by seeing that these were chosen from the various sections of the Christian Church and, moreover, that in so far as possible the writers should be those altogether qualified to produce the most satisfactory articles possible on the subjects assigned to them within the space allotted. In all, nearly two hundred contributors, many of them scholars of the highest rank, have been employed upon this work during the past six years. Over one hundred of these contributors are residents of the United States, about sixty of Great Britain and Continental Europe, and the rest, of Canada, Syria, India, Australia, and other countries. Inspection of the Index of Contributors will show how largely all Churches in the respective countries are represented in this Encyclopaedia. Anglicans, Baptists, Congregationalists, Lutherans, Methodists, Presbyterians, with those of still other communions, diverse in name but united in the faith of the one Lord and Saviour Jesus Christ and laboring in the interests of His Kingdom, have all willingly lent their aid in the production of this truly ecumenical work. Valued assistance also has been unstintingly rendered by a number of Jewish authors. A large proportion of the writers are scholars engaged in professorial work in leading Universities, Seminaries, and Colleges—a fact which greatly enhances the responsible and representative character of their contributions.

It is not possible, and the attempt would be invidious, to particularize the share of the several writers in a work which is the product of so many scholarly pens. An examination of the Encyclopaedia itself will reveal to the most critical eye such a wealth of scholarly articles as has seldom been made available to those in need of such a work. It will be sufficient to say that it was desired at the outset by the promoters of this Encyclopaedia that special prominence should be given to Archaeology and the most recent findings of Exploration, in their bearings on the Bible, and on the lands and civilizations with which Biblical history is connected (Egypt, Babylonia, Assyria, Palestine, Hittites, etc.). How fully this end has been attained is seen in the fact that a large number of the foremost authorities on Archaeology are contributors to these pages. In this connection deep regret must be expressed for the severe loss sustained to Biblical knowledge in general and to this Encyclopaedia through the lamented death, while the work was progressing, of Colonel C. R. Conder, whose acquaintance with Biblical Archaeology and Palestinian Topography, equaled by few and surpassed by none, made his services of such special value. It is, however, a gratification that, before his decease, Colonel Conder had completed most of the articles for the Encyclopaedia assigned to him.

In the treatment of the wide range of subjects opened up by the Natural History of the Bible, with kindred subjects relating to the Geology, Mineralogy, Agriculture, Trades and Industries, etc., also the Topography of Palestine, this Encyclopaedia is largely indebted to Palestinian contributors.
whose names occupy prominent places in the list. However, the Birds of the Bible are dealt with by a noted American writer, Mrs. Gene Stratton-Porter, whose stories and bird books have charmed multitudes of people all around the world. The abundant articles on Eastern customs, food, trades, marriage, family relationships, etc., are principally the work of American contributors.

Embracing in the two Testaments well-nigh every species of literature, the Bible gives rise, even in external respects, to a multitude of questions which it is required of an adequate Encyclopaedia to answer. Such are questions of language, of manuscripts, of text, of internal arrangement, of the growth of the Canon, of Versions, of vicissitudes of literary history, then of chronology as framework, of diversity of contents, leading up to history and biography; all finally merging in the wider questions with which criticism proper has to deal. It is the aim of the present work to yield reliable and satisfactory information on all these important subjects. In several articles, such as "Religion in Ancient Greece," by Dr. A. Fairbanks, of the Museum of Fine Arts, Boston, Massachusetts, and "The Roman Empire and Christianity," by Dr. S. Angus, the aim has been to give the true perspective and atmosphere to the Bible history. It is of the first importance that the reader should realize the background and salient features of that history—have a clear conception of the mythological systems and ancient world-powers with which Christianity had to contend and which it was destined to supplant. Several illustrations also will be found to serve the same end.

The center of interest in the Bible must ever be the Lord Jesus Christ, to the consideration of whose life and teaching, as enshrined in the Gospels, and to the significance of whose Person, mission, and saving work, as further unfolded in the Epistles, large space in this Encyclopaedia is necessarily devoted. It was with great diffidence, and a deep sense of the responsibility of the task, that the principal article on Jesus Christ was undertaken by the General Editor. The treatment of the subject is guided by the conviction that, while critical discussion cannot be ignored, a simple and straightforward presentation of the narrative of this transcendent life, in its proper historical and chronological setting, is itself the best antidote to the vagaries of much current speculation, and the endeavor is made to give the article throughout a character which will render it informative and helpful to the average Biblical student. The same author is responsible for the articles on the Bible and on Criticism. On the latter subject, however, another article from a different standpoint is appended to the one by the General Editor.

The articles on the greater doctrines and on doctrinal and ethical themes generally, as drawn from both Old and New Testaments, cover a wide range, and in all of these several departments of Biblical learning most painstaking effort has been put forth with such results as an examination of the Encyclopaedia itself cannot fail to reveal.

It is essential to a good encyclopaedia that in addition to its scholarly execution it possess distinctive outstanding features for the convenience and information of those who consult it. This Encyclopaedia is particularly characterized by the following features:

I. Fulsness. It has been the design of the Editors that every word in the Bible and the Apocrypha having a distinct Scriptural meaning should appear in this work; and also that all the doctrines of the Bible, the principal terms of Biblical criticism and related subjects of profane history, biography, geography, social life of the peoples, and the industries, sciences, literature, etc., should be included and given proper treatment. A much greater number of words and subjects are defined and treated in this Encyclopaedia than in any other work of its kind, as will be seen by comparison.

II. Authority. In order that those who use such a work may be assured of its trustworthiness it is necessary that the subject-matter should be identified with its authors. Therefore every article in this Encyclopaedia, of sufficient length to be regarded as more than a mere definition or notice, appears over the signature of its author. Items of less than one hundred words are not signed, as
so many signatures to short and relatively unimportant paragraphs would serve no valuable purpose, but would give a monotonous appearance to a page. It will be noted that the authors responsible for all the major subjects were selected and requested to write upon those particular themes because of their marked ability and recognized authority in the special departments of Biblical learning to which their articles belong.

III. Accessibility. More frequently than otherwise those who consult an encyclopedia desire to obtain information on only one or two points in an article and have neither the time nor inclination to read it throughout its entire length. To aid such busy readers, therefore, a uniform division of articles by the employment of headings and subheadings has been adopted. The principal divisions of articles are indicated by captions in bold-faced italics. Subordinate to this first class of divisions appears a secondary class of numerical headings known as cut-in heads, the text-matter being indented for their insertion. An illustration of these two headings follows:

II. The Ordinance.—The "seats of doctrine," i.e. the Scripture texts which must be employed for determining every essential part of the teaching of Scripture regarding the second sacrament of the Christian church, are the words of institution recorded in Mt 26:26-28; Mk 14:22-25; Lk 22:19-20; 1 Cor 11:23-25. Valuable statements, chiefly concerning the proper use of the sacrament, are found in 1 Cor 10:15 ff; 11:20 ff. That these texts are controverted is no reason why a doctrine should not be established from them. No doctrine of the Christian religion could be established, if every text of Scripture had to be withdrawn from the argument, so soon as it had become controverted. Jn 6:52-59 does not treat of this ordinance, because (1) the ordinance must be dated from the night of the betrayal, which was considerably after the Lord's discourse at Capernaum; (2) because this passage speaks of "eating the flesh" not the body, of the Son of man, and of drinking "his blood," in such

The cut-in heads are followed by a third class of subject divisions indicated by plain Arabic numerals enclosed in parentheses as follows: (1), (2), (3). The reader will be further aided by a fourth class of subdivisions composed of the letters of the alphabet arranged in the following style: (a), (b), (c), etc. In a few exceptional instances other special methods of subdividing articles have been provided to suit particular cases. The principal divisions and subdivisions of each leading article appear in tabulated form as an outline or analysis immediately preceding the article itself, so that one may observe at a mere glance the general method of treatment of any particular subject, and also the relative place in the article in which any feature is located.

IV. Illustrations. A large number of pictures, maps and charts, particularly adapted to illustrating the text, serve the purposes both of instruction and embellishment. While some of the illustrations are necessarily copied or redrawn from familiar subjects, by far the larger number are reproductions of recent photographs. Many of these latter were obtained by the Publishers through their own special representatives who either made the photographs themselves or collected them from many available sources at great outlay of time and money. The Editors and Publishers are under special obligation to many authors and interested friends who have procured from others or loaned from their own private collections many rare pictures which have been used. Among others who have thus unselfishly aided in the production of this work special mention should be made of the following persons: the Reverend A. E. Breen, D.D., of Rochester, New York; Professor Albert T. Clay, of Yale University; Professor A. E. Day, of the Syrian Protestant College, Beirut, Syria; Professor A. C. Dickie, Manchester, England; the Reverend William Ewing, D.D., Edinburgh, Scotland; Dr. Arthur Fairbanks, Director of the Museum of Fine Arts, Boston, Massachusetts; the Reverend M. G. Kyle, LL.D., Professor in Xenia Theological Seminary, Xenia, Ohio; Dr. E. C. Richardson, Librarian at Princeton University; the Reverend Professor George L. Robinson, of McCormick Theological Seminary, Chicago; the Reverend Professor G. H. Trever, D.D., of Gammon School of Theology, Atlanta, Georgia; and Mrs. W. J. Williams, Cincinnati, Ohio.
V. Maps. At some places in the text maps are used for illustration. The colored maps, which comprise an atlas, are grouped at the close of the fifth volume for convenience in reference. They have been drawn under the immediate supervision of the Reverend Professor George L. Robinson, of McCormick Theological Seminary, Chicago. The index, which precedes the atlas, renders the location of all identified places easy.

VI. Cross-References and Indexes. Although the alphabetical arrangement of an encyclopaedia enables one using it readily to locate its principal subjects, it is possible to obtain all the information concerning any theme only by an acquaintance with all the articles in which that theme appears. A system of cross-references extensively used throughout this work leads the reader to the various articles which give information on any given theme or subject. A little overlapping or repetition has occasionally been allowed to save readers the trouble of referring too frequently from one article to another. To aid further those who use this work to locate immediately any fact or particular contained in the Encyclopaedia there are seven indexes as follows: I. Contributors; II. General Subjects; III. Scripture Texts; IV. Hebrew and Aramaic Words; V. Greek Words; VI. Illustrations; VII. Index to the Atlas.

In the pronunciation of proper names and English words the international character of the work has not been overlooked. Great care has also been exercised in view of the doubts and difficulties attaching to the derivation of proper names. The American Standard Edition of the Revised Version of the Bible, copyright 1901 by Thomas Nelson & Sons, New York, by consent of the owners of the copyright, has been made the standard English text of the Biblical quotations and references where not otherwise indicated; the writers, however, have enjoyed full liberty in the use of other versions or in giving their own translations and paraphrases.

The Editors and Publishers have not spared time, painstaking care or expense in their efforts to produce an Encyclopaedia in every way adequate to the exacting requirements of teachers in colleges and theological seminaries and Bible schools, clergymen, and all others who desire to be familiar with the Holy Scriptures and those themes of doctrine, criticism, and scholarship which are directly related to them.

## II. BOOKS OF THE BIBLE

### OLD TESTAMENT

| Gen | Genesis | 2 K | 2 Kings |
| Ex | Exodus | 1 Ch | 1 Chronicles |
| Lev | Leviticus | 2 Ch | 2 Chronicles |
| Nu | Numbers | Eze | Ezekiel |
| Dt | Deuteronomy | Neh | Nehemiah |
| Josh | Joshua | Est | Esther |
| Jgs | Judges | Job |
| Ruth | Ruth | Ps | Psalms |
| 1 S | 1 Samuel | Prov | Proverbs |
| 2 S | 2 Samuel | Eccl | Ecclesiastes |
| 1 K | 1 Kings | Cant | Canticles, or Song of Solomon |
| | | | Am | Amos |
| | | | Ob | Obadiah |
| | | | Jon | Jonah |
| | | | Mic | Micah |
| | | | Nah | Nahum |
| | | | Hab | Habakkuk |
| | | | Zep | Zechariah |
| | | | Hag | Haggai |
| | | | Joel |
| | | | Mal | Malachi |

### APOCRYPHA

| 1 Esd | 1 Esdras | Wisd | Wisdom of Solomon |
| 2 Esd | 2 Esdras | Sir, or Sirach, or Eccl Esclasticus |
| Tob | Tobit | Baruch |
| Jth | Judith | Baruch |
| Ad Est | Additions to Esther, or Rest of Esther | Baruch |
| Mt | Matthew | 2 Cor | 2 Corinthians |
| Mk | Mark | Gal | Galatians |
| Lk | Luke | Eph | Ephesians |
| Jn | John | Phil | Philippians |
| Acts | Col | Colossians |
| Rom | Romans | 1 Thess | 1 Thessalonians |
| 1 Cor | 1 Corinthians | 2 Thess | 2 Thessalonians |
| | | 1 Tim | 1 Timothy |
| | | 2 Tim | 2 Timothy |
| | | Tit | Titus |
| | | Philem | Philemon |
| | | He | Hebrews |
| | | Jas | James |
| | | 1 Pet | 1 Peter |
| | | 2 Pet | 2 Peter |
| | | 1 Jn | 1 John |
| | | 2 Jn | 2 John |
| | | 3 Jn | 3 John |
| | | Jude |
| | | Rev | Revelation |

### NEW TESTAMENT

| Mt | Matthew | 2 Cor | 2 Corinthians |
| Mk | Mark | Gal | Galatians |
| Lk | Luke | Eph | Ephesians |
| Jn | John | Tit | Titus |
| Acts | Col | Colossians |
| Rom | Romans | Philem | Philemon |
| 1 Cor | 1 Corinthians | He | Hebrews |
| | | Jas | James |
| | | 1 Pet | 1 Peter |

### III. PSEUDEPIGRAPHA

| Apoc | Bar | Apocalypse of Baruch, Syriac (2 Baruch in Charles) |
| Apoc | Bar | Apocalypse of Baruch, Greek (3 Baruch in Charles) |
| Ase | Isa | Ascension of Isaiah |
| Asm | M | Assumption of Moses |
| En | Enoch, Ethiopic Book of (1 Enoch in Charles, Apoc and Pseudep) |

See also arts. Apocalyptic Literature; Apocrypha.

**Note:** In the references to the Apocrypha and Pseudepigrapha, no uniform attempt at completeness has been made.

Note.—In particular cases, where a distinction should be made between a naturally long and a tone-long vowel, the signs א and י are used, respectively. In other cases the macron (') is used to indicate "full" writing (i.e. with י or ס) rather than the actual quantity, of which such writing is ordinarily a sign. In some instances א represents י, whether the י is consonantal or vocal in origin. Where שׁוֹדָא (') is not sounded it is not represented. Where the vowel is not marked, it is understood to be short.

To represent the definite article ה (or הַ) is used without indicating the doubling of the following consonant where this occurs. In other instances where it is necessary to separate a prefix from a stem a hyphen is employed. See also art. ALPHABET.

### PRONUNCIATION OF HEBREW NAMES IN THE ENGLISH BIBLE

**General rule.**—Usage in the pronunciation of Hebrew names in English has developed after the analogy of Greek and Latin proper names, without any regard for the pronunciation of the Hebrew originals, either as represented in the Masoretic Text or as theoretically reconstructed.

**Spelling.**—The spelling of these names, especially of the best known, deviates widely from any system of uniform transliteration that can be devised. Its evolution must be traced through the attrition of the Greek and Latin endings in the Vulgate forms, based in turn on the Septuagint versions. Thus "Solomon" and "Moses" have retained Greek endings that have no counterpart in the Hebrew שִׁבְלוֹם and מוֹשֶׁה; "Gomorrah" and "Gaza" have an initial vowel that represents the closest approximation that the Greek alphabet furnished for the peculiar guttural ש, elsewhere represented by a rough breathing or ק (as in "Hebrew," "Hai"). The second ק in "Gomorrah" is likewise due to the Greek spelling פ and not to the Hebrew ק. The loss of an ק in Aaron ('אָדְרֹן) and of ק in Isaac (יִשְׂרָאֵל) must be explained in the same way. The first vowel in each of the words "Solomon," "Samuel," "Sodom," "Gomorrah," "Pharisee," "Debîr," and similar words, takes the place of a practically soundless שׁוֹדָא, which had no exact equivalent in Greek. In form, then, the Hebrew names in the Bible are to all intents and purposes Greek.

**Accentuation.**—The accentuation, however, is based on the Latin scheme, never on the Hebrew or Greek. That is to say: the last syllable is never accented; the second last is, if long, or if the word has only two syllables; the third from the end is accented in all other cases. Thus in each of the following names the accent differs from that of the Hebrew: Деb'o-rah (דְבִּרְוָה); Ab'i-dan or A-bî'dan (עבידן); Dan'iel (דָנֵיֵל); Sol'om'on (סֹלֹמֹן); Sod'om (סֹדֹהָם); San'tu-el (סנֵתוּל'); Ke'haz (כֶּהָז); A-bed'ne-go (עבְדֶנְגָו); Che'mosh (כְּמוֹשָׁה); De'bir (דְבִּר). It will be noticed that in many of these words the syllable accented in English is not a syllable at all in Hebrew, but a part of a syllable in which there is no vowel but a mere breath.
Vowels.—In determining the length of a vowel, etymology must be ignored and position in a word considered. Thus, in general, a vowel that closes a syllable is long, whereas one followed by a consonant in the same syllable is short. English models seem to be followed in this matter and the concepts “long” and “short” carry with them the qualitative changes customary in English. Thus short a is pronounced as in “cat,” and not as a merely less drawn-out ā. Authorities differ on the pronunciation of ai in Scriptural names (e.g. “Sinai”); thus the Imperial Dictionary prefers ā, Webster and others Ĳ. i-final is always long (as in Cozbi, Cushi, Malachi, and Zimri).

Consonants.—Each of the consonants, excepting c, s, and t, has but a single sound, its ordinary English sound. g is always hard, as in “go,” excepting in the word “Bethphage,” which has been more thoroughly Graecized than Old Testament words. th is pronounced as in “thin”; ch as k, excepting in the name “Rachel,” where it has the sound heard in the word “church”; ph is sounded f. c, s, and t are governed by the English rules. c is always hard (sounded as k) except before e, i, and y. Thus “Cinneroth” has the soft sound (s). s as an initial vowel of a word or syllable is sounded as in the word “sit.” Between two vowels or at the end of a word after e, i, m, n, or r it is pronounced as z (e.g. “Moses” [pronounced “mozez”], “Solomon,” “Israel” [s soft, but oftest given as z], “Isaac” [s as z]). The tendency to pronounce sh and th in obscure positions as s and th is recognized by some, but this combination is not common in Biblical names. The pronunciation of t before th, as in “Matthew,” is by some authorities disposed of by assimilating the t to the th.

Conclusion.—Though Hebrew scholars have recently displayed a tendency to permit the pronunciation of the Hebrew according to the Masora to influence that of Bible names in English by giving preference to forms that show the greatest resemblance to the Hebrew (as in the name “Bazaleel,” Hebrew b'zäl'ēl, pronounced in English “bēz-āl-ēl” or “bēz’ā-lēl,” former preferred), we must bear in mind that though these names are derived from the Hebrew they are spelled as if derived from Latin or Greek, accent as if Latin, and pronounced so far as separate letters are concerned as if native English words.

The diphthongs are:

- aι as in “aisle”
- ει as in “eight”
- οι as in “toll”
- ου as ov in “out”
- ου as ov in “group”

ου and ου as e or ηου, hence roughly speaking =ēu or ōu (no exact equivalents in English)

Glossary: v is sometimes long, sometimes short.
and the following so-called improper diphthongs q, ā, ē, ē, ē, ṓ. The second vowel is called "iota subscript," and is not sounded in pronouncing these forms, which equal ā, ē, and ē, respectively.

Consonants.—The consonants are in general equal to their English equivalents, except that a single γ, ̄, is always hard; ζ, s, is a s-sound as in "adze," rather than the simple s as in "seal"; θ, th, is always the surd aspirate as in "thin," never pronounced like the th of "this"; σ, s, s, is always a sibilant as in "so," never the z-sound as in "case"; χ or ch, is a strong palatal aspirate like ch of German "Ich," "Buch," or the Welsh "eich," "uwc," etc. A special note must be made of υ, ̄, preceding a palatal (κ, χ, ̄, χ, ch), as in this case the first y is nasalized, e.g. ἀγγελος, ἀγγαλος, is pronounced "aṅge-los" ("an'ge-los"). It might be noted further that an initial ρ, r, is always aspirated.

Transliteration.—In this Encyclopaedia it has been the practice to transliterate letter for letter: a = a, b = b, etc; even the gamma nasal has been so transliterated instead of using an ŋ or ʝ character. Further, the long forms of a, i, and u have not been indicated, and ̄, ̄, ̄, have been transliterated as ā, ē, ē, respectively, since the "iota subscript" was not pronounced in sounding the diphthongs (e.g. alpēω, hairēō, but airtēq, aitīa). Only the rough and not the smooth vowels are indicated.

Accentuation.—The Greek has three accents: (1) the acute ('), as in θεός, theōs = a rising pitch in the voice; (2) the grave ('), as in τῶν θεῶν, τὸν θέον = a falling pitch in the voice; (3) the circumflex ('), as in τῶν θεῶν, τοῦ θεοῦ = a rising and falling pitch in the voice. The grave occurs only on the last syllable and is merely a way of indicating that other words follow (in the same clause or sentence) a word which has an acute accent on the final syllable, e.g. τὸ, τὸ ("the"), but when followed by another word, τὸ ἔργον, τὸ ἐργον ("the work"). The Greek accent was originally a musical or pitch accent rather than a stress accent as in English, and the acute, grave, and circumflex accents were doubtless differentiated. In indicating the accents in this Encyclopaedia, however, the stress alone is considered, and all accents are so indicated, whether acute, grave, or circumflex; e.g. τὸ ἔργον ποιῶ is transliterated τὸ ἐργον ποιῶ and not τὸ ἐργον ποιῶ.
Aaron next comes into prominence when at Sinai he is one of the elders and representatives of his tribe to approach nearer to the manifested glory of God (Ex 24 1.9.10). A few days later, when Moses, attended by his "minister" Joshua, went up into the mountain, Aaron exercised some kind of headship over the people in his absence. Despairing of seeing again their leader, who had disappeared into the mystery of communication with the invisible God, they appealed to Aaron to prepare them a more tangible manifestation of the golden bullock. That he must however have yielded reluctantly, is evident from the ready zeal of his tribesmen, whose leader he was, to stay and to avenge the apostasy by rushing to arms and falling mightily upon the idolaters at the call of Moses (Ex 32 26-28).

In connection with the planning and erection of the tabernacle ("the Tent"), Aaron and his sons were chosen for the official priesthood, elaborate and symbolical vestments were prepared for them (Ex 28); and after the erection and dedication of the tabernacle, he and his sons were formally inducted into the sacred office (Lev 8). It appears that Aaron alone was anointed with the holy oil (Lev 8 12), but his sons were included with him in the duty of caring for sacrificial rites and things. They served in receiving and presenting the various offerings, and could enter and serve in the first chamber of the tabernacle; but Aaron alone, the high priest, the Mediator of the Old Covenant, could enter into the Holy of Holies, and that only once a year, on the great Day of Atonement (Lev 16 12-14).

After the capture of Israel from Sinai, Aaron joined his sister Miriam in a protest against the authority of Moses (Nu 12), which they asserted to be self-assumed. Against For this rebellion Miriam was smitten; Moses ten with leprosy, but was made whole again, when, at the pleading of Aaron, Moses interceded with God for her. The sacred office of Aaron, requiring physical, moral and ceremonial cleanliness of the strictest order, seems to have made him immune from this form of punishment. Somewhat later (Nu 16) he himself, along with Moses, became the object of a revolt of his own tribe in conspiracy with leaders of Dan and Reuben. This rebellion was subdued and the authority of Moses and Aaron vindicated by the
miraculous overthrow of the rebels. As they were being destroyed by the plague, Aaron, at Moses' command, rushed into their midst with the lighted censor, and the destruction was stayed. The Divine will in choosing Aaron and his family to the priesthood and in retrospect as the miraculous budding of his rod, when, together with rods representing the other tribes, it was placed and left overnight in the sanctuary (Nu 17). See Aaron's Rod.

Aaron's prominence does not come prominently into view until the time of his death, near the close of the Wilderness period. Because of the impatience, or unbelief, of Moses and Aaron at Meribah (Nu 20:12), the two brothers are prohibited from entering Canaan; and shortly after the last camp at Kadesh-barnea, Aaron was buried at Mount Hor in the people's sight; Aaron is divested of his robes of office, which are formally put upon his eldest living son; Aaron dies before the Lord in the Mount of Hor at the age of 123, and is given burial by his two mourning relatives, who then return to the camp without the first and great high priest; when the people understand that he is no more, they show both grief and love by thirty days of mourning. The dramatic scene is fully presented when Moses, Aaron and Eleazar go up to Mount Hor in the people's sight; and Aaron is divested of his robes of office, which are formally put upon his eldest living son; Aaron, Eleazar and Ithamar succeed their father. The Aaronic family had existed, as Abraham's name is engraved upon the dynasties of families being the sons of Aaron, the eldest living son, Eleazar (Nu 20:28; Dt 10:6).

Edward Mack

AARONITES, ārōn-ītēs (יָרֹןְיִתֵּֽים, L-ahārōnīṯ, lit. "belonging to Aaron"): A word used in AV, but not in the revised versions, to translate the proper name Aaron in two instances where it denotes a family and not merely a person (1 Ch 12:27; 27:17). It is equivalent to the phrases "sons of Aaron," "house of Aaron," frequently used in the OT. According to the books of Josh and Ch the "sons of Aaron" were distinguished from the other Levites by virtue of the time of Joshua (e.g. Josh 21:4.10.13; 1 Ch 6:54).

AARON'S ROD (Nu 17 and He 9:4): Immediately after the incidents connected with the rebellion of Korah, Dathan and Abiram against the leadership of Moses and the priestly primacy of Aaron (Nu 16), it became necessary to indicate and emphasize the Divine appointment of Aaron. Therefore, at the command of Jehovah, Moses directs that twelve almond rods, one for each tribe with the principal rod including the entire Aaronic family, be placed within the Tabernacle of the Testimony. When Moses entered the tent the following day, he found that Aaron's rod had budded, blossomed and borne fruit, "the three stages of vegetation life being thus simultaneously shown." When the miraculous sign was seen by the people, they accepted it as final; nor was there ever again any question of Aaron's priestly right. The rod was kept "before the testimony" in the sanctuary ever after as a token of the Divine will (17:10). The writer of He, probably following a later Jewish tradition, mentions the rod as kept in the Holy of Holies within the ark (He 9:4; of I K 8:9). See Priest, III.

AB (אָבָּה, 'abh, the Heb and Aram. word for "father"): It is a very common word in the OT; this art. notes only certain uses of it. It is used both in the singular and in the plural to refer to the father of a son. The word is always in the active voice (e.g. Jer 36:16.15). The father of a people or tribe is its founder, not, as is frequently assumed, its progenitor. In this sense Abraham is father to the Israelites (see, for example, Gen 17:11—14.27), Isaac and Jacob are the fathers of families being the sons of the same modified sense. The cases of Ishmael, Moab, etc., are similar. The traditional originator of a craft is the father of those who practise the craft (e.g. Gen 4:20.21.22). Rabbah, the father of the Ammonites (e.g. 1 Sam 14:18), is another example of the use of the word to refer to the founder of a line of endearment. See also ABRAHAM.

Willis J. Bercher

AB (אָבָּה, 'abh): The name of the fifth month in the Hebrew calendar, the beginning month in our July. The name does not appear in the Bible, but Jos gives it to the month in which Aaron died (Ant, IV, iv, 6; of Nu 33:38).

ABACUC, ab-a-kuk (Lat Abacuc): The form given the name of the prophet Habakkuk in 2 Esd 1:40.

ABAION, a-ba'ion (помнин, āba’dāūn, "ruin," "perdition," "destruction"): Though "destruction" is commonly used in translating āba’dāūn, the stem idea is intrinsically rather than passive—the idea of perishing, going to ruin, being in a ruined state, rather than of being ruined, being destroyed. The word occurs six times in the OT, always as a place name in the sense in which Sheol is a place name for the departed, the world of the dead as constructed in the Hebrew imagination. It is a common mistake to understand such expressions in a too mechanical way. Like ourselves, the men of the earlier ages had to use picture language when they spoke of the conditions that existed after death, however their picturing
of the matter may have differed from ours. In three instances Abaddon is parallel with Sheol (Job 26:6; Prov 15:11; 27:20). In one instance it is mentioned in the context of the grave and in the remaining instance the parallel phrase is "root out all mine increase" (Job 38:22; Ps 88:11; Job 31:12). In this last passage the place idea comes nearer to vanishing in an abstract conception than in the other passages.

Abaddon belongs to the realm of the mysterious. Only God understands it (Job 26:6; Prov 15:11). It is the world of the dead in its utterly dismal, destructive, dreadful aspect, not in those more cheerful aspects in which activities are conceived of as in progress there. In Abaddon there are no declarations of God's lovingkindness (Ps 88:11).

In a slight degree the O.T. presentations personalize Abaddon. It is a synonym for insatiableness (Prov 27:20). It has possibilities of information mediate between those of "all living" and those of God (Job 28:22).

In the NT the word occurs once (Rev 9:11), the personalization becoming sharp. Abaddon is here not the world of the dead, but the angel who reigns with death. The Gr. equivalent of his name is given as Apollyon. Under this name Bunyan presents him in the Pilgrim's Progress, and Christendom has doubtless been more interested in this presentation of the matter than in any other.

In some treatments Abaddon is connected with the evil spirit Asmodeus of Tobit (e.g. 3:8), and with the destroyer mentioned in Wisd (18:25; cf. 22), and through these with a large body of rabbinical folklore, but these efforts are simply groundless. See Apollyon.

WILLIS J. BECHER

ABADIAS, ab-a-d'as (Gr 'AbAdias'): Mentioned in 1 Esd 8:53 as the son of Jeseus, of the sons of Job, returned with Ezra from the captivity; and in Ezr 8:9 called "Obadiah the son of Jehiel,"

ABAGARUS, a-bag'a-rus. See Abagarus.

ABAGTHA, a-bag'tha (אֲבָגְתָּה, 'abbagqhtah'), perhaps meaning "fortunate one": One of the seven eunuchs, or "chamberlains," of Xerxes mentioned in Est 1:10. The name is Persian, and is one of the many Pers names in the Book of Est.

ABANAH, ab'a-nah, a-ba'na (אֵבָנָה; 'ăḇănāh [K'thbb, LXX, Vulg.]), or AMANA (אָמָנָא, 'amănāh [K'tē, Pesh, Tg]; AV Abana [ARV Amana]), RV ABANAH [RVm Amanah]: Mentioned in 2 K 5:12, along with the PRARPAR (q.v.), as one of the principal rivers of Damascus. The reading Amana (meaning possibly the "constant," or perennial stream) is on the whole preferable. Both forms of the name may have been in use, as the interchange of an aspirated b (bh = v) and m is not without parallel (of Evl-merodach = Amil-marduk).

The A is identified with the Chrysoorhas ("golden stream") of the Greeks, the modern Nahr Baradā (the "cold"), which rises in the Anti-Lebanon, one of its sources, the Ain Barada, being near the village of Zedebani, and flows in a southerly and then southeasterly direction toward Damascus. A few miles southeast of Suk Wady Barada (the ancient Abila; see above) the stream is more or less doubled by a torrent of clear, cold water from the beautifully situated spring 'Ain Fijah (Gr πηγή, pēgē, "fountain"), after which it flows through a picturesque gorge till it reaches Damascus, whose many fountains and gardens it supplies literally with water. In the neighborhood of Damascus a number of streams branch off from the parent river, and spread out like an opening fan on the surrounding plain. The Barada, along with the streams which it feeds, loses itself in the marshes of the Meadow Lakes about 18 miles E. of the city.

The water of the Barada, though not perfectly wholesome in the city itself, is for the most part clear and cool; its course is picturesque, and its value to Damascus, as the source alike of fertility and of charm, is inestimable. C. H. THOMSON

ABARM, ab'a-rim, a-bā'rim (אַבָּרִים, 'abbārîm): The stem idea is that of going across a space or a dividing line, or for example a river. It is the same stem that appears in the familiar phrase "beyond Jordan," used to denote the mountains. They form the Jordan, and Hellenized in the name Perea. This fact affords the most natural explanation of the phrases 'the mountains of the Abarm' (Nu 33:47-48); "this mountain-country of the Abarm' (Nu 33:17); "Abarm' (Nu 32:49); "Abarm' (Nu 33:44). In Nu 33:45 this station is called simply Iyim, "Mountains." It is to be distinguished from the place of the same name in southern Judah ( Jos 15:29). There is no reason for changing the vowels in Ezek 39:11, in order to make that another occurrence of the same name.

When the people of Abraham lived in Canaan, before they went to Egypt to sojourn, they spoke of the region east of the Jordan as "beyond Jordan." Looking across the Jordan and the Dead Sea they designated the mountain country they saw there as "the beyond mountains." They continued to use these geographical terms when they came out of Egypt. We have no means of knowing how extensive a region they applied the name. The passages speak of the mountain country of Abarm where Moses died, including Nebo, as situated back from the river Jordan in its lowest reaches; and of the Mounds of the Abarm as farther to the southeast, so that the Israelites passed them when making their détour around the agricultural parts of Edom, before they crossed the Arnon. Whether the name Abarm should be applied to the parts of the eastern hill country farther to the north is a question on which we lack evidence.

WILLIS J. BECHER

ABASE, a-bā's: The English rendering of ᾮσα, shāphēl (Job 40:11; Ezek 21:26), and of its derivative ᾮσα shăphal (Dn 4:37) = "bring down," "debase," "humble"; of ᾮσ, 'āqād (Isa 31:4) = "abase self," "afflict," "chasten self," "deal harshly with," etc; and of ᾮσ, ἀποκαθίστας = to deprest; fig. "to humiliate" (in condition or heart); "to bring low," "humble self" (Phl 4:12). The word is always employed to indicate what should be done to or by him who nurtures a spirit and exhibits a demeanour contrary to the laudable humility which is a natural fruit of religion. So a person is warranted to indicate this to such as who are not able to curb the arrogant, God is (Dn 4:37); and He has so constituted the world, that sinful arrogance must fall (Mt 23:12 AV; Lk 14:11 AV; 18:14 AV.

FRANK E. HIRSCH
ABATE, a-bät': Used six times in OT for five different Heb words, signifying "to diminish," "reduce," "assuage"; of the Flood (Gen 8:8); of strength (Deut 34:7); of pecuniary value (Lev 27:18); of wrath (Jgs 8:3); of fire (Nuzi 11:2).

ABBÁS, ab’s (אֶבֶּס, אבב, 'abbád, Hebrazio-Chal'd, "father"): In Jewish and Old-Christian prayers, a name by which God was addressed, then in oriental churches a title of bishops and patriarchs. So Jesus addresses God in prayer (Mt 26:39; 36; 39:26, 32:24; Mt 6:7; 12:27; 17:24, 25). In Mk 16:20; Rom 8:15, and Gal 4:6 (πατέρα, ho pater, is appended even in direct address, in an emphatic sense. Servants were not permitted to use the appellation in addressing the head of the house. See Delitzsch on Rom 8:15; cf G. Dalman, Gram. des jud.-paläst. Aramäisch, etc, § 40, c. 3.

ABBÁD, ab'da (אֶבֶּדָא, 'abbada, perhaps, by abbreviation, "servant of Jehovah") (1) The father of Adoniram, King Solomon's superintendent of forced labor (1 K 4:6). (2) A Levite mentioned in the statistical note in Neh 11:17. This "Abda the son of Shammu" is in the partly duplicate passage in 1 Ch (9:16) called "Obadiah the son of Shemaiah."

ABDEEL, ab'dé-el (אֶבֶּדֶל, 'abbâdel, "servant of God"): The father of Sheleiah, one of the officers whom King Jehoiakim commanded to arrest Baruch, the scribe, and Jeremiah the prophet (Jer 36:26).

ABDI, ab'di (אֶבֶּדַי, 'abbâdi, probably by abbreviation "servant of Jehovah"): A Levite, father of Kish and grandfather of King David's singer Ethan (1 Ch 6:44; cf 15:17). This makes Abdi a contemporary of Saul the king. (2) A Levite, father of the Kish who was in service at the beginning of the reign of Hezekiah (2 Ch 29:12). Some mistakenly identify this Abdi with the former. (3) A man who in Ezra's time had married a foreign wife (Ezr 10:26). Not a Levite, but "of the sons of Elam."

ABDIAS, ab-di'as (2 Esd 1:39 = Obediah): One of the Minor Prophets. Mentioned with Abraham, Isaac, Jacob and the Minor Prophets who shall be given as leaders to the "nation from the east" which is to overthrow Israel (cf Obediah).

ABDIEL, ab'di-el (אֶבֶּדִיֶל, 'abbâdiel, "servant of God"): A Gadite who lived in Gilead or in Bashan, and whose name was reckoned in genealogies of the time of Jotham, king of Judah, or of Jeroboam II, king of Israel (1 Ch 5:15-17).

ABDON, ab'don (אֶבֶּדֶן, 'abbdon, perhaps "service"): (1) A judge of Israel for eight years (Jgs 12:13-15). The account says that he was the son of Hillol the Pirathonite, and that he was buried in Pirathon in the land of Ephraim. No mention is made of great public services rendered by him, but it is said that he had seventy well-mounted sons and grandsons. So far as we can judge, he was placed in office as a wealthy elderly man, and performed the routine duties acceptably. Very likely his two next predecessors Ibzan and Elon were men of the same type.

An effort has been made to identify Abdon with the Abdon mentioned in 1 Sam 12:11, but the identification is precarious. A certain importance attaches to Abdon from the fact that he is the last judge mentioned in the continuous account (Jgs 2:6—13:1) in the Book of Jgs. After the account of him follows the statement that Israel was delivered into the hands of the Philistines forty years, and that statement the continuous account closes: and the series of personal stories begins—the stories of Samson, of Micah and his Levite, of the Benjamite civil war, followed in our English Bibles by the stories of Ruth and of the childhood of Samuel. With the close of this last story (1 Sam 4:18) the narrative of public affairs is resumed, at a point when Israel is making a desperate effort, at the close of the forty years of Eli, to throw off the Philistine yoke. A large part of one's views of the history of the period of the Judges will depend on the way in which he combines these events. My own view is that the forty years of Jgs 13:1 and of I Sam 4:18 are the same; that at the death of Abdon the Philistines asserted themselves as overlords of Israel; that it was a part of their policy to suppress nationality in Israel; that they abolished the office of judge, and changed the high-priesthood to another family, making Eli high priest; that Eli was sufficiently competent so that many of the functions of judicial judges were carried on by him. It should be noted that the regaining of independence was signalized by the reestablishment of the office of judge, with Samuel as incumbent (1 Sam 7:6 and context). This view takes into the account that the narrative concerning Samuel is detachable, like the narratives that follow, Samson belonging to an earlier period. See SAMSON.

(2) The son of Jediael and his wife Maacah (1 Ch 8:30; 9:36). Joel is described as the "father of Gibeon," perhaps the founder of the Benjamite community there. This Abdon is described as brother to Ner, the grandfather of King Saul.

(3) One of the messengers sent by King Josiah to Huldah the prophetess (2 Ch 34:20); called Azchar in 2 Kgs 22:12. (4) One of many men of Benjamin mentioned as dwelling in Jerus (1 Ch 2:23), possibly in Neheimiah's time, though the date is not clear.

ABDON, ab'don (אֶבֶּדֶן, 'abbdon, perhaps "service"): One of the four Levitical cities in the tribe of Asher (Josh 21:30; 1 Ch 6:74). Probably the same with Ebbron (in AV "Hebron") in Josh 19:28, where some copies have the reading Abdon. Now called Abidah, a few miles from the Mediterranean and about fifteen miles south of Tyre.

ABED-NEGO, a-bed'ne-go (Heb and Aram. אֶבֶּדֶנֶגּוֹ, 'abbâdênegô; Dl 3:29, אֶבֶּדֶנֶגּוֹ, 'abbâdênegô): According to many, the nego is an intentional corruption of Nebo, the name of a Bab god, arising from the desire of the Heb scribes to avoid the giving of a heathen name to a hero of their faith. The name, according to this view, would mean "servant of Nebô." Inasmuch as 'abbâdê is a tr of the Bab 'arad, it seems more probable that nego also must be a tr of some Bab word. The goddess Ishtar is by the Babylonians called "the morning star" and "the perfect light" (nabdû gittenêtû). The morning star is called by the Aramaeans nogah, "the shining one," a word derived from the root nogah, the equivalent of the Bab negâqu, "to shine." Abednego, according to this interpretation, would be the Arabic "Abad-ishtar," a not uncommon name among the Assyrians and Babylonians. Canon Johns gives this as the name of more than thirty Assyrians, who are mentioned on the tablets cited by him in Vol. III of his great work entitled Assyrian Deeds and Documents. It means "servant of Ishtar."
Abel-nego was one of the three companions of Daniel, and was the name imposed upon the Hebrew Asariah by Nebuchadnezzar (Dn 1 7). Having refused, a tag with his friends, to eat the provisions of the king’s table, he was fed and flourished upon pulse and water. Having successfully passed his examinations and escaped the death with which the wise men of Babylon were threatened, he was appointed at the request of Daniel along with his companions over the affairs of the province of Babylon (Dn 2). Having refused to bow down to the image which Nebuchadnezzar had set up, he was cast into the burning fiery furnace, and after his triumphant delivery he was caused by the king to prosper in the province of Babylon (Dn 3). The three friends are referred to by name in 1. Macc 2 59, and by implication in He 11 33.34.

R. DICK WILSON

ABEL, ʾābel (אָבֵל), hebel; “Abel, Abel; WH Ḥabel; etymology uncertain. Some tr “a breath,” “vapor,” “transitoriness,” which are suggestive of his brief existence and tragic end; others take it to be a variant of Jabal, yābḥāl, “shepherd” or “herdsman,” Gen 4 20. Cf Assyр ablu and Bab abil, “son”: The second son of Adam and Eve. The absence of the vb. hārāh (Gen 4 2; cf ver 1) has been taken as temporary, perhaps truly, that Cain and Abel were twins.

“Abel was a keeper of sheep, but Cain was a tiller of the ground,” thus representing the two fundamental pursuits of civilized life, the two earliest subdivisions of the human race. On the Heb tradition of the superiority of the pastoral over agricultural and city life, see Expos T, V, 351 ff. The narrative may possibly bear witness to the primitive idea that the pastoral life was more pleasing to Jeh than husbandry.

“In process of time,” the two brothers came in a solemn manner to sacrifice unto Jeh, in order to express their gratitude to Him whose tenants they were in the land (vs 3.4).

2. A Worshippers See SACRIFICE. How Jeh signified his acceptance of the one offering and rejection of the other, we are not told. That it was due to the difference in the material of the sacrifice or in their manner of offering was prohibited by the law and custom. It has been suggested that the LXX rendering of 4 7 makes Cain’s offering not being “correctly made” or rightly divided, and hence rejected as irregular. “If thou makest a proper offering, but dost not cut in pieces rightly, art thou not in fault? Be still!” The LXX evidently took the rebuke to turn upon Cain’s neglect to prepare his offering according to strict ceremonial requirements. ἄρτος, διέτα (LXX in loc.), however, implies נֵבֶן (낼וב), nāṭḥāh (nattak), and would only apply to animal sacrifices. Cf Ex 29 17; Lev 8 20; Jgs 19 29; 1 K 18 23; and see COUCH.

The true reason for the Divine preference is difficult to be found in the disposition of the brothers (see CAIN). Well-doing consisted not in the outward offering but in the right state of mind and feeling. The acceptability depends on the inner motives and moral character of the offerers. “By faith Abel offered unto God a more excellent [abundant, pleoná] sacrifice than Cain” (He 11 4). The “more abundant sacrifice,” Westcott, “supplies to the deepest gratitude of Abel, and shows a fuller sense of the claim of God” to the best. Cain’s “works [the collective expression of his inner life] were evil, and his brother’s righteous” (1 Jn 3 12). “It would be an outrage if the gods looked to gifts and sacrifices, and not to the same source of Abel’s works and the acceptance of his offering. The evil man cannot endure the sight of goodness in another.”

Abel ranks as the first martyr (Mt 23 35), whose blood cried for vengeance (Gen 4 10; cf Rev 6 9.10) and brought despair (Gen 4 13), whereas that of Jesus Martyr appeals to God for forgiveness and speaks peace (He 12 24) and is preferred before Abel’s.

The first two brothers in history stand as the types and representatives of the two main and enduring divisions of mankind, and bear witness to the absolute antithesis and eternal enmity between good and evil.

M. O. EVANS

ABEL, ʾābel (אָבֵל), “abbel, (meadow):” A word used in several compound names of places. It appears by itself as the name of a city concerned in the rebellion of Sheba (2 S 20 14; cf 18), though it is there probably an abridgment of the name Abel-beth-maacha. In 1 S 6 18, where the Heb has “the great meadow,” and the Gr “the great stone,” AV translates “the great stone of Abel.”

ABEL-BETH-MAAČAH, ʾābel-beth-mā’a-ka (אֶבֶל בֵּית-מָאָכָה), “Abel’s meadow of the house of Maacah”: The name appears in this form in 1 K 15 20 and 2 K 15 29. In 2 S 20 15 (Heb) it is Abel-beth-hammaacah (Maacah with the article). In ver 14 of that chapter it appears as Beth-maacha, and in vs 14 and 18 as Abel.

In 2 S it is spoken of as the city, far to the north, where Joab besieged Sheba, the son of Bichri. In 2 K it is an obscure place, a city in Naphtali captured by Tiglath-pileser, king of Assyria. The capture appears also in the records of Tiglath-pileser. In 1 K it is mentioned with Ion and Dan and “all the land of Naphtali” as being smitten by Benhadad of Damascus in the time of Baasha.

In the account in Ch parallel to this last (2 Ch 16 4) the cities mentioned are Ion, Dan, Abelmain. Abel-main is either another name for Abel-beth-maacah, or the name of another place in the same vicinity.

The prevailing identification of Abel-beth-maacha is with Abil, a few miles W. of Dan, on a height overlooking the Jordan near its sources. The adjacent region is rich agriculturally, and the scenery and the water supply are especially fine.

Abel-main, “meadow of water,” is not an inapt designation for it.

WILLIS J. BECHER

ABEL-CHERAMIM, ʾābel-ker’a-mim (אֶבֶל כֶּרָאָמִים), “meadow of vineyards”:

A city mentioned in the RV in Jgs 11 33, along with Aroer, Minnith, and “twenty cities,” in summarizing Jephthah’s campaign against the Ammonites. AV translates the plain of the vineyards. The site has not been identified, though Eusebius and Jerome speak of it as in their time a village about seven Roman miles from the Ammonite city of Rabbah.
ABEŁ-MAIM, a'bel-ma'im (אֵל מָיִם, 'abhēl mayümim, "meadow of water"). See ABEŁ-BETH-MAACAH.

ABEŁ-MEHOLAH, a'bel-mē-hōlāh (אֵל מֶהוֹלָה, 'abhēl mē-hōlāh, "meadow of dancing"): The residence of Elisha the prophet (1 K 19:16). When Gideon and his 300 broke their pitchers in the camp of Midian, the Midianites in their first panic fled down the valley of Jezreel and the Jordan ("Tel Zerahreh") (Jos 2:22); Zerahreh (Zerehan) is Zarithan (2 Ch 24:17; cf 1 K 7:46), separated from Succoth by the clay ground where Solomon made castings for the temple. The wing of the Midianites whom Gideon pursued crossed the Jordan at Succoth (Jgs 8:4 f). This would indicate that Aebel-melaholah was thought of as a tract of country with a "border," W. of the Jordan, some miles S. of Beth-shean, in the territory either of Issachar or West Manasseh.

Abel-melaholah is also mentioned in connection with the jurisdiction of Baana, one of Solomon's twelve commissary officers (1 K 4:12) as below Jezreel, with Beth-shean and Zarethan in the same list.

Jerome and Eusebius speak of Abel-melaholah as a tract of country and a town in the Jordan valley, about ten Rom miles S. of Beth-shean. At that point the name seems to be perpetuated in that of the Wady Malih, and Abel-melaholah is commonly located near where that Wady and the neighboring Wady Helweh, comes down into the Jordan valley. Presumably Adriel the Meholathite (1 S 18:19; 2 S 21:8) was a resident of Abel-melaholah.

WILLIS J. BEECHER

ABEŁ-MIZRAIM, a'bel-mi-raz'im (אֵל מִצְרָיִם, 'abhēl miṣra'im, "meadow of Egypt"): A name given to "the threshing floor of Atad," E. of the Jordan and N. of the Dead Sea, because Joseph and his funeral party from Egypt held their mourning over Jacob (Gen 50:11). The name is a pun. The Canaanites residents saw the 'abhēl, "the mourning," and therefore that place was called 'abhēl miṣra'im.

It is remarkable that the funeral should have taken his circuitous route, instead of going directly from Egypt to Hebron. Possibly a reason may be found as we obtain additional details in Egyptian history. The explanations which consist in changing the text, or in substituting the North Arabian terms for Miṣra'īm, are unsatisfactory.

WILLIS J. BEECHER

ABEŁ-SHITTIM, a'bel-shit'tim (אֵל שִׁיתִים, 'abhēl šīḥīṭîm, "the meadow of the Aciassas"): The name appears only in Nu 33:49; but the name Shittim is used to denote the same locality (Nu 26:1; Jos 2:1; 3:1; Mic 6:5). The name always has the art and the best expression of it in English would be "the Aciassas." "The valley of the Aciassas" (Joel 3:18 [4:18]) is, apparently, a different locality.

For many weeks before crossing the Jordan, Israel was encamped in the roundout of the Jordan valley, N. of the Dead Sea, E. of the river. The notices in the Bible, supplemented by those in Jos and Eusebius and Jerome, indicate that the camping region was many miles in extent, the southern limit being Beth-jeshimoth, toward the Dead Sea, while Abel of the Aciassas was the northern limit and the headquarters. The headquarters are often spoken of as E. of the Jordan at Jericho (e.g. Nu 22:1; 26:3.65). During the stay there occurred the Balak incident ("Nu 22-24"); and the harlotry with Moab and Midian (Nu 25) and the war with Midian (Nu 31), in both of which Phinehas distinguished himself. It was from the Aciassas that Joshua sent out the spies, and that Israel afterward moved down to the river for the crossing. Many of the Jebusites' people to remember all that happened to them from the time when they reached the Aciassas to the time when Jehovah had brought them safely across the river to Gilgal.

Jos is correct in saying that Abel of the Aciassas is the place from which the Deuteronomic law purports to have been given. In his time the name survived as Abila, a not very important town situated there. He says that it was "sixty furlongs from Abila to the Jordan," that is a little more than seven English miles (Av 4, IV, vii.1 and V, i, 1; BJ, IV, vii, 6). There seems to be a consensus for locating the site at Keftrein, near where the wady of that name comes down into the Jordan valley.

WILLIS J. BEECHER

ABEZ, a'bez: Used in AV (Josh 19:20) for Ezeez, which see.

ABGAR, ab gar, ABGARUS, ab-gā'rubus, ABGARUS: a-bagẖ-ā'rb-ūs (אֶבֶּגָרָּבּ, abgarā'āḇūs): Written also Agbarnus and Augarus. A king of Edessa. A name common to several kings (toparches) of Edessa, Mesopotamia. One of these, Abgar, a son of Uchomo, the seventeenth (14th?) of twenty kings, according to the legend (HE, i.13) sent a letter to Jesus, professing belief in His Messianship and asking Him to come and heal him from an incurable disease (leprosy?), inviting Him at the same time to take refuge from His enemies in his city, which is enough for us both. Jesus answering the letter blessed him, because he had believed on Him without having seen Him, and promised to send one of His disciples after He had risen from the dead. The apostle Thomas sent Judas Thaddaeus, one of the Seventy, who healed him (Cod. Apoc. N.T. 1).

A. L. BRESLICH

ABHOR, ab-hor': "To cast away," "reject," "despise," "deny," "contemn," "loathe," etc. (1) Tr. in the OT from the following Heb words among others: בָּאָשׁ (ba'ash), "to be or to become stinking" (1 S 27:12, 2 S 16:21); בֹּא (ba', "to cast out as unclean, to loath" (Lev 16:8 AV, "Yěḇel" (yaḇel), "to loath," "to fear") (Ex 1:12 m; 1 K 11:25; Isa 7:10); בֹּאַ דָּוָדָא (ba'dāḏā'ā, "to detest") (Ps 22:24); בֹּא (ba', "to abhor") (Gen 30:13, "to contemn") (Dt 23:7), בֹּא (bā', "an object of contempt," "an abhorring") (Isa 66:24; Dnl 12:2 m). (2) Tr. in the NT from the following Gr words: ἐκδίκασθαι, which is derived from ἐκδίκησθαι, "to stink" (Rom 2:23); ἐκδικεῖσθαι, derived from ἐκδίκησθαι, "to hate," "to shrink from" (Rom 12:9).

A. L. BRESLICH

ABI, a'bi (אָבִי, 'āḇī): The name of the mother of King Hezekiah, as given in 2 K 18:2. Most naturally explained as a contraction of Abijah ("Jehovah is father," or "is my father"), found in the passage in 2 Ch 29:1. The spelling in the oldest tr seems to indicate that 'āḇī is not a copyist's error, but a genuine contracted form. She is spoken of as the daughter of Zechariah, and was of course the wife of Ahaz.

ABI, a'bi, in the composition of names (אָבִי, 'āḇī, "father"): The Heb words 'āḇī, "father," and 'āh, "brother," are used in the forming of names, both at the beginning and at the end of words, e.g. Abram ("exulted one"), Josiah ("Jehovah is brother"). The father's "father" or the latter a letter at the beginning of a word, however, the modified forms 'āḇīth and 'āhī are the ones commonly used, e.g.
Abiathar ("king's brother") and Abimelech (by the same analogy "king's father").

There are, however, certain forms which complicate the question of their use in proper names. Especially since the publication in 1896 of Studies in Hebrew Proper Names, by G. Buchanan Gray, the attention of scholars has been called to this matter, without the reaching of any perfect consensus of opinion.

The word 'abhi may be a nominative with an archaic ending ("father"), or in the construct state ("father-of"), or the form with the suffix ("my father"). Hence a proper name constructed with the suffix is not necessarily by itself grammatical. It is necessary, therefore, to combine a pronoun with the phrase; if it is a sentence, either of the two words may be either subject or predicate. That is to say, the name Abimelech may supposedly mean either "father of a king," or "a king is father," or "a king is father," or "my father is king." Further, the clause "father of a king" may have as many variations of meaning as there are varieties of the grammatical genitive. Further still, it is claimed that either the word father or the word king may, in a name, be a designation of a deity. This gives a very large number of supposable meanings from which, in any case, to select the intended meaning.

The older scholarship regarded all these names as constructs. For example, Abiathar, "father of a judge." It explained different instances as being different varieties of the genitive construction; for instance, Abihail, "father of might," means mighty father. The woman's name, Abi-ahud, "father of exultation," denotes one whose father is exultant. Abishai, "father of Jesse," denotes one to whom Jesse is father, and so with Abihuud, "father of Judah," Abiel, "father of God," Abijah, "father of Jehovah." See the cases in detail in Gesenius' Lexicon.

The more recent scholarship regards most or all of the instances as sentences. In some cases it regards the second element in a name as a verb or adj., instead of a noun, but that is not important, inasmuch as in Heb the genitive construction might persist, even with the verb or adj. But in the five instances last given the explanation, "my father is exultation," "is Jesse," "is Judah," "is God," "is Jehovah," certainly gives the meaning in a more natural way than by explaining these names as construct clauses.

There is sharp conflict over the question whether we ought to regard the suffix pronoun as present in these names—whether the five instances should not rather be treated as names. God is father, Judah is father, Jesse is father, exultation is father. The question is raised whether the same rule prevails when the second word is a name or a designation of Deity as prevails in other cases. Should we explain one instance as meaning "my father is Jesse," and another as "God is father"?

A satisfactory discussion of this is possible only under a comprehensive study of Bible names. The argument is more or less complicated by the fact that each scholar looks to see what bearing it may have on the critical theories he holds. In the Hebrew Lexicon of Dr. Francis Brown the explanations exclude the construct theory; in most of the instances they treat a name as a sentence with "my father" as the subject; sometimes of the name is a designation of Deity they commonly make that the subject, and either exclude the pronoun or give it as an alternative. For most persons the safe method is to remember that the final decision is not yet reached, and to construe each name simply, without the explanations of it an open question. See NAMER, PROPER.

The investigations concerning Sem proper names, both in and out of the Bible, have interesting theological bearings. It has always been recognized that words for father and brother, when combined in proper names with Yah, Yahu, El, Baal, or other proper names of a Deity, indicated some relation of the person named, of his tribe, with the Deity. It is now held, though with many differences of opinion, that in the forming of proper names many other words, e.g. the words for king, lord, strength, beauty, and others, are also used as designations of Deity or of some particular Deity; and that the words father, brother, and the like may have the same use. To a certain extent the proper names are so many propositions in theology. It is technically possible to go very far in inferring that the people who formed such names thought of Deity or of some particular Deity as the father, the kinsman, the champion, the strength, the glory of the tribe or of the individual. In particular one might infer the existence of a widely diffused doctrine of the fatherhood of God. It is doubtless superfluous to add that at present one ought to be very cautious in drawing or accepting inferences in this part of the field of human study.

WILLIS J. BEECHER

ABIA, a-b'ia', ABIAH, a-b'ia'h. Variants for ABIJAH, which see.

ABI-ALBON, a-b'i-al'b'on, a-bi-al'b'on (אֹבִּי אלָבֶ'ן), meaning not known. Gesenius infers from the Arab. a stem which would give the meaning "father of strength," and this is at worst not quite so groundless as the conjectures which explain 'el bon as a textual misreading for 'el bo'al, Abi-albon the Arasthibne was one of David's listed heroes (2 S 23 31), called Abiel the Arasthbithe in 1 Ch 11 32. Presumably he was from Beth-arabah (Josh 16 6 61; 18 22).

ABIASAPH, a-b'i-a-saf, a-bi-a'saf (אֹבִּי אֶסַּפ), 'abbi-asaph, ("my father has gathered"). A descendant of Kohath the son of Levi (Ex 6 24; 1 Ch 23 37 [8 22]; 9 19). In Ch the name is אֹבִּי אֲסָף, a-bi-asaph, which seems to be a mere variant spelling. The Sam version has the same form in Ex. The list in Ex terminates with Abiasaph who is to be regarded as the contemporary of Phinehas, the grandson of Aaron. The two lists in 1 Ch 6 lead up to the prophet Samuel and the singing companies which David is said to have organized. The list in 1 Ch 6 is a much expanded list of the time of Nehemiah. Apparently all the lists intentionally omit names, just names enough being given in each to indicate the line.

WILLIS J. BEECHER

ABIATHAR, a-bi'ath-ar, a-bi-a'athar (אֹבִּי אֵתָר), 'ebbyathar, "father of super-excellence," or, "the super-excellent one is father." With changed phraseology these are the explanations commonly given, though "a father remains" would be more in accord with the ordinary use of the stem. The pious Abiathar was still conscious that he had a father, even after the butchery of his human relatives:

The Scriptures represent that Abiathar was descended from Phinehas the son of Eli, and through him from Ithamar the son of Aaron; that he was the son of Abimelech the high priest at Nob who, with his head priest associates, was put to death by King Saul for alleged conspiracy with David; that he had two sons, Abimelech and Jonathan, the father of whom whom Abimelech was prominent in the priestly service (I S 21 1-9; 22 7 ff; 2 S 8 17; 15 27 ff; 1 Ch 16 18; 24 3.6.31). See AHIMELECH; AHITUB.
Abiathar escaped from the massacre of the priests at Nob, and fled to David, carrying the ephod with him. This was a great accession to David's strength; for he now had the ark—denoted by the slaughter of the priests, and turned strongly against Saul. The heir of the priesthood, and in his care the holy ephod, were now with David, and the fact gave to his cause prestige, and a certain degree of legitimacy. David also felt bitterly his having been the unwilling cause of the death of Abiathar's relatives, and this made his heart warm toward his friend. Presumably, also, there was a deep religious sympathy between them.

Abiathar was priest, one recognized as David's priest, the medium of consultation with Jehovah through the ephod (1 S 22 20-23; 23 6.9; 30 7.8). He was at the head of the priesthood, along with Zadok (1 Ch 15 11), when David, after his conquests (1 Ch 18 5; 2 S 6), brought the ark to Jerusalem. The two men are mentioned together as high priests eight times in the narrative of the rebellion of Absalom (2 S 16 24 ff.), and are so mentioned in the last list of David's heads of departments (2 S 20 23). Abiathar joined with Adonijah in his attempt to seize the throne (1 K 1 7-42), and was for this deposed from the priesthood, though he was treated with consideration on account of his early comrade ship with David (1 K 2 24, 25). His position remained high priest emeritus, as Zadok and Abiathar still appear as priests in the lists of the heads of departments for Solomon's reign (1 K 4 4). Particularly apt is the passage in Ps 65 12-14, in which Abiathar as well as Zadok is mentioned among the relations of David and Abiathar in the time of Adonijah.

There are two additional facts which, in view of the close relations between David and Abiathar, must be regarded as significant. One is that Zadok, Abiathar's junior, is uniformly mentioned first, in all the many passages in which the two are mentioned together, and is treated as the one who is especially responsible. Turn to the narrative, and see how marked this is. The other similarly significant fact is that in certain especially responsible matters (1 Ch 24, 18 16; 2 S 8 17) the interests of the line of Ithamar are represented, not by Abiathar, but by his son Ahimelech. There must have been something in the character of Abiathar that disqualified him, and as described in 2 S 20 22, 23, he possibly became high priest emeritus, as Zadok and Abiathar still appear as priests in the lists of the heads of departments for Solomon's reign (1 K 4 4). Particularly apt is the passage in Ps 65 12-14, in which Abiathar as well as Zadok is mentioned among the relations of David and Abiathar in the time of Adonijah.

There are two additional facts which, in view of the close relations between David and Abiathar, must be regarded as significant. One is that Zadok, Abiathar's junior, is uniformly mentioned first, in all the many passages in which the two are mentioned together, and is treated as the one who is especially responsible. Turn to the narrative, and see how marked this is. The other similarly significant fact is that in certain especially responsible matters (1 Ch 24, 18 16; 2 S 8 17) the interests of the line of Ithamar are represented, not by Abiathar, but by his son Ahimelech. There must have been something in the character of Abiathar that disqualified him, and as described in 2 S 20 22, 23, he possibly became high priest emeritus, as Zadok and Abiathar still appear as priests in the lists of the heads of departments for Solomon's reign (1 K 4 4). Particularly apt is the passage in Ps 65 12-14, in which Abiathar as well as Zadok is mentioned among the relations of David and Abiathar in the time of Adonijah.

The characteristic priestly function of Abiathar is thus expressed by Solomon: "Because thou barest the ark of the Lord Jehovah before David my father, and hast borne him in keeping, (1 S 20 26). By its tense the verb denotes not a habitual act, but the function of ark-bearing, taken as a whole. Zadok and Abiathar, as high priests, had charge of the bringing of the ark to Jerusalem (1 Ch 15 11). We are not told whether it was again moved during the reign of David. Necessarily the priestly superintendence of the ark implies that of the sacrifices and services that were connected with the ark. The details in Kings indicate the existence of much of the ceremonial described in the Pentateuch, while numerous additional Pentateuchal details are mentioned in Ch.

A priestly function much emphasized is that of obtaining answers from God through the ephod (1 S 10 18; 2 S 6 14) does not necessarily denote the priestly vestment with the Urim and Thummim (e.g. Lev 8 7,8), but if anyone denies that this was the ephod of the priest Abiathar, the burden of proof rests upon him. This is not the place for inquiring as to the method of obtaining divine revelations through the ephod, or of explaining why it was supposed to be reserved to one priest only.

Abiathar's landed estate was at Anathoth in Benjamin (1 K 2 26), one of the cities assigned to the sons of Aaron (Josh 21 18). Apart from the men who are expressly said to be descendants of Aaron, this part of the narrative mentions priests three times. David's sons were priests (2 S 8 18). This is of a piece with David's carrying the ark on a new cart (2 S 6), before he had been taught by the death of Uzzah. "And David and Zadok gave the ark, and brought it down from the house of Jehovah, and brought it into the hands of Abiathar the priest, (2 S 26)." Abiathar had been at first originated some centuries later than Abiathar, and if he makes that tradition the standard by which to test his critical conclusions, he must of course regard the Biblical account of the circumstances as unhistorical. Either he dis proves the tradition or the tradition disproves the record. There is no third alternative. The men who accept the current critical theories understand this, and they have two ways of defending the theories against the record. In some instances they use devices for discounting the record; in other instances they resort to harmonizing hypotheses, changing the record so as to make it agree with the theory. Without here discussing these matters, we must barely note some of their bearings in the case of Abiathar.

For example, to get rid of the testimony of Jesus (Mk 2 26) to the effect that Abiathar was high priest and that the sanctuary at Nob was "the house of God," the critical historian is forced to consider that either Jesus dis proves the tradition or the tradition disproves the record. The proof alleged for this is that Abiathar's service as priest did not begin till at least a few days later than the incident referred to. This is merely finical, though it is an argument that is gravely used by some scholars in support of such theories as the one referred to.

Men affirm that the statements of the record as to the descent of the line of Eli from Ithamar are untrue; that on the contrary we must conjecture that Abiathar claimed descent from Eleazar, his line being the alleged senior line of that family; that the senior line became extinct at his death, Zadok being of a junior line, if indeed he inherited any of the blood of Aaron. In making such affirmations as these, men deny the Biblical statements as resting on insufficient evidence, and substitute for them other statements which, confessedly, rest on no evidence at all.

All such procedure is incorrect. Many are suspicious of statements found in the Books of Ch, that gives them no right to use their suspicions as if they were perceptions of fact. Supposably one may think the record unsatisfactory, and may be within his rights in thinking so, but that does not authorize him to change the record except on the basis of evidence which is such as to disprove the record of the times of Abiathar as fairness demands that a record be treated in a court of justice, or a scientific investigation, or a business proposition.
Abib, a-bîb (בִּיב, 'āḇīḇh), 'āḇīḇhā, "father of knowledge," or "my father knows," of Midian and grandson of Abram and Ketura (Gen 25 4; 1 Ch 1 33). Abibah in AV in Gen.

Abida, a-bî'dā ('בּּד, 'ăḇîḏāh), "father's judge": Abidan, son of Gideon, was a "prince of the children of Benjamin" (Nu 2 22; 10 24). He was chosen to represent his tribe at the census in the wilderness of Sinai (Nu 1 17). When, on the erection, anointing and sanctification of the Tabernacle, the heads of Israel offered, Abidan offered on the ninth day (Nu 7 60 65).

Abide, a-bî'd: OE word signifying progressively to "wait," "remain," "lodge," "sojourn," "dwell," "continue," "endure"; represented richly in OT (AV) by 12 Heb and in NT by as many Gr words. In AV displaced often by words meaning "to sojourn," "dwell," "encamp." The Heb and Gr originals in most frequent use are בָּה, pāḇah, "to dwell"; μένô, mēnô, "to remain." "A. [sit or tarry] ye here" (Gen 22 5); "The earth a. [continueth] forever" (Ecc 1 4); "Who can a. [beare or endure] the day?" (Mal 3 2); "Afflictions a. [and sojourn] with us" (Acts 20 23). The past tense abide, in frequent use, has the same meaning. "His bow a. [remained] in strength" (Gen 49 24); "There he a." (dwell) (Jt 10 40).

Abode, as a noun (Gr μνήμ, mēnē) twice in NT: "make our a. with him" (Jn 14 23); "mansions," RV in "abiding-places" (Jn 14 2). The soul of true disciples and heaven are dwelling-places of the Father, Son and Holy Spirit.

Dwight M. Pratt

Abiel, a-bî'el, ab'yl, a-bî'el ('בּּיל, 'ăḇî'ēl, "my father is God," or "God is father") of Benjamin. Father of Kish the father of King Saul, and also, apparently, the father of Ner the father of Saul's general, Abner (1 S 9 1; 14 51).

(2) Of David's mighty men (1 Ch 11 32), called Abi-albon, which see, in 2 S 23 31.

Abiezir, ab-e'-zie'r, a-bî-e'-zèr ('בּּזִר, 'ăḇîzîr, "father of help," or "my father is help.") Jezer, Jezerite (in AV Jezreel, Jezreel), is Abiezir with the letter bêt omitted.

(1) A descendent of Joseph the son of Jacob, and head of one of the families of Manasseh that settled W. of the Jordan (Nu 26 30; Jos 17 1 6; 1 Ch 7 14 19). Abiezir was great uncle to Zelophehad's daughters, who brought a case before Moses (Nu 26), he must have been an old man at the time of the conquest. He was the son of Gilead the son of Machir, in the sense of being a more remote descendant, for Machir had sons before the death of Joseph (Gen 50 23). The Machir that possessed Gilead and Bashan was the "father of Gilead" (Num 32 33), who was the Manasseh family of Machir, with Efraim as its great general (Jsh 17 13 30 31; Nu 32 39 41; Dt 3 12 15). To Abiezir and other sons of Gilead territory was assigned W. of the Jordan.

In later generations the name survived as that of the family from which Gilead was descended, perhaps also of the region which they occupied (Jgs 6 34; 8 2). They are also called Abiezrites (Jgs 6 11 24, 8 32). The region was W. of Shechem, with Ephraim for its principal city.

(2) One of David's men, "the Anathothite" (2 S 23 27; 1 Ch 11 28), who was also one of David's month-by-month captains, his month being the ninth (1 Ch 27 12).

Willis J. Beecher

Abigail, a-bî-gal, Abigail, ab'-gil ('בּּיל, 'ăḇî'gal, 'ăḇīghāy'al, or גָּל, 'ăḇīghāy'al, three times, or גָּל, 'ăḇīghāy'al, once, or גָּל, 'ăḇīghāy'al, "father," or "cause of joy");

(1) The wife of Nabal, a rich shephered of southern Judaea, whose home was Maon (1 S 25 2); shortly after Nabal's death she became the wife of David. Nabal grazed his flocks in or along the Southern Wilderness, where David and his men protected them from marauding tribes, so that not a sheep was lost to which Nabal was shephed. Afterward and feasting at Carmel (in Judaea), David sent messengers requesting provisions for himself and men. But Nabal, who was a churlish fellow, answered the messengers insultingly and sent them away empty-handed. David, angered by such mean ingratitude, gathered his 400 warriors and set out to destroy Nabal and all he had (1 S 25 22). Meanwhile Abigail, a woman "of good understanding, and of a beautiful countenance" (ver 3), heard of the deed given that Nabal was dead, hearing husband; and fearing what vengeance David in his wrath might work, she gathered a considerable present of food (ver 18), and hastened to meet the approaching soldiers. Her beautiful and prudent words, as also her fair features, so discouraged the desisted from his vengeful purpose and accepted her gift (vs 32 35). When Abigail told Nabal of his narrow escape, he was struck with fear, and died ten days afterward. Shortly after this David took Abigail to be his wife, although about the same time, probably a little before, he had also taken Ahinoam (ver 43); and these two were with him in Gath (1 S 27 3). After David became king in Hebron, Abigail bore him his second son, Chileab (2 S 5 3) or Daniel, as he is called in 1 Ch 3 1.

(2) Sister of David and mother of Amasa, at one time commander of David's army (1 Ch 2 16 17; Abigail 2 S 17 25). In the first passage she is called David's sister, along with Zeruiah; while in the second she is called the "daughter of Nahash." Several explanations of this connection with Nahash have been suggested, any one of which would be sufficient to remove contradiction:

(1) That Nahash was another name of Jesse, as in Isa 14 29, mish-ašhērēš nāḇāthē yēqēš (Kîm); (2) That Nahash was the wife of Jesse and by him mother of Abigail, which is least probable; (3) That Nahash, the father of Abigail and Zeruiah, having died, his widow became the wife of Jesse, and bore sons to
him; (4) That the text of 2 S 17:25 has been corrupted, "daughter of Nahash" having crept into the text. At all events she was the sister of David by the same mother. **Edward Mack**

**ABIHAL**, ab-i-hal (אֱבִיהָל, ἀβιήαλ); in some MSS לִבִיָּה (libiyah), when feminine, but best reading is the former: "father, or cause, of strength": (1) A Levite and the father of Zuriel, who in the Wilderness was head of the house of Merari, Levi's youngest son (Nu 3:35); (2) The wife of Abishur, a man of the tribe of Judah, in the line of Hazron and Jerahmeel (1 Ch 2:29); (3) One of the heads of the tribe of Gad, who dwelt in Gilead of Bashan (1 Ch 5:14); (4) Either a wife of Rehoboam, king of Judah, or mother of his wife Mahalath, according to the interpretation of the text (2 Ch 11:18); probably the latter view is correct, since there is no conjunction in the text, and since the following verse (19) contemplates only one wife as already mentioned. This being true, she was the wife of Jerimoth, a son of David, and daughter of Eliah, David's eldest brother. It is interesting to note that in the later narrative the three brothers are distinguished. (5) Father of Queen Esther, who became wife of Xerxes (Biblical Ahasuerus) king of Persia, after the removal of the former queen, Vashti (Est 2:15; 9:29). He was uncle of Mordecai. **Edward Mack**

**ABIHU**, a-bi-hu (אֱֹבִיהוּ, ἀβιήνος), 'abhiyān, "father he is," or "my father he is"): Second son of Aaron, the high priest (Ex 6:23). With his older brother Nadab he "died before Jehovah," when the two "offered strange fire" (Lev 10:1). It may be inferred from the emphatic prohibition of wine or strong drink, laid upon the priests immediately after this tragedy, that the two brothers were going to their priestly functions in an intoxicated condition (Lev 10:8–11). Their death is mentioned three times in subsequent records (Nu 3:4; 26:61; 1 Ch 24:2).

**ABIHU, a-bi-hu** (אֱֹבִיהוּ), ἀβιήνος, 'abhiyān, "father of majesty," or "my father is majesty," though some regard the second part as the proper name Judah. The son of Bela the eldest son of Benja- min (1 Ch 8:3).

**ABIJAH, a-bi-jah** (אֱֹבִיהָ, ἀβιήα, ἀβιήαθ, "father is Jehovah," or "Jehovah is father"): The name of six or more men and two women in the O.T.

(1) The seventh son of Becher the son of Benja- min (1 Ch 7:8).
(2) The second son of the prophet Samuel (1 S 8:2; 1 Ch 6:28 [6:13]).
(3) The eighth among "the holy captains and captains of God" appointed by lot by David in connection with the priestly courses (1 Ch 24:10). Compare "Zacharias of the course of Abijah" (Lk 1:5).
(4) A son of Jeroboam I of Israel (1 K 14:1–18). The narrative describes his sickness and his mother's visit to the prophet Abijah. He is spoken of as the one member of the house of Jeroboam in whom there was "found some good thing toward Jehovah." With his death the hope of the dynasty perished.
(5) The son and successor of Rehoboam king of Judah (1 Ch 3:10; 2 Ch 11:20–14:1). As to the variant name Abijam (1 K 14:31; 15:7.8) see Abijam.

The statements concerning Abijah's mother afford great opportunity for a person who is interested in finding discrepancies in the Bible narrative. She is said to have been Maachah the daughter of Absalom (1 K 15:2; 2 Ch 11:20.21.22). As more than 30 years elapsed between the adolescence of Absalom and the accession of Rehoboam, the suggestion at once emerges that she may have been Absalom's daughter in the sense of being his granddaughter. But Maachah the daughter of Absalom was the mother of Ass, Abijam's son and successor (1 K 5:10.13; 2 Ch 15:10). Whether we are explicitly told that Absalom had three sons and one daughter (2 S 14:27). It is inferred that the three sons died young, inasmuch as Absalom before his death built him a monument because he had no son (2 S 18:18). The daughter was distinguished by her beauty, as the younger of Tamar, not Maachah. Finally, the narrative tells us that the name of Abijah's mother was "Micaiah the daughter of Uriel of Gibeah" (2 Ch 12:2).

It is less difficult to combine all these statements into a consistent account than it would be to combine some of them if taken by themselves. When all put together they make a luminous narrative, needing no help from conjectural theories of discrepant sources or textual errors. It is natural to understand that Tamar the daughter of Absalom married Uriel of Gibeah; that their daughter was Maachah, named for her great-grandmother (2 S 3:3; 1 Ch 3:2); that Micaiah is a variant of Maachah, as Abijah is of Abijam. Maachah married Rehoboam; she parties with a son second to David's on the father's side; if they had been first cousins perhaps they would not have married. Very likely Solomon, through the marriage, hoped to conciliate an influential party in Israel which still held the name of Absalom in esteem; perhaps he hoped to supplement the moderate abilities of Rehoboam by the great abilities of his wife. She was a brilliant woman, and Rehoboam's favorite (2 Ch 11:21). On Abijah's accession she held at court the influential position of king's mother; and she was so strong that she continued to hold it, when, after a brief reign, Abijah was succeeded by Asa; though it was a position from which Asa had the authority to depose her (1 K 15:13; 2 Ch 15:16).

The account in Ch deals mainly with a decisive victory which, it says, Abijah gained over northern Israel (2 Ch 13), he having 400,000 men and Jeroboam 800,000, of whom 500,000 were slain. It is clear that these numbers are too big to be so intended, whatever may be the key to their meaning. Abijah's speech before the battle presents the same view of the religious situation which is presented in Kings and Amos and Hosea, though with fuller and more detailed story. Perhaps Abijah on this one occasion is not in conflict with the representation in Kings that he followed mainly the evil ways of his father Rehoboam. In Chronicles coarse luxury and the multiplying of wives are attributed to both father and son.

(6) A priest of Nemahiah's time, who sealed the covenant (Neh 10:7). Conjecturally the same with the one mentioned in Neh 12:17.
(7) The wife of Judah's grandson Hezron, to whom was traced the origin of Tekoa (1 Ch 2:24).
(8) The mother of King Hezeckiah (2 Ch 24:1), called Abi in 2 K. See Abi.

**WEB**

**WEB**, ab-i-jam (אֱֹבִיהָ, ἀβιήα, ἀβιήαθ, "father is sea," or, "father of sea"): The name given in Kings (1 K 14:31; 15:17.8) to the son of Reho- boam who succeeded him as king of Judah. See Abijah.

The name has puzzled scholars. Some have proposed, by adding one letter, to change it into "father of his people." Others have observed that the Gr rendering in Kings is *Abeoia*. Either the Heb copy used by the Gr translator read *'abhiyāν*.
Abijah, or else the translator substituted the form of the name which was to him more familiar. A few existing copies of the Heb have the reading Abijah, and Mt 1:7 presupposes that as the OT reading. So they infer that Abijah in K is an erroneous reading for Abijam. It is not impossible to be the prevailing view, and it is plausible. It would be more convincing, however, if the name occurred but once in the passage in Kings, instead of occurring five times. It is improbable that a scribe would repeat the same error five times within a few sentences, with a translator, if he changed the name once, would of course change it the other four times.

Exploration has revealed the fact that the whole region near the eastern end of the Mediterranean was known as "the west." "Father of the west" is not an inapt name for Rehoboam to give to the boy who, he expects, will inherit the kingdom of Solomon and David. The effect of the severance of the ten tribes was to make that name a burlesque, and one does not wonder that it was superseded by Abijah, "My father is Jehovah.

WILLIS J. BEECHER

ABILA, ab'i-la. See Abilene.

ABILENE, a-bil/'e-nə (a-bil'ə-nə, ab'i-lən', ab'il-ən'; a-bil'ə-nə, ab'il-ən'); Mentioned in Lk 3:1 as the tetarchry of Lysanias at the time when John the Baptist began his ministry. The district derived its name from Abila, a chief town, which was situated, according to the Itinerarium Antonini, 15 Roman miles from Damascus on the way to Heliopeia (Baalbec). This place it in the neighborhood of the village of Suk Wady Burada (see Abana), near which there are considerable ancient remains, with an inscription in Gr stating that a "tetrach of Lysanias the tetrarch" made a wall and built a temple, and another in Lat recording the repair of the road "at the expense of the Abilenians." The memory of the ancient name probably survives in the Moslem legend which places the tomb of Abel in a neighboring height where there are ruins of a temple. Joe calls this Abila, ḥe Lusantou, lit., "the A of Lysanias," thus distinguishing it from other towns of the same name, and as late as the time of Ptolemy (cir 170 AD) the name is treacher was associated with it.

The territory of Abilene was part of the Iturean Kingdom, which was broken up when its king, Lysanias, was put to death by M. Antonius, c 35 BC. The circumstances in which A. became a distinct tetrarchry are altogether obscure, and nothing further is known of the tetrarch Lysanias (Ant., XIX, v, 1; XX, ii, 1). In 37 AD the tetrarchy, along with other territories, was granted to Agrippa I, after whose death in 44 AD it was administered by procurators until 53 AD, when Claudius conferred it again, along with neighboring territories, upon Agrippa II. On Agrippa's death, toward the close of the 1st cent., his kingdom was incorporated in the province of Syria.See LYSANIAS.

C. H. THOMSON

ABILITY, a-bil'i-ti (Sémaús, diánnomis, or lexēs, iachús); Variously used of resources, material, mental and spiritual; e.g. of wealth, "gave after their a." (Ezr 2:60); of mental endowment, "a. to stand in the king's palace" (Dan 1:4); of talents and character, "several a." (Mt 25:13); of spiritual strength, "minister, as of the a. which God giveth" (Av 1 Pet 4:11). It may signify either possessions, native capacity, or gifts of the Holy Spirit.

ABIMELCH, a-bim'e-lek (アビメレク, 'āḇîmēleḵ, "father of a king"); A name borne by five OT persons.

(1) The name of two kings of Philistia; the first was a contemporary of Abraham, the second, probably son of the former, was king in the days of Isaac. It is quite possible that Abimelech was the royal title rather than the personal name, since in the title of Ps 34 we find it applied to the king of Gath, elsewhere known by the personal name of Achish (1 S 27:2-3). Shortly after the destruction of Sodom Abraham journeyed with his herds and flocks into the extreme S.E. country of Pal (Gen 20). While sojourning at Gerar, the city of Abimelech. King of the Philistines, he made believe that Sarah was his sister (ver 2), and Abimelech took her, intending to make her one of his wives. But God rebuked him in a dream, besides sending barrenness on the women of his household (ver 17). After his wife Rebekah had proved Abraham most justly for the deception, he dealt generously with him, loading him with presents and granting him the liberty of the land (vs 14-15). When contention had arisen between the servants of the two men over the wells of water the two men made a covenant at a well, which took its name, Beersheba, from this fact of covenant-making (Gen 21 31.32).

(2) Nearly a cent. later than the events connected with the first Abimelech, as outlined above, a second Abimelech, king of the Philistines, is mentioned in relations with Isaac (Gen 26), who in time of grievous famine went down from his home, probably at Hebron, to Gerar. Fearing for his life because of the beautiful wife he had taken her his sister just as Abraham had done with reference to Sarah. Neither Abimelech nor any of his people took Rebekah to wife—quite a variation from the Abrahamic incident; but when the falsehood was detected, he offered his name to what might have happened, continuing nevertheless to treat him most graciously. Isaac continued to dwell in the vicinity of Gerar, until contention between his herdsmen and those of Abimelech became too intolerant; they were forced by stages, reopening the wells dug by his father (ver 18-22). Finally, a covenant was made between Abimelech and Isaac at Beersheba, just as had been made between Abraham and the first Abimelech (Gen 26:20-33). The two kings of Philistia were probably father and son.

(3) The title of Ps 34 mentions another Abimelech, who in all probability is the same as Achish king of Gath (1 S 21:10-22:1); with whom David sought refuge when fleeing from Saul, and with whom he was dwelling at Gath prior to the Philistine invasion of Israel, which cost Saul his kingdom and his life (1 S 27). It appears from this that Abimelech was the royal title, and not the personal name of the Phili kings.

(4) A son of Gideon (Jgs 9) who aspired to be king after the death of his father, and did rule three
years (ver 22). He first won the support of the members of his mother’s family and their recommend-  

ation of himself to all Israel (vs 3:4). He then murdered all the sons of his father, seventy in number, at Ophrah, the family home in the tribe of Manasseh, Jotham the youngest son alone escaping (ver 5). After this Abimelech was made ruler by assembly of the people at Shechem.  

An insurrection led by Gaal the son of Ebed having broken out in Shechem, Abimelech, although he succeeded in capturing that city, was wounded to death by a mill-stone, which a woman dropped from the wall upon his head, while he was storming the stronghold of Thebez, into which the defeated rebels had retreated, after that city also had been taken (vs 50–53). Finding that he was mortally wounded and in order to avoid the shame of death at a woman’s hand, he required his armor-bearer to kill him with his sword (ver 54). His cruel treat-  

ment of the Shechemites (vs 46–49), when they took refuge from him in their strong tower, was a just judgment for their avarice in his crimes (vs 50.51); while his own miserable death was recorded in an inscription written by his blood-handed brother (vs 52–55). (5) A priest in the days of David; a descendant of Ithamar and Eli, and son of Abiathar (1 Ch 18 16). In the LXX and in 1 Ch 24 he is called Abinadab; but being unfounded with Abimelech, the father of Abiathar, and therefore a grandfather. He shared with Zadok, of the line of Ithamar, the priestly office in the reign of David (1 Ch 24 31).  

EDWARD MACK

ABINADAB, a-bin’a-dab (אֲבִינָדָּב, 'abhîná- 

dbh, “father of willingness,” or, “my father is 

willing.” This is according to the ordinary usage of the second word in the name—“willing” rather than “unsuccessful;” “noble”): (1) The man in whose house the men of Kiriat-

jearim placed the ark, after its return from the land of the Philis, his house being either in Gibeah of Benjamin or “in the hill” (1 S 7 1; 2 S 6 3.4). To account for the ark having gobbled 

means hill, and that the place-name Gibeah ordi-

narily has the definite article. It is natural to 

think that Abinadab was himself a man of Kiriat-jearim, though the account does not exclude the possibility that he was one of the members of that town who were summoned to take charge of the ark at a time when no one else dared to have it (1 S 6 20.21); and the implication seems to be 

that they had no option to refuse. Possibly this was due to the fact that Gibeah was the hereditary “bondmen” of “the house of my God” (Josh 9 17.23). However this 

may be, they “sanctified” Abinadab’s son Eleazar to have charge of the ark. According to the Heb and some of the Gr copies, the ark was in Gibeah in the middle of the reign of King Saul (1 S 14 18). About a century later, according to the Bible numbers, David went with great pomp to Kiriat-

jearim, otherwise known as Baalah or Baale-Judah, 

to bring from there the ark to Kiriat-jearim, out of the house of Abinadab in the hill (or, in Gibeah), and place it in Jerus (1 Ch 13; 2 S 6). The new cart was driven by two descendants of Abinadab. There may or may not have been another Abinadab then living, the head of the house. (2) The second of the eight sons of Jesse, one of the three who were in Saul’s army when Goliath gave his challenge (1 S 16 8; 17 13; 1 Ch 2 13). (3) One of the sons of King Saul (1 Ch 8 33; 9 50; 10 2; 1 S 31 2). He died in the battle of Gilboa, the father and brothers (vs 50). (4) In 1 K 4 11 AV has “the son of Abinadab,” which RV has BEN-ABINADAB, which see.  

WILLIS J. BEECHER

ABINOAM, a-bin’o-am, ab-i-nô’ám (אֶבְיֹנואָם, 'âbîno- 

ám, “father of pleasantness,” or, “my father is 

pleasantness”): A man of Kedesh-naphtali, the father of Barak who defeated the army of Jabin and Sisera (Jgs 4 6.12; 5 1.12).  

ABIRAM, a-ë’ram (אֶבְיֹרָם, 'âbîrâm, “exalted 

father,” or, “my father is an exalted one”): (1) The son of Elah the son of Pallu the son of Reuben (Nu 26 5f; Dt 11 6). In company with his brother Dathan and Korah the Levite and others, he disputed the authority of Moses and Aaron in the wilderness (Nu 16 1f; Ps 106 16; Dt 34 11). Two hundred and fifty followers of Korah perished by fire at the doorway of the tent of meeting. Dathan and Abiram refused to come to the tent of meeting, at the summons of Moses; and the earth opened where their tents were, and swallowed them and their families and their goods. See KORAH.  

(2) The firstborn son of Hiel the Bethlehemite, who rebuilt Jericho in the time of Ahab (1 K 16 34; os Josh 6 26). This incident has recently acquired a new interest owing to discoveries made at Gezer and Megiddo concerning foundation sacrifices as anciently offered in Palestine. One should not be too positive in making statements concerning this, but the following is a possible interpretation of the record. The curse of Joshua, pronounced on the man who should rebuild Jericho was of a piece with the other details, Jericho being treated exceptionally, as a city placed under the ban. The language of Joshua’s curse is capable of being translated: the one who rebuilds the city of Jehovah, who shall . . . build . . . Jericho; [who] shall lay its foundation in his firstborn, and set up its gates in his young son’s sacrifice at the completion of the work.  

WILLIS J. BEECHER

ABIRON, a-ë’ron (אֵבִירון, Abîron): (1) The LXX form (Eccles 45 18 AV) of Abinadab, one of the sons of Eliah, who with his brother Dathan, and with one of the sons of Eliphaz, whom he represented, allied himself to the conspiracy against Moses and Aaron (Nu 16 12.21.25.27; 26 9; Dt 11 6; Ps 106 17). (2) The eldest son of Hiel, the Bethlehemite, who died prematurely, thus fulfilling the doom pronounced on the posterity of him who should undertake to rebuild Jericho (1 K 16 34). See ABIRAM.

ABISEI, ab-i-së’î. See ABISSÉ.

ABISHAG, ab-ë’shâg, a-bë’shâg (אֶבְיֹשָג, 'âbî- 

shâg), apparently, “father of wandering,” that is, “cause of wandering,” or “my father wanders”): The Shunammite woman who became nurse to King David (1 K 1 1–4.15; 2 17.21.22). She was chosen for the service with great care, on account of her youth and beauty and physical vigor. She ministered to the king, that is, waited on him as personal attendant and nurse. She also “cher-  

ished” him in his feeleanness, through physical contact the advantage of her superabun-

dant vitality. This was a mode of medical treatment recommended by the servants of the king,
and it appears to have been not wholly unsuccessful. She had an intimate knowledge of the condition of David, and was present at the interview of Bath-sheba with David which resulted in the placing of Solomon on the throne. If that act had been questioned she would have been a most important witness. By reason of this and of her personal charms, she might become a strong helper to any rival of Solomon who should intrigue to supplant him. Adonijah sought Abishag in marriage. On the basis of this and of such other evidence as may supposably have been in his possession, Solomon put Adonijah to death as an intruder.

WILLIS J. BEECHER

ABISHAI, ab'i-shi, ab'i-shi (אֶבֶּשָׂי, 'abbishai; in Ch אֱבֶּשָׂי, 'abbshai; meaning is doubtful, probably "my father is Jesse," BDB): Son of Zeruiah, David's sister, and one of the three famous brothers, of whom Joab and Asahel were the other two (2 Sm 21:18). He was chief of the second group of three among David's "mighty men" (2 Sm 18:18). He first appears with David, who was in the Wilderness of Ziph, to escape Saul. When David called for volunteers to go down into Saul's camp by night, Abishai responded, and counselled the killing of Saul when they came upon the sleeping king (1 Sm 26:6-9). In the skirmish between the men of Ishbosheth and the men of David at Gibeon, in which a slain of the servants of Abner, Abishai was present (2 Sm 2:18:24). He was with and aided Joab in the cruel and indefensible murder of Abner, in revenge for their brother Asahel (2 Sm 3:30). In David's campaign against the allied Ammonites and the attack upon the Ammonites, while Joab met the Syrians, the battle was a great victory for Israel (2 Sm 10:10-14). He was always faithful to David, and remained with him, as he fled from Absalom. When Shimei, of the house of Saul, cursed the fleeing king, Abishai characteristically wished to kill him at once (2 Sm 16:8.9); and when the king returned victorious Abishai advised the rejection of Shimei's penitence, and his immediate execution (2 Sm 19:21). In the battle with Absalom's army at Mahanaim Abishai led one division of David's army, Joab and Ittal commanding the other two (2 Sm 18:2). With Joab he put down the revolt against David of Sheba, a man of Benjamin (2 Sm 20:6.10), at which Joab treacherously slew Sheba with his own sword, and who had likewise murdered Abner, Abishai no doubt being party to the crime. In a battle with the Philistines late in his life, David was faint, being now an old man, and was in danger of death at the hands of the Philistines (Ishbosheth when Abishai came to his rescue and killed the giant (2 Sm 21:17). In the list of David's heroes (2 Sm 23) Abishai's right to leadership of the "second three" is based upon his overthrowing three hundred men with his spear (ver 19). He does not appear in the struggle of Adonijah against Solomon, in which Joab was the leader, and therefore is supposed to have died before that time.

He was an impetuous, courageous man, but less cunning than his more famous brother Joab, although just as cruel and relentless toward rival or foe. David understood and feared their hardness and cruelty. Abishai's best trait was his unsparing loyalty to his kinsman, David.

ABISHALOM, bish'a-ló'm: Variant of Ab-sal'om, which see.

ABISHUA, bish'a-ú'a, ab-shoó'a (אֲבִישוּא, 'abbishuáh, uncertain, perhaps "father of wealth," or "my father is wealth"): (1) A son of Bela the son of Benjamin (1 Ch 4:4). (2) The son of Phinehas, who was grandson to Aaron (1 Ch 6:4.5.50; Ezr 7:5).

ABISHUR, a-bish'ur (אֶבֶּשֹׂור, 'abbishur, "my father is a wall"); Great-grandson of Jerahmeel and Atarah, Jerahmeel being great-grandson of Judah. Abishur was son of Shammai, and was the husband of Abihu, and the father of sons (1 Ch 2:28.29).

ABISSEL, a-bis'se (AV Abisse): An ancestor of Ezra (2 Esd 1:2)=Abisue (1 Esd 8:2) and Abishua (1 Ch 6:4 ff; Ezr 7:5) and Abissi (2 Esd 1:2): An ancestor of Ezra (1 Esd 8:2).

ABISUM, ab'i-sum. See ABISUE (Apop).

ABITAL (אָבִיתָל), ab'i-tal (אָבִיתָל, 'abbíthál, "my father is dew"); One of the wives of King David. In the duplicated list (2 Sm 3:4; 1 Ch 3:3) in which the same born to David in Hebron were mentioned and numbered, the fifth is said to be Shephatiah the son of Abital.

ABITUB, ab'i-tub, ab'i-tub (אֲבָיתוּב, abíthu'b, "father of goodness," or, "my father is goodness"): In AV Abitub. A descendant of Benjamin and son of Shaharsaim and Hushim, born in the field of Moab (1 Ch 8:11).

ABIUD, a-bí'ud (אַבְיָד, Abíyad, perhaps "my father is majesty"); see ABIJUD: Mentioned in the genealogy of Jesus (Mt 1:13 and not elsewhere) as the son of Zerubbabel. See GENEALOGY.

ABJET, ab'jekt: Only as a noun, and but once (Ps 35:15) for עָבַּה, 'ubábah, lit. "smitten ones," i.e. "men of the lowest grade" (Hengstenberg, Delitzsch), "the rabble," defined by the succeeding clause as those of such inferior station that they were unknown.

ABLE, a-b'l: The Gr ἄνευς, ἄνειμα, "to have power," may refer either to inherent strength, or to the absence of external obstacles, or to what may be allowable or permitted. The Gr ἄνευς, ἄνειμα, as in Lk 13:24; Jn 21:6, refers always to the first of the above meanings. The use of the word as an adj. in AV of 2 Cor 3:6, is misleading, and has been properly changed in RV into "sufficient as ministers," i.e. " hath fitted us to be ministers."

ABLUTION, ab-lú'shun: The rite of ablation for religious purification seems to have been practised in some form in all lands and at all times. The priests of Egypt punctiliously practised it (Herodotus ii.37). The Greeks were warned "never with unwashed hands to pour out the black wine at morn to Zeus" (Hesiod, Opera et Dies v.722; cf Homer, Ithak vi.296; Od. iv.759). The Romans also observed it (Virgil, Aeneid ii.217); as did and do Orientals in general (cf Koran, Sura 5, 8, etc.).

Ablutions for actual or ritual purification form quite a feature of the Jewish life and ceremonial. No one was allowed to enter a holy place or to approach God by prayer or sacrifice without having first performed the rite of ablation, or "sanctification," as it was sometimes called (Ex 19:10; 1 Sm 16:5; 2 Ch 29:5; cf Jos, Ant, XIV, xi, 5).

Three kinds of washing are recognized in Biblical and rabbinical law: (1) washing of the hands,
(2) washing of the hands and feet, and (3) immersion of the whole body in water. (1 and 2 = Gr ἐναπόκρυνση, πνεῦμα; 3 = Gr λους, λουσ). Something more than an echo of a universal practice is found in the Scriptures. The rabbis claimed to find support for ceremonial hand-washing in the form of ablution accordingly, which is most universally and sporadically practiced by Jews. Before any meal of which bread forms a part, as before prayer, or any act of worship, the hands must be solemnly washed in pure water; as also after any unclean bodily function, or contact with any unclean thing. Such hand-washings probably arose naturally from the fact that the ancients ate with their fingers, and so were first for physical cleansing only; but they came to be ceremonial and singularly binding. The Talmud abundantly shows that eating with unwashed hands came to be reckoned a matter of highest importance—"tantamount to committing an act of unchastity, or other gross crime." Akiba, when he died without a drink given him, quenched his thirst, rather than neglect the rite of ablution (Jer. 216). Only in extreme cases, according to the Mish, as on a battlefield, might people dispense with it. Simeon, the Essene, "the Saint" (Joseph. Ant., 8.1.6), on entering the holy place without having washed his hands, claiming that he was holier than the high priest because of his ascetic life, was excommunicated, as undermining the authority of the Elders (of Ed. 5 6). Washing of the hands and feet is prescribed by the Law only for those about to perform priestly functions (of Koran, Sura 5 8, in contrast: "When ye prepare yourselves for prayer, wash your faces and hands up to the elbows, and wipe your heads and your feet to the ankles"; Hughes, Dict. of Islam). For example, whenever Moses or Aaron or any subordinate priest desired to enter the sanctuary (Tabernacle) or approach the altar, he was required to wash his hands and feet from the lakeshore borders, and from the altar (Ex 30 19; 40 31). The same rule held in the Temple at Jerusalem. The washing of the whole body, however, is the form of ablution most specifically and exactlying required by the Law. The washing of the whole body is commanded, either for purification or consecration, are very numerous. For example, the Law prescribed that no leper or other unclean person of the seed of Aaron should eat of holy flesh until he had washed his whole body in water (Lev 22 4–6); that anyone coming in contact with a person having an unclean issue, or with any article used by such a one, should wash his whole body (Nu 15 1–10); that whoever incurs an unclean issue (15 16–18); a menstruous woman (2 S 11 2.4), and anyone who touched a menstruous woman, or anything used by her, should likewise immerse the whole person in water (Lev 15 19–23); that the high priest washed on the Day of Atonement (16 24–28), the priest who tended the red heifer (Nu 19 7.8.19), and every priest at his installation (Ex 29 4; 40 12) should wash his whole body in water. Of divers baptisms' (immersions) in He 9 10, and see Broughton and Foot. For another view on baptism see Kennedy in HDB, I, 257 n.).

Bathing in the modern and non-religious sense is rarely mentioned in the Scriptures (Ex 2 5 Pharaoh's daughter; 2 S 11 2.4 Bathsheba, and the interesting case 1 K 22 38). Public baths are first met with in the Gr period—including in the "place of exercise" (1 Mac 1 14), and remains of such buildings from the Rom period are numerous. Recently a remarkable series of bath-chambers have been discovered at Gezer, in Pal, in connection with a building which is supposed to be the "House of Sima the Maccabaeus" (Kenedy illust. in EFPS, 1905, 294 f).

The rite of ablution was observed among early Christians also. Eusebius (HE, X, 4, 40) tells of Christian churches being supplied with fountains or basins as a means of performing the laver for the use of the priests. The Apostles (VIII.32) have the rule: "Let all the faithful . . . when they rise from sleep, before they go to work, pray, after having washed themselves" (vipsadenos).

The attitude of Jesus toward the rabbinical law of ablution is significant. Mk (7 3) prepares the way for his record of it by explaining, "The Pharisees and all the Jews eat not except they wash their hands to the wrist" (pug. 28). (See LTJM.) According to Mt (15 1–20) and Mk I 21–22 Pharisees and Scribes that had come from Jerusalem (i.e. the strictest) had seen some of Jesus' disciples eat bread with unwashed hands, and they asked Him: "Why do thy disciples transgress the tradition of the elders? for they wash not their hands when they eat bread." Jesus' answer was to the Jews, even to His own disciples, in the highest degree surprising, paradoxical, revolutionary (of Mt 12 8). They could not but see that it applied not merely to hand-washing but to the whole matter of clean and unclean food; and this to them was one of the most vital parts of the Law (of Acts 10 14). Jesus saw that the masses of the Jews, no less than the Pharisees, were superstitious about ceremonial purity, were careless of inward purity. So here, as in the Sermon on the Mount, and with reference to the Sabbath (Mt 12 1 ff), He would lead them into the deeper and truer significance of the Law, and thus prepare the way for setting aside not only the traditions of the elders that made void the commandments of God, but even the prescribed ceremonies of the Law themselves, if need be, that the Law in its higher principle, the Law of faith, should rise. Therefore here a new formula. Here He proclaims a principle that goes to the heart of the whole matter of true religion in saying: "Well did Isaiah prophesy of you hypocrites" (Mk 7 6–13)—you who make great pretense of devotion to God, and inculcate the externals of His service, while at heart you do not love Him, making the word of God of none effect for the sake of your tradition!

Literature—For list of older authorities see MccKee- tock and Strong, Cyclopaedia; Newack, Biblical Archaeology, II, 275–99; and Spitzer, Ueber Baden und Bader bei den alten Hebrew, 1884.

Geo. B. Eager

ABNER, abnâr (אֶבְנָר), abnâr; in 1 S 14 50 the Hob has the fuller form, אֶבְנָרָּה, 'abbnâr, Abnâr, of Abram by the side of Abram; meaning, "my father is a lamp"): Captain of the host under Saul and Ibiobsheh (Hebbaal). He was Saul's cousin; Ner the father of Abner and Kish the father of Saul being brother sons of Abiel (1 S 14 50 f). In 1 Ch 8 33; 9 39 the text appears to be faulty; read: "And Ner begat Abner, and Kish begat Saul." According to 1 Ch 27 21 Abner had a son by the name of Jaaziel. Abner was son to Saul who was to David. Despite the many wars waged by Saul, we hear little of Abner during Saul's lifetime. Not even in the account of the battle of Gilboa is mention made of him. Yet both his high office and his kinship to the king must have brought the two
men in close contact. On festive occasions it was the custom of Abner to sit at table by the king's side (1 S 20 25). It was Abner who introduced the young David fresh from his triumph over Goliath to the king's court (so according to the account in 1 S 17 57). We find Abner accompanying his kinsman, David (1 S 26 5 ff). Abner is rebuked by David for his negligence in keeping watch over his master (ib. 15).

Upon the death of Saul, Abner took up the cause of the young heir to the throne, Ishbosheth, whom he forthwith removed from the neighborhood of David to Mahanaim in the East-Judian country. There he proclaimed him king over all Israel. By the pool of Gibeon he and his men met Joab and the servants of David. Twelve men on each side engaged in combat which ended disastrously for Abner who fled. He was pursued by Asahel, Joab's brother, whom Abner slew. Though Joab and his brother Abishai sought to avenge their brother's death on the spot, a truce was effected; Abner was permitted to go his way after three hundred strokes of his own had fallen. Joab naturally watched his opportunity. Abner and his master soon had a quarrel over Saul's concubine, Rizpah, with whom Abner was intimate. It was certainly an act of treason which Ishbosheth was responsible. Through disgruntled gentry, he made overtures to David; he was over the tribe of Benjamin. With twenty men of them he came to Hebron and arranged with the king of Judah that he would bring over to his side all Israel. He had disappeared gone when Joab learned of the affair; without the knowledge of David he recalled him to Hebron where he slew him, "for the blood of Asahel his brother," David mourned sincerely the death of Abner. "Know ye not," he addressed his servants, "that there is a prince and a great man fallen this day in Israel? He followed the bier in person. Of the royal lament over Abner a fragment is quoted:

"Should Abner die as a fool die? His hands were not bound, nor thy feet put into fetters; As a man falleth before the children of iniquity, so didst thou fall."

(See 2 S 3 6–38.) The death of Abner, while it thus cannot in any wise be laid at the door of David, nevertheless served his purposes well. The backbone of the opposition to David was broken, and he was soon proclaimed as king by all Israel.

MAX L. MARGOLIS

ABODE, a-bōd'. See ABIDE.

ABOLISH, a-bol'ish (םָבְלָשׁ, bāšālāth, "to be broken down," "made void"). "My righteousness shall not be abolished" [Isa. 6 16], i.e. as shown in God's faithfulness to His promises; "לְפָה מָדַבָּה, "to erase," "blot out," "that your works may be abolished" [Ezk 6 8]; "כָּסָרְגֶּה, kāsārāgē, "to render inoperative," "to bring to nought," "make of no effect," "when he shall have abolished all rule" [1 Cor 15 24], every power opposed to God's kingdom "having abolished in his flesh the enmity" [Eph 2 15]). By His death, Christ did away with the race separation due to historic ordinances and ceremonial laws (as of circumcision and uncircumcision); through the cross He wrought the reconciliation, and secured that the covenant now made with the Father by which the union is maintained.

"Our Saviour Christ Jesus . . . abolished death" (2 Tim 1 10). Men still die, "it is appointed unto men" (He 9 27), but the fear of death as having power to terrify us and affect our personal existence as with the union and our God, as a dreadful stepping out into the unknown and unknowable (into Sheol of the impenetrable gloom), and as introducing us to a final and irreversible judgment, has been removed. Christ has taken out of it its sting (1 Cor 15 55 f) and all its hurtful power (He 2 14); has shown it to be under His control (Rev 1 18), brought to light the incorruptible life beyond, and declared the ultimate destruction of death (1 Cor 15 28; of Rev 20 14). The Or (katarageō) indicates that the process of destruction was then going on.

M. O. EVANS

ABOMINATION, a-bon'-i-ma-shōn (סַרְבָּה, pīğgāl, נַפָּרְת, 'ōvēḇāh, yāḇār, śeḇēz; יְפַי, shikkā'yā); Three distinct Heb words are rendered in the English Bible by "abomination," or "abominable thing," referring (except in Gen 45 12; 46 34) to things or practices abhorrent to Jehovah, and opposed to the ritual or moral requirements of His religion. It would be well if these words could be distinguished in turn, as they denote different degrees of abhorrence, loathsomeness.

The word most used for this idea by the Hebrews and indicating the highest degree of abomination is נַפָּרְת, 'ōvēḇāh, meaning primarily that which offends the religious sense of a people. When it is said, for example, "The Egyptians might not eat bread with the Hebrews; for that is an abomination unto the Egyptians" (Ex 34 13), it is the word used; the significance being that the Hebrews were repugnant to the Egyptians as foreigners, as of an inferior caste, and especially as shepherds (Gen 46 34).

The feeling of the Egyptians for the Greeks was likewise one of repugnance. Herodotus (i.41) says the Egyptians would not kiss a Greek on the mouth, or use his dish, or taste meat cut with the knife of a Greek.

Among the objects described in the OT as "abominations" in this sense are heathen gods, such as Ashhtoreth (Astarte), Chemosh, Milcom, the "abominations" of the Zidonians (Phoenicians), Moabites, and Ammonites, respectively (2 K 23 13), and everything connected with the worship of such gods. When Pharaoh, remonstrating against the departure of the children of Israel, exhorted them to offer sacrifices to their God in Egypt, Moses said: "Shall we sacrifice the abomination of the Egyptians (i.e. sacrifice to gods whose temple they had made, by which they were taboo, 'ōvēḇāh, to the Israelites) before your eyes, and will they not stone us?" (Ex 8 26).

It is to be noted that, not only the heathen idol itself, but anything offered to or associated with the idol, the paraphernalia of the forbidden cult, was called an "abomination," for it "is an abomination to Jeh thy God" (Dt 7 25-26).

The Deuteronomic writer here adds, in terms quite significant of the point of view and the spirit of the whole law: "Neither shalt thou bring an abomination into thy house and thus become a thing set apart [קְרֵם=tabooed] like unto it; thou shalt utterly detest it and utterly abhor it, for it is a thing set apart [tabooed]. To 'ōvēḇāh is even used as synonymous with "idol" or heathen deity, as in Isa 44 19; Dt 32 16; 2 K 23 13; and esp. Ex 8 22 ff.

Everything akin to magic or divination is likewise an abomination ('ōvēḇāh); as are sexual transgressions (Dt 23 5; 23 18; 24 4), esp. incest and other unnatural offenses: "For all these abominations have the men of the land done, that were before you" (Lev 18 27; cf. Ezek 8 15).

It is to be noted, however, that some of these lesser offenses have a higher ethical and spiritual meaning: as where "divers measures, a great and a small," are forbidden (Dt 25 14–16); and in Prov where "lying lips" (12 22), "the proud in heart"
“Abomination Abound”

ABOMINATION

(15), “the way of the wicked” (15, 9), “evil devices” (15, 26), and ‘he that justifieth the wicked, and he that condemneth the righteous’ (17) are said to be an abomination in God’s sight. At last prophet and sage are found to unite in declaring that any sacrifice, however free from physical blemish, if offered without purity of motive, is an abomination: ‘Bring no more an oblation of falsehood—an incense of abomination it is to me’ (Isa 1:13; cf Jer 7:10). “The sacrifice of the wicked” and the prayer of him “that turneth away his ear from hearing the law,” are equally an abomination (see Prov 16:8; 21:27; 29:8).

And the word “abomination” in the AV is **shâkeq**, **shâkeq** or **shâkeq**. It expresses generally a somewhat less degree of horror or religious aversion than **tô ’êbhâh**, but sometimes seems to stand about on a level with it in meaning. In Dt 14:3, for example, we have the command, “Thou shalt not eat any abominable thing” as introductory to the laws prohibiting the use of the unclean animals (see **clean and Unclean Animals**), and the word there used is **tô ’êbhâh**. But in Lev 11:10–13, 20:23–41:42; Isa 66:17; and in Ezek 8:10 **shekeq** is the word used and likewise applied to the prohibited animals. It is also in Lev 14:5, when it is commanded, “Ye shall not make yourselves abominable.” Then **shekeq** is often used parallel to or together with **tô ’êbhâh** of that which should be held as detestable, as for instance, of idols and idolatrous practices (see esp. Dt 29:17; Hos 9:10; Jer 4:1; 13:27; 16:18; Ezek 11:18–21; 20:7.8). It is used exactly as **tô ’êbhâh** is used as applied to Milcom, the god of the Ammonites, which is spoken of as the detestable thing (**shekeq**) of the Ammonites (1 K 11:5). Still even in such cases **tô ’êbhâh** seems to be the stronger word and to express that which is in the highest degree abhorrent.

The other word used to express a somewhat kindred idea of abhorrence and to “abomination” in AV is **pìggâl**; but it is used in the Heb Bible only of sacrificial flesh that has become stale, putrid, tainted (see Lev 7:18; 19:7; Ezek 4:14; Isa 66:4). Driver maintains that it occurs only as a “technical term for such stale sacrificial flesh as has not been eaten within the prescribed time,” and, accordingly, he would everywhere render it specifically “refuse meat.” Compare lehem mîphî’al, “the leavened bread” (from pî’al, “to leaven”) (Lev 26:17). A chief basis in the Heb Bible for the subject for Christians grows out of the use of the term in the expression “abomination of desolation” (Mt 24:15 and Mk 13:14), which see. See also **Abhor**.

**LITERATURE**—Commentators ad loc. Rabbinical lit. in point. Driver; Weiss; Grätz; Gesch. der Juden, IV, p.15.

Geo. B. Eager

“And these ye shall have in abomination among the birds: they shall not be eaten, they are an abomination: the eagle, and the gier-eagle, and the ospray, and the kite, and the falcon after its kind, every raven after its kind, and the ostrich, and the night-hawk, and the sea-mew, and the hawk after its kind, and the little owl, and the coragorn, and the night-hawk, and the owl, and the horned owl, and the vulture, and the kite, and the griffon vulture after its kind, and the hoopoe, and the bat.” Dt 14:12–18 gives the glede in addition.

Each of these birds is treated in order in this work. There are two reasons why Moses pronounced them an abomination for food. Either they had rank, offensive, tough flesh, or they were connected with religious superstition.

The gier-eagle, ospray, kite, glede, falcon, raven, night-hawk, sea-mew, hawk, little owl, coragorn, great owl, horned owl, pelican and vulture were offensive because they were birds of prey or ate carrion or fish until the flesh partook of their food. Young ostriches have sweet, tender flesh and the eggs are edible also. In putting these birds among the abominations Moses must have been thinking of grown specimens. (Ostriches live to a remarkable age and on account of the distances they cover, their speed in locomotion, their muscles become almost as hard as bone.)

There is a trace of his early Egypt training when he placed the stork and the heron on this list. These birds, and the eagle as well, are named in all countries known at that time and were used for food according to the superstitions of different nations. These three were closely related to the ibis which was sacred in Egypt and it is probable that they were protected by Moses for this reason, since they were eaten by other nations at that time and cranes are used for food today by natives of our south-eastern coast states and are to be found in the markets of our western coast. The veneration for the stork that exists throughout the civilized world today had its origin in Pal. Noting the devotion of mated pairs and their tender care for the young the Hebrews named the bird **hâdâbâh**, which means kindness. Carried down the history of ages with many other survivals from Egypt, these storks were the better liked. Later, Pliny wrote that no one would touch a stork, but everyone was fond of cranes. In Thessaly it was a capital crime to kill a stork.

This change from regarding the stork as a delicacy to its protection by a death penalty merely indicates the hold the characteristics of the bird had taken on people as it became better known, and also the spread of the regard in which it was held throughout Pal. The hoopoe (q.v.) was offensive to Moses on account of extremely filthy nesting habits, but was considered a great delicacy when captured in migration by residents of southern Europe. See also **Abomination; Birds, Unclean**.

Gene Stratton-Porter

ABOMINATION OF DESOLATION, des-o-lâ’shun: The Heb root for abomination is **dâl, shâkeq**; “to be filthy,” “to loathe,” “to abhor,” from which is derived **dâl** or **shâkeq**. It is generally translated “abomination.” This word, which was used to describe specific forms of idolatrous worship that were specially abhorrent, as of the Ammonites (1 K 11:5), of the Moabites (1 K 11:7; 2 K 13:13), and also of Daniel, was offensive to Moses on account of the abominations of the Ahiram and the Ammonites, or shâkeq (Jer 16:14). In Daniel, the word is used of the abomination of desolation, which was the symbol of the destruction of Jerusalem, and the destruction of the temple, and the destruction of the nation of Israel.

Since the invasion of the Assyrians and Chaldaean, the Jewish people, both of the Northern and of the Southern Kingdom, had been without political
independence. From the Chaldaeans the rulership of Judea had been transferred to the Persians, and from the Persians, after an interval of 200 years, to Alexander the Great.

1. The Historical From the beginning of the Perso-sover- Background eigny, the Jews had been permitted to retain their religious and political commonwealth, thus establishing a state under the rulership of priests, for the high priest was not only the highest functionary of the cult, but also the chief magistrate in so far as these prerogatives were not exercised by the king of the conquering nation. Ezra had given a new significance to the drōh by having it read to the whole congregation of Israel and by his vigorous enforcement of the law of separation from the Gentiles. His emphasis on the law introduced the period of legalism and finical interpretation of the letter which called forth some of the bitterest invectives of our Saviour. Specialists of the law known as “scribes” devoted themselves to its study and subtle interpretation, and the priests beheld the highest moral accomplishment in the extremely conscientious observance of every precept. But in opposition to this class, there were those who, influenced by the Hellenistic culture, interpreted the law more liberally, and these were inclined to a more “liberal” policy. Thus two opposing parties were developed: the Hellenistic, and the party of the Pious, or the Chasidim, ḥasdāhim (Hasdaeans, 1 Macc 4:22; 7:13), who held fast to the strict ideal of the scribes. The former gradually came into ascendancy. Judea was rapidly becoming Hellenistic in all phases of its political, social and religious life, and the “Pious” were dwindling to a small minority. This was the situation when Antiochus Epiphanes set out to suppress the last vestige of the Jewish cult by the application of brute force.

Antiochus IV, son of Antiochus the Great, became the successor of his brother, Seleucus IV, who had been murdered by his minister, Heliodorus, as king of Syria (175–164 BC). He was by nature Epiphanes a despot; eccentric and unreliable; sometimes a spendthrift in his liberality, fraternizing in an affected manner with those of lower station; sometimes cruel and tyrannical, as witness his aggressions against Judea. Polybius (26.10) tells us that his eccentric ideas caused some to speak of him as a man of pure motive and humble character, who “hated to be despised.” The epithet Epiphanes is an abbreviation of theos epiphanis, which is the designation given himself by Antiochus on his coins, and means “the god who appears or reveals himself.” Egyptian writers translate the inscription, “God which comes forth,” namely, like the burning sun, Horos, on the horizon, thus identifying the king with the triumphal, appearing god. When Antiochus Epiphanes arose to the throne, Onias III, as high priest, was the leader of the old orthodox party in Judea; the head of the Hellenists was his own brother Jesus, or, as he preferred to designate himself, Jason, this being the Gr. form of his name and indicating the trend of his mind. Jason promised the king large sums of money for the transfer of the office of high priest from his brother to himself and the privilege of erecting a gymnasium and a temple to Phallus, and for the granting of the privilege “to enroll the inhabitants of Jerusalem as citizens of Antioch.” Antiochus gladly agreed to everything. Onias was removed; the commission of Alexander the Great, and henceforth the process of Hellenizing Judea was pushed energetically. The Jewish cult was not attacked, but the “legal institutions were set aside, and illegal practices were introduced” (2 Macc 4:11).

A gymnasium was erected outside the castle; the youth of Jerusalem exercised themselves in the gymnastic art of the Greeks, and even priests left their services at the altar to take part in the contest of the palaestra. The disregard of Jewish custom went so far that many artificially removed the traces from the religious and profane part and with characteristic liberality, Jason even sent a contribution to the sacrifices in honor of Heracles on the occasion of the quadrennial festivities in Tyre.

Under these conditions it is not surprising that Antiochus should have had both the inclination and the courage to undertake the

3. The The total eradication of the Jewish religious Suppression of, and the establishment of Gr of the polytheism in its stead. The observance of the Jewish Cult ane of all Jewish laws, especially those relating to the Sabbath and to circumcision, were forbidden under pain of death. The Jewish cult was set aside, and in all cities of Judea, sacrifices must be brought to the pagan deities. Representatives of the crown everywhere enforced the edict. Once a month a search was instituted, and whoever had secreted a copy of the Law or had observed the rite of circumcision was condemned. In Jerusalem, Alexander the Great, on the Feast of Chislev of the year 145 aet Sol, i.e. in December 168 BC, a pagan altar was built on the Great Altar of Burnt Sacrifices, and on the 25th of Chislev, sacrifice was brought on this altar for the first time (1 Macc 1:19). This evidently was the “abomination of desolation.” The sacrifice, according to 2 Macc was brought to the Olympic Zeus, to whom the temple of Jerusalem had been dedicated. At the feast of Dionysus, the Jews were obliged to march in the Bacchanalian procession, crowned with laurel leaves. Christ applies the phrase to what was to take place at the advance of the Romans against Jerusalem. They who would behold the “abomination of desolation” standing in the holy place, He bids flee to the mountains, which probably refers to the advance of the Rom army into the city and temple, carrying standards which bore images of the Rom gods and were the objects of pagan worship.

Abstinence

ABOUND, a-bound', ABUNDANCE, a-bun'-dans, ABUNDANT, a-bun'-dant, -LY, a-bun'-dant-ly. These words represent in the EV a considerable variety of different words in the Heb and Gr original. Interpreters, at times, try to give these words some form of the stem rāb̄, signifying “to cast together,” “to increase.” In Prov 8:24 the primary idea is “to be heavy” (root kāḇāhāth); in De 33:19 and Job 22:11 it is “to overwhelm” (kāḇāhā) [kāḇāhā]; in Job 36:31 it is “to plait together,” “to augment,” “to multiply” (“maḇkāḇāh from kāḇāhār); in Isa 47:9 it is “strength” (“yōḇādā”) [yōḇādā]; in 1 K 18:41 it is “tumult,” “crowd” (“ḥāmōnā”); in Ezek 5:12 it is “to fill to satisfy” (“itar); in Isa 15:7 it is “excellence” (“yūṭāhār”) and in 66:11 “a full breast” (“ṣē”). In Jer 33:6 it is “copiousness” (“āṯīrēth from āṯārāh). In several passages (e.g. Ezek 16:49; Ps 105:30; Isa 86:12) RV gives other and better renderings than AV. In the NT the periodos, perissēdou, perissēlla, etc., are the usual words for “abundant,” “abound,” “abundance,” etc (the adj. signifies “exceeding some number or measure”). A slight formal difference of conception may be noted in pleonēēs, which suggests that the abundance has relation to quantity. In Rom 5:20 the two words stand in the closest connection: “Where sin abounded [by its increase] grace abounded more exceedingly [was rich beyond measure].” In Mk 13:44; Lk 21:4; 2 Cor 8:20; 12:7; Rev 18:15 RV gives improved
renderings instead of “abundance,” and in Titus 3:6 and 2 Pet 1:11 instead of “abundantly.”

J. R. V. PELT

ABOUT, a-bout': The use of this word as prep. in the sense of “around,” is confined to the OT.

In the NT, generally an adverb, for Gr ἐπί, ἄμοιν or ἀμφότεροι. It appears in the prophetic usage of ἑλλάτον, referring to what is about to be, i.e. on the point of occurring, or immediately impending, amending AV, in Acts 5:35; 27:2; Rev 12:4, etc.

ABRAHAM, Abr-a-ham: I. Name.—In the OT, when applied to the patriarch, the name appears as אָבִי, 'abbārim, up to Gen 17:5; thereafter always as אָבִי, 'abbārim. Two other personal names are sons are named אָבִי, 'abbārim. The identity of this name with 'abbārim cannot be doubted in view of the variation between 'abbārān and 'abbērān, 'abbēshālām and 'abḥēshālām, etc. A. also appears in the list at Karnak of places conquered by Shoshenq I: "'bron (no. 72) represents אָבִי, 'abbārim, with which Spiegelberg (Aegypt. Rundglossen zum AT, 14) proposes to connect the preceding name (no. 71) pē 'bēr, so that the whole would read "the field of Abram." Outside of Palestine this name (Abūrām) has come to light just where the Biblical tradition would lead us to expect to find it, viz., in Babylonia (e.g. in a contract of the reign of Artaxerxes, second predecessor of Hammurabi; also for the aunt (!) of Esarhaddon 680-609 BC). Unnaqd has recently found it, among documents from Dibbat dating from the Hammurabi dynasty, in the forms A-ba-am-ra-am, A-ba-ar-a-ram, as well as A-ba-ra-ra-ma.

Until this latest discovery of the apparently full, historical form of the Bab equivalent, the best that could be done with the etymology was to make the first constituent "father of" (construct -i rather than suffix -i), and the second constituent "Ram," a proper name or an abbreviation of a name. (Yet observe above its use in Assyria for a woman; cf. Aršāqta; Aršaigil.) Some were inclined rather to conceive that the second element was a mystery, like the second element in the majority of names beginning with 'abb and 'āb, "father." Other would see it in the full cuneiform writing of the name, with the case-ending am, indicates that the noun "father" is in the accusative, governed by the verb which furnishes the second component, and that this verb therefore is probably רָמִי (Heb דֶּבֶן, ḳibham) "to love," etc.; so that the name would mean something like "he loves the [his] father." (So Unnaqd, also Ranke in Greßmann's work, "Sage und Geschichte in den Patriarchenerzählungen," ZATW [1910], 3.) Analogy proves that this is in the Bab fashion of the period, and that judging from the various writings of this and similar names, its pronunciation was not far from Arab ra'dāhān, 'abhrām.

While the name is thus not "Hebrew" in origin, it made itself thoroughly at home among the Hebrews, and to their ears conveyed the same idea, the meaning of the name, almost without the slightest change, in the Bab-Aramaic dialect, as the original Hebrew form.

II. Career.—Briefly summed up, the career was as follows: A., endowed with Jeh's promise of limitless blessing, leaves Haran with his brother Nahor and Haran (Gen 11:29; 22:2). He thus enters into a fresh connection with this race geographically by his birthplace, which is called 'ar-kādidah (see Uv), and by the place of his pre-Canaanite residence, Haran in the Aramaean region. The purely Sem ancestry of his descendants through Isaac is indicated by his marriage with his own half-sister (Gen 20:12), and still further emphasized by the choice for his daughter-in-law of Rebekah, descended from both his brother Nahor and Hanan (Gen 11:29; 22:2). Both the beginning and the end of the residence in Haran are left chronologically undetermined, for the new beginning of the narrative at Gen 12:1 is not intended by the earlier writer as a chronological sequence, though it has been so understood, e.g. by Stephen (Acts 7:4). All that is definite in point of time is that an Aramaean period of residence intervened between the Bab period and the Palestinian career of A. It is left to a comparison of the Bib, data with one another and with the data of archaeology, to fix the opening of A.'s career in Pal not far from the middle of the 20th cc.

III. Career.—Briefly summed up, the career was as follows: A., endowed with Jeh's promise of limitless blessing, leaves Haran with his brother Nahor and Haran (Gen 11:29; 22:2). He thus enters into a fresh connection with this race geographically by his birthplace, which is called 'ar-kādidah (see Uv), and by the place of his pre-Canaanite residence, Haran in the Aramaean region. The purely Sem ancestry of his descendants through Isaac is indicated by his marriage with his own half-sister (Gen 20:12), and still further emphasized by the choice for his daughter-in-law of Rebekah, descended from both his brother Nahor and Hanan (Gen 11:29; 22:2). Both the beginning and the end of the residence in Haran are left chronologically undetermined, for the new beginning of the narrative at Gen 12:1 is not intended by the earlier writer as a chronological sequence, though it has been so understood, e.g. by Stephen (Acts 7:4). All that is definite in point of time is that an Aramaean period of residence intervened between the Bab period and the Palestinian career of A. It is left to a comparison of the Bib, data with one another and with the data of archaeology, to fix the opening of A.'s career in Pal not far from the middle of the 20th cc.
the path to Canaan with an augmented train, at Bethel A. and Lot find it necessary to part company. Lot and his dependents choose for residence the great Jordan Depression; A. follows the backbone of the land southward to Hebron, where he settles, not in the historic city, but in its gates "by the great trees" (LXX sing., "oak") of Mamre.

Affiliation between A. and the local Amoritish chieftains is strengthened by a brief campaign, in which all unite their available forces under the leadership of Lot from an Elamite king and his confederates from Babylonia. The pursuit leads them as far as the Lebanon region. On the return they are met by Melchizedek, king of Salem, priest of 'el elyon, and blessed by him in his priestly capacity, which A. recognizes by presenting him with a tithe of the spoils. A.'s anxiety for a son to be the bearer of the divine promises conferred upon a "seed" yet unborn should have been relieved by the solemn renewal thereof in a formal covenant, with precise specifications of God's gracious purpose. But human desire cannot wait upon divine wisdom, and the Egypt woman Hagar bears to A. a son, Ishmael, whose existence from its inception is supposed to come from nowhere within the patriarchal household. The sign of circumcision and the change of names are given in confirmation of the covenant still unrealized, together with specification of the time and the person that should bring the fulfillment. The symbolized outwardly this climax of the Divine favor serves also for an intercessory colloquy, in which A. is granted the deliverance of Lot in the impending overthrow of Sodom. Lot and his family, saved thus by the pity and Divine mercy, exhibit in the moral traits shown in their escape and subsequent life the degeneration naturally to be expected from their corrupt environment. Moabites and Ammonites are traced in their origin to these cousins of Jacob and Esau.

Removal to the South-country did not mean permanent residence in a single spot, but rather a succession of more or less temporary resting-places. The first of these probably was in the Negeb in the district of Zaraith, with whose king, Abimelech, A. and his wife had an experience similar to the earlier one with the Pharaoh. The birth of Isaac was followed by the expulsion of Ishmael and his mother by Abimelech, the neighboring king as a result of a case of misalliance with the neighbors by covenant at Beer-sheba. Even the birth of Isaac, however, did not end the discipline of A.'s faith in the promise, for a Divine command to sacrifice the life of this son was accepted bona fide, and only the sudden interposition of a Divine prohibition prevented its obedient execution. The death of Sarah became the occasion for A.'s acquisition of the first permanent holding of Pal soil, the nucleus of his promised inheritance, and at the same time suggested the probable approach of his own death. This thought led to immediate provision for a future seed to inherit through Isaac, a provision realized in Isaac's marriage with Rebekah, granddaughter of A.'s brother Nahor and of Milcah the sister of Lot. But a numerous progeny unassociated with the promise grew up in A.'s household, children of Keturah, a woman who appears to have had the rank of wife after Sarah's death, and of other women unnamed, who were his concubines. Though this last phase of inactivity in the Negeb, A. was interred at Hebron, in his purchased possession, the spot with which Som tradition has continued to associate him to this day.

IV. Conditions of Life.—The life of A. in its outward features may be considered under the following topics: economic, social, political and cultural conditions.

A.'s manner of life may best be described by the adjective "semi-nomadic," and illustrated by a somewhat similar conditions prevailingly.

1. Economic Conditions: those border-communities of the East that fringe the Syrian and Arabian deserts. Residence is in tents, wealth consists of flocks, herds and slaves, and there is no ownership of ground, only at most a proprietorship in wells and tombs. All this in common with the nomad. But A. was a farmer, or rather, intermittent hint of habit, unlike the pure Bedawi, a limited amount of agriculture, and finally a sense of divergence from the Ishmael type—all of which tend to assimilate the semi-nomadic A. to the fixed conditions about him. As might naturally be expected, such a condition is an unstable equilibrium, which tends, in the family of A. as in the history of all border-tribes of the desert, to settle back one way or the other, the city-life of Lot, now into the desert-life of Ishmael.

The head of a family, under these conditions, becomes at the same time the chief of a tribe, that live together under patriarchal rule though they be separate. The son thus borne, Ishmael, is A.'s legal son and heir. When Isaac is later borne by Sarah, the elder son is disinherited by divine command (Gen 21:10–12) against A.'s wish which represented the prevailing law, and custom (CH, §105). The "maid-servants" mentioned in the inventories of A.'s wealth (Gen 12:16; 24:35) doubtless furnished the "concubines" mentioned in Gen 26:6 as having borne sons to him. Both mothers and children were slaves, but had the right to freedom, though not to inheritance, on the death of the father (CH, §171). After Sarah's death another woman seems to have succeeded to the position of legal wife, though if so the sons she bore were disinherited like the son of Sarah, by A. for that purpose (cf. CH, §§144, 146). The "men of his house" (Gen 17:27) consisted of two classes, the "home-born" slaves (Gen 14:14; 17:12, 23:27) and the "purchased" slaves (ib). The extent of the patriarchal tribe may be surmised from the number (318) of men among them capable of bearing arms, near the beginning of A.'s career, yet after his separation from Lot, and recruited seemingly from the "home-born" class exclusively (Gen 14:14). Over this entire establishment he ruled with a power more, rather than less, absolute than that exhibited in detail in the CH: more absolute, because A. was independent of any permanent superior authority, and so combined in his own person the powers of the Baal paterfamilias and of the Can city-king. Social relations outside of the family-tribe may best be considered under the next heading.

It is natural that the chieftain of so considerable an organism should appear an attractive ally and a formidable foe to any of the smaller political units of his environment.

2. Social Conditions: the sense of kinship. The family relations depicted in Gen conform to and are illuminated by the social facts of CH: "Marriage among the Early Babylonians and Hebrews," Princeton Theol. Review, April, 1908.) There is one legal wife, Sarah, who, because persistently childless, obtains the coveted offspring by giving her own bondmaid to A. for that purpose (cf. CH, §§144, 146). The son thus borne, Ishmael, is A.'s legal son and heir. When Isaac is later borne by Sarah, the elder son is disinherited by divine command (Gen 21:10–12) against A.'s wish which represented the prevailing law, and custom (CH, §105)
dantly clear from the Biblical tradition and verified from other sources. Egypt was the only great power which did not maintain diplomatic or political contact after leaving the East. In the section of Gen which describes this contact with the Pharaoh A. is suitably represented as playing no political rôle, but as profiting by his stay in Egypt only through an incidental social relation: when this terminates he is promptly ejected. The rôle of conqueror of Chedorlaomer, the Elamite invader, would be quite out of keeping with A.'s political status elsewhere, if we were compelled by the narrative in Gen 14 to suppose a parallel between the forces of A. and those of the united Bab armies. What that chapter requires is in fact no more than a midnight surprise, by A.'s hand (including the forces of confederate chieftains), of a rear-guard or baggage-train of the Babylonians inadequately manned and picketed. ("Slaughter" is quite too strong a rendering of the original hakkōth, "smiting," ver 17.) Respect shows A. by the kings of Salem (ver 18), of Sodom (ver 21) and of Geras (Gen 14 14–16) was no more than might be expected from their relative degrees of political importance, although a moral precedence, assumed in the tradition, may well have contributed to this respect.

Recent archaeological research has revolutionized our conception of the degree of culture which A. could have possessed and therefore 4. Cultural plane which literature had attained or which it was expected by A. to attain.

BC is sufficient witness to the opportunities open to the man of birth and wealth in that day for the interchange of lofty thought. And, without recourse to A.'s youth in Babylonia, we may assert even for the scenes of A.'s mature life the presence of the same culture, on the basis of a variety of facts, the testimony of which converges in this point, that Canaan in the second millennium BC was at the center of the intellectual life of the East and cannot have failed to afford, to such of its inhabitants as chose to avail themselves of it, every opportunity for enjoying the fruits of others' culture and for recording the substance of their thoughts, emotions and activities.

V. CHINESE A culture's third life may be considered under the rubrics of religion, ethics and personal traits.

The religion of A. centered in his faith in one God, who, through his prophet, gave him the right of heaven and earth (Gen 14 22; 20 17), but not as the only God. So far as the Biblical tradition goes, A.'s monotheism was not aggressive (otherwise in later Jewish tradition), and it is theoretically possible to attribute to him a polytheism more than to his "other god" or "false god," which would admit the coexistence with his deity, say, of the "gods which [his] fathers served" (Josh 24 14), or the identity with his deity of the supreme god of some Canaanite neighbor (Gen 14 18). Yet the difference between these types of monotheism does not really belong to the sphere of religion as such, but rather to that of speculative philosophical thought. As religion, monotheism is just monothelionism, and it asserts itself in corollaries drawn by the intellect as far as the law of the monothelionist and the intellectual life applies it. For A. Jah not only was alone God; he was also his personal God in a closeness of fellowship (Gen 24 40; 48 15) that has made him for three religions the type of the pious man (2 Ch 2 7; Isa 41 8; Jas 2 23; note the Arab. name of Hebron is El-balad, i.e. the "city") and underwritten the moral attributes of justice (Gen 18 25), righteousness (18 19), faithfulness (24 27), wisdom (20 6), goodness (19 19), mercy (20 6). These qualities were expected of men, and their greater variety and mixture were punished by Jah (Gen 18 19; 20 11). He manifested Himself in dreams (Gen 20 3), visions (15 1) and theophanies (18 1), including the voice or apparition of the Divine malʾāḵ or messenger ("angel") (Gen 16 7; 22 11). On man's part, in addition to divine moral requirements and special commands, the expression of his religious nature was expected in sacrifice. This bringing of offerings to the deity was diligently practiced by A., as indicated by the mention of his erection of an altar at each successive residence. Alongside of this act of sacrifice there is sometimes mention of a "calling upon the name" of Jah (cf 1 K 18 24; Ps 116 13 f.). This publication of his faith, doubtless in the presence of Canaanites, had its counterpart also in the public regard in which he was held as a "prophet" or spokesman for God (Gen 20 7). His mediation showed itself also in intercessory prayer (Gen 17 20 for Ishmael, 18 23–32; cf 19 29 for Lot; 20 17 for Abimelech), which was but a phase of the act of prayer. The usual accompaniment of sacrifice, a professional priesthood, does not occur in A.'s family, yet he recognizes priestly prerogatives in the person of Melchizedek, priest-king of Salem (Gen 14 20). Plurally speaking, there were round the taking of oaths (Gen 14 22; 24 3) and the sealing of covenants (21 23). Other customs associated with religion are circumcision (Gen 17 10–14), given to A. as the sign of the perpetual covenant, binding the priest's due; and child-sacrifice (22 2.12), enjoined upon A. only to be expressly forbidden, approved for its spirit but interdicted in its practice.

As already indicated, the ethical attributes of God were regarded by A. as the ethical requirement of man. This in theory. In 2. Morality the sphere of applied ethics and casuistry A.'s practice, at least, fell short of this ideal, even in the few incidents of his life preserved by the Bible. It is clear that the claims from virtue were offensive to the moral sense of A.'s biographer, but we are left in the dark as to A.'s sense of moral obliquity. (The "dust and ashes" of Gen 27 possesses no moral implication.) The demands of candor and honesty are not satisfactorily met, certainly not in the matter of Sarah's relationship to him (Gen 12 11–13; 20 2; cf 11–13), perhaps not in the matter of Isaac's intended sacrifice (22 5–8). To impose our own monomymous concept of marriage upon the patriarch would be unfair, in view of the different standard of his age and land. It is to his credit that no such scandals are recorded in his life and family "as blackest record of Lot (Gen 19 38), Reuben (35 22) and Judah (38 15–18). Similarly, A.'s story shows only regard for life and property, both in respecting the rights of others and in expecting the same from them—the antipodes of Ishmael's character (Gen 16 12). Outside the bounds of strictly ethical requirement, A.'s personality displayed certain characteristics that not only mark him out 3. Personal distinctly among the figures of history, traits but do him great credit as a singularly the ethist and artist of his day. Of his trust and reverence enough has been said under the head of religion. But this love that is the "fulfilling of the law," manifested in such piety toward God, showed itself toward men in exceptional

VI. Significance in the History of Religion.—As a significant figure throughout the Bible, and plays an important role in extra-Biblical Jewish tradition and in the Mohammedan religion.

It is naturally as progenitor of the people of Israel, “the seed of A.,” as they are often termed, that A. stands out most prominently in the OT books. Sometimes the contrast between him as an individual and his numerous progeny serves to point a lesson (Isa 51:2; Ezek 33:24; perhaps Mal 2:10; of 15). “The God of A.” serves as a designation of Jeh from the time of Israel to the latest period, and it is by this title that Moses identifies the God who has sent him with the ancestral deity of the children of Israel (Ex 3:15). Men remembered in these later times that this God appeared to A. in the ophery (Ex 6:3). The common origin of his people who worshipped other gods (Josh 24:3) chose him (Neh 9:7), led him, redeemed him (Isa 29:22) and made him the recipient of those special blessings (Mic 7:20) which were by covenant and oath (so every larger historical book, also the historical Ps 105 [ver 9]), notably the inheritance of the land of Canaan (Dt 6:10). Nor was A.’s religious personality forgotten by his posterity: he was remembered by them as God’s friend (31:1-6); Isa 41:8). He is, in the very recollection of whom by God would offset the horror with which the sins of his descendants inspired Jeh (Dt 9:27).

When we pass to the NT we are astonished at the wealth and variety of allusion to A. As in the OT, his position of ancestor lends him much of his significance, not only as ancestor of Israel (Acts 13:26), but specifically as ancestor, now of the Levitical priest (He 7:5), now of the Messiah (Mt 1:1), now, by the peculiarly Christian doctrine of the unity of believers in Christ, of Christian believers (Gal 3:16,29). All that A. the ancestor received through David, the covenant, is handed on to his posterity, inherited by his seed and passes under the collective names of the promise (Rom 4:13), the blessing (Gal 3:14), mercy (Lk 1:34), the oath (Lk 1:73), the covenant (Acts 3:25). The way in which A. responded to this peculiar goodness of God makes him the type of the Christian believer. Though so far in the past that he was used as a measure of antiquity (Jn 8:58), he is declared to have “seen” Messiah’s “day” (Jn 8:56). It is his faith in the Divine promise which, just because it was for him peculiarly unsupported by any evidence of the senses, becomes the type of the faith that leads to justification (Rom 4:3), and therefore in this sense again he is the “father” of Christians, as believers (Rom 4:11). For that promise to A. was, after all, a “prophecy beforehand” of the Christian gospel, in that it embraced “all the families of the earth” (Gal 3:8). Of this exalted honor, James reminds us, A. proved himself worthy, not by an inoperative faith, but by “his righteous works” (Jas 2:21; cf Jas 8:39). The obedience that faith wrought in him is what is especially praised by the author of Hebrews (He 11:8,17). In accordance with this high estimate of the patriarch’s piety, we read of his eternal felicity, not only in the current conceptions of the Jews (parable, Lk 16), but also in the express assurance of Our Lord (Mt 8:11; Lk 13:28). Incidental historical allusions to the events of A.’s life are frequent in the NT, but do not add anything to this estimation of piety, nor should it be thought that his cause of death is the subject of NT records.

Outside the Scriptures we have abundant evidence of the way that A. was regarded by his posterity in the Jewish nation. The oldest of these witnesses, Ecclesiastes, contains none of the accretions of the later A’s. His praise of A. is confined to the same three great facts that appealed to the canonical writers, viz. his glory as Israel’s ancestor, his election to be recipient of the covenant, and his piety (including perhaps a peculiarly strong devotion to God’s temple) (see Ex 21-31). The improbable and often unworthy and even grotesque features of A.’s career and character in the later rabbinical midrashim are of no religious significance, beyond the evidence they afford of the way A.’s unique position and piety were cherished by the Jews.

To Mohammed A. is of importance in several ways. He is mentioned in no less than 185 verses of the Koran, more than any other character. He is also the prototype of the series of prophets sent by God.

4. In the Koran

He is the common ancestor of the Arab and the Jew. He plays the same role of religious reformer over against his idolatrous kinsmen as Mohammed himself over against his. He is the first pure temple for God’s worship (at Mecca). As in the Bible so in the Koran A. is the recipient of the Divine covenant for himself and for his posterity, and exhibits in his character the appropriate virtues of one so highly favored: faith, righteousness, purity of heart, gratitude, diligence, compassion. He receives marked tokens of the Divine favor in the shape of deliverance, guidance, visions, angelic messages (no theophanies for Mohammed!), miracles, assurance of resurrection and entrance into paradise. He is called “Imam of the peoples!” (2:118).

VII. Interpretations of the Story of A. Other than the Bible

Now that there are writers in both ancient and modern times who have, from various standpoints, interpreted the person and career of A. otherwise than as what it purports to be, viz. the real experiences of a human person named Abraham, these views may be divided among three: sticking to the motive or impulse which they believe to have led to the creation of this story in the mind of its author or authors.

Philo’s treat on A. bears as alternative titles, “On the Life of the Wise Man Made Perfect by Instruction, or, On the Unwritten Law.” A.’s life is not for him a history of aogical interpretation but an allegory by which these things are embodied, and in which the Sarah-Hagar episode in Gal 4:21-31 belongs to this type of exposition (cf allégro6romena, ver 24), of which there are also a few other instances in his epistles; yet to infer from this that Paul shared Philo’s general attitude toward the patriarchal narrative would be unwarranted, since his use of this method is incidental, exceptional, and merely confirmatory of points already established by sound reason. “Luther compares it to a painting which decorates a house already built” (Schaft, “Galatians,” “Excursus”).

As to Philo A. is the personification of a certain type of humanity, so to some modern writers he is the personification of the Heb nation or of a tribe belonging to the Heb group. This view,
which is indeed very widely held with respect to the patriarchal figures in general, furnishes so many more difficulties in its specific application to A. than to the others, that Theory has been rejected in A.'s case even by some who have adopted it for figures elsewhere, for instance, by Professor Abiram, the late liberalized Meyer (Die Israeliten und ihre Nachbarstämme, 250; cf also note on p. 251), speaking of his earlier opinion, acknowledges that, at the time when he regarded the assertion of Stade as proved that Jacob and Isaac were tribes, he then even he 'still recognized A. as a mythical figure and originally a god.' A similar differentiation of A. from the rest is true of most of the other adherents of the views about to be mentioned. Hence also Wellhausen says (Prolegomenen, 317): "Only A. is certainly no name of a person, like Isaac and Lot; he is rather ambiguous anyway. We dare not of course on that account hold him in this connection as an historical personage; rather than that he might be a free creation of unconscious fiction. He is probably the youngest figure in this company and appears to have been only at a relatively late date put before his son Isaac."

Urged popularly by Noldeke (Im neuen Reich [1871], i, 4, up and taken up by other scholars, especially in the case of A., the view gained general currency among those Mythical who denied the historicity of Gen. Theory that the patriarchs were old deities. From this relatively high estate, it was held, they had fallen to the plane of mere mortals (though with remnants of the hero or even demigod here and there visible) on which they appear in Gen. A new phase of this mythical theory has been developed in the elaboration by Winckler and others of their astral-theology of the Bab world, in which the worship of A. as the moon-god by the Semites of Pal plays a part. A.'s traditional origin connects him with Ur and Haran, leading centers of the moon-cult. Apart from this fact the arguments relied upon to establish this identification of A. with Sin may be judged by the following samples: "When further the consort of A. bears the name Sarah, and one of the women among his closest relations the name Milcah, this gives food for thought, since these names correspond precisely with the titles of the female deities worshipped at Haran. That this moon-god Sin. Above all, however, the number 318, that became connected with the image of Winckler, A. Jeremias and others of this school are received by those who in fact differ from them with respect to A. in little save the answer to the question, what deity was A. (see e.g. Meyer, op. cit., 226 f., 236 f.)."

Gunkel (Genesis, Introduction), in insisting upon the resemblance of the patriarchal narrative to the "sagas" of other primitive peoples, draws attention both to the human traits and to the very early origin of the material embodied in our present book of Gen. First as stories orally circulated, then as stories committed to writing, and finally as a number of collections or groups of such stories formed into a cycle, the A.-narratives, like the Jacob- and the Joseph-narratives, grew through a long and complex literary history. Gressmann (op. cit., 9-34) amends Gunkel's results, in applying to them the principles of primitive literary development laid down by Professor Wundt in his Volkerpsychologie. He holds that the A.-narratives is a series of fairy-stories, of international diffusion and unknown origin, which have been given "a local habitation and a name" by attaching to them the (ex hypothesi) then common name of A. (similarly Lot, etc) and associating them with the country nearest to the wilderness of Judaea, the home of their authors, viz. about Hebron and the Dead Sea. A high antiquity (1500-1100 BC) is asserted for these stories, their astonishing accuracy in details wherever they can be tested by extra-Biblical tradition is conceded, as also the probability that, "though many riddles still remain unsolved, yet many other traditions will be cleared up by new discoveries" of archaeology.

ABRAHAM, BOOK OF. See Apocalyptic Literature. ABRAHAM'S BOSOM, בָּשֹׁם בָּשֹׁם בָּשֹׁם בָּשֹׁם (koldosos 'Abradon; κόλδος Α':) Figurative. The expression occurs in Lk 16 22, 23, in the parable of the Rich Man and Lazarus, to denote the place of repose to which Lazarus was carried after his death. The fig. is suggested by the practice of the guest to pour the liquid libation over the deceased's head. The fig. of Jesus quite corresponds with this idea. "Abraham's bosom" is not spoken of as in "Hades," but rather as distinguished from it (Lk 16 23)—a place of blessedness by itself. There Abraham receives, as at a feast, the truly faithful, and admits them to closest intimacy. It may be regarded as equivalent to the "Paradise" of Lk 23 43. See HADES; PARADISE.

JAMES OHR

ABRAM, אברם. See ABRAHAM.

ABRECH, אברך: Transliteration of the Heb אברך, 'abrikh, in Gen 41 43 RVm, of which both the origin and the meaning are mysterious. The form abrekh, 'abrekh, 'abrek, 'abreekh, 'abrek. The form as hiph. imp. instead of הברך, 'habrikh, is indefensible, while the other two derivations are fallacious.

The surmises of Egyptologists are almost without number, and none are conclusive. Skinner in Comm. on Gen. selects "attention!" after Spiegelberg, as best. Speaker's Comm. suggests "rejoice thou" from ab-nek. BDB gives preference to the Coptic a-bar-ik, "prostrate thyself.

The most satisfying is the Assyrian abarakku, meaning "grand vizier" or "friend of a king," as suggested by Fried. Delitzsch; for Bab laws and customs were dominant in western Asia, and the Hyksos, through whom such titles as A. was carried into Egypt, were ruling there at that time.

EDWARD MACK

ABROAD, a-bród: An idiomatic rendering of ἀπευθεῖα, ἀπεικότα (lit. "arrived"), "come abroad" is used in Rom 16 19 to indicate a report that has
been most widely diffused (lit. "did reach unto all"). Similar idiomatic *to* of AV have been replaced in RV by those more literal, as in Mk 4:22; Lk 8:17; Mk 6:14; 1 Thess 5:8. Used also in other idiomatic renderings, as "spread abroad" ( *diaphene*), Mk 3:46; Acts 13:47; 1 Tim 6:65; "scattered abroad," Jn 11:52; Acts 8:1, etc.; in all these cases for the pervasive meaning of the Gr preposition in composition. In Gen 16:5, *huc* means "outside."  
H. E. Jacobs

**ABROAD, SCATTERED.** See Dispersion.

**ABRONAH, a-bröʹná, AV Ebronah (אברונא, 'abbroná):** One of the stations of Israel in the wilderness on the march from Sinai to Kadesh—the station next before that at Ezion-geber on the eastern arm of the Red Sea (Nu 33:34:35).

**ABSALOM, ab’sa-lom (אבסולום, 'abshâlôm, "father is prince," written also Abishal in IK 15:2.10):** David's third son by Maacah, daughter of Talmai, king of Geshur, a small territory between Hamon and Bashan. Absalom was born at Hebron (2 S 3:3), and moved to Jerusalem at an early age, with the transfer of the capital, to Jerusalem, where he spent most of his life. He was a great favorite of his father and of the people as well. His charming manners, his personal beauty, his insinuating ways, together with his love of pomp and royal pretensions, captivated the hearts of the people from the beginning. He lived in great style, drove in a magnificent chariot and had fifty men run before him. Such magnificence produced the desired effect upon the hearts of the young aristocracy of the royal city (2 S 15:1 ff.). When Amnon, his half-brother, ravished his sister Tamar, and David shut his eyes to the grave crime and neglected to administer proper punishment, Absalom became justly enraged, and quietly nourished his anger, but after the lapse of two years carried out a successful plan to avenge his sister's wrongs. He made a great feast for the king's sons at Baal-hazor, to which, among others, Ammon came, only to meet his death at the hands of Absalom's servants (13:1 ff.). To avoid punishment he now fled to the court of his maternal grandfather in Geshur, where he remained three years, or until David, his father, had relented and come to Geshur, to embrace him as a loving son. At the end of three years (15:38) we find Absalom once more in Jerusalem. It was, however, two years later before he was admitted to the royal presence (14:28).

Absalom, again reinstated, lost no opportunity to regain lost prestige, and having his mind made up to succeed his father upon the throne, he forgot the son in the policy against His Father. In promises, especially to the dissatisfied and to those having grievances, imaginary or real, it was but natural that he should have a following. His purpose was clear, namely, to alienate as many as possible from the king, and thus neutralize his influence in the selection of a successor, for he fully realized that the court party, under the influence of Bathsheba, was intent upon having Solomon as the next ruler. By much flattery Absalom stole the hearts of many men in Israel (15:6). How long a period elapsed between his return from Geshur and his open rebellion against his father David is a question which cannot be answered with any degree of certainty. Most authorities regard the forty years of 15:7 as an error and following the Syr and some editions of the LXX, suggest four as the correct text. Whether forty or four, he obtained permission from the king to visit Hebron, the ancient capital, on pretence of paying a vow made by him while at Geshur in case of his safe return to Jerusalem. With two hundred men he repairs to Jerusalem, where the king's presence is missed, and went throughout all the tribes of Israel to stir up the discontented and to assemble them under Absalom's flag at Hebron. Very large numbers obeyed the call, among them Ahithophel, one of David's shrewdest counselors (17:7 ff.).

Reports of the conspiracy at Hebron soon reached the ears of David, who now became thoroughly frightened and lost no time in leaving 4. David's Flight. Under the protection of his most loyal bodyguard he fled to Gilead beyond Jordan. David was kindly received at Mahanaim, where he remained till after the death of his disloyal son. Zadok and Abiathar, two leading priests, were intent upon sharing the fortunes of David; they went so far as to carry the Ark of the Covenant with them out of Jerusalem (15:24). David, however, forced the priests and Levites to take it back to its place in the city and there remain as its guardians. This was a prudent stroke, for many of David's forces in Jerusalem acted as intermediaries, and through their sons and some influential women kept up constant communications with David's army in Gilead (15:24 ff.). Hushai, too, was sent back to Jerusalem, where he professed immediate allegiance to Absalom, who by this time had entered the royal city and had assumed control of the government (16:32 ff.). Hushai, the priests and a few people less conspicuous performed their part well, for the counsel of Ahithophel, who advised immediate action and advance upon the king's forces, while everything was in a panic, was thwarted (17:1 ff.); nay, more, spies were constantly kept in contact with David's headquarters to inform the king of Absalom's plans (17:15 ff.). This delay was fatal to the rebel son. Had he acted upon the shrewd counsel of Ahithophel, David's army might have been conquered at the outset.

When at length Absalom's forces under the generalship of Amasa (17:25) reached Gilead, ample time had been given to David to organize his army, which he divided among his three divisions under the efficient command of three of the greatest and chiefest generals: Joab, Abishai, and Ittai (18:1 ff.). A great battle was fought in the forests of Ephraim. Here the rebel army was utterly routed. No fewer than 20,000 were killed outright, and a still greater number became enemies of the throne in the back forest, perished that day (18:7 ff.). Among the latter was Absalom himself, for while riding upon his mule, his head was caught in the boughs of a great oak, and he met a terrible death in a forked branch. "He was taken up between heaven and earth; and the mule that was under him went on" (18:9). In this position he was found by a soldier who at once ran to inform Joab. The latter without a moment's hesitation, notwithstanding David's positive desire to see the man who had slain his brother thrice darts into the heart of Absalom. To make his death certain and encouraged by the action of the general, ten of Joab's young men "compassed about and smote Absalom, and slew him" (18:13). He was buried in a great pit, close to the spot where he was killed. A great pile of stones was piled up over his body (18:17), in accordance with the custom of dishonoring rebels and great criminals by burying them under great piles of stone (Josh 7:20; 8:20). Thomson informs us that Syriac people to this day cast stones upon the graves of murderers and outlaws (Lk, II, 61).
Absalom

Abstinence

THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

24

The death of Absalom was a source of great grief to the fond and aged father, who forgot the ruler and the king in the tender-hearted parent. His lament at the gate of Mahanaim, though very brief, is a classic, and expresses in tender language the feelings of parents for wayward children in all ages of the world (2 S 18 33).

Little is known of Absalom’s family life, but we read in 14 27 that he had three sons and one daughter. From the language of 18 15, it is inferred that the sons died at an early age.

Absalom’s Tomb: As Absalom had no son to perpetuate his memory ‘he reared up for himself a pillar’ or a monument in the King’s dale, which according to Josephus was two furlongs from Jerusalem (Ant. VII, x, 3). Nothing is known

with certainty about this monument. One of the several tombs on the east side of the Kidron passes under the name of Absalom’s tomb. This finest piece of masonry with its graceful cupola and Ionic pillars must be of comparatively recent origin, probably not earlier than the Rom period.

(1) Father of Mattathias, a captain of the Jewish army (1 Mac. 11 70; Ant. XIII, v. 7).

(2) Father of Jonathan who was sent by Simon Maccabæus to take possession of Joppa; perhaps identical with A (1) (1 Mac. 13 11; Ant. XIII, vi, 4).

(3) One of two envoys of the Jews, mentioned in a letter sent by Lysias to the Jewish nation (2 Mac. 11 17).

ABSENTON, ab’s-a-lon. See Absalom (Apoc).

ABSOULUTION, ab-so-Ã‘l-shun (tr. of Lbs, λάτω, ‘loose,’ etc. and ἀφίημι, ἀφλὴμι, ‘release,’ ‘give up,’ etc): Not a Bib., but an ecclesiastical term, used to designate the official act described in Mt 16 19: ‘Whatsoever thou shalt loose on earth, shall be loosed in heaven,’ and Mt 18 18: ‘What things soever ye shall loose,’ etc. and interpreted by Jn 20 23: ‘Whose soever sins ye forgive, they are forgiven unto them’ (see Keys, Power of). The Roman church regards this as the act of a properly ordained priest, by which, in the sacrament of Penance, he frees from sin one who has confessed and made promise of satisfaction. Protestants regard the promise as given not to any order within the church, but to the congregation of believers, exercised its prerogative through the Christian ministry, as its ordinary executive. They differ as to whether the act be declarative or collative. Luther regarded it as both declarative and collative, since the Word always brings that which it offers. The absolution differs from the general promise of the gospel by individualizing the promise. What the gospel, as read and preached, declares in general, the absolution applies personally. See also Forgiveness.

H. E. Jacobs

ABSTINENCE, ab’s-ti-nens: Abstinence as a form of asceticism reaches back into remote antiquity, and is found among most ancient peoples. It may be defined as a self-discipline which consists in the habitual renunciation, in whole or in part, of the enjoynments of the flesh, with a view to the cultivation of the life of the spirit. In its extreme forms, it bids men to stifle and suppress their physical wants, rather than to subordinate them in the interest of a higher end or purpose, the underlying idea being that the body is the foe of the spirit, and that the regressive extirpation of the natural desires and inclinations by means of fasting, celibacy, voluntary poverty, etc, is “the way of perfection.”

This article will be concerned chiefly with abstinence from food, as dealt with in the Bible. (For other aspects of the subject, see Temperance; Self-Denial; Clean; Uncleanliness; Meat, etc.) Thus limited, abstinence may be either public or private, or partial or entire.

Only one such fast is spoken of as having been instituted and commanded by the Law of Moses, that of the Day of Atonement. This Public Fast is called “the Fast” in Acts 27 9.

Fasts

Four annual fasts were later observed by the Jews in commemoration of the dark days of Jerusalem—the day of the beginning of Nebuchadrezzar’s siege in the tenth month, the day of the capture of the city in the fourteenth month, the day of the anniversaries, etc.), and the fast in the fifth month and the day of Gedaliah’s murder in the seventh month. These are all referred to in Zec 8 19. See Fasts.

It might reasonably be thought that such solemn anniversaries for the sins of the nation should have been kept up with sincerity by the Jews, at least for many years. But Isaiah illustrates how soon even the most outraged feelings of piety or patriotism may grow cold and formal. Wherefore have we fasted and thou seest not?” the exiled Jews cry in their captivity. ‘We have humbled our souls, and thou art no notice.’ Jeh’s swift answer follows: ‘Because your fasting is a mere form! Behold, in the day of your fast ye find your own pleasure and oppress only your labours’ (cf Isa 58 3: Expositor’s Bible, ad loc.). That is to say, so formal has your fasting grown that your ordinary selfish, cruel life goes on just the same. Then Jehovah makes inquest: ‘Is such the fast that I have chosen? to loose the bonds of wickedness, to undo the bands of the yoke, and to let the oppressed go free, and that ye break every yoke? Is it not to deal thy bread to the hungry, and that thou bring to the poor that which thou dost not? to thy house? Then shalt thou call, and Jehovah will answer; thou shalt cry, and he shall say, Here I am’ (vs 5–9). The passage, as George Adam Smith says, fills the earliest, if not the highest place in the glorious succession of Scriptures exalting practical
love, to which belong Isa 61; Mt 25; 1 Cor. 13. The high import is that in God's view character grows rich and life joyful, not by fasts or formal observances, but by acts of unselfish service inspired by a heart of love.

These fasts later fell into utter disuse, but they were revived after the destruction of Jerusalem by the Romans.

Occasional public fasts were proclaimed in Israel, as among other peoples, in seasons of drought or public calamity. It appears according to Jewish accounts, that it was customary to hold them on the second and fifth days of the week, for the reason that Moses was believed to have gone up to Mt. Sinai on the fifth day of the week (Thursday) and to have come down on the second (Monday) (cf. Did., 8; Apos Const., VIII, 23).

In addition to these public solemnities, individuals were in the habit of imposing extra fasts upon themselves (e.g. Jb 8 6; Lk 2 37); and there were some amongst the Pharisees, Fasts who fasted on the second and fifth days of the week all the year round (Lk 18 12, see Lightfoot, ad loc.).

Tacitus alludes to the "frequent fasts" of the Jews (History, V, 4), and describes the spread of fasting among the Gentiles (Cap. II, 40; cf. Tertullian, ad Nat., 1.13). There is abundant evidence that many religious teachers laid down rules concerning fasting for their disciples (cf. Mk 2 18; Mt 9 26; Lk 5 33).

Individuals and sects differ greatly in the degrees of strictness with which they observe fasts. In some fasts among the Jews abstinence from food and drink was observed alike from sunrise to sunset, and from washing and anointing were permitted. In others of a stricter sort, the fast lasted from one sunset till the stars appeared after the next, and not only food and drink, but washing, anointing, and every kind of agreeable activity and even salutations, were prohibited (Schurer, 11, II, 119; Ebersheimer, Life and Times, 1, 665). Such fasting was generally practised in the most ascetic, that is to say, among the Pharisees, formed a part of their most pretentious externalism. On this point the testimony of Mt 6, 16 is confirmed by the Mish.

There arose among the Jews various kinds of ascetics and fasting may be roughly divided into three classes:

4. Abstinence among Different Kinds of Ascetics

(1) The Essenes.—These lived together in colonies, shared all things in common and practised voluntary penance in order to arrive at religious "heaviness" (ab zarah, 200; Siphra, Kethuboth). "Abstain from everything evil and from whatever is like unto it" is a rule found in the Talm (Hulin, 446), as also in the Did (3) — a saying evidently based on Job 31.5. "Abominate the flesh and the world." The Mosaic laws concerning diet are all said by Rabh to be "for the purification of Israel" (Lev. 13) — "to train the Jew in self-discipline."

The question of crowning interest and significance to us is, What attitude did Jesus take toward fasting, or asceticism? The answer is to be sought in the light, first of His practice, and, secondly, of His teaching. There are indications (1) that Jesus had been accounted "the Founder and Example of the ascetic life" (Clem. Alex., Strom, III, 6). By questionable emphasis upon His "forty days" fast, His asceticism from marriage and His voluntary poverty, some have reached the conclusion that complete renunciation of the things of the present was "the way of perfection according to the Saviour."

A fuller and more appreciative study of Jesus' life and spirit must bring us to a different conclusion. Certainly His mode of life is sharply differentiated from the teachings of the Gospels, not only from that of the
Pharisees, but also from that of John the Baptist. Indeed, He exhibited nothing of the asceticism of those illustrious Christian saints, St. Bernard and St. John of the Cross, or even of St. Francis, who "of all ascetics approached most nearly to the spirit of John the Baptist." Jesus did not flee from the world, or eschew the amenities of social life. He contributed to the joyousness of a marriage feast, accepted the hospitality of rich and poor, permitted a vase of very precious ointment to be broken and poured upon His feet, welcomed the society of women, showed tender love to women, and clearly enjoyed the domestic life of the home in Bethany. There is no evidence that He imposed upon Himself any unnecessary austerities. The "forty days" fast (not mentioned in Mk, the oldest authority) is not an event to be related to any necessity imposed by His situation in the wilderness than a self-imposed observance of a law of fasting (cf. Christ's words concerning John the Baptist: "John came neither eating nor drinking"; see the articles on "Asceticism of the Desert," DCG). At any rate, He is not here an example of the traditional asceticism. He stands forth throughout the Gospels "as the living type and embodiment of self-denial," yet the mark of the ascetic are not found in Him. He is the opposite of the ascetic, indeed, so unascetic as to bring upon Him the reproach of being "a gluttonous man and a winebibber" (Mt 11:19; Lk 7:34).

(2) His teaching.—Beyond question, it was, from first to last, "instinctive with the spirit of self-denial." "If a man will not work, let him not eat," is an ever-recurring refrain of His teaching. "Seek ye first the kingdom of God," is ever His categorial imperative (Mt 6:33 AV; Lk 12:31). It is to Him the summum bonum—all desires and strivings which have not as their goal must be suppressed or sacrificed (cf Mt 13:44—46; 19:21; Mk 10:21; Lk 15:8—10; Lk 9:58—60; 14:26 with Mt 6:29—30; Mk 9:43—47; Mt 16:24; Mk 8:34; Lk 9:23). It is as if it were impossible for Him to stumble; he is the condition, implied or expressed, which justifies abstinence from any particular good.

According to the record, Jesus alluded to fasting only once, in the teaching in Mt 6:16—18, where voluntary fasting is presupposed as a religious exercise of His disciples, He warns them against making it the occasion of a parade of piety: "Thou, when thou hast fasted, anoint thy head, and wash thy face; that thou be not seen of men to fast, but of thy Father which is in secret." In short, He sanctions fasting only as a genuine expression of a devout and contrite frame of mind. In Mt 9:14—17 (Mt 2:8—22; Lk 6:38—39) in reply to the question of the disciples of John and of the Pharisees, Jesus refuses to enjoin fasting. He says fasting, as a recognized sign of mourning, would be inconsistent with the joy which "the sons of the bridechamber naturally feel while "the bridegroom is with them." But He adds, suggesting the true reason for fasting, that the days of bereavement will come, and then the outward expression of sorrow will be appropriate. Here, as in the Sermon on the Mount, Jesus sanctions fasting, without enjoining it, as a form through which men spontaneously seek expression of their teaching on the subject may be summarized in the one word, subordination (DCG).

To the form of fasting He attaches little importance, as is seen in the succeeding parables of the Old Garment and the Old Wine-skins. It will not do, He says, to graft the new liberty of the gospel on the body of old observances, and, yet more, to try to force the new system of life into the ancient molds. The new piety must manifest itself in new forms of its own making (Mt 9:16—17; Mk 2:21, 22; Lk 6:36—38). Yet Jesus shows sympathy with the prejudices of the conservatives who cling to the customs of their fathers: "No man having drunk old wine desireth new; for he saith, The old is good." But to the question, Was Jesus an ascetic? we are bound to reply, No. "Asceticism," as Harnack says, "has no place in the gospel at all; what it asks is that we should struggle against Mammon, against care, against selfishness; what it demands and disengages is love—the love that serves and is self-sacrificing—and whoever encumbers Jesus' message with any other kind of asceticism fails to understand it." (What is Christianity? 88).

On the whole, unquestionably, the practice and teachings of the apostles and early Christians were in harmony with the example and teaching of the Master. But a tendency towards asceticism, partly innate, partly transmitted from Jewish legalism, and partly pagan, showed itself among the early Christians. Vita Religiosa and Dualism which found their fullest expression in Monasticism. It is worthy of note that the alleged words of Jesus: "But this kind goeth not out by prayer and fasting" (Mt 9:29; Mt 17:21 AV), are corruptions of the text. (Cf Tob 12:8; Sir 34:26; Lk 2:37). The Oxyrhynchus fragment (disc. 1897) contains a logion with the words 

This saith Jesus. Except ye fast to the world, ye shall in no wise find the Kingdom of God," but the "fasting" here is clearly metaphorical.

Abubus, a-búb'ús ( "Abosus, Abubos"): The father of Piolemy, who deceitfully slew Simon Maccabeus and his sons at Dok near Jericho (1 Macc 16:11—15).

Abundance, a-bun'dant, a-bun'dant. See Abounds.

Abuse, a-bús': "To dishonor," "to make mock of," "to insult;" etc. (1) Tr in the OT from אבש, 'abal, "to do harm," "to defile" (Jgs 19:25), "to make mock of" (1 S 31:4). (2) Tr in the NT from ἀδιστοιχία, arsenokótasia, ἀρσενοκοτία, "one who lives with a male;" a sodomite" (1 Cor 6:9; 1 Tim 1:10; AV "for them that defile themselves with mankind"). (3) In AV 1 Cor 7:31 "as not abusing it," "from ἀρσενοκοτία, katabromon, "to abuse," i.e. misuse; RV "using it to the full," also 1 Cor 9:18. See Use.

Abys, a-bís', THE (ἡ ἀβυσσόν, ἡ ἀβυσσος): In classical Gr the word is always an adj, and is used (1) lit. 'very deep,' "bottomless;" (2) fig. 'unfathomable,' "bottomless;" (3) in the AV but the RV so transliterates ἀβυσσος in each case. The AV renders the Gr by "the deep" in two passages (Lk 8:31; Rom 10:7). In Rev the AV renders by "the bottomless pit" (9:12,11; 11:7, 17; 18:20). In the LXX ἀβυσσόν is the rendering of the Heb word הפן (phôm). According to
primitive Sem cosmogony the earth was supposed to rest on a vast body of water which was the source of all springs of water and rivers (Gen 1:2; Dt 8:7; Ps 24:2; 136). This subterranean ocean is described as "the water under the earth" (Ex 20:4; Dt 5:8). According to Job 41:32 ἄνωμ is the home of the leviathan in which he ploughs his hoary path of foam. The LXX never uses ἀποσσωσ as a rendering of ἀποσσωσις, στηθία (= Sheol = Hades) and probably ἄνωμ never meant the "abode of the dead" which was the ordinary meaning of Sheol. In Ps 149:20 ἄνωμ is used fig., and denotes "many and sore troubles" through which the psalmist has passed (cf Jon 2:5). But in the NT the word ἀποσσωσις means the "abode of demons." In Lk 31 the AV renders "into the deep" (Weymouth and The Twentieth Century NT = "into the bottomless pit"). The demons do not wish to be sent to their place of punishment before their destined time. Mk simply says "out of the country" (5:10). In Rom 10:7 the word is equivalent to Hades, the abode of the dead. In Rev (where the AV renders invariable "the bottomless pit") ἀποσσωσις denotes the abode of evil spirits, but not the place of final punishment; it is therefore to be distinguished from the "take of fire and brimstone" where the beast and his false prophet are, and into which the Devil is to be finally cast (19:20; 20:10). See also Astronomy, III, 7. Thomas Lewis

ABYSSINIA, ab-i-sin'ə. See ETHIOPIA.

ACACIA, a-kă'shə, shittih, the shittah tree of AV, Isa 41:19, and סִנְנָה, ֶשִימֶנְם, acacia wood; shittah wood AV, Ex 25:5.10.15; 26:36.37; 37:1; Dt 10:3.). Shittah (=shittah) is equivalent to the Arab. sant which is now the name of the Acacia Nilotica (NO, Lequminosa), but no doubt the name once included other species of desert acacias. If one particular species is indicated in the OT it is probably the Acacia Senegal—the Arab. Seygal—which yields the well-known gum-arabic. This tree, which has finely bipinnate leaves and globular flowers, grows to a height of twenty feet or more, and its stem may sometimes reach two feet in thickness. The tree often assumes a characteristic umbrella-like form. The wood is close-grained and is not readily attacked by insects. It would be well suited for such purposes as described, the construction of the ark of the covenant, the altar and boards of the tabernacle. Even today these trees survive in considerable numbers around 'Ain Jidy and in the valleys to the south. E. W. G. MASTERMAN

ACATAN, ak'a-tan. See AKA'TAN (Apoc).

ACABBA, ak'a-ba, ak-ə-ba (B, Akkabba, Akkabbi; A, Akāba, Gāba; AV Agaba) = Hagab (Ezr 2:40); see also HAGABA (Neh 7:45); The descendants of A. (temple-servants) returned with Zerubbabel to Jerusalem (1 Esd 5:30).

ACCAD, ak'əd. ACCADIANS, ak-tə-di'əns. See BABYLONIA.

ACCARON, ak'a-rən (Akkaron, Akkarōn): Mentioned in 1 Mac 10:89 AV; a town of the Philistines, known as Ekron (אקרון, ἐκρόν) in OT, which King Alexander gave to Jonathan Maccabaeus as a reward for successful military service in western Palestine. It is also mentioned in the days of the Crusades. See Ekron.

ACCEPT, ak-sept', ACCEPTABLE, ak-sep'ta-b'l, ACCEPTATION, ak-sep'-ta-shən: "To receive with favor," "to take pleasure in," "well-pleasing;" "the act of receiving." Accept, used (1) of sacrifice, "a. thy burnt-sacrifice" (יִתְנָן, ἀποστράτησις, "accept as fat," i.e. receive favorably; Ps 20:3); (2) of persons, "Jeh a. Job" (Job 42:9, 11:7, "to lift up," "take," "receive"); (3) of works, "a. the work of his hands" (Dt 33:11); (4) a. the dedication of the temple (Zech 5:10), "to dedicate it.

In NT (1) of favors, "We a. . . with all thankfulness" (Phil 4:18); (2) of personal appeal, "He a. our exhortation" (2 Cor 8:17); (3) of God's impartiality (Acts 24:3); (4) of patient endurance (Rom 12:12); (5) of acceptable offerings (Rom 12:5). Acceptable, used (1) of justice (יִתְנָן, ἀποστράτησις, "choose, select"); (2) of persons, "more a. than sacrifice" (Prov 21:3); (2) of words (נְנָה, נְנָה, "delight in," "be pleased," "to receive."); (4) of works (Eccl 12:10); (5) of times (תְנָן, ἀποτράπεζα, ἀποτρόπειον, "well received"); (6) a. God (1 Pet 2:2); (7) of patient endurance (יִתְנָן, "grace," "favor") (This is a. with God") (1 Pet 2:20).

Acceptation, used twice to indicate the trustworthiness of the gospel of Christ's saving grace: "worthy of all a."

These words are full of the abundance of God and are rich in comfort to believers. That which makes man, in word, work and character, acceptable to God; and renders it possible for God to accept him, his service and sacrifice, is the fullness of the Divine mercy and grace and forgiveness. He "chose us" and made us, as adopted sons, the heirs of His grace "which He freely bestowed on us in the Beloved" (Eph 1:6; cf 4:7).

DWIGHT M. PRATT

ACCEPTANCE, ak-sep'-təns: A rendering of the Heb יִתְנָן, ἀποστράτησις, "delight," "good," "kind"; remarkably so; in the New Testament: (1) acceptance of Christ as God's favor; (2) the acceptance of mine altar," With "accepted!" and other kindred words it implies redeeming grace as the basis of Divine favor. It is the "living, holy sacrifice" that is "acceptable to God" (Rom 12:1; of Titus 3:4-6).

ACCESS, ak'ses (ἐπιστρώματος, ἐπιστρωμάτος, "leading to or toward," "approach"); Thrice used in the NT to indicate the acceptable way of approach to God and of approach to His favor. Jesus said, "Come to Me, all you that labor and are heavy laden, and I will give you rest." (Mt 11:28). His blood is the "new and living way" (Heb 10:20). Only through Him have we "a. by faith into this grace
Acco, ak’kō (אֶכֶו, 'ēkō; Ἀκκώ, Aekhō; Aκη Ποταμειας, Ακη Ποταμεας; Modern Arab, 'Akba, Eng. Acre; AV Ashb) A town on the Syrian coast about three miles north of Carmel, on a small promontory on the north side of a broad bay that lies between it and the modern town of Haifa. This bay furnishes the best anchorage for ships of any on this coast except that of St. George, at Beirut, and Alexandria at the extreme north. As the situation commanded the approach from the sea to the rich plain of Esdraelon and also the coast route from the north, the city was regarded in ancient times as of greatest importance. At various periods of history was the scene of severe struggles for its possession. It fell within the bounds assigned to the Israelites, particularly to the tribe of Asher, but they were never able to take it (Josh. 19:28; 1 Kings 11:31; 2 Kings 5:14). It was, like Tyre and Sidon, too strong for them to attack and it became indeed a fortress of unusual strength, so that it withstood many a siege, often baffling its assailants. In the period of the Crusades it was the most famous stronghold on the coast, and in very early times it was a place of importance and appears in the Amarna tablets as a possession of the Egyptians. Its governor wrote to his suzerain professing loyalty when the northern towns were falling away (Am. Tab. 17:35; 48:8). The Egyptian suzerainty over the coast, which was established by Thothmes III about 1480 B.C. was apparently lost in the 14th cent., as is indicated in Am. Tab, but was regained under Seti I and his more famous son Ramesses II (1279-1213 B.C.) in the 19th. In the 12th when the Phoen towns seem to have established their independence, Sidon however surpassed her sisters in power and exercised a sort of hegemony over the Phoen towns, at least in the south, and A. was no longer a part of it (Kaw. Philom., 407-51). But when Assyria came upon the scene it had to submit to this power, although it revolted whenever Assyria became weak, as appears from the mention of its subjugation by Sennacherib (ib. 4:46), and by Ashur-bani-pal (ib. 6:28). The latter “quieted” it by a wholesale massacre and then carried into captivity the remaining inhabitants. Upon the downfall of Assyria it passed, together with other Phoen towns, under the dominion of Babylonia and then of Persia, but we have no record of its annals during that period; but it followed the fortunes of the more important cities, Tyre and Sidon. In the Seleucid period (312-65 B.C.) the town became of importance in the contests between the Seleucids and the Ptolemies. The latter occupied it during the struggles that succeeded the death of Alexander and made it their stronghold on the coast and changed the name to Ptolemais, by which it was known in the Gr and Rom period as the seat of the Gr and Rom writers, and in Jos. as well as in NT (1 Mac 5:22; 10:39; 12:48; Acts 21:7). The old name still continued locally and reasserted itself in later times. The Ptolemies held undisputed possession of the place for about 70 years but it was wrested from them by Antiochus III, of Syria, in 219 B.C. and went into the permanent possession of the Seleucids after the decisive victory of Antiochus over Scopas in that year, the result of which was the expulsion of the Ptolemies from Syria, Pal and Phoenicia (Ant., XII, iii, 3). In the dynastic struggles of the Seleucids it fell into the hands of Alexander Bala, who there received the hand of Cleopatra, the daughter of Ptolemy Philometor. This was the period of alliance between them (ib. XIII, iv, 1). Tigranes, king of Armenia, besieged it on his invasion of Syria, but was obliged to relinquish it on the approach of the Romans toward his own dominions (B. J., i, v, 8). Under the Romans Ptolemais became a colony and a metropolis, as is known from its coins, and was of importance, as is attested by Strabo. But the events that followed the conquests of the Saracens, leading to the Crusades, brought it into great prominence. It was captured by the Crusaders in 1110 AD, and remained in their hands until 1187, when it was taken from them by Saladin and its fortifications so strengthened as to render it almost impregnable. The importance of the fortress as a naval base and land was considered so great by the Crusaders that they put forth every effort during two years to recapture it, but all in vain until the arrival of Richard Cœur de Lion and Philip Augustus with reinforcements, and it was one of the most strenuous efforts on their part that the place fell into their hands; but it cost them 100,000 men. The fortifications were repaired and it was afterward committed to the charge of the knights of St. John, by whom it was held for 100 years and received the name of St. Jean d’Acre. It was finally taken by the Saracens in 1291, being the last place held by the Crusaders in Pal. It declined after this and fell into the hands of the Ottomans under Selim I in 1516 and remained mostly in ruins until the 18th cent., when it came into the possession of Jezzar Pasha, who usurped the authority over it and the neighboring district and became practically independent of the Sultan and defied his authority. In 1797 it was attacked by Napoleon but was bravely and successfully defended by the Turks with the help of the English fleet, and Napoleon had to abandon the siege after he had spent two months before it and gained a victory over the French arm at Gabra. It enjoyed a considerable degree of prosperity after this until 1831 when it was besieged by Ibrahim Pasha, of Egypt, and taken, but only after a siege of more than five months in which it suffered the destruction of its walls and many of its buildings. It continued in the hands of the Egyptians until 1840 when it was restored to the Ottomans by the English whose fleet nearly reduced it to ruins in the bombardment. It has recovered somewhat since then and is now a town of some 10,000 inhabitants and the seat of a Mufti, or subdivision of the Vilayet of Beirut. It contains one of the state prisons of the Vilayet, where long-term prisoners are incarcerated. Its former commerce has been almost wholly lost to the town of Haifa, on the south side of the bay, since the latter has a fairly good roadstead, while Acre has none, and the former being the terminus of the railway which connects with the interior and the Damascus-Mecca line, it has naturally supplanted Acre as a center of trade.
II. Accommodated Application of Scripture Passages
1. Interpretation a Science, 2. Scientific Accommodation
III. Double Reference in Scripture
IV. Accommodation in Revelation
1. General Principles, 2/ Accommodation a Feature of Progressive Revelation
3. The Limits of Revelation, 4. The Outcome of Revelation
5. The Question as to Christ's Method

Literature
I. Introductory. —The term "accommodation" is used in three senses which demand careful discrimination and are worthy of separate treatment: (1) the use or application of a Scripture reference in a sense other than the obvious and literal one which lay in the mind and intent of the writer; (2) the theory that a passage, according to its original intent, may have more than one meaning or application; (3) the general principle of adaptation on the part of God in His self-revelation to man's mental and spiritual capacity.

Important issues are involved in the discussion of this subject in each of the three divisions thus presented to us in the various uses of the term. These issues culminate in the supremely important standard principles which underlie the question of God's adaptation of His revelation to men.

II. Accommodated Application of Scripture Passages.—It is obvious that the nature of thought and of language is such as to constitute a key for all human writings, among them the Bible. It is clear that the interpreter and arbitrary exegesis of any passage must be interpreted with precision and in accordance with recognized laws of interpretation. The first and most fundamental of these laws is that a passage is to be interpreted in accordance with the intent of the writer so far as that can be ascertained. The obvious, literal and original meaning always has the right of way. All arbitrary twisting of a passage in order to obtain from it new and remote meanings not justified by the context, or by poetic or misleading phrases.

There is, however, a scientific and legitimate use of the principle of accommodation. For example, it is impossible to determine

2. Scientific Accommodation that a writer's specific application of a general principle is the only one of which it is capable.

A bald and literal statement of fact may involve a general principle which is capable of broad and effective application in other spheres of life and thought than that originally contemplated. It is perfectly legitimate to detach a writer's statement from its context of secondary and incidental detail and give it a harmonious setting of wider application. It will be seen from this that legitimate accommodation involves two things: (1) the acceptance of the author's primary and literal meaning; (2) the extension of that meaning through the establishment of a broader context identical in principle with the original one.

In the article on Quotations in NT (q.v.) the use of the term accommodation here treated in the most general terms, is dealt with in detail. See also Interpretation.

III. Double Reference in Scripture.—The second use of the term accommodation now emerges for discussion. Are we to infer the presence of double reference, or secondary meanings in Scripture? Here again we must distinguish between the legitimate and illegitimate application of a principle. While we wisely deprecate the tendency to look upon Scripture passages as cryptic utterances, we must also recognize that many Scripture references may have more than a single application.

We must recognize in the Scriptures the use of allegory, the peculiar quality of which, as a form of literature, is the double reference to an underlying literal reference. While it is clear that the use of the term in Scripture story of the Bramble-King (Jgs 7:1-15) or the Parables of Our Lord without reference to the double meanings which they involve would be as false and arbitrary as any extreme of allegorizing. The double meaning is of the essence of the literary expression. This does not mean, of course, that the poetry of the Bible, even that of the Prophets and Apocalyptic writers, is to be looked upon as allegorical. On the contrary, only that writing, whether prose or poetry, is to be interpreted in any other than its natural and obvious sense, in connection which we have definite indications of its allegorical character. Figures of speech and poetic expressions are general, these do not belong to the poetical form, are not to be taken as having occult references and allegorical meanings. Dr. A. B. Davidson thus characterizes the prophetic style (OT Prophecy, 171; see also ch 3, para. 2): "Prophecy is not allegorical. The language of prophecy is real as opposed to allegorical, and poetical as opposed to real. When the prophets speak of natural objects or of lower creatures, they do not mean human things or human beings, but these natural objects or creatures themselves. When Joel speaks of locusts, he means those creatures. When he speaks of the sun and moon and stars, he means those bodies. Allegory, therefore, which contains the double reference, in the sense of speaking of one thing while meaning another, is a definite and recognizable literary form with its own proper laws of interpretation. See Allegory.

There is progress in the understanding of Scripture. New reaches of truth are continually being brought to light. By legitimate and natural methods hidden meanings are being discovered, being continually uncovered. It is a well-attested fact that a writer sometimes speaks more wisely than he knows. He is the partially unconscious agent for the expression of a great truth, which has not been written on the page, but for all time. It is not often given to such a really great writer or to his age to recognize all the implications of his thought. Depths of meaning hidden both from the original writer and from earlier interpreters may be disclosed by modern historical and critical study.

The element of permanent value in great literature is due to the fact that the writer imparts a greater truth than can exhaustively be known in any one era. It belongs to all time.

(2) The supernatural factor which has come to the making of Scripture insures that no one man or group of men, that not all men together, can know it exhaustively. It partakes of the inhumanity of God. It is certain, therefore, that it will keep pace with the general progress of man, exhibiting in its various re-uses of meaning as it moves along the stream of history. Improved exegetical apparatus and methods, enlarged investigations into the meanings of thought and knowledge, increased in the tulipage of the Spirit in the growing Kingdom of God, will conspire to draw
up new meanings from the depths of Scripture. The thought of God in any given expression of truth can only be progressively and approximately known by human beings who begin in ignorance and ignorance and thus in the way that is inherent in every human being. 

(3) The supernatural factor in revelation also implies a twofold thought in every important or fundamental statement of Scripture: the thought of God uttered through His Spirit to a man or his generation, and that same thought with reference to the coming ages and to the whole truth which is to be disclosed. Every separate item belonging to an organism of truth would naturally have a twofold reference: first, its significance alone and of itself; second, its significance with reference to the whole of which it is a part. As all great Scriptural truths are thus organically related, it follows that no one of them can be fully known apart from all the others. From which it follows also that in a process of gradual revelation where truths are given successively as men are able to receive them and where each successive truth prepares the way for others which are to follow, every earlier statement will have two ranges of meaning and implications: that which is intrinsic and that which flows from its connection with the entire organism of unfolding truth which finally appears. 

(1) The principles thus far expressed carry us to a certain way of passing an answer to the most important question which arises under this 

3. Prophecy division of the general topic: the and Its Ful- relation between the OT and the NT- fulment through prophecy and its fulfillment. 

(2) (a) The promise made to Abraham (Gen 12 1-3; cf 13 14-18, 15 1-3, etc) and repeated in substance at intervals during the history of Israel (see Ex 6 7; Lev 26 12; Dt 26 17-19; 29 12.13; 2 S 7; 1 Ch 17, etc) is interpreted as having reference to the distant future and as fulfilled in Christ (see Gal 3 for example of this interpretation and also Quotations and its importance to the promise). 

(b) The OT system of sacrifices is looked upon as typical and symbolic, hence, predictive and realized in the death of Christ interpreted as atonement for sin (He 10, etc). 

(c) Prediction and fulfilment of the OT to kings or a king of David's line whose advent and reign are spoken of as interpreted as definite predictions fulfilled in the advent and career of Jesus the Messiah (Ps 2, 16, 22, 110; cf Lk 1 69, etc). 

(d) The historic conception of the servant of Jehovah (Isa 42 1; 44 1; 52 13-53 12; cf Acts 8 32-35) is interpreted as being an anticipatory description of the character and work of Jesus entering in His vicarious sin-bearing death. 

(3) With the details of interpretation as involved in the specific use of OT statements we are not concerned here (see "Quotations," etc) but only with the general principles which underlie all such uses of the OT. The problem is: Can we thus interpret any passage or group of passages in the OT without being guilty of what has been called "pedantic supernaturialism"; that is, of distorting Scripture by interpreting it without regard to its natural historical connections? Is the interpretation of the OT Messianically legitimate or illegitimate accommodation? 

(a) It is a widely accepted canon of modern interpretation that the institutions of OT worship and the various messages of the prophets had an intrinsic contemporary significance. 

(b) But this is not to say that its meaning and value are not invested in the immediate contemporary application. Beyond question the prophet was a man with a message to his own age, but there is nothing incompatible, in that fact, with his having a message, the full significance of which reaches beyond his own age, even into the far distant future. It would serve to clear the air in this whole region if it were only understood that it is precisely upon its grasp of the future that the leverage of a great message for immediate moral uplift rests. The predictive element is a vital part of the contemporary value. 

(c) The material given under the preceding analysis may be dealt with as a whole on the basis of a principle fundamental to the entire OT economy, namely: that each successive age in the history of Israel is dealt with on the basis of truth common to the entire movement of which the history of Israel is but a single phase. It is further to be remembered that relationship between the earlier and later phases is not merely one of logical sequence and essential unity, both doctrinal and historical. By virtue of this fact the predictive element is an essential factor in the doctrines and institutions of the earlier dispensation as originally constituted and delivered to the nation of Israel. Prediction and fulfilment are essential factors in any unified movement begun, advanced and completed according to a single plan in successive periods of time. We have now but to apply this principle in general to the OT material already in hand to reach definite and satisfactory conclusions. 

(4) (a) The promise made to Abraham was a living message addressed directly to him in the immediate circumstances of his life upon which the delivery and acceptance of the promise made a permanent impress; but it was of vaster proportions than could be realized within the compass of a single human life; for it included himself, his posterity, and all mankind in a single circle of promised blessing (see Gal 3 as the point of the immediate, contemporary value of the promise) in the fact that it concerned him not alone but in relationship to the future and to mankind. A prediction was thus imbedded in the very heart of the word of God which was the object of faith—a prediction which served to enshrine his life in the plan of God for all mankind and to fasten his ambition to the service of that plan. The promise was predictive in its essence and in its contemporary meaning (see Beecher, Prophets and Promise, 213). 

(b) So also it is with the Messianic King. The Kingdom as an institution in Israel is described from the beginning as the perpetual mediatorial reign of God upon earth (see Ex 19 5-6; 2 S 7 8-16, etc), and the King in whom the Kingdom centers is God's Son (2 S 7 13.15) and earthly representative. In all this there is much that is immediately contemporaneous. The Kingdom and the Kingship are described in terms of the ideal and that ideal is used in every age as the ground of immediate appeal to loyalty and devotion on the part of the King. None less the predictive element lies at the center of the representation. The very first recorded expression of the Messianic promise to David involves the prediction of unconditional perpetuity to his house, and thus grasps
the entire future. More than this, the characteristics, the functions, the dignities of the king are so described (Ps 102; Isa 9 6, 7) as to make it clear that the conditions of the Kingship could be met only by one endowed permanently by God and exercising divine functions in a world-wide spiritual empire. Such a King being described and such a Kingdom being promised, the recipients of it, of necessity, were set to judge the present and scrutinize the future for its realization. The conception is, in its original meaning and expression, essentially predictive.

(c) Very closely allied with this conception of the Messianic King is the prophetic ideal of the Servant of Jehovah. Looked at in its original context we at once discover that it is the ideal delineation of a mediatiorial service to men in behalf of Jehovah—which has a certain meaning of fulfilment in any person who exhibits the Divine character by teaching the truth and ministering to human need (for application of the term see Isa 49 5, 6, 7; 50 10; esp. 45 1). But the service is described in such exalted terms, the devotion exacted by it is so high, that, in the application of the ideal as a test to the present and to the nation at large, the mind is inevitably thrown into the future and centered upon a supremely endowed individual to come, who is by preeminence the Servant of Jehovah.

(d) The same principle may be applied with equal effectiveness to the matter of Israel's sacrifice. In the original sense of the word sacrifice this term is qualified: "There is no truth and no institution can exhaustively be known until it has run a course in history. For example, the ideas embodied in the Messianic Kingship and the conception of the Servant of Jehovah should be known only in the light of history. Only in view of the actual struggles and failures of successive kings and successive generations of the people to realize such ideals could their real significance be disclosed. Moreover, only by historic process of preparation could such ideals ultimately be realized. This is preeminently true of the OT sacrifices. It is clear that the NT conception of the significance of OT sacrifice in connection with the death of Christ is based upon the belief that the idea embodied in the original institution could be fulfilled only in the voluntary sacrifice of Christ (see Heb 10 1–14). This view is justified by the facts. Dr. Davidson (op. cit., 299) holds that the predictive element in the OT was in the way it covered the imperfection of the OT. While the imperfect, inherent, could be revealed only in experience. As they gradually deepened a sense of need which they could not satisfy, more and more clearly they pointed away from themselves to that transaction which alone could realize in fact what they express in symbol. A harmony such as obtained between OT sacrifice and the death of Christ could only be the result of design. It is all one movement, one fundamental operation; historically presupposed and prepared for by anticipation, and historically realized. OT sacrifice was instituted both to prepare and to prepare the way for the sacrifice of Christ in the very process of fulfilling its natural historic function in the economy of Israel."

iv. Accommodation

1. General

Adjustment to the nature of the human Principles understanding. That is clearly not a revelation which does not reveal. A disclosure of God's character and ways to men involves the use and control of the human spirit in accordance with its constitution and laws. The doctrine of inspiration inseparable from that of revelation implies such a divine control of human faculties as to enable them, still freely working within their own normal sphere, to apprehend and interpret truth otherwise beyond their reach.

2. The Bible teaches that in the height and depth of His being God is unsearchable. His mind and the human mind are quantitatively incomparable. Man cannot by searching find out God. His ways are No our ways and His thoughts are not our thoughts.

3. But, on the other hand, the Bible affirms with equal emphasis the essential qualitative kinship of the divine and the human constitutions. God is spirit and man is spirit. The image of God and made known to man. This two principles together affirm the necessity and the possibility of revelation. Revelation, considered as an exceptional order of experience due to acts of God's will in accord with the principle of making Himself known in personal relationship with man, is necessary because man's finite nature needs guidance. Revelation is possible because man is capable of such guidance. The Bible affirms that God's spirit is in man's thoughts, but that they may become ours because God can utter them so that we can receive them.

4. Two these two principles lead to a most important conclusion. In all discussions of the principle of accommodation it is to be remembered that the capacity of the human mind to construct does not measure its capacity to receive and appropriate. The human mind can be taught what it cannot independently discover. The capacity of the human mind to receive is limited by the capacity of his pupils to deal unaided with a subject of study. He is limited only by their capacity to follow him in his processes of thought and exposition. The determining factor in revelation, which is a true revelation, is not the capacity of the mind of God which stamps itself upon the kindred and plastic mind of man.

1. The beginning of revelation. Since man's experience is organically conditioned he is under the law of growth. The personal mental and spiritual life is related to his experience. While it is true that his tendencies are innate, so that he is compelled to think and to feel in certain definite ways, yet it is true that he can neither think nor feel at all except as experience presents material for thought. Man must live in order to learn. He must, therefore, learn gradually. This fact conditions all revelation. Since it must deal with men it must be progressive, and since it must be progressive it must necessarily involve, in its earlier stages, the principle of accommodation. In order to gain access to man's mind it must take him where he is and link itself with his natural aptitudes and native modes of thought. Since revelation involves the creative form of the mind of God in order that a right relationship with Him may be established, it enters both the
intellectual and moral life of the human race and must accommodate itself to the humble beginnings of early human experience. The chief problem of revelation seems to have been to bring these crude beginnings within the scope of a movement that was to carry the whole of mankind, and to the complete satisfaction of the principle of accommodation to early human experience with a view to progress is accomplished by doing what at first thought seems to negate the very principle upon which the mental and moral life of man must ultimately rest. (a) It involves the authoritative revelations of incomplete and merely tentative truths. (b) It involves also the positive enactment of rudimentary and imperfect morality.

In both these particulars Scripture has accommodated itself to crude early notions and placed the seal of authority upon principles which are outgrown and discarded within the limits of Scripture itself. But in so doing Scripture has saved the very interests it has seemed to imperil by virtue of two features of the human constitution which in themselves lay hold upon perfection and serve to bind together the crude beginnings and the mature achievements of the human race. These two principles are (c) the idea of truth; (d) the idea of obligation.

(2) It is mainly due to these two factors of human nature that any progress in truth and conduct is possible to men. What is true or right in matter of speech can find its way into the judgment of different individuals and of different ages. But the August and compelling twin convictions of truth and right, as absolute, eternal, authoritative, are present from the beginning of human history to the end of it. Scripture seizes upon the fact that these great ideas may be enforced through crude human conceptions and at very rudimentary stages of culture, and enforcing them by means of revelation and imperative law brings man to the step of truth and right and fosters his advance to larger conceptions and broader applications of both fundamental principles. Canon Moyley in discussing this principle of accommodation on its moral side, its necessity and its fruitfulness, says: "How can the law properly fulfill its object of correcting and improving the moral standard of men, unless it first maintains in obligation the standard which already exists? Those crude delineated conceptions, which it tends ultimately to purify and perfect into the modern, are indispensable inroding the religious man who accepts it as a guide from going to school to Nature and human experience for such information. All this, of course, without touching upon disputed points or debated questions of fact, involves, from the point of view of the Divine mind to which all things are known, and of the human mind to which certain facts of Nature hidden in antiquity have been disclosed, the principles of accommodation. Over against this we must set certain contrasting facts:

(b) The Scripture shows a constant tendency to transcend itself and to bring the teaching of the truth to a higher level. The simple, primitive ideas and rites of the patriarchal age are succeeded by the era of organized national life with its ideal of unity and the intensified sense of national calling and destiny under the leadership of God. The national idea of church and kingdom broadens out into the universal conception and world-wide mission of Christ. But, the same, even in the OT, vast gives way to the burning ethical realities of the Incarnate Life. The self-limitation of the Incarnation broadens out into the world-wide potencies of the era of the Spirit who uses the letter of Scripture as the instrument of His universal ministry. It is thus seen that by the progressive method through a cumulative process God has gradually transcended the limitation of His instruments while at the same time He has continuously broadened and deepened the Spirit of man to receive His self-disclosure.

(c) More than this, Scripture throughout is marked by a certain distinct and unmistakable quality of timelessness. It continually urges and suggests the infinite, the eternal, the unchangeable. It is part of the task of revelation to anticipate so as to guide progress. At every stage it keeps the minds of men on the stretch with a truth that they are not able at that stage easily to apprehend. The inexhaustible which is the result of truth are everywhere implied. Prophets and Apostles are continually in travail with truths brought to their own ages from afar. The great fundamental verities of Scripture are stated with uncompromising fulness and finality. There is no accommodation to human weakness or error.
its ideals, its standards, its conditions are absolute and inviolate.

Not only has Israel certain fundamental ideas which are peculiar to herself, but there has been an organizing spirit, an "unique spirit of inspiration" which has modified and transformed the materials held by her in common with her Sem kindred. Even her inherited ideas and institutions are transformed and infused with new meanings. We note the modification of Sem customs, as for example in blood revenge, by which savagery has been mitigated and evil associations eliminated. We note the paucity of mythological material. If the stories of Adam, Abraham, Isaac, Jacob, Simeon were originally mythological they have ceased to be such in the Bible. They have been humanized and stripped of superhuman features. (See "Pable," HGH, 220 ff.)

If we yield to the current hypothesis as to the Babylonian background of the narratives in Gen, we are still more profoundly impressed with that unique assimilative power, working in Israel, which has made the Biblical writers to eradicate the deep-seated polytheism of the Bab documents and to stamp upon them the inimitable features of their own high monotheism (see BABYLONIA). We note the reserve of Scripture, the constant restraint exercised upon the imagination, the chaste and doctrinal sobriety in the Bible references to angels and demons, in its Apocalyptic imagery, in its Mosaician promises, in its doctrines of rewards and punishments. In all these particulars the Bible stands unique by contrast, not merely with popular thought, but with the extra-canonical lit. of the Jewish people (see DEMONS, etc.).

We come at this point upon a most central and difficult problem. It is, of course, alleged that Christ adopted the attitude of composite, which was also one of acco, as comodation, in popular views con- to Christ's cerning angels and demons, etc. It Method is disputed whether this goes back to the essential accommodation involved in the self-limiting of the Incarnation so that as man He should share the views of His contemporaries, or whether, with wider knowledge, He accommodated Himself for pedagogical purposes towards the ignorant and unbelieving about Him (see DCC, art. "Accommodation"). The question is complicated by our ignorance of the facts. We cannot say that Jesus accommodated Himself to the ignorance of the populace unless it was only the prophets of holy day who, based upon the truth or falseness of the popular theory. It is not our province in this article to enter upon that discussion (see INCARNATION and KENOsis).

We can only point out that the reserve of the NT and the absence of all imaginative extravagance shows that if accommodation has been applied it is most strictly limited in its scope. In this it is in harmony with the entire method of Scripture, where the ignorance of men is regarded in the presentation of God's truth, while at the same time their growing minds are protected against the errors which would lead them astray from the direct path of progress into the whole truth reserved in the Divine counsel.

LITERATURE.—(c) For the first division of the subject consult standard works on Science of Interpretation and Homiletics sub loc. (b) For the second division, among others, Dr. A. B. Davison, OT Prophecy; Dr. Willis J. Beecher, Prophets and Promise. (c) For the third division, the most helpful single work is one entitled: Mosby, Rational Ideas in Early Ages, published by Longmans as "Oriental".

ACCOMPLISH, a-kom'plish: Richly represented in the OT by seven Heb synonyms and in the NT by five Gr (AV); signifying in Heb (1) "to complete" (Lam 4 11); (2) "to fulfill" (Dnl 9 2); (3) "to execute" (1 K 5 9); (4) "to set apart" i.e. "consecrate" (Lev 22 21); (5) "to establish" (Jer 44 25 AV); (6) "to have pleasure in" (Job 14 6); (7) "to perfect" (Ps 64 6); in Gr (1) "to finish" (Acts 21 3); (2) "to be established" (He 9 6); (3) "to be fulfilled" (Lk 2 6); (4) "to fill out" (Lk 9 31); (5) "to complete" (Lk 12 50).

ACCORD, a-kord', ACCORDING, ACCORD- INGLY, a-kord'ing-il: In OT פֶּן, poh, "mouth," "to fight with one accord" (Josh 9 2). לְבָּטֶה, l^b^t^h, "according to the mouth of," "according to their families" (Gen 47 12, "acc. to [the number of] their little ones" RVm). In Isa 59 18 the same Heb word פֶּן, k'at, is rendered "according to" and "accordingly." In NT ἐρωτάσας, homothu- maōn, indicative of harmony of mind or action, (Acts 1 14; 2 46; 7 57; 18 12) and κατά, kait, "of the same mind... acc. to Christ Jesus" (Rom 15 5); ἀπερεκατόρτως, autosmatos, "of itself," "without constraint," "opened to them of its own accord" (Acts 12 10), i.e. without human agency of Lev 26 14; 27 9; Mk 4 25; Acts 20 15; autho- retos, of his own free choice" (2 Cor 8 17). God "will render to every man according to his works" (Rom 2 6), that is, agreeably to the nature of his works (1 Cor 3 8), but salvation is not according to works (2 Tim 1 9); Titus 3 5). See DEED.

M. O. EVANS

ACCONS, ak'os (Ἀκός, Hakobh), The grand-father of Eupolemus, whom Judas Maccabaeus put on his list to Rome in 161 B.C. with a "league of amity and confederacy" (1 Mace 8 17). The name occurs in the OT as Hakkoz (Yâhâ'î, hakbōb), who was a priest in the reign of David (1 ch 24 10).

ACCOUNT, a-kount'. See ACCOUNTABILITY.

ACCOUNTABILITY, a-koun-ta-bi-lij'i-ti: The general teaching of Scripture on this subject is summarized in Rom 14 12: "So that each one of you should, not according to his own account of al Principles himself to God." But this implies, on the one hand, the existence of a Moral Ruler of the universe, whose will is revealed, and, on the other, the possibility of knowing authoritative knowledge of what are the will. In Rom 14 15 it is expressly laid down that, "where no law is, neither is there transgression"; but, lest this might seem to exclude from accountability those to whom the law of Moses was not given, it is shown that even heathen had the law to some extent revealed in conscience; so that they are "without excuse" (Rom 1 20). "For as many as have sinned without the law shall also perish without the law: and as many as have sinned under the law shall be judged by the law" (Rom 2 12). So says Paul in a passage which is one of the profoundest discussions on the subject of accountability, and with his sentiment agrees exactly the word of Our Lord on the same subject, in Lk 12 47 48: "And that servant, who knew his lord's will, and made not ready, nor did according to his will, shall be beaten with many stripes; but he that knew not, and did things worthy of stripes, shall be beaten with few stripes. And to whosoever much is given, of him shall (e) be required; and to whom much is committed, of him much will they ask the more." There is a gradual development of accountability accompanying the growth of a human being from infancy to maturity; and there is a similar development in...
the race, as knowledge grows from less to more. In the full light of the gospel human beings are far more responsible than they were in earlier stages of moral and spiritual development and the doom to which they will be exposed on the day of account will be heavy in proportion to their privileges. This may seem to put too great a premium on ignorance; and a real difficulty arises when we say that, the more of moral sensitivity there is, the greater is the guilt; because, as is well known, moral sensitiveness can be lost through persistent disregard of conscience; from which it might seem to follow that the way to lighten guilt would be to lose the gift of moral sensitivity. There must, however, be a difference between the responsibility of a conscience that has never been enlightened and that of one which, having once been enlightened, has lost, through neglect or recklessness, the goodness once possessed. In the practice of the law, for example, it is often claimed that a crime committed under the influence of intoxication should be condoned; yet everyone must feel how different this is from innocence, and that, before a higher tribunal, the culprit will be held to be twice guilty—first, of the sin of drunkenness and then of the crime.

Wherever civilization is so advanced that there exists a code of public law, with punishments provided to fit the popular perception, there goes on a constant education in the sense of accountability; and even the Immortality heathen mind, in classical times, had advanced so far as to believe in a judgment beyond the veil, to which each had to appear before the tribunal of Rhadamanthus, Minos and Aeusaeus, to have their station and degree in the underworld decided according to the deeds done in the body. How early the Hebrews had made as much progress has to be discussed in connection with the doctrine of immortality; but it is certain that, before the OT canon closed, they believed not only in a judgment after death but in resurrection, by which the sense of accountability was fastened far more firmly on the popular mind. Long before, however, there was awakened by the sacred literature the sense of a judgment of God going on during the present life and expressing itself in everyone's condition. The history of the world was the history of the events through which the world had to pass. The events through which the world had to pass were the steps of the good man, but retribution sooner or later struck down the wicked. It was from the difficulty of reconciling with this belief the fact of life that the skepticism of Hebraic thought arose; but by the same constraint the patriarchal mind was pushed forward in the direction of the full doctrine of immortality. This came with the advent of Him who brought life and immortality to light by His gospel (2 Tim 1:10). In the mind of Jesus not only were resurrection, judgment and immortality unquestionable postulates; but He was brought into a special connection with accountability through His consciousness of being the Judge of mankind; and, in His numerous references to the Last Judgment, He developed the principles upon which the conscience will then be tried, and by which accordingly it ought now to try itself. In this connection the Parable of the Talents is of special significance; but it is by the grandiloquent picture of the scene itself, which follows in the same chapter of the First Gospel, that the mind of Christendom has been most powerfully influenced. Reference has already been made to the discussions at the commencement of the Epistle to the Romans, which each has its place. By some the apostle John has been supposed to revert to the OT notion of a judgment proceeding now in place of coming at the Last Day; but Weiss (Der holländische Lehrbegriff, II, 9) has proved that this is a mistake.

Up to this point we have spoken of individual accountability; but the subject becomes more complicated when we think of the

3. Joint and Corporate persons. From the first the human mind has been occupied with the guilt of Adam's first sin. There is a solidarity in the human race, and the inheritance of evil is too obvious to be denied even by the most optimistic. There is, however, from being agreement as to the relatives of one generation to this evil legacy; some contending fiercely against the idea that the individual can have any personal responsibility for a sin hidden in a past so distant and shadowy, while others maintain that the misery which has certainly been inherited by all can only be justified in a world governed by a God of justice if the guilt of all precedes the misery. The question enters deeply into the Pauline scheme, although at the most critical point it is much disputed what the Apostle's real position is. While joint responsibility burdens the individual conscience, it may, at the same time, be said to lighten it. Thus, in Ezek 18 one of the most weighty ethical discussions to be found in Holy Writ is introduced with the words, "The fathers ate the grapes, and the children's teeth are set on edge," which proves to be a way of saying that the responsibility of children is lightened, if not abolished, through their connection with their parents. In the same way, at the present time, the sense of responsibility is enfeebled in many minds through the control over character and destiny ascribed to heredity and environment. Even criminality is excused on the ground that many have never had a chance of virtue, and it is contended that to know everything is to forgive everything. There can be no doubt that, as the agents of trusts and partnerships, men will allow themselves to do what they would never have thought of in private business; and in a crowd the individual sustains psychological modifications by which he is made to act very differently from his ordinary self. In the actions of nations, such as war, there is a vast and solemn responsibility somewhere; but it is often difficult to say whether in the ruler, the ministry or the people. So interesting and perplexing are such problems often that a morality for bodies of people, as distinguished from individuals, is felt by many to be the great desideratum. Both hands by what is called the guilt of Adam's first sin.

On this subject something will be found in most of the works on either philosophical or Christian ethics; see esp. Lemm's Christliche Ethik, 242 ff.

James Stalker

ACCOZ, ak'oz (Akkos, Akblos; RV AKKOS, q.v.): 1 Esd 5:38, head of one of the priestly families, which returned from the Exile, but was unable to prove its descent, when the register was searched. See also Ezr 2:61.

ACCURSED, a-kur'sed, a-kur'st: In the Book of Josh (6 17:18; 7 11.12.13.15) and I Ch (2 7) "accursed" (or "accursed thing" or "thing accursed") is the AV rendering of the Heb word, ἐξερήμωσις, hērem. The RV consistently uses "devoted" or "devoted thing," which the AV also adopts in Lev 27:21.28.29 and in Nu 18:14. "Cursed thing" is the rendering in two passages (Dt 7:26; 13:17); and in one passage (Ezk 44:29 AV) "devoted thing" is used. In four places the RV renders the word hērem (of Jeremiah) as "devoted thing" (Is 34:5; 43:28; Mal 3:24; [4 6]) whilst in another passage (Zec 14:11) "utter destruction"
is adopted in tr. These various renderings are due to the fact that the word harem sometimes means the act of devoting or banning (or the condition or state resulting therefrom) and sometimes the object devoted or banned. We occasionally find all three renderings, e.g. Acts 15 21: "the chief of the things which should have been utterly destroyed," AV (lit. "the chief part of the ban"); 1 K 20 42: "a man whom I appointed to utter destruction," AV (lit. "a man of my ban") ("banning"). The root-word meant "to separate," "abut off." The Arab, harem denoted the precincts of the temple at Mecca, and also the women's apartment (whence the word harem). In Heb the word always suggested "separating" or "devoting to God." Just as לַדוֹח, ᾧδοχ, meant "holy" or "consecrated to the service" of Jehovah, and so not liable to be used for ordinary or secular purposes, so the stem of harem meant "devoting" to Jehovah anything which would, if spared, corrupt or contaminate the religious life of Israel, with the further idea of destroying (things) or exterminating (persons) as the surest way of avoiding such contamination. Everything that might paganize or affect the unique character of the religion of Israel was banned, e.g. idols (Dt 7 26); idolatrous persons (Ex 22 20); idolatrous cities (Dt 27 19). The cities of the confederacy of the Jebusites flourished—were to be banned (Dt 20 16-18). The ban did not always apply to the gold and silver of lootet cities (Jos 6 24). Such valuable articles were to be placed in the "treasury of the house of Yahweh," probably indicating a slackening of the rigid custom which involved the total destruction of the spoil. According to Nu 18 14, "everything devoted in Israel" belonged to Aaron, and Ezk 44 29 AV ordained that "everything devoted" should belong to the priest (cf Zer 10 8). In the NT "accursed" is the AV rendering of ἄνθιματα (q.v.).

Thomas Lewis

ACUSER, a-καί'αρ: This word, not found in the O.T., is the rendering of two Gr words: (1) ἄργωρ, ἀργόρος, that is, a prosecutor, or plaintiff in a lawsuit, or one who speaks in a derogatory way of another (Acts 23 30; 25 16; 18; Rev 12 10); (2) ἀκαίης, ἀκαίης, meaning adversary, or enemy. This word is rendered "accusing" in the AV and "slanderer" in the RVR and the ARV (2 Tim 3 3; Titus 2 3). According to the rabbinic teaching Satan, or the devil, was regarded as hostile to God and man, and that it was to accuse man, or to put him in the place of, or to stand in the stead of, the priest and the Levite, is the basic thought in this word. It is used three times (Job 6 6f; Zec 3 1f; Rev 12 10).

W. W. Davies

ACELDAMA, a-α'ελ-δά-μα. See ASELJEM.

ACHAIA, a-καί'α (Ἀχαια, Ἀχαΐα): The smallest est country in the Peloponnesus lying along the southern shore of the Corinthian Gulf, north of Arcadia and east of Elis. The original inhabitants were Locians; but these were crowded out later by the Achaeans, who came from the East. According to Herodotus, the founder formed twelve cities, many of which retain their original names to this day. These cities were on the coast and formed a consideration of smaller communities, which in the last century of the independent history of Greece attained to great importance (Achaean League). In Rom times the term Achaia was used to include the whole of Greece, exclusive of Thessaly. Today Achaia forms the third largest of the six provinces, and contains a population of nearly a quarter of a million. The old Achaean League was renovated in 280 BC, but became more important in 251, when Aratus of Sicyon was chosen commander-in-chief. This great man increased the power of the League and gave it an excellent constitution, which our own great practical politicians, Hamilton and Madison, consulted, adopting many of its prominent devices, when they set about framing the Constitution of the United States. In 146 BC Corinth was destroyed and the League broken up (Acts 15 23); and the whole of Greece, under the name of Achaia, was transformed into a Roman province, which was divided into two separate provinces, Macedonia and Achaia, in 27 BC.

In Acts 20 2 'Greece' means Achaia, but the oft-mentioned "Macedonia and Achaia" generally means the whole of Greece (Acts 19 21; Rom 15 26; 1 Thess 1 8). Paul commends the churches of Achaia for their liberality (2 Cor 9 10).

J. E. Harry

ACHAICUS, a-καί'-κους (Ἀχαϊκός, Ἀχαικός, "belonging to Achaia"): A name honorably conferred upon L. Munius, conqueror of Corinth and Achaia (of Corinthis). A. was one of the leaders of the Corinthian church (to be inferred from 1 Cor 15 25 ff) who, visiting Paul at Ephesus with Stephanas and Fortunatus, greatly relieved the Apostle's anxiety for the Corinthian church (of 1 Cor 1 1 ff). Paul admonishes the members of the Cor church to submit to their authority (cf 1 Thess 5 12) and to acknowledge their work (1 Cor 16 15 ff).

ACHAN, a-καν (אָכָן, 'akhan in 1 Ch 27 7 Achar,וֹקָן, 'okhan, "troubler"): The descendant of Zerah the son of Judah who was put to death, in Joshua's time, for stealing some of the "devoted" spoil of the city of Jericho (Josh 7). The stem 'akhan is not found in Heb; it is closely akin to 'akhbar, "to trouble". The stem 'akhan has sufficient use to define it. It denotes trouble of the most serious kind—Jacob's trouble when his sons had brought him into blood feud with his Can. neighbors, or Jephthah's trouble when his vow required him to sacrifice his daughter (Gen 34 30; Jgs 11 35). In Prov 11 17-29; 15 6-27 the word is used with intensity to describe the results of cruelty, disloyalty, greed, wickedness. The record especially speaks of Achan's conduct as the troubling of Israel (1 Ch 27 7; Josh 6 18; 7 24). In an outburst of temper Jonathan speaks of Saul as having troubled the land (1 S 14 29). Elijah and Ahab accuse each other of the being the trouble of Israel (1 K 19 17-18). The stem also appears in the two proper names Achia and Ochran (q.v.).

The crime of Achan was a serious one. Quite apart from all questions of supposable superstition, or even religion, the harem concerning Jericho had been proclaimed, and to disobey the people of Israel was disobedience to military orders in an army that was facing the enemy. It is commonly held that Achan's family were put to death with him, though they were innocent; but the record is not explicit on these points. One whose habits of thought led him to expect features of primitive
savagery in such a case as this will be sure to find what he expects; a person of different habits will not be sure that the record says that any greater cruelty was practised on the family of Achaim than that of compelling them to be present at the execution. Those who hold that the Deuteronomic legislation comes in any sense from Moses should not be in haste to think that its precepts were violated by Joshua in the case of Achan than that of compelling them to be present at the execution.

The record says that the execution took place in the arable valley of Achar, up from the Jordan valley. See Achar.

WILLIS J. BEECHER

ACHAR, a'kar: Variant of ACHAN, which see.

ACHAZ, a'kaz ('Aka\(\theta\), Æcharaz), AV (Mt 1 9): Gr form of AHAZ (thus RV). The name of a King of Israel.

ACHBOR, ak'bor (אָבֹר, 'aḥbōr, "mouse"): (1) The father of Baal-hanan, who was the seventh of the eight kings who reigned in Edom before there were kings in Israel (Gen 36 38-39; 1 Ch 1 49).

(2) The son of Micaiah (called in Ch Abdon the son of Micaiah). He went with Hilkish the priest and other high officials, at the command of King Josiah, to consult Huldah the prophetess concerning the book that had been found (2 K 22 12.14; 2 Ch 34 20).

It may be presumed that this Achbor is also the man mentioned in Jer (26 22; 36 12) as the father of Ethanah, who went to Egypt for King Jehoiakim in order to procure the extradition of Uriah the prophet, and who protested against the burning of Baruch's roll.

WILLIS J. BEECHER

ACHIACHARUS, a-ki'-ak'-rus (ב אַחֲיָאָכָרָו, Achiācharos; Ἀχιαχαράος, Athacharosalos): Governor of Assyria. A. is the son of Amael, a brother of Tobit (Tob 1 21). Sarachelous (Esarhaddon), the king of Assyria, appointed him over all "accounts of his kingdom" and over all "his affairs" (Tob 1 21); cf Dn 2 48. At his request Tobit comes to Nineveh (Tob 1 22). A. nourishes Tobit, who later is afflicted with disease (Tob 2 10). He attends the wedding-feast of Tobias (Tob 11 18). Is persecuted by Aman, but saved (Tob 14 10).

ACHIAS, a-ki'as: An ancestor of Ezra (2 Esd 1 2). Omitted in other genealogies.

ACHIM, a'kim (אָכִים, Achetem): A descendant of Zerubbabel and ancestor of Jesus, mentioned only in Mt 1 14.

ACHIOR, a'ki-ir (אָכְיוֹר, Achidür): General of the Ammonites, who spoke in behalf of Israel before Holofernes, the Assyry general (Jth 5 5 ff.). Holofernes ordered him bound and delivered at Bethulia to the Israelites (Jth 6), who received him gladly and with honor. Afterward he became a proselyte, was circumcised, and joined to Israel (Jth 14). In Nu 34 27 it is the LXX reading for Ahihud, and in the Heb would be אַכִּים, 'ak'īm, "brother of light."

ACHIPHA, ak'-fa: AV Acipha, achi'-fa (אַכּיָפָה, Achiphah), in the Apoc (1 Esd 5 31) head of one of the families of the temple-servants, who returned with Zerubbabel; same as the OT HAKUPHA (Ezr 2 51; Neh 7 53), which see.

ACHISH, a'kish (אָכִיש, 'akkish): King of the city of Gath in the days of David. His father's name is given as Maoch (1 S 27 2), and Maecah (1 K 2 39). David sought the protection of Achish when he first fled from Saul, and just after his visit to Nob (1 S 21 10-13). Fearing rough treatment or betrayal of Achish, he feigned madness. But this made him unwelcome, whereupon he fled to the Cave of Adullam (1 S 22 1). Later in his fugitive period David returned to Gath to be hospitably received by Achish (1 S 27 1 ff.), who gave him the town of Ziklag for his home. A year later, when the Philistines invaded Maon in the land of Israel, in the campaign which ended so disastrously for Saul (1 S 31), Achish wished David to participate (1 S 28 1-2), but the lords of the Philistines objected so strenuously, when they found him and his men with the forces of Achish, that Achish was compelled to send them back. Achish must have been a young man at this time, for he was still ruling forty years later at the beginning of Solomon's reign (1 K 2 39). He is mentioned as Abimelech in the title of Ps 34. See ABIMELECH 3.

EDWARD MACK

ACHITOB, ak'-tob: Same as Ahitob. Used in 1 Esd 1 2; cf 2 Esd 1 1 AV. See AHTOB 3.

ACHMETHA, ak'-me-tha (Ezr 6 2; Neh 7 27): LXX 'Aqib\(\theta\a, Amath\(\theta\); Pes. 'Akmetha, amməd\(\theta\b, ammad\(\theta\b; in Tlghit P\(\theta\)eser's inscr. cir 1100 BC.

Achmada\(\theta\): Called in Jos. 'Behad\(\theta\a, the place of Achmad\(\theta, in Achnod, (1 K 10 7). 2. History 549 BC who brought Cyrus into the land.

See ACMETHA, the ancient capital of Media, stood (lat. 34° 50'-long. 48° 32' E.) near the modern 1. Location Hamadan, 186 miles W.S.W. of Tehran, almost 6,000 feet above the sea, cir 1 miles from the foot of Mt. Oronteus (Alvand). It was founded or rebuilt by Dēōkōs (Dayaukkū) about 700 BC on the site of Ellīppi an ancient city of the Mandi, and captured by Cyrus 549 BC who brought Cyrus there as captive (Herodotus i.158). It was the capital of the 10th Nome under Darius I. Cyrus and other Persa kings used to spend the two summer months there yearly, owing to the comparative coolness of the climate. In the latter case it was magnificently fortified with seven concentric walls (i.98). Its citadel (bārāthā') (Ezr 6 2), wrongly rendered "palace" in RV) is mentioned by Arrian, who says that, when Alexander took the city in 324 BC, he there stored his enormous booty. In it the royal archives were kept. It stood on a hill, where later was built a temple of Mithra. Polybius (x.27) speaks of the great strength of the citadel. Though the city was walled in his time, he can hardly have heard words to express his admiration for it, especially for the magnificent royal palace, nearly 7 stadia in circumference, built of precious kinds of wood sheathed in plates of gold and silver. In the city was the shrine of Annē (Anē, Anā\(\theta\a, Anehātā) Alexander is said to have destroyed a temple of Aēsulapiai (Mithra) there. Diodes tell us the city was 250 stadia in circumference. On Mt. Alvand (10,728 feet) there have been found inscriptions of Xerxes. Doubtless Ecbatana was one of the "cities of the Medes" to which Israel was carried captive (2 K 17 6). It should be noted that Gr writers mention several other Ecbatanas. One of these, afterward called Gazaca (Takhā, Sulaimān, a little S. of Lake Urmu, lat. 36° 28' N., long. 47° 21' E.) was capital of Atropasen. It was most described by the Mughulis in the 12th cent. Sir H. Rawlin-
son identifies the Ecbatana of Tobit and Herodotus with this northern city. The southern and far more important Ecbatana, with a region of desert, is certainly that of 2 Macc 9 3. It was Cyrus' Median capital, and is doubtless that of Ezr 6 2. Classical writers spoke erroneously of Ecbatana (for Ecbatana) as moderns too often do of Hamadan for Hamadan.

Hamadan has perhaps never fully recovered from the fearful massacre made there in 1220 A.D. by the Mongols, but its population is about 50,000, including a considerable number of descendants of the Israelites of the Dispersion (tracing descent from Asher, Naphtali, etc.). They point to the tombs of Esther and Mordecai in the neighborhood. It is a center for the caravan trade between Baghdad and Tehran. It is an American Presbyterian mission at work.

Authorities (besides those quoted above): Cassias, Curtius, Amm. Marcellinus, Pausanius, Strabo, Dio. Siculus; Ibn 'Uthair, Ya'qubi, Jahangusha, Jam' u't Tawârîkh, and modern travelers.

W. ST. CLAIR TIDBALL

ACHO, ak'ô. See ACCO.

ACHOR, ʾākôr (אָקֹר, ʾāḵôr, "trouble," the idea of the word being that of trouble which is serious and extreme. See ACHAN): The place where Achan was executed in the time of Joshua (Josh 7 24-26). In all the five places where it is mentioned it is described as the ʾemek, the arable valley of Achor. There is no ground in the record for the current idea that it must have been a locality with horrid and dismal physical features. It was on a higher level than the camp of Israel in the Jordan valley, and on a lower level than Debir—a different Debir from that of Josh 10 15. In a general way, as indicated by the points mentioned in the border of Judah, it was north of Beth-arabah, and south of Debir (Josh 7 24; 15 7).

Many identify it with the Wady Kelt which descends through a deep ravine from the Judaean hills and runs between steep banks south of the modern Jericho to Jordan, the stream after rains becoming a foaming torrent. Possibly the name may have been applied to a region of considerable extent. In Isa 10 15 it is on the east side of the mountain ridge which is in some sense balanced with Sharon on the west side. By implication the thing depicted seems to be these rich agricultural localities so far recovered from desolation as to be good grounds for cattle and sheep. Hosea recognizes the comforting aspect of the dreadfull affair in the valley of Achor; it was a doorway of hope to pardoned Israel (Hos 2 15 [171]), and he hopes for like acceptance for the Israel of his own day.

WILLIAM J. BEECHER

ACHSA, ak'sâ: Used in AV in 1 Ch 2 40 for ACHSAH, which see.

ACHSAH, ak'sâ (אֵכְשָה, ʾakhasháh; in some copies אֵכָשָה, ʾakhashâh' in 1 Ch 2 40), "anklelet"): The daughter of Caleb whom he gave in marriage to his younger kinsman Otniel the son of Kenaz, as a reward for smiting Kirjath-jearim (Josh 15 10; Judges 1 12 ff.). Caleb, the narrative says, established Acsahah in the South-country, and in addition, at her asking, gave her certain springs of water—the "upper basins" and the "nether basins." Professor G. F. Moore identifies these with the group of springs of the Sede ed-Dibbeh (notes on Jgs in Polychrome Bible).

WILLIAM J. BEECHER

ACHSHAPH, ak'shôf (אֵכָשָף, ʾakhashôf, "sorcery," or "fascination"): A city in the northern part of the territory conquered by Joshua. The king of Aschaph was a member of the coalition which Moses appointed against Israel; he was mentioned with Hazor, Megiddo, Taanach, etc, in the list of conquered kings. It is one of the cities marking the boundaries of the tribe of Asher (Josh 11 1; 12 20; 19 25). Several attempts have been made to identify the site of it, but explorers are not agreed as to the identification.

ACHZIB, ak'sib (אֵכָזִיב, ʾakhashib, "lying" or "disappoointment"): The name of two towns in Palestine: (1) A town in western Judah in the lowlands, mentioned in connection with Marshah and Keilah as one of the cities allotted to Judah (Josh 15 44), and in Mic (2 14), where it suggests play upon its meaning, "deceptive" or "falling," possibly the place having received its name from winter spring or brook, which failed in summer. It is also called Chezib (אֵכָזִיב, ʾakhashib; Gen 38 5), where Judah was at the time of the birth of his son Shelah. In 1 Ch 4 22 it is called Cozeba, AV "Chozeba" (בּוֹזֵב, בּוֹזֵב), clearly seen to be the same as Achzib, from the places with which it is grouped. (2) It has been identified with the modern "Achem Tezeh in the valley of Eshah; it is north of ADullam.

EDWARD MACK

(3) Mod. Zb LXXX variously: Josh 19 20, B, 'Eξεκσθή, Echosôb, A, 'Aχσθή, Achsiôb; Jgs 1 31, B, 'Aρσαθή, Aschatê, A, 'Aρσαθή, Ascheredô; Or Edippa: A small town some miles north of Acre on the coast. It is mentioned in Josh 19 28 as falling within the possessions of the tribe of Asher, but they never occupied it, as they did not the neighboring Acre (Acco). The Phoen inhabitants of the coast were too strongly entrenched to be driven out by a people who had no fleet. The Phoenecians on the coast doubtless aided one another, and Sidon had become rich and powerful before this and could succour such a small town in case of attack. Achzib was a coast town, nine miles north of Acre, now ruined, and seventeen miles south of Acco, or 52 Russian miles from the city of Acco (200 BC). It was never important and is now an insignificant village among the sand dunes of the coast. It is 80 miles by the coast on the west, what lay beyond being unholy ground.

H. PORTER

ACIPHA, as'i-fâ. See ACIPHIA.

ACITHO, ACITHO, as'i-thô (variant of ACHI-TUB): The name in AV of an ancestor of Judith (Jth 8 1).

ACKNOWLEDGE, ak-nô-lej (ἐγκνωσθή, giôsōthê): To declare that one recognizes the claims of a person or thing fully established. Both in OT and NT expressed by various forms of the word "know" (Proverbs 3 6; Isa 61 9; Col 2 2 AV). The Fesduint (Ps 25 5) "acknowledged" his sin, when he told God he knew the merits of what he had done. The Corinthians (2 Cor 1 14) "acknowledged" Paul and his companions when they formally recognized their claims and authority.

ACQUAINT, ak-kwânt', ACQUAINTANCE, ak-kwânts (ἐγκνωστος, giôsôtos): Terms referring to various degrees of knowledge, but implying more or less detailed information; applied to God's omniscience (Ps 139 3), to the grief of Suffering Spririts of Jehovah (Isa 49 7), and to the knowledge which man should have of God. The noun in the concrete, unless limited by a qualifying term, means more than one who has been known simply in passing, and implies a degree of
ACRA, ak'ra (1 Mac 1 33 RV, "citadel"). See Jerusalem.

ACRABATTENE, ak-ra-ba'të-në. See Akarabatine (Apoc).

ACRBIM, ak-rab'im: Incorrect transliteration of ἀραβίμ as arabīm, of Josh 16 3 in AV. See Akrim.

ACRE, å'kär (ṣeq, gnomoth): A term of land-measurement used twice in the English VSS of the Bible (Isa 5 10; 1 S 14 14), and said to be the only term in square measure found in the OT. The Eng. word "acre" originally signified field. Then it came to denote the measure of land that an ox team could plow in a day, and upon the basis of a maximum acre of this kind the standard acre of 100 square rods (with variations in different regions) was fixed. The Heb word tr' מ' may denote a yoke of animals, in the sense of a team, a span, a pair; it is never used to denote the yoke by which the team are coupled together. The phrase "ten yokes of land" (Isa 5 10) may naturally mean vineyard covering as much land as a team would plow in ten days, though other plausible meanings can also be suggested. In 1 S 14 14 the same word is used in describing the limits of an area within which Jonathan and his army-beater slew twenty Philistines. The tr of RV, "within as it were half a furrow's length in an acre of land," means, strictly, that they were slain along a line from two to twenty rods in length. The word rendered "furrow" only here and in Ps 129 3 is in Brown's Hebrew Lexicon defined as "plowing-ground." This gives the rendering "as it were in half a plowing-stint, a yoke of ground," the last two phrases defining each the other, so that the meaning is substantially that of the phrase in AV. There is here an alleged obscurity and uncertainty in the text, but it is not such as to affect either the tr or the nature of the event.

ACROSIC, a-kros'ik: The term is used to describe a short poem in which the first letters of the lines form a word, or name, or sentence, has not yet been proved to occur in ancient Hebrew literature. The supposed examples found by some scholars in Ps 9 and 10, and 2 S 28 21, have not generally been recognized. Still less can be said in favor of the suggestion that in Est 1 20 four words read from left to right form by their initials an acrostic on the name YIHW (cf König, Bibl 293). In Byzantine hymn-poetry the term acrosticus with which our word "acrostic" is connected was also used of alphabetic poems, that is poems the lines or groups of lines in which have their initials arranged in the order of the alphabet. Acrostics of this kind are found in pre-Christian Heb literature, as well as elsewhere in ancient oriental literature. There are twelve clear instances in the OT: Ps 25, 34, 37, 111 f, 119, 146; Prov 31 10-31, and Lam 1-4. There is probably an example in Ps 9 and 10, and possibly another in Nah 2 2-10. Outside the Canon, Sir 51 18-30 exhibits clear traces of alphabetic arrangement. Each of these fifteen poems must briefly be discussed.

Ps 9 and 10, which are treated as one psalm in LXX, show fairly clear indications of original alphabetic structure even in the MT. The initials of 9 1.3.5 are respectively ἀλεπθ, βῆθ, γμὲλ; of vs 9.11.13.15.17 τῶν, ταῖς, τῇ, τῇ, τῇ, τῇ, and γμὲλ. The first ver of 10 begins with γμὲλ and vs 12.14.15.17 with κῆθ, ῥᾶς, σῆς and τῶν. Four lines seem to have been allotted to each letter in the original form of the poem. In Ps 25 all the letters are represented except τῶν and κῆθ. In ver 18 we find τῆς instead of the latter as well as in its place in ver 19. In ver 2 the alphabetical letter is the initial of the second word. The last verse is a supernumerary. There are many two letters to a line. In Ps 34 all the letters are represented except τῶν, ver 6 not beginning with it, as was to be expected, but with ταῖς. The last verse is again a supernumerary. Since here and in 26 22 the first word is a form of τῶν it has been suggested that there may have been here a sort of acrostic on the writer's name Pedalel (prahab'del), but there is no evidence that a psalmist so named ever existed. There are two lines to a letter. In Ps 37 all the letters are represented except ταῖς which seems however from LXX to have been present in the earliest text. As a rule four lines are assigned to each letter. In Ps 111 f are found two quite regular examples with a line to each letter. Ps 119 offers another regular example, but with 16 lines to a letter, each alternate line beginning with its letter. Vs 1-8, for instance, each begin with ἀλεπθ. In Ps 146 are found all the letters but τῶν. As we find in LXX between vs 13 and 14, that is where the τῶν go. Psalm 118: "Faithful is the Lord in his words And holy in his words," which may represent a Heb couplet beginning with τῶν, it would seem that a ver has dropped out of the MT. Prov 31 16-21 constitutes a regular alphabetical poem with (except in ver 15) two lines to a letter. Lam 1 is regular, with three lines to a letter. Lam 2, 3, 4, are also regular with a curious exception. In each case πὲ precedes ταῖς, a phenomenon which has not yet been explained. In 3 there are three or four lines to a letter except in ver 17, where there seem to be five. In 3 also there are three lines to a letter and each line begins with that letter. In 4 there are two lines to a letter except in ver 22 where there are probably four lines. Lam 5 has twice as many lines as the letters of the alphabet but no alphabetical arrangement. In Nah 1 1-10 ff Delitzsch (following Frohmeyer) in 1876, Bickell in 1880 and 1894, Gunkel in 1893 and 1895, G. B. Gray in 1890, Mr. Schechter (in the judgment of most scholars) discovered the original text in a collection of fragments from the Genizah of Cairo, and this proved the correctness of Bickell's idea and even the accuracy of some details of his reconstruction. The poem begins with ἀλεπθ and has τῶν as the initial letter of the last line but one. In vs 21.22.24.25.26.27 the letters mēm, τῶν, ταῖς, πὲ, γμὲλ, κῆθ, ῥᾶς can be traced as the beginning of lines in that order. Samech is absent (cf Schechter-Taylor, The Wisdom of Ben Sira, lvxvi-lxxvii).

As this rapid survey will have shown, this form of acrostic as employed by Heb writers consisted in the use of letters of the alphabet as initials in their order, at regular intervals, the distance between two different letters ranging from one to sixteen lines. Once each letter is thus used three times, in another case eight times. The corruption of the text has in some cases led to considerable interference with the alphabetical arrangement, and textual criticism has endeavored to restore with varying success.

These alphabetical poems have been unduly depreciated on account of their artificial structure
and have also been regarded for the same reason as of comparatively late origin. This latter conclusion is premature with present evidence. The poems in Lam undoubtedly go back as far as the 6th cent. BC, and Assyry testimony takes us back farther still for acrostic poems of some kind. Strictly alphabetical poems are of course out of the question in Assyry because of the absence of an alphabet, but there are texts from the library of Ashur-bani-pal each verse-line in which begins with the same syllable, and others in which the initial syllables read together compose a word or sentence. Now these texts were written down in the 7th cent. BC, but may have been copied from far earlier Bab originals. There can be little doubt that oriental poets wrote acrostic at an early period, and therefore the use of some form of the acrostic is no clear indication of lateness of date. (For these Assyry acrostics of Webster, Die Literatur der Babylonier und Assyrier, 37.)

Literature.—In addition to authorities already cited: König, Einl. 58, 66, 72-74, 399, 404, 410, and Stephan., etc., 357 ff; Budde, Geschichte der alt-hebräischen Literatur. WILLIAM TAYLOR SMITH

ACTS, APOCRYPHAL, a-pok'-ri-fal. See APOCRYPHAL ACTS.

ACTS OF THE APOSTLES, a-pot'-al-ez.

2. Text. — (1) The chief documents. These are the Primary Uncials (8 ABCD), E which is a bilingual Uncial confined to Acts, later Uncials like HLP, the Cursive, the Vulgate, the Pesh and the Harleian Syriac and quotations from the Pothers. We miss the Coptic and Syr Sin, and have only fragmentary testimony from the Old Latin.

(2) The modern editions of Acts present the types of text (TR; RV; the critical text like that of WH or Nestle or Weiss or von Soden). These three types do not correspond with the four classes of text (Syrian, Western, Alexandrian, Neutral) outlined by Hort in his Introduction to the New Testament in Greek (1882). These four classes are broadly represented in the documents which give us Acts. But no modern editor of the Gr NT has given us the Western or the Alex type of text, though Bornemann, as will presently be shown, argues for the originality of the Western type in Acts. But the TR (Stephanus' 3d ed in 1550) was the basis of the AV of 1611. The Gr NT made use of a very few MSS, and all of them late, except D, which was considered too eccentric to follow. Practically, then, the AV represents the Syr type of text which may have been edited in Antioch for the 6th cent. Various minor errors may have crept in since that date, but substantially the Syr recension is the text of the AV today. Where this text stands alone, it is held by nearly all modern scholars to be in error, though Dean Burgon fought hard for the originality of the Syr text (The Revision Revised, 1882). The text of WH is practically that of B, which is held to be the Neutral type of text. Nestle, von Soden, Weiss do not differ greatly from the text of WH, though von Soden and Weiss attack the problem on independent lines. The text of the AV and the critical text, though coming pretty close to the critical text, is a present-day appreciation of this battle of the texts see J. Rendel Harris, Side Lights on the New Testament, 1908. For a detailed comparison between the AV and the RV Acts see Rackham, The Acts of the Apostles, xxii.

(3) In Acts' Western type of text has its chief significance. It is the merit of the late Friederich Blass, the famous classicist of Germany, to have shown that in Luke's writings (Gospel and Acts) the Western class (especially D) has its most marked characteristics. This fact is entirely independent of the theory advanced by Blass which will be discussed directly. The chief modern revolt against the theories of WH is the new interest felt in the value of the Western type of text. In particular D has come to the front in the BCP and the BCP, the feebly support that D has in its peculiar readings in Acts (due to absence of Cur. Syr and of Old Lat) makes it difficult always to estimate the value of this document. But certainly these readings deserve the care of the AV and a compromise of the text. The chief variations are, as usual with the Western text, additions and paraphrases. Some of the prejudice against D has disappeared as a result of modern discussion. Euthalius Thaddæus, MS 3, has the Gr text of D, and has no new arrangements of text. (4) Bornemann in 1848 argued that D in Acts represented the original text. But he has had very few followers.

(5) J. Rendel Harris (1891) sought to show that D (itself a bilingual MS) had been Latinized. He argued that already in 150 AD a bilingual MS existed. But this theory has not won a strong following.

(6) Chase (1893) sought to show that the peculiarities were due to tr from the Syr.

(7) Blass in 1895 created a sensation by arguing in his Commentary on Acts (Acta Apostolorum, 24 ff) that Luke had issued two editions of the Acts, as he later urged about the Gospel of Luke (Philology of the Gospels, 1898). In 1896 Blass published this Roman form of the text of Acts (Acta Apostolorum, secundum Formam quae videtur Romanam). Blass calls this first, rough, unbridged copy of Acts 3 and considers that it was issued at Rome. The later edition, should be the first, "when we had gathered together," making Luke present at Antioch. The idea of two edd is not wholly original with Blass. Leclerc, a Dutch philologist, had suggested the notion as early as the beginning of the 19th cent. Bishop Light-
foot had also mentioned it (On a Fresh Revision of the NT, 29). But Blass worked the matter out and challenged the world of scholarship with his array of arguments. He has not carried his point with all, though he has won a respectable following. Zahn (Bibl., II, 338 ff, 1899) had already pointed toward the view (358 ff. He accepts in the main Blass's theory, as do Belser, Nestle, Salmon, Zöckler. Blass acknowledges his debt to Corssen (Der cyprinische Text der Acta Apostolorum, 1892), but Corssen considers the α text as the earlier and the β text as a later revision. (8) Hilgenfeld (Acta Apostolorum, etc., 1899) accepts the notion of two edd, but denies identity of authorship.

(9) Schmiedel (EB) vigorously and at much length attacks Blass's position, else "the conclusions reached in the foregoing sections would have to be withdrawn." He draws his conclusions and then demolishes Blass! He does find weak spots in Blass's armor as others have done (B. Weiss, Der Codex D in der Apostelgeschichte, 1897; Page, Claus. Rev., 1897; Harnack, The Acts of the Apostles, 1900, 45). See also Knowling, The Acts of the Apostles, 1900, 47, for a sharp indictment of Blass's theory as being too simple and lacking verification.

(10) One of the clearest instances of doubt about Acts is, in the author's words, "the problem of unity. How are we to account for the very great uniformity of the text? (12) Headlam (HDB) does not believe that the problem has as yet been scientifically attacked, but that the solution lies in the textual license of scribes of the Western type (cf. Hort, Introduction, 122 ff). But Headlam is still shy of "Western" readings. The fact is that the Western readings are sometimes correct as against the Neutral (cf: Mt 27 49). It is not necessary in Acts 11 20 to say that Hellenes is in Western authorities (AD, etc) but he need not read that text so as to say "we". Soon we must be able to say the final word about the text of Acts, though on the whole the α text still holds the field as against the β text. The Σyr text is, of course, largely cut out of context.

III. Unity of the Book. — It is not easy to discuss this question, apart from that of authorship. But they are not exactly the same. One may be convinced of the unity of the book and yet not credit it to Luke, or, indeed, to anyone in the 1st cent. Of course, if Luke is admitted to be the author of the book, the whole matter is simplified. His hand is in it all whatever sources he used. If Luke is not the author, there may still have been a competent historian at work, or the book may be a mere compilation. That is not the point. The question is to attack the problem of unity. Holtzmann (Eini, 383) holds Luke to be the author of the "we" sections only. Schmiedel denies that the Acts is written by a companion of Paul, though it is by the same author as the Gospel bearing Luke's name. In 1846 Schlieren-macher credited the "we" sections to Timothy, not to Luke. For a good sketch of the theories of "sources," see Knowling on Acts, 25 ff. Van Manen (1890) resolved the book into two parts, Acts of Peter, Acts of Paul, combining a redactor, Sorof (1890) ascribes one source to Luke, one to Timothy. Spitta also has two sources (a Pauline-Lukan and a Jewish-Christian) worked over by a redactor. Clemen (1905) has four sources (History of the Hellenists, History of Peter, History of Paul, and a Journey of Paul), all worked over by a series of editors. Hilgenfeld (1895) has three sources (Acts of Peter, Acts of the Seven, Acts of Paul). Jungst (1895) has a Pauline source and a Petrine source. J. Weiss (1895) admits sources, but claims that the book has unity and a single view (348). Weiss (1902) conceives an early source for the first part of the book. Harnack (The Acts of the Apostles, 1909, 41 f) has small patience with all this blind criticism: "With them the book passes as a comparatively late patchwork compilation, in which the part taken by the editor is insignificant yet in all cases detrimental; the 'we' sections are not the property of the author, but an extract from a source, or even a literary fiction. He charges the critics with "airy conceit and lofty contempt." Harnack has done a very great service in carefully sifting the matter in his Luke the Physician (1907). He gives detailed proof that the "we" sections are in the same style and by the same author as the rest of the book (26-126) Harnack does not claim originality in this line of argument: "It has been often stated and often proved that the 'we' sections in vocabulary, in syntax, and in style are most intimately bound up with the whole work, and that this work itself (including the Gospel), in spite of all diversification, is parts of a grand unity of literary form" (Luke the Physician, 26). He refers to the "splendid demonstration of this unity" by Klostermann (Vinicius Lucane, 1899), to B. Weiss, who, in his commentary (1893, 2 Aufl, 1905), "is doing the best work in demonstrating the literary unity of the whole work," to the "admirable contributions" of Vogel (Zur Charakteristik des Lukas, etc, 2 Aufl, 1899) to the yet more careful and minute investigations of Hawkins (Luke, A Synopsis, 1909), to the work of Hobart (The Medical Language of St. Luke, 1885), who "has proved only too much." (Luke the Physician, 175), but "the evidence is of overwhelming force" (198). Harnack only claims for himself that he has done the work in more detail and with more minute accuracy without clouding too much (27). But the conversion of Harnack to this view of Acts is extremely significant. It ought not to be necessary any more to refute the arguments of any author, but to set forth in detail the proofs for the unity of the book. Perhaps the compilation theory of Acts is nowhere set forth more cogently than in McGiffert's The Apostolic Age (1901). See a general refutation of the argument by Robinson, Pauline and Other Studies (1906, 302-31). "I think his clever argumentation is sophistical" (305). Harnack is fully aware that he has gone over to the side of Ramsay, Weiss and Zahn: "The results at which I have arrived not only approach very nearly to, but are often coincident with, the results of their research" (The Acts of the Apostles, 302). He is afraid that if these scholars failed not to get the ear of critics "there is little prospect of claiming the attention of critics and composing them to reconsider their position." But he has the advantage of coming to this conclusion from the other side. Moreover, if Harnack was won by the force of the facts, others may be. This brief sketch of Harnack's experience may take the place of detailed presentation of the arguments for the unity of the book. Harnack sets forth in great wealth of detail the characteristic idioms of the "we" sections side by side with parallels in other parts of Acts and the Gospel of Luke. The same man wrote the rest of Acts who wrote the "we" sections. This fact alone is not sufficient. This does not mean that the writer, a personal witness in the "we" sections, had no sources for the other parts of Acts. This aspect of the matter will be considered a little later.
IV. The Author.—Assuming the unity of the book, the argument runs as follows: The author was a companion of Paul. The "we" sections prove that (Acts 16:10–17; 20:6–16; 21:27; 28). These sections have the fulness of detail and vivid description so natural to the eye-witness. Some of Paul's companions was with Paul in the second missionary journey at Tarsos and at Philippi, joined Paul's party again at Philippi on the return to Jerusalem during the third tour, and probably remained with Paul till his arrest to Rome. Some of Paul's companions came to him at Rome: others are so described in the book as to preclude authorship. Aristarchus, Aquila and Priscilla, Erastus, Gaius, Mark, Silas, Timothy, Trophimus, Tychicus and others more or less insignificant from the point of view of connection with Paul (like Crescens, Donas, Justus, Linus, Pudens, Sopater, etc.) are easily eliminated. Cursily enough Luke and Titus are not mentioned in Acts by name at all. They are distinct persons as is stated in 2 Tim 4:10. Titus was with Paul in Jerusalem at the conference (Gal 2:1) and was his special envoy to Corinth during the time of trouble there. (2 Cor 2:12f; 12:18.) He was later with Paul in Crete (Titus 1:5). But the absence of mention of Titus in Acts may be due to the fact that Luke was himself the author of the work. The writer was a physician. This fact Hobart (The Medical Language of St. Luke, 1882) has demonstrated. Cf Zahn, Einf, 2, 435 ff; Harnack's Luke the Physician, 177 ff. The arguments from the medical terms are not of entire weight. But the style is colored at points by the language of a physician. The writer uses medical terms in a technical sense. This argument involves a minute comparison with the writings of physicians of the time. Thus in Acts 28:31 ἱατρόν, according to Hobart (288), is used in the sense of poisonous matter invading the body, as in Dioscorides, Animal. Ven. Proem. So Galen, De Typis 4 (VII, 467), uses it "of fever fixing on parts of the body," Lk 5:12; Luke the physician, 177 f. Harnack agrees also that the terms of the diagnosis in Acts 28:8 "are medically exact and can be vouched for from medical literature" (ib. 176 f.). Hobart has overdone his argument and added many examples that are not pertinent, but a residue remains, according to Harnack. Then ἰατροπαρθεία is a technical term for swelling. Let these serve as examples. The interest of the writer in matters of disease is also another indication; cf Lk 8:43. Now Luke was a companion of Paul during his later ministry and was a physician. (Col 4:14). Hence he fulfills all the requirements of the case. The argument thus far is only probable, it is true; but there is to be added the undoubted fact that the same writer wrote the Gospel and Acts (Acts 1:1). The direct allusion to the Gospel is reinforced by identity of style and method in the two books. The external evidence is clear on the matter. Both Gospel and Acts are credited to Luke the physician. V. Acts ascribed to Luke. The Muratorian canon ascribes Acts to Luke. By the end of the 2d cent. the authority of the Acts is as well established as that of the Gospel (Salmon, Introduction to the NT, 1855, 366). Irenaeus, Tertullian, Clement of Alexandria, all call Luke the author of the book. That he was a brother of Luke the physician is further strengthened by the fact that the point of view of the book is Pauline and by the absence of references to Paul's epistles. If one notion Paul's companion had written Acts, he would certainly have made some use of them. Incidentally, also, this is an argument for the early date of the Acts. The proof that has won Harnack, the leader of the left in Germany, to the acknowledgment of the Lukan authorship of Acts ought to win all to this position. VI. Date. — (1) Luke's relations to Josephus. The acceptance of the Lukan authorship settles the question of some of the dates presented by critics. As Paul's companion and now according to Harnack, (Einf, 2, 406) such as also, 130 AD (EB). He assumes as proven that Luke made use of the writings of Jos. It has never been possible to take with much seriousness the claim that the Acts shows acquaintance with Jos. See Keim, Geschichtc Jesu, III, 1872, 134, and Krenkel, Josephus and Lucas, 1894, for the arguments in favor of that position. The words quoted to prove it are in the main unmetrical words of common use. The only sense of matter is the mention of the Acts 21:28 of Josephus, the Galileans in Acts 5:30 and Josephus (Ant., XX, v, 1 f). In Jos the names occur some twenty lines apart and the resemblance is only slight indeed. The use of petiō in connection with Theudas and - and Joas the companion to Josephus. That requires notice. Surely, then, two common words for "persuade" and "revolt" are not enough to carry conviction of the writer's use of Josephus. The matter is more than offset by the differences in the two reports of the death of the Galileans. (Acts 12:19–20; Jos, Ant., XVIII, vi, 7; XIX, viii, 2). The argument about Jos may be definitely dismissed from the field. With that goes all the ground for a 21-cent. date. Other arguments have been adduced (see Holtzmann, Acts 2:22–32), but the use of Paul's epistles, acquaintance with Plutarch, Arrian and Pausanias, because of imitation in method of work (i.e. lives of Peter and Paul, periods of history, etc), correction of Gal in Acts (for instance, Gal 4:17–24 and Acts 9:26–30; Gal 2:1–10 and Acts 15:1–33). The parallel with Plutarch is fanciful, while the use of Paul's epistles is by no means clear, the absence of such use, indeed, being one of the characteristics of the book. The variation from Gal is far better explained on the assumption that Luke had not seen the epistles. (2) 80 AD is the limit if the book is to be credited to Luke. The majority of modern critics who accept the Lukan authorship place it between 70 and 80 AD. So Sanday, Harnack, Lestrange, Ramsey, Zahn. This opinion rests mainly on the idea that the Gospel according to Luke was written after the destruction of Jerusalem in 70 AD. It is claimed that Lk 21:20 shows that this tragedy had already occurred, as compared with Mk 13:14 and Mt 24:15. But the mention of armies is very
general, to be sure. Attention is called also to the absence of the warning in Lk. Harnack (The Acts of the Apostles, 291 f) admits that the arguments in favor of the date 70–80 are by no means conclusive. He writes “to warn critics against a too hasty closing of the chronological question. In his new book about Stephen (Hofste von Geschicht, etc. 1911, S. 81) Harnack definitely accepts the date before the destruction of Jerusalem. Lightfoot would give no date to Acts because of the uncertainty about the date of the Gospel.

(3) Before 70 AD. This date is supported by Blass, Headlam, Maclean, Racham, Salmon. Harnack, indeed, considers that “very weighty considerations” argue for the early date. He, as already stated, now takes his stand for the early date. It is obviously the simplest way to understand Luke’s close of the Acts to be due to the fact that Paul was still in prison. Harnack contends that the efforts to explain away this situation are not “quite satisfactory or very illuminating.” He does not mention Paul’s death because he was still alive. The dramatic purpose to bring Paul to Rome is artificial. The supposition of a third book from the use of prōtōn in Acts 1 1 is quite gratuitous, since in the Koine, not to say the earlier Greek, “first” is a distinct mention of the one thing mentioned (of “our first story” and “second story,” “first wife” and “second wife”). The whole tone of the book is that which one would naturally have before 64 AD. After the burning of Rome and the destruction of Jerusalem the attitude maintained in the book toward Romans and Jews would have been very difficult unless the date was a long time afterward. Harnack wishes “to help a doubt to its just due.” That “doubt” of Harnack is destined to become the certainty of the future. (Since this sentence was written Harnack has settled his own doubts.) The book will, I think, be finally credited to the time 63 AD in Rome. The Gospel of Luke will then naturally belong to the period of Paul’s imprisonment in Caesarea. The judgment of Mofjatt (Historical NT, 1901, 416) that “it cannot be earlier” than 80 AD is completely upset by the powerful attack of Harnack on his own previous position. See also Mofjatt’s Introduction to the Lk. of the Acts in Koch’s Die Auffassung der lukischen Geschichtswerke (1911).

VII. Sources Used by Luke.—If we now assume that Luke is the author of the Acts, the question remains as to the character of the sources used by him. There are three main sources: Lk 1–4 and Acts 6–28, the general method of the author. He used both oral and written sources. In the Acts the matter is somewhat simplified by the fact that Luke was the companion of Paul for a considerable part of the narrative (the “we” sections, 15 11–17; 20 5; 21 18; 27 and 28). It is more than probable that Luke was with Paul also during his last stay in Jerusalem and during the imprisonment at Caesarea. There is no reason to think that Luke suddenly left Paul in Jerusalem and returned to Caesarea only when he started to Rome (27 1). The absence of “we” is natural here, since it is not a narrative of travel, but a sketch of Paul’s arrest and series of defenses. The very abundance of material here, as in chs 13 and 21, argues for the presence of Luke. But at any rate Luke has access to Paul himself for information concerning this period, as was true of the second, from ch 13 to the end of the book. Luke was either present or he could have learned from Paul the facts used. He may have kept a travel diary sharply from the events themselves. Luke could have taken notes of Paul’s addresses in Jerusalem (ch 22) and Caesarea (chs 24–26). From these, with Paul’s help, he probably composed the account of Paul’s conversion (9 1–30). If, as I think is true, the book was written during Paul’s first Roman imprisonment, Luke had the benefit of appeal to Paul at all points. But, if so, he was thoroughly independent in style and assimilated his materials like a true historian. Paul (and also Philip for part of it) was a witness to the events and an active participant of the work in Antioch (11 19–30). Philip, the host of Paul’s company (21 8) on the last journey to Jerusalem, was probably in Caesarea still during Paul’s confinement there. He could have told Luke the events in 6 1–7 and 8 4–40. In Caesarea also the story of Peter’s work may have been derived, possibly even from Cornelius himself (9 32–11 18). Whether Luke ever went to Antioch or not we do not know (Codex Bezae has Lk “in 11 28), though he must have had access to the Antiochian traditions. But he did go to Jerusalem. However, the narrative in ch 12 probably rests on the authority of John Mark (12 12, 25), in whose mother’s house the disciples were assembled. Luke was apparently thrown with Mark in Rome (Col 4 10), if not before. For Acts 1–5 the matter does not at first seem so clear, but these chapters are not necessarily discredit on that account. It is remarkable, as ancient historians made so little mention of it, that Luke should have mentioned it in the Acts with so many probable fountains of evidence. Barnabas (4 36) was able to tell much about the origin of the work in Jerusalem. Thus, the Mosaic also of the seven (6 5; 21 8). We do not know that Luke met Peter in Rome, though that is possible. But during the stay in Jerusalem and Caesarea (two years) Luke had abundant opportunity to learn the narrative of the great events told in Acts 1–6. He met and had written sources for this section. One cannot, of course, prove by linguistic or historical arguments the precise nature of Luke’s sources in Acts. Only in broad outlines the probable materials may be sketched. VII. The Speeches in Acts.—This matter is important enough to receive separate treatment. Are the numerous speeches reported in Acts free compositions of Luke made to order de la Thucydides? Are they verbatim reports from notes taken at the time or literate or other copies? Are they substantially reports incorporated with or less freedom with marks of Luke’s own style? In the abstract either of these methods was possible. The example of Thucydidés, Xenophon, and the like make it possible that Luke, from the scripture to invent speeches of which no report was available. There are not wanting those who accuse Luke of this very thing in Acts. The matter can only be settled by an appeal to the facts so far as they can be determined. It cannot be denied that to a certain extent the hand of Luke is apparent in the addresses reported by him in Acts. But this fact must not be pressed too far. It is not true that the addresses are all alike in style. It is not possible to distinguish very clearly the speeches of Peter from those of Paul. Not merely is this true, but we are able to compare the addresses of both Paul and Peter with their epistles. It is not probable that Luke had seen these epistles, as will presently be shown. It is crediting remarkable literary skill to Luke to suppose that he made up “Petrine” speeches and “Pauline” speeches with such success that they harmonize beautifully with the teachings and general style of each of these apostles. The address of Stephen differs also from which Peter, that we can be sure that we are not able to compare this report with any original work by Stephen himself. Another thing is true also, particularly of Paul’s sermons. They are wonderfully suited to time, place and audience.
They all have a distinct Pauline flavor, and yet a difference in local color that corresponds, to some extent, with the variations in the style of Paul's epistles. Professor Percy Gardner (The Speeches of Barnabas, 1909) recognizes these differences, but seeks to explain them on the ground of varying accuracy in the sources used by Luke, counting the speech at Mileta as the most historic of all. He admits the use of sources by Luke for these addresses. The theory of Paul's conversion by Luke is quite discredited by appeal to the facts. On the other hand, in view of the apparent presence of Luke's style to some extent in the speeches, it can hardly be claimed that he has made verbatim reports. Besides, the report of the addresses of Jesus in Luke's Gospel (as in the other gospels) shows the same freedom in giving the substance without exact reproduction of the words that is found in Acts. Again, it seems clear that some, if not all, the reports in Acts are condensed, mere outlines in the case of some of Peter's addresses. The ancients knew how to make shorthand reports of such addresses. The oral tradition was probably active in preserving the early speeches of Peter and even of Stephen. Paul himself (Acts 20) may have taken notes at the time. So also he almost certainly heard Paul's address on the steps of the Tower of Antonia (ch 22) and that before Agrippa (ch 26). There is no reason to think that he was absent when Paul made his defenses before Felix and Festus (chs 24–25). He was present on the ship when Paul spoke (ch 27), and in Rome when he addressed the Jews (ch 28). Luke was not on hand when Paul delivered his sermon at Antioch in Pisidia (ch 13), or at Lystra (ch 14), or at Athens (ch 17). But these discourses differ so greatly in theme and treatment, and are so essentially Pauline that it is natural to think that Paul himself gave Luke the notes which he used. The sermon at Antioch in Pisidia is probably one of Paul's missionary discourses. It contains the heart of Paul's gospel as it appears in his epistles. He accentuates the death and resurrection of Jesus, remission of sins through faith, justification by faith. It is sometimes objected that at Athens the address shows a breadth of view and sympathy unknown to Paul, and that there is a curious Attic tone to the Gr style. The sermon does go as far as Paul can (cf 1 Cor 9 22) toward the standpoint of the Greeks (but compare Col and Eph). However Paul does not sacrifice his people of grace in Christ. He called the Athenians to repentance, preached the judgment for sin and announced the resurrection of Jesus from the dead. The fatherhood of God and the brotherhood of man here taught did not mean that God winked at sin and could save all men without repentance and forgiveness of sin. Chase (The Credibility of Acts) gives a collection of Paul's missionary addresses. The historical reality and value of the speeches in Acts may be sustained by modern scholars. For a sympathetic and scholarly discussion of all of Paul's addresses see Jones, St. Paul the Orator (1910). The short speech of Tertullus (Acts 24) was made in public, as was the public statement of Festus in ch 26. The letter of Claudius Lysias to Felix in ch 23 was a public document. How Luke got hold of the conversation about Paul between Festus and Agrippa in ch 26 is more difficult to conjecture.

IX. Relation of Acts to the Epistles. — There is no real evidence that Luke made use of any of Paul's epistles. He was with Paul in Rome when Col was written (4 14), and may, indeed, have been Paul's amanuensis for this epistle (and for Eph and Philem). Some similarities to Luke's style have been pointed out. But Acts closes without any narrative of the events in Rome during the years there, so that these epistles exerted no influence on the composition of the book. As to the two preceding groups of Paul's epistles (1 and 2 Thess; 1 and 2 Cor, Gal, Rom) there is no proof that Luke saw any of them. The Epistle to the Romans was probably accessible to him while in Rome, but he does not seem to have used it. Luke evidently preferred to appeal to Paul directly for information rather than to his epistles. This is as simple enough if he wrote the book or made his data while Paul was alive. But if Acts was written very late, it would be strange for the author not to have made use of some of Paul's epistles. The book has, therefore, the same problem. But for the apparent conflict between Acts and Paul's epistles have been well traced by Paley in his Horiae Paulinae, still a book of much value. Knowing, in his Witness of the Epistles (1892), has made a more recent study of the same problem. But for the apparent conflict between Gal 2 1–10 and Acts 15 the matter might be dropped at this point. It is argued by some that Acts, written long after Gal, brushes to one side the account of the Jerusalem conference given by Paul. It is held that Paul is correct in his personal record, and that Acts is therefore unhistorical. Others save the credit of Acts by arguing that Paul is referring to an earlier private conference some years before the public discussion recorded in Acts 15. This is, of course, possible in itself, but it is by no means required by the variations between the two reports. The contention of Lightfoot has never been really overturned, that in Gal 2 1–10 Paul gives the personal side of the conference, not a full report of what Paul's mission was doing is to show the Galatians how he is on a par with the Jerusalem apostles, and how his authority and independence were acknowledged by them. This aspect of the matter came out in the private conference. Paul is not in Gal 2 1–10 setting forth his victory over the Jews in behalf of Gentile freedom. But in Acts 15 it is precisely this struggle for Gentile freedom that is under discussion. Paul's relations with the Jerusalem apostles is not the point at all, though it is plain in Acts that they agree. In Gal also Paul's victory for Gentile freedom comes out. Indeed, in Acts 15 it is twice mentioned that the apostles and elders were gathered together (vs 4 6), and twice we are told that Paul and Barnabas addressed them (vs 4 12). It is therefore natural to suppose that this private conference narrated by Paul in Gal came in between vs 5 and 6. Luke may not, indeed, have seen the Epistle to the Galatians, and may not have heard from Paul about the story of the conference, though he knew of the two public meetings. If he did know of the private meeting, he thought it not pertinent to his narration. There is, of course, no contradiction between Paul's going up by revelation and by appointment of the church in Antioch. In Gal 2 1 we have the second (Gal 1 18) visit to
Jerusalem after his conversion mentioned by Paul, while that in Acts 15 is the third in Acts (9:28; 11:29 f; 15:2). But there was no particular reason for the omission of the event in Acts 15 10, which did not concern his relationship with the apostles in Jerusalem. Indeed, only the "elders" are mentioned on this occasion. The same independence between Acts and Gal occurs in Gal 1:17-24, and Acts 9:26-30. In Acts there is no allusion to the visit to Arabia,just as there is no mention of the private conference in Acts 15. So also in Acts 15:35-36 there is no mention of the sharp disagreement between Paul and Peter at Antioch recorded in Gal 2:11 ff. Paul mentions it merely to prove his own authority and independence as an apostle. Luke had no occasion to record the incident, if he was acquainted with the matter. These instances illustrate well how, when the Acts and the epistles vary, they really supplement each other.

X. Chronology of Acts.—Here we confront one of the most perplexing questions in New Testament criticism. In general, ancient writers were not so careful as modern writers are to give precise dates for historical events. Indeed, it was not easy to do so in the absence of any uniform method of reckoning time. Luke does, however, relate his narrative to outward events at various points. In his Gospel he had linked the birth of Jesus with the names of Augustus as emperor and of Quirinius as governor of Syria, and the reign of John the Baptist with his ministry with the names of the chief Roman and Jewish rulers of the time (Lk 3:1 f). So also in the Acts he does not leave us without various notes of time. He does not, indeed, give the exact date of the crucifixion, though he places the Ascension forty days after the Resurrection (Acts 1:3), and the great Day of Pentecost would then come ten days later, not many days later (Acts 1:5). But the other events in the opening chapters of Acts have no chronological arrangement. The career of Stephen is merely located "in these days" (6:1). The beginning of the general persecution under Saul is located on the very day of Stephen's death (8:1), but the year is not even hinted at. The conversion of Saul comes probably in its chronologically correct position in 9, but the year again is not given. We have no hint as to the age of Saul at his conversion. So again the mission of Peter in Caesarea (10) to the preaching of the Gospel in Antioch (11) is not made clear, though probably in this order. It is only when we come to 12 that we reach an event whose date is reasonably certain. This is the dedication of Herod Agrippa I and the death of Herod the Great (12:14). But even so, Luke does not connect the life of Paul with that incident. Ramsay (St. Paul the Traveller, 49) places the persecution and death of James in 44, and the visit of Barnabas and Saul to Jerusalem in 46. About 44, then, we may consider that Saul came to Antioch from Tarsus. The "fourteen years" in Gal 2:1, as already shown, probably point to the visit in Acts 15 some years later. But Saul had been in Tarsus some years and had spent some three years in Arabia and Damascus after his conversion (Gal 1:18). Beyond this it is not possible to go. We do not know the age of Saul in 44 AD or the year of his conversion. He was probably born not far from 1 AD. But if we locate Paul at Antioch in 44 AD, we can make some headway. Here Paul spent a year (Acts 11:26). The visit to Jerusalem in 11, the first missionary tour in 13 and 14, the conference at Jerusalem in 15, the second missionary tour in 16-18, the third missionary tour and return to Jerusalem in 21-23, the second visit to Caesarea in 21-26, all come between 44 AD and the recall of Felix and the coming of Festus. It used to be taken for granted that Festus came in 40 AD. Wieseler figured it out so from Josephus and was followed by Lightfoot. But Eusebius, in his "Chronicle," placed that visit in the second year of Nero. That would be 56, unless Eusebius has a special way of counting those years. Mr. C. H. Turner (art. "Chronology" in HDB) finds that Eusebius counts an emperor's regnal year from the September following. If so, the date could be moved forward to 57 (cf. Rackham on Acts, lxxxvi). But Ramsay (ch. xiv, "Pauline Chronology," in Pauline and Other Studies) cuts the Gordian knot by showing an error in Eusebius due to his disregarding an interregnum between the reigns of Tiberius and Caligula. Ramsay here follows Erbes (Todestage Pauli und Petr) in this discovery and is able to fix upon 59 as the date of the coming of Festus. Probably 59 will have to answer as a compromise date. Between 44 AD and 59 AD, therefore, we place the bulk of Paul's active missionary work. Luke has divided this period into minor divisions with relative dates. Thus a year and six months are mentioned at Corinth (Acts 15:11), besides "yet many days" (15:15). In Ephesus Paul finds mention of "three months" (19:10), and "two years" (19:10), the whole story summed up as "three years" (20:31). Then we have the "two years" of delay in Caesarea (24:27). We thus have about seven of these fifteen years itemized. Much of the remaining eight is left to be interpreted by the reader. As already shown, Luke has treated it as the remaining period of the life of Jesus, as also, perhaps, more of the career of Paul and his teaching in the church. Of these years, we have no very exact knowledge. If 57 AD, for instance, should be taken as the year of Festus' coming rather than 59 or 60 AD, the other dates back to 44 AD would, of course, be changed. Back of 44 AD the dates are largely conjectural.

XI. Historical Worth of Acts.—It was once fashionable to discredit Acts as a book of no real value as history. The Tübingen school regarded Acts as an endless romance, the only historical value of which was to throw light on the thought of the period which produced it (Chase, The Credibility of Acts, 9). There are not wanting a few writers who still regard Acts as a late cicerone between the Peter and Paul parties, or as a party pamphlet in the interest of Paul. Somewhat fanciful parallels are found between Luke's treatment of both Peter and Paul. "According to Holtzmann, the strongest argument for the critical position is the correspondence between the acts of St. Peter and the other apostles on the one side and those of St. Paul on the other" (Headlam in HDB). But this matter seems rather far fetched. Peter is the leading figure in the early chapters, as Paul is in the latter half of the book, but the correspondences are not remarkably striking. There exists in some minds a prejudice against the book on the ground of the miracles recorded as genuine events by Luke. But Paul himself claimed to have wrought miracles (2 Cor 12:12). It is not scientifically sound to crucify a book for what it narrates miracles (Blass, Acta Apostolorum, 8). Ramsay (St. Paul the Traveller, 8) tells his experi-
ence in regard to the trustworthiness of Acts: "I began with a mind unfavorable to it, for the
inconsistent and apparently incorrect details of the Tubingen theory had left me quite unconvinced and
was by actual verification of Acts in points where it
could be tested by inscriptions, Paul's epistles, or
current non-Christian writers, that "it was gradually
borne in upon me that in various details the narra-
tive showed marvelous truth." He concludes by
"placing this great writer on the high pedestal
that belongs to him" (10). McGiffert (The Apos-
tolic Age) had been compelled by the geographical
and historical evidence to abandon in part the older
criticism. He also admitted that the Acts are
more trustworthy than previous critics allowed
(Ramsay, Luke the Physician, 5). Schmiedel (EB)
still argues that the writer of Acts is inaccurate
because he was not in possession of full information.
But on the whole Acts has had a triumphant
vindication in modern criticism. Jülicher (Erdi,
355) admits "a genuine core outgrown with
legendary accretions" (Chase, Credibility, 9). The
moral honesty of Luke, his fidelity to truth, (Rack-
ham, Acts) is clearly shown by his principles and
the Acts. This, after all, is the chief trait in the
true historian (Ramsay, St. Paul the Traveller,
4). Luke writes as a man of serious purpose and
is the one New Testament writer who mentions his
constantly material in his work. His attitude
and spirit are those of the historian. He
reveals artistic skill, it is true, but not to the dis-
credit of his record. He does not give a bare
chronicle, but he writes a real history, an inter-
pretation of the events read and digested. He had adequate
resources in the way of material and endowment
and has made conscientious and skilful use of his
opportunity. It is not necessary here to give in
detail all the points in which Luke has been vin-
dicated (see Knowling on Acts, Ramsay's books and
Harnack's Luke (Acts) 13.7). The most obvious are
the following: The use of "proconsul" instead of
"propraetor" in Acts 13.7 is a striking instance.
Curiously enough Cyprus was not a senatorial
province very long. An inscription has been found
in Cyprus "in the proconsul's of Paulus." The
'most first' of Antioch in Pisidia is like the (13 50)
"First Ten," a title which was only given (as here)
to a board of magistrates in Gr cities of the East
(MacLean in one of the letters of J.E. J attempting
(14 13) is in accord with the known facts of the worship there. So we have
Perga in Pamphylia (13 13), Antioch in Pisidia
(13 14), Lystra and Derbe in Lycaonia (14 6),
but not Iconium (14 1). In Gallipoli Luke notes
that there are called strategoi or praetors (16
20), and are accompanied by actors or ribab-
dotchis (16 35). In Thessalonica the rulers are
politarches (17 6), a title found nowhere else, but
now discovered on an inscription of Thessalonica.
We rightly speak of the Court of the Areopagus at
Athens (17 19) and the proconsul in Achaia (18
12). Though Athens was a free city, the Court of
the Areopagus at the time were the real rulers.
Achaia was sometimes associated with Macedonia,
though at this time it was a separate senatorial
province. In Ephesus Luke knows of the Asiarchs
(19 31), "the presidents of the 'Common Council' of
the province in cities where there was a temple of
Rome and the Emperor, they superintended the
worship." (MacLean) Note also that Ephesus is
"temple-keeper of the great Diana" (19 35). Then observe the town clerk
(19 35), and the assembly (19 39). Note also the
title of Felix, "governor" or procurator (24 1),
Agrippa the king (25 21), and the magistrates
(27 1). Ch 27 is a marvel of interest and accuracy for all who wish to know
details of ancient seafaring. The matter has been worked over in a masterful way by James Smith,
Voyage, and Shipwreck of St. Paul. The title "First
Man of the Imperial City" (28 7) is for the coin of Melita. These are by no means all the
matters of interest, but they will suffice. In most
of the items given above Luke's veracity was once
challenged, but now he has been triumphantly
vindicated. The force of this vindication is even
more appreciated when one recalls the incidental nature
of the items mentioned. They come from widely
scattered districts and are just the points where in
strange regions it is so easy to make slips. If
space allowed, much more could be said in detail and with more justice to Luke's worth as a his-
torian. It is true that in the earlier portions of the
Acts we are not able to find so many geographical
and historical corroboration. But the nature of
the material did not call for the mention of so many
places and persons. In the latter part Luke does
not hesitate to record miraculous events also.
His character as a historian is firmly established
by the passages where outside contact has been
found. We cannot refuse him a good name in the
rest of the book, though the value of the sources used
certainly cuts a figure. It has been urged that Luke
breaks down as a historian in the double mention
of Quirinius in Lk 2 2 and Acts 5 37. But Ramsay
What Was Christ? (1896) has shown how the
new knowledge of the census system of Augustus
derived from the Egyptian papyri is about to clear
up this difficulty. Luke's general accuracy at
least calls for suspense of judgment, and in the
matter of The Acts he deals with the records of
Luke as compared with Josephus outclasses his rival.
Harnack (The Acts of the Apostles, 203-29) gives in
his usual painstaking way a number of examples of
"inaccuracy and discrepancy. But the great
bulk of them are merely examples of independence
in narration (cf Acts 9 with 22 and 26, where we
have three reports of Paul's conversion). Harnack
did not, indeed, once place as high a value on Luke
as a historian as he now does. It is all the more
significant, therefore, to read the following in
book has now been restored to the position of credit
which is its rightful due. It is not only, taken as
a whole, a genuinely historical work, but even in the
majority of the facts and details it is correct. Judged
from almost every possible standpoint of historical criticism it is a solid, respectable, and
in many respects an extraordinary work." That
is, in my opinion, an understanding of the remark
able conclusion concerning the trustworthiness of Luke when one
considers the distance that Harnack has come. At
any rate the prejudice against Luke is rapidly
disappearing. The judgment of the future is
forecast by Ramsay, who ranks Luke as a historian
of the first order.

XII. Purpose of the Book. — A great deal of
discussion has been given to Luke's aim in the Acts.
Baur's theory was that this book was written to
give a condulatory view of the conflict between Peter
and Paul, and that a minute parallelism exists in the
Acts between these two heroes. This tendency
tone once held the critical field, but it does not
take into view all the facts, and fails to explain
the book as a whole. Peter and Paul are the heroes of
the book as they undoubtedly were the two chief
personalities in apostolic history (of Wendt, Apostel-
geschichte, 17). There is some parallelism between
the careers of the two men (see the worship of
Peter at Caesarea in Acts 10 25), and that to Paul
in 11 14; see also the punishment of Ananias and
Saphira and that of Elymas). But Knowling (Acts,
16) well replies that curiously no use is made of the
death of both Peter and Paul in Rome, possibly at the same time. If the Acts was written late, this matter would be open to the knowledge of the writer. There is in truth no real effort on Luke's part to paint Paul's life or to think of Paul. The few similarities in incident are merely natural historical parallels. Others have seen in the Acts a strong purpose to conciliate gentile (pagan) opinion in the fact that the Rom governors and military officers are so uniformly presented as favorable to Paul, while the Jews are represented as the real aggressors against Christianity (cf Josephus' attitude toward Rome). Here again the fact is beyond dispute. But the other explanation is the more natural, viz. that Luke brings out this aspect of the matter because it was the truth. Cf B. Weiss, Einl, 560. Luke does have an eye on the world relations of Christianity and rightly reflects Paul's ambition to win the Roman Empire to Christ (see Rom 15), but that is not to say that he has given the book a political bias or colored it so as to deprive it of its historical worth. It is probably true (cf Knowling, Acts, 15; J. Weiss, Uber die Absicht und den literarischen Charakter der Apostelgeschichte) that Luke did Paul, that is, he presented its world destiny in Christianity, that Christianity was the true Judaism, the spiritual and real Israel. If Luke wrote Acts in Rome, while Paul's case was still before Nero, it is easy to understand the somewhat long account of the arrest and trials of Paul in Jerusalem, Caesarea and Rome. The point would be that the legal aspect of Christianity before Rom laws was involved. Rhetorical Christianity had found shelter as a sect of Judaism, and was presented by Galilee as a religio licita. If Paul was condemned as a Christian, the whole aspect of the matter would be altered. Christianity would at once become religio illicita. The last word in the Acts comments on the fact that Paul, though still a prisoner, was permitted to preach unhindered. The importance of this point is clearly seen as one pushes on to the Neronian persecution in 64. After that date Christianity stood apart from Judaism in the eye of Rome. I have already stated my belief that Luke closed the Acts when he did and as he did because the events with Paul had only gone thus far. Numerous scholars hold that Luke had in mind a third book (Acts 1:4), a possible though he means necessary inference. A "first treatise," "first volume," to carry the narrative on to Rome with Paul, but it is rather straining the point to find all this in Acts 1:8. Rome was not "the nethermost part of the earth," but not merely nearly beyond the horizon. Nor did Paul take the gospel to Rome. Besides, to make the arrival of Paul in Rome the goal in the mind of Christ is too narrowing a purpose. The purpose to go to Rome did dominate Paul's mind for several years (19:21), but Paul cuts no figure in the early part of the book. And Paul wishes to push on from Rome to Spain (Rom 15:24). It is probably true that Luke means to announce his purpose in Acts 1:1–8. One needs to keep in mind also Lk 1:1–4. There are three ways of writing history. Luke chooses the biographical method in Acts. Thus he conceives that he can best set forth the tremendous task of interpreting the first thirty years of the apostolic history. It is around persons (cf Harnack, The apostles of the Apostles, 117), two great figures (Peter and Paul), that the narrative is focused. Peter is most prominent in 1–12, Paul in 13–28. Still Paul's conversion is told in Acts 9 and Peter reappears in 15. But these great personages do not stand alone. John the Apostle is certainly with Peter in the opening chapter. Other apostles are mentioned also by name (1:13) and a number of times in the first twelve chapters (and in 15). But after 15 they drop out of the narrative, for Luke follows the fortunes of Paul. The other chief secondary figures in Acts are Stephen, Philip, Barnabas, James, Apollo, all Hellenists save James (Heb Paul). The major characters are numerous (John, Mark, Silas, Timothy, Aquila and Priscilla, Aristarchus, etc). In most cases Luke gives a distinct picture of these incidental personages. In particular he brings out sharply such men as Gallo, Claudius, Lysias, Felix, Festus, Herod, Agrippa I and II, Julius. Luke's conception of the apostolic history is that it is the work of Jesus still carried on by the Holy Spirit (1:1f). Christ chose the apostles, commanded them to wait for power from on high, filled them with the Holy Spirit and then sent them on the mission of world conquest. In the Acts Luke records the waiting, the coming of the Holy Spirit, the planting of a powerful church in Jerusalem. The first church history. It is in reality the Acts of the Holy Spirit as wrought through these men. It is an inspiring narration. Luke had no doubt whatever of the future of a gospel with such a history and with such heroes of faith as Peter and Paul.

XIII. Analysis.—

1. The connection between the work of the apostles and that of Jesus (1:1–11).

2. The equation of the early disciples for their task (1:12–2:47).

(a) The disciples obeying Christ's parting command (1:12–14).

(b) The place of Judas filled (1:15–26).

(c) Miraculous manifestations of the presence of the Holy Spirit (2:1–13).

(d) Peter's interpretation of the situation (2:14–36).

(e) The immediate effect of the sermon (2:37–41).

3. The development of the work in Jerusalem (3:1–9:10).

(a) An incident in the work of Peter and John with Peter's apostolic (3).

(b) Opposition of the Sadducees aroused by the preaching of the resurrection of Jesus (4:1–9).

(c) An internal difficulty, the problem of poverty (4:32–5:11).

(d) Great progress of the cause in the city (5:12–16).

(e) Renewed hostility of the Sadducees and Gamaliel's retort to the Pharisees (6:17–42).

(f) A crisis in church life and the choice of the seven Hellenists (6:1–7).

(g) Stephen's spiritual interpretation of the Christian community stirs the antagonism of the Pharisees and leads to his violent death (6:8–8:1a).

4. The compulsory extension of the gospel to Judaea, Samaria and the neighboring regions (8:10–40).

(a) The great persecution, with Saul as leader (8:1–4).

(b) Philip's work as a notable example of the work of the scattered disciples (8:5–24).

5. The conversion of Saul changes the whole situation for Christianity (9:1–31).

(a) Saul's call to Damascus (9:1–3).

(b) Saul stopped in his hostile course and turns Christian himself (9:4–18).
(c) Saul becomes a powerful exponent of the gospel in Damascus and Jerusalem (9 19–30).

(d) The church has peace (9 31).

6. The door opened to the Gentiles, both Roman and Greek (9 32–11 30):
(a) Peter’s activity in this time of peace (9 32–49).
(b) The appeal from Cornelius in Caesarea and Peter’s response (10).
(c) Peter’s arraignment before the Pharisaic element in the church in Jerusalem (11 1–25).
(d) Greeks in Antioch are converted and Barnabas brings Saul to work (11 16–26).
(e) The Greek Christians send relief to the Jewish Christians in Jerusalem (11 27–30).

7. Persecution from the civil government (12):
(a) Herod Agrippa I kills James and imprisons Peter (12 1–19).
(b) Herod pays the penalty for his crimes (12 20).
(c) Christianity prospers (12 24 f).

8. The gentle propaganda from Antioch under the leadership of Barnabas and Saul (13, 14):
(a) The specific call of the Holy Spirit to this work (13 1–5).
(b) The province of Cyprus and the leadership of Paul (13 4–12).
(c) The province of Pamphylia and the desertion of John Mark (13 13).
(d) The province of Galatia (Pisidia and Lycaonia) and the stronghold of the gospel upon the native population (13 14–14 24).
(e) The return and report to Antioch (14 25–28).

9. The gentile campaign challenged by the Judaizers (15 1–56):
(a) They meet Paul and Barnabas at Antioch who decide to appeal to Jerusalem (15 1–3).
(b) The first public meeting in Jerusalem (15 4 f).
(c) The second and more extended discussion with the decision of the conference (15 6–29).
(d) The joyful reception (in Antioch) of the victory of Paul and Barnabas (15 30–35).
(e) The second great campaign extending to Europe (15 36–18 22):
(a) The breach between Paul and Barnabas over John Mark (15 36–39).
(b) From Antioch to Troas with the Macedonian Cry (15 40–16 10).
(c) In Philippi in Macedonia the gospel gains a foothold in Europe, but meets opposition (16 11–16).
(d) Paul is driven also from Thessalonica and Berea (of Philippi), cities of Macedonia also (17 1–15).
(e) Paul’s experience in Athens (17 16–34).
(f) In Corinth Paul spends nearly two years and the cause of Christ wins legal recognition from the Roman governor (17 16–17).
(g) The return to Antioch by way of Ephesus, Caesarea and probably Jerusalem (18 18–22).

11. The third great tour, with Ephesus as headquarters (18 23–20 3):
(a) Paul in Galatia and Phrygia again (18 23).
(b) Apollos in Ephesus before Paul comes (18 24–28).
(c) Paul’s three years in Ephesus (19 1–20 1 a).
(d) The brief visit to Corinth because of the report there (19 10–13).

12. Paul turns to Jerusalem again with plans for Rome (20 4–21 16):
(a) His companions (20 4).
(b) Rejoined by Luke at Philippi (20 5 f).
(c) The story of Troas (20 7–12).
(d) Coasting along Asia (20 13–16).
(e) With the Ephesian elders at Miletus (20 17–38).
(f) From Miletus to Tyre (21 1–6).
(g) From Tyre to Caesarea (21 7–14).
(h) From Caesarea to Jerusalem (21 15 f).

(a) Paul’s reception by the brethren (21 15–17).
(b) Their proposal of a plan by which Paul could undo the work of the Judaizers concerning him in Jerusalem (21 18–26).
(c) The uproar in the temple courts raised by the Jews from Asia as Paul was carrying out the plan to disarm the Judaizers (21 27–30).
(d) Paul’s rescue by the Roman captain and Paul’s defense to the Jewish mob (21 31–22 23).
(e) Examination of the chief captain (22 24–26).
(f) Brought before the Sanhedrin (22 30–23 10).
(g) Cheered by the Lord Jesus (23 11).
(h) Paul’s escape from the plot of Jewish conspirators (23 12–30).

(a) The flight to Caesarea and presentation to Felix (23 31–35).
(b) Paul’s appearance before Felix (24).
(c) Paul before Festus (25 1–12).
(d) Paul, as a matter of curiosity and courtesy, brought before Herod Agrippa II (25 13–26 32).

(a) From Caesarea to Myra (27 1–5).
(b) From Myra to Fair Havens (27 6–8).
(c) From Fair Havens to Malta (27 9–28 10).
(d) From Malta to Rome (28 11–15).

(a) His quarters (28 16).
(b) His first interview with the Jews (28 17–22).
(c) His second interview with the Jews (28 23–28).
(d) Two years afterward still a prisoner, but with freedom to preach the gospel (28 30 f).

Literature: Besides the works referred to above see Wendt’s edition of Meyer’s Kommentar (1899); Headlam in HDR; Knowing on Acts in Expositor’s Greek Testament (1900); Knowing, With the Epistles (1892), Testimony of St. Paul to Christ (1905); Moffatt, History of the NT (1901).

Here is a selected list of important works:
1. Introduction: Bosc, Intro. to the NT (1900); Bennett and van Hooft, Biblical Intro. to the Bible, Einl in das NT (4 Aufl, 1900); S. Davidson, 3d ed. (1894); C. R. Gregory, Canon and Text of the NT (1907); H. J. Holtzmann, Einl in das NT (3 Aufl, 1892); Jacques, Histoire des livres du NT (1900–5); Jülicher, Einl. to the NT (tr. 1904); Peace, Critical Intro. to the NT (1909); Reuss, Canon of the Holy Scriptures (tr. 1886); Salmon, First Intro. to the Study of the Books of the NT (7th ed., 1896); von Soden, The History of Early Christian Lit. (tr. 1906); B. Weitz, A Manual of Intro. to the NT (tr. 1890); Westcott, History of the Canon of the NT (1896); Zahn, Einl. to the NT (tr. 1909); Moffatt, Intro. to the Lit. of the NT (1911).

2. Text: See general works on textual criticism of the NT (Gregory, Kenyon, Nestle, Tischendorf, Scrivener, von Soden, Scrivener, Westcott, etc.). Of special treatises note Blasis, Philology of the Gospels (1898); Acta Apostolorum (1893); Bornemann, Acta Apostolarum (1948); Chase, Old Syriac Element in the Text of Codex Bezae (1883); Corssen, Der griechische Text der Acta Apostolorum (1892); Klostermann, Probleme im Apost. Texte (1883); Klostermann, Vindications Lucanneae (1866); Nestle, Philologie (1896); J. Rendel Harris, Study of Codex Bezae (1891).

3. Apostolic History: For literature on the life of Paul see Robinson, Epochs in the Life of Paul (1900), 321–27, and art. Paul in this encyclopedia. Important general works are the following: Eusebius, Life of St. Paul the Apostle Age (1899); Baumgarten, The Apostolic History (tr. 1854); H. J. H. St. John, Studies in the Apostolic Age (1909); Burton, Resources and Letters of the Apostolic Age (1895); Doellinger, The First Age of the Church (tr. 1867); Dobschaetz, Christian Life in the Primitive Church (tr.
ADAM, a-da’ (אָדָם, ’ādām, “adom”), a term used in the Bible to denote the human race. The opening words of the Bible are: “In the beginning God created heaven and earth” (Gen i.1). Adam, the first human ancestor, was the first created being, the great-grandson of God, and the first to exercise freedom, knowledge, and moral responsibility. He occupied a position of honor and privilege, and was made in the divine image and likeness. He was created a little lower than the angels, with authority over all creation. Adam and his wife Eve were placed in the Garden of Eden to care for it and keep it free from evil. They sinned when they ate the fruit of the tree of knowledge and were expelled from Eden. The Bible records the history of mankind from Adam’s time to the present day, and the events and incidents of man’s history are narrated as a continuation of the history of Adam and his descendants. Adam is therefore a central figure in the history of humanity and a symbol of human nature and destiny. He is also a figure of the human race and a representation of humanity in general. Adam is a figure of the human race and a symbol of humanity in general. He is also a figure of the human race and a representation of humanity in general.
2. Adam in the Narrative of Genesis

Arranges created things according to the most general possible classification: light and darkness; firmament and waters; land and seas; plants; sun, moon, stars; swimming and living creatures; land animals. No possible parallel to this classification remains in the case of mankind. In the narrative of Gen 1 the recurrence of identical expressions is almost rigidly uniform, but in the case of man the unique statement occurs (ver 27), “Male and female created he them.” Although Dillmann is here in the minority among interpreters, it would be difficult to show that he is wrong in interpreting this as referring to one male and one female, the first pair. In this case we have a point of contact and of agreement with the narrative of ch 2. Man, created in God’s image, is given dominion over every animal, is allowed every herb and fruit tree for his sustenance, and is bidden multiply and fill the earth. Gen 2 4—5 the first man is made of the dust, becomes a living creature by the breath of God, is placed in the garden of Eden to till it, is given names to the animals, receives as his counterpart and helper a woman formed from part of his body, and should not commit the forbidden fruit of “the tree of the knowledge of good and evil.” With her he is then driven from the garden, under the curse of brief life and heavy labor, since should he eat— or continue to eat?—of the fruit of the “tree of the knowledge of good and evil”.

With her he is then driven from the garden, under the curse of brief life and heavy labor, since should he eat—or continue to eat?—of the fruit of the “tree of the knowledge of good and evil”? With her he is then driven from the garden, under the curse of brief life and heavy labor, since should he eat—or continue to eat?—of the fruit of the “tree of the knowledge of good and evil”?

3. Teachings of the Narrative

Blessing upon a creature fit to serve the ends for which it was created—these things lie upon the surface of 1 26—31. In like manner 2 4 tell us that the gift of a blessed immortality was within man’s reach; that his Creator ordained that his moral development should come through an inward trial, not as a mere gift; and that the presence of suffering in the world is due to sin, the presence of sin to the machinations of a subtle tempter. The development of the doctrine of the fall belongs to the NT (see Adam in NT; FAB). Allusions to the narrative of the creation and the fall of man, covering most points of the narrative of Gen 1—4, are found in 2 Esd 3 4—7, 10.21.26; 4 30; 6 54—56; 7 11.46—48; Tob 8 6; Wis 2 25; 9 2; 10 1 f; Eccles 16 14; 17 1—4; 4. Adam in 25 24; 40 1; 49 16. In both 2 Esd Apocrypha and Wisd we read that death came upon all men through Adam’s sin, while 2 Esd 4 30 declares that the “grain of the heart” of all men has grown in the heart of Adam from the beginning.” Aside from this doctrinal development the Apoc offers no additions to the OT narrative. F. K. FARR

ADAM IN OT (Evolutionary Interpretation): אֲדֹם, “man,” Gen 1 26, or “a man,” Gen 2 5; עַזְיָא, “the man”; mostly with the article as a generic term, and not used as the proper name of a patriarch until 5 3, after which the name first given to both man and woman (5 2) is used of the man alone: The being in whom is embodied the Scripture idea of the first created man and ancestor of mankind. The account, which belongs mostly to the oldest stratum of the Genesis story (J) merits careful attention, because evolutionary science, history, and new theology have all quarreled with or rejected it on various grounds, without providing the smallest approach to a satisfactory substitute.

1. What the Writer Meant to Describe.—It is important first of all, if we can, to get at what the author meant to describe, and how it is related, if at all, to literal and factual statement. In the first place we have to ask what the writer saw, and what he means by the name; a matter which, as it is concerned with one of the commonest words of the language, is of no great moment as compared with the writer’s own understanding of it. The most plausible conjecture, perhaps, is that which connects it with the Assyrian adaman, “to make,” or produce, hence, “the produced one,” “the creature.” The author of Gen 2 7 seems to associate it, rather by word-play than derivation, with ha-’adhamah, “the ground” or “soil,” as the source from which man’s body was taken (cf 3 19, 23). The name ‘adhamah itself seems to be closely connected with the name Edom (אֶדֹם), ’adham, Gen 25 30, meaning “red”; but whether from resemblance of the vowel or the ruddiness of the man, or merely the incident recorded in Gen 25 30, is uncertain. Without doubt the writer of Gen 2 3 had in mind man’s earthly origin, and understood the name accordingly.

2. Outline of the Genesis Narrative

From them in bearing the image and likeness of God, in having dominion over all created things, and in having grains and fruits for food, while they have herbs. The writer’s object in all this seems to be as much to identify man with the animal creation as to differentiate him from it. In the second account, 2 4—3 24, man’s identity with the animal is ignored or at least minimized (cf 2 20), while the object is to determine his status in a spiritual individualized realm where he has the image of God. Jeh God “forms” or “shapes” him out of the dust of the ground, breathes into his nostrils the breath...
of life, and with such special distinction he becomes, like other created things, a "living soul" (nephesh huqyd; cf. 2 1) and is placed in a garden situated somewhere among the rivers of Babyon, his primitive occupation being to dress and keep it. In the midst of the garden are two mysterious trees, the life tree, whose fruit seems to have the potency of conferring immortality (cf. 3 22), and the tree of the knowledge of good and evil, whose fruit is not to be eaten under penalty of death. Meanwhile, as in naming the animals the man finds no real companion, Jeh God "builds" out of the man's ribs a woman, and the man recognizes her spiritual unity with himself accordingly. The story goes on to relate, without note of time, how the serpent, the subtlest of beasts, urged on the woman the desirable qualities of the fruit of the forbidden tree, intimating that God had made the prohibition from envy, and roundly denying that death would be the consequence of eating. Accordingly the woman took and ate, and gave to her husband, who also ate; and the immediate consequence was a sense of shame, which caused them to cover their nakedness with fig leaves, and a sense of guilt (not differentiated by Adam from shame, 3 10), which made the pair reluctant to meet Jeh God. He obtains the confession of their disobedience, however; and passes pathetic comment on their created antipathy between its species and the human; on the woman, of sorrow and pains and subjection to the man; and on the man, of hardship and severe labors, until he returns to the dust from which he was taken to eat of the tree of knowledge, lest now they should eat of the tree of life they are expelled from the garden, and the gate is guarded by flaming sword and Cherubim.

(3) It is impossible to read this story with the entire detachment that we accord to an ancient myth, or even to a time- and space-conditioned historical tale. It continually suggests intimate relations with the permanent truths of human nature, as if there were a fiber in it truer than fact. And this provokes the inquiry whether the author himself intended the account of the Edenic state and the Fall to be taken as literal history or as an allegory, a natural development of the theme he makes the name generic by the article (the adam or man), the only exceptions, which are not real exceptions in meaning, being 1 26 and 2 5, already noted. It is not until 5 3, where the proper name Adam is as it were officially given, that such history as is conditioned by chronology and genealogy begins. What comes before this, except the somewhat vague location of the Eden region, 2 10-14, reads rather like a description of the primordial manhood nature, not in philosophical but in narrative language. It is not fable; it is not a worked-over myth; it is not a didactic parable; it is (to speak technically) exposition by narration. By a descriptive story it traces the elemental movement of manhood in its first spiritual impact on this earthly life. In other words, instead of being concerned to relate a factual series of events from the remote past, the writer's penetrative intuition goes downward and inward to those spiritual movements of being which are germinal in all manhood. It is a spiritual analysis of man's intrinsic nature, and as such must be spiritually discerned. An analogous manner of exposition may be seen in the account of Our Lord's temptation in the wilderness, Mt. 4 1-11, which though authenticated must have come ultimately from Our Lord Himself.

II. How the Story Looks Today.—Scarcely any other Scripture story has so suffered from the changes wrought by modern thinking as has this story of Adam. On the one hand it is felt that to retain the fall and guilt of original sin, and to see this experience of Adam as a cause to impose too great a burden, dogmatic and historic, on this primitive story. Yet on the other hand the story, including this implication of the primal fall, refuses to be dismissed as an outworn or fantastic myth. Modern critics hold so vitally on the roots of human nature that our only course is not to reject it but to re-read it with the best light our age affords. And whether best or not, the evolutionary light in which all modern thought is colored we cannot ignore.

(1) The divergent assumptions of the traditional and the evolutionary view may be roughly stated thus: of the traditional, that in consequence of this Eden lapse man is in a ruined nature, needing redemption and reinstatement, and that therefore the subsequent spiritual dealing with him must be essentially pathological and remedial; of the evolutionary, that by the very terms of his creation, which the lapse from obedience did not nullify, man is spiritually a child needing growth and education, and that therefore the subsequent dealing with him must foster the development within him of a nature essentially normal and true. It is evident that these two views, thus stated, merely come to the same conclusion, namely, that without rejecting the traditional, or stopping to inquire how it and the evolutionary may coexist, we may here consider how the story before us responds to the evolutionary view. Only—it must be premised—the evolution whose beginning it describes is not the evolution of the human species; we can leave natural science and history to take care of that; but, beginning where this leaves off, the evolution of the individual, from the first forth-putting of individual initiative and choice toward the far-off adult and complete personality. This, which in view of its culmination we may call the evolution of personality, is evolution distinctively spiritual, that stage and grade of upward moving being which succeeds to the material and psychical (1 Cor 15 45-46). On the material stage of evolution, which the human species shares with the beast and the plant, Scripture is silent. Nor is it greatly concerned with the psychical, or cultural, development of the soul, but seeks to reveal in a divinely ordered history and literature its essential inadequacy to the highest manhood potencies. Rather its field is the evolution of the spirit, in which alone the highest personal values are realized. Yet the self-same, however, in a consistent origin, course and culmination of its own, as it traces the line of spiritual uprise and growth from the first Adam, who as a "living soul" was subject to the determinism of the species, to the last Adam, who as a "life-giving spirit" is identified with the supreme Personality in whom Divine and human met and blended. Of this tremendous evolution the story of Adam, with a clearness which the quaint narrative style of exposition does not impair, reveals the primal and directive factors.

(2) Just as the habitat and the nature of created things answer to each other, so the environment in which man is placed when he comes revealed by the Garden of Eden. The Garden Habitat kind of life he is fitted to live. He is placed not in wild and refractory Nature but in a garden watered and planted with a view to his receiving care and nurture from above. Nature is kind to him, and he is not to reach his fruit ready to his hand, and requiring only that he "dress and keep" the garden. Of all the trees he may freely eat, including the tree of life; save only the
most centrally located of all, the tree of "knowledge of good and evil." The being fitted to this habitat is a man adult, in statistical average, but still like a child; not yet individualized to determine character, not yet exerting a will of his own apart from the will of his Creator; in other words, as spiritually considered, not yet detached from the spirit of his personal Source. All this reads like the description of a life essentially negative, or rather neutral, with free communication both downward and upward, but neither that of a domesticated animal nor of a captive god; a being balanced, as it were, between the two poles of the Divine, but not yet aware of the possession of that individual will and choice which alone can give spiritual significance to a committal to either.

(3) In the first story of man's creation, 1 20-31, describing his creation as species, the distinction of male and female is explicitly included.

3. The Or- (1 27). In the second story (2, 3), "ganic Factor wherein man is contemplated rather as an individual, the description of his nature begins before any distinction of sex exists. If the writer meant this latter to portray a condition of man in time or in natural fact, there is thus a discrepancy in accounts. If we regard it, however, as giving a factor in spiritual evolution, it not only becomes of more meaning, but is indispensably founded in the basic theology of creation. The naive story relates that the woman was "built" out of the already shaped material of the man's body, in order to supply a fellowship which the animal could not: a help "answering" to him (avenegd; of conjoin). Then it makes the man recognize this conjugal relation, not at all with reference to sexual passion or the propagation of species but as furnishing man occasion, so to say, for loving and being loved, and making this capacity essential to the integrity of his nature. The value of this for the ultimate creative purpose and revelation is as marvelous as it is profound; it is the organic factor in realizing the far-reaching design of Him who is evolving a being bearing His image and deriving from Him the breath of life. That God is Spirit (Jn 4 24), that God is love (1 Jn 4:8) and love "creation's final law," may as an idea be later revelation; but meanwhile from the beginning, in the common origin of animal and plant life, love is implanted, by making man a dual nature, wherein love, which is the antithesis of self-seeking, has the equal and companionable object necessary to its existence. Thus in the conjugal relation the potential moral value is made intrinsic. In all the dubious course of his subsequent evolution, this capacity of love, though itself subject to the corruptio optima pessima, is like a redeeming element at the heart alike of the individual and of society.

(4) Even in this neutral garden existence it is noteworthy that the man's nature evinces its superiority to the animal in the absence of determinism. He is not enslaved to an instinct of blind conformity to an external will. In other words, he can cooperate intelligently in his own spiritual evolution. He has the power of choice, ministered by the stimulus of an unmotivated prohibition. He can abstain and live, and eat and of (2 16, 17). The reasons are given, no train of spiritual consequences, to one whose spirit is not yet awake; in this pre-spiritual stage rather the beginnings of law and prescription must be arbitrary. Yet even in so rudimentary a relation we already see the essential contrast between animal and spiritual evolution, in that the latter is not a blind and instinctive imposition from without, but a free course submitted to man's intelligence and cooperation. And it is a supremely significant feature of the man's initial impulse come by the way of subtlety. "The serpent," the writer promises, "was more subtle than any beast of the field which Jehovah God had made." It points to a trait which he puts on the borderline between the species and the individual, the disposition, not indeed to rebel against a law of being, but to submit it to refinement and accommodation or perhaps from sheer curiosity to try conclusions with it. The suggestion came first from the lowly animal and the woman, the finer and more spiritually awake of the pair. Not to press this too far, it is significant that the first impulse toward individual initiative rises through the free play of intellect and reason. It seems to promise a subtler way of being "like God." To differentiate more minutely the respective parts of man and wife in the affair, which are portrayed in the light of sex distinction, would be beyond our present scope.

(5) Two trees "in the midst of the garden" (2 9) are mentioned at the outset; but the tree of life, the permitted one, seems no more to have been thought of until it was no longer possible (margin). In the later story the woman speaks to the serpent of "the tree which is in the midst of the garden" (3 3) she has only one tree in mind, and that the prohibited one. The other, as it was accounted in its fruit, seemed to have been put by them with those privileges of life which are ignored or postponed; besides, the life it symbolized was the perpetuation of the garden-life they were living, such life as man would have lived before the temptation to the alternatives of living—a life innocent and blissful, but without the stimulus of spiritual reaction. And it was just this latter that the alternative of the two trees afforded; a reaction fateful for good or evil, needing only the impulse that should set the human spirit in motion. Consider the case. If manhood were ever to rise from a state of childhood, wherein everything was done and prescribed for him, into a life of free choice and self-moving wisdom, it is hard to see how man can live, much less evolve, except by something involving inhibition and prohibition; something that he could not do without incurring a risk. This is what the "tree of the knowledge of good and evil" (2 9) and the tree by its name means, an alluring test and a lure. In a sense we may say the temptation began with God; but it was not a temptation to evil. Symbolized in the two trees, but actual in the opportunity of spiritual committal, two ways of life stood open before him. On the one hand, it was open to him to forfay his spirit in obedience and against the lure of perilous knowledge, thus deepening and seasoning his negative innocence into positive holiness. This such a course was feasible was shown centuries later in the Divine Son of Man, who in perfect loyalty of the child yet in perfect wisdom of adultness fulfilled the primal sinless ideal of the first Adam. On the other hand there was the lure of the forbidden knowledge, to which the serpent gave the false glamor of godliness, and which could be had by detaching his individual will from that of God, and incurring the experience of self-seeking, and taking the risk. It was the latter that was chosen; this however not in the spirit of rebellion, but in the desire for a good beyond what the childlike limitations of Eden afforded (3 6). This then was the first motivated uprise of the spirit of manhood, taking the initiative and acting for itself. So far forth, as the self-
assertion of the individual, it was as truly a stage of spiritual evolution as if the man had maintained obedience; but there was in it the rupture of the spirit's union with its personal Source; and the hapless commital to self, which is rightly called a Fall. So strangely mingled were the spiritual elements in this primal manhood initiative. See Fall, The.

(6) The Scripture does not say, or even imply, that by this forth-putting of initiative the man was committed to a life of sin and depravity. This was the idea of a later time. By the nature of the organism, however, man was committed to the fallibility and unwise of his own untried nature; in other words, to the perils of self-reliance. Naturally, too, the gift of detachment from his spiritual Support would tend to widen as he trusted himself more exclusively. It lay with him and his species to perfect the individual personality in the freedom which he had chosen. And in this the possibilities both upward toward godlikeness and downward toward the abyss of self were common "Adam." Like must henceforth be lived on a broader and more spacious scale. But to this end Eden with its tender garden nurture can no longer be its habitat, nor man's existence be fitted symbolized by a tree from which he only the forbidden fruit, and but indifferently (3:22). It must encounter hardship and sweat and toil; it must labor to subdue a reluctant soil to its service (3:17-19); it must return at last to the dust from which man's body was formed (3:19). Yet the record is of a dissistant progress of ultimate victory over the serpent-power, which henceforth is to be man's deadly enemy (3:15). At this point of the exposition it is the inchoate manhood is transplanted from the garden to the unsubsidized world, to work out its evolution under the conditions of the human species. The pair becomes the family, with its family interests and cares; the family becomes the unit of social and organized life; the members receive individual names (3:20; 5:2); and chronologically measured history begins.

III. How Adam Is Recognized in the OT.—After the story of Adam is given as far as the birth of Seth (Gen 4:1) and the two days (Gen 4:25), the "book of the generations of Adam" begins at 5:1, and five verses are taken up with a statistical outline of his life, his offspring, and his 930 years of earthly existence.

(1) Adam is the father of Noah. It is in the canonical books of the OT almost all allusion to him ceases, and nothing whatever is made of his fateful relation to the sin and guilt of the race. (See Adam in the NT.) The latter idea seems to have come to consciousness only when men's sense of sin and a broken law was more ingrained than it seems to have been in canonical times. In the case of the few allusions that occur, moreover, that the name Adam is identical with the word for "man" makes the reference more or less uncertain; one does not know whether the patriarch or the race is meant. In the Song of Moses (Dt 32), in the clause ver 8, "When he separated the children of men" (or "Adam"), the reference, which is to the distribution of races as given in Gen 10, may or may not have Adam in mind. In like manner Zophar's words (Job 20:4), "Knowest thou not of this old time, since man or Adam was placed upon earth?" may mean either the recognition by name of the first created man. Job's words (31:33), "If like Adam I have covered my transgressions," sound rather more definite as an allusion to Adam's hiding himself after having taken the fruit. When Isaiah says (Isa 43:27), "Thy first father sinned," it is uncertain whom he means; for in 61:2 he says, "Look unto Abraham your father," and Ezekiel has told his people (Ezk 16:3), "The Amorite was thy father, and thy mother was a Hittite." The historical consciousness of the prophets seems to have been confined to the history of the Israelitish race.

(2) The references in the Apocryphal books (Sir, Tob, 2 Esd) deal with Adam's origin, his lordship over creation, and in the latest books with the legend of a separation of soul and body that the race inherits from him. The passages in Sir (132 BC) where he is mentioned are 33:10; 40:1, and 49:16. Of these the most striking, 40:1, "Great travail is created for every man, and a heavy yoke is upon the sons of Adam," is hardly to be construed as a reference to our heritage of his sin. In Tob (2d cent., he is mentioned once (8:6), "Thou madest Adam, and gavest him Eve." 2 Esd, written supposedly some time after 70 AD, is a somber and desponding tone throughout. It references its two references to Adam (2 Esd 3:5.10;21,26; 4:30; 6:54; 7:11.46.48) are almost all in lament over the evil he has implanted in the race of men by his transgression. The first reference (3:5) is rather remarkable for a passage of Adam's [three (3:21) ] [thou] commandest the dust, and he gave thee Adam, a body without a soul, yet it was the workmanship of thine hands, etc. His indictment of Adam culminates (7:48) in the apophasis, "O thou Adam, when thou didst know that thou was thou that sinned, the evil is not fallen on thee alone, but upon all of us that come of thee."

JOHN FRANKLIN GENUNG

EDITORIAL NOTE.—The promoters of the Encyclopaedia are not to be understood as endorsing all the views set forth in Dr. Genung's article. It was thought right, however, that a full and adequate presentation of so suggestive an interpretation should be given.

ADAM IN THE NT (Adam, Adam): The name of Adam occurs nine times (in five different passages) in the NT, though several of these are purely incidental.

I. Gospels.—In Lk 3:38 the ancestry of Jesus Christ is traced back to Adam, "Adam, the son of God," thereby identifying the human race to the OT genealogies of Gen. This is the only place in the Gospels in which Adam is actually named, though there is an allusion to him in Mt 19:4-5 (= Mk 10:6-8), referring to Gen 1:27 and 2:24.

II. Epistles.—Adam is used in two ways as the founder of the race and the cause of the introduction of sin in order to point the comparison and contrast with Christ as the Head of the new race and the cause of righteousness. The passage is the logical center of the ep., the central point to which everything that precedes has converged, and out of which everything which follows will flow. The great ideas of Sin, Death, and Judgment are here shown to be inevitably connected with the human race with Adam. But over against this there is the blessed fact of union with Christ, and in this union righteousness and life. The double headship of mankind in Adam and Christ shows the significance of the work of redemption for the entire race. Mankind is ranged under two heads, Adam and Christ. There are two men, two acts and two results. In this teaching we have the spiritual and theological illustration of the great modern principle of the union of the race. There is a solidarity of evil and a solidarity of good, but the latter far surpasses the former in the quality of the obedience of Christ as compared with Adam, and the facts of
the work of Christ for justification and life. The section thus not merely episode or illustration, but that which gives organic life to the entire ep. Although sin and death are ours in Adam righteousness and life are ours in Christ, and these latter two are infinitely the greater (ver 11); whatever we have lost in Adam we have more than gained in Christ. As all the evils of the race sprang from one man, so all the blessings of redemption come from One Person, and there is such a connection between the Person and the race that all men can possess what the One has done. In vs 12–19 Paul institutes a second Adam, analogous and contrasted to the first. Adam and Christ; the two persons, the two works and the two consequences. The fulness of the apostle's meaning must be carefully observed. Not only does he teach that what we have derived from the first Adam is met by what is derived from Christ, but the transcendence of the work of the latter is regarded as almost infinite in extent. "The full meaning of Paul, however, is not grasped until we perceive that the benefits received from Christ, the Second Adam, correspond with and counteract the disaster entailed by the first Adam. It is the surplussage of that in Paul's presentation is commonly overlooked" (Mabie, The Divine Reason of the Cross, 116).

The contrast instituted here between Adam and Christ refers to death and life, but great difficulty turns on the interpretation of the two。「all」. "As in Adam all die, so also in Christ shall all be made alive." Dods (Commentary, B. 306) interprets it as referring to Adam as the source of physical life that ends in death, and of Christ as the source of spiritual life that never dies. "All who are by physical derivation truly united to Adam incur the death, which by sinning he introduced into human experience, and similarly, all who by spiritual affinity are in Christ enjoy the new life which triumphs over death, and which he won." So also Edwards, who does not consider that there is any real unfairness in interpreting the former "all" as more extensive than the latter, "if we bear in mind that the conditions of entrance into the one class and the other are totally different. They, are not stated here. But we have them in Rom 5 5–11, where the apostle seems to anticipate an objection to the analogy which he instituted between Adam and Christ. Both alike are heads of humanity, but they are unlike in this (as also in other things, Rom 5 15), that men are in Adam by nature, in Christ by faith" (Corinthians, 412).

2. 1 Cor 15:22

4. 1 Tim 2:13-14

The argument is a very similar one to that in 1 Cor 2:14. The apostle states that "Adam was not beguiled," we must apparently understand it as simply based on the text in Gen to which he refers (Gen 3 13), in which Eve, not Adam, says, "The serpent beguiled me, and I ate." In Gal 3 16 he presents similarly from "seed" in the singular number, just as He 7 reasons from the silence of Gen 14 in regard to the parentage of Melchizedek. Paul does not deny that Adam was deceived, but only that he who was not directly deceived. His point is that Eve's facility in yielding warrants the rule as to women keeping silence.

"And Enoch, the seventh from Adam" (Gen 5). Biggs says that the quotation which follows is a combination of passages from Gen 5 and 6, though the allusion to Enoch himself in verse 14 is evidently based on the story in Gen.

III. Conclusions.—As we review the use of "Adam" in the NT, we cannot fail to observe that Paul assumes that Adam was a historical personality, and that the record in Gen was a record of facts, that sin and death were introduced into the world and affected the entire race as the penalty of the disobedience of one ancestor. Paul clearly believed the physical death and spiritual death, and that there is some causal connection between Adam and the human race in regard to physical death. While the reference to death in Rom 5 as coming through sin, is primarily to physical death, yet physical death is the expression and sign of the deeper idea of spiritual death; and even though physical death was in the world before Adam it was only in connection with sin that its moral meaning and estimate became clear. Whether we are to interpret, "for that all sin was in Adam sin," or sinning as the result of an inherited tendency from Adam, the entire passage implies some causal connection between him and them. The need of redemption is thus made by the apostle to rest on facts. We are bound to Adam by birth,
and it is open to us to become bound to Christ by faith. If we refuse to exchange our position in Adam, which is evil, for that in Christ which is good, we become answerable to God; that is the ground of moral freedom. The NT assumption of our common ancestry in Adam is true to the facts of evolutionary science, and the universality of sin predicated is equally true to the facts of human experience. Thus redemption is grounded on the teaching of Scripture, and confirmed by the uncontradicted facts of history and experience. Whether, therefore, the references to Adam in the NT are purely incidental, or elaborated in theological discussion, everything is evidently based on the record in Gen.

W. H. GRIFFITH THOMAS

ADAM, BOOKS OF: Books pretending to give the life and deeds of Adam and other OT worthies existed in abundance among the Jews and the early Christians. The Talm speaks of a Book of Adam, which is now lost, but which probably furnished some of the material which appears in early Christian writings. The Vida Adami was tr from the Ethiopic by Dillmann (1853), and into English by Malan (The Book of Adam and Eve, London, 1882). The Testament of Adam is a portion of the Vida Adami (published by Renan in 1853) and so probably is the Litteral ton Protoplaston (Fabricius, I, 83). See Apocalyptic Literature; Apocrypha.

M. O. EVANS

ADAM, CITY OF ( אלהים, 'adham, 'adham, 'adham), (Adamit): A fortified city in the territory of Naphthalite, named between Chinnereth and Ramah (Josh 19 36), which see. The name probably survives at the Damieh Ford, near the mouth of the Jabbok twenty miles above Jericho. An Arabian historian asserts that about 1265 AD the Jordan was here blocked by a land slide. The inner gorge of the Jordan is here narrow with high banks which would facilitate such an obstruction as permitted the waters to "pile up" above Adam and run out below, permitting Joshua's host to cross on dry land (SWP, II, 15; Wright, SCOTH, 130-34).

GEORGE FREDERICK WRIGHT

ADAMAH, ad'a-ma ( אדמה, 'adma), (Adami): A fortified city in the territory of Naphthalite, named between Chinnereth and Ramah (Josh 19 36), which see. The name probably survives at the Damieh Ford, near the mouth of the Jabbok twenty miles above Jericho. An Arabian historian asserts that about 1265 AD the Jordan was here blocked by a land slide. The inner gorge of the Jordan is here narrow with high banks which would facilitate such an obstruction as permitted the waters to "pile up" above Adam and run out below, permitting Joshua's host to cross on dry land (SWP, II, 15; Wright, SCOTH, 130-34).

GEORGE FREDERICK WRIGHT

ADAMANT, ad'a-mant ( אדמנ്റ, šămîr) (Ekz 3 9; Zec 7 12): In the passages cited and in Jer 17 1, where it is rendered "diamond," the word šămîr evidently refers to a hard stone. The word adamant ("unconquerable") is used in the early Gr writers for a hard metal, perhaps steel, later for a metal like gold and later for the diamond. The Heb šămîr, the Gr adamas (from which word diamond as well as adamant is derived) and the Eng. adamant occur regularly in fig. expressions. All three are equally indefinite. Adamant may therefore be rendered a good title for šămîr, though the LXX does not use adamas in the passages cited. There is a possible etymological identification of šămîr with the Gr smyris (sméris or smiris) emery, a granular form of corundum well known to the ancients and used by them for polishing and engraving precious stones. Corundum in all its forms, including the sapphire and ruby, is in the scale of hardness next to the diamond. In Ev Isa 5 6; 7 23-25; 9 18; 10 17; 27 4; 32 13, šămîr is tr brzer. See also STONES, Precious.

ALPHABETICAL ELY DAY

ADAMI, ad'a-mi; a-dâmî: Mentioned in AV as a separate name, where RV has ADAMI-NEKEB, which see (Josh 19 35).

ADAMI-NEKEB, ad'a-mî ne'ke'b ( אדامي נקב, 'adâmmî ha-nêkeb), "the ground of the piercing," that is of the pass, or defile): A place mentioned in indicating the border of Naphtali (Josh 19 35). In AV Adami and Nekeb are given as separate names, and it is an open question which view of the matter is correct. Most of the Gr texts give the names as two. The Vulg has "Adam quae est Neecess." The Jerusalem Talm gives two names, though instead of Hannekeb or Nekeb it has Shaphadâbh (Meg 1 1, or Neubauer's Geog du Talm, 225). In the list of places conquered by Thothmes III of Egypt occurs the name NKBU (Tomkins, Rec of Past, new series, V, 47), which seems to be the same with Nekeb.

The list of names for the border of Naphtali (Josh 19 33-34) has no name in common with the list of cities (vs 35-38) unless Adami and Adamah are the same. The PE Survey maps locate Adama at Damieh, about seven miles northwest of the exit of the Jordan from the Lake of Galilee, and Adam at Khurbet Adamah, five or six miles south of the exit. Condor, Tomkins and others place Adami at Damieh, and identify Nekeb by its Talmudic name in the neighboring ruin Seipâdêh. Condor says (art. "Nekeb," HDB) that the "pass" implied in the name Nekeb "is probably one leading from the eastern precipices near Tiberias."

WILLIS J. BEECHER

ADAN, ad'an. See ADDAN.

ADAD, ad'a ( אדד), "adâd, meaning uncertain): The Baba name on the twelfth month of the year. Used in the Bible only in Ezr 6 15 and eight times in Est. At first the author in Est defines Adar as the twelfth month, but afterward omits the numeral. In order to maintain the relation of the year to the seasons it was customary to add a second Adar, as often as was needed, as an intercalary month.

ADAR, ad'a ( אדר), in AV (Josh 15 3) for ADDAR, which see.

ADARSA, ad'a-śa. See ADAŞA.

ADASA, ad'a-śa ( אדרסה, Adosâ; AV ADARSA): A town less than four miles from Beth-horon (30 furlongs An, XII, x, 5; 1 Macq 7 40) and a day's journey from Hamar (1 Macq 7 38). Maccabae defeated and killed Nicanor, a general of Demetrius (1 Macq 7 40 ff). The ruin of Adaseh near Gideon (SWP, III, XVII).

ABDEEL, ad'bè-ël ( אֲבָדֶל, 'addon, "add to, ""to put upon," "to put in addition": Found only in Gal 3 15, which may thus be paraphrased: "To take a familiar illustration: even a man's will, when ratified, no third party may annul or supplement" (Dummelow, in loc.)

(2) 'ayin, 'eppathâmi, "to put upon," "any man shall add unto them, God shall add unto him the plagues" (Rev 22 18). The book is not to be falsified by addition or excision (see Book) by the interpolation of unauthorized doctrines or the neglect of essential truths (cf Dt 4 2; 12 32). See also IMPART; SUPPLY.

M. O. EVANS

ADADDAN, ad'a-n ( אָדָדַדָן), 'addin; in Neh 7 59, 'addin; connected in some way with the name of
the god Addu); A name mentioned in the list of the returning exiles (Ezr 2:58, duplicated in Neh 7:61). It is one of several names of Bab low places from which men were wont to unable to declare their genealogy as Israelites.

ADDA, ad'ār (אדר, ’addār, "glorious."); See Ard): (1) A grandson of Benjamin, sometimes counted as one of his sons (1 Ch 8:3). (2) A town on the southern border of Judah (Josh 15:3, AV "Adar"). The same as Hazar-Addar (Nu 34:4).

ADDER, ad'dēr (עדר, ’adder; Ashdōn, 'adān); Aaddān); A state lying on the east of the Tigris, on the greater and lesser rivers Zab, in the territory of ancient Assyr. For the half-century terminating with the destruction of Jerusalem by Titus, Addi- bane is especially interesting by reason of the careers of its king, Izates, and his mother Helen, who became Jews. They had their part in the Jewish-Roman wars, and in various ways were typical of the existing situation. (See Anti. XX, 2-5; BJ, II, xvi, 4; xix, 2; v, iv, 2; vi, 1; xi, 5; VI, vi, 4.) Somewhat later Adiabene was absorbed into the Roman Empire and became one of the six provinces which formed the larger province of Assyria, though Piny and Ammianus sometimes call the large province by the name Adiabene.

WILLIS J. BEECHER

ADIDA, ad'-i-da (אידדה, ’Addōdā); A town of the Benjamite tribe near Lod and Ono located upon a hill facing the "plain country" of Judaeas, rebuilt and fortified by Simon Maccabaeus (1 Mac 23:38), who later encamped here to meet the army of Tryphon (1 Mac 13:13; Anti. XIII, vi, 5). It was also here that Aretas, king of Arabia, met Alexander Janneus in battle and defeated him (Anti. XIII, xvi, 2). Perhaps the El-Haditheh of today located about three miles east of Lydda or Lod. See Hadin.

ADIEL, ad'-i-el (אדיל, ’A'dīl); "ornament of God"): (1) One of the "princes" of the tribe of Simeon, who, in the days of Hezekiah, smote the aborigines of Gedor and captured the valley (1 Ch 4:66). (2) Father of Masai, one of the priests who dwelt in Jerusalem after the return from the Exile (1 Ch 9:12). (3) Father of Azmaveth who was over David's treasures (1 Ch 27:25).

ADIN, ad'-in (אدين, ’Addīn, "adorned"): The name of a family, "the sons of Adin" (Ezr 2:15; 8:6; Neh 7:20; 10:16; 1 Esd 6:14; 8:32), mentioned among the returning exiles. The list in Ezr 2 is placed in the midst of the narrative concerning Zerubbabel, but its title and its contents show that it also includes the later Jewish immigrants into Pal. The list in Neh 7 is a duplicate of that in Ezr, but with variations; most of the variations are naturally accounted for by supposing that one copy was made later than the other and was brought up to date. In Ezr 1 and 2 the number of the sons of Adin is said to be 454; in Neh it is 655. The 50 males, led by Ebed the son of Jonathan, who came with Ezr, may or may not have been included in the numbers just mentioned. Among the names of those who sealed the coven- ant along with Neh are 44 that are placed under the caption "the chiefs of the people" (Neh 10:14-28), and nearly half of these are the family names of the list in Ezr 2 and Neh 7. It is natural to infer that in these cases a family sealed the covenant collectively through some representative. In that case the Adin here mentioned is the same that is mentioned in the other places. See also ADINA.

WILLIS J. BEECHER

ADINA, ad'-i-na, ad'-i-na (אֲדִינָה, ’Addīnāh, "adorned"): "Adina the son of Shiza the Reubenite, a chief of the Reubenites, and thirty with him" (1 Ch 11:42). This is in that part of the list of David's mighty men in which the Chroni- corder supplements the list given in 2 S.
ADINO, ad'i-no, a-d’i-no ( Heb AVC, ad’hlah, “his adorned one”). The senior of David’s “mighty men.” "Joshah-ben-ath, chief of the captains; the same was Adino the Ezanite, against eight hundred slain at one time" (2 S 23:8). This very exact rendering makes it evident even to an English reader that the text is imperfect. Ginsburg offers a corrected form taken substantially from the parallel passage in 1 Ch 11:11: “Jashobeam a son of a Hachmonite, chief of the captains; he lifted up his spear.” This is plausible, and is very generally accepted, and eliminates the name as a title of the Ezanite, which do not occur elsewhere in the Bible. So much of the facts are against this. The Sept has the names Adino and Ezanite. The Lat finds no proper names in the passage, but so translates the words as to presuppose the Heb text as we have it. It may be a case for suspended judgment.

The texts concerning David’s mighty men are fragmentary both in S and in Ch. If they were more complete they would perhaps make it clear that the three seniors were commanders of David at Pas-dammim, Ephes-dammim (1 Ch 11:13; 1 S 17:1); and that we have in them additional details concerning that battle. The record says that on the death of Goliath the Philistines fled and the Israelites "slew of them at Caesarea (1 S 17:52 sq.), but it is improbable that during the retreat portions of the Philo force rallied, so that there was strenuous fighting.

WILLIS J. BEECHER

ADINUS, ad'i-nus. See ADNUS (Apoec).

ADITHAIM, ad-i-th’aim, ( Heb adhiyam, “double ornament, passage, or prey”): A city in "the lowland" (Shephelah, not as AV “valley”) of Judah (Josh 15:36). Site unknown, but possibly same as Adum (q.v.).

ADJURATION, ad-jur’-a-shun: The act of requiring or taking a solemn oath. In a time of military peril Saul adjured the people ( Heb, ‘alah, "to take oath") and they took oath by saying "Amen" (1 S 14:24). When Joshua pronounced a ban on Jericho (Josh 6:26) he completed it with an oath ( Heb, shabha, "to cause to swear"). Often used in the sense of a solemn charge without the administration of an oath (1 K 2:16; 2 Ch 18:15; Cant 2:7; 5:8,9; 1 Thes 5:27). With reference to the withholding of testimony, see Lev 6:1 and Prov 29:24. The high priest sought to put Jesus under oath (see Pedela, exoriskos, "to force to an oath," Mt 26:63). Adjure also means to solemnly implore ( pedelw, horkizō) as when the man with an unclean spirit appealed to Jesus: "I adjure thee by God, the Son of God, to come out of me." (Mt 8:29); or seven sons of Sceva, exorcists, sought in the name of Jesus to expel demons (Acts 19:13).

(1) The exacting of an oath has, from time immemorial, been a customary procedure in conferring civil and ecclesiastical office and in taking legal testimony. Though often allowed to become paradoxical and a truism, its inherent chief solemnity, the taking of an official oath or the swearing of witnesses is still considered essential to the moral integrity of government, secular or spiritual. False swearing, under solemn oath, constitutes the guilt and heinousness of perjury. The universality of oath-taking is humanity’s tribute, whether pagan or Christian, to the sacredness of truth.

(2) Civilized nations administer oaths under three heads: political, ecclesiastical, legal. The sovereign of England receives the crown only as he or she responds affirmatively to the solemn affirmation of the archbishop or bishop: "Will you solemnly promise and swear to govern, etc., close with the affirmation, "So help me God." A fundamental conviction of civilized nations was expressed by the ancient poet Hesiod: "An oath is the bond that keeps the world together." It is the most solemn appeal to the inviolability of the human conscience, and the sacredness of a vow as witnessed both by God and men. See also OATH.

DWIGHT M. PRATT

ADLAI, ad’l-i, ad’l ( Heb Abdi, LXX ‘Aδλη, Adil and ‘Aδλα, Adai, “lax, weary”): The father of Shaphat, an overseer of David’s herds in the lowlands (1 Ch 27:29).

ADMAH, ad’mā, ad’māh ( Heb admah, “ad’ma-tha”): From a root signifying red: one of the Cities of the Plain (Circar) (Gen 10:19; 4:28; Dt 20:23; Hos 11:8) upon which Abraham and Lot looked from the heights of Bethel, destroyed by Sodom and Gomorrah. The name is used tentatively for the City of Adam referred to in Josh 3:16, and thinks that perhaps the name may be preserved in that of Dannah Ford, near the mouth of the river Jakob; but that point could not have been in view from Bethel. See VALLE OF SIDON.

ADMATHA, ad’ma-tha, ad-mā’tha ( Heb admah’tha, “ad’dma-tha’): One of "the seven princes of Persia and Media, who saw the king’s face, and sat first in the kingdom" (Est 1:4); of 2 K 25:19; Est 7:14. The LXX gives only three names.

ADMIN, ad’m-in. See ARNI.

ADMINISTRER, ad-min’is-ter ( Heb ad'min, dia-koô, administration): ADMINISTRATION, ad-min’is-tr’ishun ( Heb ad'min, dia-koôn): Terms used in AV in 1 Cor 12:5; 2 Cor 8:19; 2 Thes 3:9 respectively, and replaced in RV by "ministering" and "ministration." The root idea of both words is "service," hence to supply, or conduct or attend to anything; the performance of official duty, the conduct of a state, the various forms of spiritual or social service. "Minister," used either of an act or of an office, is the term that best represents the apostolic thought and ideal.

DWIGHT M. PRATT

ADMISSION, ad-mi’-rishun ( Heb bether, thatina, "a marvel" or "wonder"); ( Heb bethemadad, "to wonder"): A term thrice used in AV in the NT, to express a wonder that includes approval, high esteem; replaced in RV by three renderings better suited to convey the various kinds of surprise, wonder, admiration, expressed by this fertile word: viz. in 2 Thess 1:10, "to be admired," reads in RV "to be marvelled at"; in Jude ver 16 "having men’s persons in admiration" is rendered "showing respect of persons"; in Rev 17:6 "wondered with great admiration" is replaced by "with a great wonder." The Gr original is used frequently in the NT, esp. in the Gospels, to express marvel and wonder at the supernatural works of Jesus.

DWIGHT M. PRATT

ADNA, ad’na ( Heb adhn, “pleasure”); ( Heb Adinâ, Aidainâ): (1) An Israelite in Ezra’s time who, having married a foreign wife, divorced her. He belonged to Pahath-moab (Ezr 10:30).
(2) A priest of the family of Harum, during the high-priesthood of Joakim son of Jethua (Neh 12:13–15).

ADNAH, ad·nā (אַדְנָּה), 'adhnäh, “pleasure”; 'E'wâ, Ednâ; “Ezra, Edna”:
(1) A warrior of the tribe of Manasseh, who deserted Saul and joined David's forces at Ziklag (1 Ch 12:20.21).
(2) An officer of high rank, perhaps the commander-in-chief of Jehovah's army (2 Ch 17:14). Here the spelling in Heb is אַדְנָּה (adnā).  

ADO, a·dô`: Found only in Mk 6:39 AV: “Why make ye this ado and weep?” Here “make ado” is used to translate the Gr verb ἀφοβομαι, thourubomai (cf Mt 9:23 AV, where it is likewise rendered “making a noise”). “Ado” as a substant. is OF for “trouble” or “fuss,” used only in the sing.; and in the early Eng. VSS it combined well with the verb “make,” as here, to translate the Gr word rendered elsewhere “causing an uproar,” or “tumult,” “making a noise,” etc (see Acts 17:5; 20:10). Cf Shakespeare, Romeo and Juliet, III, 4, “We'll keep no great ado,—a friend or two.” Geo. B. Eager

ADONAI, a·dô·nî, ad-o-nâ (`adô'nî, `adhônâyô): A Divine name, tŕ “Lord,” and signifying, from its derivation, “sovereignty.” Its vowels are found in the MT with the unpronounceable tetragrammaton יְהֹוָה; and when the Heb reader came to these letters, he always substituted in pronunciation the word “`adônâyô.” Its vowels combined with the tetragrammaton form the word “Jehovah.” See God, Names of.

ADONIBEZK, a·dô·nî·bê·zek (`adônî·be·zek), “lord of Bezek”): Lord of a town, Bezek, in southern Palestine, whom the tribes of Judah and Simeon overthrew. Adonibezek fled when his men were defeated, but was captured, and was punished for his cruelty in cutting off the thumbs and great toes of seventy kings by a similar mutilation. Being brought to Jerusalem, he died there (Jgs 1:5–7). This not to be confused with Adonizek, as in the LXX. This is quite another name.

ADONIJAH, ad·o·nî·jâ (`adônî·jâ, `adhônî·jâh or `adhônî·jah), “my lord is Jehovah”:
(1) The eldest son of King David and Haggith, the fourth of David's sons, born in Hebron after David became king of Judah, principally known for his attempt to become king instead of Solomon (2 S 3:4; 1 Ch 3:2; 1 K 1:2 and 1). The record gives no details concerning Chiliah, the son of David and Abigail. Leaving him out, Adonijah was the oldest living son of David, after the death of Amnon and Absalom.

In treating the record it has been needlessly obscured by neglecting or distorting the time data. It says that the rebellion of Absalom broke out "at an end of forty years" (2 S 15:7). The natural meaning is not forty years after the last-mentioned preceding date, but at the close of the fortifteenth calendar year of the reign of David. As David reigned 40 years (2 S 5:4,5), the close of his fortieth calendar year was the beginning of his last year. That the date intended was at the beginning of a vernal year is confirmed by the references to the season (2 S 17:28). Instead of giving this number, Jos says that 4 years had elapsed since the last preceding date, which is very likely correct.

Many considerations show that the outbreak cannot have occurred much earlier than the fortieth year of David; for Amnon and Absalom were born after David's reign began, and were men with establishments of their own before Amnon's offence against Tamar, and after that the record, if we accept the numeral of Jos, accounts for 2 plus 2 plus 2 plus 2 plus 2 that is, for 13 (2 S 5:4–5; 1 K 1:2; 2 S 15:7). But the fortieth year of a reign is always the year that is reckoned from the beginning of the reign. It is clear that the fortifteenth year of the reign of David was the year when Absalom's son Adonijah attempted to usurp the throne; it does not follow that it was the year of the first rebellion of Absalom.

The common assumption that the fortieth is to be reduced to four, on the basis of the number in Jos, is contrary to the evidence. On this view of the chronology all the events fall into line. David's idea of making Solomon king was connected with his temple-building idea. This is implied in K, and presented somewhat in full in Ch. The preparatory acts described in Ch (1 Ch 22–24) seem to have culminated in David's fortieth year (1 Ch 25:31). David's policy was not altogether popular with the nation. His assembly (1 Ch 28:1) is mostly made up of zarm and other appointed officials, the hereditary Israelitish "priests" and "chaplains" and conspicuous by their absence. The outbreak under Absalom was mainly a matter of skillful manipulation; the hearts of the people were really with David. And yet the party of Absalom was distinctly a legitimist party, as is believed in the succession of the evil son, and it objected to many things in the temple-building policy. Joab and Abiathar and others sympathized with this party, but they remained with David out of personal loyalty to him.

The Absalom campaign began early in the calendar year. There is no reason to think that it lasted more than a few weeks. Later in the year a few weeks are enough time to allow for the campaign against Sheba. Joab must have been more or less alienated from David by David's appointment of Amasa to supersede him. Then came David's serious illness. Abishag was brought in, not to "attend upon David during his declining years," but to put her vitality at his disposal during a few weeks. Joab and Abiathar did not believe that David would ever do business again. Their personal loyalty to him no longer restrained them from following their own ideas, even though these were contrary to the wishes of their prince.

The narrative does not represent that Nathan and Bathsheba influenced David to interfere in behalf of Solomon; it represents that they succeeded in arousing him from his torpor, so that he carried out his own wishes and intentions. For if a man resting in bed had done something for him, the treatment by Abishag had not been unsuccessful. And now a supreme appeal to his mind proved sufficient to arouse him. He became himself again, and acted with his usual vigor and wisdom.

Adonijah is described as a handsome and showy man, but his conduct does not give us a high opinion of his capabilities. He had no real command of the respect of the guests who shouted "Long Live King Adonijah." When they heard that Solomon had been crowned, they "were afraid, and rose up, and went every man his way." Adonijah made his submission, but afterward attempted to engage in intrigues, and was put to death.

(2) One of the Levites sent out by Jehovah, in his third year, with the Book of the Law, to give instruction in Judah (2 Ch 17:8).

(3) One of the names given, under the heading "the chiefs of the people," of those who sealed the covenant along with Nehemiah (Neh 10:16).  

WILLIS J. BEECHER
ADONIKAM, ad-ō-nil'kām (אָדֹנִי-קָם, ‘ădōnî-kām, “my lord has risen up”): The name of a family of the returning exiles (Ezr 2 6; Neh 7 18). “The sons of Adonikam,” men and women and children, numbered 666 according to the list as given in Ezr, but 667 according to the copy in Neh. Either included among these or in addition to them was the contingent that came with Ezr. “Eliphelet, Jeuel, and Shemaiah, and with them 60 males” (Ezr 8 13).

ADONIRAM, ad-ō-nil'ram (אָדֹנִי-רָם, ‘ădōnî-rām, “my lord is exalted”): An official of Solomon (1 K 4 6; 5 14). Near the close of the reign of David, and at the opening of the reign of Rehoboam, the same office was held by Adoniram (2 S 20 24; 1 K 12 18). The name Adoniram seems to be a contraction of Adoniram, and doubtless the same person held the office in all the three reigns. The name also appears as Hadoram (2 Ch 10 18). In AV and RV the office is variably described as “over the tribute,” which is misleading, and “over the levy,” which is correct, though obscure. In ARV it is uniformly “over the men subject to taskwork.” Adoniram was at the head of the department of forced labor for the government, which were to the effect that peoples conquered by Israel, excepting the Canaanites, were to be spared, subject to the obligation to forced labor on the public works (Dt 20 11); that this law was actually extended to the Canaanites (Josh 15 10; 20 13; Jos 8 32 f); that David, in his preparations for the temple, organized and handed over to Solomon a service of forced labor (1 Ch 22 2 15, etc); that under Solomon this service was elaborately maintained (1 K 6 6 13 f; 9 10 22 Ch 7 7 f). It was not for the temple only, but for all Solomon’s numerous building enterprises. In theory men of Israelitish blood were free from this burden, but practically they found it a burden and a grievance. At the accession of Rehoboam they protested against it (1 K 12; 2 Ch 10). Nothing in the account is more indicative of Rehoboam’s utter lack of good judgment than his sending his veteran superintendent of the forced labor department to confer with the people. The murder of Adoniram and the ignominious flight of Rehoboam, were natural consequences. WILLIS J. BEECHER

ADONI-ZEDEK, a-dō-nil-zēdēk (אָדֹנִי-צֶדֶק, ‘ădōnî-ṣēdek, “lord of righteousness”): King of Jerusa at the time of the conquest of Canaan (Josh 10 1). When he heard of the fall of Ai and the submission of the Gibeonites, he entered into a league with four other kings to resist Joshua and Israel, and to the battle of Gilgal he employed all the forces at his disposal (Josh 10 4), but was overthrown by Joshua in a memorable battle (vs 12–14). Adoni-zedek and his four allies were shut up in a cave, while the battle lasted, and afterward were taken out by Joshua’s order, put to death and hanged on trees (Josh 10 22–27). It is noticeable that the name is almost the equivalent of Melchizedek, מֶלְחִצֶדֶק, mēlkhîzēdek, “king of righteousness,” who was ruler of Jerusa in the time of Abraham. EDWARD MACK

ADOPTION, a-dop'shan (ὑιοθεσία, hyiothesia, “placing as a son”):

I. The General Legal Idea
1. In the OT
2. Greek
3. Roman

II. Paul’s Doctrine
1. In Gal as Liberty
2. In Rom as Deliverance from Debt

III. The General Idea
1. In Relation to Justification
2. In Relation to Sanctification
3. In Relation to Regeneration

IV. As God’s Act
1. Divine Fatherhood
2. Its Cosmic Range

This term appears first in NT, and only in the epp. of Paul (Gal 4 5; Rom 8 15 22; 9 4; Eph 1 5) who may have coined it out of a familiar or phrase of identical meaning. It indicated generally the legal process by which a man might bring into his family, and endow with the status and privileges of a son, one who was not by nature his son or of his kindred.

1. The General Legal Idea.—The custom prevailed among Greeks, Romans and other ancient peoples, but it does not appear in Jewish law.

Three cases of adoption are mentioned: of Moses (Ex 2 10), Genumath (1 K 11 20) and Esther (Est 2 7 15), but it is remarkable

1. In the OT that they all occur outside of Pal—
in Egypt and Persia, where the practice of adoption prevailed. Likewise the idea appears in the NT only in the epistles of Paul, in which he speaks of those who have been taken out of Pal. The motive and initiative of adoption always lay with the adoptive father, who thus supplied his lack of natural offspring and satisfied the claims of affection and religion, and the desire to exercise paternal authority or to perpetuate his family. The process and conditions of adoption varied with different peoples. Among oriental nations it was extended to slaves (as Moses) who thereby gained their freedom, but in Greece and Rome it was, with rare exceptions, limited to citizens.

In Greece a man might during his lifetime, or by will, to take effect after his death, adopt any male citizen into the privileges of his son, but with the invariable condition that the adopted son accepted the legal obligations and religious duties of a real son.

In Rome the unique nature of paternal authority (patria potestas), by which a son was held in his father’s power, almost as a slave was kept in the power of his master, gave a peculiar character to the process of adoption.

For the adoption of a person free from paternal authority (aus juris), the process and effect were practically the same in Rome as in Greece (adoptio). In a more specific sense, the process of adoption proper (adoptio) was the process by which a person was transferred from his natural father’s power into that of his adoptive father, and it consisted in a fictitious sale of the son, and his surrender by the natural to the adoptive father.

II. Paul’s Doctrine.—As a Rom citizen the apostle would naturally know of the Rom custom, but in the cosmopolitan city of Tarsus, and again on his travels, he would become equally familiar with the corresponding customs of other nations. He employed the idea metaphorically much in the manner of Christ’s parables, and, as in their case, there is danger of pressing the analogy too far in its details. It is not clear that he had any specific form of adoption in mind when illustrating his teaching by the general idea. Under this figure he teaches that God, by the manifestation of His grace in Christ, brings men into the relation of sons to Himself, and communicates to them the experience of sonship.

In Gal Paul emphasizes especially the liberty enjoyed by those who live by faith, in contrast to the bondage under which men are held, who guide their lives by legal ceremonies and ordinances, as the Galatians were prone to do (5 1).
THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

Adonikam

Adoption

The contrast between law and faith is first set forth on the field of history, as a contrast between both the pre-Christian and the Christian economies (3:23-24), although in another passage he carries the idea of adoption into the description of man's condition under legal bondage—that of a slave, that of a minor under guardians appointed by his father's will, and that of a Roman son under the patria potestas (Gal 4:1-3). The process of liberty is first of all one of redemption or buying out (Gr εξαγοράσει). This term in itself applies equally well to the slave who is redeemed from bondage, and the Roman son whose adoptive father buys him out of the authority of his natural father. But in the latter case the condition of the son is not materially altered by the process; he only exchanges one paternal authority for another.

If Paul for a moment thought of the process in terms of ordinary Roman adoption, the resulting condition of the son he conceives in terms of the more free and active Greek or Jewish family life. Or he may have thought of the rarer case of adoption from conditions of slavery into the status of sonship. The redemption is only a precondition of adoption, which follows upon faith, and is accompanied by the sending of the "Spirit of his Son into our hearts, crying, Abba, Father," and then all bondage is done away (4:5-7).

In Rom (8:12-17) the idea of obligation or debt is coupled with that of liberty. Man is thought of as one time under the authority and power of the flesh (8:5), but when the Spirit of Christ comes to dwell in him, he is no longer a debtor to the flesh but to the Spirit (8:12-13), and debt or obligation to the Spirit is itself liberty. As in Gal, man thus passes from a state of bondage into a state of sonship which is also a state of liberty. "For as many as are led by the Spirit of God, these [and these only] are sons of God (8:14)." The spirit of adoption or sonship stands in diabolical opposition to the spirit of bondage (8:15). And the Spirit to which we are debtors and by which we are led, at one and the same time, unites Jesus wholly and absolutely to the Father, and unites the believer wholly and absolutely to Christ unto himself, according to the good pleasure of his will." (Eph 1:5)

The motive and impulse of Fatherhood which result in adoption were eternally real and active in God. In some sense He had been stowed the adoption upon Israel Fatherhood (Rom 9:4). "Israel is my son, my first-born" (Ex 4:22; cf. Dt 14:1; 32:6; Jer 31:2; Hos 11:1). God could not reveal Himself at all without revealing something of His Fatherhood, but the whole revelation was as yet partial and prophetic. When "God sent forth his Son" to "redeem them that were under the law," it became possible for men to receive the adoption; for to those who are willing to receive it, He sent the Spirit of the eternal Son to testify in their hearts that they are sons of God, and to give them confidence and utterance to enable them to call God their Father (Gal 4:5, 6; Rom 8:15).

But this experience also is incomplete, and looks forward to a fuller adoption in the response, not only of man's spirit, but of the whole creation, including man's body, to the Fatherhood of God (Rom 8:20-23). Every filial spirit now groans, because it finds itself imprisoned in a body subject to the prodigal son is welcomed home, glad to confess that he is not worthy to be called a son, and willing to be made as one of the hired servants, but he is embraced and restored to be a son as before. The point of each metaphor is, that justification is the act of a merciful judge, but adoption is the act of a generous father, taking a son to his bosom and endowing him with liberty, favor and a heritage.

Besides, justification is the beginning of a process which needs for its completion a progressive course of sanctification by the aid of the Holy Spirit, but adoption is the movement to Sanc-oevolution with sanctification. The justification of man is those led by the Spirit of God (Rom 8:14) and the same spirit of God gives the experience of sonship. Sanctification describes the process of general cleansing and growth as an abstract process, but adoption includes it as a concrete relation to God, as loyalty, obedience, and fellowship with an ever-loving Father.

Some have identified adoption with regeneration, and therefore many Fathers and Roman Catholic theologians have identified it with the other regenerate process, including the essential fact of conscious sonship. The new birth and adoption are certainly aspects of the same totality of experience, but they belong to distinct systems of thought. If those who identify them is to invite confusion. The new birth defines especially the origin and moral quality of the Christian experience as an abstract fact, but adoption expresses a concrete relation of man to God. Nor does Paul here raise the question of man's natural and original condition. It is pressing the analogy too far to infer from this doctrine of adoption that man is by nature not God's son. It would contradict Paul's teaching elsewhere (Rom 2:5). He should not be convicted of inconsistency on the application of a metaphor. He conceives man outside Christ as morally an alien and a stranger from God, and the change wrought by faith in Christ makes him morally a son and conscious of his sonship; but naturally he is always a potential son because God is always a real father.

IV. As God's Act.—Adoption as God's act is an eternal process of His gracious love, for He "foreordained us to adoption as sons through Jesus Christ unto himself, according to the good pleasure of his will." (Eph 1:5)

The motive and impulse of Fatherhood which result in adoption were eternally real and active in God. In some sense He had been stowed the adoption upon Israel Fatherhood (Rom 9:4). "Israel is my son, my first-born" (Ex 4:22; cf. Dt 14:1; 32:6; Jer 31:2; Hos 11:1). God could not reveal Himself at all without revealing something of His Fatherhood, but the whole revelation was as yet partial and prophetic. When "God sent forth his Son" to "redeem them that were under the law," it became possible for men to receive the adoption; for to those who are willing to receive it, He sent the Spirit of the eternal Son to testify in their hearts that they are sons of God, and to give them confidence and utterance to enable them to call God their Father (Gal 4:5, 6; Rom 8:15).

But this experience also is incomplete, and looks forward to a fuller adoption in the response, not only of man's spirit, but of the whole creation, including man's body, to the Fatherhood of God (Rom 8:20-23). Every filial spirit now groans, because it finds itself imprisoned in a body subject to...
vanity, but it awaits a redemption of the body, perhaps in the resurrection, or in some final consummation, when the whole material creation shall be transformed into a fitting environment for the Son of God, the creation itself delivered from the bondage of corruption into the liberty of the glory of the children of God (Rom 8 21). Then will adoption be complete, when man’s whole personality shall be in harmony with the spirit of salvation, and the whole universe favorable to its perseverance in a state of blessedness. See Chil

LIT. —Lightfoot, Galatians; Sunday, Romans; Lightfoot, Fatherhood of God; Ritchie, Justification and Reconciliation. T. Ress

ADOR, a’dor, ADORA, a-dor’a (’Ašpāh, Aidā;): In Idumea, mentioned in Ant., XIII, ix, 1 as one of the cities captured by Hecuruus, and referred to in 1 Mac 13 20. See ADORAIM.

ADORAIM, ad-o-ra’im (אדריאים, ’adharayim, “a pair of knolls,” perhaps): One of several cities in Judah that were fortified by Rehoboam (2 Ch 11 9). The name appears in Jos and in 1 Mac as Adora or Dora or Dor. Its location is indicated in general by several of the records in Ch groups with it. Common consent identifies it with Đūra, about five miles W. by S. of Hebron.

ADORAM, a-dor’ām. See ADONIRAM.

ADORATION, ad-o-ra’shun: Though this word never occurs in EV, it represents aspects of worship which are very prominent in the Bible.

1. Synonyms.—The word is derived from Lat adorare=(1) “to speak to,” (2) “to beseech,” “entreat,” (3) “to do homage,” “to worship”; from os (oris), mouth. Some have supposed that the root os points to the Rom practice of applying the hand to the mouth, i.e. kissing the hand to (a person or thing), as a token of homage.

II. Meaning.—Adoration is intense admiration culminating in reverence and worship, together with the outward acts and attitudes which accompany such reverence. It thus includes both the subjective sentiments, or feelings of the soul, in the presence of some superior object or person, and the appropriate physical expressions of such sentiments in outward acts of homage or of worship. In other words, it is that reverence and rapt contemplation of the Divine perfections and prerogatives, the acknowledgment of them in words of praise, together with the visible symbols and postures that express the adoring attitude of the creature towards his God. It is the expression of the soul’s mystical realization of God’s presence in His transcendent greatness, holiness and lovingkindness. As a form of prayer, adoration is to be distinguished from other forms, such as petition, thanksgiving, confession and intercession. The chief attitudes referred to in the Bible are the following:

Among the Orientals, esp. Persians, prostration (i.e. falling upon the knees, then gradually inclining the body, until the forehead touches the ground) was used as an expression of profound reverence and humility before a superior or a bene-

factor. It was practised in the worship of Yahweh (Gen 17 3; Nu 16 45; Mt 26 39, Jesus in Gethsemane; Rev 1 17), and of idols (2 K 18; Dn 1 6), but not by nor confined to religious exercises. It was the formal method of supplicating or doing obeisance to a superior (e.g. 1 S 26 23f; 2 K 4 37; Est 8 3; Mk 5 22; Jn 11 32).

A substitute for prostration was kneeling, a common attitude in worship, frequently mentioned in OT and NT (e.g. 1 K 8 54; Ezr 3 10). Kneeling was a prayer for God’s forgiveness and mercy, and was often used in the presence of a thanksgiving, or as a sign of peace-making or reconciliation (e.g. Mt 20 26; 1 Th 5 11; and Acts 21 27).

2. Kneeling 9 5; Ps 95 6; Isa 46 23; Lk 22 41, Christ in Gethsemane; Acts 7 60; Eph 3 14). The same attitude was sometimes adopted in praying homage to a fellow-creature, as in 2 K 1 13. “Sitting” as an attitude of prayer (only 2 S 17 18; 1 Ch 17 16) was probably a form of kneeling, in a Mahometan worship.

This was the most usual posture in prayer, like that of modern Jews in public worship. Abraham “stood before Jah” when he interceded for Sodom (Gen 18 22). Cf 1 S 1 26. The Pharisees in the parable “stood and prayed” (Lk 18 10), and the disciples, who were referred to “pray standing in the synagogues, and in the corners of the streets” (Mt 6 5 AV).

The above postures were accompanied by various attitudes of the hands, which were either lifted up toward heaven, or were laid upon the liv

4. The 2 8), or outspread (Ex 9 29; Ezr 9 5; Hands Isa 1 15), or both (1 K 8 54).

The heathen practice of kissing hands to the heavenly bodies as a sign of adoration is referred to in Ps 146 4, and of kissing the idol in 1 K 19 18; Hos 13 2. The kiss of homage is mentioned in Ps 2 12, if the adoration text there be correct. Kissing hands to the object of adoration was customary among the Romans (Pliny xxvii.8). The NT word for “worship” (proskuneō) lit. means to kiss the hand to (one). See also ATTITUDES.

IV. Objects of Adoration.—The only adequate object of adoration is the Supreme Being. He only who is the sum of all perfections can fully satisfy man’s instincts of reverence, and elicit the complete homage of his soul.

Yet, as already suggested, the crude beginnings of religious adoration are to be found in the respect which man paid to the world’s gods, possessing superior claims and powers, or possessing superior claims and powers, or to objects of divinity, and the homage paid to august and mys-

1. Fellow- 3 12). If Ruth 2 10; 1 S 20 41; 2 S 1 2; 14 22. On a higher plane, as involving some recognition of divinity, is the homage paid to August and Mys-

2. Material phenomena in the physical world Objects which were supposed to have some divine significance. To give reverence to material objects themselves is condemned as idolatry throughout the OT. Such e.g. is the case with the worship of “the host of heaven” (the heavenly bodies) sometimes practised by the Hebrews (2 K 17 16; 21 35). So Job protests that he never proved false to God by kissing hands to the sun and moon in token of adoration (Job 31 26-28). We have reference in the OT to acts of homage paid to an idol or an image, such as falling down before it (Isa 44 15.17.19; Dn 3 7), or kissing it (1 K 19 18; Hos 13 2). All such prac-

tures, in the form of a picture of an individual, not to themselves, but to the Deity whose
presence they symbolize, then they are regarded as legitimate aids to devotion; e.g. fire as a manifestation of the Divine presence is described as causing the worshiper to perform acts of reverence (e.g. Ex 3:2-5; Lev 9:24; 1 K 18:38 f.). In these instances, it was Yahweh Himself that was worshiped, not the fire which revealed Him. The sacred writers are moved to religious adoration by the contemplation of the glories of Nature. To them, "the heavens declare the glory of God; and the firmament sheweth his handiwork." (Cf. esp. the "nature-Psa" 8, 19, 29, 104.)

On a still higher plane is the adoration practiced in the presence of supernatural agents of the Divine will. When an angel of God appeared, men fell instinctively before Him in reverence and awe (e.g. Gen 18:10; Nu 22:31; Jgs 13:20; Lk 24:43-5). This was not the worship the creature instead of the Creator, for the angel was regarded, not as a distinct individual having an existence and character of his own, but as a theophany, a self-manifestation of God.

The highest form of adoration is that which is directed immediately to God Himself. His kingly attributes and spiritual excellences being so apprehended by the soul that it is filled with rapture and praise, and is moved to do Him reverence. A classical illustration of this is provided in Isaiah the prophetical office, when he was so possessed with the sovereignty and sublimity of God that he was filled with wonder and self-abasement (Isa 6:1-5). In the OT, the literature of adoration reaches its high-water mark in the Psalms (cf. esp. the group Psa 95-100), where the ineffable majesty, power and holiness of God are set forth in lofty strains. In the NT, adoration of the Deity finds its most rapturous expression in Rev, where the vision of God calls forth a chorus of praise addressed to the thrice-holy God (4:8-11; 7:11-12), with whom is associated the Redeemer-Lamb.

How far is Jesus regarded in the NT as an object of adoration, seeing that adoration is bestowing only to God? During Our Lord's Lifetime (Mt 2:11; 8:2; 9:18; 14:33; 15:25; 20:20; 28:17; Mk 5:6; Jn 9:38). Some ambiguity, however, belongs to the Gr word πρόσκυνος for the usual word θυσιά for "worshipping" God (e.g. Jn 4:24), in some contexts it means no more than paying homage to a person of superior rank by kneeling or prostration, just as the unmerciful servant is said to have 'paid his respects' (Lk 17:9), or as Joseph the official (Mt 18:26), and as Jos speaks of the Jewish high priests as προσκυνούμενοι (BJ. IV, v, 2). On the other hand, it certainly implies a consciousness, on the part of those who paid this respect to Jesus, and of Jesus Himself, of a very close approach to His person, for the same homage was refused by Peter, when offered to him by Cornelius, on the ground that he himself also was a man (Acts 10:25 f.), and even by the angel before whom John prostrated himself, on the ground that God alone was to be "worshipped" (Rev 22:8-9). Yet Jesus never repudiated such tokens of respect. But whatever about the "days of His flesh," there is no doubt that after the ascension Christ became to the church the object of adoration as Divine, and the homage paid to Him was indistinguishable in character from that paid to God. This is proved not only by isolated passages, but still more by the whole tone of the Acts and epistles, in relation to Him. This adoration reaches its highest expression in Rev 1:6-16, where the access to the throne of God is the subject of an outburst of adoring praise on the part of the angelic hosts. In 4:8-11 the hymn of adoration is addressed to the Lord God Almighty, the Creator; here it is addressed to the Lamb on the ground of His redeeming work. In Rev the Lamb, as "He that sitteth on the throne" and that of "the Lamb" flow together into one stream of ecstatic praise (cf. 7:9-11).

D. Miall Edwards

**ADORN** a-ðörn' (koìφει, kosmēo'): Has as its primary meaning "to arrange," "to put in order," "to decorate." It is used with reference to the manner in which Christian women were urged to dress. This was a vital question in the early church, and both Paul and Peter give advice on the subject (1 Tim 2:9; 1 Pet 3:3). See Dress.

**Figurative:** In Mt 12:44 AV the word is τέρας "garnish" and is used in a fig. sense. It describes accurately the condition of the Jewish nation. Even though they have swept out idolatry and have adored the life with much ceremony and endless religious prescriptions yet, the evil spirit can say, 'I will return to my house.' This same thing has repeatedly been done by individuals and nations when reforms have been instituted, the throne was not estab., the heart or nation was still dominated by evil. It is used also in a fig. sense with reference to the graces of the Christian life. When we remember how highly Orientalists esteem the adornment of the graces, we have here a figure of speech. It is this that makes Ps 45:13 of special significance as to the beauty and glory of the church as she is presented to God. See also Prov 1:9; 4:9; Isa 61:10; 1 Pet 3:4-5. Consecration to God, the in-dwelling of the Spirit, righteousnesse, the meek and quiet spirit—these are the true adornments of the life. All these passages carry with them the idea of joy, the satisfaction that should be ours in these possessions.

JACOB W. KAPP

**ADRA** ā'dra. See ARAD (city).

**ADRAMMELECH** a-ðra-mé'lek, and ANAMMELECH, a-nam'mé-ek (Aram: Adrammelek and Anammelek, apparently according to Assyrian usage, "Adar is prince," "Anu is prince.") By Palestinian usage it would be "Adar is king," "Anu is king":

1. The name given by the Israelitish narrator to the god of the usual worshipers for the land by the men of Sepharvaim whom the king of Assyria had settled there (2 K 17:31). In the Bab pantheon Anu, the god of heaven, is one of the three chief gods, and Adar, otherwise known as Ninib, is a solar god. Concerning the statements in this ver in K, archaeologists differ in some important points, and it is a case in which a suspended judgment may be becoming in one who is not an expert. But at least a portion of the alleged statements can be interpreted as the point of view of the Israelitish narrator. He is writing from a time considerably later than the establishment of the institutions of which he speaks—late enough to render the phrase "unto this day" suitable (2 K 17:34), late enough so that words and usages may have undergone modification. He is describing a mixture of religions which he evidently regards as deserving of contempt and ridicule, even apart from the falsity of the religions included in it. This mixture he describes as containing ingredients of three kinds—v. 1, the imported religions of the imported peoples; second, the local high-place religions (vs 32, etc), and third, the Jeh religion of Northern Israel (not that of Jezus). It is not likely that he thought that they practised all three. He shares the same idea that the religion of Jeh by introducing Canaanitiah
ADRAMYTIUM, ad-ram-it'-i-um (ἡ Ἀδραμύττον, Adramyttium; for other forms see Thayer's lexicon): An ancient city of Mycia in the Ionian Province of Asia. The only reference to it is in Acts 27:3 which says that Paul, while being taken a prisoner from Caesarea to Rome, embarked upon a ship belonging to A.

The city, with a good harbor, stood at the head of the Adrimi beach on the island of Lesbos, and at the base of Mt. Ida. Its early history is obscure. While some authors fancy that it was the Pediaus of Homer, others suppose that it was founded by Aemylus, the brother of the wealthy Croesus; probably a small Athenian colony existed there long before the time of Aemylus. When Pergamus became the capital of Asia, A. grew to be a city of considerable importance, and the metropolis of the N.W. part of the province. There the assizes were held. The coined silver and the peppercorn pick up in the surrounding fields, and which are frequently aids in determining the location and history of the cities of Asia Minor, were struck at A. as late as the 3d cent. AD, and sometimes in connection with Ephesus. Upon them the effigies of Castor and Pollux appear, showing that A. was the seat of worship of these deities.

The ancient city with its harbor has entirely disappeared, but on a hill, somewhat farther inland, is a modern city one that resembles the name Edremit, a corruption of the ancient name Aemylus. The miserable wooden huts occupied by Gr fishermen and by Turks are surrounded by vineyards and olive trees, hence the chief trade is in olive oil, raisins and timber. In ancient times A. was noted for a special ointment which was prepared there (Pliny, NH, xiii.25).

E. J. Banks

ADRIA, a,dri-a (Δρυα, Hdrías or ho Adriàs); In Gr Adrias (Polybios 12.4), Adriattiké Thalassa (Strabo iv.204), and Adriaticus Pelagos (Ptolemy iii.15.2), and in Lat Adriaticum mare (Livy xli.57.7), Adriantium mare (Cicero in Pisonem 38), Adriaticus sinus (Livy v.2.4), and Mare superum (Cicero ad Att. 9.5.1). The Adriatic Sea is a name derived from the old Etruscan city Atria, situated near the mouth of the Po (Livy v. 33.7; Strabo v.214). At first the name Atria was only applied to the most northern part of the sea, developed as the Greek colonies on the Italian and Illyrian coasts the application of the term was gradually extended southward, so as to reach Mons Garganus (the Abruzzi), and later the Strait of Hydruntum (Ptolemy iii.1.1; Polybios vii.19.2). But finally the name embraced the Ionian Sea as well, and we find it employed to denote the Gulf of Tarentum (Servius Aen xi.540), the Sicilian Sea (Pausanias v. 25), and even the waters between Crete and Malta (Urosius 1.2.90). Procopius considers Malta as lying at the western extremity of the Adriatic Sea (Aed. 1.14). After the battle of Cape Actium the apostle Paul was sailing under military escort was "driven to and fro in the sea of Adria" fourteen days (Acts 27.27) before it approached the shore of Malta. We may compare this with the shipwreck of "the middle of the Adria" where he was picked up by a ship sailing from Cyrene to Puteoli (Jos, Vita, 3).

GEORGE H. ALLEN

ADRIEL, a,dri-èl (אדריאל, Adriel): Ancestor of Tobit (Tob 1 1). ADULLAM, a-dù-lám (אדלם, Adullam): (1) A city, with dependencies, and anciently having a king, mentioned five times in the O.T., each time in a list with other cities (Josh 12 15; 15 35; 2 Ch 11 7; Mic 1 15; Neh 11 30). In the list of 31 kings whom Joshua smote, Adullam follows Hormah, Arad, Libnah, and precedes Makkedah. Among the 14 Judahite cities of the first group in "the lowland" Adullam is mentioned between Jarmuth and Socoh. In the list of 15 cities fortified by Rehoboam it appears between Socoh and Gath. Michah gives what may be a list of cities concerned in some Asyr approach to Jerus; it begins with Gath, includes Lachish, and ends with Mareschah and Adullam. And Adullam is still in the same company in the list in Neh of the cities "and their villages" where the men of Judah then dwelt. In the time of the patriarchs it was a place to which men "went down" from the central mountain ridge (Gen 38 1). Judas Maccabaeus found it still existing as a city (2 Macc 12 38). Common opinion identifies Adullam with the ruin 'Aid-al-Ma', 15 miles W.S.W. from Bethlehem (see HGHL, 229 f). This is in spite of the testimony of the Onom, which, it is alleged, confuses Adullam with Eglon. Presumably the city gave its name to the cave of Adullam, the cave being near the city.

(2) The cave of Adullam, David's headquarters during a part of the time when he was a fugitive from Saul (1 S 22 1; 2 S 23 13; 1 Ch 11 15). Sufficient care has not been exercised in reading the Bible statements on this subject. To begin with, Heb syntax permits the use of the word "cave," collectively; it may denote a group or a region of caves; it is not shut up to the meaning that there was one immense cave in which David and his 400 men all found accommodations at once. All reasonings based on this notion are futile.

Further, by the most natural syntax of 2 S 23 13-17 (duplicated with unimportant variations in 1 Ch 11 15-19), that passage describes two different events, and does not connect the cave of Adullam with the second of these. "And three of the thirty chief men went down, and came to David in the harvest time unto the cave of Adullam; and the troop of the Philistines was encamped in the valley of Rephaim. And David was then in the stronghold; and the garrison of the Philistines was then in Beth-lehem. And David longed, and said,
Oh that one would give me water," etc. Concerning these three seniors among David's "mighty men" it is narrated, first, that they were David's comrades in a certain battle, a battle which the Chronicler identifies with Pas-dammim, where David slew Goliath; second, that they joined David at the cave Adullam; third, again left the mountain top, and he was in hiding from Saul; third, that at a later time, when the Philistines were in the valley of Rephaim (2 Sam. 5:18), and David was "in the stronghold" (Jos says "at Jerusalem," Acts VII, xii), these men met him at Adullam and brought him water from the well of Bethlehem.

The cave of Adullam, like the city, was "down" from the central ridge (1 Sam. 22:1; 2 Sam. 23:13). The city was in Judah; and David and his men were in Judah (1 Sam. 23:3) at a time when, apparently, the cave was their headquarters. God's advice to David to return to Judah (1 Sam. 23:3) was given at a time when he had left the cave of Adullam. If the current identification of Aïd-el-Ma, as Adullam is correct, the cave of Adullam is probably the cave region where Saul has been found in that vicinity.

It has been objected that this location is too far from Bethlehem for David's men to have brought the water from there. To this is replied that thirteen or fourteen miles is not an excessive or unusually abnormal distance for men to go and return; and a yet stronger reply is found in the consideration just mentioned, that the place from which the men went for the water was not the cave of Adullam. The one argument for the tradition to the effect that St. Chariton's cave, a few miles S.E. of Bethlehem, is Adullam, is the larger size of this cave, as compared with those near "Aïd-el-Ma." We have already seen that this has no force.

In our current speech "cave of Adullam" suggests an aggregate of ill-assorted and disgraceful men. This is not justified by the Bible record. David's men included his numerous and respectable kinsmen, and the representative of the priesthood, and some of David's military companions, and some men who afterward held high office in Israel. Even those who are described as being in distress and debt and bitter of soul were doubtless, many of them, persons who had suffered at the hands of Saul on account of their friendship for David. David loved more admired men less in their number; but the Scriptural details and the circumstances alike indicate that they were mainly homogeneous, and that most of them were worthy citizens.

ADULLAMITE, a-dul'am-it; The gentile adj. of Adullam, which see. It is used only of Judah's friend Hirah (Gen. 38:12-20).

ADULTERY, a-dul' tér-i; In Scripture designates sexual intercourse of a man, whether married or unmarried, with a married woman.

1. Its
It is categorically prohibited in the Decalogue (seventh commandment, Ex. 20:14; Dt. 5:18). Thou shalt not commit adultery. In more specific language we read: "And thou shalt not lie carnally with thy neighbor's wife, to defile thyself with her" (Lev. 18: 20). The penalty is death for both guilty parties: "And the man that committeth adultery with another man's wife, he also that committeth adultery with his neighbor's wife, the adulterer and the adulteress shall surely be put to death" (Lev. 20:10). The manner of death is not particularized; according to the rabbis (Siphra ad loc.; Sanhedrin 25b) it is strangulation. It would seem from the eighth and twelfth chapters of Jesus the manner of death was interpreted to mean strangling ("Now in the law Moses commanded us to stone such," Jn. 8:5, said of the woman taken in adultery). Nevertheless, it may be said that in the case in question the woman may have been a virgin betrothed unto a husband, the law (in Dt. 22:23 f) providing that such a person together with her paramour be stoned to death (contrast ver. 22, where a woman married to a husband is spoken of and the manner of death is that of Ex. 20:10). Adultery is mentioned as the penalty of the adulteress; but it couples to her sin also that of shedding blood; hence the rabbinc interpretation is not necessarily controverted by the prophet. Of course it may also be assumed that a difference of custom may have obtained at different times and that the progress was in the line of leniency, strangulation being regarded as a more humane form of execution than stoning.

The guilty persons become amenable to the death penalty only when taken "in the very act" (Jn. 8:4). The difficulty of obtaining

2. Trial by direct legal evidence is adverted to by Ordeal the rabbis (see Makkoth 7a). In the case of a mere suspicion on the part of the husband, not substantiated by legal evidence, the woman is compelled by the law (Nu. 5:11 - 30) to submit to an ordeal, or God's judgment, which consists in her drinking the water of bitterness, which is that is, washed-off from the dust of the sanctuary and with the washed-off ink of a writing containing the oath which the woman has been made to repeat. The water is named bitter with reference to its effects in the case of the woman's guilt; on the other hand, when no ill effects follow, the woman is proved innocent and the husband's jealousy unsubstantiated. According to the Mish (Nagid 9) this ordeal of the woman suspected of adultery was abolished by the law (after 70 AD), on the ground that the men of his generation were not above the suspicion of impurity. See article Bitter, Bitterness.

Adultery was regarded as a heinous crime (Job 31:11). The prophets and teachers in Israel repeatedly upbraided the men of their generations for their loose-

3. A Heinous Crime in morals which did not shrink from adulterous connections. Naturally where licentious habits David was indulged in, particularly in the large cities, a tone of levity set in: in the dark of the evening, men, with their features masked, waited at their neighbors' doors (Job 31:15; 31:9; of Prov. 7), and women forget ful of the ways of Beecher.

ADULTERER, a-dul'tér-er; The man who commits adultery (after 70 AD), on the ground that the men of his generation were not above the suspicion of impurity. See article Bitter, Bitterness.

Adultery was regarded as a heinous crime (Job 31:11). The prophets and teachers in Israel repeatedly upbraided the men of their generations for their loose-
a covenant with his eyes lest he look upon a virgin (31 1). And so Jesus who came "not to destroy, but to fulfill" (Mt 5 17), in full agreement with the ethical and religious teaching of Judaism, makes the intent of the seventh commandment explicit when he declares that "every one that looketh on a woman to lust after her hath committed adultery with her already in his heart" (Mt 5 28). And in the spirit of Hosea (4 15) and Johanan ben Zacci (see above) Jesus has but scorn for those that are ready judicially to condemn though they be themselves not free from sin! "He that is without sin among you, let him first cast a stone at her" (Jn 8 7). Whereas society is in need of the death penalty to secure the inviolability of the home life, Jesus bids the erring woman go her way and sin no more. How readily His word might be taken by the unspiritual to imply the condoning of woman's peccability is evidenced by the fact that the whole sentence (Jn 7 53—8 11) is omitted by "most ancient authorities" (see St. Augustine's remark).

Adultery as a ground of divorce. — The meaning of the expression "some unclean thing" (Dt 24 1) being unclear, there was great variety of opinion among the rabbis as to the ground or grounds upon which a husband may divorce his wife. While the school of Hillel legally at least allowed any trivial reason as a ground for divorce, the stricter interpretation which limited it to adultery alone obtained in the school of Shamai. Jesus coincided with the stricter view (see Mt 5 32; 19 9, and commentaries). From a moral point of view, divorce was disowned by the rabbis likewise, save for cause of for that one ground which indeed makes the continued relations between husband and wife a moral impossibility. See also Curses; Divorce.

ADUMMIM, a-dum'mim (דּעָם, 'adummîm, perhaps "red spots"): "The ascent of Adummim" is one of the numerous landmarks mentioned in defining the northern border of Judah westward from the mouth of the Jordan to Jerusalem, and in defining the southern border of Benjamin eastward from Jerusalem to the mouth of the Jordan (Josh 15 7; 18 17). It is identified with the gorge part of the road from Jericho up to Jerusalem.

ADVANTAGE, ad-van'tâj (גָּנֶה, sâkhēn): In Job 35 3 is interpreted in succeeding clauses as "profit." In Rom 3 1 râvrâv, perissos, is likewise interpreted by a paraphrase in the next sentence. RV prefers to render pleonâskô to "take advantage," where AV has "defraud" (2 Cor 7 2) or "make gain of" (2 Cor 12 17; cf 2 Cor 2 11). In Jude (ver 16), "advantage" (sphâtēs) means "profit."

ADVENT, ad'vent. See Incarnation; Millennium; Parousia.

ADVENTURE, ad-ven'tûr: "To risk," "to dare," referring always to an undertaking attended with some peril (Jgs 9 17: "My father冒险ed his life"). Cf Dt 38 56. So also Eccl 5 14: "Riches perish by evil adventure. Only once in NT for ἀπερίπτωσις, ἄδικος (Acts 19 21), where Paul's friends beg him "not to adventure himself [archaē for "venture"] into the theatre."

ADVERSARY, ad'ver-sâ-ri, ad'ver-sâ-rî: This word (in the singular Gr.) is used in the OT to render different Heb words. In thirty-two cases the word corresponds to the noun נָשָׁמָה, nāšāmâ, or the verb נָשָׁם, nāšâm. This noun is the ordinary word for "foe" or "adversary." In twelve passages the Heb word, of which "adversary" is the tr, is הָעִדָּה, hâ'âdâh, nāšâm, הָעִד, hâ'âd, nāšâm, nāšâm. This stem means "to oppose," or "thwart" anyone in his purpose or claims.

The angel of Jehovah was nāšâm to Balaam (Nu 22 22). The word often denotes a political adversary (1 K 11 14.23.35). In four cases (viz. Prologue to Job; Zec 3 1; 1 Ch 21 1; Ps 109 6) the AV renders Satan as the rendering. But it is only in 1 Ch that the word is used without the art, that is, strictly as a proper name. The LXX gives ἀδικοῦς, ἀδικοῦς, as the rendering, and both in Job and Zecc, Satan is portrayed as the "false accuser."

In two cases "adversary" represents two Heb expressions which mean the "opponent wi a suit" or "controversy" (Job 31 35; Isa 50 8). In the NT "adversary" represents: (1) ἀρχάγγελος, antîkhrîmonei, the participle of a verb which means "to be set over against," "to be opposed" (Lk 13 17; Acts 28 26). (2) ἀντάποδος, antâpaqodôs, "opponent in a lawsuit," "prosecutor" (Mt 5 26; Lk 12 58; 18 3; 1 Pet 5 8). According to the last passage the devil is the "accuser" or "prosecutor" of believers, but according to another writer they were called an "advoeate for the defense" with the Father (1 Jn 2 1). In one passage (He 10 27) "adversary" represents a Gr word, ὑπεραντίον, which means "set over against," "contrary to" — a word used in classical Gr and in the LXX.

THOMAS LEWIS

ADVERSITY, ad'ver-sî-ti: In RV exclusively an OT term, expressing the various forms of distress and evil conveyed by four Heb words: פָּדָּא, pâda, "a halting" or "fall;" עָדָה, târah, "straitens, distress, "affliction;" וָעַר, caravan, "straitens, "affliction;" וָעַר, ra', "bad," "evil," "harmful." These words cover the whole range of misfortunes caused by enemies, poverty, sorrow and trouble. "Adversity," which occurs once in AV in NT (He 13 3: κακονοῦχος, kâkonouchômos, "ill-treated") is displaced in RV by the lit. rendering which illustrates or interprets a common phase of adversity.

DWIGHT M. PATT

ADVERTISE, ad'ver-tis: This word is found twice in the OT: In Nu 24 14 (from Heb יָדַע, yâ'dâ, "to advise") Balaam advises Balak of the future of Israel and its influence upon his kingdom ("I will advertise thee"). In AV Ruth 4 4 (from
Adumim
Affect

AENON,  אֵנוֹן (A'ın, A'nôn): The place where John was baptizing "because there was much water there" (Jn 1:22). It was on the west side of the Jordan, in the place where he was baptized at the first being on the east (Jn 1:28; 3:26; 10:40). We may be sure it was not in Sam territory. Onom locates it 8 Rom miles S. of Seythopolis (Bete'a), this stretch of land on the west of the Jordan being then, not under Samaria, but under Seythopolis. Its position is defined by nearness to Salim. Various identifications have been suggested, the most probable being the springs near 'Umân el-'Amân, which exactly suit the position indicated by Onom. See discussion under Salim. W. EWING

AENON,  אֵנוֹן: This word originally meant "duration," "dispensation." In the philosophy of Plato and Aristotle the word is ἂνον, ἄνον, from which this word is translated. In the apocryphal it has a special meaning and is there used to solve the problem of the world order. In the infinite separation between God and the world, it was taught, there must of necessity be mediating powers. These powers are the aeons and are the successive emanations from God from eternity. They are spiritual, existing as distinct entities. They constituted the Divine fulness or the Divine Pleroma. The name was applied to these beings for two reasons: because they were thought to predate on the eternal existence of Christ and because they were supposed to govern the various ages. The idea of the aeons in various forms may be found in nearly all oriental philosophy that attempted to deal with the problem of the world order. It appeared in the teachings of Philo, in Shinarism, in the old Zoroastrian religion. See GNOSTICISM. JACOB W. KAPP

AESORA,  אֶסֶּרַה, AV Esera, א-אֵסֶּרַה (Alexand., Asēra): A town in the borders of Samaria, mentioned in connection with Beth-horon and Jericho (Jdt 4:4), and from this association we judge that it was in the eastern part of Samaria.

AFFECTION  אַף-קָצָן, אַ-ף-קָצָן: The lit. meaning of "affection," is to act upon (Lat ad, "to," "upon," facio, "to do"). It has various shades of meaning, and occurs in the following senses in the Eng. Bible: (1) In its lit. sense: Lam 3:51, "Mine eyes shall be filled with tears," of "to endeavor after" "desire," "court": Gal 4:17, "They zealously affect [RV 'seek'] you ... that ye may affect [RV 'seek'] them," i.e. they earnestly court your favor, that you may court theirs. Paul means that the present general affection of the Jews was rooted in personal ambition. The past part. "affected" (RV 'sought') has the same meaning in ver 18. The same Gr word (σέβομαι) is in its "desire earnestly" in RV (1 Cor 12:11; 14:39). "Affect" has a similar meaning in Ecles 13:11. (3) In the passive, it occurs in the sense of "to be disposed of," in a neutral sense, with an advb. to characterize the nature of the disposition: Acts 14:2, "evil affected against the brethren." So also 2 Macc 4:21; 13:26. "Affection" occurs in the following senses: (1) In the lit. sense: the state of having one's feelings acted upon or affected in some way; bent or disposition of mind, in a neutral sense (the nature of the affection, whether good or bad, needing further description in the context). So Col 3:2, "Set your affection [RV 'mind'] on things above"; Col 3:5, "inordinate affection" (here "affection" by itself is neutral); the addition of the adj. makes it equivalent to "passion" in an evil sense in RV. (2) In a good sense: tender feeling, warm attachment, good will; the word in itself carrying a good meaning apart from the context. 1 Ch 29
AFFIRM, AFFIRMATIVES, a-für-ma-tivs (σωκυριστικός, δισσεχουςμός): The verb "affirm" occurs in several passages of the NT in the sense of "assert" (Lk 22:59; Acts 12:15; 25:19 [πεπώνυμον, φθυμάσθησα]); Rom 3:8 [φωνή, φθονία]; 1 Tim 1:7; Titus 2:8 [δισσεχουσία, δισσεχουσιανόν]. The Heb does not employ affirmative particles, but gives a positive reply by either repeating the word in question or by substituting the first person in the reply for the second person in the question, or by employing the formula "how hast thou said" or "Thou hast rightly said." The Saviour used this idiom (ἐρώτησα, σὺ εἶπας) when answering Judas and Caiphas (Mt 26:25-64). A peculiar elegance occasionally attaches to the interpretation of the Heb language, where the use of an affirmative and a negative together, rendering the sense more emphatic; sometimes the negative occurs first, as in Ps 118:17: "I shall not die, but live"; sometimes the affirmative precedes, as in Isa 38:1: "I said in my Gedaliah, and not I am a peculiarly emphatic because of the negative placed between two affirmatives: "And he confessed, and denied not; and he confessed, I am not the Christ." FRANK E. HIRSCH

AFFLICTION, a-dık'shum (חָלָה): Subdivisions:

I. The Source of Affliction. —The Heb mind did not dwell on secondary causes, but attributed everything, even afflictions, directly to the great First Cause and Author of all things: "Shall evil befall a city, and Jehovah hath not done it?" (Am 3:9); "Let the light be with evil: 1. God I make peace, and create evil [i.e. calamity]; I am Jehovah, that doeth all these things" (Isa 45:7). Thus all things, including calamity, were referred to the Divine operation. The Heb when afflicted did not doubt the universal sovereignty of God; yet, while assuming this sovereignty, he was sometimes tempted to accuse Him of indifference, neglect or forgetfulness. Cf Job passim; Isa 40:27; 49:14; Ezek 8:12; 9:9. Yet there are traces of a dualism which assigns a certain vague limit to God's absolute sovereignty, by referring affliction to an evil agent.

2. Evil agencies acting in quasi-independence as agents of God. There could, however, never be more than a tendency in this direction, for a supralist dualism is incompatible with the standpoint of Jewish monotheism. Thus Saul's mental affliction is attributed to an "evil spirit," which is yet said to be "from Jehovah" (1 S 16:14; 19:10; 19:9). And the fall of Abigail is said by Miriam to be caused by the "lying spirit" which enticed him to his doom, in obedience to God's command (1 K 22:20-22). In the prologue of Job, Job's calamities are ascribed to the Satan, but even he receives their word of command and is responsible to Him, like the other "sons of God" who surround the heavenly throne. He is thus "included in the Divine will and in the circle of Divine providence" (Schultz). After the prologue, the Satan is left out of account, and Job's misfortunes are attributed directly to the Divine causality. In later Judaism, the tendency to trace the origin of evil, physical and moral, to wicked spirits became more marked, probably because of the influence of Persian doctrine. In NT times, physical and mental maladies were thought to be due to the agency of evil spirits called demons, whose prince was Beelzebub or Satan (Mk 1:26; Lk 8:26-29; Mt 9:32 ff.; Mt 18:23 ff.). Christ gave His assent to this belief (cf. the woman under infirmity, "whom Satan hath bound," Lk 13:16). Paul attributed his bodily affliction to an evil angel sent by Satan (2 Cor 12:7), though he recognized that the evil agent was subordinate to God's purpose of grace, and was the instrument of His grace. The misfortunes of Job, physical and mental, while the evil spirits were regarded as malicious authors of physical maladies, they were not, in a strictly dualistic fashion, thought to act in complete independence; rather, they had a certain place assigned to them. The Divinity of Christ no longer.

II. Meaning and Purpose of Affliction.—Why did God afflict men? How is suffering to be explained consistently with the goodness and justice of God? This was an acute problem which weighed heavily upon the Heb mind, especially in the later, more reflective, period. We can only briefly indicate the chief factors which the Scriptures contribute to the solution of the problem. We begin with the OT.

The traditional view in early Heb theology was that afflictions were the result of the Divine law of retribution, by which sin was invariably followed by adequate punishment or retribution. Every misfortune was a proof of sin on the part of the sufferer. Thus Job's "friends" sought to convince him that his great sufferings were due to his sinfulness. This is generally the standpoint of the historians of Israel, who regarded national calamities as a mark of the Divine displeasure on account of the people's sins. But this view receives strong countervail by the fact that it contains an important element of truth, could not pass uncontested. The logic of facts would suffice to prove that it was inadequate to cover all cases;
e.g. Jeremiah's sufferings were due, not to sin, but to his faithfulness to his prophetic vocation. So the "suffering servant" in Isa. Job, too, in spite of his many woes, was firm in the conviction of his own integrity. To prove the inadequacy of the penal view is a main purpose of the Book of Job. A common modern modification of the traditional view was that the sorrows of the pious and the prosperity of the wicked were only of brief duration; in the course of time, things would adjust themselves aright (e.g. Job 20 5ff; Ps 73 3-20). But even granting time for the law of retribution to work itself out, experimentally, the traditional view was that misfortune or misfortune is an infallible proof of his moral quality. The thought is often expressed that afflictions are meant to test the character or faith of the sufferer. This idea is especially prominent in Job. God allowed the Satan to test the reality of Job's piety by overwhelming him with disease and misfortunes (2). Throughout the poem Job maintains that he has stood the test (e.g. 23 10-12). Cf. Dkk. Ps 66 10f; 17 3; Isa 48 10; Jer 9 7; Prov 17 3. For those who are able to stand the test, suffering has a purificatory or disciplinary value. (1) The thought of affliction as a discipline of the soul is found in the NT, and is given a historical person, Jesus Christ. That which is foreshadowed in Second-Isa becomes in the NT a central, pervasive and creative thought. A unique place in the Divine purpose is given to the passion of Christ. The disciples partake of His vicarious sufferings, and "fill up..., that which is lacking of the afflictions of Christ" (Col 1 24; cf Phil 3 10; 1 Pet 4 13). Here, surely, is a profound thought which may throw a light on the depth of human suffering. The cross of Christ furnishes the key to the meaning of sorrow as the greatest redemptive force in the universe.

III. Endurance of Affliction.—The Scriptures abound in words of consolation and exhortation adapted to encourage the afflicted. Two main considerations may be mentioned. (1) The thought of the benevolent sovereignty of God. "Jehovah... let the earth rejoice... even though clouds and darkness are round about Him" (Ps 97 12). "All things work together for good to them that love God" (Rom 8 28 AV). Since love is on the throne of the universe, we may rest assured that all things are meant for our good. (2) The thought that tribulation is of brief duration, in comparison with the hope that shall follow (Ps 30 5; Isa 54 7; 16 22); a thought which culminates in the hope of immortality. This hope is in the OT only beginning to dawn, and in the NT it is at first but a flickering light, except in moments of rare exaltation and insight, when the thought of a perfect future blessedness seemed to offer a solution of the enigmas of life (Job 19 25-27; Ps 37 7, 80). But in the NT it is a postulate of faith, and it is the Christian is able to fortify himself in affliction, remembering that his affliction is light and momentary compared with the "far more exceeding and eternal weight of glory" which is to issue out of it (2 Cor 4 17 AV; cf Mt 5 12). Akin to this is the comfort derived from the thought of the near approach of Christ's second coming (Jas 5 7-8). In view of such truths as these, the Bible encourages the pious in trouble to show the spirit of patience. Yet the psalmist in the OT (Psalms 37 7; Lk 21 19; Rom 12 12; Jas 1 3 4 5 7-11; 1 Pet 2 20), and even the spirit of positive joy in tribulation (Mt 5 11f; Rom 5 3; 2 Cor 12 10; Jas 1 2 12; 1 Pet 4 13). In the NT emphasis is laid on the example of Jesus in patient endurance in sufferings (Heb 12 3 4; Jas 5 7-11; 1 Pet 2 19-23; 3 17f). Above all, the Scriptures recommend the afflicted to take refuge in the supreme blessedness of fellowship with God, and of trust in His love, by which they may enter into a deep peace that is undisturbed by the trials.
and problems of life (Ps 73, esp. 23-28; Isa 26 3-4; Jn 14 1-27; Phil 4 7; et passim).

D. MIA LL EDW A RDS

AFFR IGH T, a-frit' : Designates a state of terror occasioned by some unexpected and startling occurrence; not as strong as "amazed," which refers more to the stupor resulting from fright. In the NT most frequently for ἀφόβον, ἐφόβος (Lk 24 37; Acts 10 4; Rev 11 13). RV uses it also for πτερόμηνοι of Phil 1 28, a word "properly used of scared horses" (Elliotcott).

AFOOT, a-fōt' (ποταμίων, ποταμόφος, "to go on foot") : By walking from Trons to Assos Paul avoided the tedious voyage round Cape Lectum (Acts 20 13 AV; cf Mk 6 33).

AFRE SH, a-fresh' : Only in He 6 6, "seeing they crucify to themselves the Son of God afresh, who was crucified once..." In the present the prefix ἀ- in ἀνασταυρώνωs. It has been disputed whether in this word ἄνα has the reiterative force ("again," "anew") in classical ἀνασταυροῦσα has always the simple sense of "to crucify," i.e. "to raise up on a cross, aná being merely "up"). So some would render it here (e.g. Cremer, Lex. of NT Gr). Against this is argued (1) that the classical writers had no occasion for the idea of crucifying anew (cf Winer, De verb. Comp., etc, Pt III, 9 ff, Leipzig, 1849); (2) that ἀνασταυροῦσα sounds ἀνασταυροῦσα signifies both "up" and "again," as in anápteleōs, which means "to recover sight" as well as "to look up"; (3) that the rendering "crucify afresh" suits the context; (4) that the Gr expositors (e.g. Chrys) take it so without questioning. (So also Bleek, Lähmann, Alford, Westcott; of Vulg rursum crucifixissent.)

AFRICA, afr'i-ka: The name of this tract, as a continent, does not occur in the Bible, and it was only in later days known as one of the

1. Africa as quarters of the world, under the name Known of Libya—that portion opposite the coast of Greece and W. of Egypt.

Ancients Naturally the most considerable part of Africa known to the Hebrews was Egypt itself, but Libya is regarded as being referred to under the names of Lehabim and Lubim (Ludim) (Gen 10 13; 2 chron 13 3)—words indicating, as often with the Semites, not the country itself, but its inhabitants. Other portions of Africa known to the Hebrews were Cush or Ethiopia, and Put, whose inhabitants they regarded as belonging to the Hamitic stock. Canaan, also Cushite and therefore Hamite, naturally did not belong to the African continent, showing that the divisions of the then known world into "quarters" (Europe, Asia, Africa) had not taken place when the Table of the Nations (Gen 10 1 ff) was drawn up—indeed, these divisions were not actually thought of until many centuries later. The Casai and the Naphhtum (Gen 10 13.14) were in all probability African peoples, though their position is in general regarded as uncertain. For the Hebrews, to all appearance, the southernmost point of Africa was Cush. And Ethiopia, called by the Assyrians and Babylonians Kusu and Melubha (Meroë), which included the district now known as the Soudan, or Black region. The sons of Cush, and also those of his firstborn, Sheba, were all Arabian tribes, nominally under the domain of Mitzram or Egypt, and on this account classed with the descendants of Ham.

It will thus be seen that the Negro districts were practically unknown to the ancient Hebrews, though men and women of Negro race must have some within their limits. It seems doubtful, therefore, whether there be, in the Bible, any reference to the Negroes to that race, either collectively or individually, the word Cushite standing, not for Negro, but for Ethiopian. This term is applied to Moses' first (Gen 12 1); and it will probably be generally admitted, that the great Hebrew lawgiver is not likely to have espoused a Negro woman. The Ethiopian eunuch converted by Philip the Evangelist (Acts 8 26 ff) was an official of Meroë, and an educated man, for he could read the OT in the (Sept) version. Commerce must have revealed to the Hebrews the whereabouts of the various peoples of Africa with whom they came into contact, and they acquired a personal knowledge of Egypt when the 12 tribes were in bondage there. During this period, it may be supposed, they saw from time to time visitors from the South—people who are not mentioned in the sacred books of the OT because the Hebrews, as a nation, never came into contact with them. Apart from Egypt, the history of the portion of Africa known to the Hebrews was a chequered one, as it came successively under Egypt, Phoen, Gr and Rom civilization. That it was not overrun, or even influenced, by the Hebrews, the history of the South, is due to the fact that the Mediterranean tract is isolated from the central (and southern) portion of that continent by the Sahara. In the Talm it is related that Alexander penetrated to the "table of the Negroes," who were a race of women, with whom he had conversation, and from whom, as he afterward confessed, being a fool, he learned wisdom—a legend suggesting some possible tradition of the Amazonas of Daphaney. But even in the Talm it is mainly the nearer (N.E.) portion of Africa which is referred to, the Africans, who had the reputation of being flat-footed, being associated with the Canaanites. Also see Cush; Ethiopia; Mitzram.

D. MIA L E DWA RDS

AFTER, aft'r, AFTERW A RD, aft'er-wôrd: The fundamental thought, in which all shades of meaning unite, is that of succession either in time or place. This succession may be immediate or remote. A very common use of the Hebrew esh'ar, "way," the use of "after" to denote "according to," "after the manner of," or "in the order of," as in Gen 1 26; Eph 4 1; Lk 1 59; Rom 6 14; He 4 11 (Rev. "unto"), and in many passages where the Gr uses the preposition παρά, κατά, as Mt 23 3; Rom 8 4; 1 Cor 1 26, etc. "In proportion to": Ps 28 4; cf 90 15. It sometimes correctly translates a peculiar Gr idiom of the prep. διά, διά, with the gen. indicating time elapsed, as Mk 2 1, lit. "through some days;" "after some days had passed"; of Acts 24 17. While the Gr is expressed by a variety of words, the Heb uses 'ahar for both prep. and advb.

H. E. JACOBS

AFTERNOON, aft'ær-nôn (אָפָרָן, הַאַפָּרָן, הַאָפָרָן, "the declining of the day"); Jgs 19 8 AV: The expression התּוֹם, הָהָוָֹם, "in the hour of the heat of the day" (Gen 18 1) refers to the early afternoon when the sun is a little past its zenith, its rays still being very strong. The phrase התּוֹם, הָהָוָֹם, "in the cool of the day" (Gen 3 8) is in contrast to the last phrase and points to the late afternoon; in the Orient a cooling breeze
arises at this period of the day, and it is then that much of the day’s business is transacted. See Day.

AGABA, ag’a-ba: A fortress in Judaea. The first of 22 “strong places” which by its commander Galeatus was given over to Aristobulus, the son of Alexander Janneus and Alexandra, when he (his mother, the queen, being dangerously ill) attempted to get control of the Judean government (Ant, XIII, xvi, 5).

AGABUS, ag’a-bus: (Agábes, Agabos): A Christian prophet of Jerusalem, twice mentioned in Acts. (1) In Acts 11:27 f, we find him at Antioch foretelling “a great famine over all the world,” “which,” adds the historian, “came to pass in the days of Claudius.” This visit of Agabus to Antioch took place in the winter of 43-44 AD, and was the means of urging the Antiochian Christians to send relief to the brethren in Judaea by the hands of Barnabas and Saul. Two points should be noted. (a) The gift of prophecy here takes the form of prediction. The prophet’s chief function was to reveal moral and spiritual truth, to “forth-tell” rather than to “foretell;” but the interpretation of God’s message sometimes took the form of predicting events. (b) The statement “over all the world” (practically synonymous with the Roman Empire) must be regarded as a rhetorical exaggeration if strictly interpreted as pointing to a general and simultaneous famine. But there is ample evidence of severe periodic famines in various localities in the reign of Claudius (e.g. Suet. Claud. 18; Tac. Ann. xii.43), and of a great dearth in Judaea under the procurators Cuspius Fadus and Tiberius Alexander, 44-48 AD (Ant, XX, ii, 6; v, 2), which probably reached its climax c.48 AD. (2) In Acts 21:10 f we find Agabus at Caesarea warning Paul, by a vivid symbolic action (after the manner of OT prophets; cf Jer 13:1ff; Ezek 3, 4) of the imprisonment and suffering he would undergo if he proceeded to Jerusalem. (3) In late tradition Agabus is included in lists of the seventy disciples of Christ. D. MIALL EDWARDS

AGADE, ag’a-de: Ancient name for Akkad (or Accad, q.v.), one of the chief cities of Babylonia (Gen 10:10), and the capital city of Sargon, who lived and ruled in Babylonia c.3500 BC. Together with Shurin it formed part of one of the royal titles: “kings of Shurin [Sumer] and Accad.”

AGAG, agag (אָגָג, אָגָג, or עָגָג, אָגָה, meaning unknown, possibly “violent,” BDB): A name, or title, applied to the king of the Amalekites, like Abimelech in Philistia and Pharaoh in Egypt. It is used of two of these kings: (1) A king of Amalek, mentioned by Balaam (Num 24:7) in his blessing of Israel; (2) A later king, in the days of King Saul (1 Sam 15). Saul was sent with his army to destroy the Amalekites, who had so violently opposed Israel in the previous days during the Divine command, sparing the best of the spoil, and saving Agag the king alive (1 Sam 15:8). After rebuking Saul, Samuel had Agag put to death for all the atrocities committed by himself and his nation (1 Sam 15:32-33).

AGAGITE, ag-ga’tite (אָגָגִי, אָגָגִי, אָגָבָה, from עָגָה, אָגָה, “a member of the house of Agag”): A title of opprobrium given to Haman (Est 3:10; 8:35; 9:24). Jewish tradition always assigned the arch-enemies of Israel membership in the house of Amalek, the hereditary foe of the nation. Cf Ant, XI, vi, 5. The word Agag has properly been taken by Delitzsch as related to the Assyrian aqag, “to be powerful,” “vehement,” “angry.” In the

Gr parts of Est, Haman is termed a Macedonian (12:6; 16:10). The name Haman is probably of Elamite origin. Oppert’s attempt to connect the term “Agagite” with “Agaaz,” a Median tribe mentioned by Sargon, has found no supporters. See Aqao.

H. J. WOLF

AGAIN, a-gen’t: Advb. denoting repetition; in NT, generally for πάντα, πάλιν, “back,” “once more.” Occasionally, it has the force of a connective, synonymous with “moreover,” as in Rom 15:10; 1 Cor 3:20, etc. The expression “born again” of AV, Jn 3:37; 1 Pet 1:23, translating the Gr “ἀνένθη” and “ἐκκήν” in comp, becomes in RV “aneu,” i.e. “over again.” As these particles mean from “above” and “up,” their use as indicating repetition is sometimes disputed, but without further foundation than that “again” does not exhaust the meaning.

AGAIN, BORN. See REGENERATION.

AGAINST, a-gen’st (κατά, κατὰ; κατάντιον, εκαντίον; πρὸς, πρός): Prep. expressing contrast. When used of direction, equivalent to “toward” (Mt 10:35; 12:14, etc.); when of position, meaning “opposite,” “towards,” “over all the world” (practically synonymous with the Rom Empire) must be regarded as a rhetorical exaggeration if strictly interpreted as pointing to a general and simultaneous famine. But there is ample evidence of severe periodic famines in various localities in the reign of Claudius (e.g. Suet. Claud. 18; Tac. Ann. xii.43), and of a great dearth in Judaea under the procurators Cuspius Fadus and Tiberius Alexander, 44-48 AD (Ant, XX, ii, 6; v, 2), which probably reached its climax c.48 AD.

In Acts 21:10 f we find Agabus at Caesarea warning Paul, by a vivid symbolic action (after the manner of OT prophets; cf Jer 13:1ff; Ezek 3, 4) of the imprisonment and suffering he would undergo if he proceeded to Jerusalem. (3) In late tradition Agabus is included in lists of the seventy disciples of Christ.

The Name and the Thing. The time of Ignatius onward, is found in the NT only in Jude ver 12 and in 2 Pet 2:13 according to a very doubtful reading. For the existence of the Christological name, however, we have abundant NT evidence.

The “breaking of bread” practised by the primitive community in Jerusalem according to Acts 2:42-46 must certainly be interpreted in the light of Jewish line usage of the word (1 Cor 10:16; 11:24) as referring to the ceremonial act of the Lord’s Supper. But the added clause in ver 46, “they took their food with gladness and singleness of heart,” implies that a social meal was connected in some way with this ceremonial act. Paul’s references to the abuses that had sprung up in the Corinthian church at the meetings for the observance of the Lord’s Supper (1 Cor 11:20-22.33.34) make it evident that in Corinth as in Jerusalem the celebration of the rite was associated with a meal of a more general character. And in one of the “we” sections of Acts (20:11) where Luke is giving personal testimony as to the manner in which the Lord’s Supper was observed by Paul in a church of his own founding, we find the breaking of bread associated with and yet distinguished from an eating of food, in a manner which makes it natural to conclude that in Troas, as in Jerusalem and Corinth, Christians when they met together on the first day of the week were accustomed to partake of a meal. The fact that the name Agape or love-feast used in Jude ver 12 (RV) is found early in the 2d cent. and often afterward as a technical expression for the religious common meals of the church puts the meaning of Jude’s reference beyond doubt.

AGAPE, ag’a-pe (ἀγάπη, ἀγάπη): The name Agape or “love-feast,” as an expression denoting the brotherly common meals of the early church, though of constant use in the post-canonical literature from 1d century on, is found in the NT only in Jude ver 12 and in 2 Pet 2:13 according to a very doubtful reading. For the existence of the Christological name, however, we have abundant NT evidence. The “breaking of bread” practised by the primitive community in Jerusalem according to Acts 2:42-46 must certainly be interpreted in the light of Jewish line usage of the word (1 Cor 10:16; 11:24) as referring to the ceremonial act of the Lord’s Supper. But the added clause in ver 46, “they took their food with gladness and singleness of heart,” implies that a social meal was connected in some way with this ceremonial act.

Paul’s references to the abuses that had sprung up in the Corinthian church at the meetings for the observance of the Lord’s Supper (1 Cor 11:20-22.33.34) make it evident that in Corinth as in Jerusalem the celebration of the rite was associated with a meal of a more general character. And in one of the “we” sections of Acts (20:11) where Luke is giving personal testimony as to the manner in which the Lord’s Supper was observed by Paul in a church of his own founding, we find the breaking of bread associated with and yet distinguished from an eating of food, in a manner which makes it natural to conclude that in Troas, as in Jerusalem and Corinth, Christians when they met together on the first day of the week were accustomed to partake of a meal. The fact that the name Agape or love-feast used in Jude ver 12 (RV) is found early in the 2d cent. and often afterward as a technical expression for the religious common meals of the church puts the meaning of Jude’s reference beyond doubt.
So far as the Jerusalem community was concerned, the common meal appears to have sprung out of the kontakonia or communion that characterized the first days of the Agape Christian church (cf Acts 1 14; 2 1 etc.). The religious meals familiar to Jews—the Passover being the best known type—would make it natural in Jerusalem to give expression by means of table fellowship to the sense of brotherhood; and the community of goods practised by the infant church (2 44; 4 32) would readily take the particular form of a common table at which the wants of the poor were supplied out of the abundance of the rich (6 1 ff.). The presence of the Agape in the Gr church of Corinth was no doubt due to the initiative of Paul, who would hand on the observances associated with the Lord's Supper just as he had received them from the earlier disciples; but participation in a social meal would commend itself very easily to men familiar with the common meals that formed a regular part of the procedure at meetings of those religious clubs and associations which were so numerous at that time throughout the Gr-Rom world.

In the opinion of the great majority of scholars the Agape was a meal at which not only bread and wine but all kinds of picaynery were used.

3. Relation a meal which had the double purpose to the Eucharist of satisfying hunger and thirst and giving expression to the sense of Christian brotherhood. At the end of this feast, bread and wine were taken according to the Lord's command, and after thanksgiving to God were eaten and drunk in remembrance of Christ and as a special means of communion with the Lord Himself and through Him with one another.

The Agape was thus related to the Eucharist as Christ's last Passover to the Christian rite which He grafted upon it. It preceded and led up to the Eucharist, and was quite distinct from it. In opposition to this view it has been strongly urged by some modern critical scholars that in the apostolic age the Lord's Supper was not distinguished from the Agape, but that the Agape itself from beginning to end was the Lord's Supper which was held in memory of Jesus. It seems fatal to such an idea, that Paul makes it quite evident that bread and wine were the only elements of the memorial rite instituted by Jesus (1 Cor 11 23-29), the abuses which had come to prevail at the social gatherings of the Corinthian church would have been much more grave if the meals consisted only of bread and wine (cf vs 21.33 f.). Moreover, unless the Eucharist in the apostolic age had been discriminated from the common meal, it would be difficult to explain how at a later period the two could be found diverging from each other so completely.

In the Did (cir 100 AD) there is no sign as yet of any separation. The direction that the second Eucharistic prayer should be offered "after being filled" (x.1) appears to imply that a regular meal had immediately preceded the observance of the sacrament. In the Ignatian Epistles (cir 110 AD) the Lord's Supper and the Agape are still found in combination (Ad Smyrn vili.2). It has sometimes been assumed that Pliny's letter to Trajan (cir 112 AD) proves that the separation had already taken place, for he speaks of two meetings of the Christians in Bithynia, one before another, which were "organized and conducted by a "sacramentum" or oath to do no kind of crime, and another at a later hour when they partook of food of an ordinary and harmless character (Ep x.96). But as the word "sacramentum" cannot be taken here as necessarily or even probably referring to the Lord's Supper, the evidence of this passage is of little weight. When we come to Justin Martyr (cir 150 AD) we find that in his account of church worship he does not mention the Agape at all, but speaks of the Eucharist as following a service which consisted of the reading of the Scriptures, prayer, etc.—and so by that time the separation must have taken place.

Tertullian (cir 200 AD) testifies to the continued existence of the Agape (Apol, 39), but shows clearly that in the church of the West the Eucharist was no longer associated with it (De Corona, 3). In the East the connection appears to have been longer maintained (see Bigg, Christian Platonists of Alexandria, 102 ff.), but by and by the severance became universal; and though the Agape continued for long to maintain itself as a social function of the church, it gradually passed out of existence or was preserved only as a feast of charity for the poor.

Various influences appear to have co-operated in this direction. Trujan's enforcement of the old law against clubs may have had something to do with it (cf Pliny as above), for the but a stronger influence probably came from the rise of a popular suspicion that all kinds of picaynery were used when the church were scenes of licentious revelry and even of crime. The actual abuses which already meet us in the apostolic age (1 Cor 11 20 ff; Jude ver 12), and which would tend to multiply as the church grew in numbers and came into closer contact with the heathen world, might suggest the advisability of separating the two observances. But the strongest influence of all would come from the growth of the ceremonial and sacerdotal spirit by which Christ's simple institution was slowly turned into a mysterious priestly sacrifice. To Christ Himself it had seemed natural and fitting to institute the Supper at the close of a social meal. But when this memorial Supper had been transformed into a repetition of the sacrifice of Calvary by the action of the ministering priest, the ascetic idea became natural that the Eucharist ought to be received fasting, and that it would be sacrilegious to link it on to the observances of an ordinary meal.

J. C. LAMBERT

AGAR, ag'ar. (Agup, Agpûr): Found once in the Apoc in the Gr (Bar 3 23) probably for the OT Hagar, mother of Ishmael, whose children are mentioned with the merchants of Meran (Midian) and Teman. In 1 Ch 5 10 the "Hagarites" AV, are located E. of Gilead, and in the days of Saul were at war with the tribe of Reuben. See also vs 19.20 and 1 Ch 27 31. In Ps 83 6 the name of the same people is Hagarenes.

AGARENES, ag'a-re-nez': Bar 3 23 AV. In the OT the word is Hagarenes (q.v.). See also Agar above.

AGATE, ag'a-t. See Stones, Precious.

AGE, age: 1. Period of time or a dispensation. In the above sense the word occurs only once in AV, in the sing., as the tr of 707, ðbr, which means, AV, a "generation," or "period," as; "an age" or "generation of man's life": almost invariably trf "generation," "generations" (Job 8 8, "Inquire, I pray thee, of the former age"); we have the plur. as the tr of ald, prop. "duration," "the course or flow of time," "an age or period of
the world." "the world" (Eph 2 7, "in the ages to come"); Col 1 26, "the mystery which hath been hid from ages and from generations," ERV, "from all ages," etc, ARV." of, geneae, "generations" (Eph 3 5 "generations, ver 21, unto all generations for ever and ever." Or m, "all the generations of the age of the ages"); "all things are given in me in RT (Ps 145 13; Isa 26 4, "the rock of ages").

We have "age" in the above sense (2 Esd 3 18; Tob 14 5; aitón) "ages," aitón (1 Esd 4 40 [of Truth] "she is the strength, etc. of all ages"); geneae (Wis 13 64); geneseos (Macc 11 61); Ecles 24 35, eis genesis aionôn, "generations of ages"; Wisd 14 6, "generations" (geneâsēs).

RV has "age" for "world" (He 6 5); "ages" for "worlds" (RVm He 1 2; ARVm; of 1 Tim 1 17) (m, unto the ages of the ages"); "ages" for "world" (1 Cor 10 11; He 9 26). ERV has "all ages" for "the beginning of the world" (Eph 3 9, ARV "for ages"); "king of the ages" for "king of saints" (Rev 15 3, corrected text; m, many ancient authorities read "nations"); Jer 10 7). See everlasting.

W. L. WALKER

AGE, OLD AGE, in individual lives (τάγη, helothē; ἡδαίκα, hēliēkā, hēliēkē). We have scarcely any word in the OT or NT which denotes "age" in the familiar modern sense; the nearest in the OT is perhaps helothē, "life," "life-time" and in the NT hēliēkē, "full age," "manhood," but which is rendered "stature" in Mt 6 27 etc; AV; helothē occurs (Job 11 17, "Thine age shall be clearer than the noonday," RV ["thy"] life"); Ps 39 5, "Mine age is as nothing before thee," ARV: "my life-time," we have hēliēkē (Jn 9 21 23, "He is of age"); He 11 11, "past age," Lk 2 52, "Jesus increased in wisdom and age," so RVm, AVm, Eph 4 13); ýom, day, (days), is used in the OT to express "age" (Gen 47 28, "the whole age of Jacob," AV, "the days of the years of his life"); but it occurs mostly in connection with old age; în, "son" (Nu 8 25; 1 Ch 23 3 24); kalab, "to be complete," is tri "full age," (Job 5 26); têletos, "complete" (He 5 14, RV, "fullgrown man, m, "perfect"); δόξα, "a revolution," "a period" is tri "age" (Isa 38 12, "Mine age is departed and removed from me as a shepherds tent," ARV, "My dwelling is removed, and is carried away from me as a shepherds tent," ERV, "mine age, m, "or habitation"); Deltacs, "his habitation," (20; 2 Cor 5 8). In RV we have pelos, "year" (Mc 5 42, RV, "old"); Lk 2 37; 3 23, "Jesus... about 30 years of age"). "Old age," "aged," are the tr or various words, zêbēn (zēbēn, "the chin," "the beard," perhaps to have the chin sharp or hanging down, often tr "elders," "old man," etc (2 S 19 32; 12 Job 20; 32 9; Jer 6 11).

In NT we have presbētēs, "aged," "advanced in days" (Titus 2 2; Philem 9); presbētās, "aged woman" (Titus 2 3); próphēbēkioi en hēmōnias, "advanced in days" (Lk 20 6); gērous, "old age" (Lk 1 36).

RV has "old" for "the age of" (1 Ch 23 3), "own age" for "sort" (Dn 1 10); "aged" for "ancients" (Ps 119 100); for "ancient" (Isa 47 6); for "old" (He 8 13); "aged men" for "the ancients" (Job 12 23); for "aged" (Job 12 20), "elders,"

(1) Among the Hebrews (and Orientals generally) old age was held in honor and respect, and was required for the aged (Lev 19 32), "Thou shalt rise up before the hoary head, and honor the face of the old man," a mark of the low estate of the nation was that "the faces of elders were not honored"; "the elders have ceased from the gate" (Lam 5 12 14).

Cf Job 29 8 (as showing the exceptionally high regard for Job). See also Wisd 2 10; Eccles 8 6.

(2) Old age was greatly desired and its attainment regarded as a Divine blessing (Gen 15 15; Ex 20 12, "that thy days may be long in the land"); Job 5 25; Ps 81 10, "With long life will I satisfy him"); 22 14; as in men of advanced age (Isa 52 22); (3) A Divine assurance is given, "Even to old age I am he, and even to hoar hairs will I carry you" (Isa 46 4); hence it was looked forward to in faith and hope (Ps 71 9 18).

(4) Supposed was the belief, that was believed to belong to the aged (Job 12 20; 16 10; 32 7 9; of 1 K 12 8); hence positions of guidance and authority were given to them, as the terms "elders," "presbyters" and (Arab.) "sheik" indicate.

AGEE, a-gē-ē (AGH, Aggabê, and Agga- bê, Aggabô; AV Gragabô; AV Gr; Hagabal; Hagabah (Exx 2 45) and Hagaba (Neh 7 48): The descendants of A. (tempel-servants) returned with Zerubbabel to Jerusalem (1 Esd 5 59). See also ACCABAH.

AGGÁEUS, a-gē-ū's (AGHATOS, Aggaiaos; and AGGeus): Hagai, one of the Minor Prophets. A. prophesied in the second year of the reign of Darius (of Ezr 4 24; 5 1) with Zacharias in Jerusalem (1 Esd 6 7; 3). In 2 Esd 1 40 he is mentioned as one who with others shall be given as "leader to the nation from the east.

AGIA, a-gi-a (Agâ, Agâ; AV Hagâ): Hattil (Ezz 2 57; Neh 7 60): The descendants of A. (sons of the servants of Solomon) returned with Zerubbabel to Jerusalem (1 Esd 5 34).

AGONE, a-gon' (Avag; Avag; Vulg agonia): A word occurring only once in the NT (Lk 22 44), and used to describe the climax of the mysterious soul-conflict and unspeakable suffering of Our Lord in the garden at Gethsemane. The term is derived from Gr agô, "conflict" and this in turn from the Gr agô "to drive or lead," as in a chariot race. Its root idea is the struggle and pain of the severest athletic contest or conflict. The wrestling of the athlete has its counterpart in the wrestling of the suffering soul of the Saviour in the garden. At the beginning of this struggle He speaks of His soul being exceeding sorrowful even unto death, and this tumult of emotion culminated in the agony. All that can be suggested by the exhausting struggles and sufferings of charioters, runners, wrestlers and gladiators, in Grecian and Roman amphitheaters, is summed up in the pain and death-struggle of this solitary word "agony." The word was rendered by Wyclif (1382) "maad in agonye"; Tindale (1534) and following translators use "an
The record of Jesus’ suffering in Gethsemane, in the Synoptic Gospels (Mt 26:36–46; Mk 14:32–42; Lk 22:39–46, and also in He 5:7) indicates that He sweated as if it were great drops of blood falling down upon Him.

The agony of His soul wrought its pain on His body, until “his sweat became as it were great drops of blood falling down upon the ground” (Lk 22:44, omitted by some ancient authorities). He offered His prayers and supplications “with strong crying and tears” (He 5:7). The intensity of His struggle so distressed and weakened Him that Luke says “there appeared unto him an angel from heaven, strengthening him.” The disembodied voice of heaven conveys the idea of the intense physical pain. “As the wire carries the electric current, so every nerve in Jesus’ physical being felt the anguish of His sensitive soul as He took upon Himself the burden of the world’s sin and moral evil.

The crisis of Jesus’ career as Messiah and Redeemer came in Gethsemane. The moral issue of His atoning work was intelligently and voluntarily met here. The Gospels exhaust language in attempting to portray the stress and struggle of this conflict. “My soul is exceeding sorrowful even unto death.” “Being in an agony he prayed more earnestly.”

“Father, if it be possible, let this cup pass away from me; nevertheless, not as I will, but as thou wilt.” The intensity of man’s sorrow is unusual when considered from the vantage point of the human soul, the terror of humanity’s entire and ageless guilt. The mental and moral anguish of Jesus in Gethsemane interprets the meaning of Paul’s description of the atonement, “him who knew no sin he made to be sin on our behalf” (2 Cor 5:21).

The agony of Jesus was supremely within the realm of His spirit. The effect of sin in separating the human soul from God was fatherless; the burden of our in the fathomless mystery of His supernatural sorrow. Undoubtedly the anguish of Gethsemane surpassed the physical torture of Calvary. The whole conflict was wrought out here. Jesus’ filial spirit, under the burden of the world’s guilt, felt isolated from the Father. This awful, momentary seclusion from His Father’s face constituted the “cup” which He prayed might pass from Him, and the “agony” of soul, experienced again on the cross, when He felt that God had forsaken Him.

No theory of the atonement can do justice to the threefold anguish of Jesus in Gethsemane and on Calvary, or to the entire trend of Scripture, that does not include the substitutionary element in His voluntary sacrifice, as stated by the prophet: “Jeh hath laid on him the iniquity of us all,” Isa 53:6; and by His apostles: “who was delivered up for our trespasses,” Rom 4:25; “who his own self bare our sins,” 1 Pet 2:24.

The word “agony” also occurs in 2 Mace 3:14:16:21 AV (RV “distress”) in describing the distress of the people at the attempt of Heliodorus to despoil the treasury of the temple in the days of Onias.

Dwight M. Pratt

AGRAPHA, ágrá-fa (Ἀγράφα, ágrapha): The word ágraphos of which ágrapha is the neuter plur. is met with in classical Gr and in Gr papyri in its primary sense of “unwritten,” “unrecorded.” In early Christian lit., especially in Clement, Alexandria, it Term and was used of oral tradition; and in Its History this sense it was revived by Koerner in a Leipzig Program issued in 1776 under the title De sermonibus Christi agraphicos.

For some time it was restricted to sayings of Christ not recorded in the Gospels and believed to have reached the sources in which they are found by means of oral tradition. As however graphé, the noun with which ágrapha is connected, can have not only the general sense of “writing” but the special meaning “Scripture,” the adj. could signify not only “oral” but also “uncanonical” or “non-canonical”; and it was employed by Resch in the latter sense in the 1st ed. of his great work on the subject which appeared in German in 1889 under the title, Agrapha: Extra-canonical Gospel Fragments. The term was now also extended so as to include narratives as well as sayings. In the second ed. (also in German) it is further widened so as to embrace all extra-canonical sayings or passages connected with the Bible. The new title runs: Agrapha: Extra-canonical Fragments of Scripture; and the volume contains a first collection of OT agrapha. The term is still however used most frequently of non-canonical works or passages. Hence the consideration of these texts will mainly be devoted.

Of the 361 agrapha and apocrypha given by Resch about 190 are directly ascribed to Christ. About 30 are added by the apocryphal Gospels, and 260 are assigned to other sources.

2. Extent of Jewish sources and about 80 sayings Material found in Muhammadan literature (Expos T, V, 99, 107, 177 f, 503 f, 561, etc). The last-mentioned group, although not entirely without interest, may largely be disregarded as it is highly improbable that it represents early tradition. The others come from a variety of sources: the NT outside of the Gospels, Gospel MSS and VSS, Apocryphal Gospels and an early collection of sayings of Jesus, liturgical texts, patristic and mediaeval lit. and the Talm.

Many of these sayings have no claim to be regarded as independent agrapha. At least five classes come under this category. (1) Some are mere repetitions or variants of sayings already in the Gospels or in other sayings which, for the most part, to be Excluded which is evidently connected with Lk 18:1; and the saying in the Talm: “I, the Gospel, did not come to take away the law of Moses but to add to the law of Moses have I come” (Shab 116b) which is clearly a variant of Mt 5:17. (2) Some sayings are made up of two or more canonical texts. “I chose you before the world was,” for example, is a combination of Jn 15:19 and Eph 3:2-4; and “Abide in my love and I will give you eternal life” of Jn 8:31 and 10:28. (3) Misquotation or loose quotation accounts for a number of alleged agrapha. “Sodom is justified more than thou” seems to be really from Ezk 16:53 and its context. “Let not the sun go down upon your wrath” is of apostolic not evangelical origin (Eph 4:26). “Anger destroys even the prudent” comes from LXX of Prov 15:1. (4) Some sayings must be rejected because they cannot be traced to an early source, for instance, the fine saying: “Be brave in war, and fight with the old serpent, and ye shall receive eternal life,” which is first met with in a text of the 12th cent. (5) Several sayings are suspicious by reason of their source or their character. The reference to “my mother the Holy Spirit,” in one of them, is too warrant in the acknowledged teaching of Christ and comes from a source of uncertain value, the
Gospel according to the He. Pantheistic sayings such as "I am thou and thou art I, and wherever thou art I am"; "You are I and I am you"; and perhaps the famous saying: "Raise the stone and thou wilt find me; cleave the wood and there am I." (For numerous parallels see Apocrypha.) They are derived from the Gospel of the Ebionites seem to breathe an atmosphere different from that of the canonical Gospels.

When all the sayings belonging to these five classes, and a few others of littoral origin, have been deducted there remain about thirty-five which are worthy of mention and in some cases of careful consideration. Some are dealt with in the art. Logia (q.v.). The others, which are given here, are numbered consecutively to facilitate reference. The best authenticated are of course those found in the NT outside of the Gospels. These are (1) the great saying cited by Paul at Miletus: "It is more blessed to give than to receive" (Acts 20:35); (2) the words used in the institution of the Eucharist preserved only in 1 Cor 11:24 f.; (3) the promise of the baptism of the Spirit (Acts 1:5 and 11:16); and (4) the answer to the question: "Out of what time restore the kingdom to Israel?" (Acts 1:7 f.). There is no mention of the Second Advent, said to be "by the word of the Lord" (1 Ths 4:15 f.); and (6) the promise of the crown of life to them that love God (Jas 2:5). Of considerable interest are some additaments, in MSS of the Gospels and VSS. One of the most remarkable (7) is the comment of Jesus on a man's working on the Sabbath day inserted after Luke 6:1 (Codex D. i.e., the Freer MS recently discovered in Egypt: "If thou knowest what thou doest, O man, blessed art thou, but if thou knowest not, thou art accused and a transgressor of the law." Another (8) also found in D and in several other authorities is appended to Mt 20:28: "But ye seek ye from little to increase and from greater to be less." In the Cireutonian Syriac the latter clause runs: "and not from greater to be less."

The new saying is noteworthy but inconclusive. A third paragraph (9) of less value still of interest is an insertion in the longer ending of Mk, between ver 14 and ver 15, which was referred to by Jerome as present in codices in his day but has now been met with in Gr for the first time in the most important MS. (For further see Am. Journal of Archaeology, 1908.) In reply to a complaint of the disciples about the opposition of Satan and their request: "Therefore reveal thy righteousness even now," Jesus is reported to have said: "The limit of the years of the authority of Satan is fulfilled, but other dreadful things are approaching, and in behalf of those who had sinned was I delivered unto death in order that they might return to the truth and might sin no longer, that they might inherit the spiritual and incorruptible glory of righteousness in heaven." This alleged utterance of the risen Lord is most probably of secondary character (cf Gregory, Das Freer Logion; Swete, Two New Gospel Fragments)

Apocryphal and patrician literature supplies some notable sayings. The first place must be given (10) to the great saying which in its shortest form consists of only three words: Be ("become," show yourself to be) to be money changers." Resch (Apographa, no. 87) gives 69 references, at least 19 of which date from the 2d and 3d cents., although they represent only a few authorities, all Egyptian. The saying seems to have circulated widely in the early church and may be genuine. Other early sayings of interest or value, from these sources, must be given without comment. (11) "The heavenly Father willth the repentance of the sinner rather than his punishment." (Justin Martyr.) (12) "That is, all Ephesians from the Gospel of the Ebionites seem to breathe an atmosphere different from that of the canonical Gospels.

In the next place is given (13) "the kingdom is at hand." (Justin Martyr.) (14) "He who has not been tempted has not been approved." (15) "Blessed are they who mourn for the pardon of unbelief." (16) "Be thou saved and thy soul." (Theodotus in Id.) (17) "He who has not been tempted has not been approved." (18) "Be thou saved and thy soul." (Theodotus in Id.) (19) "Never be excels of evil if ye have seen your brother in love." (ib.) (20) "Let not him who seeks cease . . . until he find, and when he finds shall be astonished; astonished he shall reach the kingdom, and when he has reached the kingdom he shall receive it." (Clement of Alexandria.) (21) In a fragment of a Gospel found by Grenfell and Hunt at Oxyrhynchus (O Pappor no. 655) is the following non-canonical passage in a canonical version: "He Himself will give you clothes. His disciples say unto Him: When wilt thou manifest to us and when shall we see thee? He saith: When ye shall be stripped and not be ashamed." The saying or apocryphon exhibits excellent likeness and style to sayings of Clement of Alexandria from the Gospel according to the Egyptians, but the difference is great enough to make original identity doubtful. Another fragment found by the same explorers on the same site (O Pappor no. 846) is said to be Apocrypha which though clearly secondary are very curious. The second (22) is the concluding portion of a saying about the punishment of evil-doers: "Before a man does wrong he makes all manner of subtle excuses. But give heed lest you suffer the same things as they for the evil-doers among men receive not their due among the living (Gr zóis) only but also await punishment and much torment." (Professor Swete (Two New Gospel Fragments), p. 78.) Swete has commented (in the following) of this as the "Scripture of Origen.") (23) A lengthy reply to the complaint of a Pharisaic stickler for outward purity. The most interesting part of it as regards the subsequent parable to you blind who see not . . . But I and my disciples who thou sayest have not been dipped have dipped in the waters of eternal life which come down from God out of heaven." All these texts from Oxyrhynchus probably date from the 2d cent. Other Egypt sources, the so-called Coptic Apocryphal Gospels (Texts and Studies Camb. IV, 2, 1896), contain several sayings which are of interest as coming from the same religious environment. The following three are the most remarkable. (24) "Repent, for it is better that a man find a cup of water in the age that is coming than all the riches of this world!" (130.) (25) "Better is a single footstep in My Father's house than all the wealth of this world!" (130 f.) (26) "Now therefore have faith in the love of My Father; for faith is the end of all things!" (176.) In the case of the Logia these sayings are found in association with canonical sayings and parallels. Since the Logia is probably better preserved, if not handwritten, it is in at least possible that these Coptic sayings may have been taken from the missing portions of this collection, or a recension of it, and therefore they are not unworthy of notice as conceivably early apographa. To these sayings of Christian derivation may be added

"Agatha"
The agrarian laws, a-grā'ri-an lōs:

1. The Sabbath Year
2. The Jubilee
3. Its Object
4. The Legal Rules
5. Ideas and Circumstances of the Legislation
6. Form of the Legislation
7. Generation Extension
8. Other Laws Affecting the Land

The Mosaic provisions on this subject form one of the most characteristic and interesting portions of the legislation. The main institutions are two, viz., the Sabbath year and the jubilee, and they are closely linked together.

In every seventh year the land was to lie fallow ("that the poor of thy people may eat: and what they leave the beast of the field shall eat") (Ex 23 10 f.; Lev 25 2-7).

1. The Sabbath Year

"And the Sabbath of the land shall be for food for you; for thee, and for thy servant, and for thy maid, and for thy hired servant and for thy stranger that sojourn with thee; but for thy cattle, and for the beasts that are in thy land, shall all the increase thereof be for food" (Lev 25 6 f.). This has been quoted at length because the rendering of EV is misleading. "The Sabbath of the land" does not mean that the natural increase thereof is to be eaten by the SABBATH principle, as the Revised Version is excluded by vs 3-5, 20-22. What is intended is clearly shown by the latter of these two passages, "I will command my blessing upon you in the sixth year." The principle on which the manna had for a time provided the farmer could be applied to the harvest of the sixth year, and this is the import of the phrase.

After "seven sabbaths of years, even forty and nine years" a trumpet was to be blown throughout the land on the tenth day of the seventh month (i.e. the Day of Atonement); and the fiftieth year was to be hallowed and celebrated as a "jubilee."

No agricultural work of any kind was to be performed, but "ye may [so correct RV] eat the increase thereof out of the field" (Lev 25 12). God would so bless the land in the sixth year that it would bring forth enough for the Sabbath year, the ensuing jubilee and the subsequent period to the harvest of the seventh year (vs 20-22). In addition to being a period in which the land was left fallow, the jubilee was intended to meet the economic evils that beset peasants in ancient societies. Wars or unlawful seasons would reduce a farmer to a condition in which he would have to borrow. But money is rarely to be had without interest and security, and in early communities the rates of interest were very high indeed, while the only security the farmer could offer would consist of his land and the persons of himself and his children. Hence we find insolvency giving rise to the alienation of land and to slavery all over the world—sometimes with the retention of civil rights (as in Rome and Israel), at others in a more unalloyed form. The jubilee aimed at both these evils. It is provided that in that year the peasants who had lost their full freedom through insolvency should be free (see Lev 25 13). All debts that had been sold should return to the original owner or his family. "And the land shall not be sold in perpetuity; for the land is mine: for ye are strangers and sojourners with me" (ver 23). To this theory there are other analogues elsewhere, e.g. in Zogonland (Heinrici, Zeitschrift für vergleichende Rechtswissenschaft, XI, 138).

Lev 25 containing the land laws gives effect to this view by enacting that when an israelite was compelled to part with his land there was to be a "redemption" of land, and Legal Rules that in default of redemption the land should return to its original owner in the jubilee year. This "redemption" covers two ideas—a right of redemption by the next of kin in the first instance, and if that were not exercised, a right on the part of the original owner to buy back the land before the jubilee (vs 24-28). The theory did not apply to houses in walled cities. These might be redeemed within a year of sale: in default the property passed for ever and was unaffected by the jubilee (vs 29 f.). Villages were reckoned as country (ver 31). The Levitical cities were subject to the rules of land, not of walled cities (Lev 25 36 f.). Read with the Vulg, it ARVm, "If they have not been redeemed in the jubilee then the fields were not to be sold" (ver 34). All sales of lands to which the jubilee applied were to be made on the basis of the number of crops (vs 14 f.); in fact, what was sold was not the property itself but the usufruct (i.e. the right of using, reaping,
The land laws are the product of many independent ideas and circumstances. . . . First such a system as that expounded in the 26th chapter of Lev could only be put forward by one who had to work on what is very rare in history—a clean slate. In other words, the system of land tenure here laid down could only be introduced in this way by men who had no preexisting system to reckon with. Secondly, there is (mutatus mutandis) a marked resemblance between the provisions of Lev and the system introduced in Egypt by Joseph (Gen 47). The land is the Lord's as it is Pharaoh's; but the towns which are built on that land are not subject to the same theory or the same rules. Perhaps the explanation is that Joseph's measures had affected only those who gained their living by agriculture, i.e., the dependents, and that the system shows the enormous power that the conception of family solidarity possessed in the Mosiac age. . . . And fourthly, the enactment is inspired and illuminated by the humanitarian and religious convictions to which reference has already been made (Journal of Transactions of the Victoria Institute, XLI, 160). Undoubtedly the most striking feature of the enactment is to be found in these religious convictions with the absolute reliance on constant intervention to secure the working of the law (vs 20 ff).

Lev 26 shows clearly that this legislation was conceived as the terms of a covenant made between God and the children of Israel, and it appears from vs 42-45 that this covenant was regarded as being con- nected with the covenants with the patriarchs though it is also a covenant made with the generation that came forth from Egypt. The land was originally promised to Abra- ham in a covenant (Gen 17) and it would seem that these laws are regarded as attaching to that covenant which had been renewed with his de- scendants. Indeed the laws appear to be presented as terms of the sworn agreement (covenant) under which God was about to give Israel the possession of Canaan.

As respects the operation of these laws we have no information as to the observance of any fallow years before the Exile: 2 Ch 36 21 is rather unfavorable, but so obviously it seems to be meant as a historical state- ment. But traces are to be found of the operation of other parts of the system. Ruth 4 shows us the law of redemption working, but with two notable extensions. Widows have acquired a right of property in their husbands' estates, and when the next of kin refuses to redeem, the right passes to the kinsman who is nearest in succession. Neither of these cases is contemplated by the Pent: both appear to be fresh applications of the Levitical law which, like all other legislations, had to be adapted to meet new sets of facts as they arose. Similarly Jer 32 illustrates the law of pre-emption, but in the hope to secure a sale of the suburbs of the Levitical cities. Probably however this refers only to sales outside the family and not as here to the nearest kinsman and heir presumptive. Similarly Ezek twice refers to the jubilee (7 12 ff and 46 17) in terms that seem to show that he knew it as an existing institution (see SBL, 96; Churchman, May, 1906, 292). Historical traces of the Levitical cities are mentioned in the art, Levitical Cities. It should be added that under the monarchy a rule seems to have been introduced that derelict lands fell to the king (see 2 S 9 9 f; 1 K 21 16; 2 K 8 36).

In later times there are several references to the fallow of the Sabbath year (1 Mac 6 49 53; Ant, XIII, vii, 1; XIV, x, 6, etc.). In addition to these laws Moses enacted provi- sions favoring gleaning, on which see Poor. He also prohibited sowing a field or vineyard with two kinds of seed (Lev Laws 19 19; Dt 23 9) and prescribed that for three years the fruit of trees should not be eaten, while in the fourth it should be holy, and in the fifth it was to be available for ordinary purposes (Lev 19 23 f).

Agriculture, ak'ri-kul-tur, ak'ri-kul-chur:

I. Development of Agriculture

II. Climatic Conditions and Fertility

III. Agricultural Pursuits

1. Growing of Grain
   (1) Planting and Sowing
   (2) Reaping
   (3) Threshing
2. Care of Vineyards
3. Raising of Flocks

Development of Agriculture.—One may witness in Syria and Pal today the various stages of social progress through which the people of Bible times passed in which the development of their agriculture played an important part. To the E. the sons of Ishmael still wander in tribes from place to place, depending upon their animals for food and raiment, unless by a raid they can secure the fruits of the
soil from the peoples, mostly of their own blood, who have given up wandering and are supporting themselves by tilling the ground. It is only a short step from this frontier life to the more protected territory toward the Mediterranean, where in comparatively peaceful surroundings, the wanderers become stationary. If the land which they have come to possess is barren and waterless, they become impoverished physically and spiritually, but if they have chosen the rarer spots where underground streams burst forth into valleys covered with alluvial deposits (Ex 3 8), they prosper and there springs up the more complicated community life with its servants, hirelings, gardeners, etc. A division of labor ensues. Some leave the soil for the crafts and professions but still depend upon their farmer neighbors for their sustenance. (1 K 5 11.) Such was the variety life of the people among whom Jesus lived, and of their ancestors, and of the inhabitants of the land long before the children of Israel came to take possession of it. Bible history deals with the Hebrews at a period when a large proportion of that people were engaged in agrarian pursuits, hence we find its pages filled with references to agricultural occupations.

II. Climatic Conditions and Fertility.—With climatic conditions and fertility so varied, the mode of cultivation, seedtime and harvest differed even in closely adjacent territory. On the coastal plains and in the low Jordan valley the soil was usually rich and the season was early, whereas in the mountainous regions and high interior plains the planting and reaping times were from two weeks to a month later. To make use of the soil on the hillsides, terracing was frequently necessary. Examples of these old terraces still exist. On the unwatered plains the crops could be grown only in the winter and spring, i.e. during the rainy season. These districts dried up in May or June and remained fallow during the rainless summer. The same was true for the hilly regions and valleys except where water from a stream could be diverted from its channel and spread over the fields. In such districts crops could be grown irrespective of the seasons. See Irrigation.

III. Agrarian Pursuits.—To appreciate the many references in the Bible to agricultural pursuits and the frequent allusions of Our Lord to the fields and their products, we must remember how different were the surroundings of the farmers of that day from those among which most of us live or with which we are acquainted. What knowledge we have of these pursuits is drawn from such references as disclose methods bearing a close similarity to those of the present day. The strong tendency to resist change which is everywhere manifest throughout the country and the survival of ancient descriptive words in the language of today further confirm our belief that we now witness in this country the identical operations which were used two thousand or more years ago. It would be strange if there were not a variety of ways by which the same object was accomplished when we remember that the Heb people benefited by the experience of the Egyptians, of the Babylonians, of the inhabitants of the land of their adoption, as well as of its late European conquerors. For this reason the drawings found on the Egypt monuments, depicting agricultural scenes, help us to explain the probable methods used in Pal.

Three branches of agriculture were more prominent than the others: the growing of grain, the care of vineyards, the vineyards and the richer added to these a wealth of flocks. The description of Job's wealth (in Job) shows that he was engaged in all these pursuits.

Hezekiah's riches as enumerated in 2 Ch 32 27,28 suggest activity in each of these branches.

In this and following descriptions present-day methods as far as they correspond to ancient records will be dealt with.

1. Growing (1) Plowing and sowing.—On the plains, little or no preparation for plowing is needed, but in the hilly regions, the larger stones, which the tilling of the previous season has loosened and which the winter's rains have washed bare, are picked out and piled into heaps on some ledge, or are thrown into the paths, which thus become elevated above the fields which they traverse. (See Field.) If grain is to be planted, the seed is scattered broadcast by the sower. If the land has not been used for some time the ground is first plowed, and when the seed has been scattered is plowed again. The sower may keep his supply of seed in a pocket made by pulling up his outer garment through his girdle to a sufficient extent for it to sag down outside his girdle in the form of a loose pouch. He may, on the other hand, carry it in a jar or basket as the sowers are pictured as doing on the Egypt monuments. As soon as the seed is scattered it is plowed in before the ever-present crows and ravens can gather it up. The path of the plow in the fields of the hilly regions is a tortuous one because of the boulders jutting out here and there (Mt 13 3 ff) or because of the ledges which frequently lie hidden just beneath the surface (the rocky places of Christ's parable). When the plowman respects the footpaths which the sufferance of the owner has allowed to be trodden across his fields or which mark the boundaries between the lands of different owners, and leaves them unplowed, then the seed which has fallen on these portions becomes the food of the birds. Corners of the field where the plow cannot reach are hied by hand. Harrowing, as we know it is not practised today, except on some of the larger plains, and probably was not used in Pal in earlier times. (See Harrow.)

(2) Reaping.—After the plowing is over, the

Threshing Instrument with Sharp Teeth.
fields are deserted until after the winter rains, unless an unusually severe storm of rain and hail (Ex 9 25) has destroyed the young shoots. Then a second sowing is made. In April, if the hot east winds have not blasted the grain (see Blasting) the barley begins to ripen. The wheat follows from a week to six weeks later, depending upon the altitude. Toward the end of May or the first week in June, which marks the beginning of the dry season, reaping begins. Whole families move out from their village homes to spend the time in the fields until the harvest is over. Men and women join in the work of cutting the grain. A handful of grain is gathered together by means of a sickle held in the right hand. The stalks thus gathered in a bunch are then grasped by the left hand and at the same time a pull is given which cuts off some of the stalks a few inches above the ground (see Stubble) and pulls the rest up by the roots. These handfuls are laid behind the reapers and are gathered up by the helpers (see Gleaning), usually the children, and made into piles for transporting to the threshing-floor.

3) Threshing.—The threshing-floors are constructed in the fields, preferably in an exposed position in order to get the full benefit of the winds. If there is danger of marauders they are clustered together close to the village. The floor is a level, circular area 25 to 40 ft. in diameter, prepared by first picking out the stones, and then wetting the ground, tamping or rolling it, and finally sweeping it. A border of stones usually surrounds the floor to keep in the grain. The sheaves of grain which have been brought on the backs of men, donkeys, camels, or oxen, are heaped on this area, and the process of trampling out begins. In some localities several animals, commonly oxen or donkeys, are tied abreast and driven round and round the floor. In other places two oxen are yoked together to soil which clung to the roots when the grain was reaped. The difference in weight between the stones and grain makes separation by this process possible (see Sifted). The grain is now piled in heaps and in many localities is also sealed. This process consists in pressing a large wooden seal against the pile. When the instrument is removed it leaves an impression which would be destroyed should any of the grain be taken away. This allows the government officials to keep account of the tithes and enables the owner to detect any theft of grain. Until the wheat is transferred to bags some one sleeps by the piles on the threshing-floor. If the wheat is to be stored for home consumption it is often first washed with water and spread out on goats' hair mats to dry before it is stored in the wall compartments found in every house (see Storehouse). Formerly the wheat was ground only as needed. This was then a household task which was accomplished with the hand-mill or mortar (see Mill).
No clearer picture to correspond with present-day practice in vine culture: (1) Vine (Vine) in Pal could be given than that mentioned in Isa 26. 16. Grapes probably served an important part in the diet of Bible times as they do at present. In the season which begins in July and extends for at least three months, the humblest peasant as well as the richest landlord considers grapes as a necessary part of at least one meal each day. The grapes were not only eaten fresh but were made into wine (see Wine). No parallel however can be found in the Bible for the making which is made by boiling down the fresh grape juice. Some writers believe that this substance was meant in some passages 24 for wine or honey, but it is doubtful. The care of the vineyards fitted well into the farmer’s routine as most of the attention required could be given when the other crops demanded no time.

The leaders of ancient Israel reckoned their flocks as a necessary part of their wealth (see Sheep Farming). A sheep’s flock (a’gur, a’gu) was a man’s “flocks.

3. Raising of Flocks

were his sole possession he often lived of birds with them and led them in and out in search of pasturage (Ps 23; Mt 16 12), but a man with other interests delegated this task to his sons (1 S 16 11) or hiredlings. Human nature has not changed since the time when Christ made the distinction between the true shepherd and the hireling (Jn 10 12). Within a short time the sending of these words the writer saw a hireling cursing and abusing the stray members of a flock which he was driving, not leading as do good shepherds.

The flock furnished both food and raiment. The milk of camels, sheep, and goats could be eaten fresh or made into curdled milk, butter or cheese. More rarely was the flesh of these animals eaten (see Food). The peasant’s outer coat is still made of a tawed sheepskin or woven of goats’ hair or wool (see Weaving). The vast majority of agricultural operations are treated more fully under their respective names.

James A. Patch

Agrrippa

Ahab

Ahab, ʾāḥāb (ʾāḥāb, ʾāḥāb, ʾāḥāb; ʾāḥāb a-ha-ab-bu; LXX ἀχαβ, ἀχαβ, but Jer 29 21 f, ἀχαβ, ἀχαβ, ἀχαβ, which, in analogy with ʾāḥāb, ἀχαβ, ἀχαβ, ἀχαβ, means a brother, “the father is my brother!” The compound probably signifies “he who is devoted to my father” referring to God, has been chosen as a brother.

Ahab, son of Omri, the seventh king of Israel, who reigned for twenty-two years, from 876 to 854 (1 K 18 30 f), was one of the strongest and at the same time one of the weakest of kings of Israel. With his kingdom he inherited also the traditional enemies of the kingdom, who were no less ready to make trouble for him than for his predecessors. Occupying a critical position at the best, with foes ever ready to take advantage of any momentary weakness, the kingdom, during the reign of Ahab, was compelled to undergo the blighting effects of misfortune, drought and famine. But Ahab, equal to the occasion, was clever enough to win the admiration and respect of friend and foe, strengthening the kingdom without and within. Many of the evils of his reign, which a stronger nature might have overcome, were incident to the measures that he took for strengthening the kingdom.

In the days of David and Solomon a beneficial commercial intercourse existed between the Hebrews and the Phoenicians. Ahab, recognizing the advantages that would accrue to his kingdom from an alliance with the foremost commercial nation of his time, renewed the old relations with the Phoenicians and cemented them by his marriage with Jezabel, daughter of Ethbaal, king of Tyrre (the Ithobalos, priest of Astarte mentioned by Meander).

He next turns his attention to the establishment of peaceful and friendly relations with the kindred and neighboring kingdom of Judah. For the first time since the division of the kingdom the military internece quarrels are forgotten, “and Jehoshaphat,” the good king of Judah, “made peace with the king of Israel.” This alliance, too, was sealed by a marriage relationship, Jehoram, the crown-prince of Judah, being united in marriage with the princess Athalath, daughter of Ahab.

Perhaps some additional light is thrown upon Ahab’s foreign policy by his treatment of Benhadad, king of Damascus. An opportunity was given
to crush to dust the threatening power of Syria. But when Benhadad in the garb of a suppliant was compelled to cast down his head and kiss the feet of Ahab kindly as his brother, and although denounced by the prophets for his leniency, spared his enemy and allowed him to depart on the condition that he would restore the cities captured from Omri, and connect with certain "streets" in Damascus as a quarter for Israelish residents. No doubt Ahab thought that a king won as a friend by kindness might be of greater service to Israel than a hostile nation, made still more hostile by having its king put to death. Whatever Ahab's motives may have been, these hereditary foes shall not be on his side against the common enemy, the king of Assyria, in the battle at Karkar on the Orontes in the year 854, as is proved by the inscription on the monolith of Shalmaneser II, king of Assyria.

Ahab's far-sighted foreign policy was the antithesis of his short-sighted religious policy. Through his alliance with Phoenicia he not only set in motion the currents of commerce with Tyre, but invited Phoenicia religion as well. The worship of Je by means of the golden calves of Jeroboam appeared antiquated to him. Baal, the god of Tyre, the proud mistress of the seas and the possessor of dazzling wealth, was to have an equal place with the God of Israel. Accordingly a temple built in Samaria a temple to Baal and in it erected an altar to that god, and at the side of the altar a pole to Asherah (1 K 16 32 33). On the other hand he tried to serve Je by naming his children in his honor-Ahabah ("Ahab holds"), Jehoram ("Jeh is high"), and Athaliah ("Jeh is strong"). However, Ahab failed to realize that while a coalition of nations might be advantageous, a syncretism of their religions would be disastrous. He failed to apprehend the full meaning of the principle, "Jeh alone is the God of Israel." In Jezebel, his Phoen wife, Ahab found a champion of the foreign culture, who was as imperious and as able as she was vindictive and unscrupulous. She was the patron of the prophets of Baal and of the devotees of Asherah (1 K 18 19 20; 19 1 2). At her instigation the altars of Jeh were torn down. She inaugurated the first great religious persecution of the church, killing off the prophets of Jeh with the sword. Ahab was the architect of the syncretism of the two religions; she planned to destroy the religion of Jeh root and branch and put that of Baal in its place. In this Ahab did not oppose her, but is guilty of conniving at the policy of his unprincipled wife, if not of heartily concurring in it.

Wrong religious principles have their counterpart in false ethical ideals and immoral civic acts. Ahab, as a worshipper of Baal, not only introduced a false religion, but false social ideals as well. The royal residence was in Jezreel, which had probably risen in importance through his alliance with Phoenicia. Close to the royal palace was a vineyard (1 K 21 1) owned by Naboth, a native of Jezreel. This piece of ground was coveted by Ahab for a vegetable garden. He demanded therefore that Naboth should sell it to him or exchange it for a better piece of land. Naboth declined the offer. Ahab, a Hep, knowing the laws of Jeh, was stung by the refusal and went home greatly displeased. Jezebel, however, had neither religious scruples nor any regard for the civil laws of the Hebrews. Accordingly she planned a high-handed crime to gratify the whim of Ahab. In the name and by the authority of the king, Ahab falsely accused of blasphemy against God and the king, and had him stoned to death by the local authorities. The horror created by this judicial murder probably did as much to finally overthrow the kingdom of Jehoram and Omri as did the favor shown to the Tyrian Baal.

Neither religious rights nor civil liberties can be trampled under foot without Divine retribution. The attempt to do so calls forth an awakened and quickened conscience, imperatively demanding that the right be done. Like an accusing conscience, Elijah appeared before Ahab. His very name ("my God is Jeh") inspired awe. "As Jeh, the God of Israel, liveth, before whom I stand, there shall not one of thy seed escape, until I have restored the reign of Jehoram to David's house." With the conscience-troubling message left on the mind of Ahab for more than three years. On Elijah's reappearance, Ahab greets him as the trouble of Israel. Elijah calmly informs him that the king's religious policy has been disadvantageous, and that a certain curse shall fall. Jezebel's carcass shall be eaten by dogs; the king's posterity shall be cut off; the dogs of the city or the fowls of the air shall eat their bodies (1 K 21 20 26). Like thunderbolts the words of Elijah struck home. The king lost hope and was in sackcloth, and went softly. But the die was cast. Jeh is vindicated. Never again, in the history of Israel can Baal, the inspirer of injustice, claim a place at the side of Jeh, the God of righteousness.

In common with oriental monarchs, Ahab displayed a taste for architecture, stimulated, no doubt, by Phoen influence. Large building operations were undertaken in his reign. Solomon had an ivory throne, but Ahab built for himself, in Jezreel, a palace adorned with woodwork and inlaid with ivory (1 K 21 1; 22 39). Perhaps Amos, one hundred years later, when referring to the king says, "The houses of ivory shall perish" (Am 3 15). In his day Hiel of Bethel undertook to rebuild Jericho, notwithstanding the curse of Joshua (1 K 16 33 34). Many cities were built during his reign (1 K 22 33). Ahab was not only a splendid-loving monarch, but a great military leader as well. He no doubt began his military policy by fortifying the cities of Israel (1 K 16 34; 22 39).

Ahab's military career; Benhadad (the Du-Tradi of the Assyrians: Hadadezer and Barhadad are Heb, Aram, and Arab. forms of the same name), the king of Syria, whose vassals the kings of Israel had been (1 K 15 19), promptly besieges Samaria, and sends Ahab an insulting message. Ahab replies, "Let not him that girdeth on his armor boast himself as he that putteth it off." At the advice of a prophet of Jeh, Ahab, with 7,000 men under 232 leaders, invades a crushing defeat upon Benhadad and his 32 feudal kings, who had resigned themselves to a drunken carousel (1 K 20 21).

In the following year, the Syrian army, in spite of its overwhelming superiority, meets another defeat at the hands of Ahab at Aphek. On this occasion Benhadad restore all Israelish territory and grant the Hebrews certain rights in Damascus, Ahab spares his life to the great indignation of the prophet (1 K 20 22).
In the year 854, Ahab with 2,000 chariots and 10,000 men, fights shoulder to shoulder with Ben- hadad against Shalmaneser II, king of Assyria. At Karkar, on the Orontes, Benhadad, with his allied forces, suffered an overwhelming defeat (COT, II, 183 f).

Perhaps Benhadad blamed Ahab for the defeat. At any rate he fails to keep his promise to Ahab (1 K 22:3; 20:34). Lured by false prophets, but suggesting the usual warning of the Miaciah, Ahab is led to take up the gauntlet against Syria once more. His friend, Jehoshaphat, king of Judah, joins him in the conflict. For the first time since the days of David all Israel and Judah stand united against the common foe.

Possibly the warning of Miaciah gave Ahab a premonition that this would be his last fight.

He enters the battle in disguise, but in vain. An arrow, shot at random, inflicts Death (Ahab, 6). With the rout of a hero, in order to avoid a panic, Ahab remains in his chariot all day and dies at sunset. His body is taken to Samaria for burial. A great king had died, and the kingdom declined rapidly after his death. He had failed to comprehend the greatness of Jehovah; he failed to stand for the highest justice, and his sins are visited upon his posterity (1 K 22:29 f).

1. The Monolith of Shalmaneser II (see Moabite Stone) bears testimony (lines 7, 8) that Omri and his son (Ahab) ruled over the land of Mecdeba for forty years. When Ahab and Archaeology his son, Moab rose in insurrection. Mesha informs us in an exaggerated manner that, “Israel perished with an everlasting destruction.” Mesha recognizes Jeh as the God of Israel.

2. The Monolith of Shalmaneser II (Brit Mus.; Ass. no. 1049) bears witness to the fact that in 854 Shalmaneser II came into conflict with the kingdom of Hamath, and that Benhadad II with Ahab of Israel and others formed a confederacy to resist the Assyrian advance.

3. Recent excavations—Under the direction of Harvard University, excavations have been carried on in Samaria since 1908. In 1909 remains of a Heb palace were found. In this palace two grades of construction have been detected. The explorers suggest that they have found in Omri’s palace enlarged and improved by Ahab. This may be the “ivory house” built by Ahab. In August, 1910, about 75 potsherds were found in a building adjacent to Ahab’s palace containing writing. The script is the same as that of the Moabite Stone, the words being divided by ink spots. These ostraca seem to be labels attached to jars kept in a room adjoining Ahab’s palace. One of them reads, “In the ninth year. From Shaphtan. For Ba’al-Zamar. A jar of old wine.” The reading is not far from the ostraca were found, “was found an alabaster vase inscribed with the name of Ahab’s contemporary, Osorkon II of Egypt.” Many proper names are found on the ostraca, which have their equivalent in the OT. It is claimed that the writing is far greater than all other ancient Hebrew writing yet known. Perhaps with the publication of all these writings we may expect much light upon Ahab’s reign. (See Ostraca; Harvard Theological Review, January, 1909, April, 1910, January, 1911; Sunday School Times, January 7, 1911; The Jewish Chronicle, January 27, 1911.)

S. K. Mossman

AHAB, 'a-hab, and ZEDEKIAH, zed-e-kh'a (𐤇𐤉-Disposition of the Dead ‘ah bah, ‘uncle’; אֶדֶקיהָ, 기 bible; “Jeh is my righteousness’): Ahab, son of Kolaiah, and Zedekiah, son of Maaseiah, were two prophets against whom Jeremiah uttered an oracle for prophesying falsely in the name of Jehovah, and for immoral conduct. They should be delivered over to Nebuchadnezzar and be slain, and the captives of Judah that were in Babylon should take up the curse concerning them, “Jeh makes thee like Dzedekiah and like Ahab, whom the King of Babylon roasted in the fire.” (Jer 29:21 ff.)

S. F. HUNTER

AHARAH, 'ā-har-a, a-hār’a (‘āhrah; A, Ḳārā, Aarā; B, Ḳārāh, Ḳārah, brother of Rah, or, a brother’s follower, though some regard it as a textual corruption for Ahiram): A son of Benjamin (1 Ch 8:1). See Ahiram.

AHARHEL, a-hār’hel (‘āhrah, ‘abrah, “brother of Rachel”: LXX Ἀδελφός Ἄφρα, ἀδελφός Ῥέθσα, “brother of Rechab”): A son of Harum of the tribe of Judah (1 Ch 4:8).

AHASAI, ‘ā-hā-si, a-hā-si. See Ahazai.

AHASBAI, a-hās-bi (‘āhobay, ‘abasby, “blooming”): The father of Eliaphib, a Moabite, a soldier in David’s army. He seems to have been either a native of Abel-beth-maaceah (20:14) or, more probably, of Maaceah in Syria (10:6). The list in 1 Ch 11:35-36 gives different names entirely. Here we have Ur and Hepher, which simply show that the text is corrupt in one or both places.

AHASUERUS, a-hās-sū’rūs, or ASSEURUS (LXX Ἀσσοῦρος, Āssoûros, but in Tob 14:5 Asuerus; the Lat form of the Heb אֶשֶז וו, Āshwēzārāsh, a name better known in its ordinary Gr form of Xerxes): It was the name of two, or perhaps of three kings mentioned in the canonical, or apocryphal, books of the OT.

There seems to be little reasonable doubt, that we should identify the Ahasuasus of Est with the well-known Xerxes, who reigned over 1. In Persia from 485 to 465 BC, and who Esther made the great expedition against Greece that culminated in the defeat of the Pers forces at Salamis and Plataea. If Est be taken as the name of Xerxes, it may be the same as the Amestris of Herodotus, which in Bab would be Ammi-Ishtar, or Umni-Ishtar. Amestris is said to have been the daughter of Otanes, a distinguished general of Xerxes, and the grand-daughter of Sisamnes, a notorious judge, who was put to death with great cruelty by the king because of malfeasance in office. Sisamnes may be in Bab Shamash-ammanu-[shalim]. If he were the brother and Otanes the nephew of Mordecai, we can easily account for the ease with which the latter and his ward Est, were advanced and confirmed in their positions at the court of Xerxes.

An Ahasuerus is mentioned in Est 4:6, as one to whom some persons unnamed wrote an accusation against Judah and Jerusalem.

2. In Ezra Bould and others have suggested that this Ahasuerus was Cambyses, the son and successor of Cyrus. It seems to be more probable that Xerxes, the son and successor of Darius Hystaspis, is meant: first, because in the following verses Artaxerxes son and successor of Xerxes, is mentioned; and secondly, because we have no evidence whatever that Cambyses was ever called Ahasuerus, whereas there is absolute certainty that the Pers Khshayarsha, the Heb Assakvawrsh, the Gr Assuerus or Xerxes, and the Lat. Ahasuerus, are the exact equivalents of one another.
In the apocryphal book of Tob (14 15 AV) it is said that before Tobias died he heard of the destruction of Nineveh, which was taken by Na-bu-chodonosor and Assuerus. This Assuerus can have been no other than Cyaxares, who was the subject of Herodot. (1.190) took Nineve and reduced the Assyrians into subjection, with the exception of the Bab district. As we shall see below, he was probably the same as the Assuerus of Dn (9 1). The phrase "which was taken by Nabu-chodonosor and Assuerus" is not found in the Syriac version of Tob.

An Assuerus is said in Dn 9 1 to have been the father of Darius the Mede, and to have been of the seed of the Medes. It is probable

4. In Daniel that this Assuerus is the same as the Uvakshatarra of the Pers recession of the Behistan inscription, which is in the language of Uvakshatarra, in the Susian Makaistharra, and in Herod Cyaxares. It will be noted that both the Gr Cyaxares and the Heb Akhshwaroeh omit the preformative uwa and the t of the t of Uvakshatarra. That this Median king had sons living in the time of Cyrus is shown by the fact that two rebel aspirants to the throne in the time of Darius Hystaspis claimed to be his sons, to wit, Fra-vartish, a Median, who lied saying, "I am Khsha-thrita of the family of Uvakshatarra" (Behistan Inser. col. II. v); and Citrantsakhma, who said, "I am king in Sagartia of the family of Uvakshatarra" (id. II, xiv). If we accept the identification of Gobharu with Darius the Mede, then the latter may well have been another of his sons, at first a sub-king to Astyages the Scythian, as he was later to Cyrus the Persian. R. DICK WILSON

AHAVA, a-háv'á (נָחָה, 'ahāvā): The river in Babylonia on the banks of which Ezra gathered together the Jews who accompanied him to Jerusalem. At this rendezvous the company encamped for three days to make preparation for the difficult and dangerous journey (Ezr 8 4). On reviewing the people and the priests Ezra found no Levites among them; he therefore sent to Iddo, "the chief at the place Casiphia," a request for ministers for the temple. A number of Levites with 220 Nethinim returned to Jerusalem reverent with the deputation. Ezra had expressed to the king his faith in the protection of God; being, therefore, ashamed to ask for a military escort he proclaimed a fast to seek of God "a straight way." To 12 priests Ezra assigned the care of this fast for the people in Jerusalem. When all was ready the company "departed from the river Ahava," and journeyed in safety to Jerusalem. This river, apparently called after a town or district toward which it flowed (8 15), remains unidentified, though many conjectures have been made. Rawlinson thinks it is the "Isl" of Herod. (1.79), now called "Hih," which flowed past a town of the same name in the Euphrates basin, 8 days' journey from Babylon. Some identify the district with "tevah" (2 K 18 34, 35). Most probably, however, this was one of the numerous canals which intersected Babylonia, flowing from the Euphrates toward a town or district "Ahava. If so, identification is impossible. S. F. HUNTER

AHAZ, a-häz (עָזָא, 'azā): "he has grasped," 2 K 16; 2 Ch 28; Isa 710 ff; 'Aḵšāt, Akhaṭā: The name is the same as Jehovah; hence appears on Tigrath-pileser's Assyrian inscription of 732 BC "Ushu-la-ri. The sacred inscription may have dropped the first part of the name in consequence of the character of the king.

Ahaz was the son of Jotham, king of Judah. He succeeded to the throne at the age of 20 years (according to another reading 25). The chronology of his reign is difficult, as his son Hezekiah is stated to have been 25 years of age when he began to reign 16 years after his grandfather Uziah, long unable to perform the functions of his office on account of his leprosy (2 Ch 26 21), must still have been alive. (Others date Ahaz later, when Uziah, for whom Jotham had acted as regent, was already dead.)

Although so young, Ahaz seems at once to have struck out an independent course wholly opposed to the religious traditions of his nation. His first steps in this direction were the cause to be made and circulated of molten images of the Baalim, and the revival in the valley of Hinном, south of the city, of the abominations of the worship of Moloch (2 Ch 27 2). He is declared to have made his own son "pass through the fire" (2 K 18 3); the chronicles record the tide more strongly: he burnt his children in the fire (2 Ch 28 3). Other acts of idolatry were to follow.

The kingdom of Judah was at this time in serious peril. Rezin, king of Damascus, and Pekah, king of Samaria, had already, in the days of Jotham, begun to harass Judah (2 K 15 29); now a conspiracy was formed among Israel to dethrone the young Ahaz, and set "another throne in the house of Tabea" (Isa 7 6). An advance of the two kings was made against Jerusalem, although without success (2 K 16 5; Isa 7 1); the Jews were expelled from Elath (2 K 16 6), and the country was ravaged, and large numbers taken captive (Dn 2 4). Consternation was universal. The heart of Ahaz trembled, and the heart of his people, as the trees of the forest tremble with the wind (Isa 7 2).

In his extremity Ahaz appealed to the king of Assyria for help (2 K 16 7; 2 Ch 28 16). Amid the general alarm and perturbation, the one man untouched by it in Judas was the prophet Isaiah. Undismayed, Isaiah set himself

5. Isaiah's self, apparently singlehanded, to turn Messages from the king's to the king channel in which it was running, the seeking of aid from Assyria. His appeal was to both king and people. By Divine direction, meeting Ahaz "at the pool of the upper mill, in the way of the fuller's field," he bade him have no fear of "these two talls of smoking firebrands," Rezin and Pekah, for, like dying torches, they would speedily be extinguished (Isa 7 3 ff). If he would not hew to this he would not be established (ver 9). Failing to win the young king's confidence, Isaiah was sent a second time, with the offer from Jeh of any sign Ahaz chose to ask, "either in the depth, or in the height above," in attestation of the truth of the Divine word. The frivolous monarch refused the arbitrament on the hypocritical ground, "I will not ask, neither will I tempt Jeh" (vs 10--12). Possibly his ambassadors were already despatched to the Assy king. Whenever they went, they would have taken with them a large subsidy with which to buy that ruler's favor (2 K 16 8).

It was on this occasion that Isaiah, in reply to Ahaz, gave the reassuring prophecy of Immanuel (Isa 7 13 ff).

As respects the people, Isaiah was directed to exhibit on "a great tablet" the words "For Mahershadal-hash-ba;" ("swift the spoil, 6. Isaiah's speedy the prey"). This was attested by two witnesses, one of whom was Urijah, the high priest. It was a solemn testimony that, without any action on the part of Judah, "the riches of Damascus and the
spoil of Samaria shall be carried away before the king of Assyria." (Isa 8:1-4).

It was as the prophet had foretold. Damascus fell, Rezin was killed (2 K 16:9), and Israel was invaded (16:9). The action brought about a temporary relief to Judah, but had the effect of placing her under the heel of Assyria. Everyone then living knew that there could be no equal alliance between Judah and Assyria, and that the request for help, accompanied by the message, "I am thy servant" (2 K 16:7:8) and by "presents" of gold and silver, meant the submission of Judah and the annual payment of a heavy tribute.

Had Isaiah's counsel been followed, Tiglath-pileser would probably, in his own interests, have been compelled to crush the coalition, and Judah would have retained her freedom.

The political storm having blown over for the present, with the final loss of the important port of Elath on the Red Sea (2 K 16:6), Ahaz turned his attention to more congenial pursuits. The king was somewhat of a dilettante in matters of art, and he set up a sun-dial, which seems to have consisted of a series of steps arranged round a lighted pillar, the time being indicated by the position of the shadow on the steps (cf 2 K 20:9-11; Isa 38:8). As it is regarded as possible for the shadow to return 10 steps, it is clear that each step did not mark an hour of the day, but some smaller period.

Another act of the king was to remove from the elaborate ornamental bases on which they had stood (cf 1 K 7:27-39), the ten lavers of Solomon, and also to remove from Solomon's molten sea from the 12 brazen bulls which supported it (cf 1 K 7:23-26), the sea being placed upon a raised platform or pavement (2 K 16:17). From Jer 52:20, where the prophet sees "the 12 brazen bulls that were under the bases," it has been conjectured that the object of the change may have been to transfer the lavers to the backs of the bulls.

To this was added a yet more daring act of impiety. In 732 Ahaz was, with other vassal princes, summoned to Damascus to pay homage to Tiglath-pileser (2 K 16:10; his name appears in the Assyrian inscription). There he saw a heathen altar of lovingly wrought in a pattern which greatly pleased him. A model of this was sent to Urijah the high priest, with instructions to have an enlarged copy of it placed in the temple court. On the king's return to Jerusalem, he sacrificed at the new altar, but, not satisfied with its position, gave orders for a change. The altar had apparently been placed on the east side of the old altar; directions were now given for the brazen altar to be moved to the north, and the Damascene altar to be placed in line with it, in front of the temple, giving both equal honor. Orders were further given to Urijah that the customary sacrifices should be offered on the new altar, now called "the great altar," while the king reserved the brazen altar for himself "to inquire by" (2 K 16:13).

Even this did not exhaust the royal innovations. We learn from a later notice that the doors of the temple porch were shut, that the golden candlestick was not lighted, that the offering of incense was not made, and other solemnities were suspended (2 Ch 29:7). It is not improbable that it was Ahaz who set up "the horns of the sun" mentioned in 2 K 23:11, and gave them accommodation in the precincts of the temple. He certainly built the "altars . . . on the roof of the upper chamber of Ahaz," perhaps above the porch of the temple, for the adoration of the heavenly bodies (ver 12). Many other idolatries and acts of national apostasy are related regarding him (2 Ch 28:22 ff).

In the later years of his unhappy reign there was a recurrence of places of worship under the auspices of Philistia and Edom, this time with disaster to Judah (see the list of places lost in 2 Ch 28:18, 19). New appeal to Hostilities was made to Tiglath-pileser, whose name Ahaz now used, and costly presents were sent from the temple, the royal palace, and even the houses of the princes of Judah, but without avail (ver 19-21). The Assyrian "dis- tressed" Ahaz, but rendered no assistance. In his trouble the wicked king only "trespassed yet more" (ver 22).

Ahaz died in 728, after 16 years of misused power. The exultation with which the event was regarded is reflected in Isaiah's little prophecy written "in the year that King Ahaz of Judah died" (Isa 14:28-29). According to the opinion of 2 K 15:20 that Ahaz "was buried with his fathers in the city of David" is to be understood in the light of 2 Ch 28:27, that he was buried in Jerusalem, but that his body was not laid in the sepulchre of the kings of Israel. His name appears in the royal genealogies in 1 Ch 3:13 and Mt 1:9.

W. Shaw Caldecott

AHAZ, DIAL. OF. See Dial of Ahaz.

AHAZIAH, a-ha'thî-a (אִחָזְיָה ו,역시, 'ahazyah and 'ahaz'yâh, "Jeh holds, or sustains").

1. Ahaziah.—Son of Ahab and Jezebel, eighth king of Israel (1 K 22:52—1 K 1:18).

Ahaziah became king over Israel in the seventeenth year of Jehoshaphat, king of Judah, and he reigned two years, 854-853 BC.

1. His Reign.

There is here an incongruity between the synchronism and the length of the reigns of the kings. Jehoshaphat began to reign in the fourth year of Ahab (1 K 22:41), and he reigned 22 years (1 K 16:29). Accordingly Ahaziah's first year, in the twenty-second year of Ahab, would fall in the nineteenth year of Jehoshaphat. The chronological statement in 2 K 1:17 is probably taken from the Bybl, and both are in harmony with a method of computation followed by certain Gr MSS.

A good name does not insure a good character. Ahaziah, the "God-sustained," served Baal and worshipped him, and provoked to anger Jehovah, the God of Israel, just as his father before him had done. He appears to have been weak and unfortunate, and calamities in quick succession pursued him.

Ahab had sought the good and became an enemy to the best. His house and the nation suffered the consequences. "Moab rebelled against Israel after the death of Ahab." Ahaziah appears to have been too weak to offer resistance. The Moabitite Stone dates the revolt in the days of Ahaz. No doubt it began at the time of Ahab's last campaign against Syria.

According to 1 K 22:48 f Ahab attempted to form an alliance with Jehoshaphat of Judah to revive the ancient maritime traffic, but failed. According to 2 Ch 20:35-37 the alliance was consummated, in consequence of which the enterprise came to nothing. See Jehoshaphat.

Ahabaziah suffered a severe accident by falling through the lattice in his upper apartment in
Samaria, and lay sick. As a worthy son of Jezebel and Ahab, he sent messengers to consult Baal-zebub, the god of Ekron, regarding his recovery. But Israel belonged to Jehovah. Accordingly the messenger returned with a favorable report. The prophet Elijah who for the last time warns against the corrupting moral influences of the Baal religion. "Thus saith Jehovah, Is it because there is no God in Israel, that thou sendest to inquire of Baal-zebub, the god of Ekron? therefore thou shalt not come down from the bed whither thou art gone up, but shalt surely die" was the message which he sent back to the embassy, and the death of the king speedily followed.

II. Ahaziah.—Sixth king of Judah (2 K 8 25–29; 9 10; 2 Ch 22 1–9); also written Jehoahaz (2 Ch 21 17; 25 23), which is merely a transposition of the component parts of the compound. The form "Azariah" (2 Ch 22 6) is an error, fifteen Heb MSS and all the VSS reading Ahaziah.

Ahaziah, youngest son of Jehoram, began to reign in the twelfth year (2 K 8 25) of Jehoram of Israel. In 2 K 9 29 it is stated as the eleventh. The former is probably the Heb, the latter the Gr method of counting, the former also reading the eleventh in 8 25. He was 22 years old when he began to reign and he reigned one year (2 K 8 26). The reading "forty two" (2 Ch 22 2) is a scribal error, since according to 2 Ch 21 5, 20 Jehoram the father was only 40 years old at the time of his death. Syr, Arab, and Luc read 22.

1. His Reign and Death

2. His Character

3. His Alliance with Jehoram of Israel

4. His Death

Ahaziah, "brother of an intelligent one" (1 K 4 31). Ahab's brother, "another" (1 K 20 34). A man of Benjamin (1 Ch 7 12), apparently a contracted form, perhaps the same as Ahiram (AV) (Nu 26 38) or Aharah (1 Ch 8 1).

Ahab or Ah in proper names (14 or 12,4), "abhi or 'abhi, 'brother'). The usage is practically the same with that of 'abbi, 'abbî. See AHI; NAMES, PROPER.

Ahi, or Ah, in proper names (14 or 12,4), "abhi or 'abhi, 'my brother', or perhaps a contraction from Amihai, which see. (1) A member of the tribe of Gad (1 Ch 5 15). (2) A member of the tribe of Asher (1 Ch 7 34).

Ahiah, a-h'ía: A variant in AV (1 S 14 3, 18; 1 K 4 3; 1 Ch 8 7) for Ahijah, which see. Also in the RV (Neh 10 26).

Ahiam, a-h'íăm (14 or 12,4), "abhi'am, 'mother's brother'). One of David's thirty heroes. He was the son of Sharar (2 S 23 55) or according to 1 Ch 11 55 of Saucar, the Hararite.

Ahian, a-h'í-án (14 or 12,4), "ahján, 'brotherly'). A son of Shamida of the tribe of Manasseh (1 Ch 7 19).

Ahizer, a-í-ţëzer ('ähôzer, 'brother'). (1) A son of Ammishaddai, a Danite prince, who acted as representative of his tribe on several occasions. (See Nu 1 12; 2 25; 7 66,71; 10 25,26 (2) One of the mighty men or warriors, who joined David at Ziklag when a fugitive before Saul (1 Ch 12 3).

Ahihud, a-h'níhùd (14 or 12,4), "ahjudh, 'brother'). It is not easy to decide which is the correct form: (1) One of the chief men of the tribe of Asher. He was selected by Moses to help divide the land west of the Jordan (Nu 34 27). (2) A son of EHUD of the tribe of Benjamin (1 Ch 8 6,7). The text here is obscure and probably corrupt.

Ahijah, a-h'íjà (14 or 12,4), "ahjäh, 'brother of Jehu', 'my brother is Jehu', 'Jeh is brother'. In AV the name sometimes appears as Ahiah: (1) One of the sons of Jerahmeel the great-grandson of Judah (1 Ch 2 25). (2) A descendant of Benjamin (1 Ch 8 7). (3) The son of Ahitub, priest in the time of King Saul (1 S 14 3,18). Either he is the same with Ahimelech, who is mentioned later, or he is the father or brother of Ahimelech. He is introduced to us when Saul has been so long on the throne that his son Jonathan is a man grown and a warrior. He is in attendance upon Saul, evidently as an official priest, "wearing an ephod." When Saul wishes direction from God he asks the priest to bring hither the ark; but then, without waiting for the message, Saul counts the confusion in the Philistine camp a sufficient indication of the will of Providence, and hurries off to the attack. Some copies of the Gr.
here read “ephod” instead of “ark,” but the documentary evidence in favor of that reading is far from decisive. If the Heb reading is correct, then the seclusion of the ark, from the time of its return from Philistia to the time of David, was not so absolute as some have supposed. See Ahimelech.

(4) One of David’s mighty men, according to the list in 1 Ch 11 36. The corresponding name in the list in 2 S 23 34 is Elhan the son of Ahithophel the Gilonite.

(5) Levite of David’s time who had charge of certain treasures connected with the house of God (1 Ch 26 20). The Gr copies presuppose the slightly different text which would give in Eng. “and their brethren,” instead of Ahijah. This is accepted by many scholars, and it is at least more plausible than the proposed corrections of the Heb text by the Gr.

(6) Son of Shisha and brother of Elihoresh (1 K 4 3). The two brothers were scribes of Solomon. Can the scribes Ahijah and Shemaiah (1 Ch 24 6) be identified with the men of the same names who later, were known as distinguished prophets? Shisha is probably the same with Shashua (1 Ch 18 16; 2 S 8 17; 20 25), who was scribe under David, the office in this case descending from father to son.

(7) The distinguished prophet of Shiloh, who was interested in Jeroboam I. In Solomon’s lifetime Ahijah clothed himself with a new robe, met Jeroboam outside Jerusalem, tore the robe into twelve pieces, and gave him ten, in token that he should become king of the ten tribes (1 K 11 29–39). Later, when Jeroboam had proved unfaithful to Jeh, he sent his wife to Ahijah to ask in regard to the sick son. The prophet received her harshly, foretold the death of the son, and threatened the extermination of the house of Jeroboam (1 K 14). The narrative makes the impression that Ahijah was at this time a very old man (ver 4). These incidents are differently narrated in the long addi- tion at 1 K 12 24 found in some of the Gr copies. In that addition the account of the sick boy proceeds that of the rent garment, and both are placed between the account of Jeroboam’s return from Egypt and that of his meetings with the ten tribes, an order in which it is impossible to think that the events occurred. Further, this addition attributes the incident of the rent garment to Shemaiah and not to Ahijah, and says that Ahijah was 60 years old. Other novel respect the testimony to the thirty-five prophesies spoken by Ahijah (2 Ch 10 15; 1 K 12 15; 15 29). In 2 Ch “the prophecy of Ahijah the Shilohite” is referred to as a source for the history of Solomon (9 29).

(8) The father of Basahe king of Israel (1 K 15 27 33; 21 22; 2 K 9 9).

(9) A Levite of Nehemiah’s time, who sealed the covenant (Neh 10 26 AV). WILLIS J. BEECHER.

AHIKAM, a-hi’kam (אֹהִיקָם, ʿahikām, “my brother has risen up”): A prominent man of the time of King Josiah and the following decades (2 K 22 12 14; 25 22; 2 Ch 34 20; Jer 26 24; 39 14; 40 5 f.; 41 1 f.; 43 6). He was the son of Shaphan, who very likely is to be identified with Shaphan the scribe, who was at that time so promi- nent. Ahikam was the father of Gedaliah, whom, on the capture of Jerusalem, Nebuchadnezzar made governor of the land. Ahikam was a member of the depituation sent by Josiah to the prophetess Huldah to consult her concerning the contents of the Book of the Law which had been found. Under Jehoiakim he had sufficient influence to protect Jeremiah from being put to death. On the capture of Jerusalem Nebuchadnezzar committed Jeremiah into the care of Gedaliah. It is clear that both Shaphan and his son, like Jeremiah, belonged to the party which held that the men of Judah were under obligation to keep the oath which they had sworn to the king of Babylon. WILLIS J. BEECHER.

AHILUD, a-hil’ud (אֹהִילוּד, ʿahīlūd, “child’s brother,” perhaps): The father of Johoshaphat, who is mentioned as “recorder” in both the earlier and the later lists under David, and in the list under Solomon (2 S 8 16 and 1 Ch 18 15; 2 S 20 24; 1 K 4 3). In the absence of proper we may assume that the father of Baana, one of Solomon’s district superintendents, was the same Ahilud (1 K 4 12).

AHIMAAZ, a hi’ma’az, a hi’ma’as (אֹהִיםָאָז, ʿahīma’aṣ, perhaps “my brother is rage,” or “brother of rage”): (1) Father of Ahinoam the wife of King Saul (1 S 14 50).

(2) The son of Zadok the high priest (1 Ch 24 6 9 53). With his father he remained loyal to David in the rebellions both of Absalom and of Adonijah. With Jonathan the son of Abiathar he carried information to David when he fled from Absalom (2 S 15 27 36; 17 17 20). At his own urgent request he was carried through the city to keep the death of Absalom (2 S 18 19 ff). He told the king of the victory, and also, through his re- luctance to speak, informed him of Absalom’s death. By his reluctance and his sympathy he softened a little the message, which the Cushite presently repeated more harshly.

That Ahimaaz did not succeed his father as high priest has been inferred from the fact that in the Solomon list of heads of departments (1 K 4 2) Azaria the son of Zadok is mentioned as priest. It is assumed that this Azaria is the one who appears in the genealogy as the son of Ahimaaz, and that for some reason Ahimaaz was left out of the succession. These inferences are not justified by the record, though possibly the record does not absolutely disprove them. As the list stands it makes Zadok and Abiathar the high priests. Azaria- and Jubul, the son of Nathan (vs 2 5), are spoken as holding priestly offices of a different kind. Ahimaaz may have died early, or may have followed some other career, but the simple fact is that we do not know.

(3) Ahimaaz, in Naphshi, was one of Solo- mon’s twelve commissary officers (1 K 4 15), who married Basemath, the daughter of Solomon. It is not impossible that he was Ahimaaz the son of Zadok, though there is no proof to that effect.

WILLIS J. BEECHER.

AHIMAN, a hi’man (אֹהִימָן, ʿahīmaʾ, perhaps, “brother of fortune,” or, “my brother is fortune”): (1) One of the names given as those of the three “children of the Anak” (Nu 13 22; Josh 15 14; cf Nu 13 28; 2 S 21 16 18), or the three “sons of the Anak” (Josh 15 14; Jgs 1 20). The three names (Ahiman, Sheshai, Talmai) also occur to- gether in Jgs 1 10. The word Anak in the Heb Bible has the definite article except in Nu 13 33 and Dt 9 2. Its use is that of a common noun denoting a certain type of man, rather than as the proper name of a person or a clan, though this need not be the thinking of the Anakim as a clan or group of clans, who regarded Arba as their founder. The question is raised whether Ahiman and Sheshai and Talmai are to be thought of as persons or as the most natural understand- ing of the Bible statements is certainly to the effect that they were personal leaders among the Anakim of Kirisath-arba (Hebron). They were smitten and dispossessed by the tribe of Judah, with Caleb for leader.
AHIMELECH, a-bim'-e-lek (אֵחָמְלֶךְ, 'הָיָםֵלךְ, "brother of a king," or, "my brother is king," or, "king is brother"): (1) The father of David's high priest Abiathar: son of Ahitub, the son of Phinhas, the son of Eli (1 S 21 1 2; 22 9 20; 23 4; 30 7). Ahitub the son of Ahitub (1 S 14 1 18) was either the same person under another name, or was Ahimelech's father or brother. See AHIAH, 3. Ahimelech is an interesting person, especially because he stands for whatever information we have concerning the priestly office in Israel during the period between Eli and David. Whether the Deuteronomic law for a central sanctuary originated with Moses or not, its provisions were very imperfectly carried out during the times of the Judges. This was particularly the case after the capture of the ark by the Philistines, and the deaths of Eli and his sons. From that time to the middle of the reign of David the ark was in the custody of the men of Kiriath-jearim "in the hill," or "in Gibeath" (1 S 7 1 2 S 8 23). As a general position Israel "sought not unto it" (1 Ch 13 3), though there is nothing to forbid the idea that it may, on occasion, have been brought out from its seclusion (1 S 14 18). Before and after the accession of Saul some of the functions of the national sanctuary were transacted, of course very incompletely, at Gilgal (1 S 10 8; 11 14 15; 13 7 ff; 15 12 21 33). Whether there was a priesthood, with Ahitub the grandson of Eli as high priest, is a matter on which we have no information; but we may remind ourselves the common assumption that such men as Samuel and Saul performed priestly offices is nothing but an assumption.

After Saul has been king for a good many years we find Ahijah in his retinue, acting as priest and wearing priestly vestments. A few years later Ahimelech is at the head of the very considerable priestly establishment at Nob. The scale on which it is established is indicated by the fact that 85 robed priests perished in the subsequent engagement at Nob (1 S 22 18). They had formerly resided at Nob (ver 19). They were thought of as priests of Jehovah, and were held in reverence (ver 17). It was a hereditary priesthood (vs 11 15). Men deposited votive offerings there, the sworn asserion of which is (1 S 29 6; 2 S 3 6). There seems to have been some kind of police authority, whereby a person might be "detained" (21 7). It was customary to inquire of Jeh there (22 10 15). A distinction was made between the common and the holy (21 4 6). The custom of the shewbread was maintained (21 6). In fine, Jesus is critically correct in calling the place "the house of God" (Mr 2 26). The account does not say that the ark was there, or that the burnt-offering of the morning and evening was offered, or that the great festivals were held. The priory head of the establishment at Nob is represented to have been the man who had the right to the office through his descent from Aaron. It is gratuitous to assume that there were other similar sanctuaries in Israel, though the proposition that there were none might be, like other negative propositions, hard to establish by positive proof.

(2) A son of Abiathar (2 S 8 17; 1 Ch 18 16; 24 6); and grandson of the above. In a list of the heads of departments under David, a list of the heads of the middle of David's 40 years, and in which David's sons appear, this Ahimelech, the son of David's friend, is mentioned as sharing with Zadok a high position in the priesthood. In this capacity, later, he shared with David and Zadok in the apportionment of the priests into 24 ancestral classes, 16 of the house of Eleasar, and 8 of the house of Ithamar (1 Ch 24). In this account Ahimelech is mentioned three times, and with some detail. It is alleged against David that he was absent from the council chamber living, and was high priest along with Zadok (1 Ch 15 11; 2 S 15 29; 19 11; 20 25; 1 K 2 27 35; 4 4, etc.). But surely there is no improbability in the affirmation that Abiathar had a son named Ahimelech, or that this son performed prominent priestly functions in his father's lifetime.

Many regard "Ahimelech the son of Abiathar" (Mt gives Ahimelech) as an inadvertent transposition for "Abiathar the son of Ahimelech." This is rather plausible in the passage in 2 S 8 and the duplicate of it in 1 Ch 15 16, but it has no application in the detailed account in 1 Ch 24. One must accept Ahimelech the son of Abiathar as historical unless, indeed, one regards the testimony of Ch to a fact as evidence in disproof of that fact. See ABIAH.

(3) A Hittite, a companion and friend of David, when he was hiding from Saul in the wilderness (1 S 26 6).

AHIMOTH, a-hi-moth (אֹהִימֹות, 'אֹהִימֹות, "brother of death," or, "my brother is death"): A descendant of Kohath the son of Levi (1 Ch 6 25); ancestor of Elnathan the father of Samuel. The name Mahath holds a similar place in the list that follows (6 35).

AHINADAB, a-hi'n-ad-ab (אֹהִינָדָב, 'אֹהִינָדָב, "brother of willingness," or, "my brother is willing"): Decidedly the ordinary use of the stem sa'dabh is to denote willingness rather than liberality or stolleness. One of Solomon's twelve commandary officers (1 K 4 14). He was the son of Iddo, and his district was Mahanaim.

AHINOAM, a-hi-no'am, a-hin'-o'am (אֹהִינָאוֹם, 'אֹהִינָאוֹם, "my brother is pleasantness"): (1) Daughter of Ahimaaz, and wife of King Saul (1 S 14 50).

(2) The woman from Jezreel whom David married after Saul gave Michal to another husband. She and Abigail, the widow of Nabal, seem to have been David's only wives prior to the beginning of his reign in Hebron. His marriage to Abigail is mentioned first, with some detail of the statement, that he had previously married Ahinoam (1 S 25 39 44). Three times they are mentioned together, Ahinoam always first (1 S 27 3; 30 5; 2 S 2 2), and Ahinoam is the mother of David's first son, and Abigail of his second (2 S 3 2; 1 Ch 3 1). Ahinoam's son was Amnon. The record really represents David's polygamy as a series of bids for political influence; the names of Amnon, Absalom, Adonijah suggest that the method was not finally a success.

WILLIS J. BEECHER

AHIO, a-hi'o (אֹהִו, 'אֹהִו, variously explained as "his brother," "brotherly," "brother of Jeh," "my brother is Jeh"). Proper names containing a similar form of the name of Jeh are found on the ostraca recently exhumed at Samaria. The word is always treated as a common noun in the ordinary Gr copies, being rendered either "brother" or "brothers," or "his brother" or "his brothers," but this is probably to be taken as an instance of the relative inferiority of the Gr text as compared with the MT. See OSTRACA.

(1) One of the sons of Beriah, the son of Elpaal, the son of Shaharaim and Hushim, reckoned among the families of Benjamin (1 Ch 8 11). Beriah
and Shema are described as 'ancestral heads' of the inhabitants of Aijalon, who put to flight the inhabitants of Gath.'

(2) A descendant of Jeiel ("the father of Gibeon") and his wife Maacah (1 Ch 8:31; 9:37). King Saul apparently came from the same family (8:30; 31).

(3) One of the men who drove the new cart when David first attempted to bring the ark from the house of Abinadab to Jerus (2 S 6:3; 1 Ch 13:7). In Samuel Uzza and Ahio are called sons of Abinadab. By the most literal understanding of the Biblical data about 100 years had elapsed since the ark was brought to the house; they were sons of that Abinadab in the sense of being his descendants. Whether he had a successor of the same name living in David's time is a matter of conjecture.

WILLIS J. BEECHER

AHIRA, a-hi'ra (אריהם, āhî'ra, "brother of evil," or, "my brother is evil"): A man of Naph- tali, contemporary with Moses. He is five times mentioned as the son of Enan. He was the representative of his tribe who assisted Moses in the census (Nu 1:15). He was the hereditary "prince" of the tribe; he made the tribal offering (Nu 2:28; 7:75). His was one of the copies of the tribal host when on the march (Nu 10:27).

AHIRAM, a-hi'ram (ארים, āhî'ram, "exalted brother," or, "my brother is exalted"): A son of Benjamin. Mentioned third of the five in Nu 26:38. In 1 Ch 8:1 five sons are likewise mentioned, being explicitly numbered; the third name, Ahahar (ahāhār), is conjectured to be either a corruption of Ahiram or a different name for the same person. In 1 Ch 6:9 it is a fuller list of Benjamite names, but it is fragmentary and not clear. In it occurs Acher (akēr), which may be either Ahiram or Aharah with the end of the word lost. In Gen 46:21 ten sons of Benjamin are mentioned, some being there counted as sons who, in the other lists, are spoken of as more remote descendants. In this list Ebi (ēbī) is perhaps Ahiram apostocated. See Aharah; Ahir; Ebi.

AHIRAMITE, a-hi'ram-ı't (ארים-ים, āhî'ram, "of the family of Ahiram"); Nu 26:38. See Ahiram.

AHISAMACH, a-hi'sa-ma'k (אֶהְיוֹסַמָּךְ, āhīsāmāk, "my brother supports"): A man of the tribe of Dan, father of Oholah, who was a son of Bezalel in the building of the tent of meeting and preparing its furniture (Ex 31:6; 35:34; 38:23).

AHISHAAR, a-hi'shā'äh (אֶהְיוֹשָׁה, āhīshāh, "brother of dawn"): A son of the sons of Bilhah, the son of Jediael, the son of Benjamin (1 Ch 7:10).

AHISHAR, a-hi'shā'ar (אֶהְיוֹשָׁר, āhīshār, "my brother has sung"): Mentioned in Solomon's list of heads of departments as "over the household" (1 K 4:6).

AHITHOPHEL, a-hi'thō'fel (אֶהֱיוֹתֹפֶל, āhīthōpher, "brother of foolishness," perhaps): The real leader of the Absalom revolution against David. He is described as "the king's counsellor." In a context connected with events some of which are dated in the fortieth year of David (1 Ch 27:33; 34; cf 26:31). Concerning him and his part in the rebellion, we have rather full information (2 S 15:12 ff).

Some hold that he was the grandfather of Bathsheba, and make much of this in forming their estimates of him. Does the evidence sustain this view? In the latter half of the list of David's mighty men, not among the older veterans with whom the list begins, appears "Eliam the son of Ahithophel the Gilonite" (2 S 23:34), the corresponding name in the other copy of the list being "Ahijah the Pelonite" (1 Ch 11:36). It is assumed that this is the same Eliam who was father to Bathsheba (2 S 11:3). It appears in the Chronicler's annals (1 Ch 3:5) that the mother of Solomon was "Bath-shua the daughter of Ammiel." Bathsheba may easily be a variant of Bathsheba, and the names Eliam and Ammiel are made up of the same parts, only in reversed order. We have inferred that the son of Ahithophel was the father of Bathsheba. But the inference is really not a probable one. The record does not make the impression that Ahithophel was an older man than David. The recorded events of David's life after his misconduct with Bathsheba cannot have occupied less than about twenty years; that is, he cannot have been at the time older than about fifty years. That Ahithophel had then a married granddaughter is less probable than that there were in Israel two Elis. Further, Ahithophel was not the sort of man to conspire against the interests of his grand-daughter and her son, however he may, earlier, have resented the conduct of David toward her. Ahithophel's real worth was in the sphere of political ambition for personal power, though he very likely shared with many of his countrymen in the conviction that it was unjust to push aside an older son by elevating a younger son to the throne.

AHITOB, a-hī'tōb (אֶהְיוֹתֹב, āhītōb; AV Achitob): One of the ancestors of Ezra (1 Esd 8:2; 2 Esd 1:1). Cf Ahitob, 3 (Exr 7:2 et al.).

AHITUB, a-hī'tōb (אֶהְיוֹתֹב, āhītōb, "brother of goodness," i.e. "good brother," or, "my brother is goodness");

(1) The brother of Ichabod and son of Phinehas the son of Eli (1 S 14:3; 22:9.11.12.20), According to 1 Ch 24:24 and his line were descended from Aaron through Ittamar. The record implies that he was born while his father and grandfather were priests at Shiloh, and it says that he was the father and grandfather of priests; but it is silent as to his own exercise of the priestly office. We have no information concerning the office from the time when the Pictolians captured Saul became king. See Ahiah; Ahimelech; Ahitub.

(2) A descendant of Aaron through Eleazar: by this fact distinguished from Ahitub, the descendant of Ithamar, though nearly contemporaneous with him. Esp. known as the father of Zadok
THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

Ahira

Al

who, at Solomon's accession, became sole high priest (2 Sam 8:17; 1 Chron 6:8; 18:16). His genealogical line, from Levi to the Exile, is given in 1 Chron 6:1-15 (6:27-41). The three successive names, Ahitub and Zadok and Ahimaz, appear in 2 Sam 8:17; 15:27, etc. The line is paralleled by selected names in Ezra 7:1-5, and relatively late parts of it are paralleled in 1 Chron 9:11 and Neh 11:11. The best explanation of certain phenomena in Ch is that the record was copied from originals that were more or less fragmentary. In some cases, also, a writer gives only such parts of a genealogy as are needed for his purpose. It is due to these causes that there are many omissions in the genealogical lists, and that they supplement one another. Allowing for these facts there is no reason why we should not regard the genealogies of Ahitub as having distinct historical value.

(3) In the genealogies, in the seventh generation from Ahitub, the descendant of Eleazar, appears another Ahitub, the son of another Amariah and the father (or grandfather) of another Zadok (1 Chron 6:11 [5:37]; 9:11; Neh 11:11). The list in Ezra 7 omits a block of names, and the Ahitub there named may be either 2 or 3. He is mentioned in 1 Esdras 2:2 and 2 Esdras 1:1, and the name occurs in Jdt 8:1. In these places it appears in the Eng. versions in the various forms Ahitub, Ahitob, Achitob, Acitoh.

Willis J. Beecher

Ahab, ahab (אַבַּה, אַבָּה, "fat or fruitful"): A town of Asher. It is clear, however, that the Israelites failed to drive away the original inhabitants (Josh 1:31). Some have identified Ahab with Gush Halab or Gezirah, N.W. of the Sea of Galilee.

Ahab (אַבַּה; "ahab" "O would that!"): (1) A son of Sheshan (1 Chron 2:31) or according to ver 34 a daughter of Sheshan, for here we read: "Now Sheshan had no sons, but daughters." (2) The father of Zabad, a soldier in David's army (1 Chron 11:41).

Ahoah, a-hō'ah (אַהוֹאָה, אַהוֹאַה, "brotherly"?)

A hoahite, a-hō'hit (אַהוֹהֵית, אַהוֹהֶית): A patro-nymic employed in connection with the descendants of Ahoah (q.v.), such as Dodai (2 Sam 23:9) or Dodo (1 Chron 11:12), Ilai (29) or Zalmon (2 Sam 23:28), and also Eleazar, son of Dodo (1 Chron 11:12). The family must have been fond of military affairs, for all the above were officers in David and Solomon's armies.

Aholah, a-hō'la. See Oholah.

Aholab, a-hō-l'ab. See Oholiah.

Aholah, a-hō-l'ah. See Oholiah.

Aholibah, a-hō-l'i-ba. See Oholibamah.

Aholibamah, a-hō-li-b'amah. See Oholibamah.

Ahumai, a-hō'mai, a-hō'mi (אַהוּמָי, אַהוּמַי, "brother of water")

Ahuzzam, a-hūz'zam, AHUZAM, a-hūz'zam (אַהוּצָمز, אַהוּצָוז, "possessor"): A son of Ashurah of the tribe of Judah; his mother's name was Naarah (1 Chron 4:6), written Ahuzam in AV.

Ahuzzath, a-hūz'zath (אַהוּצָז, אַהוּזוּז, "possessor"): A "friend" perhaps a minister, of Abimelech, king of Gerar. He together with Phicol, commander of the army, accompanied their sovereign to Beersheba to make a compact with Isaac (Gen 26:20). The termination -ath reminds us of Philo proper names, such as Gath, Goliath, etc. Cf Genubath (1 Kgs 11:20).

Ahza'i, a-hā'zī (אַהזה'א, אַהزة'א, "my protector"): A priest who resided in Jerusalem (Neh 11:13). The AV has Ahasai which is probably the same as Jazheva'ah of 1 Chron 9:12.

Al, a'ī (אַל, "ay, written always with the def. art. אַל, אַל, probably meaning "the ruin," kindred root אַל, אַל): 

(1) A town of central Palestine, in the tribe of Benjamin, near and just east of Bethel (Gen 12:8). It is identified with the modern Hezmel, just south of the village Dvor Dvora, in the district of HDB; Delitzsch in Comm. on Gen 12:8, or with a mound, Ettell, to the north of the modern village (Davis, Dict. Bib.). The name first appears in the earliest journey of Abraham through Pal (Gen 12:8), where its location is given as east of Bethel, and near the altar which Abraham built between the

Ascent to Al: Path to Elijah's Translation.

two places. It is given similar mention as he returns from his sojourn in Egypt (Gen 13:3). In both of these occurrences the AV has the form Ha'il, including the article in transliterating. The most conspicuous mention of Al is in the narrative of the Conquest. As a consequence of the sin of Achan in appropriating articles from the devoted spoil of Jericho, the Israelites were routed in the attack upon the town; but after confession and expiation, a second assault was successful, the city was taken and burned, and left a heap of ruins, the inhabitants, in number twelve thousand, were put to death, the king captured, hanged and buried under a heap of stones at the gate of the ruined city, only the cattle being kept as spoil by the people (Josh 7:8). The town had not been rebuilt when Josh was written (Josh 8:28). The fall of Al gave the Israelites entrance to the heart of Canaan, where at once they became established, Bethel and other towns in the vicinity seeming to have yielded without a struggle. Al was rebuilt at some later period, and is mentioned by Isa (10:28) in his vivid description of the approach of the Assyrian army, the feminine form (אַל, אַל, "ayyath") being used. Its place in the order of march, as just beyond Michmash from Jerusalem, corresponds with the identification given above. It is mentioned also in post-exilic times by Ezra (2:28) and Neh (7:32, and in 11:31 as אַל, אַל, "ayyāt"), identified in each case by the grouping with Bethel.

(2) The Al of Jer 49:3 is an Ammonite town, the text probably being a corruption of אַל, אַל, or אַל, אַל, "the city" (BAB). Edward Mack
AIM, äm: In Wisd 13 9. Lit. tr by AV of Gr στρογγυλαιον, stocksoathai, which commonly means "to shoot at." This is interpreted and explained by RV as "explore," with a hint as to the nature of the process, and may be paraphrased: "If they be able to conjecture the mysteries of the universe."

AIN, See Ayin.

AIN, a'in (יִין, 'ayin, "eye or spring [of water]"): (1) A town in the extreme N.W. corner of Canaan, so named, most probably, from a noted spring in the vicinity (Nu 31 11). Thompson and after him Robinson make Ain the same as Ain el-Jayy, the chief source of the Orontes, some fifteen miles S.W. of Riblah, which, in turn, is about twenty miles S.W. of Emesa (Hums). As Ain is named in connection with Lake Gennesaret, some claim that Riblah of Nu 31 11 must be another place farther S. and closer to that lake.

(2) A Levitical city (Josh 21 16) in the Negeb or southern part of Judah. It was first allotted to the tribe of Judah (15 32) but later to Simeon (19 7). The fact that it is several times named in immediate connection with Rimmon has lent plausibility to the view that we have here a compound word, and that we should read Ean-Rimmon, i.e. Ain-Rimmon (see Josh 15 32; 19 7; 1 Ch 4 32). See also Ayin. W. W. Davies

AIR, är (אֵאִיר, a'ir): In the OT "air" is used with (one exception) in the phrase "fowl" or "fowls (birds) of the air." The Heb word is usually rendered "heaven" or "heavens." According to ancient Heb cosmogony the sky was a solid dome (firmament) stretching over the earth as a covering. In the above phrase the air means the space between the earth and the firmament. In (41 16) "air" renders חַגָּר, "breath," "spirit," "air," "spirit." The scales of the leviathan are so closely joined together that no air can penetrate. In the NT the phrase "birds [or fowls] of the air," occurs ten times. This simply reproduces the Hebrewism noticed above. Apart from this expression "air" in the AV represents a'ir, which denotes the atmosphere which surrounds us. The expression "beating the air" (1 Cor 9 26) means "to deal blows that do not get home"—that miss the mark. In his conflict with the lower life represented by the body, Paul compares himself to a boxer who aims with unerring accuracy at his opponent. No stroke is lost. Paul also uses the phrase "speaking into the air" (1 Cor 4 9) in reference to the unintelligible utterances of those who "speak with tongues." In the expression, "prince of the powers of the air" (Eph 2 2 AV) we find an echo of the current belief that the air was the dwelling place of spirits, especially of evil spirits.

THOMAS LEWIS

AIRUS, אֵירוּס, är'ús (יוּרְס, ioros); AV: one of the heads of a family of temple servants (1 Esd 5 31 RV JAIROS), which returned from Babylon with Zerubbabel; in the OT called Reiazh (Ezr 2 47; Neh 7 50), and chassid among the Nethinim.

AJAH, a'ja. An Edomite tribe (Gen 36 24 AV). See Atah.

AJALON, a'ja-lon. See Atiah.

AKAN, a'tan (אֲקַן, 'atan, "twisted"): A son of Ezer, a descendant of Esau of Seir (Gen 36 27). He is called Jakan in 1 Ch 1 42. The AV has Jakan.

AKATAN, ak'a-tan ('אָכַטוֹן, Akatan; AV Acatan = Hakkatan; Ezr 8 12): The father of Joannes who returned with Ezra to Jerus (1 Esd 8 38).
AKELDAMA, a-kel-də-ma (‘Akel'dama, Akeldama; or, in many MSS, Ἀκελδάμα, Akeldamach; AV Acdelma): A field said in Acts 1 19 to have been bought by Judas with the “thirty pieces of silver.” In Mt 27 6.7 it is narrated that the priests took the silver pieces which Judas had “cast down . . . into the sanctuary” and “bought with them the potter’s field, to bury strangers in. Wherefore that field was called, ‘The field of blood, unto this day.’” Doubtless it was a supposed connection between this potter’s field and the potter’s house (Jer 19 2) and the Valley of the Son of Hinnom (Jer 19 2) which influenced the selection of the present site which, like the Aram. Ἀραμέας (Dalman), is today known as ἅσσαβ-α-думать, “field of blood.”

Tradition, which appears to go back to the 4th cent., points to a level platform on, and some distance up, the southern slope of the Wady or Rababi (Valley of Hinnom) just before it joins the Kidron Valley. Upon this spot there is a very remarkable ruin (78 ft. x 57 ft.) which for many centuries was used as a chancel house. The earth here was reputed to have the property of quickly consuming dead bodies. So great was its reputation that vast quantities of it are said to have been transported in 1215 AD to the Campo Santo at Pisa. When this building was standing entire, the bodies were lowered into it through five openings in the roof and then left to disintegrate, so that a few years ago there were very many feet of dust all over the floor. These have now been removed. A little S.E. of this ruin is a new Greek monastery erected in recent years over the remains of a large cistern, one of the benefits from “Akeladma” are now buried here. E. W. G. MARTERMAN.

AKKAD, a-kad, AKKADIANs, a-kā'idi-ans. See ACADEM; ACADEMIIANS.

AKKOS, ak'os (‘Akhōs, Akhos in 1 Esd 5 38; AV Aces, which see): The OT equivalent (1 Ch 24 10; Ezr 2 61; Neh 3 4.21) in HAKKOS (גַּאַכָו, ἥακρός), which also see.

AKKUB, ak'ub (אַכּב, ἀκκύβ, “pursuer”): (1) A son of Elioenai, a descendant of Zerubbabel (1 Ch 3 24). (2) A Levite porter on duty at the east gate of the second Temple (1 Ch 9 17).

AKRABATTINE, ak-rà-bà-tí'né (‘Acharbâtînî, Akrabattînî; AR Akrabattine): A place in Idumaea where Judas Maccabeus defeated the children of Esau (1 Macc 5 3).

AKRABBIM, ak-ràb'ım (once in AV Acrabbim [Josh 15 3]; אוֹרִבְיָם, ‘aorbbîm, “scorpions”): Three times found (Nu 34 4; Josh 15 3; Js 1 36), and always with הָרָבָשׁ, ma‘aléh, “ascent” or “pass”; and so “Ascent of the Scorpions.” This is said to be at the S.W. point of the Dead Sea and a part of the boundary line between Judah and Edom. At this pass Judas Maccabeus won a victory over the Edomites (1 Macc 5 3), called in the AV Arabbatine.

ALABASTER, al-a-bas-tər (άλαβαστρον, albasatron [Mt 26 7; Mk 14 3; Lk 7 37]): In modern mineralogy alabaster is crystalline gypsum or a plaster of it. The word alabaster or alabastos meant a stone casket or vase, and alabastries was used for the stone of which the casket was made. This stone was usually crystalline stalagmitic rock or carbonate of lime, now often called onyx or alabaster, to distinguish it from gypsum. The word occurs in the Bible only in the three passages of the Synoptic Gospels cited above. See Box.

ALAMB, al'a-mbeth (אָלַמְבָה, ’alāmēth, “concealment”): 1 Ch 7 8 AV): The name of a son of Becher and grandson of Benjamin. His name was preserved as the name of a town near Anathoth (ALLEMETH, 1 Ch 6 60 RV). Except for the strong pausal accent in the Heb the form of the word would be the same as ALEMETH (q.v.).

ALAMMELECH, a-làm′-ô-lek: AV (Josh 19 26) for ALAMBMECH (q.v.).

ALAMOTH, al-a'môth. See MUSC.

ALARM, a-làrəm (תַּרְעָהּ, tru‘āh): This expression is found six times in the OT. The Heb word so rendered is derived from a verb meaning “to shout” or “blow a horn,” as a signal for breaking up camp, starting on a journey or into battle, or in triumphant shout over the defeat of enemies. In a few instances it is employed of a cry of despair or distress. The noun tru‘āh translated “alarm” in Nu 10 5 refers to the signal given the people of Israel to start on their journey in the Wilderness. The passages in Jer (4 19; 49 2) both refer to the summons for war. The same is true of Zeph 1 16. The law concerning the sounding of the trumpet is fully stated in Nu 10 1–10. Here we read that two silver trumpets of beaten work were sounded by the sons of Aaron in case of war and also “in the day of . . . gladness” to gather the people together for all the various feasts, sacrifices, sacrifices and offerings.

ALBERT, al-bèr't (בְּהֵרָת, bērat, lit. “lest”): Occurs in a phrase the end of which is a tr or a clause of a clause in Philem 19 AV. The thought is: “although” or “albeit” (synonym of “although”) “I might say,” etc. This RV translates with intense literalness: “that I say not.”

ALCIMUS, al's'-mûs (אֵלִימָע, el’imā’), “God will rise”; “Alemûs, Alcimûs, valiant”): A high priest for three years, 163–161 BC, the record of whose career may be found in 1 Macc 7 4–50; 9 1–57; 2 Macc 14; see also Ant. XII, 9–11; XX, 10. He was a descendant of Aaron, but not in the high-priestly line (1 Macc 7 14; also Ant., XX, 10); and being ambitious for the office of high priest, he was sent to Antioch to secure the favor and help of the new king, Demetrius, who had just overthrown Antiochus Eupator and made himself king. Alcimus was of the Grecianizing party, and therefore bitterly opposed by the Maccabees. Demetrius II, the third and greater army under Bacchides, it was established in the high-priesthood at Jerus. The favor with which Alcimus was received by the Jews at Judas on account of his Aaronic descent was soon turned to hate by his cruelties. When Bacchides and his army returned to Antioch, Simon Maccabees attacked and overcame Alcimus, and drove him also to Syria. He there secured from Demetrius another army, led by Nicanor, who, failing to secure Simon by treachery, joined battle with him. He was defeated and killed. A third and greater army, under Bacchides again, was dispatched to save the falling fortunes of Alcimus. Now Simon was overwhelmed and slain, Alcimus established as high priest and a strong force left in Judas to uphold him. But he did not long enjoy his triumph, as he died soon after from a paralytic attack.

EDWARD MACK

ALCOVE, al'kòv (אֵכוֹב, kôvāb; AV tent; ARV pavilion; ARVm alcove): Perhaps a large tent occupied by a prince (Nu 25 8).

ALEMA, al-emā (אָלֶמַא, ’alemā), “A town in Gilead, mentioned once only (1 Macc 5 20),
ALEMETH, al-emeth (אֶלֶ֫ה, 'alemeth, "concealment"): (1) RV for Almeth of the AV in 1 Ch 7 8. (2) Descendant of Saul and Jonathan, and son of Jehoaddah, 1 Ch 8 36, or of Jarah, 1 Ch 9 42. The genealogies in the two chapters are identical, and he is the fifth generation after Jonathan. (3) In-List Hebrew, Tischendorf and Baer, for Almeth (q.v.); so in AV.

ALEPH, 'alef (א,'): The first letter of the Heb alphabet. It is nearly soundless itself and best represented in this Encyclopaedia by the smooth raising ('), but it is the direct ancestor of the Gr, Lat and Eng. a, as in "father." In either case this beginning of the alphabet happens to be near the very basis of all speech—in one case the simple expiration of breath, in the other the simplest possible vocal action—the actual basis from which all other vowels are evolved. It became also the symbol for the number one (1) and, with the dieresis, 1,000. It is the symbol also for one of the most famous of Gr Biblical MSS, the Alexandrinus. For name, written form, etc., see ALPHABET.

E. C. RICHARDSON

ALEPPO, a-lep'so. See BELEEA.

ALEXANDER, al-eg-zan'der (?Alxandros, Alex- andros, lit. meaning "defender of men.") This word occurs five times in the NT, Mk 15 21; Acts 4 6; 19 33; 1 Tim 1 19; 2 Tim 4 14): It is not certain whether the third, fourth and fifth of these passages refer to the same man.

(1) The first of these Alexanders is referred to in the passage in Mk, where he is said to have been one of the sons of Simon of Cyrene, and the man who carried the cross of Simon Christ. Alexander therefore may have been a North African by birth. Mt, Mk and Lk all record the fact, with varying detail, that Simon happened to be passing at Jerusalem in the due course of the city, to be crucified on Calvary. Mk alone tells that Simon was the father of Alexander and Rufus. From this statement of the evangelist, it is apparent that at the time the Second Gospel was written, Alexander and Rufus were well known in the Christian community. Mk takes it for granted that the first readers of his Gospel will at once understand whem he means.

There is no other mention of Alexander in the NT, but it is usually thought that his brother Rufus is the person mentioned by Paul in Rom 16 13, "Salute Rufus the chosen in the Lord, and his mother and mine." If this identification is correct, then it follows, not only that the sons of Simon were Christians, but that his wife also was a Christian, and that they had all continued faithful to Christ for many years. It would also follow that the households were among the intimate friends of Paul, so much so that the mother of the family is affectionately addressed by him as "Rufus' mother and mine." The meaning of this is, that in time past this lady had treated Paul with the tender care which a mother feels and shows to her own son.

This mention of Rufus and his mother is in the list of names of Christians resident in Rome. (Cat. of 160 AD). The fact seems no reason to doubt the tradition that Mk wrote especially for the Romans; and if so, it is worth remarking that he alone of the evangelists describes Simon of Cyrene, as 'the father of Alex-

ander and Rufus.' A person of this name therefore (Rufus) seems to have held a prominent place among the Rom Christians; and thus there is at least fair ground for identifying the Rufus of St. Paul with the Rufus of St. Mark. The inscriptions exhibit several members of the household (of the emperor) bearing the names Rufus and Alexander, but this fact is of no value where both names are so common."

To sum up, Alexander was probably by birth a North African Jew; he became a Christian, and was a well-known member of the church, probably the church in Rome. His chief claim to recollection is that he was a son of the man who carried the cross of the Saviour of the world.

(2) The second Alexander, referred to in Acts 4 6, was a relative of Annas the Jews high priest. He is briefly called "a Lk as having been present as a member of the Sanhedrin, before which Peter and Jn were brought to be examined, for what they had done in the cure of the lame man at the gate of the Beautiful gate. Much is known of this Alexander than is here given by Lk. It has been conjectured that he may have been the Alexander who was a brother of Philo, and who was also the alabarch or magistrate of the city of Alexan-

(3) The third Alexander is mentioned in Acts 19 33: "And some of the multitude instructed Alexander, the Jews putting him forward. And Alexander beckoned with the hand, and would have made a Riot at the defence unto the people. But when Ephesus they perceived that he was a Jew, all with one voice, etc., RVm. In the matter of the riot in Ephesus the whole responsibility rested with Demetrius the silversmith. In his anger against the Christians generally, but specially against Paul, because of his successful preaching of the gospel, he called together a meet-

ing of the craftsmen; the trade of the manufacture of idols was in jeopardy. From this meeting there arose the riot, in which the whole city was in commotion. The Jews were wholly innocent in the matter; they had nothing to do with the disturbance. But the riot had taken place, and no one could tell what would happen. Modern anti-Semitism, in Russia and other European countries, gives an idea of an excited mob stirred on by hatred of the Jews. The further the Jews of the Ephesian people might expend itself in violence and bloodshed, and that in fury they would be the sufferers, the Jews "put forward" Alexander, so that by his skill as a speaker he might clear them, either of having instigated the riot, or of being in complicity with Paul. "A certain Alexander was put forward by the Jews to address the mob; but this merely increased the clamor and confusion. There was no clear idea among the rioters what they wanted: an anti-Jewish and an anti-Christian demonstration were mixed up, and probably Alexander's intention was to turn the general feeling away from the Jews. It is possible that he was the worker in bronze, who afterward did Paul much harm" (Ramsay, St. Paul the Traveller, etc., 279)."

(4) The fourth of the NT Alexanders is one of two heretical teachers at Ephesus—the other being Hymenaeus: see art. s.v.,—against whom Paul warns Timothy 1 Tim 1 10, Phil. 410. The teaching of Hymenaeus and Alexander was to the effect that Heretic Christian morality was not required—antinomianism. They put away—"thrust from them," RV—faith and a good con-
science; they wilfully abandoned the great central facts regarding Christ, and so they made shipwreck concerning the faith.

In 2 Tim 2:17-18, Hymenaeus is associated with Philetus, and further details are there given regarding their false teaching. What they taught is described by Paul as "prophane babblings," as leading to more ungodliness, and as eating "as doth the Gentiles and the公民人." Their heresy consisted in saying that the resurrection was past already, and had been as fair, and that it had overflowed the faith of some. The doctrine of these three heretical teachers, Hymenaeus, Alexander and Philetus, was accordingly one of the early forms of Gnosticism. It held that matter was originally and essentially evil; that for this reason the body was not an essential part of human nature; that the only resurrection was that of each man as he awoke from the death of sin to a righteous life; that thus in the case of everyone who has repented of sin, "the resurrection was past already," and that the body did not participate in the blessedness of the future life, but that salvation consisted in the soul's complete deliverance from all contact with a material world and a material body.

So pernicious were these teachings of incipient Gnosticism in the Christian church, that they quickly spread, eating like a gangrene. The denial of the future resurrection of the body involved also the denial of the bodily resurrection of Christ, and even the fact of the incarnation. The weight of which the apostle dealt with those who taught such deadly error, was that he resorted to the same extreme measures as he had employed in the case of the immoral person at Corinth; he delivered Hymenaeus and Alexander to Satan, that they might learn not to blaspheme.

Cf 1 Cor 5:5.

(5) The fifth and last occurrence of the name Alexander is in 2 Tim 4:14-15, "Alexander the coppersmith did me much evil: the Lord render to him according to his works: of whom do thou also beware." [AV "of whom thou were also"; for he greatly withstood our words.

This Alexander was a worker in copper, or iron, a fact which is quite a strain whether Alexander no. 5 should be identified with A. no. 4, and even with A. no. 3. In regard to this, it should be remembered that all three of these Alexanders were resident in Ephesus; and it is unnecessary to be more precise and the fifth of that name resided in that city at much the same time; the interval between Paul's references to these two being not more than a year or two, as not more than that time elapsed between his writings of Tim and 2 Tim. It is therefore quite possible that these two Alexanders may be one and the same person.

In any case, what is said of this last A. is that he had shown the evil which was in him by doing many evil deeds to the apostle, evidently on the occasion of a recent visit paid by Paul to Ephesus. These evil deeds had taken the form of personally opposing the apostle's preaching. The personal antagonism of Alexander manifested itself by his greatly withstanding the proclamation of the gospel by Paul. As Timothy was now in Ephesus, in charge of the church, it is highly possible that he is strongly cautioned by the apostle to be on his guard against this opponent.

JOHN RUTHERFURLD

ALEXANDER BALAS, A. b. 1116 (Ἀλέξανδρος ὁ Βάλας λέγιμονος, Ἀλέξανδρας ὁ διὰ τῆς λεγερίας). He was against Demetrius I of Syria for the throne and succeeded in obtaining it. He was a youth of mean origin, but he was put forth by the enemies of Demetrius as being Alexander, the son and heir of Antiochus Epiphanes. He received the support of the Roman Senate and of Ptolemy VI of Egypt; and on account of the tyranny of Demetrius, was favored by many of the Syrians. The country was thrown into civil war; and Demetrius was defeated by Alexander in 150 B.C. and was killed. Balas then took up the cause of his father and in 147 B.C., Alexander fled from his kingdom and was soon after assassinated.

Our chief interest in Alexander is his connection with the Macabeans. Jonathan was the leader of the Maccabean forces and both Alexander and Demetrius sought his aid. Demetrius granted Jonathan the right to raise and maintain an army. Alexander, not to be outdone, appointed Jonathan high priest, and as a token of his new office sent him a purple robe and a diadem (Ant, XIII, ii. 2). This was an important step in the rise of the Macedonian house, for it insured them the support of the Chusidim. In 153 B.C., Jonathan officiated as high priest at the altar (1 Macc 10:1-16; Ant, XIII, ii. 1). This made him the legal head of Judaea and thus the movement of the Macabeans became closely identified with Judaism. In 1 Macc 10:1, he is called Alexander Epiphanes.

ALEXANDER, THE GREAT (Ἀλέξανδρος, Ἀλέξανδρος): Alexander, of Macedon, commonly called "the Great" (b. 356 BC), was the son of Philip, king of Macedon, and of Olympias, daughter of Neoptolemos, an Epiphanes, an Epeirete king. Although Alexander is not mentioned by name in thecanonical Scriptures, in Dnl he is designated by a transparent symbol (5:21). In 1 Macc 1:1 he is expressly called the "friend of the Persians" and the "founder of the Greeks." As with Frederick the Great, the career of Alexander would have been impossible had his father been other than he was. Philip had been for some years a hostage in Thebes; while there he had learned to appreciate the changes introduced into military discipline and tactics by Epaminondas. Partly no doubt from the family claim to Harelian descent, deepened by contact in earlier days with the Persians like Lysimachus, and the personal influence of Epaminondas, Philip seems to have united to his admiration for Gr tactics a tincture of Hel culture, and something like a reverence for Athena, the great center of this culture. In military matters his admiration led him to introduce the Thracian discipline to the rough peasant levies of Macedon, and the Macedonian phalanx proved the most formidable military weapon that had yet been devised. The veneer of Gr culture which he had taken on led him, on the one hand, during stress on his Hel descent, to claim admission to the comity of Hellas, and on the other, to appoint Aristotle to be a tutor to his son. By a combination of force and fraud, favored by circumstances, Philip got himself appointed generalissimo of the Hel state;
and further induced them to proclaim war against the "Great King." In all this he was preparing the way for his son, so soon to be his successor.

He was also preparing his son for his career. Alexander was, partly no doubt from being the pupil of Aristotle, yet more imbued with a feeling that was in his father. He was early introduced into the cares of government and the practice of war. While Philip was engaged in the siege of Byzantium he sent his son to replace Antipater in the regency; during his occupancy of this post, Alexander, then only a youth of sixteen, had to undertake a campaign against the Illyrians, probably a punitive expedition. Two years later, at the decisive battle of Chaeroneia, which fixed the doom of the Gr autonomous city, Alexander commanded the feudal cavalry of Macedon, the "Companions." He not only saved his father's life, but by his timely and vehement charge materially contributed to the victory.

When all his plans for the invasion of Persia were complete, and a portion of his troops was already across the Hellespont, Philip was assassinated. Having secured his succession, Alexander proceeded to Corinth, where he was confirmed in his father's position of leader of Hellas against Darius. Before he could cross into Asia he had to secure his northern frontier against possible incursions of barbarian tribes.

He invaded Thrace with his army and overthrew the Triballi, then crossed the Danube and inflicted a defeat on the Getae. During his absence in these but slightly known regions, the rumor spread that he had been killed, and the Thessalians began a movement to throw off the Macedonian yoke. On his return to Greece he wreaked terrible vengeance on Thebes, not only as promoter of this revolt, but also as the most powerful of the Gr states.

Having thus secured his rear, Alexander collected his army at Pella to cross the Hellespont, that he might exact the vengeance of Greece on Persia for indignities suffered at the hands of Xerxes, who "by his only strength through resources had stirred up all against the realm of Greece" (Dnl 11 2 AV). Steeped as he was in the romance of the Iliad, Alexander, when he came to the site of Troy, honored Achilles, whom he claimed as his ancestor, and sacrificed a ram. This might have been the outflow of his own romantic nature, but there was also wise policy in it; the Greeks were more readily reconciled to the loss of their freedom when it was yielded up to one who revived in his own person the heroes of the Iliad. It may be noted how exactly the point of Alexander's invasion is indicated in Daniel's prophecy (8 5). From Troy he advanced southward, and encountered the Pers forces at the Granicus. While in the conflict, Alexander exhibited all the reckless bravery of a Homeric hero. He at the same time showed the skill of a consummate general. The Pers army was dispersed with great slaughter. Before proceeding farther into Persia, by rapid marches and vigorously pressed sieges, he completed the conquest of Asia Minor. Here, too, he showed his knowledge of the sensitiveness of Asiatic peoples to omens, by visiting Gordium, and cutting the knot on which, according to legend, depended the sovereignty of Asia.

What he had done in symbol he had to make a reality; he had to settle the question of supremacy in Asia by the sword. He learned that Darius had collected an immense army and was coming to meet him. Although the Pers host was estimated at a half-million men, Alexander hastened to encounter it. Rapidity of motion, as symbolized in Dnl by the "be-goat" that "came from the west, and touched not the ground" (Dnl 8 5), was Alexander's great characteristic. The two armies met at Issus, and Alexander, in the plain of Issus, where the Persians lost, to a great extent, the advantage of their numbers; they were defeated with tremendous slaughter, Darius himself setting the example of flight. Alexander only pursued the defeated army far enough to break it up utterly. He began his march southward along the seacoast of Syria toward Egypt, a country that had always impressed the Gr imagination. Though most of the cities, on his march, opened their gates to the conqueror, Tyre and Egypt only yielded after a prolonged siege. In the case of the latter of these, enraged at the delay occasioned by the resistance, and emulous of his ancestor, Alexander dragged its gallant defender Boisis alive behind his chariot as Achilles had dragged the dead Hector. It ought to be noted that this episode does not appear in Arrian, usually regarded as the most authentic historian of Alexander. Josephus relates that after he had taken Gaza, Alexander proceeded to Alexandria, there performed the marriage of Darius the high priest, who showed him the prophecy of Daniel concerning him. The fact that none of the classic historians take any notice of a "dévot rendants the narrative doubtful: still it contains no element of improbability that the pupil of Aristotle, in the pursuit of knowledge, might, during the prosecution of the siege of Gaza, with a small company press into the hill country of Judaea, at once to secure the submission of Jerusalem, then a most important city, and to regard to his communications, and to see something of that mysterious nation who worshipped one God and had no idols.

When he entered Egypt, the whole country submitted without a struggle. Moved at once by the fact that Pharos is mentioned in the Odyssey, and that he could best rule Egypt from the seacoast, he founded Alexandria on the strip of land opposite the site of the ancient shrine of Apollo at Mareotis from the Mediterranean. As usual with Alexander, romance and policy went hand in hand. The city thus founded became the capital of the Ptolemies, and the largest city of the Hellen world. He spent his time visiting shrines, in the intervals of arranging for the government of the country. The most memorable event of his stay in Egypt was his expedition to the oracle of Jupiter Ammon (Amen-Ra) where he was declared the son of the god. To the Egyptians this meant no more than that he was regarded a lawful monarch, but he pretended to take this declaration as assigning to him a Divine origin like so many Homeric heroes. Henceforward there appeared on coins Alexander's head adorned with the ram's horn of Amen-Ra. This impressed the eastern imagination so deeply that Mohammed, a thousand years after, calls him in the Quran Ixander dhu al-qarnain, "Alexander the lord of the two horns." It is impossible to believe that the writer of Dnl could, in the face of the unchangeable attribution of the horns to Alexander, represent Persia, the power he overthrew, as a two-horned ram (Dnl 8 3 20), unless he had written before the expedition into Egypt.
Having arranged the affairs of Egypt, Alexander set out for his last encounter with Darius. In vain had Darius sent to Alexander offering 7. The Last to share the empire with him; the
Battle with 'king of Javan' (RVm) "was moved with his anger against him" (Dci 8:7) and would have nothing but absolute submission. There was nothing left for Darius but to prepare for the final conflict. He collected a yet hager host than that he had had under him at Issus, and assembled it on the plain east of the Tigris. Alexander hastened to meet him. Al-
though the plain around Gaugamela was much more suitable for the movements of the Pers troops, which consisted largely of cavalry, and gave them better opportunity of making use of their great numerical superiority to outflank the small Gr army, the result was the same as at Issus—overwhelming defeat and immense slaughter. The consequence of this victory was the submission of the greater portion of the Pers empire.

After making some arrangements for the government of the new provinces, Alexander set out in the pursuit of Darius, who had fled in the care or custody of Bessus, satrap of Bactria. Bessus, at last, to gain the favor of Alexander, or, failing that, to maintain a successful resistance, murdered Darius. Alexander hurried on to the conquest of Bactria and Sogdiana, in the course of his expe-
dition capturing Bessus and putting him to death. In imitation of Bacth, he proceeded north of India. He conquered all before him till he reached the Sutlej; at this point his Macedonian veterans refused to follow him farther.

Thus compelled to give up hopes of conquests in the farther East, he returned to Babylon, where he proceeded to make the supreme capital of his empire, and set himself, with all his superabundant energy, to organize his dominions, and fit, Babylon for his new destiny. While engaged in this work he was seized with malaria, which aggravated by his recklessness in eating and drinking, carried him off in his 33rd year.

Alexander is not to be estimated merely as a military conqueror. If he had been only this, he would have left no deeper impress on the world than Tamerlane or Attila.

9. His Influence While he conquered Asia, he en-
ervated also to Hellenize her. He every-
where founded Gr cities and.Gr municipa-
lar autonomy. With these, Hel thought and the Hel language were spread all over south-
western Asia, so that philosophers from the banks of the Euphrates taught in the schools of Athens. It was through the conquests of Alexander that Gr became the language of literature and commerce from the shores of the Mediterranean to the banks of the Tigris. It is impossible to estimate the effect of this spread of Gr on the promulgation of the gospel.

ALEXANDRIA, al-eg-zan'dri-a (q. *Aleξανδρεια, hê Alexarendrea): In 331 BC, Alexander the Great, on his way to visit the Oracle of the W. extremity of the Delta at the isle of Pharos the landing-place of Odysseus (Od. iv.35). His keen eye noted the strategic possi-
bilities of the site occupied by the little Egyptian village of Rhacotis, and his decision was immediate to erect here, what it would come to be, the gateway to the richest domain of his empire, a glorious city to be called by his own name. Deiocrates, greatest

2. The living architect, already famous as builder of the Temple of Diana, was given free hand and like a dream the most beautiful city of the ancient

or modern world (with the single exception of Rome) arose with straight, parallel streets—one at least 200 feet wide—with fortresses, monuments, palaces, government buildings and parks all erected according to a perfect artistic plan. The city was about fifteen miles long (867 BC) and would have nothing but absolute submission. There was nothing left for Darius but to prepare for the final conflict. He collected a yet hager host than that he had had under him at Issus, and assembled it on the plain east of the Tigris. Alexander hastened to meet him. Al-

2. The living architect, already famous as builder of the Temple of Diana, was given free hand and like a dream the most beautiful city of the ancient

or modern world (with the single exception of Rome) arose with straight, parallel streets—one at least 200 feet wide—with fortresses, monuments, palaces, government buildings and parks all erected according to a perfect artistic plan. The city was about fifteen miles long (867 BC) and
was the most popular and human form of the Egyptian worship. This new religion obtained phenomenal success. It was in furtherance of this general policy that the Jews in A. were given special privileges, and though probably not possessing full civil rights, yet they "occupied in A. a more influential position than anywhere else in the ancient world" (Jew Enc). To avoid unnecessary friction a separate district was given to the Jews, another to the Greeks and another to the Egyptians. In the Gr section were the palaces of the Ptolemies, the Library and Museum. In the Egypt district was the temple dedicated to Serapis (Osiris-Apis) which was only excelled in grandeur by the capital at Rome. The Jews possessed many synagogues in their own district and in Philo's day these were not confined to any one section of the city. Some synagogues seem to have exercised the right of asylum, the same as heathen temples.

One of these was so large that the ἀμεν signaled by a flag when the congregation should give the Amen! Each district had a practically independent political government. The Jews were at first ruled by a Heb ethnanarch. By the days of Augustus a Council of Elders (gerusia) had control, presided over by 71 archons. Because of their wealth, education and social position they reached high public office. Under Ptol. VI and Cleopatra the two generals-in-chief of the royal army were Jews. Ptol. I had 30,000 Jewish soldiers in his army, whose barracks have only recently been discovered. It may have been a good thing that the persecution of Antiochus Epiphanes (2d cent. BC) checked Jewish Hellenization. During the Rom supremacy the rights of the Jews were maintained, except during their persecution for a brief period by the insane Caligula, and the control of the most important industries, including the corn trade, came into their hands. When Christianity became the state religion of Egypt the Jews at once began to be persecuted. The victory of Heractius over the Persians (629 AD) was followed by such a massacre of the Jews that the Copts of Egypt still denomi-

nate the first week in Lent as the "Fast of Horaceius." Wisd and many other influential writings of the Jews originated in A. Doubtless numbers of the recently discovered documents from the Cairo g'pnzah came originally from A. But the epochal importance of A. is found in the teaching which prepared the Heb people for the reception of a gospel for the whole world, which was soon to be preached by Hebrews from Hellenized Galilee.

(1) In Dnl 11 the Ptolemies of A. and their wives are made a theme of prophecy. Apollos, the "orator," was born in A. (Acts 18: 24). Luke twice speaks of himself and A.'s infu- Paul sailing in "a ship of A." (Acts ence on the 27 6; 28 11). Stephen 'disputed' in Bible Jerusalem in the synagogue of the Alexandrians (Acts 6: 9). These direct references are few, but the influence of A. on the Bible was inestimable.

(2) The Sept, tr. in A. (3d to 2d cent. BC), preserves a Heb text 1,000 years older than any now known. This tr if not used by Jesus was certainly used by Paul and other NT writers, as shown by their quotations. It is Egypt even in trifles. This Gr Bible not only opened for the first time the "Divine Oracles" to the Gentiles and thus gave to the OT an international influence, but it affected most vitally the Heb and Christian development.

(3) The Alex Codex (4th to 5th cent.) was the first of all the great uncials to come into the hands of modern scholars. It was obtained in A. and sent as a present to the king of England (1628) by Cyrrillus Lucaris, the Patriarch of Constantinople. The Sin and Vatican uncials with many other most important Bible MSS—Heb, Gr, Coptic and Syr—came from A.

(4) Jn and several other NT writings have justly been regarded as showing the influence of this philosophic city. Neither the phraseology nor conceptions of the Fourth Gospel could have been grasped in a world which A. had not taught. Pfeil- derer's statement that He "may be termed the most
finished treatise of the A. philosophy" may be doubted, but no one can doubt the fact of Alex-influence on the NT.

With the founding of the University of A. began the "third great epoch in the history of civilization" (Max Müller). It was modeled after the great schools at Athens, but excelled, being predominantly the "university of progress" (Mahaffy). Here were founded different eras as possessing from 400,000 to 900,000 books and rolls—the rolls being as precious as the books—was a magnificent edifice connected by marble colonnades with the Museum, the "Temple of the Muses." An observatory, an astronomical laboratory and large botanical and zoological gardens were available. Celebrated scholars, members of the various faculties, were domiciled within the halls of the Museum and received stipends or salaries from the government. The study of mathematics, astronomy, poetry and medicine was especially favored (even veneration upon criminals being common); Alex-architects were sought the world over; Alex inventors were almost as famous as those of China. Ancient art can still be marked in Pompeii and an Alex painter was a hated rival of Apelles. Here Euclid wrote his "Elements of Geometry;" here Archimedes, "that greatest mathematical and inventive genius of antiquity." Many of his speculations and discoveries in hydrostatics and hydraulics; here Eratosthenes calculated the size of the earth and made his other memorable discoveries; while Ptolemy studied here for 40 years and published an explanation of the relation between the sizes of the earth and the moon. Through his "almanack" for 14 cents, and established mathematical theories which are yet the basis of trigonometry. "Ever since this epoch the conceptions of the sphericity of the earth, its poles, axis, the equator, the Arctic and Antarctic circles, the equinoctial points, the solstices, the inequality of climate on the earth's surface, have been current notions among scientists. The mechanism of the lunar phases was perfectly understood, and careful though not wholly successful calculations were made in the inter-sideral distances. On the other hand literature and art flourished under the careful protection of the court. Literature, and its history, philology and criticism became sciences" (A. Weber). It may be claimed that in literature and the fine arts, the 11th period was dis-played through the earliest "love stories" and pastoral poetry date from this period (Mahaffy); yet the literature of the Augustan Age cannot be understood "without due appreciation of the character of the Alex school" (EB, 11th ed.), while in editing texts and in copying and translating MSS inconceivable patience and erudition were displayed. Our authorized texts of Homer and other classic writers come from A. not from Athens. All famous books brought into Egypt were sent to the library to be copied. The statement of Jos. that Ptolemy Philadephus (285-247) requested the Jews to translate the OT into Gr. is not incredible. It was in accordance with the custom of that era. Ptol. Euergetes is said to have sent to Athens for the works of Aeschy., Sophocles, Euripides, etc. and when these were transcribed, sent back beautiful copies to Greece and kept the originals! No library in the world excepting the prophetic library in Jerusalem was ever as valuable as the two Alex libraries. The story that the Alex library was burned to the 7th cent. is discredit and seemingly disproved (Butler). At any rate after this period we hear of great private libraries in A., but the greatest literary wonder of the world has disappeared.

Though no department of philosophy was established in the Museum, nevertheless from the 3d cent. BC to the 6th cent. AD it was 8. Influence the center of gravity in the philo-

Philos. A. influenced the world. Al. Neo-Alexi-

ism arose. Here Neo-Platonicism, that contemplative and mystical reaction against the materialism of the Stoics, reached its full flower. It is difficult to overestimate the influence of the latter upon religious thought. In it, the profoundest longing for the spirit, in conflict with the sublimest Sem concepts. Plato was numbered among the prophets. Greece here acknowledged the Divine Unity to which the OT was pledged. Here the Jew acknowledged that Athens as truly as Jerusalem, had reached to the vision of God. This was the first attempt to form a universal religion. The Alex philosophy was the Elijah to prepare the way for a Saviour of the world. The thought of both Sadducee and Pharisee was affected by it and though the Christian church was enveloped with the sublimity of Sem concepts. Plato was saturated with it. Neo-Platonicism drew attention to the true relationship between matter and spirit, good and evil, finite and infinite; it showed the depth of antagonism between the natural and spiritual, the finite, the ideal, the necessity of some mystic union between the human and the Divine. It stated but could not solve the problem. Its last word was escape, not reconciliation (Ed. Cairo). Neo-Platonicism was the "egg out of which Christian theology hatched" (Ed. Cairo) though later it became an adverse force. Notwithstanding its dangerous teaching concerning evil, it was on the whole favorable to piety, being the forerunner of mysticism and sympathetic with the deepest, purest elements of a spiritual religion.

According to all tradition St. Mark, the evangelist, carried the gospel to A., and his body rested here until removed to Venice, 828 A.D.

6. Christian From this city Christianity reached in all Egypt and entered Nubia, Ethiopia, Alexandria and Abyssinia. During the 4th cent. ten councils were held in A., it being the ecclesiastical and religious capital of Christendom. The first serious persecution of Christians by heathen occurred here under Decius (251) and was followed by many others, the one under Diocletian (303-11) being so savage that the native Christian church stood it not. When the Christians reached political power they used the same methods of controversy, wrecking the Cæsarion in 366 and the Serapeum twenty-five years later. Serapis (Osiris-Apis) was the best beloved of all the native deities. His temple was built of most precious marbles and filled with priceless sculptures, while in its cloisters was a library second only to the Great Library of the Museum. When Christianity became the state religion of Egypt the native philosophers, cosmographers, went into the support of Serapis. But Theodosius (391) prohibited idolatry and led by the bishop, the Serapeum was seized, and smitten by a soldier's battle-axe, the image—which probably represented the old heathen religion at its best—was broken into pieces, and dragged through the streets. That day, as Steinodoff well puts it, "Egypt paganism received its death blow; the Egypt religion fell to pieces" (History of Egypt). Thereafter heathen worship hid itself in the deserts and caves of the earth. Even secret allegories of the Serapis brought persecution and sometimes death. The most appalling tragedy of this kind occurred in 415 when Hypatia, the virgin philosopher, celebrated equally for beauty, virtue and learning, was dragged by
a mob to the cathedral, stripped, and torn to pieces before the altar. Some of the greatest Christian leaders used all their influence against such atrocities, but the Egyptian Christians were always noted for their excitable. They killed heretics easily, but they would themselves be killed rather than renounce a sight that was to them the most intimate of the theological conceit. It only needed the change of a word e.g. in the customary version to raise a riot (Expos, VII, 75). Some curious relics of the early Egyptian church have very recently come to light. The oldest autographic Christian letter known (3d cent.) proves that at that time the church was used as a bank, and its ecclesiastics (who, whether priests or bishops, were called "popes") were expected to help the country merchants in their dealings with the Roman markets. Some sixty letters of the 4th cent. written to a Christian cavalry officer in the Egyptian army are also preserved, while papyri and ostraca from c. 600 AD show that at this time no deacon could be ordained without having first learned by heart as much as an entire Gospel or 25 Psalms and two epistles of Paul, while a letter from a bishop of this period is filled with Scripture, as he anathematizes the "oppressor of the poor," who is likened unto him who spat in the face of Our Lord, and smote Him on the head (Adolph Deissmann, Light from the Ancient East, etc, 1910). Oppression of Jews and heretics was not, however, forbidden and during the 5th and 6th cents. Egypt was a battle-field in which each sect persecuted each other. Even when the Arabs under the caliph Omar captured the city on Good Friday (641), Easter Day was spent by the orthodox in torturing supposed heretics! The next morning the city was evacuated and Jews and Copts received better treatment from the Arabs than they had from the Rom or Gr ecclesiastics. After the Arab conquest the Coptic church, being released from persecution, prospered and gained many converts even from the Mohammedans. But the Saracen civilization and religion steadily displaced the old, and the native learning and native religion soon disappeared into the desert. By the 8th cent. Arab. had taken the place of Gr and Coptic, not only in public documents but in common speech. Then for 1,000 years the Egypt church remained without perceptible influence on culture or theology. But its early influence was immeasurable and can still be marked in Christian art, architecture and ritual as well as in philosophy and theology. Perhaps its most visible influence was in the encouragement of image-reverence and asceticism. It is suggestive that the first hermit (Anthony) was a native Egypt, and the first founder of a convent (Pachomius) was a converted Egyptian heathen monk. Today A. has again become a Christian metropolis containing Copts, Romans, Greeks, Armenians, Maronites, Syrians, Chaldeans and Protestants. The Protestants are represented by the Anglican church, the Scotch Free church, the evangelical church of Germany and the United Presbyterian church of the U.S. (For minute divisions see Catholic Enc.)

The first theological school of Christendom was founded in A. It was probably modeled after earlier Gnostic schools established for 7. Catechet- the study of religious philosophy. School. It offered a three years' course. There were no fees, the lecturers being supported by gifts from rich students. Pantaenus, a converted Stoic philosopher, was its first head (180). He was followed by Clement (202) and by Origen (232) under whom the school reached its zenith. It always stood both for the philosophical vindication of Christianity. Among its greatest writers were Julius Africanus (215), Dionysius (265), Gregory (270), Eusebius (315), Athanasius (373) and Didymus (347), but Origen (185-254) was its chief glory; to him belongs the honor of defeating paganism and Gnosticism with their own weapons; he gave to the church a "scientific consciousness," his threefold interpretation of Scripture affected Biblical exegesis clear down to the last century. Aries was a catechist in this institution, and Athanasius, the "father of ortho-
doxy" and "theological center of the Nicene age" (Schaff), though not officially connected with the catechetical school was greatly affected by it, having been bred and trained in A. The school was closed toward the end of the 4th cent. because of theological disturbances in Egypt, but its work was continued from Caesarea and other centers, affecting profoundly Western teachers like Jerome and Ambrose, and completely dominating Eastern thought. From the first there was a mystical and Doctetic tendency visible, while its views of inspiration and methods of interpretation, including its constant assumption of a secret doctrine for the qualified initiate, came legitimately from Neo-Platonism. For several centuries after the school disbanded its tenets were combated by the "school of Antioch," but by the 8th cent. the Alex theology was accepted by the whole Christian world, east and west.

LITERATURE.—Besides works mentioned in the text see especially: Petrie, History of Egypt (1880). V. VI; Mahaffy, Empire of the Ptolemies (1895); Progress of Hellenism (1905); Butler, Arab Conquest of Egypt (1902); Ernst Steglin, Aegyptische Paläographie (1908); Har- nack, Lehrbuch der Dogmengeschichte (1890-1906); and in New Sch-Herz (1910); Inge, Alexandrian Theology in Enc of Religion and Ethics (1908); Ed. Caird, Evolution of Theology in the Greek Philosophers (1904); Pfeiffer, Philosophy and Development of Religion (1904); Schaft, History of Christian Church (1884-1910); Ziegreb, Etudes sur l'ancienne Alexandrie (1909).

CAMEY M. COBEN

ALEXANDRIANS, al-ex-an-dri-ans (Ἀλεξαν-
driei, Alexandreis): Jews of Alexandria, who had, with the Libertines and Cyrenians, a synagogue in Jerusalem. They were among those who disputed with Stephen (Acts 6:9).

ALGUM, al'gum (אָלעַג, alug'im [2 Ch 2
8; 9 10 f]; or ALMUG [אָלֵמוּג, almu'gim,
1 K 10 11 f]): It is generally supposed that these

[Diagram of an Alum Tree]
out of Lebanon" (2 Ch 2:8). In 1 K 10:11 it is said that the navy of Hiram "that brought gold from Ophir, brought from Ophir much precious and many good timber stones." In the parallel passage in 2 Ch 9:10 it is said that "algum-trees and precious stones" were brought. From this wood "the king made . . . pillars for the house of Jeh, and for the king's house, harps also and psalteries for the singers: there came no such algum-trees, nor were seen, unto this day" (1 K 10:12).

The wood was evidently very precious and apparently came from E. Asia—unless we suppose from 2 Ch 2:8 that it actually grew on Lebanon, which is highly improbable, it was evidently a fine, close-grained wood, suitable for carving. Tradition says that this was the famous sandal wood, which was in ancient times put to similar uses in India and was all through the ages highly prized for its color, fragrance, durability and texture. It is the wood of the tree, Pterocarpus santalinus (N.D. Santalaceae), which grows to a height of 25 to 30 feet; it is a native of the mountains of Malabar.

ALLAH, a-l'la (אָלֹהָ, 'elohá, 'alāh), name of the dukes, or heads of thousands of Edom (1 Ch 1:51). In Gen 36:40 the name is Alavá (אַלַּוָה, 'alāwā), the only difference being the change of the weaker γ, v, of Gen to the somewhat stronger, ϒ, v, of the later Ch, a change which is not infrequent in Heb. He is not to be confused, as in HDB, with the Alan of the same chapter.

ALLAN, a-l'ān (אֲלַנָ, 'alān): A descendant of Esau, and son of Shobal (1 Ch 1:40). In the corresponding earlier genealogy (Gen 36:23) the same person is given as Alvan (אַלְּוָן, 'alāwān), the change of the third consonant being a common one, common to Heb, occurring similarly in Alan (q.v.). Allan is not to be identified with Alliah, since the groups of names in which these occur are quite different, and the context in each case is not the same.

ALIEN, a-l'yen: Found in the AV for "ג, גֵּר, (Ex 18:3) "guest," hence: "foreigner," "sojourner" RV; also for צֶּרֶן, nēḥārāh (Isa 61:5) = "foreigner," (a foreigner) RV (concrete, "heathendom, gentiles, races"); and צֶּרֶן, nōkhrī (Dt 14:21 RV "foreigner"); of Job 19:15; Ps 69:8; Lam 5:2)—"stranger," in a variety of degrees and meanings: "foreign," "non-relative," "adulterous," "different," "wonderful," "alien," "outlandish," "strange." I often find it useful to separate מְצֹא, apellēlēthea (Eph 4:18; Col 1:21) = "being alienated," and αλλότριον, (He 11:34) = "another's," not "one's own," hence: "foreign," "not akin," "hostile." In the OT the expression was taken in its lit. sense, referring to those who were not Israelites—the heathen; in the NT it is given a fig. meaning, as indicating those who have not become naturalized in the kingdom of God, hence are outside of Christ and the blessing of the gospel.

ALIENATE, a-l'yen-āt (אֲליַּנַּט, 'alēnāt; ἀλλοματωτεύω, apellōlētheo, "to estrange from"): In OT, for the break between husband and wife caused by unfaithfulness to the marriage vow (Jer 6:8; Ezek 23:17) and also applied to the diversion of property (Ezk 48:14). In NT, spiritually, for the turning of the soul from Christ (Col 2:12; 1 Col 2:11). The Gr αλλότριον, which is the root of the verb, is the opposite of ἴδιος, "one's own." The word implies a former state, whence the person or thing has departed, and that, generally, by deterioration.

ALIVE, a-liv (אָלִּבָ, hāv, "living"); zōo, zō, "to live," ἀνέκας, anasa, "to live again"): These

Heb and Gr originals are the chief terms for life in both Testaments. They cover all life, including the soul and spirit, although primarily referring to physical vitality. Striking examples may be cited: "Is your father yet a?" (Gen 43:7); "To whom he also showed himself a." (Acts 1:8). Often used of God: "the living God" (Josh 3:10); also of the resurrection life: "In Christ shall all be made a". (1 Cor 15:22); of the soul's regenerate life: "Reckon . . . yourselves . . . a unto God," (as those that are a. from the dead" (Rom 6:11.13 AV). The term is vital with the creative energy of God; the healing, redemptive, resurrection life of Christ; the renewing and regenerative power of the Holy Spirit.

Dwight M. Pratt

ALL, ʾāl: Used in various combinations, and with different meanings.

1. All along, "Weeping all along as he went" (Jer 41:6), i.e. throughout the whole way he went, feigning equal concern with the men from Shiloh, etc, for the destruction of the Temple, so as to put them off their guard.

2. All in, "That God may be all in all" (1 Cor 15:28, Gr ἐπὶ πάντα ἐπὶ πᾶσιν, "all things in [persons and things]"). "The universe, with all it comprises, will wholly answer to God's will and reflect His mind." (Dummelow).

3. All one, "It is all one!" (Job 9:22), "it makes no difference whether I live or die." (4 At all, "If thy father miss me at all" (1 S 20:6), "in any way," "in the least.

4. All is, "All to brake his skull" (Jgs 9:53 AV) an obsolete form signifying "altogether": "broke his skull in pieces." (6 Oft used indefinitely of a large number or a great part, "All the cattle of Egypt died" (Ex 9:6); of vs 19:25), "all the Jews, and all the region round about" (Mt 3:8); "that all the world should be enrolled" (Lk 2:1); "all Asia and the world" (Acts 19:27); "All [people] verily held John to be a prophet!" (Mk 11:32).

M. O. Evans

ALLAMELECH, a-lam-ʿel-ek (אַלָּמִמְלָך, 'alāmmalek, "oak of a king"): A town in the tribe of Asher, the location of which is not known (Josh 19:26; AV Alummelech).

ALLAR, a-lar (AV Aalar; 'Aλαρ, Aalar): Occurring once (1 Esd 6:36) and used apparently to indicate a place from which certain Jews came on the return from captivity, who could not prove their lineage, and which received its name from the privileges of the priesthood. HDB identifies with Immer of Ezr 2:59 and Neh 7:61 (q.v.), but this is not at all certain.

ALLAY, a-lay (אַלָּי, hēḇĕāh, "to cause to rest," "soothe": "Gentleness allayeth [lit., "pacifieth"] great offences" [Ecc 10:4]). The word is applied to what "excites, disturbs and makes uneasy" (Smith, Synonyms Disdained, 106).

ALLEGE, a-lej (אַלָּג, הָעֹלָה, "to set forth," Acts 17:3): It is not used in the Eng. Bible in its more modern and usual sense, "to assert," but is about equivalent to "to prove.

ALLEGANCE, a-le-jus (אַלָּגָן, mishmereth, "a charge," from shāmār, "to keep," 1 Ch 12:28). RV gives the Gr meaning, "kept the house of Saul," which revisers consider fig. for "maintaining their loyalty and fidelity", i.e. "allegiance.

ALLEGORY, a-le-go-ri: The term allegory, being derived from ἀλλος ἀγορευεῖν, ἄλλο ἀγορέων, signifying to say something different from what the
words themselves imply, can etymologically be applied to any fig. form of expression of thought. In actual usage in theology, the term is employed in various ways, viz. rhetorically, hermeneutically and homiletically. In the first-mentioned sense it is the ordinary allegory of rhetoric, which is usually defined as an extended or continued metaphor, this extension expanding from two or more statements to a whole volume, like Bunyan's Pilgrim's Progress. Allegories of this character abound in the Scriptures, both in OT and in NT. Instructive examples of this kind are found in Ps 80 8-19; Eccl 12 3-7; Jn 10 15-16; Eph 6 11-17. According to traditional interpretation of both the Jewish exegesis and of the Catholic and Protestant churches the entire book of Cant is such an allegory. The subject is discussed in full in Terry's Biblical Hermeneutics, etc., ch vi, 214-38.

In the history of Biblical exegesis allegory represents a distinct type of interpretation, dating back to pre-Christian times, practised particularly by the Alex Jews, and adopted by the early Church Fathers and still practised and defended by the Roman Catholic church. This method insists that the literal sense, particularly of historical passages, does not exhaust the divinely purposed meaning of such passages, but that these latter also include a deeper and higher spiritual and mystical sense. The fourfold interpretation of both the Jewish exegesis and the Catholic and Protestant churches the entire book of Cant is such an allegory. The subject is discussed in full in Terry's Biblical Hermeneutics, etc., ch vi, 214-38.

relations between Israel and the Canaanites threatened the preservation of Yahwism.

Prohibitory measures were adopted in the legal codes with a view to Jewish separation and purity (Ex 23:32; 34:12; Dt 7:2; cf Jgs 4:17).

The Monarchy was a very early institution in the history of the Jewish kingdom; the official heads of the people formed such alliances and intermarried. David became an ally to Achish of Gath (1 S 27:2-12) and later on to Abner, which led to the consolidation of a kingdom (2 S 3:17-21; S 1:3). It appears likewise that Toast, king of Hamath, formed an alliance with David (2 S 9:10) and that Hiram of Tyre was his ally (1 K 5:12a). Alliances with foreign nations became essential to the progress of trade and commerce during the reign of Solomon. Two of his treaties are recorded: one with Hiram of Tyre (1 K 5:12-18; 9:11-14) and one with Pharaoh, king of Egypt (1 K 9:16).

After the disruption, Shishak of Egypt invaded Judaea, and probably also Israel. This meant an abrogation of the treaty existing between Israel and Egypt during the reign of Solomon. In consequence of the war between the two kingdoms, Pharaoh formed an alliance with Benhadad of Syria (1 K 15:18-20). Later on Ahah sought an alliance with Ben-hadad (1 K 20:31-34). Friendly relations ensued between Israel and Judah, during the reign of Jehoshaphat, which continued to the close of the dynasty of Omri (1 K 22:2-50). 2 K 3:7). With the accession of Jehu, hostilities were resumed. In the Syro-Ephraimitic war, Israel was allied with Syria, and Judah with Assyria (2 K 15:6-9; 16:7). This opened the way to the Assyrian power into both kingdoms. Relief against Assyria was sought in Egypt; Hoshea rebelled against Shalmaneser, and allied with So (Sevechus, the Shabaka of the 25th Dynasty) and thus brought about the fall of Samaria.

Hezekiah likewise sought an alliance with So, but derived no assistance from him. He is recorded to have formed friendly relations with Berodach-baladan of Babylon (2 K 20:12-14). These alliances resulted in the introduction of foreign cults into Jerus (2 K 16:10,11). During the reign of Manasseh, Yahwism was seriously threatened by foreign religious practices (2 K 21:2-9). The protest spirit against the prevailing encroachment on the old, right way to the Assyrian power is emphasized in the national policy. Josiah fought against Pharaoh-nechoh as an ally of Assyria (2 K 23:29). Jehociak continued the Assyrian alliance and was dethroned in consequence by Pharaoh-nechoh (ver 33). Jehoiakim was disposed to be friendly with Egypt, and even after his submission to Nebuchadnezzar, he remained loyal to the Pharaoh (ver 35). Zedekiah came to the throne as an ally of Babylon. When he broke this alliance, the destruction of Jerus resulted (35).

Judas Maccabaeus sought an alliance with the Romans (1 Mac 8:6; Jos, Ant, XII, x, 6) which was renewed by Jonathan (1 Mac 12:1; Ant, XIII, v, 8) and by Simon (1 Mac 15:17; Ant, XIII, vii, 8). Treaties were concluded with the Spartans (1 Mac 12:2; 14:20; Ant, XII, iv, 10; XIII, v, 8). The Roman alliance was again renewed by Hyrcanus about 128 BC (Ant, XIII, ix, 2). This alliance proved to be of fatal consequence to the independence of the Jews (Ant, XIV, iv, 4; and xiv, 5). For the rite connected with the formation of the earlier alliances, see Covenanter.

Samuel Cohon

### Allured

**Allied**, a-li'd, kôrōb, "near," or as in Gen 45:10; Ex 13:17, etc.: Neh 13:4 refers either to family ties, as in Ruth 2:20, or to intimate association.

**Allom**, a'lon (Al'ôn, Allônn): RV ALLOW (q.v.): One of the families of the "servants of Solomon," whose descendants returned with Zerubbabel from Babylon in the First Return, 537 BC (1 Esdr 5:34). The name is not found in the parallel lists of Ezra and Nehemiah, although some have tried to identify with the last name of each list, Ami of Ezr 2:57, and Amon of Neh 7:59. This is not probable.

**Allohn**, a'lon (Al'ôn, Allônn, "oak").

(1) A town in the tribe of Naphtali in northern Palestine (Jos 19:33), according to AV, which follows some Heb texts. It is better however to read with the RV, "oak." (Al'ôn, 'allon, "oak").

(2) A prominent descendant of the tribe of Simeon (1 Ch 4:37).

**Allon-Bacuth**, a'lon-bâ'kuth (A-on-bac'uth, Al'ôn bâk'oth; AV transliterates Alon-bacuth, al-on-bac'th, "oak of weeping"): The burial place of Deborah, the nurse of Rebekah (Gen 25:8); it appears to be the narrative in the vicinity of which was the "oak of weeping," under which she was buried.

**Allow**, a-lou', ALLOWANCE, a-lou'ane: The vb. "to allow" is used in AV to tr or four different Gr words: (1) euzedokô, "to approve together" (with others) (RV "consent unto") (Lk 14:48).

(2) proddedhmatos, "to receive to oneself," "admit": (RV "look for," in "accept"): Acts 24:15.

(3) ginôskô, "to know," "recognize": "That which I do, I allow not" (RV "I know not"). i.e., "I do not understand what I am doing, my conduct is inexplicable to me" (Grimm-Thayer). Rom 7:15.

(4) dokimizô, "to prove," "approve," "Happy is he that condemneth not himself in the thing which he alloweth" (RV "approveth," i.e. in practice), i.e. who is not troubled with scruples: Rom 14:22. Thus RV has removed the noun "allow" in each case in which it occurs in AV, it being somewhat ambiguous in meaning (its original sense, as derived from Lat allocare, "to place," assign, "grant," being influenced by another word, Lat alludere, "to touch"). The noun "allowance" occurs in the sense of quantity of food allowed, in 2 K 26:30 (AV, RV) and the parallel passage Jer 52:34 (RV; "diet") in AV.

**Alloy**, a'lo'i (A-ló'l, brôd'hal): In Is 1:25 RV "tin"; tr "tin" in the text. Elsewhere in both VSS brô'dhal is tr Tin (q.v.).

**Alure**, a-lur' (A-lœr', pâthôh, "to persuade," "woo," "entice"): Shâleâ'fat, delezôth, "to entrap," "lay a bait": (1) "I will allure her, and bring her into the wilderness" (Hos 2:14), with evident reference to the Assyrian invasion and the devastation of the land, followed up by the Exile. Thus would Jeh entice Israel to repent by gentle punishment; then follow her further degradation and the pouring out of His grace (ver 14 ff.).

(2) "They allure through the lusts of the flesh" (2 Pet 2:18, RV "enticer"). Wicked men allure to destruction; God (as above) allure to punishment, repentance and restoration. M. O. Evans.
Almighty

ALMIGHTY, ʾml-mūtʾ: (1) ʿšaddāʾ [Gen 17 1]: Found in the OT forty-eight times, most of these in the Book of Job; it occurs either alone or in combination with ʾšd, “God.” The root meaning is uncertain. (2) ʾṣarrāṣāṭ, pantokrāτōr, the exclusive tr of this Gr word in the NT, found principally in Rev (nine times); once besides (2 Cor 6 18). Its occurrence in the Apoc is frequent. See God, Names of.

ALMODAD, al-mōʾdād (ʾalmōḥāḏāh, “the beloved,” or, “God is beloved”): The first mentioned of the thirteen sons of Joktan (Gen 10 25–29; 1 Ch 1 19–23). A south Arabian name, and pointing to a south Arabian tribe. See Abimael.

ALMON, ʾal몬 (ʾalmōn, “hidden”): A Levitical city in the tribe of Benjamin (Josh 21 18), the same as “Allemeth” RV, “Alemeth” AV, of 1 Ch 6 60 (q.v.).

ALMON-DIBLATHAIM, al’mon-dib-la-thāʾîm (ʾalmōn dīblathāʾyim, “Almon of the double cake of figs”): A station in the wilderness journeys of the Israelites, located in Moab between Diban-gad and the mountains of Abarim (Nu 33 46.47). It was near the end of the forty years’ wanderings. The name was probably given because the location was like two lumps of pressed figs. In both occurrences the word has the accusative ending of direction, and should properly be read: “Almon toward Diblathaim.” It was probably the same place as Beth-diblathaim of Jer 46 22, mentioned in the prophet’s oracle against Moab.

ALMOND, ʾaʾmūnd:
(1) ṭṭ, ʾshākāḏ, Gen 43 11; Nu 17 8, etc. The word shaked comes from a Heb root meaning to “watch” or “wait.” In Jer 1 11.12 there is a play on the word, “And I said, I see a rod of an

The almond tree is mentioned in Eccl 12 5, where in the description of old age it says “the almond-tree shall blossom.” The reference is probably to the white hair of age. An almond tree in full bloom upon a distant hillside has a certain likeness to the hair of whiteold age.

A rod of almond is referred to Gen 30 37, where “Jacob took him rods of fresh poplar, and of the almond [lāz] and of the plane-tree; and peeled white streaks in them” as a previous foundation. [Feast lams and goats—a proceeding founded doubtless upon some ancient folklore. Aaron’s rod that budded (Nu 17 2.3) was an almond rod. Also see Jer 1 11 referred to above.

The blossoms of the almond are mentioned Ex 25 33 f.; 37 19 f., etc. “Cups made like almond-blossoms in one branch, a knop (i.e. knob) and a flower,” is the description given of parts of the sacred candlestick. It is doubtful exactly what was intended—the most probable is, as Dillmann has suggested, that the cup was modeled after the calyx of the almond flower. See Candelabrum.

Israel directed his sons (Gen 43 11) to carry almonds as part of their present to Joseph in Egypt. Palestine is a land where the almond flourishes, whereas in Egypt it would appear to have been unknown. Almonds are today esteemed a delicacy; they are eaten salted or beaten into a pulp with sugar like the familiar German Marzipan.

The almond is Amygdalus communis (N.O. Rosaceae), a tree very similar to the peach. The common variety grows to the height of 25 feet and produces an abundant blossom which appears before the leaves; in Pal this is fully out at the end of January or beginning of February; it is the harbinger of spring. This early blossoming is supposed to be the origin of the name ʾshākāḏ which contains the idea of “early.” The masses of almond trees in full bloom in some parts of Pal make a very beautiful and striking sight. The bloom of some varieties is almost pure white, from a little distance, in other parts the delicate pink, always present at the inner part of the petals, is diffused enough to give a pink blush to the whole blossom. The fruit is a drupe with a dry fibrous or woody husk which splits into two halves as the fruit ripens. The common wild variety grows to a kernel which is bitter from the presence of a substance called amygdalin, which yields in its turn prussic (hydrocyanic) acid. Young trees are grafted with cuttings from the sweet variety or are budded with apricot, peach or plum. E. W. G. Masterman

ALMOST, ʾalʾmost (ʾlv ʾlʾqā): In Acts 26 28 the Gr en ʾolqō does not mean “almost,” although scholars have for centuries tried the clause “Almost thou persuadest me to become a Christian.” The revisers saw clearly the errors of their predecessors, so far as the significations of the first two words is concerned; but their explanation of the sentence is also erroneous; for the Gr cannot mean “With but little persuasion thou wouldst fain make me a Christian.” Paul’s reply proves that en ʾolqō must be taken with the last word petō, not with petheis, since he takes up Agrippa’s en ʾolqō, couples it with en megdōl and continues with genēptō, which is the regular passive participle (cf Lysias xii.71 with 72). And the idea of “Christian” is also taken up and repeated in hopolas kaʾq ego eimi.

An investigation of the usage of en ʾolqō shows that it was never used in the sense of “almost.”
The phrase occurs first in the Hymn to Hermes, 240, and here it is evidently an abbreviated expression for the Homeric ὀλγη ἀλμάς, which is found in 2, Christen; "eleemosynary," we may suppose, was the equivalent of ὀλγή, which is used in Polyb. 3. 18. These uses persist from Homer far down to the post-classical literature (Phut. Per. 159 F; Coriol. 217 F; Mar. 427 A; Crass. 547 C; Polyb. x.18; Appian, Mithrad. 330; Themistius x.143 C; Eust. 1126; Hel. 771; And. 120; vtr. iv.85; Desp. 606; ii. 181). These are important variants. In the NT the phrase occurs also in Eph 3. 3. Here too the common variants are incorrect. The clause in which the phrase occurs means simply, "as I said a little while ago"—the addition of ἀλμᾶς merely indicates that the interval indicated by πρὸ ἑστα Ἀποστ. the idea which would have been expressed in classical Gr by the simple dative, ἀλμᾶς and the adverb πρὸτερον (Ar. Thesem. 578; Aeschin. i. 26, 72, 105; i. 77, 147). Only a short while before Paul had expressed practically the same thought (Eph 3. 3) and in almost identical language. Consequently, in ὀλγῆς, in the NT, means "a little," and is equivalent to ἀλμᾶς which occurs in 2 Pet 2. 18. In classical writers the idea would have been expressed by ἀλμῶν, or κατ ὀλγήν. So the original sense "in a little space" (or time), comes to mean simply "a little" (bit), ein bischen, but is never equivalent to ὀλγὴν ("within a little") in any period of the language. The King James translators disregarded the real signification of ὀλγῆς, or adopted the reading of the inferior MSS (genethai), so as to make the rest of the sentence harmonize with their tr of the first two words; and the revisers force the last two words into an impossible service, since the object of ποιεῖν of which καθιστάω is the factitive predicate, must be a third person, but certainly not Agrippa. Some scholars are of the opinion that the thought is: "You are trying to persuade me so as to make me a Christian." This is, indeed, the Spanish version; but examples show that the infinitive after πείθω was used in a different sense. The best MS reads ΘΕΩCΕΙC. This sense, of course, stand for πείθω. But μεταπέθη may point to an original μεταποίηθη. Cf Jas 4. 5 and 2 Cor 5. 2, Plato Leg. 855 E. If the correct, the whole means simply "earnestly desire," and not "persuade." Cf Herod. v.93; Plato Protag. 329 D; Aesch. Pers. 542; Soph. Phil. 534; Eur. H.F. 1408; J. T. 542; Cyc. 68; Ion 1432; Ar. Lyn. 605, ὑπὸ δὲ, ὑπὸ ἀλμᾶς; Agrippa is asking, "What do you want, Paul? What are you trying to do? Make me a Christian?" The implication in Paul's reply is that he is very desirous indeed of making him a Christian. And this interpretation harmonizes with the scene. The apostle's business at this juncture is not to convert heathen to Christianity: for he is in chains before Agrippa, Bernice, Festus and prominent men of Caesarea, μετὰ πολλῶν διάφανων (ver 23), to answer the charges brought against him by the Jews. But he holds forth at length and with such ardor that the Roman king says (though not necessarily in irony): "You seem to be anxious to make me a Christian in small measure." And Paul responds: "both small and great." All the MSS, except Sinaiticus, have πρὸτερον (Alexandria: ΘΕΩCΕΙC). Several read γενεθή (instead of ποιεῖν). Wetstenius (Amsterdam 1752) and Knapp (Halle 1829) follow these MSS. So most of the old tr: Coverdale (1535), "'Thou persuadest me in a parte to become a Christian'; Biblia Sacra (Paris 1745) "In modico suades me C. fieri"; a Latin MS, 14th, century, now in Leon Septin., Cyan.; Rosenmüller's Schriftenamt best que ihr meeradu ent flam"; Stier und Thiele's Polyglott Bibel (1849); Tregelles (1857—79, with Jerome's version); Edouard Reuss, Histoire apostolique (Paris 1876), "Tu vas me persuader scientif de devenir Chrétien." The tr of Queen Elizabeth's Bible is "Somewhat thou bryngest me in minde to forbe make Chrystye." Wycliffe renders "In litil thing thou councelst me for to be maad a Christian man." Erasmus takes en olgip in the sense of "a little," of Xiphilin's "Thou wilt make me a Christian in a moment," has been adopted in various countries (Wetstenius, Kuinoel, Neander, de Wette, Lange, Robinson, Hackett, Conybeare). The older scholars generally hold to "almost" (Valla, Luther, Beza, Grotius, Castalio, Du Veil, Bengel, Stier). Some interpret the phrase "with little labor" (Oecumenius, Olshausen, Baumgarten, Meyer, Leclerc). Neander maintains that if we adopt the readings en megab in Paul's answer, Agrippa's words must be explained "with a few reasons" ("which will not cost you much trouble"), Meyer-Wendt (Kritisches-exegetisches Handbuch über die Apostelgeschichte) translates "mit Wenigem ubereinstimmt du mir Christ zu werden." Meyer himself recognizes the phrase to have been spoken sarcastically. See Classical Review, XXI, 238—41. J. E. Harry

ALMS, 'Alms, Almsgiving, Almsgiving.' The Eng. word "alms" is an abridged form of the Gr word, ὀλγηματικός, eleemosynérion (of "eleemosynary"), appearing in gradually reduced forms in German Almosen, Wyclif's Almsee, Scotch A'w'mons, and our alms.

The later Jews often used "righteousness" γενέθηκα as meaning alms, that being our view the foremost righteousness. (Cf our modern use of "charity" to denote almogiving.) This use is seen in the Talm and in the frequent translations of the Hebrew word for "righteousness" (γενέθηκα) by "alms" (eleemosynárion) in the LXX, though nothing warranting this is found in the Heb OT, or in the true text of the NT. This notion of righteousness as alms being well-nigh universal among Jews in Jewish day, and appearing in Christian accounts, exists for "alms" in Mt 6.1, where the true text has "righteousness": "Take heed that ye do not your righteousness before men, to be seen of them" (RV with GND, the Lat versions, etc.). The oriental versions which have been called "alms" may be accounted for on the supposition that "alms" was first written on the margin as explaining the supposed meaning of "righteousness," and then, as according to this accepted oriental idea, was substituted for it in the text by the copyists.

Dikaioméne and eleemosynérion are both used in the LXX to tr ἀλμάς, "kindness," and are also both used to tr γενέθηκα, "justice." Almsgiving was regarded not merely as a plain evidence of righteousness in general but also as an act of justice, a just debt owing to the needy. "No one refuses directly," Mackie says, hence, possibly, Christ's teaching in Lk 11.41, "Let your righteousness [charity] be from within," "Give your hearts to almsgiving."

In the course of time the impulse and command to give alms in a true human way, out of pity, such as is found expressed in Dt 15.11 AV, "Thou shalt open thine hand wide unto thy brother, to thy needy, and to thy poor, and to thy needy, and to thy poor, and to thy needy," has ended up to a formal, "meritorious" practice, possessing, like sacrifice, as men came to think, the power of atoning for man's sins, and redeeming him from calamity and death. For instance, Prov 11.4 (of 16.6;
THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

Almug

Alphabet

THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

102

21 3) was expounded: "Water will quench blazing fire; so doth almsgiving make atonement for sins" (BabDhah Bataah). "Do ye give alms, and it shall deliver thee from affliction" (Ecclus 29:12).

The story of Tob is especially in point: it is simply a lesson on almsgiving and its redeeming powers: "Alms delivers from death and will purge away all sin" (Tob 1:16; 5:14; 4:7-11; 12:8). Cf Sir 29:11 f. Kindred teaching abounds in the Talm: "Alms-giving is more excellent than all offerings," is "equal to the whole law," will "deliver from the condemnation of hell," will "make one perfectly righteous," etc. "Alms-giving is a powerful parable between the Israelites and their Father in heaven; it brings the time of redemption night." (BabDhah Bataah Talm 10a).

The Roman Catholics, holding the books of Tob and Sir to be canonical, find in them proof-texts for their doctrine of almsgiving, and likewise attach great value to the gifts to the poor as atoning for sins. Protestants, by a natural reaction, have failed to hold always at its true value what was and is an important Christian duty (see Lk 12:33 AV, and of Mt 6:19-24: "Sell that ye have and give alms," etc.). It seems to have been so regarded and kept up in the Christian communities until the beginning of the 4th cent. (Apos Const II 36; Cyprian, De Offic. 27).

The teaching of Jesus on the subject is important, first, as bearing upon Jewish ideas and practices, and second, as bearing upon present-day Christian ideas and practices. It appears most conspicuously in the Sermon on the Mount. While showing what is required of the subjects of the Messianic reign, He avowedly sets forth a higher and more spiritual morality than that which was taught and practised by the scribes, Pharisees, and Sadducees. Among these, righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no wise enter into the kingdom of heaven" (Mt 5:20). There, too, He lays down the general principle embodied in the words of Mt 6:1: "Take heed that ye do not your righteousness before men, to be seen of them," and illustrates it by applying it to the three exercises most valued among the Jews (commended together in Tob 12:8), viz. almsgiving (Mt 6:2-5, prayer (v. 6-8) and giving (v. 9-13). He claims that these are the "three cardinal disciplines which the synagogue transmitted to the Christian church and the Mohammedan mosque" (cf Koran, Suras 2 40, 104; 9:54).

Jesus also taught what is forbidden in general is not publicity in performing good deeds, which is often necessary and proper, but ostentatious publicity, for the purpose of attracting attention. (The Gr conveys distinctly this idea of purpose, and the verb for "to be seen" is the one from which comes our word "theater." )

Jewish writers, as also Gr and Rom philosophers, have many notable maxims upon the beauty and importance of being unostentatious in virtue, especially in deeds of benevolence. Tob as Essenes had their treasury in a chamber of their own in the temple that both the giving and the taking should be unobserved (Mish, Shab., v.6). Rabbi Eleazar said, "Almsgiving should be done in secret and not before men, for who gives before men is a sinner, and God shall bring also the good deed before his judgment" (B.B. 9a; of Eccl 12:14).

In applying this principle to almsgiving Jesus teaches His disciple: When . . . thou dost alms, so do it in secret, and it shall be a record before the Father (Mt 6:2). The solution of this problem is given by Stier and others, and mentioned as early as Euthymius, that it was a practice among Jews for an ostentatious almsgiver literally to sound a trumpet, or cause a trumpet to be sounded before him, in public places to summon the needy, is without foundation. Simeon is also the notion, made current by the rabbis and accepted by Edermos (The Temple, etc, 26), that by "sounding a trumpet" Jesus was alluding to the trumpet-like receptacles of brass in the temple treasury. There is no proof that these were found in the synagogues, or "in the streets." "Sound a trumpet," according to the Gr commentators, and the most modern authorities, is merely a fig. expression common to many languages, for self-parade—efforts to attract notice and win applause, "Alms-giving is a powerful parable between the Israelites and their Father in heaven; it brings the time of redemption night." (BabDhah Bataah Talm 10a).

The contrast with the common practice instituted by Jesus is the significant thing: "But when thou dost alms" —"thou" is emphatic by position in the Gr—"let not thy left hand know what thy right hand doeth," etc. i.e. "So far from trumpeting your almsgiving before the public, do not even let it be known to yourself." Jesus here, Calvin well says, "silently glances at a kind of folly which prevails everywhere among men, that they think they have lost their pains if there have not been many spectators of their virtues." (The traditional saying of Mohammed, "In almsgiving, the left hand should not know what the right has given," is evidently borrowed from this saying of Jesus.) It is worthy of note that, despite popular practice, to give alms with right motives, and only to those who were worthy to receive, was a matter of special solicitude and instruction with the best among Jews as well as among Christians. The words of the Psalmist, "Blessed is he that considereth the poor," are construed to be an admonition to "take personal interest in him and not simply give him alms" (Lev. r. xxxiv). "When thou wilt deal wisely, and have regard to thy house, it is of the Lord, and he will establish thy house for ever" is mentioned (cf Prov 3:28). The saying occurs in the corresponding teaching. "The kindness displayed in the giving of alms decides the final reward of the righteous (Ps 111:4). Rabbi Eleazar was known for his unostentatious almsgiving in a way anticipated Jesus' supreme lesson, "that thine alms may be in secret: and thy Father which seeth in secret shall recompense thee" (Mt 6:4).

ALMUG, al'mug. See ALGUM.

ALNATHAN, al'na-than (Al'navoth, Alannah, "God has given," RV ELNATHAN): Apocryphal name of a person (1 Esd 8:44) corresponding to Elnathan of Ezr 8:16. He was one of the learned men summoned by Ezra, as he was beginning his journey to Jerusalem, and sent to Iddo to ask for ministers for the house of Jeh.

ALOES, al'ëz, LIGNALOES, lin-al'ëz, lig-nal'ëz (לינואס, 'al'oz, 'al'oz, אַלֹז), 'el'az, Ps 45:8; Cant 4:14; עֶלֹז, al'ëz, Jn 19:30): Mentioned as a substance for perfuming garments (Ps 45:8) and beds (Prov 7:17). In Cant 4:14, it is called "alm" (הָלָם, halam). It is most memorable use of aloes as a spice in Jn 19:30: "There came also Nicodemus, he who at the first came to him at night, bringing a mixture of myrrh and aloes, about a hundred pounds." This
was an immense quantity and if the aloes bore any large proportion to the myrrh the mixture must have been purchased at a very high cost. The most difficult mention of aloes is the earliest where (Nu 24:5,6) Balaam in his blessing on Israel exclaims—

"How goodly are thy tents, O Jacob, Thy tabernacles, O Israel! As valleys they spread forth, As gardens by the rye-side, As lilies-aloes which Jehovah hath planted, As cedar-trees beside the waters."

As the aloes in question grow in E. Asia it is difficult to see how Balaam could have come to speak of them as living trees. Post (HDB, 4:49) suggests that they may possibly have been growing at that time in the Jordan valley; this is both improbable and unnecessary. Balaam need have had no actual tree in his mind's eye but may have mentioned the aloes as a tree famed over the Orient for its preciousness. That the reference is poetical rather than literal may be supposed by the expression in the next verse "cedar-trees beside the waters"—a situation very unnatural for the high-mountain-loving cedar.

Yet another explanation is that the Heb has been altered and that בֵּית־לֵאָל, בֵּית, "terebinths" instead of בֵּית־יָרָן, ביהים, "aloes" stood in the original text.

The aloes wood of the Bible is eagleswood—so named by the Portuguese who confused the Malay name for it (aqila) with the Lat aquila, "eagle"—a product of certain trees of the N.O. Aquilariaeae, growing in S.E. Asia. The two most valued varieties are Aquilaria malaccensis and A. galaplochus—both fine spreading trees. The resin, which gives the fragrant quality to the wood, is formed almost entirely in the heart wood; logs are buried, the outer part decays while the inner part, saturated with the resin, forms the "eagle wood" or "aloes wood" of commerce; "aloes" being the same wood in a finely powdered condition. To the Arabs this wood is known as 'ud. It shows a beautiful graining and takes a high polish.

These aloes must be clearly distinguished from the well-known medicinal aloes, of ancient fame. This is a resin from Aloe socotrana, and allied species, of the N.O. Liliaceae, originally from the island of Socotra, but now from Barbadoes, the Cape of Good Hope and other places. The "American aloes" (Agave americana) which today is cultivated in many parts of Palestine, is also quite distinct from the Biblical plant.
Alphabet

THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

104

The characteristics of an alphabet are (1) the analysis of sounds into single letters rather than syllables or images, (2) the fixed order of succession in the letters, (3) the signs for the sounds, whether names or written symbols.

Of these the analysis into single letters, instead of whole words or syllables, is the characteristic element. The order of the letters may vary, as that of the Sanskrit does from the European, and yet the list remain not only alphabetic but the "same" alphabet, i.e. each sound represented by a similar name or written character. On the face of it, therefore, it might be imagined that the Egyptian and Babylonian, the Egyptian and our names for the letters of the alphabet. As with any of the Mediterranean alphabets.

The name alphabet comes from the first two letters of the Gr, alpha beta, just as the old Eng. name for the alphabet, abc or abce, is simply the first three letters of the Eng. alphabet, and thus is merely an abbreviation for the whole alphabet. It appears that the Greeks and the first and last letters of the alphabet (alpha and omega) as the Jews did the first and last, or the first, middle and last letters of their alphabet, as abbreviation for the whole and in the same sense that in Eng. one says "a to iazzard." Alpha and beta are themselves derived from the Sem names for the same letters (alaph, beth) and have no meaning in the Gr.

The question of the invention of this alphabet differs from the question of the origin of the written forms of the letters with which it is often confused, and relates to the recognition of the individual letters. Alphabetic language whether written or spoken, inward or outward, is distinguished from the pictographic, hieroglyphic, and syllabic stages by this analysis into individual sounds or letters. It begins with the picture, passes to the ideogram and syllable, and from the syllable to the letter. This is best seen in writing, but it is equally true in speech. At the letter stage the alphabet begins. It is alleged by some that another stage, a conventional writing between syllabic and alphabetic writing, should be recognized. This would deny to the Phoenician the character of a true alphabet since, as in all Sem languages, the vowels were anciently not written at all. Some go so far as to speak of it as syllabic, and on the other hand it may be said with equal pertinence that various syllabaries are nearly alphabetic. When a

Few modern questions are changing shape so rapidly as that of the historical predecessor of the Canaanite or Phoenician alphabet. For a long time it was thought that Dr. Rougé had solved the problem by tracing the letters to the Egyptian hieratic. This is the view of most of the popular literature of the present time, but it is wholly surrendered by most workers in the field now, in spite of the fact that the latest studies in hieratic show a still greater resemblance in forms (Möller, Hieratische Papyri, 1909). Winckler and others have claimed a derivation from the Canaanite, Phoenician, and the Cypriote, Sayce gets at least three letters from the Hittite, while Evans and others incline to believe that the Minoan was the direct source of the alphabet, introduced from Crete into Phoenicia by the Philistines, or at least that the two are from a common ancestor, which is also the ancestor of many other of the Mediterranean alphabets.

The Phaestos Disk, Face A.

Some, like Evans and Mosso, even suggest that, perhaps through the Minoan, the letter forms may be traced to the pictographs of the neolithic era in the caves of Europe. There is, in fact, an extraordinary resemblance between some of the letters of the Phoenician alphabet and some of the conventionalized signs of the neolithic age, and it may not be too fantastic to imagine that these early signs are the historic ancestors of the written alphabetic characters, but that they were in any sense alphabetic themselves is impossible if the invention of the alphabet was historical as here supposed, and is unlikely from any point of view.

If in fact the Phaestos disk dates from before 1600 B.C., and if Dr. Hemp's resolution of it into another source or stock of characters from which the inventor of the alphabet may have chosen (Harper's Magazine, January, 1911), the ideal written alphabet contains a separate character for each sound used in any or every language. Practically in most languages

5. Number the alphabet falls a good deal short of the number of recognized sounds to be expressed in that language and in pronunciation dictionaries they have to be analyzed into a broad, short, open, etc., by adding diacritical marks. In educated English without regarding finer distinctions (Edmonds, Comparative Philology, 45) about 50 sounds are commonly used, but Murray distinguishes at least 96, and the number sometimes used or which may be used is much greater,

**HABETS**
the possible number of vowel sounds alone being as many as 72.

Moreover the individual letters differ in sound in different individuals, and even in the same individual in successive utterances of what would be called the same letter or the same sound. It is alleged that the average sound of the a for example, is never the same in any two languages; the a in ‘father’, even, is never the same in any two individuals, and that the same individual, even, never pronounces it twice so exactly in the same fashion that the difference may not be detected by sound photography.

The written alphabet is always thus less than the number of sounds used. The Phoen and the Sem alphabets generally had 22 letters, but they omitted the vowels. English has 26, of which many have two or more sounds.

The names of the Gr alphabet are derived from the Sem names and are meaningless in the Gr, while in the Sem it has been properly ‘aleph, the ox.’ The forms of the letters are apparently derived from pictures of the ox, house, etc., made linear and finally reduced to a purely conventional sign which was itself reduced to the simplest writing motion. All this has been boldly denied by Mr. Pilcher (PSBA, XXVI [1904], 168-73; XXVII [1905], 65-68), and the original forms declared to be geometric; but he does not seem to have made many converts, although he has started up rival claimants to his invention.

The names of the letters at least seem to indicate the Sem origin of the alphabet, since the majority of them are the Sem names for the objects which gave name to the letter, and the picture of which gives form to the written letter.

Following is Sayce’s list (PSBA, XXXII [1910], 215-22) with some variants: (1) ‘aleph = ox; (2) beth = house (tent); (3) gimel = camel; (4) daleth = door; (5) he = house; (6) tav = nail (Evans, tent peg); (7) zayin = weapon; (8) beth = fence; (9) tet = cake of bread (Lidzbarski, a package); (10) yodh = hand; (11) kaph = palm of hand; (12) lamedh = ox-goad; (13) mem = water flowing; (14) nun = fish; (15) samekh = 7; (16) ayin = eye; (17) pe = mouth; (18) qadsh = trap (doors, hook or nose or steps); (19) lamedh = cage (Evans says picture is an outline head and Lidzbarski, a helmet); (20) resh = head; (21) shin = tooth (not teeth); (22) tav = mark. Not all of these meanings are, however, generally accepted (cf also Nöldeke, Beiträge Strassb. [1918], 124-36; Lidzbarski, Ephemeris, II, 125-39).

The order of the letters differs more or less in different languages, but it is in the main the same in all the Sem and Western alphabets derived from the Phoen alphabet and in the Indian languages the letters are entirely regrouped on a different principle.

The conventional order of the Semitic alphabet may be traced with some certainty in the Biblical books to as early as the 6th cent. BC, even accepting the dates of a radical higher criticism, for there are more than a dozen passages in the OT composed on this order. In the alphabetical acrostic (Psa 111, 112, 119; Prov 31 10-31; Lam 1, 2, 3, 4, etc) and the oldest of these are of this period (see Acrostic). The Formello abecedarium, if it is in fact from the 7th cent. BC, carries the known order back a century further still and shows it prevailing in Italy as well as Pal. Moreover there are those who still consider some of the alphabetical psalms older even than this.

It must be noted, however, that while the order is in general fixed, there are local and temporary differences. In several cases e.g. the order of the sixteenth and seventeenth letters of the alphabet is inverted in the alphabetical acrostics, and this would seem to point to a time or place where pe, again, was the accepted order. It happens that the inversion occurs in both the passages which are counted earliest by the modern critics (G. B. Gray in HDB, 8). Mr. Sayce too has recently altered or restored the order by re-legending the original gamelkh to a place after aksin, while Mr. Pilcher has quite reconstructed the original order on a geometrical basis, to his own taste at least, as brd; hag; mnl; sat.

A certain grouping together of signs according to the relationship of the objects which they represent has often been noticed, and Sayce (PSBA, XXXII [1910], 215-22) thinks that he has (after having put galsh in its right place) reduced the whole matter to a sequence of pairs of things which belong together: ox-house, camel-tent door, house-nail, weapon-fence (city wall), bread-hand, open hand-arm with good, water-fish, eye-mouth, trap-cage, head-tooth, samekh, tav. This arranging he thinks was done by someone who knew that ‘aleph was the West Sem for ‘leader’ and tav was the Cretan sign for ending—an Amorite therefore in touch with the Phil. The final word on order seems not yet to have been spoken.

The chief North Sem texts are (1) Moabite stone (cir 850 BC); (2) inscriptions of Zikr, Zen jir in, etc (cir 800); (3) Baal-Lebanon inscription (cir 750); (4) So loan inscription (cir 700 BC); (5) Harvard tablet; (6) Gezer tablet; (7) various weights and seals before 600 BC. The striking fact about the earliest inscriptions is that however remote geographically, there is on the whole so little difference in the forms of the letters. This

is particularly true of the North Sem inscriptions and tends to the inference that the invention was after all not so long before the surviving inscriptions. While the total amount of the pre-Mosaic Pal inscriptions is not even yet very large, the recent discovery of the Sam ostraca, the Gezer tablet, and various minor inscriptions, is at least pointing to a general use of Sem writing in Pal at least as early as the 9th cent. B.C.

The tendency of letters to change form in consequence of changed environment is not peculiar to alphabetical writing but is characteristic of the transmission of all forms of writing. The morphology of alphabetical writing has however its own history. The best source for studying this on the Sem side is Litzbarski's Handbuch (see below), and on the Gr side the best first source is E. S. Roberts, Intro to Gr Epigraphy (Cambr.). The best synoptical statement of the Sem is found in the admirable tables in the Jew Enc, V, i, 449-53.

For the later evolution of both Gr and Lat alphabets, M. Pfister's introduction to Greek and Latin Palaeography, Oxford, 1912, is far the best introduction. In this he takes account of the great finds of papyri which have so revolutionized the study of the forms of Greek letters around the beginning of the Christian era, since his first handbook was published. (See articles on the text of OT and NT.)

In the Heb, the old Phoen alphabet of the early inscriptions had in the NT times given way to the smaller Aram characters of the modern Heb which possibly came into use as early as the time of Ezra.

The most comprehensive modern brief compendium covering both Heb and Gr is that reproduced in this art, from the little manual of Specht. See also Writing.

LITERATURE.—Isaac Taylor's Alphabet (2d ed., 1899) is still useful for orientation, and his article in the HDB likewise, but Edward Clodd's little Story of the Alphabet (New York, 1907), taken with Paulmann's Geschichte der Schrift and Buch der Schrift, is better for general purposes. For scientific purposes see the bibliography prefixed to Litzbarski's Handbuch der nordischen Epigraphik (1908, 2 vols) and his Ephemeris passim to date, Evans' Scripta minora. Oxf., 1909, and the lit. of the art. Writing in this Encyclopaedia. See also C. G. Ball, "Origin of the Phoen Alphabet," P.S.B.A., XV, 392-408; E. J. Pucher, "The Origin of the Alphabet," P.S.B.A., XXVI (1904), 168-73; Franz Praetorius, "The Origin of the Phoenician Alphabet," Smithsonian Rep. (1907), 595-604; S. A. Cook, "The Old Hebrew Alphabet and Its Genres," U.T.J., XXIII, 298-300. For Heb Bible class work, H. N. Skinner's Story of the Letters and Figures (Chicago, 1905) is very admirably adapted to the purpose.

E. C. RICHARDSON

ALPHAESUS, al-fé’sús ("Alphäus, Alphäos; WH, Αλφαής, Χαλφαής): (1) The father of the second James in the list of the apostles (Mt 10 3; Mk 3 18; Lk 6 15; Acts 1 19). (2) The father of Levi, the publican (Mk 2 14). Levi is designated as Matthew in the Gospel of Mt. (9 9). There is no other reference to this Alpheus.

Some writers, notably Weiss, identify the father of Levi with the father of the second James. He says that James and Levi were undoubtedly brothers; but that seems improbable. If they were brothers they would quite likely be associated as are James and John, Andrew and Peter. CHrysostom says James and Levi had both been tax-gatherers before they became followers of Jesus. This tradition would not lend much weight as proof that they were brothers, for it might arise through identifying the two names, and the western MSS do identify them as being a brother of Levi, not of James. In Mk 2 14. This, however, is undoubtedly a corruption of the text. If it had been the original it would be difficult to explain the substitution of an unknown Levi for James who is well known.

Many writers identify Alpheus, the father of the second James, with Clopas of Jn 19 25. This had early become a tradition, and Chrysostom believed they were the same person. This identity rests on four suppositions, all of which are doubtful: (a) That the Mary of Clopas was the same as the Mary who was the mother of the second James. There is a difference of opinion as to whether "Mary of Clopas" should be understood to be the wife of Clopas or the daughter of Clopas, but the former is more probable. We know from Mt 27 56 and Mk 15 40 that there was a James who was the son of Mary, and that this Mary belonged to that little group of women that was near Jesus at the time of the crucifixion. It is quite likely that this Mary is the one referred to in Jn 19 25. 'That would make James, the son of Mary of Mt 27 56, the son of Mary of Clopas. But Mary was such a common name in the NT that this supposition cannot be proven. (b) That the James, who was the son of Mary, was the same person as the James, the son of Alpheus. The supposition under (a), this would not prove the identity of Clopas and Alpheus unless this supposition can also be proven, but it seems impossible to either prove or disprove it. (c) That Alpheus and Clopas are different variations of a common original, and that the variation has arisen from different pronunciations of the first letter θ (θ) of the Aram. original. There are good scholars who both support and deny this theory. (d) That Clopas had two names as was common at that time; but there is nothing to either substantiate or disprove this theory. See Clopas.

It seems impossible to determine absolutely whether or not Alpheus, the father of the second James, and Clopas of Jn 19 25 are the same person, but it is quite probable that they are.

ALSO, ὀλίθιος; In the Gr καυθός, καύζο, when it is intrans. to "also" or "even," it is always placed before the word or phrase which it is intended to emphasize (e.g. Acts 12 3; 1 Jn 4 21). Mt 6 14 should therefore read, "Your heavenly Father will forgive you also"; Lk 6 3, "Whom also he named apostles"; He 3 4, "The Master of a house"; and 1 Thess 4 14, 'If we believe that Jesus died and rose again, so also [we believe that] those who are fallen asleep in Jesus, God will bring with Him.'

ALTANEUS, al-ta-né’ús. See MALTANNEUS (Apost).

The classification of Hebrew altars.—Before considering the Biblical texts attention must be drawn to the fact that these texts know of at least two kinds of altars which were so different in appearance that no contemporary could possibly confuse them. The first was an altar consisting of earth or unhewn stones. It had no fixed shape, but varied with the

**FIG. 1.—Cairn Altar.**

materials. It might consist of a rock (Jgs 13 19) or a single large stone (1 S 14 33-35) or again a number of stones (1 K 18 31 f). It could have no horns, for it would be impossible to give the stone horns without hewing it, nor would a heap of earth lend itself to the formation of horns. It could have no regular pattern for the same reason. On the other hand we meet with a group of passages that refer to altars of quite a different type. We read of horns, of fixed measurements, of a particular pattern, of bronze as the material. To bring home the difference more rapidly illustrations of the two types are given side by side. The first figure represents a cairn altar such as was in use in some other ancient religions. The second is a conjectural restoration of Heb altars of burnt offering and incense of the second kind.

Both these might be and were called altars, but it is so evident that this common designation could not have caused any eye-witness to confuse the two that in reading the Bible we must carefully examine each text in turn and see to which kind the author is referring. Endless confusion has been caused, even in our own time, by the failure to note this distinction, and the reader can hope to make sense of the Biblical laws and narratives only if he be very careful to picture to himself in every case the exact object to which his text refers.

For the sake of clearness different terms will be adopted in this article to denote the two kinds of altars. The first will be termed “lay altars” since, as will be seen, the Law permitted any layman to offer certain sacrifices at an altar of earth or unhewn stone without the assistance of a priest, while the second will be styled “horned altars,” owing to their possession of horns which, as already pointed out, could not exist in a lay altar that conformed with the provisions of the law.

**II. Lay Altars.**—In Gen we often read of the erection of altars, e.g. 8 20; 12 7; 13 4. Though no details are given we are able to infer their general character with considerable precision. In reading the accounts it is sometimes evident that we are dealing with some rough improvised structure. For example, when Abraham builds the altar for

**FIG. 2.—Altar of Burnt Offering and Altar of Incense.**

the sacrifice of Isaac in Gen 22 it cannot be supposed that he used metal or wrought stone. When Jacob makes a covenant with Laban a heap of stones is thrown up “and they did eat there by the heap” (31 46). This heap is not expressly termed an altar, but if this covenant be compared with later covenants it will be seen that in these its place is taken by an altar of the lay type (*SBL*, ch 2), and it is reasonable to suppose that this heap was in fact used as an altar (cf. ver 54). A further consideration is provided by the fact that the Arabs had a custom of using any stone as an altar for the nonce, and certainly such altars are found in the Mosaic and post-Mosaic history. We may therefore feel sure that the altars of Gen were of the general type represented by Fig. 1 and were totally unlike the altars of Fig. 2.

Thus Moses found a custom by which the Israelite threw up rude altars of the materials most easily obtained in the field and offered sacrificial worship to God on sundry occasions. That the custom was not peculiar to the Israelites is shown by such instances as that of Balaam (Nu 23 1, etc). Probably we may take the narrative...
of Jethro’s sacrifice as a fair example of the occasions on which such altars were used, for it cannot be supposed that Aaron and all the elders of Israel were openly committing an unlawful act when they ate bread with Moses’ father-in-law before God (Ex 18 12). Again, the narrative in which we see Moses building an altar for the purposes of a covenant probably exemplifies a custom that was in use for other covenants that did not fail to be narrated (Ex 34 4 ff).

But a custom of erecting altars might easily lend itself to abuses. Thus archaeology has shown us one altar—though of a much later date—which is adorned with faces of the (Fig. 4), a practice that was quite contrary to the Mosaic ideas of preserving a perfectly imageless worship.

Other possible abuses were suggested by the current practices of the Canaanites or are explained by the terms of the laws. See HIGH PLACE.

III. HORNS OF ALTARS OF BURNT OFFERING.—In Ex 27 1–8 (cf 38 1–7) a command is given to construct for the Tabernacle an altar of shittim wood covered with bronze. It was to be five cubits long by five broad and three high. The four corners were to have horns of one piece with it. A network of bronze was to reach halfway up the altar to a ledge. In some way that is defined only by reference to what was shown to Moses in the Mount the altar was to be hollow with planks, and it was to be equipped with rings and staves for facility of transport. The precise construction cannot be ascertained, and it is impossible to speculate where the instructions are so plainly governed by what was seen by Moses in the Mount; but certain features that are important for the elucidation of the Biblical texts emerge clearly. The altar is rectangular presenting at the top a square surface with horns at the four corners. The more important material used is bronze, and the whole construction was as unlike that of the ordinary lay altar as possible. The use of this altar in the ritual of the Tabernacle falls under the heading SACRIFICES. Here we must notice that it was served by priests. Whenever we find references to the horns of an altar or to its pattern we see that the writer is speaking of an altar of this general type. Thus a criminal seeking asylum fled to an altar of this type, as appears from the horns which are mentioned in the two historical instances and also from such expressions as coming down or going up. See ASYLUM.

We read in Josh 22 9 ff that the children of Reuben and the children of Gad built an altar. In ver 28 we find them saying, “Behold the pattern of the altar,” etc. This is decisive as to the meaning of altar. Josh 22 for the lay altar. Accordingly in its general shape this altar must have conformed to the type of the Tabernacle altar. It was probably not made of the same materials, for the word “build” is continually used in connection with it, and this word would scarcely be appropriate for working metal; nor again was it necessarily of the same size, but it was of the same pattern: and it was designed to serve as a witness that the descendants of the men who built it had a portion in the Lord. It seems to follow that the pattern of the Tabernacle altar was distinctive and unlike the heathen altars in general use in Palestine and this appears to be confirmed by modern excavations which have revealed high places with altars quite unlike those contemplated by the Pent. See HIGH PLACE.

In the subsequent history till the erection of Solomon’s Temple attention need only be directed to the fact that a horned altar existed when the Ark was still housed in a tent. This is important for several reasons. It shows a historical period in which a horned altar existed at the religious capital side by side with a number of lay altars all over the country, and it negatives the
suggestion of C. A. Smith (Jerusalem, II, 64) that the bare rock es-Sakhra was used by Solomon as the altar, since the unhewn rock obviously could not provide a horned altar such as we find as early as 1 K 1 60–53. Note too that we read here of bringing down from the altar, and this expression implies elevation. Further in 9 25 we hear that Solomon was in the habit of

4. The Horned Altar in Use 1 K 1 60–53. Note too that we read here of bringing down from the altar, and this expression implies elevation. Further in 9 25 we hear that Solomon was in the habit of

offering on the altar which he had built, and this again proves that he had built an altar and did not merely use the temple rock. (See also Watson in PEFQ [January, 1930], 13 ff, in reply to Smith.)

For the reason just given it is certain that Solomon used an altar of the horned type, but we have no account of the construction in K.

5. The Temple of Solomon According to a note preserved in the LXX but not in the Heb, Solomon enlarged the altar erected by David on Araunah’s threshing-floor (2 S 24 25), but this notice is of very doubtful historical value and may be merely a glossator’s guess. According to 2 Ch 4 1 the altar was made of bronze and was twenty cubits by twenty by ten. The Chronicler’s dimensions are doubted by many, but the statement of the material is confirmed by 1 K 8 64; 2 K 16 10–15. From the latter passage it appears that an altar of bronze had been in use till the time of Ahaz. This king saw an altar in Damascus of a different pattern and had a great altar made for the temple on its model. As the text contrasts the great altar with the altar of bronze, we may infer that the altar of Ahaz was not made of bronze. Whether either or both of these altars had steps (cf Ezk 43 17) or were approached by a slope as in Fig. 2 cannot be determined with certainty. It may be noted that in Isa 27 9 we read of the stones of the altar in a passage the reference of which is uncertain.

Ezekiel also gives a description of an altar (43 13–17), but there is nothing to show whether it is purely ideal or represents the altar of Solomon or that of Ahaz, and modern writers take different views. In the vision it stood before the house (40 47). In addition he describes an altar or table of wood (41 22). This of course could only be a table, not in any sense an altar. See TABLE.

Exz 3 4 tells of the setting up of the altar by Zerubbabel and his contemporaries. No information as to its shape, etc, can be extracted from this notice. We read of a defilement of the temple altar in 1 Mace 1 54. This was made of stones (Ex 20 24–26 having at this date been applied to the temple altar contrary to its original intent) and a fresh altar of whole stones was constructed (1 Mace 4 44–49). Presumably this altar had no horns.

It is clear from the historical and prophetic books that in both kingdoms a number of unlawful altars were in use. The distinction which has been drawn between lay altars and horned altars helps to make these passages easy to understand. Thus when Amos in speaking of Bethel writes, “The horns of the altar shall be cut off,” we see that he is not thinking of lay altars which could have no horns (3 14). Again Hosea’s “Because Ephraim hath multiplied altars ‘to sin,’ altars have been to him ‘for sin’” (8 11; cf 10 1–8; 12 11 [12]), is not in contradiction to Ex 20 24–26 because the prophet is not speaking of lay altars. The high places of Jeroboam (1 K 12 28–33) were clearly unlawful and their altars were unlawful altars of the horned type. Such cases must be clearly distinguished from the lay altars of Saul and others.

The origin of the horns is unknown, though there are many theories. Fugitives caught in the hold of them (1 K 1 50–61), and victims could be tied to them (Ps 118 9–10). The horns of the altar were also set in the ark.

IV. Altars of Incense—Ex 30 1–10 contains the commands for the construction and use of an altar of incense. The material was shittim wood, the dimensions one cubit by one by two, and it also had horns. Its top and sides were overlaid with gold and it was surrounded by a crown or rim of gold. For facility of transport it had golden rings and staves. It stood before the veil in front of the ark.

Solomon also constructed an altar of incense (1 K 6 20; 7 48; 1 Ch 28 18), cedar replacing shittim wood. The altar of incense reappears in 1 Mace 1 21; 4 49.

V. Recent Archaeological Materials.—Recently several altars have been revealed by excavations. They throw light on the Bible chiefly by showing what is forbidden. See esp. HIGH PLACE. Fig. 8
represents an altar found at Gezer built into the foundation of a wall dating about 600 BC. Mr. Andrews describes it in the following words: "It is a four-sided block of Altar limestone, 1 ft. 3 in. high. The top and bottom are approximately 10\(\frac{1}{2}\) and 9 in. square respectively; but these are only the average dimensions of sides which are not regularly cut. The angles are prolonged upward for an additional 1\(\frac{1}{2}\) in. as rounded knobs—no doubt the 'horn' of the altar. The top is very slightly concave so as to hold perhaps an eighth of a pint of liquid. (July 1910). This site suggests an altar of incense rather than an altar of burnt-offering, but in view of the general resemblance between the Tabernacle altars of burnt offering and incense, this is a fact of minor importance. On the other hand, the shape, pattern and material are of great interest. That the altar violates a principle the law of Ex 20:25 forbidding the dressing of the stones is obvious, though that passage does not apply in terms to altars of incense, but certainly the appearance of the block does recall in a general way the altars of the other type, the horned altars. Like them it is four-sided with a square top, and like them it has knobs or horns at each corner. Possibly it was formed in general imitation of the Temple altars. In this respect, its uniqueness is heightened by their appearance the practices prohibited by the Pent. See for illustrations H. Vincent, Canaan d'après l'exploration récente; R. Kittel, Studien zur hebräischen Archäologie und Religions-Geschichte; S. R. Driver, Modern Research as Illustrating the Bible.

I. In Worship: Tabernacle and Temples. - In the literature of the Bible, sacrifices are prior to altars and altars prior to sacred buildings. Their first mention is in the case of the altar built by Noah (Gen 8:20). The next is the altar built at the place of Shechem, by Joshua, Abrahals, in consecration, on behalf of his descendants, of the whole land of Canaan (Gen 12:7). A second altar was built between Bethel and Ai (ver 8). This altar was not that of the patriarch returned on his way from Egypt (Gen 12:3). His place of sacrifice was on the mountain of Bethel (ver 18); and tradition still professes to show the place where his altar stood. A subsequent altar was built on the top of a mountain in the land of Moriah for the sacrifice of Isaac (Gen 22:9).

Each of these four spots was the scene of some special revelation of Jehovah; possibly to the third of them (Hebron) we may attribute their possession largely determined its history. To them Isaac added an altar at Beersheba (Gen 26:25), probably a reformation, on the same site, of an altar built by Abraham, whose home for many years was at Beersheba. Jacob built an altar here but again and again repaired those at Shechem and Bethel. On one occasion he offered a sacrifice on one of the mountains of Gilead, but without mention of an altar (Gen 31:44). There were thus four of these spots in Canaan associated at once with the worship of Jehovah, and the name of their great ancestor, which to Hebrews did not lose their sanctity by the passage of time, viz. Shechem, Bethel, Hebron, Moriah and Beersheba.

The earliest provision for an altar portion of a fixed establishment of religion is found in Ex 20:24-26, immediately after the prohibition of the Decalogue. Altars are Tabernacle commanded to be made of earth or Altars of unhewn stone, yet so as not have, not steps, but only slopes for ascent to the same—the injunction implying that they stood on some elevation (see ALTAR, A, above). Before the arrival at Sinai, during the war with Amalek, Moses had built an altar which he gave the name Jehovah-Nissi (Ex 17:15). This was probably only a memorial altar (cf the altar Ed in Josh 22:21 ff). At Sinai took place the great crisis in Israel's national history. It was required that covenant about to be made with Jehovah should be ratified with sacrificial blood; but before Moses could sprinkle the Book of the Covenant and the people who covenanted (Ex 24:6-7; cf He 9 19), it was necessary that an altar should be built for the sacrificial act. This was done "under the mount," where, beside the altar, were reared twelve pillars, emblematic of the twelve tribes of Israel (ver 4).

In connection with the tabernacle and the successive temples there were two altars—the Altar of Burnt Offering (the altar by prominence, Ex 43:13), and the Altar of Incense. Of these it now necessary to speak more particularly.

II. The Altar of Burnt Offering (הָלָה הַנִּבְנָא, mizbah hā-nibna‘). The Brazen Altar (הָלָה הַנִּבְנָא, mizbah hā-nibna‘).—

1. Altar be— (By "brass" throughout understand the "altar bronzite"). The altar which stood before the tabernacle was a portable box constructed of acacia wood and covered with the outside of plates of brass (Ex 27:1 ff). "Hollow with planks," is its definition
(ver 8). It was five cubits long, five cubits broad, and three cubits high; on the ordinary reckoning, about 7½ ft. on the horizontal square, and 4½ ft. in height (possibly less; see Curr). On the "grating of network of brass" described as around and half-way up the altar (vs 4-5), see GRATING. Into the corners of the Altar, a "drain off" was riveted, into which the staves were inserted by which the Ark was borne (see STAVES). For its corner projections, see HORNs OF THE ALTAR. The prohibition of steps in Ex 30 20 and the analogy of later altars suggest that the small altar before the tabernacle was made to stand on a base or platform, led up by to a slope of earth. The right of sanctuary is mentioned in Ex 21 14. For the utensils connected with the altar, see PANS; SHOVELS; BASINS; FLINT-HOOKS; CENSERS. All these utensils were made of brass.

The history of the altar before the tabernacle was that of the tabernacle itself, as the two were not parted during its continuance (see History Tabernacle). Their abolition did not take place until Solomon's temple was ready for use, when the great high place at Gibeon (1 K 3 4) was dismantled, and the tabernacle and its holy vessels were brought to the new temple (8-4). Another altar had meanwhile been made by David on the threshing floor of Ophel, and had been on the Ark of the Covenant was moved (1 Ch 16 1; 16 1). This would be a duplicate of that at Gibeon, and would share its supersession at the erection of the first temple.

In Solomon's temple the altar was considerably enlarged, as was to be expected from the greater size of the building before which it stood. We are indebted to the Solomon's for this purpose being that of "a square of twenty cubits, with an elevation of ten cubits (30×30×15 ft.; or somewhat less). It is described as "an altar of brass" (2 Ch 4 1), or "brass altar" (1 K 8 64; 2 Ch 7 7; cf K 16 14), either as being, like its predecessors, ensheathed in brass, or, as others think, made wholly of brass. It was not meant to be portable, but that the altar itself was movable is shown by the fact of Ahaz having it removed (2 K 16 14). Further details of its structure are not given. The altar stood in "the middle of the court that was before the house," but proved too small to receive the gifts on the day of the temple's dedication (1 K 8 65; 2 Ch 7 7). It remained, however, the center of Israel's worship for centuries, till Ahaz removed it from the forefront of the house, and placed it on the northern side of his Domasene altar (2 K 16 14). This indignity was repaired by Hecalekah (cf 2 K 18), and the altar assumed its old place in the temple service till its destruction by Nebuchadnezzar in 586 BC.

The altar of Ezekiel's ideal temple was, as planned, a more elaborate structure, the cubit used for this purpose being that of "a square of cubit and an handbreadth" (Ezk 43 13), or the large cube of history (see Temple Curr). The paragraph describing it (43 13-17) is very specific, though uncertainty rests on the meaning of some of the details. The altar consisted of four stages lying one above another, gradually diminishing in scale till the heath was raised upon which the fire was lit. This was a square of twelve cubits (18 ft.), from the corners of which 4 steps projected upward. The base or lowest stage was one cubit in height, and had a border round about, half a cubit high (ver 13); the remaining stages were two, four, and four cubits high respectively (vs 14, 15); the horns may have measured another cubit (thus LXX). Each stage was marked by the inlet of one cubit (vs 13, 14). The basement was thus, apparently, a square of eighteen cubits or 27 ft. The word "bottom" (lit. "bosom") in Ezekiel's description is variously interpreted, some regarding it as a "drain off," others identifying it with the "basement." On its eastern face the altar had steps looking toward the east (ver 17)—a departure from the earlier practice (for the reason of this, cf Perowne's art. "Altar" in IDB).

Of the altar of the second temple no measurements are given. It is told only that it was built prior to the temple, and was set upon its base (Ezr 3 3), presumably on the Sakhra stone—the ancient site.

In Herod's temple a difficulty is found in harmonizing the accounts of the Mish and Jos as to the size of the altar. The latter gives it as a square of fifty cubits (I Jer 4 2), while the Mish, one of one cubit, and three of five cubits in height, the topmost stage measuring twenty-six cubits square, or, with deduction of a cubit for the officiating priests, twenty-four cubits. Jos, on the other hand, gives the height at fifteen cubits, as before, and had 4 horns. Both Jos and the Mish state that the altar was built of unhewn stones. The ascent, thirty-two cubits long and sixteen broad, likewise of unhewn stone, was on the south side. See further, THURS, HEROD'S. It is of this altar that the words were spoken, "Leave there thy gift before the altar, and go thy way, first be reconciled to thy brother, and then come and offer thy gift" (Mt 6 24).

III. The Altar of Incense (חֶסֶד הָעַלּ, mizbah ha-‘al‘alah), Golden Altar (מִזְבַּח נָסִים, mizbah ha-nasîm). This was a portable table of acacia overlaid with gold, the upper surface of which was a square of one cubit, and its height two cubits, with an elevated corner or crown around its top (Ex 30 2 28). Like the great altar of burnt offering, it was in the category of "most holy" things (Ex 30 10); a distinction which gave it a right to a place in the inner room of the cella or holy of holies. Hence, in Ex 1 K 6 22, it is said to "belong to the oracle," and in He 9 4 that the chamber is said to have the "altar of incense." It did not, however, actually stand there, but in the outer chamber, "before the veil" (Ex 40 25). The reason for this departure from the strict rule of temple ritual was that sweet incense was to be burnt daily upon it at the officiating of every daily sacrifice, the lamps being then lit and extinguished (cf Nu 28 3; Ex 30 7,8), so that a cloud of smoke might fill the inner chamber at the moment when the sacrifice's blood was sprinkled (see MANUAL OF PRAYERS). The burnt incense within the veil would have required repeated entries into the holy of holies, which entries were forbidden (Lev 16 2). The altar stood immediately without the veil, and the smoke of the incense burnt upon it entered the inner chamber on the openings above the veil.
For the material construction which admitted of this, see Holy Place.

For other uses of the altar of incense see horns of the altar, where it is shown that at the time of the offerings of special sin offerings and on the day of the annual fast its horns were sprinkled with blood. But it will be noted that these uses were its only uses, as neither meat offerings might be laid upon it, nor libations of drink offerings poured thereon (Ex 30 9). The Talmud, or standing sacrificing for Israel, was a whole burnt offering of a lamb offered twice daily with its meal offering, accompanied with a service of incense.

It is probable that the censors in use at the time of the construction of this altar and after were in shape like a spoon or ladle (see Table ofシェーグラート). which, when filled with live coals from the great altar, were carried within the sanctuary and laid upon the altar of incense (Lev 16 12). The incense-sticks, broken small, were then placed upon the coals. The narrative of the deaths of Aaron's sons, Nadab and Abihu, is thus made intelligible, the fire in their censers not having been taken from the great altar.

The original small altar made by Moses was superseded by one made of Solomon for use in the temple. This altar was made of cedar wood, overlaid with gold (1 K 6 20 22; 7 48; 9 25; 2 Ch 4 19). Solomon's temple and this was among "all the vessels of gold and silver," which Nebuchadnezzar took to Babylon (2 Ch 36 18). As a consequence, when Ezekiel drew plans for a new temple, he gave it an incense altar made wholly of wood and of larger dimensions than before (Ezk 41 22). It had a height of three cubits and a top of two cubits square. There was an incense altar likewise in the second temple. It was this altar, probably plated with gold, which Antiochus Epiphanes removed (1 Macc 4 21), and which was restored by Judas Maccabeus (1 Macc 4 40). (On critical doubts as to the existence of the golden altar in the first and second temples, cf POT, 323.)

That the Herodian temple also had its altar of incense we know from the incident of Zacharias having a vision there of "an angel . . . standing on the right side of the altar of incense" when he went into the temple of the Lord to burn incense (Lk 1 11).

Narration of such an altar appears on the arch of Titus, though it is mentioned by Jos (BJ, V, v, 5). It was probably melted down by John during the course of the siege (V, xiii, 6).

In the apocalypse of John, no temple was in the restored heaven and earth (Rev 21 22), but in the earlier part of the vision was a temple (Rev 14 17; 15 6) with an altar and a censer (8 3). It is described as "the golden altar which was before the throne", and, with the smoke of its incense, there went up before God the prayers of the saints. This imagery is in harmony with the statement of Lk that as the priests burnt incense, "the whole multitude of the people were praying without at the hour of incense" (1 10). Both history and prophecy thus attest the abiding truth that salvation is by sacrificial blood, and is made available to men through the prayers of saints and sinners offered by a great High Priest.

AL-TASHHETH, al-tash'eth, AL-TASCHITH, al-tas' kith. See Psalms; Song.

ALTOGETHER, ôl-tô-geth-ér: Representing five Heb and three Gr originals, which variously signify (1) "together"; i.e. all, e.g. 'all men, high and low, weighed together in God's balance are lighter than vanity" (Ps 63 9); so also 53 3; Jer 10 8. (2) "all": so RV, Isa 10 8: "Are not my princes all of them kings?" (3) "with one accord have broken the yoke": so RV, Jer 5 4. (4) "completely": "entirely": "so as not to destroy him altogether" (2 Ch 12 12; cf of Gen 18 21; Ex 11 1; Ps 39 5; Jer 30 11 AV; cf RV). (5) "wholly": "altogether born in sins." In 9 34. (6) In 1 Cor 5 10 RV rendered "at all"; 1 Cor 9 10 "assuredly." (7) A passage of classic difficulty to translators is Acts 26 29, where "altogether" in RV is rendered "with much," Gr en megaló (en polló). See Almost. Many of the instances where "altogether" occurs in AV become "together" in RV. Used as an adj. in Ps 39 5 ("altogether vanity").

Dwight M. Pratt

ALUSH, a'tush (אַתֹשִׁךְ, 'dathah): A desert camp of the Israelites between Dophkah and Rephidim (Nu 33 13 14). The situation is not certainly known. See Wanderings of Israel.

ALVAH, al'va (אַולָה, 'alôa'h): A chief (AV duke) of Edom (Gen 36 40), called "Alalah" in 1 Ch 1 51. Probably the son of Alav or Alan, son of Shobal son of Seir (Gen 36 23; 1 Ch 1 40).

ALVAN, al'van (אַולָן, 'alôân, "tall"): A son of Shobal, the Horite (Gen 36 23). In 1 Ch 1 40 the name is written Alvan, LXX Óλαν. It is probably the same as Alvah of Gen 36 23, which appears in 1 Ch 1 51 as Aliah.

ALWAY, ol'wâ (archaic and poetic); ALWAYS, ol'wâ: Properly applied to acts or states perpetually occurring, but not necessarily continuous. In Heb, most frequently, עָלָא, təma'dh. In Gr ἀλάνω, dîa panôtis, ordinarily expresses continuity. In Mt 28 20 "always," AV, RV "allways," tr Gr πάντα τὰς ἡμέρας, "all the days" corresponding to the Heb idiom similarly rendered in Dt 5 29; 6 24; 11 1; 28 33; 1 K 11 36, etc. Gr αἰών in Acts 7 51; 2 Cor 6 10; 1 Pet 3 15, means "at every and any time."

AMAD, a'mad (עָמָד, 'amâd): A town in northern Pal, which fell to the tribe of Asher in the division of the land (Josh 19 26). The modern ruin 'Ammâr near Accho may be the site.

AMADATHA, a-mad'a-tha, AMADATHUS, a-mad'a-thus (Ad Est 12 6). See AMAN; HAMMADATHA.

AMAIN, a-main (from the Gr εἰς πνεῦμα ὅρμησαι, εἰς πνεῦμα ἴμμεναν, "they rushed to flight"): The word is composed of the prefix "εἰς" and the word "main," meaning "force." The expression is used by Milton, Parker, et al., in 9th cent. lit. found only in 2 Macc 12 22 where it is used to describe the flight of Timotheus and his army after he suffered defeat at the hands of Judas Maccabeus ("They fled amin," i.e. violently and suddenly).

AMAL, a'mal (עָמָל, 'amâl, "toiler"): A son of Helam of the tribe of Asher (1 Ch 7 35).

AMAŁEK, am'a-lek (עַמָּלָכָה, 'amâlêkâh): The son, by his concubine Timna, of Ediphas, the eldest son of Esau. He was one of the chiefs (AV dukes) of Edom (Gen 36 12 16). See AMALEKITE.

AMAŁEK, am'a-lek, AMALEKITE, a-mal'e-kit, am'a-lek-it (עַמָּלָכָה, 'amâlêk, עָמָלֶק, 'amâlêk): A tribe dwelling originally in the region south of
Judah, the wilderness of et-Tih where the Israelites came into conflict with them. They were nomads as a people dwelling in that tract would naturally be. When they joined the Midianites to invade Israel, they came "with their cattle and their tents" (Jgs 6:3–5). They are mentioned among the descendants of Esau (Gen 36:12–16) because they are mentioned earlier, in the account of the invasion of Chedorlaomer (Gen 14:7) and in Balaam's prophecy (Nu 24:20) A. is called "the first of the nations," which seems to refer to an early existence. We are uncertain of their origin, for they do not appear in the list of nations found in Gen 10. They do not seem to have had any relationship with the tribes of Israel, save as, we may suppose, some of the descendants of Esau were incorporated into the tribe. It is probable that they were of Sem stock though we have no proof of it.

The first contact with Israel was at Rephidim, in the wilderness of Sinai, where they made an unprovoked attack and were defeated after a desperate conflict (Ex 17:8–13; Dt 25:17–18). On account of this they were placed under the ban and Israel was commanded to exterminate them (Dt 25:19; 1 S 15:2.3). The next encounter of the two peoples was when Israel attempted to enter Canaan from the west of the Dead Sea. The spies had reported that the Amalekites were to be found in the south, in connection with the Hittites, Jebusites and Amorites (Nu 13:29). The Israelites at first refused to advance, but later determined to do so contrary to the will of God and the command of Moses. They were met by A. and the Canaanites and completely defeated (Nu 14:39–45). A. is next found among the allies of Moab in their attack upon Israel in the days of Edom (Jgs 3:13). They were also associated with the Midianites in their raids upon Israel (Jgs 6:9), and they seemed to have gained a foothold in Ephraim, or at least a branch of them, in the hill country (Jgs 5:14; 12:15), but it is evident that the great body of them still remained in their old habitat, for when Saul made war upon them he drove them toward Shur in the wilderness toward Egypt (1 S 15:1–9). David also found them in the same region (1 S 27:8; 30:1). After this they seem to have declined and we find, in the days of Hezekiah, only a remnant of them who were smitten by the Simeonites at Mount Seir (1 Ch 4:41–43). They are once mentioned in Pss in connection with other invertebrate enemies of Israel (Ps 137:7). The hatred directed against the Amalekites is reflected in the passages already mentioned which required their utter destruction. Their attack upon them when they were just escaped from Egypt and while they were struggling through the wilderness made a deep impression upon the Israelites which they never forgot, and the wrath of David upon the messenger who brought him news of the death of Saul and Jonathan, declaring himself to be the slayer of Saul, was no doubt accentuated by his being an Amalekite (2 S 1:1–10).

AMAN, a'man (אָמָן), a'mān (אָמָן) A mountain mentioned in Cant 4:8 along with Lebanon, Senir and Hermon. The name probably means the "firm," or "constant." "From the top of Amana" is mistranslated by the LXX ἀμέραν πολιομήν, ἀμέραν πολιομήν, the "Lord has said," of HPN, 180, 285: (1) A Levite in the line of Aaron-Eleazar; a son of Meraioth and grandfather of Zadok (1 Ch 6:7.52) who lived in David's time. Cf Zadok (2 S 15:27, etc) also Ant, VIII, 1, 8 and X, viii, 6. (2) A Levite in the line of Kohath-Hebron referred to in 1 Ch 24:20, 24:23 as the time when David divided the Levites into courses. (3) A Levite in the line of Aaron-Eleazar; a son of Azariah who "executed the priest's office in the house that Solomon built" (1 Ch 6:101). Cf Ezr 7:8 where in the abbreviated list of 74im, is mentioned as an ancestor of Ezra. See AMARIAS, (1 Esd 8:2; 2 Esd 1:2) and no. (4) of this art. (4) Chief priest and judge "in all matters of Jehovah" appointed by Jehoshaphat (2 Ch 19:11). Possibly identical with Am. no. (3) a descendant of Judah in the line of Perez and an ancestor of Atiaia who lived in Jerus after the Bab exile (Neh 11:4). Cf Imit (1 Ch 9:4) and no. (7) of this art., which Am. seems to be of the same family, (6) A Levite and an assistant of Koniah who was appointed by Hezekiah to distribute the "oblations of Jehovah" to their brethren (2 Ch 31:15). (7) A son of Bani who had married a foreign woman (Ezr 10:29). See no. (5) of this art. (8) A priest who with his descendant Sheam supplied Joseph (Neh 10:8); he had returned to Jerusalem with Zerubbabel (Neh 12:2) and was the father of Jehohanan (of Hanani, Ezr 10:20), priest at the time of Joiakim (Neh 13:19). Cf Immer, Ezr 2:37; 10:20; Neh 40:40) and also Emmeruth (AV "Meruth," 1 Esd 5:24). (9) An ancestor of Zephaniah, the prophet (Zeph 1:1).

A. L. BRESLICH

AMARIAS, a-ma-ri'as (אֲמָרִיאָס, Amarias; B, אַמָּרִיאַס, Amariel; at times אַמָּרָיָס, Amarias) = Amariah no. 3: An ancestor of Ezra (1 Esd 8:2; 2 Esd 1:2).

AMARNA, TELL EL-, tel-el-amarna. See TELL EL-AMARNA TABLETS.

AMASA, a-ma'sa (אָמָסָע, 'amâsâ), or read "emâsâ", "ammâshâi, i.e., אָמָשָׂא, 'am mishâ, "people of Jesus": The form נְבֵית, is based upon a mistaken etymology (from נְבֵית [θμάσ] "to burden"). (1) According to 2 S 17:25, Amasa is the son of Abigal, the sister of Zeruiah and David, and Ishra, an Israelite; but another source, 1 Ch 2:17, calls his father Jether the Ishmaelite. He was a nephew of David and a cousin of Absalom, who made him commander of the army of rebellion. When the uprising had been quelled, David, in order to conciliate Amasa, promised him the position held by Jonad; the latter had fallen from favor (2 S 19:13 ff.). When a new revolt broke out under Sheba, the son of Bichri (2 S 20), Amasa was intrusted with the task of assembling the men of Judah. But Joab was eager for revenge upon the man who had obtained the office of command that he coveted. When Amasa met Joab at Gibeon, the latter murdered him while pretending to salute him (2 S 20:8–10; 1 K 2:13).

(2) Son of Haidali, of the Benê 'Epriyātim ("Children of Eprihayim"), who, obeying the words of the prophet Oded, refused to consider as captives the
Judaens who had been taken from Ahaz, king of Judah, by the victorious Israelites under the leadership of Pekah (2 Chr 28:12).

H. J. Wolf

AMASAI, a-mās'ā (.CONNECT the O], 'āmashāy), perhaps rather to be read '.CONNECT the O], 'āmmishāy; so Wellhausen, IG, II, 24, n.2):

(1) A name in the genealogy of Kohath, son of Elkana, a Levite of the Kohathite family (of 1 Chr 6:35; 2 Chr 29:12).

(2) Chief of the captains who met David at Ziklag and tendered him their allegiance. Some have identified him with Amasa and others with Abishai, who is called Abahai in 1 Chr 11:20 (of 1 Chr 18:12). The difficulty is that neither Amasa nor Abishai occupied the rank of the chief of thirty according to the lists in 2 S 23 and 1 Chr 11, the rank to which David is supposed to have appointed him (of 1 Chr 12:18).

(3) One of the trumpet-blowing priests who greeted David when he brought back the Ark of the Covenant (of 1 Chr 15:24).

AMASHSAL, a-māsh'sāl (CONNECT the O], 'āmashashay, probably a textual error for '.CONNECT the O], 'āmashā; the O implies a reading 'CONNECT the O], 'āmashāy; the O is a mistaken derivation from the O). The original reading may have been 'CONNECT the O], 'āmmishāy; of Amasa): Amashsal was a priestly name in the post-exilic list of inhabitants of Jerusalem (Neh 11:13; Maasai, 1 Chr 9:12); the reading in Ch is 'CONNECT the O], ma'sāy, AV "Amasai," RV "Amasai."

AMASIAH, am-a-si'a (CONNECT the O], 'āmoy, "Yahwe bears"): One of the captains of Jehoshaphat (of 2 Chr 17:16).

AMATH, s'math, AMATHIS, am'a-this (1 Mac 12:25). See EMATH.

AMATHIS, am-a-thē'sis. See EMAETHIS.

AMAZED, a-māz'd: A term which illustrates the difficulty of expressing in one Eng. word the wide range of startled emotion, wonder, astonishment, awe, covered, in the OT, by four Heb words and in the NT by as many Gr words. Its Scripture origins are clear, derived from amazement accompanied with terror and trembling to an utmost full of perplexity, wonder, awe and joyful surprise. It is the word esp. used to show the effect of Christ's miracles, teaching, character and Divine personality on the witness who saw and heard Him, and were made conscious of His supernatural power (Mt 12:23: "All the multitudes were amazed"). The miracles of Pentecost and the Holy Spirit's bestowal of the gift of tongues produced the same universal wonder (Acts 2:7: "They were all amazed and marvell'O").

Dwight M. Pratt

AMAZIAH, am-a-zē'a (CONNECT the O], 'āmoy, 'āmoy, 'āmoy, "Jehovah is mighty"); 2 K 14:1-20; 2 Chr 26: Son of Jehosh, and tenth king of Judah. Amaziah had a peaceful accession at the age of 25. A depleted treasury, a despoiled palace and temple, and a discouraged people were among the consequences of his father's war with Hazael, king of Syria. When settled on the throne, Amaziah brought to justice the men who had assassinated his father. A verbal citation of Dt 24:16 in 2 K 14:6, forbidding the punishment of children for a father's offence, shows that the laws of this book were then known, and were recognized as authoritative, and, in theory, as governing the nation. His accession may be dated cir 812 (some put later).

The young king's plan for the rehabilitation of his people was the restoration of the kingdom's military prestige, so severely lowered in his father's reign. He composed of all the young men above 20 years of age, was first organized and placed upon a war footing (2 Chr 26:5; the number given, 300,000, is not a reliable one). Even this not being considered a large enough force to effect the project, 100 talents of silver were sent to engage mercenary troops for the expedition from Ireland. When these came, a man of God strongly dissuaded the king from relying on them (2 Chr 26:7-8). When this was communicated to the soldiers, and they were sent back unemployed, it roused them to "fierce anger" (ver 10).

Amaziah's purpose in making these extensive preparations for war, in a time of profound peace, is clear. To the S.E. of Judah lay the Edomite state, with its capital Petra. For many years Edom had been subject to Jehovah, and a Heb "deputy" had governed it (1 K 22:47). In the reign of his son and successor, Jehovah, a confederacy of Philistines, Arabsians and Edomites took Libnah and made a raid on Jerusalem. A band of these penetrated the palace, which they plundered, abducted some women, and murdered all the young princes but the youngest (2 Chr 21:17; 22:1). The public commotion and distress caused by such an event may be seen reflected in the short oracle of the prophet Obadiah, uttered against Edom, if, with some, Obadiah's date is put thus early.

From that time on Edom... "made a king over themselves" (2 Chr 21:8), and for fifty years following were practically independent. It was this blot on Jerusalem and the good name of Judah that Amaziah desired to wipe out. The army of retaliation went forward, and after a battle in the Valley of Salt, south of the Dead Sea, in which they were the victors, moved on to Petra. This city lies in a hollow, shut in by mountains, and approached only by a narrow ravine, through which a stream of water flows. Amaziah took it "by storm" (such is Ewald's rendering of "by war," in 2 K 14:7). Great execution was done, many of the captives being thrown from the walls of rock, the face of the city now covered with rock-cut tombs of the Gr-Rom age.

The campaign was thus entirely successful, but had evil results. Flushed with victory, Amaziah brought back the gods of Edom, and defiled their worship. For this act of apostasy, he was warned of approaching punishment by destruction (2 Chr 25:14-17). Disquieting news soon came relating to the conduct of the troops sent back to Samaria. From Beth-boron in the south to the border of the northern state they had looted the villages and killed some of the country people who had attempted to defend their property (2 Chr 25:13). To Amaziah's demand for reparation, Jehoshaph's answer was the contemptuous one of the well-known parable of the Thistle and the Cedar.

War was now inevitable. The kings "looked one another in the face," in the valley of Beth-shemesh, where there is a level space, suitable to the movements of infantry. Judah was utterly unable to cope with the king himself taken prisoner. There being no treasures in the lately deserted capital, Jehoshaphat contented himself with taking hostages for future good behavior, and with breaking down the borders of the more southerly, the N.W. corner of the defence (2 K 14:13.4; 2 Chr 25:22-24).
Amaziah's career as a soldier was now closed. He outlawed Jehoash of Israel "fifteen years" (2 K 14 17). His later years were spent in seclusion and dread, and had Years and a tragical ending. The reason for his failure and kingdom (2 K 14 19) (2) of a weak king who sends to a stronger an embassage to ask conditions of peace (Lk 14 32). Not used elsewhere in the Bible.

AMBER, am'ber. See STONES, PRECIOUS.

AMBITIOUS, am-bish'us (φιλοτιμούμα, philotoimomai), "to be strongly desirous, "strive earnestly," "make it one's aim": Given as a marginal reading in Rom 15 20 ("being ambitious to bring good tidings"), 2 Cor 6 9 ("We are ambitious, whether at home or absent, to be well-pleasing unto him"), and 1 Thes 4 11 ("that ye be ambitious to be quiet").

AMBUSH, am'bush. "to set an ambush": Arab, am'arab, "to set an ambush": A military stratagem in which a body of men are placed in concealment to surprise an enemy unawares, or to attack a point when temporarily undefended. This stratagem was employed successfully by Joshua at Ai (Josh 8) and by the Maccabees (2 Macc 13); and of the Moslems to set up a standard against the walls of Babylon, make the watch strong, set the watchmen, prepare the ambushes" (Jer 51 12).

AMBUSHMENT, am'busht-mant (as above) has now disappeared in 2 Ch 20 22, where RV gives for "ambushment" "blowers-in-wait." It still remains in 2 Ch 13 18, where both AV and RV render the Hebrew noun "ambushment."

AMEN, a-men' (in ritual speech and in singing a-men', a-men) (τὸ ἅμεν, ἡμέν; δόξα, amén, "truly," "verily"); Is derived from the reflexive form of a vb, meaning "to be firm," or "to prop." It occurs twice as a noun in Isa 66 16, where we have (AV, RV) "God of truth." This rendering implies the pointing ἁμα- or ἡμα- i.e. "true," or "faithfulness," a reading actually suggested by Cheyne and adopted by others. Amen is generally used as an advb. of assent or confirmation—"so, 'so let it be."

In Jer 25 6 the prophet, in answering the words of the false prophet, employed when an individual or the whole nation confirms a covenant or oath recited in their presence (Nu 6 22; Dt 27 15 ff; Neh 6 3, etc.). It also occurs at the close of a ps or book of ps, as a prayer of consecration. That Amen was appended to the doxology in the early church is evident both from St. Paul and Rev, and here again it took the form of a response by the hearers. The ritual of the installation of the Lamb (Rev 5 6–14) concludes with the Amen of the four beasts, and the four and twenty elders. It is also spoken after "Yea: I come quickly" (22 20). And that Rev reflects the practice of the church on earth, and not merely of an ideal, ascended community in heaven, may be concluded from 1 Cor 14 16, whence we gather that the lay brethren were expected to say Amen to the address. (See WEIZSÄCKER'S The Apostolic Age of the Christian Church, Eng. tr, II, 289.)

AMERC, a-márs': Found in AV only in Dt 22 10, "And they shall amerce him in an hundred shekels of silver. Amerce is a legal term derived from the French ( = "at, mercer = "mercy," i.e. lit. "at the mercy" [of the court]). Here it is used of the imposing of a fine, according to the Law of Moses, upon the man who has been proven by the Elders to have brought a false charge against the virginity of the maid he has married by saying to the father, "I found not thy daughter a maid."

AMBASSADOR, am-bas'a-dor (πρεσβεία, presbeia, "an embassy," a body of ambassadors on the message entrusted to them): Twice used by Christ (1) in the parable of the Founds, of the citizens who hated the nobleman and sent an ambassage, refusing to have him reign over them, thus illustrating those who willfully rejected His own spiritual sovereignty and kingdom (Lk 14 14); (2) of a weak king who sends to a stronger an embassage to ask conditions of peace (Lk 14 32). Not used elsewhere in the Bible.

AMBASSAD, am'be-as-adj (πρεσβεία, presbeia, "an embassy," a body of ambassadors on the message entrusted to them): Twice used by Christ (1) in the parable of the Founds, of the citizens who hated the nobleman and sent an ambassage, refusing to have him reign over them, thus illustrating those who willfully rejected His own spiritual sovereignty and kingdom (Lk 14 14); (2) of a weak king who sends to a stronger an embassage to ask conditions of peace (Lk 14 32). Not used elsewhere in the Bible.

AMBASSAD, am'be-as-adj (πρεσβεία, presbeia, "an embassy," a body of ambassadors on the message entrusted to them): Twice used by Christ (1) in the parable of the Founds, of the citizens who hated the nobleman and sent an ambassage, refusing to have him reign over them, thus illustrating those who willfully rejected His own spiritual sovereignty and kingdom (Lk 14 14); (2) of a weak king who sends to a stronger an embassage to ask conditions of peace (Lk 14 32). Not used elsewhere in the Bible.

AMBASSAD, am'be-as-adj (πρεσβεία, presbeia, "an embassy," a body of ambassadors on the message entrusted to them): Twice used by Christ (1) in the parable of the Founds, of the citizens who hated the nobleman and sent an ambassage, refusing to have him reign over them, thus illustrating those who willfully rejected His own spiritual sovereignty and kingdom (Lk 14 14); (2) of a weak king who sends to a stronger an embassage to ask conditions of peace (Lk 14 32). Not used elsewhere in the Bible.
1. History. On July 7, 1870, it was moved in the Lower House of the Convocation of Canterbury that in the work of revision the cooperation of American divines be invited. This resolution was assented to, and on December 7, 1871, the arrangements were completed. Under the general presidency of Dr. Philip Schaff, an OT Company of fifteen scholars was formed, with Dr. W. H. Green as chairman, and a NT Company of sixteen members (including Dr. Schaff), with Dr. T. D. Woolsey as chairman. Work was begun on October 4, 1872, and took the form of offering criticisms on the successive portions of the English revision as they were received. These criticisms of the American Companies were duly considered by the English Companies during the second revision and the decisions were again sent to America for criticism. These replies were received once more given consideration and, finally, the unadopted readings for which the American Companies professed deliberate preference were printed as appendices to the two Testaments as published in 1881 and 1885. These lists, however, were not regarded by the American Companies as satisfactory. In the first place, it became evident that the English Companies, giving account of their instructions and for other reasons, were not willing to make changes of a certain class. Consequently the American Companies insisted on only such readings as seemed to have a real chance of acceptance. And in the second place, the English presses hurried the last part of the work and were unwilling to allow enough time for adequate thoroughness in the preparation of the lists. But it was hoped that the first published edition of the ERV should not be the last. Hence the American Companies, considering that in the future such American proposals as had stood the test of public discussion might be incorporated into the text. This hope was disappointed—the English Companies disbanded as soon as their revision was finished and their work stood as final. As a result the American Companies resolved to continue their organization. They were pledged not to issue or indorse any new revision within fourteen years after the publication of the ERV. But in 1900 that the ARV NT was published. The whole Bible was issued in the following year.

2. Differences from ERV. As the complete editions of the ARV give a full list of the changes made, only the more prominent are mentioned. A few of the readings printed in the appendices to the ERV were abandoned, but many new ones were introduced, including some that had been adopted while the English work was in progress but which had not been pressed. (See above.) Still, in general appearance, the ARV differs but slightly from the English. The most important addition is found in the page-headings. Some changes have been made in shortening the titles of the NT books, and in the printing of poetical passages in poetical form has been carried through more consistently. The paragraphs have been altered in some cases and (especially in the OT) shortened. The punctuation has been simplified, especially by the more frequent use of the semicolon. The removal of obsolete words ("magnificat," "necings," etc) has been effected fairly thoroughly, obsolete constructions ("jealous over," etc) have been modernized, particularly by the use of "who" or "of whom" ("whom") for persons and "is" (instead of "his") for things. In the OT "Jehovah" has been introduced systematically for the proper Heb word, as has "Sheol" ("Hades" in the NT). Certain passages too literally rendered in the ERV ("reins," "by the hand of," etc) are given in modern terms. In the NT, the substitution of "Holy Spirit" for "Holy Ghost" was completed throughout (in the ERV it is made in some twenty places), "demons" substituted for "devils," "Teacher" for "Master," and "try" for "tempt" when there is no direct reference to wrongdoing.

3. Criticism. It may be questioned whether the differences between the two Revisions are great enough to counterbalance the annoyance and confusion resulting from the existence of two standard versions in the same language. But, accepting the ARV as an accomplished fact, and acknowledging a few demerits that it has or may be thought to have in comparison with the ERV (a bit of pedantry in Ps 145 12 or renderings of disputed passages such as Ps 24 6), these demerits are altogether outweighed by the superiorities—with one exception. In the Psalter, when used liturgically, the repetition of the word "Jehovah" becomes wearisome and the ERV which retains "The Lord" is much preferable. Most to be regretted in the ARV is its extreme conservatism in the readings of the original texts. In the OT the number of marginal variants was actually reduced. In the NT, only trivial changes are made from the so-called Revisers' Greek Text, although this text did not enter the consideration even in 1881, while in 1900 it was almost universally abandoned. (Today—in 1914—it is obsolete.) It is very unfortunate that the American Revisers did not improve on the example of their English brethren and consider the session after the publication of their version, for it is only by the successive revisions of published work that a really satisfactory result can be attained.

No ARV Apoc was attempted, a particularly unfortunate fact inasmuch as the study of the Apoc has become imperative and the ERV Apoc is not a particularly good piece of work. However, copies of the ARV can now be obtained with the ERV Apoc included. See English Versions.

AMETHYST, am-e-thist. See Stones, Precious.

AMI, a'mi, a'mē (אָמֳֵה, a'mē): Ancestor of a family among "Solomon's servants" in the Return (Ezr 2 57); the same as Amon in Neh 7 59.

AMIAEABLE, a'mi-a-ā-b'l (אמאי), yēhōdāh, "beloved"); Applied to the tabernacle or tent of meeting. "How a man loved (Ps 84 1), the pl. having reference to the subdivisions and appurtenances of the sanctuary (68 35). The adj. is rendered "amiable" in the sense of the French aimable, lovely; but the usage of the Heb word requires it to be understood as meaning "dear," "beloved." Cf "so amiable a prospect" (Sir T. Herbert), "They keep their churches so cleanly and amiable" (Howell, 1644). "What made the tabernacle of Moses lovely was not the outside, which was of mean, but what was within" (John Gill). See Tabernacle.

MINADAB, a-min-'ā-dāb ('עָמֳִנַדְּב, Amīnādāḇ): AV, Gr form of Amminadab (q.v.). Thus RV (Mt 1 4; Lk 3 33).

AMISS, a-mis': There are two words tr 'amiss' in the NT, ἀφετέριο, ἀπόφοιτος, referring to that which is improper or harmful (Lk 23 41; Acts 26 6) while ἀπαξετέριο, κακός, refers to that which is evil in the sense of a disaster, then to that which is wicked, morally wrong. This latter is the use of it in Jas 3 4. The purpose of the prayer is evil, it is therefore amiss and cannot be granted (of 2 Ch 6 37 ff).
AMMITAI, a-mi’t (אֶמוּתַי, ’emmitay, “faithful”): The father of the prophet Jonah. He was from Gath-hepher in Zebulun (2 K 14 25; Jon 1 1).

AMMAH, am’a (אָמֶה, ’ammah, “mother” or “beginning”): A hill in the territory of Benjamin (2 S 2 24), where Joab and Abishai halted at nightfall in their pursuit of Abner and his forces after their victory over him in the battle of Gibeon. It “lieth before Giah by the way of the wilderness of Gibeon”; but the exact location has not been identified. The same Heb word appears as the second son of Methuselah in 2 S 8 1 AV, but rendered “mother city” in RV, probably however not the same place as in 2 S 2 24.

AMMI, am’t (אָמִית, ’ammit, “my people”): A symbolic name given to Israel by Hosea (2 1; 2 3 in Heb text), descriptive of Israel in the state of restoration, and in contrast to sinful and rejected Israel, represented by Hosea’s son, who was called Lo-ammi, “not my people,” when born to the prophet (Hos 1 5 10). This restoration to the Divine favor is fully described in Hos 2 21, 23 in words quoted by Paul (Rom 9 25 26). The use of such fig. and descriptive names is frequent in the OT; cf Isa 62 4 12.

AMMIDIOI, a-mi’di-o (Av Ammidoi, am’d-i-o, ’āmēdōi; Ammidoi [also with aspirate]; occurring only in 1 Esd 5 20): One of the families returning from the Bab Captivity in the First Return, under Zerubbabel, in 537 BC. This name is not found in the corresponding lists of the canonical books, Ezra and Neh 7. Their identity is uncertain.

AMMIEL, am’i-ēl (אָמִיֵל, ’ammi’el, “my kinsman is God”); ’Ammāq, Ammiel: A name borne by four men in the OT.

1. One of the twelve spies sent into Canaan by Moses; son of Gemali, of the tribe of Dan (Nu 13 12).

2. A Benjamite, the father of Machir, a friend of David and living at Lodebar in Gilead (2 S 2 11; 27).

3. Father of Bathshua (or Bathsheba), one of David’s wives, who was mother of Solomon (1 Ch 3 5). In the pass 2 S 11 5, by transposition of the two parts of the name, he is called Eliam, meaning “my God is a kinsman.”

4. The sixth son of Obed-edom, a Levite, one of the doorkeepers of the tabernacle of God in David’s life-time (1 Ch 25 5). Edford Mack

AMMIHUD, a-mi’hud (אָמִיחֻד, ’ammihud, “my kinsman is glorious”); variably in LXX, ’Eμμιχος, Emmiōd or Σμιχος, Semiod or Σμιχος, Amiōd: The name of several OT persons.

1. Father of Elishama, who in the Wilderness was head of the tribe of Ephraim (Nu 1 10; 2 18; 7 48 53; 10 22; 1 Ch 7 26).

2. Father of Shemuel, who was appointed by Moses from the tribe of Simeon to divide the land among the tribes after they should have entered Canaan (Nu 33 11).

3. Father of Pedahel, who was appointed from the tribe of Naphtali for the same purpose as the Ammihud of (2 Nu 34 28).

4. In the AV and RVm for the Ammihur (אָמִימִר, ’ammihur, “my kinsman is holy”), who was father of Tzalmai of Geshur, a little Aram. Kingdom E. of the Lebanon mountains, to whom Absolon fled after the murder of his brother Amnon. The weight of evidence seems to favor the reading Ammihur (2 S 13 37).

5. A descendant of Judah through the line of Perez (1 Ch 9 4). Edward Mack

AMMIHUR, a-mi’hur (AV and RVm; אָמִימִר, ’ammihur, “my kinsman is holy”); ’Eμμιχος, Emmiōd. See Ammihud (4).

AMMINADAB, a-min’a-dab (אָמִינָדָב, ‘amminadabh): “my people [or my kinsman is generous or noble].” Three persons bearing this name are mentioned in the OT.

1. In Ruth 4 19 20 and 1 Ch 2 10 Amminadab is referred to as one of David’s ancestors. He was the great-grandson of Perez, a son of Judah (Gen 38 29; 46 12) and the great-grandfather of Boaz, who again was the great-grandfather of David. Aaron’s wife, Elisheba, was a daughter of Amminadab (Ex 6 23), while one of the sons, viz. Nahshon, occupied an important position in the Judah clan (Nu 1 7; 2 3; 7 12; 10 14).

2. In the first Book of Ch 6 22 Amminadab is mentioned as a son of Kohath (a and therefore a grandson of Levi) and the father of Korah. But in other genealogical passages (Ex 6 18; Nu 3 19; 1 Ch 6 2) the sons of Kohath are Amram, Izhar, Hebron and Uzziel, and in two places (Ex 6 21; 1 Ch 6 38) Izhar is mentioned as the father of Korah.

3. According to 1 Ch 15 10 11 Amminadab was the name of a priest who took part in the removal of the ark to Jerusalem. He was the son of Uziel, and therefore a nephew of Ammoch and son of Kohath (= Izhar). Thomas Lewis

AMMINADIB, a-min’a-dib (אָמִינָדֵיב, ’amminadibh): “my people [or my kinsman is generous or noble].” The name occurs in AV and RV only in one passage (Cant 6 12, “the chariots of Amminadib”). In AVm and RV, however, it is not regarded as a proper name, and the clause is rendered, “among the chariots of my princely people.” Interpretations widely vary (see Commentaries).

AMMISHADDAI, am-i-shad’i, am-i-shad’i (אָמִיְהוּדָאֵי, ’ammishad’ai, “Shaddai is my kinsman”): The father of Ahierai, a Danite captain or “head of his father’s house,” during the Wilderness journeys (Nu 1 12; 2 25, etc).

AMMIZABAD, a-miz’a-bad (אָמִיִצָבָד, ’ammizabadh, “my kinsman has made a present”): The son of Beniah, one of David’s captains for the third month (1 Ch 27 6).

AMMON, am’on; AMMONITES, am’o-nts (אָמֹן, ’ammon; אָמֹנִית, ’ammonim): The Heb tradition makes this tribe descendants of Lot and hence related to the Israelites (Gen 19 38). This is reflected in the name usually employed in OT to designate them, Ben ’Ammi, Ben Ammon, “son of my people, my "children of my people," i.e. relatives. Hence we find that the Israelites are commanded to avoid conflict with them on their march to the Promised Land (Dt 2 19). Their dwelling-place was on the east of the Dead Sea and the Jordan, between the Arnon and the Jabbok, but before the advance of the Hebrews, they had been dispossessed of a portion of their land by the Amorites, who founded, along the east side of the Jordan and the Dead Sea, the kingdom of Sion (Nu 21 21–31). We know from the records of Egypt, esp. Am Tab, the approximate date of the Ammonite invasion (14th and 13th cents., BC). They were pressed on the north by the Hittites who forced them upon the tribes of the south, and some of them settled east of the Jordan. Thus Israel helped A. by destroying their old enemies, and this
makes their conduct at a later period the more reprehensible. In the days of Jephthah they oppressed the Israelites east of the Jordan, claiming that the latter had deprived them of their territory when they came from Egypt, whereas it was the possession of the Amorites they took (Jgs 11 1-28). They were defeated, but their hostility did not cease, and their conduct toward the Israelites was particularly shameful, as in the days of Saul (1 S 11) and of David (2 S 10). This may account for the cruel treatment meted out to them in the war that followed (2 S 12 20-31). They seem to have been completely subdued by David and their capital was taken, and we find a better spirit manifested afterward, for Nahash of Rabbah showed kindness to him when a fugitive (2 S 17 27-29). Their country came into the possession of Jeroboam, on the division of the kingdom, and when the Syrians of Damascus deprived the kingdom of Israel of their possessions east of the Jordan, the A. became subjects of Benhadad, and we find a contingent of 1,000 of them serving as allies of that king in the great battle of the Syrians with the Assyrians at Qarqar (854 BC) in the reign of Shalmaneser II. They may have regained their old territory when Tiglath-pileser carried off the Israelites E. of the Jordan into captivity (2 K 16 19-20; 1 Ch 5 26). Their hostility to both kingdoms, Judah and Israel, was often manifested. In the days of Jehoshaphat they joined with the Moabites in an attack upon him, but met with disaster (2 Ch 19 1-20). When Joash ruled (2 Ch 27 5). After submitting to Tiglath-pileser they were generally tributary to Assyria, but we have mention of their joining in the general uprising that took place under Sennacherib; but they submitted and we find them tributary in the reign of Esarhaddon. Their hostility to Judah is shown in their joining the Chaldeans to destroy it (2 K 24 2). Their cruelty is denounced by the prophet Amos (1 13), and their destruction by Jer (49 1-6). Ezek (21 28-32), Zeph (3 9,10). Their murder of Gedaliah (2 K 25 22-26; Jer 40 14) was a dastardly act. Tobiah the A. united with Sanballat to oppose Neh (Neh 4), and their opposition to the Jews did not cease with the establishment of the latter in their land.

They joined the Syrians in their wars with the Maccabees and were defeated by Judas (1 Mac 5 6). Their religion was a degrading and cruel superstition. Their chief god was Moloch, or Molech, to whom they offered human sacrifices (1 K 11 7) against which Israel was especially warned (Lev 20 2-5). This worship was common to other tribes for we find it mentioned among the Phoenicians.

AMMONIITES, am-on-i'tes, a-mon'i-tes (תַּמונִי, 'ammonith'); a woman of the Ammonites, Naamah, the mother of Rehoboam (1 K 14 21-31; 2 Ch 12 13; 24 26).

AMNON, am'non (עִם, 'amnōn, "faithful"); of יְמֹן, 'yāmōn, 2 S 13 20), which is probably a diminutive. Wellhausen [I Ug. II, 24, n.2] resolves יְמֹן into יָמִן, יָמִית, and יָמָן, "my mother is the serpent"; of CUN: 

(1) the eldest son of David and Ahinoam, the Jezreelites (cf 2 S 3 2). As the crown prince and heir presumptive to the throne, he was intensely hated by his brothers, who were eager to revenge the outrage committed by Amnon upon his sister Tamar (2 S 3 2; 13 1 ff; 1 Ch 3 1).
(2) A name in the genealogy of Judah (1 Ch 4 20).

AMOK, a'mök (עִמּוֹךְ, 'umōk, "deep"): A chief priest who came to Jesus with Zerubbabel (Neh 12 7) and the forefather of Elber, who was priest in the days of Joiakim (Neh 12 20).

AMON, a'mon (עִמּון, 'amōn): A name identical with that of the Egyptian local deity of Thebes (No); of Jer 46 25. The foreign name given to a Heb prince is remarkable, as is also the fact that it is one of the two or three royal names of Judah not compounded with the name of Jehovah. See MA'ASSEH. It seems to reflect the sentiment which his fanatical father sought to make prevail that Jeh had no longer any more claim to identification with the realm than had other deities.

(1) A king of Judah, son and successor of Manasseh; reigned two years and was assassinated in his own palace by the officials of his household. The story of his reign is told briefly in 2 K 21 19-26, and still more briefly, though in identical terms, so far as they go, in 2 Ch 33 21-25. His short reign was merely incidental in the history of Judah; just long enough to reveal the traits and tendencies which directly or indirectly led to his death. It was merely a weaker continuation of the régime of his idolatrous father, though without the same moral fibre which gave the father positive character, and without the touch of piety which, if the Chronicler's account is correct, tempered the father's later years.

If the assassination was the initial act of a revolution, the successor was immediately suppressed by "the people of the land," who put to death the conspirators and placed Amon's eight-year-old son Josiah on the throne. In the view of the present writer the motive of the affair was probably connected with the religious tendencies of the Davidic dynasty, which, having survived so long according to prophetic prediction (cf 2 S 7 16; Ps 89 36.37), was an essential guarantee of Jeh's favor. Manasseh's foreign sympathies, however, had loosened the hold of Jeh on the officials of his court; so that, instead of being the loyal center of devotion to Israel's religious and national idea, the royal household was but a hotbed of worldly ambitions, and all the more for Manasseh's prosperous reign, so long immune from any struggle for Divine judgment. It is natural that, seeing the insignificance of Amon's administration, some ambitious clique, imitating the policy that had frequently succeeded in the Northern Kingdom, should strike for the throne. The plan redounded to the credit of the inbred Davidean loyalty of the body of the people. It was a blow at one of their most cherished tenets, committing the nation both politically and religiously to utter uncertainty. That this impulsive act of the people was in the line of the purer religious movement which was ripening in Israel does not prove that the spiritually-minded "remnant" was minded to violence and conspiracy; it merely shows what a stern and stirring fiber of loyalty still existed, seasoned and confirmed by trial, below the corrupting cults and fashions of the ruling classes. In the tragedy of Amon's reign, in short, we get a glimpse of the basis of sound principle that lay at the common heart of Israel.

(2) A governor of Samaria (1 K 22 26); the one to whom the prophet Micah was committed as a prisoner by King Ahab, after the prophet had disputed the predictions of the court prophets and foretold the destruction of Ahab and his battle. 

(3) The head of the "children of Solomon's servants" (Neh 7 59) who returned from captivity; reckoned along with the Nethinim, or temple slaves. Called also Ani (Est 2 57).
AMORITES, am'o-rits; Amorites (אֲמוֹרִים, ’āmōrîm), always in the singular like the Bab Amurrû from which it is taken; ’Ămūraḥ, Amorraḥ; 1. Varying Use of the Name Explained 2. The Amorite Kingdom 3. Sīnôn’s Conquest 4. Disappearance of the Amorite Kingdom 5. Physical Characteristics of the Amorites

The name Amorite is used in the OT to denote (1) the inhabitants of Pal generally, (2) the population of the hills as opposed to the plain, and (3) a specific people under a king of their own. Thus (1) we hear of them on the west shore of the Dead Sea (Gen 34), at Hebron (Gen 41), and Shechem (Gen 45:22), in Gilead and Bashan (Dt 3:10) and under Hermon (Dt 3:8; 4:48). They are named instead of the Canaanites as the inhabitants of Pal whom the Israelites were required to exterminate (Gen 15:16, 17; Josh 6:10; 1 Sm 7:14; 1 Kgs 21:26; 2 Kgs 21:11); the older population of Judah is called Amorite in Josh 10:5-6, in conformity with which Ezek (16:3) states that Jerus had an Amorite father, and the Gibeonites are said to have disgraced the remnants of the Amorites (2 Sm 21:2). On the other hand (2), in Nu 13:29 the Amorites are described as dwelling in the mountains like the Hittites and Jebusites of Jerus, while the Amalekites or Bedouins lived in the south and the Canaanites on the seacoast and in the valley of the Jordan. Finally (3), we hear of Sīnôn, “king of the Amorites,” who had conquered the northern half of Moab (Nu 21:21-31; Dt 2:26-35).

Assyriological discovery has explained the varying use of the name. The Heb form of it is a transliteration of the Bab Amurrû, which was both sing. and pl. In the Age of Abra- ham the Amurrû were the dominant people in western Asia; hence Syria and Pal were called by the Baby- lonians “the land of the Amorites.”

In the Assyrian period this was replaced by “land of the Hittites,” the Hittites in the Mosaic age having made themselves masters of Syria and Canaan. The use of the name “Amorite” in its general sense belongs to the Bab period of oriental history.

The Amorite kingdom was of great antiquity. About 2500 BC it embraced the larger part of Mesopotamia and Syria, with its capital probably at Harran, and a few centuries later northern Babylonia was occupied by a “Amorite” dynasty of kings who traced their descent from Sarru or Sumu (the Biblical Sem), and made Babylon their capital. To this dynasty belonged Khannu-rabi, the Amraphel of Gen 14:1. In the astronomical documents of the period frequent reference is made to “the king of the Amorites.”

This king of the Amorites was subject to Babylonia in the age of the dynasty of Ur, two or three centuries before the birth of Abraham. He claimed suzerainty over a number of “Amorite” kinglets, among whom those of Khana on the Euphrates, near the mouth of the Khabur, may be named, since in the Abrahamic age one of them was called Khannu-rapilkh and another Išurîm or Israel. A paymaster in this kingdom, one of the Babylonian traders, was his successor or perhaps his son (Gen 14:13), and lived in the Louvre. Numerous Amorites were settled in Ur and other Bab cities, chiefly for the purpose of trade. They seem to have enjoyed the same rights and privileges as the native Babylonians. Some of them were commercial travelers, but we hear also of the heads of the great firms making journeys to the Mediterranean coast.

In an inscription found near Diarbekir and dedicated to Khannu-rabi by Ḫibum (舒伯, the governor of the district, the only title given to the Bab monarch is “king of the Amorites,” where instead of Amurrû the Sumerian Murrû (Hot mērēk) is used. The great-grandson of Khammu-rabi still calls himself “king of the widespread land of the Amorites,” but two generations later Babylonia was invaded by the Hittites, the Amorite dynasty came to an end, and there was once more a “king of the Amorites” who was not also king of Babylonia.

Heads of Amorites, akin to North Africans.

The Amorite kingdom continued to exist down to the time of the Israelitish invasion of Pal, and mention is made of it in the Egyptian records as well as in the cuneiform Am Tab, and the Hittite archives recently discovered at Boghaz-keui, the site of the Hittite capital in Cappadocia. The conquest of Canaan by the kings of the XVIIIth Dynasty had put an end to the effective government of that country by the Amorite princes, but their rule still extended eastward to the borders of Babylonia, while its southern limits coincided approximately with what was afterward the northern frontier of Naphthali. The Amorite kings, however, became, at all events in name, the vassals of the Egyptian Pharaoh. When the Egyptian empire began to break up, under the “heretic king” Amen-hotep IV, at the end of the XVIIIth Dynasty (1400 BC), the Amorite princes naturally turned to their more powerful neighbors in the north. One of the letters in the Tell el-Amarna correspondence is from the Pharaoh to his Amorite vassal Aziru, the son of Mshed-Asherah, accusing him of rebellion and threatening him with punishment. Eventually Aziru found it advisable to go over openly to the Hittites, and pay the Hittite government an annual tribute of 300 shekels of gold. From that time forward the Amorite kingdom or vassalage of the Hittite empire, which, on the strength of this, claimed dominion over Pal as far as the Egyptian frontier.

The second successor of Aziru was Abi-Amurrû (Abi-Hadad), whose successor bore, in addition to a Sem name, the Mitannian name of Bente-sinas. Bente-sinas was dethroned by the Hittite King Mutallis and imprisoned in Cappadocia, where he seems to have met the Hittite prince Khattu-sil, who, on the death of his brother Mutallis, seized the crown and restored Bente-sinas to his kingdom. Bente-sinas married the daughter of Khattu-sil, while his own daughter was wedded to the son of his Hittite suzerain, and an agreement was made that the succession to the Amorite throne should be confined to his descendants. Two or three generations later the Hittite empire was destroyed by an invasion of “northern barbarians,” the Phrygians, probably, of Gr history, who marched southward, through Pal, against Egypt, carrying with them “the king of the Amorites.” The invaders, however, were defeated and practically exterminated by Ramses III of the XXth Egyptian Dynasty (1200 BC). The Amorite king, captured on this occasion by the Egyptians, was probably the immediate predecessor of the Sihon of the OT.
Egypt influence in Canaan had finally ceased with the invasion of Egypt by the Libyans and peoples of the Aegean in the fifth year of
3. Sihon's Conquest II, at the time of the Israelittish Exodus. Though the invaders were repulsed, the Egyptian garrisons had to be withdrawn from the cities of southern Palestine, where their place was taken by the Philistines who thus blocked the way from Egypt to the north. The Amorites, in the name of their distant Hittite overlords, were accordingly able to overrun the old Egyptian provinces on the east side of the Jordan; the Amorite chieftain Og possessed himself of Bashan (Dt 3:8), and Sihon, "king of the Amorites," conquered the northern part of Moab.

The conquest must have been recent at the time of the Israelittish invasion, as the Amorite song of triumph is quoted in Nu 21:27-29, and adapted to the overthrow of Sihon himself by the Israelites. 'Hee unto thee,' it reads, 'O Moab: thou art undone. O people of Chemosh! [Chemosh] hath given thy sons who escaped [the battle] and thy daughters into captivity to Sihon king of the Amorites. '

The same word that had thus consumed Heshbon, it is further declared, shall spread southward through Moab, while Heshbon itself is rebuilt and made the capital of the conqueror: "Come to Heshbon, that the city of Sihon [like the city of David, 2 S 5:9] may be rebuilt and restored. For the fire has spread from Heshbon, the flame from the capital of Sihon, devouring as far as Moab [reading 'adh with the LXX instead of 'd'], and swallowing up [reading bdll'adh with the LXX] the high places of Arnon." The Israelittish invasion, however, prevented the expected conquest of southern Moab from taking place.

After the fall of Sihon the Amorite kingdom disappears. The Syrians of Zobah, of Hamath and of Damascus take its place, while the rise of Assyria the "Amorites" cease to be the representatives of the Amorite in contemporary lit. of the inhabitants of the Amorite and Hittite territories in western Asia. At one time their power had extended to the Babylonia and Persia of the Chaldeans and of the Nabonidas to Cappadocia by his Hittite overlords to answer a charge made by the Bab ambassadors of his having raided northern Babylonia. The Amorite king urged, however, that the raid was merely an attempt to recover the spoil of 30 talents of silver.

In Nu 13:29 the Amorites are described as mountaineers, and in harmony with this, according to Professor Petrie's notes, the Egyptian artists represent them with fair complexions, blue eyes and light hair. It is likely that the Amorites would, therefore, seem that they belonged to the Libyan race of northern Africa rather than to the Semitic stock. In western Asia, however, they were mixed with other racial elements derived from the following races and peoples west of the Euphrates to whatsoever race they might belong. The races of the Amorites were different, and the Semitic stock of the Semitic Amorites in the Semitic world would be the Semites, and as they spoke a Semitic language one of the most important of these elements would have been the Semites. In its general sense, moreover, the name "Amorite" included in the Bab period all the settled and civilised peoples west of the Euphrates to whichever race they might belong.

Literature

I. The Prophet.—Amos is the prophet whose book stands third among the "Twelve" in the Hebrew canon. No other person bearing the same name is mentioned in the OT, the name of the father of the prophet Isaiah being written differently ('āmōs). There is an Amos mentioned in the genealogical series Lk 3:25, but he is otherwise unknown, and we do not know how his name would have been written in Hebrew. Of the signification of the prophet's name the LXX translator can say that a verb with the same stem letters, in the sense of to load or to carry a load, is not uncommon in the language.

Tekoa, the native place of Amos, was situated at a distance of 5 miles S. from Beth-hel, from which it is visible, and 10 miles from Jerusalem.

2. Native Jerusalem, on a hill 2,700 ft. high, overlooking the wilderness of Judah. It was made a "city for defence" by Rehoboam (2 Ch 11:6), and may have in fact received its name from its remote and exposed position; for the stem of which the word is a derivative is of frequent occurrence in the sense of sounding an alarm with the trumpet: e.g. "Blow the trumpet in Tekoa, and set up a sign of fire in Beth-haccerem" (Jer 6:1 AV). The same word is also used to signify the setting up of a tent by striking in the tent-pegs; and Jerome states that there was no village beyond Tekoa in his time.

The name has survived, and the neighborhood is at the present day the pasture-ground for large flocks of sheep and goats. From the high ground on which the modern village stands one looks down on the bare undulating hills of one of the bleakest districts of Palestine, "the waste howling wilderness," which might have suggested the startling imagery of the prophet's addresses. The place may have had—as is not seldom the case with towns or villages—a reputation for a special quality of its inhabitants; for it was from Tekoa that Iosah fetched the "wise woman" by whom a feigned story effected the reconciliation of David with his banished son Absalom (2 S 14).

There are traces in the Book of Am of a shrewdness and mother-wit which are not so conspicuous in other prophetical books.

The particulars of a personal kind which are noted in the book are few but suggestive. Amos was not a prophet or the son of a prophet, he tells us (7:14), i.e. he did not belong to the professional class which frequented the so-called schools of the prophets. He was "among the herdmen of Tekoa" (1:1), the word here used being found only once in another place (2 K 3:4) and applied to Mesha, king of Moab. It seems to refer to a special breed of sheep, somewhat ungainly in appearance but producing an abundant fleece. In 7:14 the word rendered "herdman" is different, and denotes an owner of cattle, though some, from the LXX rendering, think that the word should be the same as in 7:1. He was also "a dresser of
sycamore-trees" (7 14). The word rendered "dresser" (RV) or "gatherer" (AV) occurs only here, and from the rendering of the LXX (συκώτος) it is conjectured that there is a link to a sycamore's fruit. The name of the sycamore fig to make it more palatable or to accelerate its ripening, though such a usage is not known in Pal at the present day.

Nothing is said as to any special preparation of the prophet for his work: "The Lord took me from following the flock, and the Lord said unto me, Go, prophesy unto my people." Joash may refer to his expression, people Nature The various later renditions have been taken or interpreted by those who care to accept more palatable or to accelerate its ripening, though such a usage is not known in Pal at the present day.

4. His Preparation Israel (7 15 ERV). In these words he puts himself in line with all the prophets who, in various modes of expression, claim a divine mission from the beginning. But the mention of the prophetic call in association with the mention of his worldly calling is significant. There was no period interposed between the one and the other, no cessation of husbandry to prepare for the work of prophesying. The husbandman was prepared for this task, and when God's time came he took it up. What was that preparation? Even if we suppose that the call was a momentary event, the man must have been ready to receive it, equipped for it. Amos acted as the wayfarer, the way whom he accomplished it, as exhibited in his book, we can see that there was a preparation, both internal and external, of a very thorough and effective character.

Knowledge of God. First of all, he has no doubt or uncertainty as to the character of the God in whose name he is called to speak. The God of Amos is one whose sway is boundless (9 2 ff), whose power is infinite (8 9 ff), not only controlling the forces of Nature (4 1 ff) but guiding the movements and destinies of nations (6 1 ff; 14: 9 7 ff). Moreover, He is righteous in all His ways, dealing with nations on moral principles (1 3 ff; 2 1 ff); and, though particularly favorable to Israel, yet making that very choice of them as a people a ground for visiting them with sterner retribution for their sins (3 2). In common with all the prophets, Amos gives no explanation of how he came to know God and to form this conception of His character. It was not by searching that they found out God. It is assumed that God is and that He is such a Being; and this knowledge, as it could come only from God, is regarded as undisputed and undisputable. The call to speak in God's name may have come suddenly, but the prophet's conception of the character of the God whom he is called is no new or sudden revelation but a firm and well-established conviction.

(2) Acquaintance with history of his people. Then his book shows not only that he was well acquainted with the history and traditions of his nation, which he takes for granted as well known to his hearers, but that he had reflected upon these things and realized their significance. We infer that he had breathed an atmosphere of religion, to which he is not able to indicate that, in his acquaintance with the religious facts of his nation, he differed from those among whom he dwelt, although the call to go forth and enforce them came to him in a special way.

(3) Personal travel. It has been conjectured that Amos had acquired by personal travel the accurate acquaintance which he shows in his graphic delineations of contemporary life and conditions; and it may have been the case that, as a wool-merchant or flock-master, he had visited the towns mentioned and frequented the various markets to which the people were attracted.

(4) Scenery of his home. Nor must we overlook another factor in his preparation: the scenery in which he had his home and the occupations of his daily life. The landscape was one to make a solemn impression on a reflective mind: the wide-spread desert, the shimmering waters of the Dead Sea, the high wall of the distant hills of Moab, over all which were thrown the varying light and shade. The aspect of the country, as with all scenes before him, he tended his flock or defended them from the ravages of wild beasts, would to one whose thoughts were full of God nourish that exalted view of the Divine Majesty to which we find in his book, and from which his thoughts are set (1 2; 3 4 ff; 4 13; 5 8; 9 5 ff). As he is taken from following the flock, he comes before us using the language and figures of his daily life (3 12), but there runs through all the note of one who has seen God's working in all Nature and His presence in every phenomenon. Rustic he may be, but there is no rudeness or rusticity in his style, which is one of natural and impassioned eloquence, ordered and regular as coming from a mind which was responsive to the orderly working of God in Nature around him. There is an aroma of the free air of the desert about his words; but the prophet lives in an ampler ether and breathes a purer air; all things in Nature and all ruling forces are seen in a Divine light and measured by a Divine standard.

Thus prepared in the solitudes of the extreme south of Judah, he was called to go and prophesy unto the people of Israel, and appears as both the capital of Uzziah's reign and the scene of the prophet's preparation for his work. He is seen as a man who had been trained for, and prepared for, his mission to the highest capacity in the Northern Kingdom. It may be that, in the prosecution of his worldly calling, he had seen and been impressed by the conditions of life and religion in those parts. No reason is given for this, but the impression had been so deep that the Northern Kingdom about that time had become victorious over war, and had reached its culmination of wealth and power, with the attendant results of luxury and excess, while the Southern Kingdom had been enjoying a period of outward tranquillity and domestic content.

The date of the prophet Amos can approximately be fixed from the statement in the first verse that his activity fell "in the days of Uzziah king of Judah, and in the days of Jeroboam the son of Joash king of Israel, two years before the earthquake". With these monarchical boundaries, that of Uzziah extending from 779 to 740 BC and that of Jeroboam II from 783 to 743 BC. If we look at the years when they were concurrently reigning, and bear in mind that, toward the end of the Northern Kingdom, Jeroboam II was at the height of his power, we may safely place the date of Amos at about the year 760 BC. In a country in which earthquakes are not uncommon the one here mentioned must have been of unusual severity, for the memory of it was long preserved (Zec 14 5). How long he exercised his ministry we are not told. In all probability the book is the deposit of a series of addresses delivered from time to time till his plain speaking drew upon him the resentment of the authorities, and he was ordered to leave the country (Am 7 10 ff). We can only conjecture that, some time afterward, he withdrew to his native place and put down in writing a condensed record of the discourses he had delivered.

5. His Mission Kingdom. It may be that, in the prosecution of his worldly calling, he had seen and been impressed by the conditions of life and religion in those parts. No reason is given for this, but the impression had been so deep that the Northern Kingdom about that time had become victorious over war, and had reached its culmination of wealth and power, with the attendant results of luxury and excess, while the Southern Kingdom had been enjoying a period of outward tranquillity and domestic content.

The date of the prophet Amos can approximately be fixed from the statement in the first verse that his activity fell "in the days of Uzziah king of Judah, and in the days of Jeroboam the son of Joash king of Israel, two years before the earthquake". With these monarchical boundaries, that of Uzziah extending from 779 to 740 BC and that of Jeroboam II from 783 to 743 BC. If we look at the years when they were concurrently reigning, and bear in mind that, toward the end of the Northern Kingdom, Jeroboam II was at the height of his power, we may safely place the date of Amos at about the year 760 BC. In a country in which earthquakes are not uncommon the one here mentioned must have been of unusual severity, for the memory of it was long preserved (Zec 14 5). How long he exercised his ministry we are not told. In all probability the book is the deposit of a series of addresses delivered from time to time till his plain speaking drew upon him the resentment of the authorities, and he was ordered to leave the country (Am 7 10 ff). We can only conjecture that, some time afterward, he withdrew to his native place and put down in writing a condensed record of the discourses he had delivered.

6. Date. The Book. We can distinguish with more than ordinary certainty the outlines of the individual addresses, and the arrangement of the book is clear and simple. The text, also, has been on the whole faithfully preserved; and though in a few places critics profess to find the traces of later editorial hand, these conclusions rest mainly on subjective grounds, and will be estimated differently by different minds.
The book falls naturally into three parts, recognizable by certain recurring formulas and general literary features.

1. Its Divisions
   (1) The first section, which is clearly recognizable, embraces chs 1 and 2. For the designation of the prophet in ver 1, there is a solemn proclamation of Divine authority for the prophet's words: "Jeh will roar from Zion, and utter his voice from Jerusalem" (ver 2). This is notable in one who through the book himself be in the position as world-wide and His operation as extensive as creation; and it should be a caution in view, on the one hand, of the assertion that the temple at Jerusalem was not more sacred than any of the numerous "high places" throughout the land, and, on the other hand, the superficial manner in which some writers speak of the Heb notion of a Deity whose dwelling-place was restricted to one locality beyond which His influence was not felt. For this God, who has His dwelling-place in Zion, now through the mouth of the prophet, designates in succession the surrounding nations, and this mainly not for offences committed against the chosen people but for moral offences against one another and for breaches of a lower binding on humanity. It will be observed that the nations of Jeroboam's period be in geographical order, and the prophet exhibits remarkable rhetorical skill in the order of selection. The interest and sympathy of the hearers by being the fixing of the attention on the enormities of guilt in their own borders, and curiosity is kept awake by the uncertainty as to where the next stroke of the prophetic whip will fall. Beginning with the more distant and alien peoples of Canaan, Greece and Tyre, he includes round to the nearer and kindred peoples of Edom, Ammon and Moab, till he rests for a moment on the brother tribe of Judah, and thus, having relentlessly drawn the net around Israel by the enumeration of seven peoples, he swoops down upon the Northern Kingdom to which his message is to be particularly addressed.

(2) The second section embraces chs 3 to 6, and consists apparently of a series of discourses, each introduced by the formula, "Hear this word!" (3 1; 4 1; 5 1), and another introduced by a comprehensive: "Woe to them that are at ease in Zion, and to them that are secure in the mountain of Samaria!" (6 1). The divisions here above noted are clearly marked, e.g. that there is another "Woe!" at 5 18; and in ch 4, though the address at the outset is directed to the luxurious women of Samaria, from ver 4 onward the words have a wider reference. Accordingly some who might make the division into a larger number of subsections; and some, indeed, have described the whole book as a collection of ill-arranged fragments. But, while it is not necessary to suppose that the written book is an exact reproduction of the spoken addresses, and while the division into chs has no authority, yet we must allow for some latitude in the details which an impassioned speaker would introduce into his discourses, and for transitions and connections of thought which may not be apparent on the surface.

(3) The third section has some well-marked characteristics, although it is even less uniform than the preceding. The outstanding feature is the phrase, "Thus the Lord Jeh showed me!" (7 1.4.7; 8 1) varied at 9 1 by the words, "I saw the Lord standing upon the altar." We have heard a series of "visions" bearing upon, and interpreted as applying to, the condition of Israel. It is in the course of one of these, when the prophet comes to the words, "I will rise against the house of Jeroboam with the sword!" (7 9) that the interposition of Amaziah, the priest of Bethel, is recorded, with the prophet's noble reply as to his Divine call, and his rebuke and denunciation of the priest, ending with a prophetic announcement of the downfall and captivity of Israel (7 14-17).

If the divinely designated order of the delivery, it would appear that Amos did not immediately take his departure, since more visions follow this episode; and there is a special appropriateness to the introduction of Amaziah just at the point where it is recorded. As to the closing passage of this section (9 11-15) which gives a bright prospect of the future, there is a class of critics who are inclined to reject it just on this account as inconsistent with the severe denunciatory tone of the rest of the book. It is quite possible, however, that the prophet himself (and no succeeding later editor) may have added the passage when he came to write down his addresses. There is no reason to believe that any of the prophets—harsh though their words were—believed that the God of Israel would make a full end of His people in captivity: on the contrary, their assurance of God's faithfulness to His promise, and the deep-seated conviction that right would prevail, led them to expect not even the sternest or earliest of the prophets the hope of a future glory—that hope which grew brighter and brighter as the nation's outlook grew darker, and attained intensity and clearness in the eschatological hope, which embraces the darkest period of exile. It is difficult to believe that any of the prophets were prophets of despair, or to conceive how they could have prophesied at all unless they had a firm faith in the ultimate triumph of God.

The Book of Am is particularly valuable from the fact that he is certainly one of the earliest prophets whose writings have come down to us. It is, like the Book of Hosea which belongs to about the same time, a contemporaneous document of a period of great significance in the history of Israel; and not only gives graphic sketches or illuminating hints of the life and religious condition of the people, but furnishes a trustworthy standard for estimating the value of some other books where the dates are not so precisely determined, a definite starting-point for tracing the course of Israel's history.

(4) As in the case of the social condition.—The book is valuable as embodying a contemporary picture of society and the condition of religion. From the abuses which the prophet denounces and the life-like sketches he draws of the scenes amid which he moved, taken along with what we know otherwise of the historical movements of the period, we are able to form a fairly adequate estimate of the condition of the age and the country. During the reign of Jeroboam II the kingdom of Israel, after having been greatly reduced during preceding reigns, rose to a degree of extent and influence unexampled since the days of Solomon (2 K 14 25); and we are not astonished to read in the Book of Am the haughty words which he puts into the mouth of the people of his time when they spoke of Israel as the 'chief of the nations,' a first-class power in modern language, and boasted of the 'horns' by which they had attained that eminence (6 1.13). But success in war, if it encouraged this boastful spirit, brought also inevitable evils in its train. Victory, as we have seen from the immediate prophecy, meant plunder; for king after king recounts how much spoil he had taken, how many prisoners he had carried away; and we must assume that wars among smaller states would be conducted on the same methods. In such wars, success meant an
extension of territory and increase of wealth, while defeat entailed the reverse. But it is to be remembered that, in an agricultural country and in a society constituted as that of Israel was, the result of this chaotic condition in such passages as 4.6.11—these had been of no avail to awaken the sleeping conscience. They put the evil day far from them (6.3), for Jeh was their national God and "the day of the Lord," the good time coming (6.18), when God would come to their help, was more in their mind than the imperative duty of returning to Him (6.6-8, etc).

(3) Testimony to history.—The book is valuable for the confirmation it gives of the historical statements of other books, particularly for the references it contains to the earlier history contained in the Pentateuch. And here we must distinguish between references to, or quotations from, books, and statements or hints or indications of historical events which may or may not have been written in books or accessible to the prophet and his hearers. Opinions differ as to the date of composition of the books which record the earlier history, and the oldest Biblical writers are not in the habit of saying from what sources they drew their information or when the previous events occurred. We can hardly believe that in the time of Amos copies of existing books or writings would be in the hands of the mass of the people, even if the power to read them was general. In such circumstances, if we find Amos quoting books which are in a small book referring to outstanding events and stages of the past history as matters known to all his hearers and unquestionable, our confidence in the veracity of the books in which these facts are recorded is greatly increased, for the statement becomes a matter of comparatively less importance at what date these books were composed. Now it is remarkable how many allusions, more or less precise, to antecedent history are found in the compass of this small book; and the significance of them lies not in the actual number of references, but in the kind of reference and the implications involved in the individual references. That is to say, each reference is not to be taken as an isolated testimony to some single event in question, but involves a great deal more than is expressed, and is intelligible only when other facts or incidents are taken into consideration. Thus e.g. the reference to the overthrow of Sodom and Gomorrah (4.11) is only intelligible if based on the supposition that the story of that catastrophe was a matter of common knowledge; and it would be a carping criticism to argue that the destruction of other cities of the plain at the same time and the whole story of Lot were unknown in the days of Amos because they are not mentioned here in detail. So, when we have in one passage a reference to the house of Isaac (7.10), in another to the house of Jacob (3.13), in another to the house of Joseph (5.6) and in another to the enmity between Jacob and Esau (1.11), we cannot take these as detached notices, but must supply the links which the prophet's words would suggest to his hearers. In other words, such slight notices, just because they are incidental and brief, imply a familiarity with a connected patriarchal history such as is found in the Book of Gen. Again, the prophet's references to the "whole family" of the "children of Israel" whom the Lord "brought up out of the land of Egypt" (5.1), to the Divine leading of the people "forty years in the wilderness to possess the land of the Amorite" (2.10) are not odds and ends of popular story but links in a chain of national history. It seems to be on the strength of these and similar references in the books of Am and Hose, whose dates are known, we have agreed to fix the date of the earliest historical por-
tions of the Pent as they understand them, viz. the parts designated as J and E, in the 8th and 9th cents. BC, i.e. at or shortly before the time of these prophets, and seek to judge of the reader to say whether the references look like references to a newly composed document, or whether it is not more probable that, in an age when written documents were necessarily few and not accessible to the multitude, these references are appeals to things well fixed in the national memory, a memory extending back to the things themselves. Or, if the prophet's words are to be taken as sufficient proof of the existence of written sources, the fact that the matter is at least on the line of prophetic and historical writers of a certain school relegate these legalistic portions of the Pent to a late date. Now at the outset it is obvious to ask what have we a reasonable right to expect of a command to be found in a condition of the people whom Amos addressed, and the purpose and aim of his missions to the Northern Kingdom. It is to be remembered that, as we are told in the Book of K (1 K 12 25; Jer 3 15, 31), it is a system of thought to make a breach between the worship of Jerusalem and that of his own kingdom, while persuading his people that the worship of Jeh was being maintained. The schism occurred some 170 years before the time of Amos and it is not probable that the worship and ritual of the Northern Kingdom tended in that interval to greater purity or greater conformity to what had been the authoritative practice of the undivided kingdom at the temple of Jerus. When, therefore, Amos, in face of the corrupt worship combined with elaborate ritual which prevailed around him, declares that God hates and despises their feasts and takes no delight in their solemn assemblies (5 21), we are not justified in pressing his words to mean that for the same reason a sweeping condemnation of all ritual. On the contrary, seeing that, in the very same connection (5 22), he specifies burnt offerings and meal offerings and peace offerings, and, in another passage (4 4.5), declares that these offerings are a testimony of their righteousness, it is natural to infer that by these terms which are familiar in the Pent he is referring to those statutory observances which were part of the national worship of united Israel, but had been overlaid with corruption and become destitute of spiritual value as practised in the Northern Kingdom. So we may take his allusions to the new moon and the Sabbath (8 5) as seasons of special sacredness and universally sanctioned. Having condemned in such scornful and sweeping terms the worship that he saw going on around him, what was Amos to gain by entering into minute ritual prescriptions or defining the precise duties and perquisites of priests and Levites? Having condemned the pilgrimages to the shrines of Bethel, Gilgal, Beersheba, Samaria and Dan (4 4; 5 6; 8 14), what was he to gain by quoting the law of Deut as to a central sanctuary? And had one of his hearers, like the woman of Samaria of a later day, attempted to draw him into a discussion of the relative importance of the temples, we can conceive him answering in the spirit of the great Teacher: "Ye worship ye know not what: we know what we worship" (Jn 4 22 AV). A regulation of the form was of no avail while the whole spirit of the observance was corrupt; the soul of religion was not practised and the prophet had a higher duty than to dress out the carcass.

At the root of the corruption of the religion lay a rottenness of moral sense; and from beginning to end Amos insists on the necessity of a pure and righteous life. In this connection his appeals are in striking agreement with the specially ethical demands of the law books, and in phraseology so much resemble them as to warrant the conclusion that the requirements of the law on these subjects were known while Amos was writing. Thus his citations of those who oppress the poor (2 7; 5 1; 8 4) are quite in the spirit and style of Ex 22 21, 22; 23 9; his references to the perversity of justice and taking bribes (3 9, 6 7.10 ff; 6 12) are rhetorical enforcements of the prohibitions of the law in Ex 23 6-8; when he reproves those that "lay themselves down beside every altar upon clothes taken in pledge" (2 8) we hear an echo of the command: "If thou at any time lendeth to thy neighbor aught, as money, or victual, or whatever thy neighbor shall require of thee; thou shalt not look to the matter as due before the sun goeth down" (Ex 22 26); and when he denounces those making "the ephah small, and the shekel great, and dealing falsely with balances of deceit" (8 5) his words are in close agreement with the warnings of the other books, in judgment, in mete-yard, in weights, or in measure. Just balances, just weight, a just ephah, and a just hin, shall ye have" (Lev 19 35.36 AV).

Ethical teaching. As a preacher of righteousness, Amos stands next to Isaiah among the ethical parts of the law which are its vital elements, and which lie at the foundation of all prophecy; and it is remarkable how even in phraseology he agrees with the most ethical book of the Pent, Dt. He does not, indeed, like his contemporary Hosea, dwell on the love of God as Dt does; but, on the other hand, in almost the very words of Dt, emphasizes the keeping of God's commandments, and denounces those who despise the law (cf 2 4 with Dt 17 19). Among verbal coincidences have been noticed the combinations "oppress" and "crush" (4 1; Dt 23 33), "blasting" and "mildew" (4 9; Dt 28 22), and "gall" and "wormwood" (6 12; Dt 29 18). Of also 5 8 with Dt 6 15, and note the predilection for the same word to express any linguistic similarity that can be discovered" (H. G. Mitchell, Amos, an Essay in Ezekiologia, 185).

(5) The prophetic order.—As Amos is without doubt one of the earliest writing prophets, his book is invaluable as an example of what prophecy was in ancient Israel. And one thing cannot fail to impress the reader at the very outset: viz. that he makes no claim to be the first or among the first of the line, or that he is exercising some new and hitherto unheard-of function. He begins by boldly speaking in God's name, assuming that even the people of the Northern Kingdom were familiar with that kind of address. Nay, he goes farther and states in unequivocal terms that "the Lord God will do nothing, but he reveals his secret unto his servants the prophets" (3 7 AV). We need not search farther for a definition of the prophet as understood by him and other OT writers: the prophet is one to whom God reveals His will, and who comes forward to declare that will and purpose to the people. We turn to the words of Amaziah the priest of Bethel (7 12), as if they proved that the prophet in those times was
regarded as a wandering rhetorician, earning his bread by reciting his speeches; and it has been inferred from the words of Amos himself that the prophets of his day were so disputatious a class that they could be named along with them (7 14). But all this is fanciful. Even if we admit that there were men calling themselves prophets who prophesied for hire (Mic 3 5,11), it cannot be assumed that the expression here to "eat bread" has that meaning; for in other passages it seems simply to signify to lead a quiet or ordinary life, to go about one's daily business (see Ex 24 11; Jer 22 15). In any case we are not to take the estimate of a man like Amaziah or a godless populace in preference to the conception of Amos himself and his account of his call. It was not by man or by any college of prophets but by Jeh himself that he was appointed, and by whatever name he might be called, the summons was "Go, prophesy unto my people Israel" (7 15). There is no trace here of the "prophets becoming conscious of a distinction between themselves and the professional nbbu'tin, who were apt simply to echo the patriotic and nationalistic sentiments of the people, and in reality differed but little from the soothsayers and diviners who "belonged to the brutes" (of Israel, 90). Whoever the "professional nbbu'tim" may have been in his day, or whatever he thought of them if they existed, Amos tells us nothing; but he ranges himself with men to whom Jeh has spoken (7,9; 8,7). In the announcement that there had been a succession of such men (2 11), faithful amid the prevailing corruption though tempted to be unfaithful (2 12); in short he gives us to understand that the "prophetic order" goes back to a period before his day and having its roots in the true and original religion of Israel.

(6) The prophetic religion.—Finally, from the Book of Am we may learn what the prophetic religion was. Here again there is no indication of rudimentary crudeness of conception, or of painful struggling upward from the plane of naturalism or belief in a merely tribal God. The God in whose name Amos speaks has control over all the forces of Nature (4 6 ff; 5 8,9), rules the despised nations (6 2,4; 9 2-6), searches the thoughts of the heart (4,13), is inflexible in righteousness and deals with nations and with men on equal justice (1 and 2; 9 7), and is most severe to the people who have received the highest privileges (3 2). And this is true whether or not the hearers accept themselves, whose claims they cannot deny, whose dealings with them from old time are well known and acknowledged (2 11), whose laws they have broken (3 4; 3 10) and for whose just judgment they are warned to prepare for (4 12). All this the prophet enforces faithfully and sternly; not a voice is raised in the circle of his hearers to controvert his words; all that Amaziah the priest can do is to urge the prophet to abstain from unwise words in Bethel, because it is the king's sanctuary and a rural house; the only inference is that the people felt the truth and justice of the prophet's words. The "prophetic religion" does not begin with Amos.

JAS. ROBERTSON

AMOS, 'amos (אָמֹס, 'āmōs); An ancestor of Jesus in Lk's genealogy, the eighth before Joseph, the husband of Mary (Lk 3 25).

AMOZ, 'amōz (עָמוֹז, 'āmōz, "strong"): The father of Ilsa the prophet (2 K 19 2,20; 20 1; 2 Ch 26 22; 32 20,32; Isa 1 1; 2 1; 13 1; 20 2; 37 2,21; 38 1).

AMPHIPOLIS, am-fip'o-lis (Ἀμφίπολις, Amphipolis): A town in Macedonia, situated on the eastern bank of the Strymon (mod. Struma or thrua) some three miles from its mouth, near the point where it flows out of Lake Presias or Conclusitis. It lay on a terraced hill, protected on the N., W. and S. by the river, on the E. by a wall (Thuc. iv,102), while its harbor-town of Eton lay on the coast close to the river's mouth. The name was derived either from its being nearly surrounded by the streams from its four main wadies, or on every side, a fact to which Thucydides draws attention (l.c.). It was at first called Αμφίδροτος, Nine Ways, a name which suggests its importance both strategically and commercially. It guarded the main vay from Thessaly to the Adriatic (cf. Eur., Men., 330; Ant. xiv.102), and later became an important station on the Via Egnatia, the great Rom road from Dyrrhachium on the Adriatic to the Hebrus (Mart., and it was the center of a fertile district producing wine, oil, figs and almonds. The first Roman colony on the coast there in 437 under the leadership of Hagnon. The population, however, was too mixed to allow of strong Athenian sympathies, and in 424 the town fell away to the "sacred leader" Alexius and defied all the subsequent attempts of the Athenians to recover it. It passed under the protectorate of Perdicas and Philip of Macedon, and the latter finally made himself master of it in 358. On the Rom partition of Macedonia it became a Roman colony (19 BC) Amphipolis was made a free city and capital of Macedonia Prima. Paul and Silas passed through it on their way from Philippi to Thessalonica, but the narrative seems to preclude a long stay there. The place was called Popolis in the Middle Ages, while in modern times the village of Neohorai (Turkish, Venikoy) marks the site (Leake, Northern Greece, III, 181 ff; Cousinéry, Macedoine, I, 100 ff, 122 ff; Heusay and Daumet, Mission archéol. de Macedoine, I, 259). The name is from the same root as *Amphitrite*, the Thessalian goddess, and in ref. to its being a double town, "Amphi" in Greek means both "twice" and "full".

AMPLIUS, am-pl'is (Ἀμπλίας, Amphiás); AV form: a contraction of AMPHILIAUS (thus RV; q.v.).

AMPLIATUS, am-pl'i-á-tus (Ἀμπλίάτας, Amphilaíos; Ἀμφιλάες, DELP, RV form; AV AMPLIAS): The name of a member of the Christian community at Rome, to whom Paul sent greetings (15 8). He is designated as "the beloved hierarch ... Lord." It is a common name and is found in inscriptions connected with the imperial household. The name is found twice in the cemetery of Dami-llia. The earlier inscription is over a cell which belongs to the end of the 2d cent. The bearer of this name was probably a member of her household and conspicuous in the early Christian church in Rome.

AMRAM, am'ram (עָמָראָם, amrám, "people exalted"): (1) Father of Aaron, Moses and Miriam (Ex 6 20; Nu 26 59; 1 Ch 6 3; 23 13); and a son of Kohath, the son of Levi (Ex 6 18; Nu 3 19, etc.). It is not certain that he was the real son of Kohath, but rather his descendant, since there were ten generations from Joseph to Joshua.
AMRAMITES, am'ram-it's (ארממאים, 'amramā'im): The descendants of Amram, one of the Levitical families mentioned in 1 Ch 6 20, who had the charge of the tabernacle proper, guarding the ark, table, candlestick, etc, called in 1 Ch 23 22 "the treasures of the house of Jesh." 

1. The Expedition Against Sodom and Gomorrah

(1 Ch 1 41) (AV) for the properly read HAMRAN of the RV (הַהָרָן, hamrān), a Horite, who in Gen 36 26 is called HEMDAN (q.v.).

2. The Preparation and the Attack

At this juncture the kings of the cities of the plain came out against them, and opposed them with their battle-array in the vale of Siddim. The result of the fight was, that the kings of Sodom and Gomorrah, with their allies, fled, and fell among the bitumen-pits of which the place was full, whilst those who got away took refuge in the mountain. All the goods and food (the camp-equipment and supplies of the kings of the plain) were captured by Chedorlaomer, and his allies, who then continued their march (to their own lands) (vs 8-11).

Among the captives, however, was Lot, Abram's nephew, who dwelt in Sodom. A fugitive, having escaped, went and announced the result of the engagement to Abram, who was at that time living by Mamre's oak plantation. The patriarch immediately marched with all his trained men, and pursued them to Dan, where he divided his forces, attacked the Elamite-Bab army by night, and having put them to flight, pursued them again to Hobah, on the left (or N.) of Damascus. The result of this sudden onslaught was that he rescued Lot, with the women and people, and recaptured Lot's goods, which the allies of Amraphel had carried off (vs 12-16). There is no doubt that the identification of Amraphel with the Hammurabi of the Bab inscriptions is the best that has yet been proposed, and though there are certain difficulties therein, these may turn out to be apparent rather than real, when we know more of Bab history. The last at the end would be Amraphel (which has also p) instead of Amram (which is more natural), as well as the fact that the expedition itself has not yet been recognized among the campaigns of Hammurabi, must be acknowledged as two points hard to explain, though they may ultimately be solved by further research. It is noteworthy, however, that in the first ver of Gen 14 Amraphel is mentioned first, which, if he be really the Bab Hammurabi, is easily comprehensible, for his renown to all appearance exceeded that of Chedorlaomer, the best that has yet been proposed. In vs 5, however, it is Chedorlaomer alone who is referred to, and he heads the list of eastern kings in ver 9, where Tidal comes next (a quite natural order, if Goim be the Bab Guté, i.e. the Medes). Next in order comes Amraphel, king of Babylonia, and suzerain of Arioch of Ellasar (Err-Aku of Lorsa), whose name closes the list. It may also be suggested, that Amraphel led a Bab force against Sodom, as the ally of Chedorlaomer, before he became king, and was simply crowned prince. In the case, like Belhazzar, he was called "king" by anticipation. For further details see Arioch and Chedorlaomer, and of Err-Aku and Hammurabi; for the history of Babylonia during Hammurabi's period, see that article.

T. G. PINCHES

AMULET, am'ū-lēt (אַמַּלְעֵת, gismith; ἀμαλλετόν, ἀμαλλήσιον, ἀμαλλησίσιον; φυλακτήριον): Modern scholars are of opinion that our Eng. word amulet comes from the Lat amuletum, used by Pliny (Naturalis Historia, xxviii, 38; xxx, 2, etc), and other Lat writers; but no etymology of his is generally admitted. The present writer thinks the root exists in the Arab. himlat, "something carried" (see Dozy, Supplément aux Dictionnaires Arabes, I, 327), though there is no known example of the use of the Arab word in a material sense. Other writers have denoted any object supposed to have the power of removing or warding noxious influences believed to be due to evil spirits, etc, such as the evil eye, etc. But in the common usage it stands for an object worn on the body, generally hung from the neck, as a remedy or preservative against evil influences of a mystic kind. The word "amulet" occurs once in the RV (Isa 3 20) but not at all in the AV.

The substances out of which amulets have been made and the forms which they have taken have been various:

1. Classes
   (1) The commonest have consisted of Amulets of pieces of stone or metal, strips of parchment with or without inscriptions from sacred writings (Bible, Koran, etc). The earliest Egyptian amulets known are pieces of green schist of various shapes—animal, etc. These were placed on the breast of a deceased person in order to secure a safe passage to the under-world. When a piece of stone is selected as an amulet it is always portable and generally of small size (the human face, etc). The use of such a stone for this purpose is really a survival of animism.
   (2) Gems, rings, etc. It has been largely held that all ornaments worn on the person were originally amulets.
   (3) Certain herbs and animal prepar-
rations; the roots of certain plants have been considered very potent as remedies and preservatives.

The practice of wearing amulets existed in the ancient world among all peoples, esp. among Orientals; and it can be traced among most modern nations, esp. among peoples of backward civilization. Nor is it wholly absent from peoples of the most advanced civilization of today, the English, Americans, etc. Though the word charm (see CHARM) has a distinctive meaning, it is often inseparably connected with amulets, for it is in many cases the incantation or charm inscribed on the amulet that gives the latter its significance. As distinguished from talisman (see TALISMAN) an amulet is believed to have negative results, as a means of protection; a talisman is thought to be the means of securing for the wearer some positive boon.

Though there is no word in the Heb or Gr Scriptures denoting “amulet,” the thing itself is manifestly implied in many parts of the Bible. But it is remarkable that the same term is used in the Bible as a technical term. The OT writers is wholly and strongly opposed to such things.

1. The Old Testament. The golden ear-rings, worn by the wives and sons and daughters of the Hebrews, out of which the molten calf was made (Ex 32 2 f), were undoubtedly amulets. What other function could they be made to serve in the simple life of the desert? That the women’s ornaments condemned in Isa 3 16–20 were of the same character is made exceedingly likely by an examination of some of the terms employed. We read of moonlets and sunlets (ver 18), i.e. moon and sun-shaped amulets. The former in the shape of crescents are worn by Arab girls of our own time. The “ear-drops,” “nose-rings,” “arm chains” and “foot chains” were all used as a protection to the part of the body implied, and the strong words with which their employment is condemned are only intelligible if their function as counter charms is borne in mind. In Isa 3 20 we read of ḭăšîm rendered “ear-rings” (AV) and “amulets” (RV). The Heb word seems to be cognate with the word for “serpent” (m’tzâsh, l and r often interchange), and meant probably in the first instance an amulet against a serpent bite (see Magic, Divination, and Demonology among the Hebrews and Their Neighbours, by the present writer, 50 f; cf Jer 8 7; Eccl 10 11; Ps 58 5). Crescent-shaped amulets were worn by animals as well as human beings, as Jes 44 9.

At Bethel, Jacob burned not only the idols (“strange gods”) but also the ear-rings, the latter being as much opposed to Yahwism as the former, on account of their heathen origin and import.

In Prov 17 8 the Heb words rendered “precious stone” (Heb “a stone confering favor”) mean without question a stone amulet treasured on account of its supposed magical efficacy. It is said in Prov 19 9 that wisdom will be such a defence to the one who has it as the head amulet is to the head and that of the neck to the neck. The words rendered in the RV “a chaplet of grace unto thy head” mean lit. “something bound to the head conferring favor.” The one word for the latter clause being identical with that so rendered above (ḥān). The Talm word for an “amulet” (ḥarmî) denotes something tied or bound (to the person).

We have reference to the custom of wearing amulets in Prov 6 21 where the reader is urged to “bind them [i.e. the admonitions of father and mother] upon thy heart” and to “tie them about thy neck”—words implying a condemnation of the practice of trusting to the defence of mere material objects.

Underneath the garments of warriors slain in the Maccabean wars amulets were found in the shape apparently of idols worshipped by their neighbors (2 Macc 12 40). It is strange but true that like other nations of antiquity the Jews attached more importance to amulets obtained from other nations than to those of native growth. It is probable that the signet ring referred to in Cant 6 6; Jer 22 24; Hag 2 23 was an amulet. It was worn on the heart or on the arm.

2. The phylacteries and the m’tzâsh. There is no distinct reference to these in the OT. The Heb technical term for the former (ḥp’ḥlîn) does not occur in Bib. Heb., and although the Heb word m’tzâsh does occur over a dozen times its sense is invariably that of “gate” (or “gateway”) post and not the amulet put on the door-post which in later Heb the word denotes.

It is quite certain that the practice of wearing phylacteries has no Bib. support, for a correct exegesis and a proper understanding of the passage go beyond the dispute that the words in Ex 13 9, 16; Dt 6 8 f; 11 18–20 have reference to the exhortations in the foregoing verses: “Thou shalt bind them [the commands previously mentioned] for a sign upon thy hand, and they shall be for a frontlet between thy eyes. And thou shalt write them upon the door-posts of thy house, and upon thy gates” (Dt 6 8 f). The only possible sense of these words is that they were to hold the precepts referred to before their minds constantly as if they were inscribed on their arms, held in front of their eyes, and written on the door- or gate-posts which they daily passed. That the language in Ex 13 9, 16 does not command the use of phylacteries is obvious; and that the same is true of Prov 3 3; 6 21; 7 3 where similar words are used is still more certain.

Yet, though none of the passages enjoin the use of phylacteries or of the m’tzâsh, they may all contain allusions to both practices as if the sense were, ‘Thou shalt keep constantly before thee my words and look to them for safety and not to the phylacteries worn on head and arm by the heathen.’ If, however, phylacteries were in use among the Jews thus early, it is strange that there is not in the OT a single instance in which the practice of wearing phylacteries is mentioned. Jos, however, seems to refer to this practice (Ant, IV, viii, 13), and it is frequently spoken of in the Mish (B. ḫakah, 1, etc).
It is a striking and significant fact that the Apoc is wholly silent as to the three signs of Judaism, phylacteries, the mezuzah and the phylacteries (or tassel attached to the corner of the prayer garment called tallith; cf Mt 9 20; 14 36 AV when "hem of the garment" is inaccurate and misleading).

It is quite evident that phylacteries have a magical origin. This is suggested by the Gr name phukaterion (whence the Eng. name) which in the 1st cent. of our era denoted a counter charm or defence (phulasso, "to protect") against evil influences. No scholar now explains the Gr word as denoting a means of leading people to keep (phulasso) the law. The Heb name 'philotin (="prayers") meets us first in post-Rab. Heb, and carries with it the later view that phylacteries are used during prayer in harmony with the prayers or other formulæ over the amulet to make it effective (see Budge, Egyptian Magic, 27). See more fully under Chlam.

LITERATURE.—In addition to the lit. given in the course of the foregoing art., the following may be mentioned. On the general subject see the great works of Tyler (Early History of Man: Prayer and Culture) and Fraser, Golden Bough; also the series of arts. under "Charmes and Amulets" in 2 Son of Zion (Eisen and Ethbon) and the excellent article "Amulet" in the corresponding German work, Die Religion in Geschichte und Gegenwart. See further the art. "Amulets" in JEW Enc. and Budge, Egyptian Magic, 26 ff.

T. WITTON DAVIES

AMZI, amzi (עַמְצִי, "amzi, "my strength"): (1) A Levite of the family of Merari (1 Ch 6 46). (2) A priest of the family of Adahiah in the second temple. His father's name was Zechariah (Neh 11 12).

ANAB, an'ab (的价值. "ahabh, "grapes"): B. 'Av'ev, and 'Ab'ab, Anabh (Anab). Mentioned in the list of cities which fell to Judah (Josh 15 50). In the list it follows Debir, from which it was a short distance to the S.W. It lay about twelve miles to the S.W. of Hebron. It was a city of the Anakim, from whom Joshua took it (Josh 11 21). Its site is now known as the ruin Anab.

ANÄEL, an'a-el (ב"שא, "Anäel, "Añael): A brother of Tobit mentioned once only (Tob 1 21) as the father of Achaebarus, who was an official in Nineveh under Esar-haddon.

ANAH, an'a (אנה, "ahabh, meaning uncertain; a Horite clan-name [Gen 36]):

(1) Mother of Aholibamah, one of the wives of David at Jerusalem (cf Gen 36 2 14 18 25). The IXX, the Sam Pent, and the Pesh read "son," identifying this Anah with no. 3 (see below); Gen 36 2, read מִאָן (ma-an), for מִיָּן (miyân) (ha-bôrî), for מִיָּן (miyân) (ha-bôrî).

(2) Son of Seir, the Horite, and brother of Zibeon; one of the chiefs of the land of Edom (cf Gen 36 20 21 =1 Ch 1 38). Seir is elsewhere the name of the land (cf Gen 14 6; Isa 21 11) but here the country is personified and becomes the mythical ancestor of the tribes inhabiting it.

"This Anah who found the hot springs in the wilderness" (cf Gen 36 24 =1 Ch 1 40 41). The word בּשָּׂר (ba-shâr), occurs only in this passage and is probably corrupt. Ball (SBOT, Gen, crit. note 93) suggests that it is a corruption of בּשָּׂר, w-hêmâm (cf Gen 36 22) in an earlier version of Jerome, in his commentary on Gen 36 24, assembles the following definitions of the word gathered from Jewish sources: (1) "sense" as though בּשָּׂר, yâmmân; (2) "hot springs" as though בּשָּׂר, hâmâmîn; (3) a species of ass, ב"שר, yâmmîn; (4) "mules." This last explanation was the one most frequently met with in Jewish lit.; the word Anah was used first to be the name of the mule, thus bringing into existence an unnatural species. As a punishment, God created the deadly water-snake, through the union of the common viper with the Libyan lizard (cf Gen Rabbah 82 15; Yer. Ber 1 1 12b); Bab Pesi 60a; Ginberg, Monatschrift, XLII, 538 39).

The descent of Anah is thus represented in the three ways pointed out above as the text stands. If, however, we accept the reading בּשָּׂר, for בּשָּׂר, bath, in the first case, Aholibamah will then be the unmarried daughter of the Anah of ver 24, not the Aholibamah, daughter later of Anah of ver 25 (for the Anah of this verse is evidently the one of ver 20, not the Anah of ver 24). Another view is that the words, "the daughter of Zibeon," are a gloss, inserted by one who mistakenly identified the Anah of ver 25 with the Anah of ver 24; in this event, Aholibamah, the daughter of Anah, will be the one mentioned in ver 25.

The difference between (2) and (3) is to be explained on the basis of a twofold tradition. Anah's origin is thus made subterranean as Zibeon, and both were "sons of Seir"—i.e. Horites.

H. J. WOLF

ANAHARATH, an-nâ'ha-rath (אֲנָהְרַ֣ת, "ânâôrâth, "meaning unknown: A place which fell to the tribe of Issachar in the division of the land (Josh 19 17). Located in the valley of Jehoshaphat toward the E., the name and site being preserved as the modern en-Na'ârâ). BB is wrong in assigning it to the tribe of Naphtali.

ANAIAH, an-nâ'a, an-nâ'â (אֲנָיָ֣ה, "ânâ'yâ, "Jah has answered"): (1) A Levite who assisted Ezra in reading the law to the people (Neh 8 4), perhaps the person called Anaias in Ead 9 43. (2) One of those who sealed the covenant (Neh 10 22). He may have been the same as Anaias (1).

ANAK, an'ak. See ANAKIM.

ANÄKIM, an'a-kim (אֲנָקִים, "ânakîm; "Evaaskî, Enakim, or "Evâskî, Enakîm; also called "sons of Anak." [Nu 13 33], and "sons of the Anakim" [Dt 1 20]). The spies (Nu 13 33) compared them as to the Nephilim or "giants" of Gen 6 4, and according to Dt 2 11 they were reckoned among the Rephanim (q.v.). In Nu 13 22 the chiefs of Hebron are said to be descendants of Anak, while "the father of the Anakim" is said to have been killed (Dan 1 11) to be Abra after whom Hebron was called "the city of Arba." Josh cut off the Anakim . . . from Hebron, from Debir, from Anak, . . . and from all the hill-country of Israel; remnants of them being left in the Phili cities of Gaza, Gath and Ashdod (Josh 11 21 22). As compared with the Israelites, they were tall like giants (Nu 13 33), and it would therefore seem that the "giant" Goliath and his family were of their race. At Hebron, at the time of the Israelitish conquest, we may gather that they formed the body-guard of the Amorite king (see Josh 10 5) under their three leaders Sheshai, Ahiman and Talmai (Nu 13 22; Josh 15 14; Jgs 1 20). Am Tab show that the Can princes were accustomed to surround themselves with body-guards of foreign mercenaries. It appears probable that the Anakim came from the Aegian like the Philistines, to whom they may have been related. The name Anak is a masculine corresponding with a feminine which we meet with in the name of the goddess Onoka, who according to the Gr writers, Stephanus of Byzantium and Hesychius, was the "Phoen," i.e. Syrian equivalent of Athena. Anket or Anukit was also the name of the goddess worshipped by the Egyptians at the First Cataract. In the name Ahiman it is possible that -man denotes a non-Semitic deity.

A. H. SAYCE
ANAMIM, an-a-mîm (אָנָּמִים, ’ănāmîm): Descendants of Mizraim (Gen 10:13; 1 Ch 1:11). See Table of Nations.

ANAMMELECH, a-nâm-‘e-lek (אֶמְאָמֶלְךָ, ’âmâmelah): Assyр. Anû-malîk, “Anû is the prince”**: A Bab (?) deity worshipped by the Sepharvites in Samaria, after being transported there by Sargon. The worship of Adrammelech (who is mentioned with Anammelech) and Anammelech is accompanied by the sacrifice of children by fire: “The Sepharvites burnt their children in the fire to Adrammelech and Anammelech, the gods of Sepharvaim.” (2 K 17:31). This passage presents two grave difficulties. First, there is no evidence in euniceform lit. that would point to the presence of human sacrifice, by fire or otherwise, as part of the ritual; nor has it been shown that the sculptures or bas-reliefs deny this thesis. Much depends upon the identification of “Sepharvaim”; if, as some scholars hold, Sepharvain and Sippar are one and the same cities, the two deities referred to are Bab. But there are several strong objections to this theory. It has been suggested that Sepharvaim (LXX. Sephrarh, sephrelëin) is rather identical with “Shabarâ’in,” a city mentioned in the Bab Chronicle as having been destroyed by Shalmaneser IV. As Sepharvain and Arpad and Hamath are grouped together (2 K 17:24; 18:34) it is probable that Sepharvain is a Syc city. Sepharvain may then be another form of “Shabarâ’in,” which, in turn, is the Assyrian form of Sbrain (Ezk 47:16), a city in the neighborhood of Damascus (cf. Halévy, ZA, II, 401 ff). One objection to this last is the necessity for representing ū (ū) by sh; this is not necessarily insurmountable, however. Then, the attempt to find an Assyrian etymology for the two god-names falls to the ground. Besides, the custom of sacrifice by fire was prevalent in Syria. Secondly, the god that was worshipped at Sippar was neither Adrammelech nor Anammelech but Samâ’s. It is improbable, as some would urge, that Adrammelech is a secondary title of the tutelary god of Sippar; then it would have to be shown that Anû enjoyed special reverence in this city which was especially consecrated to the worship of the Sun-god. (For “Anû” see ASSYRIA.) It may be that the text is corrupt. See also ADAMMELECH.

ANAN, a-nân (אֲנָן, ’ānān, “cloudiness”): (1) One of those who, with Neh, sealed the covenant (Neh 10:26). (2) A returned exile (1 Esd 5:30). He is called Hanan in Ezr 2:46 and Neh 7:49.

ANANIA, a-nâ-nî (אֲנָנִי, ’ânâni, perhaps a shortened form of Ananiah, “Jehovah has covered”): A son of Eleazar of the house of David, who lived after the captivity (1 Ch 3:24).

ANANIAH, a-nâ-nî’â (אֲנָנִיָּה, ’ânâniâh, “Jehovah has covered”): (1) Grandfather of Azariah. He assisted in repairing the walls of Jerusalem (Neh 3:23). (2) A town of Benjamin mentioned in connection with Nob and Hazor (Neh 11:32). It is commonly identified with Beit Hamma, between three and four miles N.N.W. from Jerusalem.

ANANIAS, a-nâ-nî’as (אָנָנִיאָס, WH, Ἄνανίας, Hananías; Ἄνανιάς, hânânîâh, “Jeh has been gracious”): The name was common among the Jews. In its Heb form it is frequently found in the OT (e.g. 1 Ch 25:4; Jer 29:1; Dtn 1:6). See Hanan.

Husband of Sapphira (Acts 5:1-10). He and his wife sold their property, and gave to the common fund of the church part of the purchase money, pretending it was the whole. When his hypocrisy was denounced by Peter, Ananias fell down dead; and three hours later his wife met the same doom.

1. A Disciple at Jerusalem: The following points are of interest.

(1) The narrative immediately follows the account of the intense brotherliness of the believers resulting in a common fund, to which Barnabas had made a generous contribution (Acts 4:32-37). The sincerity and spontaneity of the gifts of Barnabas and the others act forth in dark relief the false pretended devotion. (2) This passage presents two grave difficulties. First, there is no evidence in euniceform lit. that would point to the presence of human sacrifice, by fire or otherwise, as part of the ritual; nor has it been shown that the sculptures or bas-reliefs deny this thesis. Much depends upon the identification of “Sepharvaim”; if, as some scholars hold, Sepharvain and Sippar are one and the same cities, the two deities referred to are Bab. But there are several strong objections to this theory. It has been suggested that Sepharvaim (LXX. Sephrarh, sephrelëin) is rather identical with “Shabarâ’in,” a city mentioned in the Bab Chronicle as having been destroyed by Shalmaneser IV. As Sepharvain and Arpad and Hamath are grouped together (2 K 17:24; 18:34) it is probable that Sepharvain is a Syc city. Sepharvain may then be another form of “Shabarâ’in,” which, in turn, is the Assyrian form of Sbrain (Ezk 47:16), a city in the neighborhood of Damascus (cf. Halévy, ZA, II, 401 ff). One objection to this last is the necessity for representing ū (ū) by sh; this is not necessarily insurmountable, however. Then, the attempt to find an Assyrian etymology for the two god-names falls to the ground. Besides, the custom of sacrifice by fire was prevalent in Syria. Secondly, the god that was worshipped at Sippar was neither Adrammelech nor Anammelech but Samâ’s. It is improbable, as some would urge, that Adrammelech is a secondary title of the tutelary god of Sippar; then it would have to be shown that Anû enjoyed special reverence in this city which was especially consecrated to the worship of the Sun-god. (For “Anû” see ASSYRIA.) It may be that the text is corrupt. See also ADAMMELECH.

3. A High Priest at Jerusalem: the high priestly office by Herod of Chaleci. In 52 AD he was sent to Rome by Quadratus, legate of Syria, to answer a charge of oppression brought by the Samaritans, but the emperor Claudius acquitted him. On his return to Jerusalem, he resumed the office of high priest. He was deposed shortly before Felix left the province, but continued to wield great influence, which he used in a lawless and violent way. He was a typical Sadducee, wealthy, haughty, corrupt, filling his sacred office for purely selfish and political ends, anti-nationalist in his relation to the Jews, friendly to the Romans. He died an ignominious death, being assassinated by the popular zealots (sicarii) at the beginning of the last Jewish war. In the NT he figures in two passages. (1) Acts 23:1-5, where Paul defends himself before the Sanhedrin. The overbearing conduct of Ananias in commanding Paul to be struck on the mouth was characteristic of the man. Paul's cry was for mercy, and he hurled back the scurrilous epithet of "whited wall." On being called to account for "reviling God's high priest," he quickly recovered the control of his feelings, and said "I knew not, brethren, that he was high priest:"
ANATHOTH, an'a-thoth (אנותות, 'anənəthoth; אנהות, Anathoth): A town which lay between Michmash and Jerus (Isa 10 30), in the territory of Benjamin, assigned to the Levites (Josh 21 18). It was the native place of Abiathar (1 K 2 20), and of the prophet Jer (Jer 1 1; 11 21 ff, etc.). Here lay the field which, under remembrances connected with the place where, according to the traditions of David, his small village of some fifteen houses with remains of ancient walls. There are quarries in the neighborhood from which stones are still carried to Jerus. It commands a spacious outlook over the uplands to the N., and especially to the S.E., over the Jordan valley toward the Dead Sea and the mountains of Moab. There is nothing to shelter it from the withering power of the winds from the eastern deserts (Jer 4 11; 18 17, etc.).

W. Ewing

ANATHOTHITE, an'a-thoth-it (אנותית, 'anənəthīt): RV form of AV Anathothite, Anathotithe, Antothite. An inhabitant of Anathoth, a town of Benjamin assigned to the Levites. The Anathothites (1) (Abiezer, one of David's thirty heroes (2 S 23 27; 1 Ch 11 21 ff; Jer 37 5), and Zebah and Zalmunna, two of the officers of David's distinguished soldiers); Abiezir (2 S 3 27) and Jehu (1 Ch 12 3), also hailed from Anathoth. It was again occupied by the Benjamites after the return from the Exile (Neh 11 32, etc.). It is identified with 'Anathoth', the small village of Jerus, a small village of some fifteen houses with remains of ancient walls. There are quarries in the neighborhood from which stones are still carried to Jerus. It commands a spacious outlook over the uplands to the N., and especially to the S.E., over the Jordan valley toward the Dead Sea and the mountains of Moab. There is nothing to shelter it from the withering power of the winds from the eastern deserts (Jer 4 11; 18 17, etc.).

ANCHOR, an'kér. See Ships.

ANCIENT, an'shent: This word renders several Heb words: (1) קֶדֶם, kedem, which denotes "beforetime," "yore"; generally the remote past (cf Dt 33 15, "ancient mountains"); (2) קָדָם, qadam, "old" or "elders" when the pl. form is found) in six cases "ancient" is used and "ancestors" in nine cases. See ANCESTORS.

ANCIENT OF DAYS (זEnemies, יז_xy, 'attīq yōmīn, -āram;): On יז_xy, 'attīq, see ANCIENT (4). The expression is used in reference to God in Dn (7 9.13.22) and is not intended to suggest the existence of God from eternity. It was the venerable appearance of Yahweh, the "ancient of days," before the writer's mind: "What David sees is not the eternal God Himself, but an aged man, in whose dignified and impressive form God reveals Himself (cf Ezek 1 26)" (Keil).

Thomas Lewis

ANCIENT OF DAYS (ז Enemies, יז_xy, 'attīq yōmīn, -āram;): On יז_xy, 'attīq, see ANCIENT (4). The expression is used in reference to God in Dn (7 9.13.22) and is not intended to suggest the existence of God from eternity. It was the venerable appearance of Yahweh, the "ancient of days," before the writer's mind: "What David sees is not the eternal God Himself, but an aged man, in whose dignified and impressive form God reveals Himself (cf Ezek 1 26)" (Keil).

Thomas Lewis
ANCIENTS, an-shents: This word (except in one instance) renders the Heb word צֶ֫עַדְתָּא, צֶ֫עַדְתָּא (pl. of צְעַדָּה, צְעַדָּה), which should always be tr' "old men" or "elders." The Heb word צֶ֫עַדְתָּא (pl. of צְעַדָּה, צְעַדָּה), which is the connotation which "ancients" has in modern Eng. The words "I understand more than the ancients" (Ps 119 100 AV) do not mean that the Psalmist claims greater wisdom than his distant forbears but than his contemporaries with all their age and experience. In the parallel clause "teachers" is the corresponding word. In such phrases as "ancients of the people" (Jer 19 1 AV), "ancients of the house of Israel" (Ezk 8 12), "elders" would obviously be the correct rendering, as in RV. Even in Isa 24 23 ("before his face gathereth his elders" and ERV) "elders" is the right tr (ARY). The writer probably alludes to the Sin. theophany witnessed by the "seventy ... elders" (Ex 24 9-18). Generally speaking the word suggests the experience, insight and praiseworthy wisdom of an elder. There is a parallel usage in the Greek "τελείους πάσης ὁμοιότητος," which means "men of former times." ANCLE, an'k'l. See ANKLE.

ANDREW, an'drew ('Aνδρέας, Άνδρας, i.e. "manly."). The name has also been interpreted as "the mighty one, or conqueror"); Andrew was the first called of the Twelve Apostles.

I. In New Testament. — Andrew belonged to Bethsaida of Galilee (cf John 1 44). He was the brother of Simon (Peter) and his father, Zebedee, was a fisherman (John 1 42). He was called by Jesus (John 1 40). He was the means at this time of bringing his brother Simon Peter also to Christ (John 1 44). Andrew was probably a companion of Jesus on his return journey to Galilee, and was thus present at the marriage in Cana of Galilee (John 2 2), in Capharnaum (John 1 24), at the Passover in Jerusalem (John 2 13), at the baptizing in Judea (John 3 22), where he himself may have taken part (cf John 4 2), and in Samaria (John 4 5).

On his return to Galilee, Andrew resumed for a time his old vocation as a fisherman, till he received his second call. This happened after John the Baptist was cast into prison (cf Mark 1 14; Matthew 4 12) and is described in Mark 1 16-18; Matthew 4 18-19.

Ordination The two accounts are practically identical, and tell how Andrew and his brother were now called on definitely to forsake their mundane occupations and become fishers of men (Mark 1 17). The corresponding narrative of Luke varies in part; it does not mention Andrew by name, and gives another, additional detail of the miraculous draught of fishes. Some by it has been regarded as an amalgamation of Mark’s account with John 21 1-8 (see James, Son of Zebedee). After a period of companionship with Jesus, during which, in the house of Simon and Andrew, Simon’s wife’s mother was in distress (Mark 3 17, cf Luke 7 11-15), the call of Andrew was finally consecrated by his election as one of the Twelve Apostles (Mark 10 2; Matthew 10 3; Luke 6 14; Acts 1 13).

Further incidents recorded of Andrew are: At the feeding of the five thousand by the Sea of Galilee, the attention of Jesus was drawn by Andrew to the lad with five barley loaves and two fishes (John 6 9-11). At the foot of the Passover, the Greeks who wished to "see Jesus" inquired of Philip, who turned for advice to Andrew, and the two then told Jesus (John 12 20-36). On the Mount of Olives, Andrew along with Peter, James and John, related the resurrection of Jesus regarding the destruction of Jerusalem and the end of the world (Mark 13 3-28; cf also Matthew 24 3-28; Luke 21 5-24).

II. In Apocryphal Literature. — The name of Andrew’s mother was traditionally Joanna, and according to the "Apocrypha, the "Genealogy of the Twelve Apostles" (Budge, "Contendings of the Apostles", II, 49) he belonged to the tribe of Reuben, the tribe of his father. A fragment of a Coptic gospel of the 4th or 5th cent. tells how not only Thomas (John 20 27), James and John, but also Andrew was consumed by fire (4). The "Gospel of the Apostles" (ed Condon, 4) mentions Bithynia, Eusebius gives Scythia (Hebrew III, 1, and others Greece (Lipsius, "Apokryphen Apostelgeschichten", I, 63). The Muratorian Fragment relates that John wrote his gospel in consequence of a revelation given to Andrew, and this would point to Ephesus (cf Hennecke id., 459).

The "Contendings of the Twelve Apostles" (for historicity, authorship, etc. of this work, cf Budge, "Contendings of the Apostles", Intro; Hennecke, "Handbuch zu den neutestamentlichen Apokryphen", 351-588; RE, 664-666) contains several parts dealing with Andrew: (1) "The Preaching of St. Andrew and St. Philip among the Kurds" (Budge, II, 163 ff) narrates the appearance of Andrew to the disciples, the sending of St. Andrew to Lydia and his conversion of the people there. (2) The "Preaching of St. Matthias in the City of the Cannibals" (Budge, II, 267 ff; REH, 666) tells of how St. Matthias, on being imprisoned and blinded, was released by St. Andrew, who had been brought to his assistance in a ship by Christ, but the two were afterward again imprisoned. St. Matthias then caused the city to be inundated, the disciples were set free, and the people converted. (3) "The Acts of St. Andrew and St. Bartholomew" (Budge, II, 183 ff) gives an account of their mission among the Parthians. (4) According to the "Martyrdom of St. Andrew" (Budge, II, 215) he was stoned and crucified in Scythia.

According to the surviving fragments of "The Acts of St. Andrew," a heretical work dating probably from the 2d cent., and referred to by Eusebius (HE, III, ii, 5), the scene of St. Andrew’s death was in Achia, the tribe of Joseph, by tigers, and crucified by order of the proconsul Êges (or Aegetes), whose wife had been estranged from him by the preaching of St. Andrew (cf Hennecke, 459-73; Pfeiffer, "Apostolic Apocryphal Acts", 201-21; Lipsius, I, 543-622). A so-called "Gospel of St. Andrew" is mentioned in "The Innocent I", Ep. I, iii, 7 and Augustine ("Contra Advers. Leg. et Prophet., I, 20), but this is probably due to a confusion with the above-mentioned "Acts of St. Andrew."
The relics of St. Andrew were discovered in Constantinople in the time of Justinian, and part of his cross is now in St. Peter's, Rome. St. Andrew is said to have been the patron of Scotland, where his arrival is said to have been transferred by St. Regulus. The ascription to him of the deusque cross is of late origin.

III. Character.—There is something significant in Andrew's being the first called of the apostles. This may have been an important reason for the lead given by Andrew depended the action of the others. Christ perceived that the soul's unrest, the straining after higher things and a deeper knowledge of God, which had induced Andrew to make the pilgrimage to Bethany, gave promise of a rich spiritual growth, which no doubt influenced Him in His decision. His wisdom and insight were justified of the after event. Along with a keenness of perception regarding spiritual truths was coupled in Andrew a strong sense of personal conviction which enabled him not only to accept Jesus as the Messiah, but to win Peter also as a disciple of Christ. The incident of the Feeding of the Five Thousand displayed Andrew in a new aspect in which he played a striking contrast to the feeble-mindedness of Philip. Both these traits—his missionary spirit, and his decision of character which made others appeal to him when in difficulties—were evident in the time when the Greeks sought to interview Jesus. Andrew was not one of the greatest of the apostles, yet he is typical of those men of broad sympathies and sound common sense, without whom the success of any great movement cannot be assured.

C. M. KERR

ANDRONICUS, an-dro-nik'us (Ἀνδρόνικος, Andrónikos): (1) A deputy of Antiochus Epiphanes, who, while ruling at Antioch, erected the Jews by the murder of Onias, and, upon their formal complaint, was executed by his superior (2 Mac 4:32-38); generally distinguished from another officer of the same name, also under Antiochus (2 Mac 5:23).

(2) A kinsman of Paul, residing at Rome (Rom 16:7). He had been converted to Christianity before Paul, and, like Paul, had suffered imprisonment, although when and where can only be surmised. When he and Junias, another kinsman of Paul, are referred to as "of note among the apostles," this may be interpreted as either designating the high esteem in which they were held by the Twelve, or reckoning them in the number of apostles. The latter is the sense, if "apostle" be understood here in the more general meaning, used in Acts 14:14 of Barnabas, in 2 Cor 8:23 of Titus, in Phil 2:25 of Epaphroditus, and in the Did of "the traveling evangelists or missionaries who preached the gospel from place to place" (Schaaf, The Teaching of the Twelve Apostles, 67; see also Lightfoot on Philippians, 196). On this assumption, Andronicus was one of the most prominent and successful of the traveling missionaries of the early church.

H. E. JACOBS

ANEM, 'anem (عبر, 'ānēm, "two springs"); 'Ānēm, 'Ānēm: Anem is mentioned with Ramoth among the cities of Issachar assigned to the priests, the sons of Gershom (1 Ch 6:73). In the parallel list (Josh 21:29), there are mentioned Jarmuth and En-gannim, corresponding to Ramoth and Anim, therefore Anim and En-gannim (Jenin) are identical. As the name denotes (Anem = "two springs"; En-gannim = "the spring of gardens"), it was well suited to the country; it was adjacent to the rich sections inhabited by Edomites with Aner, but Condor suggests the village of "Anim," on the hills W. of the plain of Esdraelon which represents the Anea of the 4th cent. AD (Onom s.v. "Aneel" and "Bethara"), a city lying 15 Rom miles from Caesarea, which had good baths.

ANER, 'änēr (אֶנֶר, 'ānēr; LXX Αὐνά, Aunád; Sam, יָנָא, 'yāmān, "sprout," "waterfall"): One of the three "confederates" of Abraham in his pursuit after the four kings (Gen 14:13-14). Judging from the meanings of the two other names, Mamre being the name of the sacred grove or tree (J) and synonymous with Hebrew (P); and Eschol—a name of a valley (lit. "grape cluster") from which the personal names are derived—it may be expected to explain the name Aner in a similar way. Dillmann suggested the name of a range of mountains in that vicinity (Corum, ad loc. and Rosen in ZDMG, XII, 478; Skinner, Genesis, 365).

S. CONOH.

ANER, 'änēr (אֶנֶר, 'ānēr, meaning doubtful): A Levitical town in Manasseh, W. of the Jordan (1 Ch 6:70). Gesenius and others identified it with Taanach of Josh 21:25. There is, however, no agreement as to its location.

ANETHOTHITE, an'-e-thoth-it: AV form of Anathothite (thus RV 2 S 3:27).

ANETOTHITE, an'-e-toth-it: AV form of Anatothite (thus RV 1 Ch 27:12).

ANGEL, 'an-gel (αγέλ, mal'āk; LXX and NT, ἄγγελος, ángelos): I. Definition and Scripture Terms. The word angel is applied in Scripture to an order of supernatural or heavenly beings whose business it is to act as God's messengers to men, and as agents who carry out His will. Both in Heb and Gr the word is applied to human messengers (1 K 19:2; Lk 7:24). In Heb it is used in the singular to denote a Divine messenger, and in the plural for human messengers; although there are exceptions to both usages. It is applied to the prophet Haggai (Hag 1:13), to the priest (Mal 2:7), and to the messenger who is to prepare the way of the Lord (Mal 3:1). Other NT phrases applied to angels are brnē ἡδ' Elohim (Gen 6:24; Job 1:6; 2:1) and brnē 'elôm (Ps 29:1; 89:6), i.e. sons of the Elohim or Elohim; this means, according to a common Heb usage, members of the class called 'elôm or 'elôm, the heavenly powers. It seems doubtful whether the word 'elôm, standing by itself, is ever used to describe angels, although LXX so translates it in a few passages. The most notable instance is Ps 8:5; where RV gives, "Thou hast made him but little lower than God," with ERV reading of "the angels" for "God" (cf He 2:7,9); brnē 'Ḥoshēm "holy ones" (Ps 89:5,7), a name suggesting the fact that they belong to God; br, brêm, "watcher," "watchers" (Dan 4:13-17.23). Other expressions are used to designate angels collectively: gēbêh, "council" (Ps 89:7), where the reference may be to an inner group of exalted angels; 'ādhâh and 'ābâl, "congregation" (Ps 82:1; 89:5); and finally cībâdâh, cībâṭhîth, "host," "hosts," as in the familiar phrase "the God of hosts." In NT the term is almost uniformly used when it refers to a Divine messenger, is frequently accompanied by some phrase which makes this meaning clear, e.g. "the angels of heaven" (Mt 24:36). Angels
belong to the "heavenly host" (Lk 2:13). In reference to their nature they are called 'spirits' (He 1:14). Paul evidently referred to the ordered ranks of angels in 1 Cor 15:41. They are usually described as creatures found in various combinations, viz. archangels, "principalities," "powers," "thrones," "dominions," and "darkness," also translated "powers." The first four are apparently used in a good sense in Col 1:16, where it is said that all these beings were created through Christ and unto Him; in most of the other passages in which words from this group occur, they seem to represent evil powers. We are told that our wrestling against them who are many (Eph 6:12), and that Christ triumphs over the principalities and powers (Col 2:15; cf Rom 8:38; 1 Cor 15:24). In two passages the words archangelos, "archangel," or chief angel, occurs: "the voice of the archangel" (1 Thess 4:16), and "Michael the archangel" (Jude ver 9).

II. Angels in OT.—Everywhere in the OT the existence of angels is assumed. The creation of angels is referred to in Ps 148:2.5 (cf Col 1:16). They were present at the creation of the world, and were so vividly described with wonder and gladness that they "shouted for joy" (Job 38:7). Of their nature we are told nothing. In general they are simply regarded as embodiments of their mission. Though presumably the holiest of created beings, they are charged by God with folly (Job 4:18), and we are told that "he putteth no trust in his holy ones" (Job 15:15). References to the fall of the angels are only found in the obscure and probably corrupt passages Gen 6:1-4, and in the interdependent passages 2 Pet 2:4 and Jude ver 6, which draw their inspiration from the Apocryphal book of Enoch. Demons are mentioned (see Demons); and although Satan appears among the sons of God (Job 1:6; 2:1), there is a growing tendency in later writers to attribute to him a malignity that is all his own (see Satan).

As to their outward appearance, it is evident that they bore the human form, and could at times be mistaken for men (Ezk 2:2; Gen 19:15). There is no hint that they ever appeared in female form. The conception of angels as winged beings, so familiar in Christian art, finds no support in Scripture (except, perhaps, Dn 9:19; the roll on the "chemosh" or "flywing"). The cherubim and seraphim (see Cherub; Seraph) are represented as winged (Ex 25:20; Isa 6:2); winged also are the symbolic living creatures of Ezk (Ezk 1:6; cf Rev 4:8).

As above stated, angels are messengers and instruments of the Divine will. As a rule they exercise no influence in the physical sphere. In several instances, however, they are represented as destroying angels: two angels are commissioned to destroy Sodom (Gen 19:13); when David numbers the people, an angel destroys them by pestilence (2 S 24:16); it is by an angel that the Assyrian army is destroyed (2 K 19:35); and Ezekiel hears six angels receiving the command to destroy those who were sinful in Jerusalem (Ezk 9:1-7). In this connection should be noted the expression "angels of evil," i.e. angels that bring evil upon men from God and execute His judgment (Ps 78:49; cf 1 S 16:14). Angels appear to Jacob in dreams (Gen 18:12; 31:11). The archangel Michael meets Balaam is represented first as a lion, and not to the river (Nu 22:22). Angels interpret God's will, showing man what is right for him (Job 33:23). The idea of angels as caring for men also appears (Ps 119:11), although the modern conception of the possession of each man of a special guardian angel is not found in OT.

The phrase "the host of heaven" is applied to the stars, which were sometimes worshipped by idolatrous Jews (Jer 33:22; 2 K 21:2). The name Host is applied to the company of angels because of their countless numbers (cf Dn 7:10) and their glory. They are represented on the right and left hand of Jehovah (1 K 2:20). Hence God, who is over them all, is continually called throughout OT "the host of hosts," "Jeh of hosts," "Jeh of the host" (Dn 7:11). One of the principal functions of the heavenly host is to be ever praising the name of the Lord (Ps 148:1; 149). In this host there are certain figures that stand out prominently, and some of them are named. The angel who appears to Joshua calls himself "prince of the host of Jehovah" (Josh 5:14 f). The glorious angel who interprets to Daniel the vision which he saw in the year of Cyrus (Dn 10:5), like the angel who interprets the vision in the first year of Belshazzar (Dn 7:16), is not named; but other visions of the same prophet were explained to him by the angel Gabriel, who is called "the man Gabriel," and "Gabriel, who shows a man's voice" (Dn 9:21; 8:15 f). In Daniel we find occasional reference made to "princes": "the prince of Persia," "the prince of Greece" (10:20). These are angels to whom is intrusted the charge of, and power over, the created universe (cf Ps 103:21). Most notable among them is Michael, described as "one of the chief princes," "the great prince who standeth for the children of thy people," and, more briefly, "your prince" (Dn 10:13; 12:1; 10:21); "Michael is the prince of the host of the Jews." In Apoc Raphail, Uriel and Jeremiel are also named. Of Raphael it is said (Tob 13:15) that he is "one of the seven holy angels who present the prayers of the saints" (cf God's Rev 8:2, "the seven angels that stand before God"). It is possible that this group of seven is referred to in the above-quoted phrase, "one of the chief princes." Some (notably Kösters) have maintained that the expressions the "counsel" of the "whom," God's "counsel" and "congregation," refer to the ancient gods of the heathen, now degraded and wholly subordinated to Jehovah. This rather daring speculation has little support in Scripture; but we find traces of a belief that the sevenfold order was preserved and failed in establishing righteousness within their allotted sphere on earth, and that they will accordingly be punished by Jehovah over their Lord (Isa 24:21 f; Ps 83; cf Ps 68:1 f RVm; cf Jude ver 6).

This angel is spoken of as "the angel of Jehovah," and "the angel of the presence (or face) of Jehovah.

The following passages contain references to this angel: Gen 16:7 f—Angel of the angel and Hagar; Gen 18:10 f—Theophany Abraham intercedes with the angels for Sodom; Gen 22:11 f—the angel interposes to prevent the sacrifice of Isaac; Gen 24:7—Abraham sends Eliezer and promises him the angel's protection; Gen 31:11 f—the angel who appeared to Jacob and says "I am the God of Bethel"; Gen 32:24 f—Jacob wrestles with the angel and says, "I have seen God face to face"; Gen 48:15 f—Jacob speaks of God and the angel as identical; Ex 3 (cf Acts 7:30 f)—the angel appears to Moses in the burning bush; Ex 13:21 f; cf Nu 14:19 (Gen 16:20)—God or the angel leads Israel out of Egypt; Ex 23:20 f—the people are commanded to obey the angel; Ex 32:34—33:17 (cf Isa 63:9)—Moses pleads for the presence of God with His people; Josh 5:13—"the angel appears to Joshua; Jgs 6:2—"the angel speaks to the people; Jgs 6:11 f—the angel appears to Gideon.

A study of these passages shows that while the
angel and Jeh are at times distinguished from each other, they are with equal frequency, and in the same passages, merged into each other. How is this possible? Is Paul in 1 Cor 15:41 saying, ‘Then the first man is of Adam; the second man is of Christ? That the apparitions cannot be the Almighty Himself; whom no man hath seen, or can see. In seeking the explanation, special attention should be paid to two of the passages above cited. In Ex 3:20 ff God promises to send an angel before His people to lead them to the promised land; they are commanded to obey him and not to provoke him ‘for he will not pardon your transgression: for my name is in him.’ Thus the angel can forgive sin, which only God the Father can do. His character and thus His authority, are in the angel. Further, in the passage Ex 32:34—33:17 Moses intercedes for the people after their first breach of the covenant; God responds by promising, ‘Behold, mine angel shall go before thee’; and immediately after God says, ‘I will not go up in the midst of thee.’ In answer to further pleading, God says, ‘My presence shall go with thee, and I will give thee rest.’ Here a clear distinction is made between an ordinary angel, and the angel who carries with him God’s presence. The conclusion may be summed up in the words of Davidson in his OT Theology: ‘In particular providences one may trace the presence of Jehovah in influence and operation in Man’s ordinary everyday experience. The same may discover Jehovah present on some side of His being, in some attribute of His character; in the angel of the Lord He is fully present as the covenant God of His people, to redeem them.’ The question is raised, ‘who is this angelic being?’ To this many answers have been given, of which the following may be mentioned: (1) This angel is simply an angel with a special commission; (2) He may be a momentary desent of God into visibility; (3) He may be the Logos, a kind of temporary preincarnation of the second person of the Trinity. Each has its difficulties, but the last is certainly the most tempting to the mind. Yet it must be remembered that at best these are only conjectures that touch on a great mystery. It is certain that from the beginning God used angels in human form, with human voices, in order to communicate with men; and the appearances of the angel of the Lord, with his special redemptive role, are in the preincarnation of the Divine mode of self-revelation which culminated in the coming of the Saviour, and are thus a foreshadowing of, and a preparation for, the full revelation of God in Jesus Christ. Further than this it is not safe to speculate.

III. Angels in NT.—Nothing is related of angels in NT which is inconsistent with the teaching of OT on the subject. Just as they are specially active in the beginning of OT history, when God’s people is being born, so they appear frequently in connection with the birth of Jesus, and again when a new order of things begins with the resurrection. An angel appears three times in dreams to Joseph (Mt 1:20; 2:13, 19). ‘The angel Gabriel appears to Zacharias, and then to Mary in the announcement (Lk 1). An angel announces to the shepherds the birth of Jesus, and is joined by a ‘multitude of the heavenly host,’ praising God in celestial song (Lk 2:14). When Jesus is tempted, and again during the agony at Gethsemane, angels appear to him to strengthen his soul (Mt 4:11; Lk 22:43). The verse which tells how an angel came down to trouble the pool (Jn 5:4) is now omitted from the text, and perhaps justifiably so, in all versions. The angel Gabriel appears to Mary to roll away the stone from the tomb of Jesus (Mt 28:2); angels are seen there by certain women (Lk 24:23) and (two) by Mary Magdalene (Jn 20:12). A angel releases the apostles from prison, directs Philip, appears to Peter in a dream, frees him from prison, smites Herod with sickness, appears to Paul in Damascus (Acts 9:10; 12:7; 22:7; 23:23). Once they appear clothed in white; they are so dazzling in appearance as to terrify beholders; hence they begin their message with the words ‘Fear not’ (Mt 26:53). It is quite certain that Our Lord accepted the main teachings of OT about angels, as well as the later Jewish belief in good and bad angels. According to Our Lord the angels of God are holy (Mt 8:28); they have no sex or sensuous desires (Mt 22:33); they have high intelligence, but they know not the time of the Second Coming (Mt 24:36); they carry (in a parable) the soul of Lazarus to Abraham’s bosom (Lk 16:22); they could have been summoned to the aid of Our Lord, had He so desired (Mt 26:53); they will accompany Him at the Second Coming (Mt 25:31) and separate the righteous from the wicked (Mt 13:41-49). They watch with sympathetic eyes the fortunes of men, rejoicing in the repentance of a sinner (Lk 15:10); cf 1 Pet 1:12; Eph 3:10; 1 Cor 4:9), and they will hear the Son of Man when He confesses or denies Him before men (Lk 12:8). The angels of the presence of God, who do not appear to correspond to our conception of guardian angels, are specially interested in God’s little ones (Mt 18:10). They are also implied in the Lord’s Prayer in the petition, ‘Thy will be done, as in heaven, so on earth’ (Mt 6:10).

Paul refers to the ranks of angels (‘principalities, powers,’ etc) only in order to emphasize the complete supremacy of Jesus Christ. He teaches that angels will be judged by the saints (1 Cor 6:8). He attacks the Gnosticism of Asia Minor by forbidding the worship of angels (Col 2:18). He speaks of God’s angels as ‘elect,’ because they are included in the counsels of Divine love (1 Tim 5:21). When Paul commands the women to keep their heads covered in church because of the angels (1 Cor 11:10) he probably means that the angels are cognizant of the affairs with deep interest, would be pained to see any infraction of the laws of modesty. In 1 Cor 11:10 angels are described as ministering spirits engaged in the service of the saints. Peter also emphasizes the supremacy of Our Lord over all angels (2 Pet 3:22). The references to angels in 2 Pet and Jude are colored by contact with Apoc lit. In Rev, where the references are obviously symbolic, there is very frequent mention of angels. The angels of the seven churches (1:20) are the guardian angels or the personifications of these churches. The worship of angels is also forbidden (22:8). Specially interesting is the mention of elemental angels—the angel of the waters (16:5), and the angel ‘that hath power over fire’ (14:18; cf 7:1; 19:17). Reference is also made to the ‘angel of the bottomless pit,’ who is called Abaddon or Apollyon (q.v.), evidently an evil angel (9:11 AV, RV ‘abysse’). In 12:7 we are told that there was war between Michael with his angels and the dragon with his angels.

IV. Development of the Doctrine.—In the childhood of the race it was easy to believe in God, and He was very near to the soul. In the earlier theologies of angels an angel was Himself who walks in the garden. A little later the thought of angels appears, but God has not gone away, and as ‘the angel of Jehovah’ He appears...
to His people and redeems them. In these early times the Jews believed that there were multitudes of angels divided into eight good and bad; these had no names or personal characteristics, but were simply embodied messages. Till the time of the captivity the Jewish angelology shows little development. During that dark period they came into close contact with a polytheistic people, only to be more deeply confirmed in their monotheism thereby. They also became acquainted with the purer faith of the Persians, and in all probability viewed the tenets of Zoroastrianism with a more favorable eye, because of the great Cyrus of Persia. There are a few direct traces of Zoroastrianism in the later angelology of the OT. It is not even certain that the number seven as applied to the highest group of angels is Pers in its origin; the number seven was not wholly disregarded by the Jews. One result of the contact was that the idea of a hierarchy of the angels was more fully developed. The conception in Dn. of angels as “watchers,” and the idea of patron-princes or angel-guardians of nations may be set down to the Pers influence. It is probable that contact with the Persians helped the Jews to develop ideas already latent in their minds. According to Jewish tradition, the names of the angels came from Babylon. By this time the consciousness of a God had grown more intense in the Jewish mind; God had receded an immeasurable distance; the angels helped to fill the gap between God and man.

The more elaborate conceptions of Daniel and Zechariah are further developed in Apoc, especially in Ezcl. Tob and 2 Mac.

In the NT we find that there is little further development; and by the Spirit of God its writers were saved from the absurdly puerile teachings of contemporary Rabbinists. We find that the Sadducees, as contrasted with the Pharisees, did not believe in angels or spirits (Acts 23, 8). We may conclude that the Sadducees, with their materialistic standpoint, and denial of the resurrection, regarded angels merely as symbolic expressions of God’s actions. It is noteworthy in this connection that the great priestly document P makes no mention of angels. The Book of Revelation naturally shows a close kinship to the books of Ezk and Dn.

Relying on the rabbinical developments of angelology, some beautiful, some extravagant, some grotesque, but all fanciful, it is not necessary here to speak. The Essenes held an esoteric doctrine of angels, in which most scholars find the germ of the gnostic sects.

V. The Reality of Angels. — A belief in angels, if not indispensable to the faith of a Christian, has its place there. In such a belief there is nothing unnatural or contrary to reason. Indeed, the warm work of which human nature has always been given to this thought, is an argument in its favor. Why should there not be such an order of beings, if God so willed it? For the Christian the whole question turns on the weight to be attached to the words of Our Lord. All are agreed that He teaches the existence, reality, and activity of angelic beings. Was He in error because of His human limitations? That is a conclusion which it is very hard for the Christian to draw, and who may say He was so? If He then adjudge facts to a popular belief, knowing that what He said was not true? This explanation would seem to impute deliberate untruth to Our Lord, and must equally be set aside. So we find ourselves restricted to the conclusion that we have any of Christ’s words for the existence of angels; for most Christians will set the question.

The visible activity of angels has come to an end, because their mediating work is done; Christ has founded the kingdom of the Spirit, and God’s Spirit speaks directly to the spirit of the new and living way has been opened up to us by Jesus Christ, upon whom faith can yet behold the angels of God ascending and descending. Still they watch the lot of man, and rejoice in his salvation; still they hear in the praise and adoration of God, the Lord of hosts; still can they be regarded as “ministering spirits sent forth to do service for the sake of them that shall inherit salvation.”

LITERATURE.—All OT and NT theologians contain discussion of angels. See the older books Oehler’s OT Theology and Hengstenberg’s Christology of OT (for “angel of the Lord”) and angel passages, such as Apoc. 22. Theology are specially valuable. The ablest supporter of the theory that the “sons of the Elohim” are degraded gods is Klotz. “Die Konstan der Angelologie unter Israell” TT 1876. See also arts. on “Angel” in HDB (by Davidson), EB, DCG, Enc. Enc. RE (by Cranmer). Cranmer’s Biblical-Theological NT Lexicon should be consulted s.v. “angels.” For Jewish beliefs see also Ederer’s Leben und Zeit des Jesus, II. Appendix XIII. On the Persian angelology see Everling, Die paolinsche Angelologie. On the general subject see Godet, Biblical Studies; Monley, The Word, ch.lx, and Latham, A Service of Angels.

JOHN MACARTNEY WILSON

ANGEL OF GOD. See Angel.

ANGEL OF JEHOOVAH. See Angel (II, 3).

ANGELS OF THE SEVEN CHURCHES: It is evident from the contexts of the various Biblical passages in which the word “angel” appears, that the word does not always represent the same idea. In such passages as Dncl 12 and Acts 12 it would seem that the angel was regarded as a superhuman being whose duty it was to guard a nation or an individual, not unlike the jenjel of the Arabs. However, in Mal 2 and 3 (Heb) the word is clearly used to represent men. In the NT also, there are at least two instances in which the word seems to be applied to men. The seven angels of the seven churches (Rev 1) received seven letters, fig. letters, and therefore it would seem that the seven angels are also fig. and may refer to the seven bishops of Crete, only generally despised over the seven churches of Asia. Or the angels may be regarded as the personifications of the churches.

E. J. BANKS

ANGER, an’ger. In the OT, the tr. of several Heb words, e.g., min, “sphk” (lit. “nostril,” “composure”), which is used some 45 times of human, 177 times of Divine, anger (OHL). The word occurs rarely in the NT (Mc 3, 5; Eph 4, 31; Col 3, 8; Rev 14, 10), its place being taken by the word “wrath” (see wrath). As a tr. of words denoting God’s “anger,” the Eng. word is unfortunate so far as it may seem to imply selfish, malicious or vindictive personal feeling. The anger of God is the response of His holiness to outbreaking sin. Particularly when it culminates in action it is rightly called His “wrath.” The OT doctrine of God’s anger is contained in many passages in the Pent. Ps and the prophets. In Prov men are dissuaded from anger (16, 1; 27, 4), and the “slow to anger” is commended (15, 18; 16, 32; 19, 11). Christians are enjoined to put away the feeling of sorrows for self-spr.e anger (Eph 4, 31; Col 3, 8), and to cherish no desire of personal revenge (Eph 4, 26). F. K. FARR

ANGLE, an’gˇl: Used in Is. 19, 8 for a Heb noun that is rendered “hook” in Job 41, 1: “The fishers shall lament, and all they that cast angle [hook] into the Nile shall mourn.” For a striking fig. use of it see Hab 1, 15 where, speaking of the wicked devouring the righteous, “making fishers of the sea” the prophet says the guilt of the wicked “They take up all of them with the angle, they catch them in their net.” (RV uses singular).
ANGLING, ang'gling: Angling, i.e. fishing with a hook or angle, was little known among the ancients. The fish were chiefly taken by casting nets, etc. (see Mt 13:47). Cf. e.g. "Then did Deucalion first the art invent of angling" (Davies, Secret of Angling, I). See NET.

ANGLO-SAXON VERSIONS, an-glo-sax'on vör'-shuns. See ENGLISH VERSIONS.

ANGUISH, ang'gwish: Extreme distress of body, mind or spirit; excruciating pain or suffering of soul, e.g. excessive grief, remorse, despair. Chiefly expressed in OT, by four derivatives of יָשֶׁל, yeshol, "straitened," "pressed," and יָסֵר, yiser, and two derivatives signifying "straitness," "narrowness," hence distress; also יָגַנְדָה, yagnda, "giddiness," "confusion of mind"; יָשַׁל, yeshal, "to twist" with pain, "writhe," So in the NT, θυμα, thyma, "a pressing together," hence affliction, tribulation; στενοχώρια, stenochoria, "narrowness," hence στενόχωρος, stenochoros, "a holding together," hence distress. The fundamental idea in these various terms is pressure—being straitened, compressed into a narrow place, or pain through physical or mental torture. Used of the physical agony of childbirth (Jer 4:31; 6:24; 49:24; 50:43; Jn 16:21); of distress of soul as the result of sin and wickedness (Job 15:24; Prov 1:27; Rom 3:9) of anguish of spirit through the cruel bondage of slavery (Ex 6:9) and Assy oppression (Isa 3:22); of the anxiety and pain of Christian love because of the sins of fellow-disciples (2 Cor 2:4). DWIGHT M. PRATT

ANIAM, a-niam (אֲנִית, 'anı'ām, "lament of the people"): A son of Shemidah of Manasseh (1 Ch 7:19).

ANIM, ānim (אֲנִי, ānim, "springs"): One of the cities of the hill country of Judah mentioned immediately after Eshtemoa (Josh 15:50). It is probably represented by the double ruin of el Ghusein situated S. of es Semu'a. The surface remains are Byzantine—a Christian town called Aenon was here in the 4th cent. But it is clear that it is a shrine at an ancient site of importance (PEF, III, 408; SH, XXV).

ANIMAL, an'i-mal: See under the various names and also general art. on ZOOLOGY.

ANISE, an'is, or DILL, dill; (RvM, anîsos, anîsol): Not the true anise, Pimpinella anisum, as was supposed by AV translators, but Dill Anethum graveolens. This is an annual or biennial herb of NO Umbelliferae, growing from one to three feet high, with small yellow flowers and brownish, flattened, oval fruits ½ in. long. It grows wild in lands bordering on the Mediterranean. The seeds have an aromatic flavor and are used as condiment in cooking, as carminative in medicine. "Dill water" is a favorite domestic remedy. Jesus said (Mt 23:29): "Voces unto youscribes and Pharisees, hypocrites! for ye tithe thine anise and cummin, and have left undone the weightier matters of the law," etc. In the tract, Ma'aseketh (4:5) it is mentioned that this plant (Heb shabhah), its stem, leaves and seed, was subject to tithe. (See out.)

E. W. G. MASTERMAN

ANKLE, an'k'l (in older edd of AV ankle): From Heb דָּבַשׁ דָּבָשׁ, débhash, "water of ankles," i.e. shallow water (Ezk 47:3); "ankle-bones" (Acts 3:7) from ἐσθήδως, esthédōs; "ankle-chains" (AV "chains"), from a Heb root meaning "to walk about proudly" (Nu 31:50). The same Heb word is trd "bracelet" (2 S 1:10), but in Isa 3:20 another word from the same root "ankle chains" (AV "ornaments of the legs"). Of ANKLET (Isa 3:18).

ANOLVE, An'klet, An'kle-chain, an'klet, an'k'l-châ:n: "Anklets" is rightly found in Isa 3:18 RV, and "ankle-chains" in Nu 31:50 RV. A cognate word of essentially the same meaning is used in Isa 3:20, and is rendered by AV "ornaments of the legs." It was these "anklets" that Isaiah represented the ladies of Jerusalem as "rattling" as they walked (Isa 3:16 to end), "making a tinkling with their feet"; and a part of the punishment threatened is, "The Lord will take away the bravery of their tinkling ornaments about their feet" (Isa 3:16 AV).

ANNA, an'na (אֲנָנָּה, ānānāh, signifying "grace"). 1:2)

(1) The wife of Tobit (Tob 1:9).

(2) A "prophetess," daughter of Phanuel, of the tribe of Asher, and thus a Galilean, living in Jerusalem at the time of Jesus' birth (Lk 2:36-38). "Of a great age," she must have been considerably over 100 years, having been a widow 84 years after a short married life of seven (see RV). Exceptionally devout and gifted in spirit, she worshipped so constantly "with fasting and supplications and night and day," that she is said to have "departed not from the temple." Some have mistakenly supposed
that this signified permanent residence in the temple. The fact that her lineage is recorded indicates the distinction of her family. Tradition says that the tribe of Annas was one of the tribes of priests, and that his family was a distinguished one; for the beauty and talent of its women, who, for these gifts, were qualified for royal and high-priestly marriage.

While the tribe of Asher was not among the tribes that returned from the Bab exile to Pal, many of its chief families have done so as in the case of the prophetess. The period of war and national oppression, through which Anna's early life was passed, created in her, as in the aged Simeon, an intense longing for the "redemption promised through the house of David." See Simeon. This hope of national deliverance sustained her through more than four decades of patient waiting. In the birth of Jesus her faith was abundantly rewarded, and she became a grateful and ceaseless witness "to all them which were looking for the redemption of Jerusalem," that the day of their spiritual deliverance had come.

Dwight M. Pratt

ANNAAS, an'na-as (Zadok, Sanias, 1 Esd 8 23, RV SANAAS): The High-priest of Ezra 2 35.

ANNAS, an'as (Awvov, Ānnos; WH Hanan; Jos Annas; the Gr. name of Elel ἀνανας, πρεσβυτερος; "merci- ful," "hospitable," of Neh 8 7, 12, 18; 1 Esd 3 10, 12). A high priest of the Jews, the virtual head of the priestly party in Jerus in the time of Christ, a man of commanding influence. He was the son of Sethi (Jos, Sethhi), and was elevated to the high-priesthood by Quirinius, governor of Syria, 7 AD. At this period the office was filled and vacated at the caprice of the Rom procurators, and Annas was deposed by Valerius Gratus, 15 AD. But though deprived of official status, he continued to wield great power as the dominant member of the hierarchy, using members of his family as his willing instruments. That he was an adroit diplomatist is shown by the fact that five of his sons (Ant, XX, ix, 1) and his son-in-law Caiaphas (Jn 18 13) held the high-priesthood in almost an uninterrupted succession, though he did not survive to see the office filled by his fifth son Annas or Annas II, who caused Jos the Lord's brother to be stoned to death (cir 62 AD). Another mark of his lordship is that after he had led his office he was still called "high priest," and his name appears first wherever the names of the chief members of the sacerdotal faction are given. Acts 4 6; "And Annas the high priest was there, and Caiaphas, and John, and Alexander, and as many as were of the kindred of the high priest." Annas is almost certainly called high priest in Jn 18 19-22, though in vs 12, 24 Caiaphas is mentioned as the high priest. Note especially the remarkable phrase in Lk 3 2, "And the high-priesthood of Annas and Caiaphas," as if they were joint holders of the office. The cases in which Jos gives the title "high-priest" to persons who no longer held the office afford no real parallel to this. The explanation seems to be that owing to age, activity and force of character Annas was the virtual, though Caiaphas the titular, high priest. He belonged to the Sadducean aristocracy, and, like others of that class, seems to have been arrogant, astute, ambitious and exceedingly wealthy. He could be extravagant in their rivalry over their capacious and greed. The chief source of their wealth seems to have been the sale of requisites for the temple sacrifices, such as sheep, doves, wine and oil, which they carried on in the four famous booths of the sons of Annas on the Mount of Olives, with a branch within the precincts of the temple itself.

During the great feasts, they were able to extort high monopoly prices for their goods. Hence our Lord's strong denunciation of them as "the robbers" (Mt 21 15–19), and the curse in the Talm, "Woe to the family of Annas! woe to the serpent-like hisses" (Pes 57a). As to the part he played in the trial and death of our Lord, although he does not figure very prominently in the gospel narratives, he seems to have been mainly responsible for the course of events. Renan's emphatic statement is substantially correct, "Annas was the principal actor in the terrible drama, and far more than Caiaphas, far more than Pilate, ought to be held responsible for the malpractices of mankind!" (Life of Jesus). Caiaphas, indeed, as actual high priest, was the nominal head of the Sanhedrin which condemned Jesus, but the aged Annas was the ruling spirit. According to Jn 18 12, 13, it was to him that the officers who arrested Jesus led Him first. "The reason given for that proceeding ["for he was father-in-law of Caiaphas"] lays open alike the character of the man and the character of the trial" (Westcott, in loc.). Annas (if he is the high priest of Jn 18 19-26, as seems most likely) questioned Him concerning His disciples and teaching. This trial is not mentioned by the synoptists, probably because it was merely informal and preliminary and of a private nature, meant to gather material for the subsequent trial. Failing to elicit the purpose from Jesus, "Annas therefore sent him bound unto Caiaphas the high priest" (Jn 18 24 AV is incorrect and misleading) for formal trial before the Sanhedrin, "but as one already stumped with a sign," (lit., "of the sign") John 18 24. Doubtless Annas was present at the subsequent proceedings, but no further mention is made of him in NT, except that he was present at the meeting of the Sanhedrin after Pentecost when Peter and John defended themselves for preaching the gospel of the resurrection (Acts 4 6).

(2) Head of a family who returned with Ezra (1 Esd 9 32), called "Harim" in Ezr 10 31.

ANXEIS, an'is (AV Annias; RV Amnias; 'Avvovs, Annías, Annás A); The name of a family in the list of the returning exiles (1 Esd 5 16). The name is not given in the || list in Ezra and Neh.

ANNUL, DISANNUL, nul'-dis-a-nul'-; God, as the Supreme Ruler, can disannul His covenant for cause (Isa 28 18); man, through wilfulness and transgression, as party of the second party, may break the contract and thus release Jeh, as party of the first part (Job 40 8; Isa 14 27), though there are some purposes and laws which the Almighty will carry out in spite of ungodly rage and ravings (Gal 3 15 AV); or an old law or covenant might be conceived as disannulled by a new one (Gal 3 17), or because of its becoming obsolete and ineffective (He 7 18). For the first idea, the Heb employs ἀναλύω, kaphar—"to cover," "to expiate," "to avert," "to annul," "to cancel," "to cleanse," "disannul," "purge," "put off" (Isa 28 18); and the Gr (Gal 3 15), athetō = "to set aside," "disestem," "neutralize," "violate," "frustrate." One covenant disannulling another by "conflict of laws" is expressed by εκκαθάρισαι, "to invalidate," "to disannul," "to make of void" (John 8 32); Athetō is employed to express also the disannulling through age and disease (He 7 18).

Frank E. Hirsch

ANNUS, an'us (A, 'Avvovs, ANNOS, B, ANNUS; AV Anus = Bani, Neh 8 7): One of the Levites who interpreted the law to the people (1 Esd 9 48).
ANNUUS, an’u-us (Ἀννοὺς, Άννωνος): Returned with Ezra from Babylon to perform the functions of a priest in Jerusalem (1 Esa 8 48). Omitted in Ezr 8 19.

ANOEINT, a-noint’, ANOINTED, a-noint’ed (ἀποινάω, αἰνάω, χρῆω, χρίω): Refers to a very general practice in the East. It originated from the relief from the effect of the sun that was experienced in rubbing the body with oil or grease. Among rude people the common vegetable or animal fat was used. As society advanced and refinement became a part of civilization, delicately perfumed oil was employed. Among the Orientals it was customary to use perfumed oil for ceremonial purposes, for health, and for medicinal purposes.

ANOEINTING, a-noint’ing: A distinction was made by the ancient Hebrews between anointing with oil in private use, as in making one’s toilet (תָּכֹ, ἐκθήκ), and anointing as a religious rite (πνίμω, μασάβαχ).

(1) As regards its secular or ordinary use, the native olive oil, alone or mixed with perfumes, was commonly used for toilet purposes, the

1. Ordinary very poor naturally reserving it for special occasions only (Ruth 3 3).

The fierce protracted heat and biting lime dust of Palestine made the oil very soothing to the skin, and it was applied freely to exposed parts of the body, especially to the face (Ps 104 15).

(2) The practice was in vogue before David’s time, and traces of it may be found throughout the OT (see Dt 28 40; Ruth 3 5; 2 S 12 20; 14 2; 2 Cr 28 12; Ezk 16 9; etc.). In the NT it has been a part of the daily toilet throughout the East.

(3) To abstain from it was one token of mourning (2 S 14 2; cf Mt 6 17), and to resume it a sign that the mourning was ended (2 S 12 20; 14 2; Dnt 10 3; Jth 10 3). It often accompanied the bath (Ruth 3 5; 2 S 12 20; Ezk 16 9; Sus 17), and was a customary part of the preparation for a feast (Ecc 9 8; Ps 23 5). One way of showing honor to a guest was to anoint him with oil (Ps 23 5; Lk 7 46); a rarer and more striking way was to anoint his feet (Lk 7 38). InJac 5 14, we have an instance of anointing with oil for medicinal purposes, for which see Oil.

Anointing as a religious rite was practised throughout the ancient East in application both to persons and to things.

2. Religious.

(1) It was observed in Canaan long before the Heb conquest, and, accordingly, Weinel (Stade’s Zeitschrift, XVIII, 50 ff) holds that, as the use of oil for general purposes in Israel was an agricultural custom borrowed from the Canaanites, so the anointing with sacred oil was an outgrowth from its regular use for toilet purposes in accordance with the known facts of the case and the terms used in description to accept the view set forth by Robertson Smith (Religion of the Semites, 2d ed, 233, 333 ff; cf Wellhausen, Reste des arabischen Heidentums, 2d ed, 125 ff) and to believe that the ἐκθήκ or use of oil for toilet purposes was of agricultural and secular origin, and that the use of oil for sacred purposes, μασάβαχ, was in origin nomadic and sacrificial. Robertson Smith finds the origin of the sacred anointing in the very ancient custom of smearing the sacred fat on the altar (μασάβαχ), and claims, rightly it would seem, that from the first there was a distinct and consistent usage, distinguishing the two terms as above.

(2) The primary meaning of μασάβαχ in Heb, which is basic to all later uses, seems to have been “to daub” or “smear.” It is used in painting a ceiling in Jer (22 14), of anointing a shield in Isa (21 5), and is, accordingly, consistently applied to sacred furniture, like the altar, in Ex 25 30 and Dnt 9 24, and to the sacred pillar in Gen 31 13: “where thou anointed a pillar.”

(3) The most significant uses of μασάβαχ, however, are found in its application, not to sacred things, but to certain sacred persons. The oldest and most sacred of these, it would seem, was the anointing of the king, by pouring oil upon his head at his coronation, a ceremony regarded as sacred from the earliest times, and observed religiously, not in Israel only, but in Egypt and elsewhere (see Jgs 9 8,15; 16 1,19; 21 2; bc 13 2; Ps 20 4). It is thought by some that the practice originated in Egypt, and is known to have been observed as a rite in Canaan at a very early day. Am Tab 37 records the anointing of a king.

(4) Among the Hebrews it was believed not only that it effected a transference to the anointed one of something of the holiness and virtue of the deity in whose name and by whose representative the rite was performed, but also that it imparted a special endowment of the spirit of Jeh (cf 1 S 16 13; Isa 61 1). Hence the profound reverence for the king as a sacred personage, “the anointed” (Heb, μασάβαχ YWH), which passed over into our language through the Gr Christos, and appears as “Christ.”

(5) In what is known today as the PC, the high priest is spoken of as “anointed” (Ex 29 7; Lev 4 3; 8 12), and, in passages regarding some as later additions to the PC, other priests are also thus spoken of (Ex 20 30; 40 13-15). Elisha was told to anoint Elisha as a prophet (1 K 19 16), but seems never to have done so. 1 K 19 16 gives us the only recorded instance of such a thing as the anointing of a prophet. Isa 61 1 is purely metaphorical (cf Dillmann on Lev 8 12-15 and ICC on Nu 3 3; see also Nowack, Lehrbuch der hebräischen Archäologie, II, 124).

LITERATURE.—Few Enc. art. “Anointing”; BJ. IV. ix, 10; DB, art. “Anointing,” etc.; GHW. B. EAGER

ANON, a-non’ (εὐανός, εὐθεῖος, εὖβος, εὖθος): In AV of Mk 1 30; Mt 13 20, for “straightway” of RV, i.e. “without delay,” “immediately.”

ANOS, 5’os (Αὐων, Ἄνων) = Vaniah (Ezr 10 36); A son of Bani who put away his “strange wife” (1 Esa 9 34).

ANSWER, an’sær: In our Eng. Bible the word “answer” does not always mean a simple reply to a question.

Six different words are tv by answer. (1) It is frequently used where no question has been
asked and in such cases it means a word, a statement. (2) It also means a response (Job 21:34; Acts 24:30). (3) It often means a declaration or proclamation from God where no question has been asked. See the many passages that read: "The Lord answered and said." (4) The other words trí "answer" or "exclaimed" in the OT are unimportant shadings and variations.

The words trí "answer" are not so varied. (1) It sometimes means an apology, a defence (1 Pet 3:15; Acts 24:10,25). (2) It may mean simply "to say" (Mt 9:8). (3) It may mean a revelation from God (Rom 11:4). (4) It is also used to apply to unspoken thoughts of the heart, esp. in the sayings of Jesus; also by Peter to Sapphira (Acts 6:8).

G. H. GERBERING

ANSWERABLE, an'ser-a-b'l: This word is found in the OT only. Moses and Ezekiel alone use it (Ex 35:18; Ezk 40:18; 45:7; 48:18). It is used in the OE sense of "corresponding to," "in harmony with." Bunyan uses it in the same sense (Holy War, Clar. Press ed., 92).

ANT (אָנָּט, n'malāh=Arab. namalāh): The word occurs only twice in the Bible, in the familiar passages in Prov (6:6; 30:25) in both of which this insect is made an example of the wisdom of providing in the winter for the wants of the winter. Not all ants store up seeds for winter use, but among the ants of Pal there are several species that do so, and their well-marked paths are often seen about Palestinian threshing-floors and in other places where seeds are to be obtained. The path sometimes extends for a great distance from the nest.

ALFRED ELY DAY

ANTE'DILUVIAN PATRIARCHS, an-tē-di-lı'-vī-an pā'tri-ark'hs: Ten patriarchs who lived before the Flood are listed in the genealogical table of Gen 5, together with a statement of the age of each at the birth of his son, the number of years that remained to him till death, and the sum of both periods or the entire length of his life.

The first half of the list, from Adam to Mahalalel inclusive, together with Enoch and Noah is the same in the three texts, except that the Sept has 100 years less in the first column in each case save that of Noah, and 100 years less in the second column. See CHRONOLOGY of OT.

Divergence exists in the case of Jared, Methuselah and Lamech only. Even here the longevity of Jared and Methuselah is given similarly in the Heb and the Sept; and probably represents the reading of the source, especially since the different data in the Sam text bear evidence of adjustment to a theory. The customary excess of 100 years over the age at the birth for the age of the patriarch at the birth of the son, and the variously divergent data for the total age of Jared, Methuselah and Lamech are, therefore, the matters that await explanation.

The general superiority of the Heb text of the Pent as a whole to the Sam text and the Sept is no longer questioned by Bib. scholars. But whether the superiority obtains in this particular passage has given rise to long and earnest discussion. Keil and Delitzsch make their commentation on Genesis, Press (Zeitsehrung der Septuaginta, 1859, 30ff), Noldeke (Untersuchung zur Kritik des AT, 1869, 112), and Eduard König (ZAW, 1883, 281ff), to hold the originality of the Heb data. Bertheau (Johßhser für deutsche Theologie, XXIII, 617f) and Dillmann ascribe priority to the Sam numbers in Gen 5, but to the Heb numbers in Gen 11. Klostermann argues for the originality of the Sept (Pentateuch, Nene Folge, 1907, 37-99).

It is agreed by all that the divergences between the texts are mainly due, not to accidental corruption, but to systematic alteration.

3. Divergences not Accidental

Accordingly two tasks devolve upon the investigator, namely (1) the removal of accidental corruptions from the numerical data in the several texts and (2) the discovery of a principle that underlies and explains the peculiarities in each one or in two of the three sets of data.

On the interpretation that the names denote individuals and that no links have been omitted in the genealogy, readers of the Sept noticed that according to its data Methuselah survived the flood, and in order to avoid this incongruity a scribe changed the 167 years, ascribed to his age at the birth of his son, to 187 years. This rendering was early in existence, and was followed by Jos. Holding the same theory regarding the genealogy, the Samaritans noticed that by their data three men, Jared, Methuselah, and Lamech, survived the Flood. To correct the
apparent mistake, without tampering with the age of these three men at parenthood, their longevity was reduced sufficiently to enable them to die in the year of the Deluge. If the Heb. text in its present form is not original, and is to be emended from the Sam and Sept, the same difficulty inhered in it. To overcome this difficulty, perhaps, 100 years were borrowed from the years that elapsed between parenthood and death and were added to the age of the three men at the time of begetting a son, in order to fill in the matter and as Jared was concerned and perhaps in the case of Lamech also, and the borrowing of an additional 20 years set Methuselah right also. If the original number for Lamech was 53 in the Heb, as in the Sam, then it was necessary to increase the time between Methuselah's birth and the flood not 20, but 49 years. These 49 years could not be added directly to either Methuselah's or Lamech's age at begetting a son without making this age exceed 200 years, and thus be out of proportion; and accordingly the 49 years were distributed.

The difference of a cent. in the age assigned to the patriarchs at the son's birth which distinguishes the data of the Heb in most cases from the Sept, and likewise from the Sam in several instances, in Gen 6 and regularly until Nabor in 11 10-26, is commonly explained in the manner in which the data is given in a similar way: namely, when any of these long-lived patriarchs was found recorded as having begotten a son at a more youthful age than 150 years, the translators of the Sept added 100 years; on the other hand, and in a Sam of 100 years when necessary in order that no one save Noah might be recorded as reaching 150 years of age before entering upon parenthood, and added 100 years when the record made a patriarch become father of a son before attaining even 50 years. A different explanation is, however, attempted, and the reason for the constant variant is sought in the purpose to construct an artificial chronology; for on interpreting the names as denoting individual persons and the genealogy as proceeding from father to son without break, a method employed as early as the 1st cent. of the Christian era (Ant, I, ii, 3), the time that elapsed between the creation of Adam and the Deluge was 1,556 years according to the Heb text, 1,307 according to the Sam text, and 2,242 according to the Sept; and numerous attempts have been made to bring one or other of these totals into arithmetical relation with some conceivable larger chronological scheme.

A conspicuous of these studies is furnished by Delitzsch (Neuer Commentar über die Genesis, 136-39), Dillmann (Genesis, 6te Aufl., 111-13), and most recently by Skinner (Critical and Exegetical Comm. on Genesis, 135, 136, 234). The different explanations that are offered naturally vary in plausibility; but all possess the common fault of lacking cogency at critical points and somewhere doing violence to the data.

In Gen 4 there are two distinct genealogies, one proceeding through Cain and the other through Seth. Since Hupfeld, the representatives of critics who partition Genesis have generally reached the conclusion that both of these genealogies were found in an ancient recension of it (Wellhausen, Composition des Hexateuchs, 8-14; Delitzsch, Neuer Commentar, etc., 126; Kautzsch and Sohn; Dillmann, Genesis, 104, 116; Budde, Urkunden, 91-94; Driver, Composition of the Hexateuchs, 14, 21; Strack, Genesis, 14, 99; Gunkel, Genesis, 49; Skinner, Genesis, 2, 14, 99 [4]; Stade, on the other hand regards 4 25, 26; 5 29 as the composition of a redactor, ZATW, X IV, 281). In Gen 5 there is also a genealogy leading through Seth to Noah.

By removing vs 25 and 26 of ch 4 from their present position and placing them before ver 1 or, as Guthrie does, before ver 17; and by extending the word "Eve" from ver 1 to extend in the Two ins 29, the words "another," and "instead of Abel, for Cain slew him"; and by introducing the words "and Lamech begat" before "a son" in 5 28, 29 and inserting this material after vs 18 and 19 or after ver 24: then the two genealogies of ch 4 are reduced to one and, so far as the names are concerned, have become almost identical with the Septite genealogy contained in ch 5. In fact the resemblances between the six names in 4 17.18 with six in 5 have from the first been the basis of every attempt to identify the two genealogies (Buttmann, Mythologus, 170-72). The procedure is violent (see strictures, Skinner, Genesia, 90). It is a serious objection also that the work of reconstruction has been conducted without thought of the possible bearing of the tribal theory of the genealogies on this problem.

It is important to note that the number of links in the two genealogies may indicate that Jabal, Jubal, and Tubal-Cain, who mark stages of developing culture, lived several generations before Noah. It was ancient Sem belief that civilization was far advanced before the Flood, and was continued in its various forms by the survivors (Berosus, and inscription 13, col. i, 18 in Lehmann's Shammaishumukin). However, for the sake of comparison, the six links in the genealogical chain of the Cainites are placed side by side with those of the Sethites so as to better reveal the resemblances and differences.

### Cainites

- **Kain**
- **Enoch**
- **Irad**
- **Melujoel (son of Jared)**
- **Methuselah**
- **Lamech**
- **Jabal and Jubal, Tubal-Cain and Naamah**

### Sethites

- **Kenan (= Kainan)**
- **Enoch**
- **Jared**
- **Methushelah (correctly, Methuselah)**
- **Lamech**
- **Shem, Ham, and Japheth**

Of these names two, Enoch and Lamech, occur in each genealogy, though Enoch does not occupy the same place in both lists. Kenan is readily derived from the same root as Kain. Instead of 'Irad the original Hebrew text may have been 'Idad, as was read by the LXX, A and Lucian. But, accepting 'Irad as original, 'Irad and Jared may conceivably have been distorted in the oral tradition; yet as they stand they are radically different. An old French text, preserved by Busbecq, 15.127, produced the names 'Irad in 5 14, 21; Strack, Genesis, 14, 99; Gunkel, Genesis, 49; Skinner, Genesis, 2, 14, 99 [4]; Stade, on the other hand regards 4 25, 26; 5 29 as the composition of a redactor, ZATW, X IV, 281). In Gen 5 there is also a genealogy leading through Seth to Noah.
lished by textual evidence and are fine Semitic names. Methusaelia particularly is of good Bab form, meaning "man of God"; archaic in Heb or smacking of the northern dialect, but quite intelligible to the Israelite.

The resemblance between the six consecutive names in the two lists is indeed striking, but the differences are also great; and the writer of 2 Samuel in pronouncing judgment is suggested and emphasized by a comparison of two lists from the later history of the people of Israel. The twelve kings of Judah compared with their nineteen contemporaries in northern Israel show almost as many resemblances as the ten Cainites to the twelve Sethites, Adam as the common ancestor not being reckoned. The two series begin with Rehoboam and Jeroboam, names as similar externally as Irad and Jared. Ahaziah of Israel was almost contemporary with Ahaziah of Judah; Jehoram was on the throne of Judah while Jehoram ruled over Israel, the reign of Jehoash of Judah overlapped that of Jehoash of Israel, and Jehoahaz of Israel preceded about half a century Ahaz, or, as his character and position appear in the books of Kings, that of Jehoash of Judah. If there can be two contemporary dynasties with these coincidences, surely there could be two antediluvian races with an equal similarity in the names. Then, too, the material difference between the Cainites and Sethites is great. Cain is the son of Adam; whereas Kenan is the third remove, being descended through Seth and Enos. The two Enochos seem to have nothing in common save the name (4 17:18; 5 20:33). The character of the two Lamechs is quite different, as appears from their speeches (4 19:23; 5 28:29). The line of Cain terminated in Lamech and his four children, of whom the three sons became of note in the annals of civilization; whereas the line of Seth continued through Noah, the hero of the Flood, and his three sons who were known only as the ancestors of peoples. Moreover, even excluding the section of Genesis assigned to F, the two lines were distinguished from each other, and most of the characteristic differences between them were clearly set forth, in the most ancient form of the Heb tradition, as it is actually known (Green, Unity of Genesis, 43-49; Delitzsch, Neuer Commentar, etc, 126, 127, 132, 140; Strack, Genesis, 29, 30, 22, 23 [11]).

The order of narration in the Book of Genesis is also significant. It indicates the writer's perception of a profound difference between the two races. The narrative regarding Cain and his descendants is completed, according to invariable custom in the Book of Genesis, before the line of Seth, in which eventually Abraham appeared, is taken up and its history recorded (Green, Unity of Genesis, 49; Delitzsch, Neuer Commentar, etc, 126). Thus at each stage of the history the story of the branch line is told before the fortunes are reached of the direct line of promise.

Berosus, a priest of Marduk's temple at Babylon about 300 BC, in the second book of his history tells of the ten kings of the Chaldeans who reigned before the Deluge. He says he obtained his information from a copyist who had the name, and afterwards Alacapor has his son reigned by him, who reigned eighteen years. The first king was Alacora of the city of Babylon, a Chaldean. He gave out a fable concerning himself that God had appointed him to be shepherd of the people, and by his son Assur, [a son of Alacora], sixty-six hundred years. And afterwards Alacapor his son reigned twelve years.

Thou Megalabos of the city of Pautibibla, and he reigned eighteen years. And after him Damos the shepherd of Pautibibla reigned ten years. Thou Edoranchus of Pautibibla reigned eighteen years. Thou Amempeninos, a Chaldean of Lararcha, reigned; and he, the eight, was king ten years. Next Othlary a Chaldean of Lararcha, reigned; and he [the ninth] was king eight years. And [last of all], upon the death of Othlary, his son Xiscotros reigned seven years. In his time the great deluge occurred. Thus, when summed up, the kings are reckoned by the days and the years of twenty [or four hundred and thirty-two thousand years, reaching to the Flood].

The original Bab form of seven of these ten names has been determined with a fair degree of probability by a reading of the Gr Adaparos in all probability a misreading by a copyist of the Gr Adaparos (Hommel, PSBA, XV, 243 ff; Zimmern, KAT', 530 ff), and accordingly represents Adapa, followed perhaps by another element beginning with the letter r; Amelon and Anmemnon are equivalent to the Bab noma amedu (Delitzsch, Wo lag das Paradis? 8 149; Hommel, PSBA, XV, 243 ff; Zimmern, KAT', 530 ff), man, and Anemnon (Hommel, PSBA, XV, 243 ff; Zimmern, KAT', 530 ff), servant of the moon. Zimmern is Edumarrukin (pronounced Evumarrukin) (Zimmern, KAT', 530 ff); Amempeninos is probably Amelu-Sin (Delitzsch, Wo lag das Paradis? 149; Hommel, PSBA, XV, 243 ff; Zimmern, KAT', 530 ff), servant of the moon. The name, according to the Greek Paraparos, is Ubarra-Tutu (Delitzsch, Wo lag das Paradis? 149; Hommel, PSBA, XV, 243 ff; Zimmern, KAT', 530 ff), servant of Marduk; and Xiscoros is Ussal-i-shara (cf. Delitzsch, KAT', 530 ff), equivalent to Atra-hasis, an epitaph given to the hero of the Flood.

Several of these names are well known in Babylonian literature: Adapa was a human being, a wise man, a wizard, who failed to obtain immortality. He was an attendant at the temple of Ea in the town of Eredu, prepared bread and water for the sanctuary and provided it with fish. Perhaps it was his connection with the temple that led to his being called son of Ea, and described as created or built by Ea (Schrader, Keilinschriftliche Bibliothek, VI. 91-101). Similarly King Esharkaddon calls himself the faithful son, child of Belus; and Ashurbanipal claims to have been created by the god by his son Amelu-Sin in the womb of his mother (cf. Adam, the God of the son, Lk 3 38). Emendurakku, whose name has been interpreted as possibly meaning chief priest of Duranki, the meeting place of sky and earth; was a god of Sippar, a city where his deity was the sun-god Shamash. He was a notable wise man who, it seems, was reputed to have been taken by the gods Shamash and Ramman into their fellowship and made acquainted with the secrets of heaven and earth (KAT', 530 ff). As among the Hebrews the priests were descended from Aaron, so among the Babylonian Emendurakku was regarded as the ancestor of the wizards and soothsayers or the founder of their guild. As among the Hebrews there was a worship of 1 K (KAT', 537). In the Babylonian account of the Flood the hero is addressed as son of Ubarra-Tutu. It is worth mention that legends grew up about the hero of the Flood, as they have about other mythical personages since; and he even appears like some

8 Syneculhus quoting Alexander Polybius. 9 Syneculhus quoting Apollonius. 10 Syneculhus quoting Abdenorus. 11 Syneculhus quoting Alipionius concerning the deluge of Noah, Armenian Chronicle, quoting Alexander Polybius. 12 Syneculhus, Armenian Chronicle, quoting Abdenorus. The royal names have been transmitted with substantial uniformity, except the third, fifth, seventh and ninth. Alborin (2) is given as Amilburin (9) and Alburn (5); Magabazar (4) has been copied as Magabazar (5) as Amoor (3), Edemphas (5) as Eorabaz (3), Edoresis (5) and Edomesis (5) and Adrians (1) as Adrians (5). The city names and readings of the Gr. adaptations and Readings, Historica, 70-50; Mem. Patrologia Graeca, XIX, 9; Sebastiani Chronicae urbanae, Lib. 1, cap. 15, pp. 100, 102; Scherra, Josuedi Chronorum, Lib. 1, pp. 7, 9.
ancient kings, with the determinative for god before his name. Adapa, also, who was classed with the wizards, early came to have a place in story.

The first name in the list of Berosus is Aloros. Professor Hommel would understand the original Bab form to have been Aruru, a goddess. The identification is precarious, for it makes his line of kings begin with a goddess. He should have called Aloros a queen. Professor Hommel regards Aloros as a deity, contrary to the statements of the tale itself; thus holding that the second Bab king like the first was a Divine being. On such an interpretation the Bab and Heb lists are not identical, for the Heb genealogy commences in Adam, human being. With the third name, however, certain remarkable correspondences begin to appear. The third Bab king is Amelu, man, and the third patriarch is Enoch, also meaning man; the fourth king is Umanin, artificer, and the fourth patriarch is Kenan, a name derived from a root meaning to form or fabricate. The seventh king is Enmeduranki, who apparently was reputed to have been summoned by the gods Shamash and Ramman into their realm, and made familiar with the secrets of heaven and earth; and the seventh patriarch was Enoch who walked with God (like Noah, Gen 6:9; see K A T ?, 540). The tenth king, like the tenth patriarch, was the hero of the Flood. These facts are not compatible with Egypt: either the two catalogues are fundamentally different, having been constructed for different purposes, yet as they deal with prominent persons belonging to the same period of history and to the same order than curious tenaciously and culminate in the same individual (as do the genealogies of Mt 1 and Lk 3); or else when the unexplained names of both lists shall have been finally interpreted, the two catalogues will be found to represent the same tradition.

Differences between the catalogues exist, which in some instances may be more apparent than real.

(1) In the Babylonian list the descent of the government from father to son is stated in a different manner, namely, from the first king to the second and from the ninth to the tenth. The Heb asserts kinship, however remote, between the successive links. Yet the two records are quite compatible, as is shown by the tuning theory (see below) that the Heb genealogy was shortened by omissions in order to name but ten generations. (2) Each of the ten patriarchs is assigned a long life; each of the ten kings has a greatly longer reign. The contrast is twofold: between the number of years in corresponding cases, and between length of life and length of reign. But instead of this difference indicating non-identity of the two lines, it may be found, when the Sem tradition is fully known, to afford the explanation for the duration of life which is assigned to the patriarchs. (3) There is no arithmetical ratio between the years connected with the corresponding names of the two lists. And the symmetry of the numbers in the Bab transmission is open to the suspicion of being artificial. The number of kings is ten; the sum of their united reigns is one hundred and twenty sars, a multiple of ten and of the basal number of the Bab duodecimal system. The sum of the reigns of the successive reigns which taken together, 3+13+12, make ten and eighteen sars. Taking the reigns in the order in which they occur, we have as their duration the series 10, 18+10, 18, 10, 18, 10, 8, and 18 (Davis, Genesis and Semitic Tradition, 96–100; Strack, Genesis, 24). Three explanations of this genealogy in Gen 5 may be mentioned. (1) An interpretation, current at the time of Jos (Ant, I, iii, 4) and 11. The Interpretation 1650 in his attempt to fix the dates of the events recorded in the Scripture Genealogy assumes an unbroken descent from in Gen 5 father to son, during ten generations, from Adam to Noah. On this theory the time from the creation of man to the Flood is measured by the years assigned to the patriarchs at the birth of the son and successor, together with Noah's age when he entered the Ark; so that all the years from the creation of Adam to the Flood were 1,650 years. The extraordinary longevity of these patriarchs is accounted for by the known physical effects of sin. Sin works disease and death. Man was not as yet far removed from his state of sinlessness. The physical balance between man sinless and man the sinner had not been attained (cf Deuteronomy, Genesis, 130; see Ant, I, iii, 9). But after all are we really justified in supposing that the Heb author of these genealogies designed to construct a chronology of the period? He never puts them to such a use himself. Each genealogical statement is deduced from the chronological statement is deduced from them. There is no computation anywhere in Scripture of the time that elapsed from the Creation or from the Deluge, as there is from the descent into Egypt to the Exodus. But, from the Exodus to the building of the temple (1 K 6:1, Green, Bibliotheca Sacra, 1890, 296). (2) A second method of interpretation assumes that links of the genealogy have been intentionally omitted between the ten main dynasties, the names which are based on the phenomena presented by other Heb genealogical registers. Matthew, for example, has outlined the lineage of Christ from Abraham. The history naturally divides into three sections, and to give the tabulation symmetry Matthew names twice seven generations in each division, in one instance omitting three famous kings of Judah and saying "Joram begat Uzziah." As Joram is said to have begotten Uzziah, his grandson's grandson, but no Enoch must have been son or grandson, although the latter may have been Enoch's great-grandson or remotest descendant. The book of Genesis is divided by its author into ten sections, each introduced by the same formula (34; 5; 6 and 9), while this is inverted from the fifth to the tenth. The crisis of the history was the Flood. Twice ten generations are named in the symmetrical register, ten before the Flood, Sham to Abraham; and the latter period in its turn is divided into two equal parts, and five generations are named for the time to, and five for the time after the birth of Peleg, in whose days 'the earth was divided' (11) 10–26; 10 25; cf perhaps 11 1–9). On this conception of the tables, which is fully justified, there is no basis in the genealogy from Adam to Noah for the calculation of chronology. The table was constructed for a different purpose, and the years are noted for another reason than chronology (Green, Bibliotheca Sacra, 1890, 285–303; Warfield, Princeton Theological Review, 1911, 2–11; cf Dillmann, Genesis, 166 "dritte Abicht"). The longevity is explained as it is on Usher's interpretation of the data (see above). (3) A third method of interpretation, and the one generally named patriarchal to denote the individual and his family spoken of collectively. The person and tribe form one conception. This method also agrees with the phenomena presented by Heb
genealogical registers. Thus, Keturah bears to Abraham Jokshan and Jokshan begat Sheba and Dedan, tribes and the countries they inhabited (Gen 25 1-5). Mizraim, as Egypt was called by the Hebrews, begat the Lydians and other ancient peoples (10 15); and Canaan begat the town of Sidon and subsequent tribes as the Jebusite and the Amorite (vs 15-18). Similarly, countries like Media, Ionia (Javan), Tubal and Meshech, and peoples named by gentile adjectives in the plural number, like Kittim and Dodanim, are listed as sons of Japheth; and Ethiopia, Egypt, Punt and Cush (evolved into Arabia) in Arabic, Sheba and Havilah are recorded as descendants of Ham (2-7). Moreover, outside of genealogies, in common parlance Israel denotes a man and the tribe that sprang from him; David, the king of that name and the dynasty he founded (1 K 25:18; of Jer 30:9); Nebaioth, a people and its prince (Gen 33:16; 28:9). Sometimes the family takes its name from its progenitor or later leading member; sometimes the name of the tribe or of the country it inhabited is given to its chief representative, as today men are commonly addressed by their family name, and nobles are called by the name of their duchy or county. It is quite in accordance with usage, therefore, that Noah, for example, is the hero of the Flood and the family to which he belonged. The period of the Flood is the period during which the family had prominence and leadership; the age at the son's birth is the date in the family history at which a new family originated that ultimately succeeded to the dominant position. If no links have been stopped in constructing the register, the period from the creation of man to the Flood is measured by the sum of the ages of Adam and his successors to Noah and 600 years of the life of Noah, amounting to 8,225 years. Thus, the family of Seth originated when Adam was 130 years old (Gen 5:3). Adam and his direct line were at the head of affairs for 930 years (5), when they were succeeded by the family of Seth. In Seth, 105 years after it attained headship, the family of Enoch took its rise (6). Seth, after being at the head of affairs for 912 years (8) was succeeded by the family of Enoch, in the year of the world 1842. And so on.

JOHN D. DAVIS

ANTEDILUVIANS, an-tē-di-li'ū-vi-ans: According to the ordinary interpretation of the genealogical tables in Gen 5 the lives of the antediluvians were prolonged to an extreme agefulness which attains that of 969 years. But before accepting these figures as a basis of interpretation it is important to observe that the Hebrews, the Sam and the Sept texts differ so radically in their sums that the evidence from the texts can be placed in any of them. The Sept adds 100 years to the age of six of the antediluvian patriarchs at the birth of their eldest sons. This, taken with the great uncertainty connected with the transmission of numbers by the Heb method of notation, makes it unwise to base important conclusions upon the data accessible. The most probable interpretation of the genealogical table in Gen 5 is that given by the late Professor William Henry Green, who maintains that it is not intended to give chronology, and does not give it, but only indicates the line of descent, as where (1 Ch 26:24) we read that "Shebuel the son of Gershom, the son of Moses, was ruler over the treasures"; whereas, while Gershom was the immediate successor of Moses, Shebuel derived from Gershom by several generations. According to the interpretation of Professor Green all that we can certainly infer from the statement in Heb that Adam was 130 years old when he begat Seth, is that at that age the line branched off which culminated in Seth, it being permitted, according to Heb usage, many intermediate generations as other evidence may compel. As in the genealogies of Christ in the Gospels, the object of the tables in Genesis is evidently not to give chronology, but the line of descent. This conclusion is supported by the fact that no use is made after the statement about Seth of the word of the chronology, whereas the Genealogies line of descent is repeatedly emphasized. This method of interpretation allows all latitude to primitive information that any archaeologist may require. Some will get further relief from the apparent incredibility of the figures by the interpretation of Professor A. Winchell, and Rev. T. P. Crawford (Winchell, Pre-adamites, 449 ff) that the first number gives the age of actual life of the individual while the second gives that of the ascendency of his family, the name being that of dynasties, like Caesar or Pharaoh.

The nēphilim (giants) and the mighty men born of "the sons of God" and the "daughters of men" (Gen 6:4) are according to the best interpretation "giants in wickedness," Nephilim being the fruit of intermarriage between the descendants of Seth ("sons of God") who had the name Noach (Noah), and the "daughters of men." The idea that "sons of God" refers to angels or demigods has no support in Scripture. On this familiar designation of the worshippers of the true God see Ex 3 22; Dt 14 1; 32; repeated in Isa 1:21; 11.1. Intermarriage with depraved races such as is here intimated produced the results which were guarded against in the Mosaic law prohibiting marriages with the surrounding idolatrous nations. The word Nephilim in Gen 6:4 occurs again only in Nu 13 33 (AV "giants"). But the word is more probably a descriptive term than the name of a race. In the older Gr VSS it is τέρσιον "violent men." The antediluvians are, with great probability, identified by some geologists (Sir William Dawson, e.g.) with glacial or paleolithic man, with glacial or paleolithic man, with glacial or paleolithic man, with glacial or paleolithic man.

4. The Ice Age found buried beneath the deposits of glacial floods in northern France, southern England, southern Russia and in the valleys of the Delaware, Ohio and Missouri rivers in America. The remains of "paleolithic" men reveal only conditions of extreme degradation and savagery, in which violence reigned. The sparse population which was spread over the northern hemisphere during the closing floods of the Glacial period lived in caves of the earth, and contended with a strange variety of gigantic animals which became extinct at the same time with their human contemporaries (See DELUGE).

beatrix). Tristram cites two African species (the babuline antelope, Babalis mauretanica, and the addax, Addax nasomaculatus) as existing in the Sin peninsula, southern Pal and Arabia, but he did not collect specimens of either and was probably misled by statements of the Arabs which in both cases really referred to the oryx. The only naturalist who has ever penetrated into N.W. Arabia is Mr. Douglas Carruthers, who went in 1909 on a collecting expedition for the Syrian Protestant College at Beirut, his object being to obtain the oryx and any other large antelopes which might be found there. Through observation and repeated inquiry he became convinced that neither the addax nor the babuline antelope is found in Arabia. Tristram says the addax is called maḥa‘ and the babuline antelope bakar-ul-waḥah, both of which names are in fact used by the Arabs for the oryx, which is also according to Doughty called waḥdakah.

\[ Qūḥā‘ in the list of clean animals in Dt 14:5 (AV ‘roebuck’; RV ‘gazelle’) is quite certainly gazelle, Arab. gō'b (q.v.), so it is quite possible that ṭōy may be the oryx. It is noteworthy that it is rendered oryx (ὄρυξ) in the LXX. It must be borne in mind that ṭōyn or ṭōyn, rendered “unicorn” (q.v.) in AV and “wild ox” in RV, may perhaps also be the oryx. That the oryx should be called by two names in the Bible need not be considered strange, in view of the indifference of Sem ideas of natural history, which is directly evidenced by the three names now used for this animal by the Arabs.

The slightly different form ṭōy (AV “wild bull”); RV “antelope”) found in Isa 54:10 (“Thy sons have fainted, they lie at the head of all the streets, as an antelope in a net”) may quite as well refer to the oryx as to any other animal. According to Genesis the word is derived from the verb ṭā‘ōh, “to outrun,” which would be appropriate for this or any antelope.

The accompanying illustration is from a photograph of a well-grown female oryx in the zoological gardens at Cairo, which is 35 in. high at the shoulder and whose horns are 21 in. long. An adult male measures 40 in. at the shoulders, 59 in. from tip of nose to root of tail, and the longest horns known measure 27½ in. The color is pure white with dark brown or black markings. It is a powerful animal and its horns may inflict dangerous wounds. It inhabits the deserts of Arabia and its remarkably large hoofs seem well adapted to traversing the sands. It feeds upon grasses and upon certain succulent roots, and the Bedawin declare that it never drinks. Under its name of maḥa‘ it is celebrated in Arab. poetry for the beauty of its eyes. Of the Homeric ox-eyed goddess Hera (βόος ἑρας “Hep), Bakar-ul-waḥah, the name most commonly used by the Bedawin, means “wild cow” or “wild ox,” which is identical with the tr of ṭōy in the AV.

Alfred Ely Day

Anthodon, an-thŏ-don: A city of Pal, rebuilt along with Samaria, Ashdod, Gaza, and other cities, at Gabinius' command (Jos, Ant. XIV, v, 3).

Anthothijah, an-thŏ-thĭ-jā (ἀνθόθεη, 'an-thōthēiğh, “belonging to Anthothith”), a son of Shasak of Benjamin (1 Ch 8:24), written in AV Anthothijah.

Anthropology, an-thrŏ-pol-o-jī:
I. Terms Employed.——Several words are used in the OT for our word Man.

I. Terms Employed.—Several words are used in the OT for our word Man.

Ahd, ‘adham, either as the name of the first man, (cf Lk 3:38; Rom 5:14; 1 Cor 15:45); or as an appellative—the man; or the 1. ‘Aḍham—generic name of the human race (LXX ἀνθρώπος; Vulg homo). The origin of the name is obscure. In Gen 2:7 Adam is connected with ‘aḍhamah, from the earthy part of man’s nature (dust out of the ‘aḥdāmah), as the earth-born one. The derivation of Adam from ‘aḍhamah, however, is disputed—among others by Dillmann: “Sprachlich lässt sich die Ableitung aus Adamah nicht vertheiden” (Genesis, 58). Delitzsch refers to Jos (Ant. 1. i, 2), who maintained that Adam really meant purrḥōs (“red as fire”), in reference to the redness of the earth, out of which man was formed. “He means,” adds Del., “the wonderfully fruitful and aromatic red earth of the Hauran chain of mountains, which is esteemed of marvelously strong and healing power, and which is believed to be self-rejuvenescing” (N. Comm. on Gen, 118). The connection with Bēlom in Gen 25:30 may perhaps point in the same direction. A connection has also been sought with the Assy. ḍmu (‘aḥlībr), especially the young of the bird, in the sense of making or producing (Delitzsch; Oxford Dictionary); while Dillmann draws
attention to an Ethiopian root ḏmn̄a, “pleasant,” “pleasant-able, charming”—a derivation, however, which he rejects. suffice it to say, that no certain derivation has yet been found for the term (thus Dillmann, “ein sicheres Etymon für Adam ist noch nicht gefunden,” Gen., 53). Evidently in the word the earthy side of Man’s origin is indicated. The phrase ֶנַחַי חָטָם, “son of man” (Nu 23 19; Job 20 6; Ezek 2 3) is frequently found to denote man’s frailty and unworthiness in the sight of God. So in the much-disputed passage in Gen 3 12, “And the man (םָנַח חָטָם) are contrasted with the degenerate “daughters of men” (בְּנָות חָטָם). See also Ps 11 4; 12 1-8; 14 2. On the other hand the dignity of man is sometimes indicated in the word ָאָדָם. Thus in Eccl 7 28, “One man (וֹדָם) among a thousand has he, but a woman among all those have I not found.”

\[ \text{ wilderness, } \text{noah (Ps 8 4; 10 18; 90 3; 103 15; frequently in Job and Ps), man in his impotence, frailty, mortality (like the Gr δρῶτος) as against } \text{ ish, man in his strength and dignity. Gen 4 22. The word becomes a proper name, applied to the son of Seth. Delitzsch derives it from a root ָאֶשׁ related to the Arab and Assyry, signifying “to be or become frail.” To intensify this frailty, we have the phrase in Ps 10 18, “נָאָשׁ man who is of the earth.”

\[ \text{ wilderness (tish), LXX aner; Vulg, var, male as against female, even among lower animals (Gen 7 2); husband as contrasted with wife (ışshāḥhāt).}

4. ʾīsh Gen 2 23/24; man in his dignity and excellence (Jer 5 1: “seek, ... if ye can find a man of understanding,” that is, of shāḥhāt; Ps 8 4, where ʾīsh is contrasted with בָּנֶה חָטָם, “unto you, O men, I call; and my voice is to the sons of men”—like the Attic ἄνθρωπος and anthropōt, wisdom turning her discourse to high and low, to persons of every sort) (Prov 8 52, and 23 24). Delitzsch, A New Comm. on Gen, 145. The term ʾīsh is sometimes used generally, as the Gr ἄνθρωπος, the French, the German, to express “anyone,” as in Ex 21 14; 26 16; 1 Tim 3 8; 1 Peter 2:6. He is a ἄνθρωπος, gibbor, man in his strength.

The term is applied as men contrasted with women and children (Job 3 3), “a male child,” in opposition to a female (יָשִׁית drāʾin); also in contrast to non-territorial inhabitants (Ex 10 11) and in NT, see Mt 8 10; Jn 1 6, where ἄνθρωπος is used. Thus we read: “Neither shall a man [gebrah] put on a woman’s garment” (Dt 22 5). Heroes and warriors are specially indicated by the term in such phrases as “mighty man of valor” (Acts 16 12). Sometimes animals are denoted by the term, as in Prov 30 30 (”mightihest among beasts”); sometimes it is applied to God (Isa 10 21) and to the Messiah (Isa 9 6). In combination with ʾīsh it gives intensity to the meaning, as in 1 Kgs 19 13. The Gr term ἄνθρωπος stands for man generally—a human being (Mt 12 12; Mk 10 27); though it is sometimes used to indicate man in his imperfection and weakness (1 Cor 3 3), “any mighty man of valor” (Acts 19 40). Of the Gr terms ἄνθρωπος stands for man generally—human being (Mt 12 12; Mk 10 27).

5. Gebher, in opposition to a female (יָשִׁית drāʾin); also in contrast to non-territorial inhabitants (Ex 10 11) and in NT, see Mt 8 10; Jn 1 6, where ἄνθρωπος is used. Thus we read: “Neither shall a man [gebrah] put on a woman’s garment” (Dt 22 5). Heroes and warriors are specially indicated by the term in such phrases as “mighty man of valor” (Acts 16 12). Sometimes animals are denoted by the term, as in Prov 30 30 (”mightiest among beasts”); sometimes it is applied to God (Isa 10 21) and to the Messiah (Isa 9 6). In combination with ʾīsh it gives intensity to the meaning, as in 1 Kgs 19 13. The Gr term ἄνθρωπος stands for man generally—a human being (Mt 12 12; Mk 10 27).

6. Antrōpos

(2 Cor 4 16, where the “outward man” is represented as slowly dying, while the “inner man” is being renewed, contrasts the “natural man” (1 Cor 2 14), the “old man,” with the “new” (Rom 6 6; Col 3 9/10).

Anēr, Lat vir—man in his vigor as contrasted with woman in her weakness (1 Cor 11 3; 1 Pet 3 7): sometimes, however, standing for “men in general” (Mk 6 44: “They that ate the loaves were five thousand men”—adres).

II. The Nature of Man. —The Biblical idea of man’s name has summed up in the words of St. Paul, “of the earth, earthly” (1 Cor 1 1).

1. Biblical 16 47, as compared and contrasted Terms with the statement in Gen 1 27:

“God created man in his own image.”

This act of creation is described as the result of special declaration on the part of God—the Divine Being taking counsel with Himself in the matter (ver 26). Man therefore is a creature, formed, fashioned, shaped out of “earth” and made after the “image of God.” More than one word is employed in the OT to express His idea: (1) בָּרָא, “create,” a word of uncertain derivation, occurring five times in Gen 1, to indicate the origin of the universe (ver 1), the origin of life in the waters (ver 26), and always in connection with God’s creative work, never where “second causes” are introduced. (2) יָכַור, “fashion,” “form,” “knend” (Gen 2 7), “of the dust of the ground.” (3) בָּדָה, “build,” in special reference to the creation of woman, “built out of the rib” (Gen 2 22).

By God’s special interposition man becomes a nephesh hayyah (“a living soul”), where evidently there is a reference to the breath of life, which man shares with the beasts (cf. Gen 2 21), yet with this distinction, that “God Himself breathed into man’s nostrils the breath of life” (lit. “breath of lives,” nishmath hayyah). With a single exception, that of Gen 7 22, the word nishmath, “breath,” is confined to man. In Gen reference is made to his creative act, where Elisha says: “There is a spirit in man, and the breath (nishmath) of the Almighty [shaddāl] giveth them understanding” (Job 32 8); cf. also Isa 42 5: “Then I will giveth breath (nēsāth) to the Man therefore is a being separated from the rest of creation and yet one with it.

This distinction becomes more clear in the declaration that man was made in the “image” (“eshem, image, imago), and after the likeness (ḏmāth, homonis, similudo) of God. The question has been asked Likeness whether the two terms differ essentially in meaning; some maintaining that “image” refers to the physical, “likeness” to the ethical side of man’s nature; others holding that “image” is that which is natural to man, was created with him, was therefore as it were stamped upon him (concrete), and “likeness”, that which was acquired by him (acquisite); while others again declare that “image” is the concrete and “likeness” the abstract for the same idea. There is very little scriptural ground for these assertions. Nor can we accept the interpretation of the older Scoleens and some of the Remonstrants, that God’s image consisted in dominion over all creatures, a reference to which is made in Gen 1 28.

Turning to the narrative itself, it would appear that the two terms do not denote any real distinction in ver 27critical versus 27. The expression “in our image, in our likeness” (Immagine, “immagine”).

3. Meaning alone is used to express all that separates man from the brute and links him to his Creator. Hence the expression “in our image.” In ver 26, however, the word
This likeness of man with God is not merely a Scriptural idea. Many ancient nations seem to have grasped the truth. The apostle Paul placed them in a far-off past, not in a distant future. St. Paul quotes a pagan poet in Acts 17 28, "We are also his offspring" (Aratus of Soli, in Cilicia, a countryman of the apostle). This statement also occurs in the beautiful hymn to Jupiter, ascribed to Cleanthes, a Stoic native of Assos in the Troad, and contemporary of Aratus. Psychologically and historically therefore the Bible view is justified.

III. The Origin of Man.—The Divine origin of man is clearly taught in the early chapters of Gen, as has just been seen. Two narratives from different sources are supposed to have been combined by an unknown R to form a not very harmonious whole. It is the purpose of criticism to determine the relationship in which they stand to each other and the dates of their composition. In both accounts man is the crowning glory of creation. The first account (Gen 1 1—2 3) is general, the second particular (Gen 2 4—25); in the first we have an account of man's appearance on a prepared platform—a gradual rise in the scale of organized existence from chaos upward to the climax, which is reached in man. There is reason to believe that the one particular account was prepared by the writer as a process which occupied six days, or periods, measured by the appearance and dissipation of darkness. In the first period, chaotic disturbance is succeeded by the separation of light from darkness which in its turn is followed by the separation of water from dry land, and to this a second period is assigned. Then gradually in the next four periods we have in orderly sequence the rise of vegetable life, the formation of the creatures of the deep, of the air, of the dry land. When all is prepared man is called into being by a special fiat of the Almighty. Moreover, while other creatures were produced "after their kind," man alone as a unique conception of the Divine Intelligence is made to appear upon the scene, called into existence by direct Divine interposition, after a Divine type, and in distinction of sex; for both man and wife, in a later chapter, are called by the same name: Adam (Gen 2 24).

The former is the second account of the first narrative. No wonder, then, that Scripture elsewhere calls the first man "the son of God" (Lk 3 38). It need not be determined here, whether the account is strictly chronological, whether the "days" are intended to signify periods of darkness and not periods of twenty-four hours regulated by the rising and setting of the sun, or whether the whole narrative is but a prose poem of creation, not strictly accurate, or strictly scientific.

In the second narrative (Gen 2 2—25) the order of procedure is different. Man here is not the climax, but the center. He is a creature of the dust, but with the breath of God in his nostrils (Gen 2 7), holding sway over all things, as God's vice-gerent upon earth, creation circling around him and submitting to his authority. To this is added a description of man's early home and of his home-relationships. The second narrative therefore seems on the face of it to be supplementary to the first, not contradictory of it; the agreements indeed are far greater than the differences. "The first may be called typical, the second, physi- logical. The former is the generic account of man's creation—of man the race, the ideal; the latter is the personal account; it is that of the actual man, of the historic Adam" (Laidlaw).

The differences between the two narratives have been magnified by supporters of the various docu-
mentary hypotheses. They are supposed to differ in style—the first “displaying clear marks of study and deliberation,” the second being “fresh, spontaneous, primitive” (Dri-ver, Genesis). They differ also in their design and order of events—the earth, in the second narrative not emerging from the waters as in the first, but dry and not fitted for the support of vegetation, and man appearing not last but first on the scene, followed by beasts and birds lastly by woman. The document is further supposed to differ in their conception of Divine interposition and a consequent choice of words, the first employing words, like “creating,” “dividing,” “making,” “setting,” which imply nothing local, or sensible in the Divine nature, the second being strongly anthropomorphic. —Jeh represented as “moulding,” “placing,” “taking,” “building” etc—and moreover locally determined within limits, confined apparently to a garden as His accustomed abode. Without foreclosing the critical question, it may be replied that the first narrative is as anthropomorphic as the second, for God is there represented as “speaking,” “setting” (1 17; 2 17), “delighting in” the work of His hands (1 31), “addressing” the living creatures ver 24, and “crowning” them close on 2 31. As to the home of Jeh in a limited garden, we are expressly told, not that man was admitted to the home of his Maker, but that Jeh specially “planted a garden for the abode of man.” The order of events may be different; but certainly the scope and the aim are not.

More serious have been the objections raised on scientific grounds. The cosmogony of Gen has been disputed, and elaborate comparisons have been made between geological theories as to the origin of the world and the Mosaic account. The points at issue are supposed to be the following: geology knows of no “periods” corresponding to the “days” of Gen; “vegetation” in Gen appears before animal life, geology maintains that they appear simultaneously; “fishes and birds” in Gen preceded all land animals; in the geological record “birds” succeed “fishes” and are preceded by numerous local or modern racers of each. To this a twofold reply has been given: (1) The account in Gen is not scientific, or intended to be so: it is a prelude to the history of human sin and of Divine redemption, and gives a sketch of the world’s origin and its abode from his first to his last. (2) That one object in view. The starting-point of the narrative is the creation of the universe by God; the culminating point is the creation of man in the image of God. Between these two great events certain other acts of creation in orderly sequence are presented to our view, in so far as they bear upon the great theme of sin and redemption discussed in the record. The aim is practical, not speculative; theological, not scientific. The whole creation-narrative must be judged from that point of view. See Cosmogony.

(2) What has struck many scientists is not so much the difference or disharmony between the Mosaic and the geological record, as the wonderful agreements in general outline apart from discrepancies in detail. Geologists like Dana and Dawson have expressed this as clearly as Haeckel. The latter, e.g., has openly given utterance to his “just and sincere admiration of the Jewish lawgiver’s grand insight into nature and his simple and natural hypothesis of creation . . . which contrasts favourably with the confused mythology of creation current among most of the ancient nations” (History of Creation, 1, 37, 38). He draws attention to the agreement between the Mosaic account, which accepts “the direct action of a constructive Creator,” and the non-miraculous theory of development, inasmuch as “the idea of separation and differentiation of the originally simple matter and of a progressive development” is to be found in “the Jewish lawgiver’s” record.

Later, it has been maintained that Israel was dependent upon Babylon for its scientific knowledge; but even the most serious supporters of this view have had to concede that the first introduction of Bab teeth into the sacred narrative “must remain a matter of conjecture,” and that “it is incredible, that the monotheistic author of Gen 1, at whatever date he lived, could have borrowed any detail, however slight, from the polytheistic epic of Marduk and Tiamat” (Driver, Gen. 31). The statement of Bauer in his Hebräische Mythologie, 1802: “Es ist ein Tag ausser allen Zweifel gesetzt, dass die ganze Erzählung ein Mythos ist” (It is beyond all doubt, that the whole narrative is a myth), can no longer be satisfactorily maintained; much less the assertion that we have here an introduction of post-exilic Bab or Pers myth into the Heb narrative (van Leeuwen, Anthropologie).

Whether the division of the narrative into Elohist and Jehovahic documents will stand the test of comparison with the critical histories of the race is a great many minds. Professor Eerdmans of Leyden, the present occupant of Kuenen’s chair, has lately maintained that a “thorough application of the critical principles of the school of Graaff—Wellhausen leads to highly improbable results,” and that “the present OT criticism has to reform itself” (HJ, July, 1909). His own theory is worked out in his Attestamentliche Studien, to which the reader is referred.

IV. The Unity of the Race.—The solidarity of the race may be said to be as distinctly a doctrine of science as it is of Scripture. It is implied in the account of the Creation and of the Deluge. It is strongly affirmed by St. Paul in his address to the Athenians (Acts 17 26), and is the foundation of the Bib. scheme of redemption (Jn 3 16). The human race in the OT is described as “sons of Adam” (Dtn 32 8; Gen 5 1). Driver from Gen 1 27; 2 20, as having its origin in one individual (Gen 2 18; of 1 Cor 11 8, where woman is described as derived from ‘man’). Hence the term “Adam” is applied to the race as well as to the individual (Gen 4 1 36; 2 5; 3 22 24; 5 21). This doctrine is applied to the history of redemption—Christ as the “second Adam” restoring what was lost in “the first Adam” (1 Cor 15 21 47 49).

Outside of Holy Scripture various theories have been held as to the origin, antiquity and primeval condition of the human race. That 2. Various of polygenism (plurality of origin) Theories has found special favor, partly as co-adamism, or descent of different races from different progenitors (Paracelsus and others), partly as pre-adamism, or descent of dark-colored races from an ancestor who lived before Adam—the progenitor of the Jews and the light-colored races (Zanim and esp. de la Peyrère). But no serious attempts have yet been made to divide the human race among a number of separately originated ancestors. The Bib. account, however, has been brought into discredit by modern theories of evolution. Darwin has not held for polygenism; though many interpret- ers of the evolutionary hypothesis have given it that application. Darwin distinctly repudiates polygenism.

He says: “Those naturalists who admit the principle
of evolution will feel no doubt, that all the races of man are descended from a single primitive stock" (Descent of Man, 2d ed, 176); and on a previous page we read: "Man has been studied more carefully than any other animal, and yet there is the greatest possible diversity amongst capable judges, whether he should be classed as a single species, or race, or as two (Verey), as three (Jacquinot), as four (Kant), five (Blumenbach), six (Buffon), seven (Hunter), eight (Agassiz), eleven (Pékering), fifteen (Bory St. Vincent), sixteen (Dechmoulin), twenty (Morgan), sixty (Crawford), or as sixty-three, according to Burke" (p. 174).

V. Evolutionary Theory as to the Origin of Man.

—Modern science generally accepts the theory of evolution. Darwin gave to the hypothesis the character it never had before; but since his day its application has been unlimited. "From the organic it is extended to the inorganic world; from our planet and the solar system to the cosmos, from nature to the creations of man's mind—arts, laws, institutions, religion. We speak in the same breath of the evolution of organic beings and of the steam engine, of the printing-press, of the newspaper, now even of the atom" (Ory, God's Image in Man, 85). Without a single exception all arguments and conclusions from the application of the theory, the factors that enter into the process, the method or methods by which the great results in this process are obtained, may still be considered as under debate. Its application to the Bible doctrine of man presents serious difficulties.

Darwin's argument may be presented in the following form. In Nature around us there is to be observed a struggle for existence, to which every organism is exposed, and the stronger or best-fitted ones are destined to survive. Those so surviving may be said metaphorically to be naturalized by Nature for that purpose—hence the term "natural selection," assisted in the higher forms of life by "sexual selection," under the influence of which the best-organized males are preferred by the females, and thus as far as were selected for propagation of their kind. The properties or characteristics of the organisms so chosen are transmitted to their descendants, so that with indefinite variability "from a few forms or from one, into which life has been originally bestowed, endless forms most wonderful have been, or are being evolved" (Origin of Species, 6th ed, 429). Applying this mode of procedure to the origin of man, the strength of the argument is found to lie in the analogies between man and the brute, which may be summed up as follows: (1) morphological peculiarities in the structure of the bodily organs, in their liability to the same diseases, in their close similarity as regards tissues, blood, etc; (2) embryological characteristics, in the development of the human being, like the brute from an ovule, which does not differ from and passes through the same evolutionary process as that of any other animal; (3) the existence of rudimentary organs, which are considered to be either absolutely useless, in some cases harmful, often productive of disease, or in any case of very slight service to the human being, pointing back therefore—so it is maintained—to an animal ancestry, in which these organs may have been necessary; (4) mental peculiarities of the same character being not of the same range, in the brute as in man though the differences between the two may be as great as between a terrier and a Hegel, a Sir William Hamilton, or a Kant; (5) paleontological agreements, to show that a comparison of fossils remains brings modern civilized man and his primeval, anthropoid ancestor into close correspondence. Lately Friedenthal's experiments, in regard to blood-transfusion between man and the ape, have been introduced into the argument by evolutionists.

The difficulties which beset the theory are so great that naturalists of repute have subjected it to very severe criticism, which cannot be disregarded. Some, like Du Bois-Reymond, have openly declared that supernaturalism has gained the day ("es scheint keineswegs, als ob die Annahme des Urhebers der Arme zu wer- fen") (cf. Bavinek, Geerformeerde Dogmatik, II, 548). Others, like Virchow, have to the last pronounced against Darwinism as an established hypothesis, refuting a simian ancestry as an accepted fact and finally, the Wege der Speculation ist man zu der Affen-Theorie gekommen: man hätte eben so gut zu anderen thermo-morphischen Theorien kommen können, z. B. zu einer Elefanten-Theorie, oder zu einer Schaf-Theorie. (Virchow). In the following, Darwin and the theory of evolution are considered, in the light of the modern discussion, Virchow held as strongly, that "neither the pithecantropus nor any another anthropoid ape showed any of the characteristics of a primeval man." This was in 1896.

The difference of opinion among scientists on this point seems to be great. While Darwin himself uncompromisingly held to the simian ancestry of man, several of his followers reject that line of descent altogether. This may be seen in the Cambridge volume, dedicated to the memory of the British naturalist, Schwabile, who instance Copé, Adloff, Klaatsch and others as advocating a different ancestry for man, acknowledges, though reluctantly, that the line of descent disappears "in the darkness of the ancestry of the mammals," and is inclined to admit that "man has arisen independently" (Darwinism and Modern Science, 134). Two things therefore are clear, viz. that modern science does not disprove the favorite maxim of Darwin, "The Origin of Species or evolution. "Nature does not make a jump," with which according to Huxley he "has unnecessarily hampered himself" (Lay Sermons, 342), and that "man probably arose by a creation, by a special act of God, by 'a most beautiful and most wonderful variation of considerable magnitude'" (J. A. Thompson's, Naturalism and Human Life, 123). Granted therefore an asent in the scale of evolution by "leaps" or "leaps," the words of Otto (Naturalism and Religion, 132) receive a new meaning for those who accept as historic the tradition recorded in the early chapters of Gen.: "There is nothing against the assumption, and there is much to be said in its favor, that the last step, or leap, was such an immense one, that it brought with it a freedom and richness of psychic life incomparable with anything that had gone before."

The objections raised against the Darwinian theory are in the main threefold: (1) its denial of teleology, for which it substitutes natural selection; (2) its assumption, that the evolutionary process is by slow and insensible gradations; (3) its assertion, that organic advance has been absolutely continuous from the lowest form to the highest (for an, 108). This may be illustrated a little more fully: (1) Chance versus Creation.—The denial of teleology is clear and distinct, though Professor Huxley has spoken of a "wider teleology," by which however he simply meant (Critiques et Addresses, 308)
that the teleologist can defy his opponent to prove that certain changes in structure were not intended to be produced. In Darwinism the choice seems to lie between chance and creation. Mind, purpose, forethought, intention, Divine guidance and super-intendence are banished from the evolutionary process. Unintelligence and chance alone call in the aid of a creator (Origin of Species, 6th ed., 429), regretted afterward, that he "haduckled to public opinion and used the pentateuchal term, by which he really meant appearance by some wholly unknown process (Letters, 5th ed., 188).

Admittedly Darwin attributed too great a power to natural selection. He himself in the Descent of Man considered it "one of the greatest oversights" in his work, that "he had not sufficiently considered the existence of many structures which are neither beneficial nor injurious," and that he had "probably attributed too much to the action of natural selection on the survival of the fittest." (Descent of Man [2d ed., 61].) Dr. A. R. Wallace, though like Darwin acknowledging the potency of natural selection, endeavors, not to prove that it is wholly negative. Writing to his friend he says: "Nature does not so much select special varieties, as exterminate unfavorable ones" (Darwin's Life and Letters, III, 46). It is this very insistence on a method of advance by small and imperceptible steps: that has met with strong opposition from the very beginning. "Natural selection" Darwin writes, "acts solely by accumulating slight, successive, favorable variations; it can produce no great or sudden modifications; it prove that a step by step and few steps" (Origin of Species [6th ed.], ch. 15). The process therefore according to Darwin is wholly fortuitous. This non-teleological aspect of Darwinism is characteristic of many treatises on evolution. While great credit is due to the force, that the philosophical significance of the theory lies in the fact that "mechanical forces" are substituted for "directive force" to explain the origin of useful structures. Otto speaks of its radical opposition to teleology. And yet an ardent supporter of Darwinism, Professor J. A. Thomson, admits that "there is no logical proof of the doctrine of descent" (Darwinism and Human Life, 22)—a statement which finds its counterpart in Darwin's letters: "With a species species have changed" (Life and Letters, III, 25). Still more clearly, almost epigrammatically is this inculcated by Professor J. A. Thomson: "The fact of evolution forces itself upon us: the facts elude us" (Bible and Man, 187); again: "The natural selection explains the survival of the fittest, not the arrival of the fit" (ib 162). Still more extraordinary is the view expressed by Korschinsky that struggle "presents the establishment of new variations and in reality stands in the way of new development. It is rather an unfavorable than advantageous factor" (Otto, Nature and Rel., 182). We are in fact being slowly led back to the teleology which by Darwin was considered fatal to his theory. Scientists of some notore are fond of speaking of directive purpose. "Wherever we tap organic nature," says Professor J. A. Thomson, "it seems to flow with purpose" (Bible of Nature, 25); and again, "If there is Logos at the end of the long evolutionary process ending in man we may be sure it was also at the beginnings" (ib 86). Where there is purpose there must be mind working with purpose and for a definite end; where there is mind there may be creation at the beginning; where creation is granted, an overruling Providence must be accepted as the growing tree; if it be a 'directive, not an originative factor' (J. A. Thomson, Darwinism and Human Life, 193); if it produces nothing, and the evolutionary process is dependent upon forces which work from within and not from without, then surely the Duke of Argyll was right in maintaining (Unity of Nature, 272) that "creation and evolution, when these terms have been cleared from intellectual confusion, are not antagonistic conceptions mutually exclusive. They are both inclined to the ancient narrative, therefore, which posits God at the beginning, and ascribes the universe to His creative act, is after all not so unscientific as some evolutionists are inclined to make out."

(2) Variability independent—Indefinite variability, assumed by the theory, is not supported by fact. Development there doubtless is, but always within carefully defined limits: at every stage the animal or plant is a complete and symmetrical organism, without any indication of an everlasting progression from the less to the more complex. This translation from type seems ever to have a development proceeding indefinitely, and the sterility of hybrids seems to be Nature's protest against raising variability into a law of progression. It has been repeatedly pointed out, that variations as they arise in any organ are not of advantage to its possessor: "A very slight enlarged sebaceous follicle, a minute pimple on the nose of a fish, a microscopic point of ossification or consolidation amongst the muscles of any animal could hardly be considered useful to the species over its fellows" (Elam, Winds of Doctrine, 128).

(3) Existing gaps.—Nor can it be denied that no theory of evolution has been able to bridge the chasms which seem to exist between the various kingdoms in Nature. A complex translation from the inorganic to the organic, from the vegetable to the animal kingdom, from one species of plant or animal to another species, from the animal to man, is not found in Nature. This is acknowledged by scientists of repute. Du Bois-Reymond has maintained that there are seven great enigmas, indicating a sevenfold limit to investigation, viz. (a) the existence of matter and force; (b) the origin of motion; (c) the origin of life; (d) the appearance of design in Nature; (e) the existence of consciousness; (f) intelligent thought and the origin of speech; (g) the question of freewill. Others have found equally serious difficulties in a theory of descent which ignores the existence of inorganic. Dr. J. W. M. Thomson—"a great upholder of the theory of natural selection—allows that "there are at least three stages in the development of the organic world, when some new cause or power must necessarily have come into play, viz. animal life, the introduction of sensation and consciousness, and at the introduction of man" (Darwinism, 474-75).

(4) Applied to man.—When the theory is applied to the human species the difficulties are enormously increased. Psychically man is akin to, yet vastly different from, the brute. Consciousness, thought, language (called by Max Muller "the Rubicon" between the human and the animal world), morality, religion cannot easily be explained by any theory of evolution. The recognition of moral obligations, the freedom of choice between moral alternatives, the categorical imperative of conscience, the feeling of responsibility and the pain of remorse are unaccounted for by the doctrine of descent. Man stands apart, forming psychologically a kingdom by himself, "infinitely divergent from the simian stirps" (Huxley, Man's Place in Nature, 108)—the riddle of the universe, apart from the Biblical narrative. In the view of things the conscious and the unconscious lie far apart. "The assertion of the difference between them does not rest on our ignorance, but on our knowledge of the perceived distinction between material particles in motion and internal consciousness related to a
self" (Orr, Homiletic Review, August, 1907). There can be no transition from the one to the other. The "extra" or "super" man breaks in an otherwise continuous series of psychical changes, mankind clearing at one bound the space which separated the highest stage of the unprogressive intelligence of inferior animals from the first and lowest form of improvable reason of man. Even Professor Huxley, one of the staunchest supporters of Darwinism, acknowledged that "Nature does make jumps now and then," and that a "recognition of the fact is of no small importance in disposing of many minor objections to the doctrine of natural selection" (Orr, God's Image in Man, 116). Less conciliatory than either De Vries or Huxley is Eimer, who, while repudiating the "chance" theory of Darwinism, sets against it "definitely directed evolution," and holds that "natural selection is insufficient in the formation of species" (Otto, Naturalism and Religion, 174). Evidently the evolution theory is undergoing modifications, which may have important bearing on the interpretation of the Mosaic narrative of creation and especially on the descent of man. Man may therefore, from a purely scientific point of view, be an entirely new being, not brought about by slow and gradual ascent from a simian ancestry. He may have been introduced at a bound, not as the simple result of indisputable and moral, "internally harmonious, with possibilities of endless development, which only his free act annulled." If the new theory of "mutational" evolution be accepted, the scriptural view of man's origin will certainly not be discredited.

This much may fairly be granted, that within certain limits Scripture accepts an evolutionary process. In regard to the lower animal kingdom we find Darwin's "making" (ver 28), is not described as water and earth, which does not exclude, but rather calls into operation the powers that are in the sea and dry land (vs 11.20.24 AV): "And God said, Let the earth bring forth grass . . . . Let the waters bring forth abundantly the moving creature." It is only in the creation of man that God works "immediately," and God said, "Let us make our image . . . . And God created man" (vs 26.27). The "stride or jump of Lyell and Huxley, the "harmatogenesis" of De Vries are names which in the simple narrative disappear before the pregnant apocryphon: "And God did give a theistic coloring to the evolution theory (of Flint, Theism, 195 ff), inasmuch as development cannot be purposeless or causeless, and because "Nature is but effect whose cause is God." The deathblow which, according to Professor Huxley, the teleological argument has received from Darwin, may after all not be so serious. At any rate Lord Kelvin (Sir William Thomson) in 1871 before the British Association openly pleaded for "the solid and irresistible argument so well put forward by Paley . . . . teaching us, that all living things depended upon an everacting Creator and Ruler." See EVOLUTION.

VI. Primitive and Present Conditions of Man.—The newer anthropology has carried the human race back to a remote antiquity.

1. The Time-Distance.—The ordinary estimates range between 100,000 and 500,000 years. Extra-
is a million times as far from us as we are from the sun, so that the time-distance of man from the very lowest animals, from the worm or seed or ovule, is according to Haeckel almost incalculable. The human race is thus carried back by evolutionists into an immeasurable distance from the present inhabitants of the earth. Several primateval races are by some declared to have existed, and fossil remains of man are supposed to have been found, bringing him into touch with extinct animals. The time-computations of evolutionists, however, are not shared by scientists in general. “These misunderstandings have arisen,” says another Darwinian, “when another Darwin, Sir G. H. Darwin of Cambridge, demonstrated that the physical conditions were such that geology must limit itself to a period of time inside of 100,000 years” (Orr, God’s Image, etc., 176). Professor Tait of Edinburgh limited the range to no more than 10,000,000 years and he strongly advised geologists to “hurry up their calculations.” “I dare say,” he says, “many of you are acquainted with the speculations of Lyell and others, especially of Darwin, who tells us, that even for a comparatively brief portion of recent geological history, three hundred millions of years will not suffice! We say, so much the worse for geology as at present understood by its chief authoritv. (Recent Advances in Phys. Science, 168). Recently, however, a second and a more reliable source of new energy in the universe as the result of radio-activity. Duncan, in The New Knowledge, contrasts the old conception, according to which God made the universe and started it at a definite time to run its course, with the new, which, though it does not distinctly teach, at least is inclined to maintain, that the universe is immortal or eternal, both in the future and the past (p. 245). If this view be correct the Darwinian “eons” of time may be considered restored to the evolutionist. On the other hand it appears that Lord Kelvin seriously doubted the validity of these speculations. Professor Orr writes: “In a personal communication Lord Kelvin states to me that he thinks it ‘almost infinitely improbable’ that radium had any appreciable effects on the heat and light of the earth or sun, and suggests it as ‘more probable that the energy of radium may have come originally in connection with the excessively high temperatures produced by gravitational action” (Hemmistic Review, Aug., 1906).

In regard to primateval man there is no agreement among scientists. Some, like Delaunay, de Mortillet, Quatrefages, believe him to have been a new type of Man, such as Virchow, Zittel, Prestwich, Dawson, maintain that man appeared on the scene only in the Quaternary. As the limits between these periods are not well defined a decision on this point may be made only after many years. Even if man be found to have been a contemporary of extinct animals, such as the mammoth, the inference from this fact would be equally just, not that man is as old as the extinct animal, but that the animal is as young as man and that the period assigned to these fossil remains must be brought considerably nearer to present-day life.

Calculations based on the graved of the Somme, on the cone of the Tiherie, on the peat-bogs of France and Denmark, on fossil bones discovered in caves of Germany and Calculations France, on delta-formations of great rivers like the Nile and the Mississippi, on the “kitchen middings” of Denmark, and on the lake-dwellings of Switzerland, have been based on the suppositions stated above. W. Dowson, a geologist of great repute, has made the deliberate statement, that “possibly none of these reach farther back than six or seven thousand years, which according to Dr. Andrews have elapsed since the close of the boulder clay in America” (Story of the Earth and Man, 293). The “ice-age,” formerly hypothetically calculated, has latterly been brought within calculable distance. G. F. Wright, Winchell and others have arrived at the conclusion that the Glacial period in America, and consequently in Europe, does not lie more than some eight or ten thousand years behind us. If such be the case, the antiquity of man is brought within reasonable limits, and must be considered as a contradiction to the Biblical statements on this point. If the careful and precise calculations of Dr. Andrews on the raised beaches of Lake Michigan are accepted, then N. America must have risen out of the waters of the Glacial period some 5,500 or 7,500 years ago; and if so, the duration of the entire continent is fixed and must be considerably reduced (Dawson, Story, etc., 295). One of the latest deliverances on this subject is that of Professor Russell of the University of Michigan (1904), who maintains that “we need only a few thousand years of well attested evidence of the presence of man in America, and that man has driven the animals to extinction after the Glacial epoch.” Where all is vague and experts differ great caution is necessary in the arrangement of dates and periods of time. If moreover a comparatively rapid post-glacial submergence and submersion of high lands have been experienced, as some naturalists hold, and man were then on the earth, the question may fairly be asked, whether this subsidence did not “constitute the deluge recorded in that remarkable ‘log-book’ of the ‘Geh’ preserved to us in Gen” (Dawson, op. cit., 290).

The chronology of ancient nations—China, Babylon, Egypt—has been considered as subversive of the scriptural view as to the age of the human race. But there is a well-known fact, that experts differ very seriously upon the point. Their calculations range, for Egypt—starting from the reign of King Menes—from 5,867 (Champollion) to 15,000 (Braun) and from 3,800 (Brugsch) to 2,500 (Wilkinson). As to Babylon Bunsen places the starting-point for the historic period in 3,754, Brandis in 2,468, Oppert in 3,540—a difference of thousands of years (of Bavink, Grefg. Dogmatik, II, 557). Too, it is impossible to separate the legends and the scientific data; it is impossible to bring the scientific and the Biblical view into fuller harmony. At any rate Hommel’s words on all these calculations require careful study: “The chronology for the first thousand years before Christ is fairly fixed: in the second thousand BC some points seem to be fixed: in the third thousand, i.e. before 2000 BC, all is uncertain.” In this connection it may be mentioned, that attempts have frequently been made to cast discredit on the chronology of the early chapters of Gen. Suffice it to say that the calculations are based on the genealogies of the patriarchs and their descendants, and that the generally accepted dates assigned to them by Archbishop Ussher and introduced into the margins of some editions of the Bible are not to be trusted. The LXX differs in this respect from the Heb text by more than 1,500 years: precise chronological data are not and cannot be given. The basis of calculation is not known. Perhaps we are not far wrong in saying that, “if we allow, say, from 12,000 to 15,000 years to be the time of man’s first appearance on the earth, we do ample justice to all the available facts” (Orr, God’s Image, etc., 180). See CHRONOLOGY.
That all these discussions have a bearing upon our view of man's primitive conditions can easily be appreciated. According to Scripture man's destiny was to "replenish the earth, and subdue it; and have dominion over fish, fowl and every living thing" (Gen 1:28), as God's steward (perhaps even, Titus 1:7), as fellow-laborers with God (Eunapius, 1 Cor 3:9). Hence he was placed by God in the garden of Eden (a prêtêden; LXX paradésis tes têthês; Vulg paradisus volup\-tatis, "paradise of delight"). The situation of that garden is carefully described, though the precise site has been unknown (Gen 2:14-15). Some, like Driver, consider this an ideal locality (Genesis, 57); others take a very wide range of fixing upon the true site. Every continent has been chosen as the cradle of the race—Africa, among others, as the home of the gorilla and the chimpanzee—the supposed progenitors of humanity.

In America, Greenland and the regions around the North Pole have their inhabitants. Certain parts of Europe have found favor in some quarters. An imaginary island—Lamuria—situated between the African and Australian continents—has been accepted by others. All this, however, lies beyond the scope of science, and beyond the range of Scripture. Reference to the ancient Palu-thine, in or near Babylonia, we must seek for the cradle of humanity. No trace of primeval man has been found, nor has the existence of primeval races been proved. The skulls which have been found (Neanderthal, Engis, Longichi) are of a high type, even Professor Huxley declaring of the first, that "it can in no sense be regarded as the intermediate between Man and the Ape," of the second, that it is "a fair, average skull, which might have belonged to a human being, or might have been hoarded by some thoughtless brains of a savage" (Man's Place in Nature, 156, 157). Of the Lansing skeleton found in Kansas, in 1902, this may at least be said—apart from the question as to its antiquity—that the skull bears close resemblance to that of the modern Indian. Even the skull of the Cro-Magnon man, supposed to belong to the palaeolithic age, Sir J. W. Dawson considers to have carried a brain of greater size than that of the average modern man (Man's Place in Nature, 154). Primeval men can hardly be compared to the modern savage; for the savage is a deteriorated representative of a better type, which has slowly degenerated.

History does not know of an unaided emergence from the essence of the parent race; nor does it know of degradation from a better type. Whatever view we take of the original state of man, the following points must be borne in mind: we need not suppose him to have been a humanized ape, rising into true manhood by a slow and gradual process; nor need we picture him either as a savage of pronounced type, or as in every sense the equal of modern man, "the heir of all the ages." Scripture represents him to us as a moral being, "with possibilities of intellectual development, which his own free act annulled." There the matter may rest, and the words of a non-canonical Scripture may fitly be applied to him: "God created man to be immortal, and made him to be an image of His own eternity" (Wisd 2:23 AV). See also PSYCHOLOGY.

J. I. MARAIS

ANTHROPOMORPHISM, an-thro-po-mor'fizm n.

1. Definition of the Term
2. OT Anthropomorphisms
3. In What Sense an Anthropomorphic Element Is Necessary
4. Anthropomorphism and the Exigencies of Human Thinking
5. Anthropomorphism and Theism
6. Symbolic Forms of Thought
7. Philosophical Pantheism
8. Anthropomorphism and Personalized or Mediated Knowledge
9. From Greek Polytheism to Modern Ethical Monotheism
10. Greek Thought
11. Anthropomorphism of Israel
12. Twofold Nature of the Anthropomorphic Difficulty
13. Need of Rising Higher
14. God in Christ the True Solution

By this term is meant, conformably with its ety-
omological signification, i.e. as being in the form or likeness of man, the attribution to God of human form, parts or passions, and the taking of Scripture passages which speak of God as having hands, arms, or ears, in a literal sense. This anthropomorphic procedure called forth Divine rebuke so early as Ps 50 21: "Thou thoughtest, that I was altogether such a one as thyself."] Fear of the charge of an-
moral deterrent effect upon many minds, but
very needlessly so. Even that rich storehouse of apparently crude anthropomorphisms, the OT, when it ascribes to Deity physical characteristics, mental or moral attributes, like those of man, merely means to make the Divine nature and operations intelligible, not to transfer to Him the defects and limitations of human character and life.

In all really ethical forms of religion, there is an anthropomorphic element present, for they all presuppose the psychological truth of a certain essential likeness between anthropomorphic God and man. Nor, perfect as we know many anthropomorphic qualities to be, is the necessity to Deity, can we, in the realm of spirit, ever wholly eliminate the anthropomorphic element involved in this assumption, without which religion itself were not. It is of the essence of the parent race that we realize the analogy subsisting between God's relations to man, and man's relations to his fellow. We are warned off from speaking of "the Divine will" or "the Divine purpose," as too anthropomorphic—savoring too much of simple humanity and human psychology—and are bidden speak only of "the Divine immanence" or "the Divine ground of our being." But these speculative objections strongly spring from a shallow interpretation of the primary facts of human consciousness, which, in the deepest realm of inner experience, claims the indefeasible right to speak of the Divine Anthropomorphism nature in human terms, as may best be possible to our being. The proper function or duty of our philosophy is to take due account of such direct and primary facts of our being as cannot be altered to suit her convenience.

If we were to interpret the impalpable and omnipresent Energy, from which all things proceed, in terms of force, then, as Fiske said, "there is scarcely less anthropomorphism lurking in the phrase 'Infinite Power,' than in the phrase 'In-
finite Person." Besides which, the soul of man could never be content with the former phrase, because it could not believe in the existence of a God more than dynam- 
es. But if we have ascribed to God anthropomorphism certain attributes in keeping with the and Theism properties of the one Protean force behind all nature-manifestations, it has been to help purge our conception of God of objectionable anthropomorphic elements. The ex- igencies of human thinking require us to symbolize the nature of Deity in some psychical way whereby He shall have for us some real meaning; hence these quasi-sensual properties of our divine expression, which inhere in the most perfected con- ceptions of Deity, as well as in the crude ideas of unreflective spiritism. And if all anthropomorphism could be dissipated by us, we should in the process have demolished theism—a serious enough issue for religion.

Even speech has been declared to be a sensuous symbol, which makes knowledge of God impossible. To such an extent have the hyper- critical objections to anthropomorphism been pressed. Symbol of the Divine, speech may, in this sense, be; but it is a symbol whereby we can mark, distinguish or discern the super-sensible. Thus our abstract conceptions are by no means sensuous, however the language may have been derived or the meaning be given it. Hence it would be a mistake to suppose that our knowledge of God must remain anthropomorphic in content, and cannot think the Absolute Being or Essence save in symbol form. It is a developmental law of religion—of spirit in general—that the spiritual grows always more clearly differentiated from the symbol and sensuous. The fact that our knowledge of God is susceptible of advance does not make the ide of God a merely relative one. God's likeness to man, in respect of the attributes and elements essential to personal spirit, must be presupposed as a fundamental reality of the universe. In this way or sense, therefore, any true idea of God must necessarily be anthropomorphic.

We cannot prove in any direct manner—either psychological or historical—that man was really made in God's image. But there is no manner of doubt that, on the other hand, man has always made God in his (man's) own image. Man can do no otherwise. Because he has purged his con- ceptions of Deity after human pattern, and no longer cares much to speak of God as a jealous or repentant Deity, as the case may be, it yet by no means follows that "the will of God" and "the love of God" have ceased to be of vital interest or primary importance for the religious consciousness. All man's constructive powers—intelectual, emotional, and spiritual—combine in evolving such an ideal, and believing in it as the personal Absolute, the Ideal-Real in the world of reality. Even in the forms of philo- sophical pantheism, the factors which play in man's personal life have not ceased to project themselves into the pantheistic conceptions of the cosmic proc- esses or the being of the world.

But man's making of God in his (man's) own image takes place just because God has made man in His own image. For the God, whom man makes for himself, is, before all things, real—no mere construction of his intellect, no figure or fiction of thought, but the expression in the mind of the Perfect Reality. Thus we see that any inadverrancy springing out of the anthropomorphic character of our religious knowledge or conceptions is not at all so serious as might at first sight be supposed, since it is due merely to the necessarily personalized or mediated char- acter of all our experience is human experience, and, in that sense, anthropomorphic. Only the most pitiful timidity will be scared by the word "anthropomor- phism," which need not have the least deterrent effect upon our minds, since, in the territory of spirit, our conceptions are purged of anthropomorphic taint or hue, the purer our human con- sciousness becomes.

To say, as we have done, that all knowledge is anthropomorphic or anthropomorphic but to recognize its partial, fallible, progressive or developmental.

9. Religious character. It is precisely because this Progress is true of our knowledge of God that our improved and perfected concep- tions of God are the most significant feature in the religious progress of human thought. "Or is there course of the long religious march, wherein thought has shot up through the superincumbent weight of Greek poly- theism into monotheism, and emerged at last into the severely ethical monotheism of our time, has religion become in the process a mere vestige of anthropomorphic vestments. It cannot too clearly be understood that the religious ideal, which man has formed in the conception of the Absolute Per- sonality, is one which is rooted in the realm of actuality. Not as an abstract, super-sensible in which the God can be known by us—intelligible only in the light of our own self-conscious experience.

It is a more modern—and rather unilluminated—abuse of the term anthropomorphic which tries to make a prefix this term serves to indicate that the

10. Greek Thought a conception of God. In the days of the Greeks, it was only the ascrip- tion to the God of man, to the human race, that led Xenophanes to complain of anthropomorphism. This Xenophanes naturally took to be an illegiti- mate endeavor to raise one particular kind of being—one form of the finite—into the place of the Infinite. Hence he declared: "There is course of the greatest of all gods and men, who is like to mortl creatures neither in form nor mind."

But the progressive anthropomorphism of Greece is seen less in the humanizing of the gods than in "the idea that "the human is god.""

11. Anthropomorphic men become gods by transcendent of Israel merit. In this exaltation of the nature of man, the anthropomorphism of of Israel is seen in the contrapositions of anthropomorphism of Israel, which was prone to fashion its Deity, not after the likeness of anything in the heavens above, but after something in the earth beneath. Certain professors of science have been mainly responsible for the recent and comprehensible use of the term, so familiar to us, for which we owe them no particular gratitude.

The anthropomorphic difficulty is a twofold one. Religion, as we have just shown, must remain anthropomorphic in the sense that it

12. Difficult—cannot get rid of imputing to the universe the forms of our own mind or life, since religion is rooted in our anthropomorphism Two-human experience. As we have al- ready hinted, however, religion in is in no worse case in that respect than science. For nothing is more idle than the pre- tension that science is less anthropomorphic than religion—or philosophy either—as if science were not, equally with these, an expression of human thinking! It is surely most obvious that the scientist, in any knowledge of re- ality he may gain, can, no more than the religiousist or the metaphysician—jump off his own shadow,
or make escape from the toils of his own nature and powers. For knowledge of any sort—whether religious, scientific, or philosophical—a certain true anthropomorphism is necessary, for it is the essence of rationality. Nature, of which science professes a knowledge, is really a man-made image, like unto its human maker. Say what science will, this is the objectively real of science—a cognition which, critically viewed, is only subjectively valid. There is no other way by which science can know the being of the world than after the human pattern. It is, however, a serious issue that this human element has often unduly penetrated the realm of the Divine, subordinating it and dragging it down to human aims and conceptions.

Hence arises the second aspect of the anthropomorphic difficulty, which is the need of freeing religion from anthropomorphic tendencies of our six.
manifestation of this “lawless one” was restrained; when, however, the aged emperor should pass away, or God’s time should appoint, that “lawless one” would be revealed, whom the Lord would “slay with the breath of his mouth” (ver 8).

Although many of the features of the “Man of Sin” were exhibited by Nero, yet the Messianic King did not come, nor did Christ return to His people at Nero’s death. The first of these passages (“as ye have heard that anti-christ cometh”), it is evident that the coming of Anti-christ was an event generally anticipated by the Christian community, but it is also clear that the apostle shared to but a limited extent in this popular expectation. He thought the attention of believers needed rather to be directed to the anti-christian forces that were at work among and around them (even now he sees many anti-christs). For 1 Jn 2:18; 2 Jn ver 7 we see that the apostle regards erroneous views of the person of Christ as the real Anti-christ. To him the Docetism (i.e. the doctrine that Christ’s body was only a seeming one) which portended Christ’s ultimate separation from heaven, and the element of Leolinism (Christ was only a man), were more seriously to be dreaded than persecution.

In the Book of Revelation the doctrine of Anti-christ receives a further development. If the traditional date of the Apocalypse is to be accepted, it was written when Anti-christ in the the hull which followed the Neronian persecution had given place to that domain under Domitian—“the bald Nero.”

The apostle now feels the whole imperial system to be an incarnation of the spirit of Satan; indeed from the identity of the symbols, seven heads and ten horns, applied both to the dragon (12 3) and to the Beast (13 1), he appears to have regarded the roxion d’ère of the Rom Empire to be found in its incarnation of Satan. The ten horns are borrowed from Dnl 7, but the seven heads point, as seen from Rev 17 9, to the “seven hills” on which Rome sat. There is, however, not only the Beast, but also the image of the beast to be considered (13 14 15). Possibly this symbolizes the cult of Rome, the city being regarded as a goddess, and worshipped with temples and statues all over the empire. From the fact that the seer enforces the Beast that come out of the earth with “two horns like unto a lamb” (13 11), the apostle must have had in his mind some system of teaching that resembled Christianity; its relationship to Satan is shown by its speaking “as a dragon” (ver 11). The number of the Beast (ver 8), though presumably readily understood by the writer’s immediate public, has proved a riddle capable of too many solutions to be now readily soluble at all. The favorite explanation Neûn Kësar (Nero Caesar), which suits numerically, becomes absurd when it implies the attribution of ten horns. There is no necessity to make the calculation in Heb; the corresponding arithagon in the Sib Or, 1 328-30, in which 888 stands for Issous, is interpreted in Gr. On this hypothesis Latèneos, a suggestion preserved by Ireneus (V, 30) would suit. If we follow the analog of Daniel’s four horns it has influenced the Apocalyptic so much, the Johannine Anti-christ must be regarded as not a person but a kingdom. In this case it must be the Rom Empire that is meant.

III. In Apocalyptic Writing. Although from their eschatological bias one would expect that the Anti-christ full of the subject, mention of the in the Apocalyptic writings occurs only in a few of the Apocalypse writings. The earliest certain notice is found in the Sibylline books (4 167). We are there told that “Beliar shall come and work wonders,” and “that he shall spring from the Sebasteni (Augusti)” a statement which, taken with other indications, inclines one to the belief that the mad demands of Caligula, who presume of a war against the Jews. There are references to Beliar in the XII P, which, if the date ascribed to them by Dr. Charles, i.e. the reign of John Hyrcanus I, be assumed as correct, are earlier. Personally we doubt the accuracy of this conclusion. Further, as Dr. Charles admits the presence of many interpolations, even though one might assert to his opinions as to the date of the XII P, yet these Beliar passages might be due to the interpolator.

In one passage in “Beliar”’s words distinguished from antitheses Dnl 5 10 11 (Charles’ tr), “And there shall rise unto you from the tribe of Judah and of Levi the salvation of the Lord, and he shall make war against Beliar, and execute everlasting vengeance on our adversaries, and the captivity shall be taken from Beliar and turn disobedient hearts unto the Lord.” Dr. Charles thinks he finds an echo of this last clause in Lk 1 17; but may the case not be the converse?

The fullest exposition of the ideas associated with the antichrist in the early decades of Christian history is to be found in the Asc Isa. In this we are told that “Beliar” (Belial) would enter into “the matricide king” (Nero), who would work great wonders, and do much evil. After the expiry of 1,332 days during which he has persecuted the plant which the twelve apostles of the Beloved have planted, “the Lord will come with his angels and with armies of his holy ones from the seventh heaven, with the glory of the seventh heaven, and he will drag Beliar into Gehenna and also his armies” (4 3 13, Charles’ tr). If the date at which Beliar was supposed to enter into Nero was the night on which the great fire in Rome began as then the space of one given to him is too short by 59 days. From the burning of Rome till Nero’s death was 1,421 days. It is to be noted that there are no signs of the writer having been influenced either by Paul or the Apocrypha. In the coming of the Lord to be the immediate cause of the death of Nero, we date the writing some months before that event. It seems thus to afford contemporary and independent evidence of the views entertained by the Christian community as to Anti-christ.

IV. In Patristic Writing.—Of the patristic writers, Polycarp is the only one of the Apostolic Fathers who refers directly to Anti-christ. He writes References “Whosoever doth not confess that Jesus Christ has come in the flesh is Anti-christ” (T), and regards Docetism as Anti-christ in the only practical sense. Basils, although not using the term, implies that the fourth empire of Daniel is Anti-christ; this he seems to identify with the Rom Empire (4 5). Ireneaus is the first-known writer to occupy himself with the number of the Beast. While looking with some favor on Latèneos, he himself prefers Teitan as the name intended (5 30). His view is interesting as showing the belief that the arithagon was to be interpreted by the Gr values of the letters. More particulars as to the views prevailing can be gleaned from Hippolytus,
who has a special work on the subject, in which he
exhibits the points of resemblance between Christ
and Antichrist (On Christ and Antichrist, 4.14.15.
19.25), we find the suggestion that
Antichrist springs from the terms of Jacob's blessing
to Dan. Among other references, the idea of
Commodian (250 AD) that Nero risen from the dead
is to be Antichrist, has been noticed. In
the commentary on Revelation attributed to
Victorinus of Petav there is, inserted by a later hand,
an identification of Genseric with the "Beast" of
that book. It is evident that little light is to be
gained on the subject from patristic sources.

V. Medieval Views.—Much time need not be
spent on the medieval views of Antichrist in either
of the two streams in which it flowed, Christian
and Jewish.

The Christian was mainly occupied in finding
methods of transforming the names of those whom
verbs and phrases were written into a
1. Christian shape that would admit of their being
views reckoned 666. The favorite name for
these species of torture was naturally
Maometis (Mohammed). Gregory IX. found
no difficulty in accommodating the name of Frederic
II so as to enable him to identify his great antibo-
nist with "the beast coming up out of the sea": this
identification the emperor retorted on the pope.
Rabanus Maurus gives a full account of what Ant-
christ was from without any attempt to label
any contemporary with the title. He was to work
miracles and to rebuild the temple at Jerusalem.
The view afterward so generally held by Protents that
the papacy and Antichrist had its representatives
among the sects denounced by the hierarchy as
heretical, as the Kathari. In various periods
the rumor was spread that Antichrist had been already
born. Sometimes his birthplace was said to be
Barboli, on many grounds his election was accorded
to the mystical Babylon, Rome.

The Jewish views had little effect on Christian
speculation. With the Talmudists Antichrist was
named Arimlhus, a variation of Romulus.

2. Jewish Views. Rome is evidently primarily intended
for Antichrist. In the Jewish writings we find that
he will be born in Jerusalem, and that he will be
the Antichrist, who will be, according to the
rabbis, one of the messiahs, who will come
in the last days, and who will be the
redeemer of the Jewish people.

VI. Post-Reformation Views.—In the
immediately post-Reformation times the divines of the Roman
church saw in Luther and the Reformed
churches the Antichrist and Beast of
Revelation. On the other hand the
critics of Protents identified the popacy and
Antichrist with the Roman church with these, and
with the Pauline Man of Sin.

The latter view had a certain plausibility, not only from the
to many undeniably antichristian features in the
developed Rom system, but from the relation in
which the French church stood to the city of Rome
and to the imperial idea. The
fact that the Beast which came out of the earth (Rev 13 11) had
the horns of a lamb points to some relation to the
lamb which had been slain (6 6). Futurist interpre-
tors have sought the Antichrist in historical
persons, as Napoleon III. These persons, however,
did not live to realize the expectations formed of
them. The consensus of critical opinion is that
Nero is intended by the Beast of the Apocalypse,
but who are most likely to be the Antichrist,
is not satisfactory. Some future development of evil may
more exactly fulfill the conditions of the problem.

Canon of NT; Deutero-Canonical Books.

ANTI-LIBANUS, an-ti-lib'a-nus. See Lebanon.

ANTIMONY, an-ti-mô-ni. See Color.

ANTILOC, an'ti-ok. OF PIDISIA, pi-sid'i-a ('Antô-sia prôs Pî-da, Antiocheia prôs Pisdia,
or 'Antô-sia hê Pî-daia, Antiocheia hê Pisdia = "Pisidian":

(1) Antioch of Pisidia was so called to distin-
guish it from the many other cities of the same
name founded by Seleucus Nikator
in 301–280 BC and called after his
father Antiochus. It was situated in
a strong position, on a plateau close to the
western bank of the river Anthios, which flows down
from the Sultan Dagh to the Euphrates river.
It was planted on the tem-
urity of a great estate belonging to the priests of
the native religion; the remaining portions of
this estate belonged later to the Rom emperors,
and many inscriptions connected with the emperors,
who succeeded to the Divine rights, were
inserted in the temple of Antiochus.

(2) Antiochus or Antiochus Epiphanes, the
first of the Seleucid kings, built the city
at the mouth of the river Euphrates, on the
antil-leg'o-me-na.

The Seleucid colonists were Greeks, Jews and
Phrygians, if we may judge by the analogy of
similar Seleucan foundations. That there were
Jews in Antioch is proved by Acts 13 45
and by an inscription of Apollonia, a neighboring city,
mentioning a Jewess Deborah, whose ancestors
had held office in Antioch (if Ramsay's interpre-
tation of the inscription, The Cities of St. Paul, 249, is
correct). In 180 BC, after the peace with Antiochus
the Great, the Romans made Antioch a "free city":
this does not mean that any change was made in
its constitution but only that it ceased to pay
tribute to the Seleucid kings. Antony gave
Antioch to Amyntas, the son of Amyntas, in
25 BC, and henceforth Amyntas was included in the
province Galatia (see Galat-
i) formed in 25 BC out of Amyntas' kingdom.
Not much before 6 BC, Antioch was made a Rom
colony, with the title Caesarea Antiœhæa; it was now the capital of southern Galatia, and the chief of a series of military colonies founded by Augustus and connected by a system of roads as yet insufficiently explored, to hold down the wild tribes of Pisidia, Isauria and Pamphylia.

Much controversy has revolved round the question whether Antiœch was in Phrygia or in Pisidia at the time of St. Paul. Strabo defines Antiœch as a city of Phrygia toward Antiœch, Pisidia, and the same description is implied in Acts 16 6, and 18 23. Other authorities assign Antiœch to Pisidia, and it admittedly belonged to Pisidia after the province of that name was formed in 295 AD. In the Pauline period it was a city of Galatia, in the district of Galatia called Phrygia (to distinguish it from other ethnic divisions of Galatia, e.g. Lycaonia). This view is certain on a study of the historical conditions (see Ramsay, The Church in the Roman Empire, 25 ff), and is supported by the fact that Phrygian inscriptions (the surest sign of the presence of a people) can be found in the districts of Phrygian Pisidian tribes. No scheme of military conquest in the Pisidian mountains could omit this important strategical point on the N.W. This fact was recognized by Seleucus when he founded Antiœch, by Antony when he gave Antiœch to the Romans, and by Augustus when he made Antiœch the chief of his military colonies in Pisidia. A military road, built by Augustus, and called the Royal Road, led from Antiœch to the sister colony of Lystra. According to the story preserved in the legend of "Paul and Thekla," it was along this road that Paul and Barnabas passed on their way from Antiœch to Iconium (Acts 13 51; cf 2 Tim 3 11; see Ramsay, The Church in the Roman Empire, 27-30).

Latin continued to be the official language of Antiœch, from its foundation as a Rom colony until the later part of the 2nd cent. AD. It was more thoroughly Romanized than any other city in the district; but the association with temple and cult, and the inscriptions from that date are in Gr. The principal pagan deities were Men and Cybele. Strabo mentions a great temple with large estates and many hierodoulos devoted to the service of the gods. Antiœch, as has been shown above, was the military and administrative center for that part of Galatia which comprised the Isaurian.

4. Paul at Antiœch

The "devout and honorable women" (AV) and the "chief men" of the city, to whom the Jews addressed their complaint, were perhaps the Rom colonists. The publicity here given to the action of the women is in accord with all that is known of their social position in Asia Minor, where they were often priestesses and magistrates. The Jews of Antiœch continued their persecution of Paul when he was in Lystra (Acts 14 19). Paul passed through Antiœch a second time on his way to Perga and Attalia (Acts 14). He visited Antiœch on his second journey (Acts 16 6; Ramsay, The Church in the Roman Empire, 74 ff), and on his third (Acts 18 23; cf ib 96).
36; 18 23), and thither he returned from the first two as to his headquarters (Acts 14 26 ff.); but as the headquarters originally a nickname, was first applied to the followers of Jesus (Acts 11 26). The honorable record of the church at Antioch as the mother-church of gentle Christianity gave her a preeminence which she long enjoyed. The most distinguished of her later sons was St. John Chrysostom. The city suffered severely from earthquakes, but did not lose its importance until the Arab conquest restored Damascus to the first place among Syrian cities. Antioch still bears its ancient name (Antakya), but is now a poor town with a few thousand inhabitants.

C. H. THOMSON

ANTIOCHIANS, an-ti-o'ki-ans (Ἀντίοχεσ, Antiochēs, peculiar to the Apoc, 2 Macc 4 9,19): Antiochus Epiphanes was on the throne of Syria from 175 to 164 BC. His determined policy was to Hellenize his entire kingdom. The greatest obstacle to his ambition was the fidelity of the Jews to their historic religion. Many worldly Hebrews, however, for material advantage were willing to apostatize, among them, Jason, the brother of the faithful high priest Onias III. With a large sum of money (2 Macc 4 7–10) he bribed Antiochus to appoint him high priest in his brother's stead. This perch of Jason's time, political as it was, as religious, made him virtually the head of the nation. He promised, on condition the king would permit him to build a Gymnasium at Jerus, "to train up the youth of his race in the fashions of the Hellenic world," to enrol the Hellenized people as Antiochians, i.e. to give all Jews who would adopt Gr customs and the Gr religion the rights and privileges of citizens of Antioch. The granting of this request made Jason the head of the Gr party as well as of the Gr faction, and the increase of heathenish manners" under his perverted high-priesthood, that the priests under him lost courage to "serve any more at the altar, but despising the temple and neglecting the sacrifices, hastened" to ally themselves with the Grecians. When the sacrifice of Hercules was observed in connection with the Grecian games at Tyre "Jason sent special messengers from Jerus, who were Antiochians (2 Macc 4 19) with a large contribution of money. This Hellenizing movement was supported by a decree of Antiochus which enjoined uniformity of worship throughout his dominions. He forbad the further observance of Jewish festivals, Sabbath, sacrifices in the temple and the rites of circumcision. His aim was not only the like subjugation of Egypt, but being thwarted in his expedition thither by Rom emissaries, he returned to Jerus to vent his anger on the Jews who refused to deny the faith of their fathers. The persecutions inflicted by the king upon these devout Jews abounded in every atrocity. All sacred books of the law that could be found were burned. This attempt to Hellenize the Jews was pushed to every remote rural village of Pal. The universal revolt led the Samaritans, eager for safety, to repudiate all connection and kinship with the Jews. They sent ambassadors and an epistle asking to be recognized as belonging to the Gr party, and to have their temple on Mt. Gerizim named "The Temple of Jupiter Hellenus." The request was granted. This was evidently the final breach between the two races indicated in Jn 4 9, "For Jews have no dealings with Samaritans."

Among those who refused to be enrolled as Antiochians was Mattathias, an aged priest of the Mourners of Simeon. Mattathias, by his dire preoccupation of the holy city and temple he retired with his five sons to his ancestral estates among the mountains N.W. of Jerus. The emissaries of Antiochus followed him thither and commanded him to offer sacrifices upon a heathen altar. He was promised such sacrifices "double the sacrifices of the Gr temple;

ANTIOCHUS VI, surmamed Theos (Θεός, Theos, "god"): Son and successor of Antiochus I (261–246 BC). He made a successful war on Ptolemy Philadelphia in Egypt, but was obliged to buy peace in 250 by divorcing his wife, Laodice, and by marrying Ptolemy's daughter, Berenice. After the death of Ptolemy, "the king of the south" (Dan 11 6) 248 BC, he recalled Laodice and named her eldest son (Seleucus Kallinikos) as his successor to the throne; but Laodice (probably because she feared a second repudiation) had Berenice, her child, and Antiochus all murdered (246 BC). The Miletians gave him the name of Theos in gratitude for his liberating them from the tyranny of Timarchus. (See Arrian, I, 17, 10, and 18; Jos, Ant, XII, iii, 2; Dittenberger, Ὑπόλου Ἱεροῦ. 106–171.)

ANTIOCHUS III (Μάγας, Megas, "The Great," mentioned in 1 Macc 11 10; 8 6–8): Son of Seleucus Kallinikos; succeeded to the throne of Syria in
222 BC; put to death his general, Hermias, and then led an army against Egypt. Theodotus surrendered to him Tyre, Ptolemais and his naval fleet. He also defeated Cyzicus, as well as the Byzantines and Aetolians, desired peace, but Antiochus declined to accept their terms. He renewed the war, but was defeated at Raphia in 217, and was obliged to give up Phoenicia and Coele Syria; Seleucus, however, retained. He undertook to bring under his sway again all the territory of the Parthian. His expedition against Bactria and Parthia gained for him the surname of "The Great." In 209 he carried away the treasure of the goddess Aine in Ecbatana, defeated the Parthians, and in 208 marched against the Bactrians. Later he made a treaty with an Indian rajah, and then returned to the West by way of Arachosia and Carmania, forcing the Germanic Arabs to furnish him with frankincense, myrrh and silver. Then he took Ephesus, which he made his headquarters. In 196 he crossed the Hellespont and rebuilt Lydia-mithraeum. Hannibal visited Antiochus in Ephesus the next year and became one of the king's advisers. He sought the friendship also of Eumenes of Pergamum, but without success. Rome now requested the king not to interfere in Europe, or to recognize the right of the Romans to protect the Greeks in Asia. A war broke out in 192, and Antiochus was persuaded to come to Greece. The Aetolians elected him their general, who asked the Achaemenes to remain neutral. But the patriotic Philopoemen decided that an alliance with Rome was to be preferred. Antiochus first captured Calcis; then succeeded in gaining a footing in Boeotia, and later made an effort to get possession of Thessaly, but retired on the approach of the Macedonian army. In 191 the Romans made a formal declaration of war on Antiochus, who, being at that time in Aeacian, returned to Calcis, and finally sailed back to Ephesus. The Romans regained possession of Boeotia, Euboea and Sestus; but Polyxenidas defeated the Roman fleet near Samos, which island, together with Cyme and Phocaea, fell into the hands of Antiochus. The victorious Polyxenidas, however, soon sustained a crushing defeat at the hands of the Romans, and Antiochus was obliged to make an open truce with Rome. He was finally defeated at Magnesia and sent word to Scipio, who was at Sardis, that he was willing to make peace; but Scipio ordered him to send envoys to Rome. A decision was reached in 189; the Achaean monarch was obliged to renounce everything on the part of the Tauri; give up all his ships of war but ten and pay 15,000 talents to Rome, and 500 to Eumenes. Antiochus marched against the revolted Armenians in 187. In order to replenish his exhausted treasury, he attempted to plunder a temple, and both he and his soldiers were slain by the Elymaeans.

THEODORE HARRY

ANTIOCHUS IV ("Εὐμενὴς, Ἐρυθραχνᾶς, ἐπιφανὴς, ἐπίφανος, ἐπιφάνης, "Illustrious"): Son of Antiochus III who became king after his brother, Seleucus IV, had been murdered by Heliodorus. As a boy Antiochus lived at Rome as a hostage among the monarchs, Eumenes and Attalus, succeeded in placing upon the throne the brother of Seleucus, although Heliodorus had wished to ascend the throne himself. The young king was even more enterprising than his father. He was called in to settle a quarrel between Onias III and his brother, Jason, the leader of the Hellenizing faction in Jerus, and Onias was driven out (2 Macc. 4:4-6). Jason became high priest in his stead (2 Macc. 4:5-10; 1 Macc. 10:13-15; Ant. XII, v. 1). Antiochus himself afterward visited Jerus and was signalized honored (2 Macc. 4:22). On the death of Ptolemy VI in 173, Antiochus laid claim to Coele Syria, Pal and Phoenicia; whereupon war broke out between Syria and Egypt. In this war Antiochus was victorious. Ptolemy Philometor was taken prisoner, and Antiochus had himself crowned king of Egypt (171-167) at Memphis; whereupon Alexandria revolted and chose Ptolemy's brother as their king. The Roman ambassador, Philippus Lamas, demanded the surrender of Egypt and the immediate withdrawal of its self-constituted king. Antiochus yielded; gave up Pelusium and withdrew his fleet from Cyprus, but retained Coele Syria, Pal and Phoenicia.

While Antiochus was on a second campaign in Egypt, he heard of the siege of Jerusalem. He returned immediately, slew many thousands of the inhabitants and robbed the temple of its treasures (1 Macc. 1:20-24; 2 Macc. 6:11-21). By his proclamation of monotheism in Syria, he further weakened the position of the Jews, and the worship of the Olympian Zeus (1 Macc. 1:54; 2 Macc. 6:2; Ant. XII, v. 4) he brought about the insurrection of the Jews, under the Maccabees, upon whom he made an unsuccessful war in 167-164 BC. After this war Antiochus retired to the eastern provinces and died, after having failed in an attack on the temple of the Sun in Elymais, in Persia. See also ABOMINATION OF DESOLATION; ANTIOCHUS.

ANTIOCHUS V (Εὐκλείδης, Ἐρυθράκχων, "Noble-born"): Son and successor to Antiochus Epiphanes, ascended the throne as a mere boy (163-161 BC) under the guardianship of Lysias, who led an expedition to Egypt, and was acclaimed king by the Jews. He was besieged by Judas Maccabaeus (1 Macc. 6:18-30; Ant. XII, ix, 4), who was defeated (1 Macc. 6:42). Antiochus then besieged Jerusalem. Peace was finally concluded on the condition that the Jews should not be compelled to change any of their national customs (1 Macc. 6:55-60; Ant. XII, ix, 7). Philip, the king's foster-brother (2 Macc. 9:29), was defeated at Antioch, but soon afterward Lysias and Antiochus were themselves defeated by Demetrius, son of Seleucus Philopator (1 Macc. 7:4; 2 Macc. 14:2; Ant. XII, x, 1; Polyb. xxxi.19; Livy Epit. 40).

ANTIOCHUS VI (surnamed Theos [θεός], or, according to coins, Dionysius Epiphanes): Was the son of Alexander Balas, who claimed to be the son of Antiochus Epiphanes. Alexander left the throne to his son in 146 BC. The young king retired to Arabia—perhaps through compulsion. The shrewd diplomatist and skilful general of his country, succeeded first in winning over to his side the two leaders of the Jews, Jonathan and Simon, and then, by force of arms, in making the Syrians recognize his protégé. As soon as the monarchy had been firmly established, this prince, as his first projects: he had been ambitious only for himself; Antiochus had been only an instrument in his hands.
In 143, after a reign of a little more than three years, Antiochus was assassinated by Tryphon, who ascended the throne himself (1 Mace 13:31; Ant, XIII, vii, 1; Livy, Epit., 55). J. E. HARRY

ANTIOCHUS VII (surnamed Sidetes, Σιδῆτης, after Sida in Pamphylia, where he was educated): Younger son of Demetrius Soter and brother of Demetrius Nicator, whose wife, Cleopatra, he married when Demetrius was taken prisoner by the Parthians. Antiochus overthrew the usurper, Tryphon, and ascended the throne himself and reigned from 139 to 130 BC. He defeated John Maccabaenus and besieged Jerusalem (Ant, XIII, viii, 2), but concluded a favorable peace (Ant, XIII, viii, 3) from fear of Rome. Later he waged war with the Parthians and was slain in battle (1 Mace 15:2-9.28-31). J. E. HARRY

ANTIPAS, an-ti-pas (Ἀντίπας): The name is an abbreviation of Antipater: (1) A name of Herod the "tetrarch" (in Jos.), son of Herod the Great, the brother of Archelaus (Mt 14:1; Lk 3:1; 9:7; Acts 13:1). See HEROD. (2) A martyr of the church of Pergamum, described as "my witness, my faithful one" (Rev 2:13).

ANTIPATER, an-tip'a-ter (Ἀντίπατρος, Antipatros): One of two envoys sent by the senate of the Jews to the Romans and Spartans (1 Mace 12:16; 15:22).

ANTIPATRIS, an-tip'a-tris (Ἀντίπατρις, Antipatria): Is mentioned in Scripture only once, in connection with the descent of Paul from Jesus to Cæsarea (Acts 23:31). References will be found in Ant, XIII, xv, 1; XVI, v, 2; BJ, I, xxi, 9. It was a town built by Herod the Great, and called after his father Antipater. It is probably identical with the modern Rās el-Ain, "fountain head," a large mound with ruins at the source of Nahar el-'Ain, in the plain to the N.E. of Jaffa. There are remains of a crusading castle which may be the Mirabel of those times. W. Ewing

ANTIOQUITY, an-ti-kw'ē-tē (Ἀντικοινότητα), ἀντικοινότης, from ἀντίκοινος, "to precede in time," "to be old": In Ezek 16:55; 36:11, rendered "former"; in Ps 129:6, "before." Tr1 "antiquity" only in Isa 23:7 to indicate the primeval age of Tyre, which Strabo terms, after Sidon, "the oldest Phoen. city." Dl1 has rendered it "whose origin is from the days of the olden time."

ANTONIA, an-tōn'ē-á. See JERUSALEM.

ANTOTHIJAH, an-to-thē'ja. See ANTHOTHIJAH.

ANTOTHIJAHE, an-toth'i-he: AV form of ANATHOTHIJE (q.v.) (thus RV) (1 Ch 11:28; 12:3).

ANUB, a'nu (அனு, 'ānūb, "ripe"): A descendant of Judah and son of Hakkoz (AV Coz) 1 Ch 4:8.

ANUS, a'nu. See ANNS (Apoč).

ANVIL, an'v'il (ἄνυλ, pa'‘łam): The word is used only once to mean anvil. The passage (Isa 41:7) refers to the custom still very common of-workmen encouraging each other at their work. See CRAFTS. How just pretentious the anvil of the ancient was we do not know. Most work requiring striking or beating, from the finest wrought jewelry to the largest copper vessels, is now done on an anvil shaped like an inverted letter L which is driven into a block of wood, or into the ground, or into a crack between two of the stone slabs of the workman’s floor. The only massive anvils still in the country today are modern and of foreign make.

AMES A. PATCH

APASE, a-pā'sē ("at a pace"): With "come," 2 S 18:23; "flee," Jer 46:5, for "rapidly," "hastily," "fast," corresponding to a Heb idiom that adds emphasis or intensity to an idea by repetition of the word or its equivalent.

APAME, a-pā'mē, ap'a-mē (Ἀπάμη, Apame): A combination of Darius and a daughter of Bartacaus the Illustrious, whose behavior to the king is referred to in a speech of Zerubbabel before the king to prove to him the great power of women (1 Esd 4:29). See BARTACAEUS; ILLUSTRIOUS.

APART, a-pār't (תַּפּוֹת, "flock, separation," i.e. alone, by oneself; נָעֵד, "unceanness," i.e. something put away: "an abomination"): In Zec 12:14 the former word is used eleven times with powerful effect to indicate the separation of families and the isolation of the Jews, through excessive grief in Jerusalem on account of the slain Messiah. The latter word signifies removal from ceremonial uncleanness (Lev 15:19, 18; Ezek 22:10). In Gk, ἀπέχε- 

APE, a'pe (ἄπι, kōph): The word occurs only in the two passages (1 K 10:22; 2 Ch 9:21) in which the magnificence of Solomon is illustrated by the things which are brought to him from foreign countries. Ape is mentioned with gold, silver, ivory and peacocks. Peacocks are natives of India and Ceylon. Ape and ivory may have been brought from India or Africa. Gold and silver may have come from these or other quarters. An Indian origin may be inferred from the fact that the Heb kōph, the Gr κῆκος and the Eng. ape are akin to the Sanskrit kapī, which is referred to the root kap, kamp, "to tremble"; but the question of the source of these imports depends upon what is understood by Tammuz and Ovna (q.v.). Canon Cheyne in Ed. (a.v. "Peacock") proposes a reading which would give "gold, silver, ivory and precious stones" instead of "gold, silver, ivory, apes and peacocks." Assuming, however, that animals are here referred to, the word ape should be understood to mean some kind of monkey. The word ape is sometimes used for the tailless apes or anthropoids such as the gorilla, the chimpanzee and the orang-outang, as opposed to the tailed kinds, but this distinction is not strictly held to, and the usage seems formerly to have been freer than now.

ALFRED ELY DAY

APELES, a-pēl'ēz (Ἀπέλλης, Apelles): A Christian at Rome to whom Paul sends greetings.
(Rom 16:10). He is described by Paul as “the approved in Christ,” i.e. “the approved Christian” (Deut. 31:12; 2 Tim 2:15). It is a common name. Many commentators refer to Horace (Satires, i.5.100): “Credat Judaeus Apella, non ego.”

APHAEREMA, a-fér’ē-ma (Ἀφαίρεμα, Aphai- rema and Aphērema; AV Apherema). One of three districts taken from Samaria and added to Judea by Demetrius Nicator (1 Macc 11:34). Cf Ant. XIII, iv, 9.

APHARATHCHITES, a-far’sath’skits. APARRACHITES, a-far’sak’ts (Ἀφαράθχιτα, Ἀφαραθ- khayē); A tribe living in Samaria that protested against the rebuilding of the Temple, and brought their complaint to Darius (Ezr 4:9; 5:6; 6:6). The tribe has not yet been recognized with any certainty in the inscriptions. Rawlinson identifies them with the Persians; other scholars deny that any Assyrian king ever arises to have been able to obtain colonists from Persia. Some maintain with Marquardt that the term is not the name of a tribe, but the title of certain officers under Darius. Fred. Delitzsch suggests the inhabitants of one of the two Median towns “Partakka” and “Partukka” mentioned in Esdras’ inscriptions. Andreas plausibly connects it with the Assyrian ṣuparshāk (Muss-Arnolt, Assyur Dict., 1908), šāqua (3) “general”; Scheff takes it from an old Iranian word aparawarka, “lesser ruler.”

H. J. Woll

APHARITES, a-far’sīts (Ἀφαρίτες, Ἀφαρί- kēs); A tribe transferred to Samaria by Assaraph of Assyria (Ezr 4:9). Rawlinson identifies them with the APHARACHITES (q.v.), taking Apharites to be an accidental repetition of the same word. He understands “the Persians” to be meant in both cases. Others identify them with a Median tribe mentioned in the inscriptions of Sennacherib as dwellers in the district of Parsua.

APHEK, ā-fēk (אםך, Ἀφήκ, “fortress”; ‘Aḥēk, Aphēk): (1) In Josh 12:18 we should probably read with the LXX “the king of Aphek in Shinar.” This may correspond with Aphek in 1 S 4:1. It was a royal city of the Canaanites whose king was slain by Jos. Probably it is the Aphek mentioned by Jos as being near to Antipatris (BJ II, x., 1). König, a strong position commanding the main entrance to Samaria might suit; but the name has perished.

(2) (Gr ‘Aphek or Aphekā): A city in the lot of Asher (Josh 13:4). The inhabitants were not ejected by Asher, nor is it said that they became tributary (Josh 13:31). In this passage it is written ‘dphēkh (Heb). It may be represented by ‘Affa on Nahal Ibrahim, although this is probably farther north than we should expect.

(3) To this place the Philist gathered their hosts, while the Israelites pitched by the fountain which is in Jezreel (1 S 29:1). It has been generally supposed that these two positions were over against each other, and that therefore Aphek must be sought in the plain of Edaracan. No place answering this description has been found here. Pud‘ah on Mount Gilboa is plainly impossible. If, however, this was only the rallying point of the Philist from which they went up to Jezreel (ver 11), it may be identical with the Aphek in the plain of Sharon (cf 1 above).

(4) A city v. on the plateau east of the Jordan, where disaster befell Benhadad (1 K 20:26,30). The same place may be intended in 2 K 13:17.

The modern Fēk or Afēk (for both forms are heard) on the brow of the hill beyond Kal‘at el-Husn, east of the Sea of Galilee, probably represents this ancient city.

W. Ewing

APHEKAH, a-fē’kā (אמך, Ἀφήθα, “force” or “strength”): An unidentified city in the hill country of Judah (Josh 15:53).

APHAREMA, a-fär’ē-ma. See APHAEREMA (Aphoc).

APPHRAH, a-fē’ra (Ἀφφρά, Aphpha): Head of a family of children of Solomon’s servants in the post-exilic list, one of eight listed in 1 Esd 5:34 after Pocheret-hazzebaim of Ezr 2:57 = Neh 7:59.

APHIAH, a-fi’a (אמך, Ἀφιᾶ, Ἀφία): A Benjamite and an ancestor of King Saul (1 S 9:1).

APHIK, a-fē’k: Variant of APHEK (q.v.).

APPHRAH, af’ē-ra: AV form for RV BETH-LE-APPHRAH (Mic 1:10).

APHSES, af’sēz: AV form for RV HAPPIZZEZ (1 Ch 24:13).

APOCALYPSE, a-pok’ē-lips. See APOCYPHTIC LITERATURE; REVELATION OF JOHN.

APOCALYPSE OF BARUCH, bā’rūk. See APOCYPHTIC LITERATURE.

APOCYPHTIC LITERATURE, a-pok’ē-lip’tik litĕră-tūră: Introductory

I. BACKGROUND OF APOCALYPHIC

1. Judaism and Hellenism

2. Political Influences

II. GENERAL CHARACTERISTICS OF APOCALYPHIC

1. Differences from Prophecy in Content

2. Differences from Prophecy in Literary Form

III. AUTHORSHIP OF JEWISH APOCALYPHIC WORKS

1. Pseudepigraphic Authors not Known Individually

2. General Resemblance and Mutual Dependence among Them Products of One Sect

3. Three Jewish Sects Comprise Whole Literary Class

4. Not the Product of the Sadducees nor of the Pharisees

5. Probably Written by the Essenes

Works Entitled Apocalyptic

I. APOCALYPHIC PROPHET

1. Enoch Books: (1) History of the Books; (2) Summerly; (3) Language; (4) Date; (5) Internal Chronology: The Book of Noah; (6) External Chronology: 7 Slavonic Enoch; (7) Secondary Enoch

2. Apocalypse of Baruch: (1) Summary; (2) Structure; (3) Language; (4) Date; (5) Relation to Other Books; (6) The Rest of the Words of Baruch

3. The Assumption of Moses: (1) Summary; (2) Structure; (3) Language; (4) Date; (5) Relation to Other Books

4. The Ascension of Isaiah: (1) Summary; (2) Structure; (3) Language; (4) Date

5. The Fourth Book of Esdras: (1) Summary; (2) Structure; (3) Language; (4) Date

II. LEGENDARY WORKS

The Book of Jubilees: (1) Summary; (2) Structure; (3) Language; (4) Date

III. PALAEOSYNODOPHORIA

1. The Psalter of Solomon: (1) Summary; (2) Language; (3) Date; (4) Christology

2. The Odes of Solomon: (1) Relation to Pitus Sophia and Summary; (2) Date

IV. TARGUMS

1. Testaments of the Twelve Patriarchs: (1) Summary; (2) Language; (3) Date; (4) Christology

2. Testament of Adam

3. Testament of Abraham

4. Testament of Job: (1) Summary; (2) Language; (3) Date; (4) Authorship

V. SIXTHLINE ORACLES

VI. CONCLUSION
A series of pseudographic works, mainly of Jewish origin, appeared during the period between 210 BC and 200 AD. They have many features in common. The most striking is the resemblance they all bear to the Book of Daniel. Following this model, most of them use "vision" as a literary device to introduce the imagination of the remote future. A side product of this same movement was the composition, mainly in Alexandria, of the Sibylline books. The literary device of "vision" was one used in the Aeneid by Virgil, the classical contemporary of a large number of these works. One peculiarity in regard to the majority of these documents is the fact that while popular among the Christian writers of the first Christian centuries, they disappeared with the advent of the Middle Ages, and remained unknown until the first half of the 19th cent. was well on in its course.

INTRODUCTORY

I. BACKGROUND OF APOCALYPTIC.- When the Jews came back from Babylon to Palestine, though surrounded by heathen of various 1. Judaism creeds, they were strongly mono- and theistic. The hold the Persians had of monotheism, prevented any violent attempts at perverting the Jews. With the advent of the Gr power a new state of things emerged. Certainly at first there does not seem to have been any direct attempt to force them to abandon their religion, but the calm contempt of the Hellene who looked down from the superior height of his artistic culture on all barbarians, and the influence that culture had in the ruling classes tended to seduce the Jews into idolatry. While the governing orders, the priests and the leaders of the Council, those who came in contact with the generals and governors of the Lagids of Egypt, or the Seleucids of Syria, were thus inclined to be seduced into idolatry, there was a large class utterly uninfluenced by Hellenic culture, and no small portion of this class hated fanatically all tampering with idolatry. When the domination over Pal passed out of the hands of the Potemicians into that of the house of Seleucus, this feeling was intensified, and the temple house regarded with less tolerance the religion of Israel. The opposition to Hellenism and the apprehension of it naturally tended to draw together those who shared the feeling. On the one side was the scriblical and devoted to the Mosaic law, the other were the mystics, who felt the personal power of Deity. These afterward became first the Chassidim, then later the Essenes. These latter gradually retired from active participation in national life. As is natural with mystics their feelings led them to see visions and to dream dreams. Others more intellectual, while they welcomed the enlightenment of the Greeks, retained their faith in the one God. To them it seemed obvious that as their God was the true God, real enlightenment must have proceeded from Him alone. In such thinkers as Plato and Aristotle they saw many things in harmony with the Mosaic law. They were sure that there must have been links which united these thinkers to the current of Divine revelation, and were led to imagine of what sort these links necessarily were. The names of poets such as Orpheus and Linus, who survived only in their names, suggested the source of these links—those who made the whole of this, forgeries, mainly by Jews, of Gr poems. On the other hand, there was the desire to harmonize Moses and his law with the philosophical ideas of the time. Philo the Alexandrian, the most conspicuous example of this effort, could not have been an isolated phenomenon; he must have had many precursors. This latter movement, although most evident in Egypt, and probably in Asia Minor, had a considerable influence in Judaea also.

Political events aided in the advance of both these tendencies. The distinct favor that Antiochus Epiphanes gave to those barbarians who Hellenized, became with his son Antiochus Epiphanes a direct religious persecution. This exacerbated the protest of the Chasidim on the one hand, and excited the imagination of the visionaries to greater vivacity on the other. While the Maccabees and their followers were stirred to deeds of valor, the meditative visionaries saw in God their refuge, and hoped for deliverance at the hand of the Messiah. They pictured to themselves the tyrant snuffed down by the direct judgment of Jehovah. After the death of Epiphanes, the Maccabees had become a power to be reckoned with, and the visionaries had less excitement from external events till the Herodian family found their way into supreme power. At first the Herodians favored the Pharisaic party as that which supported John Hyrcanus II, the friend of Antipater, the father of Herod the Great, and the linen clad Pharisees were closely akin to monotheism, prevented any violent attempts at perverting the Jews. With the advent of the Gr power a new state of things emerged. Certainly at first there does not seem to have been any direct attempt to force them to abandon their religion, but the calm contempt of the Hellene who looked down from the superior height of his artistic culture on all barbarians, and the influence that culture had in the ruling classes tended to seduce the Jews into idolatry. While the governing orders, the priests and the leaders of the Council, those who came in contact with the generals and governors of the Lagids of Egypt, or the Seleucids of Syria, were thus inclined to be seduced into idolatry, there was a large class utterly uninfluenced by Hellenic culture, and no small portion of this class hated fanatically all tampering with idolatry. When the domination over Pal passed out of the hands of the Potemicians into that of the house of Seleucus, this feeling was intensified, and the temple house regarded with less tolerance the religion of Israel. The opposition to Hellenism and the apprehension of it naturally tended to draw together those who shared the feeling. On the one side was the scriblical and devoted to the Mosaic law, the other were the mystics, who felt the personal power of Deity. These afterward became first the Chassidim, then later the Essenes. These latter gradually retired from active participation in national life. As is natural with mystics their feelings led them to see visions and to dream dreams. Others more intellectual, while they welcomed the enlightenment of the Greeks, retained their faith in the one God. To them it seemed obvious that as their God was the true God, real enlightenment must have proceeded from Him alone. In such thinkers as Plato and Aristotle they saw many things in harmony with the Mosaic law. They were sure that there must have been links which united these thinkers to the current of Divine revelation, and were led to imagine of what sort these links necessarily were. The names of poets such as Orpheus and Linus, who survived only in their names, suggested the source of these links—those who made the whole of this, forgeries, mainly by Jews, of Gr poems. On the other hand, there was the desire to harmonize Moses and his law with the philosophical ideas of the time. Philo the Alexandrian, the most conspicuous example of this effort, could not have been an isolated phenomenon; he must have had many precursors. This latter movement, although most evident in Egypt, and probably in Asia Minor, had a considerable influence in Judaea also.

II. GENERAL CHARACTERISTICS OF APOCALYPTIC.— Both in matter and form apocalyptic lies, and the writings associated with it differ in many respects from the preceding periods. As already men- tioned, while the predictive element in Prophecy is present in Apocalypses, as in Prophecy itself, it is more prominent and relates to longer periods and involves a wider grasp of the state of the world at large. Apocalypse could only have been possible under the domination of the great empires. Alike in Prophecy and in Apocalypse there is reference to the coming of the Messiah, but in the latter the event is not defined. When the Messiah is not defined, it has a wider reference. In the Prophets and Psalmists the Messiah had mainly to do with Israel. "He will save his people"; "He will die for them"; "His people shall be all righteous." All this applies to Israel; there is no imperial outlook. In the Apocalypses the imperial outlook is prominent, beginning with Daniel in which we find the Messianic kingdom represented by a "son of man" over against the bestial empires that had preceded (Dan 7:13). The whole of these reaching the acme of Apocalypses, if not its inception, is Rev 11:15: "The kingdom of the world is become the kingdom of our Lord, and of his Christ". While the prophecy was primarily a preacher of righteousness, and used prediction either as a
guarantee, by its fulfilment, of his Divine mission, or as an exhibition of the natural result of rebellion against God's righteous laws, to the Apocalypse, prediction was the thing of most importance, and in the more typical Apocalypse there is no moral exhortation whatever.

In the literary form employed there are marked differences between Apocalyptic and Prophecy. Both make use of vision, but in Prophecy, in the more restricted sense of the word, these visions are as a rule implied, rather than being described. Although Isaiah calls his greater part of his Prophecy "vision," yet in only one instance does he describe what he sees; as a rule he assumes throughout that his audience knows what is visible to him. The only instance (ch 8) in which he does describe his vision is not at all predictive; the object is exhortation. In the case of the Apocalypses the vision is the vehicle by which the prediction is conveyed. In Ezekiel there are visions, but only one of these—"the valley of dry bones"—is predictive. In it the symbols used are natural, not as always in Apocalypses, arbitrary. Cf in Daniel's vision of the Ram and the He-goat (ch 8). In Ezekiel the dry bones naturally suggest death, and the process by which they are revived the reader feels is the natural consequence of an event he did not see, and which in his imagination comes within the sphere of ordinary experience; while in what is told of the horns on the head of the He-goat there is no natural reason for the changes that take place, only a symbolical one. This is still more marked in the vision of the Eagle the Apocalypse. What may be regarded as yet more related to the form is the fact that while the Prophets wrote in a style of so elevated prose that it always hovered on the border of poetry—indeed, frequently passed into it and employed the form of verse, as Isa 21—these apocalyptists always used pure prose, without the elaborate parallelism or cadenced diction of Heb poetry. The weird, the gorgeous, or the terrible features of the vision described are thrown into all the higher relief by the baldness of the narrative.

III. Authorship of Jewish Apocalyptic Works.
—In most cases the question of authorship is one that has to be discussed in regard to each work individually. A number of the characteristics of a work rendered by such a procedure impossible in regard to them. If we put to one side the two Apocalypses that form part of the canon, they are all pseudonymous, as En and Aq, and are anonymous, the Book of Jub. Many of them in addition show traces of interpolation and modification by later hands. If we had a full and clear history of the period during which they were written, and if its literature had not the great extent been preserved to us we might have been in a position to fix on the individual; but as matters stand, this is impossible. At the same time, however, from internal evidence, we may form some idea of the surroundings of those who have written these works. From the striking resemblance in general style which they exhibit, and from the way in which some of them are related to the others, many of these works seem to have been the product of similar circumstances. Even in the valley those most removed from the rest in type and general attitude are nearer of One Sect than they are to any other class of work. All affirmative evidence thus points to these works having been composed by authors that were closely connected with each other. The negative evidence for this is the very small traceable influence these works had on later Jewish thought. Many of them are quoted by the Christian Fathers, some of them by NT writers. The whole of these works have been preserved to us through the revision of the large number that have been preserved by being adopted into the OT canon of the Ethiopic church; a considerable number have been unearthed from Ambrosian Library in Milan; most of them have been written in Pal by Jewish writers; yet no clear indubitable sign of the knowledge of these books can be found in the Talm.

The phenomenon here noted is a striking one. Works, the majority of which are written in Heb by Jews, are forgotten by the descendants of these Jews, and are retained by the Christian Gentile Church, who were ignorant of Heb and preserved them in Gr, Lat or Ethiopic translations. A characteristic of the Judaism during the period in which these books were appearing was the power exercised by certain recognized sects. If we take the most nearly contemporary historian of the Jews, Jos, as one's authority, it is found how prominent the three sects, Pharisees, Sadducees and Essenes, were. To a certain extent this is confirmed by the Gospel accounts. Acts, however, shows the general conception—the Essenes are never mentioned by name. The scribes, the literary class among the Jews, all belonged to one or other of these three sects. Consequently the event was a fact they all knew. They were the diehard members of one of those sects. Their mutual resemblance precludes their authors from belonging some to one sect and some to another. We know pretty exactly from Jos and the NT what the character and temporal position of the sects were. To the Sadducees and Pharisees, for example, they can be attributed by the Essenes. They received only the Pent as authoritative, and had no share in the Messianic hopes of which the Prophets were full. They believed neither in angel nor spirit, and had no hope of immortality (Acts 28 8). Jos compares them with the followers of Epicurus among the Greeks. Nothing could be farther removed from the spirit and doctrines of the Apocalypses than this. The Messianic hopes bulk largely; angels are prominent, their hierarchies are described and their names given. The doctrine of immortality is implied, and the places of reward and punishment are taking shape. The Apocalypses therefore be attributed to the Sadducees. There is greater plausibility in attributing them to the Pharisees. So far as doctrines are concerned, there is no doubt that the agreement is relatively close. There are, however, difficulties in this view of their origin. With the fall of

5. Nor from the Jewish state, the Sadducees disappeared, when there was no field for political activity, and when with the destruction of the temple there were no more sacrifices to require the services of Aaronic priests. Nearly contemporaneously the Essenes disappeared in Christianity. The Pharisees alone remained to carry on the traditions of Judaism. We have in the Talm the result of Pharisaic literary activity. The Mish is the only part of this miscellaneous conglomeration which is at all nearly contemporary with the works before us. It has none of the characteristics of the apocalyptic writings. It is later Haggadah, often more resemblance to some of these, noticeably to the Book of Jub. Still, the almost total want of any references to any of the Apocalypses in the recognized Pharisaic writings, and the fact that no Jewish version of any of these books has been preserved, seem to be against the idea that the Apocalypses owed their origin to the Pharisaic schools. The books that form the ordinary Apoc are in a different position. The majority, if not
the whole of them, were received into the Jewish canon of Alexandria. Some of them are found in Heb or Aram., as Ecllus, Tob and Jeh. None of the Syriac apocalypses have been so far studied as to lead necessarily to the conclusion that the Pharisees did not write these books.

By the method of exclusions, we are led thus to adopt the conclusion of Hilgenfeld, that they are essentially not the work of the Essenes. We have,

6. Probably however, positive evidence. We know from Jos that the Essenes had many secret sacred books. Those books before us would suit this description. Further, in the Essene text, there is a story which affords an explanation of the existence of these books. 2 (4) Esd 14:40–48 tells how to Ezra there was given a cup of water as it were fire to drink, and then he dictated to five men. These men wrote in characters which they did not understand "for forty days," until they had written "four score and fourteen books" (RV). He is commanded, "The first that thou hast published openly, and let the worthy and unworthy read it; but keep the seventy last that thou mayest deliver them to such as be wise among thy people." While the twenty-four books of the ordinary canon would be open to all, these other seventy books would only be known by the wise—presumably, the Essenes. This story proceeds on the assumption that all the Biblical books had been lost during the Bab captivity, but that after he had his memory quickened, Ezra was able to dictate the whole of them; but of these only twenty-four were to be published to all; these other twenty-four were to be kept by a society of wise men. This would explain how the Books of En and Noah, and the account of the Asm M could appear upon the scene at proper times, and yet not be known before. In the last-named book there is another device. Moses tells Joshua to embalm (hezirae) the writing which gives an account of what is coming upon Israel. Books so embalmed would be liable to be found when Divine providence saw the occasion ripe. These works are products of a school of associates who could guard sacred books and had prepared hypotheses to explain at once how they had remained unknown, and how at certain crises they became known. All this suits the Essenes, and especially those of them who were to be kept beside the Dead Sea. We are thus driven to adopt Hilgenfeld's hypothesis that the Essenes were the authors of these books. Those of them that formed the Community of Engedi by their very dreamy seduction would be especially ready to see visions and dream dreams. To them it would seem no impossible thing for one of the brotherhood to be so possessed by the spirit of Enoch or of Noah that what he wrote were really the words of the patriarch. It would not be inconceivable, or even improbable, that Moses or Josh might in a dream open to them books written long before and quenched their memories so that what they had read in the night they could recite in the day-time. As all the Essenes were not dwellers by the shores of the Dead Sea, or "associates with the palms of Engedi," some of the writings of this class, as we might expect, betray a greater knowledge of the world, and show more the influence of events than those which proceeded from the Coenobites. As to some extent confirmatory of this view, there is the slight importance given to sacrifice in most of these works.

WORKS ENTITLED APOCALYTIC

In the classification of plants and animals in natural science the various orders and genera present the observer with some classes that have all the features that characterize the general class prominent and easily observable, while in others the features are so far from prominent that to the casual observer they are invisible. This may be seen in the apocalyptic writings: there are some that present all the marks of Apocalypses, such as the Book of Enoch; the Asm M and the Apoc Bar. They all claim to be revelations of the future—a future which begins, however, from the days of some ancient saint—and then, passing over the time of its actual composition, ends with the coming of the Messiah, the setting up of the Messianic Kingdom, and the advance of the world. There are others, like the Book of Jubb, in which the revelation awesomely looks back, and which thus contain an amount of legendary matter. One of the books which are usually reckoned in this class, has, unlike most of the Apocalypses, which are in prose, taken the Book of Psalms as its model—the Ps Sol. A very considerable number of the works before us take the form of farewell counsels on the part of this or that patriarch. The most famous of these is the XII P. Although the great majority have been written in Heb or Aram by Jews resident in Pal, the Sibyline books, composed to a great extent by Jews of Alexandria, present an exception to this.

I. Apocalypses Proper.—As above indicated, all these take the model of the Book of Daniel as their model, and imitate it more or less closely. One peculiarity in this connection must be referred to. While we have already said these later Apocalypses were practically unknown by the Jews of a couple of centuries after the Christian era, the Book of Dan was universally regarded as authoritative alike by Jews and Christians. In considering these works, we shall restrict ourselves to those Apocalypses that, whether Jewish or Christian by religion, are the production of those who were Jews by nation.

The most important of these is the Book, or rather, Books of Enoch. After having been quoted in Jude and noticed by several of the Fathers, this work disappeared from the Bible. The books of the Apoc were attributed to them as copies of the Bible of their model, and it was supposed that they were to be kept beside the Dead Sea. We are thus driven to adopt Hilgenfeld's hypothesis that the Essenes were the authors of these books. Those of them that formed the Community of Engedi by their very dreamy seduction would be especially ready to see visions and dream dreams. To them it would seem no impossible thing for one of the brotherhood to be so possessed by the spirit of Enoch or of Noah that what he wrote were really the words of the patriarch. It would not be inconceivable, or even improbable, that Moses or Josh might in a dream open to them books written long before and quenched their memories so that what they had read in the night they could recite in the day-time. As all the Essenes were not dwellers by the shores of the Dead Sea, or "associates with the palms of Engedi," some of the writings of this class, as we might expect, betray a greater knowledge of the world, and show more the influence of events than those which proceeded from the Coenobites. As to some extent confirmatory of this view, there is the slight importance given to sacrifice in most of these works.

II. Books of Enoch.

This is not a time for the study of the Apoc of Enoch the Seventeen. The ancient works have been written in Heb or Aram by Jews resident in Pal, the Sibyline books, composed to a great extent by Jews of Alexandria, present an exception to this.

(a) History of the books.—Fairly copious extracts from this collection of books had been made by George Syncellus, the 8th cent. chronographer. With the exception of those fragments, all the writings referred to have disappeared from the ken of European scholars. In the last quarter of the 18th cent. Bruce, the Abyssinian traveler, brought to Europe three copies of the Book of En in Ethiopic, which had been regarded as canonical by the Abyssinian church, and had consequently been preserved by them. Of these three copies, one he retained in Kinnaird House, another he presented to the Bodleian Library in Oxford, the third he gave to the Royal Library in Paris. For more than a quarter of a cent. these manuscripts remained as unknown as if they had still been in Abyssinia. In the year 1800 Sylvester de Sacy published an art. on Enoch in which he gave a tr. of the first sixteen chs. This was drawn from the Parisian copy. Twenty-one years after Archbishop Laurence published a tr. of the whole work from the MS in the Bodleian. Seventeen years after he published the text from the same MS. The expedition to Magdala under Lord Napier brought a large number of different MSS. to the German missionaries, for whose release the advance had been undertaken, brought a number to Germany, while a number came to the British
Museum. Some other travelers had brought from the East MSS of this precious book. Fleming, the latest of the MSS, and one of the rare used, 26 MSS. It needs but a cursory study of the Ethiopic text to see that it is a tr from a Gr original. The quotations in George Syncellus confirm this, with the exception of a small fragment published by Mau. Until the last decades of the 19th cent. Synesius's fragments formed the only remains of the Gr text known. In 1892 M. Bouriant published from MSS found in Gizeh, Cairo, the Gr of the first 32 chs. More of the Gr may be discovered in Egypt. Meanwhile we have the Gr of chs 1-52, and from the Vatican fragment, published by Chrys., of chs 25-52. The Gr text shows it also to have been a tr from a Heb original. Of this Heb original, however, no part has come down to us.

As we have it, it is very much a conglomeration of fragments of various authorship. It is impossible to say whether the Gr translator was the collector of these fragments or whether, when the mass of material came into his hands, the interpolations had already taken place. However, the probability, judging from the usual practice of translators, is that as he got the book, so he transcribed it.

(2) Summary of the book.—The first chapter gives an account of the purpose of the book, chs 2-5, an account of his survey of the heavens. With 6 he begins the temporal record of the heavens of the fallen angels and Enoch's relation to them. Chs 20-36 narrate Enoch's wanderings through the universe, and give an account of the place of punishment, and the secrets of the West and of the central regions of the earth. This may be regarded as the First Book of Enoch, the Book of the Angels.

With ch 37 begins the Book of Similitudes. The first Similitude (chs 37-44) represents the future kingdom of God, the dwelling of the righteous and of the angels; and finally all the secrets of the heavens. This last portion is interesting as revealing the succession of the parts of this conglomeration—the more elaborate the astronomy, the later; the simpler, the earlier. The second Similitude (chs 45-57) brings in the Son of Man as a superhuman if not also superangelic being, who is to come to earth as the Messiah. The third Similitude occupies chs 58-71, and gives an account of the glory of the Messiah and of the subjugation of the earth under him. Thus he has interpolated a long account of Leviathan and Behemoth. There are also Noachian fragments inserted. The Book of the Curses of the Luminaries occupies the next eleven chs, and subjoined to these are the Similitudes of the heavens, of which is an account of the history of the world to the Maccabean Struggle. Fourteen chs which follow may be called "The Exhortations of Enoch." The exhortations are emphasized by an exposition of the history of the world in 10 successive weeks. It may be noted here that there is a dislocation. The passage 91-12 contains the 8, 9, and 10 weeks, while ch 93 gives an account of the previous 7. After ch 104 there are series of sections of varying origin which may be regarded as appendices. There are throughout these books many interpolations. The most observable of these are what are known as "Noachian Fragments," portions in which Noah and not Enoch is the hero and spokesman. There are, besides, a number of universally acknowledged interpolations, and some that are held by some to be interpolated, are regarded by others as intimately related to the immediate context. The literary merit of the different portions is various: of none have they called higher praise. The book of Similitudes, with its revelations of heaven and hell, is probably the finest.

(3) The language.—We have the complete books only in Ethiopic. The Ethiopic, however, is not, as already observed, the original language of the Book of Enoch, of which still survive in Gr, prove that at all events our Ethiopic is a tr from the Gr. The question of how far it is the original is easily settled. The angels assemble on Mt. Hermon, we are told (ch 6), and bind themselves by an oath or oaths: "and they called it Mount Hermon because they had sworn and bound themselves by mutual imprecation upon it." This has a meaning only in Heb or Aram., not in Gr. A very interesting piece of evidence of the original language is got from a blunder. In 90 Gr we are told that "the first was the Word" (Logos). As for the appearance of this term, from its connection it is obvious that some sort of bullocks is intended. In Heb the wild ox is called r'm; (Aram. r'ma). The Gr translators, having not a Growmn term as Dr. Charles transliterated it as r'm or r'ma. This the translators confused with a word. It is impossible to decide with anything like certainty which of the two languages, Heb or Aram., was the original, though from the general character of the text, and from the connection it is obvious that the probability is in favor of its being Heb.

(4) The date.—The question of date is twofold. Since Enoch is really made up of a collection of books and fragments of books, the question of the date of the whole is also a primary one. The common view is that chs 1-36 and 72-91 are by the same author, and form the nucleus of the whole. Although the weighty authority of Dr. Charles is against assigning these portions to the author of chs 37-71, the number is numerous and seem to us by no means so superficial as he would regard them. He, with most critics, would regard the Book of Similitudes as later. Nevertheless, we venture to differ from this view, for reasons which we shall assign.

(5) The Book of Noah.—The fragments of the Book of Noah above alluded to present an intrusive element in the Book of Enoch. These, though fairly numerous, are not so numerous as to make it necessary to be dependent on them. Those that show clear traces not only of being interpolations, but also of being interpellations from this Book of Noah, are found only in those portions of the Book that appear to be written by a later author of chs 37-71. If in the latter portions there are astronomical portions, as there are also in the portion that seems to proceed from another hand, chs 1-36, 72-91. When these are compared, the simplest account of the phenomena of the heavens would seem to be in the Noachian portions, the first noted chs 37-71, 92-107; the next in complexity is that found in the Noachian interpolations; the most complex is that contained in chs 72-91. This would seem to indicate that the earliest written portion was chs 37-71, 92-107. Our view of the date of this middle portion of Enoch, the Book of Similitudes, is opposed by Dr. Stanton ("Jewish and Christian Messiah, 60-63, 241-44), who maintains that it is post-Christian. For this decision he rests mainly on the use of the title "Son of Man." This title, he says, as applied to the Messiah, is unknown in rabbinic literature. Rabbinic literature is all so late as to be of no value. The Mish has few traces of Messianic belief, and he has not committed to writing till the end of the 2d cent., when the difference between church and synagogue was accentuated. He further states that he was not understood by the Jews who heard our Lord, and brings as proof ch 31 "the Son of Man." Who is this—the "Son of Man?" Dr. Stanton ("Jewish and Christian Messiah, 241) so translates the passage. To us, the last clause is a mistranslation. The Gr usage in regard to hoiotos ho would lead
us to translate: "Who is this peculiar kind of Son of Man?" This is the meaning which suits the context. Our Lord had not in all the preceding speech used the title "Son of Man" of Himself. This sentence really proves that the multitude regarded the title as equivalent to Messiah or Christ. It might be paraphrased, "The Christ abideth ever; how saivest thou then, the Christ must be lifted up? Who is this Christ?" In fact, Our Lord's adoption of the title is unintelligible unless it were understood by His audience as a claim to being Messiah. It had the advantage that it could not be reported to the Romans as blasphemous. There are supplementary portions of Enoch which may be neglected. At first sight 10 1–3 appear to declare themselves as Noachian, but close inspection shows this to be a misapprehension. If we take the Gr text of Sycellus, Uriel is the angel sent to Noah. The Ethiopic and Qizhe Gr. of Jehovah was already known. Then the introduction of Raphael implies that the first portion of this ch and this Raphael section are by the same author. But the Raphael section has to do with the binding of Assael, a person intimately connected with the end of the Jews. Should it be objected that according to the Massoretic reckoning, as according to that of the LXX, Noah and Enoch were not living together, it may be answered that according to the Sam there were for 180 years contrary. In 68 Noah speaks of Enoch as his grandfather, and assumes him to be a contemporary of himself. Moreover, we must not expect precise accuracy from the Apocryphists.

(6) Relation of external chronology.—When the internal chronology of the book is fixed, the way is open for considering the relation of external chronology. Dr. Charles has proved that the Book of Enoch includes the revelation portrayed in the Enoch Books. There are notices of the existence of a Book of Noah (10 13). There is reference also to a Book of En (21 10). Dr. Charles would date the Book of Jub between 135 and 105 BC. If, then, the Book of Appius was known at much later, there appears to us a reference in En 66 5 to the campaign of Antiochus the Great against the Parthians and the Medes. Early in his reign (220 BC) he had made an expedition to the East and taken the Medes and Persia, which he subdued. This was followed (217 BC) by a campaign in Pal, which at first successful, ended in the defeat of Raphia. In the year 212 BC he made a second expedition to the East, in which he invaded India, and subdued into alliance the formidable Parthian and Bactrian kingdoms. The expectation was natural that now, having gained such an access of power and reputation, Antiochus would desire to wipe out the dishonor of Raphia. It was to be anticipated that along with the nationalities from which ordinarily the Syr armies were recruited, the Parthians would be found, and the earlier subdued Medes. The description of the treating down of the land of the Elect is too mild for a description of the desecration wrought by Ephiphanes. If we are right, we may fix on 205 BC, as the probable date of the nucleus. The Book of the Luminaries of the Heavens which we feel inclined to attribute to the same hand as chs 1–36 contains a history of Israel that is related with the references of Media and Persia, which are not referred to until after 160 BC. It is to be stated that 68 is a passage that the first portion of this Book of En is yet older, it would be impossible to date En earlier than 160 BC. Additionally, we are not quite convinced of the correctness of Dr. Charles's reasonings as to the date of the Book of Assael, and so it may be known as the Enoch with which the Enoch Books have existed as a separate book in the time when the Book of Jub was written. It is dependent on Enoch, and therefore after it. The use of portions taken from it to interpolate in the En Books must have taken place before the Maccabean Struggle. There are other passages that have every appearance of being interpolations, the date of which it is impossible to fix with any definiteness.

(7) The Slavonic Enoch.—In the year 1892 the attention of Dr. Charles was directed to the fact that a Book of En was extant in Slavonic. Perusal proved it not to be a version of the book before us, but another and later pseudepigraphic book, taking, as the earlier had done, the name of Enoch. It is totally independent of the Ethiopic Book of Enoch, as is seen by the most cursory consideration. It begins by giving an account of En's instruction to his descendants how he had been taken up to the seventh heaven. Another manuscript adds other three heavens. In the third heaven Enoch is shown the future of the punishment of the wicked. In the description of the fourth heaven there is an account of the physical conditions of the universe, in which the year is said to be 365 days; but the statement of the same is an excess of 7 days, which appears to be all that is accounted for. Here the independence of the Slavonic En is clear, as the Ethiopic En makes the year 364 days. There are many points of resemblance which show that the writer of the Slavonic En interpolated the book which he had come down to us in Ethiopic, but the relationship is not by any means as close as to be called dependence. The definite numbering of the heavens into seven or ten is a proof of its later date, and is juxtaposed to the XEON, and also to the Ass Isa. We cannot quite acknowledge the cogency of the proofs that any portion of this Book of Enoch has been composed in Gr: hence we cannot agree with Dr. Charles that it was composed in Alexandrion. The resemblance to Philo are too few and slight to be convincing. That some of it was originally Heb Dr. Charles admits. The date Dr. Charles assigns to it—1–50 AD—seems reasonable, with this qualification, that it seems nearer the later than the earlier, and therefore shows the uncertainty of some interpolations and the probability of many more, makes any decided judgment as to date hazardous, so much has to depend on resemblances between books in cases where it is impossible to have access of the Medes and Persia. It is at once an interesting and a valuable addition to our knowledge of the mind of the age preceding the publication of the gospel.

(8) Secrets of Enoch.—In imitation of this Book and in some sense in dependence on it was written a rabbinic Book of the Secrets of Enoch. It is attributed to Rabbi Ishmael, who was a prominent figure in the rebellion of Barcoeha. En is there noted as Metatron. It follows to some extent the course of the Slavonic Book of Enoch. It is this book that is referred to in the Talm, not the more important book quoted by Jude.

Though not without its value in estimating the trend of pre-Christian speculation, the Apocalypse of Bar did not influence thought in India, the way that the Books of En have done. It is neither quoted nor referred to by any of the Christian Fathers. Irenæus (V, 33) quotes a saying which ascribes to Our Lord on the authority of Papian the Maccabean Struggle as his own, but his attribution on the authority of John behind him. This saying we find in the Apocalypse before us, though considerably expanded. In regard to this,
in the first place we have only the Lat VS of Irenaeus, not the Gr original. In the next place, even though the Lat may be serviceable by any Gr, still it is only a quotation from a lost book, which itself records traditions. The fact that it is in the shortest form in the book before us would seem to indicate that it is the original. If that is so, we may regard it as having a certain vogue among the Essene school and their sympathizers. In the Syr Apocalypse published by Lagarde there is a small book entitled "The Epistle of Baruch the Scribe." This occurs at the end of our Apocalypse of Bar. In Cyprian's Test. against Jud., p 113, 29, we have a passage of considerable length from Baruch, a few words of which agree with a passage in this Apocalypse. Hippolytus quotes an oath used by certain Gnostics which he says is found in the Book of Bar. There are features in the passage thus quoted which seem to be echoes of the book before us. This was all that was known of the Apocalypse of Bar until the last half-cent., when Ceriani discovered a Syr version of it in the Ambrosian Library in Milan, nearly complete. It begins after the model of a prophecy: "The word of the Lord came to Baruch, the son of Neriah, saying." In this he follows the phraseology of Jeremiah. He and Jeremiah are commanded to leave Jerus as God is about to destroy it. Baruch is to treat God for his city, and God shows him that the punishment will be temporary. Then the Chaldeeans come to fulfill what God has threatened; but Baruch is shown the angel ministers of Divine vengeance among the sacred vessels of the Gr; still he swallows them up. Then the angels helped the Chaldeeans to overthrow the walls of Jerus. Notwithstanding that in the canonical Book of Jer (43 6-7) and in 2 K the prophet goes down to Egypt, Baruch declares that Jeremiah is sent to comfort the captives in Babylon, while he, Baruch, is to remain in Judæa. He prays over Jerus and denounces woes in Babylon (chs 1-12). While he is standing upon Mt. Zion he is called into colloquy with God as to the method of Divine dealing with Judah, and a revelation is promised him (chs 13-20). This revelation is introduced by a prayer of Baruch followed by a colloquy with the Almighty. Baruch asks, "Will that tribulation continue a long time?" to which the angel answers, "It will be two successive different forms of judgment which shall come. Then follows an enigmatic sentence, "Two parts weeks of seven weeks" are "the measure and reckoning of the time" which probably means that each of the parts is a week. At a certain period the Messiah is to appear. Here a description is given of the glories of the Messianic kingdom in the course of which occurs the passage already referred to as quoted by Papias (chs 21-30). The writer, forgetting what he has already said of the desolation of Jerus, makes Bar assemble the Elders of Jerus and announce that he is going to retire into solitude. In his retirement he has a vision of a wooded hill, and at the foot of it is a vine growing and beside the vine a spring of water. This fountain swelled and became tempestuous, sweeping away all the forest on the hill but one great cedar. It, too, falls at length. The interpretation is given. The forest is the fourth Empire of Daniel—the Rom—the many magistracies being symbolic of the numerous trees of the forest. The Messiah is the vine and the fountain. It is probable that Pompey is the leader referred to (chs 31-40). Then follows a colloquy of Baruch first with God, then with his son and the Elders of the people. This long prayer is the angel's answer which includes a description of the punishment of the wicked and the reward of the righteous—the latter is next given with greater fulness (chs 41-52). Another vision is given to Baruch of twelve showers of rain alternately light and dark and a final torrent blacker than anything else and closed by a bright light. The angel Ramiel comes to Baruch to interpret the vision. It represents the history of Israel to the return to Judæa under the decree of Cyrus. The last dark waters represent the Maschanian Struggle. It would seem as if the vision carried the conflict on to the fratricidal conflict between John Hyrcanus II and Aristobulus (chs 53-77). Then follows the epistle to the nine and a half tribes (chs 78-87). (2) Structure.—Preliminary to anything further in the discussion of the further—how far it is one, how far it is composite or interpolated. That it contains different portions is obvious on the slightest careful study. The first portion that the reader marks off is the "epistle to the nine tribes and a half." As it has already been mentioned, the epistle and the prayers that follow, to ch 52, are all connected, though not closely. But close connection is not to be expected from an oriental and an Apocalypticist. Then follows the sections connected with the vision of the Messianic kingdom, and its interpretation. There are thus five independent sections exclusive of interpolations which may be due to different writers. (3) Language.—In the first place it is clear that the Syr in which the work has come down to us is itself a tr from Gr. The MS of Ceriani states this in its title. This is confirmed by Graecisms filtering through, as ho Manasseh in 66 1, where ho represents the Gr article. In some cases the readings that are unintelligible can be explained by the back into Gr, as shown by Dr. Charles. The most convincing is the use made of the book by the writer of the "Rest of the Words of Bar," who wrote in Gr. Although not a few scholars have followed Langen in maintaining that Gr was the original tongue, careful investigation proves that behind the Gr was Heb. The strongest of these proofs is that the echoes of Scriptural texts are almost invariably from the Heb as against the LXX. Thus in 6 1 Jer times addresses the earth and calls upon it to hear the word of the Lord. So it is in the MT and in the Vulg, but not in the LXX, where the word "earth" is only given twice. There are several other instances. Dr. Charles has carefully compared the idiomatized phrase with the fact that copies of the MT have been preserved in the Gr, and then conveyed to the Syr. The most interesting of these is the peculiarity of infinitive with finite verb to emphasize the action
narrated. This is rendered in LXX sometimes by cognate noun and verb, and sometimes by participle and verb. The examples chosen by Dr. Charles have the disadvantage of being chosen for the sake of the technical effect on this idiom of passing through the two languages, Gr and Syr. In Paulus Tellensis there are examples—e.g. 2 K 18 33. He is scarcely accurate in saying that this idiom never occurs in the Pesb unless it is in the Gr. See Lk 1 22; Jn 13 29, etc., as examples to the contrary. The proof seems conclusive that Heb was the original language of this Apocalypse, and that it was first tr° into Gr, and from that into Syr. From this it is impossible to determine particularly of original was Pal. That it has practically no effect on Jewish lit., and was potent enough among the Christians to lead a Christian about the middle of the 2d Christian cent. to compose an addition to it, proves to our thinking its Essene origin.

(4) Date.—Although the writer assumes the destruction of Jerusalem by the army of the Chaldaeans, he evidently has no conception of what such a catastrophe would really mean. He has no conception of the length of time occupied by a siege, the terrors of famine, or the desolation that follows the capture of a city. Jos tells us (Bj, VII, i, 1) that save a portion of the west wall and three towers, the city was utterly rased to the ground—"there are not to be found there believe that ever it had been inhabited." Yet, when endeavoring to realize the similar destruction which had befallen the city under Nebuchadnezzar, he speaks of himself sitting "before the closed books of the scribe" (a) where the gates had wholly disappeared. Again, he assembles the people and their elders "after these things" in "the valley of the Kidron." The Apocalypse must be dated at all events considerably before 70 A.D. On the other hand, it is subsequent to the first part of En; it assumes it as known (56 10–13). But a closer discrimination may be reached. In the vision of the wood and the one tree that survives we have Pompey pointed out clearly. The multitude of trees points to the numerous magistrates of Rome. (Of description of Senate of Rome in 1 Mac 8 15.) The see in his vision sees all these swept away and one remaining. It could not be an emperor, as the title was added as equivalent to "king," as Nero in the Asc. Isa. is called "the matricide of the human race." The only other besides Pompey likely to be pointed to would be Julius Caesar. But the fall of the great desecrator of the temple, which the seer foresaw, would not be expected to be followed by that of Caesar who had conquered him. It is difficult for us to realize the position Pompey occupied in the eyes especially of the eastern world before the outbreak of the civil war. Cicero's letters and his own P.k. Manilia show the way Pompey filled the horizon even in republican Rome, in a society most of the prominent members of which claimed a descent that would have enabled them to look down on Pompey. But in the East he had enjoyed dictatorial powers. For intervention in the context between the brothers John Hycamus II and Aristobulus could not fail to impress the Jews, and his desecration of the temple would mark him off for a very special destruction. The date is so far before the death of Pompey (48 BC)—though after the desecration of the temple—that the possibility of anyone entering into conflict with him is not dreamed of. When we turn to the twelve showers, we are led to the time of this struggle also as that which shall immediately precede the coming of the angel. As we are to find in ch 25—"The measure and reckoning of the time are two parts, weeks of seven weeks." This we regard as two jubilees—i.e. approximately a cent. The point to be fixed is the time from which this cent. is to be reckoned. To our idea it must be from some event connected with the temple. Such an event was probably the show of power by Judas Maccabeus in the 148th year of the Seleucid era—that is, 163 BC. A cent. brings us exactly to the year of Pompey's capture of Jerusalem and desecration of the temple. Thus three different bases converge in pointing to 60 or 50 BC as the date at which this book was written.

(5) Relation to other books.—The strange mingling of knowledge of Scripture and ignorance of it is a phenomenon to be observed. The very first vision contains a quotation of original, which explanation may be given of the statement. Taken with what follows, the statement is that Jesus was taken by Nebuchadnezzar, "in the 20th year of Jeconiah, king of Judah. This naturally ought to mean the 25th year of the reign of Jeconiah, but he only reigned three months. Whether the date is reckoned from his life or his captivity, it will not suit the date of the capture of Jerusalem by the Chaldaeans. Another strange blunder appears in the subjoined "Epistle of Bar," the number of northern tribes who rebelled against Rehoboam is confused, with that of the tribes settled on the west of Jordan, and that of the tribes following the House of David with that of those on the east of Jordan. Yet the whole case is probably quite understood. The author seems fairly well acquainted with Jer and Ps, as there are frequent echoes of these books. Most marked is the confusion between this Apocalypse and the other Christian books. That connection is not so obvious in quotable sentences as in the general atmosphere. This is very marked in regard to the En books, Ethiopic and Slavonic. In the case of the latter, of course, the resemblance is not imitation on the part of the writer of this Apocalypse. One marked distinction, one that precludes any thought of direct imitation, is the elaborate angelology of the En books as compared with the one name which appears in the Apocalypse of Bar. The book with which the present Apocalypse has closest relation is 2 (4) Ess. Dr. Charles has given at the end of his tr of the work before us (A poc of Baruch, 171) a long list of resemblances, not always of equal value. Sometimes the references are inaccurate. Thus in ch 29, while 2 Ess as we have it has on the one hand a markedly Christian coloring, which seems impossible to attribute to interpilation, and on the other, to have seen the desolation of Jerusalem under the Romans, there is no Christian element in the genuine Baruch, and the desolation is more sentimental as proved by the inability to realize the consequences consequent on the capture of the city by victorious enemies. The words of Baruch.—One of the evidences of the influence our Apocalypse had in the Christian community is the composition by a Christian of "The Rest of the Words of Bar" (or Jer). This was found, like so many other treasures, by Ceriani in the Ambrosian Library, Milan. Jer is the principal spokesman in the book. It is revealed to him that Jesus is to be given into the hands of the Chaldaeans, and he announces this to Baruch. He is desirous to save Ebedmelech (Ebedmelech), and prays God for him, and Ahimelech is sent away out of the city while the angels are overturning it. He goes to the vineyard of Agrippa and falls asleep. His sleep continues sixty years. When, arising from sleep, he enters Jerusalem again he does not recognize it. An angel leads him, and Ahimelech is sent to the temple in a tank. Baruch writes to Jeremiah, who has departed to Babylon. His letter is conveyed by an eagle. Jer on receipt of this epistle collects all
the captives and leads them back to Jerus. Certain of them would not submit to the law in all its strictness, but, turning aside, founded Samaria. After three days the Samaritans, excepting the third day and preaches Christ as the Son of God, and is stoned by the Jews. A noticeable thing is the relatively accurate account of the date of Christ's appearance after the return from the captivity, 477 years, only it must be calculated from the reign of Artaxerxes and to the resurrection. This, however, would make Jeremiah nearly two hundred years old. Such a thing, however, is not a matter that would disturb a Jewish chronicler. "The Rest of the story is so much "written from history" that it has been written by a Christian Jewish Fal before the rebellion of Barcochba. In the Epistle of Jude are a reference to a conflict between the archangel Michael and Satan, when they disputed about the body of Moses." Origen (de Princip. i.2) attributes this to a book he calls As-

3. The Assumption of Moses & censio Mosta. Clement Alexandrinus gives an account of the burial of Moses quoted from the same book. There are several references to the book up to the 6th cent., but thereafter it disappeared till Ceriani found the fragment of it which is published in the Acta Sacra et Profana (Vol I). This fragment is in Latin and the author of the work is unknown. The work, however, is a commentary, proving that the last scribe had but an imperfect knowledge of the tongue in which he wrote. Some of the blunders go farther back and seem to have been due to the scribe who transcribed it from Gr. Even such a commentator as the "Addition" he did not know, but attempted, by no means with conspicuous success, to transliterate it as clipsis. So with allophuloi" foreigners," the common LXX equivalent of "Philistine," and yet comment on skén ("a tent") and several others. It probably was dictated, as some of the blunders of the copyist may be better explained as mistakes in hearing, as fygicis for Phoenices, and ventic for vened. Some, however, are due to blunders of sight on the part of the translator, as moises for moyses. From this we may deduce that he read from a MS in cursive characters, in which and were alike. This Milan MS has been frequently edited. Dr. Charles has suggested with great plausibility that it was a joint work of Moses and an Assumption, and that these had been combined; and, while Jude ver 9 is derived from the Assumption, as also the quotation in Clement of Alexandria, he thinks that Jude ver 16 is derived from separate clauses of the Testament. It may be observed that in the fragment which has been preserved to us, neither the passages in Clement nor that referred to in Jude ver 16 are to be found.

(1) Summary of the book.—Moses, now in the plain of Moab, calls Joshua to him and gives him commands for the people. He had already blessed them tribe by tribe. Now he calls his successor to him and urges him to be of good courage. He tells him that the world has been created for Israel, and that he, Moses, had been ordained from before the foundation of the world to be the mediator of this covenant. These commands are to be written down and preserved in clay jars full of cedar oil. This sentence is added to explain the division. A recapitulation of the history of Israel to the fall of the Northern Kingdom follows. The successive reigns are called years—eighteen years before the division of the kingdom, 15 Judges and Saul, David and Solomon, and nine, the kings from Jeroboam to Hosea. The Southern Kingdom has twenty years or reigns. The Southern Kingdom was to fall before Nebuchadnezzar, the king from the East who would cover the land with his cavalry. When they are in captivity one prays for them. The latter seems a more probable meaning of "Saul," as more in the line of Jewish thought. It should be noted that Dr. Charles thinks illusa adventum refers not to the Messiah's coming, but to the last judgment. In answer to the declaration of Moses as to his approaching death, Joshua rends his garments and breaks forth into lamentations, wondering who will lead on the people when his master has departed. There is one phrase that seems to imply a tincture of classical culture. Joshua says of Moses, "All the world is thy Sepulchre," which seems to be a reminiscence of the quotation (Thucyd. ii.4), "The whole earth is the monument of men of renown." He then casts himself at the feet of Moses. His master encourages
him and promises him success. At this point the fragment ends. It is to be expected that shortly after this would occur the passage quoted by Clement of Alexandria, and still later that quoted in 2 M 23:9.

(2) Structure.—It seems to have been united with one, if not two other books, a "Testament of Moses" and our Book of Jub. It would seem that in the present work we have mostly the "Testament." The insertion of the word morte in 10:12 indicates that when this copy was made the two writings were united. As above remarked, there appears to have been a displacement of chs 8 and 9; they ought to have been placed between chs 4 and 5.

(3) Language.—As already mentioned, the MS found by Ceriani in the Ambrosian Library is in Lat. No one, however, has maintained that this was the language in which it was originally written. It is evidently a tr from the Gr. A number of Gr words are transliterated, some of them common enough. So clearly does the Gr shine through, that Hilgenfeld has reproduced what he imagines the Gr text to have been. That having been settled, a further question arises. Is it the original tongue, or was it, too, a tr from a Sem original? The first alternative is that adopted by Hilgenfeld. His arguments from the alleged impossibility of certain grammatical constructions being found in Hebrew and the presence of such words as Allophile and Deuteronomium simply prove that in translating a book which claimed to be written about Moses, the writer followed the diction used by the LXX, just as Archbishop Laurence in 1811 translated his own diction of the AV of the Bible. These questions have been ably investigated by Dr. Charles in his edition of the Asm M (42–45). He shows a number of Sem idioms which have persisted through the Gr—some cases in which the meaning can only be got by reconstructing the Heb text. Again, corruption can only be explained by means of a Sem text. It might be suggested that a falsarius writing in Gr would naturally employ the diction of the LXX as has been done frequently in English; the diction of the AV is used to cover the imitation of a sacred book. The fact that style was so little regarded as a means of settling dates and authorship renders this unlikely. The more delicate question of which of the two Sem versions, or, Hebrew — the LXX or the AV is more difficult to settle. There are, however, one or two cases in which we seem to see traces of the υγιον (yu) conversive—a construction peculiar to Heb—e.g. 8:2, "Those who conceal their circumcission shall be put to death and have delivered up to be led to prison." The ignorance of the scribe may, however, be invoked to explain this. On the other hand, the change of tense is so violent that even an ignorant scribe would not be likely to make it by mistake—towards the end of verse 2, and帐 topology referred to Joshua and asserted to be written down by him at the dictation of Moses, would necessarily be in Heb. From this we would deduce that Heb rather than Aram. has been the Sem original.

(4) Date.—The identification of the rex petulans with Herod and the statement that he should be succeeded by his sons who should reign a short time, fix the date of the composition of the work before us within narrow limits. It must have been written after the death of Herod and also after the deposition of Archelaus, 6 AD, and before it was seen that Antipas and Philip were secure on their throns. Thus we cannot date it later than 7 or 8 AD. The intense hatred of the Herodians was one of this time. Later they came to be admired by the patriotic party.

(5) Relation to other books.—The most striking phrase is the name given to Moses—arbiter testamenti, "the mediator of the covenant," which we find repeatedly used in the Epistle to the Hebrews. He is the tr of mokhsaph in Job 9:33, but in translating the Epistle to the Hebrews, Litzsch uses sarjor, a purely rabbinic word. Another rendering is mnoqath. There are several echoes in this book of passages in the OT, as the address to Josiah (1 Kings 11) is parallel with Deuteronomy 31:7. The prayer in ch. 4, as before observed, is modeled on Deuteronomy 9:4–19. There are traces of acquaintance with the Psalter of Solomon in ch. 8 as compared with Ps. 4. In these there appear to be echoes of the present work in Our Lord's description of the Pharisees, when we compare Mark 23 with ch. 9.

There is a fragment published by Ceriani entitled "History and Life dekigiesia kai politeia of Adam, Which Was Revealed by God to Moses, His Servant. It is an account of the life of our first parents after the death of Abel to their own death. It has been composed to all appearance in Gr, and really belongs not to Mosaic lit., but, to that connected with Adam. It is to be noted that to Cain and Abel other names are given besides those so well known as Adam, Seth, Enos, Enoch, Jared, and Amalthea, names of no assignable origin. There are no evidences of Christian influence; from this one would be led to regard it as a Jewish writing; as the middle of it has been lost, any decision is to be made without further information.

The Ascension of Isaiah was often referred to by name in the works of early Christian Fathers, especially by Origen. It is called by him "The Apocalypse of Isaiah." Epiphanius, 391, refers to the work as the Ascension of Isaiah more commonly known. Now that we have the book, we find numerous echoes of it. Indeed, Origen claims that He 11:37 contains a reference to it in speaking of saints who were seen asunder. Justin Martyr speaks of the death of Isaiah in terms that imply an acquaintance with this book. It had disappeared till Archbishop Laurence found a copy of it in Ethiopic on a London book-stall. The capture of Magdala brought home more manuscripts. A portion of it had been printed in Venice from a Lat. version.

(6) Summary.—In the 26th year of his reign Hezekiah calls Isaiah before him to deliver certain writings into his hand. Isaiah informs him that the devil Satanvoyd, is more powerful than his son Manasseh, and that he, Isaiah, will be seen asunder by his hand. On hearing this, Hezekiah would order his son to be killed, but Isaiah tells him that the Chosen One will render his counsel vain. On the death of his father, Manasseh turned his hand to serve Berial Matanbukses. Isaiah retired to Bethlehem, and thence, with certain prophets—Mic, Joel and Hab—and also Hananiah and his own son Joah, he removed to a desert mountain. Birkah, a name attributed to their hiding-place. They are brought before Manasheh, and Isaiah is accused of impiety because he has said that he has seen God, yet God had declared to Moses, "There shall no flesh see my face." He had also called Jerus, Sodom, and its rulers, those of Cemorrah. For Berial (Beliak) had great wrath against Isaiah because he had revealed the coming of Christ and the mission of the apostles. At this point there appears to be a confusion between the first coming of Christ and the second. Lawless elders and shepherds are referred to as appearing, and it is assumed the elders of the church and the pastors are intended, though this is not necessarily so. There certainly was much contention in the churches, as we know, concerning the question of circumcision. The reference to the elders, however, may be to the elders of Israel who crucified Our Lord. Then
follows the account of the incarnation of Beliar in Nero, "the matricide monarch," and the persecution of the twelve holy ones, of whom one will be delivered into his hand—the reference again, probably, to the martyrdom of Peter. If it is Paul, then it is a denial of Peter's martyrdom at Rome altogether; if it is Peter, it means the denial of Paul's apostleship. The reign of the Antichrist is to be "three years, seven months and twenty-seven days," that is, on the Rom reckoning, 1,335 days. This would seem to be calculated from Nero's persecution of the Christians. 

He makes a singular statement: "The greater number of those who have been appointed to the Throne, the Beloved will turn aside after him"—a statement that implies a vastly greater apostasy under the stress of persecution than we have any record of from other sources. A good deal is to be said for the insertion of 1,000 in the number 352 in § 14, so as to make it read 1,332. At the end of this period "the Lord will come with His angels and will drag Beliar into Gehenna with his armies." Then follows a reference to the descent of the Beloved into Sheol. The following chapter gives an account of the martyrdom of Isaiah, how he was "sawn sunder with a wooden saw," and how Belkira mocked him, and strove to get Isaiah to recant. With ch 6 begins the Ascension proper. This chapter gives literally the introduction to the Beloved. It is in ch 7 that the account is given of how the prohibition is carried up through the firmament and then through heaven after heaven to the seventh. A great angel leads him upward. In the firmament he finds the angels of the devil evening on another. Above this is the first heaven where he found a throne in the midst, and angels on the right and the left, the former of whom were the more excellent. So it was in the second, third, fourth and fifth heavens. Each heaven was more glorious than that beneath. In the sixth heaven there was no throne in the midst nor was there any distinction between angels on the right and left; all were equal. He is then raised to the seventh heaven—the most glorious of all—where he sees not only God the Father, but also the Son and the Holy Spirit. As to the Son we are told that he should descend, and having assumed human form should be crucified through the influence of the Prince of this world. Having descended into Sheol, he spoiled it, and ascended up again, in ch 10 the account of the descent of the Son through the successive heavens, how in each He assumed the aspect of the angels that dwelt therein, so that they did not know Him. In the Firmament the quarreling and envy appeared at first to hinder Him. In ch 11 we have a semi-doctetic account of the miraculous birth. With the declaration that it was on account of these revelations that he, Isaiah, was sawn sunder, the Apocalypse ends.

Structure.—Dr. Charles has maintained that three works are incorporated—the Testament of Hezekiah, the Martyrdom of Isaiah and the Vision of Isaiah. The names have been taken from those given to this work in patristic literature, and are not strictly descriptive of the contents, at least of the first. The confused chronology of the work as we have it may to some extent be due to transcription and translation. From the opening paragraph, there appears to have been an Apocryphon style of writing, the phraseology and diction being that of a writer whose priority of the work is a phrase which implies a knowledge of the Epistle to the Eph on the part of the writer. The contents given thus summarily are not further detailed. The Vision of Isa does not give any account of the powers and principalities of Satan's kingdom. It would seem better to regard the present work as composed of two—the Martyrdom of Isaiah and the Ascension or Resurrection proper. The references backward and forward seem to imply a similarity of authorship in both parts. This would seem to suggest that the editors and author were one and the same person. There is a knowledge of Rom affairs at the time of Nero's fall so much beyond what anyone living in Pal could attain that Rome would seem to be the place of composition.

(3) Language.—The immediate original from which the tr. Ethiopic, Lat and Selavonic were made appears to have been Gr. It is clear in regard to the Ethiopic where the proper names which end in Heb in k and in the Gr transcription end in s, as Hezekias, Isaia, the latter is followed, but Manasseh is Manase; a more integrally written text found in 2 12: Mikayas is called "son of Amida," where "Amida" stands for Imlah. In the Ethiopic transliteration ጥዓrhs is generally used for the initial ṣdḥ and ṣdḥ as a vowel, as it is in "Israel" (Ethiopic Aerated); hence "Israel" was "seen, from the man's head." Then as Δ (d) and ʌ (i) are like each other the change is explained. Although certainly as said above, Gr has been the immediate original, it is possible if not even probable that behind the Gr there was a Patristic text. The substitution suggests the same thing (see 2 5 Gr). The mysterious name given to Berial, Mattanbukus—which, unfortunately, we have not in Gr—seems to be intelligible only in the idea that it has a Heb etymology, and when translated by "Lamb of God" the latter word being equivalent to the "void," "the abyss." The title given to Sammuel, Malkira, seems naturally to mean king of the watchers"—Vris, the angels who, as related in En (10 5), did not continue in their first estate, but defiled themselves with women. So Belkira is "Lord of the fort"—ba'al šr. There thus seems to be a probability that like so many others of this class, the "Ascension" is an interlinear gloss, but not an integrally written Heb.

(4) Date.—No one reading the "Ascension" can fail to feel that he has to do with a Christian document, and one belonging to the very beginning of Christian history. There may have been an earlier Jewish Apocalypse behind, though the subser-"ing that does not seem necessary. It is made up of two documents, but the Christian element appears to be woven into the structure of both portions. That it is to be dated early in the history of the church may be seen from the expectation of Christ's speedy reappearance in the world in His parousia. The conflict in the church between elders and shepherds gives a picture of the struggle between Judaizers and the Pauline Christians on the other side. The emphasis laid on the twelve, the omission of all reference to Paul, indicates that it was Judaizing. The doctetic account of the birth of Jesus, its independence of the canonical Gospels, all speak of an early date. The date, however, it seems to us, can be fixed with great certainty. The reign of Beliar, who has come down upon Nero and incarnated himself in him is to be three years, seven months and twenty-seven days, in all 1,335 days (§ 12). This number, it may be noted, is reached by reckoning the years after the ascension as dated according to the Julian Calendar, proving this Apocalypse to have been written in Rome. But the number is singularly near the actual duration of Nero's reign after the persecution had begun. From the 17th of July, 64 to the death of Nero (June 9, 68) was 1,421 days—that is, 66 days more. It was at least a month after the conflag-
vation that the persecution began, and longer till the mad orgy of cruelty when Christians wrapt in pitch and set on fire illuminated Nero's gardens. If Christ was crucified at Rome, any might hope for the end of this reign of terror, and fix on the number he found in Daniel. It would seem that already the 1,290 days had been over-passed, so he hopes that the 1,335 days will see the end of the tyrant. There is a difficulty in the 332 days of 4:14. The temptation is great to hold with Lücke, Dillmann and Charles that 1,000 has dropped out, and that the last figure ought to be 5; then we have the same number. In that case, this Apocalypse may have been composed after the news of the rebellion of Vindex had reached Rome, but before the death of Nero. If we may adopt this—though the fact that the shorter no. is found in all three Ethiopic MSS makes this method of adding a figure necessary to an explanation one to be avoided—this would point to the time immediately preceding Nero's death. The difficulty is, where did the author get the number? If it is correct, it is probably the arithmogram of some name of Satan. Beralia gives 229 by gematria. It would seem that another mark of time is given in the martyrdom of Peter, which may be dated 64 AD. Another negative note is the absence of any reference to the fall of Jerus. Had it happened, Jew though the writer was, and Jew for his country, he would have led him to see the vengeance of heaven on the city which had put Him to death, and exult in it. It must have been written in the course of the year 65.

Until the books we have been discussing hitherto 4 Esd has never disappeared from the knowledge of the church. It has, however, come down to us primarily in a Lat. translation by a Gr. original. Archbishop Laurence discovered an Ethiopic version of it. Later an Armenian version with Lat. translation was published in Venice. An Arab. version is also in existence. It was received into the Apocrypha of the Anglican church, though excluded from that of Germany; by the Council of Trent 1 Esd and 2 Esd of our Apocrypha were excluded from the Roman Catholic canon, and placed after Rev. along with Pr Man.

1. Summary.—The first two chs contain a prophecies. The third and fourth chapters show the influence of the NT on it. Cf. 2(4) Esd 1:30 with Mt 23:37, and 2(4) Esd 2:45 with Rev 7:13. With ch 3 there is a new beginning. This opens with a prayer which occupies the whole ch. In answer, Uriel is sent from God and reveals to Ezra by various symbols the plan of God in regard to Israel. This goes on to the middle of ch 5, and forms the first vision. After fasting seven days, a new communication is made by Uriel to Ezra. It begins as the former did with a prayer. Then follows a series of questions intended to bring out the limited understanding of man. When these are finished, Uriel gives an account of the history of the world from the creation. This vision ends with ch 6. The third vision is very interesting, as a large section of 70 vs had been lost, and were recovered only comparatively recently. This vision contains an account of Creation as it is in Gen, only rhetorical expansions occur, and a full description is given of Leviathan and Behemoth. Ezra is shown the heavenly Zion in vision as difficult of access. The portion recently discovered contains an account of the place of punishment, and there is mention of Paradise. The end of this prayer of a Jew seems an independent composition (ch 20). The fourth vision begins with ch 26. In it Ezra is shown a woman weeping, who is interpreted to be Zion. She is transformed into a city (10:27). The fifth vision is the most important. It begins with an eagle appearing, which has three heads and twelve wings. This is interpreted as referring to the Roman empire, in which he might hope for the coming of Christ. In the seventh we have an account of the re-writing of the books at the dictation of Ezra, and the retenion of the seventy secret sacred books. In what has preceded he has been discussing the scheme of Fritzsche. The last ch proceeds from the same pen as do the opening chs, and is combined with them by Fritzsche and called the Fifth Book of Esd.

2. Structure.—As has been indicated above, 4 Esd is marked off into several distinct portions, preceded by Ezra fasting, and introduced by a prayer on the part of the prophet. Kabisch has a more elaborate scheme than Fritzsche. Like him, he recognizes seven visions, and like him he separates off the ch and the last 17, 15, 16, as by a different hand from the rest of the book. But in addition, he recognizes additions made by a R throughout the book. To us the scheme appears too elaborate.

3. Language.—As above mentioned, the immediate source of the Lat text appears to have been Gr. There is very little to enable us to settle the question whether Gr was the language in which this book was composed, or whether the Gr is a transcriber from Heb or Aram. There are many echoes of the other Scriptures, but no direct quotations, so there is nothing to show whether the author used the Heb text or the LXX. The proper names do not supply any clue. Although there are so many versions of the Gr, they are all so paraphrastic that the Gr in most cases is not by any means certain. The few vs quoted in Gr by Clemens Alexanderius do not afford space enough to discover through them if there is any other language behind. It possibly was written in Heb, as it seems to have been written in Pal.

4. Date.—From the tone of the book there is no doubt that it was written after the capture of Jerus. by Titus. Not a Jew seems to occupy the role of Jesus, the New Covenant, when the rebellion of Barcochba was overthrown, a Christian Jew would not have manifested such sorrow. The break between the church and the synagogue was complete by that time. Further, had the author been written under the previous disaster would have been referred to. Over and above the distinctly and avowedly Christian passages, there are numerous echoes of the NT Scriptures. The fifth vision affords notice of time which would be more unambiguous if there had not been additions made. The eagle with the three heads and twelve wings is declared to be the fourth monarchy of Daniel, and by the context this is shown to be imperial Rome. The question that has exercised critics is the portion of the Rom history referred to. Lücke regarded the reference to be to rulers prominent in the time of Sulla, and the three heads to be the first triumvirate. This view implies a knowledge of Rom politics not possessed by any Jew of the pre-Christian period. Further, the echoes of NT language which occur (cf. 2[4] Esd 5:1 with Lk 18:8; 2[4] Esd 6:5 with Rev 7:3, etc.) determine the decision against any idea that it was pre-Christian. The realization of the horrors of Jerus. is too vivid to be the result merely of imagination. Another would see in the three heads the three Septimians, Severus and his sons Caracalla and Geta. This
would find a place for the eight under-wings, as that is exactly the number of emperors between Domitian and Severus, if one neglects the short reign of Didius Julianus. The destruction of "the two under wings that thought to have reigned" (24[1] Esd 11 31) would be fulfilled in the defeat and death of Pescennius Niger and Clodius Albinus. The fact that it is the right-hand head that devours the head to the left fits the murder of Geta the younger son, by Caracalla, the elder. Against this view is the fact that the book is quoted by Clemens Alexandrinus. Further, the eight under-wings are said to be king by whose names shall be small, and their number is 800" (24[1] Esd 12 22). Though it might be said of Nerva, it could not be affirmed of Trajan, Hadrian, Antoninus Pius or Marcus Aurelius. We are thus restricted to the view which maintains that the three heads are the three Flavii. The twelve wings are the first emperors, beginning with Julius Caesar. The reign of Augustus is longer than any of the monarchs that succeeded him, and it is noted that the second wing was to have that distinction (24[1] Esd 12 15). The date then may be placed between the deaths of Titus and that of Domitian—that is, from 81 to 96. The Lion who rebukes the Eagle for his unrighteousness is the Messiah—the Christ—in His second coming, when He shall come in the glory of His kingdom. The Lion fails to do duty for the Son of the Master; hence He is spoken of as "kept unto the end of days" (2 Esd 12 32). Such are the Apocalypses, strictly speaking.

II. Legendary Works.—The Book of Jubilæus is the only one which survives of this class of composition. The portion of Asc Isa which contains the book of the account of his martyrdom has much of this character. It, however, has been conjoined to the Apocalyptic "Ascension." It would seem that in some copies of the Asm M was added to this work as a supplement. It is frequently cited as lepto Genesis—sometimes leptongenesis, and again microgenesis, "the little Genesis." This title cannot be meant to refer to its actual size, for it is considerably larger than the canonical book. It may either mean that this book is to be less regarded than the canonical Genesis, or that it is taken up with lepto—"minute." Another, and possibly more plausible explanation is to say that Heb does not refer to an entire hexaplaric book known as Bre'ëshith Rabba', in which the whole of Gen is expanded by Midrashic additions, amplifications and explanations, to many times the size of the work before us, which, in comparison, would be "short." The main difficulty is that the Jewish work, B. Rabbah, cannot well be dated earlier than 300 AD. We owe the work before us mainly—in its complete form—like so many others, to its inclusion in the canon of the Ethiopic church. Portions of it in Lat and Syr have been found in the second main source of apocalyptic lit. in recent times, the Ambrosian Library of Milan. There have been several editions of the Ethiopic text.

(1) Summary.—It is difficult to give anything like a summary of the Book of Jubilæus in the ordinary sense of the word. Roughly speaking, the canonical Book of Gen is the summary. The writer has omitted many features and incidents, but these have been more than compensated for by additions and explanations. At least the three revisions have an apologetic aim. The acts of deception of which Abraham was guilty in Egypt and toward Abimelech in regard to Sarah, the similar act of Isaac, would involve matters difficult to palliate. The writer entraped the Shechemites into being circumcised and then took advantage of their condition to murder them, is omitted also.

Jacob's devices to increase his flocks at Laban's expense are also passed over in silence. The most marked omission is the blessing of Jacob in Gen 48. This is to be explained by the way the writer has praised Simeon and Levi earlier, where Jacob's denunciation of them flatly contradicts. Many of the additions have a similar apologetic intention, as in the statement that "then" was twelve years old at the time of the rape, the presents Jacob gave to his parents four times a year, etc. When Jacob deceives his father, he does not say he is Esau, but only "I am thy son." There are longer additions, chiefly ceremonial. Two incidents narrated at length are the warfare of the Pentateuch and Jacob (34 1-9), and the war of Esau (37 and 38).

(2) Structure.—The most marked characteristic of the book is that from which it has its most common name, "The Book of Jubilæus," the dating of events by successive Jubilæus. The whole history of the world is set in a framework of Jubilæus and every event is dated by the Jubilee of the world's history in which it had occurred, and the year-week of that Jubilee and the year of that week. The writer has carried his secondary scheme into every detail and made the days in it, as did the writer of one of the En books, a multiple of seven, 364 x 7 x 52 days. It does not seem to have been interpolated.

(3) Language.—Like so many more of the pseu- dopigrapha, from Modena continue, the main explanation of the Master; hence he is spoken of as "kept unto the end of days" (2 Esd 12 32). Such are the Apocalypses, strictly speaking. The Book of Jubilæus is the only one which survives of this class of composition. The portion of Asc Isa which contains the book of the account of his martyrdom has much of this character. It, however, has been conjoined to the Apocalyptic "Ascension." It would seem that in some copies of the Asm M was added to this work as a supplement. It is frequently cited as lepto Genesis—sometimes leptongenesis, and again microgenesis, "the little Genesis." This title cannot be meant to refer to its actual size, for it is considerably larger than the canonical book. It may either mean that this book is to be less regarded than the canonical Genesis, or that it is taken up with lepto—"minute." Another, and possibly more plausible explanation is to say that Heb does not refer to an entire hexaplaric book known as Bre'ëshith Rabba', in which the whole of Gen is expanded by Midrashic additions, amplifications and explanations, to many times the size of the work before us, which, in comparison, would be "short." The main difficulty is that the Jewish work, B. Rabbah, cannot well be dated earlier than 300 AD. We owe the work before us mainly—in its complete form—like so many others, to its inclusion in the canon of the Ethiopic church. Portions of it in Lat and Syr have been found in the second main source of apocalyptic lit. in recent times, the Ambrosian Library of Milan. There have been several editions of the Ethiopic text.

(1) Summary.—It is difficult to give anything like a summary of the Book of Jubilæus in the ordinary sense of the word. Roughly speaking, the canonical Book of Gen is the summary. The writer has omitted many features and incidents, but these have been more than compensated for by additions and explanations. At least the three revisions have an apologetic aim. The acts of deception of which Abraham was guilty in Egypt and toward Abimelech in regard to Sarah, the similar act of Isaac, would involve matters difficult to palliate. The writer entraped the Shechemites into being circumcised and then took advantage of their condition to murder them, is omitted also.

Jacob's devices to increase his flocks at Laban's expense are also passed over in silence. The most marked omission is the blessing of Jacob in Gen 48. This is to be explained by the way the writer has praised Simeon and Levi earlier, where Jacob's denunciation of them flatly contradicts. Many of the additions have a similar apologetic intention, as in the statement that "then" was twelve years old at the time of the rape, the presents Jacob gave to his parents four times a year, etc. When Jacob deceives his father, he does not say he is Esau, but only "I am thy son." There are longer additions, chiefly ceremonial. Two incidents narrated at length are the warfare of the Pentateuch and Jacob (34 1-9), and the war of Esau (37 and 38).
This date would explain the hatred of Edom. We therefore would place it about the death of Herod—from 3 BC to 6 AD.

Unlike the other books of this class, much of it has been found in the Talm; hence, though we still think the author to have been an Essene, we think that he had much sympathy with the Phari-
sical school in its latest development.

III. Psalitic Pseudepigrapha. — The Ps Sol is the one of all the pseudepigrapha which seems to have hovered most nearly on the border of deuto-canonicity. Even of Solomon 4 Esd, as not being found in Gr, it has been an exception, as it was never admitted into the canon of Alex-
andria. The famous Codex Alexandrinus, as its table of contents proves, originally contained the book before us. In several catalogues of books that were acknowledged, by some at least, to be authoritative, it is named—sometimes to be de-
clared uncanonical. Like so many other books—Jewish and Christian—during the Middle Ages, it sank into oblivion. A MS of it was first noticed by Heschel the librarian in the Library at Augsburg, in the beginning of the 17th cent., and published by de la Cerda in 1626. This MS has since been lost. More recently, four other Gr MSS have been brought to light. From these, with the assistance of the Hebrew, it has been pub-
lished. The name given to it, “The Psalter of Solomon,” seems purely gratuitous; the writer makes no claim, direct or indirect, to be the Son of David.

(1) Summary.—The present collection consists of 18 ps closely modeled as to line of thought and diction on the canonical Ps. The first ps announces the declaration of war, but is occupied with the denunciation of hypocrites. The second describes a siege of Jerus and acknowledges that the distresses of the siege have been deserved, but ends by the description of the death of the besieger on the coast of Egypt. The third ps is one of thanksgiving on the part of the righteous. In the fourth we have the description and denunciation of a hypocrite in terms which suggest strongly Our Lord’s words against the Pharisees. It is evidently directed against a prominent individual member of the San-
hedrin. On the generally received date, Antipater may be taken as the prominent individual. In the Psalms we find a prayer for mercy from God and an appeal to His loving-kindness. The sixth is occupied with a description of the blessedness of the righteous. The short ps which follows is a prayer of Israel under chastisement, interating God not to remove His tabernacle from their midst. The eighth ps de-
scribes the siege of the temple and denounces the sins of the inhabitants of Jerus, which had brought the Smir from afar against them, and a prayer for restoration to favor. Israel, a captive, prays to God for forgiveness in the ninth ps. In the tenth we have the blessedness of the man who submits to the chastening of the Lord. The theme of the ele-
venth is the return of the captives. The idea of the following ps is not unlike the middle stanza of Ps 120 of the canonical Psalter. The next has as its theme the blessedness of the righteous and the evil estate of the wicked. The fourteenth is a similar subject. The next begins with the sentiment so frequent in the canonical Ps: “When I was in trouble I called upon the Lord.” The ps which follows is experimental in the sense of the old Puritans. The seventeenth ps is the most im-
portant, as it is Messianic, and exhibits the hopes pre-

duced by the first Ps Sol. The eighteenth ps is the one written. The eighteenth gives a description of the blessedness of the return of the Jews to Divine favor. Messrs. Ryle and James would divide this ps into two, as there seems to be a conclusion at the tenth verse with the sign diaspeudma. Moreover, a slightly different theme is introduced at this point, but there is no reference in the Ps Sol to the events of the 19th ps, and this is not the one implied. It seems to be some probability that a Lat tr once existed from references, though few, in the Lat Fathers; but no MS of it has yet been discovered. A Syr tr has been discovered by Dr. M. E. Harris along with a number of other pss also attributed to Solo-
mon, which he has called “Odes.” Of these more will be said below.

(2) Language.—That the Gr of these pss is a tr from the Heb may be proved by what seems to have been errors in translation, as tof eipen, “to say,” where the sense implies “to destroy,” from the double meaning of dabbah, “to say,” and later “to destroy”; hēs enikē, “all he conquered,” where the meaning must be “forever” or “continu-
ously,” equivalent to ‘adh, lā-negah, which might be taken as in Aram, and tr as in the Gr. Further, the general character, the frequent occurrence of en in senses strained in Gr but suitting thoroughly the Heb preposition ʾa, the omission of the substan-
tive verb, the general simplicity in the structure of the sentences, serve to confirm this. For fuller elucidation the reader is directed to Ryle and James ed of this book (lviii–lxxiv). Hilgenfeld has urged some arguments for the Gr of these pss being the origi-
nal language. These really prove that the trans-
lator was very much influenced in making his translation by the LXX version of the canonical Psalter.

(3) Date.—While Ewald would place it back in the time of Epiphanes, if not even earlier, and Movers and Delitzsch would place it about the time of Herod, the description of the siege does not suit any siege but that of Pompey. Still more the death of the proud oppressor who besieged the Temple suits down to the minutest detail the death of Pompey, and suits that of no other. This is the opinion of Langen, Hilgenfeld, Drummond, Stanton, Schütz, Ryle and James. The ps, however, were written at various dates between 94 BC, the year preceding the Pompeian siege, and the death of Pompey 46 BC. The common critical idea is that it is the Psalter of the Pharisees. The singular thing is that though the writer reverences the Temple, he describes it as if he were going to remove it.

(4) Chrystalog.—The main interest of this pseudepigrapha is its Christology, which is princi-

pally to be seen in the 17th ps. The Messiah is to be the seed of David: He is to come on the down-
fall of the Asmoneans, to overthrow the Romans in turn. He is to gather the dispersed of Israel, and is to subject the Gentiles to His rule. The character of this rule is to be spiritual, holy, wise and just. All these features indicate a preparation for the coming of Him who fulfilled the expectation of the Jews in a way which they had so little dreamed of.

The students of Gnosticism in pursuing the Pista Sophia, one of the few literary remains left us by those bizarre heresies, found repeated quotations from the Ps Sol, not one of which was to be found in the canonical collection. There was one numberd reference, but it was to the 19th psalm, whereas only eighteen were known to exist. Lactantius has a quotation from the Ps Sol which, like those in Pista Sophia, has no place in the “eighteen.” When the above are added, there are more Solomonic writings that were called Psalms than those ordinarily known. In the beginning of 1909 the learned world was startled by the in-
formation that Dr. Rendel Harris had found on his shelves the missing Ps Sol in a Syr. tr. The MS was defective both at the beginning and end, but there was, after all, little missing of the whole book. The title of the MS begins: "Thee Psalms ascribed to Solomon, and arranged"; it ends with the New Psalms, or, to give them Dr. Harris' title, "Odes," which are followed by those till now known.

(1) Relation to *Pistis Sophia.*—This cannot have been the order of the time when *Pistis Sophia* was published, as the first of these odes is quoted as the 19th. There are forty-two of them. They are the work of a Christian. The doctrine of the Trinity is present; very prominent is the miraculous birth of the Saviour; the descent upon Mary of the Holy Ghost in the form of a dove; the crucifixion, and the descent into Hades; and, though less clearly, the resurrection. One striking thing is the resemblance of the account of the virgin birth to that we find in the Ase Isa.

(2) Date.—Dr. Rendel Harris dates these Christian odes in the last quarter of the 1st cent., and there seems every reason to agree with this. The relation the 19th ps (Ode 37) bears to the Ase Isa is clear to those who think. The Ase Isa seems the more primitive.

IV. Testaments.—Although, strictly speaking, Jewish law had no place for "testamentary dispositions" by those about to die—"the portion of goods" to be given to his heir or "counsel"—and "the dying exhortations of Jacob addressed to his sons, the farewell song of Moses, David's deathbed solomons, were of the nature of spiritual legacies. Under Gr and Rom law testaments were the regular way of arranging heritages; with the thing the name was transferred, as in the Mish. Bābhd Baḥavr 15 26 f, הַנַּבְּרֶד לַּא לְדוֹגִיתָה, dagytiko, also in Syr. The idea of these pseudographa is clearly not drawn from the "Last Will and Testament," but the dying exhortations above referred to.

Gen 49 in which Jacob addresses his sons gathered round his dying bed furnished the model for a number of pseudographic writings.

1. The Testament of the Twelve Patriarchs of these the longest known is XI 11 f. Is of Jacob following his father's example and assembling his descendants in order that he might give his dying charge. While Jacob addressed each of his sons separately, the sons of Joseph, became at all prominent; so in the case of the sons of Jacob they each address their descendants as a whole. These Testaments are occupied with moral advices mainly. The sin most warned against is incontinence.

(1) Summary.—(a) Reuben: The first Patriarch whose Testament is given is Reuben. While he bewails the sin that deprived him of his birthright, he gives an account of the various propensities that tend to sin, and accommodates each child to "the case" not with an evil spirit—spirits of deceit. He gives details of his sin, which, resembling those given in the Book of Jub, differs in an apologetic direction. This apologetic effort is carried farther in the Targ of the pseudo-Jonathan. In it Reuben is declared to have disordered the bed of Bilhah because it was put beside his mother's, and he was accused of impunity with her; but the Spirit revealed to Jacob that he was not guilty.

(b) Simeon: The next Testament is that of Simeon. The case that seems to have most affected Jacob, if we may judge by Gen 49 5-7, was the murder of the Shechemites by Simeon and Levi. That, however, is not touched upon in the Testament; his envy of Joseph is what he most regrets of. A stanza, however, is inserted, warning against fortitude (ver 3).

(c) Levi: The Testament of Levi follows. It is mainly apocalyptic. The murder of the Shechemites is regarded as a wholly estimable action, and is commended by God. The treachery of the cir- cutes is ascribed to the sons of Levi; but when he was admitted in dream to the third heaven. In another vision he is clothed with the garments of the priesthood. After a piece of autobiography followed by general admonitions Levi tells what he had learned from the writing of Enoch. He tells how his descendants will fall away and become corrupt. It is to be noted that fornication becomes very prominent in the picture of the future. The destruction of Jerus is foretold, and the captivity of Judah among all nations. This cannot refer to the setting up of the "Abomination of Desolation" by Epiphanes. The Temple was not laid waste, although it was desecrated; and there did not follow on the desecration by Epiphanes the scattering of the Jews unto all nations. It seems necessary to understand by this wasting the capture of Jerus by Titus. Consequently, the new priest of ch 18 seems to us the priest "after the order of Melechizedek" according to the NT interpretation.

(d) Judah: The Testament of Judah is to our thinking, the Ase Isa seems the more primitive.

(e) Issachar: The Testament of Issachar is much shorter than either of the two preceding ones. After telling the story of the mandrakes, he dwells on husbandry. As is noted by Dr. Charles, this is at variance with the rabbinic representation of the characteristics of the tribe. He, too, denounces impurity and drunkenness.

(f) Zebulun: Zebulun's Testament is little longer than that of Issachar. The Testament is greatly occupied with the history of the sale of Joseph in which Zebulun protests he took only the smallest share and got none of the price.

(g) Dan: The Testament of Dan also is short. He confesses his rage against Joseph, and so warns against anger. Here also are warnings against whoredom. The Messiah is to spring from Judah and Levi. Dr. Charles thinks the first of these was not in the original, because it would not naturally have been called "the Messiah." The last is somewhat hasty, as in 1 K 12 23 (LXX) we have the precisely similar construction próσ πάντα ὀκὼν Τόδα καὶ Βεναδομ. a sentence which represents the construction of the Heb. In this there is a Messianic passage which describes whose Testament as delivering the captives of Beliar.

(h) Naphtali: The Testament that follows, that of Naphtali, has apocalyptic elements in it. It opens with the genealogy of Bilhah, his mother, whose father is said to be Becher. But both of his visions is somewhat hasty, as in 1 K 12 23 (LXX) we have the precisely similar construction próσ πάντα ὀκὼν Τόδα καὶ Βεναδομ. a sentence which represents the construction of the Heb. In this there is a Messianic passage which describes the Messiah as delivering the captives of Beliar. The young man with the twelve palm branches seems to be a reference to the Apostles. Joseph seizes a bull and rides on it. He has a further dream in which he sees a star whose brethren being separated. Again there is a reference to the recurrent theme of sexual relation (ch 8).
(i) Gad: The subject of the Testament of Gad is hatred. Gad is associated with Simeon as being most filled with wrath against Joseph. It is the Asher of the Apocalypse, the Levite engaged in the work of righteousness, as the apostle James does in his epistle.

(ii) Joseph: One of the most important of these Testaments is that of Joseph. The opening is occupied with a prolonged description of the temptation of Joseph by Potiphar’s wife. There is in that connection the unhealthy dwelling on sexual matters which is found in monkish writers. There are not a few resemblances to the language of the Gospel. In Joseph (12:8) there is a more important passage (19:8): “And I saw that from Judah was born a virgin wearing a linen garment, and from her was born a lamb, and on his left hand there was, as it were, a lion: and all the beasts rushed against him, and the lamb overcame them, and destroyed them, and trod them under foot.” This to us is clearly Christian. Dr. Charles, without apocalyptic evidence to support him, would amend it and change the reading.

(iii) Benjamin: The Testament of Benjamin is very much an appendix to that of Joseph. It opens with the account Joseph gave Benjamin of how he was sold to the Ishmaelites. He exhorts his descendants against deceit, but, as all his brethren, he瞧es them against fornication. There is a long Christian passage which certainly seems an interpolation, as it is not found in some of the texts, though others have all vs. The text concerning Paul (11:1.2) appears in varying forms in all VSS. The interpolation of Testaments which have been interpolated is proved by the variations in the different texts. Dr. Charles has, however, gone much farther, and wherever there is a Christian clause has declared it an obvious interpolation. For our part, we would admit as a rule those passages to be genuine that are present in all the forms of the text. The text first of all, so to say, recent times edited by Grossetete, bishop of Lincoln, in the 13th cent. Since then other MSS have been found, and a Slavonic and an Aram. version. We are thus able to check the interpolations. In essence the Christian passage in T Jos is found in all versions.

(3) Language.—Dr. Charles makes a very strong case for Heb being the original language. His numerous arguments are not all of equal value. While some of the alleged Hebraistic constructions may actually be so, not a few may be explained by imitation of the language of the LXX. As an example of the first, of T Jud (7:3): הַיָּדוֹן הָאֲבָלִים, “a numerous host,” on the other hand T Reub 3:8: “understanding in the Law,” is a turn of expression that might quite well be common among Gr-speaking Jews. Of passages that are only explicable by retranslation, as in T Jos 11:7: “God . . . increased him in gold and silver and in work,” this last turn is evidently due to the translator’s rendering דֹּבֱעַדָּה, “servant,” as if it were דֹּבֱעַדָּה, “work.” On the whole, we are prepared to amend the decision elsewhere, and admit that the probability is that this book, like so many more of the same class, has been translated from Heb.

(4) Date and authorship.—Dr. Charles declares the author to have been a Pharisee who wrote in the early part of the reign of John Hyrcanus I. The initial difficulty with this, as with the other pseudo-pigrapha in attributing a Pharisaic authorship, is the preservation of the book among the Christian community. The occurrence of names and things of the Jews. The only sect of the Jews that survived the destruction of Jerusalem was that of the Pharisees. The Sadducees, who were more a political than a religious party, disappeared with the cessation of the Jewish state. When Judaism became merely a religion—a church—not a nation, their function as the third stone was done. They were disappeared, but did so into the Christian church. If the writer had been an Essene, as we suppose he was, the preservation of this writing by the Christians is easily explicable. If it were the work of a Pharisee, its disappearance from the literature of the synagogue is as inexplicable as its preservation by the Christians. The constant harping on the sin of fornication—in T Naph 8:8 even marital intercourse is looked at askance—indicates a state of mind suited to the Essenes. The date preferred by Dr. Charles, if the author is a Pharisee, appears to us impossible. The Pharisees had, long before the final break, been out of sympathy with the Maccabees. The Chasidim deserted Judas Maccabaeus at Elasra, not improbably in consequence of the alliance he had made with the heathen Romans, and perhaps also his assumption of the high-priesthood. Further, the temple was laid waste and the people driven into captivity unto all nations (T Lev 15.4). This does not suit the desecration of the temple under Epiphanes. During that time the temple was not laid waste. The orgies of the worship of Bacchus and of Jupiter Olympius disdained it, but that is a different thing from its being laid waste. Going unto all nations did not take place then. Some were taken captive and enslaved, but this was not general. The description would only apply to destruction of the temple by Titus and the enslaving and captivity of most of the inhabitants of Jerusalem. The “New Priest” cannot refer to the Maccabees, for they were Aaronites as much as Alcimus or Onias, though not of the high-priestly family. This change of the priesthood only has point if it refers to the priesthood of Christ as in He 7:12. If Dr. Charles is right in maintaining that 2 Macc in its account of Menelaus is to be preferred to Jos, the change of the priesthood was not unprecedented, for Menelaus was a Benjamite, not a Levite. Yet 1 Macc. takes no notice of this enormity. Further, there are the numerous passages that are directly and indirectly Christian. Dr. Charles certainly marks them all as interpolations, but he gives no reason in most of the cases for so doing so. The mere omission of the visible not dislocate the narrative arises from the simpler construction of Sem narrative, and is therefore not to be regarded as conclusive evidence of interpolation. The reference to Paul in T Ben 11, occurring in all the sources, although with variations, also points to a post-Christian origin. For these reasons, we would venture to differ from Dr. Charles and regard the XII P as post-Christian, and to be dated in the first quarter of the 2d cent. AD.

(5) Relation to other books.—From the decision we have reached in regard to the date of these Testaments, it follows that all the many resemblances which have been noted between them and the books of the NT are due to imitation on the part of the Testaments, not the reverse. A case in point is T Jos 1:6 where the resemblance to Mt. 26:31–36 is close; only, whereas in the Gospel the judge approves of the righteous on account of their visiting the sick and the imprisoned, and condemns the wicked because they did not do so, in T Jos God ministers to His servants. The Testament is really an imitation of the passage in the Gospel. The direct visiting of the afflicted, whatever the form of the affliction, was a thing of everyday occurrence. The doing of the Almighty doing so is the result of a bold metaphor. The turn of the Gospel narrative might not unnaturally think of God’s dealings with the saints in terms drawn from Apocalyptic Lit. THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA 176
Our Lord's description of the Last Judgment. In T Naph p 2 the figure of the potter and the clay is, as in chs 9-21, applied to God's power over His creatures. The passage in the T Naph is expanded, and has not the close intimate connection with the argument that the Pauline passage has. While none of the other resemblances give one any great aid in the main, these instances of the clay tell us how the others: with them. We may thus regard the resemblances to the NT in XII P as due to the latter's copying of the former.

The Testament of Adam survives merely in a group of fragments published first by Renan in the Jour. de litt. 1899, 447. A Gr fragment was published by M. R. James. With ch 9 A Or fragment.

2. The Testament of Adam gives an account of the adoration offered by all the different classes of God's creatures. More strictly of the nature of a Testament is a Syr fragment entitled "More of Adam Our Father." It contains a prophecy of the incarnation, and appears to be of late date. It was used by the Scholastics.

The Testament of Abraham is a late document. It opens with representing Abraham at his tent-door. One recension declares his age then to be 995 years. Michael comes to him. The purpose for which Michael has been sent is to reveal to Abraham that he must die. He hesitates to do this. When, however, the fatal message is revealed, Abraham will not yield up his spirit at first. He is after a while persuaded, and as a reward, before his death he has a revelation: there is given to him a vision of the whole world in the widest sense—the world of spirits as well. Seeing a soul, which, weighed in the balance, is nearly being found wanting, by his intercession the soul is admitted to Paradise. There are several traces of Christian influence; many of the thoughts and phrases are similar to those to be found in the Gospels. At the same time, although to one who had read John's Gospel the statement of Our Lord that Abraham had seen His day "and was glad" (John 8 55-56) would inevitably have led a Christian writer to have exhibited Abraham as seeing in vision the day of Christ. The writer's failure to do so seems to show that he was not a Christian. The echoes of the Gospel in the Apocryphal work are those of thatapocryphal Christian mark is to be explained if we regard the translator as a Christian, while the original Midr is the work of a Jew. The language was probably Aram. There are two Gr recensions, one, long, and the other, abbreviated, of which the latter is probably a direct from Aram. As there is no reference to the coming of Christ, this Testament is probably pre-Christian. The text may be dated early in the 2nd cent., as Origen knew it.

In Gr, there is a MS of the Testaments of Isaac and Jacob. They are late and Christian. The latter is founded on the last ch of Gen.

More interesting is the Testament of Job published in Anecdota Apocrypha by M. R. James in 1897. It purports to be an account of his suffering related by Job himself. It appears to be the work of a Jew, tr1b by a Christian. The position of Satan in the Midr is not so subordinated as in the drama of Eliphaz, when not confused with that of Eliphaz, is regarded as inspired by Satan.

(1) Summary.—It begins with Job, "who is called Jobah," summoning his seven sons and three daughters. The list of Job's sons forms the singular exception of names, most probably of Sem origin. Most of them are certainly Gr words, though not Gr proper names—Chards and Nikis, "dances" and "victory," Hmyn, "of pigs," Phoros, "tribute." The other names are Teres, Phiphi, Phravu. While none of the other resemblances give any great aid in the main, these instances of the clay tell us how the others: with them. We may thus regard the resemblances to the NT in XII P as due to the latter's copying of the former.

2. The Testament of Adam gives an account of the adoration offered by all the different classes of God's creatures. More strictly of the nature of a Testament is a Syr fragment entitled "More of Adam Our Father." It contains a prophecy of the incarnation, and appears to be of late date. It was used by the Scholastics.

We may thus regard the resemblances to the NT in XII P as due to the latter's copying of the former.

have been invented. As we have seen, they are not Gr. names, but are probably really Hellenized "Yehudim of some Sem. appellations. At the same time, they do not seem to be Heb., but rather Arab. It would seem to have been tr by one familiar with the NT.

(4) Date and authorship. — It has no direct references to Christian doctrines or the facts of Christian history. This is conclusive against its having a Christian origin. The reason that would lead a Christian to compose such a document would be to give a further prophecy for evidence for the mission of his Master. He would have no object in making do with the destruction of Israel, unless he were himself. Dr. James thinks the writer to have been a Jewish Christian of the 2d cent. resident in Egypt. By the 2d cent. few Jews passed from Judaism to the faith of Jesus: the break between church and synagogue was a serious one. The writer of Job made king of all Egypt (ch 28) may indicate some relationship to that country, as if the writer had identified Job with Psammecotes, the Egypt king overthrown by Cambyses. This, however, may have been due to a mistaken translation. If the original language were Sem.-Arab. or Hebrew, it is probable that the author wrote in Pal. There are no direct signs to indicate the date. There is no appearance of knowledge of Rome. The fire of the opposition to it has died down. It may have been written in the reign of Alexander.

V. The Sibylline Oracles. — The burning of the Capitol (83 BC) and the destruction of the famous Sibylline books led Sulla to search in Italy and Greece for those that might replace the contents of the vola which had been burnt. About half a cent. later Augustus revived the search for Oracles. Such a demand would naturally produce a supply. It would seem that certain Jews of Alexandria, eager to propagate the faith of their fathers, invented vs in the shape in which these Oracles had been preserved, as we learn from Herodotus — i.e. in hexameters and in the epic dialect in which Homer and Hesiod had written. Those in Herodotu s are mainly from the Oracle of Delphi. From Pausanias, who quotes several of them, we learn that the Oracles attributed to the various Sibyls were delivered in a similar style. Hence these Jewish writings must have been written in Greek. In later times the industry was pursued with even greater zeal by Christians. These have been collected into several books — some 15 are named — of which some have been lost. The books are made up of fragmentary different ages. The first book begins with the creation, and narrates the history of the race to the flood and the going out of Noah from the ark. Then the history of Our Lord is given succinctly, the miracle of the loaves, the crucifixion, and the resurrection of Jesus. In it, Hosea is derived from "Adam." Reference is made to the sin of the watchers, as in En, and an arithmetic is given which seems to be fulfilled in Théo Sáthe. The second book is modeled largely on Our Lord's eschatological discourses, may passages bearing a distinct echo of it. It may be noted that the four archangels of the Book of En — Michael, Gabriel, Raphael and Uriel — are introduced. The third is by much the longest, but it is a confused mass of fragments, where are early reference to the conquest of Egypt by Rome; the building of the tower of Babylon, the siege of Troy, the conquest of Alexander and many other events appear. The fourth book is Christian throughout. After praise to the Christians, there is a sketch of the history of the beginning of the empire, the Assyrians and ending with Alexander; then an account of Nero appearing from the east and doing evil fills the end of all things. The fifth book begins with an account of the successive emperors from Julius Caesar to the Antonines. Then a new song begins, clothed with Egyptian revolutionary imagery, referring to Xerxes crossing the Hellespont, the impurities of Rome, and ending with Egypt and the burning up of all things. The sixth is short — 28 lines in praise of the Cross; and the seventh is fragmentary. In the eighth is the archimagery and acrostic of "APOCYPHTOC DEOTYIOGOTHP CTAPOC, Iesous christóth theob hudie soter stauros.

The remaining books have similar characteristics. The place of composition is evidently Egypt, as, whatever the immediate context may be, the writer gravitates to Egypt; and the authors are Jews or Jewish Christians. The dates of the various fragments of which this collection is composed fall between the first triumvirate and the age of Diocletian.

VI. Conclusion. — There are many points in which the theology of the Apocalyptic prepared the way for that of Christianity. These, however, are more naturally taken up under their special headings. Angelology is much more developed in certain apocalyptic writings than it is in Christianity, if we except the writings published under the name of Jesus; and the Apocalyptic mission is quite as much as a prophetic one in the end, the last judgment, the punishment of the wicked and the reward of the righteous. What we have just said applies mainly to the strictly Jewish and pre-Christian Apocalypses. In the Christian Jewish Apocalypses the place the incarnation and the miraculous birth hold is worthy of special note. The representation in regard to the latter of these subjects is independent of the gospel narrative. Connected with this independence of the written Scriptures are the variations these writings introduce. The Apocalyptic is due to apologetic reasons, not a few to the desire to enhance the national glory. The reverence for the letter of Scripture, so markedly characteristic of the rabbinic teachings found in the Talm, is not found in the apocalyptic writings. Apocalyptic thus presents a stage in the doctrine of Scripture.

LITERATURE. — On Apocalyptic generally: Deane, Pseudopigrapha; Demarch, Histoire de la Palestine; Drummond, Jewish Messiah; Ewald, History of Israel, tr V; Grätz, Geschichte der Juden, III; Hilgenfeld, Messias Jüdischer; Jüdische Apokalypstk; Katzsch, Die Apokryphen und Pseudepigraphen des Alten Testaments; Langen, Palastina zur Zeit Christi; Renan, Histoire du Peuple de Dieu, Sibyll, Judaet, Jewish Messiah; Smith, Jewish and Christian Messiah; Thomson, Books Which Influenced Our Lord. On special books: Enoch (Text, English); Pseudo-Jonathan, Dillmann, Furst; Enoch: Laurence, Schodde, Charles. Slavonic Book of Enoch: Matthi, Eichorn (Text, Syriac, and English); Charles, The Assumption of Moses (Text, Latin); Charles, The Ascension of Isaiah (Text, English); Laurence, Dillmann (English); Charles, Fourth Book of Esdras (Text, Latin); Vulg. (English); Apoc RV Book of Jubilees (Text, English); Dillmann, Charles (English); Schodde, Charles. Book of Solomon: Gness; Pick, Ryle and James; (English); Whiston, Pick, Ryle and James. Book of Bel: Rendel Harris (English); Solomon (English); Rendel Harris, Testaments of the Patriarchs (Text, Greek); Skinner, Charles; (English); Skinner, Chrestomathia, Jews and Studies; Sibylline Oracles (Text): Alexandre, Razh.

2. Classification of Books

V. Original Language of the Apocrypha

VI. Date of the Apocryphal Writings

I. Definition.—The word Apocrypha, as usually understood, denotes the collection of religious writings which the LXX and Vulg (with trivial differences) contain in addition to the writings constituting the Old and New Testament canon.

1. "Apocryphal" is not the original or the correct sense of the word, as will be shown, but it is that which it bears almost exclusively in modern speech. In critical works of the present day it is customary to speak of the collection of writings now in view as "the Old Testament Apocrypha," because many of the books at least were written in Heb, the language of the OT, and because all of them are much more closely allied to the OT than to the NT. There is a "New" as well as an "Old" Testament Apoc existing of gospels, epistles, etc. Moreover the adj. "Apocryphal" is also often applied in modern times to what are now generally called "Pseudepigraphical writings," so designated because ascribed in the titles to authors who did not and could not have written them (e.g. Enoch, Abrnam, Moses, etc.).

The persons thus connected with these books are among the most distinguished in the traditions and history of Israel, and there can be no doubt that the object for which such names have been thus used is to give weight and authority to certain writings.

The late Professor E. Kautzsch of Halle edited a German tr. of the Old and New Testament Apocrypha, and of the Pseudepigrapha gentium, containing valuable notes by the best German scholars. Dr. Edgar Hennecke has edited a similar work on the New Testament Apocrypha. Nothing in the English language can be compared with the work edited by Kautzsch and Hennecke in either scholarship or usefulness. (A similar Eng. work to that edited by Kautzsch is now passing through the (Oxford) press, Dr. E. Charles being the editor, the writer of this art. being one of the contributors.)

II. The Name Apocrypha.—The investigation which follows will show that when the word "Apocryphal" was first used in ecclesiastical writings it bore a sense virtually identical with "esoteric"; so that "apocryphal writings" were such as appealed to an inner circle and could not be understood by outsiders. The present connotation of the term did not get fixed until the Protestant Reformation had set in, limiting the Bib. canon to its present dimensions and Protestant churches.

1. Classical.
   (a) The Gr adjective ἀποκρύφως, ἀποκρύφωρος, denotes strictly "hidden," "concealed," of a material object (Eurip. Hec. Fust. 1070). Then it came to signify what is not revealed, secret, reserved, hard to understand (Xen. Mem. 3.5.14). But it never had in classical Gr any other sense.

(2) Hellenistic.—In Hellenistic Gr as represented by the LXX and the NT there is no essential departure from classical usage, in which ἀποκρυφα is employed (Theod.) where the ἀποκρύφα or hidden things are the meanings of Nebuchadnezzar's dream revealed to Daniel though "hidden" from the wise men of Babylon. The word has the same sense in Sir 14:24; 37:3; 43:23; 43:32.

(3) In the NT.—In the NT the word occurs but thrice, viz. Mk 4:22 and the Lk 8:17; Col 2:3.

In the last passage Bishop Lightfoot thought we have in the word ἀποκρύφα (treasures of Christ hidden) an allusion to the vaunted esoteric knowledge of the false teachers, as if Paul meant to say that it is in Christ alone we have true wisdom and knowledge and not in the secret books of these teachers. Assuming this, we have in this verse the first example of ἀποκρύφα in the sense "esoteric." But the evidence is against so early a use of the term in this—soon to be its prevailing sense. Nor does exegetis demand such a meaning here, for no writings of any kind seem intended.

4. Patristic.—In patristic times the early adj. ἀποκρύφα came to be applied to Jewish and Christian writings containing secret knowledge about the future, etc, intelligible only to the small number of disciples who read them and for whom they were believed to be specially revealed.

To this class of writings belong in particular those designated Apocryphal (see Apocryphal Literature), and it will be seen as thus employed that ἀποκρύφα has virtually the meaning of the Gr ἀποκρύφα (esoteric). A brief statement as to the doctrine in early Gr philosophy will be found helpful at this point.

3. Patristic and Jewish "Esoterics."—In ancient Greece distinguished schools of Greek Philosophy, could be taught to all their pupils, etc. and those which could profitably be communicated only to a select circle called the initiated. The two classes of doctrines and rites—generally were marked off by a name designated respectively "esoteric" and "esoteric." Lucian (d. 312; see Vit. Auct. 26) followed by many others referred the distinction to Aristotle, but as modern scholars agree, wrongly, for the Aristotle, as well as many of his followers, denotes popular treatises. The Pythagoreans recognized and observed these two kinds of doctrines and duties and there is good reason for believing that they created a corresponding double lit. though unfortunately no explicit examples of such lit. have come down to us. In the Gr mysteries (Orphic, Dionysiac, Eleusinian, etc) two classes of hearers and readers are implied all through, though it is a pity that more of the lit. bearing on the formation has not been preserved. Among the Buddhists the Samaqa forms a close society open originally to monks or bhikhus admitted only after a most rigid examination; but in later years nuns (bhikshunis) also have been allowed admission though in their case too after careful testing. The Vinaya Pitaka or "Basket of Discipline" contains the rules for entrance and the regulations to be observed after entrance. But this and kindred lit. was and is still held to contain secrets to outsiders. See 2 in the Sacred Books of the East, XI (Rhys Davids and Olendorf).

III. Usage as to Apocrypha.—It must be borne in mind that the word ἀποκρύφα is really a Gr adj. in the neuter pl., denoting strictly "things hidden."
But almost certainly the noun biblia is understood, so that the real implication of the word is "apocryphal books" or "writings." In this article apocrypha will be employed in the sense of this last, and apocryphal as the equivalent of the Gr apokryphos.

Apocryphal literature.—The word apocrypha was first used technically by early Christian writers for the Jewish and Christian writings for the

1. Early
usually
understood as "Apocryphal" (Mazdean) Christian (see APOLYPTICAL LITERATURE). In Usage this sense it takes the place of the classical Gr origin and bears the same general meaning, viz., writings intended for an inner circle and capable of being understood by no others. These writings give intimations regarding the future, the ultimate triumph of the kingdom of God, etc., beyond, it was thought, human discovery and even the ultimate injection of the uninitiated. In this sense Gregory of Nyssa (d. 395; De Ordinis., II, 44) and Epiphanius (d. 403; Haeres, 51 3) speak of the Apocrypha of John as "apocryphal."

Christianity itself has nothing corresponding to the idea of a document for the initiated or a lit. for a select few. The gospel was preached in its first days to the poor and ignorant, and the reading and studying of the sacred Scriptures has been more highly esteemed in the churches (with some exceptions) upon the public at large.

(1) Esoteric literature.—The rise of this conception in the eastern church is easily understood. When devotees of Gr philosophy accepted the Christian faith it was natural for them to look at the new religion through the medias of the old philosophy. Many of them read into the canonical writings mystic meanings, and embodied those meanings in pseudepigraphal books, the last becoming esoteric lit. in themselves: and as in the case of apocryphal writings, this esoteric lit. was more revered than the Bible itself. In a similar way there grew up among the Jews side by side with the written law an oral tradition of the teachings of the rabbis and regarded as more sacred and authoritative than the writings they profess to expound. One may find some analogy in the fact that among many Christians the official lit. of the denomination to which he belongs has more weight than the Bible itself. This movement among Gr Christians was greatly aided by gnostic sects and the esoteric lit. to which they gave rise. These Gnostics had been themselves influenced deeply by docetic mysticism and anloesian lit. Clement of Alexandria (d. 220) distinctly mentions esoteric books belonging to the Zoroastrian (Mazdean) religion.

Oriental and esp. Gr Christianity tended to give to philosophy the place which it had among the western Christianity assign the OT. The preparation for the religion of Jesus was said to be in philosophy much more than in the religion of the OT. It will be remembered that Marcian (d. end of 2d cent. A.D.), Theonas Morgan, the Welsh1800), cedt. (d. 1743) and Friedrich Schleiermacher (d. 1834) taught this very same thing.

Clement of Alexandria (see above) recognized 4(2) Ess (to be hereafter called the Apocalypse of Ezech), the Asm M, etc., as fully canonical. In addition to this he upheld the authority and value of esoterical books, Jewish, Christian, and even heathen. But he is of most importance for our present purpose because he is probably the earliest Gr writer to use the word apokrypha as the equivalent of esoterika, for he describes the esoteric books of Zoroastrism as apokryphal.

But the idea of esoteric religious lit. existed at an earlier time among the Jews, and was borrowed from them by Christians. It is clearly taught in the

Apocryphal Ezech (2 or 4 Ess) ch 14, where it is said that Ezra aided by five amanuenses produced under Divine inspiration 94 sacred books, the writings of Moses and the prophets having been lost when Jerus and the temple were destroyed. Of this large number of sacred books 24 were to be published, the others were to be thrown away, as unworthy, these 24 books representing undoubtedly the books of the Heb OT. The remaining 70 were to be kept for the exclusive use of the "wise among the people": i.e. they were of an esoteric character. Perhaps if a writer of a later age had preserved the word "apokrypha" would have been found as an epithet attached to the 70 books. Our Eng. VSS are made from a Lat original (see 2:4 Ezech or the APOLYPTICAL ESS. Modern scholars agree that in its present form this book arose in the reign of D.81—96 A.D. So that the conception of esoteric lit. existed among the Jews in the 1st cent. of our era, and probably still earlier.

It is significant of the original character of the religion of Israel that no one has been able to point to a Heb word corresponding to esoteric (see below). When among the Jews there arose a lit. of oral tradition it was natural to apply to this last the Gr notion of esoteric, esp. as this class of lit. was more or less confined to the very Jewish circles than the OT Scriptures themselves.

(2) Non-canonical religious books.—The next step in the history of the word "apocrypha" is that by which it came to denote religious books inferior in authority and value to the Scriptures of the OT and NT. This change of attitude toward non-canonical writings took place under the influence of two principles: (1) that no writer could be inspired who lived after the apostolic age; (2) that no writing could be recognized as canonical unless it was accepted as such by the churches in general (in Lat the principle was—quod ubique, quod semper, quod ab omnibus). Now it was felt that many if not most of the religious writings which came in the end of the 2d cent. to be called "apocryphal" in a disparaging sense had their origin among heretical sects like the Gnostics, and that they had never commanded the approval of the great body of the churches. Origen (d. 250) held that we ought to discriminate between books called "apocryphal," some such having to be firmly rejected as teaching what is contrary to the Scriptures. More and more from the end of the 2d cent., the word "apocrypha" came to stand for what was spurious and untrustworthy, as, e.g. for writings ascribed to authors who did not write them: i.e. the so-called "Pseudepigraphical books."

Irenaeus (d. 202) in opposition to Clement of Alexandria states that esoteric writings have any claims to credence or even respect, and he uses the Gr word for "apocryphal" to describe all Jewish and Christian canons. To him, as later to Jerome (d. 420), "canonical" and "apocryphal" were antithetical terms. 1st—2d cent. A.D., Tertullian (d. 230) took the same view: "apocryphal" to him denoted non-canonical. But both Irenaeus and Tertullian meant by apocrypha in particular the apocalyptic writings. During the Nicene period, and even earlier, sacred books were divided by Christian teachers into three classes: (1) books that could be read in church; (2) books that could be read privately, but not in public; (3) books that were not to be read at all. This classification is implied in the writings of Origen, Clement of Alexandria, Athanasius, etc., and in the Muratorian Fragments (about 200 A.D.).

(3) "Spurious" books.—Athanasius, however, restricted the word apocrypha to the third class, thus making the corresponding adj. synonymous with
"spurious." Nicephorus, patriarch of Constantinople (806–15 AD) in his chronography (belonging essentially to 500 AD according to Dr. Zahn) recorded in his sacred books thus: (1) the canonical books of the OT and NT; (2) the Antilegomena of both Testaments; (3) the Apocrypha of both Testaments.

The design of the Apoc of the NT are thus summarized: (1) Enoch; (2) The 12 Patriarchs; (3) The Prayer of Joseph; (4) The Testament of Moses; (5) The Assumption of Moses; (6) Abram; (7) Eldad and Modad; (8) Elijah the Prophet; (9) Zephaniah the Prophet; (10) Zechariah, father of John the Baptist; (11) Baruch, Hezekiel, and Daniel.

The books of the NT Apoc are thus given: (1) The Itinerary of Paul; (2) The Itinerary of Peter; (3) The Itinerary of John; (4) The Itinerary of Thomas; (5) The Gospel according to Thomas; (6) The Teaching of the Apostles (the Didache); (7) and (8) The Two Epistles of Clement; (9) Epistles of Ignatius, Polycarp and Hermas.

The above lists are repeated in the so-called Synopsis of Athanasius. The author of these so-called apocryphal books being unknown, it was sought to gain respect for these writers by tacking onto them well-known names, so that, particularly in the western church, "apocryphal" came to be associated with "heretical." Of the OT lists given above nos. 1, 2, 4, 5 are extant wholly or in part. Nos. 3, 7, 8 and 9 are lost though quoted as genuine by Origen and other eastern Fathers. They are all of them apocalypses designated apocryphal in accordance with early usage.

(4) "List of Sixty."—In the anonymous "List of Sixty," which hails from the 7th cent., we have represented probably the attitude of the eastern church. It divides sacred books into three classes: (a) "apostolic"; (b) "apocryphal" or "pseudepigraphical" sense. The Protestant canon consists of but 57 books it will be seen that in this list books outside our canon are included. (2) Books excluded from the 60, yet of superior authority to those mentioned as apocryphal in the next class. (3) Apocryphal books, the names of which are as follows: (a) Adam; (b) Enoch; (c) Lamech; (d) The 12 Patriarchs; (e) The Prayer of Joseph; (f) Eldad and Modad; (g) The Testament of Moses; (h) The Assumption of Moses; (i) The Apocalypse of Enoch; (j) The Apocalypse of Zechariah; (k) The Apocalypse of Elias; (l) The Assumption of Isaiah; (m) The Apocalypse of Enoch; (n) The Apocalypse of Zephaniah (see no. 9 of the OT Apoc books mentioned in the Chronography of Nicephorus); (o) The Apocalypse of Zechariah; (p) The Apocalypse of James; (q) The Apocalypse of Peter; (r) The Itinerary and Teaching of the Apostles; (s) The Epistles of Barnabas; (t) The Acts of Paul; (u) The Apocalypse of Paul; (v) Didascalia of Clement; (w) Didascalia of Ignatius; (x) Didascalia of Polycarp; (y) Gospel according to Barnabas; (z) Gospel according to Matthew.

The greater number of these books come under the designation "apocryphal" in the early sense of "apocryphal," but by this time the word had taken on a lowering meaning, viz. books not good for even private reading. Yet the fact that these books are mentioned at all show that they were more highly esteemed than heathen and than even heretical Christian writings. The eastern churches down to the present day reject the meaning of "apocryphal" current among Protestants (see definition above), and their Bible includes the OT Apoc, making no distinction between it and the rest of the Bible.

(1) The "Decretum Galasii."—In the western church the word apocrypha and the corresponding adj. had a somewhat different history. In general it may be said that the western church did not adopt the triple division of sacred books prevalent in the eastern church. Yet the Decretum Galasii of the 6th cent. in its definition of the text, the Apoc.

3. Western a triple list which is almost certainly based on Damasus, bishop of Rome, 366 to 384. It is as follows: (1) the canonical books of both Testaments; (2) writings of the Fathers approved by the church; (3) apocryphal books rejected by the church. Then there is added a list of miscellaneous books condemned as heretical, including even the works of Clement of Alexandria, Tertullian, and Lactantius. These works being all branded as "apocryphal." On the other hand Gregory of Nyssa and Epiphanius, both writing in the 4th cent., used the word "apocrypha" in the old sense of apocryphal, i.e. heretical.

(2) Non-canonical books.—Jerome (d. 420) in the Prolologia Galasii (so-called because it was a defence and so resembled a helmed warrior) or preface to his Latin Version of the Bible uses the word "Apoc" in the sense of non-canonical books.

His words are: Quidquid extra hae (i.e. the 22 canonical books) inter Apocrypha ponendum. "Anything outside of these must be placed within the Apocrypha"(when among the Fathers and rabbis the OT is made to contain 22 [not 24] books, Ruth and Lamentations are rejected, yet Commentary on them was followed in this by Rufinus (d. cir 410), etc. Jerome's friend and adversary, as he had been anticipated by Irenaeus. The western church as a whole regarded the NT theory by including the apocryphal books among the canonical writings: but the general custom of western Christians about this time was to make apocryphal mean non-canonical. Yet Augustine (d. 460; De Cielsate Det, XV, 23) explained the use of the term "apocryphal" in connection with books of dubious authorship, and this sense of the word became the prevailing one in the West.

Separation from canonical books.—But it is to the Reformers that we are indebted for the habit of using Apoc for a collection of books appended to the OT and generally up to Reformers 1587 appended to every printed English Bible. Bodenstein of Carlstadt, usually called Carlstadt (d. 1541), an early Reformer, thought the present forms of Sacred Scripture existing in all the first modern scholar to define "Apoc" quite clearly as writings excluded from the canon, whether or not the true authors of the books are known, in this, going back to Jerome's position. This definition of "apocryphal" has since undergone a more and more disapproving sense. Protestantism was in its very essence the religion of a book, and Protestants would be sure to see to it that the sacred volume on which they based their religion, including the reforms they introduced, contained no book but those which in their opinion had the strongest claims to be regarded as authoritative. In the eastern and western churches under the influence of the Or (LXX) and Lat (Vulgo) VSS the books of the Apoc formed an integral part of the canon and were scattered throughout the OT, they being placed generally near books with which they have affinity. Even Protestant Bibles up to 1827 included the Apoc, but as one collection of distinct writings at the end of the OT. It will be seen from what has been said that notwithstanding the favorable attitude toward it of the eastern and western churches, from the earliest times, our Apoc was regarded with more or less suspicion, and the suspicion was strengthened by the continual antagonism toward it. In the Middle Ages, under the influence of Ruchelin (d. 1532)—great scholar and Reformer—Heb came to be studied and the OT read in its original language. The fact that
the Apoc is absent from the Heb canon must have had some influence on the minds of the Reformers. Moreover in the Apoc the Heb texts were incorporated with Protestant principles, as for example the doctrines of prayers for the dead, the intercession of the saints, etc. The Jews in the early Christian cents. had really two Bibles: (1) There was the Heb Bible which does not include the Apoc, and which circulated in Pal and Babylon; (2) there was the Gr version (LXX) used by Gr-speaking Jews everywhere. Until in quite early times, instigated by the use made of it by Christians against themselves, the Jews had indeed this version made the Heb Bible their Bible, thus rejecting the books of the Apoc from their list of canonical writings, and departing from the custom of Christian churches which continued with isolated remembrances to make the Gr OT canon, with which the Vulg agrees almost completely. The statements of the Reformers would agree in extent with that of the Jews and not with that of the Gr and Lat Christians. Notwithstanding the doubt which Ryle (Canon of the OT, 158) cast on it in matters of the external evidence to show that the LXX and therefore the other great Gr VSS included the Apoc from the first onward.

But how comes it to be that the Gr OT is more extensive than the Heb OT? (2) Up to the final destruction of Jer in 71 AD (the temple with its priesthood and ritual was the center of the religious thought and life of the nation). But with the destruction of the sanctuary and the disbanding of its officials it was needful to find some fresh hand- and directing agency and this was found in the collection of sacred writings known by us as the OT. But a national synod held at Jamnia, near Jaffa, in 90 AD, the OT canon was practically not then finally closed, and it is quite certain that the limits of the OT were once and for all fixed, no writings being included except those written in Heb, the latest of these being as old as 100 BC. Now the Jews of the Dispersion spoke and wrote in Gr and they were long after their fellow-countrymen of the homeland had ceased to produce any fresh original lit. What they did produce was explanatory of what had been written and practical use of the Gr Scriptures that of the Jews in Egypt and of those found in other Gr-speaking countries. John Wycliffe (d.1384) puts the Gr canon together at the end of the OT and the same course was taken by Luther (1546) in his great German and by Miles Coverdale (d.1558 and Eng. tr. 1535). It is quite certain that there is no Heb word or expression corresponding exactly to the word “apocrypha” as first used by Christian writers, i.e. in the sense “esoteric”? 5. Hebrew

Words for Apocrypha negative as regards the OT and the Talm. But in the Middle Ages kabbaláth (lit. “tradition”) came to have a closely allied meaning (of our “kabbalistic”).

(1) Do such exist?—Is there in Heb a word or expression denoting “non-canonical,” i.e. having the secondary sense acquired by “apocrypha”? This question does not allow of so decided an answer, and as matter of fact it has been answered in different ways.

Views of Zahn, et al.—Zahn (Gesch. des neusten. Kanons, I, i, 123 ff); Schürer (REP, I, 623); Porter (HDB, I) and others maintain that the Gr word “Apocrypha (Biblia)" is a tr of the Heb ספּארתים; gênāzim, lit. “books stored away.” If this view is the correct one it follows that the distinction of canonical and non-canonical books originated among the Jews, and that the Fathers in using the word apocrypha in this sense were simply copying the Jews substituting Gr words for the Heb equivalent. But there are decisive reasons for rejecting this view.

(3) Reasons for rejection.—(a) The verb gênāz of which the passive part. occurs in the above phrase means “to store away,” “to remove from view”—of things in themselves sacred or precious. It never occurs from the canon.

(b) When employed in reference to sacred books it is only of those recognized as canonical. Thus after copies of the Pent or of other parts of the Heb Bible had, by age and use, become unfit to be read in the home or in the synagogue they were “buried” in the ground or as being too sacred to be burnt or cut up; and the verb denoting this burying is gênāz. But those buried books are without exception canonical.

(c) The Heb phrase in question does not once occur in either the Bab or the Jerus Talm, but only in rabbinical writings of a much later date. The Gr apocrypha cannot therefore be a rendering of the Heb expression. The Heb for books definitely excluded as non-canonical (lit. "outside") or “external books.” The Mish (the text of the Gemara, both making up what we call Talm) or oral law with its additions came to be divided analogously into (1) The Mish proper; (2) the external (iyorám) Mish: in Aram. called Babilon ha'.

What has been said may be summarized:

(1) Among the Protestant churches the word Apoc is used for the books included in the LXX and not found in the Vulg, but absent from the Hebrew Bible.

6. Summary

This restricted sense of the word cannot be traced farther back than the beginning of the Reformation.

(2) In classical and Hellenistic Gr the adj. apokryphos means “hidden” or “obscure,” almost hard to understand (of certain kinds of knowledge).

(3) In early patristic Gr this adj. came into use as a synonym of the classical Gr esoterikos.

(4) In post-reformation Tr. (Eng., Fr., etc.) and in Lat works beginning with Jerome, Gr apokryphos meant non-canonical, implying inferiority in subject-matter to the books in the canon.

(4) By the Protestant Reformers the term “apocrypha” (Gr apokryphos) “books that have been closed” came to stand for what is now called the “OT Apoc.” But this usage is confined to Protestants, since in the eastern church and in the Rom branch of the western church the OT Apoc is as much an integral part of the canon as Genesis or Kings or Psalms or Isaiah.

(5) There are no equivalents in Heb for apokryphos in the sense of either “esoteric” or in that of “non-canonical.”

IV. Contents of the Apocrypha.—The following is a list of the books in the Apoc in the order in which they occur in the Eng. VSS (AV and RV): (1) 1 Esdras; (2) 2 Esdras (to be hereafter called “The Apocryphal Esdras”); (3) Tobit; (4) Judith; (5) The Rest of Esther; (6) The Wisdom of Solomon; (7) Ecclesiasticus (to be hereafter called “Sirach”); (8) Baruch, with the Epistle of Jeremiah; (9) The Song of the Three Holy Children; (10) The History of Susanna; (11) Bel and the Dragon; (12) The Prayer of Manasses; (13) 1 Maccabees; (14) 2 Maccabees.

No. 5 in the above, “Addition to Esther,” as it may be called, consists of the surplusage (107 out
of 270 verses) of the Book of Esther as it occurs in the best MSS of the LXX and Vulg over the text in the Heb Bible. These additions are in the LXX scattered throughout the book and are intelligible in the context thus given them, but not when brought together as they are in the collected Apoc of our Eng. VSS and as they are to some extent in Jerome's Lat. version and the Vulg (see Century Bible, Ezra, Neh and Esther, 294 f.). Nos. 9–11 in the above enumeration are additions made in the Gr LXX and Vulg VSS of Daniel to the book as found in the MT. It will be well to name them "Apoc. of Daniel." The LXX, apart from the writings of the Apoc into an apart collection was due in a large measure to Jerome, who separated many of the apocryphal additions from their original context because he suspected their genuineness. His version included the Vulg, which follows Jerome's version closely.

Though it is generally true that the Apoc is the excess of the Gr LXX and Lat (Jer, Vulg) over the Heb (MT) Bibles, the statement needs qualification, i.e. the Apocryphal Ezra (Eadras), is absent from the LXX, from Jerome's version, and also from Luther's Bible, but it occurs in the Vulg and in the Eng. and other modern VSS of the Apoc. On the other hand 3 and 4 Macc occur in the Gr MSS of the LXX, but the Vulg, following Jerome's version, rejects both as do modern VSS (Eng. etc) of the Apoc. Moreover it has to be pointed out that in the Vulg proper the Prayer of Manasses and 1 (3) Eadras and the Apocryphal Eadras are appended to the NT as apocryphal.

1. Historical.—The books of the Apoc proper may be thus classified: (a) 1 and 2 (i.e. 3) Eadras; (b) 1 and 2 Maccabees; (c) Additions to Daniel (nos. 9–11 in the above list); (d) Additions to Esther; (e) The Books of Baruch; (f) Prayer of Manasses.

2. Legendary.—(a) Book of Baruch (sometimes classed with prophetic books, sometimes with Apocalypses); (b) Tobit; (c) Judith.

3. Apocalyptic.—The Apocryphal Eadras or 2

4. Eadras.

5. Didactic.—(a) The Wisdom of Solomon; (b) Sirach (Ecclesiasticus).

R. H. Charles, our greatest living authority on the Apocryphal and Apocalyptic writings, embraces the following under the heading "Hellenistic Jewish Literature," the rest coming under the heading "Palestinian Jewish Literature" (BT, 11th ed., II, 177): (1) The Additions to Daniel and Esther (2) The Epistle of Jeremy; (3) 2 Macc; (4) The Wisdom of Solomon.

V. Original Languages of the Apocrypha.—The bulk of the Apoc was written originally in the Gr language and existed at the first in that language alone. The following books were however written in Heb: Tobit, Judith, Sirach, Baruch (part probably in Gr), and 1 Macc. In these cases some prefer regarding Aram, as the original language in at least parts of the above books. For detailed information see under the several books.

VI. Date of the Apocryphal Writings.—The question of date as it applies to the separate books of the Apoc will be discussed in connection with the arts, dealing with the several books. But a general statement regarding the extreme limits between which all the books were completed may safely be made. The oldest apocryphal book is Sirach, which in its original Heb form belongs to a period between 190–170 BC. In its present form the best modern scholars agree in fixing it at between 130–120 BC. None of the books can well belong to a date later than 100 AD, though some (2 Esd, etc) may be as late as that. The whole of the Apoc may with more than average certainty be said to have been written some time between 200 BC and 100 AD. It will be seen that it is an inaccurate assumption that the Apoc was in all its parts of later date than the latest parts of the OT. The canonical Book of Daniel and many of the Psalms are of later date than Sirach and 1 Eadras, and there are cogent reasons for giving the canonical Esther a later date than any of the books named and perhaps than Judith as well (see, however, Daniel; Esther). But it is quite certain that by far the greater part of the Apoc is of later date than the OT and this is of utmost importance as reflecting the state of the Jews and the character of their intellectual and religious life at the various periods represented. And in later years much use has been made of it.

LITERATURE.—The Gr text of the Apoc is given in the various editions of the LXX (except the Apocryphal Ezadras not extant in Gr). The best editions of the LXX are those by Tischendorf revised by E. Nestle (1887); and Swete (1890–99 and later editions). Critical editions of the Apoc have been issued by A. Fabrice (Hamburg, 1723–25); Apel (ib 1804) and a valuable edition by O. E. Frischese (Leipzig, 1871) which includes the LXX version of the Apocryphal Ezadras—without the missing fragment. There are several modern translations, for the most being that by E. Kautzsch, containing Introductions, general and special, and valuable indexes by the best German scholars. In English besides the RSV there is the useful Vatcorm ed., edited by C. J. Ball, an Eng. critical edition of the Apoc edited by H. Charles, with introd., notes, is now being printed at Oxford and will be very valuable.

The best commentary is that by O. F. Fritzsche and C. L. W. Grimm, Kutspsel, Eng. Handbuch, 1851–60; but the commentary by Bissel in Lange's Series of Commentaries and the edited by Wace, in the Speaker's Bible Series, are meritorious.

Introduction to the Apoc will be found in the various Bible Dictionaries, e.g. see esp. H. E. Ryle in DB (1893), schurzen (RF), but esp. in the valuable intro to the OT in Dr. by H. B. Swete (1906), HDB (C. F. Porter), and R. H. Charles (Eng. Brit). See also the Einleitungen by König, Brüdel (A. Bertholet has written the part dealing with the Apoc), and Schürer, Geschichte, III. 1898 (Eng. tr., II. 110), where much lit. is specified. For monographs on the several books of the Apoc or discussing special points, see the special articles.

VI. Relationship of Different Acts

VII. Records of Early Christianity

A. General Introduction

I. The Meaning of "Apocryphal"—As applied to early-Christian writings the term "apocryphal" has the secondary and conventional sense of "extra-canonical."
Apocryphal Acts

The International Standard Bible Encyclopaedia

Originally, as the etymology of the word shows (Gr apokrypho = "hide"), it denoted what was hidden or secret. In this sense it meant:

1. Secret

"apocryphal" was, to begin with, a title of honor, being applied to writings used by the initiated in esoteric circles and highly valued by them as containing truths miraculously revealed and kept secret from the outside world. Just as there were writings of this kind among the Jews, so there were in Christian circles, among gnostic sects, apocryphal, which claimed to embody the deeper truths of Christianity, committed as a secret tradition by the risen Christ to His apostles. When the conception of a Catholic church began to take shape, it was inevitable that these secret writings should have been regarded with suspicion and have been ultimately forbidden. Only by so doing was the spirit of division in the church, but because they were favorable to the spread of heretical teaching. By a gradual and intelligible transference of ideas "apocryphal," as applied to secret writings thus discredited by the church, came to have the bad sense of spurious and heretical. In this sense the word is used both by Jerome and Tertullian.

Short of being recognized as false and heretical many books were regarded as unsuitable for reading in public worship, although they might be used for purposes of private edification. Chiefly under the influence of Jerome the term "apocryphal" received an extension of meaning so as to include writings of this kind, stress now being laid on their non-acceptance as authoritative Scriptures by the church, without any suggestion that the ground of non-acceptance lay in their being apocryphal. It is in this wide sense that the word is used when we speak of "Apocryphal Acts." Although the Acts which bear this name had their origin in the most part in circles of heretical tendency, the description of them as "apocryphal" involves no judgment as to the character of their contents, but simply denotes that they are Acts which were excluded from the NT canon because their title or claims to recognition as authoritative and normative writings were not accepted by the Church. This does not limit the scope of our investigation to those Acts which belong to the 2d cent., the Biblical Acts having secured their place as an authoritative scripture by the end of that cent. See further, Apocrypha.

II. General Considerations

Apocryphal Acts purport to give the history of the activity of the apostles in fuller detail than the

1. Romance canonical Acts. The additions to the NT narrative found in them are highly flavored with romance and reveal an extravagant and unhealthy taste for the miraculous. Wonderful tales, the product of an exuberant fancy, often devoid of delicacy of feeling and always out of touch with reality, are freely heaped upon the others. The apostles are no longer conceived as living on the ordinary levels of humanity; their human frailties, to which the canonical writers are not blind, have almost entirely disappeared; they walk through the world as men conversant with the mysteries of heaven and earth and possessed of powers to which no limit can be set. They have the power to heal, to exorcise demons, to raise the dead; and while marvelous deeds of that nature constantly recur, there are other miracles wrought by the apostles, writing in the name of "what we have heard and seen," the battle and non-moral prodigies of the Childhood Gospel of Thomas. A smoked fish is made to swim; a broken statue is made whole by the use of consecrated water; a child of seven months is enabled to talk with a man's voice; animals receive the power of human speech.

The romantic character of the Apocryphal Acts is intensified by the frequent introduction of the supernatural. Angelic messengers appear in vision and in dream; heavenly voices are heard; clouds descend to give the faithful in the hour of danger and lightnings smite their foes; the terrifying forces of Nature, earthquake, wind and fire, strike dismay into the hearts of the ungodly; and martyrs die transfigured in a blaze of unearthly glory. Especially characteristic of these Acts are the appearances of Christ in many forms; now as an old man, now as a comely youth, now as a child; but most frequently in the likeness of this or that apostle. (It is interesting to observe that Origen is familiar with a tradition that Jesus during His earthly life could change His appearance when and how He pleased, and gives that as a reason for the necessity of the traitor's kiss. Cf. also Mk 16 9-12.)

One must not suppose from the foregoing that the Apocryphal Acts with their profusion of romantic and supernatural details were designed merely to exalt the personality of the apostles and to satisfy the prevalent desire for the marvelous. They had a definite practical end in view. They were intended to confirm and popularize a type of Christianity in strong reaction against the world, in which emphasis was laid on the rigid abstinence from sexual relations, asceticism, and the moral requirement. This sexual asceticism is the dominant motif in all the Acts. The "contendings" of the apostles, their trials and their eventual martyrdom are in almost every case due to their preaching the sinfulness of conjugal life and to their success in persuading women to reject the society of their husbands. The Acts are penetrated throughout by the conviction that abstinence from marriage is the supreme condition of entering upon the highest life and of winning heaven. The gospel on its practical side is (to use the succinct expression of the Acts of Paul) "the word of God regarding abstinence and the resurrection."

Besides inculcating an ascetic morality the Apocryphal Acts transmitted by the false church for the propagation of dogmatic heresy. All of them with

4. Heretical the exception of the Acts of Paul

Teaching represent a docetic view of Christ; that is to say, the earthly life of Jesus is regarded merely as an appearance, and His ascension and unreal. This docetic Christology is most prominent in the Acts of John, where we read that when Jesus walked no footprints were discernible; that sometimes when the apostle attempted to lay hold of the body of Jesus his hand passed through it without resistance; that when the crowd gathered round the cross on which to all appearance Jesus hung, the Master Himself had an interview with His disciple John on the Mount of Olives. The crucifixion was simply a symbolical spectacle; it was only in appearance that Christ suffered and died. Allied with the docetic Christology is a naïve Modalism, according to which there is no clear distinction between the Father and the Son.

In spite of the unfavorable impression created by the flood of miraculous and supernatural details, the pervading atmosphere of sexual feeling makes this a romantic and unrestrained enthusiasm. Particularly in the Acts of John, Andrew and Thomas there are passages (songs, prayers, homilies), sometimes of genuine poetic
beauty, which are characterized by religious warmth, mystic fervor and moral earnestness. The mystery of God was the foundation, and though it fre-
quently is in the strange language of gnostic thought, served to bring the Saviour near to men as the satisfaction of the deepest yearnings of the soul for deliverance from the dark power of death. The rank superstition and the traces of uncon-
quered heathenism should not blind us to the fact
that in the Apocryphal Acts we have an authentic if greatly distorted expression of the Christian faith, and that through them great masses of people were confirmed in the spiritual presence and power of Christ the Saviour.

III. Origin.—The Apocryphal Acts had their origin at a time when the canonical Acts of the Apostles were not yet recognized as alone authorita-
tive. Various motives contributed to the appearance
of books dealing with the life and activity of the different apostles.

Behind every variety of motive lay the profound reverence for the apostles as the authoritative depositaries of Christian truth. In apostolic times the sole authority in Christian communities, outside OT Scripture, was "the Lord." But as the creative period of Christianity faded into the past, the apostles (in the sense of the Twelve, including Paul) were accorded a pre-eminent position alongside Christ with the object of securing continuity in the faith. The commandments of the Lord had been received through them (2 Pet 3 2). In the Ignatian epistles they have a place of acknowledged supremacy by the side of Christ. Only that which had apostolic authority was normative for the church. The authority of the apostles was universal. They had gone into all the world to preach the gospel. They had, according to the legend referred to at the beginning of the Acts of Thomas, divided among themselves the different regions of the earth as the spheres of their activity. It was an inevitable consequence of the peculiar reverence in which the apostles were held as the securities for Christian truth that a lively interest should everywhere be shewn in traditional stories about their work and that writings should be multiplied which purported to give their teaching with fulness of detail.

The canonical Acts were not calculated to satisfy the prevailing desire for a knowledge of the life and teaching of the apostles. For one thing many of the apostles are there ignored, and for another the information given about the chief apostles Peter and Paul is little more than a meager outline of the events of their life. In these circumstances traditions not preserved in the canonical Acts were eagerly accepted and circulated. The individual apostles was largely shrouded in ob-
scure, legends were freely invented to gratify the insatiable curiosity. The marvelous character of these inventions is a testimony to the supernatural level to which the apostles had been raised in popular

As in the case of the apocryphal Gospels, the chief motive in the multiplication of apostolic romances was the desire to set forth with the full weight of apostolic authority such conceptions of Christian life and doctrine which prevailed in certain circles. (1) Alongside the saner and catholic type of Christianity there existed, espe-
cially in Asia Minor, a popular Christianity with features of heathenism. On its intellectual side the Christian religion was viewed as an ascetic disci-
pline, involving not only abstinence from animal

food and wine but also (and chiefly) abstinence from marriage. Virginity was the Christian ideal. Poverty and fasting were predominant. The Apocryphal Acts are permeated by this spirit, and their evident design is to confirm and spread con-
fidence in this ascetic ideal by representing the apostles as the zealous advocates of it. (2) The Apocryphal Acts were also intended to serve a
dogmatic interest. Heretical sects used them as a
means of propagating their peculiar doctrinal views and sought to supplement or supplant the tradition of the growing catholic church by another tradition which could be equally acceptable to them.

A subsidiary cause in the fabrication of apostolic legends was the desire of churches to find support for the claims which they put forward for an apostolic foundation or for some connection with apostles. In some cases the tradition of the sphere of an apostle's activity may have been well based, but in others there is a probability that stories of an apostolic connection were freely in-
cvented for the purpose of enhancing the prestige of
some local church.

IV. Sources.—In general it may be said that the Apocryphal Acts are full of legendary details. In the invention of these everything was allowed to the convenience of them as histori-
cally true. The narratives are accordingly abound in clear reminiscences of the canonical Acts. The apostles are cast into prison and are marvelously set at liberty. Converts receive into the apostles into their bosoms. The description of the Lord's Supper as "the breaking of bread" (Acts 2 42.46) is repeated in the Apocryphal Acts and is strictly apposite to the ritual there set forth in which there is frequently no mention of the celebration of the sacrament.

In the Acts of Paul the author evidently used the canonical Acts as the framework of his narrative. This dependence on the canonical Acts and the variety of allusions to details in them served to give an appearance of historical truth-
ness to the later inventions and to secure for them a reader acceptance. The fact that the canonical Acts were so used clearly shows that they had a position of exceptional authority at the time when the Apocryphal Acts were written.

The legendary character of the Apocryphal Acts does not preclude the possibility of authentic details in the additions made to the canonical history. There must have been many traditions that the apostles preserved in Christian com-

munities which had a foundation in actual fact. Some of these would naturally find a place in writings which were designed in part at least to sat-
ify the popular curiosity for a fuller knowledge of the apostles. It is certain that there is some sub-
stratum of historical fact in the episode of Paul's association with Thecla (Acts of Paul). The de-
scription of Paul's appearance given in the same connection is in all likelihood due to trustworthy
historical reminiscence. But it must be confessed that the signs of the presence of reliable traditions are very scanty. The few grains of historical fact are hidden in an overwhelming mass of material whose legendary character is unmistakable.

Although a formal connection with the canonical

Acts is recognizable and reliable traditions are to a

 slightest extent incorporated in the Apocryphal Acts, it is unquestionable that as a whole they reflect

a Hellenic spirit which revealed in the miraculous. A noteworthy type of popular literature whose influence is apparent on almost every page of the Apocryphal Acts was that
of the travel-romance. The most famous example of this romantic literature is the Life of the neo-
Pythagorean preacher, the great wonder-worker Acteus, who died at the Holy Church at Rome at the end of the 1st cent. AD. The marvelous deeds reported to have been wrought by him on his travels were freely transferred in a somewhat less striking form to other teachers. It is in the atmosphere of these romances that the Apocryphal Acts had their birth. In particular the Acts of Thomas recall the history of Apollonios. For just as Thomas was a missionary in India, so "Apollonios as a disciple of Pythagoras had traveled, a peaceful Alexander, to the Indian wilderness and there preached his master's wisdom." (Gedeon, Christliche Apokry-
phen, 36).

V. Ecclesiastical Testimony.—From the nature of his reference to the canonical Acts it is probable that the writer of the Muratorian Canon (cir 190 AD) had the existence of other Acts in mind. "The Acts of all the apostles," he says, "are written in a single book. Luke relates them admirably to Theophilus, confining himself to such as fell under his own notice, as he plainly shows by the omission of all reference either to the martyrdom of Peter or to the journey of Paul from Rome to Spain." During the 3rd cent. there are slight allusions to certain of the Apocryphal Acts, but it is only in the 4th cent. that frequent reference is made to them by both of the East, and of the West. A few of the more important references may be given here. (For a full account of the ecclesiastical testimony see Harbach, Gesch. der altchr. Lit., I, 116 ff.)

1. Eastern Testimony.—Leucius (c. 340) is the first to make any clear reference to Apocryphal Acts. He speaks of "Acts of Andrew, of John and of the other apostles," which were of such a character that no ecclesiastical writer thought it proper to invoke their testimony. Their style and their teaching showed them to be so plainly of heretical origin that he would not put them even among spurious Scriptures, but absolutely rejected them as absurd and impious (H. B., 111, 25. 6.7). Ephraem (d. 373) declares that Acts were written by the Bardeanes to propagate in the name of the apostles the unbelief which the apostles had destroyed. Epiphanius (cir 375) repeatedly refers to innumerable acts which were being believed in the sects. Amphilochios of Iconium, a contemporary of Epiphanius, declares that certain writings emanating from heretical circles were "not Acts of the apostles but accounts of demons." The Second Synod of Nicea (787 AD), in the records of which those words of Amphilochios are preserved, dealt with apocryphal literature and had under special consideration the Acts of John to which the Icono-
clasts appealed. In the synod's finding these Acts were characterized as "this abominable book," and on the judgment was passed: "Let no one read it; and not only so, but we judge it worthy of being committed to the flames." In the West from the 4th cent. onward references are frequent. Philastrius of Brescia (cir 387) testifies to the use of Apocryphal Acts among the Manichaeans, and declares that although they are not suitable for general reading they may be read with profit by mature Christians (De Haeres, 88). The reason for this favorable judgment is to be found in the pronounced ascetic tendency of the Acts, which was in line with the moral ideal prevalent at that time in the West. Augustine refers repeatedly to Apocryphal Acts among the Manichaeans and characterizes them as the work of "cobbler of fables" (sutoribus fabularium). The Manichaeans accepted them as true and genuine; and in respect of this claim Augustine says: "They would in the time of their authors have been counted worthy of being welcomed to the authority of the church and led to actual examination because then alive and could examine such things as had acknowledged them as speaking the truth" (Contra Faustum, XXII, 79). The Acts of John and the Acts of Thomas are mentioned by Augustine by name. He also refers to Leucius as the author of Apocryphal Acts. Turribius of Astorga (cir 450) speaks of Acts of Andrew, of John, of Thomas, and attributes them to the Manichaeans. Of the heretical teaching in the Acts of Thomas, Turri-
bius singles out the claim for special attention: "by oil instead of by water. Leucius is mentioned as the author of the Acts of John. The Acts of Andrew, Thomas, Peter, and Philip are condemned as apocryphal in the Gelasian Decree (496 AD) and in the same condemnation are included "all acts and prophecies of Leucius, a disciple of the devil."

The fullest and most important reference to the Apocryphal Acts is found in Photius, the Patriarch of Constantinople in the second half of the 9th cent. In his Bibliotheca, which contains an account of 280 different books which he had read during his ab-

2. Western Testimony among ecclesiastical writings. The book which was fullest of contradic-
ditions. Its teaching was heretical. In particular it was taught that Christ had never really become man. Not Christ but another in His place had been crucified. After referring to the ascetic do-
ctrine and the absurd miracles of the Acts and to the part which the Acts of John had played in the Iconoclastic Controversy, Photius concludes: "In short this book contains ten thousand things which are childish, incredible, ill-conceived, false, foolish, inconsistent, impious and godless. If anyone were to call it the fountain and mother of all heresy, he would not be far from the truth."

There is thus a consensus of ecclesiastical testi-
mony as to the general character of the Apocryphal Acts as written and a number of heretical sects but regarded by the church as unreliable and harm-

4. Ecclesiastical Testimony Condemna-
tion

The book was stigmatized with full heretical charac-
ter. The sharpest condemnation is that pronounced by Leo I (cir 450) who declares that "they should not only be forbidden but should be utterly swept away and burned. For although there are certain things in them which seem to have the appearance of piety, yet they are not free of poison and secretly work through the allures of fables so that they involve in the snares of every possible error those who are seduced by the narra-
tion of marvelous things." The Acts of Paul, which show no trace of dogmatic heresy, were included in the ecclesiastical censure owing to the fact that they had received a place at the end of the corpus. Many teachers in the church, however, made a distinc-
tion between the miraculous details and the heretical doctrine of the Acts, and while they rejected the latter they retained the former. Wis-
ness the words of an orthodox reviser in regard to his heretical predecessor: "Quaedam de virtutibus
quidem et miraculis quae per eos Dominus fecit, vera dixit; de doctrina vero multa mentitus est.

VIII. Acts of John. In the Acts of Photius (Bibliotheca cod. 114) all the five Acts are ascribed to one author, Leucius Charinus. Earlier writers had associated the name of Leucius with certain Acts. In particular he is, on the witness of several writers, declared to be the author of the Acts of John. As these Acts show, the author professes to be a follower and companion of the apostle, and Epiphanius (Haeres. 51 6) mentions one named Leucius as being in the entourage of John. This notice of Epiphanius, however, is of doubtful value, as it proceeds from the practice of giving the name of the author of a collection to the author of any one of its parts.

Whether or not there is any truth in the ascription of these Acts to a disciple of John must be left undecided, but the probabilities are against there being any. Be that as it may, when the different Acts were collected, the name of the reputed author of the Acts of John was transferred to the whole collection. This probably happened not later than the 4th cent. Although all the Acts are certainly not from one hand (the difference of style is insufficient proof of this), there are so many striking similarities between some of them as to suggest a possible common authorship in those cases or at least a relation of literary dependence.

VII. Different Acts. That some connection existed between the different Acts was clearly recognized in early times, and it was doubtless due to this recognition that they were gathered together in a corpus under the name of one author. It is acknowledged that there is a relationship between the Acts of Peter and the Acts of John, some holding that they are the work of the same author (James, Zahn), others that the former are dependent on the latter (Schmidt, Hennecke), while others again believe that their origin is in the same theological school and in the same ecclesiastical atmosphere sufficiently explains all similarities (Ficker). The Acts of Andrew, too, reveal a near kinship to the Acts of Peter. But however the matter may stand in regard to literary dependence, the affinity between the different Acts in a material sense is manifest. All are pervaded by the ascetic spirit; in all Christ appears in the form of the apostle; in all women visit the apostle in prison. It is acknowledged that in the Acts of Peter the soul stand by themselves as anti-gnostic in tendency, but the others agree in their doctet view of Christ's person; while in the Acts of John, Peter and Thomas, there is a similar mystical doctrine of the cross.

VIII. Value of the Apocryphal Acts. In a study about the life and work of the apostles the Apocryphal Acts are almost entirely worthless.

1. As History. A possible exception in this respect is the section of the Acts of Paul dealing with Paul and Thecla, although even there any historical elements are almost lost in the legendary overgrowth. The spheres of the apostles' work, so far as they are mentioned only in these Acts, cannot be accepted without question, although they may be derived from reliable tradition. Taken as a whole the picture given in the Apocryphal Acts of the missionary labors of the apostles is a grotesque caricature.

The Apocryphal Acts, however, although worthless as history, are of extreme value as throwing light upon the period in which they were written. They belong to the 2d cent.

2. As Records of Early Christianity. There are a rich quarry for information about the popular Christianity of that time. They give us a vivid picture of what Christianity assumed in contact with the enthusiastic mystery-cults and gnostic sects which then flourished on the soil of Asia Minor. We see in them the Christian faith deeply tinged with the spirit of contemporary pan-gaman; the faith in Christ the Saviour-God, which satisfied the need of the years, the conquest from the powors of evil, in association with the yet unconquered elements of its heathen environment.

(1) The Acts show us popular Christianity under the influence of gnostic ideas as contrasted with the Gnosticism of the schools which moves in a region of mythological conceptions, cold abstractions and speculative subtleties. At the basis of Gnosticism lay a contempt for material existence; and in the Christianity of the Apocryphal Acts we see the practicalition in harmony with which followed from this fundamental position, a docetic conception of Christ's person and an ascetic view of life. In this popular religion Christ had few of the features of the historic Jesus. He was the Saviour-God, exalted above principalities and powers, through union with whom the soul was delivered from the dread powers of evil and entered into the true life. The manhood of Christ was sublimated into mere appearance; and in particular the suffering of Christ were conceived mystically and symbolically, sometimes in the form that in the story of His sufferings we see only the symbol of human sufferings in general; sometimes in the form that Christ who is present in His church shares in the martyr-sufferings of the faithful. Again, in the form that the sin, weakness and unfaithfulness of His people inflict upon Him ever-renewed sufferings" (Pfeiderer, Prim. Christianity, 111, 181). The ethical influence of Gnosticism is apparent in the asceticism, which is the most characteristic feature of these Acts. It is true that the ascetic ideal obtained not only in gnostic but also in orthodox church circles, as we gather from the Acts of Paul as well as from other sources. The prominence of the strict ascetic ideal in early Christianity is intelligible. The chief battle which the Christian faith had to fight with Hellenic heathenism was for sexual purity, and in view of the coarseness and laxity which prevailed in sexual relations it is not surprising that the Christian protest was exaggerated in many cases into a demand for complete continence. This ascetic note in primitive Christianity was emphasized by the spirit of Gnosticism and finds clear expression in the form of the Acts of the apostles written in an environment tinged with gnostic ideas. It goes without saying that the influence of these romances which are so largely concerned with sexual morality and occasionally are unspeakably coarse, was to preoccupy the mind with spiritual thoughts and to sully that purity of spirit which it was their intention to secure. There are, however, other ethical elements in these Acts which are in complete harmony with a true Christian morality. (2) The Apocryphal Acts are an invaluable source for information about early-Christian forms of worship. The ritual of the sacraments is fully described in the Acts of Thomas. Some of the prayers found in the Acts are pervaded by a warm religious spirit and are rich in liturgical expression.

(3) The beginnings of Christian hymnology may be traced in the Acts of Thomas, in which occur gnostic hymns breathing the fantastic oriental spirit. (4) Apparent in the Acts throughout is the excessive love for the supernatural and the religious enthusiasm which flowered in Asia Minor in the 2d cent. (cf. especially the dance of the disciples round Jesus in the Acts of John: ch. 94 ff.).

IX. Influence. The Apocryphal Acts had a remarkable influence in the Beginnings of the Church. After the establishment of Christianity under Constantine men turned their eyes to the earlier years of struggle and persecution. A deep
Apocryphal Acts

The INTERNATIONAL STANDARD BIBLE ENCYCLOPEDIA

interest was awakened in the events of the heroic age, the age of martyrs and apostles. Acts of martyrs were eagerly desired in parochial and pulpitudinous places, and the Apocryphal Acts were drawn upon to satisfy the desire for a fuller knowledge of the apostles than was afforded by the canonical books. The heretical teaching with which the apostolic legends were associated, these Acts led to their condemnation by ecclesiastical authority, but the ban of the church was unavailing to eradicate the taste for the vivid colors of apostolic romance. In these circumstances church writers set themselves the task of constructing full-length narratives, and what they wrought was clearly heretical and retaining the miraculous and supernatural elements. And not only so, but the material of the Acts was freely used in the fabrication of lives of other apostles, as we find in the collection of the so-called Apocryphal Acts in the 6th cent. The result was that from the 4th to the 11th cent. literature of this kind, dealing with the apostles, grew in space and form, and the favorite reading of Christians, from Ireland to the Abyssinian mountains and from Persia to Spain (Harnack). Apostolic legends were reproduced in religious poems; they appeared in martyrologies and calendars; they formed the subject of homilies on the Feast-days of the apostles, and incidents from them were depicted in Christian art. New cycles of legends arose in the Syrian and Coptic churches, and the Coptic legends were translated into Arab, and from Arab. into Ethiopic (Gadla Hawarayt—The Contendings of the Apostles). Literature of this kind was the fruitful medium of every kind of superstition.

'Whole generations of Christians [as Harnack says, yes, whole Christian nations were intellectually blinded by the dazzling appearance of these tales. They lost the light only for the light of his towers, but for the light of truth itself' (Gesch. der altcrh. Lit., I, xxvi). It is noteworthy that the apocryphal correspondence with the Corinthians in the Acts of Paul was received as canonical in the Syrian and Armenian Churches.

LITERATURE.—The Apocryphal Acts form the subject of a voluminous literature. The earlier editions of the available texts by Fabricius (1703) and Tischendorf (1831) have been completely superseded by Lipsius-Bonnet, Acta apostolorum apocrypha (1891—1903), which contains not only all of the Acts in the codices of the later texts, Translations of earlier Acts with various readings and conjectures in Harnack, NT Apokryphen (1904), while critical discussions and elucidation of the text are given in Harnack, Handbuch z. Geschichte der NT (1908). The latter work is indispensable to the student. English trs. of earlier Acts have been brought out in Pick and apocryphal Acts (1909). The critical work of Lipsius on these Acts was epoch-making: Die apokryphen Apostellgeschichten und Apostellegenden (1889—90). Full lists of literature may be found in Harnack and Pick. The following may be mentioned here: Zahn, Geschichte des NT Kanons, II, 382 ff. (1892); Forschungen zur Geschichte des NT Kanons, VI, 14 ff. 194 ff. (1900); Harnack, Geschichte der altchristlichen Literatur, I, 116 ff. (1893); II, 493 ff. 541 ff. (1897); James, Apocrypha Anecdota (Texts and Studies, V, 1. 1897); Ehrard, Die altchristliche Literatur u. Forschung, 1900); Schmidt, Die Alten Petrusuhrer (Teil, IX, 1. 1903). Useful as setting forth the religious significance of the Apocryphal Acts are Pfeiffer, Primitive Christianity, III, 170 ff. (1910); Liebchen, Die Offenbarung im Ostchristentum (1901). The chapter in Schmidt's Intro to the NT (1901) may be consulted. A short account of the Acts written with full knowledge is given in Alter, Apokryphen des Christentums (Religionsgeschichtliche Volksschriften, 1908).

B. THE SEPARATE ACTS

The Apocryphal Acts dealt with in this article are the Leukanus Acts mentioned by Photius in his Bibliotheca. As we now have them there have undergone revision in the interest of ecclesiastical conformity several older copies, and they belong to the 2d cent. It is impossible to say how much the Acts in their present form differ from that in which they originally appeared, but it is evident at many points that the orthodox revision which was meant to eliminate heretical elements was not by any means thorough. Passages which are distinctly heretical were left in the texts, and the reviser did not understand their true meaning.

1. Acts of Paul.—Origen in two passages of his extant writings quotes the Acts of Paul with approval, and it was possibly due to his influence that these Acts were highly esteemed in the East. In the Testimony Codex Claromontanus (3d cent.), which is of eastern origin, the Acts of Paul are treated as a catholic writing and take rank with the Shepherd and the Apocalypse of Peter. Eusebius, who utterly rejects "The Acts of Andrew, John and the rest of the apostles," puts the Acts of Paul in the lower class of debated writings alongside Hermas, Epistle of Barnabas, Did., the Apocalypse of John, etc (HE, III, 254). In the West, where Origen was viewed with suspicion, the Acts of Paul were apparently discredited, the only use of them as a reliable source being found in Hippolytus, the friend of Origen, who however does not mention them by name. (The reference by Hippolytus is found in his commentary on Daniel: "He argues from Paul's conflict with the wild beasts to the credibility of the story of Daniel in the lions' den.) The Acts of Paul only fragments remain. Little was known of them until 1904 when a translation from a badly preserved Coptic version was published by C. Schmidt, and the discovery was made that the well-known passion of Christ was wrongly set apart as a part of the Acts of Paul. From the notes regarding the extent of the Acts given in the Cod. Claromontanus and in the Stichometry of Niphon we gather that the fragments amount to about one-fifth of the whole.

(1) Of these fragments the longest and the most important is the section which came to have a separate existence under the name The Acts of Paul and Thecla. When these were separated from the Acts of Paul we cannot tell, but this had happened before the time of the Gelasian Decree (498 AD), which without making mention of the Acts of Paul condemns as apocryphal the Acts of Paul and Thecla. An outline of the narrative is as follows: At Lyons, Thecla, a Christian maiden, listened to the preaching of Paul on virginity and was so fascinated that she refused to have anything further to do with her lover. On account of his influence over her, Paul was brought before the pronuncial and was condemned and thrown into prison. There Thecla visited him with the result that both were brought to judgment. Paul was banished from the city and Thecla was condemned to be burned. Having been miraculously delivered at the pile, Thecla went in search of Paul and when she had found him she accompanied him to Antioch. (There is confusion in the narrative of Antioch of Pisidia and Syrian Antioch.) In Antioch an influential citizen, Alexander by name, became enamored of her and openly embraced her on the street. Thecla, resenting the familiarity, pulled off the crown which Alexander wore and in consequence was condemned to fight with the wild beasts at the games. Until the day of the games Thecla was placed under the care of Queen Tryphena, then living in Antioch. When Thecla was exposed in the amphitheater a lioness died in defending her against attack. In her peril Thecla cast herself into a tank containing seals and declared: "In the name of Jesus Christ, my Lord, and of my last day." (It was with reference partly to this act of self-baptism that Tertullian gave the information about the authorship of these Acts: infra 3.) When it was proposed to have Thecla
torn saunder by maddened bulls Queen Tryphaena fainted, and through fear of what might happen the authorities released them. They handed over to Tryphaena, Thecla once again sought Paul and having found him was commissioned by him to preach the Word of God. This she did first at Iconium and then in Seleucia where she died. Very few Coptic church historians described Thecla’s end, and in one of them it is narrated that she went underground from Seleucia to Rome that she might be near Paul. Finding that Paul was dead she remained in Rome until her death. (6) Although the Thecla story is a romance designed to secure approbation, it was incorporated in the Gnostic creed probably that it had at least a slight foundation in actual fact. The existence of an influential Thecla cult at Seleucia favors the view that Thecla was a historical person. Traditions regarding her association with Paul which clustered round the temple in Seleucia built in her honor may have provided the materials for the romance. In the story there are clear historical reminiscences. Tryphaena is a historical character whose existence is established by coins. She was the mother of King Solomon II of Pontus and a relative of the emperor Claudius. There are no grounds for doubting the information given us in the Acts that she was living at Antioch at the time of Paul’s first visit. The Acts further record Paul’s speech and in the presentation of “the royal road” by which Paul is stated to have traveled from Lystra on his way to Iconium—a statement which is all the more remarkable because, while the road was in use in Paul’s time for military reasons, it was not used by travelers who went on the last quarter of the 1st cent. In the Acts Paul is described as “a man small in stature, bald-headed, bow-legged, of noble demeanor, with meeting eyebrows and a somewhat prominent nose, full of grace. He appeared sometimes like a man, and at other times he had the face of an angel.” This description may quite well rest on reliable tradition. On the ground of the historical features in the story, Ramsay (The Church in the Roman Empire, 375 ff) argued for the existence of a shorter version going back to the 1st cent., but this view has not been generally accepted. (c) The Acts of Paul and Thecla were very widely read and had a remarkable influence owing to the widespread reverence for the holy and to the high place among the saints as “the first female martyr.” References to the Acts in the Church Fathers are comparatively few, but the romance had an extraordinary vogue among Christians both of the East and of the West, veneration for Thecla reaching its highest point in Gaul, and in a poem entitled “The Banquet” (Caena) written by Cyprian, a poet of South Gaul in the 5th cent., Thecla stands on the same level as the great characters of Biblical history. The later Acts of Xanthippe and Polyxena are entirely derived from the Acts of Paul and Thecla.

(2) Another important fragment of the Acts of Paul is that containing the so-called Third Epistle to the Corinthians. Paul is represented as being in prison at Philippi (not at the time of Acts 16 23 ff, but at some later time). His incarceration was due to his influence over Stratonice, the wife of Apollodorus. The Corinthians who had been disturbed by two teachers of heresy sent a letter to their persecutors’ enjoiners. The letter which abounds in allusions to several of the Pauline epistles is chiefly remarkable from the fact that it found a place, along with the letter which called it forth, among canonical writings in the Syriac and Armenian churches after the 2d cent. The correspondence was strangely enough believed to be genuine by Rinck who edited it in 1823. The original Gr version has not been preserved, but it exists in Coptic (not quite complete), in Armenian and in two Lat trs (both mutilated), besides being incorporated in Eusebius’s Chronicle (in Armenian tr). The Syr version has been lost.

(3) Besides the two portions of the Acts of Paul mentioned above there are others of less value, the Healing of a Dresciaul Man at Myra by the apostle (a continuation of the story of the -name). Occurring in the same 3. Author- ship and Date -name the large number of names occurring in these Acts are found in inscriptions of Smyrna, although it would be precarious on that ground to infer that the author belonged to that city. It is possible that he was a native of a town where Thed had enjoyed peculiar favor, but the tradition of her association with Paul, the preacher of virginity, was the chief motive for his writing the book. Along with this was linked the motive to oppose the views of some Gnostics (the 1st century), the date of the Acts of Paul is the latter half of the 2d cent., probably between 160 and 180 AD.

The Acts of Paul, though written to enhance the dignity of the apostle, clearly show that both in respect of intellectual equipment and in breadth of moral vision the author, with all his love for Paul, was no kindred spirit. The intellectual level of the Acts is low. There is throughout great poverty in conception; the same motif occurs without variation; and the defects of the author’s imagination have their counterpart in a bare and inarticulate diction. NT passages are frequently and freely quoted. The view which the author presents of Christianity is narrow and one-sided. Within its limits it is orthodox in sentiment; there is nothing to support the opinion of Lipseus that the work is a revision of a gnostic writing. The frequent occurrence of supernatural events and the strict asceticism which dominate the Acts are not results of gnostic influence. The dogmatic is indeed anti-gnostic, as we see in the correspondence with the Corinthians. “The Lord Jesus Christ was born of Mary, of the Seed of David,
the Father having sent the Spirit from heaven into her. The resurrection of the body is assured by Crispius's declaration (190). Resurrection, however, is only for those who believe in it— in this we have the one thought which betrays any originality on the part of the author: "they who say that there is no resurrection shall have no resurrection." With faith in the resurrection is associated the demand for strict sexual abstinence. Only they who are pure (i.e. who live in chastity) shall see God: "Ye have no part in the resurrection unless ye remain chaste and defile not the flesh." The prophet Abacuc had spoken words which were the word regarding self-control and the resurrection."

In the author's desire to secure authority for a prevalent form of Christianity, which demanded sexual abstinence as a condition of eternal life, we recognize the chief aim of the book. Paul is represented as the apostle of this popular conception, and his teaching is rendered attractive by the miraculous and supernatural elements which satisfied the crude taste of the time.

**Literature**—Books mentioned under. "Literature" (p. 188): C. Schmidt, "Die Paulusakten" (Neue Jahrbücher, 211 ff, 1897) and Acts Paulus (1904); dealing with Arendz, The Acts of Paul and The Church in the Roman Empire (4th ed., 1895); Conybeare, The Apology and Defence of the Acts (1894); Velthuis, La légende de sainte Thècle (1896); Orr, The NT Apoc Writings (intro, tr, and notes, etc.) and further lit., see Hennecke, Hando. Act. 1, 1 ff. 2. **Acts of Peter.**—A large portion (almost two-thirds) of the Acts of Peter is preserved in a Latin translation—the *Actus Vercellenses*, so called from the city of Vercelli in Piedmont, where the MS containing them lies in the chapter-library. A Copitic fragment discovered and published (1903) by C. Schmidt contains a narrative with the subscription "Secondo il Vero" and is considered to be the authentic one of this fragment formed part of the work to which the *Actus Vercellenses* also belonged, but this is somewhat doubtful. The fragment deals with an incident in Peter's ministry at Jerusalem, while the *Actus Vercellenses*, which probably were meant to be a continuation of the canonical Acts, give an account of Peter's conflict with Simon Magus and of his martyrdom at Rome. References in ecclesiastical writers (Philastrius of Brescia, Isidore of Pelusium and Photius) may be cited as evidence that these Acts were in circulation, and belong to the writing known as the Acts of Peter, which was condemned in the rescript of Innocent I (405 AD) and in the Gelasian Decree (496 AD). (1) The Copitic Fragment contains the story of Peter's being saved from a death-dealing thorn, which had wounded his side, while he was engaged in healing the sick a bystander asked him why he did not make his own daughter whole. To show that God was able to effect the cure through him, Peter made his daughter sound for a short time and then bade her return to her place and become as before. He explained that the affliction had been laid upon her to save her from defilement, as a rich man Ptolemy had been enamored of her and had desired to make her his wife. Ptolemy's grief at not receiving her had been such that he became blind. As the result of a vision he had come to Peter, had received his sight and had been converted, and when he died he had left a piece of land to Peter's daughter. This land Peter had sold and had given the proceeds to the poor. Augustine (Contra Adiutantium, 17.5) makes a reference to this story but does not mention Acts of Peter. There are also two references to the incident in the Acts of Philip. In the later Acts of Nereus and Achilleus a certain Nereus is sent to Rome to beseech Peter to save him, and there is the name of Peter's daughter, which is not mentioned in the fragment, being given as Petronilla. (2) The contents of the Actus Vercellenses fall into three parts: (a) The first three chapters which clearly are a continuation of some other narrative and would fitly join on to the canonical Acts tell of the events in Rome after the martyrdom of Philip. The account of the Acts (4-32) gives an account of the conflict between Peter and Simon Magus at Rome. Paul had not been gone many days when Simon, who "claimed to be the great power of God," came to Rome and perverted many of the Christians. Christ appeared in a vision to Peter at Jerusalem, and this was to be delivered to him. Peter went to see Simon in the house of one named Marcellus, whom the magician had seduced; and when Simon refused to see him, Peter unleashed a dog and bade it go and deliver his challenge. The result of this marvel was the repentance of Marcellus. A section follows describing the mending of a broken statue by sprinkling the pieces with water in the name of Jesus. Mean time the dog had given Simon a lecture and had pronounced on him the doom of unquenchable fire. After reporting on its errand and speaking words of encouragement to Peter, the dog expired, and the next morning Simon was found waxed strong at the sight of the wonders which Peter wrought, and Simon was driven out of his house with every mark of contempt. Simon, enraged at this treatment, came to challenge Peter. An infant child of St. Peter's, called Vercellae, in a main voice denounced Simon and made him speechless until the next Sabbath day. Christ appeared in a vision of the night encouraging Peter, who when morning came was come to the congregation at the house of Peter. "The Lord has called you out of Judaea. Shortly afterward, in the house of Marcellus which had been "cleansed from every vestige of Simon," Peter unfolded the true understanding of the gospel. The adequacy of Christ to meet every kind of need is shown in a characteristic passage which reveals doetic traits: "He will comfort you that you may love Him, this Great and Small One, this Beautiful and Ugly One, this Youth and Old Man, appearing in time yet utterly invisible in eternity. He is the Way, and the Truth, and the Life, "who yet is now grasped by His servants, whom flesh had not seen and now sees," etc. Next in a wonderful blaze of heavenly light blind widows received their sight and declared the different forms in which Christ had appeared to Peter. Still the work of Marcellus is described in which the Lord appearing in the likeness of Peter struck down with a sword "the whole power of Simon," which had come in the form of an ugly Ethiopian woman, very black and clad in filthy rags. Then follows the conflict with Simon in the forum in presence of the senators and prefects. Words were first exchanged between the combatants; then from words it came to deeds, in which the power of Peter was signally exhibited as greater than Simon's in the raising of the dead. Simon was now disgraced in Rome, and in a last attempt to recover his influence he declared that he would ascend to God. Before the assembled crowd he flew up over the city, but in answer to Peter's prayer to Christ he fell down and broke his leg in three places. He was removed from Rome and after having his limb amputated died. (e) The Actus Vercellenses close with an account of Peter's martyrdom (33-41). Peter had incurred the enmity of influential citizens by persuading their wives to separate from their husbands. Then follows the well-known "Quo vadis?" story. Peter being warned of the danger he was in and fled from Rome; but meeting Christ and learning that He was
going to the city to be crucified again, Peter returned and was condemned to death. At the place of execution Peter expounded the mystery of the cross. He was crucified head downward, and when this was done he exclaimed in words suggesting of gnostic influence (33 I). In these Acts we find the same negative attitude to creation and the same pronounced ascetic spirit as in the others. The "virgin of the Lord" are held in special honor (22). Water is used instead of wine at the Eucharist. Very clearly in the story of Peter is the emphasis laid on the boundless mercy of God in Christ toward the backsliding (especially 7). This note frequently recurring is a welcome revelation of the presence of the true gospel-message in communities whose faith was allied with the grossest superstition.

LITERATURE.—Books mentioned under "Literature" (p. 188). In addition, Flicker, Die Petrusurkunden, Beiträge zur christlichen Geschichtswissenschaft (1860); Harnack, "Pastorale Missionen" (T. U. V. 3, 1900).

III. Acts of John.—According to the Stichometry of Nicephorus the Acts of John in their complete state formed a book about 100,000 words long as the Gospel of Matthew. A number of sections which show links of connection with one another are extant—about two-thirds of the whole. The beginning of the Acts is wanting, the existing narrative commencing at 18. What the character was of the earlier chapters were we cannot surmise. In Book I alone the first fourteen chapters deal with John's journey from Ephesus to Rome and his banishment to Patmos, while 15-17 describe John's return to Ephesus from Patmos. The material given by St. Jerome may contain material which belonged to the original acts, but it is improbable that they stood at the beginning of the work, as it seems clear that the narrative commencing at 18 describes John's first visit to Ephesus. The first extra portion of Book I, and that portion which like the Acts of Peter are anecdotal, may be due to the fact that the Lycanomades as "the commander-in-chief of the Ephesians" met John as he drew near the city and besought on behalf of his beautiful wife Cleopatra, who had become paralyzed. When they came to the house the grief of Lycanomades was so great that he fell down lifeless. After prayer to Christ John made Cleopatra whole and afterward raised Lycanomades to life again. Prevailed upon by their entreaties John took up his abode with them. In 26-29 we have the incident of the picture of John which played so prominent a part in the Lycanomades of Nicomedia. Lycanomades commissioned a painter to paint a picture of John and when it was completed put it in his bedroom with an altar before it and prayed beside it. John discovering why Lycanomades repaired so frequently to his room, taxed him with worshipping a heathen god and learned that the picture was one of himself. This he believed only when a mirror was brought that he might see himself. John charged Lycanomades to paint a picture of his soul and to use as colors faith in God, meekness, love, chastity, etc. As for the picture of his body it was the dead picture of a dead man. The 30-36 narrate the story of an Inspired bush out of a house to the theater where the miracles were wrought John gave an address on the vanity of all earthly things and on the destroying nature of fleshly passion. In 37-46 we read that in answer to the prayer of John the temple of Artemis fell to the ground, with the result that many people were won to the worship of Christ. The priest of Artemis who had been killed through the fall of the temple was raised to life again and became a Christian (40 I). After the narration of further wonders one of the houses is building is described. This incident of the Acts, the exquisitely repulsive story of Drusiana (62-86), which was used as the theme of a poem by the nun Hroswitha of Gandersheim (10th cen.). The following sections describe a discourse on the life, death, and ascension of Jesus (37-105) which is characterized by distinct

2. Historical Value

It is plain from the account given of these Acts that they are entirely legendary in character. They have not the slightest value as records of the activity of Peter. They are in reality the creation of the ancient spirit which delighted in the marvelous and which conceived that the authority of Christianity rested on the ability of its representatives to surpass all others in their possession of supernatural power. The tradition that Simon Magus exercised a great influence in Rome and that a statue was erected to him may have had some basis in fact. Justin Martyr (Apol. I, 26, 56) states that no mention on account of the wonderful deeds which he wrought in Rome was regarded as a god and had a statue set up in his honor. But grave doubts are thrown on the veracity of this by Semon's Sanco deo Fidio Sacrum which was found on a stone pedestal at Rome in 1574. This refers to a Sabine deity Semo Sancus, and the misunderstanding of it may have led to Justin's statement and possibly was the origin of the whole legend of Simon's activity at Rome. The tradition that Peter died a martyr's death at Rome is early, but no reliance can be placed on the account of it given in the Acts of Peter.

Nothing can be said with any certainty as to the authorship of the Acts of Peter. James (Apocrypha Aeneid, II) believes them to be from the same hand as the Acts of John, and in this he is supported by Zahn (Gesch. des NT Kanons, II, 561). By all that can definitely be said is that both these Acts had their origin in the same religious atmosphere. Both are at home on the soil of Asia Minor. Opinion is not unanimous on the question where the acts of Peter were written, but it is probably in Rome. There are probably reminiscences of historical persons who lived in Asia Minor. The date is about the close of the 2nd cent.

4. General Character

The Acts of Peter were used by heretical sects and were subjected to ecclesiastical censure. That however does not necessarily imply a heretical origin. There are traces in them of a spirit which in later times was regarded as heretical, but they probably originated within the church in an environment strongly tinged by gnostic ideas. We find the principle of gnosticism in the stress that is laid on understanding the Lord (22). The gnostic view that the Scripture required to be supplemented by a secret tradition committed to the apostles is reflected in several passages (20 in particular). At the time of their early date states that of the apostles not to be able to understand the full revelation of God. Each saw only as far as he was able to see. Peter professes to communicate what he had received from the Lord "in a mystery." There are slight traces of the docetic heresy. The mystical words of Peter as he hung on the cross are...
docetic traits, a long passage dealing with Christ's appearance in many forms and with the peculiar nature of His body. In this section occurs the strange hymn used by the Priscillianists, which purports to be that which Jesus sang after supper in Galilæa (Mt 26:30), the disciples dancing round Him in a ring and responding with Amen. Here too we find the mystic doctrine of the Cross revealed to John by Christ. Chs 106-15 narrate the end of John. After addressing the brethren and dispensing the fruits of the Lord's Supper with bread alone, John ordered a grave to be dug; and when this was done, he prayed, giving thanks that he had been delivered from "the filthy madness of the flesh" and asking for a safe passage through the fierce eyes of the children of men. When he lay down quietly in the grave and gave up the ghost, the Acts of John, it need hardly be said, have not the slightest historical value. They are a tissue of literary devices and anachronism.

2. Historical Value

With regard to miracles, the miraculous character served to insinuate the popular mind the dogmatic conceptions and the ideal of life which the author entertained. The Acts however, are in harmony with the well-founded tradition that Ephesus was the scene of John's later activity. Very remarkable is the account of the destruction of the Artemis-temple by John—a clear proof that the Acts were not written in Ephesus. The Ephesian temple of Artemis was destroyed by the Goths in 262 AD.

The Acts of John are the most clearly heretical of all the Acts. The docetic traits have already been referred to. The unreality of Christ's bodily resurrection is shown by the change of forms in which He appeared (88-90), by His ability to do without food (93) and without sleep ("I never at any time sleep or keep my eyes open", 89), by His leaving no footprint when He walked (95), by the varying character of His body when touched, now hard, now soft, now completely immaterial (89, 93). The crucifixion of Jesus, too, was entirely phantasmal (89-91). Independently followed immediately on the apparent crucifixion; there was no place for the resurrection of One who had never actually died. Gnostic features are further discernible in the disparagement of the Jewish Law (96), which has been tied to a sect which claimed to be the legacy of a secret tradition committed by Christ to the apostles (96) and in the contempt for those who were not enlightened ("Care not for the many, and them that are outside the mystery despise," 100). The historical incidents of Christ's sufferings are subsumed into something altogether mystical (101); they are simply a symbol of human suffering, and the object of Christ's coming is represented as being to enable men to understand the true meaning of suffering and thus to be delivered from it (96). The real sufferings of Christ are those caused by His grief at the sins of His followers (106 f.). He is also a partaker in the sufferings of His faithful people, and indeed is present with them to be their support in every trial (108). The Acts of John also reveal a strong ascetic tendency, although that is not so pronounced as in the Acts of Andrew and of Thomas. Nowhere however do we get a more horrifying glimpse into the depths of corrupt sects than in these Acts. The writing and circulation of the story of Drusiana cast a lurid light on the gross sensual elements which survived in early Hellenic Christianity. Apart from this there are passages which reveal a warm and true religious feeling, and some of the prayers are marked by glow and emotion (112 ff.). The Acts show that the author was a man of considerable literary ability; in this respect they form a striking contrast to the Acts of Paul.

The author of the Acts of John represents himself as a companion of the apostle. He has participated in the events which are described, and in consequence the narrative possesses a certain lively quality which gives it the appearance of actual history. The author according to testimony which goes back to the 4th cent. was Leucius, but nothing can with any certainty be said of him (see above A, V7). It is possible that in some part of the Acts which is lost the author mentioned his name. The early date of the Acts is proved by a reference in Clement of Alexandria (cir 200) to the immaterial nature of Christ's body, the passage plainly indicating that Clement was acquainted with the Acts or had heard another speak of them (Hypotyposeis on 1 Jn 11). The probable date is between 150 and 180 and Asia Minor is the place of origin.

The Acts of John exerted a wide influence. They are in all probability the earliest of the Apocryphal Acts and those written later owe much to them.

5. Influence to them. The Acts of Peter and of Andrew are the most closely related to the Acts of John that some have regarded them as being from the same hand; but if that be not so, there is much to be said for the literary dependence of the former on the latter. We are probably right in stating that the author of the Acts of John was the pioneer in this sphere of apostolic romance and that others eagerly followed in the way which he had opened up. That the Acts of John were read in orthodox circles is clear from the reference in Clement of Alexandria to a later work in which they were regarded with suspicion. Augustine quotes part of the hymn (95) which he read in a Priscillianist work sent him by a bishop Cereutius and makes severe animadversion on it and on the claim advanced regarding it that it had been revealed in secret to the apostles. The second Synod of Nicaea (787 AD) passed judgment on the Acts of John in words of great severity (see above A, V7). The stories found in the Acts had, however, before this time passed into the apocryphal tradition and had been used by Prochorus (5th cent.), a supposed disciple of John, in the composition of his travel-romance dealing with the apostle, in which he represents John as having been as late as the 6th cent. whose work contains material from the older Acts which is not otherwise preserved.

Literature.—See under "Literature" (p. 188); also Zahn, Acta Johanne (1880).

IV. Acts of Andrew.—The first mention of these Acts which are referred to frequently by ecclesiastical writers is in Eusebius (HE, III, 25, 6). They are there, along with other Acts, rejected as absurd and impious. Epiphanius refers to them in several passages (Haer., 47, 61, 68) as being in use among various heretical sects which practised a strict ascetic morality. Early writers attribute them to Leucius, the author of the Acts of John.

Of the Acts of Andrew only small portions remain. A fragment is preserved by Eusebius of Ursala (d. 424), a contemporary of Augustine, and a longer piece, found in a MS of the 10th or 11th cent., containing lives of saints for November, was identified by Bonnet as belonging to the Acts of Andrew. The account of the death of Andrew cast a lurid light on the gross sensual elements which survived in early Hellenic Christianity. Apart from this there are passages which reveal a warm and true religious feeling, and some of the prayers are marked by glow and emotion (122 ff.). The Acts show that the author was a man of considerable

Apostolic Acts THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA 192
longest section of the Acts deals with Andrew’s imprisonment because he had induced Maximilla to separate from her husband “Aegeates” and to live a life of chastity. (“Aegeates,” which occurs as the name of Maximilla’s husband, denotes in reality “a man of courage,” Aegeates being a town in the vicinity of Patrae, where Andrew was described as carrying on his work.) The section opens in the middle of an address spoken to the brethren by Andrew in prison, in which they were enjoined to glory in their fellowship with Christ and in their delivery from the baser things of earth. Maximilla with her companions frequently visited the apostle in prison. Aegeates expostulated with her and declared that if she did not resume relations with him he would subject Andrew to torture. Andrew counseled her to resist the importance of Aegeates, and delivered an address on the true nature of man and stated that torture had no terrors for him. If Maximilla should yield, the apostle would suffer on her account. Through her fellowship with his sufferings she would know her true nature and thus escape from affliction. Andrew next comforted Stratoecles, the brother of Aegeates, who declared his need of Andrew, the sower in him of the “seed of the word of salvation.” Andrew thereupon announced his crucifixion, saying that Andrew and a few visited the apostle in prison, “the Lord going before her in the form of Andrew.” To a company of the brethren the apostle delivered an address, in which he discoursed on the deceitfulness of the devil, who first had dealt with men as a friend but now was manifest as an enemy. (3) When brought to the place of crucifixion Andrew addressed the cross which he joyfully welcomed. After being bound to the cross he hung smiling at the miscarriage of the very means of his death. He next explained “a man who belongs to Jesus because he is known of Him is armed against every vengeance.” For three days and nights Andrew addressed the people from the cross, and they, moved by his nobility and eloquence, went to Aegeates, demanding that he should be delivered from death. Aegeates, fearing the wrath of the people, went to take Andrew down from the cross, but the apostle refused deliverance and prayed to Christ to prevent his redemption. Andrew was buried by Maximilla, and Aegeates soon afterward cast himself down from a great height and died. The enigmatic ideal in its most pronounced form is exhibited in the Acts of Andrew. (In view of the ecclesiastical tradition with a strict asceticism, there is a curious irony in the fact that in some parts of Germany Andrew is the patron saint of maidens seeking husbands. In the Harz and in Thuringia St. Andrew’s Night [November 30] is considered by maidens the most favorable time for the vision of their future husbands.) The gnostic spirit is revealed in the feeling for the preiminent worth of the spiritual means. (5) Andrew, the gnostic reasoner, said: “Aegaeates being a town in the vicinity of Patrae on the Corinthian Gulf. (Patrae is not actually mentioned in the fragmentary Acts, but that the scene of the imprisonment and martyrdom of Andrew is laid in that city may be inferred from the name “Aegeates” and the narrative 4 [2].) Ecclesiastical tradition speaks with great uncertainty of the sphere of Andrew’s missionary labors, Scythia, Bithynia and Greece being all mentioned. It may be regarded as probable that Andrew came to Greece and suffered martyrdom at Patrae, although one must reckon with the possibility that the account of his work and crucifixion there was invented for the purpose of representing the church at Patrae as an apostolic foundation. The crucifixion of the apostle on the so-called St. Andrew’s cross is a later legend. 

V. Acts of Thomas.—These Acts exist in a complete state and their great popularity in church circles is shown by the large number of MSS which contain them. It is probable that they were written by a gnostic in the first half of the second century, and may be translated into Gr and worked over from the Catholic point of view.

In the Stichometry of Nicephorus the Acts of Thomas are mentioned as containing 1,600 stichoi (or verses) or a moderate length in comparison with the first two figures. Some idea of the contents may be given as follows:

1. Contents fifth fewer than the Gospel of Mark. If this notice is correct, the form in which we have the Acts is very much extended.

In the Gr version the Acts are divided into thirteen “dichota” (sections). After each of these sections the text explains “a man who belongs to Jesus because he is known of Him is armed against every vengeance.” For three days and nights Andrew addressed the people from the cross, and they, moved by his nobility and eloquence, went to Aegeates, demanding that he should be delivered from death. Aegeates, fearing the wrath of the people, went to take Andrew down from the cross, but the apostle refused deliverance and prayed to Christ to prevent his redemption. Andrew was buried by Maximilla, and Aegeates soon afterward cast himself down from a great height and died.

The enigmatic ideal in its most pronounced form is exhibited in the Acts of Andrew. (In view of the ecclesiastical tradition with a strict asceticism, there is a curious irony in the fact that in some parts of Germany Andrew is the patron saint of maidens seeking husbands. In the Harz and in Thuringia St. Andrew’s Night [November 30] is considered by maidens the most favorable time for the vision of their future husbands.) The gnostic spirit is revealed in the feeling for the preiminent worth of the spiritual means. (5) Andrew, the gnostic reasoner, said: “Aegaeates being a town in the vicinity of Patrae on the Corinthian Gulf. (Patrae is not actually mentioned in the fragmentary Acts, but that the scene of the imprisonment and martyrdom of Andrew is laid in that city may be inferred from the name “Aegeates” and the narrative 4 [2].) Ecclesiastical tradition speaks with great uncertainty of the sphere of Andrew’s missionary labors, Scythia, Bithynia and Greece being all mentioned. It may be regarded as probable that Andrew came to Greece and suffered martyrdom at Patrae, although one must reckon with the possibility that the account of his work and crucifixion there was invented for the purpose of representing the church at Patrae as an apostolic foundation. The crucifixion of the apostle on the so-called St. Andrew’s cross is a later legend. 

V. Acts of Thomas.—These Acts exist in a complete state and their great popularity in church circles is shown by the large number of MSS which contain them. It is probable that they were written by a gnostic in the first half of the second century, and may be translated into Gr and worked over from the Catholic point of view.

In the Stichometry of Nicephorus the Acts of Thomas are mentioned as containing 1,600 stichoi (or verses) or a moderate length in comparison with the first two figures. Some idea of the contents may be given as follows:

1. Contents fifth fewer than the Gospel of Mark. If this notice is correct, the form in which we have the Acts is very much extended.

In the Gr version the Acts are divided into thirteen "dichota" (sections). After each of these sections the text explains "a man who belongs to Jesus because he is known of Him is armed against every vengeance." For three days and nights Andrew addressed the people from the cross, and they, moved by his nobility and eloquence, went to Aegeates, demanding that he should be delivered from death. Aegeates, fearing the wrath of the people, went to take Andrew down from the cross, but the apostle refused deliverance and prayed to Christ to prevent his redemption. Andrew was buried by Maximilla, and Aegeates soon afterward cast himself down from a great height and died. The enigmatic ideal in its most pronounced form is exhibited in the Acts of Andrew. (In view of the ecclesiastical tradition with a strict asceticism, there is a curious irony in the fact that in some parts of Germany Andrew is the patron saint of maidens seeking husbands. In the Harz and in Thuringia St. Andrew’s Night [November 30] is considered by maidens the most favorable time for the vision of their future husbands.) The gnostic spirit is revealed in the feeling for the preiminent worth of the spiritual means. (5) Andrew, the gnostic reasoner, said: “Aegaeates being a town in the vicinity of Patrae on the Corinthian Gulf. (Patrae is not actually mentioned in the fragmentary Acts, but that the scene of the imprisonment and martyrdom of Andrew is laid in that city may be inferred from the name “Aegeates” and the narrative 4 [2].) Ecclesiastical tradition speaks with great uncertainty of the sphere of Andrew’s missionary labors, Scythia, Bithynia and Greece being all mentioned. It may be regarded as probable that Andrew came to Greece and suffered martyrdom at Patrae, although one must reckon with the possibility that the account of his work and crucifixion there was invented for the purpose of representing the church at Patrae as an apostolic foundation. The crucifixion of the apostle on the so-called St. Andrew’s cross is a later legend.
instructed by Thomas to exorcise the demons which dwelt in the women. (9) A woman, Mygdonia, married to Charis, narrates in the likeness of King Midas, who listened to a discourse of the apostle and was led to reject the society of her husband. Charis complained to the king about the magician who had put a spell upon his wife and Thomas was cast into prison. At the request of his fellow-prisoners Thomas prayed for them and recited a hymn (known as "the hymn of the soul") which is entirely gnostic in character. (10) Mygdonia received the seal of Jesus Christ, being first anointed with oil and anointed him using the Eucharist in bread and water. Thomas was released from prison, and Sifor, his wife and his daughter all received the seal. (11) Tertia the queen was sent by Midas to reason with Mygdonia and as a result she herself was won by the apostle; and then brought to the place of judgment. (12) There Vazan, the king's son, talked with the apostle and was converted. The king gave orders that Thomas should be tortured with hot plates of iron, but when these were applied he received the seal of Midas and submerged them. Then follow an address and prayer of Thomas in prison. (13) The apostle was visited in prison by the women and by Vazan and thereafter Vazan along with others were also received by Thomas: we are told that Thomas, coming from prison to Vazan's house for this purpose, (14) Thomas was put to death by the command of the king, being pierced with lances, but afterward he showed himself to his followers. Later anecdotes of his having been a twin-brother of an unclean spirit by dust taken from the apostle's grave and Midas himself became a Christian.

The Acts of Thomas are in reality a treatise in the form of a travel-romance whose main design was to set forth abstinence from sexual intercourse as the indispensable condition of salvation. In the addresses and Tendency of Thomas, however, positive Christian imagery is strikingly exhibited in the story of the building of the heavenly palace. The Acts clearly had their origin in gnostic circles and were held in high estimation by various reciter sects. The original Acts underwent revision in the interest of orthodoxy. The hymns and dedication-prayers which showed marked gnostic features were probably retained because their meaning was not understood. A Lapithaean version of the "the hymn of the soul," and the "prayer of this precious relic of gnostic poetry we owe to the happy ignorance of the Catholic reviser, who had no idea what heretical serpent lurked beneath the beautiful flowers of this poem."

The hymn, probably written by Bardesanes, the founder of a gnostic sect, narrates in the form of an allegory the descent of the soul into the world of sense, its forgetfulness of its heavenly origin, its deliverance by the Divine revelation when awoke to a consciousness of its true dignity, and its return to the heavenly home from which it came. In the opinion of some, however, the hymn is falsely called "the hymn of the soul." As Preuschen says: "It describes rather the descent of the Saviour to the earth, His deliverance of the soul which languishes there in the bondage of evil, and His return to the heavenly kingdom of light. One may characterize the whole as a gnostic embellishment, and extension of Phil 2: 5-11."

The letter attributed to Our Lord is given in Eusebius (HE, I, 13) who records that in his day a copy of the letter was to be found among the archives of Edessa. Abgar, the king of Edessa, a small country in Mesopotamia, writes from Edessa, the capital, to Our Lord, asking for healing and offering Him protection. Our Lord sends back a short letter saying that He cannot leave Palestine, but that, after His ascension, a messenger will come and heal Abgarus. The letters are obviously spurious. Osroene was actually Christianized about the beginning of the 3d cent., and the legend took shape and received official sanction in order to show that the country

3. Historical Value

The author however has made use of the name of Thomas, the King of Gondar (Vindafra) is known from other sources as an Indo-Parthian ruler in the 1st cent. AD. It is very doubtful whether the tradition preserved in the Acts as to the activity of Thomas in India is trustworthy. The earliest tradition with which we are acquainted places the sphere of his missionary labors in Parthia. Syrian tradition states that he died at Edessa, where in the 4th cent. there was a church dedicated to him. Thomas is also indirectly associated with Edessa in the Apocalypse, in which we read that Thaddæus who founded the church at Edessa was sent by Thomas. In the existing form of the Acts of Thomas we have a combination of the traditions regarding India and Edessa: we are told that apostle's death his bones were carried "into the regions of the West." Early tradition knows nothing of Thomas as a martyr; according to a statement of the Valentinian Heracleon (cir 170) quoted by Clement of Alexandria, Ap. IV, 9, the apostle died quietly in his bed. The name of the apostle is given in the Acts as Judas Thomas, and this is also found in the Doctrine of Addai and elsewhere. The statement in the Acts that the apostle was also called "Twin" is probably suggested by the meaning of the name Thomas (= "twin") and by the desire to enhance the dignity of the apostle. In 110 (In the Hymn of the Soul) there is a reference to the still existing Parthian kingdom, and as that kingdom came to an end in 227 AD, the poem must have been written before that date. The hymn, however, does not seem to have belonged to the original Acts, which probably were in existence before the end of the 2nd cent.

Literature—Besides books mentioned under "Literature" (p. 188) Thilo, Acta Sancti Thomae apostoli (1852); Hofmann, ZNTW, 32 (1903), 373-399; F. Baur, Studies in the Spiritual Hymn of Connecticut (1904); Hilgenfeld, ZWF (1904), 229-241.

The Syrian Acts of Thomas were ed and tr. by W. Wright, A gnostic pseudepigrapha and the Apocalypse of Pseudo Thomas, Texts and Studies, V, 3 (1897). The later Ethiopic version is found in Malin, The Conflicts of the Holy Apostles (1871), and in Budge, The Contendings of the Apostles (2 vols containing Ethiopic text and tr, 1899-1901).

APOCRYPHAL EPISTLES, a-pok'-ri-fal e-pis't-lz: A few epistles have been attributed to the Virgin Mary, but these are very late and without value. The following epistles fall to our Lord:

1. Letter To His Mother

2. Letter To Our Lord

The letter attributed to Our Lord is given in Eusebius (HE, I, 13) who records that in his day a copy of the letter was to be found among the archives of Edessa. Abgarus, the king of Edessa, a small country in Mesopotamia, writes from Edessa, the capital, to Our Lord, asking for healing and offering Him protection. Our Lord sends back a short letter saying that He cannot leave Palestine, but that, after His ascension, a messenger will come and heal Abgarus. The letters are obviously spurious. Osroene was actually Christianized about the beginning of the 3rd cent., and the legend took shape and received official sanction in order to show that the country
had received the Gospel at a much earlier date. See Apgar.

The Clementine Homilies is a work of fiction attributed to Clement of Rome; it was actually written about the end of the 2d cent. or the beginning of the 3d. At the beginning of it there is a set of letters of Peter to James. In it Peter counsels James not to show the book containing Peter’s preaching except to a limited circle, and makes a violent attack upon the apostle Paul. It is thus evidently Ebionitic in tendency, and is, like the homilies as a whole, probably spurious. See Colossians; Ephesians; Epistle to the Hebrews.

(2) Lost Epistle to the Corinthians.—In 1 Cor 5:9 a letter to the Corinthians is mentioned which appears to have been lost. In a 5th cent. Armenian VS of the Scriptures there is inserted after 2 Cor a short letter of the Corinthians to Paul, and one from Paul to the Corinthians. These are also found in Syr., and were evidently accepted in many quarters as genuine at the end of the 4th cent. They formed a part of the Apocryphal Acts of St. Paul, and date from about 200 AD. See Corinthians.

(3) An Epistle to the Alexandrines.—This is mentioned only in the Muratorian Fragment, and has not come down to us.

(4) Letters of Paul to Seneca.—This is a correspondence in Latin, six of the letters being attributed to Paul and eight to Seneca. Regarding this correspondence Lightfoot says: ‘This correspondence was probably forged in the 4th cent., either to recommend Seneca to Christian readers, or to recommend Christianity to students of Seneca.’ It had a wide circulation in the Middle Ages.

LITERATURE.—See: “Apocrypha” in EB and RE. For text of Peter’s letter to James, see Roberts and Donaldson’s Greek Christian Library, XVII. For the Pauline letters consult Zahn, Geschichte des NT Kanons, II, 190, 210-19. Lightfoot’s commentary on Col (where the text of the letter is given) and for the letters to Seneca, Lightfoot’s Comm. on Phil. Dissertation II, with Appendix.

APOSTRYPHAL GOSPELS, a-pok’ri-fal gos’pels:

I. INTRODUCTORY

1. Early Gospels
2. Canonical Gospels
3. Apocryphal Gospels
4. Gospel according to the Hebrews

II. HEBRETLICAL GOSPELS

1. Gospel of the Ebionites
2. Gospel of the Egyptians
3. Gospel of Marcion
4. Gospel of Peter
5. Gospel of the Twelve Apostles
6. Gospels of Barnabas and Bartholomew

III. SUPPLEMENTARY OR LEGENDARY GOSPELS

1. Gospels of the Nativity
   (a) Gospel of Mary of Egypt
   (b) Gospel of Joseph James
   (c) Gospel of Mary James
2. Gospels of Infancy or Childhood
   (a) Gospel of Thomas
   (b) Arabic Gospel of the Childhood
3. Gospels of Passion and Resurrection
   (a) Gospel of Peter (as above)
   (b) Gospel of Nicodemus containing
      (1) Acts of Pilate
      (2) Descent of Jesus into the Lower World
   (c) Other Fabrications

The apocryphal gospels form a branch of the apocryphal literature that attended the formation of the NT canon of Scripture. Apocryphal here means non-canonical. Besides gospels, this literature included acts, epistles and apocalypses.

1. Introductory.—The introduction to the third canonical Gospel shows that in the days of the writer, when the apostles of the Lord were still living, it was a common practice to write and publish accounts of the acts and words of Jesus. It has even been maintained (S. Barag-Gould, Lost and Hostile Gospels, p. 195) that it is a marked feature of the close of the 1st cent., almost every church had its own gospel with which alone it was acquainted. These were probably derived, or professed to be derived, from the oral reports of those who had seen, heard, and it may be said, only four gospels, as "pillars" of the church. The Harmonies of Theophilius, bishop of Antioch (168-80 AD), and of Tatian, and the Apology of Justin Martyr carry back the tradition to a much earlier period of the cent., and, as Liddon proves at considerable length (Bampton Lectures, 2d ed., 210-19), it is scarcely too much to assert that every decade of the 2d cent. furnished its share of proof that the four Gospels as a whole, and St. John’s in particular, were to the church the same as "the pillars of the present." The recent attempt of Professor Bacon of Yale to get rid of the important authority of Irenaeus (The Fourth Gospel in Research and Debate, New York, 1910) will not succeed; it has been shown to be merely assertive where there is no evidence and agnostic where evidence is apparently demonstrative. During the last cent. the Gospels, as regards their composition, credibility and historicity, were subjected to the most searching and unspurring criticism, though, in point of fact, were never previously wanting, may be said to have begun when Strauss, to use Liddon’s words, “shocked the conscience of all that was Christian in Europe” by the publication of his first Life of Jesus. The methods pursued in this work consisted largely in the application to the sacred books, and especially to the Gospels, of the principles of criticism that had for forty years previously been used in estimating the structure and composition of some of the literary products of antiquity; and the controversy excited by this criticism can hardly yet be said to have subsided. This is not the place for entering upon an account of the controversy; it may be sufficient here to say that the traditional positions of the church have been ably defended,

LITERATURE.
and in particular, that the claims of the canonical Gospels have been abundantly maintained. Whatever was the fate of the antecedent and other possible 1st-century gospels, with the 2d cent. and the formation of an authoritative canon that the apocryphal gospels, such as we now have, for the most part begin to appear. In the days of the reproductions of documents by manuscript, of restricted communications between different localities, and when the church was only as yet forming and completing its organization, the formation and spread of such gospels was not, as from that number of such gospels is very considerable, amounting to about fifty. These exist mainly in fragments and scattered notices; though some, as pointed out below, are either entire or nearly so. The apparent bewildering of the minds of the foolish" and Eusebius (HE, III, 25) gives the following list of spurious and disputed books: "That we have it in our power to know both these books [the canonical] and those that are adduced by the heretics under the name of the apostles such as the gospels of Peter, of Thomas, and of Matthew, and certain others beside these or such as contain the Acts of Andrew and John, and of the other apostles, of which no one of those writers in the ecclesiastical scriptures who say away much in his works: and, indeed, the character of the style itself is very different from that of the apostles, and the sentiments, and the purport of these things that are advanced in them, deviating as far as possible from sound orthodoxy, evidently prove they are the fictions of heretical men: whence they are not only to be ranked among the spurious writings but are to be rejected as altogether absurd and impious." In the appendix to Westcott's Introduction to the Study of the Gospels will be found, with the exception of those recently discovered in Egypt, a complete list of the non-canonical sayings and deeds ascribed to Our Lord as recorded in the patristic writings; and also a list of the quotations from the non-canonical gospels where these are only known by quotations.

The aim of the apocryphal gospels may be regarded as (1) heretical or (2) supplemental or legendary: that is to say, such as either were framed in support of some heresy or such as serve the canonical gospels and try to make additions—largely legendary—to them. Before considering these it may be well to take separate account of the Gospel according to the Hebrews.

The undoubted early date of this gospel, the character of most of its not very numerous quotations, the respect with which it is uniformly mentioned by early writers, and the esteem in which it is at present held by scholars in general, entitle the Gospel according to the Hebrews to special notice. Apart from the tradition, to which it is not necessary to attach too great importance, that represented Our Lord as commanding His disciples to remain for twelve years in Jerusalem, it is reasonable to suppose that for the Christian communities resident in Jerusalem and Pal a written gospel in their own language (Western Aram.) would soon be a necessity, and such a gospel would naturally be used by Jewish Christians of the Diaspora. Jewish Christians, for example, settled in Alexandria, might use this gospel, which, like Salmon and Harnack, are disposed by Harnack, might use the Gospel of the Egyptians, till of course both were superseded by the four Gospels sanctioned by the church. There is no proof however that the gospel was earlier than the Synoptics, or that it may represent a pre-Lukan gospels. Harnack, indeed, by a filiation of documents for which there seems hardly sufficient warrant, placed it as early as between 65 and 100 AD. Salmon, on the other hand (Intro, Lect X) concludes that "it is probable that being the mother, or even the sister of one of our canonical four, can only claim to be a grand-daughter or grand-niece." Jerome (400 AD) knew of the existence of this gospel and says that he translated it into Latin and quoted from it in his works and in those of Clement of Alexandria. Its relation to the Gospel of Matthew, which by almost universal consent is declared to have been originally written in Heb (Id. Aram.), has given rise to much controversy. The prevalent view among scholars is that it was not the original of which Matthew's Gospel was a Gr tr, but still that it was a fairly early composition. Some, like Salmon and Harnack, are disposed by regard Jerome's Heb Gospel as to all intents a fifth gospel originally composed for Palestinian Christians, but which became of comparatively insignificant value with the development of Christianity into a non-Jewish religion. It would however seem to have referred to the baptism of Jesus and a few of his sayings, such as—"Never be joyful except when ye shall look upon your brother in love"; "Just now my Mother, the Holy Spirit, took me by one of my hairs and brought me away from the things of Thabor"—it records the appearance of Our Lord to James after the resurrection, adduced by Paul (1 Cor 15 7) as one of the proofs of that event; but of course Paul might have learned this from the lips of James himself as well as from ordinary tradition, and not necessarily from this gospel. This indeed is the principal detail of importance which the quotations from this gospel add to what we know from the Synoptics. In other divergences from the Synoptics where the same facts are recorded, it is possible that the Gospel according to the Hebrews may relate an earlier and more reliable tradition. On the other hand, the longest quotation, which gives a version of Christ's interview with the Rich Young Ruler, would seem to show, as Westcott suggests, that the Synoptics give the simpler and therefore the earlier form of the common narrative. Many scholars, however, allow that the few surviving quotations of this gospel should be taken with caution in constructing the life of Christ. The Ebionite gave the name of Gospel of the Hebrews to a mutilated gospel of Matthew. This brings us to the heretical gospels.
II. Heretical Gospels.—The Ebionites may be described generally as Jewish Christians who aimed at retaining the doctrines and practices of the OT and may be taken as representing the Ebionites originally the extreme conservative section of the Council of Jerusalem mentioned in Acts 15:1-29. They are frequently mentioned in patristic literature from the 2d to the 4th cents., and the prolonged gnostic controversies of those times may well have founded among them different sects or at least parties. Accordingly Jerome, in a work of the mid-4th century states (Ep ad August. 122 13) that he found in Pal Jewish Christians known as Nazarenes and Ebionites. Whether these were separate sects or simply supporters of more liberal or narrower views of the same sect cannot well be determined. Some, such as Harnack and Uhlhorn, have held that the two names are general designations for Jewish Christians; others regard the Ebionites as the most retrograde and the narrowest of Jewish Christians, while the Nazarenes were more tolerant of the belief and practice. The Gospel of the Ebionites or the Gospel of the Twelve Apostles, as it was also called, represented along with the Gospel of the Hebrews (noticed above) this Judaico-Christian spirit. Some fragments of the Gospel of the Ebionites are preserved in Epiphanius (d. 370). He speaks of the Nazarenes as “having the Gospel according to Matthew in a most complete form, in Heb” (i.e. Arama.,) though he immediately adds that he does not know whether they “forged the genealogies from Abraham to Christ,” that is to say, whether they accepted or rejected the virgin birth of Christ. In contrast with this statement he says that the Ebionites had a gospel “called the Gospel according to Matthew, not written carefully complete, but falsified and mutilated, which they call the Hebrew gospel.” The extant fragments from the gospel are given in Westcott (Intro, 437 f.). They “show that its value is quite secondary and that the author has simply compiled it from the canonical, and especially from the Synoptic Gospels, adapting it at the same time to the views and practices of gnostic Ebionism” (DCG, I, 505).

Three short and somewhat mystic verses are all that are left of what is known of the original Gospels of the Egyptians. They occur in Book III of the Stromaten of Clement of Alexandria, who devoted that book to a refutation of Encratism, that is, the rejection, as absolutely unlawful, of flesh meat and of wine. Already in the Pauline Epistles are met parties with the cry (Col 2 21) “Handle not, nor taste, nor touch,” and (1 Tim 4 3) “forbidding to marry, and commanding to abstain from meats.” The vs in Clement read as follows: “When Salome asked how long will death prevail? The Lord said, As long as ye women bear children: for I have come to destroy the function of women. And Salome said to him: Did I not well then in not bearing children? And the Lord answered and said, Eat of every herb, but do not eat of that which is bitter. And when Salome asked when the things would be known about which she had enquired, the Lord said, When ye trample on the garment of shame, and when the two shall be one, and the male with the female not male nor female.” The words assuredly vary much from the usual character of those of Our Lord. Modern writers vary as to their enigmatic tendency and as to how far Gospel of the Egyptians was passed. With so little material it is not easy to form a conclusion. It may have contained other passages on account of which Origen deemed it heretical. It was used by the Naassenes and Sabellians. The date of the Gospel is between 130 and 150.

The Gospel of Peter has sometimes been supposed to have been mentioned in patristic writings but those of Paul. This work forms a striking example of what liberties, in days before the final formation of the canon, could be taken with the material. As a result the most revered documents of the faith, and also as showing the free and practically unlimited nature of the controversy, of which the canon as finally adopted was the result. He rejected the OT entirely, and of the NT retained only the Gospel of Lk, as being of Pauline origin, with the omission of sections depending on the OT and ten epistles of Paul, the pastoral epistles being omitted. The principal Church Fathers agree upon this corruption of Lk’s Gospel by Marcion; and the main import of his gospel is that in modern controversy it was for some time assumed to be the original gospel of which Lk’s Gospel was regarded as merely an expansion. The theory was shown first in Germany and afterwards demonstrated to be quite untenable. It was lately revived by the author of Supernatural Religion; but Dr. Sanday’s work on The Gospels in the Second Century (ch viii) may be said to have closed the controversy. (Cf also Salmon’s Introduction).

Until about a quarter of a cent. ago no more was known of the Gospel of Peter than of the crowd of heretical gospels referred to above. From Eusebius (HE, VI, 199) it was known that a Gospel of Peter was in use in the church of Rhossus, a town in the diocese of Antioch at the end of the 2d cent., that controversy had arisen as to its character, and that after a careful examination of it Eusebius, bishop of Antioch (199-203), had condemned it as doctetic. Origen (d. 253 AD), in his commentary on Mt 10 17, refers to the gospel as saying that “there are certain brothers of Jesus, the sons of Joseph by a former wife, who lived with the Gospel of Peter.” It is said in HE, III, 3, 2 knows nothing of the Gospel according to Peter being handed down as a catholic writing, and in HE, III, 25, 6 he includes the Gospel of Peter among the forged heretical gospels. Theodoret, a century later, also says (d. 253) that the Nazarenes used a gospel called “according to Peter.” The gospel is also referred to in Jerome (De Viris Ilustris, ch I) and is condemned by the Decretum Gelasianum (496). Salmon (Intro, 231) remarks: “Of the book no extracts have been preserved, and apparently it never had a wide range of circulation.” These words were written in 1855. In the following year the French Archaeologist Mariette, working in upper Egypt, found in a tomb, supposed to be a monk’s, at Akhmim (Panopolis), a parchment containing portions of no less than three lost Christian works, the Book of Enoch, the Gospel of Peter and the Apocalypse of Peter. The text was published in 1892 and has given rise to much discussion. The gospel has been carefully reproduced in facsimile and edited by competent scholars. The fragment is estimated to contain about half of the original gospel. It begins in the middle of the story of the Passion and just after Pilate has washed his hands from all responsibility and ends in the middle of a sentence when the disciples at the end of the Feast of Unleavened Bread were betaking themselves to their homes. ’But I Simon Peter,
the ostensible writer] and Andrew my brother took our mother and went to the sea; and they were with the fishermen. And the word of God came to Simon. (Mark xii. 28, 29.)

Harnack (Texte und Untersuchungen, I X, 2, 2d ed., 76) exhibits about thirty new traits contained in the Petrine account of the Passion and burial. These are given in detail in an additional volume of the Ante-Nicene Library: Recently Discovered MSS, etc., Edinburgh, 1897. But Dr. Swete (Gospel of Peter, xv, London, 1893) shows that "even details which seem to be entirely new or which directly contradict the canonical narrative, may have been suggested by it", and concludes that the list was given a large amount of new matter which it contains, "there is nothing in this portion of the Petrine Gospel which compels us to assume the use of sources other than the canonical gospels." To Professor Orr (NT Apocryphal Writings, s.xf) the gnostic origin of the gospel seems clear in the story given of the Resurrection; and its docteric character—that is, that it proceeded from those who held that Christ had only the semblance of a body—from the statement that on the cross Jesus was silent as one who felt no pain, and from the dying cry from the cross, "My power, my power, thou hast forsaken me," the really Divine Christ having departed before the crucifixion. The date of the gospel has been placed in the first quarter of the 2d cent. and by others in the third quarter, of the 2d cent. For the other newly discovered "Sayings of Jesus," see LOGIA.

A Gospel of the Twelve is mentioned by Origen (Hom. I, in Luc.), and a few fragments of it are preserved in Codex Eusebianus (Harn. 39 13–16, 24). It commenced with the baptism, and was used by the Ebionites. It was written, Zahn thinks, about 170 AD. A Gospel of Barnabas and Gospel of Bartholomew are condemned in the decree of Pope Gelasius. The latter is mentioned by Jerome (Proem ad Matt.).

III. Supplemental or Legendary Gospels.—In all of the gospels of this class it is noteworthy that considering the desire of the writers of non-canonical gospels to multiply miracles, no notice is taken of the period in the life of Christ that intervened between his twelfth year and his thirtieth. The main reason for the omission probably is that no special dogmatism was given by the narratives of this period of the Saviour's life. Where access cannot be had to these documents in their original languages, it may be useful to point out that a good and full translation of them may be found in Vol. I of Clarke's Ante-Nicene Library, Edinburgh, 1870.

1. The Gospel of the Nativity: (a) The earliest of these documents is the Protevangelium of James. James is supposed to be the Lord's brother. The title "Protevangelium" or First Gospel—a catching title which assumes much and suggests more—was given to this document byPostellus, a Frenchman, who first published it in 1508 in the Greek and Syriac MSS, it is known by various other titles, such as, The History of James concerning the Birth of the All-Holy and Ever-Virgin Mother of God and of Her Son Jesus Christ. Tschen dorff in the notes to ch. i of his Evangel. Apoc gives a long list of the names descriptive of it in the various MSS. In the Gelasian Decree depriving it of canonical authority it is simply styled Evangelium nomine Jacobi minoris apocryphon. In this document the birth of Mary is foretold by angelic announcement to Joachim. Following this announcement was that of Jesus to Mary. It contains in twenty-five chs the period from this announcement to the Massacre of the Innocents, including accounts of the early training of Mary in the temple, the Lukan narrative of the birth of Christ with some legendary additions, and the death of Zacharias by order of Herod for refusing who gave information regarding the place of concealment of Elisabeth and the child John who, in their flight during the massacre, are miraculously saved by the opening of a mountain. At ch 18 a change takes place in the narrative from the third to the first person, which has been taken (NT Apoc. Writings by Professor Orr, D.D., London, 1903) to suggest an Essene-Ebionitic origin for the document, and at least to argue for it a composite character, which again may account for the large amount of new matter which it contains. It has been assigned (EB, I, 259) to the 1st cent. Zahn and Krüger place it in the first decade, many scholars in the second half of the 2d cent., while others (e.g. Harnack) place it in its present form as late as the middle of the 4th cent. Good scholars (Sandy, The Gospels in the Second Cent.) admit references to it in Justin Martyr which would imply that possibly in some other form it was known in the first half of the 2d cent. In its latest form the document indicates the obvious aim of the writer to promote the sanctity and veneration of the Virgin. It has been shown to contain a number of unhistorical statements. It was condemned in the western church by Pope Damasus 1 (385) and by others in the third quarter of the 4d cent. (b) A forged correspondence between Jerome and two Italian bishops supplied a substitute in the Gospel of the Pseudo-Matthew, which Jerome was falsely represented to have rendered in Lat from the original Heb of Mt. The gospel is known only in Latin and, as already indicated, is not earlier than the 5th cent. The Protevangelium is freely used and supplemented from some unknown (probably gnostic) source, and further miracles especially connected with the sojourn in Egypt have been wrought into it with others added from the Childhood Gospel of Thomas. Some of the miracles recorded of Egypt are represented as fulfilments and by theNarrative of this period the infant Jesus by dragons recalls the fulfilment of what was said by David the prophet: "Praise the Lord from the earth, ye dragons: ye dragons and all ye deeps"; or as when ch. 19 lions and leopards and wild beasts were feeding among the countryside the wilderness, bowing their heads and wagging their tails and adoring Him with great reverence, which was regarded as a fulfilment of the prophecy: "Wolves shall feed with lambs and the lion and the lamb shall eat together." In this gospel, too, appears for the first time the notice of the ox and the ass adoring the child Jesus in the manger, of which much was made in Christian art. The gospel is further eked out by the relation of several other miracles connected with the Gospel of the Childhood.

(c) The Gospel of the Nativity of Mary was written in Lat. It goes over much the same ground as the earlier portion of the Pseudo-Matthew, but so differs from it as to the names of Mary and of her mother, so that the author. It includes more of the miraculous element and daily angelic visits to Mary during her residence in the temple. This gospel makes Mary leave the temple in her 14th year; the central idea is that the narrator is represented as the Son of Mary Himself, she left the temple in her 12th year, having lived in it nine years. It was for long held to be the work of Jerome, and from this gospel was almost
entirely formed the "Golden Legend" which largely took the place of the Scriptures in the 13th cent. throughout Europe before the invention of printing. It was among the books early printed in some countries where (as in England) it might not be safe to print the Scriptures. Its service to mediæval life... amicable terms that it was a forgery deliberately introduced into the service of the church about the 6th cent., when the worship of Mary was specially promoted in the church.

(a) To the same class of compositions belongs the Gospel of Joseph the Carpenter. Originally written in Coptic, it was translated into Arab., in which language with a Lat. VS it was published in 1722. They took their title from a... they are of some importance for the history of dogma.

(b) Transitus Mariæ: although not strictly a gospel of the Nativity notice may here be taken of the account of St. John the Theologian (Couch) and the Narrator of the Gethsemane. The text appears in Gr., but it contains in 22 cts the whole history of Joseph and relates in the last part the circumstances of his death at the age of 111 years. These are of some importance for the history of dogma.

5. The Passing of Mary commonly called "the Passing of Mary" (transitus Mariae). It was originally written in Gr, but it appears also in Lat and several other languages. This text, it seems, after the ascension of Jesus, Mary, who paid frequent visits to the "Holy tomb of our Lord to burn incense and pray" was persecuted by the Jews and prayed her Son that He would take her from the earth. The angel Gabriel brings an answer to her prayers and announces that after three days she shall go to the heavenly places to her Son, into true and everlasting life. Apostles from their graves or from their dioceses are summoned to her bedside at Bethlehem and relate how they were occupied when the summons reached them. Miracles of healing are wrought round the dying bed; and after the instantaneous transportation of Mary and the attendant apostles to Jesus, on the Lord's Day of the Ascension of Mary, it appears and receives her soul to Himself. Her body is buried in Gethsemane and thereafter translated to Paradise. Judged by its contents which reveal an advanced stage of the worship of the Virgin and of the liturgy, the document cannot have been produced earlier than the end of the 4th or the beginning of the 5th cent., and it has a place among the apocryphal documents condemned by the Gelasian Decree. By this time indeed it appears as if the writers of such documents assumed the most unrestricted license in imagining and embellishing the facts and situations regarding the gospel narrative.

2. The Gospels of the Childhood: (a) Next to the Protevangelium the oldest and the most widely spread of the apocryphal gospels is the Gospel of Thomas. It is mentioned by Origen and Ireneæus and seems to have been used by a gnostic sect of the 2d cent. It was doctestic as regards the miracles recorded in it and on this account was also acceptable to the Manichees. The author was one of the Marcionites referred to by Ireneæus. Great variations exist in the text of which there are 27000 in Gr., 2400 in Lat and 3000 in Syr. One of the Gr versions is considerably longer than the other, while the Lat is somewhat larger than either. They are very largely concerned with a record of miracles wrought by Jesus before He was 12 years of age. They depict Jesus as an extraordinary but by no means a lovable child. Unlike the miracles of the canonical Gospels those recorded in this gospel are mainly of a destructive nature and are whimsical and puerile in character. It rather shocks one to read that it accords with the Lucæan Christ. The wonder-worker is described by Renan as "un génie omnipotent et omniscient," wielding the power of the Godhead with a child's waywardness and petulance. Instead of being subject to His parents He is a serious trouble to them; and instead of growing in wisdom He is represented as forever eager to teach His instructors, and to be omniscient from the beginning. The parents of one of the children whose death He had caused entreat Joseph, "Take away that Jesus of thine from this place for he cannot dwell with us in this town; or at least teach him to bless and not to curse." Three or four miracles of a beneficent nature are mentioned; and in the Lat gospel when Jesus was in Egypt and in his third year, it is written (ch. 3), 'And seeing other boys playing he began to play with them and he took a dried fish and put it into a basin and ordered it to move about. And it began to move about. And he said again to the fish: 'Throw out the salt which thou hast, and walk into the water.' And without a word it obeyed, and it was restored to life, and the days of the marriage (in Egypt) were over when that had been done, told it to the widowed woman in whose house Mary his mother lived. And as soon as she heard it she thrust them out of her house with great haste." As Westcott points out in his 'Intro to the Study of the Gospels,' these apocryphal miracles we find no worthy conception of the laws of Providential interference; they are wrought to supply present wants or to gratify present feelings, and often are positively immoral; they are arbitrary displays of power, and without any spontaneity on our Lord's part or on that of the recipient. Possibly the compilers of the 1st cent. narratives above mentioned had in many cases deemed it expedient to make the miraculous an essential—even a too prominent—part of their story; and this may be the reason why John in the opening of the Fourth Gospel declared all the reported miracles of the Childhood to be unauthorized by the statement that the things that he had performed, "if many of his miracles were wrought... were only the beginning of the public ministry... at the marriage of Cana of Galilee. "This beginning of his signs did Jesus in Cana of Galilee, and manifested his glory; and his disciples believed on him" (John 2.1). (b) The Arab. Gospel of the Childhood is a composite production. Though first published in Arab. with a Latin translation in 1697, its Syr origin may be inferred from the use of the era of Alexander the Great in ch. 2, from the acquaintance of the writer with oriental learning, and from that of the child Jesus, when in Egypt, with astronomy and physics. The popularity of the book among the Arabs and Persians may also be explained by the fact that the most important of its miracles take place during the Sojourning in Egypt. It is noteworthy also that according to this gospel (ch. 7) it was on the ground of a prophecy of the Magi that the neighbors of the Messiah that the Magi undertook their journey to Bethlehem. Some of its stories also appear in the Koran and in other Mohammedan writings. Chs 1—9 are based on the canonical Gospels of Matthew and Luke and on the Protevangelium of James; while chs 26—29 are derived from the Gospel of Thomas. The intermediate portion of the work is thoroughly oriental in character and reads like extracts from the Arabian Nights. It is not easy to treat seriously the proposal to set productions...
like these on anything approaching equality with the canonical Gospels. The gospel also has much to do with the "curious state of the Viaticum.

3. Gospels of the Passion and Resurrection: The principal documents in this connection are the Gospel of Nicodemos and to some extent, as above shown, the Gospel of Pilate, the two of Peter. The Gospel of Nicodemos is a name given not earlier than the 13th cent. to a duplicate composition the two parts of which were (1) the Acta Pilati or Acts of Pilate and (2) the Descent of Christ to the Lower World. The document professes to be a translation into Gr from the Heb, and to have been made in the 17th year of the emperor Theodosius and the 6th of Valentinian. It exists in six forms, two Gr and one Lat of the Acts of Pilate, and two Lat and one Gr of the Descent to the Lower World. The general consensus of scholars places the composition in the 8th cent., though Tischendorf, relying upon references in Justin and Tertullian, places it in the 2d, a date by which it is quite possible for the legend to have arisen. Possibly there has been some confusion between the report on the proceedings connected with the trial and crucifixion of Jesus that had to be furnished to the emperor, as required by the rules of the Rom civil service, and the extended record of the proceedings contained in the Gospel of Nicodemos. The writer was obviously a Jewish Christian. He wrote for this class and was anxious to establish his record by evidence from the mouths of the enemies of Jesus and especially of those who witnessed the crucifixion. The events before and after the death of Jesus. Pilate in particular is shown to be favorable to Jesus and— a gap that must have struck many readers of the canonical narratives—several of those on whom the burden of hell was wroth, come forward to give evidence in favor of Jesus— a most natural step for a late narrator to suppose as having taken place in a regular and formal trial, but one which, as may be gathered from the silence of the canonical writers, was omitted in the turbulent proceedings of the priestly conspiracy that ended with the crucifixion. With all the writer's acquaintance with Jewish institutions "he shows himself in many points ignorant of the topography of Galilee and Syriac, and of the Hellenic and Gr section of the garden in which he was seized (ch 9) and places Mt. Mamilch or Malek (S. of Jerus) in Galilee, and confounds it with the Mount of Ascension" (Orr, op. cit., xx). The second part of the gospel—The Descent of Christ to the Lower World—gives an account of an early and widely accepted tradition not mentioned in any canonical Gospel but based upon 1 Pet 3:19: "He went and preached unto the spirits in prison." Two saints who were raised at His resurrection relate how they had been confined in Hades when the Conqueror appeared at its entrance, how the gates of brass were broken and the prisoners released, Jesus taking with Him to Paradise the souls of Adam, Isaiah, John the Baptist and other holy men who had died before Him. The document is purely imaginary: its only importance is in showing how this article of the creed was regarded in the 4th cent.

Of even less importance are some late fabrications referring to Pilate sometimes in the MSS attached to the Gospel of Nicodemos, such as Pilate's Letter to the emperor Tiberius; Pilate's Official Report, above referred to; the Paradoses of Pilate and the Death of Pilate, who, after condemnation to the most bitter death, was crucified by his own hand. In the Narrative of Joseph of Arimathea the writer gives a loose rein to his imagination. The study of the documents above described fully justifies the observation of the editors of the Ante-Nicene Library that while they afford us "cursory glimpses of the early state of Christian science, and of modes of thought in the first centuries of our era, the predominant impression which they leave on our minds is a profound sense of the immeasurable superiority, the unapproachable simplicity and majesty, of the Canonical Writings."

LITERATURE.—In addition to the books quoted above may be mentioned the following: Fabricius, Codex Apophthegmatis, and the collation by Tischendorf and Thilo (1832); Tischendorf, Gospels, 1853; Ellicott, "On the Apocryphal Gospels" in Cambridge Essays, 1866; Lipsius, "Die Apokryphen" in Die Quaere Scientiae, 1878; Dr. W. Wright in Journal of Sacred Lit., January and April, 1865; on the Syr VSS of the Protoevangelium, The Gospel of Thomas, and the Transitus Mariae: Student Sinaitica (No. X, 1902) giving new Syr texts of the Protoevangelium and Transitus Mariae. A. F. Hindley, art. "Acts (Apoc.)", were will be found a very copious body of references to works, British and foreign, dealing with all branches of the subject.

J. HUTCHISON

APOLLONIUM, ap-o-lon'i-a (Ἀπολλωνία, Apollôni-a): A town in Mygdonia, a district in Macedonia. It was situated a little to the south of Lake Bobe, on the Via Egnatia, the great Roman road leading from the coast of the Adriatic to the river Hecorus (Maritta), one of the main military and commercial highways of the empire: it lay between Apollonia and Dalmatia, and about 40 or 30 miles from the former and 38 from the latter. The foundation of the town may perhaps be attributed to about 432 BC; in any case, coins are extant which attest its existence in the 4th cent. BC (Head, Historia Numorum, 181). Paul and Silas passed through the town on their journey from Philippi to Thessalonica, but do not appear to have stayed there (Acts 17 1). The name seems to have survived in the modern Pollina (Leake, Northern Greece, III, 185; Cousinéry, Voyage de Macedonia, I, 115).

MARCUS N. TOD

APOLLONIUS, ap-o-lon'i-us (Ἀπολλάνιος, Apollônios): A common name among the Syro-Macedonians. Prideaux (Connect) interrupts his narrative of the year 148 BC to give an account of the different persons who bore this name. (1) Son of Thrassus (2 Macc 3 5) who was governor of Coele-Syria (Pall and Phoenicia) under Seleucus Philopator, and is said to have robbed the temple, and after his authority in that province, supported Simon the governor of the temple at Jerus against Onias the high priest. He was also chief minister of state to King Seleucus. He was put on the throne—of Antiochus Apollonis, in some way becoming obnoxious to the new king, left Syria and retired to Mileitus. (2) A son of (1) who, while his father resided at Mileitus, was brought up at Rome along with Demetrius, son of Seleucus Philopator, and at that time held as a hostage by the Romans. This Apollonius lived in great intimacy with Demetrius, who, on recovering the crown of Syria, made him governor of Coele-Syria and Phoenicia, the same government which his father held under Seleucus Philopator. He seems to have been continued in the same government by Alexander (1 Macc 10 60) but he revolted from him to embrace the interest of Demetrius. (3) Son of Menestheus, and favorite and chief minister of Antiochus Epiphanes (2 Macc 4 21). He went as ambassador from Antiochus, first to Rome (Livy xli.6) and afterward to Ptolemy Philometer, king of Egypt (2 Macc 4 21). This is generally held to be the same who is said to have been overthrown by the Jews (1 Macc 10 62) and who, on the return of Antiochus from his last expedition into Egypt, was sent with a detachment of 22,000 men to destroy Jerusalem. He attacked the Jews while keeping the Sabbath day
holy and slow great multitudes of them (2 Mac 5 24–27). (4) Governor of Samaria in the time of Antiochus Epiphanes. He was slain in battle by Judas Maccabaeus (1 Mac XII, vii, 10). (5) Son of Gennaeus (2 Mac 12 2), and governor of a territory in Pal under Antiochus Eupator he proved a bitter enemy of the Jews.

J. HUTCHISON

APOLLOPHANES, a-pol-o-fan-ez (Ἀπόλλωνάς, Απολλόφανας): A Wyrtian killed by Judas Maccabæus (2 Mac 10 37).

APOLLOPS, a-pol-os (Ἀπόλλως, Απόλλος, the short form of Apollonius): Apollos was a Jew of Alexandrian race (Acts 18 24) who reached Ephesus in the summer of 54 AD, while St Paul was on his third missionary journey, and there he “spake and taught accurately the things concerning Jesus” (Acts 19 25). That he was eminently fitted for the task is indicated by the fact of his being a “learned man,” “mighty in the scriptures,” “fervent in spirit,” “instructed in the way of the Lord” (vs 25). His teaching was however incomplete in that he knew “only the baptism of John” (ver 25), and this has given rise to some discovery. According to Blass, his information was derived from a written gospel which reached Alexandria, but it was more probably the fruits of what Apollos had heard, either directly or from others, of the preaching of John the Baptist beyond Jordan (cf Jn 1 28). Upon receiving further instruction from Priscilla and Aquila (Acts 18 26), Apollos extended his mission to Achaia, being encouraged thereto by the brethren of Ephesus (ver 27). In Achaia “he helped them much that had believed through grace; for he powerfully confuted the Jews, and that publicly, showing by the scriptures that Jesus was the Christ” (vs 27 28). During Apollos’ absences in Achaia, St Paul had reached Ephesus and learned of what had been taught by Apollos there (19 1). As St Paul was informed that the Ephesians still knew nothing of the baptism of the Spirit (vs 2–4), it is probable that Apollos had not imparted to his hearers the further instruction he had received from Priscilla and Aquila, but had departed for Achaia shortly after receiving it. St Paul remained upward of two years among the Ephesians (vs 8 10), and in the spring of 57 AD he wrote the First Epistle to the Corinthians. By this time more in Ephesus (cf 1 Cor. 16 12). It is incredible that this epistle of St Paul could have been prompted by any feelings of jealousy or animosity on his part against Apollos. It was rather the outcome of discussion between the two regarding the critical situation then existing in Corinth. The mission of Apollos had met with a certain success, but the breeding of faction, which that very success, through the slight discrepancies in his teaching (cf 1 Cor 1 12, 3 4) with that of Paul or of Cephas, had not received, was utterly alien to his intentions. The party spirit was as distasteful to Apollos as it was to St Paul, and made him reluctant to return to the scene of his former labors even at the desire of St Paul himself (v 9 12). The epistle voiced the indignation of both. St Paul welcomed the cooperation of Apollos (3 6: “I planted, Apollos watered”). It was not against his fellow-evangelist that he fulminated, but against the private spirits of those who loved faction more than truth, who saw not that both he and Apollos came among them with “God’s fellow-workers” (3 9), the common servants of the one Lord and Saviour Jesus Christ. This view is also borne out by the tenor of Clement’s Ep. to the Cor. (cf Honecke, Neutestamentliche Apokryphen, 54 and 66 with passages 1 Cor 12 1–7; 2 Cor 3 1; 11 16, where St Paul seems to allude to Apollos’ eloquence, wisdom, and letter of commendation. St Paul wrote thus not in order to disparage Apollos, but to affirm that, even without the aid of these incidental contending, he would yield none in the preaching of Christ crucified.

The last mention of Apollos is in the Ep. to Titus, where he is recommended along with Zenas to Titus (Titus 3 13). He was then on a journey through Crete (1 5), and was probably the bearer of the epistle. The time of the writing of the Ep. to Titus, though generally admitted to have been after the release of St Paul from imprisonment at Rome, has been variously placed at 64–67 AD. See Titras, Ec. 70.

APOLLYON, a-pol-i-on (Ἀπόλλων, Απολλóνων; ‘abhaddón, “destroyer”): Present part. of the vb. ἀπολλωνεῖν, “to destroy.”

I. Definition.—A proper name, original with the author of the Apocalypse and used by him once (Rev 9 11) as a tr. of the Heb word ‘Abaddon” (see ABADDON) to designate an angel or prince of the lower world.

II. OT Background.—The term Abaddon (“destruction”) appears solely in the Wisd. lit. of the OT and in the following narrow range of Hexaconventure: Job 31 12; 42 7; Ec. 12; 4: 8–11; Ps. 88 10; Prov. 16 11. In all these passages save one (Job 31 12) the word is combined either with Sheol, “death,” or “the grave,” in such a way as to indicate a purely eschatological term based upon the advanced idea of moral distinctions in the realm of the dead. In the one exceptional passage (Est 9 6) is incorrectly referred to—the word here is different, viz. אבッション, ‘abhaddon” where the combination does not occur, the emphaus on the moral element in the “destruction” mentioned is so definite as practically to preclude the possibility of interpreting the term in any general sense (as Charles, HDB, art. “Abaddon”; per con., Briggs, ICC, “Psalms in loc.; EBD, sub loc.”). The meaning of the word, therefore, is: the place or condition of utter ruin reserved for the wicked in the realm of the dead.

One other feature of OT usage is worthy of consideration as throwing light upon Rev 9 11. As Abaddon and the accompanying terms “Death” and Sheol are personified (as in Job 28 22) and represented as living beings who speak and act (cf Rev 6 12),—and the accompanying terms “Death” and Sheol are personified (as in Job 28 22) and represented as living beings who speak and act (cf Rev 6 12).

III. NT Usage.—The starting-point of the Apocalypse’s use of “Apollyon” is to be found in the fundamental meaning of “Abaddon” as moral destruction in the underworld, together with the occasional personification of kindred terms in the OT. The imagery was in general terms familiar while the NT writer felt perfectly free to vary the usage to suit his own particular purposes.

(1) Since Apollyon is a personification he is not to be identified with Satan (of Rev 9 1 where Satan seems to be clearly indicated)

2. Apollyon or with any other being to whom not Satan historical existence and definite char-Part of but Part of other acteristics are ascribed. He is the per-ideal central figure in an ideal picture of Description evil forces represented as originating in the world of lost spirits and allowed to operate destructively in human life. They are pictured as locusts, but on an enlarged scale and with the addition of many features with the strict replication of the figure (see vs 7–10). The intention is, by the multiplication of images which the author does not attempt to harmonize,
to convey the impression of great power and far-reaching destructiveness. (2) This interpretation finds additional support in the writer's significant departure from the familiar usage at the parting of the Red Sea in Exod. 14.17. It is the sadistic and the serpentine destroying angel. It is the prefiguring of the Dispensation of Law. The personal issue is the Abys, of which the presiding genius is Destruction in person. The seer's picture is equally independent of the tradition represented by the Talm (Shab 1, 65) where Abraham is personified as jointly with God's president over six destroying angels. These modifications are evidently due to the exigencies of the pictorial form. It is clearly impossible to portray forces proceeding from the place of ruin in the charge of the place itself.

3. Apollyon

Necessary to the Picture

The importance of the conception of Apollyon to the completeness of the picture should not be overlooked. It is intended to represent these forces as having a certain principle of internal unity and as possessing the power of effective leadership.

As to the specific significance of the vision of the locusts as a whole it is not easy to reach a conclusion.

Professor Swete suggests (Comm. on Rev. 9) that the vocation of the locusts is to be understood in the Description divine visitation; they hurt by recalling forgotten sins. It seems to us more probable that they represent an actual historical movement, past or to come, demoniacal in origin and character, human in the mode of its operation and the sphere of its influence, used by God for a scourge upon mankind and kept in restraint by His grace and the Church.

LOUIS MATTHEWS SWETE

APOSTASY, a-pos'ta-si, APOSTATE, a-pos'tat (ἀπόστασις, ἢ καταστάσις, "a standing away from"); i.e. a falling away, a withdrawal, a defection. Not found in the EV, yet used twice in the NT, in the Gr original, to express abandonment of the faith. Paul was falsely accused of teaching the Jews apostasy from Moses (Acts 21 21); he predicted the great apostasy from Christianity, foretold by Jesus (Mt 24 10-12) which would precede "the day of the Lord" (2 Thess 2 2). Apostasy, not in name but in fact, means scattering repute in the Epistle of Jude, e.g. the apostasy of angels (ver 6). Foretold, with warnings, as sure to attend in the last days (Mt 24 10-23; 2 Thess 2 3; 2 Pet 3 17). Causes of: persecution (Mt 24 9-10); false teachers (Mt 24 11); temptation (Lk 8 13); worldliness (2 Tim 4 4); defective knowledge of Christ (1 Jn 2 19); moral lapse (He 6 4-6); forsaking worship and spiritual living (10 25-31); unbelief (3 12). Biblical examples: Saul (1 S 16 11); Amaziah (2 Ch 25 14-27); many disciples (Jn 6 66); Hymenaeus and Alexander (1 Tim 1 19-20); Demas (2 Tim 4 10). For further illustration see Dt 13 13; Zeph 1 4-6; Gal 5 4; 2 Pet 2 20,21.

"Forsaking Jehovah" was the characteristic and oft-recurring sin of the chosen people, esp. in their contact with idolatrous nations. It constituted their supreme national peril. The tendency appeared in their earliest history, as abundantly seen in the warnings and prohibitions of the laws of Moses (Ex 20 3-17; Dt 6 14; 11 16). The fearful consequences of religious and moral apostasy appear in the curses pronounced against this sin, on Mount Ebal, by the representatives of six of the tribes of Israel, elected by Moses (Dt 27 13-26; 28 15-68). So wayward was the heart of Israel, even in the years immediately following the national exodus, that the prophet Joshua found it necessary to re-pledge the entire nation to a new fidelity to Jehovah and to their original covenant before they were permitted to enter the Promised Land (Josh 24 1-28). Infidelity to this covenant baffled the nation's prospects and growth during the time of Judges (Jgs 2 10 15; 10 6 10); in the OT the people are described as "prophets of Baal" (1 S 12 10). It was the perseverance of prolific and ever-increasing evil, civic and moral, from Solomon's day to the Assyrian and Babylonian captivities. Many of the kings of the divided kingdom apostatized, leading the people, as in the case of Rehoboam, into the grossest forms of idolatry and immorality (1 K 14 22-24; 2 Ch 12 1). Conspicuous examples of such royal apostasy are Jeroboam (1 K 12 28-32); Ahab (1 K 16 30-33); Ahabiah (1 K 22 51-53); Jeroham (2 Ch 21 6 10-12-18); Ahaziah, son of Jehoahaz (2 K 13); Manasseh (2 Ch 33 1-9); Amos (2 Ch 33 22). See IDOLATRY. Prophecy originated as a Divine and imperious protest against this historic tendency to defection from the religion of Jehovah.

In classical Gr, apostasy signified revolt from a military commander. In the Roman Catholic church it denotes abandonment of religious orders; renunciation of ecclesiastical authority; defection from the faith. The persecutions of the early Christian centuries forced many to deny Christian belief. For this defection they were subjected to increasing incense to a heathen deity or blaspheming the name of Christ. The emperor Julian, who probably never vitally embraced the Christian faith, is known in history as "the Apostate," having renounced Christianity for paganism soon after his accession to the throne.

An apostate's defection from the faith may be intellectual, as in the case of Ernst Haeckel, who, because of his materialistic philosophy, publicly and formally renounced Christianity and the church; or it may be moral and spiritual, as with Judas, who for filthy lucre's sake basely betrayed his Lord. See exhaustive art. on "Apostasy" in Jew. Enc.

APOSTLE, a-pos'tle (ἀπόστολος, apostolos, lit. "one sent forth," an envoy, missionary): For the meaning of this name as it meets us in the NT, reference is sometimes made to classical and Jewish parallels. In an earlier classical Gr there was a distinction between an angelos or messenger and an apostolos, who was not a mere messenger, but a delegate or representative of the person who sent him. In the later Judaism, again, apostoloi were envoy-sent out by the patriarchate in Jerusalem to collect the 10th part of the tithe (1 K 14 3-2 Thess 2 3). The Dispersion. It seems unlikely, however, that either of these uses bears upon the Christian origin of a term which, in any case, came to have its own distinctive Christian meaning. To understand the word as we find it in the NT it is not necessary to go beyond the NT itself. To discover the source of its Christian use it is sufficient to refer to its immediate and natural significance. The term used by Jesus, it must be remembered, was not Aram., not Gr, and apostolos was its equivalent.

In the NT history we first hear of the term as applied by Jesus to the Twelve in connection with that evangelical mission among the villages on which He dispatched them (Mt 10 1ff); Mk 3 14; 6 30; Lk 6 13; 9 1ff.). From a comparison of the Synoptics it would seem that the name as thus used was not a general designation for the Twelve, but had reference only to this particular mission, which was typical and prophetic, however, of the wider mission that was to come (cf. Hort, Christian Ecclesia, 23-29). Luke, it is true, uses the word as a title for the Twelve apart from reference to the mission (cf. 1 Thess 2 7-12). The equivalent word in the Hebrew is, as Dr. Hort suggests, that since the Third Gospel and the Book of Acts formed two sections of what
was really one work, the author in the Gospel employs the term in that wider sense which it came to have afterwards.

When we pass to Acts, "apostle" has become an ordinary name for the Eleven (Acts 1.26ff.), and after the election of Matthias in place of Judas, for the Twelve (2.37-42.43, etc.). But even so it does not denote a particular and restricted office, but rather that function of a world-wide missionary service to which the Twelve were especially called. In his last charge, just before he ascended, Jesus had commissioned them to go forth into all the world and preach the gospel to every creature (Mt 28.19-20). But it is said that those who were to be His witnesses not only in Jerusalem and Judaea, but in Samaria (contrast Mt 10.5), and unto the uttermost part of the earth (Acts 1.8). They were apostles, therefore, qua missionaries—not merely because they were the Twelve, but because they were now sent forth by their Lord on a universal mission for the propagation of the gospel.

The very fact that the name "apostle" means what it does would point to the impossibility of confining it within the limits of the Twelve.

2. Paul (The "twelve apostles" of Rev 21.14 is evidently symbolic; cf in 7.3ff the restriction of God's sealed servants to the twelve tribes.) Yet there might be a tendency at first to restrict the badge of honor and privilege peculiar to that inner circle (cf Acts 1.25). If any such tendency existed, Paul effectually broke it down by vindicating for himself the right to the name. His claim appears in his assumption of the apostolic office, and is spoken in the opening words of most of his epistles. And when his right to it was challenged, he defended that right with passion, and especially on these grounds: that he had seen Jesus, and so was qualified to bear witness to His resurrection (1Cor 15.3ff; cf Acts 22.20ff.); that he had received a call to the work of an apostle (Rom 1.1; 1Cor 1.1, etc; Gal 2.7; cf Acts 13.2ff; 22.21); but, above all, that he could point to the signs and seals of his apostleship furnished by his missionary labors and their fruits (1Cor 9.2; 2Cor 12.12; Gal 2.8). It was by this last ground of appeal that Paul convinced the original apostles of the justice of his claim. He had not been a disciple of Jesus in the days of His flesh; his claim to have been the first messenger of the Savior had been overthrown by Peter's denial and Paul's admission of a personal commission was not one that could be proved to others; but there could be no possibility of doubt as to the seals of his apostleship. It was abundantly clear that he that wrought both Peter into the apostleship of the circumcision wrought for [Paul also unto the Gentiles" (Gal 2.8). And so perceiving the grace that was given unto him, Peter and John, together with James of Jerusalem, recognized Paul as apostle to the Gentiles and gave him the right hand of fellowship (ver 9).

It is sometimes said by those who recognize that there were other apostles besides the Twelve and Paul that the latter (to whom some, on the ground of 1Cor 15.7; Gal 1.19, would add James the Lord's brother) were the apostles par excellence, while the other apostles mentioned in the NT were apostles in some inferior sense. It is hardly possible, however, to make out such a ground on the ground of NT usage. There were great differences, no doubt, among the apostles of the primitive church, as there were among the Twelve themselves—differences due to natural talents, to personal acquisitions and experience, to a sense of mission, to the salt and light of the apostleship. But Thaddaeus and Simon were disciples of Jesus in the very same sense as Peter and John; and the Twelve and Paul were not more truly apostles than others who are mentioned in the NT. The apostleship denotes missionary service, and if its reality, as Paul suggests, is to be measured by its seals, it would be difficult to maintain that Matthias was an apostle par excellence, while Barnabas was not. Paul sets Barnabas as an apostle side by side with himself (1Cor 9.5ff; cf Acts 13.2ff; 14.14.); he speaks of Andronicus and Junias as "of note among the apostles" (Rom 16.7); he appears to include Apollos along with himself among the apostles who are made a spectacle unto the world and to angels and to men (1Cor 4.6.9); the natural inference from a comparison of 1Thess 1.1 with 2.6 is that he describes Silvanus and Timothy as "apostles of Christ"; to the Philippians he mentions Epaphroditus as 'your apostle" (Phil 2.25 RVm), and to the Corinthians certain unknown brethren as "the apostles of the churches" and "the glory of Christ" (2Cor 8.23 RVm). And the very fact that he found it necessary to denounce certain persons as "false apostles, deceitful workers, fashioning themselves into apostles" (2Cor 11.13) shows that there was no thought in the primitive church of restricting the apostleship to a body of 12 or 13 men. "Had the number been definitely restricted, the claims of these interlopers would have been self-condemned" (Lightfoot, Galatians, 97).

When we come to the Did. which probably lies beyond the boundary-line of NT history, we find the name "apostles" applied to a whole class of names given to the men in Didache who settled in no church, but moved about from place to place as messengers of the gospel (ch 11). This makes it difficult to accept the title "apostles" of Apollos and Timothy, as being late converts to Christianity who lived far from the scenes of Our Lord's ministry. Lightfoot remarks that we have no reason to suppose that this condition was ever waived unless we throw the apostles into the 1st cent. But it seems very unlikely that even towards the end of the 1st cent. there would be a whole class of men, not only still alive, but still in active exercise of their missionary functions all the hardships of a wandering and homeless existence. These men, (ch 11), who were yet able to bear the personal testimony of eye-witnesses to the ministry and resurrection of Jesus. In Lk 24.48 and Acts 1.8.22 it is the chosen company of the Twelve who are in view. In 1Cor 1.1 Paul is meeting his Judaizing opponents on their own ground, and answering their insistance upon personal intercourse with Jesus by a claim to have seen the Lord. But apart from these passages there is no evidence in the NT that the apostles of the early church were necessarily very widely known Jesus in the flesh or had been witnesses of His resurrection—much less that this was the primary qualification on which their apostleship was made to rest.

We are led then to the conclusion that the true differentia of the NT apostleship lay in the missionary calling implied in the name, and that all whose lives were devoted to Apostleship this vocation, and who could prove by the issues of their labors that God's Spirit was working through them. Barnabas of Jew or Gentile, were regarded and described as apostles. The apostolate was not a limited circle
of officials holding a well-defined position of authority in the church, but a large class of men who discharged one—and that the highest—of the functions of the office (Gal 1:14). It was on the foundation of the apostles and prophets that the Christian church was built, with Jesus Christ Himself as the chief cornerstone (Eph 2:20). The distinction between the two classes was that while the prophet was God's spokesman to the believing church (1 Cor 14:24; 2 Pet 3:16; Acts 2:40), the apostle was His envoy to the unbelieving world (Gal 2:7,9).

The call of the apostle to his task might come in a variety of ways. The Twelve were called personally by Jesus to an apostolic task at the commencement of His earthly ministry (Mt 10:1 ff), and after His resurrection this call was repeated, made permanent, and given a universal scope (Mt 28:19,20; Acts 1:8). Matthias was called first by the voice of the general body of the brethren and thereat by the decision of the lot (Acts 1:15,23,26). Paul's call came to him in a heavenly vision (Acts 9:15-19), and though this call was subsequently ratified by the church at Antioch, which sent him forth at the bidding of the Holy Ghost (13:1 ff), he firmly maintained that he was an apostle not from men neither through man, but through Jesus Christ and God the Father who raised Him from the dead (Acts 14:20). Barnabas was sent forth (ἐξαπόστησιν is the vb. used) by the church at Jerusalem (Acts 11:22) and later, along with Paul, by the church at Antioch (13:1); and soon after this we find the two men described as apostles (14:4). It is in this manner which there were sent that explains the title. And when this particular mission was completed and they returned to Antioch to rehearse before the assembled church "all things that God had done with them, and that he had opened a door of faith unto the Gentiles" (ver 27), they thereby justified their claim to be the apostles not only of the church, but of the Holy Spirit.

The authority of the apostolate was of a spiritual, ethical and personal kind. It was not official, and in the nature of the case could not be transmitted to others. Paul claimed for himself complete independence of the opinion of the whole body of the earlier apostles (Gal 2:6,11), and in seeking to introduce his gospel was ever endeavored by manifestation of the truth to commend himself to every man's conscience in the sight of God (2 Cor 4:2). There is no sign that the apostles collectively exercised a separate and autocratic authority. When the doctrine of the Blessed Sacrament (the Most Holy ritual by gentle Christians arose at Antioch and was referred to Jesus, it was "the apostles and elders" who met to discuss it (Acts 15:24,22), and the letter returned to Antioch was written in the name of "the apostles and the elders, brethren" (ver 23). In founding a church Paul naturally appointed the first local officials (Acts 14:23), but he does not seem to have interfered with the ordinary administration of affairs in the churches he had planted. In those cases in which he was appealed to or was compelled by some grave scandal to interpose, he rested an authoritative command on some express word of the Lord (1 Cor 7:10), and when he had no such word to rest on, was careful to distinguish his own judgment and counsel from a Divine commandment (vs 12,27,40). His appeals in the latter case are grounded upon fundamental principles of morality common to heathen and Christian alike (1 Cor 5:1), or are addressed to the spiritual judgment (10:15), or are reinforced by the weight of the evidence gathered by unimpeachable service and by the fact that he was the spiritual father of his converts as having begotten them in Christ Jesus through the gospel (4:15 ff).

It may be added here that the expressly missionary character of the apostleship seems to debar James, the Lord's brother, from any claim to the title. James was Christ's brother (Matt 13:55; Mark 6:3), and was certainly a local spiritual leader, probably an apostle (Acts 12:17). As the head of the church at Jerusalem, he exercised a ministry of a purely local nature. The passages on which it has been sought to establish his right to be included in the apostolate do not furnish any satisfactory evidence. In 1 Cor 15:7 His resurrection is contrasted with "all the apostles" rather than included in their number (vs 9). And in Gal 1:19 the meaning may quite well be that with the exception of Peter, none of the apostles was seen by Paul in Jerusalem, but only James the Lord's brother (cf RVm).

LITERATURE.—Lightfoot, Galatians, 92-101; Hort, Christian Ecclesia, Lect II; Weissècker, The Apostolic Age, 11, 93-99; Lindsay, The Church and the Ministry, 15-60. J. C. LAMBERT.

APOSTLES' CREED, kréd, THE: The Apostles' Creed is the oldest creed, and lies at the basis of most others. Though not, as the long-current legend of its origin affirmed, the direct work of the Apostles, it has its roots in apostolic times, and embodies, with much fidelity, apostolic teaching. It shall be seen immediately that it had an important place in the early church, when as yet no creed but the form of God's only begotten Son (φίλις τοῦ Θεοῦ) was read in the church, and the readings (οὐδὲ ἀνθρώπινος). It has been made to thrust out some of its chief articles from Christian belief. This is a general reason for considering the foundations on which these articles of faith rest.

1. Form of the Creed.—In the first place, what is the creed? Here, first of all, it is to be pointed out that the received form of the creed is not its oldest or original form. The creed exists in two forms—a shorter and a longer; the former, known as the Old Rom Form, going back certainly as early as the middle of the 2nd cent. (about 140 AD), the latter, the larger form (forma longior), much later. Its final form was probably given to it in St. Paul not before the middle of the 5th cent. (in one or two clauses, as late as the 7th). It is desirable, at the outset, to put these two forms of the creed (forma longior) together in a single statement of the essential points of the creed, and to refer to the larger form only for a case or two. This is a general place omitted in the Latin form preserved by Rufinus, 390 AD.

The Received Form of the creed reads thus:

1. Old Roman Form

He rose from the dead; He ascended into heaven, and sitteth at the right hand of the Father, from whence He shall come to judge the quick and the dead. And in the Holy Ghost; the holy Church; the forgiveness of sins; the resurrection of the body; (the life everlasting)."

The last clause is omitted in the Latin form preserved by Rufinus, 390 AD.

2. The Received Form

He rose from the dead; He ascended into heaven, and sitteth at the right hand of the Father, from whence He shall come to judge the quick and the dead. And in the Holy Ghost; the holy Church; the forgiveness of sins; the resurrection of the body; (the life everlasting)."
ascended into heaven; and sat at the right hand of God the Father Almighty; from thence He shall come to judge the quick and the dead. I believe in the Holy Ghost; the holy catholic Church; the communion of saints; the forgiveness of sins; the resurrection of the body; and the life everlasting. Amen.

Such is the form of the creed. Something must now be said of its origin and history.

II. Origin of the Creed.—The legend was that the creed took shape at the dictation of the Twelve Apostles, each of whom contributed a special article. Thus Peter, it is said, inspired the confession of the holy ghost; Andrew (or according to others, John) continued, “And in Jesus Christ, His only Son, our Lord”; James the elder went on, “Who was conceived by the Holy Ghost,” etc. This legend is not older than the 5th or 6th cent., and is absurd on the face of it.

The real origin of the creed has now been traced with great exactness. The original germ of it is to be sought for in the baptismal confession made by converts in the reception of that rite. The primitive confession may have contained no more than “I believe that Jesus is the Son of God,” as the other confessions within the NT itself that it soon became enlarged. Paul speaks of the “form of teaching” delivered to converts (Rom 6:17), and reminds Timothy of “the good [beautiful] confession” he had made in sight of many witnesses (1 Tim 1:13). Some other language is used of Christ’s confession before Pilate (ver 13). We may perhaps conjecture from the epistles that Timothy’s confession contained references to God as the author of life, to Jesus Christ and His descent from David, to His witness to the dead, to His being raised from the dead, to His coming again to judge the quick and the dead (1 Tim 6:13; 2 Tim 2:8; 4:1). Early Christian writers, as Ignatius (110 AD), and Ariostes the apologist (cir 125 AD), show traces of other clauses.

In any case, the fact is certain that before the middle of the 2d cent., the confession at baptism had crystallized into tolerably settled shape in all the greater churches. We have secure accounts (besides the Old Rom Form) in Irenæus, Tertullian, Novatian, Origen, etc.; and they show substantial unity with a certain freedom of form in expression. But the form in the Rom church was generally taken as canonical.

After the middle of the cent., the confession rose to new importance as the result of the gnostic controversies, and assumed more of the character of a formal creed. It came to be known as the “Rule of Truth,” or “Rule of Faith,” and was employed to check the licence of interpretation of Scripture of these fantastic heretical speculators. The creed had originated independently of Scripture—in the early oral teaching and preaching of the apostles; hence its value as an witness to the common faith. But it was not used to supersede Scripture; it was held to corroborate Scripture, where men by their allegorical and other perversions sought to wrest Scripture from its real sense. It was employed as a check on those who sought to allegorize away the Christian faith.

III. History of the Creed.—The Old Rom Form of the creed was, as said above, certainly in use by the middle of the 2d cent., in Rome; probably earlier. We have it in both its Gr and Lat forms (the Gr being probably the original). The Lat form is given by Rufinus about 390 AD who compares it with the creed of his own church of Aquileia—a very old church. The Gr form is preserved by Marcellus, of Ancyra, in the 4th cent. The old shorter form of the creed long maintained itself. We find it in England, e.g. up to nearly the time of the Norman Conquest (in 8th or 9th cent. MSS in British Museum).

The Received Form of the creed has a much more obscure history. The additional clauses came in at different times, though in themselves some of them are very old. The addition to the first art., e.g. “Maker of Heaven,” and early in this form in Gaul about 650 AD, though similar forms are found in much older creeds. Another addition, “He descended into hell,” meets us first in Rufinus as part of the creed of Aquileia, but is probably also old in that church. It is known that the creed had assumed nearly its present shape (perhaps without the above clauses, and that on the communion of saints) by the time of Faustus of Reiz, about 460 AD. Thence it spread, and had reached Ireland apparently before the end of the 7th cent. In England it appears a cent. later, about 850 AD (from the court of Charlemagne?), and from the beginning of the 10th cent. it largely superseded the older form. The same applies to the phrase “The Holy Ghost” as now one in common use. Two significant changes may be noted in the form given to it. In England, whose form we follow, the Reformers substituted for “the resurrection of the flesh” the words, “the resurrection of the body,” and in later works the Lutherans change the word “catholic” to “Christian,” in “the holy catholic church.”

IV. Structure of the Creed.—The Apostles’ Creed, it will be perceived, has no theological or metaphysical character; it is a simple enumeration, in order, of the great verities which the church was known to have held, and to have handed down from the beginning—which Scripture also taught. Originating from the baptismal confession, it naturally follows the Triune order suggested by the customary formula for baptism. The first art. declares Christ, His only Son, our Lord, and in the great facts embraced in the gospel testimony regarding Him. The eighth art. affirms belief in the Holy Ghost, recognized by the additional clauses, declaring belief in the holy catholic church, the communion of saints, the forgiveness of sins, the resurrection of the flesh (body), and the life everlasting.

It will help to show the kind of heresies the church of that age had to contend with, and what the earnest struggles of the Fathers of the time (using the Apostles’ Creed as a bulwark), if we append the Creed of Apelles, a 2d-cent. form, as reconstructed by Principal Lindsay (The Church and the Ministry, 222) from Hippolytus:

“We believe, that Christ descended from the Power above, from the Good, and that He is the Son of the Good; that He was born of a virgin, and that when He was crucified by the Jews and died; that He was raised again after three days He appeared to His disciples; that He showed them the prints of the nails and the wound” in His
APOSTOLIC AGE, ap-os-toh-lik aij: (1) When the disciples realized that they had seen the risen Christ for the last time and that He had now become more than a Missionary to spread His message, they gathered themselves together and restored the number of “witnesses” to the appointed Twelve. Immediately afterward the outpouring of the Holy Spirit gave them the signal to begin work. At first this work was rigidly centered in Jerusalem, and the first journeys were the result of forcible dispersion and not of planned effort (Acts 11:19). But pilgrims to the feast had carried away the gospel with them, and in this way Christianity had been spread as far as at least Damascus (9:2:19). The dispersion itself widened the circle to Cyprus and to Antioch and marked the beginning of the gentle work (11:19-20). Here the extreme promiscuity of St. Paul’s ministry in the NT should not obscure the success of the other missionaries. When the apostles began their journeys we do not know but at the time of Gal 1:19 only St. Peter represented the Twelve in Jerusalem. St. Paul mentions their extended work in 1 Cor 9:5-6 and it seems certain that St. Peter’s discussion of the controversy was taken by Professor Harnack of Berlin, whose objections may be regarded as representative. Professor Harnack, and those who think with him, criticize the creed from a twofold point of view: (1) it is in the first place a true apostolic doctrine—this not only in its later arts, but even in such an art as that affirming the virgin-birth of Christ; (2) They deny that the meaning we now put on many of the clauses of the creed and of its true origin from the now given meaning. We use the words, but with a different sense from the original framers.

In considering these objections, it is always to be remembered that those who urge them do so from the standpoint of rejection of most Harnack’s that is usually considered essential Criticism to Christianity. There is in their view no incarnation, no real Godhead of Christ, no real miracle in His life (only faiths), no resurrection from Joseph’s tomb. This no doubt takes the bottom from the Apostles’ Creed, but it takes the bottom also out of apostolic Christianity. Where Harnack, for instance, objects that “Father” and “Son” in the first and second articles of the creed mean something different from what we mean by these words, but with a different sense from the original framers.

LITERATURE.—A list of the voluminous pamphlet literature produced by the German controversy the Apostles’ Creed may be seen in Nippold’s Die theologische Rundschau, II, 232-35. The most important contributions are those of Harnack, Glaubensbekennisse (1887); Katzenbusch, and Christliche Auseinandersetzungen um das Apostolische Glaubensbekenntniss (1887); Kattenbusch, and Catholic Creeds of the Christian World, 1, 14-50. Special works are: Pearson, Exposition of the Creed (1699); Kattenbusch, Die apostolische Symbolik (1889); 2 Vol. Kattenbusch, Das apostolische Symbolik (1893); ET (1899): H. B. Swete, The Apostles’ Creed and Its Symbolic Tradition (1894); Swete, C. McGiffert, The Apostles’ Creed, Its Origin, Its Purpose, and Its Historical Interpretation (1902).

The International Standard Bible Encyclopaedia

APOSTLES, GOSPEL OF THE TWELVE. See APOTHECARY GOSPELS.
persecution broke out in which St. James was martyred and St. Peter delivered only by a miracle (Acts 12). With the resumption of Roman rule in 44 the persecution ceased. Some peaceable mode of living was devised, as appears from the absence of further allusions to troubles (cf Acts 21 17—26) and from the accounts of Josephus and Hegesippus of the esteem in which James the Lord's brother was held. His martyrdom (in 62?) was due to the tension that preceded the final revolt against Rome, in which the Christians of Jerusalem took no part. Instead, they retired across the Jordan to Pella (Rev 12 13—17), where they found a closely-intensively Jewish body under the rule of the descendants of Christ's brethren according to the flesh. Some mission work was done farther to the east but in the 2d cent. they either were absorbed in normal Christianity or became one of the factors that produced Ebionism.

Many members of this body (and, doubtless, other Jewish Christians outside it) showed various degrees of inability to understand the new Gentile work. The acceptance of an uncircumcised Christian as "saved" offered fairly slight difficulty (Gal 2 3; Acts 15). But to eat with him was another thing and one that was an offence to many who accepted his salvation (Gal 2 12—13). The rigorous conclusion that the Law bound no Christian was still another thing and one that even St. James could not accept (Acts 21 21). At the time of Gal 2 9, the "pillars" were as yet not thinking of doing gentle work. St. Paul's controversies are familiar and probably the last friction did not end until the fall of Jerusalem. But the difficulties grew gradually less and 1 Pet is evidence that St. Peter himself finally accepted the full status of Gentiles.

From the Rom power Christianity was safe at first, as the distinctions from Judaism were thought too slight to notice (Acts 13 14—16; 4. Relations 26 19). (Troubles such as those of with Rome Acts 17 9 were due to disturbance of the peace.) The government was thought of as a protector (2 Thess 2 7) and spoken of in the highest terms (Rom 13 1; 1 Pet 2 13.14).

But, while absolute isolation was not observed (1 Cor 10 27), yet the Christians tended more and more to draw themselves into bodies with little contact with the dead world 4 3, so provoking suspicion and hostility from their neighbors. Hence they were a convenient scapegoat for Nero after the burning of Rome. It is uncertain how far his persecution spread or how far persecution spread from his time until the end of the reign of Domitian (see Peter, First Epistle of), but in Rev Rome has become the symbol for all that is hostile to Christ.

Influence of the "pagan" religions on Christianity is not very perceptible in the 1st cent. But syncretism was the fashion of the day.

5. "Hellen-en many converts must have attempted to combine the new religion with views that they held already (or that they learned later). Apparently little attention was paid to this attempt, if restricted to entirely minor details (1 Cor 15 29), but in Col 2 8—23 a vital matter is touched. The danger is more acute in the Pastoral (1 Tim 1 4; 4 3; Titus 3 9) and in Rev 2 great harm is being done. And Jude, 2 Pet, and 1 John polemically attack the systems so arising, the beginnings of what in the 2d cent. appeared as Gnosticism.

For further details see the separate articles, esp. Ministry; New Testament Canon; and (for life in the Apoc) SPIRITUAL LIFE, Apocalyptic Literature.—See the separate articles. Works with the title Apostolic Age are by Gilbert (brief), Bartlet (use-ful), Purves (very conservative), Ropes, McGiffert, and Woillezcker. The last three are for critical study.

BURTON SCOTT EASTON

APOTHECARY, Ap-oth-er-ri, RV: Found in EV eight times in the OT and Apoc for Heb word rendered more accurately "pharmacist" by some.

APPEARAL, a-par-é-al: The Eng. equivalent of six Heb and three Gr words, variously signifying all kinds of raiment, chiefly garments costly and beautiful: ornamental (2 Sam 1 24); royal, as of Asaherus (Est 5 8), of Herod (Acts 12 21, κοσμική, καθαρός; of kings' daughters (2 Sam 13 18); priestly (Ex 3 10); also mourning (2 Sam 14 2). In 1 Sam 17 38.39 "ap-" replacement "armor" of AV: "Saul clad David with his apparel," probably some close-fitting garment worn under the armor, or sometimes without it. Severe judgment was pronounced on Jewish princes who clothed themselves with "strange" (AV), i.e., "with foreign apparel" (Zeph 1 8; cf Isa 2 6—8). "Modest apparel" as against "costly raiment" is commended as suited to Christians (1 Tim 2 9; ἀρετον, ἐνυπαρξει, καθαρός, κατακελεστήρος). Angels are robed in white apparel (Acts 1 10; cf Lk 24 4, "dazzling"). Fig. of the glorious and red (suggestive of the wine-press) apparel of the Messiah (Isa 63 1; cf) of "a man clad in garments and quiet splendor" (1 Pet 3 4).

Dwight M. Pratt

APPEARANTLY, a-par'ent-li (TNK), mar'ch, RV "manifestly," signifying in the only place so trd [Nu 12 8] "in the form of seeing" [Keil and Delitzsch], i.e., "an appearance," "a similitude," a manifestation of the invisible God in human form): This is the OT manner of Divine revelation "in the person and form of the angel of Jehovah": "In the bush I did manifestly reveal myself, and talked with Moses" (2 Esd 14 3). God talked with Moses openly, without figure, in a direct manner revealing to him His will in the clear distinctness of a "spiritual communication": "With him will I speak mouth to mouth, even manifestly, and not in dark speeches; and the form of Jehovah shall he behold."

M. O. Evans

APPARITION, a-par'i-sh'oun (BPAS, ἀπαρίστου, ἐμφανία, epiphaneia; φαναρία, phantasma): This word is not found in the OT or NT canon, AV or ARV, but occurs twice in RV and thrice in Apoc AV as follows: Wisd 17 3, Gr ἐνυπαρξει, RV "spectral form"; Rom 10 7, Gr ἐνυπαρξει, RV "apparition," RVm "manifestation"; 2 Macc 5 4, Gr ἐφανερωθη, RV "vision," RVm "manifestation." NT, RV: Mt 14 26; Mk 6 49; Gr phantasma, ARV "ghost," AV "Spirit."
APPEAL, a-pel': If an appeal be, as it properly is, a petition for the removal of a case that has been decided by a lower court, or even by a higher court, by a higher court, we find no such instance either in the OT or the NT.

In the institution of judges by Moses (Ex 18 26), the reference, "the hard cases they brought unto Moses, but every small matter they judged themselves," indicates simply a distribution of cases between two courts, but gives no trace of any provision for the rehearing of any case, by a higher court, that has already been decided by a lower. In Dt 17 8-15, directions are given that a lower court, under the certain conditions, shall ask for a higher court for instructions as to procedure, and shall strictly follow the order prescribed: nevertheless, the decision itself belongs to the lower court. When its sentence was once given, there was no appeal.

In the NT, the provision of the Roman law, for an appeal from a lower to a higher court, is clearly recognized, although the case of Paul in Acts 25 does not strictly fall within its scope. The Roman law origi­nally gave a citizen the right of appeal to the tribunal of the people, but, with the establish­ment of the Empire, the emperor himself assumed this function of the tribunal, and became the court of last resort. The case of Paul, however, had not been tried by Festus, nor any verdict rendered when (Acts 25 10.11) he utters the proper legal formula: "I appeal unto Caesar" (Καίσαρ ἐμνείλημαι, Kaisar ἐπικαλοւμαι). That Roman citi­zens could insist upon such procedure, as right, is not perfectly certain (HJP, II, 2-279). Paul evi­dently acted upon the suggestion of the governor himself (ver 9), who seems to have been despairing of avoiding the responsibility of a case involving questions most remote from his ordinary attention. At first sight, the decision of the court seems too mature. He throws away his chance of acquittal by Festus, and acts upon the assumption that he has been already condemned. Acts 26 32 shows that the possi­bility of his acquittal had amounted almost to a certainty. This course is explicable only by regarding his appeal the master stroke of a great leader, who was ready to take risks. In the propo­sition of Festus, he grasps at what had been an object of hope long deferred. For many years, he had been before the Roman court (Acts 19 12; Rom 1 11.15; 16 23.24). The Lord had just assured him (Acts 23 11), that as he had testi­fied at Jerus., "so must thou bear witness also at Rome." With this promise and direction in view, he had resigned himself to the work of the apostle and the center of the world's influence, in the seemingly precipitate words, "I appeal," which a lover of order of prudence would have deferred until he had first been condemned. H. E. Jacobs

APPEAR, a-per': Of eight Heb originals the chief is הָלַע (ya'lah, "to be seen"). Used mainly of God's self-revelations in person and in dreams and visions: "Jehovah appeared unto Abram" (Gen 12 7); to Moses (Ex 3 28); to Solomon (1 Ki 3 4). All originals used of Nature's processes, of the appearing, i.e. coming of the morning (Ex 14 27); stars (Neh 4 21); flowers, flocks of goats, tender grapes (Cant 2 12; 4 1m; 7 12m). So NT ἀφαίρεσ, ἀφαίρεσ, passive of ἀφαίρεσ, "I see;" "to be seen" used esp. of angelic revelations and visions: on the Mount of Transfiguration (Mt 17 3); an angel (Lk 1 11); the risen Lord (Lk 24 34); eleven tongues at Pentecost (Acts 2 3); vision to Paul (Acts 16 19); a great wonder in heaven (Rev 12 1 AV). ὀφθαλμῶν, ὀφθαλμῶν, in Acts 1 3, of Christ appear­ing after his suffering; φανταμα, φανταμα, "to shine," like the above with the added thought of a resplendent, luminous revelation, as of the Bethle­hem star (Mt 2 7); the bringing to light of sin (Rom 3 19). Also see AV, "to make manifest," used exclusively of the post-resurrection appearances and second coming of Christ and of the disclosures of the great judgment day. See Col 3 4; 2 Cor 5 10; Rev 3 18 and seven other passages AV. Dwight M. Pratt

APPEARANCE, a-pear'ans (παρουσία, παρουσία, "manifestation"): Exclusively technical, referring in the six passages where found to the final, the nonnullular advent of Christ (e.g. 1 Pet 1 7 AV; 2 Tim 1 10; Titus 2 13).

APPEASE, a-per's: "To make one at peace." Esau is appeased, i.e. placated, won over by means of presents (Gen 32 20). One 'sow to anger appease­th strife,' i.e. puts an end to a quarrel (Prov 21 18). RV changes "appeased" of AV in Acts 19 35 into "quieted" (Gr katastatho, "put down," "suppress," "restrain," referring to a popular commotion).

APPARENT, a-pa'r-tan': Only once in EV, viz. in Jer 10 7, for הָלַע, ya'lah, "it becometh," "it is seemly." Vulg "Tuum est enim decus," "it is Thy honor." Generally in the sense of "to belong to" (Lev 6 5, "to whom it appertaineth"); Neh 2 8, "to the castle which is appertained to the house" (Tob 6 12; 1 Ess 8 95; 1 Macc 10 42).

APPETITE, a-pet'it (יוֹדֵע, יְרֵע, nephesh): This word occurs four times in OT text and once in the LXX (Acts 10 30 KJV) it is a tr of nephesh. "Canst thou . . . satisfy the appetite (life) of the young lions?" Twice (Prov 23 2; Eccl 6 7; also Isa 66 11, AVm) it is a tr of nephesh: Prov 23 2, ba'al nephesh, "a man given to appetite"; Eccl 6 7, "the nephesh behaveth itself in the flesh"; "the appetite of nephesh" is tr2 "greedy." Nephesh means origi­nally "breath," hence "the soul," psuch, "the vital principle, "life"); therefore in certain expressions referring to the sustaining of life the nephesh hunger (Prov 10 3), thirsts (Prov 25 25), fasts (Ps 69 10). Nephesh then comes to mean the seat of the senses, affections, emotions, and to it is ascribed love, joy, desire (cf Dt 12 20; Prov 6 30 KJV; Mic 7 1, where the nephesh "desires"). The idea of desire or appetite of the nephesh may include all forms of longing; e.g. lust (Jer 2 24; "her desire" is lit. "the desire of her nephesh"); the appetite for revenge (Ps 41 2, "the will of his enemies") is lit. "the nephesh, etc."
The next step is to identify the nephesh with its desire, hence in the cases above nephesh is tr4 "appetite." In the 4th case (Isa 29 8) "His soul hath appetite" is a free tr of נפשׁוּ השכַקְקֵה (shokkekh), lit. "His soul runneth to and fro." S. F. Hunter

APPHIA, a-fie' a-fee' (Ἀφίππα, Aphiphia, dative case of Apphia; in Philen 2, though Apphia, Am­phia, and Appia, also occur): A Christian of Colos­sae, probably the wife of Philenom; certainly a
member of his household, greeted as the "sister" RVM. In the Greek church, November 22 is sacred to her memory. It has been supposed, since Appius was called Lucius, that Apphia was Philomen's wife and the mother or sister of Archippus (q.v.). She was stoned to death with Philomen, Onesimus, and Archippus in the reign of Nero. (See Lightfoot, Col., 372.)

APPHUS, a'fus, ap'fus: A name borne by Jonathan, the fifth son of Mattathias (I Macc. 2.5). All the brothers, according to this passage, had the same name; John is said to have been called Gaddis; Simon, Thassi; Judas, Maccabaeus; Eleazar, Avaran; Jonathan, Apphus (I Macc. 2.2-5). The latter were probably the names which Mattathias gave his sons, while the brothers were received later when they became "leaders of the people."

The common explanation of the word "Apphus" relates it to the Syr appas, hopas, "the dissembler"; but Torrey (art. "Maccabees," EB) points out that there are no means of ascertaining with what guttural consonant the word began, or what Sem consonant the Gr (2) represents. And the form and meaning of the name are, therefore, still to be explained.

H. J. WOLF

APPII FORUM, ap'i-i fô'rum, transliteration of Lat.; APPIUS, ap'i-us, MARKET OF (RV) (Ἀππίου φόρεων, Appii phorôn): Appii Forum (Cicero ad Att. 2.10; Suetonius Tib. 2: Appii Forum; Vulg RV: Forum Appii; Horace Satires 1.5; Pliny, Nat. Hist., iii.64; xiv.61; CIL, X, 6824), or Market of Appius, was a town situated at the forty-second milestone on the Appian Road (39) English miles from Rome, a single day's journey for energetic travelers) according to the imperial itineraries (Ant, 108; Hierosol. 611; Geog. Rav. 4.34). Its existence probably dates from the time of Appius Claudius Caecus (Suet. Tib. 2; cf Mommsen, Röm. Forsch., I, 308), who laid out the famous highway from Rome to Capua in 312 BC. In the 1st cent. it had the rank of a municipality (Pliny, iii.64). Its importance as a highway station is due chiefly to the canal which ran by the side of the road from there to within a short distance of Tarraconae (at the sixty-second milestone), affording an alternative means of conveyance (Strabo v.3.6). It was customary in covering this length of the journey through those Pomtine Marshes, by night in canal boats drawn by mules. Horace (Sat. i, 5) offers a lively picture of the discomforts of the trip, mentioning the importunate inn-keepers and intolerable water at Appii Forum, the grates and frogs which were enemies to repose, and the exasperating procrastination of the muleteer.

The Christian brethren in Rome went out along the Appian Road to welcome the apostle Paul upon hearing of his arrival at Puteoli. One party awaited him at Three Taverns while another proceeded as far as Appii Forum (Acts 28 15).

GEORGE H. ALLEN

APPLE, ap'1, APPLE-TREE (752), tappas): A fruit tree and fruit mentioned chiefly in Cant, concerning the true nature of which there has been much dispute among critics on account of the relation of the Hebrew word to the Greek. Cant 2 3 says: "As the apple-tree among the trees of the wood, so is my beloved among the sons. I sat down under his shadow with great delight."

Cant 2 3: "Under the apple-tree I awakened thee: thy dew was as the dew that covered the vine, and the drops thereof as those of the palm-tree."

Cant 3 1: "He kissed me with the nether balsam, and smelled so sweetly that it was terrible to use it." The Hebrew term is tappas, which is the combination of the root tappas, "to smell," and the preposition bâ'sh, "like apples." In all the above references the true apple, Pyrus malus, suite the conditions satisfactorily. The apple tree affords good shade, the fruit is sweet, the perfume is aromatic, spiritual, and the flower of the East. Sick persons in Pal delight in holding an apple in their hands, simply for the smell. (Cf Arabian Nights, "Prince Hassan and the Pari-banou.") Further the Arab, for apple teuffah is without doubt identical with the Heb tappas. The apple was well known, too, to the ancients; it was, for example, extensively cultivated by the Romans.

The one serious objection is that apples do not easily reach perfection in Pal; the climate is too dry and hot in the northern Lebanon to flourish. At the same time it is possible to exaggerate this objection, for with careful grafting and cultivation exceedingly good apples may be produced in the mountain regions. Apple trees there need special care and renewal of the grafts, but there is no impossibility that at the time of the writing of Cant skilled gardeners should have been able to produce sweet and perfumed apples in Pal. Small but very sweet and fragrant apples are now grown at Qamishly, which is well known, and which is, for example, extensively cultivated in the market at Jerus, but they are chiefly importations from the North.

On account of the above difficulty three other fruits have been suggested by various writers. Two doubts have been brought forward with a view to Prov 25 11: "A word fitly spoken is like apples of gold in network of silver," but the reference would certainly seem to be to some silver filigree work ornamental with gold modeling to look like fruit. The citron and the apricot (Tristram) have both been suggested as the true tappas. The former, which is a native of Syria, does not appear to have been introduced into Pal until well into the Christian era and the apricot, though an attractive substitute for the apple and today one of the most beautiful and productive of fruit trees, can hardly have been established in Pal at the time of the scripural references. It is a native of China and is said to have been brought to find its way westward at the time of Alexander the Great.

The third of the fruits is the quince, Cydonia vulgaris (N.O. Rosaceae), and this had more serious claims. It ripens in Pal, and is said to be "like apples" or "like the quince apple." In Job 29:4 it is spoken of as being indigenous there. Indeed it is probable that even if tappas was a name for apple, it originally included also the closely allied quince. The greatest difficulty is its harsh and bitter taste. Further the Mish dina distinguishes the tame quince, which is called paritz, and from the crab apple or hijzor (Kohler in Jev Enc, II, 23). The quince along with the apple was sacred to Aphrodite, the goddess of love.

On the whole there does not appear to be any sufficient reason for rejecting the term apple from the AV and RV: the Biblical references suit it; the identity of the Heb and Aral words favor it and there is no insuperable objection on scientific grounds.

The word tappas appears in two place names, Beth-tappas and Tappas (q.v.).

E. W. G. MASTERMAN

APPLE, ap'1, OF THE EYE: The eyeball, or globe of the eye, with pupil in center, called "apple" from its round shape. Its great value and careful protection by the eyelids automatically closing when there is the least possibility of danger made it the emblem of that which was most precious and jealously protected. The Heb terms for it were ishron, dimin. of esh, "man," little man or manni-kin, referring perhaps specially to the pupil, probably from the "little image one sees of himself when looking into another's pupil" (Davis' Lexicon), "He kept him (Israel) as the apple of his eye."
APPLES OF SODOM, sod-um: Jos (BJ, IV, viii, 4) says that "the traces [or shadows] of the five cities [na-prun] are still to be seen, as well as ashes growing in their fruits, which fruits have a color as if they were fit to be eaten; but if you pluck them with your hands they dissolve in smoke and ashes." This "Dead Sea fruit" was the first "smoke proof of a plant" from the Dead Sea region. This fruit is often given to the fruit of the Solarium Sodomaeum, "a prickly shrub with fruit not unlike a small yellow tomato." Cheyne thinks that the fruits referred to by Jos (cf. Tacitus Hist. v.37) may be either (1) those of the 'aker-tree ('ásar, Calotropis pereira, described by Hasselquist[Travels, 1760]), found in abundance about Jericho and near the Dead Sea, which are filled with dust when they have been attacked by an insect, leaving the skin of the fruit. (2) A "wild" fruit of a small size which, like the Solarium, describes the fruit as being "as large as an apple of average size, of a bright yellow color, hanging three or four together close to the stem"; or as suggested by Tristram (2) those of the wild colocynthis, the fruit is fair of aspect with a pulp which dries up into a bitter powder (EB, art. "Sodom," col. 4669, n. 2). This colocynthis is supposed to be the "wild vine" mentioned 2 K 4 39. The "vine of Sodom" of Dt 22 32 has not been supposed to bear the "Jerusalem plum" (cf. Jos 8 16), but most modern writers regard the passage as figurative.

W. L. WALKER

APPLY, a-plit: Purely an OT term representing fire, Heb. ber, which signifies "to enter," "to incline," "to give," "to go about," "to put or place," in each instance spoken of the heart in its attitude to wisdom (Ps 90 12 AV); instruction (Prov 23 12); understanding (2 2); knowledge (22 17).

APPOINT, a-point': This word is used for the expression of a large variety of ideas and the tr of almost as many words.

229, nádhán = "put into office" (Gen 41 34; Nu 1 50; Est 2 3); "select" (Jer 51 27); "put in charge" (Jer 49 19; 50 44); "assign" (Nu 4 27; Jer 15 3); "send" (Lev 26 16); "designate," "select" (Ex 21 18); "consecrate" (Lev 10 14; Deut 31 9); "single out" (1 8 11; Hosea 1 11). 229, nádhán = "designate," "select" (Nu 35 6 AV; Josh 20 2 AV; Ezek 46 6); "set aside" (Ex 30 16). 229, shith = "designate," "select" (Job 14 13; Isa 26 1). So also 229, ἀνάπλημα "designate," (1 K 15 16; Nch 7 3); so 229, ἀνάπλημα = "designate,

APT (lit. "fitte"): Applied to one distinguished for readiness in meeting demands of some special situation, or emergency. For this, there is no specific Biblical word in either OT or NT. It occurs always in the English tr in paraphrases, as "apt for work" (2 K 24 18); "apt to teach," or "apt to teach" (1 Thess 2 5; 1 Cor 11 29). See CLEVER.
ARABAH, ar′a-ba, a-ra′ba (אַרְבַּא, ἀράβα, "ambush"): This word indicates in general a barren district but is specifically used in whole or in part to the depression of the Jordan valley extending from Mount Hermon to the Gulf of Akabah. In the AV it is translated literate only once (Josh 15:18) describing the border of Benjamin. Elsewhere it is rendered "plain". But in the TV it is everywhere transliterated. South of the Dead Sea the name is still retained in Wady el-Arabah. In Dt 1:1; 2:8 AV ("plain") the southern portion is referred to; in Dt 3:17; 4:49; Josh 3:16; 11:2; 12:2; and 2 K 14:25 the name is closest connected with the Dead Sea and the Sea of Chinnereth (Genesaret). The allusions to the Arabah in Dt 11:30; Josh 8:14; 12:1; 15:18; 2 S 2:29; 4:7; 2 K 4; Jer 30:4; 62:7 indicate that the word was generally used in its most extended sense, while in Josh 11:16, and 12:8 it is represented as one of the great natural divisions of the country.

The southern portion, which still retains the name of Arabah, is included in the wilderness of Zin (Nu 34:3). According to the survey of Lord Kitchener and George Armstrong made in 1883, under the auspices of the Pal Exploration Fund, its length from the head of the Gulf of Akabah to the Dead Sea is 112 miles. The lowest point of the watershed is 465 feet from sea-level, about 1,052 feet above tide, 1,952 feet above the Dead Sea. The average width of the valley up to this point is about 6 miles, but here a series of low limestone ridges (called Er Risheh) rising 150 feet above the plain runs obliquely across it at a distance of 10 miles, narrowing it up to a breadth of about one-half mile. North of this point, opposite Mount Hor, the valley widens out to 13 miles and then gradually narrows to 6 miles at the south end of the Dead Sea. At Ain Abu Werideh, 39 miles north of the watershed, the valley is at the sea-level—1,292 feet above that of the Dead Sea. North of the watershed, the main line of drainage is the Wady el-Jeib, which everywhere keeps pretty close to the west side of the valley. At Ain Abu Werideh it is joined by numerous wadies descending from the Edomite mountains on the east, which altogether water an oasis of considerable extent, covered with a thicket of young palms, tamarisks, willows and reeds.

Twenty-four miles farther north this valley drops down suddenly into the valley of the Dead Sea, or the Ghôr, as it is technically called. Lord Kitchener's report is here so vivid as to be worthy of literal reproduction. "The descent to the Ghôr...
was down a sandy slope of 300 feet, and the change of climate was most marked, from the sandy desert to masses of tangled vegetation with streams of water running in all directions, birds fluttering from every tree, the whole country alive with life; nowhere have I seen so great and sudden a contrast" (Mount Seir, 214). The descent here described was on the eastern side of the semi-circular line of cliffs formed of sand, gravel, and marl which enclose the Ghôr at the south end, and which are probably what are referred to in Josh 15 3 as the "ascent of Akribbin." The ordinary route, however, leading to the plain of the Arabah from the Dead Sea is up the trough worn by the Wady el-Jelb along the west side of the valley. But this route would be impracticable during the rainy season after the cloudbursts which occasionally visit this region, when torrents of water pour down it, sufficient to roll blowdiers of considerable size and to transport an immense amount of coarse sediment.

South of the Dead Sea a muddy plain, known as the Sebkah, extends 6 miles, filling about one-half of the width of the Ghôr. During most of the year the mud over this area is so thin and deep that it is impossible to cross it near its northern end. This whole area between the "ascent of Akribbin" and the Dead Sea has evidently been greatly transformed by the sedimentary deposits which have been brought in by the numerous tributary wadies during the last 4,000 years, the coarser material having encroached upon it from either side, and the fine material having been deposited over the middle portion, furnishing the clay which is so embarrassing to travelers. (For further considerations upon this point see Dead Sea; Cities of the Plain.)

The Arabah in its whole extent occupies a portion of the great geological fault or crevasse in the earth's crust which extends from Anti-Lebanon southward between the Lebanon and the Anti-Lebanon Mountains to the valley of the Jordan and the Dead Sea, and onward to the Gulf of Akabah, whence it can be traced with considerable probability through the Red Sea and the interior lakes of Africa. The most remarkable portion of this phenomenal crevasse is that which extends from the Waters of Merom to the springs of Ain Abu Werideh; for through this entire distance the Arabah is below sea-level, the depression at the Dead Sea being approximately 1,292 feet. See Dead Sea. Throughout the entire distance from the Waters of Merom to the watershed, 45 miles from Akabah, the western side of the Arabah is bordered by strata of Cretaceous (chalk) limestone rising pretty continuously to a height of from 2,000 to 5,000 feet above sea-level, no older rocks appearing upon that side. But upon the eastern side older sandstones (Nubian and lower Carboniferous) and granitic rocks border the plain, supporting, however, at a height of 2,000 or 3,000 feet Cretaceous limestones corresponding to those which descend to the level of the gorge on the western side (Fig. 1). Throughout this entire distance, therefore, the strata have either slipped down upon the western side or risen upon the eastern side, or there has been a movement in both directions. The origin of this crevasse dates from the latter part of the Cretaceous or the early part of the Tertiary period.

But in post-Tertiary times an expanded lake filled the region, extending from the Waters of Merom to Ain Abu Werideh, a distance of about 200 miles, rising to an elevation of about 1,400 feet above the present level of the Dead Sea, but not sufficiently high to secure connection with the ocean either through the Arabah proper or across the valley of Esdraelon. This body of water was, on the average, 30 miles wide and over the northern part of the Dead Sea had an extreme depth of 2,700 feet. The most distinct evidence of the existence of this enlargement of the lake is to be found at Ain Abu Werideh, where Hull reports "banks of horizontally stratified materials . . . sometimes of coarse material, such as gravel; at other times consisting of fine sand, loam, or white marl, with very even stratification, and containing blanched semi-fossil shells of at least two kinds of univalves, which Professor Haddon has determined to be Melanta tuberculata Müll, and Melanopsis Saulcy, Bourc." (Mount Seir, 99, 100). These are shells which are now found, according to Tristram, in great numbers in semi-fossil condition in the marl deposits of the Dead Sea; and both of these genera are found in the fluvo-marine beds formed in the brackish or salt water of the Isle of Wight. The existence of the shells indicates the extent to which the saline waters of the Dead Sea were diluted at that time (Figs. 2, 3). It should be added, however, that species somewhat similar still exist around the borders of the Dead Sea in lagoons where fresh water is mingled in large quantities with that of the Dead Sea. This is especially true in eddies near the mouth of the Jordan. (See Merrill, East of the Jordan. Hunt-ington in 1909 confirms the fact that these high-level shore lines are found on both sides of the Dead

---

**Fig. 1.—Geological Cross-Section of Southern Palestine, through Bethlehem. After Blanckenhorn.**
Sea, though for some reason they have not been traced farther north.

At lower levels, especially at that which is 650 feet above the Dead Sea, there is, however, a very persistent terrace of gravel, sand and clay marking a shore line all the way from the south end of the Dead Sea to Lake Galilee. This can be seen running up into all the wadies on either side, being very prominent opposite their mouths, but much eroded since its deposition. On the shores of the lake between the wadies the line is marked by a slight accumulation of coarse material. Below the 650-foot line there are several other minor strands marking periods when the subsiding waters were for a short time stationary.

This period of enlargement of the waters in the Arabah is now, with abundant reason, correlated with the Glacial epoch whose influence was so generally distributed over the northern hemisphere in early post-Tertiary times. There were, however, no living glaciers within the limits of the Arabah Valley — Mount Hermon not being sufficiently large to support any extensive ice-sheet. The nearest glacier of any extent was on the west side of the Lebanon Mountains, 40 to 50 miles north of Beirût, where according to my own observations one descended from the summit of the mountains (10,000 feet high) 12 miles down the valley of the Kadesha River to a level 5,500 feet above the sea, where it built up an immense terminal moraine several miles across the valley, and 5 miles up it from its front, upon which is now growing the celebrated grove of the Cedars of Lebanon. (See Records of the Past, Am. ser., V, 195-204.) The existence of the moraine, however, had been noted by Sir Joseph Hooker forty years before. (See Nat. Hist. Rev., January, 1862.)

But while there were no glaciers in the Arabah Valley itself, there, as elsewhere, semi-glacial conditions extended beyond the glacial limits a considerable distance into the lower latitudes, securing the increased precipitation and the diminished evaporation which would account for the enlargement of the bodies of water occupying inclosed basins within reach of these influences. The basin of Great Salt Lake in Utah presents conditions almost precisely like those of the Arabah, as do the Caspian and Aral seas, and lakes Urumiah, Van, and various others in central Asia. During the Glacial epoch the water level of Great Salt Lake rose more than 1,000 feet higher than now and covered ten times its present area. At the same time the Aral Sea disappeared into the Caspian Sea through an outlet as large as Niagara. When the conditions of the Glacial epoch passed away the evaporation again prevailed, until the water areas of these inclosed basins were reduced to the existing dimensions and the present equilibrium was established between the precipitation and the evaporation.

While it is susceptible of proof that the close of this epoch was geologically recent, probably not more than 10,000 years ago (see Wright, Ice Age in North America, 5th ed., ch. xx), the present conditions had become established approximately long before the time of Abraham and the development of civilization in Babylonia and Egypt.

East of the Arabah between the Dead Sea and Akabah numerous mountain peaks rise to the height of more than 4,000 feet above tide level, the highest being Mount Hor, though back of it there is a limestone range reaching 5,000 feet. This mountainous region contains numerous fertile areas and furnishes through its numerous wadies a considerable amount of water to favor vegetation. The limestone floor of the Arabah south of the Dead Sea is deeply covered with sand and gravel, washed in from the inclosed areas from the east. This greatly favors the accumulation of sediment at the mouths of the wadies emptying into the south end of the Ghôr.

At present the Egy government maintains a fort and harbor at Akabah, but its authority does not extend into the interior. The

**2. History** Arabah has, however, from time immemorial furnished a caravan route between northern Arabia and the Sinaitic Peninsula. It was this which supported the great emporium of Petra. The Israelites traversed its southern portion both on their way from Horeb to Kadeeb-barneea and on their return, when the king of Edom refused passage through his land (Nu 20:21; Dt 2:9). This opposition compelled them to turn up the forbidding Wady el-Them, which opens into the Arabah a few miles north of Akabah and leads to the Pilgrim route between Damascus and Mecca. The terrors of this passage are referred to in Nu 21:4, where it is said, "the soul of the people was much discouraged because of the way." Around Akabah itself there are still groves of palms, the existence of which, at the time of the Exodus, is indicated by the name Elath (Dt 2:9), "a grove of trees."

**ABABBATINE, arb-a-ba-tîne. SCC ARABBATTINE (Apoc).**

I. **NAME AND SITUATION**

1. Name
2. Situation and Configuration

II. **PHYSICAL FEATURES**

1. The Desert
2. Cities
3. Mountains
4. Rivers
5. Oases and Wells

III. **POLITICAL DIVISIONS**

1. Ancient Divisions
2. Modern Divisions
3. Political Situation
4. Chief Towns
Surrounded as it is on three sides by the sea—by the Indian Ocean on the south, and its two branches, the Red Sea on the west and the Persian Gulf on the east—and configuration of Syria, the country of Arabia is to all intents and purposes an island; and it is named by its inhabitants and by those who speak their language "the Island of the Arabs." In configuration the country is roughly of the form of a parallelogram, about 1,000 miles in length by 500 or 600 miles broad. This parallelogram is not of uniform altitude, but the generally even surface is tilted to one corner in such a way that the most southerly point contains mountains rising to 10,000 feet in height, whilst the N.E. corner is almost on a level with the sea. The altitudes of the intervening portions are in proportion to their situation with respect to these extremes. Thus the mountains of the S.E. corner have an altitude of from 5,000 to 6,000 feet, those of the N.W. of 4,000 or 5,000, whereas those which are situated near the middle of the W. coast rise to 8,000 feet, and the plateau which forms the northern half of the interior of the peninsula is between 3,000 and 4,000 feet above sea-level. In consequence of this configuration the main watershed of the country runs parallel to the W. coast at a distance of between 50 and 100 miles from the sea, with a subsidiary watershed running along the south, and the principal outlets for the drainage run in a N.E. direction. The whole of Arabia stretches from about 13° to about 36° north of the equator, and it lies between 33° and 60° east of Greenwich. Its area is about eight times that of the British Isles, or nearly 1,000,000 square miles.

II. Physical Features.—Although Arabia is considered by geographers as part of the continent of Asia, it belongs in almost every respect to Africa. The great bulk of the country Desert is desert, of fine sand in the southern part, but consisting of coarse sand (the nefūd), gravel and flints in the northern. It is in fact an offshoot from the great African Sahara. Of the southern half little is known, and it has never been crossed by the foot of European. The northern has been traversed in many directions; it has numerous caravan routes, and some important towns are situated in the heart of it. Arabian fancy has peopled the desert with strange creatures not of human kind (cf. Isa 13:21; 34:14), and fancy has been justified by the common phenomena of the mirage and the Pata Morgana (Isa 38:7; 49:10). To the keen sight of the nomad the glowing desert heat is visible as a fine gossamer (Isa 18:4). Perhaps this is the meaning of šārābī in 35:7; 49:10 also. It is quite certain, however, that the whole of Arabia and especially the northern borders in the neighborhood of the Sinai peninsula and eastward to the south of Pal and the country of Edom, were at one time very much better watered than they are at the present day. For centuries a constant process of desiccation has been going on. Indeed, persons now living can remember the existence of wells one or two generations ago, where now there are none. It follows that this district must formerly have supported a very much larger population than it does at present.

It will be obvious that the climate of Arabia must vary greatly in its different parts, the temperature and rainfall depending not so much

2. Climate upon latitude as upon altitude, so that within a few miles the greatest extremes co-exist. In the southern angle where the mountains are highest there are two rainy seasons, one in spring the other in autumn, so that this province well deserves its Grecian name of
Arabia Felix. In the higher reaches of this province, for example, at its capital San'a, snow falls in December on the coast of the Red Sea. Loheia, scarcely 100 miles distant, the thermometer rarely falls below 80°. In the Red Sea 93° is a common reading in the shade in summer, while the heat of the Persian Gulf, owing to its steep shores and great evaporation, is hardly endurable by a European. In the N.W. province, in which are situated the two sacred cities of Mecca and Medina, the rainfall is unreliable and takes the form of heavy thunder showers which occasion frequent floods in the former town, and are, owing to the arborial denudation of the country, of little use for the purpose of irrigation or irrigation. These winter rains may commence as early as September, and by December at latest the new pasturage will have covered the ground. Hence the true spring in northern Arabia, or in Syria, falls in our autumn, but there is not the distinction of former and latter rain (cf Hos 6:3) which obtains in Pal. The climate of the northern central plateau is described by Palgrave as one of the most salubrious in the world.

3. Moun-
nets

In the midst reaches it attains an elevation of between 8,000 and 9,000 feet, and at its southern extremity it spreads out into the plateau of Arabia Felix, where its highest peaks have an altitude of about 11,000 feet. The eastern corner of the peninsula the range of Jebel Akhdar runs parallel to that on the W., and is connected with it along the border of the south coast by a range of less elevation. In the interior the northern plateau is intersected by numerous irregular mountain ranges of moderate length, of which the most frequently mentioned are Jebel Aja and Jebel Selma, which face one another in the Shammar country.

The course of the rivers is determined by the direction of the mountain ranges. As has been said the drainage is mainly from W. to E., but the fact is that Arabia is a land almost without rivers. The only quarter in which perennial streams are found is Arabia Felix, and to some extent they occur along the coast. The rest of the peninsula is destitute of rivers and lakes. The scour (seld) from the winter thunder showers cuts out for itself a torrent bed (wadi), which, however, may be filled only once or twice in a generation, and even then dries up as soon as the rain ceases. The most important of these wadis is the W. Sirhan, which runs from the Hauran in a S.E. direction to the Jauf (see Dumah), the W. el-Kora to the N. of Medina, the W. el-Hameth between Medina and Mecca, and the W. Duweisir to the S. of Mecca. Larger than any of these however is the W. er-Rumma, which extends from the neighborhood of Medina to the head of the Persian Gulf. It has never been explored, and is filled with water only at long intervals.

In these circumstances the Arabs have to seek their water supply elsewhere than in their rivers. In many places the surface of the country sinks into a depression down to the level of permanent water, thus forming an oasis, which word is probably none other than the Arab. wadd. The best known of these occur at Khisbar and Tima (see Tima) to the N. of Medina, and also at Tabuk to the N.W. The W. Duweisir is itself practically an oasis of a length of three days' journey. In addition to these natural depressions there are also dotted over all the inhabited parts of Arabia and along the caravan routes numerous wells, these routes following naturally the course of the wadd. These wells are plentiful in the W. Sirhan, and a number were sunk by command of Zubeyda the wife of Harun al-Ra'ahid, along the Pilgrim way from Persia to Mecca; but the most famous of all is the well of Zamzem in the Holy City itself. It is said that the water in it flows, so that it is probably one of those subterranean rivers which are not uncommon in Arabia. Its water, however, is heavy and brackish and causes indigestion, and the sweetest water obtainable in Mecca for drinking purposes was traditionally brought by Zebeida from a source some 15 miles distant. The purest water of all is that which collects after rain in the hollows of the numerous outcrops of lava which occur at frequent intervals and in great masses along the western mountain range. A spy, where lava predominates is called a barrak (from the Arabic verb "to be hot"), and several of these volcanic regions still show signs of activity.

III. Political Divisions.—The peninsula of Arabia was divided by the ancient geographers into three parts: A. Petraea, A. Deserta.

1. Ancient and A. Felix. The first of these divisions, names which is found in Ptolemy, means, not A. the Rocky, but that part of A. in which is situated the city of Petra (see Selâ), and it also includes the peninsula of Sinai. It is identical with the desert of the Wandering. A. Deserta is a translation from the Gr. A. érênion of Strabo (cir 24 AD). It denotes the extreme north of the continent of A. which is in like a wedge between the fertile lands which drain into the Euphrates on the E. and into the Jordan valley on the W. It is thus equivalent to the Syrian Desert. The third term, A. Felix, is also a tr from the Gr. A. euêthdes—A. which is again a tr, or rather a mistranslation of the Arab. El-Yemen. This last name denotes the country to the right hand, i.e. the S, just as the Arab. Es-Shem (Syria) means the country to the left hand, or to the N. El-Yemen, however, was interpreted as equivalent to El-Eyman, the Fortunate or Happy, a name which the district truly deserves.

Since before the time of Mohammed (6th cent.) A. has been divided into seven or eight tribal or political states, the boundaries of which are for the most part clearly defined by intervening deserts or uninhabited tracts. The most important of these a religious point of view is the Hijaz, which may be described as the northern half of the western coast, stretching from the Red Sea to a distance of between 100 and 200 miles inland. The whole of the coast line, indeed, where the land is low lying is called the Thîhâma. This
may, however, be considered as belonging to the adjacent high land beneath which it lies. Hijaz means ‘Barrier,’ and the district is so called because it contains only a certain range of hills which separate the great northern central plateau from the Tihamā. This last name is connected with a root meaning "to be unhospitable." Whether the district gave its origin to the verb, or the verb gave its denomination to the district, the name is equally appropriate. The chief importance of the Hijaz arises from the fact that in it are situated the two holy cities of Mecca and Medina—the cradle and the grave of the Prophet. It is thus the religious center of the Moslem world, and may ride strong claims to the title of capital. The Yemen, a district of the southern corner of the peninsula. It is identical with A. Felix, and its physical characteristics have been described above. The Hijaz often fell to the sovereignty of Egypt, but for the last four centuries it has, like Egypt, been subject to the Turk. It is only within the last fifty years, on the other hand, that the sultan has attempted to enforce his sovereign rights in the Yemen. The southern coast of A. is generally designated as Hadramaut, although in strictness that appellation is properly applicable to a section of it only. The eastern corner of A. is taken up by Oman, a state which has generally claimed and secured a position of independence. Both it and the southern states are more or less influenced by Persian government. The country adjacent to Oman toward the N. formed the province of El-Bahrein ("the Two Seas"), but this name is now restricted to a large island at the western end of it and some smaller islands famous for their pepper; their remaining province of El-Hassa is occupied by practically independent tribes. From many points of view the most interesting province of A. is the great northern central plateau called Najd, that is, "high land." From its situation it is least susceptible to foreign influence. It contains some fairly large towns, but the bulk of its population live, as their fathers have done from time immemorial, the life of the Bedawi. Two small provinces remain to be noticed. Between the Yemen and the Hijaz lies the district of Asir, which largely resembles the first-named province in its physical features. To the E. of Najd lies the district of Yemān, which used to be the territory of an important tribe. Today bear a considerable resemblance to that to which obtained immediately before the mission of Mohammad. At that time a point in regard to political history. In A. today is it which from the Arabs of Mohammed's time—the use of gunpowder. Except in respect of the three commodities just mentioned, everyday life in the desert today goes on exactly as it did 1,600 years ago. Forest trees are extremely rare and the possibility is that the tamarisk called ghada which grows in the northern nefud is proverbial for the quality of charcoal it affords and is a favorite food of the camel. An acacia called hatlād is likewise a by-word on account of its long spines. The wood is used for making camels' saddles; it grows in the Tihamā. As in Najd and in most countries which have been inhabited for many thousands of years, the larger trees have long been cut down for fuel or for building purposes.

Among beasts of prey, wolves, hyaenas, jackals, and (it is said) even lions are found in A. Many of the tribes are named after these and other animals. The wild oryx (see Unicorns) is rarely seen, but gazelles are plentiful. Ape abound in the Yemen, as they do all along the N. of Africa, and are kept as pets (cf. 1 K. 10:22). By far the most important domestic animal is the camel. Without it many of the poorer people would be unable to exist. It is commonly supposed that the best breed of horses comes from Nejd, but this appears to be an error. In Nejd the camel is

**IV. Flora and Fauna.**—The peninsula of A. belongs, as has been said, in its physical features to Africa, and its flora and fauna are those of that continent. Of all the products of the soil by far the most important is the date palm. It flourishes in every oasis. In the Wādī Duweirs alone it is said one hundred thousand date palms were planted in the shelter of the palm groves. The dates, which are the staff of life of the Arab, differ in quality in each locality, each district producing a variety of its own. In the Yemen, with its varied altitudes, almost every kind of fruit and vegetable known in temperate latitudes is cultivated on the terraced mountain sides. Vines are grown, as Ibn Khaldūn remarks, for the sake of the berry, not for the purposes of wine making. The vine is common to Arabia and Palæstina, whereas the date palm has almost gone out of cultivation in the latter country. On the other hand the olive, which is so important in the northern country is almost unknown in the southern. The olive is constantly pressed for oil, which is used for lighting and cooking. In the S. coast especially are exported frankincense, balsam, myrrh and other aromatic plants; and cotton is cultivated in the province of Oman. Cereals flourish in the Yemen and tobacco. Coffee and tobacco are the only two articles of consumption which are used in A. today and which have not been used from time immemorial. Coffee was probably introduced into A. from Galland on the African mainland two or three cents ago. The Arabs are most inured to coffee and tobacco. Tobacco was probably first brought from English ships at Constantinople in the reign of James I. It is cultivated in every oasis, unless in the interior in Nejd, where its use is discouraged on religious grounds. There is only one other natural product of A., the gum of the Agave, and the date gum which comes from the Arabs of Mohammad's time—the use of gunpowder. Except in respect of the three commodities just mentioned, everyday life in the desert today goes on exactly as it did 1,600 years ago. Forest trees are extremely rare and the possibility is that the tamarisk called ghada which grows in the northern nefud is proverbial for the quality of charcoal it affords and is a favorite food of the camel. An acacia called hatlād is likewise a by-word on account of its long spines. The wood is used for making camels' saddles; it grows in the Tihamā. As in Najd and in most countries which have been inhabited for many thousands of years, the larger trees have long been cut down for fuel or for building purposes.

Among beasts of prey, wolves, hyaenas, jackals and (it is said) even lions are found in A. Many of the tribes are named after these and other animals. The wild oryx or oryx (see Unicorns) is rarely seen, but gazelles are plentiful. Ape abound in the Yemen, as they do all along the N. of Africa, and are kept as pets (cf. 1 K. 10:22). By far the most important domestic animal is the camel. Without it many of the poorer people would be unable to exist. It is commonly supposed that the best breed of horses comes from Nejd, but this appears to be an error. In Nejd the camel is
the indispensable beast of burden and mount; horses are comparatively useless there. The best Arabian horses are reared in Mesopotamia. Studs and herds are kept by the Najd, but the horses are small and of little use. The pedigrees of the best horses go back, according to tradition, to the time of Solomon (1 K 10:28). Dogs are trained to hunt the wild ox; to tend sheep and to watch the camp. All domestic animals—dogs, horses, mules, asses—receive names as with us. The ostrich is rarely met with, but is found as far north as the Jauf; it no doubt found its way into A. from Africa. A common bird is the *kata* or sand-grouse. It migrates to water in extreme heat. “Better guided than a *kata*” is a common proverb. Hawks and falcons are found, and falconry among the Arabs was a favorite sport. In A. the locust, so far from being a scourge wherever it appears, is a valuable article of food. It is eaten not only by human beings (Ms 3 4), but also by dogs, horses and even beasts of prey. As might be expected in a rocky and sun-scorched land like A., scorpions and various sorts of serpents abound. The chameleon (Lev 11:30) is common here. It is used as a simile for sickle people and those who do not fulfill their promises. It may be regarded as a substitute for the thermometer, as on very hot days it ascends trees or any high places. Another sign of extreme heat is the humming of the ground. The Persian Gulf, especially the Bahrein archipelago, is famous for its pearls, while the Red Sea is noted for its coral reefs, which have caused many a shipwreck. It is believed that in the interior of Hadramaut there are many mineral deposits in lingering gold.

V. Inhabitants.—The inhabitants of A. are divided into three classes.

1. Classification.

1. Classifications

A. Arabians, divided into three classes. There are in the first place a number of tribes which became extinct, and which are not connected genealogically with those which survived. The latter are divided into two great stems, the south Arabian and indigenous branch descended from Kahtan, and the north Arabian or immigrant tribes descended from Jahlad, the son of Abraham. There is naturally a good deal of inconsistency in the various traditions of the origins of these tribes and their subsequent history.

2. Extinct Tribes

Of the extinct tribes the most familiar name is that of Amlik or Almil (Amalek). By the Arabian genealogists he is variously described as a grandson of Shem and as a son of Ham. In Gen 36:12 he is a son of Esau’s son, Eliphax, by Timna. They are said to be first met with in Chadæa, from which they were expelled on the rise of the Assyrian power under Ninurad. They migrated into Ar, occupying in turn the Bahrain, Omán, the Yemen, and finally the Hijaz, where they are said to have been the first settlers at Yathrib (Medina) and also to have occupied land round Mecca and Kheibar. In the time of Abraham they were expelled from Mecca on the arrival of two new tribes from the S., those of Juhum and Khadrah (Gen 26:1). Later, it is said, David, during the rebellion of Absalom, took up his quarters in Kheibar and ruled over the surrounding districts. According to another tradition Moses sent an expedition against the Amalekites in the Hijaz on which occasion the Amalekites, disobeying orders, spared their king Arkam (of Rekon, Nu 31:8; Josh 13:21) —a reminiscence of the incident in the life of Saul (1 S 15). In any case the Amalekites were supplanted in the northern Hijaz by Jews or Jewish tribes, who continued there until the unification of Moab and Timna. The Amalekites migrated into Egypt and southern Pal. The Pharaohs of the time of Abraham, Joseph and Moses are represented to have been Amalekites. Finally, broken up by Josch, they fled into northern Africa, where they are said to have grown into the Berber race. The rest of the tribes which became extinct like the Amalekites are of less interest for the present purpose, being unconnected with the Bible narrative. They are mentioned in the Koran, in which book their destruction is attributed to their idiosyncratic provoking and to their rejection of the monotheistic prophets. The best known and most important are 'Ad and Thamûd. 'Ad is variously named the son of Amalek and the son of Uz (Gen 21:30; 10:28). They were driven straight to the grave.

3. The Southern Arabian Tribes

The southern Arabs claim to be descended from an ancestor called Kahtan son of 'Abir, son of Shalikh, son of Afrakshad, son of Shem, son of Noah. Kahtan is undoubtedly the Biblical Joktan (Gen 10:26), and the names of his descendants reappear as Arab. place names. Indeed the tenth chapter of Gen throws much light on the earliest history of A. and the movements of the tribes. Thus the fact that Sheba and Dedan appear as grandsons of Cush, that is, as Abyssinian tribes descended from Ham, in Gen 10 and again as descendants of Keturah and Abraham in 26 3 points to the fact that parts of these tribes migrated from the one region to the other. Havilah in Gen 10 7 may similarly be connected with Havilah in 10 29, the intercourse between S.W. Arabia and the opposite coast of Africa being always very close. Among the sons of Joktan are mentioned Melah, Hetzur, Jahavah, Kedemoth, Sheba, Ophir, Havilah. In Almad we have probably the Arab. El-Mudul, a name which occurs among the descendants of Jurhum, son of Yakkant (Joktan). Hazarmaveth is obviously Hadramaut. Melah is the ancient name of Sarda, the capital of the Yemen. Sheba is the Arab. Saba or Marib. Ophir and Havilah were probably in S. or E. Arabia. In Gen 10 30 it is said that the camping grounds of these tribes stretched from Mecca as you go toward Sheba, the mountain of the East, that is, probably from the N. of the Persian Gulf to the center of S. Arabia, Sebah being Zafar, the capital of the 8. Arab kingdom near to the present Mibbase.

4. Migration of Tribes

Many of the most illustrious tribes are descended from Kahtan, and some of them still survive. A constant stream of migration went on toward the N., thus the tribe of Jurhum left the Yemen on account of drought and settled in the Hijaz and 'Ad. The Thamul, driving out the Amalekites, and were in turn driven out by Koda'a, another Kahtanite tribe. After that they disappear from history and are reckoned among the
extinct tribes. Koda'a was a descendant of Himyar. The Himyarites founded, about the 1st cent. B.C, a kingdom which lasted for five centuries. The place of Tubab and the center of their worship was successively Marib (Sab'a), Zafar and San'a. One of their monarchs was the queen Bilikis whom the Arabian historians identify with the queen of Sheba who visited Solomon, though she must have lived much later. The story of the meeting is given in the Koran, ch 38. A chief occasion on which many of the tribes left the district N.E. of the Yemen was the bursting of the great dam, built by Lokman at Marib, about the 2nd cent. AD. A.D. It is said these grew into the Arabian kingdom of Ghasan, whose capital was Damascus and many of whose kings bore the name Al-Harith (Arezas, 2 Cor 11:32). This kingdom lasted till the time of Mohammad (7th cent.) and was in alliance with the Rom and Gr empires. On the opposite side of the Syrian desert the Lakhmid kingdom of Al-Hira on the Euphrates (also of Khaitante origin) was allied to Persia. The two Arabian "sulfer-states" were almost constantly at war with one another. Among the Arabs Ishmael holds the place occupied by Isaac in the Heb tradition. It was to the valley, afterward the site of the town of Mecca, that Abraham conducted Hagar and her son, and that Ishmael grew up and became a great nation. The locality is full of spots connected by tradition with his life history, the ground where Hagar searched for water, the well Zemzem of which Gabriel showed her the place, the Thamud of Arabian stock who gave up to death to the grave his son (Ishmael), and the graves of Hagar and Ishmael. The Jurhum, among whom Ishmael grew up, gave him seven goats: these were the capital with which he began life. He married a woman of Jurhum and had twelve sons (Gen 25:16) of whom Kudair and Nabat are the best known, perhaps the Cedrei and Nabataei of Pliny; other sons were Dama and Tema (q.v.). The subsequent history of the Ismaelites is lost for several generations until we come to 'Adnah, who is said to have been defeated by Nebuchadnezzar, when the latter invaded Arabia. All the Ismaelite tribes are descended from 'Adnah. They are the north Arabian tribes, as opposed to the Khaitante or Sabaite. They were under their chief, Kosay, became master of Mecca, driving out Koda'a. Later, as the tribe of the Prophet, they became the rulers of Arabia and the aristocracy of the Muslim empire; and the descendants of the Jurhum tribe to this day the only hierarchy known to Islam.

There are one or two other branches which are not included in the above classification: such are the Nabateans (see NABATIEN) and the descendants of Esau and Keturah (Gen 25:2 ff).

In Arabia there was and still is, in spite of religious disabilities, a large Jewish population. Before the age of Mohammad they lived in the cities of the desert, which at that time were largely Jewish. The desert was not given by the Jews to the Arabs, but the Arab tribes are said to have been at first subject to the Jewish paramount chiefs.

7. Foreign Tribes

7. Elephants

Known tribel An-Nadr and Koreiza

—occupying Yathrib (Medina).

At the rise of Islam they were expelled from A., but at the present time there are probably some 60,000 Jews in the Yemen alone. There has always been a close connection between the S. and W. of A. and the opposite African coast. Especially in the 6th cent. there was a large influx of Abyssinians into the Yemen, as there still is into the western districts. A like interchange of population went on between Zanzibar and Oman.

VI. Religion.—The religion of the greater part of the Arabs before the time of Mohammad consisted of a vague deism combined with a primitive form of stone-worship. The monotheism This is chiefly true of the Ishmaelite tribes descended from Modan, a great-grandson of 'Adnah, and among them it is especially true of Koreish. The origin of this stone worship may have been that as each family was forced to hive off from the main stock and quit the sacred territory around Mecca, it carried with it a stone as a monument of the homeland. This stone soon became a fetish. It was worshiped by those Arabs who left behind them a "guardian" through whom a journey a man would perform this religious duty, and also immediately on his return, before even visiting his wife and family. The best known idols of the pagan Arabs, from the mention of them in the Koran, were Abu al-Aziz and Abu Bakr (Kor 53:19-20), worshiped by the Thakif at Taif, by the two tribes of Medina, the Aus and the Khazraj, and by Koreish, in a shrine near Mecca, respectively. Koreish had also a great idol named Hubal in the "house of God" at Mecca, which contained other idols besides. The deity in each case was probably at first a large bowler of stone, then a portable image was made, apparently in human form. They were regarded as feminine and called the daughters of God. Indeed, Al-Lat is apparently merely the feminine of Allah (God). The deities mentioned in the Koran (71:23), Yaghuth, Ya'tik and Nen, were worshiped in the Yemen. It is certain, however, that the idolatry of the Arabs was not "the Iguuna, Kuraysh, and Harim" ("the "Iguna, Kuraysh, and Harim"; cf Acts 17:30)—so native writers name the ages before Mohammad (Koran 3:148, etc)—has been greatly exagerated by Muhammadan historians. It is remarkable that the words denoting an idol, "rūmah and "wāhām, are not Arab, roots, and the practice of idolatry seems also to have been an importation from without. Even the idolatrous Arabs believed in a supreme deity, whose daughters the idol deities were, and with whom they had powers of intercession. They therefore were rather images of saints than of gods. As Renan has said, the desert is monotheistic; it is too empty to give birth to a pantheon, as the fruitful plains of India could do. At the present day the desert Arabs are more strictly monotheistic than the Muslims themselves. Their religion consists in nothing save a vague belief in God.

Though there were many houses of God in the country, the chief religious resort even before the time of Mohammad was Mecca. The Ka'ba, the House of God (see Ka'ba), was built by Abraham and Ishmael. The honor of acting as "guardian priest" of the House was a subject of rivalry among the tribes. The office was held consecutively by the tribes of...
Jurhum, Koda'a and Koreish, and last by the grand-
father and uncles of Mohammad. These, there-
fore, correspond to the tribes of Judah in Is-
rael. The Koran is said to have contained a large number of images,
but it is remarkable that the nearer our authorities
got to the time of Mohammed the smaller is the number of images mentioned. The chief of these,
Hubal, is not named in the Koran. The worship
took the form of circumambulation (tawaf), running
or marching round the sanctuary (cf Ps 25 6).
An annual visitation was and still is made by those
living at a distance, and sacrifices are offered. This
is perhaps the image of the sacrifice for the
sacrifice corresponding to the rite among the Hebrews
(Ex 10 9 and often). These religious assemblies
were combined with fairs, at which markets were
held and a considerable trade carried on. Before
the time of Mohammed the great annual fair was
held at Okaz, a place still pointed out about three
days' journey E. of Mecca and one day W. of Taif.
Here were not only all kinds of commercial trans-
actions carried on — auctions, sales, settling of
accounts and payment of blood-wit, but an academy
was held at which poets recited their odes, and
received judgment upon their merits. These fairs
were generally held in the sacred months, that is,
the first, seventh, eleventh and twelfth months, in
which the former Meccans lived and therefore
a great civilizing and pacifying influence.

Before the time of Mohammad Judaism pre-
vailed extensively in Arabia, especially in the
Hijaz. It began no doubt with the migration of
Mohammad's father, Jurhum, and spread thence, in disturbed
political conditions at home. The
conquest of Pal by Nebuchadnezzar, by the Seleucids,
by the Romans under Pompey, Vespasian and
finally Hadrian, drove many Jews to seek peace and
fame out of the desert, their forebears had once
had Thither St. Paul also withdrew
after his conversion (Gal 1 17). Two of these
gentile tribes, the Nadir and Koreza, settled at
Medina, first in independence, then as clients of the
Aur and Kharraz. In the end they were harassed
and destroyed by Mohammad. The Jewish colony
at Kheibar met the same fate. Several free Arab
tribes also professed the Jewish faith, especially
certain branches of Himyar and Kinda, both descendants
of the former Jewish tribes in the Arabian Peninsula and
later in central Arabia. Judaism was introduced
into the Yemen by one of the Tubbias, probably in
the 3rd cent. AD, but it was not until the begin-
ing of the 6th cent. that it made much headway. At
that epoch the tribe of the Tubbias dispersed and
became fierce protagonists of this creed. He seems to have
attacked the Aus and Kharraz to whom the Jews of
Yathrib (Medina) were subject. He instituted
against the Christians of Nejran, a territory lying to the
N.E. of the Yemen, a persecution which
brought upon him the vengeance of the Byzantine
emperor and of the Negus of Abyssinia and in-
volved his kingdom and dynasty in ruin.

Judaism did not hold such a large place in Arabia as
did Christianity. The apostle of the Tubbias
sent to have carried the gospel the thither.

4. Chris-
tianity
One of the Hurumin kings who may have
lived about the beginning of the 2d
cent. AD is named Abil el-Mashih
(Christ's slave) and was, as such,
converted into Christianity. The
Christian emperor Constans
(337-350) sent the Bishop Theophilo into S. Arabia
in order to obtain toleration for the Christians.
The mission was successful. Churches were built
at Zafar, at Aden, and on the shores of the Persian
Oceans. The emperor's real object was doubtless
political—to counteract the influence of Persia in
these regions. Most of the Yemenite tribes were
at this time pagan: they worshipped the idols men-
tioned above (Kor 71 23). Some time after we
read the Visitation and the Birth of the
saviour of the inscriptions at Axum as king of the Himyarites.
This supremacy would be favorable to the spread
of Christianity. One of the chief seats, however,
of the Christian religion, was at the above-mentioned
Nejran, the territory of the tribe Harith ibn Ka'b,
whom ecclesiastical writers seem to denote by Are-
thas son of Caleb. It was this tribe that Dhu Nuwais,
Tubba of the Yemen, on his conversion to Judaism,
attacked. He threw all the Christians who held
by him under their faith in consequence of which they were
burned (Kor 85 4). News of this atrocity was
either carried by those who escaped or sent by
the Lakhmid, king of Al-Hira, to the emperor Justin
I, who, in turn, either directly or through the
patriarch of Alexandria, invoked the cooperation
of the Axumite king. The result was that the
Abyssinians invaded the Yemen and overthrew the
Himyarite dynasty. Christianity then became the
prevailing religion of S. Arabia. The Abyssinians
were in their turn, however, expelled by the Pers-
ians, under whom all religions—Christianity,
Judaism and paganism — were tolerated, until they
all disappeared before Islam. Several of the
Lakhmid kings of Al-Hira, although they were
converted from circumcision, adopted the Persian
Zoroastrism, professed Christianity.
Nu'man I who reigned at the end of the 4th and
beginning of the 5th cent., perhaps under the
influence of Simon Stylites, retired from the world
and became a hermit. This was the beginning of the
6th cent., seems to have come temporarily under the influence of the Eutychian heresy.
Nu'man V, one of his successors, was also
converted to Christianity. But the kingdom in which
Christianity flourished most was naturally that in
which it was in closest contact with the Byzantine empire—the
kingdom of the Ghassanids, although it seems not to
have been until after the conversion of
Constantine that this was the case. From his reign
date the monasteries of which the ruins are still
visible in the Ghassanid country. The powerful
Ishmaelite tribe of Taghlib, whose settlements
were in Mesopotamia was also converted to Chris-
tianity through similar influences, but not until
the end of the 6th cent. The latter, however, is the
kingdom of which the Sabians were the
most numerous. This realm was divided into
eight parts, each of which was the property
of a name. Of these parts three have been
mentioned—Munio, the favour of the Sabians. These
name
Sabin has no connection with Sabaean
which is derived from the name of that part

5. The Sabians
These are monotheists who also worshipped
the stars or the angels. The name
Sabian was first used by the Jews and Christians for a
to
people.

Sabins
An account of their religion, taken from
Abul Faraj (Bar Hebraeus), the Jacobite bishop,
who wrote about the middle of the 13th cent.,
will be found in Sale's Koran, Preliminary Discourse,
sec. I. and 2. of the Sabins, however, agreement with
the primitive religion of the Arabs, which
Mohammad sought to supplant. This is impossible,
however, in view of the fact that Mohammad
tolerated the one and proscribed the other. Since
the publication of Chwolson (Sabins of Mohammed),
Sabism has been recognized as the only debt
Sabins are included two very different groups of
people. In the first place the devotees of the old
Sem idolatry which flourished at Harran assumed the
name Sabian to enable them to claim the pro-
tection afforded by the Koran. It is the tenets of
these Harranians of which Chwolson's work con-
tains an exposition. The true Sabians, however,
were a survival of primitive Christian Gnosticism;
whence they were also called Mandaean.
their frequent ablutions they received their name derived from the Aram. "Cloth," to "baptize," the ' ayin being softened to ' aleph, and connected with St. John the Baptist.

The Jews, Christians and Sabians are called in the Koran "the people of the book," that is, those to whom a holy book had been vouchsafed, and who were in consequence of this tolerated. In one passage of the Koran (22 17) a fourth religion is added to these—the Magian, or Zoroastrian, introduced from Persia.

Shortly before the appearance of Mohammed a number of thinking persons had become dissatisfied with the old Arabian religion of their

6. Seekers ancestors, and yet had not joined the after Truth Christian or Jewish faith. They gave up the worship of the old gods, and various sacred books, and sought to find out the true way. They are considered in the Koran as having been of the true faith even before Mo- hammad had appeared. About a dozen are men tioned by the name, of whom the most impor tant are four—Waraka the cousin of Mohammed's wife Khadija; Othman who became a Christian; Obiadallah who became a Christian and then a Muslim; Zeid who traveled in pursuit of Truth, but did not attach himself to any one faith. The Heb prophets and those who accepted their doctrines are regarded as belonging to the same class. A person who is a monotheist, and who yet does not attach himself to any particular creed is called in the Koran a Hamid. This pure religion is called the religion of Abraham. Mohammed claimed to restore this primeval religion in Islām. By John of Damascus Mohammed was regarded as the founder of a Christian sect. It is probable that but for Mohammed the Arabian monotheism would have spread over the whole of Arabia.

ARABIC LANGUAGE. ar'a-bik luq'wā:j: For the student of the Bible the Arabic language is of interest, first, as one of the members of the Sem group of languages, to which belong the Heb and Aram. tongues of the Bible; second, as one of the languages into which the Bible has been translated, and in which a Christian lit. was produced; and thirdly, as the vernacular of Mohammed and his followers, the classical tongue of that religious system which is the offspring of a degenerate Judaism and Christianity.

Schools are generally agreed in grouping the Arabic and Ethiopic together as a South-Sem branch of the Sem stock. For the geographical and ethnological background of the Aram. language, see.

1. Philo logical Character ization ARABIA. A general characteristic of this tongue of the desert is its remarkable retention into a late historical period, of grammatical features obliterated or in process of obliteration in the other Sem tongues at their earliest emergence in lit.; so that in the period since the golden age of its lit., the Arab. has been undergoing changes in some respects analogous to those which its sister-diaktae underwent in their pre-literary or earliest literary stage. Thus, for example, the case-endings of nouns, lost in Aram. and Canaanite, have been husbanded, and Arab. Ayin dialects, beginning to be disregarded in even the early (popular) Bab, lost also in the dialects of modern Arab. are in full vitality throughout the classical period of Arab. literature.

The Arabic language itself, ancient and modern, divides into a vast number of dialects, many of which have attained the distinction of producing a lit. greater or less. But the dialect of the tribe of Koreish, to which Mohammed belonged, is the one that, naturally, by the circumstance of the Koran's composition and diffusion, has become the norm of pure Arabic. Old Arab. poems, some of them produced in "the Ignorance," that is, before the days of Mohammed, are in substantially the same dialect as that of the Koran, for it appears that Bedouin tribes ranging within the limits of the Arabian desert spoke an Arabic little differentiated by tribal or geographical peculiarities. On the other hand the inhabitants of the coast of the Indian Ocean from Yemen to Ceylon, and of the lands beyond that coast, spoke an Arabic differing widely from that of the northern tribes. The various dialects of this "South-Arabic," known partly through their daughter-dialects of today (Mehri, Soctrī, etc), partly from the monuments and important inscriptions ("Mānean" and "Sabaean") found in Yemen by recent travelers, notably Halévy and Glaser, show a closer affinity than do the "North-Arabic" with the Abyssinian dialects (Ge'ez, i.e. "Ethiopic,

Tigre, Tigrī, Amharic, etc.), as might indeed be expected from the admitted S. Arabian origin of the Habesh-tribes or Abyssinians.

For the interpretation of the OT the Arab. language has been of service in a variety of ways. In the department of lexicography it has thrown light not only on many a word used but once in the Bible or too seldom for usage alone to determine its meaning, but also on words which had seemed clear enough in their Biblical setting, but which have received illusory illumination or correction in the immense bulk and range of Arab. lit. with its enormous vocabulary. For the modern scientific study of Heb. grammar, with its genetic method, Arab. has been of the greatest value, through the comparison of this cognate Sem. forms, where, in the main, the Arab. has the simpler, fuller and more regular morphology, and through the comparison of similar constructions, for which the highly developed Arab. syntax furnishes useful rubrics. In addition to this the Arab. language plays a prominent part, perhaps the foremost part, in the determination of those laws of the mutation of sounds, which once governed the development and now reveal the mutual relationships of the various Sem languages.

The script in which we know the Arab. script, with its numerous varieties, developed out of the vulgar Aram. alphabet in N. Arabia; diacritical points were added to many of those letters, either to distinguish Arab. sounds for which no letter existed, or to differentiate letters the forms of which had become so similar as to create confusion. In Yemen another script arose early, that of the inscriptions above mentioned, admirably clear and adapted to express probably all the chief varieties of consonantal sounds in common use, though quite without vowels.

For Arab. VSS of the Scriptures there was most felt by Christian communities living in the Arab-speaking world (primarily, though not exclusively, in Egypt and Syria) the need of a
Christian lit. suited to the tastes of the time and region. Apocryphal and legendary material makes up a large part, therefore, of the list.

2. Christian of Christian Arab. lit. See Arabic.

BIBLICAL LITERATURE was not the smaller degree of intellectual activity in those circles. It is not surprising that most of such material, and indeed of the entire literary output, consists of translations from Syr, Gr or Coptic, and that original productions are few in number.

Of these last the most noteworthy are the following: theological and apologetic tracts by Theodore, bishop of Haran, the same who held the famous dispute with Mohammedan scholars at the court of G Firuz Al-Mamun early in the 9th cent.; apologetic and polemic writings of Yahya ibn Adi of Tekrit, and of his pupil Abu Ali Isma ibn Ishaq, both in the 10th cent.; the Arab. works of Bar Hebraeus, better known for his numerous Syr compositions, but productive also of both historical and theological works in Arab. (13th cent.); in Egypt, but belonging to the same Jacobite or Monophysite communion as the above, the polemic and homiletic productions of Bishop Severus of Eshmunain (10th cent.), and a general work belonging to the opposing Mektite Egyptian church, the chronicle of Euthychius, patriarch of Alexandria, continued a cent. later by Yahya ibn Said of Antioch; large compilations of church history, church law and ecclesiastical legislation by the Copt. Patriarch Al-Makin, Abu Ishaq ibn Al-Assal, Abu'l-Barakat and others, the leaders in a general revival of Egyptian Christianity in the 18th cent.; on the soil of Nestorianism, finally, the ecclesiastical, dogmatic and exegetical writings of Abulfaraj Abdallah ibn At-Tayyib, (11 cent.), the apologetic compositions of his contemporary, Elias ben Shinaya, the historian, and the Nestorian church chronicle begun in the 12th cent. by Mari ibn Suleiman and continued two cents. later by Amr ibn Mattai and Saliba bar Johanan. After this date there is no original literature produced by Arab-speaking Christians until the modern intellectual revival brought about by contact with European Christianity.

That Aram, C and Lat. have been successively in the history of Christianity, all this, and more, Arab. has been in the history of Islam. The language of its founder and his "helpers," the language of the Koran, "the book" from God to Mohammed by the angel Gabriel, the language therefore in which it has always been preserved by the faithful, untranslated, whithersoever it has spread in the wide world of Islam, Arab. is identified with Islam in its origin, its history, its art and its propaganda. All the points of contact between the religion of the Bible and the religion of the Koran, literary, historical, apologetic and missionary, are alike in this, that they demand of the intelligent student of Christianity a symp- pathetic and earnest acquaintance with the genius and the masterpieces of the great Arab tongue.

ARABIC VERSIONS, ar-a-bik vîr‘u-shuns: Arab. tr. of the Bible must have been made at a very early date. For Christianity and Judaism had penetrated far into Arabia by the 6th cent. of our era, but the oldest of which a copy has come down to our time is that of Saadiah the Gaon (942–1007). This version was made directly from the MT, and is said to have covered the whole of the OT, but much of it is no longer extant. It is characterized by an avoidance of anthropomorphisms (e.g. Gen 6:2, "sons of nobles" and "daughters of common people") and by giving modern equivalents, e.g. Turic, Franks, Chinese, for the Heb. names. Saadiah's Pent was first printed at Constantinople in 1546 and was incorporated into the Paris (1629–45) and London (1657) Polyglots. When, after the rise of Islam, Arab. became the common language of Syria, Egypt and N Africa, trs. were made from the Greek LXX, from the Pesh and from Coptic. In the Polyglots the tr of Joshua is, like the Pent, made from the MT, as also portions of Kings and Nehemiah, with interpolations from the Pesh. Judges, Ruth, 1 and 2 Samuel, 1 and 2 Kings (in part) and 1 and 2 Chronicles (?), Nehemiah (in part) and Job have been trd into Arab. from Syr. The remaining books (Prophecets, Psalms, Proverbs, etc.) are from the LXX, and that according to Codex A. In the NT the Gospels have been trd from the Vulg. and the remaining books, although from the Gr, are late. A revised edition of the versions in Walton's Polyglot was published by J. D. Carlyle, professor of Arab. in Cambridge, and printed at Newcastle having the phrase, "translated into the Syrian and Arab. by the late James Van Dyck of the Syrian Protestant College and published by the American Press in Beirut." Dr. Van Dyck had the benefit of the help and advice of the Sheikh Nâṣîf al-Ýazîjî.

A large number of MSS of the Bible in Arab., in whole or in part, are to be found in the British Museum, the Bibliothèque Nationale and the great libraries of the Continent, but none of them are of sufficient age to make them of value for the criticism of the text.

10. Chief Differences in Litterature

The name is given to a form of Sem speech, most notably related to Heb and Phon, but exhibiting marked peculiarities, and subsisting in different dialects. Its original home may have been in Mesopotamia (Aram), but it spread N. and W., and, as below shown, became the principal tongue throughout Mesopotamia. After the return from the Captivity, it displaced Heb as the spoken language of the Jews in Pal. In its eastern form it is known as Syr. In its occurrence in the OT, it formerly, though incorrectly, generally bore the name Chaldee. The present article deals with it chiefly in its OT relations.

If we neglect two words which occur in Gen 31 47, the earliest notice of the use of this language in Scripture is in the request which the representatives of H Zachediah made to the servants of the Syr language:“Speak, I pray thee, to thy servants in the Syr language” (ʼāram̄, 2 K 18 26; Isa 36 11).

The narrative from which we have made this excerpt, even if it stood alone, would prove that Aram., “the Syr language,” was so different from Heb., “the Jews’ language,” that it was not understood by the inhabitants of Jerus. Further, it shows that Aram. was the ordinary language of Assyri diplomacy. We next meet with Aram. in a verse in Jer 10 11 which appears to be an answer put into the mouths of the Jews as a reply to any attempt to seduce them to the worship of idols. If we assume the traditional date of Daniel to be 106 B.C., the six chs. in that book (Dnl 2 4–7 28), forming the greater part of the whole, are the next and most important occurrence of Aram. in Scripture. There are, further, passages in Ezra 8 6–18; 17 12–26, amounting perhaps to three chs., in which Aram. is used. In the NT several Aram. words and phrases occur, modified by having passed through Gr.

Formerly our knowledge of Aram. earlier than the Tgs and the Pesh was restricted to the above-noticed passages of Scripture. Now, however, discoveries, still comparatively recent, have put us in a different position. In the closing decade of last cent. extensive inscriptions were discovered in Sinjîrî, in the neighborhood of Arsameia, dates of which synchronize with Ezra and Nehemiah. Earlier than these in discovery, but between them in date of origin, are weights of the reign of Sargon, with two inscriptions, one, official, in cuneiform, which not only gives the designation of the weight, but relates the name and titles of the king; the other, popular, in Aram., which only tells the weight. More striking is the fact that frequently, in regard to contracts and sales, while the text is in cuneiform character and the Assyrian language, the inscription on the clay envelope which served as a docquet is in Aram., language and letter. This affords proof that at all events before the reign of Tiglath-pileser III, Aram. was the general speech for commerce and diplomacy all over S.W. Asia.

When we come in contact with it, Aram. is a fully formed alphabetical language, and has attained a further stage of development than the Assyrian with its cumbersome cuneiform. The Script of Aramaic was largely ideogrammatic and hieroglyphic. The same Inscriptions group of symbols represented very different sounds according to circumstances, and widely differing meanings were connected with the same sound, with the consequent necessity for determinatives. The alphabet employed in Aram. is practically that found on the Moabite Stone. It evidently stands at the end of a long process of evolution. We have here the hieroglyphic standing behind it; whether it is derived from the Hiittite (Condr), or from Egypt (Roqé), or Assyri (Delitzsch), or is independent of origin (Gesenius), cannot be determined. Aram. is, like Heb and Assyr, of North Semitic origin, but there is a manner between them. It is more regular in its formation than either of the others, a character that may to some extent be due to its use as a lingua franca over so wide a territory. Aram. was the official language of the extensive Persian empire, as it had been to some extent that of its predecessor, the empire of Assyria. It may be regarded as having been generally understood from Asia Minor on the N., to the Cataracts of the Nile on the S., and from the mountains of Media on the E., to the Mediterranean on the W. Its history has been long; spoken, as we learn by inscriptions, from before the days of Tiglath-pileser, it is still spoken on the banks of the Tigris and the Euphrates.

These extensive limits, geographical and chronologically, imply dialectic differences. Means of communication were so ineffective that the distance between the eastern Dialects of Aramaic and western limits would require official to travel. The road which separates America from Europe, or New York from Brazil. The primary dialectic distinction was between eastern Aram. (Syri) and western (formerly called Chaldee). The peculiarity which most prominently distinguishes these is the preformative of the imperfect; in the western, as in Heb and Arab., it is yod, while in the eastern it is nun or lamedh. Each of these has sub-dialects. In Pal, besides the Chaldee of the Jewish Tgs, there was Sam; in it, besides many foreign elements in the vocabulary, the use of 'ayin instead of waw in the preterite of 'ayin-waw verbs is the most striking feature. The sub-dialect of eastern Aram. is Mandean; it is characterized by the use of the matres lectionis instead of vowel signs. From the inscriptions and the papyri it would seem to follow that the eastern peculiarities are the more recent—changes introduced through passage of time. In eastern Aram. the script became more cursive than in western, which retained the square or angular form; except the Sam, which used a still earlier script, less removed from the angular style of the inscriptions. The script of the Assuan papyri indicated a tendency toward the later square character.

Although an article like the present is not the place to give a full grammar of Aram., yet we may
advert to some of the more prominent peculiarities, common to all branches of the language, which distinguish it from Heb, the best-known Aramaic.

5. Grammatical Peculiarities of Aramaic are the want of the article, and the presence instead of the status emphaticus, which follows the syntactic rules of the Heb article. The next thing likely to attract attention is the use of the relative pronoun \( \pi \) or \( \delta \) as if it were a preposition meaning "of." While in Heb the passive voice is generally indicated in the derived conjunctions by internal voices, in the case of \( \pi \) in Aram. the syntactic \( \pi \) and \( \pi \) is prefixed (earlier \( \nu \)). Instead of the Aram. causative \( \pi \), there is the \( \pi \) (earlier \( \pi \) with its passive \( \pi \) or \( \pi \) (earlier \( \pi \))

6. Comparisons of the Aramaic of Sinjirli with That of the Bible. A challenge to the grammar of the Heb is the result of transcriptions extending over 1,500 or 1,200 years, according as we take the traditional or the critical dates for the books in question. This implies probably a score or more of transcriptions each with its quota of variations from the original. While the variations introduced by any one transcription might be few and unimportant, they would all be in the direction of looseness, and cumulative might easily become very great. The late Heb of Ecclesiastes, notwithstanding its ascription to Solomon, shows how little the idea of the chronology of style entered into the thoughts of the scribes who took this text out of modernization. It follows that while the presence of late peculiarities proves nothing but the inaccuracy of the copyist, early grammaticical forms and modes of spelling are nearly indisputable evidences of antiquity.

The Sinjirli inscriptions, if we neglect the less important, are three, the Panammu inscription, the Hadad inscription and the Barrehab inscription (Bauenschrift, Sachau). The first, the last, and the middle one are placed by Sachau in the preceding century. It ought to be noted that, when first discovered, it was a matter of doubt whether the inscriptions should not be reckoned as Heb, rather than Aram. The close affinity between them and Heb is shown in various ways. By a relation among the North Sem tongues similar to that among the Arayan languages expressed by Grimm's law, where letters with the sound appear in Heb, in later Aram. we find corresponding letters with the sounds. But the Sinjirli inscriptions we do not find this mark of the later language; thus we have \( \pi \), not \( \pi \), \( \pi \), \( \pi \) instead of \( \pi \), \( \pi \) for \( \pi \), etc. That this is not due to the proximity of Heb is proved by the fact that on the weights in Sargon's palace we find \( \pi \). Thus the Sinjirli inscriptions date from a period when Heb and Aram. had not been completely differentiated.

There are other points of likeness. Instead of the \( \pi \) and \( \pi \) of later Aramaic, there is the \( \pi \) and \( \pi \); besides, or \( \pi \) as the sign of the passive, there is \( \pi \). The vocabulary also are nearly identical. In both, the syllable \( \pi \) or \( \pi \), sign of the accusative, is present, as if a survival, only as the support of the oblique cases of a pronoun (Dnl 22: Sinjirli, Had 28). The pronouns exhibit a similar resemblance to Heb and also to Biblical Aramaic. The first person pronoun is \( \pi \) (once \( \pi \) in Pan. 1. 19), as in the Phoen. and Moabit. dialects of Heb; \( \pi \) occurs in the Heb of the poetical Aram. is \( \pi \) instead of \( \pi \) in the demonstrative pronoun; here there is relation to the Heb \( \pi \). Another case in frequent evidence is \( \pi \) instead of \( \pi \).

More nearly contemporary with the Aram. of Daniel and Ezra is that of the Assouan papyri. These are carefully dated, and extend from 471 BC to 411 BC; these two dates include the whole reign of Aram. The language of Nebhebes was, and who sent him as governor to Jerus. and a few years after his predecessor's and successor's reigns. These documents, as written with a reed or on papyrus, a chisel on stone, manifest a very different style of letter; as already said, there is some approximation to the later square character. The resemblance between the grammar and vocabulary of these papyri and the Biblical Aram. is closer than that of the latter to the Sinjirli grammar and diction. Where, in the more ancient Aram., we have \( \pi \), in these papyri we occasionally find the later \( \pi \). It is not improbable that, as in Spain, a slippage pronunciation became prevalent; the \( \pi \) pronounced as \( \pi \) in "then" would in that case represent more accurately the sound actually uttered than would \( \pi \). The word already noticed, \( \pi \), which generally appears in Biblical Aram. as \( \pi \), is a similar case. In northern Palestine the Arab. \( \pi \) is pronounced much as if it were \( \pi \), if not even the related sound \( \pi \); instances of this spelling also are found in the Assouan papyri. Both of these differences are due to frequent assimilation of the Biblical \( \pi \) to the \( \pi \) of the papyri.

Another peculiarity is probably due to a different cause. In Biblical Aram. the preformative of the 3rd per. sing. and plur. of the impf. of the substantive verb is \( \pi \). Of this peculiarity Dr. Bevan gives an ingenious explanation. If the \( \pi \) preformative were used, the resulting word would have a resemblance to the sacred name: to avoid this, he thinks, the \( \pi \) was changed into the \( \pi \). Unfortunately this explanation too much, therefore explains nothing. Had this been the explanation, the name "Jehu," which consonantly is nearly the same as the 3rd per. sing. and plur. of the substantive verb, would never have been written as it is. Further, if Jewish reverence for the Divine name expressed itself in this way, we should expect to find this preformative in the Tgs, which, however, we do not. Hundreds of cases in proof may be found in Onkelos alone. The truth is, it is a Mandaeen form, which proves that the Aram. of Daniel and Ezra is eastern. A further peculiarity is the \( \pi \) compensative; as \( \pi \) (Dnl 4. 23), which regularly would be \( \pi \).

This also is found in the Mandaeen; it is, however, also found in papyri of Assouan, an evidence that the Mandaeen characteristic was a survival from an earlier time.

Another interesting point of contact between the Aram. of this period and that of Daniel is exhibited...
in the Elephantine papyri published by Sachau. These papyri, discovered in the island of Elephantine (opposite Assouan) in 1897, are the most numerous of the 3,350 known papyri of the 14th year of Darius II (407 BC). In the first, II, 27, 28, the second, I, 26, and the third II, 3, 4, we have God called "the God of heaven," the title given to God throughout Dt 2. This is also the appellation used in the Aram. of Ezra (5 11.12; 6 9 etc.). From the passages where it occurs it would seem that during the Bab and Pers rule this was the recognized governmental title of the God of the Hebrews.

We cannot attempt to give an exhaustive summary of the differences between Biblical and Targumic Aram., but indicate only some of the more obvious. Account Differences need not be taken of yath, the sign of the accusative, as it appears only as representing the Heb 'eth. In verbs, reference has already been made to the l preformative in the substantive verb, a peculiarity which Biblical Aram. shares with Mandaean in distinction from other forms of the language: also to the fact that the hith of the earlier verbal forms is replaced by 'ith in the more recent 'ithp'al and 'ithpa'al. This also is the case with 'aphq'al (in earlier and Biblical Aram. haph'al), the passive of which is haph'al, not 'ithp'al. In Targumic Aram. the importance of verbal forms in determining age is readily recognized; thus in English, if the 3rd per. sing. of the verbs in an English writing is in 'eth we decide that writing to belong, in fact or feigning, to a period not later than the 17th cent. In regard to pronouns, while in Biblical Aram., as in Sinjiri and Assouan, the 1st per. sing. is 'an'ā, in Targumic it is 'anā: the plur. in Biblical Aram. is 'anānā and akin to Shnānā in Assouan, whereas in the Tgs it is usually 'anān, though sometimes the Biblical form appears. The 2nd per. sing. in Biblical Aram. is 'ant as in Assouan, with the plur. 'antām (As- souan, 'anem), in Targumic it is 'atī and 'atīn. To compare our own language, when we find "thou" and "ye" in a writing, we date it as not later than the 17th cent. The ordinary vocabulary, though not without value in this respect, is not very important chronologically. Connective particles, however, are. Everyone acquainted with Heb knows yəfēd, but 'āfēd is, however, rare; as frequent is 'ith in Targumic. In the Bible, as in the papyri, the form found is 'ithī. In the Tgs 'it stands for "it"; in the Bible and papyri it is hēn. Cognate with this, the Bible and the papyri have lāhēn, "therefore": this is not found in the Tgs, which have instead 'al-lāhēn. In our own language the use of "else" in serious prose or poetry as a conjunction would prove the antiquity of the composition. The fact that the distinction between כ and ו has disappeared in the Tgs, but is still preserved in the Bible, is a note of age that cannot be passed over. Other examples might be given, but these will suffice. Professor Bevan lightly dismisses many of these differences as mere matters of orthography; yet in French the presence of l for u or as strengthening the a in such words as elle, eux, etc. is regarded as a note of old as distinct from modern French; yet probably the pronunciation was not different.

In pursuing this part of the subject the latter portion of Pusey's first Lecture (Daniel the Prophet) is worthy of study. Pusey had not the advantage of contemporary documents with which to compare Biblical Aram.; he could only emphasize the nature and amount of the differences from which separated the language of Daniel from that of the Tgs. The argument can now be supplemented by a yet stronger argument from the resemblance between the former and the contemporary papyri of Assouan, and yet the earlier Sinjiri inscriptions. See further, SYRIAC; LANGUAGES OF THE OT; and tò art. "Aramaic" in ENCYCLOPAEDIA STANDARD BIBLE.

LITERATURE.—Numerous grammars and dictionaries of the two principal dialects of Aram., eastern (SYR) and western (Chaldees) may be seen in any catalogue. There is an excellent compendium of the grammar of Biblical Aram. in Delitzsch's intro to Haer's Text of Dn and Ezr. For Sam there is a small grammar by Nöldeke, published in the series "Porta Linguarum Orientalum." Nöldeke has published grammars for Mandaean and New Syr.

ARAM-REHOB, a-ram-ruh'-ob. See SYRIA.

ARAM-ZOBAH, a-ram-zû'-ba. See SYRIA.

ARAN (Ar-ram, 'drân, "wild goat"): A son of Dishan, the Horite (Gen 36 28; 1 Ch 1 42). It may possibly be connected with the Yerahmite Oren (Ar-ram 1 Ch 2 25; cf Curtis, Chron. ad loc.; Dillmann, Gen ad loc.; ZDMG, L, 168); Robertson Smith claims that this name is equivalent to the Sem נס, "wild goat" (Jour. Phil., IX, 90). J. Jacobs translates it by "asai" (Stud. Bib. Arch., 71). This is one of the many totem names in the Bible.

More than one-third of the Horites, the descendants of Seir, bear animal names, and those clans of the Edomites connected with the Horites also have animal names. The very name "Seir" means a "he-goat," and Dishan, a "a gazelle" (Stud. Bib. Arch., 70-72). Gray, however, remarks that "the instance [Aran] is most uncertain" (HPN, 106).

SAMUEL COHON

ARARAH. Same as ARARAH (Top 2 1).

ARARAT, ar-ar-awt (Ar-ram, 'drâyā): A mountainous plateau in western Asia from which flow in
different directions the Euphrates, the Tigris, the Araxes, and the Choruk rivers. Its general elevation is 6,000 feet above the sea. Lake Van, which like the Dead Sea has no outlet, is nearly in its center. The Bab name was Urartu, the consorts being the same in both words. In 2 K 19:30 the word is in AV Armenia, which correctly represents the region designated. It was to Armenia that the sons of Senacherib fled. In Jer 51:27 Ararat is associated with Minni and Ashkenaz, which according to the Assyr monuments may just to the east of Armenia. In Gen 8:4 the ark is said to have rested "upon the mountains of Ararat." i.e. in the mountainous region of Armenia, the plur. showing that the mountain peak known as Ararat was not referred to.

This peak is of volcanic origin and lies outside the general region, rising from the lowlands of the Araxes (Aras) River to a height of 17,000 feet, supported by another peak seven miles distant, 13,000 feet high. It is only in comparatively modern times that the present name has been given to it. The name was still "Mt. Marsiad," but believe, however, that Noah was buried at Nachitchevan near its base.

The original name of the kingdom occupying Armenia was Banias, which Ptolemy transplanted into E.Arabia. Later it was modified into V and we have the modern Van, the present capital of the province. The "mountains of Ararat" on which the ark rested were probably those of the Kurdish range which separates Armenia from Mesopotamia and Kurdistan. In the Bab records, in the place called "the mountain of Ninir" which is east of Assyria. Likewise Bereus locates the place "in the mountain of the Kordaysis" or "Kurds" (Ant, I, ii, 6), while the Syr version has Hardu in Gen 8:4 instead of Ararat. The Kurds, or the modern Kurds, are a mountain race. The country between Armenia and Kurdistan, as the place where the ark rested.

This elevated plateau of Armenia has still many attractions, and is eminently suited to have been the center from which the human race spread in all directions. Notwithstanding its high elevation the region is fertile, furnishing abundant pasture, and producing good crops of wheat and barley, while the vine is indigenous. Moreover there are unmistakable indications that in early historic times there was a much more abundant rainfall in all that region than there is now, so that the climate was then better adapted to the wants of primitive man. This is shown by the elevated beechen forests which have lasted, in certain regions, actually, all the lakes of central Asia. Great quantities of mammoth bones have been found in these bordering lacustrine deposits corresponding to those found in the glacial and postglacial deposits of Europe and America. It should, also, be remembered that the drying up of the waters of the flood is represented to have been very gradual—it being 170 days from the time the waters began to subside before Noah could disembark. It may have been many centuries before the present conditions were established, the climate, meanwhile, being modified to a corresponding degree by the proximity of vast surrounding bodies of water.

Armenia abounds in inscriptions carved on the rocks, altar stones and columns, but they have been only imperfectly translated. The script is cuneiform and each letter has only a single phonetic character attached to it. But there are introduced a good many borrowed ideographs which have assisted in the decipherment. According to Sayce and others, this alphabet is introduced from Assyria after the conquest of Shalmaneser II in the 9th cent. BC.

George Frederick Wright

ARARATH, ar'a-rath: Same as ARARAT (q.v.).

ARATHES, a-ra-théz (AV Ararithes; 'Aραρθής, Arathés; Αραρθῆς, Araritheos); King of Cappadocia, 163-130 BC. Educated in Rome, he imbibed Rom ideas and became a faithful ally of the Romans, in conformity with whose wishes he declined a proposal of marriage with the sister of Demetrius Soter. The latter declared war, drove Arathes from his kingdom and set up Holophernes in his stead. He fled to Rome about 158, and through the good offices of the Romans succeeded in obtaining for himself a participation in the government of Cappadocia. Later he again became sole king. In 139 BC, as a result of an embassy sent by Simon Maccabaeus, the Romans wrote letters to Arathes (1 Macc 15:22) and other eastern kings in behalf of the Jews. (See Diodor. XXXI, 19, 28; Justin, XXXI, 1; Polyb. III, 5; XXII, 20-30; XXXIII, 12).

J. E. Harry

ARANAH, a-ra'na (ἡ Ἀρανά, 'Arachán, 2 S 24:16.20 f.; Ἱορδανή, 'Iordan[ά]h, 1 S 18:13, 24; Ἰουράν, 'Ouran, 1 Ch 21:15 ff.; 2 Ch 21:15 ff.), all from a Heb root meaning "to be strong!": A Jebusite from whom David at the request of the prophet Gad bought a threshing-floor located upon Mt. Moriah, as a site for an altar of the Lord at the time of the great plague (2 S 24:15 ff.; 1 Ch 21:15 ff.), upon which Solomon later erected the temple (2 Ch 3:1).

ARBA, CITY OF. See KIRIATH-ARBA.

ARBA, ar'ba (אַרְבָּא, 'Arba), "four": Variously described as "the greatest man among the Anakim" (Josh 14:15), "the father of Anak" (15:13), "the father of Anok" (21:11m). Thus he seems to have been regarded as the ancestor of the Anakim, and as the most famous hero of that race. He was the reputed founder of the city called after him, on the site of which Hebron was built (21:11).

ARBATITE, är-bat-tit (אֲרָבָתִים, 'Arabāthîm, 2 S 4:4, 7), "Arabahites": Perhaps "a native of the Arabah." Klostermann suggests "a native of Beth-arabah." The Arbatite is Abi-albon (2 S 23:31), also named Abiel (1 Ch 11:32), one of David's heroes.

ARBATTA, är-bat'ta, AV Arbatiss, är-bat'ta (יוֹם 'ארבתא, 'Arbatṭōs [plur.], en Arbattois): Apparently a district in the neighborhood of Galilee, from which the Jews who were in danger of attack by the heathen were furnished lakes, rivers, and islands, and, indeed, all the lakes of central Asia. Great quantities of mammoth bones have been found in these bordering lacustrine deposits corresponding to those found in the glacial and postglacial deposits of Europe and America. It should, also, be remembered that the drying up of the waters of the flood is represented to have been very gradual—it being 170 days from the time the waters began to subside before Noah could disembark. It may have been many centuries before the present conditions were established, the climate, meanwhile, being modified to a corresponding degree by the proximity of vast surrounding bodies of water.

Armenia abounds in inscriptions carved on the rocks, altar stones and columns, but they have been only imperfectly translated. The script is cuneiform and each letter has only a single phonetic character attached to it. But there are introduced a good many borrowed ideographs which have assisted in the decipherment. According to Sayce and others, this alphabet is introduced from Assyria after the conquest of Shalmaneser II in the 9th cent. BC.

ARBELA, är-be'la (יוֹם 'ארבֵל, en Arboth): This place is mentioned in 1 Macc 9:1 ff., and in Ant., XLI, xi, 1, describing the march and encampment of Bacchides. The former says that "Demetrius sent Bacchides and Alcimus into the land of Judaea, who went forth by the way that leadeth to Galgala, and pitched their tents before Masaloth, which is in Arbel, and after that they had won it they slew many people." Jos says that Bacchides "marched out of Antioc and came into Judaea and pitched his camp at Arbel, a city of Galilee, and having besieged and taken those that were there in caves (for many people fled into such places) he removed, and made all the haste he could to Jerusalem." It was from the caves near
the village of Arbela in Galilee that Herod demolished the robber's dwellings (Ant., XIV, xv, 4; f; BJ, I, xvi, 226). Jos. foresaw the looting of Arbel or Albela (both forms are attested) by the robbers, and, before leaving the place, he predicted that the robbers would be discovered in the cisterns that he had seen beneath the ruins of the city (Cisternarius, west of the village, 59 in. above the road). A series of these caves, skillfully adapted to purposes of refuge and defence, is still known as Qal'at ibn Ma'ān, "fortress of the son of Ma'ān." On the height above stand the ruins of Irbid or Irbid (both names are attested today) which are really the remains of the representation of the Arbel of Jos. The army from Antioch may quite well have come this way. No name however in the least resembling Masaloth has been recovered in this district. We may mention Robinson's identification (BR, II, 398, n.) that it may stand for the Heb msylloth, "steps, stories, terraces," and may apply to the fortress in the rocks. On the other hand the writer of 1 Macc is an earlier authority than Jos. If we accept his guidance, Baassuotes must have creased the plain of Esdraelon and followed the main highway southward through Samaria. Galgala may then be identified with Jitjáka, about 8 miles N. of Bethel, and Masaloth with Meneth, about 9 miles S.E. of Dothan. Mention an Arab in the plain, 9 miles from Legio (Lejjun), but it is now unknown. The phrase en arbelois might mean that Masaloth was in the district of Arbela; but there is no trace of this name as attaching to any tract in the modern neighborhood.

One or other of these routes must have been taken. While no certain decision can be reached, special weight attaches to the statement of Jos, on account of his acquaintance with the localities in the region, and his unquestionable familiarity with the history. See also BETH-ARBEL. W. EWING

ARBITE, ār'bit (אַרִיבֵת, hā-ārbit): The Arbite or probably an inhabitant of Arabia in southern Judah (Josh 15:52). The epithet is used in connection with one of David's mighty men in 2 S 23:35; where Paarai the Arbite occurs. In the list (1 Ch 11:37) we have Paarai the son of Ezab.

ARBONAI, ār-bo'nah, ār-bo'n-ah (Απυνα, Ἀβρόνα): A torrent mentioned in Jth 2:24. Beyond what is indicated in this passage, it is not possible to determine the location; but from this it appears to be a very productive torrent, on the west side of the Ain, in the modern Nahar Ibrahim is rejected on the ground (1) that the ancient name of this river was Adonis, and (2) that this does not answer to the term "torrent" applied by Judith. A possible misreading of the high cities that were "Aššur, 'ār-būnā, n.," b'bēher ha-nāhār ("beyond the river") (EB, n.s.)

ARCH, arch (אֵרָךְ, 'ār; LXX τὰ αἰλίαν, τὰ αἰ-λίαν, in sense of "posts" or "colonade"): Referred to repeatedly in Ezek 40:16ff, but tr is an error for "porch" or "portico." RV gives no marg. "or, colonnade." The meaning of the Heb word is uncertain." The principle of arch construction was known to the Jews and examples of early Jewish rude arches have been found in Pal. An arched form need not necessarily be constructed with radiating joints; it can be corbeled as at Mycenae (Treasury of Atreus). This type of construction has been found also in Pal.

ARCHEOLOGY, ār-kē-ol'o-ji, and CRITI-
CISM, krit'i-sizm: Archaeology, the science of antiquities, is in this article limited to the Biblical field, a field which has been variously delimited

(De Wette, 1814, Gesenius), but which properly includes not only all ancient facts bearing upon the Bible which have been lost, but all literary remains of antiquity bearing upon the Bible and, also, of the first importance, the Bible itself (Hogarth, Authority and Archaeology, vi).

Criticism, the art of scrutiny, is here limited mainly, though not exclusively, to the literary criticism of the Bible, now, following Scope of Article Criticism. Thus "Archaeology and Criticism," the title of this art, is meant to designate the bearings of the archaeology of Bible lands upon the criticism, esp. the Higher Criticism, of the Bible. The subject as thus defined calls for the discussion of, I. What archaeology can do in the case— the powers, rights and authority, that is to say, the Function of archaeology in criticism; and II. What archaeology has done in the case, the resulting effects of such archaeological evidence, that is to say, the History of the bearing of archaeology upon the criticism of the Bible.

1. Ignored by Critics generally, until the most recent decade, there has been a general reluctance to accept a proper bearing of archaeology, of this kind, on the text of the Bible. This has been true, particularly, of the "higher critics," who, while allowing for the historical character of the Biblical narratives, have rejected them as "folk-tales," and have been content to identify the Biblical events with "legendary stories" or "fables.

2. Variously Estimated by Critics recently archaeology has not generally

Archeologists generally for a long time have been putting forward the superior claims of their science in the critical controversy (Brugsch, Egypt under the Pharaohs; Dümmler, Geschichte des N.S.; Petrie, Hyksos and Israelite Cities; chs i-v; Researches in Sinai, 188-223; Spiegelberg, Aufenthalt Israels in Aegypten; Stein-
dort, Explorations in Bible Lands [Hilprecht], 628–90; Sayce, Higher Criticism and the Monuments; Hommel, Ancient Heb Tradition, xi; Jeremias, Das alte Testament im Bilde der altesten Völker.

The function of archaeology in criticism, as fully brought to light by recent discussion, is as follows:

1. Historical setting.—Archaeology furnishes the true historical setting of Scripture. In the criticism of a painting, it is of the utmost importance to hang the picture aright before criticism begins. It is not greatly different in the criticism of lit., and esp. Bib. lit. The patriarchs and prophets and psalmists are the "old masters" of spirituality and of religious lit.; their productions were brought forth under certain social, political, moral and religious conditions, and within certain surroundings of influences, enemies, opportunities, temptations and spiritual privileges. It is only archaeology that can hang their pictures aright, and it is only when thus hung that true criticism is ready to begin. The critic is only then a critic when he has seen how archaeology has hung the picture (BST, 1903, 306).

2. Guidance to methods.—Archaeology gives guidance to the methods of criticism. This it does: (a) With regard to presuppositions. Pre-suppositions are inevitable from our mental constitutions, and necessary to the consideration of any subject, since all subjects cannot be considered at once. But our presuppositions are naturally, to a large extent, those induced by our own experience and environment, until we are otherwise instructed. As early as 1858, Robinson (BJ, January, 1901; January 29, 1901, 219–25, 317–18; Vincent, Canaan, 144)Archaeology must guide in the interpretation of ancient lit., whether that which has just been dug up, as the recent finds of MSS and monuments, or that which has never been dug in the literature of ancient nations.

3. Facts to test theories.—Archaeology supplies facts wherewith to test theories. There can be no real antagonism between the facts of archaeological and correct criticism of trustworthy documents.

4. Presuppositions.—Archaeology gives guidance concerning the canons of criticism. It is of the utmost importance that a literature should be judged only by the canons followed by that literature. The innumerable literary remains of Egypt and Babylonia reveal methods and standards very different from each other, and still more different from those of modern western lit., but exhibiting to a marked degree the literary peculiarities of that Bab lit. is said to exhibit chronology. In Egypt lit., comparatively little attention is given to chronology, and what chronology there is, is seldom epochal, but either synchronous or merely annalistic. In the OT there is a mixture of all these kinds of chronology. Again, in Bab lit., there is carefulness and some degree of accuracy; in Egypt lit., carelessness, slovenliness and inaccuracy are provokingly frequent. The Scriptures of the OT are, in this respect, in striking contrast to those of modern Bab lit. yet nowhere in ancient oriental lit. is there the mathematical rigidity of statement demanded in occidental lit. today; on the other hand there is frequently a brevity and abruptness of literary method which, to western minds, appears to be fragmentaries of documents. The attempt to elucidate oriental lit. in the Bible and out of it by applying thereto the tests and standards of western lit. is not less disastrous than would be the attempt to judge western lit. by these oriental peculiarities.

5. Canons.—Archaeology gives guidance concerning literary form. Much of the definiteness and unity of modern lit. is due to the arts of print ing and book-binding. All archaeological lit. of Bible lands, lacking, as it does, the influence of these arts, is, in form, indefinite, or fragmentary, or both. These peculiarities in form and the causes of the same, archaeology makes very plain by abundant illustration. It makes clear, also, that fragmentariness and indefiniteness in oriental lit., in so far as it arises from the lack of method of construction of documents, in no wise militates against integrity.

(d) Archaeology gives guidance concerning interpretation. Archaeology admonishes us of the frequent uncertainty, we often overlooked, that the most perfect and trustworthy language of ancient lit., in so far as it is not translated, must have the support of the historical method. In the absence of this support, more especially if contemporary history as revealed by archaeology be antagonistic, interpretation, though supported by all the other methods of criticism, is very precarious. The interpretation of a rubric by the etymological and analytical methods may be partly or completely overthrown by a single picture or a brief description of the priest at the altar. For instance, is very distinctly brought out by the remarks of commentators on Bible references to the worship at high places with the facts revealed by the recent discovery of high places and the worship there conducted (Macalister, PEFS, 1903, 23–31; Driver, Authority and Archaeology, 143).

3. Facts to test theories.—Archaeology supplies facts wherewith to test theories. There can be no real antagonism between the facts of archaeological and correct criticism of trustworthy documents.

5. Canons.—Archaeology gives guidance concerning the canons of criticism. It is of the utmost importance that a literature should be judged only by the canons followed by that literature. The innumerable literary remains of Egypt and Babylonia reveal methods and standards very different from each other, and still more different from those of modern western lit., but exhibiting to a marked degree the literary peculiarities of that Bab lit. is said to exhibit chronology. In Egypt lit., comparatively little attention is given to chronology, and what chronology there is, is seldom epochal, but either synchronous or merely annalistic. In the OT there is a mixture of all these kinds of chronology. Again, in Bab lit., there is carefulness and some degree of accuracy; in Egypt lit., carelessness, slovenliness and inaccuracy are provokingly frequent. The Scriptures of the OT are, in this respect, in striking contrast to those of modern Bab lit. yet nowhere in ancient oriental lit. is there the mathematical rigidity of statement demanded in occidental lit. today; on the other hand there is frequently a brevity and abruptness of literary method which, to western minds, appears to be fragmentaries of documents. The attempt to elucidate oriental lit. in the Bible and out of it by applying thereto the tests and standards of western lit. is not less disastrous than would be the attempt to judge western lit. by these oriental peculiarities.

6. Literary Form.—Archaeology gives guidance concerning literary form. Much of the definiteness and unity of modern lit. is due to the arts of printing and book-binding. All archaeological lit. of Bible lands, lacking, as it does, the influence of these arts, is, in form, indefinite, or fragmentary, or both. These peculiarities in form and the causes of the same, archaeology makes very plain by abundant illustration. It makes clear, also, that fragmentariness and indefiniteness in oriental lit., in so far as it arises from the lack of method of construction of documents, in no wise militates against integrity.

(d) Archaeology gives guidance concerning interpretation. Archaeology admonishes us of the frequent uncertainty, we often overlooked, that the most perfect and trustworthy language of ancient lit., in so far as it is not translated, must have the support of the historical method. In the absence of this support, more especially if contemporary history as revealed by archaeology be antagonistic, interpretation, though supported by all the other methods of criticism, is very precarious. The interpretation of a rubric by the etymological and analytical methods may be partly or completely overthrown by a single picture or a brief description of the priest at the altar. For instance, is very distinctly brought out by the remarks of commentators on Bible references to the worship at high places with the facts revealed by the recent discovery of high places and the worship there conducted (Macalister, PEFS, 1903, 23–31; Driver, Authority and Archaeology, 143).
(b) Even a theory which meets all the known conditions of the case in hand is not by that fact proved to be true, and therefore to be received into the life. The most alluring fiction is the contrary assumption that a theory which meets all the known conditions of the case in hand is thereby proved to be true. This is not the case. Such a theory must, in addition, be corroborated by facts independently brought to light, or by mysteries unlocked; and even if mysteries be unlocked, the theory is not necessarily an entirely correct theory—the key that turns the lock must be something like the key that belongs to it, but may after all, be a false key. There must, in any case, whether of mysteries unlocked or of facts otherwise brought to light, be independent, genuine evidence in addition to the adaptability of the theory to all the known conditions of the case in hand. And furthermore, a theory must not only be able to meet the test of some additional facts, but the test of all the conditions imposed by any additional facts brought to light, and be able, also, to incorporate these new facts as naturally as those upon which the theory was constructed.

The problem is not to determine one or several of the ways in which an event might have taken place, but the one way in which it did take place. A theory which meets all the conditions of the case as made out by the evidence, convinces twelve jurymen, and secures a conviction. Yet sometimes afterward it is found out that another person committed the crime in an entirely different way. That the dictum under discussion is inapplicable to literature is equally well established.

Sir Peter LePage Renouf argued with great acuteness and force that it is possible to assign significations to words to make them, when thus treated, make a grammar and translate inscriptions as historical statements and make good sense, though not a single sign, or word, or construction, or thought be correct (Life-work, 1, 6, 7). He says of such a method: "It is not difficult to make out the Ten Commandments, the Psalms of David, the Homeric Poems, or the Irish Melodies, on any ancient or modern monument whatever, and in any language you please.

But until an examination of the Mummy's warning thesis are not wanting. The grotesque, yet confident, efforts at the decipherment of hieroglyphics before the discovery of the Rosetta Stone are not forgotten. Dr. Budge says (The Mummy, 124): "In more modern times the first writer at any length on hieroglyphics was Athanasius Kircher, the author of some ponderous works in which he pretended to have found the key to the hieroglyphic inscriptions, and to translate them. Though a man of great learning, it must be plainly said that, judged by scholars of today, he would be considered an impostor." Joseph de Guignes (1770) maintained that China was settled by Egyptians and that the Chinese characters only degenerate Egypt hieroglyphics. These attempts to decipher the Hittite hieroglyphs and translate the Hittite inscriptions must form painful recollections to distinguished scholars yet living, whose efforts, extending in some cases not only to lists of signs but to syllabaries, vocabularies, grammars and translations, are subject, in toto, rejected by the whole learned world. However successful present or future efforts of these scholars may prove to be, they have, in part at least, themselves repudiated their former work. The most plausible theory of a lit., though it seems to embrace every detail, may, after all, be found to be, as in one or two of the instances referred to above, wholly false when tested by the principles of philology and the facts of contemporary history.

The dangers of unconfirmed theory in life and literature are even greater in history, which, in its present-day form, is but life written down, human experiences given over to "cloudland." But the spades of Petrie at Abydos (Royal Tombs), of Evans at Knossos (Quarterly Review, October, 1904, 374-95), and of Schliemann at Troy (Ilios: City and Country of the Trojans), have shown that the ghostly heroes were substantial men of flesh and blood. If we are to learn anything from experience, certainly no theory of either sacred or profane history is to be accepted as final until tested and attested by factual evidence.

(c) Only archaeology is bringing forth any new facts on the questions raised by criticism. Criticism produces only theories; it combines facts, but produces none. Exegesis and commentators rarely, if ever, now bring to light new facts any more than present-day philosophers give the world new thoughts. A flood of light is, indeed, pouring across the page of the exegete and the commentator in these latter days which makes their work inestimably more helpful for interpretation, but the source of that light is neither criticism nor exegesis, but archaeology. Archaeology it is which sets alongside the Bible history things from the past and brings the words thus formed, construct a grammar and translate inscriptions as historical statements and make good sense, though not a single sign, or word, or construction, or thought be correct (Quarterly Review, 1, 6, 7). He says of such a method: "It is not difficult to make out the Ten Commandments, the Psalms of David, the Homeric Poems, or the Irish Melodies, on any ancient or modern monument whatever, and in any language you please.

Hence no critical theory of the Bible is to be finally accepted and made a part of our faith until it is ratified and attested by archaeological facts. Even Wellhausen, however far of Function he departs from this principle in the course of his criticism, seems to lay it down as fundamental in the beginning of his History of Israel, when he says: 'From the place where the conflagration was first kindled the firemen keep away; I mean the domain of religious antiquities and dominant religious ideas—that whole region as Vatke in his Biblical Theology has marked it out. But only here, where the conflict was kindled, can it be brought to a definite conclusion' (Hist of Israel, 12). G. A. Smith quotes also with approval these words from Napoleon (Campagnes d'Egypte et de Syrie dictées par Napoléon lui-même, II): 'When camping upon the ruins of the ancient citadel, the attempt every evening in the tent of the General-in-Chief.
The verisimilitude and the truthfulness of the descriptions were striking. They are still suited to the land after all the ages and the vicissitudes." But Dr. Smith adds, "This is not more true, yet, than the fact that geography can do is to show whether or not the situations are possible at the time to which they are assigned; even this is a task often beyond our resources." (HGHL, 108). Thus critics, while here and there acknowledging the proper function of criticism in archaeology, have not hitherto allowed it much scope in the exercise of that function.

II. History.—The history of archaeology in criticism to be set forth here has mainly to do with the testing of critical theories by archaeological facts. The contributions of archaeology to the furnishing of the historical setting of the Biblical narratives make up a large part of this and every dictionary of the Bible. The history of the guidance of critical methods by archaeological information is in the making. There can hardly as yet be said to be any record.

The field opened up for the testing of critical theories by the results of archaeological research is so wide that an outline can be given here. Extraordinary claims concerning the outcome of this testing have been made both by some critics and by some of their opponents; as when Dr. Driver says, after excepting the points upon which the evidence of archaeology is neutral, "On all other points the facts of archaeology, so far as they are at present known, harmonize entirely with the position generally adopted by the critics" (Authority and Archaeology, 145); or as when the astronomer, C. Piazzi Smyth, thought that the great pyramid proved the "wisdom of the Egyptians" to have included some of the abstruse problems of higher mathematics; and Dr. Sciss, in his *Miracle in Stone*, was confident that the same colossal monument of Egypt definitely portrayed some of the extreme positions of the premillennial theology.

Some of the instances of the testing of critical theories concerning the Scriptures by the facts of archaeology for which unquestionable historical proofs can be offered, are here presented.

1. Theories not affecting historicity or integrity.—Many critical theories, notably those not affecting the historicity or the integrity of the Scriptures, i.e. according to which no valuable facts of Scripture, have been corroborated and others discredited.

(a) Theories corroborated: (1) The theory of the geographical and topographical trustworthiness of Scripture, i.e. that the peoples, places and events of Scripture are to be found just where the Bible places them. Attempts to belittle the importance of this geographical and topographical corroboration of the trustworthiness of the Scriptures have been made (Driver, *Authority and Archaeology*, 145; also *LOT*, xi; Smith, HGHL, 108), but such attempts are not satisfying. The theory of the correctness of the Biblical statements has been of well-nigh universal acceptance; archaeologists have fitted out expensive expeditions in accordance with it. Excess has allowed it to enter into its conclusions, discussion has proceeded upon the assumption of its correctness, the whole body of identifications which make up Biblical geography and topography attest it, and the whole list of such identifications, uniform in every essential particular, are in evidence in support of this theory, even the works of those writers who have spoken disparagingly of it.

(b) The theory of the ethnographical correctness of Scripture. That the relation between peoples as indicated in Scripture is correct, has been a working theory for all general purposes and only departed from for special ends. Kautzsch says (Die bleibende Bedeutung des Alten Testaments, 47) "The theory of the nations remains, according to all results of monumental exploration, an ethnographic original document of the first rank, which nothing can replace." The progress of archaeological research has confirmed this general working theory and every year adds new confirmation with regard to particular items which, for some special end, have been represented as against the theory. That the general theory of the correctness of the tribal relationships in Scripture has been, and is being sustained, is indisputable. (Hommel, Ancient Hebrew Tradition; Gunkel, Israel und Babylonien, ch vi; Sayce, Patriarchal Palestine, ch ii; Winckler, OLZ, December 15, 1906; Budge, *Hist of Egypt*, I; Orr, *POT*, 404–405, 529–30). See Table of Nations.

2. A Wide Field

(c) The theory of the discovery of the graphic imagery in both the originals and the copies. Every theory of inspiration postulates this in greater or less degree, and the most prevalent of these is the analytical theory put forth by critics. It rests on the assumption that the whole of Scripture, as it is asserted, authorship, demands, for its very life, a degree of accuracy and invariance in the use of words in both the writing of originals and the transmission of them by copyists greater than that demanded by any merely exacting theory of inspiration. Wherever it has been possible to test the statements of Scripture in its multitudinous historical notices and references, archaeology has found it correct to its remarkable degree in its form and even in minute peculiarities of statement (Brugsch, *Babil und Persien*, 8; *Die altorientalischen Texte*, 308; Sayce, *Israel*, 338; Van de Mieroop, *The Age of Abraham*, 120; *Clay, Light on the OT from the Bible*, 338).

(d) The theory of the correctness of the imagery of the Bible. This is another of the fundamental and universal working hypotheses of criticism which is, however, sometimes forgotten. Whatever the theory of the authorship and the origin of the various books of the Bible, there is, with the exception of the special assumption on the part of the critics of the correctness of the imagery reflecting the topography, the flora and the fauna, the seasons and the customs. Indeed, upon the trustworthiness of the imagery, upon the exactness in the use of words, criticism depends. And this underlying assumption of criticism of every hue has been confirmed indisputably in its general features, and is being corroborated year by year in its minutest details, and even in those very special instances where it has been disputed. To this end testify the whole company of oriental residents, intelligent travelers and scientific investigators (Thompson; Van Lennap; Robinson; Stanley; Palmer, Desert of the Exodists; Trumpoli, *Cradle of the Nations*; Driver, *Archaeological Researches*; Van Dyke, *Out of Doors in the Holy Land*).

Besides these theories of a general character, some concerning particulars may be noticed:

(e) The theory of the location of the Garden of Eden somewhere in the Euphrates Valley. This theory has been all but universally held and, while it is not yet definitely substantiated, is receiving cumulative corroboration along ethnographic lines. Wherever it is possible to trace back the lines of emigration of the early nations mentioned in the
Bible, it is always found that the ultimate direction is toward a certain comparatively small area in western Asia.

(6) The geological theory concerning the flood of Noah as the greatest change in earth's surface is being most exactly confirmed, not only by investigations into glacial history, but by examination of the records of the cataclysm left upon the mountains and valleys of central and western Asia (Wright, The Ice Age in North America; and Scientific Confirmations of OT History, chs vii–xi). See DELUGE.

(7) The geological theory of the destruction of the Cities of the Plain has been exactly confirmed by the examination of the strata;

9. Sodom a bitumen production area, and Gomorrah a bit of rock-salt-capped by sulphur-bearing marls and conglomerates cemented by bitumen, an explosion of pent-up gases, which collect in such geological formations, blowing the burning brimstone to heaven, the rock falling back from the blowing-off crater, the catching of Lot's wife in the edge of the cataclysm and her incrustation with salt (Wright, Scientific Confirmations of OT History, 144; Blanckenorn, ZDPV, XIX, 1).

(8) It has long been thought that there might be some relationship between the mysterious Hyksos kings of Egypt and the Patriarchs to account for the deplorable reception, even royal distinction, given the latter. This theory of relationship has been very fully established by the discoveries of Petrie at Tell el-Yehudiyeh (Petrie, Hyksos and Israelite Cities, ch. iii), a great mass has been shown to what race the Hyksos belonged, but he has shown their tribal character, that they were, as their name indicates, "Bedouin princes," leaders of the nomadic or semi-nomadic tribes of Upper and Lower Ruthen, i.e. Syria and Pal, and northern and western Arabia, as were the Patriarchs, so that the latter were shown by the former the consideration of one "Bedouin prince" for another.

(b) Theories discredited: (1) The interesting picture which is put forward, that of Abraham leaving all his friends and civilization, behind him to become a pioneer in a barbarous land has been dim and dimmer and at last faded out completely in the ever-increasing light of contemporary history revealed by Bab and Palestinian discoveries (Vincent, Canaan, chs i–ii)

12. Concerning Melchizedek, "without father and mother" (He 7:3), Am Tab, while not without affording the needed information, have put to flight a host of aginings of old commentators, and pointed toward Melchizedek's place in a line of kings at Jerus of unique title disclaiming any hereditary rights in the crown. "It was not my father and it was not my mother who established me in this position, but it was the mighty arm of the king himself" (Ch 7, 3), has been the correct translation of which there has been much controversy, but nothing more required to the present form of the sovereignty of the king (Budge, History of Egypt, IV, 231–35).

The theory of the chronology of the early portions of OT, which made it to be so exactly on the principle of the system of chronology in vogue in our western world today, which, indeed, assumed that there could be no other system of chronology, and which was universally

13. Oriental held as a working hypothesis by all Chronology classifies critics and theories until very recently, has been greatly modified, if not utterly discredited, by both archaeological and ethnological research. Whatever may have been the system and method of chronology in use in early Biblical history, it certainly was not the same as our epochal chronology based upon exact astronomical time. The early chronologies of the Orient were usually annalistic, oftentimes synchronistic, but very seldom epochal. The first, and usually the only, intent of present-day chronologists of the Orient was to chronicle a flight of time; the ancient systems of the East often introduced a moral element; events, rather than time, were chronicled, and the time in which nothing took place and the man who accomplished nothing were not to be passed over in silence. Some chronicles were arranged symmetrically, and again the visional conception of time found in all prophecy seems sometimes to have prevailed in the writing of history. Certain it is that ancient oriental thought regarded it as a religious duty to know the relation of the time to the time—a more deeply moral conception of chronology than our own (Green, BS, April, 1890, 285–303).

2. Theories affecting the integrity or historicity of Scripture—Many critical theories of the integrity or historicity of Scripture, i.e. reconstructive theories, have been utterly discredited by archaeological evidence, and, in some cases, abandoned by those who held them (cf Driver, Genesis, addenda, 7th ed. xx).

(a) The ignorance of the patriarchal age was once a frontier fortress which threatened away all literary pretensions beyond that limit. This ignorance, though never held by all, was one of the most effective of the reconstructive critics, who held that the patriarchal Age was held by some. Von Bohlen scoffed at the idea of the "undisciplined horde" possessing knowledge of laws (Gen, 29–41; cf Reuss, Gesch der AT, 96; Dillmann, 2. S. and Jud, 594). Dr. Driver says, indeed, "It is not denied that the patriarchs possessed the art of writing," but thinks the possession of a law, by them a mere hypothesis, for the truth of which no positive ground can be alleged (Gen, xili–xiv). For Driver, the whole theory of patriarchal corruptions is absolutely abandoned by everyone hardly needs to be stated. The discovery of evidence of a postal system in Canaan in the days of Naram Sin (Sayce, Archaeology of the Canaanites, 1897, 1–12: the strict conformity of many of the patriarchal customs and events to written law, as revealed by DeMorgan's discovery of the C.H. Dr. Murch's discovery of the Am Tab, revealing as they do the wide diffusion of the art of writing about one hundred and thirty years before the Exodus, together with the gradual pushing back by epigraphic evidence of the date of the origin of the Hebrew script (Clay, Amuru, 30–32), and the overwhelming evidence, from recent excavations, of the general culture and refinement of patriarchal Pal, while not yet making known fully the exact state of the patriarchal civilization, has made any theory of the ignorance of that age impossible.

(b) The theory of the nomadic, semi-barbarous condition of the latter part of the patriarchs' relation to religious ideas among the patriarchs before the Exodus (Kuenen, Rel of Religious Ideas in Canaan, 1; 105–9), though closely connected with the preceding, demands the terms of the present generation's or the present generation's influence on the current version of the Israel's
history and has been definitely espoused by nearly all holding that view (G. A. Smith, *Estoi*, 1908, 254-72; cf *POT*, 60). This theory, though less important to other schools of critics, has in fact been held by critics and all commentators. But the discovery of the earliest wall- and cistern-work at Taanach (Sellin), and the engineering feats on the defences and the water-works at Gezer (Macalister and Vincent, *PEFS*), and the 40-ft. city wall published in Egypt illustration of Can war (Poite, *Deshasha*, pl IV), as well as the list of richest booty taken by Thothmes III (Sayce, *Archaeology of the Cuneiform Inscriptions*, 155-57; Birch, *RP*, 1st ser, II, 35-32; Lepsius, *Denkmaler*, Abth. III, bl 32, 32A, 30A, 30B; *Aegypt*, I, L 42-46), which could scarcely be duplicated by all the museums of the world today, testify equally to the luxurious culture and refinement of the times. All this, in addition to the mass of evidence against the ignorance of the patriarchal age (see [a] above), overwhelmingly sustains the opinion of W. Max Müller that "the civilization of Pal in the patriarchal age was fully equal to that of Egypt."

(c) The theory of the evolution of Israel's history chiefly from a Palestinian origin and environment (Friedmann, *Hist. of the Tel*, esp 77; Kuenen, *Hist of Israel*, 225; 16. Evolu- tionary Wellhausen, *Hist of Israel*, 462). Pal- estinian discoveries show a contrast between the unique religion of the He- brews and the religion of all surrounding peoples of Canaan as marked as it may well be. The evidence is not at all of a purer religion growing up out of the vile culture of Pal, but of a purer religion coming down and overwhelming it (*PEFS*, 1902-9; G. A. Smith, *Mod. Mythology of the OT*, ch IV, esp 142; *PEFS*, 1905, 287-88).

Descending now to a few of the great mass of particulars, we may mention:

(d) The theory of the legendary character of the four kings of Gen 14, and of the Hittites; and the theory of the generally mythological character of the early portions of the Bible. The four kings have been called "petty sheikhs of the desert," and their legendary character was not a matter of doubt. But as time went on, scholars and critics have been more and more inclined to regard the four kings of Gen 14 as legendary. The traditional story of these kings has been utterly discredited by many. Noldke in his Untersuchungen arrives at the result that the history (Gen 14) is throughout a "free composition," and regards it as a "particular figure." And Wellhausen thinks Noldke gave the "death-blow" to the historicity of the story (Wellhausen, *Comp. of the Hex*, 311-12). Ed. Meyer is of the same opinion as Noldke, but expresses himself in a still more unfavorable manner (Gesch, 186). Hitzig, however, goes to the extreme of depreciation when he sees in the expedition of Chedorlaomer only an adumbration of the invasion by Sennacherib (2 K 19 13). Delitzsch gives a very comprehensive review of theories which have regarded the narrative of the kings as legend of small or no historical basis (Gen, I, 396-99; cf Dillmann, *Gen*, II, 32-33). In addition, the mythological character of the early portions of the Bible generally has had earnest advocates (Stade, *Gesch, 129-30; Schulz, *OT Theodoret*, I, 31; Well-hausen, *Gesch Israels*, 317-20).

But the four kings have appeared in archaeological discoveries. While there is still some dispute about the identity of the invaders, the confederacy has appeared in Babylonia and also the Bab suze- raincy over Pal in the age called for by the narrative, and, indeed, the whole historical setting into which the narrative fits with perfect naturalness (Jeremias, *Das alte Testament im Lichte des alten Orients; Hommel, Hebrew Tradition, ch v; Clay, Light on the OT from Babel, ch vi*). But myths do not receive archaeological confirmation such as has not only been given to the narrative of the confederacy of the four kings, but which is rapidly bringing out the features of the whole early OT history (Gunkel, *Gen*, 263; Ladd, *Doct of Sac Scrip*, I, 737).

Then grave doubts in the past have been raised concerning the Hittites. Occasionally it has been boldy said that "no such people ever existed" (cf Newman, *Heb Monarchy, Hittites* 184-85; Budge, *Hist of Egypt*, IV, 196). But in addition to the treaty of Rameses II with the "Kheta," long generally believed to have been the Hittite (*RP*, 2d ser, IV, 25-32), and the references to the "Hatti" in the Am Tab, also thought to be the same people, we now have Winckler's great discovery of the Hittite capital at Boghaz-Koi, and the Hittite copy of the treaty with Rameses II in the cunei- form script. The Hittites are seen to be a great nation, a third with Egypt and Babylonia (OLZ, December 15, 1906). See HITTITES.

(e) The theory of onearchroic. Aside from the general theory of the Babel, this theory has been criticized by many critics to the traditional view of Scripture and the assertion of the systematic representation of earlier events in the light of much later times (Robertson, *Early Religion*, 30; Frit, *Comp. of Gen*, many special instances of anachronism are not been alleged. Edom has been said to be mentioned too early in the narrative (De Wette, *Int*, II, 71, Parker's note; also Gunkel, *Gen*, 61). But an officer of Seti Morepattah II, about the time of the Exodus, in an official record, mentions the Edomites as desiring to pasture their flocks in Goen and they had thus early found their way clear across the Sinai peninsula (Muller, *Asien und Europa*, 135; of Papyrus Anastasia). "The Moab, long unidentified, has had doubt cast on its existence at so early a time as its first mention; but it also occurs in an inscription of Rameses II near the time of the Exodus, and the land of Moab is placed in "Ruthe", the Egypt and Moab and the "Egypt and Moab and western Arabia (Kyle, *Geographical and Ethnic Lists of Rameses II*, *Recueil de Travaux*, XXX).

3. Theories now challenged.—Several critical theories are just now the main object of discovery; whether or not the challenges will ultimately be sustained remains to be determined. A few only are mentioned here, but they are of such a character as, if ultimately sustained, will have a far-reaching effect upon criticism.

(a) The theory, long established and almost universally held, of the Bab origin and westward course of early Sem culture, esp. of religious traditions, has been called into question by several archaeological discoveries. Whether or not the challenges will ultimately be sustained remains to be determined. Few only are mentioned here, but they are of such a character as, if ultimately sustained, will have a far-reaching effect upon criticism.

(b) The theory of the gradual invasion of Palesti- time instead of the conquest is now for the first time.
challenged by evidence other than the record in Joshua. Such Palestinian researches and the collection of such evidence have but begun within a few years, and from the very breadth of the question the process is bound to be a long one. As the excavations have gone, the evidence is of a decided change in the culture even at such towns as Gezer, without, however, the Canaan culture coming fully under Israelite influence and succumbing to it; exactly, in fact, as is represented in the Biblical narrative (PEFS, 1903, 49, Macalister; ib, 1908, Macalister, 17; Vincent, 228).

(e) The post-Christian View of the Hermetic Writings. These Egypt documents in the Gr tongue have been thought to reflect early Christian thought in Egypt, chiefly because of a certain "unholy resemblance" to gospel language found in them. A recent critical examination of these writings has established, it is claimed, by archaeological evidence gathered from the writings themselves, that the "unholy resemblance" to gospel expressions arose not from the Hermits teaching, but from an appropriation by the evangelists of current expressions of Alex Gr in use in pre-Christian theological language. This view of the Hermetic Writings, if finally established, cannot but have a far-reaching effect upon NT study (Pietri, Personal Religion in Egypt before Christianity).

4. Reconstructive criticism not confirmed.—Not a single critical theory still maintained, either generally or by prominent individual critics, which proposes to take Scripture at other than its face value, has been sustained by archaeology. The assertion that it is otherwise, that "on all other (controverted) points, the facts of archaeology, so far as they are at present known, harmonize entirely with the positions generally advanced by the critics" (Driver, Authority and Archaeology, 145; LOT (1897), Pref, xvii; Gen, addenda to 7th ed, XXXIV—XXXVI), means either that such unsustained theories are not advocated by the person making the assertion and not by him regarded as generally advocated by critics, or, more commonly, that the theories in question have not been positively and definitely contradicted by archaeological evidence. The assertion that theories are not definitely contradicted by archaeological evidence; we have seen (cf above) that they must be definitely corroborated before being accepted and allowed to affect one's faith. An instance of the claims of criticism concerning the harmony between its theories and the facts of archaeology, a claim whose importance merits presentation at length, is found in the Addenda to the 7th ed of Driver's Introduction to Gen, the latest and most positive utterance of criticism on this subject. Driver says (XXXV):

It is stated by Professor Sayce expressly, and by Dr. Orr and Professor A. T. Clay, by implication, that Noldeke's arguments against the accuracy of the narrative of Gen 14 have been refuted by archaeology. The statement supplies such an object-lesson of the methods on which the opponents of criticism not unfrequently rely, that it may be worth while to explain here the grounds on which it rests. It is the case that the learned editor of the Monumental Texts, Professor Sayce's words (Monumental Texts, 1904, 64; cf, though without Noldeke's name, in, Monumental Texts, 161 f): "It is evident that for the sake of the narrative of Gen 14 we have to assume that the latter is a later composition than the former." From this passage it will be seen that the editor of the Monumental Texts, Noldeke, while the one about the names is attributed to him with partial correctness (though in so far as it is attributed, Sayce has it not been by him, but by the other arguments were never used by him at all) he has in the use of the Chaldean names (Sayce's long indictment is that of the names of the five Can kings, which are given, Bera and Birsha (suggesting the idea of "weather") and "windless" rage; perhaps are typical of ancient kingship, and that the whole names are artificial; but this (NB) is not asserted of the name of any of the four kings from the East.) The fact is, Noldeke's arguments on Gen 14 have not been refuted, or even touched, by archaeology. Professor Sayce has simply not mentioned Noldeke's real arguments at all. Nor are they mentioned by Dr. Orr or Professor Clay.

Archaeology has met the arguments which Noldeke did not use; it has not met the arguments which he did use. Noldeke never questioned, as Professor Sayce declares that he did, the general possibility at this time of an expedition being sent from the far East into Palestine. But argument connected in point of time with various historical impossibilities attaching to the details of a particular tradition: and Professor Sayce has thrown this argument only by producing evidence that this expedition, with the details as stated in Gen 14, actually took place and is up to the present time (June, 1900) archaeology has not done.

Compare with these declarations of Driver, one by one, though in somewhat different order, Noldeke's account. He says (Under-suchungen, 157—60):

24. Noldeke's "The chapter begins with an imposing Assertions enumeration of kings, in whose time the event the subject is alleged to have taken place. Of what use is the dating according to kings, the time of the events is already fixed by the narrative? Of what use is the dating according to kings, the time of the events is already fixed by the narrative? Of what use is the dating according to kings, the time of the events is already fixed by the narrative? Of what use is the dating according to kings, the time of the events is already fixed by the narrative? Of what use is the dating according to kings, the time of the events is already fixed by the narrative? Of what use is the dating according to kings, the time of the events is already fixed by the narrative?

Bera and Birsha are said to be "quite deprecated by the historian. ... The alliterative prenaming also of these names speaks more for their fictitious than for their historical origin. It is striking that for the single historical city of Zoar, no name of the king is given. Besides, we are bound to no time, for the event recounted could quite as well have taken place in the year 4000 as 2000; the artificial chronology of Gen is for us no rule.

Whence the narrator got the names of the hostile kings we cannot say. They may really have been handed down to him, perhaps quite recently. Another conjecture may be, the utmost we can admit is that he has employed a few correct names intermingled with false or invented ones, and the appearance of Bera and Birsha can as little permanently deceive us as the proper names and dates in the texts. And if we admit provisionally the correctness of the names of the kings and test the narrative further.

Here in a long paragraph, Noldeke follows the reductio ad absurdum, arguing that, from a historical standpoint, the provisional supposition is incredible and impossible, and concludes (163), "Now this whole expedition is historically improbable to the same extent that it is adapted to the production of a striking effect; the usual view is that it is fictitious. ... Does not the manifest improbability of the narrative lie precisely in the details which give it the appearance of historicity?" Concerning the story of Abram's pursuit of the kings and the critical charge of Lot, he states (165): "If that is possible, then is nothing impossible. It may be replied that the number of Abram's servants was in reality much greater; but everything depends upon it, and the number belongs again to the very few which supply the unique of the narrative the deceptive shimmer of historicity."

Of Melchizedek and the Amorite allies of Abram, he says (168): "So do the proofs pile up, that our narrative has no historical worth. ... Even if the rest of the chapter were historic, we could still hold Melchizedek a poetical fiction." He sums up the argument in the following words
ARCHAEOLOGY OF ASIA MINOR. See ASIA MINOR, ARCHAEOLOGY OF.

ARCHANGEL, är-äk-n‘jel. See ANGEL.

ARCHELAUS, är-ké-la’üs (Ἀρχέαλαος, Archelaos, Mt 2:22): Son of Herod the Great by his wife Malthace. He succeeded on his father’s death to the government of Judea, but was deposed by the Romans for misgovernment in 6 AD. See HEROD.

ARCHERY, är-chér-i. (1) The art of using the arrows, or bow and arrow for hunting and in battle is of great antiquity. It is mentioned in Gen 21:20, as well as in the Iliad and the Odyssey, and depicted on Egyptian monuments and in Assyrian records, but it is probable that the story, which is, in reality, impossible course of the narrative, out of which there cannot be separated any single things as bare exaggeration of the tradition, that we have here a conscious fiction; in which only a few historical names have been used.

Now, recalling to mind the facts of archaeology in this case (cf above) it becomes evident that they are very far from “harmonizing entirely” with the opinion advanced by Nöldeke and reiterated by Driver, and the method of advocating such “harmonizing” appears very clearly. Moreover, what is true of this particular theory of Nöldeke and Driver is equally true of other radical critical theories at present held. Of the recent reconstructive theories of criticism—the patriarchs not individuals but personifications; the rude, nomadic, semi-barbarous condition of Pal in the patriarchal age; the desert; Egypt; the comparative unimportance of Moses as a law-giver; the nature of the origin of Israel’s religion from astral myths; and the late authorship of the Pent—not one is being sustained. In fact, however much archaeological evidence there may be that is negative in character or that is minimally significant in the theories of criticism, no one can point to a single definite particular of archaeological evidence whereby any one of these theories is positively sustained and corrobodated. 5. The present state of the discussion. The present stage of progress of the testing of critical theories by archaeological evidence may briefly be stated. The Bible at its face value is being corroborated wherever archaeology immediately and definitely touches it. To illustrate this statement fully would be to cite every definite piece of archaeological evidence in the Biblical field of scientific research during the last one hundred years. But views of Scripture must finally square with the results of archaeology, i.e. with the contemporaneous research makes that contemporaneous history to appear, critical theories at variance therewith are of necessity giving way; so that, as far as the process has been carried to the present time, archaeology is bringing harmony with the face value of Scripture, and is not definitely and unequivocally encouraging attempts at literary reconstruction of any portion of the Bible, although sometimes asked to render such service.

LITERARY. The bibliography of the discussion has appeared in the references fully given throughout this article. The bibliography on the subject of this art, "Archaeology and the Bible" and "Criticism," is exceedingly meager, since the importance of the subject has but recently come to the front and been generally recognized. The following may be cited here: "River in Authority and Archaeology (Hogarth). ch II; Eerdmans, "Witboer Journal, July, 1909; also Altertumswissenschaftliche Studien; Ort, The Problem of the OT, ch xi; Bennett, Contemporary Review, 1906, 518."

M. G. KYLE

ARCHITECTURAL ARCHIVE. Addressed by Paul in his letter to Phil. as "our fellow-soldier:" probably a member of Philon's
family circle, holding some official position in the church (Col 4:17; Philm 2). See ARCHAIA. The tradition that he was one of the seventy disciples, become bishop of Laodicea and later became a martyr, seems to have little historical foundation.

LITERATURE
1. Historical. —The words "architect" and "architecture" do not occur in the OT or the NT.

As the greatness of a nation and its social elevation are reflected in the course of architectural development, so is a nation's failure to rise to firm establishment, after victory in war, reflected in the absence of such development. The latter condition was that of the Jews in Pal; they failed so to establish themselves that their character and aims could find true expression in architecture. The country by reason of its geographical position and its broken territorial character, which exaggerated the tribal nature of its inhabitants, did not favor political empire (see HGHT, 10). The great difficulty of the Jews was the preservation of their own integrity. There could be no victorious expeditions to foreign lands to inspire monumental evidence of achievement, nor had they the inspiration of various gods or saints, to whose glory great and separate buildings might be raised. Their dwellings were, by force of circumstances, unpretentious, and their tombs were of the same character.

Although in the smaller buildings there is very little evidence of the builder having been governed by a previously drawn plan, there seems no doubt that in larger works a plan was prepared. The Tabernacle and Temple was made according to a "pattern" (Ex 25:9) and Solomon's Temple was also designed and submitted for approval (1 Ch 28:11). Estimated cost was also considered (Lk 14:28). The equivalents to a tape line and foot rule can be identified (Ezk 40:35; 47:2; Rev 11:1; 21:15).

The Israelites arrived in tents, and the walled cities, "great and walled up to heaven" (Dt 1:28 AV) which they took and occupied were well fortified, unlovely shelters, covering areas of anything from 12 acres, as at Taanach and Megiddo, to about 23 acres as at Gerizim (Canaan d'après l'exploration récente). The habitations within the walls were poor structures of mud bricks or rude stone; in many cases they were rock-cut caves. True, the Jews attempted, at the outset of their full possession, to build in beauty, and made efforts toward greater substantiality, using the best available help; the attempt, however, was doomed to failure. The most important buildings were their fortifications. The engineering skill displayed in the construction of aqueducts and other water systems was forced out of them by sheer necessity, and proved the existence of a latent constructive power, which they never had sustained opportunity to apply to architecture. In striking contrast is the architecture of the Crusaders. In a comparatively short time of less than 200 years, during the half of which practice in the arts of peace was well-nigh impossible, they stamped their occupation by the erection of an enormous number of great and beautiful buildings, the ruins of which are among the most imposing landmarks in the country.

The often quoted references to building greatness in the OT, indicate a pride out of all scale with actuality. They tell the story of a long desert pilgrimage during which the Jews, as dwellers in tents, were impressed with the walled cities which, with extraordinary fortitude, they stormed and occupied, and which, with pardonable enthusiasm, they consequently exaggerated, to the glory of God. Although references to buildings in the OT are frequent, they are seldom sufficiently detailed to convey an idea of their character.

Cain built a city and named it Enoch (Gen 4:17); his descendant Tubal Cain was "an instructor of every artificer in brass and iron" (ver 22 RVm). The description of the plan of the ark (Gen 8:19) is the first detailed architectural description in the OT. Ashur, a descendant of Ham, built Nineveh and other cities (Gen 10:11). The tower of Babel was built of 'brick for stone and slime for mortar' (Gen 11:3). In Ex 27 9-21 plan, dimensions and construction of the Tabernacle are given.

II. TEMPLE AND PALACE OF SOLOMON.—The most complete architectural reference is the description of the Temple and Palace of Solomon (1 K 6, 7) and (Ezk 40, 41). These buildings are fully dealt with under TEMPLE, but a brief note is here necessary, as they are by far the greatest buildings of which there is mention in the OT. It is clear that Solomon had ambition for architectural greatness, and, following the example of David (2 S 8:11)
he employed Phoen designers and craftsmen to carry out the work.

**Fig. 3.—Doorway with Voluted Slabs at Lachish.**

It is known that the buildings were of stone, that the chambers surrounding the Temple were three stories high, that the Temple was roofed (presumably flat) with cedar. Fergusson’s restoration shows a sloping roof, following the precedent of the sloping roof of the Tabernacle (Temple of the Jews, 26). The walls and ceilings were lined with cedar, so that “there was no stone seen” (1 K 6 18) within the house. The interior was enriched with carved foliage and cherubim, and in the decorative scheme, gold was freely applied. The description of the exterior is less minutely detailed. Stones were large and, as in the buildings of Egypt, were “sawed with saws” “from foundation to coping” (1 K 7 9), “foundation to the top of walls” (3 K 7 9, Douay VS). The inference therefore is that the masonry was smooth-faced: “no sign of any hammer” (Ara, VIII, iii, 2). Windows were “narrow” (1 K 6 4 AV), repeatedly referred to (Ezk 40 18-26). In the interior of the palace, cedar beams were carried on rows of cedar columns, and there were three rows of windows, one row to each story, directly opposite each other. Doors and posts were “square in prospect” (1 K 7 5 ERV), i.e. square-headed. In Ezek 40 21 f EV arches are repeatedly mentioned but this is an error of translation. See Arch.

In the description, there is very little indication of the style of architecture. The rich nature of the pillars of brass and their “chapters” (1 K 7 15 f EV) point to some hanging after an ornate trabeated style. There is no indication, however, of such a style in constructive stone. No mention is made of a crowning feature of a distinctive kind, not even an eave, simply a “coping.” The use of a coping suggests that the walls were topped by parapets, “battlement” (Dt 22 8 EV), according to the law. Fergusson’s restoration shows both cornice and battlements (Temples of the Jews, Frontispiece).

One can only vaguely conjecture the sources of influence which guided the builders. The description clearly shows that the great columnar architecture of Egypt was not taken as a model, although certain Egyptian characteristics in detail are evident in contemporary work. Probably Phoenician intercourse with the Mediterranean, generally, showed its influence, in

**Fig. 4.—Jewish Temple of Leontopolis.**
The Phoenicians who were employed seem to have been indifferent builders. They took 13 years to build Solomon's house (1 K 7 1) and 71 years to build the Temple (1 K 6 38), and they, in all probability, found such work beyond their powers of adequate conception, more especially as the housement of a strange God was uninspiring. "Shalt thou build me an house for me to dwell in?" (2 S 7 5 EV) was a command which they were only hired to fulfil.

III. Conclusions from Actual Remains. — There are only a very few known examples from which a knowledge of Jewish architecture can be obtained. There are none now standing, and what the space has uncovered proves little more than a mere building craft of an inferior order. Remains of the period of the monarchy have been uncovered on several sites, notably Jerusalem, Lachish, Tel es Safi (Gath?), Gezer, Taanach, Tel es Mutesellim (Megiddo), Jericho, and these give a general idea of the building craft of the period, but give no evidence of an architectural style. It may, with good reason, be argued that there was no style, but it is too much to conclude that the Jews had no architectural instinct. Ideals were not lacking:

![Painted Tombs of Marissa](image)

"Behold, I will set thy stones in fair colors, and lay thy foundations with sapphires. And I will make thy pinnacles of rubies, and thy gates of carbuncles, and all thy border of precious stones" (Isa 54 11. 12). Had history been different, Solomon's great example might have laid a foundation from which a national style would have been developed. The arts of peace, however, did not even bud, and the bane of internal and external conflict forced building energy to concentrate itself on fortifications.

Indeed in the great defence walls lies the building history of the Jews. They were hurriedly built and frequently destroyed. Defence construction and reparation alternated so consistently, that each successive city within was little more than a temporary housement, at all times subservient to the more important work of defence. Under such conditions nothing flourished, least of all architecture. Building art became a thing of bare temporary utility.

Streets (Fig. 1) were laid out without method; narrow, tortuous alleys broken into by projections, founded at the will of each individual builder, served as main thoroughfares (Bible Side lights, 95; Excavation of Gezer, Vol I, p. 167 ff); cf similarity of conditions with streets of Mediterranean city of Philakopi (Journal RIB A, XI, 531). See Crry. Masonry was usually of rough unhewn stones, unskilfully laid without mortar, and buildings were rarely on the square. Under these conditions the enthusiasm displayed in the description of Solomon's work can be understood.

![Lintel Stones](image)

In Jerusalem the Temple area was the center of architectural grandeur, and it is possible that it may have inspired building endeavor of another nature in other cities. Pal has as yet yielded no such parallel. "Grand Manner" Free areas, where they are found to have existed, seem to have happened so, and do not always coincide in position in successive superincumbent cities. They lay claim to no particular "lay out" and, in all probability, they served as space for the dump heaps of the town refuse or for the penning-up of cattle and sheep (Isa 58 12, "waste places"). Fig. 2 shows the modern city of Es Salt, and gives a fairly good idea of the general appearance of an ancient Jewish city. The use of wooden shafts for porticos and roofs of large covered areas appears to have been prevalent, and these were frequently set in stone sockets which served as bases. Stone columns seem to have been sparingly used; in fact, there is no evidence whatever that a stone columnar

![Tomb of Zechariah](image)
At Lachish (Lachish, 23 ft) a number of voluted low-relief slabs were discovered which were originally built into the left reveals of the doorways of a building of considerable importance. These slabs were found in conjunction with a molded lintel of Egyptian character. The discovery disclosed the only authentic examples of the architectural detail of the Solomonic period, and is particularly interesting as furnishing, perhaps, the earliest prototype of the Ionic volute. Fig. 3 is a sketch reconstruction of the doorway after Petrie’s restoration. At its best it is a shoddy unconstructive adaptation of exotic features, and if it is to be taken as a key to the work of the period throughout Pal, there can be nothing great to record.

When Onias fled to Egypt from the persecution of Antiochus Epiphanes, cir 154 BC, he gained permission from Ptolemy and Cleopatra to build a temple at Leontopolis like to that at Jerus (47, XIII, ii, 3). The temple was built in fulfilment of the prophecy of Isa and modeled after the temple of Ze-rubbabel, but “smaller and poorer” and “resembled a tower.” Petrie recovered this temple (Hyksos, 19 ft) on an artificial mound resembling the Temple hill at Jerus, raised alongside the Hyksos camp, where an influential Jewish community had established itself. It is the most complete plan of a Jewish building of monumental character yet discovered (Fig. 4). A sort of rude Corinthian detail was used, and certain fragments point to a battlemented treatment, suggestive of Bab origin, and to some extent confirming the inference drawn from the description of Solomon’s Temple.

Fragments of contemporary architecture of the Maccabean dynasty throughout Pal show a Greco-Syrian style of considerable dignity and interest, illustrating a readiness to respond to the Hellenizing influence in the arts, which at that time was characterized, in architecture, by a decadent provincialism. The battlemented details, found at Hyksos, seem to indicate the use of a style antedating the Maccabean work, preserving, to some extent, Bab traditions.

From the 3d cent. BC up to the Christian era architecture shows a consistent Gr origin with local character in detail (see Ex. iii, 9; 9, 18, 19) at Tel Sandahannah and Mareshah (Painted Tombs of Marissa).

These Marissa tombs show most interesting decorated elevations, with painted architectural detail (see Fig. 5). The work is Phoen (93) and the date probably 194 to 119 BC (79). The Ionie capitals are used, with wreath enrichments painted on the architrave over the capital, and a deep frieze of painted animals, surmounted by a representation of a “battlement” (coping) (Deut. 22, 8; 1 K 7, 9) remarkably like the details found by Petrie at Hyksos. An interesting detail is the point-ed head to the intercolumnar opening, a form which seems to have suggested itself universally to the primitive builder, where the handling of large lintel stones presented a difficulty (see Fig. 6). They call to mind the heads of Anglo-Saxon openings.
A liking for mural decoration existed throughout the whole Jewish period, as is seen from the small fragments of painted plaster discovered in the various post-exilic cities, but the decoration on the Marissa tombs is the most complete example, and resembles in many ways the mural decoration at Knossos and Phylakopi.

The tomb of Zechariah in the Kidron valley (Fig. 7) probably belongs to the same date as its neighboring tomb of St. James, which De Vogüé, from the inscription upon it, ascribes to the time of Herod.

8. A Characteristic Feature

(Le Temple de Jérusalem, 46). The detail of the crowning part of the entablature is an oft-recurring feature in Pal architecture, appearing as early as the Solomonic era at Lachish (see Fig. 3). It is characteristically Egyptian, and is also seen at Persepolis (Gwilt's Enc. 22), and although neither may have been borrowed from the other, they are both derived from the common parent. (A curious eastern tradition mentioned [BD, "Cities," 610] ascribes the building of Persepolis to Solomon.) It was a feature commonly used by the Phoenicians (Rawlinson, Hist. of Phoen., 142), and was probably introduced by them from Egypt. It seems to have been in favor up to the time of Herod and was abandoned after the wholesale introduction of the classic entablature which in Hellenistic times was on only partially incorporated into the prevailing style. The successive variations of the crowning feature of their design is an important factor in tracing the development of Jewish architecture.

V. Herodian Work.

The Temple of Siah (described by De Vogüé in Recovery of Jews, 419 ff, and Temples of the Jews, 140 ff) is an interesting example of the work of the Herodian period and is more Gr in character than one would expect. Here, local character in carving is strongly marked, foliage and figures being freely used with a certain Assyrian manner which, in spite of loose handling, betrays its origin. In fact this choral of architectural enrichment can be traced through the work of India, Assyria, Persia and Syria on to the Byzantine period, when the great cathedral church of St. Sophia in Constantinople displayed it in the most perfect harmony of all time.

The great building period of Herod need not be detailed. Here, Herod was an Erodotote and his architecture partook of the more robust Roman style which dominated Jewish art at a time when the opportunity of national incorporation had passed.

V. Synagogues.

This Roman influence, however, remained in Pal as can be seen by the important remains of synagogues in Galilee of the 3d cent. AD (see Fig. 8 from Kefer Berim; Studies in Galilee, ch vi; SWP, special papers, 294 ff). The many remains investigated shed light upon the plan of these post-exilic places of worship, of which there is little or no mention in the OT. See Synagogues. The plans vary considerably in proportion. The example at Meiron measures 90 ft. x 44 ft. 8 in., while that at Iribid measures 57 ft. 3 in. x 53 ft. (SWP, special paper, 290). In general arrangement the plans vary very little, consisting usually of aisles with a triple entrance, most often facing south. The details are richly carved and "a surprising feature common to all is the use of animal figures, especially lions, or lambs and eagles, ... . . . In some human figures, usually intentionally mutilated, are found (Studies in Galilee, 110).

VI. Final.

It is probable that future researches may add to our knowledge of early Jewish architecture, but it is doubtful whether the results of future research will be as interesting as the discoveries of the past.

ARCHITECTS, arek'tis (אֲרֵכְתִּים, ha'-ark't; AV Arch): A clan mentioned in connection with the marking of the southern boundary of Joseph (Josh 16 2). The phrase הַגִּלְאָה הַכִּנָּה יְהוָה (g'hal ha'ark'h 'arthóth) offers difficulties, and it has been suggested that the order of the last two words be changed to read "the border of Ataroth-of-the-Archites." See ATAROTH. G. A. Smith identifies Ataroth with the present Atara on the high road from Jerus to Bethel, three and one-half miles S. of Bethel and northeast of the city of Beth-hevi, the "friend" of David, was an Archite (2 S 16 16).

ARCHIVES, arek'ivs (the more correct RV rendition of אֲרָכֵיִית, beth siphrayad), in Exr 6 1, "house of the archives" instead of "house of rolls" as in the AV). A part of the royal treasure-house (5 17), in which important state documents were kept.

ARTCURUS, arek't-rus: The "Plough" or "Charles's Wain" is intended. See ASTRONOMY, II, 13.

ARD, ard (אָרְד, 'ard, meaning unknown). Either directly or remotely a son of Benjamin. Nu 26 38-40 mentions five sons of Benjamin, together with Ard and Naaman, the sons of Bela, Benjamin's oldest son, counting all seven as ancestors of Benjaminite families. In 1 Ch 8 1-3 Addar and Naaman are mentioned, with others, as sons of Bela, Addar and Ard being apparently the same name with the consonants transposed. In Gen 46 21 ten sons of Benjamin are counted, including at least the three grandsons, Ard and Naaman and Gera.

ARDAT, ard'at (AV Ardath; Syr and Ethiopic have Arpadh): A certain field where Ezer communed with God (2 Esd 9 26).

ARDITES, arek-t'its: Patronymic of Ard, which see.

ARDON, ard'on (אֲרֹדֶן, 'ardon, meaning unknown): One of the three sons of Caleb and Azubah, of the tribe of Judah (1 Ch 2 18).

ARELI, arel'el (אָרֶלִי, ar'elî, apparently the gentilic form of a compound that would mean "God's lioness," or "God's heart"): One of the sons of Gad the son of Jacob (Gen 46 16; Nu 26 17). "Arelites" (q.v.) is exactly the same word.

ARELITES, arel'it's: In Nu 26 17. See ARELI.

AREOPAGITE, are-op'a-j't. See DIONYSIUS.

AREOPAGUS, are-op'a-gus (Ἀρέωπαγος, Areó-pagoς; Acts 17 19 22. Mars' Hill, 17 22 AV): A sort of spur jutting out from the western end of the Acropolis and separated from it by a very short saddle. Traces of old steps cut in the
rock are still to be seen. Underneath are deep grottoes, once the home of the Eumenides (Furies). On the flat surface of the summit are signs still visible of a smoothing of the semicircle for seats. Directly below to the N. was the old Athenian agora, or market-place. To the E., on the descent from the Acropolis, could be seen in antiquity a small semicircular platform—the orchestra—from which rose the precipitous rock of the citadel. Here the book-sellers kept their stalls; here the work of Anaxagoras could be bought for a drachma; from here his physical philosophy was disseminated, then, through Euripides, the poetic associate of Socrates and the sophists, leavened the drama, and finally reached the people of Athens. Then came the Stoics and Epicureans who taught philosophy and religion as a system, not as a faith, and spent their time in searching out some new thing in creed and dogma and opinion. Five cents, earlier Socrates was brought to this very Areopagus to face the charges of his accusers. To this same spot the apostle Paul came almost five hundred years after 399 BC, when the Attic martyr was executed, with the same earnestness, the same deep-rooted convictions, and with even greater ardor, to meet the philosophers of fashion. The Athenian guides will show you the exact place where the apostle stood, and in what direction he faced when he addressed his audience. No city has ever seen such a forest of statues as studded the market-place, the streets and the sides and summit of the Acropolis of Athens. A large part of this wealth of art was in full view of the speaker, and the apostle naturally made this extraordinary display of votive statues and offerings the starting-point of his address. He finds the Athenians extremely religious. He had found an altar to a god unknown. Then he develops the theme of the great and only God, not from the Hebraic, but from the Gr., the Stoic point of view. His audiences consisted, on the one hand, of the advocates of prudence as the means, and pleasure as the end (the Epicureans); on the other, of the advocates of duty, of living in harmony with the intelligence which rules the world for good. He frankly expresses his sympathy with the nobler principles of the Stoic doctrine. But neither Stoic nor Epicurean could believe the declarations of the apostle: the latter believed death to be the end of all things, the former thought that the soul at death was absorbed again into that from which it sprung. Both understood Paul as proclaiming to them in Jesus and An Anastasis ("resurrection") some new deity. But they were disappointed. When Jesus was ordained by God to judge the world, and that An Anastasis was merely the resurrection of the dead, they were disappointed. Some scoffed, others departed, doubtless with the feeling that they had already given audience too long to such a fanatic.

The Areopagus, or Hill of Ares, was the ancient seat of the court of the same name, the establishment of which leads us far back into the mythical period long before the dawn of history. This court exercised the right of capital punishment. In 584 BC the jurisdiction in criminal cases was given to the archons who had discharged the duties of their office well and honorably, consequently to the noblest, richest and most distinguished citizens of Athens. The Areopagus saw that the laws in force were to be applied. They made law and the laws were given to this body for the conduct of various affairs of state; when the safety of the city was menaced, the court acted even without waiting for full power to be conferred upon it. The tenure of office was for life, and the judges of the Areopagus were without restriction. The court sat at night at the end of each month and for three nights in succession. The place of meeting was a simple house, built of clay, which was still to be seen in the time of Vitruvius. The Areopagus kept up the memory and sacred traditions of the past, a dignified and august body, was independent of and uninfluenced by the wavering discordant multitude, and was not affected by the ever-changing public opinion. Conservative in its views, to a fault, it did good service by holding in check the too rash and radical younger spirits. When the democratic party came to power, after Cimon's banishment, one of its first acts was to limit the powers of the Areopagus. By the law of Ephialtes in 460 the court lost practically all jurisdiction. The supervision of the government was transferred to the nomophylakes (law-guardians). At the end of the Peloponnesian war, however, in 403 its old rights were restored. The court remained in existence down to the time of the emperors. From Acts 17 19 and 22 we learn that it existed in the time of Claudius. One of its members was converted to the Christian faith (17 34). It was probably abolished by Vespasian.

As to whether Paul was "falsely apprehended and formally tried," see Conybeare and Howson, The Life and Epistles of St. Paul, ch x, and Epesos, 5th ser. ii, 209 ff., 261 f. (Ramsay).

Literature—P. W. Forchhammer, De Areopago (Kiel, 1866); Philippus, Der A. und die Epheten (Leipzig, 1874); Lange, Die Epheten und der A. vor Solon (Leipzig, 1874).

J. E. Harry

Areopolis, ar-ŏ-op′-ŏ-lis. The Gr name of Ar (q. v.).

Ares, à′rés, är′ēs (Ἀρες, ἀρέας). The Gr name of Ares, the god of war.
ARETAS, arē'tas (Ἀρέτας, Arētās): The name is a common one among Arabian princes and signifies "virtuous or pleasing." It is mentioned several times in Biblical lit. and in Jos. Here it refers to an Arabian king, who was a contemporary of Anti-ochus Epiphanes (cir 170 BC), before whom Jason the high priest was accused.

1. 2 Macc 5:8 — Another Arabian prince of this name, surnamed Obodas (Ant, XIII, xv, 2; xvi, 2; XVI, ix, 4) de-feated Antiochus Dionysius and reigned over Coele-Syria and Damascus. He participated with Hyrcanus in the war for the Jewish throne against Aristobulus but the allies were completely defeated at Paphyrnon, by Aristobulus and Scaurus, the Rom. general. The latter carried the war into Arabia and forced Aratas to make an ignominious peace, at the price of his brother Philip (Mt 14:3; Mk 6:17; Lk 3:19). Jos (Ant, XVIII, v, 1.3) gives us a circum-stantial narration of the events leading up to and following the conduct of Antipas. Coupled with a theoretical part, this confused wilderness of black rock, rent and torn by countless fissures, flowed from the craters whose dark forms are seen on the E. It rises to an average height of about 20 ft. above the plain, on which it lies like an island on a sea of emerald, the edges being sharply defined. At all points it is difficult of entrance, and might be defended by a few resolute men against an army. To this fact doubtless it owes its name el-Lejá, "the refuge." There are many traces of considerable cities in the interior. The present writer collected there the names of no fewer than seventy-one ruined sites. See further Trachonitis. This identification is supported by taking 'argōb as the Heb equivalent of the Gr root 'argōb (Gen 49:11). It is possible only if, as Gesenius assumes, the root 'raghām is cognate with ragāhm, an extremely precarious assumption. "Cloth" is the tr. of the word rgehek in Job 21:33; 38:38; probably therefore 'argōb should be trans-lated "a matter of value; costly," i.e. "arable land." This practically rules out el-Lejā. We must assume that the term hebbel need have no reference to the clearly marked rocky boundaries. As regards the great cities, all Bashan is studded with the ruins of such. The splendour that everywhere meet the traveler's eye were thought by Porter (Giant Cities of Bashan) and others, to be the wreck of the great cities that struck the invading Israelites with wonder. It is now clear that the ruins on the ground are not older than the beginning of our era. The Gr and Rom architecture is easily recognized. Probably, however, excavation will prove that in very many cases the sites have been occupied from very ancient times. Cave dwellings, chambers cut in the rock and covered with stone vaults, and what may be described as subterranean cities, have been found in different parts, the antiquity of which it is impossible to estimate. There is nothing which enables us to identify the region of Argob. The whole country of Bashan, with the exception of an "infertile land." The soil is very fertile, composed of lava detritus. In almost every district might have been found the threshore cities. Guth suggests the
western part of el-Hauran, stretching from Edrei (Pe'rat) to Na'ak. Buhl would locate it in the district of ej-Souwah, to the S.E. of the low range of ez-Zumleh. This however seems too far to the S. The S.W. slopes of Jebel ed-Druze seem to meet the conditions as well as any. They form quite a well-marked district; they are very fertile, and the strong cities in the region must have been numerous.

ARGUE, ar-gū: Only in RV in Job 40 2. נָעְג, yakahāh, which it translates, lit. means "to be right," and in the causative form "reason with," "answer back," and is found in AV rendered "reproach."

ARIRATHES, อา-ริ-ร่า-ที. See Aratites.

ARIO, ar'i-d, ar'i-d'ā: (אַרְיָּדֵן, 'ārīyāh: a son of Haman (Est 9 9)): The name may be related to the Pers Hải-dā-ha, "delight of Harî"); the text is very uncertain.

ARIDATHA, ar-i-d'ā-tha, ar-i-d'ā-tha (אַרְיָּדָתָה, 'ērīyāthāh): A son of Haman (Est 9 8). It may be related to the Pers Hari-dāta, "given by Hari.") The LXX reads Phardatha.

ARIEH, อา-รี: "(the) Lion." See Arxob.

ARIOEL, อา-ริ-อเอล (אַרְיָּוֶל, 'ērīyō'él, "lioness of God"): But the word occurs in Ezk 45 15,16, and is there tr4 in RV "ALTER HEART!")

(1) According to RV a man of Moab whose two sons were slain by David's warrior Benalath the son of Jehoada (2 S 29 26; I Ch 11 22). Here AV translates "two friendly aright (Job 11 13; Ps 78 8). Its use in Ps 60 23 is without authority in the Heb text; hence in italics.

ARIMATHEAE, ar-i-mar-thē's (Ἀριμαθαία, Arimathaia): "A city of the Jews," the home of Joseph in whose sepulchre the body of Jesus was laid. Its identity is the subject of much conjecture. The Onomasticon of Eusebius and Jerome identifies it with Ramathaim-Zophim in the hill-country of Ephraim (1 S 1 1), which is Ramah the birthplace and burial-place of Samuel (1 S 1 19; 25 1), and places it near Timnah on the borders of Judah and Dan. G. A. Smith thinks it may be the modern Beit Kima, a village on an eminence 2 miles N. of Timnah. Others incline to Ramallah, 8 miles N. of Jerus and 3 miles from Bethel (Mt 27 57; Mk 15 43; Lk 23 51; Jn 19 38).

ARIOCH, อา-ริ-ออ (אַרְיָּא-, 'ērīyāh): (1) The name of the vassal king of Ellasar, under Chedorlaomer, king of Elam, and Amraphel, king of Shinar (Babylonia), who took part in the expedition against Sodom, Gomorrah and other states (Gen 14 19). Assyrologists generally, and probably rightly, identify A. with Éri-Aku (q.v.), king of Larsa, Ellasar being for Al-Larsa (now Sinqara in central Babylonia)

For an account of the expedition see Amraphel, and for the Babylonian texts bearing upon the reign, see Éri-Aku. In Gen 14 19, where the names of the allied kings who marched against the Cities of the Plain are given, that of Arioch follows the name of Chedorlaomer, and not Cheduraga, as in the Vulgate, and in Gen 15 20. The name of him who, according to the text, carried the tribute of Shinar and Elam to Chedorlaomer, is given in Gen 14 2, 19, as Éri-Aku, and in Gen 15 20, as Éri-Agallu.

Texts referring to the Reign of Arioch for the Kingdom of Babylonia are scarce. Besides Larsa, Éri-Aku's inscriptions inform us that Ur (Mugayar, Musgeher) was in the principality of which Larsa was the capital.

(2) The Arioch of Dnl 2 14 25 was captain of the bodyguard of King Nebuchadnezzar. Nothing else is known about him except that it was he who was commanded to slay the "wise men" who failed to repeat to the king his dream and its interpretation; and who communicated to his royal master that Daniel had undertaken the task. T. G. Potter.

ARIOAL, อา-ริ-ออล (אַרְיָּוָל, 'ērīyāl): Probably a Pers word of unknown meaning. One of Haman's sons, slain by the Jews (Est 9 9).

ARISTARCHUS, ar-is-tār-kus (Ἀριστάρχος, Aristarchos, "best ruler"): He was one of those faithful companions of the apostle Paul who shared with him his labors and sufferings. He is suddenly mentioned with Caius as having been seized by the excited Ephesians during the riot stirred up by the silversmiths (Acts 19 29). They are designated men of Macedonia, Paul's companions in travel. We learn later that he was a native of Thessalonica (20 4; 27 2). They were probably seized to extract from them information about their leader Paul, but when they could tell nothing, and since they were Greeks, nothing further was done to them.

When Aristarchus attached himself to Paul we do not know, but he seems ever after the Ephesian uproar to have remained in Paul's company. He was one of those who accompanied Paul from Greece via Macedon in (20 4). Having preceded Paul to Tarsus, where they waited for him, they traveled with him to Pal. He is next mentioned as accompanying Paul to Rome (27 2). There he attended Paul and shared his imprisonment. He is mentioned in the letters of the Roman captivity, in the Epistle to the church at Col (4 10), and in the Epistle to Philem (ver 24), in both of which he sends greetings. In the former Paul calls him "my fellow-prisoner." According to tradition he was martyred during the persecution of Nero. S. F. Hunter.

ARIOSTOBULUS, ar-is-to-bu'lus (Ἀριστοβούλος, Aristoboulos, "best counselor"): (1) Son of the Maccabean, John Hyrcanus, who assumed the power and also the title of king after his father's death (105 BC) and associated with him, as co-regent, his brother Antigonus (Ant. XIII, 1), though by the will of his father the government was intrusted to his mother. Three other brothers and his mother he cast into prison, where they died of starvation. He murdered Antigonus, and died conscience-stricken himself in 104 BC. See Maccabees.

(2) Aristobulus, nephew of the former, dethroned his mother, Alexandra (69 BC), and forced his brother Hyrcanus to renounce the crown and sitre in his favor. In 64 Pompey came to Pal and supported the cause of Hyrcanus. See Hyrcanus. Aristobulus was defeated and taken prisoner, and Hyrcanus was appointed in his stead. On his death (63 BC), Aristobulus and his two daughters were taken to Rome, where he grasped the triumph of Pompey. The father escaped later (56 BC) and appeared in Pal again as a claimant to the throne. Many
followers flocked to his standard, but he was finally defeated, severely wounded and taken prisoner a second time and with his son, Antigonus, again taken to Rome and there held in confinement for 2 years, until Pompey the Great, who had just reached Syria as a province, had Antigonus poisoned as he was on his way to Ptol.

(2) Grandson of the preceding, and the last of the Maccabean family. See Asmonians.

(4) The Jewish teacher of Ptol. VII (2 Macc 1:13).

(5) An inhabitant of Rome, certain of whose household are saluted by Paul (Rom 16:10). He was probably a grandson of Herod and brother of Herod Agrippa, a man of great wealth, and intimate with the emperor Claudius. Lightfoot (Philippians, 172) suggests that "the household of A.," were his slaves, and that upon his death they had kept together and had become the property of the emperor either by purchase or as a legacy, in which event, however, they might still retain the use of their former master. Afterward these were Christians to whom Paul sends greeting.

M. O. Evans

ARITHMETIC, a-rith'me-tik. See Number.

ARIUS, a-r'ı-us, Ἀρῖος (Ἀρης, Ἀρέας): The reading of the Vulg. adopted in RV for the former reading Arēus and Arēios of Jos. A king of Sparta (309-265 BC) who wrote the letter to Onias, the high priest, given in 1 Macc 17:20-23. There were two Spartan kings named Aries, and three high priests named Onias. Chronology requires the letter mentioned to have been written by Aries I to Onias I, most probably in the interval between 309 and 300 BC. See Laconian.

ARK, ark, OF BULRUSHES, bōdī 'rush-ı, (םָנָה, שֶפֶה, אֲדֹן 'אֶשֶּכֶת, אֲדֹן 'אֶשֶכֶת, אדונ 'אשך, "a vessel to float"). The Heb word here tr' "ark" is used in the OT only of the ark of Noah (Gen 6:14 ff) and of the ark of bulrushes (Ex 2:3), and always in the secondary meaning, a vessel to float. The LXX translates it of Noah's ark by κυβήρα, κυβήρα, "a casket," and of the ark of bulrushes by θῆκα, a little basket made of osiers or flags. For the Ark of the Covenant, the Heb employed a different word (םָנָה, שֶפֶה, אֲדֹן 'אֶשֶכֶת, אֲדֹן 'אשך, "ark of bulrushes") which was employed by the Egyptians for many different vessels, some of which were intended to float or even to be used as a skiff. Sīmē (םָנָה, שֶפֶה, אֲדֹן 'אֶשֶכֶת, אֲדֹן 'אשך, "bitumen"), kōpēth, "pitch" (םָנָה, שֶפֶה, אֲדֹן 'אֶשֶכֶת, אֲדֹן 'אשך, "pitch") was probably the sticky mud of the Nile with which to this day so many things in Egypt are plastered. In this case it was mixed with bitumen. Flags (םָנָה, שֶפֶה, אֲדֹן 'אֶשֶכֶת, אֲדֹן 'אשך, "sedge") were reeds of every kind and tall grass grown in the shallow water at the edge of the river.

Thus the ark of bulrushes was a vessel made of papyrus stalks and rendered fit to float by being covered with a mixture of bitumen.

2. History and mud. Into this floating vessel the mother of Moses placed the boy when he was three months old, and put the vessel in the water among the sedge along the banks of the Nile at the place where the ladies from the palace were likely to come to bathe. The act was a pathetic imitation of obedience to the king's command to throw his baby into the river, a command which she had for three months bravely and which now she so obeyed as probably to bring the cruelty of the king to the notice of the royal ladies in such a way as to arouse a womanly sympathy.

A similar story is related of Sargon I of Babylon (Records of the Past, 1st ser., V, 1-4; Rogers, Hist. Bab and Assyri, I, 362).

The one theory is commonly discredited. That method of abandoning children, either willingly or by necessity, is as natural along the Nile and the Euphrates, where the river is the great artery of the land and where the floating basket had been used from time immemorial, as is the custom in our modern cities of placing abandoned infants in the streets or on door-steps where they are likely to be found, and such events probably occurred then as often as now.

ARK OF THE COVENANT, kuvve-n̄ant (םָנָה, שֶפֶה, אֲדֹן 'אֶשֶכֶת, אֲדֹן 'אֶשכֶת, אדונ 'אשך, "ark of bulrushes"): I. The Statements of the OT Concerning the Ark of the Covenant.—In Ex 25:10 ff, Moses receives the command to build an ark of acacia wood. Within this ark were to be placed the tablets of the law which God was about to give to Moses. Upon the top of the ark, probably not as a lid but above the lid, the אֲדֹן 'אֶשֶכֶת, אֲדֹן 'אֶשכֶת, אדונ 'אשך, (םָנָה, שֶפֶה, אֲדֹן 'אֶשֶכֶת, אֲדֹן 'אֶשכֶת, אדונ 'אשך, "ark of bulrushes") kuvv̄e-n̄ant, in the NT τὸ Πατριαρχεῖον, τὸ Πατριαρχεῖον (He 9:5), is to be placed, which was a golden plate upon which two cherubim, who raised wings and covered the ark. From the place between the two cherubim God promises to speak to Moses, as often as He shall give him commands in reference to the Israelites.

The portion of the Pent in which this is recorded is taken from the so-called Priest Codex (P). The reports of the Elohists (E) and the Jahwists (J) on this subject are wanting; but both of these sources report concerning the important rôle which the ark played at the entrance of Israel into Canaan, and these documents too must have contained the information that the people had received this ark. It can further with certainty be stated concerning E, and with some probability concerning J, in what part of these documents these accounts were to be found. For E reports in Ex 33:6 that the Israelites, in order to demonstrate their repentance on account of the golden calf, had at God's command laid aside their ornaments. In vs 7-10 there follows a statement concerning the entry of Israel into the sacred tent; but this is explained only by the fact that between vs 6 and 7 a report concerning the erection of the ark of the covenant must have been found, which the R of the Pent (since before this he had already made use of the narrative account of the Priest Codex) was compelled to omit. But that at this place E must have reported not only concerning the erection of the sacred tent but also of the construction of the ark of the covenant, is in itself probable, and can too be concluded from this, that according to D, the composition of which is also conditioned upon that of E and J, the ark was built on this occasion. We further conclude that it was not so much the tabernacle which could serve as a consolation to the people, something that at that time they needed, but rather the ark, which was to symbolize to them that God was on the march with them. In J we do not indeed find at this place any statement concerning this sacred structure, but we do find the statement that the Israelites, because of the bad news brought by Moses, discarded their ornaments. For Ex 33:4 is taken from J, since E contains the command to discard the ornaments later in the Pent, and hence could not have written ver 4. Now it is a reliable surmise that the report what use was made of the ornaments that had been discarded; and as this author, just as is the case with E, must have at some place contained
in the Psalter or the prophetic books. In the NT the ark of the covenant is mentioned only in He 9 4 in the description of the Solomonic temple.

II. The Form of the Ark of the Covenant.—
According to the statements in P, the ark of the covenant was a chest made out of acacia wood, 2½ cubits long, 1 cubit wide, and 1½ high. That it was made out of acacia wood is also stated by D in 10 3. According to P it was covered with gold within and without, and was ornamented with a moulding of gold running all around it. Its four feet were also added, through which the gold-covered carrying-staves were put. These staves are also mentioned in 1 K 8 7 8; 2 Ch 5 8 9, and mention is often made of those who carried the ark (2 S 6 13; 16 24). The correctness of these statements cannot be proved, but yet there is no reason to doubt them. Rather we might have reason to hesitate in clinging to the view that on the old ark there was really a golden kapporeth, but only because in olden times the possession of such valuable and their use for such a purpose would be doubtful. But on the basis of these statements we could at most doubt whether the lid with its cherubim consisted of solid gold.
That the cherubim were attached to or above the ark is not at all likely. The Cherubim proclaimed the ark in the Holy of Holies between two massive cherubim figures (1 K 6 19 23 ff; 8 6) does not prove that there were no cherubim figures on the ark itself, or even that those cherubim figures, which are only described in Ex 25 19 were found on the ark, were nothing else than those of Solomon's days in imagination transferred back to an earlier period (Vatke, Biblische Theologie, 1885, 333; Popper, Der biblische Bericht über die Stilfassungen, 1869). In recent times the view has been maintained that the ark in reality was no ark at all but an empty throne. It was Reichel, in his work Vorhellenische Götterkulte, who first expressed this view, and then Meinhold, Die Lade Jahwes, Tubingen, 1910, and Theologische Studien und Kritiken, 1901, 593-617, who developed this view in the following manner. It is claimed that in the days of Moses a throne-like rock at Mount Sinai was regarded as the seat of Jehovah, and when the Israelites started their journey in the wilderness, they carried a portable throne, and Jehovah was regarded as sitting visibly enthroned upon this and accompanying His people. In the main the same view was maintained by Martin Dibelius (Die Lade Jahwes, Lobbingen), 1910, and by the book Die Lade Jahwes im Thronzitat, reprinted from the Zeitschrift für Missionskunde und Religionswissenschaft, Heidelberg, 1906). The occasion for this view was given by the fact that among the Persians and other people there were empty thrones of the gods, which were carried or hauled around in processions. The reasons for finding in the ark of the covenant such an empty throne are found chiefly in this, that the passages in the OT, in which it seems that the presence of God was conditional on the presence of the ark (of Nu 14 42-44), can be explained if the ark is regarded as a throne of Jehovah. However, empty thrones of the gods are found only among the Aryan people, and all of the passages of the OT which refer to the ark can be easily explained without such a supposition. This view is to be rejected particularly for this reason, that in the OT the ark is always described as an ark, and never as a throne or a seat; and because it is absolutely impossible to see what reason would have existed in any case for regarding an ark if it had originally been a throne. Dibelius and Gunkel appeal also particularly to this, that in several passages, of which 1 S 4 4; 1 S 2 26 2 are the oldest, Jehovah is declared to be enthroned

in the waters of the river ceased to continue as flowing so as the feet of the priests who were carrying the ark entered the water, and that it stood still above until these priests, after the people had crossed over, again left the bed of the river with the ark. In the account of the solemn march around Jericho, which according to ch 6 caused the walls of the city to fall, the carrying of the ark around the city is regarded as an essential feature in vs 4 7 11. In ch 7 it is narrated that Joshua, after the defeat of the army of Jericho, lamented and prayed before the ark. In ch 8 this is mentioned in connection with Mount Ebal.

At the time of Eli the ark stood in the sanctuary at Shiloh (1 S 3 3). From this place it was taken after it had been defiled by the Philistines (1 S 6 1). Other statements assure the help of Jehovah to the people, but, instead of this, the ark fell into the hands of the Philistines (1 S 4 6). But the various misfortunes that now afflicted the Philistines induced these to regard the possession of the ark as a calamity (1 S 5) and they sent it back to Israel (1 S 6). It was brought first to Bethshemesh in the tribe of Judah, near the borders of the Philistines, and soon after to Kirjath-jearim, about 7.5 miles N.W. of Jerusalem. There the ark remained for years in the house of a man by the name of Abinadab, whose son was its guardian (1 S 7 1), until David brought it to Mount Zion, after he had successfully defeated the Philistines. There he placed it in a tent prepared for it (2 S 6; 1 Ch 13, 15). In David's time again the ark was taken along into battle (2 S 11 11). When David fled from the presence of Absalom, the priests carried the ark with them. With the ark David was prevailed upon to build a house for David, but was not willing that David should build one for Him (2 S 7). Solomon then built the temple and placed the ark of the covenant in the Holy of Holies of this temple, where it was placed under the wings of two mighty cherubim images (1 K 8 6; 2 Ch 5).

Jeremiah in the passage 3 16, which certainly was written after the destruction of Jerusalem, states that in the future new Jerus will not any more concern himself about the ark of the covenant of Jehovah, and no one will have access thereto. But it is also the subject which lies in the background of the poet who sang this psalm as participants in the home-bringing of the ark by David. No further mention is made of the ark of the covenant in the Pentateuch.
Ark of Covenant  THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA 244

on the cherubim. But this proves nothing, because he is not called "He who is enthroned on the ark," and there is a sacred and a profane thing, even if there were cherubim on the lid of the ark. Of the refutation of Meinhold and Dibelius by Budde (ZATW, 1901, 193-200, and Theol. Studien und Kritiken, 1908, 459-507).

III. The Contents of the Ark of the Covenant.— According to the PC the two tables of the law constituted the contents of the ark. In Ex 25 16; 40, as also De 10 5, and, too, in 1 K 8 9, we have the same testimony. The majority of the modern critics however regard this statement first concocted by the so-called "Deuteronomistic school." Their reasons for this are the following: (1) The critics deny that the existence of the Mosaic tables of the law is a historical fact; (2) The critics declare that if these tables had really been in possession of the Israelites, they would not have been so foolish as to put them into a box which it was forbidden to open; (3) The critics declare that the views entertained in olden times on the importance of the ark cannot be reconciled with the presence of the tables in the ark. But we reply: (1) That the actual existence of the two tables of the law is denied without sufficient reasons; that the ten principal formulas of the Deuteromonic Code are given in De 5 and De 10, as also those in Ex 34, must be insisted upon, and that according to Ex 34 other ten commandments had been written on these tables is incorrect. The laws in Ex 34 17-26 are not at all declared to be those which Moses prepared to write upon the tables. But if Moses had prepared the tables for the commandments, then it is (2) only probable that he caused to be made a suitable chest for their preservation and their transportation. (3) It would not have been thought that the view that the ark was so holy that it dared not be opened had originated only after the time of Moses. However, it is just as easily possible, that that importance had already been assigned by Moses to the tables in the ark which the sealed and carefully preserved copy of a business agreement would have and which is to be opened only in case of necessity (Jer 32 11-14). Such a case of necessity never afterward materialized, because that which on the ark could be acres, was not written on the tables. On a verbistam reading no stress was laid in olden times. (3) With regard to the importance of the ark according to the estimate placed upon it in the earlier period of Israel, we have to consider that that ancient tendency to the tables harmonize fully with this importance. Of the modern critics who have rejected this tradition, some have thought that the ark was empty, and that the Israelites thought that Jeh dwelt in it (Guth, Geschichte des Volkes Israel, 39), or that the empty chest was a kind of fetish (Schwally, Semitische Kriegsallerttimer, 1901, 1, 10). As a rule they believe that a stone image of Jeh or two stones had been placed in the ark, these being possibly meteor stones, in which it was thought that some divine power was dwelling (Stade, Geschichte Israels, 1, 458); or possibly stones that in some battle or other had been hurled and through which a victory had been won (Couard, ZATW, XII, 76); or possibly they were the stones which at the alliance of the tribes that dwelt about Mount Sinai were first set up as testimonials of this covenant (Kraetzschmar, Die Bundesvertreibung im Alten Testament, 216). Of these numerous views one only is widely held, that the ark contained meteor stones deserves any notice, because it could indeed be thought possible that Israel would have taken with them on their journey through the desert such stones which they could have regarded as pledges of the Divine Presence fallen from heaven and could have preserved these stones, if it is impossible to show that this view is probable, not to speak of proving it to be correct. The only extant tradition says that the ark contained the tables of the law, and this is the only view that in harmony with what we must think of the whole work of Moses. Finally we must again remember that it is probable that E and J, who speak both of the ark and also of the tables of the law, in the portions of these documents which have not been preserved, reported also that these were in the ark. The tables were not a theoretical statement, as the critics of the older school contend.

IV. The Names of the Ark of the Covenant.— The name "ark of the covenant of Jeh" was not originally found everywhere where it now stands, but in many places the words "of the covenant" were added later. However, the expression "ark of the covenant" is found in the oldest source of the Book of S (2 S 15 24), and in 1 K 3 15 in the old source for the history of Solomon, of which the Deuteronomistic author of the Book of Kings made use; in 1 K 8 1, a very old account of the building of the temple; and the genuineness of the expression "ark of the covenant" in these passages is not with any good reasons to be called into question. Further the expression is found in the books of Chronicles in 2 Chr 20, 21, 24. From this we must conclude that the name "ark of the covenant" go back to very ancient times, and we must reject the view that this term took the place of the term "ark of Jeh" in consequence of a change of views with reference to the ark, brought about through Deuteronomy. Indeed, since the name "ark of the covenant," as is proved by E, was nowhere more in use than in Ephraim, where they did not possess the ark and accordingly would have had the least occasion to introduce a new name for it, and indeed nowhere does the name appear among the oldest names, namely those of Moses. The other expression "ark of Jeh" may be just as old and need not be an abbreviation of the other. It was possible to designate the ark as "ark of Jeh" because the ark was present in ancient times, and it was possible to call it also "the ark of the covenant of Jeh," because it was a monument and evidence of the covenant which Jeh had made with Israel. It is for this reason not correct to translate the expression 'aron brith Yahweh by the ark of the law of Jeh," as equivalent to "the ark which served as a place for preserving the law of the covenant." For brith does not signify "law," even if it was possible under certain circumstances to call a covenant "law" figuratively and synecdochically the "covenant"; and when 1 K 8 21 speaks of "the ark wherein is the covenant of Jeh," the next words, "which he made with our fathers," show that covenant does not here mean "law," but rather the covenant relationship which in a certain sense is embodied in the tables.

In P the ark is also called "the ark of the testimony," and this too does not signify "ark of the law." For not already in P but only in later documents does one meet with the form of expression "law" (Lotz, Die Bundeslade, 40). P means by "testimony" the Ten Words, through the proclamation of which the true God has given evidence of His real essence. But where this tes-
timony is found engraved in the handwriting of God on the tables of stone, just there also is the place where He too is to be regarded as locally present.

The Ark of the Covenant

According to the tradition contained in the Pentateuch, the sacred ark was built at Mount Sinai and was taken by the Israelites along with them to Canaan. This must be accepted as absolutely correct. The supposition is groundless, that it was a shame that the Israelites had taken over ever from the Canaanites. This view is refuted by the high estimate in which in Elî’s time the ark was held by all Israel (1 S 1 ff; 2 22); and especially by the fact that the ark was at that time regarded as the property of that God who had brought Israel out of Egypt, and accordingly had through this ark caused the Canaanites to be conquered. (1 S 4 8; 6 6; 2 S 6; 1 K 12 28).

The opinion also that the ark was an ancient palædium of the tribe of Ephraim or of the descendants of Joseph and was only at a later period recognized by all Israel (Stade, Geschichte des Volkes Israel, I, 458) is not tenable, for we hear nothing to the effect that the descendants of Joseph concerned themselves more for the ark than the other tribes did. Elî, at all events, Even stood in the sanctuary at Shiloh. When Israel had been conquered by the Philistines, the ark was taken from Shiloh in order that Jeh should aid His people. But notwithstanding this the Philistines never conquered another city. The misfortunes that overtook them made them think that the possession of the ark was destructive to them and they sent it back (1 S 6). The ark first came to Bethshemesh, in the tribe of Judah, and then to Bethel (2 S 6) and afterwards in S Benjamin about 7 miles N.W. of Jerusalem. There the ark remained for many years until David, after he had taken possession of Mount Zion, took it there (2 S 6) and deposited it in a tent. Solomon brought it into the Holy of Holies in the temple (1 K 8 8–5), where in all probability it remained until the destruction of Jerusalem by Nebuchadnezzar; for Jer 3 16 proves that the Israelites felt that they were in possession of the ark up to this time.

VI. The Significance of the Ark. — According to many investigators the ark was originally a war sanctuary. In favor of this it can be urged that Israel took it into their camp, in order that they might receive the help of Jeh in the battle with the other tribes devoid of powerful help, and in that time of David the ark was again taken along into battle (2 S 11 11; cf Ps 24); note also the word of Moses, which he spoke when the ark was taken up to be carried: “Rise up, O Jeh, and let thine enemies be scattered” (Nu 10 35). However, nothing of what we know or presuppose concerning the form and the contents of the ark points to an original military purpose of the same; and in the other statements that are found elsewhere concerning the ark no mention of such a special significance is assigned to it. The significance which the ark had for the Israelites in connection with their wars is only the outcome of its significance as the symbol of the presence of Jeh, who was not at all a God of war, but when His people were compelled to fight was their helper in the struggle.

That the ark was designed to be a symbol of the presence of God in the midst of His people is the common teaching of the O.T. According to E the ark was made to serve as a witness of the covenant made with Israel. In the time of David this, that they were to leave the mountain where their residence was, and never enter it, was again considered a special significance assigned to it. The significance which the ark had for the Israelites in connection with their wars is only the outcome of its significance as the symbol of the presence of Jeh, who was not at all a God of war, but when His people were compelled to fight was their helper in the struggle.

That the ark was designed to be a symbol of the presence of God in the midst of His people is the common teaching of the O.T. According to E the ark was made to serve as a witness of the covenant made with Israel. In the time of David this, that they were to leave the mountain where their residence was, and never enter it, was again considered a special significance assigned to it. The significance which the ark had for the Israelites in connection with their wars is only the outcome of its significance as the symbol of the presence of Jeh, who was not at all a God of war, but when His people were compelled to fight was their helper in the struggle.

A Symbol of the Divine Presence

God had caused them to realize His presence (Ex 30 6). According to P, God purposefully made the ark to hold a representative of the presence. As the ark was taken up to be carried according to Jgs 2 1 ff, the angel of Jeh spoke in Bethel (Bochim) in rebuke and exhortation to the people, after the ark of the covenant had been brought to that place; for the comparison of Nu 10 35 ff and Ex 23 20 ff shows that Jgs 2 1 ff is to be regarded as speaking of the transfer of the ark to Bethel. When Israel in the time of Elî was overpowered by the Philistines, the Israelites sent for the ark, in order that Jeh should come into the camp of Israel, and this was also believed to be the case by the Philistines (1 S 4 4 ff). After the ark had come to Bethshemesh and a pestilence had broken out there, the people did not want to keep the ark, because no one could live in the presence of Jeh, this holy God (1 S 6 20); and Jeremiah says (3 16 17) that an ark of the covenant would not be again made after the restoration of Israel, but then Jehu would be called the “throne of Jeh,” i.e. it would so manifestly be the city of God that it would guarantee the presence of God at least just as much as the ark formerly did.

In olden times these things appeared more realistic to the people than they do to us; and when the ark was considered the visible representation of the presence of Jeh, as well as the way His presence, a mighty power and in itself powerful. It was believed to exist between the ark and Jeh, by virtue of which Divine powers were also thought to be present in the ark. The people at Bethshemesh were not willing to keep the ark any longer in their midst, because they could not endure its presence. David’s dancing before the ark is regarded by him and by the narrator of the event as a dancing before the Lord (2 S 6 5 ff), and in 2 S 7 5 ff God says, through Nathan, that He had allowed Israel to dwell outside Canaan — in fact since He had led the Israelites out of Egypt.

But the view advocated by some of the modern critics, that the Israelites had thought that the ark was the dwelling-place or the throne-seat of Jehovah, is nevertheless not correct. This opinion cannot be harmonized with this fact, that in the sources, dating from the same olden times, mention is made of His dwelling in many places in Canaan and outside of Canaan, so that the idea that His presence or even His Self is confined to the ark is impossible. The statement of Moses, “Rise up, O Jeh, and let thine enemies be scattered” (Nu 10 35), is not the command addressed to those who carry the ark to lift it up and thereby to lift Jeh over and above them. It is as if Jeh, in accordance with His promise, to go ahead of Israel as the ark does. According to 1 S 4 3 the Israelites did not say “We want to go and get Jeh,” but “We want to go and get the ark of Jeh,” so that He may come into our midst.” They accordingly only wanted to induce Him to come by getting the ark. This, too, the priests and the soothsayers of the Philistines say: “Do not permit the ark of the God of the Israelites to depart without sending a special angel forth.” But the people speak thus of Jeh. That Samuel, who slept near the ark, when he was addressed by Jeh, did not at all at first think that Jeh was addressing him, proves that at that time the view did not prevail that He was in the ark or had His seat upon it. Ancient Israel was accordingly evidently of the conviction that the ark was closely connected with Jeh, that something of His power was inherent in the ark; consequently feeling prevailed that when near the ark they were in a special sense near Jeh and near to the Lord. But this is something altogether different from the opinion that the ark was the seat or the dwelling-place of Jeh. Even if the old Israelites, on account of the crudeness of antique methods of thought, were not conscious what the nature of this difference was, or that this difference was felt not at all as a matter of doubt.
the ark was built to embody the presence of God among His people is just as clear from the statements of E, and probably also of J, as it is from those of P; and if these passages regarded the tablets of the law as constituting the contents of the ark, then this is in perfect harmony with their views of this purpose, and we too must cling to these same views. For what would have been better adapted to make the instrument which represents the presence of God more suitable for this than the stone tablets with the Ten Words, through which Jeh had made known to His people His ethical character? For this very purpose it had to be an ark, an enormous box, a kind of a physical portrait of the God of Israel, who could not be pictured in a bodily form. In this shape nobody in ancient Israel has formulated this thought, but that this thought was present is certain.

ARK, ar'k, of NOAH, no'a: A structure built by Noah at the command of God to preserve from the Flood a remnant of the human race and of the animals associated with man. It was constructed of "goopher wood" (Gen 6:14), likely the cypress used extensively by the Phoenicians for ship-building. It was divided into rooms or nests, and was three stories high, pitched within and without with bitumen or "asphalt," of which there are remnants, found in the Euphrates valley, a little above Babylon. It was 300 cubits long, 50 cubits broad, 30 cubits high, which according to Petrie's estimate of a cubit as 22.5 inches would make it to be 5025 ft. long, 93 ft. wide, and 48 ft. deep. It is extremely improbable that such reasonable dimensions should have been assigned to the Ark except they were based on fact. Unrestrained tradition would have been sure to distort the proportions, as is shown by what actually occurred in other accounts of the Ark. The cubeform tablets represent it as six stories high, with the length, width, and depth, each as 140 cubits (292 ft.), and having a mast on top of all, and a pilot to guide the impossible (see Deluge Tabl. ii. 23, 33-35). E. N. Peters, the G historian, represents 292 ft. to have been five stadia (3,000 ft.) long and two stadia (1,200 ft.) broad, while Origen, in order to confound Celsius (Against Celsus 4.41) gave the figures an interpretation which made the Ark 25 miles long and 7 of a mile wide.

It is needless to speculate upon the capacity of the Ark for holding absolutely all the species of animals found in the world, together with the food necessary for them, since we are only required to provide for such animals as were native to the area to which the remnants of the human race living at that time were limited, and which (see Deluge) may not have been large. But calculations show that the structure described contained a space of about 4,000,000 cubic feet, and that after storing food enough to support several thousand pairs of animals, of the average size, on an ocean voyage of a year, there would remain more than 50 cubic feet of space for each pair.

No mention is made in the Bible of a pilot for the Ark, but it seems to have been left to float as a derelict upon the waters. For that purpose its form and dimensions were perfect, as was long ago demonstrated by the celebrated navigator, Sir Walter Raleigh, who notes it had "a flat bottom, and was of a form of a broad, with a shade of roundness forward, to cut the waves for the better speed"—a construction which secured the maximum of storage capacity and made a vessel which would ride steadily upon the water. Numerous vessels after the pattern of the Ark, but of smaller dimensions, have been made in Holland and America and proved admirably fitted for freighting whose speed was not of the first importance. They would hold one-third more lading than other vessels, and would require no more hands to work them. The gradual rise and subsidence of the water, each continuing for six months, and their movement inward, render the survival of such a structure by no means unreasonable. According to Gen 6:3; 1 Pet 3:20; 2 Pet 2:5, warning of the Flood was given 120 years beforehand, and during that time Noah, while preparing the Ark, became a preacher of righteousness. For evidence that there was a gradual destruction of the race previous to the Flood, see Deluge.

George Frederick Wright

ARK OF TESTIMONY, text'-i-mo-ni. See Ark of Covenant.

ARKITE, ark'it (אֲרֹקִי: "arky"). An inhabitant of the town of Arka, situated some ten or twelve miles N.E. of Tripolis, Syria, and about four miles from the shore of the sea. The Arkites are mentioned in Gen 10:17 and 1 Ch 1:15 as being the descendants of Canaan, and they were undoubtedly of Phoen stock. The place was not of much importance, but it is mentioned in the Assyr inscriptions, under the name of Armenia, and taken by Diggah Pileser III in 738 BC. Not being on the sea its trade was small and it probably belonged to Tripoli or Barys originally. It was the birthplace of Alexander Severus, hence its Roman name, Caesarea Libani. Its site is marked by a high mound near the foothills of Lebanon.

H. Porter

ARM, är, in (אָרָם, עָרָם, ע"רָם, "er'om, י"ר, d'ra'; מַפְאָא, ma'pha, b'rach'ion; תַּוָּה, חָכָם, תַּדָ'לָף; The usual form is x'r'om from the root x'r"). "to spread." The arm may be "stretched out." "Ezor" is this form with prophetic ".d'al" (Job 31:22; Jer 32:21), and d're' is the Aram. form. Xo' is really "bossom," thus RV (Isa 49:22); and k'dal is "shoulder," thus RV (Job 31:22), (cf. che'ri, also, in Acts 13:21).

Figurative: The arm denotes influence, power, means of support or conquest. The arms of Moab (Jer 44:25) and of Pharaoh (Exk 30:21) are broken. The arm of Eli and the arm of his father's house are to be cut off (1 Sam 2), because the arm wielded the sword it signified "oppression" (Job 35:9). The arms are the means of support, therefore to refuse to aid the fatherless is to break their arms (Job 22:9).

Applied anthropomorphically to God the arm denotes also His power, power to deliver, support, conquer. His "outstretched arm" delivered Israel from Egypt (Ex 6:6; Dt 4:34), etc. They support: "Underneath are the everlasting arms" (Dt 33:27). His arm protects (Isa 40:11). Jeh is sometimes likened to a warrior and smites with His arm (Ps 89:10; Isa 63:5; Jer 21:5). The arm of Jeh is holy (Ps 98:1; Isa 52:10). Many other passages of Scripture might be quoted showing how the power of God to redeem, judge, protect, punish is expressed by the idea of "the arm of Jeh.

I. Geography.—

Ark of Noah Armenian

8,000 and 3,000 feet above sea-level, and slopes toward Euphrates, Cyrus, and the Caspian. Mt. Massis (generally called Greater Ararat) is 16,990 ft. and Lesser Ararat, 12,840 ft. Both are of igneous origin, as is Aragats (A’ta Gôs), 13,438 ft. Sulphur springs and earthquakes still attest volcanic activity. The largest rivers are the Euphrates, Tigris and Araxes. The latter, swift and famed for violent floods, joins the Cyrus, which falls into the Caspian. The lakes Van, Urmia and Sevan are veritable inland seas. The many mountain chains, impassable torrents and large streams divide the country into districts far less accessible from one another than from foreign lands. Hence invasions are easy and national union difficult. This has sadly affected the history of Armenia. Xenophon (Anab. iv.5) describes the people as living in houses partly underground, such as are still found. Each village was ruled by its chief according to ancient customary laws. He well describes the severity of the winters. In summer the climate in some places is like that of Italy or Spain. Much of Armenia is extremely fertile, producing large herds of horses and cattle, abundant crops of cereals, olives and fruit. It is rich in minerals, and is probably the home of the rose and the vine.

LITERATURE.—Minas Gaphamatzean; Garagashean; Palasanian; Edris Bustanawan; I. Rawlinson; Xenophon; Petermann, Mittheilungen for 1871; Bryce, Transcaucasia and Ararat.

II. Ancient History.—The country is first mentioned in Gen 8:4 as the land upon (some one of) the mountains of which Noah’s Ark rested. (According to Jewish tradition this was one of the Kurdish Armenians mountains.) It is next spoken of by Sargon I of Agadê, cir. 3800 BC, as among his conquests. In early Babylonian legends Armenia figures as an almost unknown land far
tus Ann. ii.60). Many places conquered by Rameses III, and mentioned in the Medinet Habu lists, were probably in Armenia. The Assyrian king Ur-ban of water; a raid left Armenia, and mentions the central district (Urartu proper, near Lake Van), the land of the Manni (Minni, Jer 51 27), Nahiri ("the Rivers"), Ashhuzu (Ashkenaz, ib), etc. Another invader was Tigrat-pleser Bar 1110-1086 BC of Ashshuzu-nasr-pal in 885 BC advanced to Urartu. A little later he mentions as articles of Armenian tribute chariots, horses, mules, silver, gold, plates of copper, oxen, sheep, wine, variegated cloths, linen garments. Again and again he carried fire and sword through the country but it constantly revolted. Under Shalmaneser II (860-825 BC) and afterward for centuries wars continued. By uniting and forming powerful kingdoms (of which the principal was Blainnah around Lake Van) the Armenian princes played an important part in the destruction of Nineveh, and in that of Babylon later. Shalmaneser II tells of the wicker-work coracles on Lake Van. The Balawat bronzes depict Armenians dressed like the Hittites (to whom they were sometimes subject) in tights and snow-shoes with turned-up and pointed ends, wearing helmets, swords, spears and small round shields. Sacye compares their faces in form to the Negro type. Possibly they were Mongolians, who were to pass for Armenians. At any rate the kings of this period was Sarduri II, about 840 BC, who built as his capital Tushpa, now Van. He ruled most of Armenia, and the Assyrians, and apparently, in a check on Shalmaneser II in 833 BC. He introduced the cuneiform character, and inscriptions are in Assyrian. His son Ishpuismadd adapted the Assyrian syllabary to his own tongue, which bears a slight resemblance to Georgin in sound points, and is almost all over Armenia, telling of his victories over the Hittites, etc. The kingdom of Blainnah reached its acme under the great monarch Arschipish I, who succeeded in defending his country against Bar 1196-1170 BC. Med. in 825 BC. But in his son's reign Tigrat-pleser IV (745-727 BC: Pub) crushed the Armenians to the dust in a great battle near Commagene in 743. Pub failed to capture Van in 737, but ravaged the country far and wide. The 14th year of an Armenian confederacy, began a great struggle in 716 with Sargon (722-705), who in 714 captured Van with Russash's family. After 5 months' wandering Russash committed suicide. His brother Arschipish II, to some degree recovered independ-ence. His successor Ermenas gave an asylum to Adrammelech and Sharezer (Aššur-bēl-asur) in 680 (2 K 19 37; Is 37 38) after the murder of their father Semacherib. Invading Assyria in the same year, they were defeated by Esar-haddon I. Armenia from the Cyrus River to the S. of Lake Van was ravaged by the Kimmerians (679-677). Russash II (cir 660-645) and his son Sandursir III (the latter cir 640 or soon after) submitted to Asshur-bēl-asur-pal (685-683). Nebuchadnezzar (604-561) boasted of reaching Van in his conquests, though the Armenians had probably their share in the destruction of Nineveh in 606. Jer 51 27 mentioned the kingdom of Ararat, Minni and Ashkenaz about 595, and said they would help in the overthrow of Babylon (in 538). Cyrus had therefore probably subdued or won them over after capturing Ekbatana (549). After this the Turanians gradually gave place in Armenia to the Armenians. Later times.

(a) Their religion. The supreme god of the Turanian Armenians was Haldish, who was father of all the rest. They were styled "children of mighty Haldish." He, with Teishbash, god of the atmosphere, and Ardinish, the Sun-god, formed "the company of the mighty gods." Aush, god of the earth; Sardish, the Moon-god; Sardish, the Year-god; and 42 other gods are mentioned. Sari was a goddess, probably corresponding to Ishtar. Adoration was offered to the spirits of the dead also. Somewhat strangely, some of the divine names we have mentioned round one of certain Arjan (Gr and Old Pers) words, however this may be accounted for.

The ancestors of the present Armenians (who call themselves Haist'k, i.e. Pat-j, "Lords") may have settled in the country in the 8th cent. BC, when. Sargon mentions a king of Armenia who bore the Arman name Bagaddati (=Theodore). They came from Phrygia (Herod. viii.73), used the Phrygian dress and armor (Dion. of Halicarnassus; Diodorus, Herod.) and spoke the same language (Herod. 11.17). These Armanian kings are called "House of Togarmah" (Gen 10 3; 1 Ch 1 6; Ezk 27 14; 38 6) and "Ashkenaz" (Gen 10 3; 1 Ch 1 6; Jer 51 27; the Assysh Ashghaza), as by their own writers of later times. Xenophon gives an account in the Cyropaedia of a Median conquest of Armenia, Strabo their Median attire; yet Armenian girls could not understand Xenophon's Pers interpreter (Anab. iv.5). Three of the four Armenians mentioned by Darius have Armenian names. The Armenians, the Median nobles, fleeing in his revolt against Darius I (519 BC). Much of the consequent fighting took place in Armenia, which was with difficulty subdued (517). It formed part of Darius' thirteenth Nome, and afterward two satrapies (apparently Armenia Major and Minor). The government of Armenia Major was made hereditary in the family of Vidarna (Hydarnes) for helping to put down Fravartish. Xenophon's interesting description of the country and people and the severity of its winters is well known. Herodotus tells of Armenians in skin and wicker-work coracles bringing wine, etc, to Babylon. Xenophon says they and the Chaldeans traded with India. Strabo mentions their caravan trade across central and western Asia. The Satraps were to present 20,000 young horses annually to the king of Persia at the great annual festival of Mithra. A large body of Armenian soldiers served in Xerxes' invasion of Greece. At the battle of Arbela (331 BC) 40,000 of their infantry and 7,000 cavalry took part. Armenia then became a portion of Alexander's empire, and later of that of Seleucus (301 BC), under a native satrap, Artaxerxes. Armenia revolted after Antiochus' defeat at Magnesia (190 BC), and the Romans encouraged the two satraps to declare themselves kings. Artaxias, king of Armenia Major, used Hannibal's aid in fortifying his capital Artaxata (189 BC). Artaxias was overthrown by Antiochus Epiphanes in 165, but was restored on swearing allegiance. Civil con-

fusion ensued. The nobles called in the Parthians under Mithridates I (150 BC), who became master of the whole Pers empire. He made his brother Valarsaces king of Armenia. Thus the Arsacid dynasty was established in that country and lasted till the fall of the Parthian empire (226 AD), the Armenian kings very generally recognizing the Parthian monarchs as their suze-

mains. The greatest Armenian king was Tiraneses I (198-55 BC), the warrior who, when Artaxias gave a time to the foremost position in Asia. He humbled the Parthians, joined Mithridates VI in war with
Rome, ruled Syria for over 14 years, built near Mārdin as his capital Tigranocerta, and assumed the title of "King of Kings," Lucullus defeated Tigranes and destroyed Tigranocerta in 69 BC. Tigranes surrendered to Pompey near Artaxata (66 BC), paid 6,000 talents, and retained only Armenia. Under him Gr art and lit. flourished in the country. Armenia as a subject-ally of Rome became a "buffer state" between the Rom and Parthian empires. Tigranes' son and successor Artesdates joined in the Parthian invasion of Syria after Crassus' overthrow at Sinmaca 53 BC. He treacherously caused great loss to Antony's army. Tigranes was carried into chains in Egypt, where Cleopatra put him to death in 32 BC. After this, Armenia long remained subject to the Romans whenever not strong enough to join the Parthians, suffering much from intrigues and the jealousy of both powers. There is no proof of the later Armenian story that Armenia was subject to Abgarus, king of Edessa, in Our Lord's time, and that the gospel was preached there by Thaddeus, though the latter point is possible. In 69 AD, Tigranes, older brother of the Parthian king Volosoges, having defeated the Romans under Paetus and established himself on the throne of Armenia, went by land to Rome and received investiture from Nero. Peace between Rome and Armenia remained closely united to Parthia till Trajan's expedition in 114 AD.

ARMENIAN, արմենիա (ARYAN, ար-իա, ար蜍-ան) RELIGION. This greatly resembled that of Persia, though Zoroastrianism and its dualistic system were not professed. We are thus enabled to judge how far the religion of the Avesta is due to Zoroaster's reformation. Aramazd (Ahura Mazda), creator of heaven and earth, was father of all the chief deities. His spouse was probably Spandaramet (Spēta Arma'it), goddess of the earth, who was later held to preside over the underworld (cf. Persephone; Hel). Among her assistants as genii of fertility were Horot and Morot (Haurvatāt and Ameretāt), tutelary deities of Mt. Massis (now still the temple of Aramazd). Aramazd had fallen very much into the background in favor of that of inferior deities, among the chief of whom was his daughter Anahīt (Anāhīta), who had temples in many places. Her statues were often of the previous metals, and among her many names were "Golden Mother" and "Goddess of the Golden Image." Hence to the present day the word "Golden" enters into many Armenian names. White heifers and green boughs were offered her as goddess of fruitfulness, nor was religious prostitution in her honor uncommon. Next in popularity came her sister Astghik ("the little star"), i.e. the planet Venus, goddess of beauty, wife of the deified hero Vahagn (Verethragna). He sprang from heaven, earth, and sea, and overthrew dragons and other evil beings. Another of Aramazd's sisters was Nanē (of Assyr Nānā, Nanaena), afterward identified with Athēnē. Her brother Mēr (Mithra) had the sun as his symbol in the sky and the sacred fire on earth, both being objects of worship. In his temples a sacred fire was rekindled once a year. Aramazd's messenger and scribe was Tiur or Tir, who enter men's deeds in the "Book of Life." He led men after death to Aramazd for judgment. Before birth he wrote men's fates on the heavens. The punishment of punishment was Dzhok'k' (Pers Dūzāḵ). To the sun and moon sacrifices were offered on the mountain-tops. Rivers and sacred springs and other natural objects were also adored. Prayer was offered facing eastward. Omens were taken from the rustling of the leaves of the sacred Sūnēan forest. Aramazd was the religious capital.

Among inferior spiritual existences were the Ar'lek'h, who licked the wounds of those slain in battle and restored them to life. The Parikk' were evidently the "nuns" of the pagans of Persia. The Armenian mythology told of huge dragons which sometimes appeared as men, sometimes as worms, or basilisks, elves, sea-bulls, dragon-lions, etc. As in Persia, the demons made darts out of the parings of a man's nails to injure him with. Therefore these parings, together with teeth and trimmings of hair, must be hidden in some sacred place.

LITERATURE
1. Ancient Armenian.—Armenia was in large measure Christianized by Gregory I. (the Illuminator); consecrated 302 AD;
2. Circum- died 332, but, as Armenian had stances not been reduced to writing, the Scrip- tures were used to be read in some places in Gr, in others in Syr. and tr orally to the people. A knowledge of these tongues and the training of teachers were kept up by the schools which Gregory and King Tigrates had established at the capital Vagharshapat and elsewhere. As far as there was any Christianity in Armenia before Gregory's time, it had been almost exclusively under Syrian influence, from Edessa and Samosatea. Gregory introduced Gr influence and culture, though maintaining bonds of union with Syria also. When King Sapor II. of Persia became a heathen, he offered one of the sacred images to Tigranes, who was then the governor of Armenia (378 AD), he not only persecuted the Christians most cruelly, but also, for political reasons, endeavored to prevent Armenia from all contact with the Byzantine world. Hence his viceroy, the renegade Armenian men (Cassius), chose the schools, proscribed Gr learning, and burnt all Gr books, especially the Scriptures. Syr books were spared, just as in Persia itself; but in many cases the clergy were unable to interpret them to their people. Perse- cution had not crushed out Christianity. There was danger lest it should perish through want of the Word of God. Hence several attempts were made to translate the Bible into Armenian. It is said that Chryseostom, during his exile at Cucusus (404-7 AD), invented an Armenian alphabet and tr the Psalter, but this is doubtful. But when Arcadius ceded almost all Armenia to Sapor about 396 AD, something had to be done. Hence in 397 the celebrated Mesrop Mashtots and Isaac (Sahak) the Catholicos resolved to translate the Bible. Mesrop had been a court secretary, and as such was well acquainted with Pahlavī, Syr and Gr, in which three languages the royal edicts were then published. Isaac had been born at Constantinople and educated there and at Caesarea. Hence he too was a good Gr scholar, besides being versed in Syr and Pahlavī, which latter was then the court language in Ar- menia. But none of these three alphabets was
Armenian VSS

THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

suited to express the sounds of the Armenian tongue, and hence an alphabet had to be devised for it.

A council of the nobility, bishops and leading clergy was held in Vagharshapout at 402, with Vramshapout being present, and this council requested Isaac to translate the Scriptures into the vernacular.

By 406, Mesrop had succeeded in inventing and alphabet practically the one still in use—principally by modifying the Gr and the Pahlav characters, though some think the Palmyrene alphabet had influence. He and two of his pupils at Samosata began by translating the Book of Prov; and then the NT, from the Gr. Mesrop, being unable to find a single Gr MS in the country, Issac translated the church lessons from the Pesh Syr, and published this VS in 411. He sent two of his pupils to Constantinople for copies of the Gr Bible. These men were present at the Council of Ephesus, 431 AD. Probably from these reports (De Ora Graec. Affect., I, 5) learned from them what he says about the existence of the Bible in Armenian. Isaac's messengers brought him copies of the Gr Bible from the Imperial Library at Constantinople—such copies prepared by Eusebius at Constantine's command. Mesrop Mashots and Isaac, with their assistants, finished and published the Armenian (ancient) VS of the whole Bible in 436. Lk, Coro is justified in styling it the first VS. Unfortunately the OT was rendered (as we have said) from the LXX, not from the Heb. But the Apoc was not in a, only "the 22 Books" of the OT, as Moses of Chorene informs us. This was due to the influence of the Pesh OT.

(a) Apocrypha omitted. Not until the 8th cent. was the Apoc rendered into Armenian: it was not read in Armenian churches until the 12th. Theodotion's VS of Dni was in a, instead of the very inaccurate LXX. The Alexandrine text was generally followed but not always.

In the 6th cent. the Armenian VS is said to have been revised so as to agree with the Pesh. Hence probably in Mt 28 18 AV, the 3. Revision passage, "As my Father hath sent me, even so send I you," is inserted in the Pesh, though it occurs also in its proper place (Jn 20 21). It reads "Jesus Barabba is in Mt 27 16-17—a reading which Origen found "in very ancient MSS." It contains Lk 22 43-44. As is well known, in the Etchmiadzin MS of 986 AD, and in AO 2130, are inserted the words, "It was said by the presbyter Ariston the presbyter"; but Nestle (Text. Criticism of the Gr NT, Plate IX, etc.) and others omit to notice that these words are by a different and a later hand, and are merely an unauthorized remark of no great value.

Mesrop's VS was soon widely circulated and became the one great national book. Lazarus Pharpetsi, a contemporary Armenian historian, says he is justified in describing the spiritual results by quoting Isaac and saying that the whole land of Armenia was thereby "filled with the knowledge of the Lord as the waters cover the sea." But for it, both church and nation would have perished in the terrible persecutions which have led to wars, with intervals, for more than a millennium and a half.

This VS was first printed somewhat late: the Psalter at Rome in 1565, the Bible by Bishop Oosan at Erivan at Amsterdam in 1666, from a very defective MS; other editions are dated 1705, Venice, 1713, in 1733. Dr. Zohrab's ed. of the NT in 1789 was far better. A critical ed. was printed at Venice in 1805, another at Serampore in 1817.

The OT (with the readings of the Heb text at the foot of the page) appeared at Constantinople in 1892 ff.

II. Modern Armenian Versions.—There are two great literary dialects of modern Armenian, in which it was necessary to publish the Bible, since the ancient Armenian (called Grapar, or 'written') is no longer generally understood. The American missionaries took the lead in translating Holy Scripture into both.

The first VS of the NT into Ararat Armenian, by Dittrich, was published by the British and Foreign Bible Society at Moscow in 1835; the Psalter in 1844; the rest of the OT much later. There is an excellent ed., published at Constantinople in 1896.

A VS of the NT into Constantinopolitan Armenian, by Dr. Zohrab, was published at Paris in 1825 by the British and Foreign Bible Society. An ed. made by Armenian Adger, appeared at Smyrna in 1842.

In 1846 the American missionaries there published a VS of the OT. The American Bible Society have since published revised ed. of this version.

III. Armenian Language.—The Armenian language is now recognized by philologists to be not a dialect or subdivision of ancient Persian or Iranian, but a distinct branch of the Aryan family, standing almost midway between the Iranian and the European groups. In some respects, especially in weakening and ultimately dropping t and d between vowels, it resembles the Keltic tongues (of Gaelic A(th)air, Arm, pair = Peter, in Latin, Hauck, Realencyclopedia fur protest. Theol. und Kirche).

W. ST. CLAIR TISDA LL

ARMHOLE, arm'hål: The Heb word בזס, 'açtel, is used in Jer 38 12 in the sense of armhole. When the prop was pulled up out of the pit by ropes, the armuits were protected with rags and old garments. The meaning in Ezk 13 18 AV (RV "elbows, RVn "joints of the hands") is clear from context. The phrase is used, without doubt, of some ornament or article of dress worn by the false prophetsesses and priestesses of Ashtaroth in order to allure the unwary and tempt the simple.

The "pillows" were probably "amulet" supposed to have magical virtues, and worn on the arms or wrists.

W. W. DAVIES

ARMLET, arm'let: The word tr-^ "bracelet" in 2 S 1 10 AV, probably denotes an "armlet," or "arm-band," worn on the upper arm.

But it is the same word in which a different meaning is rendered "ankle-chains" (in Nu 31 50 RV). The "bracelet" of Sir 21 21 AV, worn upon the right arm, was an "armlet," as is seen from the list given of Judith's ornaments, who "decked herself bravely with her armlets [RV 'chains'] and her bracelets, and her rings, and her ear-rings, and all her ornaments" (Jth 10 4). The nature of the ornaments given in RV as "armlets," Ex 35 22; Nu 31 50, and in the AV as "tablets," is uncertain. For full and distinguishing descriptions of armlets, "anklets," "bracelets," etc., found in ancient graves, see PEFS, 1905, 318 ff. See also Oraments.

Geo. B. EAGER
ARMONI, ar-mō'ni (אֶרְמֹנִי, 'armōnī, "belonging to the palace"): One of the two sons of Saul by Riciph, the daughter of Aiah (2 S 21 8). David delivered them over to the blood vengeance of the Gibeonites.

ARMOR, ARMS, ār-mər, ār-mz. 1. Armor in General—OT
2. In the NT; Polybius
3. Offensive Weapons
4. Defensive Weapons
5. Girdle

I. Armor in General—OT. Under this head it may be convenient to notice the weapons of attack and defence in use among the Hebrews, mentioned in Scripture. There are no such descriptions given by the sacred writers as are to be found in Homer, who sets forth in detail the various pieces of armor worn by an Achilles or a Patroclus, and the order of putting them on. There is an account of the armor offensive and defensive of the Phil Goliath (1 S 17 5-7); and from a much later time we read of shields and spears and helmets and habergeons, or coats of mail, and bows and slings with which Uzziah provided his soldiers (2 Ch 26 14). In Jeremiah's ode of triumph over the defeat of Pharaoh-necho, there is mention of the arms of the Egyptians: "Prepare ye the buckler and shield, and draw near to battle. Harness the horses, and get up, ye horsemen, and stand forth with your helmets; furnish the spears, put on the coats of mail" (Jer 46 3.4). Of the arms of Assyrian, Chaldean, Egyptian and Hittite soldiery there have come down to us sculptured representations from their ancient monuments, which throw light upon the battle-pieces of the Hebrews and prophets.

Heavy-armed Greek Soldier.

Group of Ancient Arms.

II. In the NT; Polybius. In the NT, St. Paul describes the panoply of the Christian soldier, naming the essential pieces of the Roman soldier's armor—the girdle, the breastplate, the footgear, the shield, the helmet, the sword—although it is to be noticed that his most characteristic weapon, the πιάτον or spear, is omitted (Eph 6 10-17). In a similar context the same apostle speaks of "the armor of light" (Rom 13 12), "of righteousness on the right hand and on the left" (2 Cor 6 7). Of the equipment of the Roman soldier in detail, the most useful illustration is the account given by Polybius (vi.23): "The Roman panoply consists in the first place of a shield [θυρεός]. . . . Along with the shield is a sword [μαχαιρά]. . . . Next come two javelins [θραύσεις] and a helmet [περικεπαλαῖος], and a greave [κνέμια]. . . . Now the majority, when they have further put on a bronze plate, measuring a span every way, which they wear on their breasts and call a heart-guard [καρδιοφυλακή], are completely armed, but those citizens who are assessed at more than 10,000 drachmai wear instead, together with the other arms, cuisses made of chain mail [χαλκούδιτοι θήραμα]."

III. Offensive Weapons. The commonest weapon in the hands of the shepherd youth of Palestine today is the rod (σκῆπτρον; ἕβατος, ἱδράδος), a stick loaded at one end, which he may carry in his hand, or wears attached to his wrist by a loop of string, ready for use. It is of considerable weight and is a formidable weapon whether used in self-defence or in attacking a foe. With such a weapon David may well have overwhelmed the lion and the bear that invaded the fold. This shepherd's rod, while used for guidance, or comfort, or for numbering the flock (Ps 23 4; Lev 27 32), was also a weapon with which to strike and punish (Ps 2 9; Isa 10 9,15). In this sense it has for a synonym ματτῆς ( Isa 9 4; Ezek 7 11), and both came to have the derived meaning of spearheads (σκῆβης, 2 S 18 14; ματτῆς, 1 S 14 27). They may have been the original of the maul or hammer (ὁμόρρις, Prov 25 18; Jer 61 20, where Cyrus, as God's battle-axe, is to shatter Babylon and its inhabitants for the wrongs they have done to His people Israel).

Scarcely less common and equally homely is the string (κελά; θραύσμα, σφενόδοχος) (1 S 17 40). It consists of plaited thongs, or of one strip of leather, made broad at the middle to form a hollow or pocket for the stone or other contents, the ends being held firmly in the hand as it is whirled loaded round the
head, and one of them being at length let go, so that the stone may take its flight. It is used by the shepherd still to turn the straying sheep, and it can also be used with deadly effect as a weapon of war. The slingers (ba-balla‘ām, 2 K 3 25) belonged to the light infantry, like the archers. The Benjamites were specially skilled in the use of the sling, which they could use as well with their left hand as the right (Jgs 20 16). The sling was a weapon in use in the armies of Egypt and Babylonia, and Jeremiah in a powerful figure makes the Lord say to Jerusalem in a time of impending calamity: “Behold, I will sling out the inhabitants of the land at this time” (Jer 10 18; cf 1 S 25 29).

A very important offensive weapon in the wars of Israel was the bow (kešeth) and arrows (hīṣēm), and the archers whether mounted or on foot formed a powerful element of the fighting forces of the Philis, Egyptians and Assyrians (s.v. Archer; Bow and Arrows).

The spear has various words to represent it.

1. The šēnēth had a wooden staff or shaft of varying size and length with a head, or blade, of bronze, or, at a later time, of iron (1 S 17 7). In AV it is sometimes tr. “javelin,” but in RV “spear” (see 1 S 13 22; 18 11). Saul’s spear, stuck in the ground, betokened the abode of the king for the time, just as today the spear in front of his tent marks the halting-place of the Bedouin Sheikh (1 S 22 6; 26 7). Nahum, describing the arms of the Assyrians, joins together the flashing sword and the glinting spear (Nah 3 3). The bearers of the šēnēth belonged to the heavy-armed troops.

2. The rōmah, also tr. in AV “javelin,” was of the character of a lance. It does not appear to have differed much from the šēnēth—they appear as synonyms in Joel 3 10, where rōmah is used, and in Isa 2 4 where šēnēth is used, of spears beaten into pruning hooks. It describes the Egyptian spear in Jer 46 4. vi.39, 3; Job 41 29; Jer 6 23). (4) In the NT the word “spear” occurs only once and is represented by the Gr ἄντελμα, the equivalent no doubt of ḫānum as above (Jn 19 34).

3. Bow and Arrows.

4. Spear—

The bearers of the rōmah also belonged to the heavy-armed troops. (3) The kōthōn was lighter than either of the preceding and more of the nature of a javelin (gatson in LXX, Josh 8 18 and Polybius Battle-Axes and Spears.

The sword (hereb) is by far the most frequently mentioned weapon in Scripture, whether offensive or defensive. The blade was of iron.

5. Sword (1 S 13 19; Joel 3 10). It was hung from the girdle on the left side, and was used both to cut and to thrust. Ehud’s sword (Jgs 3 16) was double-edged and a cubit in length, and, as he was left-handed, was worn on his right thigh under his clothes. The sword was kept in a sheath (1 S 17 51); to draw the sword was the signal for war (Ezk 21 3). Soldiers are “men who draw the sword.” It is the flashing sword (Nah 3 3); the oppressing sword (Jer 46 16); the devouring sword (2 S 13 8; Jer 12 12); the sword which drinks its fill of blood (Isa 34 5, 6). The sword of the Lord executes God’s judgments (Jer 47 6; Ezek 21 9, 10 ff).

Figurative: In the highly metaphorical language of the prophets it stands for war and its attendant calamities (Jer 50 55–57; Ezek 21 28).

In the NT ma–chaires is employed for sword in its natural meaning (Mt 26 47, 51; Acts 12 2; Heb 11 34, 37). St. Paul calls the Word of God the sword of the Spirit (Eph 6 17); and in the Epistle to the Hebrews he speaks of the sword as sharper than any two-edged sword (He 4 12). As a synonym the word romphaios is used in the Apoc alone of the NT books, save for Lk 2 35. It was the Thracian sword with large blade, and is classed by the ancients rather as a spear. The word is used frequently in the LXX like machaira to translate hereb. In Rev 1 16 the sharp two-edged sword of judgment, romphaios is seen in vision proceeding out of the mouth of the glorified Lord (cf Rev 19 15). Xiphos is still another word for sword, but it is found only in the LXX, and not in the NT.

IV. Defensive Weapons.—The most ancient and universal weapon of defence is the shield. The two chief varieties are (1) the ginnēth, the large shield, worn by heavy-armed infantry, adapted to the form of the human body, being made oval or in the shape of a door; hence its Gr name, thurass, from thura, a door; and (2) the māghēn, Lat clipeus, the light, round hand-buckler, to which Egyptian Swords.
The gímnáh was the shield of the heavy-armed (1 Ch 12:24); and of Goliath we read that his shield was borne by a man who went before him (1 S 17:7). The maghén could be borne by bowmen, for we read of men of Benjamin in Asa’s army that bare shields and drew bows (2 Ch 14:8). The ordinary material of which shields were made was wood, or wicker-work overlaid with leather. The wood-work of the shields and other weapons of Gog’s army were to serve Israel for fuel for seven years (Ezk 39:9). The anointing of the shield (2 S 1:21; Isa 21:5) was either to protect it from the weather, or, more probably, was part of the consecration of the warrior and his weapons for the campaign. Solomon in his pride of wealth had 200 shields (gímnáh) of beaten gold, and 300 targets (maghénim) of beaten gold made for himself, and hung in the house of the forest of Lebanon (1 K 10:17). They were only for show, and when Shishak of Egypt came up against Rehoboam and carried them off, Rehoboam replaced them with others of bronze (1 K 14:27). On the march, the shield was strapped over the shoulder and kept in a cover, which was removed before the battle (Isa 22:6). Both words are used of the mechanical device known to the Romans as the festulo employed by the besiegers of a city against the darts and stones and blazing torches thrown out by the besieged (Isa 37:33; Ezk 26:8).

Figurative: Jch is spoken of as the shield and protector of His people—of Abraham (Gen 15:1); of Israel (De 33:29); of the Psalmist (Ps 10:30; 35:2; and many other passages). In his description of the panoply of the Christian soldier, St. Paul introduces faith as the thurēos, the large Gr-Rom shield, a defence by which he may quench all the fiery darts of the evil one.

The helmet, ḫibba‘ or ḫibba‘, seems to have been originally in the form of a skull-cap, and it is thus figured in representations of Hittites. 2. Helmet on the walls of Karnak in Egypt. In the earliest times it is found worn only by outstanding personages like kings and commanders. When King Saul armed David with his own armor he put a helmet of brass upon his head (1 S 17:38). Uzziah at a later time provided his soldiers with helmets, as part of their equipment (2 Ch 26:14). The men of Pharos-neko’s army also wore helmets (Jer 46:4), and the mercenaries in the armies of Tyre had both shield and helmet to hang up within her (Ezk 27:10). The materials of the helmet were at first, of wood, linen, felt, or of even of rush; leather was in use until the Seleucid period when it was supplanted by bronze (1 Mac 6:35); the Gr and Rom helmets both of leather and brass were well known in the Herodian period.

Figurative: St. Paul has the helmet, periskephalatā, for his Christian soldier (Eph 6:17; 1 Thess 5:8). In the LXX periskephalatā occurs eleven times as the equivalent of the Heb term.

Body armor for the protection of the person in battle is mentioned in the OT and is well known in representations of Egypt, Pers and Parthian warriors. The shīṟiḡōn, Gr “habergeon” in AV, rendered in RV “coat of mail,” is part of the armor of Nehemiah’s workers (Neh 4:16), and one of the
pieces of armor supplied by King Uzziah to his soldiers (2 Ch 26:14). Goliath was armed with a shir'yon, and when Saul clad David in his own armor to meet the Philistine he put on him a coat of mail, his shir'yon (1 S 17:5-58). Such a piece of body armor Ahab wore in the fatal battle of Ramoth-gilead (1 K 22:34). In the battle of Beth-sura in the Maccabean struggle the Syrian war-elephants were protected with breastplates, the word for which, thōrax and peri-kephalaia are the Gr words of the LXX to render shir'yon and kōthō. It is from this passage (Isa. 69:17) that St. Paul obtains his "breastplate of righteousness" (EpH 6:14).

Greaves and Sandals.

Greaves (migchāh; kva'ādeth, kōnā.DAL) are mentioned once in Scripture as part of the armor of Goliath (1 S 17:6). They were of brass or leather, fastened by thongs round the leg and above the ankles.

The girdle (ḥagōrāhāh; Gr. zōōδ) was of leather studded with nails, and was used for supporting the sword (1 S 18:2; 2 S 20:8). See GIRDLE.

Figurative: For fig. uses see under the separate weapons.

T. NICOL

ARMOR-BEARER, ʿārər-mēr-bār-ēr (ʾēṯ ñwûh, nōṣē kēl); Gr uses a phrase, ἐφικοῦσαν τὰ σκειρία, ἢν ἀνέφθεν τὰ σκειρία, lit. "the one carrying the armor": One who carried the large shield and perhaps other weapons for a king (1 S 31:4), commander-in-chief (2 S 23:37), captain (1 S 14:7) or champion (1 S 17:7). All warriors of distinction had such an attendant. Rather than perish by the hand of a woman, Abimelech called upon his armor-bearer to give him the finishing stroke (Jgs 9:54), and when King Saul's armor-bearer refused to do this office for him that he might not become the prisoner of the Philistines, he took a sword himself and fell upon it (1 S 31:4). David became Saul's armor-bearer for a time, and

Jonathan's armor-bearer was a man of resource and courage (1 S 14:7). The shield-bearer was a figure well known in the chariots of Egypt and Assyria and the Hittites, his business being to protect his fighting companion during the engagement. T. NICOL

ARMORY, ʿārər-mēr-i: (1) (ʾēṯ ṯnūx, ʿādar; ṭbaṣṣawwīs, ṭkasrābō); A storehouse (1 K 7:51; Neh 10:38); but employed also in the stored-up anger of Jeh which breaks forth in judgments (Jer 60:25). (2) (ʾūḏīl, ʿānāk); Identical with Solomon's "house of the forest of Lebanon," the arsenal close to the temple (1 K 10:17; Neh 3:19; Isa 22:5), in which were stored the shields and targets of beaten gold. (3) (ʾēṯ ṭāḥtāw, ṭulḥtāḥ); A puzzling word rendered "armory" in our VSS (Cant 4:4)—"the tower of David bulilded for an armory, whereon there hang a thousand bucklers, all shields of mighty men." RVm renders "built with turrets." T. NICOL

The Israelites were not a distinctively warlike people and their glory has been won on other fields than those of war. But Canaan, between the Mediterranean and the desert, was the highway of the East and the battle-ground of nations. The Israelites were, by the necessity of their geographical position, often involved in wars not of their own seeking, and their bravery and endurance even when worsted in their conflicts won for them the admiration and respect of their conquerors.

The first conflict of armed forces recorded in Holy Scripture is that in Gen 14. The kings of the Jordan valley had rebelled against 1. The First Chedorlaomer, king of Elam—not the Campaign first of the kings of the East to reach out for History the Mediterranean with his armies— and joined battle with him and other kings in the Vale of Siddim. In this campaign Abraham distinguished himself by the rescue of his nephew Lot, who had fallen with all that he possessed into the hands of the Canaanite king. The force with which Abraham effected the defeat of Chedorlaomer and the kings that were with him was his own retainers, 318 in number, whom he had armed and led forth in person in his successful pursuit.

When we first make the acquaintance of the Israelites as a nation, they are a horde of fugitives who have escaped from the bitter oppression and hard bondage of Pharaoh. Although they may not have been but little of the martial spirit in a people so long and grievously oppressed, their journeys through the wilderness toward Canaan are from the first described as the marching of a great host. It was according to their "arms" (hosts) RV that Aaron and Moses were to bring the Children of Israel from the land of Egypt (Ex 6:26). When they had entered upon the wilderness they were up "harnessed" ("armed") RV for the journeys that lay before them, and business being bare but to the order and arrangements of a body of troops marching five deep (ḥămūšhēšim) or divided into five army
corps (Ex 13:18). On the way through the wilderness they encamped (Ex 13:20; and passim) at their successive halting-places, and the whole army of Israel was armed, with Slings and stone-throwers, and with Cohort or army corps, each with its own camp and the ensigns of their fathers' houses (Nu 2:2). "From twenty years old and upward, all that are able to go forth to war in Israel," the males of the tribes were numbered and assigned to their place in the camp (Nu 1:3). Naturally, in the wilderness they are footmen (Nu 11:21), and it was not till the period of the monarchy that other arms were added. Bow and sling and spear and sword for attack, and shield and helmet for defense, would well be. It is the full equipment of the men called upon to fight in the desert. Although we hear little of gradations of military rank, we do read of captains of thousands and captains of hundreds in the wilderness (Nu 31:14), and Joshua commands the fighting men in the battle against the Amalekites at Rephidim (Ex 17:9-16). That the Israelites acquired in their journeys in the wilderness the discipline and martial spirit which would make them a warlike people, may be gathered from their successive actions against the Midianites against Og, king of Bashan, toward the close of the forty years, and from the military organization with which they proceeded to the conquest of Canaan.

In more than one campaign the Israelites under Joshua's leadership established themselves in Canaan. But it was largely through the enterprise of the several tribes that the conquest was achieved. The Conquest stubbornly contested, but Joshua encouraged his kinsmen of Ephraim and Manasseh to press the conquest even against the invincible war-chariots of the Canaanites—"for thou shalt drive out the Canaanites, though they have iron chariots, and though they are strong" (Josh 17:18). As it was in the early history of Rome, where the defence of the state was an obligation resting upon every individual according to his state in the public welfare, so it was at first in Israel. Tribal jealousies, however, impaired the sentiment of nationality and hindered united action when once the people had been settled in Canaan. The tribes had to defend their own, and it was only a great commotion about national unity that prevented a general insurrection in the course of a generation. The first notable approach to national unity was seen in the army which Barak assembled to meet the host of Jabin, king of Hazor, under the command of Sisera (Jgs 4:5). In Deborah's war-song in commemoration of the notable victory achieved by Barak and herself, the men of the northern tribes, Zebulun, Naphtali, Issachar, along with warriors of Manasseh, Ephraim and Benjamin, are praised for the valor with which they withstood and routed the host—foot, horse and chariot—of Sisera. Once again the tribes of Israel assembled in force from "Dan even to Beer-sheba, with the land of Gilead" (Jgs 20:1) to punish the tribe of Benjamin for condoning a gross outrage. The single tribe was defeated in the battle that ensued, but they were able to put into the field "20,000 men, who drew sword," and they had also "700 chosen men left-handed; every one could sling stones at a hair's breadth, and not miss" (Jgs 20:15-16).

Up to this time the fighting forces of the Israelites were more of the character of a militia. The men of the tribes more immediately involved in the business of war to which the nation was subjected were called up for no more than temporary service. The early monarchy brought change in military affairs. It was the plea of the leaders of Israel, when they desired to have a king, that he would go out before them and fight their battles (1 Sm 8:20). Samuel had warned them that with a monarchy a professional soldiery would be raised; and he would appoint them unto him, for his chariots, and to be his horsemen; and they shall run before his chariots; and he will appoint them unto him for captains of thousands, and captains of fifties; and he will set some to plow his ground, and reap his harvest, and to make his instruments of war, and the instruments of his chariots" (1 Sm 11:12). That was thus the course which military reform took in the period following the establishment of the monarchy may be gathered from the account of the operations to withstand the invading Philistines (I Sm 13:1-5). The Philistines were a military people, well disciplined and armed, with 30,000 chariots and 6,000 horsemen. When they came upon the Wadi Michmash (1 Sm 13:5). "What chance had raw levies of vine-dressers and herdsmen from Judah and Benjamin against such a foe? No wonder that the Israelites hid themselves in caves and thicket, and on rocks, and in holes, and in pits (1 Sm 13:6). And it is quoted by the historian as the lowest depth of national degradation that the Israelites had to go down to the Philistines "to sharpen every man his share, and his couler, and his axe, and his mattlock" (1 Sm 13:20) because the Philistines had been so accustomed to prevent them from making swords or spears.

It was in this desperate condition that King Saul was called to begin the struggle for freedom and national unity under God. The victories at Michmash and Elah and the hotly contested but unsuccessful and fatal struggle at Gibboa evince the growth of the martial spirit and advance alike in discipline and in strategy. After the relief of Jabesh-gilead, instead of disbanding the whole of his levies, Saul retained 8,000 men under arms, and this in all probability became the nucleus of the standing army of Israel (1 Sm 13:2). From this time onward "when Saul saw any mighty man, or any valiant man, he took him, and put him in his own place" (1 Sm 14:52). Of the valiant men whom Saul kept round his person, the most notable were Jonathan and David. Jonathan had command of one division of 1,000 men at Gibeah (1 Sm 13:2), and David was captain of 600 united in battle (1 Sm 17:35; cf 18:15). When David fell under Saul's jealousy and betook himself to an outlaw life in the mountain fastnesses of Judah, he gathered round him in the cave of Adullam 400 men (1 Sm 22:1) who were long increased to 600 (1 Sm 18:13). From the story of Nabal (1 Sm 25) we learn how a band like that of David could be maintained in service, and we gather that landholders who benefited by the presence of an armed force were expected to provide the necessary supplies. On David's return to the throne this band of warriors remained attached to his person and became the backbone of his army. We can identify them with the gibborim—the mighty men of whom Benjiah at a later time became captain (2 Sm 23:22-29; 1 K 1:5) and who are also known by the name of Cherethites and Peletites (2 Sm 8:18). These may have received their name from their foreign origin, the former, in Heb k'rithh, being originally from Crete but akin to the Philistines; and the latter, in Heb peleth being Philistia by birth. That there were foreign soldiers in David's service we know from the examples of Uriah the Hittite and Ittai of Gath. David's gibborim have been compared to the Praetorian Cohort of the Roman emperors, the Janissaries of the Ottoman Empire, the Swiss Guards of the French kings. Of David's army Joab was the commander-in-chief, and to the military genius of this rough and unscrupulous
warrior, the king's near kinsman, the dynasty of David was deeply indebted.

In the reign of Solomon, although peace was its prevailing characteristic, there can have been no diminution of the armed forces of the kingdom, for we read of military expeditions against Edom and Syria and Hamath, and also of fortresses built in every part of the land, which would require troops to garrison them. Hazor, the old Can capital, at the foot of Lebanon; Megiddo commanding the rich plain of Jezreel; Gezer overlooking the Phili plain; the Bethorhous (Bethhoron) of Judah; and the wilderness of Jericho, not to speak of Jerus with Millo and the fortified wall, were fortresses requiring strong garrisons (1 K 9:15). It is probable that "the levy," which was such a burden upon the people at large, included forced military service as well as forced labor, and helped to create the dissatisfaction which culminated in the revolt of Jeroboam, and eventually in the disruption of the kingdom. Although David had reserved from the spoils of war in his victorious campaign against Hadadezer, king of Zobah, horses for 100 chariots (2 S 8:4), cavalry and chariots were not an effective branch of the service in his reign. Solomon, however, disregarding the scruples of the stricter Israelites, and the command of God (Dt 17:16), added horses and chariots on a large scale to the military equipment of the nation (1 K 10:26-29). It is believed that it was from Muṣri, a country of northern Syria occupied by the Hittites, that higher quality horses were acquired (1 K 10:28; 2 Ch 1:16, where the best text gives Muṣrī, and not the Heb word for Egypt). This branch of the service was not only looked upon with distrust by the stricter Israelites, but was expressly denounced in later times by the prophets (Isa 2:7; Hos 1:7; Mic 5:10). In the prophets, too, more than in the historical books, we are made acquainted with the cavalry and charioteers of Assyr and Babylon which in the days of Sargon, Sennacherib, and Nebuchadnezzar had become so formidable. Their lancers and mounted archers, together with their chariots, gave them a sure ascendancy in the field of war (Nah 3:2-3; Hab 1:8; Jer 46:4). In comparison with these, the cavalry of Solomon obtained for his 1,000 chariots and cavalry and chariots (1 K 10:29; 2 Ch 1:16, where the best text gives Muṣrī, and not the Hebrew word for Egypt). This branch of the service was not only looked upon with distrust by the stricter Israelites, but was expressly denounced in later times by the prophets (Isa 2:7; Hos 1:7; Mic 5:10).

As we have seen, every male in Israel at the age of twenty, according to the ancient law, became liable for military service (Nu 1:3; 26:2; 2 Ch 25:5), just as at a later time every male of that age became liable for the half-shekel of Temple dues.

6. Organization of the Hebrew army

Jos is our authority for believing that no one was called upon to serve after the age of fifty (Ant, III, xii, 4). From military service the Levites were exempt (Nu 2:38). In Deuteronomical law exemption was allowed to persons betrothed but not married, to persons who had built a house but had not dedicated it, or who had planted a vineyard but had not eaten of the fruit of it, and to persons faint-hearted and fearful whose timidity might spread throughout the ranks (Dt 20:1-9). These exemptions no doubt reach back to a high antiquity and in the Maccabean period they still held good (1 Macc 3:40). The exemption was different to bodies of armed men in Maccabean times, 10, each under its own captain (Sor) (Nu 31:14; 1 S 8:12; 2 K 1:9; 2 Ch 25:5; 1 Macc 3:55). In the army of Uzziah we read of "heads of fathers' houses," mighty men of valor who numbered 2,000 and had under their hand a trained army of 397,500 men (2 Ch 26:12). There, however, the figures have an appearance of exaggeration.

Over the whole host of Israel, according to the fundamental principle of the theocracy, was Jeho himself, the Supreme Leader of his armies (1 S 7:1); it was "the Captain of the Lord's host," to whom Joshua and all serving under him owned allegiance, that appeared before the walls of Jericho to help the gallant leader in his enterprise. In the times of the Judges the chiefs themselves, Barak, Abinoam, and Oziel, led their men into battle. Under the monarchy the captain of the host was an office distinct from that of the king, and we have Joab, Abner, Benalish, named as commanders-in-chief. An arm-bearer attended the captain of the host as well as the king (1 S 14:6; 31:4-5; 2 S 23:37). Mention is made of officers who had to do the numbering of the people, the scribe, attached to the captain of the host (2 K 18:19; 2 S 24:5; 1 Macc 4:42), and the , master-mester, who kept the register of those who were in military service and knew the men who had received authorized leave of absence (Dt 20:5, Driver's n.).

Before the army set forth, religious services were held (Deut 9:9), and sacrifices were offered at the opening of a campaign to consecrate 7. The war (Mie 3:5; Jer 6:4; 23:7).

Army in the field was had in earlier times to the oracle (Jgs 1:1; 20:27; 1 S 14:34; 21:5; 23:10; 1 K 15:6; 1 Sm 15:18). Cases were to a prophet (1 K 22:5; 2 K 3:13; 19:2; Jer 38:14). Cases are mentioned in which the Ark accompanied the army to the field (1 S 4:4; 14:18), and before the engagement sacrifices also were offered (1 S 7:9; 13:9), ordinarily neces-

sary at the presence of a priest (Dt 20:2). Coun-

sellors of war were held to settle questions of policy in the course of siege or a campaign (Jer 38:7; 39:3). The signal for the charge or retreat was given by sound of a trumpet (Nu 10:9; 2 S 28:16; 1 Macc 16:8). The order of battle was simple, the heavy-armed spearmen forming the van, slingers and archers bringing up the rear, supported by horses and chariots, which moved to the front as needed (1 Esd 6:24; 1 Sm 17:49; 1 K 14:9). Strategy was called into play according to the disposition of the opposing forces or the nature of the ground (Josh 6:3; 11:7; Jgs 7:16; 1 S 15:5; 2 S 5:23; 1 K 11:17).

Although David had in his service foreign soldiers like Uriah the Hittite and Ittai of Gath, and although later kings hired aliens for their campaigns, it was not till the Maccabean struggle for independence that mercenaries came to be largely employed in the Jewish army. Mercenaries are spoken of in the prophetic as a source of weakness to the nation that employs them (to Egypt, Jer 46:16; to Babylon, Jer 50:16). From the Maccabean time onward the princes of the Has-

monaean family employed them, sometimes to hold the troublesome Jews in check, and sometimes to support the arms of Rome. Herod the Great had in his army mercenaries of various nations. When Jewish soldiers, however, took service with Rome, they were prohibited by their law from performing duty on the Sabbath. Early in the Maccabean fight for freedom, a band of Hasideans or Jewish Puritans, allowed themselves to be cut down to the last man rather than take up the sword on the Sabbath (1 Macc 2:44). Cases are even on record when their gentle adversaries took advantage of their scruples to inflict upon them loss and defeat (Ant, XIII, xii, 4; XIV, iv, 2).
The forces which composed the Roman army under the Empire may be divided into the following five groups: (1) the imperial guard, (2) the legions, (3) the auxilia, (4) the numeri, (5) the fleet. We shall discuss their organization in the order mentioned.

The imperial guard consisted of the cohors praetoriae, which together with the cohors urbsae and vigiles made up the garrison of Rome. In the military system as established by Augustus there were nine cohorts of the praetorian guard, the auxilia urbanae, and the vigiles. Each cohort numbered 1,000 men, and was commanded by a tribune of equestrian rank. The praetorian prefects (praefecti praetorio), of whom there were usually two, were commanders of the entire garrison of the capital, and stood at the highest point of distinction and authority in the equestrian order.

There were 25 legions in 23 AD (Tacitus Annals 4, 5), which had been increased to 30 at the time of the emperor Marcus Aurelius, 160-180 AD (Dio Cassius, iv. 23-24).

The legatus Augustus pro praetore, or governor of each imperial province, was chief commander of all the troops within the province. An officer of senatorial rank known as legatus Augusti pro praetore was intrusted with the command of each legio, together with the bodies of auxilia which were associated with it. Besides, there were six tribuni militum, officers of equestrian rank (usually sons of senators who had not yet held the quaestorship) in each legion. The centurions who commanded the centuries belonged to the plebeian class. Between the rank of common soldier and centurion there were a large number of subalterns, called principes, who correspond roughly to the non-commissioned officers and men detailed from the ranks for special duties in modern armies.

The auxilia were organized as infantry in cohors, as cavalry in alae, or as mixed bodies, cohortes equitatae. Some of these divisions contained approximately 1,000 men or "Auxilia" alae milliariae, but the greater number about 500 (cohors or alae quingenariae). They were commanded by tribuni and praefecti of equestrian rank. The important auxilia consisted originally in the diversity of their equipment and manner of fighting, since each group adhered to the customs of the nation in whose midst it had been recruited. But with the gradual Romanization of the Empire they were assimilated more and more to the character of the legions.

The numeri developed out of the provincial militia and began to appear in the 2d cent. AD. They maintained their local manner of warfare. Some of the bodies of manunfray, others of cavalry, and they varied in strength from 300 to 90 (Mommsen, Hermes, XIX, 219 f., and XXII, 547 f.). Their commanders were praesidis, praefecti or tribuni, all men of equestrian rank.

The fleet was under the command of prefects (praefecti classis), who took rank among the highest officials of the equestrian class. The principal naval stations were at Misenum and Ravenna. Augustus established the northern boundary of the Empire at the Rhine and at the Danube, throughout the greater part of its course, and bequeathed to his successors the advice that

**1. The Imperial Guard**

- The forces which composed the Roman army under the Empire may be divided into the following five groups: (1) the imperial guard, (2) the legions, (3) the auxilia, (4) the numeri, (5) the fleet. We shall discuss their organization in the order mentioned.

**2. The Legions**

There were 25 legions in 23 AD (Tacitus Annals 4, 5), which had been increased to 30 at the time of the emperor Marcus Aurelius, 160-180 AD (Dio Cassius, iv. 23-24).

**3. The Auxilia**

The legates Augusti pro praetore, or governor of each imperial province, was chief commander of all the troops within the province. An officer of senatorial rank known as legatus Augusti pro praetore was intrusted with the command of each legio, together with the bodies of auxilia which were associated with it. Besides, there were six tribuni militum, officers of equestrian rank (usually sons of senators who had not yet held the quaestorship) in each legion. The centurions who commanded the centuries belonged to the plebeian class. Between the rank of common soldier and centurion there were a large number of subalterns, called principes, who correspond roughly to the non-commissioned officers and men detailed from the ranks for special duties in modern armies.

The auxilia were organized as infantry in cohors, as cavalry in alae, or as mixed bodies, cohortes equitatae. Some of these divisions contained approximately 1,000 men or "Auxilia" alae milliariae, but the greater number about 500 (cohors or alae quingenariae). They were commanded by tribuni and praefecti of equestrian rank. The important auxilia consisted originally in the diversity of their equipment and manner of fighting, since each group adhered to the customs of the nation in whose midst it had been recruited. But with the gradual Romanization of the Empire they were assimilated more and more to the character of the legions.

The numeri developed out of the provincial militia and began to appear in the 2d cent. AD. They maintained their local manner of warfare. Some of the bodies of manunfray, others of cavalry, and they varied in strength from 300 to 90 (Mommsen, Hermes, XIX, 219 f., and XXII, 547 f.). Their commanders were praesidis, praefecti or tribuni, all men of equestrian rank.

The fleet was under the command of prefects (praefecti classis), who took rank among the highest officials of the equestrian class. The principal naval stations were at Misenum and Ravenna. Augustus established the northern boundary of the Empire at the Rhine and at the Danube, throughout the greater part of its course, and bequeathed to his successors the advice that
they should not extend their sovereignty beyond the limits which he had set (Tacitus Annals 11; Agricola 13) and although this policy was departed from in many instances, such as the annexation of Thrace, yet the military system of the Empire was arranged primarily with the view of providing for the defence of the provinces and not for carrying on aggressive warfare on a large scale. Nearly all the forces, with the exception of the imperial guard, were in the occupied provinces on the border of the Empire, and the essential feature of the disposition of the troops in these provinces was the permanent fortress in which each unit was stationed. The combination of large camp for the legions with a series of smaller forts for the alae, cohorts, and numeri is the characteristic arrangement on all the frontiers. The immediate protection of the frontier was regularly instructed to the auxiliary troops, while the legions were usually stationed some distance to the rear of the actual boundary. Thus the army as a whole was so scattered that it was a difficult undertaking to assemble sufficient forces for carrying out any considerable project of foreign conquest, or even to cope once on a large scale with a serious invasion. The system was generally satisfactory in view of the conditions which prevailed, and secured for the millions of subjects of the Roman Empire the longest period of undisturbed tranquillity known to European history.

6. Defensive Arrangements. Cappadocia, Mauretania, Britain, and Dacia, not to mention the more ephemeral acquisitions of Trajan, yet the military system of the Empire was arranged primarily with the view of providing for the defence of the provinces and not for carrying on aggressive warfare on a large scale. Nearly all the forces, with the exception of the imperial guard, were in the occupied provinces on the border of the Empire, and the essential feature of the disposition of the troops in these provinces was the permanent fortress in which each unit was stationed. The combination of large camp for the legions with a series of smaller forts for the alae, cohorts, and numeri is the characteristic arrangement on all the frontiers. The immediate protection of the frontier was regularly instructed to the auxiliary troops, while the legions were usually stationed some distance to the rear of the actual boundary. Thus the army as a whole was so scattered that it was a difficult undertaking to assemble sufficient forces for carrying out any considerable project of foreign conquest, or even to cope once on a large scale with a serious invasion. The system was generally satisfactory in view of the conditions which prevailed, and secured for the millions of subjects of the Roman Empire the longest period of undisturbed tranquillity known to European history.

7. Recruiting System. (Tacitus Annals 4, 5), the legions were usually stationed some distance to the rear of the actual boundary. Thus the army as a whole was so scattered that it was a difficult undertaking to assemble sufficient forces for carrying out any considerable project of foreign conquest, or even to cope once on a large scale with a serious invasion. The system was generally satisfactory in view of the conditions which prevailed, and secured for the millions of subjects of the Roman Empire the longest period of undisturbed tranquillity known to European history.

Il. Allusions in the NT to the Roman Military Establishment. — Such references relate chiefly to the bodies of troops which were stationed in Judaea. Agrippa I left a military establishment of one ala and one cohort at his death in 44 AD (Jos, Ant, XIX, ix, 2; BJ, III, iv, 2), which had doubled in size. These divisions were composed of local recruits, chiefly Samaritans (Hirschfeld, Verwaltungsbeamte, 355; Mommsen, Hermes, XIX, 217, n. 1).

The Ala I gemina Sebastenorum was stationed at Caesarea (Jos, Ant, XX, 122; BJ, II, xii, 5; CIL, VIII, 9359).

Julius, the centurion to whom Paul and other prisoners were delivered to be escorted to Rome (Acts 27 1), belonged to one of the 1. Augustan five cohorts which was stationed at Band near Caesarea. This Square Sebastenorum (WH), "Augustus' Band" (RV "Augustan band"; RVm "cohort"), was probably the same body of troops referred to in the Latin inscriptions as Cohors I Augusta (CIL, Supp, 6667) and Square Avgostae (Lebas-Waddington 2112). Its official title may have been Cohors Augusta Sebastenorum (GYV). It will be observed that all divisions of the Rom army were divided into companies of about 100 men, each of which, in the infantry, was commanded by a centurion, in the cavalry, by a decurion.

There was another cohort in Caesarea, the "Italian band" (Cohors Italic, Vulg) of which Cornelius was centurion (Acts 10:1). This was possibly the cohors miliariae (Brown, Emscher, Roemische Zeitung, 9487). One of the five cohorts was stationed in Jericho (Mt 27:27; Marquard, Nachrichten der preussischen Museen, 254; Mg 15 39.44.45; Lk 23 47). It was customary for centurions to be intrusted with the execution of capital penalties (Tacitus Ann. i.6; xvi.9; xvi.15; Hist. ii.85).

The AV contains the passage in Acts 28:16: "The centurion delivered the prisoners to the captain of the guard" (stratopedarches), which the RV omits. It has commonly been held that the expression stratopedarches was equivalent to praetorian prefect (praefectus praetorius), and that the employment of the word in the singular was proof that Paul arrived in Rome within the period 51-62 AD when Sex. Afranius Burrus was sole praetorian prefect. Mommsen (Sitzungsberichte der Berliner Akademie [1895], 491-503) believes that the sentence in question embodies an ancient tradition, but that the term stratopedarches could not mean praefectus praetorius, which is never rendered in this way in Gr. He suggests that it stands for princeps castrorum peregrinorum, who was a centurion in command of the frumentarii in Rome. There were detachments of legionary soldiers who took rank as principes. They served as military couriers between the capital and provinces, political spies, and an imperial police. It was probably customary, at least when the tradition under discussion arose, for the frumentarii to take charge of persons who were sent to Rome for trial (Marquard, Roemische Staatsverwaltung, II, 491-94).

Literature. Comprehensive discussions of the Roman military system will be found in Marquard, Nachrichten der preussischen Museen, Roemische Staatsverwaltung, II, 319-612, and in Pauly-Wissowa, Realencyclopaedia, art. "Exercitus"

George H. Allen

ARRA, är'na (Lat Arna): One of the ancestors of Ezra given in 2 Esd 1 2, evidently identical with Zerahiah of Ezr 7 4 and Zaraias of 1 Esd 8 2.

ARAN, är'nan (ארנן, "joyous"): A descendant of David and founder of a family (1 Ch 3 21). The LXX has Orna.

ARNI, är'ni (ארני, Arni), found only in Lk 3 33 RV, following WH). The name of an ancestor of Jesus Christ. But as V. 15 mentions AV, Renan's name of this genealogical list of Mt 1 34 the same person is called Aram (Gr 'Aρᾶμ, Aräm) in both AV and RVm. In Mt RV, however, the form is Ram, which is nearest to the OT name Ram (רָם, "high").
ARNON, ār'non (אַרְוֹנֵן, 'aronnē; Āro'non, Arnon): Is first mentioned in Nu 21.24 as the border between Moab and the Amorites. "The valleys of Arnon" in the next ver undoubtedly indicate the numerous wadis contributary to the main stream. It formed the southern boundary of the land assigned to Reuben (Dt 3.12). The city of Aror stood on the northern edge of the valley (Dt 2.36; Jgs 12.2, etc.). Arnon was claimed by the Amorites as his border, marked the southern limit of their territory when Israel invaded the land (Jgs 11.13). They, however, had already been driven out by the Amorites, and the region north of Arnon was held by Sihon. From the inscription of Mesha on the Moabite Stone we gather that Moab had established herself on the north of the Arnon before the time of Omri. Under Omri and Ahab she was confined to the south of the river. A rebellion under Mesha was put down by Jehoram son of Ahab (2 K 3.19) and the expedition of Hazael against Israel reached the valley of the Arnon (2 K 10.33). But according to Mesha he regained for Moab the lost land; and this agrees with Isa 15, 16, where cities north of Arnon are located in Moab, etc. Heshbon.

The modern name of Arnon is Wady el-Majib, which enters the Dead Sea from the E. about 11 miles N. of el-Lisân. Some 13 miles E. of the Dead Sea two streams, Siéel es-Sâ'deh from the S., and W. En-Kelt from the E., flow westward from their waters, and flow westward in the bottom of an enormous trench. The waters of Wady Welch come in from the N.W. A wide stretch of country thus drains into the valley by means of a great network of smaller wadis—the "valleys of Arnon." The "forests of the Arnon" (Isa 15.2) were doubtless crossed by Mesha's highway which he claims to have built in Arnon; and may be marked by the traces of the old Rom road and bridge immediately to the W. of where, on the northern edge of the Wady, stands 'Ara'ir, the ancient Aror.

W. EWING

AROD, ār'od, ār'od (אֶרְוֹד, ārovôt): The sixth son of Gad (Nu 26.17). His descendants are called Arod or Arodites (Gen 46.18; Nu 26.17).

ARODI, ār'ō-di. See Arod.

ARODITES, ār'ō-dîts. See Arod.

AROER, ār'o'er (אַרְוֹר, ārovēr; Āro'ēr, Arōb): (1) A city of the Amorites which stood on the northern edge of the Arnon (Dt 2.36, etc.). Taken by Israel, it shared the vicissitudes of the country north of the river, and when last named (Jer 48.19) is again in the hands of Moab. It is one of the cities which Mesha claims to have built, i.e. fortified. It was within the territory allotted to Reuben, yet its building (fortification) is attributed to Gad (Nu 32.34). Thus far came the Syrian, Hazael, in his raid upon Israel (2 K 10.33). The Rom road across the valley lay about an hour to the W. of Khirbet 'Arā'ir.

(2) A city in Gilead described as "before Rab-bah," on the boundary between Gad and the Amorites (Josh 13.25). No name resembling this has yet been recovered in the district indicated.

(3) A city in the territory of Judah named only in 1 S 30.28. Probably however in Josh 15.26 we should read 'ārōrā' instead of 'adāh lūdāk, which may be the same city, and may be identical with 'A'rā'ārā, a site with cisterns and some remains of ancient buildings about 14 miles S.E. of Beersheba. W. EWING

AROERITE, ār'o-ēr'ē-t̄, (אַרְוֹרִיִ֑ת, ha-tărōērē): A native of Aroer. The Aroerite was Hotham, father of two of David's heroes (1 Ch 11.44).

AROM, ārōm ('Āro'mā, Arōm): The sons of A. returned to Jerus with Zerubbabel (1 Esd 5.16). Omitted in Ear and Neh. Hashum is found in place of A. in Ezr 2.19.

ARPACHSHAD, ār-pak'shād. See ARPHAXAD.

ARPAD, ār'pad; ARPHAD, ār'fād, (אַרְפָּד, "support"): A city of Syria, captured frequently by the Assyrians, and finally subjugated by Tiglath-pilser III in 740 BC, after a siege of two years. It is now the ruin Tell Erfâd, 13 miles N.W. of Aleppo. Arpad is one of the conquered cities mentioned by Râbshakhe, the officer of Sennacherib, in his boast before Jerus (2 K 18.34; 19.13; Isa 36.19; 37.13; AV Arphad). Ishai places a boast about its capture in the mouth of the Assyrian king (Isa 10.9), and Jeremiah mentions it as "con¬founded" because of evil tidings, in the oracle concerning Damascus (Jer 49.23). On every occasion Arpad is mentioned with Haran.

S. F. HUNTER

ARPHAXAD, ar-fak'sad: (1) AV form (Gen 10.22.24; 11.12.13; 1 Ch 1.17) of RV "ARPACH¬SHAD," which see. See also TABLE OF NATIONS. (2) In Apos (Jh 1) a king of the Medes, who reigned in Ecbatana. He was defeated and slain by Nebu¬chadrezzar.

ARRAY, ā't̄, (1) [יָבָרָה, lăḇōrāh, לַבוֹרָה, 'ārōh; περιβάλλω, periballō, ἐβολμαίον, εὐβολμαίον, hımattimósma. (2) [יָבָרָה, lăḇōrāh, לַбарוֹ, šāḥ]: "Array." Composed of ārāh and rat. "Order" is used in two senses, (1) in contrast to clothing and (2) in reference to the disposition of an army.

(1) Lăḇōrāh is the most common Heb word meaning "to clothe," and is used in allesses but one in the OT for "array" (cf Gen 41.42; Pharaoh "arrayed him [Joseph] in vestures of fine linen"; see also 2 Ch 28.15; Est. 6.9.11; Job 40.10; 2 Ch 5.12). (b) "A'ūth, meaning "to veil," "to cover," is once used. Nebuchadrezzar "shall array himself with the land of the Medes" (Jer 51.12). (c) Periballō, "to throw around," is used 8 times in the NT. It is the word used of Herod's "arraying" Jesus "in gorgeous apparel" (Lk 23.11; the other references are Mt 27.29; Lk 12.27; Rev 7.13; 17.4; 19.8); (d) Endua'mōn, "to order," "to enter," means, therefore, "to be entered into" clothing. Once it is used in reference to Herod (Acts 12.21). (e) Ημιταímων, "clothing," is tr four once "array" = "raiment (from same root)." This is the only occurrence of "array" in this sense (1 Tim 2.9).

(2) (a) A'rāk is the common word in the OT, used in reference to the disposition of an army, and is tr "to put in array," "to set in array," the object being "the battle" or the army. The root meaning is that of orderly arrangement, and the verb is used in other senses than the military, e.g. arranging the table of showbread. In 1 Ch 28.33 RV has "order the battle array" for AV "keep rank," tr of Heb tādār. (b) Shitt, "to set, to place," used once for battle array: "and the horsemen set themselves in array at the gate" (Isa 22.7).

S. F. HUNTER

ARREST, a-rest', AND TRIAL OF JESUS. See JESUS CHRIST, ARREST AND TRIAL OF.

ARRIVE, ā-rīv'. Originally a nautical term (Lit ad ripam) for reaching shore, is used in lit. sense in Lk 8.26, and, fig. for Gr phthádoi, instead of "attain to," RV in Rom 9.31.
ARROGANCY, ar'o-gan-si'. Excessive pride, leading to boastfulness and insolence (1 S 2 3; Prov 8 13; Isa 13 11; Jer 48 29).

ARROW, ar'ø. See ARCHERY; ARMOR.

ARROWS, DIVINATION BY. See AUGURY, IV, 1.

ARROWSNAKE, ar'-ø-snak. In Isa 34 15 the Heb word תֹּנֵח, kippōz, which in AV is rendered "great owl," is in ERV rendered "arrowsnake," and in ARV "dart-snake." Gesenius, who translated the Targum, says that, "so called from the spring with which it propels itself." Others, from the mention of 'make her nest, lay, and hatch,' think some kind of bird is meant. See OWL; SERPENT.

ARSAKES, ār-sà-ka'se, ār' -sa-ka'se ('Arsàkēs, Arsākēs): The common name assumed by all the Parthian kings, is mentioned in 1 Mac 14 1–3, and in 15 22 in connection with the history of Demetrius, one of the Gr, or Seleucid, kings of Syria, and successor to Antiochus Epiphanes, the oppressor of the Jews, who caused the uprising against the Syrian domination under the leadership of the Maccabees. This particular Arsakes was the sixth of the line of independent Parthian rulers who reigned in 250 BC by Arsaces I who revolted from Antiochus Theos, killed the Syrian satraps, and with his successor Tiridates I firmly established the independence of the Parthian kingdom. About 243 BC, Tiridates added Elymais, Artois, and Babylonia, to his dominions; but it was not till the reign of Arsaces VI, whose pre-regnal name was Mithridates, that Parthia through the conquest of Bactria, Media, Persia, Armenia, Elymais and Babylonia, threatened the very existence of the kingdom of the Seleucids and became a dangerous competitor of Rome itself. It was this king who about 141 BC was attacked by Demetrius Nicotor, king of Syria. According to the account preserved in 1 Mac 14 1–3, Arsaces sent one of his captains, who went and smote the host of Demetrius, and took him alive, and brought him to Arsaces, by whom he was put in ward. At first, the captive king was treated with great severity, being carried in triumph from city to city and exhibited to his enemies. Later, however, Arsaces gave him his daughter in marriage and assigned him a residence in Hyrcania. Some time after the death of Arsaces, Demetrius was sent back to Syria by Phraates, the son of Mithridates, and reigned from 123 B.C. to 116 B.C. Arsaces VI is mentioned also in 1 Mac 15 22, as one of the kings whom the Romans forbade to make war on their Jewish allies.

LITERATURE.—See 1 Mac 14 1–3, and 15 22; Ant, XIII, v. 11; XIV, v. 6; Apion, II, 5; Strabo, XI, 515; XV, 702; Justin, XXI, 5; XXXV I, 1; Grotius, V, 4; Rawlinson’s Periplus, in the Story of the Nations, and Die Herrschaft der Parther in Justin’s Geschichte des alten Persien in Oncken’s Allgemeine Geschichte, I, 4.

R. DICK WILSON

ARSARETH, ār'sà-reth. See ARARATH.

ARSIPURITH, ār-sì-pür'-ith (Ἀρσιπούριθ, Ar-sipouritch; AV Asiphurith): 112 of the sons of A, returned to Jerus with Zerubbabel (1 Esd 5 16). They were in Ex 2 21 denounced for mischief, but the number corresponds to those mentioned with Jorah (Exr 2 18) and Hariph (Neh 7 24).

ARTAXERXES, ār-tak-ār' -kēs (Ἀρτάξερξης, Artāxērsēs): The Gr and Lat form of one, and perhaps of two or three kings of Persia mentioned in the OT.

(1) All are agreed that the Artaxerxes at whose court Ezra and Nehemiah were officials was Artaxerxes I, the son of Xerxes, commonly called Longimanus, who reigned from 465 to 424 BC. This Artaxerxes was the third son of Xerxes and was raised to the throne by Artabanus, the murderer of Xerxes. Shortly after his accession, Artaxerxes put his older brother Darius to death; and a little later, Artabanus, who perhaps aimed to make himself king, was killed. Hypsaspis, the second brother, who seems to have been estrap of Bactria at the time of his father’s death, rebelled, and after two battles was deprived of his power and probably of his life. The reign of Artaxerxes was further disturbed by the revolt of Egypt, in 460 BC, and by that of Bithynia about 448 BC. The Egyptians were assisted by the Athenians, and their rebellion, led by Iaratus and Amyrtaeus, was suppressed only after five years of strenuous exertions on the part of the Persians under the command of the great general Megabyzus. After the re-conquest of Egypt, Artaxerxes, fearing that the Athenians would make a permanent subjugation of Cyprus, concluded with them the peace of Callias, by which he retained the island of Cyprus; but agreed to grant freedom to all Gr cities of Asia Minor. Shortly after this Megabyzus led a revolt in Syria and compelled his sovereign to make peace with him on his own terms, and afterward lived and died in high favor with his king. He was succeeded by his son Artaxerxes II, who reigned, more than twenty-five years, at a later time, while satrap of Lydia and Caria, led a rebellion in which he was assisted by the Greeks. It is thought by some that the destruction of Jerus which is lamented by Nehemiah occurred during the rebellion of Syria under Megabyzus. Artaxerxes I died in 424 BC, and was succeeded by his son Xerxes II, and later by two other sons, Sogdianus and Ochus, the last of whom assumed the regnal name of Darius, whom the Greeks surnamed Nothus.

(2) Ewald and others have thought that the Artaxerxes of Ezr 4 7 was the pseudo-Smerdis. The principal objection against this view is that we have no evidence that either the pseudo-Smerdis, or the real Smerdis, was ever called Artaxerxes. The real Smerdis is said to have been called Tanyoxares, or according to others Oroastes. Ewald would change the latter to Orrostases, which closely resembles Artaxerxes, and it must be admitted that many of the Persic kings began with a T. It seems more probable, however, that Artaxerxes I is the king referred to; and there is little doubt that the identification of the Artaxerxes of Ezr 4 7 with the pseudo-Smerdis would never have been thought of, if Ewald’s critical commentary of explaining the reference to him in this place.

(3) The Gr το of the LXX renders τὰ Ἀβασχεριν του Βουκωνου του ἐντολικοῦ Μεγαβυζοῦ, the Abashcherin of the Book of Est by Artaxerxes, and is followed in this rendering by Jos. There is no doubt that by this Artaxerxes Jos meant the first of that name; for in the Antiquités, VI, i, 1 he says that “after the death of Xerxes, the kingdom came to be transferred to his son Cyrus, whom the Greeks called Artaxerxes.” He then proceeds to show how he married a Jewish wife, who was herself of the royal family and who is related to have saved the nation of the Jews. In a long chapter, he then gives his account of the story of Vashti, Esther and Mardochai. In spite of this rendering of the LXX and Jos, there is no doubt that the Heb ḏābashēērēθ is the same as the Gr Xerxes; and there is no evidence that Artaxerxes I was ever called Xerxes by any of his contemporaries. The reason of the confusion of the names by the LXX and Jos will probably remain forever a mystery.

R. DICK WILSON

ARTEMAS, ār'te-mas (Ἀρτῆμας, Artemas): One of the seventy disciples and bishop of Lystra, according to Dorothicus (Bibl. Maxima [Lugd.])
1677], III, 429). He is mentioned in Titus 3:12 as one of the faithful companions of Paul. The name is probably Gœ, a masc. form of Artemis, or, as has been suggested, a short form of Artemidoros, a common name in Asia Minor. These contracted forms were by no means rare in the Gr world. The Athenian orator, Lysias, was doubtless named after his grandfather, Lysanias, and at first may even have been called Lysananias himself.

**ARTEMIS**, är-te-mis. See DIANA.

**ARTIFICER**, är-tîl-i-er. See Crafts.

**ARTILLERY**, är-tîl-lîr (קִ֥שׁ, kalî). In 1 S 20 (AV) of Jonathan's bow and arrows, replaced in RV by WEAPONS; and in 1 Mac 6:51 (AV) where the Gr words are τοις in RV "instruments for casting fire and stones."

**ARTISAN**, är-tî-zan. See Crafts.

**ARTS.** See Crafts.

**ARUBBOTH, ar-ù-both** (אֵרֵבָּה, ārēḇāh; AV Aruboth): One of the 12 districts from which victims for Solomon's household were obtained (1 K 4:10). With Aruboth also mentioned are Sochoh, and all the land of Hepher," and as Sooch lay in the Shephelah (Jos 18:35), Arubboth probably lay in the southern part of the Shephelah.

**ARUMAH, ar-ro'ma** (אֵרְעָם, ārē'ām, "lofty"): The town in which Abimelech, the son of Jerubaal (Gideon), dwelt when driven from Shechem (Jgs 9:41). The ruins El-Ormeh, 6 miles S.E. of Shechem, may be on the site, though its possession has not been known with certainty.

**ARVAD, är-vad, ARVADITES, är-vad-its** (ארוד, Arud; Aradas; mod. Rood): An island city off the coast of Syria some 30 miles N. of Tripolis, and the race inhabiting it. It was a barren rock covered with fortifications and houses several stories in height. The island was about 800 ft. long by 500 wide, surrounded by a massive wall, and an artificial harbor was constructed on the E. toward the main land. It developed into a trading center, as did most of the Phoen cities on this coast. It had a powerful navy, and its ships are mentioned in the monuments of Egypt and Assyria. It seems to have had a sort of hegemony over the northern Phoen cities, from Mt. Cassius to the northern limits of Lebanon, something like that of Sidon in the S. It had its own local dynasty and coinage, and some of the names of its kings have been recovered. Its inhabitants are mentioned in the early lists of Gen (10:18); and Ezek (27:11) refers to its seamen and soldiers in the service of Tyre. It brought under its authority some of the neighboring cities on the main land, such as Marathus and Simyra, the former nearly opposite the island and the latter some miles to the S. "Thothmes III, of Egypt, took it in his campaign in north Syria (1472 BC) and it is noticed in the campaigns of Rameses II in the early part of the 13th cent. BC (Breasted, Ancient Records). It is also mentioned in the Am Tab as one of the cities with the Amorites in their attacks upon the Egyptians possessions in Syria (44 and 28, B.M. Am Tab). About the year 1200, or later, it was sacked by invaders from Asia Minor or the islands, as were most of the cities on the coast (Paton, Syria and Pal, 14:5) and it recovered when they were driven back. Its maritime importance is indicated by the inscriptions of the Assyrian kings.

Tiglath-pileser I (c.1020) boasts that he sailed in the ships of Arvad. Assur-nazir-pal (c.876) made it tributary, but it revolted and we find 200 men of Arvad mentioned among the allies of Sargon of Asshur (2 K 18:20). Lysanias, the king of Arvad, was after the battle of Resafa (c.605 BC) given over to the Persians and, after another revolt under Mattan (c.576 BC), it was made a Persian satrapy with important privileges. In 2 K 18:20 it is described as a "city of tribute." No doubt its commercial importance as a center of the maritime trade with the coast of Asia Minor and the Aegean in the 11th and 10th cent. BC is indicated by the material culture of the time, and the number of coins as well as the inscriptions, of which over 50 have been discovered.

**ARZANE, är-za-ne** (ܐܪܙܢܐ, Arzāna): A steward of King Eliak, in whose house at Tirzah Zimri murdered the king at a drinking debauch. The text is not quite clear, and Arzane might have been a servant of Zimri (1 K 16:9).

**ARZARENTH, är-sa-reth** (AV Arsareth, är-sa-reth): This is the land to which the ten tribes were deported (2 Esd 13:45). It is described as "another land" lying a year and a half's journey beyond the river, i.e., the Euphrates. It probably answers to the Heb אֶרֶז אֶרֶש (Erz, Arse) (Dan 29:28). In Jos' time the people were still believed to be there in countless numbers (Am 1:1, v. 2).

**AS, az.** Conj. and adv. (usually Gr οὖ, hοδί, ἀνώτερον, ἄνωτερος, ἄνωτερος, κοινή, κοινής, κοινή): designating: (1) Loc: (a) between nouns (Gen 3:5; Jgs 6:5; Phil 2:8; He 11:27-29); (b) between verbs (Lk 6:36; Jn 6:30; 1 Cor 10:7); (c) between adjectives (1 Cor 15:48). (2) Limitation (with respect to a particular aspect or relation) (1 Pet 4:15-16). (3) Time (Lk 8:5; 15:25; Acts 8:36). (4) Cause (1 Cor 1:4). (5) Concession (Jn 7:10; 2 Cor 11:21). (6) Illustration, in numerous passages, beginning "as it is written," "as 1 is said," etc.

**ASA, ä'sa (אָסָה, 'aŝāh), "healer"; 'âsâ, Abô): (1) A king of Judah, the third one after the separation of Judah and Israel. He was the son of Abijah and grandson of Rehoboam. Maacah, his mother, or rather grandmother, was daughter of Abishalom (Absalom) (1 K 15:15). The first ten years of his reign were prosperous and peaceful (2 Ch 14:1). He introduced many reforms, such as putting away the sodomites or male prostitutes, removing idols from holy places, breaking down altars, and burning Asherim. He even deported the "queen mother" because of her idolatrous practices, and of the image which she had made for Asherah (1 K 15:16 ff; 2 Ch 14:3). Though the king himself, in the main, was a zealous reformer, his subjects did not always agree with him (15:17). With an army of 580,000 he repelled an attack of Zerah, the Ethiopian, and
Asadias

THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

routed him completely at Mareshah in the lowlands of Judah (14 6 ff). Directed and encouraged by Azariah the prophet, he carried on a great revival. Having restored the great altar of burnt offering in the temple, he assembled the people for prayer, and anointed Zedebiah, son of Jeh. On this occasion 700 oxen and 7,000 sheep were offered in sacrifice. For the next twenty years there was apparently great prosperity and peace throughout his kingdom, but in the thirty-sixth year of his reign Judah was attacked by Baasha, king of Israel, at all times hostile to Judah (1 K 15 32). Baasha continued to encroach and finally fortified Ramah as a frontier fortress. Asa, faint-hearted, instead of putting his entire trust in Jeh, made an alliance with Ben-hadad of Damascus. The Syrian king, in consideration of a large sum of money and much treasure from the temple at Jerus, consented to attack the northern portion of Baasha's territory. It was at this favorable moment that Asa captured Ramah, and with the vast building material collected there by Baasha, he built Geba of Benjamin and Mizpa (1 K 15 16-22). This lack of faith in Jeh was severely criticized by Hanani the prophet. Asa, instead of listening patiently, and possibly being offended and enraged and Hanani was put in prison (2 Ch 16 1-10). Three years later, Asa was attacked by gout or some disease of the feet. Here again he is accused of lack of faith, for he sought not to Jeh for the help of his nation (2 Ch 16 12). Having ruled forty-one years, he died and was buried with great pomp in a tomb erected by himself in the city of David, i.e. Jerus. On the whole his reign was very successful, but it is said that as the years rolled on he became less and less faithful to Jeh and His law.

(2) A son of Elkanah, a Levite, who dwelt in one of the villages of the Netophathites (1 Ch 9 16).

ASADIAS, as-a-d'as (Ἀσαδίας, Asadias): An ancestor of Baruch (Bar 1 1).

ASAEEL, as-a'-el, as-a'-el. See ASIEL (Apoel).

ASAEHL, as-a'-hel (אסאיהל, Asáhiel), "God hath made": (1) The brother of Joab and Abishai. The three sons of Zerubbabel, one of David's sisters (1 Ch 3 20). The three brothers seem to have been from the beginning members of David's troop of strangely respectable brigands. Asaehel was distinguished for his swift running, and this fact brought misfortune upon him and upon Israel. When Abner and the forces of Ish-bosheth were defeated near Gibson, Asaehel pursued Abner. Abner knew that he could outfight Asaehel, though he could not outrun him. He also knew that the time had come for making David king, and that a blood feud among the leaders would be a calamity. He contemplated with Asaehel, but in vain. It came to a fight, and Abner slew Asaehel (2 S 2, 3).

Asaehel was mentioned as sixth in the list of David's "mighty men" (2 S 23 24; 1 Ch 11 26). The earlier of the names in this list are evidently arranged in the order of seniority. If it be assumed that to this point not much, was known of the death of Asaehel, still there is no difficulty in the idea that some of the names in the list were placed there posthumously. Asaehel is also mentioned as the fourth of David's month-by-month captains (1 Ch 27 7).

ASAPH, as-a'ph (בּשָּׁפָה, Asaph): Is the name of three men in the OT, of whom one is the reputed author of the psalms of 50-83. He was one of David's three chief musicians, the other two being Heman, and Ethan and Jeduthun, and we first hear of him when the ark was taken to Jerus (1 Ch 16 16-19). He conducted with cymbals the music performed in the tent where the ark was housed (1 Ch 16 4.5.7.37), while his two coudjators dis-
charged the same office at Gibeon (16 41:42). In 1 Ch 25:1 ff we are told that four of his sons were appointed to conduct under him detachments of the great chorus, the families of Heman and Jeduthun also furnishing leaders, and all took part at the dedication of the temple (2 Ch 5:12). A, H., and J. were called the king's seers (1 Ch 25; 2 Ch 35:13), no doubt an official title of rank or dignity. The "sons of Asaph" are mentioned in later times. They formed a guild, and played a prominent part at each revival of the national religion. See MUSIC; PSALMS.

JAMES MILLAR

ASARA, as'as-ра ('Asāra, Asär; AV Azara): The sons of A. (temple-servants) returned to Jerus with Zerubbabel (1 Esd 5:31). Omitted in Ezr and Neh.

ASARAMEL, a-sar'a-mel (ʼAsarāmēl, Asaramél or Saramel): A name of uncertain origin occurring in 1 Mac 14:28, in the inscription set up in memory of Simon and the Macaeban family. "On the eighteenth day of Elul, in the hundred and seventy and second year, and this is the third year of Simon the high priest, it Asaramel, in a great congregation of priests and people and princes of the nation, and of the elders of the country," etc. The phrase "in Asaramel" has been taken as referring to a place, and as the name of a title of Simon. Ezekiel and others thought it to be the equivalent of בֶּן נֵבַי יָמ (ben yam), "the son of the people of God." Another reading is "in Saramel." The majority prefer to take the phrase as a title of Simon; the original phrase is then taken to have been בֶּן נֵבַי יָמ (ben yam), "son of the people of God," i.e. of a city, "Israel," if the translator mistranslated מ (m) for מ (mh) and read 'am, "the people," because he supposed it to be the name of a place. Schürer disposes of the ηρι by taking it as a corruption of οὐτος, συγγένειας, συγγενής, which is equivalent to the Gr συγγέννης, συγγενής (GV, I, 197, n. 17).

H. J. WOLF

ASAREEL, a-sār'e-el. See ASAREEL.

ASAREL, as'er-el (ʼAsārel, ʼAsarēl, "Asel is ruler"); AV Asarel: A descendant of Judah and a son of Jehallelel (1 Ch 4:16).

ASARELAH, as'a-re-lah. See ASAREL.

ASBACAPHATH, as-ba-kaphath. See ASBAARETH.

ASBAARETH, as-ba'reeth (LXX Ἀσβακαφῆ, Asbaphēθ, or Ἀσβααρῆ, Asbaretē): The Gr rendering of the Assyr Asshur-qaq-nidina ("Ezr-haddon") (1 Esd 5:69; cf also Ezr 4:2.10). See OSSNAPPAR.

ASCALON, as'kal-on (ʼAskalon, Ašdālōn): In Acts, both AV and RV (Jth 2:28; 1 Mac 10:86; 11:60; 12:33). See ASHEKALON.

ASCEND, a-send': By derivation the Eng. word implies motion from a lower place to (not merely toward) a higher one; and usage tends to restrict it to cases where the holder is in the lower, not the higher, position. AV uses it 39 times in all: (1) of the going up of vapor (Ps 155:7), flame (Jgs 20:40), or smoke (Es 8:17) from one place to another (Acts 25:1) or of the course of a boundary (Josh 15:3); (2) of coming up from the underworld (1 S 28:13; Rev 11:7; 17:8); and (4) of the going up (of men, angels, our Lord) from earth to the skies or heaven (Ps 68:1; 89:12; Jn 3:13). RV uses the appropriate form of "to go up" in all cases falling under (2) and (3); in those under (4) it retains "ascend" with an occasional change in tense; under (1) it retains "ascend" everywhere in OT (Ex 19:18; Josh 8:20:21; Ps 155:7; Jer 10:13; Zel 16) except Jgs 20:40, but our Lord's going up is always called "ascend" (Matt 8:4; 14:11). The like change in the OT passages would make the usage of RV uniform.

F. K. FARR

ASCENSION, a-sen'shun: Most modern Lives of Christ commence that at Bethlehem and end with the Ascension, but Christ's life began earlier and continued later. The Ascension is not only a great fact of the NT, but a great factor in the life of Christ and Christians, and no complete view of Jesus Christ is possible unless the Ascension and its consequences are included. It is the consummation of His redemptive work. The Christ of the Gospels is the Christ of history, the Christ of the past, but the full NT picture of Christ is that of a living Christ, the Christ of heaven, the Christ of experience, the Christ of the present and the future. The NT passages referring to the Ascension need close study and their teaching careful observation.

I. In the Gospels. — The Ascension is alluded to in several passages in the Gospels in the course of Our Lord's earthly ministry (Lk 9:1. Antici- 31:51; Jn 6:62; 7:33; 12:32; 14:18; 16; 20; 17). These pass, however, that the discourses show that Christ's coming to earth on clouds of heaven (Mt 26:64) is not mentioned in the Gospels.

II. In the Acts. — The story in 1:6-12 is clear. Jesus Christ was on the Mount of Olives. There had been conversation between Him and His disciples, and in the course of it was taken up; and a cloud received Him out of their sight (ver 9). His body was uplifted till it disappeared, and while they continued to gaze up they saw two men who assured them that He would come back exactly as He had gone up. The three Gr words rendered "taken up" (ἀνάβησθαι, ἐφερθῆ) (ver 9); "went in" (ἀνέβησθαι, ἐφερθῆ) (ver 10); "received up" (ἀνέβησθαι, ἐφερθῆς) (ver 11); deserve careful notice. This account must either be attributed to tradition, or to the testimony of an eye-witness. But Luke's historicity now seems abundantly proved.

The Ascension is mentioned or implied in several passages in Acts (2:33; 3:21; 7:55; 9:3-5; 22:6-8; 26:13-15). All these passages assert the present life and activity of Jesus Christ in heaven.
III. In the Pauline Epistles.—In 8:34 the apostle states four facts connected with Christ Jesus: His death; His resurrection; His session at God's right hand; His intercession. The last two are clearly the culminating points of a series of redemptive acts.

While for its purpose Rom necessarily lays stress on the Resurrection, Eph has as part of its special aim an emphasis on the Ascension. In 1:20 God's work wrought in Christ is shown to have gone much farther than the Resurrection, and to have "made him to sit at his right hand in the heavenly places, thereby constituting Him the supreme authority over all things, and especially Head of the church (1:20-23). This idea concerning Christ is followed in 2:6 by the association of believers with Christ "in the heavenly places," and the teaching finds its completest expression in 4:8-11, where the Ascension is connected with the gift of the heavenly Christ as the crowning feature of His work. Nothing is more striking than the complementary teaching of Rom and Eph respectively in their emphasis on the Resurrection and Ascension.

3. Philip- pians is shown to follow His deep humiliation. He who humbled Himself is exalted to the place of supreme authority. In 3:20 Christians are taught that their common- wealth is in heaven, "whence also we wait for a Saviour."

The emphasis placed on the second advent of Christ in 1 Thess is an assumption of the fact of the Ascension. Christians are waiting for God's Son from heaven (1:10) who is to "descend from heaven, with a shout, with the voice of the archangel, and with the trump of God" (4:16).

The only allusion to the Ascension in the Pastoral Epistles is found in the closing statement of what seems to be an early Christian song in 1 Tim 3:16. He who was "manifested in the flesh . . . received up in glory."

IV. In Hebrews.—In this epistle there is more recorded about the Ascension and its consequences than in any other part of the NT. The facts of the Ascension and Session are first of all stated (1:3) with all their implications of definite position and authority (1:4-12). Christ is described as contemplating Jesus as the Divine Man in heaven (2:9), though the meaning of the phrase, "crowned with glory and honor" is variously interpreted. It is clear that the result and outcome of His death, others thinking that He was "crowned for death" in the event of the Transfiguration (Matheson in Bruce, Hebrews, 83).

Jesus Christ is described as "a great High Priest, who hath passed through the heavens" (4:14), as a Forerunner who is entered within the veil for us and as a High Priest for ever after the order of Melchizedek (6:20). As such He "abideth for ever," and "ever liveth to make intercession" (7:24,25). The chief point of the epistle itself is said to be "such a high priest, who sat down on the right hand of the throne of the Majesty in the heavens" (8:1), and His position there implies that He has obtained eternal redemption for His people and is appearing before God on their behalf (9:12,24). This session at God's right hand is also said to be with a view to His return to earth when His enemies will have become His footstool (10:12,13), and one of the last exhortations bids believers to look unto Jesus as the Author and Perfecter of faith who has "sat down at the right hand of the throne of the Majesty in the heavens." (12:2).

V. In the Petrine Epistles.—The only reference to the Ascension is in 1 Pet 3:22, where Christ's exaltation after His sufferings is set forth as the pattern and guarantee of Christian glorification after endurance of persecution.

VI. In the Johannine Writings.—Nothing is recorded of the personal Ascension, but 1 Jn 2:1 says that "we have an Advocate with the Father." The word "Advocate" is the same as "Comforter" in Jn 14:16, where it is used of the Holy Spirit. Christ is the Com- forter "in relation to the Father," and the Holy Spirit is the Comforter dwelling in the soul.

The references in the Apocalypse either teach or imply the living Christ who is in heaven, as active in His church and as coming again (Rev 1:7,13; 5:5-13; 6:9-17; 14:1-5).

VII. Summary of NT Teaching.—The NT calls attention to the fact of Ascension and the fact of the Session at God's right hand.

1. The Fact The Ascension is a word of the Gospels in connection with the Ascension: anal- baśānim (ascendere), "to go up"; analtamīnēshai (adsumi), "to be taken up"; pōresēshū, "to go up."

The Session is connected with Ps 110; and this NT passage is frequent in these terms, and in all parts of the NT. But it is used especially in Heb in connection with Christ's priesthood, and with His position of authority and honor at God's right hand (Swete, The Ascended Christ, 10-15). But the NT recognizes the Ascension rather than the mode, the latter being quite secondary. Yet the acceptance of the fact must be carefully noticed, for it is impossible to question that this is the belief of all the NT writers. They base their teaching on the fact and do not rest content with the moral or theological aspects of the Ascension apart from the historic reality. The Ascension is regarded as the point of contact between the Christ of the gospels and of the epistles. The gift of the Spirit is said to have come from the ascended Christ. The Ascension is the culminating point of Christ's glorification after His Resurrection, and is regarded as necessary for His heavenly exaltation. The Ascension was foretold and demanded by the Resurrection, though there was no need to preach it as part of the evangelistic message. Like the Virgin birth, the Ascension involves doctrine for Christians rather than non-Christians. It is the culmination of the Incarna- tion, the result of Christ's work, and is the entrance upon a wider sphere of work in His glorified condition, as the Lord and Priest of His church (Jn 7:52; 16:7).

We may summarize what the NT tells us of Our Lord's present life in heaven by observing care- fully what is recorded in the various passages of the NT. He ascended into heaven (Mark 16:19; Lk 24:51; Acts 1:10); He is seated at the right hand of God (Col 3:1; Heb 1:3; 8:1; 10:12); He bestowed the gift of the Holy Spirit on the Day of Pentecost (Acts 4:33); He added disciples to the church (Acts 2:47); He worked with the disciples as they went forth preaching the gospel (Mark 16:20); He healed the impotent man (Acts 3:16); He stood to receive the first martyr (Acts 7:56); He appeared to Saul of Tarsus (Acts 9:5); He makes intercession for His people (Rom 8:26; Heb 7:25); He is able to succor the tempted (He 2:18); He is able to sympathize (He 4:15); He is able to save to the uttermost (He 7:25); He lives forever (He 7:24; Rev 1:18); He is our Great High Priest (He 7:26; 8:1; 10:21); He possesses an intransmissible or inviolable priesthood (He 7:28); He is the Advocate and Chief Intercessor for the saints (He 9:24); He is our Advocate with the Father (1 Jn 2:1); He is waiting until all oppo-
1. Relation to Nature

There are two questions usually associated with the Ascension which need our attention.

There is no greater difficulty in connection with the Ascension than with the Resurrection, or the Incarnation. Of Our Lord’s resurrection-body we know nothing. All we to the Laws can say is that it was different from nature the body laid in the tomb and yet essentially the same; the same and yet essentially different. The Ascension was the natural close of Our Lord’s earthly life, and as such, is inseparable from the Resurrection. Whatever, therefore, may be said of the Resurrection in regard to the laws of nature applies equally to the Ascension. The record in Acts is sometimes objected to because it seems to imply the localization of heaven above the earth. But is not this taking the narrative in too absolutely bald and literal sense? Heaven is at once a place and a state, and as personality necessarily implies locality, some place for Our Lord’s Divine, yet human person is essential. To speak of heaven as “above” may be only symbolical, but the ideas of life and locality must be carefully adhered to. And yet it is not merely local, and “we have to think less of a transition from one locality than of a transition from one condition to another. . . . the real meaning of the ascension is that . . . Our Lord will remain in this world, and that higher existence where God is” (Milligan, Ascension and Heavenly Priesthood, 26).

2. Localization of the Spiritual World

It matters not that our conception today of the physical universe is different from that of NT times. We still speak of the sun setting and rising, though strictly these are not true. The details of the Ascension are really unimportant. Christ disappeared from view, and no question need be raised either of distance or direction. We accept the fact without any scientific explanation. It was a change of conditions and mode of existence; the essential fact is that He departed and disappeared. Even Keim admits that “the ascension of Jesus follows from all the facts of His career” (quoted, Milligan, 13), and Witsius and several other writers show that higher existence where God is (Milligan, Ascension and Heavenly Priesthood, 26).

3. Its Relation to Christ Himself.

The Ascension was the exaltation and glory of Jesus Christ after His work was accomplished (21:11). He had a threefold glory: (1) the Son of God before the Incarnation (Jn 17:5); (2) as God manifest in the flesh (Jn 1:14); (3) as the exalted Son of God after the Resurrection and Ascension (Lk 24:26; 1 Pet 1:21). The Ascension meant very much to Christ Himself, and no study of the subject must overlook this aspect of NT teaching. His exaltation to the right hand of God meant (1) the proof of victory (Eph 4:8); (2) the position of honor (Ps 110:1); (3) the place of power (Acts 2:33); (4) the place of happiness (Ps 16:11); (5) the place of rest (“setanted”); (6) the place of permanence (“for ever”).

4. Its Teaching for Christians.

The Ascension and the Ascention are the turning point in Christ’s earthly career, and a revelation to us of His present life in heaven which means so much in the believer’s life. The spiritual value of the Ascension lies, not in Christ’s physical remoteness, but in His spiritual nearness. He is free from earthly limitations, and His promises are “guaranteed” to us. “Because I live ye shall live also.”

The Ascension and Session are regarded as the culminating point of Christ’s redemptive work (He 8:1), and at the same time the demonstration of His righteousness (Rom 4:25). The Resurrection demonstrated the sufficiency of the atonement for the former, and the Ascension demonstrated the sufficiency of righteousness for the latter. The Spirit of God was to convict the world of “righteousness” (Jn 16:10). In accord with this we find that in the Epistle to the Hebrews reference to Our Lord’s ascension is in the past, implying completeness and perfection, “once for all.”

This is the peculiar and special message of the Ascension. It finds its essential features in the representation of man to God, involving access into the Divine presence (He 4:16).

The Ascension constituted Christ as Head of the church (Eph 1:22; 4:10.15; Col 2:19). This Headship teaches that He is the Lord and Head and Lord.

The fact that He is at the right hand of God suggests in the symbolical statement that He is not yet properly King on His own throne, as He will be hereafter as “King of the Jews,” and “King of Kings.”

In several NT passages this is regarded as the crowning point of Our Lord’s work in heaven (Rom 8:33.34). He is the perfect Mediator between God and man (1 Tim 2:5; Heb 4:14). The Lord’s intercession is never associated with any such place as Calvary. Nor is there any hint in the NT of a relation between the Enchirarch and His life and work in heaven. This view popularized by the late Dr. William Milligan (The Ascension, etc, 206), and endorsed from other standpoints in certain aspects of Anglican teaching (Swete, The Ascended Christ, 46), does not find any support in the NT. As Westcott says, “the modern conception of Christ pleading in heaven His passion, ‘offering His blood, on behalf of man, has no foundation in this episode” (Hebrews, 293). And Holt similarly remarks, “The words, ‘Still . . . His prevailing death He pleads’ have no apostolic warrant, and cannot even be reconciled with apostolic doctrine’ (Life and Letters, II, 213). Our Lord’s intercession is not so much in what He says as in what He is. He pleads by His presence on His Father’s throne, and He is able to save to the uttermost through His intercession, because of His perpetual life and His inviolable, undelegated, intransmissible priesthood (He 7:24-25). There is thus an intimate and essential connection between the Ascension of Christ and the descent of the Holy Spirit. The Holy Spirit was given to Christ
as the acknowledgment and reward of His work done, and having received this “Promise of the Father” He bestowed Him upon His Church. The Father is the Giver of the Spirit (Acts 2:33). By means of the Spirit the twofold work was done, of convincing sinners (Jn 16:9), and of edifying believers (Jn 14:12; see also Jn 14:26, 16:14).

It is in connection with the Ascension and our Lord’s life in heaven that we understand the force of such a passage as “Lo, I am with you all the days of the Spirit” (Mt 28:20). “He ever liveth” is the supreme inspiration of the individual Christian and of the whole church. All through the NT from the time of the Ascension onward, the one assurance is that Christ is living; and in His life we live, hold fellowship with God, receive grace for daily living and rejoice in victory over sin, sorrow and death.

Our Lord’s life in heaven looks forward to a consummation. He is “expecting till his enemies be made his footstool” (He 10:13 AV). He is described as our Forerunner (He 6:18 ff.), and His presence above is assurance that no one who shares His life hereafter. But His Ascension is also associated with Him coming again (Phil 3:20,21; 1 Thes 4:16; He 9:28). At this coming there will be the resurrection of dead saints, and the transfiguration of living ones (Acts 4:10,17), to be followed by the Divine tribunal with Christ as Judge (Rom 2:16; 2 Tim 4:1,8). To His own people this coming will bring joy, satisfaction and glory (Acts 3:21; Rom 8:19); to His enemies defeat and condemnation (1 Cor 15:25; Rom 15:12; 10:13).

Reviewing all the teaching of Our Lord’s present life in heaven, appearing on our behalf, interceding by His presence, bestowing the Holy Spirit, governing and guiding the church, sympathizing, helping and saving His people, we are called upon to “lift up our hearts,” for it is in occupation with the living Christ that we find the secret of peace, the assurance of access, and the guaranty of our permanent relation to God. Indeed, we are clearly taught in He that it is in fellowship with the present life of Christ in heaven that Christians realize the difference between spiritual immaturity and maturity (He 6:1; 10:1), and it is the purpose of this book and his truth above all others, Christianity is the “religion of free access to God,” and in proportion as we realize, in union with Christ in heaven, this privilege of drawing near and keeping near, shall we find in the attitude of “lift up your hearts” the essential features of a vigorous, growing, joyous Christian life.

W. H. Griffith Thomas

ASCENSION OF ISAIAH. See Apocalyptic Literature.

ASCENT, a-sent':
1. The rendering in AV twice, RV 14 times correctly, of Heb ma'dâ'ch, “ascent,” “pass,” as a geographical term (AV Nu 34:4; 2 S 18:30; RV Josh 10:1; 1 Sam 13:13, etc).
2. The rendering in AV and RV of olâ'h in 1 K 10:5, “his ascent by which he went up unto the house of Jeh”; but olâ’h everywhere else means “burnt-offering,” and all ancient VSS support RVm, “his burnt-offering which he offered” (caused to go up, etc).
3. In 2 Ch 9:4 (1 K 10:5) a very slight textual correction (supported by LXX) gives us the same words as in 1 K instead of the difficult dâ'ath, “upper chamber,” not “ascent” as AV and RV render it against all usage elsewhere.
4. In RV Ezek 40.31.34.37; Neh 12, 37, of a flight of steps, stairs.
5. In RV (Heb 'âlîyâh), Neh 3:31.32, m. “upper chamber” is to be preferred to text in ascen (H. K. P. Farr)

ASChENAZ, as-he-naz. See ASHEKNAZ.

ASEAS, as-e-as'as (Aseás, Aseias = Ishijah [Ezr 10:31]): A son of Anans, who put away his strange wife (1 Esd 9:32).

ASEEBIAS, as-e-bi-e-â's (Aseebiâ's, Asebiâ's: AV Asebebia, as-e-bi'e-a'): A. his sons and brethren returned with Ezra to perform the functions of priesthood in Jerusalem (1 Esd 8:47). Cf Sherehabiah (Ezr 8:18).

ASEEIBIAS, as-e-bi-e-â's (Aseebiâ's, Asebiâ's; AV Asebia, as-e-bi'a): A. returned with Ezra to perform the function of a priest in Jerusalem (1 Esd 8:48). Cf Haschhabiah (Ezr 10:9).

ASENATH, as-e-nath ('Asevî, Asebeth): The wife of Joseph, daughter of Potiphera, mother of Manasseh and Ephrahim (Gen 41:45.46; 46:20).

She was evidently an Egyptian woman and bore an Egyptian name. ASENATH, pointed by the Massoretes as ÆSENATH, "aseneth, appears in the LXX as aseneth or asenneth. The last two consonants appear to represent the name of the Egyptian goddess Neith. The first part of the name will then represent either nas = "belonging to" (so Brugsch and generally), or y's-n (note the doubled n in the LXX transcription) = "she belongs to" (so Spiegelberg). It is possible that these four letters represent the Egyptian name 'as-n (so Lichtheim, among others), though the S must then be explained as ÆLēph prostheticum and the Ñ would be less regular than a Ñ to stand for the Egyptian feminine t.

J. Oscar Boyd

ASER, a'zer (Azer, Ashr): AV; Gr form of Asher (thus RV) (Lk 2:36; Rev 6:7).

ASERER, a'se-rer. See SEAR.

ASH, ash (ץ, 'oren; RV FÎR TREE; RVm Ash): A maker of idols "planteth a fir-tree [m, "ash"], and the rain doth nourish it" (Isa 44:14). It is a suggestion as old as Luther that the final letter י, n, was originally a ג, and that the word should be 'erea, "cedar"; the chief objection is that cedar occurs just before in the same verse. The word for "aseneth" so shown in the Authorised but for "fir" has support from the LXX and from the rabbis. Post (HDB) suggests as probable the stone pine, Pİneus pİnus, which has been extensively planted round Beirut and unlike most planted trees flourishes without artificial irrigation—"the rain doth the fir feed." The tr "ash" was probably suggested by the
fanciful resemblance of the Heb 'bôren and the Lat orrus, the manna ash of Europe. Three varieties of ash flourish in Syria, Praezinus orius, E. excelsior and of the former kind, which is common in parts of N. Pal, being a large tree some 30 to 40 ft. high, might suit the context were there anything philosophical to support the idea.

E. W. G. Masterman

ASH (Bear). See Astronomy.

ASHAMED, a-shâm'd: Almost exclusively moral in significance; confusion or abashment through consciousness of guilt or of its exposure. Often including also a sense of terror or fear because of the disgrace connected with the performance of some action. Capacity for shame indicates that moral sense (conscience) is not extinct. "Ashamed" occurs 96 out of 118 times in the OT. Heb בושת, bosh, "to feel shame" (Lat pudere), with derivatives occurs 80 times; עונש, qal, "to shame," including the thought of "disgrace," "reproach"; חמשת, mishash; "to blush": hence shame because of frustrated plans (uniformly in RV "confounded"); Gr a'xovýmaas, aishchównma, "suffused with shame," passive only and its compounds. Uses: (1) A few times, of actual embarrassment, as of Hazael before the brave Esra (2 K 5 11; see also 2 S 10 5; 2 K 2 17; Ezr 8 22). (2) Innocence not capable of shame: "both naked, ..., and not a." (Gen 2 25; see Shame); the redeemed no occasion for (Ps 24 5 AV; 1 Jn 2 28); Christ not of "brethren" (He 2 11); nor Christian of gospel (Rom 1 16); nor God of men of faith (He 11 16); nor they who trust in God (Isa 50 7; 54 4; Joel 2 26). (3) Sense of guilt: "I am a ..., for our iniquities" (Ezr 9 6); "of thy lced way" (Ezek 16 19); idolaters, because of their unanswerable cause of Idols (Isa 29 24; 44 9.11; 45 16; Jer 2 26); to enemies (Ps 6 10); to wicked (Ps 31 17); to all who forsake God (Jer 17 13); to those who trust in human help, as Israel of Egypt and Assyria, and Moab of Chemosh (Jer 2 26; 48 13); to a mother of wicked children (Jer 50 12). (4) Repentance causes shame for sin (Jer 31 19; Rom 6 21). (5) Calamities also, and judgments (Jer 14 3.4; 15 9; 30 11). (6) Capacity for shame may be taken as the long-continued sin (Jer 6 15; 8 12; cf 3 3), exceptionally striking passages on the deadening power of immorality, suggestive of 1 Tim 4 2; Titus 1 15. (7) The grace of Christ delivers from the shame of moral timidity (Rom 1 16; 2 Tim 1 7-12); judgment coming His followers will "not a. before him" (1 Jn 2 28); at the final judgment He will be a. of all who have been a. of Him (Mk 8 38; Lk 9 26; of Mt. 10 33; He 11 16). (9) The word lends itself to rich poetic use, e.g. Lebanon, with faded and falling foliage, "is a." (RV "confounded") at the desolations of the land under Sennacherib (Isa 33 9); so great is God's glory in the new Jerus that "the sun [is a.]" in His presence (Isa 24 23), explaining the glorious figure in Rev 2 25. Some references in this art. are from AV; RV frequently replaces "ashamed" by "put to shame." See Shame.

Dwight M. Pratt

ASHAN, b'shan (אשַּן, 'ashân): An unknown site in the domain of Judah (Josh 16 42), possessed by Simeon (Josh 19 7), and mentioned among the Philistines (other places 1 Ch 6 59). (44) = Josh 21 16 (אשַע, 'asân), is a corruption of ישע, 'ishān. Chorashan (or Borashan), which was probably the site of some reservoir in the S.W. part of Judah (1 S 30 30), is the same as Ashan.

ASHARELAH, ash-a-re'lah, ASARELAH (אשָרֶלָה, 'askér'ēlā): One of the Asaphites appointed by David to the temple service (1 Ch 25 2); in ver 14 he is called Jesharelah. The latter element in both forms may be (Israel) "God," but the meaning of the former part in the first form is fully unknown. The former part in the second form is clearly connected with the word צער, 'asār, "to bind," "whom God has bound [by a vow]."

Ashbea, ash-bē'a, ash-bē'ā (אשֶבֶא, 'ashbē'): The house of theAshbea was a family of linen-workers mentioned in 1 Ch 4 21. We might render both "ashbē" as their dwelling-place; nothing is known of such a place nor is this house of weavers referred to in any other of the books.

Ashbel, ash-bēl, ASHEBELITE, ash-bēl-it (אשְׁבֵל, 'ashbēl): The gentile name "Ashebelite" is found in Nu 26 38, second son of Benjamin (Gen 46 21). In 1 Ch 7 6-11 (6) "Jediael" ("known to God") is substituted for the heathen-sounding "Ashbel" ("Ishbaal," "man of Baal"). The chronicler, in this case, conforms literally to the principle laid down in Hos 2 17; the title "Baal" ("lord") was applied in early days (e.g. in the days of Saul) to the national God of Israel, but in later days the prophets objected to it because it was freely applied to heathen Baal (of Israimm.): it is extraordinary that the three names Bela, Ashbel, Aharim (=Ahriman) are taken from Nu 26 38, however, without change.

H. J. Wolf

Ashdod, ash'dôd (אשָדֹד, 'ashdôd; אָשָׁדְוּ, 'asăدو, Ashdôs; mod. Esdâd): One of the five chief cities of the Philis. The name means stronghold or fortress, and its strength may be inferred by the fact that Psammemit I, of Egypt, besieged it for many years (Herodotus says 29). Some of the Anakim were found there in the days of Joshua (Josh 11 22), and the inhabitants were too strong for the Israelites at that time. It was among the towns assigned to Judah, but was not occupied by her (Josh 13 3; 16 46). It was still independent in the days of Samuel, when, after the defeat of the Israelites, the ark was taken to the house of Dagon in Ashdod (1 S 6 1.2). We have no account of its being occupied even by David, although he defeated the Philis many times, and we have no definite knowledge of its coming into the hands of Judah until the time of Uzziah (2 Ch 26 19). It is possible that they other Philis towns, came under the authority of the Assyrian monarchs, and we have mention of it in their records. It revolted against Sargon in 711 BC, and deposed the Assyrian governor, Akhimati, who had been appointed by him in 720 BC. They then sent a force to subdue the rebels and the city was severely punished. This is referred to by Isaiah (Isa 20 1). Amos had prophesied such a calamity some years before (1 8), and Jeremiah refers to "the remnant of Ashdod" as though it had continued weak until his day (Jer 25 20). Zephaniah (Zeph 2 4) refers to the desolations of Ashdod and Zecharina to its degraded condition (Zee 9 6). It continued to be inhabited, however, for we find the Jews intermarried with them after the return from Babylon (Neh 13 23.24). In the Maccabean period we are told that Judas and Jonathan both took it and purified it of idolatry (1 Mac 5 68; 10 84). In these passages it is called Azotus, as it is also in the NT (Acts 8 40). In the 4th cent. AD it became the seat of a bishopric. It had been restored in the time of Herod, by the Rom general Gabinius, and was presented to Salome, the sister of Herod, by the emperor Augustus. It is now a small village about 18 miles I.N.E. of Gaza.

H. Porter

Ashdodites, ash'dôd-its: Inhabitants of Ashdon (q.v.) (Josh 13 3; AV Ashdodites, ashd- doths; Neh 4 7).
ASHDOTH PISGAH, ‘as-doth pis’ga (אֶשֶׁדֹת פִּיסְגָּא , ‘asher-ha-pisgah): Thus AV for RV "The slopes [RVm springs] of Pisgah." The spurs and ravines, or the "shoulders" of Pisgah are meant. ‘Ashedoth is "a poring out," and ‘ashtoth are the slopes of a mound from which ascending flocks feed. In Josh 10 40; 12 8, ‘Ashedoth, trv "springs" in AV, is "slopes" in RV (Dt 3 17; Josh 12 3; 13 20). See PISGAH.

ASHER, ‘asher (‘asher, ‘aŝhër, ‘aṣṣir, ‘aŝêr): According to the Bib. account Asher was the eighth of Jacob's sons, the second borne to Leah. His relationship to other Asherim, Ashkenaz, and Ch of AV, "The blessing he shall yield royal dainties" (Gen 49 20); and again in that of Moses: "Blessed be Asher with children; let him be acceptable unto his brethren, and let him dip his foot in oil" (Dt 33 24). His family prospered in Egypt, and at the Exodus the tribe of Asher is numbered at 41,500 adult males (Nu 1 11). The second census gives the number is 63,400 (Nu 26 47). The place of Asher in the desert march was with the stamens of the camp of Dan, on the north of the tabernacle, along with Dan and Naphtali; the prince of the tribe being Pagiel the son of Olad (Nu 33 17). The spies Asher was represented by Sethur (Nu 13 13). The tribe seems to have taken no important part in the subsequent history. It raised no hero, and gave no deliverer to the nation. In the time of David it was of so little consequence that the name is not found in the list of chief rulers (1 Ch 27 16 ff). The rich land assigned to Asher sloped to the Phoen seaboard, and brought him into touch with the Phoenicians who were already world-famous in trade and commerce. He probably soon became a partner in their profitable enterprises, and lost any desire he may ever have had to eject from their cities (Jgs 1 31). He cared not who ruled over him if he were free to pursue the ends of his calling. Whether he lived on the hill and in the vale unto the death, and Naphtali upon the high places of the field, to break the power of the foreign oppressor, but Asher "sat still at the haven of the sea, and abode by his cliffs" (Jgs 5 17 ff). He was probably soon largely absorbed by the people with whose interests his were so closely identified: nevertheless "divers of Asher," moved by the appeal of Hezkiiah, "humbled themselves, and came to Jerus" (2 Ch 30 11 AV). To this tribe belonged the prophetess Anna (Lk 2 36 ff). According to a modern theory, the mention of the slave girl Zilpah as the mother of Asher is meant to indicate that the tribe was of mixed blood, and arose through the mingling of Israelites with the Canaanites. It is suggested that the name may have been taken from that of the Can. clan found in the Am Tab, Māri abd-Ashtar, "sons of the servant of Asherah. A similar name occurs in the inscriptions of the Hyp Seti I (14th cent. BC), ‘Aṣera, a state in western Galilee (W. Max Müller, As. und Evr., 230-30). This people it is thought may have associated themselves with the invaders from the wilderness. But while the speculations are interesting, it is impossible to establish any relationship between these ancient tribes and Asher.

The boundaries of the territory are given in considerable detail in Josh 19 25 ff (cf Jgs 1 31 f; Jos 17 10 f). Only a few of the places named can be identified with certainty. Dor, the modern Tan-Tarah, although occupied by Manasseh belonged to Asher. Wady ez-Zerqā’, of Asher possibly identical with Shihor-libnah, which enters the sea to the S. of Dor, would form the southern boundary. The tribe of Asher had the map of land from S to 10 m. wide running northward along the shore to the neighborhood of Sidon, touching Issachar, Zebulun and Naphtali on the E. Asher seems to have taken possession of the territory by a process of peaceful penetration, not by conquest, and as we have seen, there is no mention of Phoenicians from their cities. The rich plain of Acre, and the fertile flats between the mountain and the sea near Tyre and Sidon therefore remained in Phoen hands. But the valleys breaking down westward and opening on the plains have always yielded fine crops of grain. Remains of an ancient oak forest still stand to the N. of Carmel. The vine, the fig, the lemon and the orange flourish. Olive trees abound, and the supplies of olive oil which to this day are exported from the district recall the word of the old-time prophet, "Let him dip his foot in oil."

ASHER, ‘asher (‘asher, ‘aŝhër):

1. See preceding article.
2. A town on the southern border of Manasseh (Josh 17 7). The site is unknown.
3. A place of this name is mentioned in Apec (Tob 1 2), identified with Hazor, in Naphtali. See HAZOR.

ASHERAH, a-šér‘ā (אָשֶׁרֶה , ‘ašerēh; ἀσήρας, ἀσώρα, mistranslated “grove” in the AV, after the LXX and Vulg.

1. Referrers to the Goddess
2. Assyrian Origin of the Goddess
3. Her Symbols
4. The Attributes of the Goddess

Was the name of a goddess whose worship was widely spread throughout Syria and Canaan; plur. Ashterim, ashtaram.

Her "Image" is mentioned in the OT (1 K 15 13; 2 K 21 7; 2 Ch 15 16), as well as her "prophets" (1 K 18 19) and the vessels used in her service (2 K 23 4).

1. Referrers to the In Assyr. the name appears under Godd over Assur and Asirtu; it was to Asratu that a monument found near Diarbekir was dedicated on behalf of Khammu-rabi (Amrhalph) "king of the Amorites," and the Amorite king of whom we hear so much in Am Tab bears the name ineffectually of Ebed-Asrati and Ebed-Asirî.

Like so much else in Can. religion, the name and worship of Asherah were borrowed from Assyria. She was the wife of the war-god Asirî, whose name was identified with that of the city of Assur with the result that he became the national god of Assyria. Since Asirî was merely the feminine form of Asir, "the superintendant" or "leader," it is probable that it was originally an epithet of Istar (Ashtoreth) of Nineveh. In the W., however, Asherah and Ashtoreth came to be distinguished from one another, Asherah being exclusively the goddess of fertility, whereas Ashtoreth passed into a moon-goddess.

In Assy asirî, which appears also under the forms asratû, esritû (plur.) and asru, had the further signification of "sanctuary." Originally asirî, the wife of Asirî, and symbol "sanctuary," seem to have had no connection with one another, but the identity in the pronunciation of the two words caused them to be identified in signification, and as
ASHUR, ashtur (אַשְׁתּוּר, asšḥṭūr, AV Ashur): The "father of Tekoa" (1 Ch 2:24; 4:5), probably the founder of the village. The original meaning of the name is the "man of Horus," Ashurites (אשּׁורִים, ha-ashšārīm). This name occurs in the list of Ash-bosheth's subjects (2 S 2:9). An Arab and Vulg version read ḫa-ṣghārī, "the Geshurites," designating the small kingdom to the S. or S.E. of Damascus. This reading, though adopted by Ewald, Thenius and Wellhausen, is untenable, for during the reign of Ish-bosheth Geshur was ruled by its own king Talmai, whose daughter was married to David (2 S 3:3; 13:37). Furthermore Geshur was too far away from the rest of Ish-bosheth's territory. A more consistent reading is אַשּׁור, ha-āššērī, as given in the Tg of Jonathan and accepted by Köhler, Klost, Kirkpatrick and Bulde, "those of the house of Asher" (cf Jgs 1:32). The term would then, denote the country to the W. of Jordan above Jezebel.

SAMUEL COHON

ASHIMA, a-shî'îma, a-shîma (אָשִּׁימה, 'āshî'mâ; 'אשימא, 'āshimâ): A deity worshipped at Hamath (2 K 17:30) of whom nothing further is known. It has been suggested that the name is the same as that of the goddess Simi, the daughter of the supreme god Hadad, who was worshipped at Membej, but there is nothing to support the suggestion.

ASHKELON, ash'ke-ôn (AV Eshkalon, esh-ka-lon [Eshkalonites; Josh 13:3]; Askelon, aš-ke-lôn [Jgs 1:18; 1 S 6:17; 2 S 2:20]; אָשְׁכֶלֹן, 'aškîlôn; mod. Askalan): A maritime town between Jaffa and Gaza, one of the five chief cities of the Philistia. The Ashkelonites are mentioned by Joshua (Josh 13:3), and the city was taken by the tribe of Judah (Jgs 1:18). One of the golden tumors (AV "emerod") sent back with the ark by the Philistia was from A. (1 S 6:17). David couples A. with Gath in his lament over Saul and Jonathan (2 S 2:20) indicating its importance, and it is joined with Gaza, Ashod and Ekron in the denunciations of Amos (1:7,8). It is referred to in a similar way by Jeremiah (Jer 26:20; 47:5,7). Zephaniah (2:4,7) speaks of the desolation and destruction of A., and announces the fear of A. on the destruction of Tyre (9:5). The city is mentioned in the Am. Tab., and a certain Yitia is referred to as king. It revolted against Rameses II and was subdued, and we have mention of it by the Assyrians. Tiglath-pileser III names it among his tributaries, and its king, Mitinti, is said to have lost his reason when he heard of the fall of Damascus in 732 BC. It revolted in the reign of Sennacherib and was punished, and remained tributary to Assyria until the decay of that power. In Maccabean times we learn of its capture by Jonathan (1 Mac 10:86; 11:60, RV "Ascalon"); Herod the Great was born there (BJ, III, ii, 1 f). In the 4th cent. AD it was the seat of a bishop. It became subject to the Moslem in the 7th cent. and was taken by the Crusaders. It was taken in 1187 by Saladin, who dismantled it in 1191 to make it useless to Richard of England, into whose hands it was expected to fall. Richard restored it the next year but it was again destroyed by Saladin. It was an important fortress because of its vicinity to the trade route between Syria and Egypt.

H. PORTER

ASHKELONITES, ash'ke-lôn-îts (Josh 13:3): The people of Ashkelon, who were Philistines. 

ASHKENAZ, ash'ke-naz (אָשָׁן, 'āškanēz): The name occurs in Gen 10:3; 1 Ch 1:6, in the list of the sons of Japheth as a son of Gomer. See
TABLE OF NATIONS. It occurs also in Jer 51 27 (AV ‘Ashchenaz’) in connection with the kingdoms of Arrat and Minni, which suggests a location about Armenia.

ASHNAH, ash'na (אָשָנָה, ash'nah): Two sites, (1) Josh 16 33, a site in the lowlands of Judah, probably near Ézrail and Zorah. The small ruin Ashtar with between those two places may retain an echo of the old name; (2) Josh 15 43, an unknown site farther south.

ASPHENAZ, as'pē-nāz (אֶשְפֵּנָּז, as'phēnāz): The master of the eunuchs of Nebuchadnezzar was an officer into whose hands the king intrusted those of the children of Israel, and of the princes, and of the seed of the king of Judah, whom he had carried captive to Babylon, that they might be taught the learning and tongue of the Chaldeans in order to serve in the king’s palace. He is mentioned by name in Dn 1 3 only. It was used to be supposed that the name was Pers; but it now seems more probable that it is Bab. We would suggest Aship-an-Isuz, “the Aship-priest of Anu is mighty,” as a possible form of the original. R. DICK WILSON

ASHRIEL, ash'ri-el. See ASRIEL.

ASHTAROTH, ash'ta-roth (אָשָׁתְרוֹת, ’ash'tārōth); AV Ashtaroth, as’ta-roth; ’Aṣṭarōth, Aṣṭarōth, the city of Og, king of Bashan [Dt 1 4, etc]; ASHTEROSE KARNAIM (אֲשָׁתְרוֹת קַרְנְיָים, ’ash'tārōth kārnyā'im), the scene of the defeat of the Rephaim by Chedor-lomer [Gen 14 5]; BEESHERAH (בֶשֶרָה, beshērāh), a Levitical city in Manasseh E. of the Jordan [Josh 21 27]: The name probably means “house” or “temple of Astaroth.” It is identical with the Aramaic name Beshara‘ of 1 Ch 6 71. Ashhtaroth is the plur. of Asirronen (q.v.). The name denotes a place associated with the worship of this goddess. Ashteroth-karnaim is mentioned only once in canonical Scripture unless we accept Grätz’s restoration, that Karnaim appears as a city taken by Israel: “Have we not taken to us horns [karnayim] by our own strength?” (Am 6 13). It is identical with Carnion or Carnaim of 1 and 2 Macc, a city of Carnial as a town of Ashtaroth, as Carnia. The name Ashtaroth has been identified with Aspera in the lists of Tahmnes III of the XVIIIth Egyptian Dynasty; and with Ashtarot of the Am. Tab. Its claim to antiquity is therefore well established.

As far as the Bib. record is concerned, the names at the head of this art. might stand for one and the same city, Ashtaroth being a contraction from Ashteroth-karnaim. But in the days of Eusebius and Jerome, we learn from the Onom, there were two forts of this name 9 miles apart, lying between Adara (Der’ah) and Ahaba (Ab’d), while Ashtaroth, the ancient city of Og, king of Bashan, lay 6 miles from Adara. Carnain Ashtaroth, which is evidently identical with Ashteroth-karnaim, they describe as a large village in the angle of Bashan where tradition places the home of Job. This seems to point to Tall ’Ashtarā, a hill which rises about 80 ft. above the plain, 2 miles S. of el-Merkes, the seat of the governor of the Haúran. Three-quarters of a mile N. of el-Merkes, at the south end of a ridge on which the village of Sfarakh ‘Allah is built, stands the wele of the stone of Job, Weley Sokhrat ‘Ayğrab. By the large stone under the dome Job was said to have sat to receive his friends during his affliction. An Egyptian inscription, found by Schumacher, proves the stone to be a monument of the time of Rameses II. At the foot of the hill is pointed out the bath of Job. In el-Merkes the building known as Deir ’Ayğrab, “Monastery of Job,” is now part of the barracks. There is also shown the tomb of Job. The stream which flows southward past Tel Ashdar, is called Mojet en-Nab Ayygh, “stream of the prophet Job,” and is said to have risen where the patriarch stamped his foot on his recovery. It is to be noted also that the district lying in the angle formed by Nahor and Baktîd and the Yarmak is called to this day ez-Zanugyet ash-sharkiyeh, “the eastern angle” (i.e. of the Jaulan). The term may in Jerome’s time have covered the land east of the ‘Allan, although this is now part of the Haúran. At Tell ’Ashtarā there are remains pointing to a high antiquity. The site was also occupied during the Middle Ages. Perhaps here we should locate Carnain Ashtaroth of the Onom. It does not, however, agree with the description of Carnain in 1 and 2 Macc. The Ashtaroth of the Onom may have been at el-Mas’ūrath, on the great pilgrimage road, about 6 Rom miles from Der’ah—the distance indicated by Eusebius. The old fortress here was situated on an island in the middle of the lake, Bâbiqueet el-Baïjik. A full description of the place is given in Schumacher’s Archeology of the Jordan, 137 ff. It must have been a position of great strength in antiquity; but the ancient name has not been recovered.

Some would place Ashteroth-karnaim, the Carnain of the Maccabees, at Tell ’Ash’arih, a site 10 Rom miles N. of Der’ah, and 41 Rom miles S. of Tell ’Ashtarā. This clearly was “a place hard to besiege, and difficult of access by reason of the narrowness of the approaches on all sides” (2 Macc 12 21). It occurs a promontory which stands out between the deep gorge of the Yarmāk and a great chasm, at the head of which is a waterfall. It could be approached only by the neck connecting it with the mainland; and here it was guarded by a triple wall, the ruins of which are seen today. The remains of a temple close by the bridge over the Yarmak may mark the scene of the slaughter by Judas.

The whole question however is obscure. Eusebius is clearly guilty of confusion, with his two Ashteroth-karnaims and his Carnain Ashtaroth. All the places we have named lie considerably N. of a line drawn from Tall Abl to Der’ah. For light upon the problem of identification we must wait the results of excavation. W. EWING

ASHTAROTH, plur. of Ashtoreth. See ASHTORETH.

ASHERATHITE, ash’tar-ath-īt, ash-ter-ath-īt (אֲשָׁרָתִי, ha’-ash’rāthī‘āth); A native of Ashteroth: Uzza, one of David’s heroes (1 Ch 11 44).

ASHTEROTH-KARNAIM, ash’ta-roth kar-nā’īm; i.e. “Ashteroth of the two horns,” mentioned in Gen 14 5 as the place of Chedor-lomer’s defeat of the Rephaim. See ASHTAROTH. A Carnain or Carnion in Gilead, with a temple of Atar-gatis attached, was captured by Judas Maccabaeus (1 Macc 5 43, 44; 2 Macc 12 26).

The name and cult of the goddess were derived from Babylonia, where Istar represented the evening and morning stars and was accordingly an-
drogonous in origin. Under Sem influence, however, she became solely female, but retained a memory of her primitive character by standing, alone among the Assyro-Bab goddesses, on a footing of equality with the male divinities. From Babylonia the worship of the goddess was carried to the Semites of the West, and in most instances the feminine suffix was attached to her name; where this was not the case the deity was regarded as a male. On the Moabite Stone, for example, 'Ashter is identified with Chemosh, and in the inscriptions of southern Arabia 'Ahtar is a god. On the other hand, in Arat-galis or Derketu (2 Macc 12:26), Arab, without the feminine suffix, is identified with the goddess 'Athah or 'Athi (Gr Gatis). The cult of the Gr Aphrodité in Cyprus was borrowed from that of Ashtoreth; whether the Gr name also is a modification of Ashtoreth, as has often been maintained, is doubtful.

In Babylonia and Assyria Istar was the goddess of love and war. An old Bab legend related how the descent of Istar into Hades in search of her dead husband, Tammuz, was followed by the cessation of marriage and birth in both earth and heaven, while the temples of the goddess at Nineveh and Arbela, around which the two cities afterward grew up, were dedicated to her as the goddess of war. As such she appeared to one of Assur-bani-pal's seers and encouraged the Assyrian king to march against Elam. The other goddesses of Babylonia, who were little more than reflections of the god, tended to merge into Istar who thus became a type of the female divinity, a personification of the productive principle in nature, and more especially the mother and creatress of mankind.

The chief seat of the worship of Istar in Babylonia was Erech, where the institution was practised in her name, and she was served with immoral rites by bands of men and women. In Assyria, where the warlike side of the goddess was predominant, no such rites seem to have been practised, and, instead, prophetesses were attached to her temples to whom she delivered oracles.

In Canaan, Ashtoreth, as distinguished from the male Ashtar, dropped her warlike attributes, but in contradistinction to Asherah, whose name and cult had also been imported from Assyria, became, on the one hand, the colorless consort of Baal, and on the other hand, a moon-goddess. In Babylonia the moon was a god, but after the rise of the solar theology, when the number of the Bab gods were resolved into forms of the sun-god, their wives also became solar. Baal, the 'son of light' the moon-god, remaining identified with the evening-star. In Canaan, however, when the solar theology had absorbed the older beliefs, Baal, passing into a sun-god and the goddess who stood at his side becoming a representative of the moon—the pale reflection, as it were, of the sun—Ashtoreth came to be regarded as the consort of Baal and took the place of the solar goddesses of Babylonia.

Hence there were as "many Ashtoreths" or Ashtarah as Baals. They represented the various forms under which the goddess was worshipped in different localities (e.g. Local 10:6; 1 S. 7:4; 12:10, etc.). Some Ashtarah times was she addressed as Naamah, the "delightful one," or "astro-nos," the mother of Eshmun and the Cabeiri. The Phûis seem to have adopted her under her warlike form (1 S. 31:10 AV reading "Ashtoreth," as LXX), but she was more usually the moon-goddess (Lucian, De Dea Syr., 4; Herodian, v.6, 10), and was accordingly symbolized by the horn of a cow. See AshTAROTH—KARMALM. At Ashkelon, where Herodotus (i.105) places her most ancient temple, she was worshipped under the name of Arat-galis, as a woman with the tail of a fish, and fish were accordingly sacred to her. Elsewhere the dove was her sacred symbol. The immoral rites with which the worship of Istar in Babylonia was accompanied were transferred to Canaan (Dt. 23:18) and formed part of the idolatrous practices which the Israelites were called upon to extirpate.

A. H. SAYCE

ASHUR, ashùr. See ASIHUR.

ASHURBANIPAL, a-shu'or-hi'təp-pal (Ashur-bānipal, "Ashur creates a son"): Before setting out on his last campaign to Egypt, Esarhaddon king of Assyria doubtless having had some premonition that his days were numbered, caused his son Ashurbanipal to be acknowledged the crown prince of Assyria (668 BC). At the same time he proclaimed his son Shamash-shum-ukin as the crown prince of Babylonia. At the father's death the latter, however, was only permitted to become viceroy of Babylonia.

Ashurbanipal is generally believed to be the great and noble Esnappar (Esr 4:10). See Osnappar. If this identification should not prove correct, the king is not mentioned by name in the OT. In the annals of Ashurbanipal there is a list of twenty tributary kings in which Manasseh (written Mineal) of the land of Judah is mentioned. With a few exceptions the list is the same as that given by Esarhaddon, his father. In 2 Ch. 33:11 ff. we learn that the captains of the host of the king of Assyria took Manasseh with hooks and bound him with fetters, and carried him to Babylon. The king to whom reference is made in this passage was either Esarhaddon or Ashurbanipal. If the latter, his restoration of Manasseh was paralleled in the instance of Nebcho, the vassal king of Memphis and Sais, who also had revolted from Assyria; for he was accorded similar treatment, being sent back to Egypt with special marks of favor, and reinstated upon his throne.

Another reference in the OT, at least to one of the acts of Ashurbanipal, is the prophecy of Nahum, who in predicting the downfall of Nineveh, said, "Art thou [Nineveh] better than No-amon?" This passage is illustrated by the annals of the king, in which he recounts the destruction of the city. No (meaning "city") is the name of Thebes, while Amon (or Amen) was the chief deity of that city.

Esarhaddon died on his way to Egypt, which he had previously conquered, an inscription having taken place. Tirhakah, whom Esarhaddon had been carrying as a prisoner, who had fled and returned, and had advanced against the rulers appointed by Assyria. He formed a coalition with Nebcho and others. Not long after Ashurbanipal came to the throne, he set out for Egypt and defeated the forces. The leaders of the insurrection were carried to Nineveh in fetters. Nebcho, like
Manasseh, as mentioned above, was restored to his rule at Sais. Tirhakah died shortly after. His sister's son Tanut-Anon (Tandami) then took up the cause, and after the departure of the Assyrian army he advanced against the Assyrian vassal government. The Assyrian army returned, the city was relieved and besieged. Tanut-Anon returned to Thebes, which was conquered and which was spoiled by the rapacious Assyrians, 663 BC. This is what the prophet Nahum referred to (3:8). A few years later, Psammetik, the son of Necho, who had remained faithful after his restoration, declared his independence. As the Assyrian army was required elsewhere, Egypt was henceforth free from the yoke of the Assyrian.

Bal al Tyrus after a long siege, finally submitted. Yakinlu, king of Arvad, paid tribute and sent hostages. Other rebellious subjects, who had become emboldened by the attitude of Tirhakah, were brought into submission. Under Uriakli, the old enemy Elam, which had been at peace with Assyria since the preceding reign, now became aggressive and made inroads into Babylonia. Ashurbanipal marched through the Zagros mountains, and suddenly appeared before Susa. This move brought Yakinlu, king of Arvad, in the reign of Uriakli, back to his capital. Elam was humiliated.

In 652 BC the insurrection of Shamash-shum-ukin, the king's brother, who had been made viceroy of Babylon, broke out. He desired to establish his independence from Assyria. After Ashurbanipal had overcome Babylon, Shamash-shum-ukin took refuge in a palace, set it on fire, and destroyed himself in the flames.

There is much obscurity about the last years of Ashurbanipal's reign. The decedence of Assyria had not resulted not only in the loss to the title of the surrounding countries, but also in its complete annihilation before the cent. was over. Nineveh was finally razed to the ground by the Umman-Manda hordes, and was never rebuilt.

Ashurbanipal is also distinguished for his building operations, which show remarkable architectural ingenuity. In many of the cities of Assyria and Babylonia he restored, enlarged or embellished the temples or shrines. In Nineveh he reared a beautiful palace, which excelled all other Assyrian structures in the richness of its ornaments and ornamentation.

During his reign the study of art was greatly encouraged. Some of his exquisite sculptures represent not only the height of Assyrian art, but also belong to the most important aesthetic treasures of the ancient world. The themes of many of the chief sculptures depict the hunt, in which the king took special delight.

Above all else Ashurbanipal is famous for the library he created, because of which he is perhaps to be considered the greatest known patron of literature in the pre-Christian centuries.

For Bibliography see ASSYRIA. A. T. CLAY

ASHURITES, ash'ur-its (אֲשֻרִים, ha-ash'or): According to the MT of 2 S 2 9, a tribe included in the short-lived kingdom of Ish-bosheth, Saul's son. A slight textual correction gives 'Asherites,' that is, the tribe of Asher; with this the Tg of Jonathan agrees. The tribe of Asher lay where it would naturally fall to Ish-bosheth's kingdom. The reading 'Geshurites' (Vulg and Syr) is excluded by the known independence of Geshur at this time (2 S 3 3; 13 37). For similar reasons we cannot think of Assyria (Heb Asshur) nor of the Arab. Asshurnim of Gen 26 3.

ASHVATH, asv'ath (אֵשֵׁב, 'asv'ath): A man of Asher, of the house of Japheth (1 Ch 7 33).

ASIA, 'āši-a ('Asia, Asia): A Rom province embracing the greater part of western Asia Minor, including the older countries of Myasia, Lydia, Caria, and a part of Phrygia, also several of the independent vassal cities, the Tyanae, and apparently the islands of Lesbos, Samos, Patmos, Cos and others near the Asia Minor coast (Acts 16 6; 19 10. 27). It is exceedingly difficult to determine the exact boundaries of the several countries which later constituted the Rom province, for they seem to have been somewhat vague to the ancients themselves, and were constantly shifting; it is therefore impossible to trace the exact borders of the province of Asia. Its history previous to 133 BC coincides with that of Asia Minor of which it was a part. However, in that year, Attalus III (Philometer), king of Pergamos, bequeathed his kingdom to the Rom Empire. It was not until 129 BC that the province of Asia was really formed by Rome. Its first capital was Pergamos, the old capital of Myasia, but in the time of Augustus, when Asia had become the most wealthy province of the Empire, the seat of the government was transferred to Ephesus. Smyrna was also an important rival of Ephesus. The government of Asia was a pro-consul, chosen by lot by the Romans from among the former consuls who had been out of office for at least five years, and he seldom continued in office for more than a single year. The diet of the province, composed of representatives from its various districts, met each year in the different cities. Over it presided the asiarch, whose duty it was, among other things, to offer sacrifices for the welfare of the emperor and his family.

In 285 AD the province was reduced in size, as Caria, Lydia, Myasia and Phrygia were separated from it, and apart from the cities of the coast little remained. The history of Asia consists almost entirely of the history of its important cities, which were Adramyttium, Assos, Cnidus, Ephesus, Laodicea, Miletus, Pergamos, Philadelphia, Sardis, Smyrna, Thyatira, Troas, etc. E. J. BANKS

ASIA MINOR, 'āši-a mīn'ēr: Introductory

I. The Country

1. Position and Boundaries
2. General Description
3. Mountains
4. Rivers, Lakes and Plains
5. Roads
6. Climate and Products

II. History

1. The Hittites
2. Phrygians and Bithynian Immigrations
3. Lydian and Persian Conquests
4. Alexander and His Successors
5. The Roman
6. The Romans

III. A.M. in the 1st Cent. AD

1. The Population
2. The Native Social System
3. Emperor Worship
4. The Hellenistic System
5. Roman colonies

IV. Christianity in A.M. (Asia Minor)

Literature

Technically, it is only on sufferance that an account of 'Asia Minor' can find a place in a Biblical encyclopedia, for the country to which

Introduct-- this name applies in modern times was tory never so called in OT or NT times.

The term first appears in Orosius, a writer of the 5th cent. AD, and it is now applied in most European countries and in this work to the peninsula forming the western part of Asiatic Turkey.

The justification for the inclusion in this work of a summary account of A.M. as a whole, its geography, history, and the social and political condition of its people, is to be found in the following sentence of Gibbon: "The riv
that extend from the Euphrates to the Ionian Sea were the principal theatre on which the Apostles to the Gentiles displayed his zeal and piety; and no region outside the city of Rome has preserved to modern times so many records of the growth and character of its primitive Christianity.

1. Position and Boundaries

on the S., forms a natural bridge between central Asia and southeastern Europe. On the N.W. corner, the peninsula is separated from Europe by the Bosphorus, the Sea of Marmora and the Hellespont. On the W. the peninsula borders on the Aegean Sea, whose numerous land-locked bays and harbors of this coast have made it the happy hunting-ground of Mediterranean traders in all ages. On the E. it is usual to delimit A.M. by a line drawn from Alexandretta to Samsun. For purposes of history, it must be remembered that part of Cilicia, Cappadocia and Pontus (Galatia) lie to the E. of this line (Long. 26° to 36° E.; lat. 36° to 42° N.).

There are two distinct countries, implying distinct historical development. In the S. coast, Apulia, the country of the coast, and the 2. General country of the central plateau. The latter takes its shape from that of the great mountain ranges which bound it on the W., E., and S. The Apulian plain is tilted down toward the N. and W.; the mountain ranges on these sides are not so lofty as the Taurus chain on the S. and S.E. This chain, except at its S.E. corner, rises sharply from the S. coast, whose undulations it determines. On the N., the mountains of Pontus (no distinctive name), a continuation of the Armenian range, give the coast-line a similar character. On the inhospitable N. coast, there is only one good harbor, that of Sinope, and no plain of any extent. In the S., the plains of Pamphylia and Cilicia, both highly fertile, the harbors of Makri and Marmarliki, and the sheltered bays of Adalia and Alexandretta. On the W., the ascent from the littoral to the plateau is sharp. The Pyramus valley, which separates the Phrygian mountains, where the oriental plateau begins, from the W. seaboard with its inlets and trading cities. These hundred miles are composed of river valleys, divided off by mountain ranges, and forming the channels of communication between the interior and the coast. While these two regions form part of a single country it is obvious that—in all that gives individuality to a country, their flora, fauna, climate, conditions of life and history—the one region is sharply marked off from the other. For the plateau naturally connects itself with the E. In its vegetation and climate, its contrasts of temperature, its dry soil and air, it forms part of the region extending eastward to central Asia. The coast land recalls the scenery and general character of the Gr mainland and islands. It naturally looked to, it influenced and was influenced by, the populations on the other side of the Aegean Sea. At Smyrna, the traveler in all ages recognizes the bright, active life of the Aegean; and from him he feels the stimulating and lethargic calm of the East. A.M. in its geographical structure as well as in its population, has been throughout history the meeting-place, whether for peaceful intermixture or for the clash in war, of the eternally contended systems of East and West.

The Armenian mountains reach westward, and, fork, close to the line we have chosen as the E. boundary of A.M., into two ranges, the Taurus Mountains on the S., and the mountains of Pontus on the N. Mount Argesus (over 12,000 ft.) stands in the angle formed by these ranges, nearer to Taurus than to the northern system. Taurus is pierced on the northern side of the Cilician plain by the pass, easy to traverse and still more easy to defend, of the Olympos Gates, another route leads from central Cappadocia to Amisus on the Black Sea. These mountain ranges (average height of Taurus 7,000 to 10,000 ft.; the N. range is much lower) enfold the central Galatian and Lycaonian plains, which are bounded on the W. by the Sultan Dagh and the Phrygian mountains. From the latter to the west coast extend three mountain ranges, delimiting the valleys of the Caicus, Hermus and Maeander. These valleys lie E. and W., naturally conducting traffic in those directions.

The great plains of the interior, covering parts of Galatia, Lycaonia and Cappadocia, lie at an altitude of from 3,000 to 4,000 ft. Rivers enter the plains from the mountains, to be swallowed up in modern times in salt lakes and swamps. In ancient times much of this water was used for irrigation. Regions which now support only a few scattered villages were covered in the Roman period by numerous large cities, implying a high degree of cultivation of the naturally fertile soil. The remaining rivers cut their way through rocky gorges in the fringe of mountains around the plateau; on the W. side of the peninsula their courses open into broad valleys, among which those of the Caicus, Hermus and Maeander are among the most fertile in the world. Down those western valleys, and that of the Sangarius on the N.W., ran the great highways from the interior to the seaboard. In those valleys sprang up the greatest and most prosperous of the Hellenistic and Gr-Rom cities, from which Gr education and Christianity radiated over the whole country. The longest river in A.M. is the Halys, which can be traced as the Euphrates, and rises in enormous bend south-westward flows into the Black Sea. This, and the Iris, E. of Amisus, are the only rivers of note on the N. coast. The rivers on the S. coast, with the exception of the Sarus and the Cimmerian Bosporus, are mountain torrents, flowing immediately into the sea. A remarkable feature of A.M. is its duden, rivers disappearing underground in the limestone rock, to reappear as springs and heads of rivers many miles away. Mineral and thermal springs abound all over the country, and are especially numerous in the Maeander valley. There are several salt lakes, the largest being Lake Tatta in Lycaonia. Fresh-water lakes, such as Karalis and the Limnæ, abound in the mountains in the S.W.

The road-system of A.M. is marked out by Nature, and traffic has followed the same lines since the dawn of history. The chief traveler from the Euphrates or from Syria enters by way of Meltene and Caesarea, or by the Cilician Gates. From Caesarea he can reach the Black Sea by Zela and Amisus. If he continues westward, he must enter the Aegean area by one of several routes. One, which is now above, by the valleys of the Maeander, Hermus or Caicus. If his destination is the Bosphorus, he travels down the valley of the Sangarius. Other roads lead from the bay of Adalia to Antioch in
Pisidia or to Apameia, or to Laodicea on the Lycus and thence down the Maeander to Ephesus. The position of the Hittite capital at Pteria fixed the relations of the Lydian empire. As it was the main general route for travelers from E. to W., and this was the route followed by the Pers Royal Road. Later, traffic from the E. took the route passing along the S. side of the Arzylon, N. of Iconium, and Pisidian Antioch to the Lycus, Maeander and Ephesus. This route coincides with that from the Cilician Gates, from a point N.E. of Iconium. The need to control the Pisidian tribes in the reign of Augustus led to the building of a series of roads in Pisidia, radiating from these roads from Antioch to Lystra, and it was the one traversed by Paul on his journey from Antioch to Iconium (Acts 13 51).

The winter on the central plateau is long and severe, the summer is short and hot: but a cool breeze from the N. (the Black Sea) to the clime of the West coast resembles that of southern Europe. The country contains vast mineral wealth; many of the mines were worked by the ancients. There are forests of pine, oak and fir in the mountains of the N. and S. The Black Sea has always been famous for its vast flocks of sheep. King Amyntas of Galatia owned enormous flocks which pastured on the Lycaonian plain. Carpets and rugs and other textile products have always been characteristic of Asia Minor. The wealth of the cities in the province of Asia depended largely on textile and dyeing industries (Rev 1 3).

II. History.—It follows from what has been said above that the clue to the history of A.M. more than in the case of any other country, lies in its geographical position and structure. “Planted like a bridge between Asia and Europe,” it has been throughout human history the meeting-place and the battle ground of the peoples of the East and those of the West. From the earliest period to which our records reach, we find it inhabited by an amalgam of races, religions and social systems, none of which has ever quite died out. And throughout history new racial and national systems, alike incomparable in many of their features, have poured into the peninsula to find a home there.

At the dawn of history, A.M. was ruled by a non-Aryan people, the Hatti or Hittites about which knowledge of the coast is accumulating so fast that no final account of them is possible. See Hittites. A.M. is now recognized to have been the center of their civilization, as against the older view that they were a Mesopotamian people. Sculptures and hieroglyphs belonging to this people have long been known over the whole country from Smyrna to the Euphrates, and it is almost unanimously assumed that their capital was at Boghazi Keui (across the Halys from Ancyra). This site has been identified with much probability with the Pteria of Herodotus, which Croesus captured when he marched against the Persians, the inference being that the portion of the Hittite land which lay off the Halys was at that time a satrapy of the Pers Empire. Excavations in the extensive ancient city at Boghazi Keui have recently been carried out by Winckler and Puchstein, who have discovered remains of the royal archives. These records are written on clay tablets in cuneiform script; they are in the same tongue (supposedly) in the still undeciphered native language. The documents in the Bab tongue prove that close political relations existed between the Hatti and the eastern monarchy. In the 14th cent. BC the Hittites appear to have conquered a large part of Syria, and to have established themselves at Carchemish. Thenceforth, they were in close touch with Mesopotamia. From about the beginning of the first millennium, the Hittites “were in constant relations, hostile or neutral, with the Ninevites, and thenceforward they are shown such marked Assyrian characteristics that it hardly retains its individuality.”

The date of the Phrygian and Bithynian immigrations from southeastern Europe cannot be fixed with certainty, but they had taken place by the beginning of the first millennium. BC The Phrygian immigrations coincide in time with the decline of the eastern side of the plateau, and no power exercised such an influence on the early development of A.M. as the Phrygian, principally in the sphere of religion. The kings of Phrygia “bulked more impressively in the Gr mind than any other non-Gr monarchy; their language was the original language and the speech of the godhead herself; their country was the land of great fortified cities, and their kings were the associates of the gods themselves.” The material remains of the “Phrygian country”—the tomb of Midas with the fortified acropolis above it, and the many vases and coins for which the country was famous—are the most impressive in A.M. Inscriptions in a script like the early Ionian are cut on some of the tombs. The Phrygian language, an Indo-Germanic speech with resemblances to both Gr and the Italian languages, is proved by inscriptions (a score of them still unpublished) to have been in common use well into the Christian period. Two recently found inscriptions show that it was spoken even in Iconium, “the furthestmost city of Phrygia,” on the Lycaonian side, until the 3d cent. of our era. Those inscriptions mention the names of Ma (Cyble) and Attis, whose cult exercised a profound influence on the religions of Greece and Rome.

The next monarchy to arise in A.M. is that of Lydia, whose origin is obscure. The Phrygian empire had fallen before an invasion of the Persians, of the Cimmerians in the 9th or 8th cent. A.M. and the Persians (617 BC). Croesus, king of Lydia (both names afterward proverbial for wealth), was lord of all the country to the Halys, as well as of the Gr colonies colonies—colonists bands from Hellas—had reached their zenith by the 5th cent. and studded all three coasts of A.M. Their inability to combine in a common cause placed them at the mercy of Croesus, and later of his conquerors, the Persians (546 BC). The Persians divided A.M. into satrapies, but the Gr towns were placed under Gr dynasts, who owned the suzerainty of Persia, and several of the inland races continued under the rule of their native princes. The defeat of Xerxes by Hellas set the Gr cities in A.M. free, and they continued free during the period of Athenian greatness. In 386 BC they were restored to the king of Persia by the selfish diplomacy of Sparta.

When Alexander the Great crossed the Hellespont in 334 BC, a new era opened for the Asiatic Greeks. Hitherto the Gr cities in A.M., apart from spasmodic efforts at combination, had been mere trading communities, independent of each other, in competition with each other, and often for purposes of power striving to bring each other to ruin. These colonies had moreover been confined to the coast, and to the open river valleys of the west. The idea of a Gr
emprise in A.M. was originated by Alexander, and materialized by his successors. Henceforward the city rivalries certainly lasted on, and at a later period we have St. Paul's sermon to the Galatians; but henceforward the Gr cities were members of a Gr empire, and were conscious of an imperial mission. It is to this period that the Hellenization or, as Mommsen would tr the term, the civilization of the interior of A.M. belongs. The foundations of Alexander's successors, the Attalids and Seleucids, covered the peninsula; their object was to consolidate the Gr rule over the native races, and, most important of all, to raise those races to the Gr level of civilization. The experiment succeeded only partially and temporarily; but such success as it and the later Rom effort in the same direction had, exercised a profound influence on the early growth of Christianity in the country (see below).

In their manner of entering and settling in the country, in the way in which they both came under the influence of the Asiatic environment, and impressed the stamp of their vigorous individuality on the culture and the history of the land, the Galatae, a Celtic nation who crossed from Europe in 278-277 BC, to establish themselves ultimately on the E. of ancient Phrygia and on both sides of Halys, are the chief feature of the Phrygian immigration of a thousand years earlier. 'The region of Galatia, at a remote period the chief seat of the oriental rule over anterior Asia, and preserving in the famed rock-sculptures of the modern Bosphorus Keui, formerly the royal town of Pteria, reminiscences of an almost forgotten glory, had in the course of centuries. become in language and manners a Celtic island amidst the waves of eastern peoples, and remained so in internal organization even under the [Rom] empire. 'But these Gauls came under strong oriental influence; they modified to some extent the organization of the local religion, which they adopted; but they adopted it so completely that only one deity with a Celtic name has so far appeared on the numerous cult-inscriptions of Galatia (Anderson in Jour. of Hell. Studies, 1910, 163 ff.). Nor has a single inscription in the Galatian language been found in the country, although we know that such language was spoken by the eastern Gauls as late as the 2nd cent. AD. The Galatian appears to have superseded the Phrygian tongue in the part of Galatia which was formerly Phrygian; no Phrygian inscriptions have been found in Galatia, although they are common in the district bordering on its southern and western boundaries. But Galatian was unable to compete with Gr as the language of the educated classes, and even such among the humbler orders as could write, wrote in Gr, and Gr-Rom city-organization replaced the Celtic tribal system much earlier and much more completely in Galatia than Rom municipal organization did in Gaul. Still, the Galatians stood out in strong contrast both to the Greeks and to the Orientals. Rom diplomacy recognized and encouraged this sense of isolation, and in her struggle against the Orientals and the Greeks under Mithridates, Rome found trusty allies in the Galatians. In the imperial period, the Galatians were considered the best soldiers in A.M. See GALATIA.

6. The Romans in A.M. The Romans secured an effective control over the affairs of A.M. after their defeat of Antiochus the Great in 189 BC, but it was only in 133 BC, when Attalus of Pergamus bequeathed his kingdom of 'Asia' to the Rom emperor, that the Rom occupation began. This kingdom formed the province Asia; a second inheritance which fell to Rome at the death of Nicomedes III in 74 BC became the province Bithynia, to which Pontus was afterward added. Cilicia, the province which later was to leave St. Paul wrote to the Galatians; but henceforward the Galatian was annexed in 100 BC, and reorganized by Pompey in 66 BC. These provinces had already been organized; in other words the Rom form of government had been definitely established in them at the foundation of the empire, and, in accordance with the principle that all territory which had been thoroughly "pacified" should remain under the administration of the senate, while the emperor directly governed regions in which soldiers in numbers were stationed. The only provinces, with the exception of Cilicia, fell to the senate. But all territory subsequently annexed in A.M. remained in the emperor's hands. Several territories over which Rome had exercised a protectorate were now organized into provinces, under direct imperial rule. Such were: Galatia, to which under its last king Amyntas, part of Phrygia, Lycæonia, Pisidia and Pamphylia had been added, and which was made a Rom province at his death in 25 BC (the extension of Galatia under Amyntas to include Antioch, Iconium, Lystra and Derbe and the consequent incorporation of these cities in the province Galatia, forms the ultimate historical basis of the 'South Galatian Theory'); Paphlagonia, bounded on the E. by the Taurus, and in 43 AD, and in 63 AD the part of Pontus lying between the Iris and Armenia. This formed the Roman A.M. of Paul's time. See Asia; BITHYNIA, etc.

III. A.M. in the First Century AD.—The partition of A.M. into Rom provinces did not correspond to its ethnological divisions, and even those divisions were not always clearly marked. As is clear from the brief notice above, the population of A.M. was composed of many overlapping strata of races, which tended in part to lose their individuality and sink into the original Anatolian type. Answering roughly to the above-mentioned separation of A.M. into two countries, and to its characterization as the meeting-place of East and West, we can detach from among a medley of races and institutions two main coexistent social systems, which we may call the native system, and the systems of Asia (esp. as the result of Rom government) overlap and blend with each other, but they correspond in a general way to the distinction (observed in the country by Strabo) between city-organization and life on the village system. A deep gulf separated these forms of society.

Under the Rom Empire, there was a continuous tendency to raise and absorb the Anatolian natives into Gr cities and Rom citizenship. But in the Apostolic Age, this process had not gone far in the interior of the social country, and the native social system was still that under which a large section of the population lived. It combined the theocratic form of government with institutions derived from a preexistent matriarchal society. The center of the native community was the temple of the god, with its great corporation of priests living on the temple revenues, and its people, who were the servants of the god (hierodoulos; cf. St. Paul's expression, "servant of God"), and worked on the temple estates. The villages in which these workers lived were an inseparable adjunct of the temple, and the priests (or a single priest-dynast) were the absolute rulers of the villages. The priest of the temple (hieros) performed special functions (probably for a period only) in the temple service. This included, in the case of women, sometimes a
service of chastity, sometimes one of ceremonial prostitution. A woman of Lydia, of good social position (see Acts 16:14), boasted in an inscription that she comes of ancestors who had served before the god in this manner, and that she has done so herself. Such women afterward married in their own rank, and incurred no disgrace. Many inscriptions prove that the god (through his priests) exercised a close supervision over the whole moral life and over the whole daily routine of his people; he was their Ruler, Judge, Helper and Healer.

Theocratic government received a new direction and a new meaning from the institution of emperor-worship; obedience to the god now

3. Emperor coincided with loyalty to the emperor. Worship The Seleucid kings and later the Roman emperors, according to a highly probable view, became heirs to the property of the dispossessed priests (a case is attested at Pisidian Antioch); and it was out of the territory originally belonging to the temples that grants of land to the new Seleucid and Rom foundations were made. On those portions of an estate not gifted to a polis or colonia, the theocratic government lasted on; but alongside of the Anatolian god there now appeared the figure of the god-emperor. In many places the temple founded and established in the most important shrine of the neighborhood; the god-emperor succeeded to or shared the sanctity of the older god, grecized as Zeus, Apollo, etc.; inscriptions record dedications made to the god and to the emperor jointly. Elsewhere, in the cities, new temples were founded for the worship of the emperor. A.M. was the home of emperor-worship, and nowhere did the new institution fit so well into the existing religious system. Inscriptions have been recently found from which light on the existence of a society of Xenoi Tekmenorei ("Guest-Friends of the Secret Sign") who lived on an estate which had belonged to Men Askaoes beside Antioch of Pisidia, and was now in the hands of the Rom emperor. A procurator (who was probably the chief priest of the local temple) managed the estate as the emperor's representative. This society is typical of many others whose existence in inner A.M. has come to light in recent years; it was those societies centered around the temple of which we are best acquainted that on its local as distinct from its provincial side (see Asia), and it was chiefly those societies that set the machinery of the Rom law in operation against the Christians in the great persecutions. In Asia many of the existing (and the new) estates tended to pass into a condition of servdom; but occasionally an emperor raised the whole or part of an estate to the rank of a city.

Much of inner A.M. must originally have been governed on the theocratic system, but the Gr city-state gradually encroached on the territory and privileges of the ancient temple. Several of these cities were "colonized" by the Seleucids and Antiochus. This sometimes meant a new foundation, more often the establishment of Gr city-government in an older city, with an addition of new inhabitants. These inhabitants were often Jews whom the Seleucids found trustworthy colonists: the Jews of Antioch in Pisidia (Acts 13:14 ff) probably belong to this class. The conscious aim of those foundations was the Hellenization of the country, and their example influenced the neighboring cities. With the oriental absolutism of the native system the introduction of Christianity was in sharp contrast. In the earlier cents. of the Rom Empire these cities enjoyed a liberal measure of self-government. Magistrates were elective; rich men in the same city vied with each other, and city vied with city, in erecting magnificent public buildings, in founding schools and promoting intellectual and artistic culture; yet, all that was done was done by means of the soil by civilization. With the Gr cities came the Gr Pantheon, but the gods of Hellenes did little more than add their names to those of the gods of the country. Wherever we have any detailed information concerning a cult in inner Anatolia, we recognize under a Gr or (Rom) disguise the essential features of the old Anatolian god.

The Greeks had always despised the excesses of the Asiatic religion, and the more advanced education of the Anatolian Greeks could not reconcile itself to a degraded cult, which sought to perpetuate the social institutions under which it had arisen, only under their ugliest and most degraded aspects. 'In the country generally a higher type of society was maintained; whereas at the great temples the primitive social system was kept up as a religious duty incumbent on the class called Hieroi during their regular periods of service at the temple...'. The chasm that divided the religion from the educated life of the country became steadily wider and deeper. In this state of things St. Paul entered the country; and wherever education had already been diffused, he found converts ready and eager. This accounts for "the marvelous and the marvellous" Acts of the preaching of the Apostle in Galatia" (Ramsay, Cities and Bishoprics of Phrygia, 96).

Under the Rom Empire, we can trace a gradual evolution in the organization of the Gr cities toward a municipal type. One of the main factors in this process was "Coloniae". The foundation over inner A.M. of Rom colonies, which were "bits of Rome" set down in the provinces. These coloniae were organized entirely on the Rom model, and were usually garrisons of veterans, who kept unruly parts of the country in order. Such in NT time were Antioch and Lystra (Ioniaum, which used to be regarded a colonia of Claudius, is now recognized to have been raised to that rank by Hadrian). In the 1st cent. Lat was the official language in the coloniae; it never ousted Gr in general usage, and Gr soon replaced it in official documents. Education was at its highest level in the Gr towns and in the Rom towns in the same way; but in the Gr the emphasis on the education of the young people, who were educated exclusively that St. Paul addressed the gospel.

IV. Christianity in A.M.—Already in St. Paul's lifetime, Christianity had established itself firmly in many of the greater centers of Gr-Rom culture in Asia and the imperial center of Ephesus, the capital of the province Asia, and the terminus of one of the great routes leading along the peninsula, contributed largely to the spread of Christianity in the inland parts of the province, and esp. in Phrygia. Christianity, in accordance with the program of St. Paul, first took root in the cities, from which it spread over the country districts.

The Christian inscriptions begin earliest in Phrygia, where we find many documents dating from the end of the 2d and beginning of the 3d cents. AD. The inscriptions, main characteristic of those early etc. inscriptions—a feature which makes them difficult to recognize—is their suppression as a rule of anything that looked overtly Christian, with the object of avoiding the notice of persons who might induce the Rom officials to take measures against their dedicants. The Lycian inscriptions of the 2d and 3d cents. later, not, we must suppose, because Christianity spread less rapidly from Iconium, Lystra, etc., than it did from the Asian cities, but because Gr education took longer to permeate the sparsely populated
 plains of the central plateau than the rich townships of Asia. The new religion is proved by Pliny's correspondence with Trajan (111–13 AD) to have been firmly established in Bithynia early in the 2d cent. farther east, where the great temples still had much influence, the expansion of Christianity was slower, but in the 4th cent. Cappadocia produced such men as Basil and the Gregorys. The great persecutions, as is proved by literary evidence and by many inscriptions, raged with especial severity in A.M. The influence of the church on A.M. in the early cent. of the Empire may be judged from the fact that securely a trace of the Mithraic religion, the principal competitor of Christianity, has been found in the whole country. From the date of the Nicene Council (325 AD) the history of Christianity in A.M. was that of the Byzantine Empire. Ruins of churches belonging to the Byzantine period are found all over the peninsula; they are especially numerous in the central and eastern districts. A detailed study of a Byzantine Christian town of Lycaonia, containing an exceptionally large number of churches, has been published by Sir W. M. Ramsay and Miss G. L. Bell: The Thousand and One Churches. Gr-speaking Christian villages in many parts of A.M. continue an unbroken connection with the Roman Empire till the present day.

LITERTUPE.-Ramsay's numerous works on A.M., especially St. Paul the Traveller, etc. The Church in the Rom Empire, The Cities of St. Paul, The Letters to the Seven Churches, and Cities and Bishoprics of Phrygia have been freely drawn upon in this account. For a fuller bibliography, see EB (11th ed.) art. "Asia Minor" (Hogarth and Wilson).

W. M. CALDER

ASIA MINOR, a'shi-a mi'nər, THE ARCHAEOLOGY OF, är'kē-ol'o-jē ov: At the present stage of our information it is difficult to write with acceptance on the archaeology of Asia Minor. Views unquestioned only a few years ago are already passing out of date, while the modern archaeologist, enthusiastically excavating old sites, laboriously deciphering worn inscriptions, and patiently collating documentary evidence, has by no means completed his task. But it is now clear that an archaeological field, worthy to be compared with those in the valleys of the Euphrates and the Nile, invites development in Asia Minor.

In the Contemporary Review for August, 1907, Professor Sayce reminded his readers that the Gr geographers called Cappadox the son of Ninyas, thereby tracing the origin of Cappadocian culture to Nineveh, from Mesoopotamia and similarly they derived the Mermotam, nad Dynasty of Lydia from Ninos the son of Belos, or from Babylonia through Assyria. Actual history is probably at the back of these legends, and the Table of Nations supports this (Gen 10 22), when it calls Lud, or Lydia, a son of Shem and brother of Asshur. This is not to assert, however, that any great number of Sem people ever made A.M. their home. But Professor Winckler and others have shown us that the language, script, ideas and institutions characteristic of the Bab civilization were widespread among the nations of western Asia, and from very early times A.M. came within their sphere of influence. Strabo records the tradition that Zile, as well as Tyana, was founded upon "the mound of Semiramis," thus connecting these ancient sites with the Mesopotamian culture. Dr. David Robinson in his Ancient Sinope (145 f), argues that "the early foundations of Sinope are probably Assyrian," though established history cannot describe in detail what lay back of the Milesian settlement of this the northern point and the best harbor of the peninsula. Neither could Strabo go back of the Milesian colonists for the foundation of Samsun, the ancient Amias, an important commercial city east of Sinope, but the accompanying illustration (Fig. 1) seems clearly to show the influence of Assyria. The original is a terra cotta figure of gray clay found recently in Old Samsun. Mesopotamian religious and cultural influences thus appear to have tinged A.M., at least at certain points, as far as the coast of the Black Sea, and indeed the great peninsula has been what its shape suggests, a friendly hand stretching out from the continent of Asia toward the continent of Europe.

FIG. 1.—Head from Old Samsun (Showing Assyro Influence).

Professor Sayce's article referred to above was based upon the evidence furnished by cuneiform tablets from Kara Eyuk, the "Black Mound," an ancient site just within the ox-bows of the Halys River near Cuncuba, ancient Mazaca. These tablets, as deciphered by himself and Professor Pimches, were of the period of Abraham, or of
Hammurabi, about 2250 BC, and were written in a dialect of Assyrian. The settlers were soldier colonists from the Assyrian section of the Bab empire, engaged in mining and in trade. Silver, copper and perhaps iron were the metals sought. “Time was reckoned as in Assyria by means of officials called limmi, who gave their name to the year.” The colonists had a temple with its priests, where financial transactions were carried on under the sanctity of religion. There were roads, mail carriers whose pouches were filled with cuneiform bricks, and commercial travelers who made a specialty of fine clothing. This makes quite natural the finding of a goodly Bab mantle by Achan at the pillage of Ai (Joel 7:21). Slavery is a recognized institution; a boy is sent to a barber for circumcision; a house, wife and children are pledged as security for a debt. An oath is taken on “the top of a staff,” an interesting fact that sheds its light on the vs describing the oath and blessing of dying Jacob (Gen 47:31; He 11:21). Early A.M. is thus lighted up at various points by the culture of Mesopotamia, and transmits some of the scattered rays to the Gr world.

The earliest native inhabitants to be distinguished in A.M. are the Hitites (see Hittites). Ever since 1872, when Dr. Wright suggested that the strange hieroglyphics on four Millennium black basalt stones which he had discovered at Hamath were perhaps the work of Hittite art, there has been an ever-growing volume of material for scholars to work upon. There are sculptures of the same general style, representing figures of men, women, gods, lions and other animals, eagles with double heads, sphinxes, musical instruments, winged discs and other symbols, all of which can be understood only in part. These are accompanied by hieroglyphic writing, undeciphered as yet, and the inscriptions read “boystrophedon,” that is from right to left and back again, as the oxen go in plowing an oriental field. There have also been discovered great castles with connecting walls

and ramps, gates, tunnels, moats, palaces, temples and other sanctuaries and buildings. More than this, occasional fragments of cuneiform tablets picked up on the surface of the ground led to the belief that written documents of value might be found buried in the soil. Malatia, Marash, Sinjirli, Sakje Gezi, Gurun, Boghaz-keuy, Eyuk, Karabel, not to mention perhaps a hundred other sites, have offered important Hittite remains. Carchemish and Kedesh on the Orontes were capital cities in northern Syria. The Hittites of the Holy Land, whether in the days of Abraham or in those of David and Solomon, were an offshoot from the main stem of the nation. A.M. was the true home of the Hittites.

Boghaz-keuy has become within the last decade the best known Hittite site in A.M., and may be described as typical. It lies in northern Cappadocia, fifty muleteer hours S. of Sinope. Yassili-kaya, the “written” or “sculptured” rocks, is a suburb, and Eyuk with its sphinx-guarded temple is but 15 miles to the N. It was the good fortune of Professor Hugo Winckler of the University of Berlin to secure the funds, obtain permission from the Turkish government, and, in the summer of 1906 to unearth over 3,000 more or less fragmentary tablets written in the cuneiform character and the Hittite language. This is the first considerable store of the yet undeciphered Hittite literature for scholars to work upon. These tablets are of clay, written on both sides, and baked hard and red. Often the writing is in ruled columns. The cuneiform character, like the Lat alphabet in modern times, was used far from its original home, and that for thousands of years. The language of a few Boghaz-keuy tablets is Bab, notably a copy of the treaty between Rameses II of Egypt and Khita-ear, king of the Hittites in central A.M. The scribes adopted not only the Bab characters but certain ideographs, and it is these ideographs which have furnished the key to provisional vocabularies of several hundred words which have

been published by Professors Pinches and Sayce. When Professor Winckler and his German collaborators publish the tablets they have deposited in the Constantinople museum, we may listen to

Fig. 3.—Hittite Lion, Boghaz-keuy; at the “Lion Gate.”
the voice of some Hittite Homer speaking from amid the dusty brinks written in the period of Moses. Beside Boghaz-keuy the beetle-towers of lofty Troy sink to the proportions of a fortified hamlet. Hittite sculptures show a very marked type of men, with squat figures, slant eyes, prominent noses and Mongolid features. We suppose they were of Turanian or Mongolid blood; certainly not Sem and probably not Aryan. As they occupied various important inland centers in A.M. before, during and after the whole of the second millennium BC, it is probable that they occupied much or most of the intervening territory (see Records of the Past for December, 1908). A great capital like Boghaz-keuy, with its heavy fortifications, would require extensive provinces to support it, and would extend its sway so as to leave no enemy within striking distance. The "Amazons" are now generally regarded as the armed Hittite priestesses of a goddess whose cult spread throughout A.M. The "Amazon Mountains," still known locally by the old name, run parallel with the coast of the Black Sea near the Iris River, and tradition current there now holds that the women are stronger than the men, work harder, live longer and are better at a quarrel! A comparative study of the decorated pottery, so abundant on the old sites of the country, makes it more than possible that the artificial mounds, which are so common a feature of the Anatolian landscape, and the many rock-hewn tombs, of which the most famous are probably those at Amasia, were the work of Hittite hands.

The Hittite sculptures are strikingly suggestive of religious rather than political or military themes. The people were pagans with many gods and goddesses, of whom one, or one couple, received recognition as at the head of the pantheon. Such titles as Sutekh of Carchemish, Sutekh of Kadesh, Sutekh of the land of the Hittites, show that the counterpart. She is represented in the sculptures with a youthful male figure, as a consort, probably illustrating the legend of Tammuz for whom the erring Heb women wept (Ezk 8 14). He was called Attys in later days. He stands for life after death, spring after winter, one generation after another. The chief god worshipped at Boghaz-keuy was Teshub. Another was named Khba, and the same name appears in the Tell el-Anarna correspondence from Jerus. This affords a remarkable illustration of the prophet's address to Jerus, "Your mother was a Hittite!" (Ezk 16 45).

The worship of the Hittites of the era of the Exodus is still seen pictured on the rocks at Yasili-kaya. This spot was the sanctuary of the metropolis. There are two hypaethral rock galleries, the larger of which has a double procession of about 80 figures carved on the natural rock walls, which have been smoothed for the purpose, and meeting at the inner recess of the gallery. The figures nearest the entrance are about half life-size. As the processions advance the height of the figures increases, until the two persons at the head, the chief priest and priestess or the king and queen, are quite above life-size. These persons advance curious symbols toward each other, each is followed by a retinue of his or her own sex, and each is supported—the priest-king upon the heads of two subjects or captives, and the priestess-queen upon a leopard. The latter figure is followed by her consort son.

The ruins at Eyuk are compact, and consist of a small temple, its sphinx-guarded door, and a double procession of approaching worshippers to the number of about 40. The main room of the sanctuary is only 7 yds. by 8 in measurement. This may be compared with the Holy Place in the tabernacle of the Israelites, which was approximately contemporary. Neither could contain a worshipping congregation, but only the ministering priests. The solemn sphinxes at the door suggest the cherubim that adorned the Israelite temple, and winged eagles with double heads decorate the inner walls of the doorway. Amid the sculptured

![Fig. 5.—Hittite Sculptures, Yasili-kaya.](image)

Chief god was localized in various places, perhaps with varying attributes. A commonation goddess was named Antarct. She was the great Mother Goddess of A.M., who came to outrank her male
processions moving on the basalt rocks toward the sanctuary is an altar before which stands a bull on a pedestal, and behind which is a priest who wears a large earring. Close behind the priest a flock of sheep was driven and a deed approach the sacrificial altar. Compare the description in Ex 32. The Israelites said to Aaron, “Up, make us gods”; he required their golden earrings, made a calf, “and built an altar before it”; they offered burnt offerings and brought peace offerings; they sat down to eat and drink and rose up to play. Israelite worship was in certain forms similar to the worship of the Hittites, but its spiritual content was wholly different. For musical instruments the Eyuk procession exhibits a lituus, a (silver?) trumpet and a shapely guitar. The animal kingdom is represented by another bull with a chest or ark on its back, a well-executed lion and two hares held in the two talons of an eagle. A spring close by furnished all the water required by the worshippers and for ritual purposes.

Professor Garstang in The Land of the Hittites shows that the power which had been waning after about 1200 BC enjoyed a period of recrudescence in the 10th and 9th centuries. He ascribes to this period the monuments of Sakje Gezici, which the professor himself excavated, together with other Hittite remains in A.M. The Vannic power known as Urartu, akin to the Hittites but separate, arose in the N.E.; the Phrygians began to dominate in the W.; the Assyrians pressed upon the S.E. The overthrow of the Hittites was completed by the bursting in of the desolating Cimmerian hordes, and after 717, when Carchemish was taken by the Assyrians, the Hittites fade from the archaeological records of their home land. See Asia Minor, II. 1.

Before the Hittites disappeared from the interior of A.M., sundry Aryan peoples, more or less closely related to the Greeks, were established at various points around the coast. Schliemann, of Trojan fame, was the pioneer archaeologist in this field, and his boundless enthusiasm, optimism and resourcefulness recovered the treasures of Priam’s city, and made real again the story of days when the world was young. Among the most valuable collections in the wonderful Constantinople Museum is that from Troy, which contains bronze axes and lance heads, implements in copper, talbots of silver, diadems, earrings and bracelets of gold, bone bodkins and needles, spindle whorls done in baked clay, numbers of idols or votive offerings, and other objects found in the Troad, at the modern Hissarlik. Phrygian, Thracean and subsequently Galatian immigrants from the N.W. had been filtering across the Hellespont, and wedging themselves in among the earlier inhabitants. There were some points in common between the Cretan or Aegean civilization and that of A.M., but Professor Hogarth in his Ionia and the East urges that these resemblances were few. It was otherwise with the Greeks proper. Herode-
Hogarth says of the region of the Midas Tomb, "There is no region of ancient monuments which would be better worth examination" by excavators. Then came Lydia, whose capital, Sardis, is now in process of excavation by Professor Butler and his American associates. Sardis was taken and Croesus dethroned by the Persians about 546 BC, and for two cents, until Alexander, Pers authority overshadowed A.M., but permanent influences were scanty.

By about the year 200 BC the Romans began to become entangled in the politics of the four principal kingdoms that then occupied A.M., namely Bithynia, Pergamus, Romans Pontus and Cappadocia. By slow degrees their influence and their arms advanced under such leaders civil and military as Sulla, Lucullus, Pompey, Cicero and Julius Caesar, while Attalus of Pergamus and Prusias of Bithynia bequeathed their uneasy do-

sound and as rough as when Rom chariots rumbled over them. Milestones were erected to mark the distances, usually inscribed in both Lat and Gr, and the decipherment of these milestone records contributes to the recovery of the lost history. Bridges over the important streams have been rebuilt and repaired by successive generations of men, but in certain cases the Rom character of the original stands clearly forth. The Romans were a building people, and government houses, aqueducts, baths, theaters, temples and other structures confront the archaeologist or await the labor of the spade. Epigraphical studies such as those of Professor Sterrett indicate what a wealth of inscriptions is yet to be recovered, in Lat as well as in Gr.

It was during the Rom period that Christianity made its advent in the peninsula. Christian discipies as well as Rom legions and governors used the roads, bridges and public buildings. Old church buildings and other religious foundations have their stories to tell. It is very interesting to read on Gr tombstones of the 1st or 2d cent. AD such inscriptions as: "Here lies the servant of God, Daniel," "Here lies the handmaid of God, Maria." Our great authority for this period is Sir William M. Ramsay, whose Historical Geography of A.M. and other works must be read by anyone who would familiarize himself with this rich field.

By almost imperceptible degrees the Rom era was merged into the Byzantine. We are passing so rapidly now from the sphere of

6. The Byzantine Period

archaeology to that of history proper that we must be brief. For a thousand years after the fall of Rome the Eastern Empire lived on, a Gr body pervaded with lingering Rom influences and with Constantinople as the pulsating heart. The character of the times was nothing if not religious, yet the prevailing Christianity was a syncretistic compound including much from the nature worship of earlier Anatolia. The first great councils of the Christian church convened upon the soil of A.M.,

the fourth being held at Ephesus in 431, and at this council the phrase "Mother of God" was adopted. We have seen that for fifty generations or more the people of A.M. had worshipped a great
mother goddess, often with her consort son. It was at Ephesus, the center of the worship of Diana, that eclectics, many of whom had but slight training in Christianity, adopted this article into their statement of religious faith.

Again the government of the country, the dominant race, the religion, language and culture, the dominant race—this time with the invasions of the Seljukian Turks. This tribe was the precursor of the Turks. Their Turks and later became absorbed among them. These Seljuks entered A.M., coming up out of the recesses of central Asia, but at the time the Normans were settling along the coasts of western Europe. Their place in history is measurably clear, but they deserve mention in archaeology by reason of their remarkable architecture. Theirs was a branch of the Scythian or M. (Commune Asia; and many examples remain in A.M. Mosques, schools, government buildings, khans, fortifications, fountains and other structures remain in great numbers and in a state of more or less satisfactory preservation, and they are buildings remarkably massive, yet ornate in delicacy and variety of tracery. The Ottoman Turks, cousins of the Seljuks, came up out of the central Asian hovve later, and took over by a memorial siege in 1453. With this event the archaeology of A.M. may be said to close, and history to cover the field instead.

GEORGE E. WHITE

ASIA, zerbai-erk (A 'Ard, Asirchek; ERV "the chief officer of Asia," AV "the chief of Asia"). The title given to certain men of high honorary rank in the Roman province of Asia. What their exact functions were is not altogether clear. They derived their appellation from the name of the province over which they presided (C Thyrne

A. M. Acts

The

Kapp

ASKELON, a'ske-lon: AV form in Jgs 1 18; 1 S 6 17; 2 S 1 20, for ASHEKELON (q.v.).

ASLEEP, a'sleep (Y, yahšen, "sleeping," G, rádhām, "deep sleep"); καθαὐδό, kathedó, "to fall asleep, ἀποκαταφείν, ἀποφεύεται, "to fall asleep"); A state of repose in sleep. Nature's release from weariness of body and mind, as of Jonah on shipboard (Jon 1 5); of Christ in the tempest-tossed boat (Mt 8 24); of the exhausted disciples in Gethsemane (Mt 26 43 AV). Used with beautiful and comforting significance of death (κοιμάομαι, koimáomai, "to put to sleep"). Sleep implies a subsequent waking, and as a symbol of death implies continued and conscious life beyond the grave. In the presence of death no truth has been so sustaining to Christian faith as this. It is the distinct product of Christ's resurrection. Paul speaks of departed believers as having "fallen asleep in Christ" (1 Cor 15 58); as proof of the soul's immortality he terms the risen Christ "the first-fruits of them that are asleep." Lazarus and Stephen, at death, are said to have fallen asleep (Jn 11 11; Acts 7 60); of David and the ancient patriarchs (Ps 16 10; 2 Pet 3 4). The most beautiful description of death in human language and lit. is Paul's characterization of the dead as "them also which sleep
in Jesus" (1 Thess 4:14 AV). This blessed hope has wrought itself permanently into the life and creed and hymnology of the Christian church, as in the hymn often used with such comforting effect at the burial service of believers: "Asleep in Jesus! blessed sleep!"  

**Dwight M. Pratt**

**ASMODAEUS, as-mo-deus; asmodaos; 'ashmodahe; 'asmodos; Asmodiōs**: An evil spirit first mentioned in Tob 3:8. Older etymologists derived the name from the Heb verb 'asāmah, "destroy"; but it is now generally held to be associated with Zoroastrianism, with which the Jews became acquainted during the exile, and by which later Jewish views on the spirit-world were greatly influenced. It is now held to be the equivalent of the Pers Aeshma-Devā, the spirit of concurrence. The spirit is at times reckoned as the equal in power of "Abaddon" (Job 31:12) and of "Apollyon" (Rev 9:11), and in Tobit is represented as loving Sara, only daughter of Raguel of Ebodathand, and as causing the death on the bridal night of seven husbands who had in succession married her. His power was broken by the young Tobias acting on the advice of the angel Raphael (Tob 6:15). He burnt on the "ashes of incense" the heart and liver of Tobias, thus being taught that when the devil smelled the smoke, he fled into the uppermost parts of Egypt, and the angel bound him" (Tob 8:3). Milton refers to the incident in Paradise Lost, 4, 186–71, founding on Jewish demonology and the "loves of the angels" (Gen 6:4) by J. Hutchison

**Asmoneans, as-mo-ne'ans**: A remarkable priestly family of Modin, in Judaea, also called Hasmonaeans or Maccabees. They belonged to that portion of the Jewish nation which under all trials and temptations remained loyal to Jeh, even when the national life and religion seemed at their lowest ebb, and they succeeded, for a while at least, in restoring the name and fame of Israel. All in all they were an extremely warlike family. But the entire Asmonean history affords abundant proof of the bitter partisanship which, even more than the persecutions of their enemies, sapped the national strength and divided the nation into bitter and relentless enemies. For the unforeseen and unwise adventures of the Macedonian and Syran periods, and in this direction the thousands of Heb soldiers, who fought, under the Gr. banners, must have exerted an inestimable influence. The Asmonean struggle is therefore, in all its phases, a three-sided one, and it makes the ascendency of the family all the more remarkable. The sources of our knowledge of this period are mainly found in the Books of the Macc, in the Ant and BJ of Josiah, and in occasional references of other classic historians. The contents of Ant plainly prove that Jos used the Books of the Macc as far as possible, but that besides he was possessed of sources of information now wholly lost. The name "Asmonean" is derived from the Heb ḥasōman, "wealthy." Hashman was a priest of the family Joarib (Ant, XII, vi, 1; 1 Macc 2:1; 1 Ch 24:7). The name "Maccabee," from the surname of Judas, the son of Mattathias, may be derived from the Heb ḫākkōdāh, "a hammer"; makkōdōh is the transliteration from the first name of the high priest, Mt Ḥokmōdāh Bešʿām YWHH "Who among the gods, O Lord, can be likened unto thee," inscribed on the Maccabean banner in the word ṢamKhBiY.

Antiochus Epiphanes returned in 169 BC from the Egyptian wars, the fruits of which had been wrested from him by the Roman power, which a year later, in his fourth war, in the revolt order him peremptorily to leave Egypt once and for all. This was impossible, for the appeal to the Romans to aid him was rejected, and he was resolved forever to crush the power of Judaism and to wipe out its detested religion. Thus Apollonius (Jos tells us, the king himself, BJ, v, ix, 4) in 168 BC appeared before Jerusalem, devastated the city, defiled the temple by the sacrifice of swine on the altar, burnt offerings, destroyed all the holy writings that could be obtained, sold numberless Jews and their families into slavery, forbade circumcision on pain of death and inaugurated the closed period spoken of by Dnlt (2:27; 11:31). Thus Antiochus marked his name in blood and tears on the pages of Jewish history. Against this cruel tyranny and this attempt to root out the religion of Israel and their ancient faith, the Maccabean family revolted and achieved an independence and success which were essential for Jewish independence. How far they succeeded in these efforts the following sketch will show.

Mattathias was a priest of the house of Joarib, at the time of the breaking out of the revolt most probably among the refugees from Jerusalem, living at Modiin, W. of the city, in the highlands of Judaea, where he may have owned an estate. When compulsion was tried by the Syrians to make him sacrifice to idols, he not only refused to obey, but slew a Jew who came forward to the altar, as well as Apelles, the Syrian commander and a portion of his guard (Ant, XII, vi, 2). Overthrowing heathen altars as he went, he was followed into the wilderness by large bands of loyal Jews. And when the refusal to fight on the Sabbath day had led to the slaughter of a thousand of his followers, he gave liberty to the Jews to give battle on that day. In 167 BC, soon after the beginning of the conflict, he sank under the unequal Joaribs. He was succeeded by his son Judas, who had intrusted his son to his five sons, John (Gaddis), Simon (Mattathias), Judas (Maccabaeus), Eleazar (Auran) and Jonathan (Apphas). On his deathbed he appointed Simon as the counselor and Judas as the military leader of the movement (Ant, XII, vi, 1). These two with Jonathan were to carry the work to completion.

Judas proved himself fully worthy of his father's foresight and trust. His military talent was marvellous, his cunning baffling, his courage lionine, his swiftness that of the eagle. He won a victory at Adasa, the ancient military genius of Israel. Nearly all his battles were fought against impossible odds and his victories inspired the Syrians with awe. In sudden night attacks he surprised the Syrian generals, Apollonius and Soron (1 Macc 3:10), and scattered their armies. Antiochus, ready to do so, the countries eastward, who appeared on the point of rebellion, intrusted the conduct of the Judaeans to the generals, his kinsman and favorite, who was charged to wipe Israel and its hated religion off the face of the earth. The latter intrusted the actual conduct of hostilities to an ill-equipped army, under Ptolemaeus, Nicander and Gorgias. This army was encamped at Emmaus, S. of Modiin, while Judas lay with his small force a little to the S.E. When Gorgias attempted to surprise him by night, Judas himself fell like an
avalanche on the rest of the Syrian army and crushed it, then met and defeated the returning Gorgias and gained an immense booty. Equally successful in the campaign of 165 BC Judas captured Jerus and purified and rededicated the temple, just five years after its defilement. Thus the Jewish “Festival of Lights” came into existence. The next year was spent in the reduction of Idumaea, the Jordan territory, the Ammonites, and several important strongholds of the enemy, whilst Simon marched northward and brought back the Jewish captives from Gilead and the sources of the Jordan.

Meanwhile Antiochus had died in the eastern campaign and his death inaugurated the collapse of the Syrian empire. Philip was appointed guardian of the infant king, while his uncle Demetrius sought to dethrone him by the aid of the Romans. The siege of the stronghold of Jerus, still in the hands of the Syrians, by the Maccabees, led Philip to make a heroic effort to crush Judas and his growing power, and he swiftly marched upon Judaea with a large and well-equipped army. The odds were too strong for Judas, his band was frightened by the Syrian war-elephants and in the battle of Beth-zacharias the Maccabees were defeated and Eleazar, the youngest brother, was killed. Jerus was taken by the Syrians, the temple wall broken down and only the threatening danger of an attack from the king’s southern foes saved the Maccabean cause. Lysias retreated but left a strong garrison in Jerus. All seemed lost. Alcimus, leader of the disloyal Jews and a mortal enemy of Judas, was made high priest and he prayed Demetrius, who had captured the Syrian throne, to come to his aid against the Maccabees in 162 BC. Bacchides was sent with a strong force and sought in vain to obtain possession of the person of Judas by treachery. He made havoc of the Jews, by killing friend and foe alike, and returned to the East to be succeeded by Nicanaor, who also failed to dispose of Judas by treachery. In the ensuing battle at Capharsalama he was defeated and compelled to fall back on Jerus and thence on Beth-horon, where Judas attacked, again defeated and killed him. In this hour of hope and fear Judas was led to seek a Rom alliance whose consummation he never saw. From that day his fortune changed. A new Syrian army under Bacchides and the false priest Alcimus approached

Jerus. Judas gave them battle at Elasa, in April, 161 BC. With only 3,000 men he engaged the Syrian forces. He succeeded in defeating the left wing of the Syrians under Bacchides, but was in turn surrounded and defeated by the right wing. All hope of escape being cut off, Judas surrounded himself with his best warriors and fell at last surrounded by heaps of slain foes. Strange to say the Syrians surrendered his body to Simon and Jonathan his brother, who buried him by his father’s side at Modin.

The death of Judas for the moment paralyzed the revolutionary movement, while it increased the determination of the Syrians. All 4. Jonathan, previous privileges were revoked, and 160–143 the Maccabean sympathizers were BC rigorously persecuted. But all this served only to bind the party closer together, and the chief command was conferred on Jonathan, the youngest brother, as daring as, and

power, and he swiftly marched upon Judaea with a large and well-equipped army. The odds were too strong for Judas, his band was frightened by the Syrian war-elephants and in the battle of Beth-
zacharias the Maccabees were defeated and Eleazar, the youngest brother, was killed. Jerus was taken by the Syrians, the temple wall broken down and only the threatening danger of an attack from the king’s southern foes saved the Maccabean cause. Lysias retreated but left a strong garrison in Jerus. All seemed lost. Alcimus, leader of the disloyal Jews and a mortal enemy of Judas, was made high priest and he prayed Demetrius, who had captured the Syrian throne, to come to his aid against the Maccabees in 162 BC. Bacchides was sent with a strong force and sought in vain to obtain possession of the person of Judas by treachery. He made havoc of the Jews, by killing friend and foe alike, and returned to the East to be succeeded by Nicanaor, who also failed to dispose of Judas by treachery. In the ensuing battle at Capharsalama he was defeated and compelled to fall back on Jerus and thence on Beth-horon, where Judas attacked, again defeated and killed him. In this hour of hope and fear Judas was led to seek a Rom alliance whose consummation he never saw. From that day his fortune changed. A new Syrian army under Bacchides and the false priest Alcimus approached

perhaps more crafty than Judas. He plunged into the wilderness, relieved himself of the burden of the women and children, and when the latter under the care of John, his brother, were exterminated by the Amri, he took bloody vengeance on them. Surprised by Bacchides, the Syrian general, he inflicted great losses on the latter and escaped across the Jordan. The death of the traitor Alcimus, in 100 BC, for a while relieved the situation and the strength of the Maccabees rapidly grew. A second campaign of Bacchides proved fruitless against the daring and cunning of Jonathan and Simon, and they succeeded in making peace with the Syrians (Ant XIII, 1, 5, 6), but the citadel of Jerus and other strongholds remained in the hands of the enemy. The events of the year 153 BC however changed the entire aspect of affairs. Demetrius saw his throne menaced by Alexander Balas, a Rom favorite. Trying to secure the aid of the Maccabees, he greatly extended the former concessions, and when Balas outstripped him in generosity and appointed Jonathan high priest with practically royal powers, the Maccabees craftily played out the one against the other. Since the death of Alcimus the high-priesthood had now been vacant for seven years (Ant XIII, ii, 8); for which reason the appointment was exceedingly gratifying to the Jews. In his extremity, Demem-
with the king, Hyrcanus offered as favorable conditions as possible, paid a ransom and had to permit the raising of the city wall. To obtain money he opened and spoiled the tomb of David (Ant, XIII, viii, 4) and thus obtained a standing army for the defence of the country. With this army he proceeded to the Parthian war in which Antiochus was killed. Hyrcanus now threw off the Syrian yoke and began a war of conquest. In a quick campaign he conquered the trans-Jordanic territory, destroyed Samaria and its people and devastated the land of Edomites, whose people were now embodied in the Jewish commonwealth by an enforced circumcision (Ant, XIII, ix, 1). By an embassy, the third in the Asmonean history, he made an alliance with Rome. Meanwhile a strong partisan spirit had been aroused against him. Thus the men who had been the very core of the Maccabean revolt from the beginning now raised a sedition against his regime (Ant, XIII, vii, 7; 1 Macc 11 67 ff). Tired of the endless struggle and longing for a strong arm to lean on, like Judas, he sought a renewal of the Rom alliance, but never saw its realization. Tryphon, who feared him, treacherously and unrighteously put him prisoner at Pamphylia, and his followers were immediately killed and he himself subsequently executed at Basca in Cœle-Syria (Ant, XIII, vi, 2, 6).

Thus again the Maccabees faced a great crisis. But Simon, the sole survivor of the sons of Mattathias, now stepped in the breach, 5. Simon, 143–138 BC

Tryphon, met strategy with strategy, renewed the alliance with Demetrius and obtained from him the high-priesthood. All the old privileges were renewed, the alliance with Tryphon was conduced by the king, and the Maccabees resolved to count this era as the beginning of the latter. This stronghold of Gazara fell and last of all the citadel of Jerus was reduced, and even the hill, on which it had stood, was completely leveled in the following three years (Ant, XIII, vi, 7). Simon, favored by the Phari- saeans and the party of the ancients in the revolution of Jewish life, from the start, had been the essence of the Asmonean movement and, as the years rolled on, the chasm between the two great parties in Israel grew ever wider. The break with the Pharisees seemed to break a wide breach in the traditions of the fathers, whilst the Sadducees paid attention only to the written testimony, and besides were very liberal in their views in general. Only the immense power of Hyrcanus enabled him to weather this storm. After a reign of nearly three decades he died in peace, envied for three things—the possession of the supreme power in Israel, the possession of the high-priesthood and the gift of prophecy (Ant, XIII, vi, 4, 1). With John Hyrcanus the glory of the Maccabean house passed away. What remains is only the sad tale of outward and inward decay. The period covered is only a few decades. His family, Hyrcanus had nominated his wife to the supreme power, while Aristobulus, his oldest son, was to take the high-priesthood. But the latter was no sooner installed in this office than he was dethroned. The new ruler was deprived of the royal title, imprisoned and starved to death his mother and incarcerated his three youngest brothers, leaving at liberty only Antigonus, whom he soon after caused to be murdered in a frenzy of jealousy of power (Ant, XIII, xi, 1, 2, 3). Shortly after this he died of an intestinal disease, little lamented by his people. His childless widow elevated the oldest of the surviving sons of Hyrcanus, Jannaeus Alexander, to the throne and married him. This Jannaeus began his reign with the title of one of his remaining brothers and, following the example of his father, affiliated himself with the party of the Sadducees. Involved in bitter wars, which arose on every hand, he proved that the old military genius of the Maccabees had not wholly perished. When the Pharisees aroused a widespread sedition against him, he crushed the movement in a torrent of blood (Ant, XIII, xiv, 2).

In the intercine war that followed, he killed some 50,000 of his own people and absolutely an exile from the confines of the kingdom. But only by brute force, he made the last years of his reign dark and gloomy. Jos touches but lightly on the bitter events of this sedition, on both sides marked with great barbarity (Ant, XIII, xiv, 2).
Though suffering from an incurable form of quartan fever, he waged war to the last and died during the siege of Jerusalem. On his deathbed he advised his queen to cast herself upon the mercy of the Pharisees: a wise counsel as the event proved, for she was permitted to retain the crown and to place her son Hyrcanus in the high-priestly office. Thus she ruled for nine years (78-69 BC). On her death, her son Aristobulus, whom she had kept from public affairs and who espoused the cause of the Sadducees, aspired to the crown. Another internecine war resulted, in which Aristobulus was victorious. Hyrcanus agreed, for a large financial consideration, to leave public affairs entirely alone. The Herodian family, which owed everything to the Maccabees (Ant, XIV, i, 3), now appears on the scene. Antipater, a friend of Hyrcanus, induced him to escape to Rome after the death of Aristobulus at Pergamon (Ant, XIV, vii, 4). The fate of the remnants of the Maccabean stem, at the hands of Herod, may be found by consulting the article under Maccabees.

ASNAH, as'nah (עֵשְנָה, 'eshnah, "hornbush"): One of the Nethinim, who returned with Zerubbabel from the exile (Ezr 2.50).

ASNAPPER, as-nap'ær. See Osnappar.

ASOCHIS, a-so'kis, PLAIN OF. See CANA OF GALILEE.

ASOM, a'som (Ἄσσωμ, Ἄσσωμ) = Hashum (Ezr 10.33): The sons of A. put away their "strange wives" (1 Esd 9.33).

ASP (_HERE, puthen [Dt 32.33; Job 20.14-16; Isa 11.8; ὀσπής, ἀσπίς [Rom 3.13]): Any poisonous snake, or even poisonous snakes in general, would satisfy the context in all the passages cited. Puthen is also the tr 3d ADEER (q.v.) in Ps 58.4; 91.13. Most authors have supposed the Egyptian cobra (Naja haje, L.) to be the snake meant, but while this is widely distributed throughout Africa, its occurrence in Southern Pal seems to rest solely on the authority of Canon Tristram, who did not collect it. There are other poisonous snakes in Pal, any one of which would satisfy the requirements of these passages. See SERPENT. While the asp of classical Gr lit. may well have been the Egyptian cobra, it is to be noted that Vipera aspis, L., is confined to central and western Europe.

ASPALATHUS, as-pal'a-thus (σπαλάθος, ἀσπάλαθος): An aromatic plant mentioned in Eccles 24.15 AV, where "wisdom" says, "I gave a sweet smell like cinnamon and aspalathus," etc. It would seem to have been a prickly shrub, the wood of which was scented, but nothing certain is known about it.

ASPATHA, a's-pa'tha (Ἀσπάθη), "asphāthē": One of the ten sons of Hanan (Ezr 9.7) (Pers aṣpādāta, "given by a sacred horse," acc. to Theodorus, Add. 71, after Pott and Bentley).

ASPHALT, a's-falt. See SLIME.

ASPHEAR, as-für, THE POOL (Λάκκος Ἀσφαρ, ἱλίκκος Asphar): When Jonathan and Simon fled from Bacchides they encamped by this pool in the wilderness of Tekoa (1 Mac 9.33; Ant, XIII, i, 2). It is probably identical with Ez-Zaferaneh, a ruined site with an ancient cistern, to the S. of Tekoa, and E. of Halhul. Bir Selhub about 6 miles S.W. of 'Ain Jidy is favored by some (EB, s.v.), the hills around it being known as Asphar, in which there may be a survival of the old name.

ASPHERASUS, as-far'as-sus (Ἄσφαρασος, Ἀσφαραςός = Mispar [Ezr 2.2; Mispereth, Neh 7.7]): A leader of the captives, who returned with Zerubbabel to Jerusalem (1 Esd 5.8).
ASS, as (אֲשַׁרְיָא), hāmōr, of Arab. hāmōr, apparently connected with Arab root 'aḥmar, "red," but referred to some root hāmol, 1. Names "to carry;" also, but less commonly, both in Heb and in Arab, אַשְׁרֹת, 'āthōn, Arab. 'ātān, used in Arab. only of the females; הַמּוֹר, ḫer, or הַמּו, her, and הַרִּש, drōkh, or הַרִּש, drōḏāh, Arab. 'ār, "wild ass," and also רִיר, ʿayr, Arab. ʿār, "a young" or "wild ass"); The name drōḏāh (Job 39 5) is rare; ḥer, ônos (Mt 21 2).

(1) Hāmōr is derived from the root which means, in all probability, "to carry a burden" (see Fürst, Handwörterbuch, ḥer, ii), or "heep.

2. Meaning up." While no analogies are contained in the OT this root occurs in New Heb. The Aram. אָשָׁר, hāmor, means to make a run-heap" (from which the name hāmor, "a heap," used in Jgs 15 16 in a play of words:

"With the jawbone of an ass, heaps upon heaps, with the jawbone of an ass have I smitten a thousand men"). The root may also mean "to be red." In this case the nominal form hāmor may have been derived from the reddish-brown skin of a certain type of the ass.

(2) 'Āthōn, Assy. 'atānu and Aram. אַתְדָּן, 'atānd, is derived from אַתָּד, ʿatāh, "to come," "go," etc (Fürst suggests that it may be derived from אַתָּד, 'atāh, "to be slender," "docile," etc); מִלְּחָמָה, 'ilḥomah ʿilḥomah, "red-white asses" (Jgs 5 10) designates a better breed.

(3) ʿAyır, Arab. ʿayır ("male ass") used of the young and vigorous animal, is derived from the root ʿayır, "to go away," "escape through swiftness" (Hommel, Namen der Säugethiere, 121-23). This name is used as a parallel to אָשָׁר, ʿayır, drōḏāh (Gen 49 11) and as a compound of ʿayır ʿayır, ʿayır ʿayır (Job 11 12), "a wild ass's colt." (4) ʿEpery, "wild ass," is derived from the root which means "to run," suggestive of the animal's swiftness.

(5) 'Āroḏh, is, in all probability, an Aram. loan-word for the Heb pere'. The Tg uses נֶעָרֶה, drōṭāh and נֶעָרֶה, drōṭāh.

From the references to these various names in the OT it is clear that (1) hāmor was used for riding purposes: (a) by men (2 S 16 2; 17 6; 23 19 20; 1 K 2 40; 13 15 24 27); (b) by women (Ex 4 20; Josh 16 18; Jgs 1 14; 1 S 25 20 23 42; cf 2 Ch 28 15).

Asses at a Mill.

3. Uses 23 19 20; 1 K 2 40; 13 15 24 27.

4. As a Domestic animal always has been one of the most common domestic animals. It is a much more important animal in Bible lands than in England and America. The humblest peasant owned his own ass. It is associated throughout the Bible with peacefulness, in plowing, with an ox (Dt 22 10). The ass (āthōn) was used as a beast of burden (Gen 46 23) and for riding (Jgs 6 10; Nu 22 21 22; 2 K 24 24). The ʿayır is also referred to as used in riding (Jgs 10 4), carrying (Isa 30 6) and tilling (ver 24).

Besides the use of the ass in agriculture and riding it was employed in the caravans of commerce, and sent even upon long expeditions through the desert. The ass is and always has been one of the most common domestic animals.

5. Figurative use. The ass (āthōn) is used symbolically of a corpse (Jer 22 19); hāmor is used as a symbol of peace and humility (2 S 19 20). Zechariah speaks of the future Messiah as "lowly, and riding upon an ass, even upon a colt the foal of an ass" (Zec 9 9; cf Mt 21 5 7).

(2) Pere' is used as a symbol of wildness (Hos 8 9, and מִים, pere' ʿāthām, "a wild ass's man" (Gen 16 12), referring to Ishmael, designates a free nomad. In Job the name pere' is applied to the desert dwellers (Job 24 5). Jeremiah employs this name as a symbol of lust. He compares Israel's love of idolatry to the lust of the wild ass (Jer 2 22). The ass (āthōn) figures prominently in the Balzal story (Nu 22; 2 Pet 2 16. See Gray, ICC, "Numbers," ad loc.). It is interesting to note that Apion charged the Jews Use in Literature that they 'placed an ass's head in their forest,' affirming that this discovery was made when Antiochus Epiphanes spoiled our temple, and found that ass's head there
ASSASIN, a-sas-in (swâ'ap-ā, sâdi'i'; AV murderers; Jos (BJ, II, xiii, 3, xvii) relates that "there sprung up in Jerusalem a class of robbers called Sgarri, who acted mainly in the dark and in the midst of the city. They did thus chiefly when they mingled with the populace at the festivals, and, hiding short daggers in their garments, stabbed with them those that were their enemies. The first to be assassinated by them was Jonathan the high priest, and, after him many of the royal family ... (Acts xx, vii, 6, ix). The name is derived from Lat stca, 'a dagger.' The sicarii were implacable in their hatred to Rome and to those Jews who were suspected of leaning toward Rome. They took a leading part in the Jewish rebellion against the Roman power ... and also in the faction quarrels during the war. After the war they continued their nefarious practices in Egypt and Cyrene whither they had fled.

LYIAS mistook Paul for the 'Egyptian who ... led out into the wilderness the 4,000 men of the sicarii' (Acts 21 38).

S. F. HUNTER

ASSAULT, a-sol't (swâ'ap-ā, gr: ἄρπα, ἄρπν, ἄρπαν): The Heb verbal form is used of pressing forward a siege (see GARR), but also of a hostile attack upon a person then trd "assault" (Est 2 11). The Gr word hærne used of an attack upon persons in Acts 14 5 (AV) is rendered "onset" in RV. The word "assault" remains in Acts 17 5, of attacking the house of Jason in Thessalonica, where the verb is ephståstai, "to come suddenly upon."
On the whole it is better to interpret the phrase "persons skilled in collections" of wise sayings, grouped in a compact whole (cf. Wright, Eccl. 102).

S. F. HUNTER

ASSEMBLY, a-sem’bi (יוֹתֵר, kohal; εὐκλήσια, ekklesia): The common term for a meeting of the people called together by a crier. It has reference therefore to any gathering of the people called for any purpose whatsoever (Ex 12:6; Ps 22:16 AV; 89:7 AV; Acts 19:32-41). The solemn assemblies of the Jews were their feasts or religious gatherings of any kind (Isa 1:13). The word pan prohibition, "a general feasting assembly" (Heb 12:23), is transferred from the congregation of the people of Israel to the Christian church of which the congregation of Israel was a figure. In the same passage, ekklesia has the sense of calling, summoning. In classical Gr ekklesia was the name for the body of free citizens summoned by a herald. In this sense the church calls all the world to become identified with it. It denotes the whole body of believers, all who are called. Or it may refer to a particular congregation or local church (synagogou, "synagogue") (Acts 2:41 RVm). See CALLED; CHURCH; CONGREGATION.

JACOB W. KAPP

ASSEMBLY, SOLEMN. See CONGREGATION; FEASTS.

ASSENT, a-sent’: Twice used in AV as equivalent to "voice," and to "consent," and displaced in both instances by the RV by the rendering of the Heb p’sh, "mouth" (2 Ch 18:13); and the Gr suneti, "agree to," i.e. "a-am" (Acts 24:9).

ASSESOR, a-sez-er: Lit. one who sits by another, an assistant, among the ancients esp. an assistant to the king (cf. "The assessor of his throne," Dryden, Milton’s P. L., Bk vi), or to the judge (see Dryden, Virgil’s Aeneid, vi.583). Later it came to mean one who assesses people or property for purposes of taxation.

(1) Royal officials in Israel have the general title s’rim, "princes," and this general title included the officer who was "over the tribute," who seems to have had charge of the assessment, as well as the collection of taxes. In the days of the later monarchy "the governor of the royal household," "the royal steward and high chamberlain," seems to have held some such important position (Isa 22:15; 36:3.22).

(2) In the early kings do not seem to have subjected the people to heavy taxes, but we find much in the prophets about the injustice and extortion practiced by these officials on the poor of the land (cf Am 2:6:7; Isa 5:8; Jer 5:28; Mic 3:11). Special taxes seem to have been imposed to meet emergencies (cf 2 K 23:35), but it is not clear that anything of the nature of a regular land tax, or property tax, existed in early times; though something of the kind may be referred to in the reward promised by Saul to the slayer of Goliath (1 S 17:25) and the tenth mentioned in 1 S 8:15-17. The kings of Judah, it would seem, made free use of the temple treasures.

(3) Later the Rom government "farmed out" the taxes of the provinces. The publicans, or tax-gatherers of the Gospels, seem to have been agents of the imperial procurator of Judaea, instead of direct agents of the great Rom financial companies, who ordinarily let out the business of the collection of the taxes to officers of their own.

During the Empire there were ample imperial munificence provided for the regular collection of the taxes, and the emperor appointed a procurator in each province whose business it was to supervise the collection of revenue. Some Jews found the business profitable, but these were objects of detestation to their countrymen. See PUBLICAN.

ASSHUR, a-shoor, ASSUR, a-soor. See ASSYRIA.

ASSHURIM, a-shoor-im (אָשָׁהַרְיִמ, ’ashaharim): Mentioned among the sons of Deuel, son of Jokshan, son of Abraham by Keturah (Gen 25:3).

ASSIDAEANS, a-si-de’ans. See HASSIDAEANS (Apoc).

ASSIDUOUS, a-sid’as: Occurs only in Wisd 8:18 RV, "in assiduous with her is understanding," i.e. "in continued exercise of fellowship." The idea expressed in the adj. is contained in the prepositional prefix, σον of the original sug-gwmaas, giving the vb. intensive force.

ASSIGN, a-sin’ (ἐνθάν, "to give," or "grant," i.e. apportion): Used (Josh 20:8) of Moses setting apart Bezer as one of the three cities of refuge on the E. of the Jordan (cf Dt 4:41-43); also of Josiah’s setting Uriah in a place of mortal peril in battle (2 S 11:16).

ASSIR, a-sir’ ( הבא, "capture"): (1) A Levite of the family of Korah (Ex 6:24; 1 Ch 6:22).

(2) A son of Ebiassaph and grandson of Assir. Samuel was descended from him (1 Ch 6:23).

(3) A son of Jeconiah, king of Judah, according to AV and RVm and ARVm. It is a question whether the Assir of this passage (1 Ch 3:17) is not a common adj. modifying Jeconiah. The ARV and RV render it "the captive." It is to be noticed, however, that there is no definite art. in the Heb.

ASSOCIATE, a-so’shi-at: Only in Isa 8:9 AV, where the Heb b’ru’, b’ru’, is variously interpreted, according to differences of opinion as to the vb. whence it comes. RV "make an uproar": RV "break": Vulg "Congregamini"; LXX xtrn, gnwte, "know ye?"; Luther: seid booeoe ("be wicked").

ASSOS, a-sos (Ἀσσός, Ἀσσω): An ancient city of Mysia in the Rom province of Asia, at which, according to Acts 20:13, Paul and Luke rested while on their way from Troas to Mitylene. Standing upon a conical-shaped rock on the southern coast of the Troad, it once occupied one of the three great cities in Asia. The rock is about 700 ft. high; its sides are covered with terraces, both natural and artificial, and so steep is it that Stratoricus wrote of it: "If you wish to hasten your death, try and climb Assos." The view from the summit is extensive and magnificent.

The city, which is very ancient, is said to have been founded by the Aeolians, and to have always been singularly Gr. As early as the 5th cent. BC it struck its own coins, and its coinage system continued until 235 AD. One of its early rulers or tyrants was Hemeas, a eunuch, once a slave, who gave his niece in marriage to Aristotle. There the great Gr philosopher lived three years, from 348 to 345 BC. During the time of the kings of Pergamus, the city bore the name of Apollonia. To the Byzantines it was known as Macharamion, and at present the town, which has dwindled in importance under Turkish rule, is called Bekhram, a Turkish corruption of the Byzantine name. The ruins of Assos are among the most imposing in Asia Minor, and yet they have long served as a quarry; from its public buildings the stones for the Constantinople docks were taken. The Turk-
ish sultan Murad II presented the many beautiful bas-reliefs of the Doric temple of Athena to the French government, which are now preserved in the Louvre. The ruins were discovered and partially excavated in 1882-83 by Mr. Clarke for the Archaeological Institute of America, and the entire plan of the ancient city is clear. Upon the very summit of the hill stood the temple of Athena, which is said to have been erected about 470 BC. Among its ruins Clarke found eight other bas-reliefs which are now in the Boston Museum and which possess a special interest because of their connection between the art of the Orient and of Greece. Upon the several natural terraces of the hill which have been enlarged by artificial means, stood the many public buildings, as the gymnasium, the public treasury, the baths, the market place and the theater, of which but little now remains. The city was surrounded by a double wall which in places is still well preserved. The inner wall of dressed stones laid without mortar, and filled with loose stones, is 8 ft. thick, and the larger outer wall was protected with towers at intervals of 60 ft. The ancient road leading to Troezen, i.e., the road which the path of the Nile temple, are cisterns, a Turkish fortress and a Byzantine church which has been converted into a mosque. Without the city walls is a necropolis. Its many sarcophagi of all ages and sizes and shapes are made of the chaotic stone which, so the ancients believed, possessed the quality of consuming the bodies buried in it. The stone is the famous "Lapis Assius," or the flesh-eating, hence the word sarcophagus. It was raised extensively in the fields about Assos, but now valonia, or acorn cups, form the chief article for export.

ASSUAGE, a-swaj' (AV Asswage): Lit. "sweeten," "soften down;" then, "mitigate," "abate;" used of "food," Gen 8 1 ("subsides"); of grief, Job 16 5.6 ("restrain"); also applied to any strong emotion; not used in the NT.

ASSUMPTION, a-sump' shun, OF MOSES. See APOCALYPTIC LITERATURE.

ASSUR, as'ur. See Assur.

ASSURANCE, a-shóf' rans: A term exceptionally rich in spiritual meaning. It signifies the joyous, unwavering confidence of an intelligent faith; the security of a fearless trust. The original words have to do with the heart of vital religion. יִשָּׂא, bāth, "trust;" נֶשָּׂא, "amman, "to prop," "to support," hence to confide in, to trust. Jesus repeatedly used this word "amen" to express the trustworthiness and abiding certainty of his sayings. פִּנָּה, pfānāh, "faith;" פִּינָחָה, pīnāchāh, "ful assurance." The confidence of faith is based, not on "works of righteousness which we have done" (cf Titus 3 4.5 AV) but on the high-priesthood and atoning sacrifice of Christ (He 10 21.22) of yer 19, "boldness to enter . . . by the blood of Jesus" (AV). Assurance is the soul's apprehension of its complete emancipation from the power of evil and from consequent judgment, through the atoning grace of Christ. It is the exact opposite of self-confidence, being a joyous appropriation and experience of the fulness of Christ—a glad sense of security, freedom and eternal life in Him. This doctrine is of immense-urable importance to the life of the church and of the individual believer, as a life of spiritual doubt and uncertainty contradicts the ideal of liberty in Christ Jesus which is the natural and necessary fruitage of "the washing of regeneration and renewing of the Holy Spirit . . . shed on us abundantly, through Jesus Christ our Saviour." Paul unhesitatingly said, "I know" (2 Tim 1 12) —a word which, oft-repeated in 1 Jo, furnishes the groundwork of glad assurance that runs through the entire epistle. For the classic passage on "full assurance" see Col 2 1–10.

ASSURANIPAL, as ur-ba'nī-pal. See ASSUR-BANI-PAL.

Last Period and Fall of Empire.

ASSYRIA, a Gr name formed from Assur (アシュラ, 'asur-har; 'Aššur, Assir; Assyr Assur): The primitive capital of the country.

I. Geography.—The origin of the city (now Kala‘at Sharqat), which was built on the western bank of the Tigris between the Upper and Lower Zab, went back to pre-Sem times, and the meaning of the name was forgotten (see Gen 2 14, where the Hiddekel or Tigris is said to flow on the eastern side of Assur). To the N. of the junction of the Tigris and Upper Zab, and opposite the modern Mosul, was a shrine of the goddess Istar, around which grew up the town of Nina, Ninua or Nineveh (now Kowunjı̄k and Nebi Yunus). Another early sanctuary of Istar was at Urbillu, Arbilu or Arbela, E. of the Upper Zab. N. of Nineveh was called Sargina (now Khorsabad) where Sargon built his palace (720 BC). All this district was embraced in the kingdom of Assyria which extended from Babylonia northward to the Kurdish mountains and at times included the country westward to the Khazars and the Khorassan.

II. Early History.—The whole region was known to the early Babylonians as Subartu. Its possession was disputed between Sem Ammurra or Amorites (q.v.) and a non-Sem people from the N. called Mitanni. The earlier high priests of Assur known to us bear Mitannian names. About 2500 BC the country was occupied by Bab Semites, who brought with them the religion, law, customs, script and Sem language of Babylonia (Gen 10 11.12, where we should read "He went forth to Assur"; see Mic 6 6). The foundation of Nineveh, Rehobo-'Am (Assyr Rheboth-Al, "the suburbs of the city"), Calah and Resen (Assyr Res-enî, "head of the spring") is ascribed to them. The triangle formed by the Tigris and Zab, which inclosed those cities, was in later times included within the fortifications of the "great city" (Gen 10 12; Jon 3 8). Assyria is always distinguished from Babylonia in the OT, and not confounded with it as by Herodotus and other classical writers.

III. Climate and Productions.—Assyria, speaking generally, was a limestone plateau with a temperate climate, cold and wet in winter, but warm
during the summer months. On the banks of the rivers there was abundant cultivation, besides pasture-land. The apple of the North grew by the side of the palm-trees of the South. Figs, olives, pomegranates, almonds, vines were also cultivated as well as all kinds of grain. Cotton is mentioned by Sennacherib (King, P58A, December, 1909). The forests were tenanted by lions, and the plains by wild bulls (rams, Heb. ʾēdên), wild asses, wild goats and gazelles. Horses were imported from Cappadocia; ducks were kept, and mastiffs were employed in hunting. IV. Population.—The dominant type was Sem, with full lips, somewhat hooked nose, high forehead, black hair and complexion and abundance of beard. In character the Assyrians were cruel and ferocious in war, keen traders, stern disciplinarians, and where religion was concerned, intense and intolerant. Like the Ottoman Turks they formed a military state, at the head of which was the king, who was both leader in war and chief priest, and which offered a striking contrast to the theocratic state of the Babylonians. It seems probable that every male was liable to conscription, and under the Second Empire, if not earlier, there was a large standing army, part of which consisted of mercenaries and recruits from the subject races. One result of this was the necessity for constant war in order to occupy the soldiery and satisfy their demands with captured booty; and the result, as in the Northern Kingdom of Israel, was military revolution, with the seizure of the throne by the successful general. As might be expected, education was confined to the upper classes, more especially to the priests and scribes.

V. Trade and Law.—As far back as the age of Abraham, when Assyria was still a dependency of Babylonia, trade was carried on with Cappadocia and an Assyrian colony of merchants settled at Kara Euyk near Kaisariyeh. Down the Euphrates came the silver, copper and bronze of Asia Minor, together with horses. Cedar wood was brought from Mount Amanus, and there was already trade through Syria, with the Mediterranean. Nineveh itself was probably founded in the interests of the trade with the North. In later days commercial relations had much to do with the efforts of the Assyrians to conquer eastern Asia Minor and the Mediterranean coast of Syria and Palestine under the diplomacy (of 2 K 18:26), and commercial documents written in cuneiform were provided with Aram, docketts. As in Babylonia, land and houses were leased and sold, money was lent at interest, and the leading firms employed numerous damgari or commercial agents.

Assyrian law was, in general, derived from Babylonia and much of it was connected with trade. The code of Hammurabi (CH) or Amarna (q.v.) underlay it, and the same system of judicial procedure with pleading before judges, the hearing of witnesses, and an appeal to the king, prevailed in both countries.

VI. Art.—Unlike Babylonia, Assyria abounded in stone; the brick buildings of Babylonia, accordingly, were replaced by stone, and the painted or tinted walls by sculptured slabs. In the bas-reliefs discovered at Nineveh three periods of artistic progress may be traced. Under Assur-nazir-pal the sculpture is bold and vigorous, but the work is immature and the perspective faulty. From the beginning of the Second Empire to the reign of Esar-haddon the bas-reliefs often remind us of embroidery in stone. Attempts are made to imitate the rich detail and delicate finish of the ivory carvings; the background is filled in with a profusion of subjects, and there is a marked realism in the delineation of them. The third period is that of Assur-bani-pal, when the overcrowding is avoided by one or more leaving the background bare, while the animal and vegetable forms are distinguished by a certain softness, if not effeminacy of tone. Sculpture in the round, however, lagged far behind that in relief, and the statuery of Assyria is very inferior to that of Babylonia. It is only the human-headed bulls and winged lions that can be called successful: they were set on either side of a gate to prevent the entrance of evil spirits, and their majestic proportions were calculated to strike the observer with awe (cf the description of the four cherubim in Ezek. 1). In bronze work the Assyrians excelled, much of the work being cast. But in general it was hammered, and the scenes hammered in relief on the bronze gates discovered by Mr. Rassam at Balawt near Nineveh are among the best examples of oriental metallurgy at present known. Gold and silver were also worked into artistic forms; iron was reserved for more utilitarian purposes. The beautiful ivory carvings found at Nineveh were probably the work of foreign artists, but guns and seal cylinders were engraved by native artists in imitation of those of Babylonia, and the Bab art of painting and glazing tiles was also practised. The terra-cotta figures which can be assigned to the Assyrian period are poor. Glass was also manufactured.

VII. Mechanics.—The Assyrians were skilled in the transport of large blocks of stone, whether sculptured or otherwise. They understood the use of the lever, the pulley and the sledge, and they had invented various engines of war for demolishing or undermining the walls of a city or for
testing the assailants. A crystal lens, turned on the lathe, has been found at Kouyunjik: it must have been useful to the scribes, the cuneiform characters inscribed on the tablets being frequently very minute. Water was raised from the river by means of a shaduf.

VIII. Furniture, Pottery and Embroidery.—The furniture even of the palace was scanty, consisting mainly of couches, chairs, stools, tables, rugs and curtains. The chairs and couches were frequently of an artistic shape, and were provided with feet in the form of the legs of an ox. All kinds of vases, bowls and dishes were made of earthenware, but they were rarely decorated. Clothes, curtains and rugs, on the other hand, were richly dyed and embroidered, and were manufactured from wool and flax, and (in the age of the Second Empire) from cotton. The rug, of which the Pers rug is the modern representative, was a Babilonian specialty.

IX. Language, Literature and Science.—The Assyrian language was Semitic, and differed only dialectically from Sem Bab. In course of time, however, differences grew up between the spoken language and the language of literature, which had incorporated many Sumerian words, and retained grammatical terminations which the vernacular had lost, though these differences were never very great. Assyrian, moreover, was mainly derived from Babylonia. Assur-bani-pal employed agents to ransack the libraries of Babylonia and send their contents to Nineveh, where his library was filled with scribes who busied themselves in copying and editing ancient texts. Commentaries were often written upon these, and grammars, vocabularies and interlinear translations were compiled to enable the student to understand the extinct Sumerian, which had long been the Lat of Sem Babylonia. The writing material was clay, upon which the cuneiform characters were impressed with a stylus while it was still moist: the tablet was afterward baked in the sun or (in Assyria) in a kiln. The contents of the library of Nineveh were very various: religion, mythology, law, history, geography, zoology, philology, mathematics, astronomy, astrology and the pseudo-science of omens were all represented in it as well as poetry and legendary romance. See Nineveh, Library of.

X. Government and Army.—Assyria was a military kingdom which, like the Northern Kingdom of Israel, had established itself by a successful revolt from Babylonia. In contradistinction to Babylonia, which was a theocratic state, the king being subordinate to the priest, the Assyrian king was supreme. Whereas in Babylonia the temple was the chief public building, in Assyria the royal palace dominated everything, the temple being merely a royal cell attached to the palace. The king, in fact, was the commander of an army, and this army was the Assyrian people. How far the whole male population was liable to conscription is still uncertain; but the fact that the wars of Assurbanipal so exhausted the fighting strength of the nation as to render it unable to resist the invaders from the North shows that the majority of the males must have been soldiers. Hence the constant wars partly to occupy the army and prevent revolts, partly for the sake of booty with which to pay it. Hence too, the military revolutions, which, as in the kingdom of Israel, resulted in changes of dynasty and the seizure of the throne by successful generals. The turtannu or commander-in-chief, who took the place of the king when the latter was unable or unwilling to lead his forces, ranked next to the sovereign. From the reign of Tiglath-pileser IV onward, however, the autocracy was tempered by a centralized bureaucracy, and in the provinces a civil governor was appointed by the side of the military commander. Among the high officials at court were the rab-saki or "vizier," and the rab-sa-raisi or "controller," the rabbaqaris (Rab-sakis) of the OT.

The army consisted of cavalry, infantry, bowmen and slingers, as well as of a corps of charioteers. The army of the Second Empire the cavalry were increased at the expense of the chariotry, and were provided with saddles and boots, with the married groom who had run by the side of the horse became a mounted archer. Sennacherib clothed the horseman in a coat of mail. The infantry were about ten times as numerous as the cavalry, and under Sargon were divided into bowmen and slingers, the bowmen again being subdivided into heavy-armed and light-armed, the latter being apparently of foreign origin. Sennacherib introduced a corps of slingers, clad in helmet and cuisses, leather drawers and boots. He also deprived the heavy-armed bowmen of the long robes they used to wear, and established a body of pioneers with double-headed axes, helmets and buskins. Shields were also worn by all classes of soldiers, and the army carried with it standards, tents, battering-rams and baggage-carts. The royal sleeping-tent was accompanied by tents for cooking and dining. No pains, in fact, were spared to make the army both in equipment and discipline an irresistible engine of war. The terror it excited in western Asia is therefore easily intelligible (Isa 10 5-14; Nah 2 11-13; 3 1-4).

XI. Religion.—The state religion of Assyria was derived from BABYLONIA (q.v.) and in its main outlines is Bab. But it differed from the religion of Babylonia in two important respects: (1) the king, and not the high priest, was the god, and (2) at the head of it was the national god Assur or Astar, whose high priest and representative was the king. Assur was originally Asir, "the leader" in war, who is accordingly depicted as a warrior-god armed with a bow and sword in the age when solar worship became general in Babylonia. The name of the sun-god. But the similarity of the name caused
him to be also identified with the city of Assur, where he was worshipped, at a time when the cities of northern Babylonia came to be deified, probably under Hittite influence. Later still, the scribes explained his worshippers' adoration of a certain primeval cosmogonic deity An-sar, the upper firmament, which in the neo-Bab age was pronounced Assûr. The combination of the attributes of the warrior-god, who was the peculiar god of the commander of the army, with the deified city to which the army belonged, caused Assur to become the national deity of a military nation in a way of which no Bab divinity was capable. The army were "the troops of Assur," the enemies were "the army of Assur." Thus Assur's name was pronounced by they who should acknowledge his supremacy or be destroyed. Assur was not only supreme over the other gods, he was also, in fact, unlike them, without father or wife. Originally, it is true, his feminine counterpart, Asirîtu, the Assyrîn (q.v.) of the OT, had stood at his side, and later literary pedants endeavored to find a wife for him in Belit, "the Lady," or Istar, or some other Bab goddess, but the attempts remained purely literary. When Nineveh took the place of Assur as the capital of the Assyrian kingdom, Babylon, around whose sanctuary Nineveh had grown up, began to share with him some of the honor of worship, though her position continued to be secondary to the end. This was also the case with the worship of the Hittite war-god, whose cult was specially patronized by the Assyrian kings. See BABYLONIA AND ASSYRIA, RELIGION OF.

XII. Excavations.—Rich, who had first visited Mosul in 1811, examined the mounds opposite in 1823 and 1848 and identified the site of Nineveh. The few antiquities he discovered were contained in a single case in the British Museum, but the results of his researches were not published until 1836. In 1843-45 the Frenchman Botta disinterred the palace of Sargon at Khorsabad, 15 miles N. of Nineveh, while at Nimrud (Calah) and Kouyunjik (Nineveh) Layard (1845-51) brought to light the ruins of the great Assyrian palaces and the library of Assur-bani-pal. His work was continued by Rassam (1851-54). Nothing more was done until 1873-75 when George Smith resumed excavations on the site of Assur-bani-pal's library; this was followed in 1877-79 by the excavations of Rassam, who discovered among other things the capitals of Balawat. At Khorsabad an Assyrian expedition under Andraes was working at Kala'at Shergat (Assur) where the English excavators had already found the cylinder-inscription of Tiglath-pileser I (see Shergat).

XIII. Chronology.—The Assyrians reckoned time by means of limbû, certain officials appointed every New Year's day, after whom their year of office was named. The lists of limbû or "Eponyma" which have come down to us form the basis of Assyrian chronology. For the imprecise history of Assyria and Babylonia have also been discovered, as well as fragments of two "Babylonian Chronicles" written from a Bab point of view. The "Eponym" lists carry back an exact dating of time to the beginning of the 10th cent. BC. Before that period Sennacherib states that Tiglath-pileser I reigned 418 years before himself. Tiglath-pileser, moreover, tells us that Semas-Ramman son of Iame-Dagon had built a temple at Assur 641 years earlier, while Shalmaneser I places Semas-Ramman 580 years before his own reign. And Enisan Ramman, though Ea-haddu has the dates differently. Apart from the native documents, the only trustworthy sources for the chronology (as for the history) of Assyria are the OT records. In return the "Eponym" lists have enabled us to correct the chronology of the Books of Kings (q.v.).

XIV. History.—Assyrian history begins with the high priests (patesia) of Assur. The earliest known to us are Aupsia and Kilia, who bear Mitannian names. The early history is corrupt and subject to Babylonia, and under Khammurabi (Amraphel) Assyria was still a Bab province. According to Erast-haddon the kingdom was founded by Bel-bani son of Adasi, who first made himself independent; Hehad-numri, however, ascribes its foundation to Zulil. Assyrian merchants and soldiers had already made their way as far as Cappadocia, from whence copper and silver were brought to Assyria, and an Assyrian colony was established at Kara Euyk near Karsiyeh, where the Assyrian mode of reckoning time by means of limbû was in use. In the age of Am Gas (1400 BC) Assur-balad was king of Assyria. He corresponded with the Egypt Pharaoh and married his daughter to the Bab king, thereby providing for himself a pretext for interfering in the affairs of Babylonia. The result was that his son-in-law was murdered, and Assur-balad sent troops to Babylonia who put the murderers to death and placed the grandson of the Pharaoh on the throne of Babylon. In 1120 BC the Bagadur, who had been driven into decay and been forced to protect herself from the rising power of Assyria by forming an alliance with Mitanni (Mesopotamia) and Egypt, and subsequently, when Mitanni had been absorbed by Assyria, the power of Assyria finally came to dominate the entire empire of the Hittite king, Shalmaneser I (1300 BC), accordingly, devoted himself to crippling the Hittite power and cutting it off from communication with Babylonia. Campaign after campaign was undertaken, and in 17 years he represented the most powerful of the Assyrian empire, Malatiyeh was destroyed, and Carchemish threatened. Shalmaneser's son and successor Tukulti-Mas entered into the fruits of his father's labors. The Hittites had been rendered powerless by an invasion of the northern barbarians, and the Assyrian king was thus left free to crush Babylonia. Babylon was taken by storm, and for seven years Tukulti-Mas was master of all the lands watered by the Tigris and Euphrates. The image of Merodach was carried to Assur as a sign that the scepter had passed from Babylon to the pervenu Assyria. A successful revolt, however, finally drove the Assyrian conqueror back to his own country, and when he was murdered soon afterward by his own palace guard, he received posthumously the deed a punishment inflicted by the god of Babylon. A few years later the Assyrian king Bel-kudur-usur lost his life in battle against the Babylonians, and a new dynasty appears to have mounted the Assyrian throne. About 1120 BC the older Assyrian empire was brought to an end.
nazir-pal was succeeded by his son Shalmaneser II (859–825 BC), who, instead of contenting himself, like his father, with mere raids for the sake of booty, endeavored to organize and administer the countries which his armies had subdued. The famous black Obelisk, which was erected by him in commemoration of his victories. In his reign the Israelites and Syrians of Damascus first came into direct relation with the Assyrians. In 854 BC he attacked Hamath and at Qarqar defeated an army which included 1,200 chariots, 1,200 cavalry, and 20,000 infantry from Ben-hadad of Damascus, 2,000 chariots, and 10,000 infantry from “Ahab of Israel,” besides considerable contingents from Ammon, Arvad, Arabia and elsewhere. In 842 BC Shalmaneser penetrated to Damascus without a Hazael, the successor of Ben-hadad, who had already been defeated in the open field, was closely besieged. The surrounding country was ravaged, and “Jehu son of Omri” hastened to offer tribute to the conqueror. This is recorded on the Black Obelisk found at Ninrûd and now in the British Museum. Shalmaneser’s campaigns were not confined to the West. He overran Armenia, where the kingdom of Van had just been established, made his way to Turan in Cilicia, took possession of the mines of silver, salt and alabaster in the Taurus mountains among the Tabal or Tubal, and obliged the Bab king to acknowledge his supremacy. In his later days, when too old to take the field himself, his armies were led by the turtannu or commander-in-chief, and a rebellion, headed by his son Assur-danin-pal (Sardanapalus) broke out at home, where Nineveh and Assur were jealous of the preference shown for Calah. Nineveh, however, was captured, and the revolt suppressed after two years’ duration by another son, Samas-Ramman IV, who shortly afterward, on his father’s death, succeeded to the throne (824–812 BC). His chief campaigns were directed against Media. His son Hadad-nirari III (811–783 BC) was the next king, whose mother was Sammu-ramat (Semiramis). He claims to have reduced to subjection the whole of Syria, including Phoenicia, Edom and Philistia, and to have taken Media, king of Damascus, prisoner in his capital city. After this, however, Assyria once more fell into a state of decay, from which it was delivered by the successful revolt of a military officer Pulu (Pul), who put an end to the old line of kings and took the name of Tiglath-pilesier IV (745–727 BC). Tiglath-pilesier founded the second Assyrian empire, and made Assyria the dominant power in western Asia. The army was reorganized and made irresistible, and a new administrative system was introduced, the empire being centralized at Nineveh and governed by a bureaucracy at the head of which was the king. Tiglath-pilesier’s policy was twofold: to wield western Asia into a single empire, held together by military force and financial laws, and to drive back the power of the merchants of Nineveh. These objects were steadily kept in view throughout the reigns of Tiglath-pilesier and his successors. For the history of his reign, see TIGLATH-PILESIER. In 738 BC Tiglath-pilesier put an end to the independent existence of the kingdom of Hamath, Menahem of Samaria becoming his tributary, and in 733 BC he commenced a campaign against Rezin of Damascus which ended in the fall of Damascus, the city being placed under an Assyrian governor. At the same time the land of Naphtali was annexed to Assyria, and Yahu-khazi (Ahaz) of Judah became an Assyrian vassal, while in 731 BC, after the murder of Pekah, Hoshea was appointed king of Israel (cf 2 K 15–17). In 725 BC Tiglath-pilesier solemnly crowned at Babylon and the following year he died. His successor was another military adventurer, Shalmaneser IV (727–722 BC), whose original name was Ululâ. While engaged in the siege of Samaria Shalmaneser died or was murdered, and the throne was seized by another general who took the name of Sargon (722–705 BC). Sargon, for whose history see SARGON, captured Samaria in 722 BC, carrying 27,290 of its inhabitants into captivity. A large part of his reign was spent in combating a great confederation of the northern nations (Armenia, Mannâ, etc.) against Assyria. Carchemish, the Hittite capital, was captured in 717 BC, a revolt of the states of southern Pal was suppressed in 711 BC and Merodach-Baladan, the Chaldean, who had possessed himself of Babylonia in 722 BC, was soon suppressed. His campaign against Hezekiah of Judah in 701 BC was a failure; so, also, was his policy in Babylonia which was in a constant state of revolt against his rule, and which ended in his razing the sacred city of Babylon to the ground in 689 BC. Nine years previously his troops had been called upon to suppress a revolt in Cilicia, where a battle was fought with the Greeks. His son Esar-haddon, who succeeded him (681–669 BC) after his murder by two other sons on the 20th Tebet (cf 2 K 19 37), was as 4. Last distinguished a general and administrative period as his father had been the ruling power. For his history see ESAR-HADON. Under him the Second Empire reached the acme of its power and prosperity. Babylon was rebuilt and made the second capital of the empire, Pal became an obedient province, and Egypt was conquered (674 and 671 BC), while an invasion of the Cimmerians (Gomer) was repelled, and campaigns were made into the heart of both Media and Arabia. Esar-haddon died while on the march in Egypt, and his son Assur-bani-pal succeeded him in the empire (669–626 BC), while another son Samas-sum-ukîn was appointed viceroy of Babylonia. Assur-bani-pal was a munificent patron of learning, and the library of Nineveh owed most of its treasures to him, but extravagant luxury

**Assur-bani-pal Hunting.**
had now invaded the court, and the king conducted his wars through his generals, while he himself remained at home. The great battle at Ksarumij (Niniveh) was fought by him. Egypt demanded his first attention. Tirhakah the Ethiopian, who had headed his revolt was driven back to his own country, and for a time there was peace. Then under Tandoname, Tirhakah's successor, Egypt revolted again. This time the Assyrian punishment was merciless. Nebuchadnezzar's (Nabu-ucki) was destroyed, its booty carried away and two obelisks transported to Nineveh as trophies of victory. Meanwhile Tyre, which had rebelled, was forced to sue for peace, and ambassadors arrived from Gyges of Lydia, asking for help against the Cimmerians. Elam still remained independent and endeavored to stir up disaffection in Babylonia. Against his will, therefore, Assur-bani-pal was obliged to interfere in the internal affairs of that country, with the result that the Elamites were finally overthrown in a battle on the Eulaeus beneath the walls of Susa, and the conquered land divided between two vassal kings. Then suddenly a revolt broke out throughout the greater part of the Assyrian empire, headed by Assur-bani-pal's brother, the viceroy of Babylonia. For a time the issue was doubtful. Egypt recovered its independence under Psammechus, the founder of the XXVth Dynasty (660 B.C) who had received help from Lydia, but Babylonia, which rejected and repulsed after a long siege was starved, Samas-sum-ukin burning himself in the ruins of his palace. Elam remained to be dealt with, and an Assyrian army made its way to Susa, which was leveled to the ground, the shrines of its gods and the image of its ancient kings torn from their graves. Then came the turn of northern Arabia, where the rebel sheikhs were compelled to submit. But the struggle had exhausted Assyria; its exchequer was empty, and its fighting population killed. When the Cimmerians descended upon the empire shortly afterward, it was no longer in a condition to resist them. Under Assur-etil-ilani, the son and successor of Assur-bani-pal, Calah was taken and sacked, and two reigns later, Sin-ar-isakun, the last king of Assyria, fell fighting against the Scythians (606 B.C). Nineveh was utterly destroyed, never again to be inhabited, and northern Babylonia passed into the hands of Nabopolassar, the viceroy of Babylon, who had joined the northern invaders. Persia, the old capital of the Assyrians, was still standing in the age of Cyrus, but it had become a small provincial town; as for Nineveh and Calah, their very sites were forgotten.  

**A. H. SAYCE**

**ASSYRIA AND BABYLONIA, RELIGION OF.** See Babylonia and Assyria, Religion of.  

**ASSYRIAN AND BABYLONIAN LIBRARIES.** 

See Nineveh, Library of.  

**ASSYRIANS, assir’-ians (אשוריא, ‘ashšārā):** The inhabitants of Assyria. In Heb. the name of the people is the same as that of the country. See Assyria.  

**ASTAD, ast’ad:** The reading of the Eng. versions of 1 Esd 5 13 for the name which appears as Esgd in 2 Esd 2 12 and Neh 7 17. In the different or copies of 1 Esd the name varies: See Asgd; Astath.  

**ASTARTH, ass-ta-rost.** See ASHTAROTH.  

**ASTARTE, as-tar’tē, ASTORETH.** See ASHTAROTH.  

**ASTATH, as’sath (Aštath, Aštāth):** The form given in 1 Esd 8 38 to the name which in Ezr 8 12 appears as Assag. See Assag.  

**ASTONISHED, as-ton’-ish’d, ASTONIED, as-ton’-id (בָּשָׁם, bāšām; ἀστονήσω, ἀστονήσας, “astonished,” the root idea being “silent,” i.e. struck dumb with amazement; ἀστρολογία, ἀστρολογῷ, to be struck with astonishment,” as if by a blow or a shock; ἀστυνομία, ἀστυνόμη, “to amaze,” “to throw into wonderment”; παράμυθον, thamboano, “to astonish” to the point of fright); The state of being surprised, startled, stunned by some exceptional wonder, some overwhelming event or miracle, as e.g. Nebuchadnezzar's amazement at the miracle in the burning fiery furnace (Dan 3 24) (חץ, t’soch, “astonished”); of the passer-by at the desolation of Babylon (Ezr 5 10-13). The personality, teaching and works of Jesus were so wonderful, Divine, supernatural, as to awaken emotions of surprise and awe never before known in the presence of man. The people “were astonished out of measure” at his doctrine (Mk 10 26 AV); “astonished with a great astonishment” at Him having the dead (Mk 5 42 AV). The gift of the Holy Ghost to the Gentiles was in like manner a source of astonishment to those Jews who believed through the power of Peter's preaching (Acts 10 45 AV). The miracle of regeneration today, which renews and transforms debased and fallen men into saints, makes the same impression on an observing world. 

**Dwight M. Pratt**

**ASTONISHMENT, as-ton’-ishment:** Amazement; mental surprise, excitement, wonder; often the cause of the startled emotion, as in Dt 28 37: “Thou shalt become an astonishment.” The chosen people, visited with calamities for idolatry would become a source of amazement to all nations (Jer 25 9-11,18); Solomon's lofty and beautiful temple would be “an astonishment!” (2 Ch 7 21 AV). For original terms and fuller study see Astromen.  

**ASTRAY, a-strai’ (אָשָׁרַי, t’šārā, “to wander,” “to err”; παράμυθον, plōndos, “to go astray,” each carrying the idea of being lost): With one exception (Ex 33 4 “his ass going astray”) used metaphorically of moral wandering, going astray in paths of error and sin, like “sheep going astray” (1 Pet 2 25 AV; Isa 63 6; Ps 119 170). This wandering may be due (1) to inherent evil (Ps 68 3); (2) to false shepherds (Jer 50 6); contrast the beautiful and classic passage, Mt 18 12,13, the Son of man (ver 12) seeketh which is gone astray. No word more vividly portrays sin as a straying, a separation from God. To be morally ‘astray’ is to be ‘lost.”

2. Origin of Modern Astrology Curious Arts of Ephesi

LITERATURE

I. The Desire to Forecast the Future. —The desire to penetrate the future and influence its events has shown itself in all lands and ages. But it is clear that a knowledge of the future does not lie within the scope of man's natural powers; "divination," therefore has always been an attempt to gain the help of beings possessing knowledge and power transcending those of man. The answer of the Chaldæans to King Nebuchadnezzar when he demanded that they should tell his dream was a reasonable one: "There is not a man upon the earth that can show the king's matter: . . . there is no other that can show it before the king, except the gods, whose dwelling is not with flesh." (Dan 2.10.11.) "Divination," therefore, in all its forms is but an aspect of polytheism.

It was for the twofold reason that the arts of divination were abominable in themselves, and gave to their votaries no knowledge of the will of God. This is well forbidden in the Law (Dt 18.9–15). Israel was to be perfect with God and He would reveal to them His will perfectly through that prophet like unto Moses whom He would send. Kell and Delitzsch in commenting on this passage will remonstrate together all the words which the language contained for the different modes of exploring the future and discovering the will of God, for the purpose of forbidding every description of soothsaying, and prohibit the habit of Moloch-worship at the head, to show the inward connection between soothsaying and idolatry, possibly because febrution, or passing children through the fire in the worship of Moloch, was more intimately connected with soothsaying and magic than any other description of idolatry." (Commentary on the Pentateuch, III, 393.)

The forms of soothsaying mentioned in this catalogue are as follows: "One that practiseth augury" (מְנַשְׁבִּים) is of uncertain etymology, but the rabbins connect it with אָנוּין, "an eye"; literally therefore one who ogles, or who bewitches with the evil eye. "An enchanter" (מְנַשְׁבִּים), sometimes supposed to be a snake-charmer, or one who sings lullabies to the snake; in other words a mesmerist or hypnotist. The word occurs in connection with Joseph's divining-cup, and such cups were employed both in Babylon and Egypt, and their use was akin to the more modern crystal-gazing, the hypnotic state being induced by prolonged staring, as in the fascination aspersed to serpents. On this account, snakes were sometimes figured upon such cups. Thus in Talm we read: "If one finds vessels with delineations of the sun, if they show them, let him cast them into the salt sea" (Abho, dhah-Zath, fol 42, col. 2). "A sorcerer" (מְנַשְׁבִּים) is one who incants murmants or incantations in ventriloquial whispers, as if under the influence of the spirits of the dead. "A charmer" (תְּוָכָר הָבֶר), is one who inflicts a spell by weaving magical knots. "A conulser with a familiar spirit" (בָּזְרִים), denotes one who is possessed of a python or soothsaying demon. Such were the woman of Endor in whom Saul consulted on the eve of the battle of Gilboa (1 S 28) and the pythons of Philippi out of whom St. Paul cast the spirit (Acts 16.16–18). The word (בָּזְרִים) means "bottle" and either indicates that the medium was the receptacle of the spirit or it is a relic of the old tradition that the departed dead are imprisoned in bottles by means of magical incantations.

"A wizard" (גָּיוֹדֶה) means a wise man, "a knowing one." The word in OT is always used in connection with בָּזְרִים, and denotes a man who could interpret the ravings of the medium. A necromancer" (דָּרְשָׁר דַּדְו), is one who calls up the spirits of the dead and has intercourse with them. "Consulting the teraphim" (Ezk 21.21) may have been a form of consulting the dead, if, as is probable, the teraphim were ancestral images, raised by superstition to the rank of household gods. The manner of consultation we do not know; but as an illustration of the use of the image of a dead person, we may remember that a modern medium will often ask for a portrait of a deceased relative for the alleged purpose of entering into communication with the departed spirit.

It will be seen that these forms of soothsaying are allied to the arts which in modern times bear the names of hypnotism and mediumship. They are more briefly referred to in Isa 8.19. "When they shall say unto you, Seek unto them that have familiar spirits and unto the wizards, that chirp and that mutter: should not a people seek unto their God? on behalf of the living should they seek unto the dead?" Soothsaying and partial divination are connected with the ventraliloquial whispers and mutterings, which are supposed to be characteristic of the utterances of the dead.

But the first term in the catalogue, "one that useth divining-cups," is of wider application. It signifies a "diviner" and refers to the practice which men have followed in an infinite variety of ways for trying to get light upon the future by resorting to what seem to them the habits of chance. The results of a battle and of the fall of dice are alike unknown beforehand. But the second can be tested, and men assume that the result of the first will correspond to the second. Any chance will serve: the shuffling of a pack of cards; the flight of birds; the arrangement of dregs in a cup; nothing is too trivial for the purpose. The allotment of a particular interpretation to a particular sign was of course purely arbitrary, but the method could be applied in an infinite number of ways, every one of which could be worked out to an extent only limited by the limits of the misdirected ingenuity of man. Two such forms of "divination," that is of "dividing," are mentioned by Ezekiel in the prophecy of Moloch: "The king of Babylon stood at the parting of the way, at the head of the two ways, to use divination [גָּשָׁמ]: he shook the arrows to and fro, he consulted the teraphim, he looked in the liver" (Ezk 21.21). The arrows were either marked to represent certain courses of action, and one was drawn out or shaken out, or else they were thrown promiscuously up into the air, and the augury was deduced from the way in which they fell.

"Looking in the liver" used to be one of the most venerable forms of divination. Here again it was a question of "division." Each of the various parts of the liver, its lobes, the gall bladder, the ducts and so forth, had a special significance allotted to it, the theory, apparently, being that the god to whom the animal was sacrificed revealed his will by the way in which he molded the organ which was supposed to be the seat of the victim's life.

It will be noted that no explicit mention is made of astrology in this catalogue of the modes of soothsaying. But astrology was, as will be shown, closely connected with Moloch-worship, and was most directly a form of divination, that is of "dividing.""
points out that the common designation for "planet" amongst the Babylonians is a compound ideograph, the two terminals of which signify 'sheep' and 'dead.' He considers that the sacrificial sheep was offered to the deity specially for the purpose of securing an omen. Hence when the planets were used as omens, this name of "slain sheep" was naturally applied to them, even as "augury, divination by the flight of birds, came to represent amongst the Romans all kinds of divination. "On the famous bronze model of a liver found near Placenza and which dating from about the 3d cent. BC was used as an object-lesson for instruction in hepatoscopy, perhaps only to be die throne. "As the model of a liver dating from the Hammadur period was used in a Bab temple school, we find the edge of the liver divided into sixteen regions with names of the deities inhabiting them corresponding to divisions of the heavens in which the gods have their seats, while on the reverse side there is a line dividing the liver into 'day' and 'night.' Professor Korte, in a study of this remarkable object, summing up the results of many years of research, explains this by showing that the liver was regarded as a microcosm reflecting the macrocosm, or, in other words, the liver of the sacrificial animal from being originally a reflection of the soul or mind of the god to whom the animal was offered, was brought into correspondence with the parts of the heavens, the heavenly bodies revealing the intention of the gods acting in concert" (Morris Jastrow, Jr., "Hepatoscopy and Astrology in Babylonia and Assyria," in Proc. Amer. Phil. Soc., 665-66).

There were 12 classes of the zodiac, that is to say of divination by the heavenly bodies, are mentioned in Is. 47 13, as being practised in Babylon. "Let now the astrologers, the star-gazers, the monthly prognosticators, stand up, and save thee. The astrologers are the "dividers of the heavens" (khabirē šamāgin); that is to say the significance of any stellar conjunction was made to depend upon the division of the heavens in which it occurred. The earliest of such divisions appears to have been into the four quarters, N., S., E., W., and astrological tablets of this character have been discovered in considerable numbers. Thus tablet W. A. I. III, 56, 1, gives a table of eclipses for each day of the month, and associates the month with the days of the month, and the significance of the eclipse is connected with the quarter in which it was seen. On the first day of each month the eclipse is associated with the S., on the second with the N., on the third with the W., and on the fourth with the E. (S. Savage, Astronomy and Astrology of the Babylonians, 222). Tablets of this description are very instructive since they prove that those who drew up such lists of omens had not even a rudimentary knowledge of astronomy. For the Bab months were intended to be natural months, yet at this time it was not realized that an eclipse of the sun could only take place when the moon was invisible, that is to say about the 28th or 29th day of the month, if the calendar was correct. Further, it was not realized that neither sun nor moon can ever be in the N. in the latitude of Babylon. Such tables of omens then were not new, as has sometimes been supposed, from a striking event having occurred near the time of an observed eclipse, but they must have been drawn upon an entirely the arbitrary plan.

The same principle of "division" was applied to the moon itself for the purpose of drawing omens from its eclipses. Thus in R. C. Thompson's Reports of the Magicians and Astrologers of Nineveh and Babylonia (No. 268), "The omens of all the lands. The right of the moon is Akkad, the left Elam, the top Aharru, the bottom Subartu."

The constellations of the zodiac also had omens allotted to them in a similar manner. The astrologers mentioned in the Book of Dan ("ashahdāphāh") are not "dividers of the heavens," but mutterers of incantations. The star-gazers or seers of the stars or constellations (kōbdāynam bā-kōbdābāhām) may be illustrated from two of Thompson's Reports. No. 216, "Saturn has appeared in Leo. When Leo is obscured, for three years lions and jackals ..., and kill men"; and No. 239, "When Mars (šapin) approaches Scorpio the prince will die by a scorpion's sting and his son after him will take the throne."

Saturn takes three years to pass through the constellation Leo, the ravages of lions are predicted to last for that time.

At a later date we find a complete system of astrology based upon the constellations of the zodiac which happen to be rising at the moment when the stars were consulted. Examples of this form of divination are found in the works of Zeuxobros of Babylon, who flourished about the beginning of our era. By his day the system had received a considerable development. Twelve signs did not give much scope for prediction, so each sign had been divided into three equal portions or "decans;" each decan therefore corresponding nearly to the sign of the zodiac, and being thus the equivalent of a decade or "week" of 10 days of the Egyptians. A yet further complexity was brought about by associating each one of the 36 decans with one of the 36 extra-zodiacal constellations, and a further variety was obtained by associating each decan with its sign in the zodiac with its sign in the zodiac with its sinanatallōn, or constellation rising with it; that is, at the same time; or with its paranatallōn, or constellation rising beside it; that is, a constellation on the same meridian. At what time these particular forms of augury by the constellations came into use we do not know, but the division into the decans is distinctly alluded to in the 5th tablet of the Bab Creation Epic: "4. For the twelve months he [Marduk] fixed three stars."

The monthly prognosticators were the men who knew the omens of the new moon (mōđīb'im lō-kōbdābāhēm). At one time the error of the}

II. Worship of the Heavenly Bodies.—As we should naturally expect, the earliest astrological tablets relate chiefly to omens dependent upon the two great lights, the sun and moon. There is no evidence that any such tablets existed when the planets were first recognized as distinct from the fixed stars. Probably this discovery was intimately connected with the formation of the con-
stellations; it cannot have been long delayed after it. Certainly planet-worship, and as connected with it, planetary divination, prevailed in the Ephraimites very early in the fourth millennium, possibly even earlier.

One planet is certainly mentioned in OT, and we may safely infer that the other four were known, since this particular planet is the least conspicuous both in brightness and in motion, and was therefore probably the last to be discovered. The reference to Saturn occurs in Am 5:25:26: "Did ye bring unto me sacrifices and offerings in the wilderness forty years, O house of Israel? Yet, ye have borne the iniquity of your fathers in the heathen, even in [AV Chinn] the shrine of your images, the star of your god, which ye made to yourselves." This passage was quoted from LXX by St. Stephen in his defence, 'And they made a calf in those days, and brought a sacrifice unto the idol, and rejoiced in the works of their hands. But God turned, and gave them up to serve the host of heaven; as it is written in the book of the prophets,' "Did ye offer unto me slain beasts and sacrifices, Forty years in the wilderness, O house of Israel? Yet, ye have borne the iniquity of your fathers in the heathen, even in [AV Chinn] the shrine of your images, the star of your god, which ye made to yourselves." (Acts 7:41-43).

The difference between the names Chinn and Rephan is due either to Rephan being a local Egyptian name for the planet Saturn, and therefore used by the LXX as its equivalent, or to an actual error of transcription in the text from which they were translating; the initial of the word being taken as κατών, it should have been káπηλ, r instead of k. The word should therefore be transliterated Kaivan, which was the name of the planet Saturn amongst the ancient Arabs and Syrians, while kaivatet, "constant" or "regular," was its name with the Assyrians. The RV in Am 5:26 adopts the reading of the AV, "Sicceuth your king," Moloch meaning king; but the authority of the LXX and the parallelism of the text and its general line of thought support the reading given by some of the ancient versions and followed by the AV.

The difficulty of the passage is that both Amos and St. Stephen appear to represent the worship of the golden calf as identical with the worship of Moloch and of the planet Saturn. Worship mentioned here, the nature of the reference would imply that this deity was one familiar both to speaker and hearers. The difficulty vanishes at once, if the plain statement of St. Stephen be accepted, that when God permitted Israel to "go after the stubbornness of their heart, that they might walk in their own counsels" (Ps 81:12) He "gave them up to serve the host of heaven." The worship of the golden calf was star worship; it was the solar bull, the constellation Taurus, in which the sun was at the time of the spring equinox, that was thus represented. The golden calf was therefore analogous to the familiar symbol of the Mithraic cult, the bull slain by Mithra, Sol Invictus, if indeed the latter did not take its origin from this apostasy of Israel. See CALF, GOLDEN.

And Moloch the king, the idol of the Ammonites and Phoenicians, was intimately connected both with the solar bull and the planet Saturn. According to the rabbis, his statue was of brass, with a human body but the head of an ox. On the Carthaginian worship of Moloch or Saturn, Diodorus (book xx, ch i) writes: "Among the Carthaginians there was a brazen statue of Saturn putting forth the palms of his hands before him in a manner indicating toward the earth, as that the boy who was laid upon them, in order to be sacrificed, should slip off, and so fall down headlong into a deep fiery furnace. Hence it is probable that Euripides took what he fabulously relates concerning the sacrifice of Taurus, where he introduces Iphigenia asking Orestes this question: "But what sacrifice will you then make to the gulf of sacred fire we have?" The ancient fable likewise that is common among all the Greeks, that Saturn devoured his own children, seems to be confirmed by this law among the Carthaginians."

The parallelism of the text therefore is very complete. The Israelites professed to be carrying the tabernacle of Jeh upon which rested the Shekinah glory; but in spirit they were carrying the tabernacle of the cruellest and most malignant of all the deities of the earth, in the belief that the visible signal of their rejoicing was the star of the planet assigned to that deity.

Moloch then was the sun as king, and especially the sun as he entered upon what might be considered his peculiar kingdom, the zodiac from Taurus to Scorpio, the period of the six summer months. The connection of the sun with Saturn may seem to us somewhat forced, but we have the most direct testimony that such a connection was believed in by the Babylonians. In Thomson's Reports, obv. of No. 176 reads: "When the sun stands in the place of the moon, the king of the land will be secure on his throne. When the sun stands above or below the moon, the foundation of the king's throne will be removed. When the sun clearly cannot be the actual sun, and it is explained on the reverse as being "the star of the sun," the planet Saturn. No. 176 rev. reads: "Last night Saturn drew near to the moon. Saturn is the star of the sun, it is therefore the planet Saturn and is in a peculiar sense the symbol of Time, and because of Time, of Destiny."

The connection between the worship of the golden calves, of the heavenly host and of Moloch, and of these with divination and enchantments, is clearly in the judgment which the writer of the Book of K pronounces upon the apostate ten tribes: "They forsook all the commandments of Jehovah their God, and made them molten images, even calves, and sold Baal, and served Baal. And they caused their sons and their daughters to pass through the fire, and used divination and enchantments." (2 K 17:10-17). The sin of apostate Judah was akin to the sin of apostate Israel. In the reformation of Josiah, he put down the idolatrous priests that "burned incense unto Baal, to the sun, and to the moon, and to the planets [mazzaloth], and to all the host of heaven" (2 K 23:5). He also destroyed the ' Asherah and he "defiled Topheth . . . . . . . . that no man might make his son or his daughter to pass through the fire to Molch" (ver 10). "Moreover them that had familiar spirits, and the wizards, and the teraphim, and the idols, and all the abominations that were seen in the land of Judah and in Jerusalem, did Josiah put away" (ver 24). The idolatries to which the Israelites of both kingdoms were especially prone were those of the heavenly bodies, and inextricably woven with them was their peculiar divining those heavenly bodies as omens, and in consequence for every kind of divination and witchcraft.

The word trn "planets" in 2 K 23:5 is mazzaloth,
Astrology

closely akin to the masszroth of Job 38:32. This rendering probably reproduces correctly the meaning of the original. R.C. Thompson, in his recent reduction to the Reports writes (xxvii): "The places where the gods stood in the zodiac were called massažlāt, a word which means literally 'stations,' and we are probably right in assuming that it is the equivalent of the massazlāth mentioned in 2 K 23:5. The use of the word in late Heb is, however, somewhat more vague, for massažlāt, though literally meaning a constellation of the zodiac, is also applied to any or every star, and in the B'v'eloth Rabbei, e.g., it is said 'One massazlāz did not contradict another.' The bodies referred to are evidently the moon with its lunation of about 30 days, and Saturn with its revolution of about 30 years; these being the two planets with the shortest and longest periods respectively. By a natural metonymy massažlāth, the complete circuit of the zodiac, came also to mean massažlāt, the bodies that performed that circuit, just as in the present day we speak of a railway, which means literally the "permanent way," when we really mean the trains that travel upon it.

The references in OT to the planets other than Saturn are not so clear. In Isa 65:15 two deities are so named: "For every high mountain," etc. It is clear that Gad and Meni are the names of two closely associated deities, and Gesenius identifies them with Jupiter and Venus, the Greater and Lesser Good Fortunes of the astrologers. But as I have suggested in the Astronomy of the Bible (192, 217), if any of the heavenly bodies are here intended (which cannot as yet be considered certain), it is more probable that they are the two beautiful star-clusters that stand on the head and the shoulder of the Bull at the old commencing of the zodiac, as if they marked the gateway of the year—the Hyades and Pleiades. Both groups were considered traditionally as composed of seven stars; and the two names Gadh (the Hyades) and Meni (the Pleiades) taken together give the meaning of "Fortune," i.e. seven. The lecelettaeoma—the spreading the table and mingling the wine to Gadh and Meni—at the beginning of the year to secure good fortune throughout its course, were therefore held about the time of the Passover, as if in memory, if indeed they were not a desecration of it: heathen rites added to one of the most solemn services of Jeh.

The planet Venus is more distinctly referred to in Isa 14:12: "How art thou fallen from heaven, O Lucifer, light-bearer," etc. Light-bearer is the Hebrew word hāṭēl corresponding to the Assyrian mustelīth, "the shining star," an epithet to which the planet Venus has a prominent claim. Mars and Mercury, the two remaining planets, are not mentioned as such in OT, but the deities connected with them, Nergal=Mars (2 K 17:30) and Nebo=Mercury (Isa 46:1), both occur.

III. Systems of Astrology. In astrology the planets were regarded as being 7 in number, but the idea that the number 7 derived its sacredness from this fact is an inversion of the true state of the case. It was that being regarded as a number, the number of the planets was artificially made to correspond by including in the same class as the five wandering stars, bodies that differed so widely from them in appearance as the sun and moon. So artificial a classification makes no more sense than to say that a man is a quadruped, a horse, a dog, or a cat. It is significant that in Gen 1:14 the sun and moon are presented as being (as indeed they appear to be) of an altogether different order from the rest of the heavenly bodies. Yet there is one feature that they have in common with the five planets: all move among the stars within the band of the zodiac; each of the seven makes the circuit of the massažlāt.

We owe the names of the days of the week to this astrological conception of the planets as being 7 in number, and it is significant that in A. Proctor's Myths and Marvels of Astronomy, 43-47) have supposed that the week of 7 days owed its origin to this astrological conception and that the 7th day—Saturn's Day—became the Sabbath, the Day of Rest, because Saturn was the planet of ill-omen and it was then unlucky to undertake any work. The way in which the allotment of the planets to the days of the week was arrived at was the following. The Gr astronomers and mathematicians concluded that the planet Saturn was the most distant from the earth and that the others followed in the descending order of Jupiter, Mars, Sun, Venus, Mercury, Moon. In the progress of astrology there came a time when it was found necessary to assign a planet to each day of the week, and so it could afford. Starting then with Saturn as presiding over the first hour of the first day, each planet was used three times over on that day, and three planets were used a fourth time. The sun, the fourth planet, was reserved for the last hour of the second day, and gave it its name, so that Sunday followed Saturday. In like manner the third day became the moon's day, and so on with the other planets which followed in the order Mars, Mercury, Jupiter, Venus, and finally Saturn. This idea of the relative distances of the planets was that arrived at by the astronomers of Alexandria, and was necessarily subsequent to the reduction of the planetary motions to a mathematical system by Euclides and his successors. The division of the day implied was one of 24 hours, not of 12; the Egyptian division, not the Bab. But the Egyptian week was one of 10 days, the 7-day week was Sem, and the week implied in the system is the free week, running on from the 1st week of the month of the Bab. For the Babylonians, though they paid some attention to the 7th day, began their reckoning afresh at the beginning of each month. This particular astrological system therefore owed its origin to foreign influence, the introduction of the influence of the planets was Bab; the mathematical working out of the order of the planets was exclusively Gr; the division of the day into 24 hours was Egypt; the free continuous 7-day week was particularly Jewish. These four influences were brought together in Alexandria not very long before the Christian era. Here therefore and at this time, this particular system of astrology took its origin.

This form of astrology was readily adopted by the Jews in their later, degenerate days, as we find from the references in Talm. Thus Rabbi Chana men said to his disciples, "Go and tell Ben Laive, the planetary influence does not depend upon days but hours. He that is born under the influence of the sun (no matter on what day) will have a beaming face," and so the rabbi went through the whole list of the planets (Shabbeth, fol 156, col. 1). The above was spoken as a criticism of Rabbi Shimon Ben Laive who had written, "Whoever is born on the first day of the week will be either a very good man or a thoroughly bad man; because light and darkness was created on that day!" and the rabbi spoke similarly for the other days. We get a relic of this superstition in our nursery rhyme, "Monday's
child is full of grace; Tuesday's child is fair of face," etc; and some present-day astrologers still use the system in their forecasts. It will of course be noticed that the signs of the zodiac are named after the actual positions of the heavenly bodies; the moon does not shine more or less on Monday than on any other day.

It was from Alexandria astrology that modern astrology immediately derived its form; but the original source of all astrology in the

2. Origin of ancient world lay in the system of

Modern planetary idolatry prevalent in the

Astrology Euphrates valley, and in the fact that

this idolatry was practised chiefly for the purpose of determining the time of divine visits, it was supposed that a real astronomy was cultivated at an early time in Babylonia, but Jastrow, Kugler and others have shown that this idea is without basis.

The former writes, "The fact however is significant that, with perhaps some exceptions, we have in the library of Ashurbanipal representing to a large extent copies from older originals, no text that can properly be called astronomical... It is certain that the astronomical tablets so far found belong to the latest period, and in fact to the age following on the fall of the Bab empire. According to Kugler the oldest dated genuinely astronomical tablet belongs to the 7th year of Cambyses, i.e. 522 BC" ("Hepatoscopy and Astrology in Babylonia and Assyria," in Proc. Amer. Phil. Soc., 667).

The conquests of Alexander the Great brought into close connection with each other the Babylon and Gr systems of thought, and Bab astrology was introduced to the Greeks by Beroea the Chaldean priest. In Gr hands, astrology was changed from its character of an oriental religion into the appearance of a science. In Babylonia the stars had been consulted for the benefit of the king as representing the state; amongst the Greeks, with their strong individualistic tendency, the fortunes of the individual became the most frequent subject of inquiry, and the idea was originated of determining the character and fortune of a man from the position of the stars at his birth—genethliology—a phase of astrology which never existed in the Euphrates valley. This extension rendered it necessary to increase greatly the complexities of the omens, and the progress which the Greeks had made in mathematics suited them with the means of doing so.

Thus came into existence that complex and symmetrical system of divination of which we have the earliest complete exposition in the writings of Claudius Ptolemy about 130 A.D.; a system which, though modified in details, is in effect that in use today.

Since this mathematical astrology did not come into existence until after the commencement of the Christian era, it is clear that there could not be any reference to it in the NT. Acts 19 19). Of the converts at Ephesus it is written, "Not a few of them that practised magical arts brought their books together and burned them in the sight of all; and they counted the price of them, and found it 50,000 pieces of silver." Books of magical incantations and prescriptions were certainly included, but it is also likely that the almanacs, tables and formulæ, essential to the astrologer for the exercise of his art, were also in the number. It was of course impossible then, as now, for the convert to Christianity to consult astrologers or to practise astrological divination. Partly because of the anabasis, for the divisions of the heavens upon which the predictions are based, are purely imaginary; the "signs" of the zodiac, and the "houses" have nothing whatsoever correspoding to them in Nature; such division is exactly that denounced by the prophets of old as hegem, "divinization." Next, and of more importance, it ascribes to men, animals, the planets or the spirits supposed to preside over them, the powers that belong to God alone; it was and is essentially idolatrous. As one of the chief living astrologers put it, "The true astrologer believes that the sun is the basis of the heavens of this solar system, 'in Him we live and move and have our being.' The planets are his angels, being modifications in the consciousness of the Logos" (Knowledge, XXXII, 229). Astrology is indeed referred to in the OT, with other forms of divination, and the idolatry inherent in them, but they are only mentioned in terms of the most utter repudiation. The Jews alone of all the nations of antiquity were taught by their religion neither to resort to such arts nor to be afraid of the omens deduced from them. Isaiah knew the Lord to be He that "freteth the signs of the liars, and maketh diviners mad" (Isa 44 25), and Jeremiah declared, "Thus saith Jehovah, Learn not the way of the nations, and be not dismayed at the divinations of the nations are dismayed at them" (Jer 10 2). And what held good for the Jews of old holds good for us today. Above all, astrology is an attempt to ascertain the will of God by other means than those which He has appointed—knowledge of the Truth and the Life, and His Holy Scriptures in which we learn of Him, and which are able to make us "wise unto salvation through faith which is in Christ Jesus" (2 Tim 3 15).

LITERATURE
The keynote of the Heb writers respecting the heavenly bodies is sounded in Ps 8:

"When he setteth for thy heavens, the work of thy fingers," etc.

The moon and the stars, which he hast made; What is man, that thou art mindful of him? And the son of man, that thou visitest him? For thou hast made him but little lower than God, And crowned him with glory and honor. Thou madest him to have dominion over the works of thy hands; Thou hast put all things under his feet." (Ps 8:3-6).

The heavenly bodies were inexpressibly glorious, and they were all the handiwork of Jehovah—without power or vitality of their own—and man, not by any inherent virtue, but by the will and grace of God, was superior to them in importance. Thus there was a great gulf fixed between the superstitious of the heathen who worshipped the sun, moon and stars as gods, and the faith of the pious Hebrew who regarded them as things made and moved by the will of one only God. And it followed from this difference that the Hebrew, beyond all nations, if his inquiry was filled with a keen delight in natural objects and phenomena, and was attentively observant of them.

I. The Heavenly Bodies.—To the sacred writers, the ordinances of heaven taught the lesson of Order—great, magnificent and immovable. Day by day, the sun rose, the moon and the stars moved in their "highways" or "courses." And the Right Hand of God, the "host of heaven," moved in their appointed path, as by the command of Jehovah, the "ruler of the hosts." But, as the years rolled on, the stars in the N. autheon, the "host of heaven," moved in their "highways" or "courses," while the other stars, those in the W. disappeared into the light of the setting sun, and new stars seemed to spring out of the dawning light. There was thus a yearly procession of the stars as well as a nightly one.

And to this "ordinance of the heavens" the Hebrews noted that there was an answer from the earth, for in unfailing correspondence came the succession of seasons, the revival of vegetation, the ripening of harvest and of fruits, the return of winter's cold. Of them God asked the question: "Knowest thou the ordinances of the heavens? Canst thou establish the dominion thereof in the earth?" (Job 38:33), and they recognized that to this question no answer could be given, for these ordinances of heaven were the sign and evidence of Almighty Jehovah, power and unchangeableness. "Thus saith Jehovah, who giveth the sun for a light by day, and the ordinances of the moon and of the stars for a light by night . . . . Jehovah of hosts is his name" (Jer 31:35).

We have no writings of the early Hebrews other than the books of the O.T., and in them there is no record of any research into the mechanical explanation of the movements of the heavenly bodies. Nor should we expect to find in them a record of the research if such were made, since the purpose of Holy Scripture was, not to work out the relations of things—"the inquiry to which modern science is devoted—but to reveal God to man. Therefore the lesson which is drawn from the observed ordinances of heaven is not that the earth rotates on its axis or revolves round the sun, but that God is faithful to His purpose for mankind. "Thus saith Jehovah: If my covenant of day and night stand not, if I have not appointed the ordinances of heaven and earth; then will I also cast away the seed of Jacob, and of David my servant" (Jer 33:25-26). And "the glory of God" which the heavens declare is not only His almighty power, but the image which the order and perfection of the heavenly movements supply of the law which He has revealed unto man. The "speech" that they "utter," the "knowledge" that they "show" is: "The law of Jehovah is perfect, restoring the soul" (Ps 19:7).

(1) The names for the sun.—Four words are used for the sun in the O.T.;
   (a) "Or" simply means "light" and is usually rendered thus, but in one instance (Job 31:26), being in antithesis to "moon," it is rendered as "sun," and it is used for the sun when this is in association with bêbhânah or "snow-white" for the moon, as in Isa 24:23, "Then the snow-white [moon] shall be confounded, and the heat [sun] reigned," the assimilation being drawn between the cold light of the silver moon and the fiery radiance of the glowing sun.
   (b) Hammâmāh means "heat" and is used for the sun when this is in association with bêbhânah or "snow-white" for the moon, as in Isa 24:23, "Then the snow-white [moon] shall be confounded, and the heat [sun] reigned;" the assimilation being drawn between the cold light of the silver moon and the fiery radiance of the glowing sun.
   (c) Shemesh, the Sama, of the Babylonians, is a primitive word, probably with the root meaning of "ministrant." This is the word most frequently used for the sun, and we find it used topographically as, for instance, in Beth-sheam, "the house of the sun." Four places of this name are mentioned in the O.T.; one in Judah, a Levitical city, to which the two milch kine bearing the ark took their straight way from the country of the Philistia, one on the border of Issachar; one in Naphtali, a fenced city; and one in Egypt, supposed to be the same as Heliopolis or On, the city of Asenath, wife of Joseph.
   (d) Ḥēreb means "blister" or "burning heat," from a root "to scratch" or "be rough," and is an unusual term for the sun, and its precise rendering is sometimes in doubt. Once it is rendered as "itch," when it occurs amongst the words threatened in the "curse" that the six tribes tribes threatened in the "curse" that the six tribes shall not bring their corn to Mount Ebal (Dt 28:27). Once it is certainly used of the sun itself when Job (9:7) said of God, He
"commandeth the sun [heres or heres], and it riseth not." Once it is certainly the name of a hill, for Mount Heres was near Ajalon, on the borders of Judah and Dan. In another passage, authorities differ. In the rendering, Strong and others, Slade overcame Zebah and Zalmunna (Jgs 8 13), he "returneth from the battle," according to AV, "before the sun was up," but according to RV, "from the ascent of Heres." In yet another passage (Jgs 14 18), when the Philisties answered Samson's riddle, both AV and RV to heres as sun; but the city of the sun was termed "Hareseth." We moreover get slight variants of the same word, joined with kit ("wall" or "fortress"), in Kir-Hareseth (2 K 3 25; Isa 16 7) and Kir-Heres (Isa 16 11; Jer 43 31 36). These are probably to be identified with the modern "Khirbat es-Sheikh." (2) City of the sun.—But the most interesting reference is found in Isa 19 18: "In that day there shall be five cities in the land of Egypt that speak the language of Canaan, and swear to Je-hovah of the host, and shall not be destroyed." The word here rendered "destruction" is in Heb heres, which has that meaning, but Ge-se-ni-us and other authorities would substitute for the initial letter, he, the letter, neth, which it so closely resembles. In "Kir-Hareseth," this city of the sun, With this reading it was identified with On, that is, Heliopolis (the city of the sun), and on this belief Onias, the son of Onias the high priest, persuaded Ptolemy I to allow him to build a temple, which in that prefecture, 140 BC (Ant. XIII, iii, 1). (3) The greater light-giver.—(e) Yet a fifth function is used to denote the sun, and in one respect it is the most important and significant of all recorded. The creation narrative it is called the greater light or rather light-giver (mal'or): 'And God made the two great light-givers; the greater light-giver to rule the day, and the lesser light-giver to rule the night: He made the stars also' (Gen 1 16). The extremest simplicity of this passage is most significant. In marked contrast to the Bab creation poem, which by its more complex astronomy reveals its later origin (see post, sec. II, 12, Mazzārōth), the sun and moon have no different names assigned to them; there is no recognition of the grouping of the stars into constellations, none of any of the planets. The celestial bodies could not be referred to in a more simple manner. And this simplicity is marred by no such maladroit fainting out of the distinction of sun or moon or stars; there is no anthropomorphic treatment, no suggestion that they formed the vehicles for spirits. They are described as they were observed when they were first noticed by men, simply as light-givers of different brightness. It is the expression of man's earliest observation of the heavenly bodies, but it is real observation, free from any taint of savage phantasies; it marks the very first step in astronomy. No particular names are assigned to them; there is of a character more markedly primitive than this. (4) Purpose of the sun.—Two purposes for the great heavenly bodies are indicated in Gen 1 14 15. The sun and moon are appointed to give light and to measure time. These, from the human and practical point of view, are the two main services which they render to us. Their purpose for measuring time by their movements will be taken up under another heading, but here it may be pointed out that when it is stated in the Book of Wisd (7 18) that King Solomon knew "the alternations of the solstices and the changes of seasons," the reference is to the whole cycle of changes from winter through summer back to winter again. From winter onward the places of sunrise and sunset move northward along the horizon until midsummer when for some days they show no change—the "solstice" is reached; then from midsummer onward the movement "turns" southward until midwinter, when again a "solstice" is reached, after which the places of sunrise and sunset again move northward. This changing place of the sunrise is also referred to when God asked Job (38 12 14): Hast thou "caused the dayspring to know its place," and the passage goes on, "It [the earth] is changed as clay under the seal; and all things stand forth as a garment." As the shapeless clay takes form under the pressure of the seal, as the garment, shapeless while folded up, takes form when the wearer puts it on, so the earth, shapeless during the darkness, takes form and relief and order and impress of the dawn light. In the NT when St. James (1 17) speaks of "the Father of lights, with whom can be no variation [parallage], neither shadow that is cast by turning [trophi]" he is using astronomical technical terms for these same apparent movements of the sun in the city of the sun. (5) The sun as a type.—But the apparent unchangeability of the sun makes it, as it were, a just measure of eternal duration (Ps 72 5 17). The penetration of its rays renders "under the sun" (Eccl 1 9) "eternal" in the sense of unchangeable, and on the other hand the fierceness of its heat as experienced in Pal makes it equally suitable as a type of oppression and disaster, so the sun is said, in Ber. to "smite" those oppressed by its heat (Ps 121 6). But it was in its light-giving and ministering power that the Heb writers used the sun as a type to set forth the power and beneficence of God. Words are the symbols of ideas and it was only by this double symbolism that it was possible to express in intelligible human speech, and to make men partly apprehend some of the attributes of God. So we find in the Ps of pilgrimage (Ps 84 11) Jehovah not only "smiteth the sun" and a shield "fire" (Pal.) which foretells "that the sun of righteousness shall arise with healing in its wings." But the old Heb writers were very guarded and careful in the symbolism they used, whether of word or illustration. Man in those days terribly perverted the benefits which they received through the sun, and made them the occasion and excuse for plunging into all kinds of nature worship and of abominable idolatries. It was not only clear thinking on the part of the type that the sun gave them, but the benefits that came to them in the natural word direct to the action of God; it was a necessity for clean living. There is no bottom to the abyss in which men plunged when they "worshipped and served the creature rather than the Creator, who is blessed for ever" (Rom 1 25). In NT times, though men were no less prone to evil, the fashion of that evil was changing. "The pillars of Beth-shemesh" were broken down (Jer 43 13), idolatry was beginning to fall into disrepute and men were led away rather by "the knowledge [gnosis] which is falsely so called" (1 Tim 6 20). The apostles could therefore use symbolism from the natural world more freely, and so we find St. John speaking of Our Lord as "There was the true light, even the light which shineth every man, coming into the world" (Jn 1 9), and again, "God is light, and in him is no darkness at all" (1 Jn 1 5); and again, that the glory of the New Jerus shall be that "the city hath no need of the sun, neither of the moon, to shine upon it: for the glory of God is the Lamb" (Rev 21 23); while the great modern discovery that nearly every form of terrestrial energy is derived ultimately from the energy of the sun's rays, gives a most striking appropriateness to the imagery of St. James that 'Every good gift and every perfect gift is from above,
coming down from the Father of lights, with whom can be no variation, neither shadow that is cast by turning' (Jas 1 17 ERV).

(1) The names for the moon.—Three words are tr' "moon" in the OT, not including cases where "moon" has been rendered "moon" for the sake of a more flowing sentence: 

(a) ḫôḏhesh, "new moon," meaning "new," "fresh." As the Hebrews reckoned their months from the actual first appearance of the young crescent, ḥôḏhesh is most frequently tr" month." Thus 'In the six hundredth year of Noah's life, in the second month, on the seventeenth day of the month' (Gen 7 11), and in the great majority of cases, the word for month is ḥôḏhesh, "new moon," in Isa 66 23, "from one new moon to another," should be lit. "from new moon to new moon." Once it is rendered "monthly" (Isa 47 13), when it is used to denote the astrologers who fixed the omens of the opening month. Ḥôḏhesh, therefore, when tr" new moon" is not a designation of the actual heavenly body, but denotes the first day of the month. It is a term directly or indirectly connected with the calendar. 

(b) Yərâh, probably "wandering," a very appropriate primitive term for the moon, since her motion among the stars from night to night is sufficiently rapid to have caught the attention of very early observers. Its use therefore as the proper name for the "lesser light" indicates that the systematic observation of the heavenly bodies had commenced, and that the motion of the moon, relative to the stars, had been recognized. Yərâh is twice tr" month" (Dt 33 14; Isa 60 20), but without any great reason for the variation in either case.

(2) The lesser light-giver.—The direct references in Scripture to the moon as a light-giver are not numerous, but those that occur are significant of the great importance of moonlight in ancient times, when artificial lights were few, expensive and dim, and the lighting of streets and roads was unthought of. To shepherds, the moon was of especial assistance, and many of the people of Israel maintained the habits of their forefathers and led the shepherd's life long after the settlement of the nation in Pal. The return of the moonlight portion of the month was therefore an occasion for rejoicing and for solemn thanks to God, and the "new moon" as well as the Sabbath was a day of special offerings. On the other hand one of the judgments threatened against the enemies of God was that the light of the moon should be withheld. The threat made against Pharaoh is "I will cover the sun with a cloud, and the moon shall not give its light" (Ezk 32 7); and in the day of the Lord denounced against Babylon, "The sun shall be darkened in its going forth, and the moon shall not cause its light to shine" (Isa 30 10). But among the glories of the restoration of Israel it is promised that "the light of the moon [ḇḥândâḥ] shall be as the light of the sun [ḥamāmd]" (Isa 30 26).

(3) Phases of the moon.—There is no direct mention of the phases of the moon in Scripture; a remarkable fact, and one that illustrates the foolishness of attempting to prove the ignorance of the sacred writers by the argument from silence, since it is not conceivable that men at any time were ignorant that the moon changes her apparent shape and size. So far from the Hebrews being plunged in such a depth of more than savage ignorance, they based their whole calendar on the actual observation of the first appearance of the young crescent. In two passages in RV we find the expression "at the full moon," keekeh (Ps 81 3; Prov 7 20), but though this is what is intended, the literal meaning of the word is doubtful, and may be that given in AV, "at the day appointed."

In another passage already quoted, there is a reference to the dark part of the month. "Thy sun shall no more go down, neither shall thy moon [yərâh, "month"] withdraw itself"—the "withdrawn" part of the month being the time near new moon when the moon is nearly in conjunction with the sun and therefore invisible.

The peripatetic changes of the moon are its ordinances (Jer 31 35). It was also appointed for "seasons" (Ps 104 19), that is, for religious assemblies or feasts (môḏâhim). Two of these were held at the full of the moon, the Passover and the Feast of Tabernacles; one at the new moon, the Feast of Trumpets; but the ordinary new moon did not rank among the great "appointed feasts" (môḏâhim). As light-giver, assisting men in their labors with the flick and in the field and helping them on their journeys; as time-measurer, indicating the progress of the months and the seasons for the great religious festivals, the moon was to the pious Hebrew an evidence of the goodness and wisdom of God.

The "rounder tires like the moon," worn by the daughters of Zion (Isa 3 18 AV), and those on the canes of Zeba and Zalmunna (Isa 8 21 AVm), were designated by the same Heb word, saḥârînîm, tr" in the Vaig as tūlānûma, and were little round ornaments, probably round like crescents, not discs like the full moon.

Jericho possibly means "city of the moon," and Jerah, "moon," was the name of one of the sons of Joktan.

(1) Solar and lunar eclipses.—The sun and moon were not only given "for days and years" (Gen 1 14), but also "for signs," and in no way do they better fulfil what was in the old time understood by this word than in their eclipses. Nothing in Nature is more impressive than a total eclipse of the sun; the mysterious darkness, the sudden cold, the shining forth of the weird corona, seen at no other time,
shall be turned into darkness, and the moon into blood," and this was quoted by St. Peter on the Day of Pentecost (Acts 2 19.20). St. John also says that when the sixth seal was opened "the sun became black as sackcloth of hair, and the whole moon became as blood" (Rev 6.12). When the new moon in its revolution or turning comes exactly between the earth and the sun, and their shadow— the "shadow that is cast by turning" of Jas 1 17—falls on the earth, the sun is completely hidden and its glowing disc is replaced by the dark body of the moon; "the sun is turned into darkness." When the shadow of the earth falls upon the full moon, and the only rays from the sun that reach it have passed through an immense thickness of our atmosphere and are therefore of a dull copper-red color like clotted blood, "the moon is turned into blood." 

(2) The wings of the morning.—But a solar eclipse is not solely darkness and terror. Sarcely has the dark moon hidden the last thread of sunlight than a beautiful pearly halo, the corona, is seen surrounding the blackness. This corona changes its shape from one eclipse to another, but the simplest form is that of a bright ring with outstretched wings, and is characteristic of times when the sun has but few spots upon it. This form appears to have been the origin of the sacred symbol of the ring or disc with wings, so frequently figured on Egyptian, Babylonian and Chaldean monumens. It is possible that these corona "wings of the sun" may have been in the mind of the prophet Malachi when he wrote, "Unto you that fear my name shall the sun of righteousness arise with healing in its wings." (Mal 4:2). The metaphor "wings of the morning" of Ps 139:9 is however more probably due to the long streamers, the crepuscular rays, seen at dawn when the sun rises behind a low bank of clouds.

Total eclipses of the moon must frequently have been visible in Pal as in other countries, but only two or three total eclipses of the sun were visible there during OT history; that of 831 BC, August 15, was total in Judea, and that of 824 BC, April 2, very nearly total. It has been suggested that two eclipses of the sun were predicted in the OT—that of Nineveh, 763 BC, June 15, in Am 8:9, and that of Thales, 585 BC, May 28, in Isa 13:10, but the suggestion has little to support it.

(1) The meaning of the word.—The sun and moon were appointed "to give light upon the earth," and "for signs," and "for days and years.

5. Seasons They were also appointed "for seasons" (mōḏāḇēm), i.e. "appointed assemblies." These seasons were not primarily such seasons as the progress of the year brings forth in the form of changes of weather or of the condition of vegetation; they were seasons for worship. The word mōḏāḇēm occurs some 219 times; in 149, it is tr"congregation," and in about 50 other instances by "solemn assembly" or some equivalent expression. Thus before ever man was created, God had provided for him times to worship and had appointed two great lights of heaven to serve as signals to call to it.

The appointed sacred seasons of the Jews form a most complex and terminological series, developing from times indicated by the sun alone to times indicated by the sun and moon together, and completed in times indicated by luni-solar cycles.

(2) Natural seasons for worship.—The sun alone indicated the hours for daily worship at sunrise, when the day began, there was the morning sacrifice; at sunset, when the day closed, there was the evening sacrifice.

The moon indicated the time for monthly worship; when the slender crescent of the new moon was first seen in the western sky, special sacrifices were ordained with the blowing of trumpets over them.

The sun and moon together marked the times for the two great religious festivals of the year. At the beginning of the bright part of the year, when the moon was full in the first month of spring, the Passover, followed by the Feast of Unleavened Bread, was held. At the end of the bright part of the year, when the moon was full in the first month of autumn, the Feast of Tabernacles was held. These may all be termed natural seasons for worship, obviously marked out as appropriate. The beginning and close of the bright part of the day, and of the bright part of the year, and the beginning of the bright part of the month, have been observed by many nations.

(3) Hallowing of the seventh.—But that which was distinctive in the system of the Jewish festivals was the hallowing of the seventh: the seventh day, the seventh week, the seventh month, the seventh year were all especially marked out. The sun alone indicated the Sabbath by the application of the sacred number seven to the unit of time given by the day. For the period of seven days, the week was not dependent upon any phase of the moon's relation to the sun; it was not a quarter month, but a free week, running on independently of the month. The Jewish Sabbath therefore differed from the Bab, which was tied to the lunar month. The same principle was applied also to the year; every seventh year was set apart as a period of rest, the Sabbatic year.

Every seventh day, every seventh year, was thus observed. But for the week and month, the principle of hallowing the seventh came into operation only once in the year. The Sabbath, as it was called, the Feast of Weeks, was held at the close of the seventh week from the morrow after the Sabbath of Unleavened Bread; and the new moon of the seventh month was held as a special feast, the Feast of Trumpets, "a holy convocation. Ye shall do no servile work" (Lev 23 24.25). The other new moons of the year were not thus distinguished.

The weekly Sabbath, the Passover, Pentecost, and the Feasts of Trumpets and of Tabernacles, with one other day of solemnity, were in an especial sense, the mōḏāḇēm of the Lord.

The seventh day was especially the day of worship, and to correspond, the seventh month was especially the month of worship; and this, not only because it was ushered in with peculiar solemnity, and included one of the chief great feasts of the year, but because it furnished the culminating ceremony of the entire Jewish system, the great eye of the Day of Atonement, held on the tenth day of the month, and therefore on a day set marked directly by any phase of the year. The Day of Atonement purged away the offences of the past year, and restored Israel to the full enjoyment of the Divine favor.
(4) The Jubilee a luni-solar cycle.—The Jewish month was a lunar month, based upon the actual observation of the young crescent. The Jewish year was a natural year, that is, a solar tropical year, based upon actual observation of the ripening of the grain. But there is not an exact number of days in a lunar month, nor is there an exact number of months in a solar year; twelve lunar months falling short of the year, by eleven days; so that in three years the error would amount to more than a complete month, and to restore the balance a thirteenth month would have to be intercalated to place the Jubilee on the Day of Atonement. The Day of Atonement meant the restitution of Israel to the Divine favor; the blowing of the trumpet of Jubilee every forty-nine years meant "the restitution of all things"; every Hebrew in service, indentured to freedom on this day, was set free; married women might return to their original owner. And this period of 49 solar years was astronomically a period of restitution, for the sun and moon returned nearly to their original positions relative to each other, since 49 solar years is 400 lunar months with an error of only 32 hours. So that though the Jubilee period is not a perfect lunar cycle, it was quite exact enough to guide the Jewish priests in drawing up their calendar in cases where the failure of observation had given rise to some doubt.

The beginning of each month was marked by the blowing of the two silver trumpets (ḥādōrāh: Nu 10:2-10). The beginning of the civil, that is to say, of the agricultural year, was marked by a special blowing of trumpets (tıråh), giving the name "Feast of Trumpets" to that new moon (Lev 23:24; Nu 29:1). And the beginning of a new cycle of 49 years was marked by the Jubilee, the ḥādōrāh andTIYAH. Thus the cycle of the Jubilee made symmetrical, completed, and welded together all the mo‘a‘āšim of the Lord—the two great lights were set "for seasons."

(5) The 19-year luni-solar cycle.—The cycle of the civil or luni-solar cycle in the Jewish religious calendar so long as the nation inhabited its own land, since from its small extent there would be no conflict of time reckoning and it would be easy to notify the appearance of the new moon from one end of the country to the other. But after the captivities, when the people were scattered from Gozan of the Medes to Syene on the Nile, it was necessary to devise some method by which the Jews, however far they had been dispersed, would be able to reckon for themselves as to when the moon was new for Jerusalem. We have lately learned from the discovery of a number of Aramaic papyri at Syene that there was a colony of Jews there who used a calendar constructed, not from observation, but from calculation based upon a very exact luni-solar cycle (E. B. Knobel, "Ancient Jewish Calendar Dates in Aramaic Papyri," Monthly Notices of the Royal Astronomical Society, LVIII, 334). This cycle, known to us by the name of its supposed discoverer, Meton, is of 19 years, which is the true length of the solar cycle. As this Jewish colony appears to have been founded after Nebuchadnezzar's destruction of Jerusalem by some of the refugees who fled into Egypt with Johanan the son of Kareah (Jer 40-44), this cycle was the Metonic cycle and the moon 365 days. Indeed no other nation appears to have been aware of it until a generation later. Meton, the Athenian, won immortal fame by announcing it. The evidence of these Syene papyri renders it probable that Meton did not himself discover the cycle but learned it from Jewish sources. Many of the Sem nations used, like the Jews, a number of months to determine the new moon, but the Jews were the most likely to have discovered this cycle, since they alone had their worship centralized at a single shrine which became, in consequence, their standard observatory for their observation of the new moon. These observations, therefore, would all be comparable, and during the 400 years that the Temple stood, it must have been quite clear to them that the 19-year cycle not only gave them seven, the sacred number, of intercalated months, but brought the setting places of the new moons to the same points of the western horizon and in the same order.

It is clear from the evidence of these Syene papyri that the Jews, there, used the 19-year cycle both for determining the date of the new moon, the day of rest, but also to determine when a thirteenth month had to be intercalated, an illustration of the futility of "the argument from silence," for so far from there being any notice in Scripture of the use of a cycle for determining its calculation, there is no mention of intercalation at all.

(6) The Jewish ritual preëxilic.—Ever since this date of the Captivity, the 19-year cycle has been employed by the Jews, and it gives us to the "Golden Number" which is employed in fixing the date of Easter in our own ecclesiastical calendar. Since the 19-year cycle has been in use ever since the Captivity, the 49-year cycle, the Jubilee, cannot have been an exilic or post-exilic innovation. In fact we find the decision of the controversy which has so long divided critics as to whether the ritual legislation of the Jews dated from before or after their captivity. We may take Kuenen as representing the more recent school: "Even the early members of the Sebastianus, who were especially and emphatically those that lived before the Exile, were unacquainted with any ritual legislation, and specifically with that which has come down to us" (The Hexateuch, 273-74). In determining the antiquity of the ritual legislation, we must turn our attention to the "inference of sanctity", to Deuteronomy, to which it is evidently subsequent. . . . . . This comes out most clearly in the legislation concerning the festivals. Other indications though less unequivocal, plead for the same relationship. In the next place the legislation itself gives evidence of the date of its origin, and those data which justify a positive inference point to the Babylonian captivity. . . . . It would follow that the legislation of sanctity arose in the second half of the Babylonian captivity, presumably shortly before its close; and there is not a single valid objection to this date" (ib., 276). Kuenen was evidently unaware of the astronomical relations concerned in the ritual legislation, and was unable to anticipate the striking discoveries made from the Syene papyri. More recent knowledge has reversed the verdict which he pronounced so confidently. The traditional view, that the Hebrew ritual preceded the Captivity, was correct. For the Jubilee, with which the Day of Atonement was both the civil and the religious foundation of the completion of the entire ritual, and, since the period of the Jubilee, as a luni-solar cycle, was preëxilic, the ritual, as a system, must have been preëxilic likewise.
(7) The luni-solar cycles of Daniel.—The seasons for which the sun and moon were appointed are mentioned in yet another connection. In the last vision given to Daniel the question was asked, "How long shall it be to the end of these wonders?" and it was answered, "It shall be for a time, times [dual], and a half; and when they have made an end of breaking in pieces the power of the holy people, all these things shall be finished" (Dn 12 6.7). From the parallel passage in Dn 7 25, where it is said of the fourth beast, "He shall think to change the times and the law; and they shall be given into his hand until a time [udder] and times [dual] and half a time," it is inferred that mo'edh in the first instance stands, like 'udder in the second, for a year; or the period is equivalent to half a week.

The parallel passages in Rev 11 2.3; 12 6.14; 13 5 have caused these years to be taken as conventional years of 360 days, each year being made up of 12 conventional months of 30 days, and on the year-day principle of interpretation, the entire period indicated would be one of 1,260 tropical years. This again is a luni-solar cycle, since 1,260 years contain 15,584 months correct to the nearest day. To the same prophet Daniel a further chronological vision was given, and a yet more perfect cycle indicated. In answer to the question, "How long shall the vision concerning the continual burnt-offering, and the transgression that maketh desolate, to give both the sanctuary and the host to be trodden under foot?" the answer was returned, "Unto two thousand and three hundred evenings and mornings; then shall the sanctuary be cleansed" (Dn 8 13.14). Whatever may be the prophetic significance of the passage its astronomical significance is clear: 840,957 days are precisely 2,300 solar years, or 28,447 lunar months, or 30,487 anomalistic months, the anomalistic month being the period in which the moon travels from perigee to perigee. It is the most perfect luni-solar cycle known, and restores the two great lights exactly to their former relationship. This fullest "season" indicated by the sun and moon is given as that for the cleansing of the sanctuary, for the bringing in, as it were, of the full and perfect Jubilee.

It is not possible at present to decide as to whether the Jews had learnt of this cycle and its significance from their astronomical observations. If so, they must have been far in advance in mathematical science of all other nations of antiquity.

---

**Stars**

1. Their number.—But two other ideas are also strongly dwelt upon; the stars and the heaven of which they form the "host" are used to express the superlatives of number and of height. "Look now toward heaven, and number the stars, if thou be able to number them" (Gen 15 5); "As the host of heaven cannot be numbered" (Jer 33 22) are a few of the passages in which the stars are used for limitless number. Those separately visible to the naked eye at any one time do not exceed 2,000 in number, but it was just as evident to the Hebrews of old, as it was to
Ptolemy, the astronomer of Alexandria, that beside
the stars separately visible, there is a background,
a patterned curtain of light, which indicates by its
granular and mottled appearance that it is made up
of countless myriads of stars, too faint to be indi-
vidually detected, too close to be individually de-
dined. The most striking feature of this curtain
is the grand stellar stream that we call the Milky
Way, but the mind easily recognizes that the
minute points of light, composing its pattern, are
as really stars as the great leaders of the constel-
lations. Later astronomy has confirmed the testi-
mony of the prophets that the stars are without
number. The earliest star catalogue, that of Hip-
parchus, contained a little over one thousand stars;
the great International Photographic Chart will
show the images of more than fifty millions, and
there are photographs which show more than a
hundred thousand stars on a single plate. The
limit that has been reached is due only to the
limited power of our telescopes or the limited time
of exposure of the photographs, not to any limita-
tion in the number of stars. To us today, as to
the Psalmist of old, it is a token of the infinite power
and knowledge of God that "He telleth the number
of the stars; He giveth them all their names" (Ps
147:4 AV).
(2) Their distance.—As regards the height, that
is to say, the distance of the stars, this is immes-
urable except in a very few cases. By using as a
base line the enormous diameter of the earth's
orbit—186,000,000 miles—astronomers have been
able to get a hint as to the distance of some 40 or
50 stars. Of these the nearest, Alpha Centauri,
is distant about twenty-five millions of millions of
miles; the brighter stars are on the average quite
ten times as far; whilst of the distances of the untold
millions of stars beyond, we have no gauge. For
us, as for King Solomon, the "heaven" of the stars
in "for height" (Prov 25:3), for a height that is
beyond measure, giving us therefore the only fitting
image for the immensity of God. So Zophar the
Naamathite asked, "Canst thou find out the Al-
mighty unto perfection? It is high as heaven;
what canst thou do?" And Eliphaz the Temanite
reiterated the same thought, "Is not God in the
height of heaven? And behold the height of the
stars, how high they are!" (Job 11:7,8; 22:12).
And the height of the heaven, that is to say, the
distance of the stars, stands as a symbol, not only
of God's infinitude, but of His faithfulness and of
His mercy: "Thus saith Jehovah: If heaven above
can be measured, and the foundations of the earth
searched out beneath, then will I also cast off all
the seed of Israel for all that they have done, saith
Jehovah" (Jer 31:37). And the Psalmist sings,
"For as the heaven is high above the earth, so
great is his mercy toward them that fear him" (Ps
103:11 AV).
(3) Their brightness.—The stars are not all of
equal brightness; a fact alluded to by St. Paul
when he wrote that "one star differeth from another
star in glory" (1 Cor 15:41). The ancient Gr
astronomers divided the stars according to their
brightness into six classes or magnitudes, to use
the modern technical term, the average star in any
particular magnitude giving about two and a half
times as much light as the average star of the next
magnitude.
Just as the number of the stars and their ordered
movement led them to be considered as a mighty army, "the host of heaven," and as a type of that other celestial host, the holy angels, so the individual stars are taken as fitly setting forth, by their brilliancy and position, the spiritual powers and intelligences, whether these are the angels of God, as in Job 38 7, or rulers of churches, as in Rev 1 20. The same image is naturally applied in a yet higher sense to Christ Himself, who is the "star of Jacob" (Num 24 17), and "the bright, the morning star" (Rev 22 16; 2 Pet 1 19).

In ancient times there were two methods by which the progress of the year could be learned from observation of the heavens. The sun was "for seasons," and the change in its place of rising or of setting supplied the first method. The second method was supplied by the stars. For as the Heb shepherds, such as Jacob, Moses, David and Amos, kept watch over their sheep and flocks and noted the rising and setting of the stars, and the silent procession of the stars through the hours of darkness, and knew without clock or timepiece how they were progressing. They noticed that stars were rising in the E., what stars were culminating in the S., what stars were setting in the W., and how the northern stars, always visible, like a great dial, were turning. But as the eastern horizon began to brighten toward the dawn, they would specially note what stars were the last to rise before their shining end in the west, or the last to set in the black of night. These, the last stars to appear in the E. before sunrise, were the "morning stars," the heralds of the sun. As morning followed morning, these morning stars would be seen earlier and earlier, and therefore for a longer time before than before. But they disappeared in the dawn, until some morning, other stars, unseen before, would shine out for a few moments, and thus supplant the stars seen earlier as the actual heralds of the sun. Such a first appearance of a star was termed by the Gr astronomers its "heliacal" rising, and the mention in Scripture of "morning stars," or "stars of the twilight" (Job 38 7; 3 9), shows that the Hebrews like the Greeks were familiar with this feature of the order of the heavens, and noted the progress of the year by observation of the apparent changes of the celestial host. One star would herald the beginning of spring, another the coming of winter; the time to plow, the time to sow, the "rain in his sight," the undeniable beauty of successive "morning stars" as they appeared.

(1) Meteors.—Meteors are not stars at all in the popular sense of the word, but are quite small bodies drawn into our atmosphere, and are sometimes seen by the naked eye, or by mere nakedness of the same size, mass, or nature, but are "apparently" small to us because they pass before our eyes. These meteors of the "morning stars" we call by their Gr name, "aerolites," the "fire-ball" or "fire-disk." The "star" or "comet" of the Dr H. of the Arabic astronomers is the "heliacal" rising, and the mention in Scripture of "morning stars," or "stars of the twilight" (Job 38 7; 3 9), shows that the Hebrews like the Greeks were familiar with this feature of the order of the heavens, and noted the progress of the year by observation of the apparent changes of the celestial host. One star would herald the beginning of spring, another the coming of winter; the time to plow, the time to sow, the "rain in his sight," the undeniable beauty of successive "morning stars" as they appeared.

(2) The star "Wormwood."—Such great meteoric showers are most impressive spectacles, but solitary meteors are sometimes hardly less striking. Bodekites or aerolites, as suchstars are termed, are apparently of great size, and are sometimes so brilliant as to light up the sky even in broad daylight. Such a phenomenon is referred to by St. John in his description of the star Wormwood: "There fell from heaven a great star, burning like a torch" (Rev 8 10). Such aerolites are not entirely consumed in their passage through our atmosphere, but portions of them reach the ground, and in some cases large masses have been found intact. These are generally of a metallic nature, but others are either almost pure iron or contain much of that metal. Such a meteoric stone was used as the pedestal of the image of the goddess Diana at Ephesus, and the "townedlerk" of the city referred to this circumstance when he reminded the Ephesians that their city was "temple-keeper of the great Diana, and of the image which fell down from Jupiter" (Acts 19 35).

It has already been noted that the moon may perhaps have received its Heb name from the fact of its being a "wanderer" among the stars. But stars, but there is not direct and existing evidence that such stars as are referred to in the Bible as "wanderers" except in Jude 13: "Wandering stars, for whom the sky is darkness, are reserved for ever." These stars are sometimes called "comets" or "meteors," more probably the latter, as comets are more appropriately described as "falling stars."

(1) Comets as a spiritual type.—But as comets and meteors are intimately connected with each other—meteors being in many cases the debris of comets—the simile applies to either. False professors of religion, unstable or apostate teachers, are utterly unlike the stars which shine forth in heaven for ever, but are fitly represented by comets, which are seen only for a few weeks or days, and then are entirely lost to sight, or by meteors, which flash out for a few moments, and are then totally extinguished.

All the great comets, all the comets that have been conspicuous to the naked eye, with the single exception of that named after Halley, have appeared at least once within the realm of human records and Halley's Comet only takes 80 centuries to traverse that part of its orbit which lies within the orbit of the earth; the rest of its period of revolution—76 years—is passed outside that boundary, and for 38 years at the minimum remains outside the orbit of Neptune, more than 2,800,000,000 miles from the sun. The other great comets have only visited our neighborhood once within our experience.

(2) Comets referred to in Scripture?—The question has been raised whether the appearance of comets is ever referred to in Scripture. Jos., speaking of the signs which preceded the destruction of Jerus by Titus, says: "Thus there was a star resembling a sword which stood over the city, and a comet that continued a whole year" (BJ, VI, v, 5). The "star resembling a sword" was doubtless the return of Halley's Comet in 66 AD, and the phrase used by Jos has suggested that it was a stellar phenomenon that is referred to in 1 Ch 21 16: "The angel of Jehovah, . . . between earth and heaven, having a drawn sword, stood over Jerusalem." But this, and the corresponding suggestion as to the nature of the flaming sword that kept the way of the tree of life (Gen 3 24), are unsupported conjectures not worthy of attention. The astronomical description, we have thought that the first vision of Jeremiah of the "rod of an almond tree" and of a "boiling caldron" (Jer 1 11.13) had its physical
basis in a return of Halley's Comet, and other commentators have thought that cometary appearances were described in the "pillars of smoke" of Joel 2:30; but none of these suggestions appear to have plausibility.

II. The Constellations.—The principal achievement of the science of astronomy in the cents. during which the books of the OT were written was the arrangement and naming of the constellations, and there can be no reasonable doubt that the same system was known to the Hebrews as that which has been handed down to us through the Gr astronomers. St. Paul certainly knew the Gr constellations, for in his sermon on Mars' Hill (Acts 17:28) he quoted from that poetical description of them which Aratus the great poet of Cilicia had written about 270 BC. But these constellations have a much greater antiquity than this, and it is probable that they were well known to Abraham before he left Ur of the Chaldees. It has been frequently shown (The Astronomy of the Bible, 158; Astronomy without a Telescope, 5) that these constellations themselves supply evidence that they were designed about 2700 BC. They thus antedated the time of Abraham by some cents., and since some of their most characteristic forms are found upon old Bab "boundary stones," it is clear that they were known in the country from whence he came out.

The direct references to these old constellation-forms in Scripture are not numerous. One of the clearest is in Job 26:13, where the "Crooked Serpent" is used as the correlative of "garnished the heavens"; the great constellation of the writhing Dragon, placed at the crown of the heavens, being used, metaphorically, as an expression for all the constellations of the sky. For by its folds it encircles both the poles, that of the equator and that of the ecliptic.

The term בָּרָה, rendered "crooked" but better as in RVm as "winding," is applied by Isaiah to "Leviathan" (תֵּלֹאִיתָן. Isa 27:1), properly a "wreathed" or writhing animal, twisted in folds, and hence also called by the prophet דָּלָלְתֹּת, "crooked," "twisted," or "winding"; a very appropriate designation for the great polar Dragon. But the latter was not the only "crooked serpent" in the constellations; there were three others, two of which were placed with an astronomical significance not less precise than the coiling of Draco round the poles. Hydra, the Water, marked out the original celestial equator for about one-third of its circumference, and Serpens, the Adder, lay partly along the celestial equator and then was twisted up the autumnal colure, and reached the zenith with its head.

The arrangement of the twelve signs of the zodiac to mark out the apparent yearly path of the sun, and of these three serpent-forms to hold their respective and significant positions in the heavens, shows that a real progress in astronomy was made before the constellations were designed, and that their places were allotted to these figures on a definite astronomical plan.

A further purpose is shown by the relation of the three serpents to the neighboring figures, and it is clear that the history preserved in

3. The Seed of the Woman wished to perpetuate its memory by means of the stellar frescoes. For the constellations Scorpio, Ophiuchus, and Serpens, show us a man slanging a snake and standing on a scorpion; the head of the latter he crushes with one foot, but his other foot is wounded by its reverted sting. When these three constellations were due S., that is to say, at midnight in spring-time, Hercules and Draco were due north, and presented the picture of a man kneeling on one knee, and pressing down with his other foot the head of the great northern serpent or dragon. During the winter midnight the zodiacal constellation on the meridian was the Virgin, figured as a woman holding an ear of corn in her hand, while

beneath her the immense length of Hydra was stretched out upon its belly in the attitude of a snake when fleeing at full speed. These figures are evidently meant to set forth in picture that which is expressed in word in Gen 3:14-15. "And Jehovah God said unto the serpent, Because thou hast done this, cursed art thou above all cattle, and above every beast of the field; upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life: and I will put enmity between thee and the woman, and between thy seed and her seed: he shall bruise thy head, and thou shalt bruise his heel."

Nor is this the only narrative in Genesis which finds a parallel in the constellations. Among the southern groups we find a ship Argo Set in the close to it stands a figure, Centaurus, Cloud who is apparently slaying an animal, Lupus, beside an Altar. The cloud of smoke arising from the Altar is represented by the Milky Way, and in the midst of the cloud there is set the Bow of the Archer, Sagittarius. Here there seems to be pictured the covenant made with Noah after he offered his sacrifice when he left the ark: "I do set my bow in the cloud, and it shall be for a token of a covenant between me and the earth" (Gen 9:13). Thus the constellations, designed several cents. before the time of Abraham,
clearly express a knowledge, and appear designed to preserve a remembrance of the two first promises made by God to mankind as recorded in the early chapters of Gen.

Astronomy

THE INTERNATIONAL STANDARD BIBLE ENCYCLOPAEDIA

Hydra and the Neighboring Constellations.

There is no need to assume, as some writers have done, that all the 48 primitive constellations were of Divine origin, or even that any of them were. If some of the early astronomers possessed in one form or another the histories that we have in Gen 3, 8 and 9, it would not be unnatural for them to attempt to preserve a memorial of them in the heavens by associating these figures with the stars.

It does not follow that all the old constellations have an analogous significance, or that if they have, we should now be able to detect it, and a great deal of ingenuity has been wasted in the attempt to convert the old 48 constellations into a sort of gospel in hieroglyphic. Interpretations of this order were current quite early in Christian times, for they are denounced at considerable length and in detail by St. Hippolytus in his Refutation of All the Heresies, c. 210 AD. Their revival in recent years is chiefly due to Macrœth, a series of papers by the late Miss Frances Rolleston in which fanciful etymologies were given to the Arab names by which the principal stars are known. These names, for the most part, simply indicate the places which the stars were severally supposed to hold in the figures to which they were assigned, and Miss Rolleston's derivations for them are quite misleading and unfounded. Nevertheless her results have been blindly accepted by a number of writers.

6. Joseph's several indirect allusions to them gain Dream an added meaning. Thus Joseph dreamed that "the sun and the moon and eleven stars made obeisance to him" (Gen 37 9). The twelve constellations of the zodiac are the twelve among which the sun and moon move, and thus constitute, as it were, their family. Eleven of them therefore represented eleven sons of Jacob, Joseph himself the twelfth. Of course it is possible that some evidence that the time came when the suggestion of this dream was acted upon to the extent that some of the tribes adopted certain of the constellation figures by way of crest or armorial bearing. In Num 2 it is stated that the four camps into which the host of Israel was divided had its own standard: "Neither the Mosaic law nor the OT generally gives us any intimation as to the form or character of the standard (deghel). According to rabbinical tradition, the standard of Judah bore the figure of a lion, that of Reuben the likeness of a man, or of a man's head, that of Ephraim the figure of an ox, and that of Dan the figure of an eagle; so that the four living creatures united in the cherubic forms described by Ezekiel were represented upon these four standards" (Keil and Delitzsch, Commentary on the Pentateuch, III, 17).

A variant of the standard tradition gives as the standards of Reuben, "unstable as water" (Gen 49 4 AV), a Man and a River, and of Dan, "Dan shall be a serpent in the way" (Gen 49 17), an Eagle and a Serpent. These four forms are also found in the constellation in the four quarters of the heavens. Aquarius, the man with a stream of water, and Leo were the original zodiacal constellations of the two solstices, Taurus was that of the spring equinox, and Aquila and Serpens were close to the autumnal equinox, the latter being actually upon the colure.

This distribution of the four cherubic forms in the four quarters of heaven gives a special significance to the invocation used by Hezekiah and the Psalmist, "Thou that dwellest Cherubin between the cherubim" (Isa 37 16 AV; Ps 80 1 AV). The Shekinah glory rested indeed between the golden cherubim over the ark in the Holy of Holies, but "the Most High dwelleth not in houses made with hands" (Acts 7 48), and these cherubic forms were put upon the curtains of the heavens. "Behold, heaven and the heaven of heavens cannot contain thee" (1 K 8 27); "Thou dwellest between the cherubim," filling the infinite expanse of the stellar universe.

When Balaam said "Israel dwelleth not in their tribes; and the Spirit of God came upon him" (Nu 24 2), it was not unnatural that he should
allude in his prophecy to the great standards which he would see floating above the camps, and three of the four appear to be indicated:

9. Balaam’s the bull of Joseph—“He hath as it were Prophecy the strength of the wild-ox”; the lion of Judah—“He lay down as a lion and as a great lion,” AV; and Aquarius, the man pouring out a stream of water from a pitcher, the cognizance of Reuben—“Water shall flow from his buckets” (Nu 24.7.8.9).

In a similar way when the prophets refer to the enemies of Israel under the figure of dragons or reptiles, there seems occasionally an indirect reference to the serpents that represent the powers of evil in the pictures that have been associated with the star groups. Thus in Isa 27:1, ERV, it is prophesied that the Lord “shall punish Leviathan the swift serpent, and Leviathan the crooked serpent; and He shall slay the dragon that is in the sea”; the first allusion being appropriate to the attitude of Hydra, the second to Draco, the third to Cetus. Whilst the group of constellations, Andromeda, Cetus and Eridanus, the woman persecuted by a dragon that casts a river out of its mouth, a river which flowing down below the horizon appears to be swallowed up by the earth, would seem to have furnished St. John with some of the material for the imagery of Rev 12 in his great vision.

Besides references direct or indirect to the familiar constellation figures, four special astronomical terms occur in the Heb of the OT which have given rise to much discussion. These are K’tmåh, K’šîl, Mazzâtôth and ‘Ayish. The tradition of their significance had been lost before the LXX tr. was made, but it may be taken as practically certain that the renderings given in RV are substantially correct.

The word K’tmåh occurs in three passages, in each case in conjunction with K’šîl (Am 5:8; Job 9:9; 38:31). It apparently means a “heap” or “cluster,” and is hence especially applicable to the beautiful little group of the Pleiades, the most conspicuous star cluster visible to the naked eye. There is the less uncertainty about this identification since “k’ma” is the term generally used in Syr lit. to denote the Pleiades.

Six stars can now easily be seen by any good sight, but very keen-sighted persons can detect more; thus Maestlin, the tutor of Kepler, mapped

---

**The Pleiades.**

---

11 before the invention of the telescope, and in recent times Carrington and Denning have counted 14 with the naked eye. Still, 6 is the number visible to most persons, though there is a curiously widespread and uniform tradition that they once “were seven who now are six,” and seven is the number almost always assigned to them in literature. Hesiod calls them “the seven sisters, the Virgin stars,” and Milton, “the seven Atlantic sisters,” as representing the daughters of Atlas. Many of the Gr poets, however, regarded them as Pleiades, “rock pigeons,” doves, flying from the hunter Orion; but whether they have been considered as representing doves or maidens, seven has still been their traditional number. Possibly one of the group has declined in brightness in the course of the centuries; Alcyone would seem to have increased in brightness, though now the brightest, it is not one of the four that figure in Ptolemy’s Catalogue, and if one has increased in brightness, others may have di-
minished. In the telescope many hundreds of stars are visible. The photographic plate has registered thousands and shows the principal stars as envelopes. To the right of the Pleiades is a stream of nebulous matter, the stars shining on these filamentous lines of light like pearls upon a string. This, the appearance of the Pleiades on the best modern photographs, would be strikingly appropriate to the rendering of Job 33:31, which has been adopted in the RV, "Canst thou bind the cluster [in "chain"] of the Pleiades?" and the question put to Job would be equivalent to asking him if it were his power that had brought together the seven stars and the seven candlesticks. This rendering which involves the reading "ma'asaddōth" is supported by the LXX, and all the early versions, and hence by nearly all Orientalists. The reading in MT, "ma'adhanāth," that is to say, "dainties" or "delights," and adopted in AV, where the word is paraphrased as "sweet influences," is however correct, as will be shown below.

The designation of the group as that of the seven stars gives a special significance to each of the details of the vision of St. John: "I saw seven golden candlesticks; and in the midst of the candlesticks one like unto a son of man, . . . . And He had in his right hand seven stars: . . . . The seven stars are the angels of the seven churches." (Rev. 1:12.13.16.20.) The seven stars in a single compact cluster shining as one, furnish an image of the church in its many diversities and its essential unity.

It may be noted here that there is a certain widely diffused error. When it was discovered that the sun itself with all its attendant planets was traveling rapidly through space, the German astronomer Mädler hazarded the suggestion that the center of the solar system was the sun itself, not the earth. This idea has been generally abandoned by astronomers.

The word Kēšīl as denoting a constellation occurs in the singular number in three passages, and in each it is placed in antithesis.

11. Orion to Mazzaroth. In Isa. 13:10 it occurs by itself and in the plural. There is no doubt as to the significance of the word in its common use. In 70 cases it is translated "bed" or "feet." It does not signify a weak-minded person, so much as a violent, impetuous, self-confident one. As a star name, it is probably rightly considered to refer to the glorious constellation of Orion. According to an old tradition, the name of Mazzaroth, mentioned in Gen. 41:10, as the founder of the tribes of Askenaz, Asshur, Arphaxad, and Sheleph, was given by his courtiers to this most brilliant of all the constellations, one that by its form somewhat suggests a gigantic warrior armed for the fight. Until recently it was not found possible to identify the Mazzaroth of Scripture with any Babylonian monarch until Dr. T. G. Pinches suggested that "Nimrod" was a deliberate Heb transmutation of "Marduk," the name of the great Babylonian hero, and chief deity of their pantheon. The change was brought about by making the root triliteral, and the ending uk (ak) in Merodach-Baladan disappearing first, Marduk appeared as Marad. This was connected with the root mārada, "to be rebellious," and the word was still further multiplied for derivative forms, leaving a root attached, assimilating it to a certain extent to the niph'hal forms of the Heb vb., and making a change altogether in conformity with the genius of the Heb language" (The Old Testament in the Light of the Historical Records of Assyria and Babylonia, 129-90).

In the very brief reference to Nimrod in Gen. 10:8 RSV, the word is etymologically identical with the word "Marduk," "a mighty (one)" and this has been the name of this constellation among Syrians, Arabs and Jews for many centuries. Indeed the brightest star of the constellation, the one in the left knee, now generally known as Rigel, is still occasionally called Aljabbar, a corruption of Al Jabbār, though now one of the fainter stars near it more generally bears that name. The word Kēšīl as applied to this constellation would parallel closely the use of the word "Merodach," its transformation into "Nimrod" as if it were derived from mārādā, "to rebel." He who was to the Babylonians a deified hero, was to the Hebrews a rebel Titan, bound in chains among the stars that all might behold his punishment, and in this aspect the question, "Canst thou therefore . . . . lose the bands of Orion?" (Job 33:31) would be equivalent to asking, "Canst thou bring down from their places the stars that make up this figure and so, as it were, set the Titan free?"

In Isa. 13:10, Kēšīl occurs in the plur. Kēšīlim, "for the stars of heaven and the constellations thereof shall not give their light"; Kēšīlim being tr4 as "constellations! under the impression that Orion is the central figure and the seven stars was put for the constellations in general. This is no doubt correct, but the context shows that the meaning goes farther than this, and that the Kēšīlim who were to be darkened were the proud and arrogant giant tyrants of the Mesopotamian who would, if possible, climb up into heaven itself, even as Orion is represented in our star atlases as if trying to climb up into the zodiac—the home of the sun.

A further astronomical term which occurs in Job 38:32 is urt1 in both AV and RV, viz. the word Mazzaroth. It occurs only once in the OT, but the similar zārōth word mazzaloth, tr4 "planets" in AV and RV, occurs in 2 K 23:5. For the latter see Astronomy. In the 5th tablet of the Bab Epic of Creation, we read:

1. He [Marduk] made the station for the great gods:
2. The stars, their images, as the stars of the zodiac he fixed.
3. He ordained the year, and into sections [mirārā'] he divided it.
4. For the twelve months he fixed three stars.

Here in the third line, mirārā', cognate with the Heb mazzārōth, means the sections or divisions of the year, corresponding to the signs of the zodiac mentioned in the second line.

Yet again when Job 9:9 is compared with Job 38:1-32, it is seen that the place of the word mazzārōth in the latter passage is held by the expression "the chambers of the south" (bādarē thēmān) in the earlier. Mazzaroth therefore is equivalent to "the chambers of the south," and clearly signifies the twelve constellations of the zodiac through which the sun appears to pass in the course of the year, poetically likened to the "inn," the "chambers," or "tabernacles" in which the sun successively rests during the several monthly stages of his annual journey. The same idea was employed by the Arabs in their "mansions of the moon," its "lodging-houses" (mazzādīl), which are 26 in number, since the moon takes 28 days to make the circuit of the heavens, just as the sun takes 12 months.

The word Mazzaroth therefore represents the twelve "signs" or, to speak more correctly, the twelve "constellations of the zodiac." These two terms are often used indiscriminately, but there is a real difference between their significations. The constellations of the zodiac are the actual groupings
of the stars, lying along the ecliptic, and are quite irregular in form and length. The signs have no connection with the actual stars but are imaginary divisions of the ecliptic, all exactly equal in length, and they are reckoned from that point in the heavens where the sun is in the moment that it crosses the celestial equator in its northward motion in springtime. As this point, known to astronomers as the first point of Aries, moves slowly amongst the stars, taking 25,800 years to complete a revolution of the heavens, the seas of the zodiac also move among the stars, and hence, though at one time each sign bore a rough and general correspondence to the constellation of the same name, the signs have gradually drawn away from them. The constellations of the zodiac were designed about 2700 BC, but the signs—the equal divisions of the zodiac named from them—cannot have been adopted earlier than 700 BC, and were probably even later. For since Aries is the first of the signs, it is clear that it was the first of the constellations at the time when the equal division of the zodiac was effected, and 700 BC is the very earliest date that the constellation Aries can have been so regarded. Incidentally it may be remarked that the mention in the Heb story of distribution of the allotment of three stars to each of the sections (Mizarata) of the year, shows that not only had the division of the zodiac into 12 equal signs been effected, but that a further step had been taken, namely, the division of each sign into 3 equal parts, later known amongst the Greeks as its "decans," corresponding roughly to the 36 decades of the Egy calendar. Whatever, therefore, may have been the antiquity of the traditions embodied in it, the poem quoted above, even from being an early document, as it was at one time supposed to be, is probably almost as late as the destruction of Jerus by Nebuchadnezzar.

There are three constellations, natural groupings of the stars, the Pleiades and Orion, and "Charles's Wain," which have always attracted men's attention, and we accordingly find them referred to in the earliest poems extant. Thus they are the three groups of stars most frequently mentioned by Homer and Hesiod. The two first groups, the Pleiades and Orion, are, as we have seen, indicated by Kimah and Kesil. We should therefore naturally expect that the third constellation ("Charles's Wain") should have had its name in the Book of Job should be none other than the seven bright stars in the N., the principal part of the Great Bear. The Heb name for this third constellation appears in two slightly different forms. It is 'osh in Job 9, and 'ayish in Job 38 32, and in the latter case it is connected with its "sons." The last star of Charles's Wain or the Plough, as the group is often called among ourselves, still bears the name Benetnasch, derived from the Arab. name Benet Na'ash, "the daughters of the Bier," by which the Arabs designate the three stars in the Plough-handle, while they called the four stars in the body of the Plough, Na'ash, "the bier" or "litter." Na'ash and its daughters so closely correspond to "ayish and its sons," that there can be no reasonable doubt that the same seven bright stars are intended; so that the rendering of RV, "Canest thou guide the Bear with her train?" correctly reproduces the original meaning. The Arcturus of the AV is derived from Vulg, where it is probably a mistake for Arcos, that is to say in the "Major," the Great Bear.

The antithesis which is presented in Job 38 32 now reveals itself. The Mazzaroth are the twelve constellations of the zodiac, and of these each one rules the night for about a month in its turn; they are each "led forth" in its "season." Each, in its turn, is the "chamber," "tabernacle" or "resting-place" of the sun, and they are appropriately called "chambers of the south," since it is especially in the southern sky that each is seen. In contrast to these are the northern constellations, those round the pole, of which the Great Bear or Charles's Wain is the brightest and best known. At the time of the origin of the constellations, this group was much nearer the pole of the heavens than at present, but now as then these stars are not "led forth," for they are visible at all hours, and during every night; but they are "guided," they move round the pole of the heavens in an unending circle, as if the wain or chariot were being guided by a skilful driver.

(1) The "Scatterers."—There is some probability that in Job 37 9 the same two regions of the heavens are alluded to: "Out of the chamber of the south cometh the storm, and cold out of the north." It will be observed that the complete expression, "chamber of the south," is not in the original, the translators having supplied of "south" from analogy with Job 9 9. The sirocco comes then from the region held by the mazzal, the "chamber," or constellation of the zodiac, then on the meridian. But the cold, the blizzard, comes from the "scatterers." (Mizratim). Who or what are the scatterers, and why do they represent the north? The late Professor Schiaparelli suggested that by a slight difference in the pointing, the word might be read as mizrayim, "the two winnowing fans," and that this may well have been a native term for the stars which we now know as the two Bears, Ursa Major and Minor, emphatically the northern constellations; the names being given them from the native grouping of theirs, just as they are known as the two "Dippers" in the United States, or the two "Ladles" in China (Astronomy in the Old Testament, 67-72).

(2) The ordinances of heaven.—The astronomical antithesis between Mazzaroth, the constellations of the zodiac ("led forth" each in its "season"), and A'ayish, "the Bear with her train" ("guided" in its unceasing revolution round the pole), is so complete and astronomically appropriate, that there is reason to expect an antithesis as clear and as astronomically significant between the two clauses of the preceding verse. But the rendering of RV does not afford anything of the kind: "Canest thou bind the cluster of the Pleiades, or loose the bands of Orion?" is strictly equivalent to the question as to whether Job could fix these stars in their places in the sky; and for an inquiry so perfectly general, one constellation would be no more appropriate than another. The rendering of RV certainly brings out some difference or at least distinction between the two constellations or the use that was made of them.

And in the third passage in which Kimah and Kesil are mentioned together an important distinction is hinted at. The order in Am 5 8 suggests that the Pleiades corresponded in some way to daybreak, Orion to nightfall: "That maketh the Pleiades and Orion, and turneth the shadow of death into the morning, and maketh the day dark with night." Sunrise turns "the shadow of
The international standard bible encyclopedia

Astronomy

...and the simple their short "the cisterns, they..."

Similarly, sunset makes "the day dark with night..." But any ideas of the progress of the seasons; the analogous change of the higher and lower heavens is effected when the long nights and short days of winter set in the evening of the year, and all nature is bound as by iron bands, in cold and frost. And at the time of the origin of the constellations, the "astronomical" rising of Orion, i.e., its rising at nightfall, was the harbinger of this change; the rigor of winter formed "the bands of Orion."

These regular changes in the appearances and positions of the constellations constitute the ordinances of the heavens, ordinances which Job could neither alter for the worse by holding back the delights of springtime, or for the better by breaking the bonds of winter cold. But these ordinances kept contact with the elements of the heavens; their dominion was established on the earth, which answered by the revival of vegetation when the Pleiades, then nearly in conjunction with the sun, appeared for a short time before sunrise. The return of the constraints of cold and frost when Orion, in opposition to the sun, rode the sky the whole night long.

The completeness and beauty of the imagery will now be apparent. Orion stood for the East, since by their rising just after blackcrow, they heralded the morning of the year and the "delights" of springtime.

Orion stood for the West, since his appearing just after nightfall heralded the evening of the year, and the bands of winter cold.

Mazzārôth, the twelve constellations of the zodiac, the "chambers of the south," each "led forth" from the underworld in its own "season," stood for the South.

Then the "Bear with her train," "guided" in their unceasing course round the pole, stood for the circumpolar constellations in the North. And the movements of them all in a perfect obedience to the law of God were the ordinances of heaven, and the dominion of men was established upon the earth in the constant succession of the seasons there in unfailing answer to the changes in the stars above.

These three verses give us a vivid picture of the work of primitive astronomy. The science was then in an early stage of development, but it was a real science, a science of observation, thoroughly sound so far as it had progressed, and showing high intelligence on the part of those who pursued it. We need not know that the movement of "the Bear with her train," that is, the apparent rotation of the heavens round the pole, is due to the real rotation of the earth upon its axis; that the bringing out of "the Mazzārôth in their season," apparently due to the revolution of the sun round the earth, is due to the real revolution of the earth round the sun. But this knowledge which has enabled us to see where the actual movements lie has not brought us any nearer penetrating the mystery of those movements. What is the ultimate cause of the rotation of this vast globe, we know no more than the ancients knew what caused the heavens to rotate; what causes it to fly through space 18 miles in every second of time, we know no more than the ancients knew why the sun appeared to move among the stars. To us, as to them, it is the power of God, and the will of God.

It has been supposed by some scholars that the Book of Job was written during the Captivity in Babylon, but this supposition is untenable in view of the statement in the Date of the Book's Apology that the worship of the Book of Job heavenly bodies was "an iniquity to be punished by the judges" (Job 31:26–28). This could not have been written by Jews in exile amongst the worshippers of Samâl and Sin. But neither can this book have been written after the Return. The meaning of the three terms, 'Ayish, Kimâm and K'ût, had been lost before the LXX made the rendering of the Heb Scriptures into Gr, for in Am 6:8 they left 'Kimâm and K'ût untranslated, and they rendered 'Ayish and K'ût differently in Job 9:9, and 38:31, 32. Before the Captivity, Kimâm and K'ût were plainly in common use, since Amos uses them as if they were familiar to his hearers, and as he himself points out, he was not a man of learning but a simple prophet. The obvious and sufficient explanation of the later ignorance respecting these three terms lies in the catastrophes of the Assyr and Bab conquests. Not less significant of their complete loss of the real meaning of these words is the alteration made in the Heb text. The "delights of the Pleiades" had evidently no more meaning for them than they had for the majority of modern Orientalists, and no doubt it seemed a plausible and legitimate emendation to substitute instead of ma'ddhannoth, "delights," so as to bring about a fancied parallelism with māšk̂îthāth, the "bands" of Orion. But the alteration transforms a complete, beautiful and symmetrical figure, an "epitome of the astronomical science of the time," into a bald tautology. Those critics are therefore right who assign the Book of Job and the Isa to the period before the Captivities, and the three names come to us as indications, not of a Bab science of astronomy, learned by the Jews during their exile, but of a Heb astronomy destroyed by the unspeakable disaster of the conquest.

III. Physiography.—It has generally been assumed that the Hebrews considered the earth to be a vast circular arched overhead; a firmament, or "the firmament"—above which were stored, as if in cisterns, the "treasuries" (Job 38:22) of the rain, snow and hail, and some writers have even attempted to express this supposed conception in their diagrams, the best of these attempts, reproduced below, is given by Schiaparelli, in his Astronomy in the OT.

But this assumption is in reality based more upon the ideas prevalent in Europe during the Dark Ages than upon any actual statements in the OT. The same word (hâgh) used in the OT to express the roundness of the heavens (Job 25:14) is also used when the circle of the earth is spoken of (Isa 40:22), which is likewise applied to the deep (Prov 8:27). Now it is obvious that the heavens are spherical in appearance, and to an attentive observer it is clear that the surface of the sea is also rounded. There is therefore no sufficient warrant for the assumption that the Hebrews must have regarded the earth as flat.

(1) The earth a sphere.—Certain astronomical relations were recognized very early. The stars appear as if attached to a globe rotating round the earth once a day. The ancients were clearly familiar to the author of the Book of Job, and indeed long before the time of Abraham, since the formation of the constellations could not have been effected without such recognition. But the spherical form of the heavens almost involves a
similar form for the earth, and their apparent diurnal rotation certainly means that they are not rigidly connected with the earth, but surround it on all sides at some distance from it. The earth therefore must be freely suspended in space, and so the Book of Job describes it: "He stretcheth out the north over empty space, and hangeth the earth upon nothing" (Job 26:7).

SCHIAPELLI'S HEBREW WORLD

The author's cut representing the Hebrew universe, with his accompanying explanations, is here reproduced.

HEAVEN, THE EARTH, AND THE AUTHOR.

Explanatory Key:
ABC = the upper heaven; AEC = the curve of the sky; AEC = the plains of the earth and sea; RSB = various parts of the sea, EXE = various parts of the earth; GHI = the points of the firmament or lower heaven; JKL = the strophes of the wind; LLM = the strophes of the upper waters, of snow, and of hail; N = the space occupied by the air, within which the clouds move; NN = the waters of the great abyss; XXX = the foundations of the great abyss; PP = flood or limit; Q = the lower part of the main, the infernal properly so called.

(2) The north stretched over empty space. — Here the "north" signifies the northern circumpolar constellations and the writer recognized that they stretch out beyond the utmost confines of the earth; so that he was not under any impression that the heavens rested upon the earth, or were borne up by mountains. The celestial sphere surrounded the earth entirely, but at a distance from it; between the two there was "empty space." Some commentators have indeed claimed that Job 26:10, "He hath also stretched a boundary upon the face of the waters, unto the confines of light and darkness," is equivalent to a statement that the circumference of the terrestrial plan extended to the place where sea and sky met. But no man of intelligence can, at any time, have supposed that the sea horizon marked the dividing line between day and night, and the meaning of the passage is correctly given in AV, "until the day and night come to an end"; in other words, the waters of the sea will be confined to their appointed place never again to overflow the earth so long as the succession of day and night shall continue (cf Gen 8:22; 9:15).

(3) The corners of the earth. — See EARTH, CORNERS OF.

erep, "the earth," in general the surface of the earth, the dry land inhabited by man and beast.

2. The Pillars of the Earth

Hence "the pillars" of the earth (Job 9:6) are the rocks that bear up that surface, for as has been shown, it was quite clear to the author of the Book of Job, and to the primitive astronomers, that our world was unsupported in space. For "Vault of the Earth" see EARTH, VAULT OF.

(1) Hebrew conception. — Above the spherical earth was stretched out the "firmament" (צָבָן) made on the second day of creation to "divide the waters from the waters" (Gen 1:6). To the Hebrews the "firmament" was the apparent void above, in which clouds float and the lights of heaven pursue their appointed paths. The word צָבָן, by its etymology, suggests an expanse, something stretched, spread or beaten out, as when Isaiah (40:22) says that the Lord "stretcheth out the heavens as a curtain, and spreadeth them out as a tent to dwell in." But the Gr word στερέωμα, by which the LXX rendered צָבָן, gives the meaning of a firm and solid structure, and our translators have carried out this same idea in their Eng. rendering of "firmament."

(2) The Alexandrian conception. — In this however the LXX simply expressed the astronomical science of their day as accepted in Alexandria, where the doctrine of a succession of solid crystalline spheres, each carrying a planet, held currency. But in order to express the Heb idea, צָבָן should be rendered "expansé" or "space"; it corresponds to the "empty space" of Job 26:7. This "expansé" was appointed to divide "the waters which were under the expansé, from the waters which were above the expansé"; and it has been argued that this that the upper waters must have been regarded as being inclosed in a watertight reservoir, furnished with sluices or floodgates, which could be opened to allow the rain to fall. Thus in the account of the Flood, "the windows of heaven" are said to have been opened. But, drubah, "window," means a network, or lattice, a form which can never have been represented as allowing the water to issue. The word means a network, or lattice, a form which can never have been represented as allowing the water to issue.

4. The Windows of Heaven (Job 38:8). — Other passages where "the windows of heaven" are mentioned the expression is obviously metaphorical (2 K 7:21; Isa 24:18; Mal 3:10).

Further the numerous other references to rain connect it with the clouds, as "I will also command the clouds that they rain no rain" (5 Rain (Isa 5:6), or in the Song of Deborah, "The clouds dropped water" (Jgs 5:4; see also Ps 77:17; 147:8; Prov 16:15; Ecle 12:2). The fantastic idea of solidly built cisterns in the sky furnished with sluices has no warrant in Scripture. So far from any such crude conception, there is a very clear and complete account of the atmospheric circulation. Eblis describes the process of condensation, the dew draweth up the drops of water, which distil in rain from his vapor, which the skies pour down and drop upon man abundantly (Job 36:27-28).

Jeremiah and the Psalmist repeat the description, "He causeth the vapes to ascend from the ends of the earth; he maketh lightnings

6. Clouds for the rain, and bringeth forth the wind out of his treasures." (Jer 10:13). By the foreshortening that clouds undergo in the distance they appear to be chiefly on the horizon, "at the ends of the earth," whence they move upward toward the zenith. Thus God "calleth for the waters of the sea, and poureth them out upon the face of the earth" (Am 9:6); and thus "All the rivers run into the sea, yet the sea is not full; unto the place whither the rivers go, thither they go again" (Ecle 1:7). Other references to the clouds in the Book of Job reveal not merely observation but acute reflection. "Dost thou know the balancings of the clouds, the wondrous works of him who is perfect in knowledge?" (Job 37:16) indicates a perception that the clouds float, each in its own place, at its own level, each perfectly balanced in the thin air.

(1) Meaning of the word; see MOVING WATER, meaning moving water, and hence the ocean, which is represented as being essentially one, exactly as we
now know it to be by actual exploration—"Let the waters under the heavens be gathered together unto one place" (Gen 1 9). And the earth was strethout "above the waters" (Gen 1:10). That is to say that the water surface lies lower than the land surface; and not only so, but, within the substance of the earth itself, there are inter-terranean waters which form a kind of ocean under ground. This also is called in Ezek 47:1 the 'deep', hophim; "The waters nourished it, the deep made it to grow." But in general hophim denotes the sea, as when Pharaoh's chosen captains were drowned in the Red Sea, "The deep covers them" (Ex 15 5). Indeed the word appears to be onomatopoetic derived from the "moaning" or "humming" of the sea; whilst erech, the "earth," seems intended to represent the "rattle" of shingle, "the scream of a maddened beach dragged down by the wave." G. B. WARD

ASTYAGES, as-ti'ajaz (Ararwma, Astiagis; or Astygas in Ktesias), or Astygan of Cyaxares, son of Cyaxares I, king of the Medes 585-550 BC, and predecessor of Cyrus (Bel ver 1): His wife was the daughter of Alyattes, king of Lydia. The daughter of Astyages (Astyga) was Mandane, who married Cyrus the Great. Astyages had given orders to expose the babe; but Harpagus, on whose task had been imposed, gave the child to a herdsman, with instructions to kill him when opened the boy, who had been brought up as his own by the herdsman, arrived at the age of twelve, Astyages discovered that he was the son of Mandane. The king in wrath then had the son of Harpagus killed and served to his father as food. This led to the feeling of hatred and resentment, and bided his time; and when the young Cyrus had grown to manhood, he stirred up the grandson in insurrection against Astyages, who was defeated and taken prisoner (Herodotus 1:27-30). When Astyages marched against the Persians, the Medes, under the command of Harpagus, deserted their king, and sided with the disappointed Persians; and Cyrus was crowned king. This account of Herodotus is confirmed by the Anabatic Tactlet of Cyrus (R.P. ser. ii, 150). The dektheron monarch was treated with kindness by his conqueror. According to Ktesias, a home was provided for him by Cyrus in Hyrcania.

Astyages was the last of the kings of the Manda (Media). An exceedingly shrewd man, Deceives by name, had founded the kingdom 150 years before (699-646). Pharsortes was the second in line (646-624), and Cyaxares the third (624-574). R. H. G.

ASUNDER, a-sun'dar: This word occurs 22 times in AV, 13 in OT and 9 in the NT. It is found in combination with break (twice), burst, cleave (twice), depart, cut (six times), divide (three times), drive, part, pluck, put (twice), rend, saw. These are the tr of 9 Heb, and 4 Greek words (1) (oipj, uparxein): Job, in reply to Eliaphaz, complaints about God, "I was at case, and he brake me asunder" (Job 16 12). (2) (pi1, nithlo): In Ps 2 the kings and rulers, meditating rebellion against Jeh and His anointed, say, "Let us break their bonds asunder" (Ps 2 3).

Burst asunder (kardos, laskos): This was the fate of Judas (Acts 1 18). Ps 69 21. (2) (nibh,f, nithba): The same root as of bikah, a valley, "The ground clave asunder" and swallowed up Dathan and Abiram with their households (Nu 16 31). (2) (pillab): Job complains of God, "He cleaveth my reins asunder" (Job 16 13).

Cut asunder (1) (lepsi, lepsi): The Lord "cut asunder the cords of the wicked" (Ps 129 4). The Heb word is used of cutting into wires or strips (Ex 39 3). (2) (gadho): "to cut off a branch or cut down a tree," "How is the hammer of the whole earth [Baby!] cut asunder!" (Jer 50 23). Zechariah "cut asunder" the staff "Beauty," signifying the breach of the covenant between Jeh and His people, and also the staff "Bands," signifying the breach of the brotherhood between Judah and Israel (Zec 11 10, 14). (3) (xoptoume, dichomolou): The fate of the Unfaithful Steward, lit. "cut in two," RV "severely scourge him" (Mt 21 41; Lk 12 14). See Part. Seabold.

Depart asunder (apokriwypomai, apochorizomai): Paul and Barnabas "departed asunder from one another" (Acts 15 39 AV); RV "parted asunder." Divide asunder (1) (merizomai, hibhdhal: Usually to separate, to make a division between. Here the reference is to the offering of pigeons or turtledoves (Lev 1 7; 8 8). (2) (merizp, merimn): From meriz, "to divide." The noun is abstract, "the act of dividing." The word of God pieces "even to the dividing of soul and spirit" (He 4 12).

Drive asunder (1) (ftll, hll): Lit. "to cause to tremble," "the jaws "loosen." God "drove asunder the nations" (Hab 3 6).

Part asunder (plhrrh, hprkth): With prep. ben, "between," "to separate." The chariot and horses of fire "parted asunder" Eljah and Elisha (2 K 3 11).

Pluck asunder (Spwrw, dhpdp): To bear asunder, to part forcibly; "Chains had been plucked asunder" by the demoniac of the Gerasenes (Mk 5 4 AV); RV "rent asunder.

Put asunder (wpwth, chrtos): To sever one from another. See the words of Jesus on divorce (Mt 19 6; Mk 10 9).

Rend asunder (ppm, nibbha): The same Heb word as "asunder." (1) "And No shall be rent asunder" (Ezk 30 16 AV); RV "broken up." (2) RV for AV "plucked asunder" (Mk 5 4).

Saw asunder (wpw, prq or pwp, prq): The fate of some on the roll of faith, "They were sawn asunder" (He 11 37). See also Punishments.

ASUPPIM, a-sup'im, HOUSE OF ASUPPIM (Ararwma, Asupim, Asup): AV "gatherings"; RV "the storehouses." In Neh 12 25, AV renders the same word thresholds (AV "treasuries, assemblies"). A storehouse most probably at the southern gate of the temple (1 Ch 25 16, 17; Neh 12 25).

ASUR, as'ur (Astart, Asor): RV for Assur in 1 Ed 5 31. Same as Harhar of Ez 2 51.

ASYLUM, a-syl'um: The custom of fleeing to specially sacred places to obtain the protection of a deity is found all over the world (Post, Grundriis, II, 252 f). In ancient Israel we meet with it in two forms—the asylum of the altar and the asylum of the cities of refuge. The altar at the House of
God was a place to which persons in danger fled for protection (1 K 1:50; 2:28). It had horns and must not be confused with the altars of earth or stone that were used for lay sacrifices. See A' TARI; SACRUTION. Ex 21:14 provides that a murderer is to be taken from the altar to be put to death. The law of the cities of refuge proceeds upon a somewhat different principle. Its objects are (1) to shield a homicide from the avenger of blood until trial, and (2) to provide a refuge for the manslayer who has not been guilty of murder. There is one reference to the institution in the history of the kingdom (2 S 14:14). For the legal and geographical information, see CITIES OF REFUGE; HOMICIDE. HAROLD M. WIENER

ATAD, a-tad (‘Atad, 'atadh, “a thorn”). See ABEK-MIZRAIM.

ATAR, a-tar (‘Atar, Atar); AV Jatal—Ater (Exr 2:42; Neh 7:45). The sons of A. (porters) returned with Zerubbabel to Jerusalem (1 Esd 5:28).

ATARAH, a-tar'a (‘Atarāh, ‘atārah, “crown”): One of Jerahmeel’s wives and mother of Omam (1 Ch 2:26).

ATARGATIS, a-tar'ga-tis (‘Artargātis, Artargātīs; RV wrongly ATARGATIS): Is stated in 2 Macc 12:28 to have been worshipped at Karnion, the Ashtaroth-Karnim of the OT (cf Ant, XII, viii, 4). The name is found on coins of Membid as Ἀτραγάτις, ‘Artara-tahat, where ‘Atar (i.e. Ashtaroth) is identified with the goddess ‘Atah, whose name is sometimes written Ἱττά, ‘At. ‘Atah or ‘Ati was also worshipped at Palmyra, and (according to Melito) in Adiabene. The compound Atargatis, often corrupted by the Greeks into Derketo, had her chief temples at Membid (Hierapolis) and Ashkelon where she was represented with the body of a woman and the tail of a fish, fish being sacred to her. She protected those who called her the Aphrodite Urania of the Greeks. ‘Ati may have been originally a Hittite goddess with whom the Assyr Istar (‘Atar) came afterward to be identified. A. H. SAYCE

ATAROTH, a-tar'oth, a-ta'roth (‘Atarāth, ‘Atārōth, “crowns,” or “wreaths”; ‘Aṭarōth, Aṭarōth): (1) A city E. of the Jordan, apparently in the territory given to Reuben, but built, or fortified, by the children of Gad (Nu 32:34). It is named along with Dibon, which is identified with Dhiba. Eight miles N.E. by N. of Dibon, on the S. of Wady Zerfāt Ma‘ān, stands Jebel ‘Ataratū, in which the ancient name is preserved. The city is doubtless represented by Khirbet ‘Aṭarās, about 4 miles W. of the mountain. (2) A place on the boundary between Ephraim and Benjamin, toward the W. (Josh 16:2). It seems to be the same as Ateroth-Addar of ver 5 and 18:13. It is probably to be identified with the modern el-Dārīsiyeh S. of neither Bethoron, and about 121 miles W. of Jerusalem.

(3) A place on the eastern frontier of Ephraim (Josh 16:7). This town has not been identified. Conder thinks it may be identified with el-Trāneh in the Jordan valley, or with Khirbet el-Ṭisayrāh. W. Ewing.

(2) The head of a family of porters who returned from Babylon to Jerusalem (Exr 2:42; Neh 7:45).

ATEREZAIAS, a-ter'e-za-as (‘Atēràzaias, ‘Ater Ṭēzaiḥ): Usually found in the abbreviated form Ater. Head of a Jewish family, which returned with Zerubbabel, under the decree of Cyrus. Mentioned (Exr 2:16) as sprung from Hezekiah. Their number is given as 98. Mentioned again as found in the register of the genealogies of the first returned exiles by Nehemiah (7:21). Again among those who sealed “the sure covenant” (Neh 10:17). Also found in 1 Esd 5:16, where the name is given variously as Ater or Aterezaias. The number of the family, given by Esdras, is 92.

ATERTAGIS, a-tēr'ga-tis. See ATERTAGIS.

ATEA, a-te'a (AV Tatäa; A, Ἀταρία, Ἀτάθ, B, om.): Head of a family of Levites; gatekeepers who returned from the captivity with Zerubbabel (1 Esd 8:28); called Hatitä in Exr 2:42; Neh 7:45.

ATHACH, a-thak (‘Aṭākh, ‘Athākh, “lodging-place”): One of the cities of Judah to which David sent from Ziklag the spoil of the Amalekites (1 S 30:30). Its site is unknown. Driver, Budde, and Wellhausen identify it with Ether (Jos 15:42).

ATHALIAH, a-thal'i-a (‘Aṭalāyā, ‘Aṭalāyāh; meaning uncertain, perhaps, “whom Jeh has afflicted”); 2 K 8:26; 11; 2 Ch 22:23, 24). (1) Daughter of Ahab and Jezabel, granddaughter of Omri, 6th king of Israel. In her childhood the political relations of the two kingdoms of Judah and Israel had, after many years of strife, become friendly, and she was married to Jehoram, eldest son of Jehoshaphat, king of Judah (2 K 8:18). The marriage was one of political expediency, and is a blot on the memory of Jehoshaphat. When Jehoram was 32 years of age, he succeeded to the throne, and Athaliah became queen of Judah. She inherited her mother’s strength of will, and like her developed a as Queen fanatical devotion to the cultus of the Zidonian Baal. Eliah’s blow at the worship of Baal in Samaria shortly before her accession to power did nothing to mitigate her zeal. It probably intensified it. The first recorded act of Jehoram’s reign is the murder of his six younger brothers; some princes of the realm, who were known to be favorable to the ancient faith of the nation, were also destroyed (2 Ch 21:4). There can be little doubt that these deeds of blood were supported, and perhaps instigated, by Athaliah, who was a much stronger character than her husband.

After eight years of royal life, Athaliah became a widow, and her son, Ahaziah, then 22 years of age (2 K 8:26; not 42 as in 2 Ch 22:2), ascended his father’s throne. As queen-mother, Athaliah was now supreme in the councils of the nation, as well
as in the royal palace. Within a single year, the young king fell (see Jeur), and the only persons who stood between Athaliah and the throne were her grandchildren. It is in such moments that ambitions, fired by fanaticism, sees its opportunity, and the matrix of the royal seed was determined on. This was carried out: but one of them, Jehoash, a babe, escaped by the intervention of his aunt, Jehesheba (1 K 11 2; 2 Ch 22 11).

The palace being cleared of its royal occupants, Athaliah had herself proclaimed sovereign. No other woman, before or since, sat upon the throne of David, and it is a proof of her energy and ability that, to spare the blood of her own family, she malefactors, and planted them in the place of the temple of Baal.

The high priest at this time was Jehoiada, who had married the daughter of Athaliah, Jehesheba (2 Ch 22 11). His promotion to the primacy led to the undoing of the usurper, as Jehoiada proved staunchly, and fearlessly, to the writing of which was named five captains who led the military rising (2 Ch 23 1). With the Book of K before him, it was not necessary to do more than extract from the ancient records such particulars as had neither been appeared. This is which has chiefly given rise to the charge of variations in the two narratives. See Jehoash.

At the time of the deposal, Athaliah was resident in the royal palace. When roused to a sense of danger by the acclaimations which greeted the coronation ceremony, she made an attempt to stay the revolt by rushing into the temple court, alone; her guards, according to Jos, having been prevented from following her (Ant. IX, vii, 3). A glance sufficed. It showed her the lad standing on a raised platform before the temple, holding the Book of the Law in his hands, and reading it, by his expression. The boy shook his robe and shouting, "Treason! Treason!" she fled. Some were for cutting her down as she did so, but this was objected to as defiling the temple with human blood. She was, therefore, allowed to reach the door of the palace in flight. Here she fell, smitten by the avenging guards.

Athaliah’s usurpation lasted for six years (2 K 11 3; 12 1; 2 Ch 22 12). Her 1st year synchronizes with the 1st of Jehu in Israel, and may be placed 846 BC (see note later). See Chronology of OT. The statement of 2 K 12 1 is here understood in the sense that Jehoash began his public reign in the 7th year of Jehu, and that he reigned 40 years counting from the time of his father’s death. A modern parallel is the dating of all official records and legal documents of the time of Charles II of England from the death of Charles I.

The only other reference to Athaliah is that above alluded to in 2 Ch 24 7, where she is spoken of as “that wicked woman.”

(2) A Benjamite who dwelt in Jerus (1 Ch 8 26 28).

(3) Father of Jeshaiah, who returned with Ezra (8 7); called Gofiothas in Apoc (1 Esd 8 33).

W. SHAW CALDECOTT

ATHANASIAN, ath-a-náz’han, CREED. See CREED.

ATHARIAS, ath-a-rí’as. See ATHARIAS.

ATHARIM, ath’a-rí’m (אַתָרִים, ‘athārîm): RV “The way of Atharim”; AV “The way of the spires.” RV regards Atharim as a place (so LXX). AV follows Syr and Tg, rendering Atharim as Ti Tarim = spires. Dillmann translates “the caravans path,” connecting it with Arab..thar’ī, “a track or footpath.” Here the king of Arad fought against Israel, taking some captives (Nu 21 1). See HORMAH.

ATHEISM, ath’ē-iz’m (άθεος, atheos, “without God” (Eph 2 12)): Ordinarily this word is interpreted to mean a denial of the existence of God, a disbelief in God, the opposite of theism. But it seems better that we should consider it under four heads, in order to obtain a clear idea of the different teachings in which it has been used.

(1) The classical.—In this sense it does not mean a denial of the existence of a Divine Being, but the denial of the existence or reality of the god of a particular nation. Thus the Christians were repeatedly charged with a theism, because of their disbelief in the gods of heathenism. It was not charged that they did not believe in any god, but that they denied the existence and reality of the gods worshiped, and before whom the nation hitherto had bowed. This was considered so great a crime, so dangerous a thing to the nation, that it was felt to be a just cause for most cruel and determined persecutions. Socrates’ teaching cast a shadow on the reality of the existence of the gods, and this charge was brought against him by his contemporaries. Cicero also uses the word in this sense in his charge against Diagoras of Athens. Indeed, such use of it is common in all classical literature.

(2) Philosophic.—It is not meant that the various philosophic systems to which this term is applied actually deny the existence of a Divine Being or of a First Cause, but that they are atheistic in their teaching, and tend to unsettle the faith of mankind in the existence of God. There is indeed a belief in a first cause, in force, in motion, in a certain aggregation of materials producing life, but the Divine Being as taught by theism is absolutely denied, as the Idealism of Fichte, of the Ideal Pantheism of Spinoza, the Natural Pantheism of Schelling, and similar forms of thought. In applying the word atheism to the teaching here given, theism does not intend to assimilate them as wholly without a belief in a Divine Being; but it affirms that God is a person, a self-conscious Being, not merely a first cause or force. To deny this fundamental affirmation of theism is to make the teaching atheistic, a denial of that which is essential to it. See Creeds, 11 3.

(3) Dogmatic.—It absolutely denies the existence of God. It has often been held that this is, in fact, impossible. Cousin has said, “It is impossible, because the existence of God is implied in every assertion.” It is true, however, in that in all ages there have been persons who declared themselves absolute atheists. Esp. is this true of the 18th cent.—a period of widespread skepticism—when not a few, particularly in France, professed themselves atheists. In many cases, however, it resulted from a loose use of the word, careless discussion, and sometimes from the spirit of boisterousness.

(4) Practical atheism.—It has nothing at all to do with belief. Indeed it accepts the affirmations of theism. It has reference wholly to the mode of life. It is to live as though there was no God.
It takes the form often of complete indifference to the claims of the Divine Being or again of outbroken and defiant wickedness (Ps 14:1). That this form of atheism is widely prevalent is well known. It is accompanied in many cases with some form of unbelief or prejudice or false opinion of the church or Christianity. Dogmatic atheism is no longer a menace or even a hindrance to the progress of Christianity, but practical atheism is widespread in its influence and a dangerous element in our modern life (cf Isa 31:1; Jer 2:17.18; 18:15). Whatever the form, whether it be that of religious agnosticism, denying that we can know that God exists, or critical atheism, denying that the evidence to prove His existence is sufficient, or dogmatic, or practical atheism, it is always a system of negation and as such tears down and destroys. It destroys the faith upon which all human relations are built. Since there is no God there is no right nor wrong, and human action is neither good nor bad, but convenient or inconvenient. It leaves human society without a basis for order and human government without foundation (Rom 1:10-32). All is hopeless, all is wretchedness, all is tending to the grave and the grave ends all.

Arguments against atheism may be summarized as follows: (1) It is contrary to reason. History has shown again and again how impossible it is to bring the mind to rest in this doctrine. Although Buddhism is atheistic in its teaching, idolatry is widespread in the lands where it prevails. While the Positive Philosophy of Auguste Comte was based on a denial of the existence of God, his attempt to found the new religion of humanity with rites and ceremonies of worship reveals how the longing for worship cannot be suppressed. It is a revelation of the fact so often seen in the history of human thought, that the mind cannot rest in the tenets of atheism.

(2) It is contrary to human experience. All history testifies that there are deep religious instincts within the human breast. To regard these as deceptive and unreasonable would itself be utterly unreasonable and unscientific. But the fact of such spiritual longing implies also that there is a being who is responsive to and can satisfy the cry of the heart (1 Co 11:6). In his Bampton Lectures Reville has said on this subject: "It would be irrational in the last degree to lay down the existence of such a need and such a tendency, and yet believe that the need corresponds to nothing, that the tendency has no goal."

(3) It fails to account for the evidence of design in the universe. See Cosmology.

(4) It fails to account for the existence of man and the world in general. Here is the universe: how did it come to be? Here is man: how is he to be accounted for? To these and like questions, atheism and atheistic philosophy have no adequate answer to give. See also Cosmology; Creation; God.

JACOB W. KAPP

ATHENOBUS, ath-e-nö'-bi-us ('Athé-nobios, Athénobios): A "friend" of Antiochus VII (Sidetes), who was sent to Jerus by the king to protest against the occupation of Joppa and Gazara, and the citadel Jerus. A demand was made on Simon Maccabaeus to give up all the places he had taken or pay 1,000 talents in silver. Simon declined to pay more than 100 talents, and Athenobus returned to Antiochus from his fruitless mission (1 Macc 15:28-30).

ATHENS, ath'-enz ('Athêna, Athênaí): In antiquity the celebrated metropolis of Attica, now the capital of Greece. Two long walls, 250 ft. apart, connected the city with the harbor (Piraeus). In Acts 17 we are told what Paul did during his single sojourn in this famous city. He came up from the sea by the new road (N. of the ancient) along which were altars of unknown gods, entered the city from the W., and passed by the Ceramicus (burial-ground), which can be seen to this day, the "Theseum," the best preserved of all Gr temples, and on to the Agora (Market-Place), just N. of the Acropolis, a steep hill, 200 ft. high, in the center of the city. Cimon began and Pericles completed

Acropolis and Areopagus, Athens.
the work of transforming this citadel into a sanctuary for the patron goddess of the city. The magnificent gateway (Propylaeæ), of which the Athenians were justly proud, was built by Mnesicles (437-432 BC). A monumental bronze statue by Phidias stood on the left, as one emerged on the plateau, and the mighty Parthenon a little farther on, to the right. In this temple was the famous gold and ivory statue of Athena. The eastern pediment contained sculptures representing the birth of the goddess (Elgin Marbles, now in the British Museum), the western depicting her contest with Poseidon for supremacy over Attica. This, the most celebrated edifice, architecturally, in all history, was partially destroyed by the Venetians in 1687. Other temples on the Acropolis are the Erechtheum and the "Wingless Victory." In the city the streets were exceedingly narrow and crooked. The wider avenues were called plateiai (πλατείαι), whence Eng. "place," Spanish "plaza." The roofs of the houses were flat. In and around the Agora were many porticoes (stoa). In the Sloa Poecile ("Painted Portico"), whose walls were covered with historical paintings, Paul met with the successors of Zeno, the Stoics, with whom he disputed daily. In this vicinity also was the Senate Chamber for the Council of Five Hundred, and the Court of the Areopagus, whither Socrates came in 399 BC to face his accusers, and where Paul, five cents. later, preached to the Athenians the unknown God. In this neighborhood also were the Tower of the Winds and the water-clock, which must have attracted Paul’s attention, as they attract our attention today. The apostle disputed in the synagogue with the Jews (Acts 17 17), and a slab found at the foot of Mount Hymettus (a range to the E. of the city, 3,000 ft. high), with the inscription αὐτὴ ἡ τούθη ῥόδον ῥυόν, δίκαιον εὐδελεύοντα ἐν ἀντισ (Ps 118 20), was once thought to indicate the site, but is now believed to date from the 3d or 4th cent. Slabs bearing Jewish inscriptions have been found in the city itself.

The population of Athens was at least a quarter of a million. The oldest inhabitants were Pelasgians. Cecrops, the first traditional king, came from Egypt in 1556 BC, and by marrying the daughter of Ateaon, established the sovereignty. The first king was Erechtheus. Theseus united the twelve communities of Attica and made Athens the capital. After the death of Codrus in 1068 BC, the governing power was intrusted to an archon who held office for life. In 733 the term of office was limited to ten years. In 683 nine archons were chosen for a term of one year. Draco's laws, "written in blood," were made in 620. Solon was chosen archon in 594 and gave the state a constitution. The tyrant Pisistratus in the control permanently from 541 to 527; his son Hipparchus was assassinated in 514. Cleisthenes changed the constitution and introduced the practice of ostracism. In 490 the Athenians defeated the Persians at Marathon, and again in 480 at Salamis. In 476 Aristides organized the great Athenian Confedera. After his death Conon became the leader of the conservative party; and when the general Cinna was killed, Pericles became the leader of the people. In 431 the Peloponnesian War broke out and continued till 404, when Athens succumbed to Sparta. An oligarchical government was set up with Critias and Theramenes at the head. War broke out again but peace was restored by the pact of Antalcidas (357 BC). In the Sacred War (357-355) Athens exhausted her strength. When Philip of Macedon began to interfere in Gr affairs, Athens could neither resolve on war measures (to which the oratory of Demosthenes incited her), nor make terms with Philip. Finally, she joined Thebes in making a joint appeal to her resistance, but in spite of her heroic efforts at Chaeronea, she suffered defeat (338). Philip was murdered in 336, and Alexander the Great became master. After the subjugation of Greece by the Romans, Athens was placed under the supervision of the governor of Macedonia, but was granted local independence in recognition of her great history. As the seat of Gr art and science, Athens played an important role even under Rom sway—she became the university city of the Rom world, and from her radiated spiritual light and intellectual energy to Tarsus, Antioch and Alexandria. Philo, the Jew, declares that the Athenians were ἐλληνικά δυνατάτατοι βασιλείαν ("keenest in intellect") and adds that Athens was to Greece what the pupil is to the eye, or reason to the soul. Although the city had lost her real independence, the people retained their old characteristics: they were still interested in art, literature and philosophy. Paul may possibly have attended the theater of Dionysus (on the west cliff of the Acropolis) and witnessed a play of the Gr poets, such as Euripides or Menander. Many gifts were received from foreign monarchs by Athens. Attalus I of Pergamum endowed the Academy, Eumenes added a splendid Stoa to the theater and Antiochus Epiphanes began the Olympeum (15 columns of which are still standing), the massive sub-base of which had been constructed by Pisistratus. Athens became a favorite residence for those who wished to cultivate the cultivated history, geography and literature. Horace, Brutus and Cassius sojourned in the city for some time. Jos declares that the Athenians were the most god-fearing of the Greeks (εὐπλησθείσαι τῶν Ἐλλή- νων). Cf. Lkry xiv.27.

LITERATURE—See Wordsworth, Athens and Athens; Butler, Story of Athens; Ernest Gardner, Ancient Athens; Hackett, Life in Ancient Athens; A. Momigliano, Life of the Early Christian Women; Conybeare and Howson, Life and Epistles of St. Paul; ch. x; Gregorovius, Stadt Athen im Mittelalter; Leake, Greece, Thrace, Carthage, Ceylon and Passannas' Athens, recently edited by Carroll (Ginn & Co.), or in the large work of Frazer.

J. F. HARRY

ATHLAI, athlai (Ἀθλαί, athlay, "afflicted[?]"), a Jew, the son of Bebai, who was influenced by Ezra to put away his wife (Ezr 10 28).

ATIPHA, at-i'fa. See HATIPHA.
AT ONE (eis εἰρήνην, eis eirēnēn, "at one," "at peace"); "Set them at one again" (Acts 7:26), the reconciliation of persons at variance. From this adv. we have the words "atoné" and "atonement."

ATONEMENT, a-tōn'ment: Translates ἁπάντωσις, kāphar; נָאַת, hādā; כָּפָר, rācaḥ, the last employed only of human relations (1 S 29:4); translates the following Gr stems kīdōs, simple and compounded with various preps.; ἄλλος in composition only, but with various preps. and even two at a time, e.g. Mt 5:24; ἱπ' (rarely) (Dnl 9:24).

1. Terms Employed.—The root meanings of the Heb words, taking them in the order cited above, are, to "cover," hence expiate, con.

2. Heb. and done, cancel, placate; to "offer," or Gr Words "receive a sin offering," hence make atonement, appease, propitiate; "ef.

3. The Eng. word, Atonement, does not correspond etymologically with any Heb or Gr word which it translates. Fur.

4. Not to Be Settled by Lexicon Merely

5. Notes

(a) The most frequently employed Heb word, kāphar, is found in the Prophets only in the priestly section (Ezk 45:13-20; Dnl 9:24) where EV has "make reconciliation," as the purge away. Furthermore it is not found in Dt, which is the prophetic book of the Pent. (Hex). This indicates that it is an essentially priestly conception. The same term is frequently tr' by "reconcile," construed as equivalent to "make atonement." (Lev 6:30; 8:15; 10:20; 1 S 29:4; Ezek 15:20; Dnl 9:24). In this latter sense it connects itself with hādā. In 2 Ch 29:24 both words are used: the priests make a sin offering (hādā) to effect an atonement (kāphar). But the first word is frequently used by metonymy to include, at least suggestive, the end of the reconciliation; and, on the other hand, the latter word is so used as to involve, also, doing that by which atonement is realized.

(b) Of the Gr words employed ἱλασθαι means "to reach a prosperous" (He 2:17; Lev 6:30; 16:20; Ezek 45:20); ἀλλάτισθαι, used however only in composition with preps., means "to render other," "to restore" to another (former?) condition of harmony (of Mt 6:24 = "to be reconciled" to a former condition of making an acceptable sacrifice to God).

(c) In the Eng. NT the word "atonement" is found only at Rom 5:11 and the ARR changes this to "reconciliation." While in strict etymology this word signifies only the active or conscious exercise of unity of life or harmony of relations, the causative idea probably belongs to the original use of the term, as it certainly is present in all current Christian use of the term. As employed in Christian theology, both practical and technical, the term includes with more or less distinctness: (a) the fact of union with God, and this always looked upon as (b) a broken union to be restored or an ideal union to be realized, (c) the procuring cause of atonement, variously described, (d) the critical act wherein the union is effected, the work of God and the response of the soul in which the union becomes actual. Inasmuch as the reconciliation between Abraham and God is always conceived as so effected through Jesus Christ (2 Cor 5:18-21) the expression, "the Atonement of Christ," is one of the most frequent in Christian theology. Questions and controversies have turned mainly on the procuring cause of atonement, (c) above, and at this point have arisen the various "theories of the Atonement."

II. Bible Teaching concerning Atonement in General.—The Atonement of Christ must be interpreted in connection with the atonement in general in the Scriptures. This idea of atonement is, moreover, part of the general circle of fundamental ideas of the religion of Jeh and Jesus. Theories of the Atonement root themselves in conceptions of the nature and character of God, His holiness, love, grace, mercy, etc. of man, his nature, disposition and capacities; of sin and guilt.

The basal conception for the Bible doctrine of atonement is the assumption that God and man are ideally related to life and interests so far as true life and interest may be conceived as corresponding with those of God. Hence it is every-
Atonement
